Subject: where's the accessibility?
Date: 04/15/2010 11:18 AM

It's great that the Election Assistance Commission is proposing a pilot program to provide Internet voting to US citizens overseas, but - big oversight - you forgot to mention the need for system accessibility for people using assisstive technologies or who have disabilities!! Also, your web site isn't accessible for people using assisstive technology (get rid of all the "click here" links; links should always be descriptive).
