

# Alaska Center for Energy and Power

ALASKA DEPARTMENT OF LABOR  
& WORKFORCE DEVELOPMENT

***Are you looking to put your mechanical engineering skills to use in the field of renewable energy?***

*Then apply to join the Pacific Marine Energy Center at the University of Alaska Fairbanks as a mechanical engineer!*

**I**n this role you will support university research, development and demonstration projects in both engineering and project management activities. As a part of the hydrokinetic energy research program at ACEP, your work will specialize in research and the development of energy systems that extract kinetic energy from flowing water to generate energy for microgrid applications. Join our team to work on energy research and development (R&D) throughout Alaska's waters while getting to enjoy the variety of landscapes throughout the state!

**This position is expected to travel to remote areas of Alaska three to four times a year.**

As a public, regional, comprehensive university, UA is committed to building a culturally diverse and inclusive organization and strongly encourages women, minorities, members from marginalized communities, individuals with disabilities, and veterans to apply. UA is an affirmative action/equal opportunity employer, educational institution and provider and prohibits illegal discrimination against any individual:
