TO THE
MEMORY
OF
WILLIAM ROBERTSON SMITH

P R E F A C E

THE idea of preparing a new Dictionary of the Bible on critical lines for the benefit of all serious students, both professional and lay, was prominent in the mind of the many-sided scholar to whose beloved memory the present volume is inscribed. It is more than twelve years since Prof. Robertson Smith began to take steps towards realising this idea. As an academical teacher he had from the first been fully aware of the importance of what is known as Biblical Encyclopædia, and his own earliest contributions to the subject in the *Encyclopædia Britannica* carry us as far back as to the year 1875. If for a very brief period certain untoward events arrested his activity in this direction, the loss of time was speedily made up, for seldom perhaps has there been a greater display of intellectual energy than is given in the series of biblical articles signed 'W. R. S.' which appeared in the *Encyclopædia Britannica* between 1875 and 1888. The reader who is interested in Bible study should not fail to examine the list, which includes among the longer articles BIBLE, CANTICLES, CHRONICLES, DAVID, HEBREW LANGUAGE, HOSEA, JERUSALEM, JOEL, JUDGES, KINGS, LEVITES, MALACHI, MESSIAH, MICAH, PHILISTINES, PRIEST, PROPHET, PSALMS, SACRIFICE, TEMPLE, TITHES, ZEPHANIAH: and among the shorter, ANGEL, ARK, BAAL, DECALOGUE, ELI, EVE, HAGGAI, LAMENTATIONS, MELCHIZEDEK, MOLOCH, NABATÆANS, NAHUM, NAZARITE, NINEVEH, OBADIAH, PARADISE, RUTH, SABBATH, SADDUCEES, SAMUEL, TABERNACLE, VOW.

Nor should the students of our day overlook the service which this far-seeing scholar and editor rendered to the nascent conception of an *international* biblical criticism by inviting the co-operation of foreign as well as English contributors. That names like those of Nöldeke, Tiele, Welhausen, Harnack, Schürer, Gutschmid, Geldner, appeared side by side with those of well-known and honoured British scholars in the list of contributors to the *Encyclopædia* was a guarantee of freedom from dangerous eccentricity, of comprehensiveness of view, of thoroughness and accuracy of investigation.

Such a large amount of material illustrative of the Bible, marked by unity of aim and consistency of purpose, was thus brought together that the *Encyclopædia Britannica* became, inclusively, something not unlike an *Encyclopædia Biblica*. The idea then occurred to the editor and his publishers to republish, for the guidance of students, all that might be found to have stood the test of time, the lacunæ being filled up, and the whole brought up, as far as possible, to the high level of the most recent scholarship. It was not unnatural to wish for this; but there were three main opposing considerations. In the first place, there were other important duties which made pressing demands on the time and energy of

the editor. Next, the growing maturity of his biblical scholarship made him less and less disposed to acquiesce in provisional conclusions. And lastly, such constant progress was being made by students in the power of assimilating critical results that it seemed prudent to wait till biblical articles, thoroughly revised and recast, should have a good chance of still more deeply influencing the student world.

The waiting-time was filled up, so far as other occupations allowed, by pioneering researches in biblical archæology, some of the results of which are admirably summed up in that fruitful volume entitled *The Religion of the Semites* (1889). More and more, Robertson Smith, like other contemporary scholars, saw the necessity of revising old work on the basis of a more critical, and, in a certain sense, more philosophical treatment of details. First of all, archæological details had their share—and it was bound to be a large share—of this scholar's attention. Then came biblical geography—a subject which had been brought prominently into notice by the zeal of English explorers, but seemed to need the collaboration of English critics. A long visit to Palestine was planned for the direct investigation of details of biblical geography, and though this could not be carried out, not a little time was devoted to the examination of a few of the more perplexing geographical problems and of the solutions already proposed (see *e.g.* APHEK, below, col. 191*f.*). This care for accuracy of detail as a necessary preliminary to a revision of theories is also the cause of our friend's persistent refusal to sanction the republication of the masterly but inevitably provisional article BIBLE in the *Encyclopædia Britannica*, to which we shall return later. The reader will still better understand the motive of that refusal if he will compare what is said on the Psalter in that article (1875) with the statements in the first edition of *The Old Testament in the Jewish Church* (1880), in the *Encyclopædia Britannica*, article PSALMS (1885), and in the second edition of *The Old Testament in the Jewish Church* (1892).

It is only just, however, to the true 'begetter' of this work to emphasise the fact that, though he felt the adequate realisation of his idea to be some way off, he lost no time in pondering and working out a variety of practical details—a task in which he was seconded by his assistant editor and intimate friend, Mr. J. S. Black. Many hours were given, as occasion offered, to the distribution of subjects and the preparation of minor articles. Some hundreds of these were drafted, and many were the discussions that arose as to the various difficult practical points, which have not been without fruit for the present work.

In September, 1892, however, it became only too clear to Prof. Smith that he was suffering from a malady which might terminate fatally after no very distant term. The last hope of active participation in his long-cherished scheme of a Bible Dictionary had well-nigh disappeared, when one of the present editors, who had no definite knowledge of Prof. Smith's plan, communicated to this friend of many years' standing his ideas of what a critical Bible Dictionary ought to be, and inquired whether he thought that such a project could be realised. Prof. Smith was still intellectually able to consider and pronounce upon these ideas, and gladly recognised their close affinity to his own. Unwilling that all the labour already bestowed by him on planning and drafting articles should be lost, he requested Prof. Cheyne to take up the work which he himself was compelled to drop, in conjunction with the older and more intimate friend already mentioned. Hence the combination of names on the title-page. The work is undertaken by the editors as a charge from one whose parting message had the force of a command.

Such is the history of the genesis of the *Encyclopædia Biblica*, which is the result primarily of a fusion of two distinct but similar plans—a fusion desired by Prof. Robertson Smith himself, as the only remaining means of realising adequately his own fundamental ideas. With regard to details, he left the editors entirely free, not from decline of physical strength, but from a well-grounded confidence that religion and the Bible were not less dear to them than to himself, and that they fully shared his own uncompromisingly progressive spirit. The Bible Dictionary which he contemplated was no mere collection of useful miscellanea, but a survey of the contents of the Bible, as illuminated by criticism—a criticism which identifies the cause of religion with that of historical truth, and, without neglecting the historical and archaeological setting of religion, loves best to trace the growth of high conceptions, the flashing forth of new intuitions, and the development of noble personalities, under local and temporal conditions that may often be, to human eyes, most adverse. The importance of the newer view of the Bible to the Christian community, and the fundamental principles of the newer biblical criticism, have been so ably and so persuasively set forth by Prof. Robertson Smith in his Lectures that his fellow-workers may be dispensed from repeating here what he has said so well already. ‘There remaineth yet very much land to be possessed.’ Let us assume, then, that the readers of this *Encyclopædia*, whatever be their grade of knowledge or sphere of work, are willing to make an effort to take this widely extended land in possession.

Every year, in fact, expands the narrow horizons which not so long ago limited the aspirations of the biblical scholar. It is time, as Prof. Robertson Smith thought, to help students to realise this, and to bring the standard books on which they rely more up to date. It may seem hopeless to attempt this with an alphabetically arranged encyclopædia, which necessarily involves the treatment of points in an isolated way. By an elaborate system of cross references, however, and by interspersing a considerable number of comprehensive articles (such as, in Part I, APOCALYPTIC LITERATURE, CAINITES, DRAGON), it has been sought to avoid the danger of treating minute details without regard to their wider bearings. Many of the minor articles, too, have been so constructed as to suggest the relation of the details to the larger wholes. Altogether the minor articles have, one ventures to hope, brought many direct gains to biblical study. Often the received view of the subject of a ‘minor article’ proved to be extremely doubtful, and a better view suggested itself. Every endeavour has been used to put this view forward in a brief and yet convincing manner, without occupying too much space and becoming too academic in style. The more comprehensive articles may here and there be found to clash with the shorter articles. Efforts, however, have been made to mitigate this by editorial notes in both classes of articles.

It will also doubtless be found that on large questions different writers have sometimes proposed different theories and hypotheses. The sympathies of the editors are, upon the whole, with what is commonly known as ‘advanced’ criticism, not simply because it is advanced, but because such criticism, in the hands of a circumspect and experienced scholar, takes account of facts and phenomena which the criticism of a former generation overlooked or treated superficially. They have no desire, however, to ‘boycott’ moderate criticism, when applied by a critic who, either in the form or in the substance of his criticism, has something original

to say. An 'advanced' critic cannot possibly feel any arrogance towards his more 'moderate' colleague, for probably he himself held, not very long ago, views resembling those which the 'moderate' critic holds now, and the latter may find his precautionary investigations end in his supporting, with greater fulness and more complete arguments, as sound the views that now seem to him rash. Prof. Robertson Smith's views of ten years ago, or more, may, at the present day, appear to be 'moderate' criticism; but when he formulated them he was in the vanguard of critics, and there is no reason to think that, if he had lived, and devoted much of his time to biblical criticism, his ardour would have waned, and his precedence passed to others.

There are, no doubt, some critical theories which could not consistently have been represented in the present work; and that, it may be remarked, suggests one of the reasons why Prof. Robertson Smith's early *Encyclopædia Britannica* article, BIBL.E., could not have been republished, even by himself. When he wrote it he was still not absolutely sure about the chronological place of P (Priestly Code). He was also still under the influence of the traditional view as to the barrenness and unoriginality of the whole post-exilic period. Nor had he faced the question of the post-exilic redaction of the prophetic writings. The fundamental principles of biblical criticism, however, are assumed throughout that fine article, though for a statement of these we must turn to a more mature production of his pen. See, for example, *The Old Testament in the Jewish Church*⁽²⁾, pp. 16 ff. (cp 1st ed. pp. 24 ff.), and notice especially the following paragraph on p. 17:—

'Ancient books coming down to us from a period many centuries before the invention of printing have necessarily undergone many vicissitudes. Some of them are preserved only in imperfect copies made by an ignorant scribe of the dark ages. Others have been disfigured by editors, who mixed up foreign matter with the original text. Very often an important book fell altogether out of sight for a long time, and when it came to light again all knowledge of its origin was gone; for old books did not generally have title-pages and prefaces. And, when such a nameless roll was again brought into notice, some half-informed reader or transcriber was not unlikely to give it a new title of his own devising, which was handed down thereafter as if it had been original. Or again, the true meaning and purpose of a book often became obscure in the lapse of centuries, and led to false interpretations. Once more, antiquity has handed down to us many writings which are sheer forgeries, like some of the Apocryphal books, or the Sibylline oracles, or those famous Epistles of Phalaris, which formed the subject of Bentley's great critical essay. In all such cases the historical critic must destroy the received view, in order to establish the truth. He must review doubtful titles, purge out interpolations, expose forgeries; but he does so only to manifest the truth, and exhibit the genuine remains of antiquity in their real character. A book that is really old and really valuable has nothing to fear from the critic, whose labours can only put its worth in a clearer light, and establish its authority on a surer basis.'

The freedom which Prof. Robertson Smith generously left to his successors has, with much reluctance, yet without hesitation, on the part of the editors, been exercised in dealing with the articles which he wrote for the *Encyclopædia Britannica*. The editors are well assured that he would have approved their conduct in this respect. Few scholars, indeed, would refrain from rewriting, to a large extent, the critical articles which they had produced some years previously; and this, indeed, is what has been done by several contributors who wrote biblical articles for the former Encyclopædia. The procedure of those who have revised our friend's articles has in fact been as gentle and considerate as possible. Where these articles seemed to have been destined by himself for some degree of per-

manence, they have been retained, and carefully revised and brought up to date. Some condensation has sometimes been found necessary. The original articles were written for a public very imperfectly imbued with critical principles, whereas now, thanks to his own works and to those of other progressive scholars, Bible students are much more prepared than formerly to benefit by advanced teaching. There is also a certain amount of a new material from Prof. Smith's pen (in two or three cases consisting of quotations from the MS of the second and third courses of Burnett Lectures), but much less, unfortunately, than had been expected.

Freedom has also been used in taking some fresh departures, especially in two directions — viz., in that of textual criticism of the Old Testament, and in that of biblical archæology. The object of the editors has been, with the assistance of their contributors, not only to bring the work up to the level of the best published writings, but, wherever possible, to carry the subjects a little beyond the point hitherto reached in print. Without the constant necessity of investigating the details of the text of the Old Testament, it would be hard for any one to realise the precarious character of many details of the current biblical archæology, geography, and natural history, and even of some not unimportant points in the current Old Testament theology. Entirely new methods have not indeed been applied; but the methods already known have perhaps been applied with somewhat more consistency than before. With regard to archæology, such a claim can be advanced only to a slight extent. More progress perhaps has been made of late years in the field of critical archæology than in that of textual criticism. All, therefore, that was generally necessary was to make a strong effort to keep abreast of recent archæological research both in Old Testament and in New Testament study.

The fulness of detail with which the data of the Versions have been given may provoke some comment. Experience has been the guide of the editors, and they believe that, though in the future it will be possible to give these data in a more correct, more critical, and more condensed form, the student is best served at present by being supplied as fully as possible with the available material. It may also be doubted by some whether there is not too much philology. Here, again, experience has directed the course to be pursued. In the present transitional stage of lexicography, it would have been undesirable to rest content with simply referring to the valuable new lexicons which are now appearing, or have already appeared.

With regard to biblical theology, the editors are not without hope that they have helped to pave the way for a more satisfactory treatment of that important subject which is rapidly becoming the history of the movement of religious life and thought within the Jewish and the Christian church (the phrase may be inaccurate, but it is convenient). Systems of Prophetic, Pauline, Petrine, Johannine theology have had their day; it is perhaps time that the Bible should cease to be regarded as a storehouse of more or less competing systems of abstract thought. Unfortunately the literary and historical criticism of the New Testament is by no means as far advanced as that of the Old Testament. It may not be long before a real history of the movement of religious life and thought in the earlier period will be possible. For such a history for the later period we shall have to wait longer, if we may infer anything from the doubtless inevitable defects of the best existing handbook of New Testament theology, that of the able veteran critic, H. J. Holtzmann. The editors of the present work are keenly interested in the subject at

present called 'Biblical Theology'; but, instead of attempting what is at present impossible, they have thought it better to leave some deficiencies which future editors will probably find it not difficult to supply. They cannot, however, conclude this section without a hearty attestation of the ever-increasing love for the Scriptures which critical and historical study, when pursued in a sufficiently comprehensive sense, appears to them to produce. The minutest details of biblical research assume a brightness not their own when viewed in the light of the great truths in which the movement of biblical religion culminates. May the reader find cause to agree with them! This would certainly have been the prayerful aspiration of the beloved and lamented scholar who originated this *Encyclopædia*.

To the contributors of signed articles, and to those who have revised and brought up to date the articles of Prof. Robertson Smith, it may seem almost superfluous to render thanks for the indispensable help they have so courteously and generously given. It constitutes a fresh bond between scholars of different countries and several religious communities which the editors can never forget. But the special services of the various members of the editorial staff require specific acknowledgment, which the editors have much pleasure in making. Mr. Hope W. Hogg became a contributor to the *Encyclopædia Biblica* in 1894, and in 1895 became a regular member of the editorial staff. To his zeal, energy, and scholarship the work has been greatly indebted in every direction. In particular, Mr. Hogg has had the entire responsibility for the proofs as they passed in their various stages through the hands of the printer, and it is he who has seen to the due carrying out of the arrangements—many of them of his own devising—for saving space and facilitating reference that have been specified in the subjoined 'Practical Hints to the Reader.' Mr. Stanley A. Cook joined the staff in 1896, and not only has contributed various signed articles, which to the editors appear to give promise of fine work in the future, but also has had a large share in many of those that are of composite authorship and unsigned. Finally, Mr. Maurice A. Canney joined the staff in 1898; he also has contributed signed articles, and has been eminently helpful in every way, especially in the reading of the proofs. Further, the editors desire to acknowledge their very special obligations to the Rev. Henry A. Redpath, M.A., editor of the *Concordance to the Septuagint*, who placed his unrivalled experience at their disposal by controlling all the proofs at a certain stage with special reference to the LXX readings. He also verified the biblical references.

T. K. CHEYNE.

J. SUTHERLAND BLACK.

20th September 1899.

PRACTICAL HINTS TO THE READER

Further Explanations.—The labour that has been bestowed on even minor matters in the preparation of this *Encyclopædia* has seemed to be warranted by the hope that it may be found useful as a students' handbook. Its value from this point of view will be facilitated by attention to the following points:—

1. Classes of Articles.—The following notes will give a general idea of what the reader may expect to find and where to look for it:—

i. *Proper Names.*—Every proper name in the Old and the New Testament canons and the OT Apocrypha (Authorised Version or Revised Version, text or margin) is represented by an article-heading in Clarendon type, the substantive article being usually given under the name as found in the AV text. *Adoraim*, on the same line as ADORA (col. 71), and *Adullamite*, three lines below ADULLAM (col. 73), are examples of space-saving contrivances.

ii. *Books.*—Every book in the OT and the NT canons and the OT Apocrypha is discussed in a special article—*e.g.* Acts, Chronicles, Deuteronomy. The 'Song of Solomon' is dealt with under the title CANTICLES, and the last book in the NT under APOCALYPSE.

iii. *General Articles.*—With the view, amongst other things, of securing the greatest possible brevity, many matters have been treated in general articles, the minor headings being dealt with concisely with the help of cross-references. Such general articles are: ABI AND AHI, NAMES IN AGRICULTURE, APOCALYPTIC LITERATURE, APOCRYPHA, ARMY, BAKEMEATS, BREAD, CANON, CATTLE, CHRONOLOGY, CLEAN AND UNCLEAN, COLOURS, CONDUITS, CUTTINGS OF THE FLESH, DISPERSION, DIVINATION, DRESS.

iv. *Other Subjects.*—The following are examples of important headings:—ADAM AND EVE, ANGELS, ANTICHRIST, BLESSINGS AND CURSINGS, CHRISTIAN, NAME OF, CIRCUMCISION, COMMUNITY OF GOODS, COUNCIL OF JERUSALEM, CREATION, DELUGE, DEMONS, DRAGON.

v. *Things.*—The *Encyclopædia Biblica* is professedly a dictionary of things, not words, and a great effort has been made to adhere rigidly to this principle. Even where at first sight it seems to have been neglected, it will generally be found that this is not really the case. The only way to tell the English reader what has to be told about (*e.g.*) CHAIN is to distinguish the various things that are called, or should have been called, 'chain' in the English Version, and refer him to the articles where they are dealt with.

vi. *Mere Cross-references* (see above, 1, i.; and below, 2).

2. Method of Cross-References.—A very great deal of care has been bestowed on the cross-references, because only by their systematic use could the necessary matter be adequately dealt with within the limits of one volume. They have made possible a conciseness that is not attained at the expense of incompleteness, repetition of the same matter under different headings being reduced to a minimum. For this reason the articles have been prepared, not in alphabetical order, but simultaneously in all parts of the alphabet, and have been worked up together constantly and kept up to date. The student may be assured, therefore, that the cross-references have not been inserted at random; they have always been verified. If any be found to be unwarranted (no such is known), it must be because it has been found necessary, after the reference was made, to remove something from the article referred to to another article. The removed matter will no doubt be represented by a cross-reference (cp, *e.g.*,).

The method of reference employed is as follows:—

i. *Identification of Article.* (a) *Long Names.*—To save space long headings have been curtailed in citations—*e.g.*, APOCALYPTIC LITERATURE is cited as APOCALYPTIC.

(b) *Synonymous Articles.*—Persons of the same name or places of the same name are ranged as 1, 2, 3, etc., under a common heading and cited accordingly. In other cases (and even in the former case when, as in ADNAH in col. 67, one English spelling represents different

Hebrew spellings (the articles usually have separate headings, in which case they are cited as i., ii., iii., etc., although they are not so marked. Usually geographical articles precede biographical, and persons precede books. Thus SAMUEL i., 2 is the second person called Samuel; SAMUEL ii. is the article SAMUEL, BOOKS OF. If a wrong number should be found the reason is not that it was not verified, but that the article referred to is one of a very small number in which the original order of the articles had to be changed and the cross-reference was not detected. Thus in the article ALUSH the reference to BERED ii., 1. ought to be to BERED i., 1.

ii. *Indication of Place in Article Cited.*—Articles of any length are divided into numbered sections (§§ 1, 2, etc.) indicated by insets containing a descriptive word or phrase. As convenience of reference is the great aim, the descriptive phrases are limited to, at most, three or four words, and the sections are numbered consecutively. Logical subordination of sections, therefore, cannot appear. Divisions larger than sections are sometimes indicated in the text by I., II., etc., and subdivisions of sections by letters and numbers (*a, b, c, a. β, γ, i, ii, iii.*). References like (BENJAMIN, § 9, ii. β) are freely used. Most of the large articles have prefixed to them a table of contents.

iii. *Manner of Citation.*—The commonest method is (see DAVID, § 11, (c) ii.). EZRA (*q.v.*, ii. § 9) means the article EZRA-NEHEMIAH, BOOK OF, § 9. Sometimes, however, the capitals or the *q.v.* may be dispensed with. CHAIN printed in small capitals in the middle of an article would mean that there is an article on that term, but that it hardly merits *q.v.* from the present point of view. In articles (generally on RV names) that are mere cross-references *q.v.* is generally omitted; so, *e.g.*, in ABADIAS in col. 3.

3. **Typographical Devices.** i. *Size of Type.*—(a) *Letters.*—Two sizes of type are used, and considerable care has been devoted to the distribution of the small-type passages. Usually the general meaning of an article can be caught by reading simply the large-type parts. The small-type passages generally contain such things as proofs of statements, objections, more technical details. In these passages, and in footnotes and parenthesis, abbreviations (see below, 8), which are avoided as much as possible elsewhere, are purposely used. (b) *Numbers.*—Two sizes of Arabic numerals are used. (Note that the smallest 6 and 8 are a different shape from the next larger 6 and 8). In giving references, when only the volume is given, it is usually cited by a Roman number. Pages are cited by Arabic numbers except where (as is often the case) pages of a preface are marked with Roman numbers. When numbers of two ranks are required, two sizes of Arabic numbers (5₅) are used irrespectively of whether the reference be to book and chapter, volume and page, or section and line. If three ranks are needed, Roman numbers are prefixed (v. 5₅).

ii. *Italics.*—Italic type is much used in citing foreign words. In geographical articles, as a rule, the printing of a modern place-name in italics indicates that the writer of the article identifies it with the place under discussion. For the significance of the different kinds of type in the map of Assyria see the explanations at the foot of the map. On the two kinds of Greek type see below, 4 ii. (b).

iii. *Small Capitals.*—Small Roman capitals are used in two ways: (1) in giving the equivalent in RV for the name in AV, or *vice versa*, and (2) in giving a cross-reference (see above, 2 iii.). On the use of small italic capitals see below, 4 ii. (b).

iv. *Symbols.*—(a) *Index Figures.*—In ‘almost always’ clear; ‘6’ indicates footnote 6. In ‘Introd.⁽⁶⁾’, ‘(6)’ means sixth edition. In ‘D₂’, ‘2’ means a later development of D (see below,).

(b) *Asterisk.*—B* means the original scribe of codex B. **conho* means that the consonants are known but the vowels are hypothetical. v. 5* means v. 5 (partly).

(c) *Dagger.*—A dagger † is used to indicate that all the passages where a word occurs are cited. The context must decide whether the English word or the original is meant.

(d) *Sign of Equality.*—‘AALAR, 1 Esd. 5₃₆ AV = Ezra 2₅₉ IMMER, i.’ means that the two verses quoted are recensions of the same original, and that what is called Aalar in the one is called Immer in the other, as will be explained in the first of the articles entitled IMMER.

(e) *Sign of Parallelism.*—|| is the adjective corresponding to the verb =. Thus ‘Aalar of 1 Esd. 5₃₆ AV appears as Immer in || Ezra 2₅₉.’

(f) *Other devices.*—199 means 1899. 1 Ch. 6₈₁ [66] means that verse 81 in the English version is the translation of that numbered 66 in Hebrew texts. √ is used to indicate the ‘root’ of a word.

v. *Punctuation.*—No commas are used between citations, thus: 2 K. 6_{21 25} Is. 21₇. Commas are omitted and semicolons or colons inserted whenever ambiguity seems thus to be avoided—*e.g.*, the father Achbor [1] is called ‘Father of Baal-hanan [1] king of Edom,’ and the son Baal-hanan [1] is called ‘ben Achbor [1]; one of the kings of Edom.’

4. **Text-Critical Apparatus.**—As all sound investigation must be based, not on the ancient

texts as they lie before the student, but on what he believes to be the nearest approach he can make to their original reading, the soundness of every text is weighed, and if need be, discussed before it is used in the *Encyclopædia Biblica*.

i. *Traditional Original Text*.—In quoting the traditional Hebrew text the editions of Baer and of Ginsburg have been relied on as a rule; similarly in the case of the New Testament, the texts of Tischendorf and of Westcott and Hort (see below,).

ii. *Evidence of Versions*.—The Vulgate (ed. Heysse-Tischendorff) and the Peshitta (ed. Lee and London Polyglott) and the minor Greek versions (Field, *Hexapla*: Hatch-Redpath, *Concordance*) have been quoted quite freely; the testimony of the Septuagint has been attended to on every point.

In exceptional cases 'Holmes and Parsons' has been consulted; ordinarily Swete's manual edition (including the variants) and Lagarde's *Parv Prior* have been considered sufficient. In general (for the main exception see next paragraph) only variations of some positive interest or importance have been referred to. Almost invariably a quotation from the LXX is followed by symbols indicating the documents cited (thus $\omega\alpha$ [BAL]). This does not necessarily imply that in some other MS or MSS a different reading is found; it is simply a guarantee that Lagarde and Swete's digest of readings have both been consulted. The formula [BAL] standing alone means that the editors found no variant in Lagarde or Swete to report. In the parts, therefore, where Swete cites κ or other MSS as well as BA, BAL includes them unless the context indicates otherwise; BAL might even be used where B was lacking. When BAL stands alone the meaning is everywhere the same; it is a summary report of agreement in Lagarde and Swete.

Proper names have been felt to demand special treatment; the aim has been to give under each name the readings of Lagarde and all the variants of B&A as cited in Swete. The commonest, or a common form for each witness is given at the head of the article, and this is followed at once or in the course of the article by such variants as there are. Where all the passages containing a given name are cited in the article, the apparatus of Greek readings (as in Swete and Lagarde) may be considered absolutely complete. In other cases, completeness, though aimed at, has not been found possible.

The distinction between declinable and indeclinable forms has generally been observed; but different cases of the same declinable form have not as a rule (never in the case of common nouns) been taken note of. Where part of one name has been joined in the LXX to the preceding or succeeding name, the intruding letters have usually been given in square brackets, though in some very obvious cases they may have been ignored.

When MSS differ only in some giving ι and others ϵ that is indicated concisely thus: ' $\alpha\beta\epsilon\iota\alpha$ [B], $\alpha\beta\alpha$ [AL],' becomes ' $\alpha\beta[\epsilon]\iota\alpha$ [BAL].' Similarly, $-\tau\epsilon$, $-\tau\tau$, becomes $-\tau[\tau]$.

A great deal of pains has been bestowed on the readings, and every effort has been made to secure the highest attainable accuracy. In this connection the editors desire to acknowledge their very special obligations to the Rev. Henry A. Redpath, M.A., editor of the *Concordance* to the Septuagint, who has placed his unrivalled experience in this department at their disposal by controlling the proofs from the beginning with special reference to the LXX readings. He has also verified the biblical references.

Unfortunately, misprints and other inaccuracies—inaccuracies sometimes appearing for the first time after the last proof reading—cannot be avoided. Corrections of errors, however minute, addressed to the publishers, will always be gratefully received.

Some typographical details require to be explained:—

(a) In giving proper names initial capitals, breathings, and accents are dispensed with; they were unknown in the oldest MSS (see Swete, 1 p. xiii 2).

(b) The Greek readings at the head of an article are given in uncials, and the Vulgate readings in small italic capitals; elsewhere ordinary type is used.

(c) The first Greek reading is given in full; all others are abbreviated as much as possible. Letters suppressed at the beginning of a word are represented by a dash, letters at the end by a period. In every case the abbreviated form is to be completed by reference to the Greek form immediately preceding, whether that is given in full or not. Thus, e.g., ' $\alpha\beta\epsilon\lambda\omicron\upsilon\tau\tau\epsilon\upsilon\mu$, β . . . $\tau\tau\mu$, $-\tau\tau\epsilon\upsilon$, $\beta\epsilon\lambda\omicron\upsilon$.'¹ means ' $\alpha\beta\epsilon\lambda\omicron\upsilon\tau\tau\epsilon\upsilon\mu$, $\beta\epsilon\lambda\omicron\upsilon\tau\tau\epsilon\upsilon$, $\beta\epsilon\lambda\omicron\upsilon\tau\tau\epsilon\upsilon$, $\beta\epsilon\lambda\omicron\upsilon\tau\tau\epsilon\upsilon$.' That is to say, the abbreviated form repeats a letter (or if necessary more) of the form preceding. Two exceptions are sometimes made. The dash sometimes represents the *whole* of the preceding form—e.g., ν for μ in $\epsilon\mu$, ν . These exceptions can hardly lead to ambiguity.

(d) The following are the symbols most commonly quoted from Swete's digest with their meaning:—

¹ This is a misprint in the art. ABEL-SHITTIM. ' $\beta\epsilon\lambda\omicron\upsilon$.' should be ' $\beta\epsilon\lambda\omicron\alpha$ ', without the period.

- * = original scribe.
- 1 = his own corrections.
- a, b, c = other correctors.
- ab = first corrector confirmed by second.
- a⁷ b⁷ = a or b.
- a⁷ b = b, perhaps also a.
- a(vi)d = prob. a.
- a vid = a, if it be a *bona fide* correction at all.

- D = testimony of the Grabe-Owen collation of D before D was partly destroyed (see Swete, I p. xxiv).
- D⁰¹ = readings inferred from the collation (*D⁰e silentio*).
- κ^a = a corrector of κ belonging to the 7th cent. (Sw., 2 p. viii; cp I, p. xxi).
- Bedt = *e.g.*, on Sirach 46I, p. 47I.
- κ^b = see Sw., 2 p. viii.
- κ^c = *e.g.*, Sir. 107, p. 663.

(e) The following are the MSS most commonly cited:—

- | | | | |
|---|--|------|---|
| κ | Sinaiticus (see Swete, I p. xx). | F | Cod. Ambrosianus (Swete, I p. xxvi). |
| A | Alexandrinus (Swete, p. xxii). | 87 | Cod. Chisianus (Swete, 3 xii). |
| B | Vaticanus (Swete, I p. xvii). | Syr. | Cod. Syro. Hexaplaris Ambrosianus (3 xiii). |
| C | Cod. Ephraemi (Swete, 2 p. xiii). | V | Cod. Venetus (= 23, Parsons; Swete, 3 p. xiv). |
| D | Cod. Cottonianus Geneseos (Swete, I p. xxiii). | Q. | Cod. Marchalianus (Swete, 3 p. vii). |
| E | Cod. Bodleianus Geneseos (Swete, I p. xxvi). | Γ | Cod. rescriptus Cryptoferratisis (Swete, 3 p. ix f.). |

5. Proper Name Articles.—Proper name articles usually begin thus. The name is followed by a parenthesis giving (1) the original; (2) where necessary, the number of the section in the general article NAMES where the name in question is discussed or cited; (3) a note on the etymology or meaning of the (personal) name with citation of similar names; (4) the readings of the versions (see above, 4 ii.).

6. Geographical Articles.—The interpretation of place-names is discussed in the article NAMES. The maps that are issued with Part I. are the district of Damascus, the environs of Babylon, and 'Syria, Assyria, and Babylonia' (between cols. and). The last-mentioned is mainly designed to illustrate the non-Palestinian geography of the Old Testament. It is made use of to show the position of places outside of Palestine mentioned in Part I. which happen to fall within its bounds.

In all maps biblical names are assigned to sites only when the article discussing the question regards the identification as extremely probable (the degree of probability must be learned from the article).

The following geographical terms are used in the senses indicated:—

- | | |
|---------------------------------------|--|
| <i>Dēr, deir,</i> 'monastery.' | <i>Khīrbet-(Kē),</i> 'ruins of —.' |
| <i>Haj(j),</i> 'pilgrimage to Mecca.' | <i>Nahr (N.),</i> 'river.' |
| <i>ʿġebel (J.),</i> 'mountain.' | <i>Tell,</i> 'mound' (often containing ruins). |
| <i>Kefr, Kufr,</i> 'village.' | <i>Wādī (W.),</i> 'valley,' 'torrent-course.' |
| <i>Khān,</i> 'caravanserai.' | <i>Welī, wely,</i> 'Mohammedan saint,' 'saint's tomb.' |

7. Transliteration, etc.—Whilst the *Encyclopædia Biblica* is meant for the student, other readers have constantly been kept in view. Hence the frequent translation of Hebrew and other words, and the transliteration of words in Semitic languages. In certain cases transliteration also saves space. No effort has been made at uniformity for its own sake. Intelligibility has been thought sufficient. When pronunciation is indicated—*e.g.*, Bēhēmōth, Leviāthān—what is meant is that the resulting form is the nearest that we can come to the original as represented by the traditional Hebrew, so long as we adhere to the English spelling.

In the case of proper names that have become in some degree naturalised in an incorrect form, that form has been preserved: *e.g.*, Shalmaneser, Tiglath-pileser. Where there is an alternative, naturally the closer to the original is selected: therefore Nebuchadrezzar (with *r* as in Ezek., etc.), Nazirite. Where there is no naturalised form an exact transliteration of the original has been given—*e.g.*, Asur-rēs-isi—and the component parts of Assyrian names are thus separated by hyphens, and begin with a capital when they are divine names.

In the case of modern (Arabic) place-names the spelling of the author whose description has been most used has generally been retained, except when it would have been misleading to the student. The diacritical marks have been checked or added after verification in some Arabic source or list.

On the Assyrian alphabet see BABYLONIA, § 6, and on the Egyptian, EGYPT, § 12. One point remains to be explained, after which it will suffice to set forth the schemes of transliteration in tabular form. The Hebrew h (ח) represents philologically the Arabic h and h, which are absolutely distinct sounds. The Hebrew spoken language very likely marked the distinction. As the written language, however, ignores it, ח is always transliterated h. The Assyrian guttural transliterated with an h, on the other hand, oftenest represents the Arabic h, and is therefore always transliterated h (in Muss.-Arn. *Dict.*, x for χ), never h. There is no h in transliterated Assyrian: for the written language did not distinguish the Arabic h from the Arabic h 'g or', representing them all indifferently by', which accordingly does not, in transliterated Assyrian, mean simply h but h or ח or h or ח or g. Hence *e.g.*, Nabū-nahid is simply one interpretation

of Nabû-na'id. Egyptian, lastly, requires not only h, h, and h, like Arabic, but also a fourth symbol h (see EGYPT, §).

TRANSLITERATION OF HEBREW (AND ARABIC) CONSONANTS

ʾ	א	ע	z	ז	ז	l	ל	ל	s	ס	ש
b	ב	ב	ḥ	ח	ח	m	מ	מ	k (q)	ק	ק

Ar. ā ī ū	a (e)	i (e)	u (o)
Ar. diphthongs: ai, ay, ei, ey, ē; aw, au, ō.			

8. Abbreviations, Symbols, and Biographical Notes.—The following pages explain the abbreviations that are used in the more technical parts (see above 31. (a)) of the *Encyclopædia*. The list does not claim to be exhaustive, and for the most part it takes no account of well-established abbreviations, or such as have seemed to be fairly obvious. The bibliographical notes will be not unwelcome to the student.

The Canonical and Apocryphal books of the Bible are usually referred to as Gen., Ex., Lev., Nu., Dt., Jos., Judg., Ruth, S(a.), K(i.), Ch[r.], Ezr., Neh., Est., Job, Ps., Pr., Eccles., C(an)t., Is., Jer., Lam., Ezek., Dan., Hos., Joel, Am., Ob., Jon., Mi., Nah., Hab., Zeph., Hag., Zech., Mal.; 1 Esd., 4 Esd. (i.e. 2 Esd. of EV), Tob., Judith, Wisd., Eccus., Baruch, cap. 6 (i.e. Epistle of Jeremy), Song of the Three Children (Dan. 3₂₃), Susanna, Bel and the Dragon, Prayer of Manasses, 1-4 Macc.; Mt., Mk., Lk., Jn., Acts, Rom., Cor., Gal., Eph., Phil., Col., Thes., Tim., Tit., Philem., Heb., Ja[s.], Pet., 1-3 Jn., Jude, Apoc. [or Rev.]. An explanation of some of the symbols (A, K, B, etc.), now generally used to denote certain Greek MSS of the Old or New Testaments, will be found above, at p. vx. It may be added that the bracketed index numerals denote the edition of the work to which they are attached; thus OTJC⁽²⁾ = *The Old Testament in the Jewish Church*, 2nd edition (exceptions R^{P(2)}, AOF⁽²⁾: see below). The unbracketed numerals above the line refer to footnotes; for those under the line see below under D₂, etc.

When a foreign book is cited by an English name the reference is to the English translation.

It is suggested that the *Encyclopædia Biblica* itself be cited as *E Bi*. It will be observed that all the larger articles can be referred to by the numbered sections; or any passage can readily be cited by column and paragraph or line. The columns will be numbered continuously to the end of the work.

ABBREVIATIONS, SYMBOLS, AND BIBLIOGRAPHICAL NOTES

The following pages explain the abbreviations that are used in the more technical parts (see above, p. xiv. 3 i. [a]) of the *Encyclopædia*. The list does not claim to be exhaustive, and, for the most part, it takes no account of well-established abbreviations, or such as have seemed to be fairly obvious. The bibliographical notes will, it is hoped, be welcome to the student.

The Canonical and Apocryphal books of the Bible are usually referred to as Gen., Ex., Lev., Nu., Dt., Josh., Judg., Ruth, S(a.), K(i.), Ch[r.], Ezra, Neh., Esth., Job, Ps., Pr., Eccles., C(an)nt., Is., Jer., Lam., Ezek., Dan., Hos., Joel, Am., Ob., Jon., Mi., Nah., Hab., Zeph., Hag., Zech., Mal.; 1 Esd., 4 Esd. (*i.e.*, 2 Esd. of EV), Tob., Judith, Wisd., Ecclus., Baruch, Epistle of Jeremy (*i.e.*, Bar. ch. 6), Song of the Three Children (Dan. 3₂₃), Susanna, Bel and the Dragon, Prayer of Manasses, 1-4 Macc.; Mt., Mk., Lk., Jn., Acts, Rom., Cor., Gal., Eph., Phil., Col., Thess., Tim., Tit., Philem., Heb., Ja[s.], Pet., 1-3 Jn., Jude, Rev. [or Apoc.].

An explanation of some of the symbols (A, 8, B, etc.), now generally used to denote certain Greek MSS of the Old or New Testaments, will be found above, at p. xvi. It may be added that the bracketed index numerals denote the edition of the work to which they are attached: thus OTJC⁽²⁾ = *The Old Testament in the Jewish Church*, 2nd edition (exceptions KP⁽²⁾, AOF⁽²⁾; see below). The unbracketed numerals above the line refer to footnotes; for those under the line see below under D₂, E₃, J₃, P₃.

When a foreign book is cited by an English name the reference is to the English translation.

It is suggested that this work be referred to as the *Encyclopædia Biblica*, and that the name may be abbreviated thus: *Ency. Bib.* or *E.Bi.* It will be observed that all the larger articles can be referred to by the numbered sections (§§); or any passage can readily be cited by column and paragraph or line. The columns will be numbered continuously to the end of the work.

ABBREVIATIONS, SYMBOLS, AND BIBLIOGRAPHICAL NOTES

The following pages explain the abbreviations that are used in the more technical parts (see above, p. xiv. § i. [a]) of the *Encyclopædia*. The list does not claim to be exhaustive, and, for the most part, it takes no account of well-established abbreviations, or such as have seemed to be fairly obvious. The bibliographical notes will, it is hoped, be welcome to the student.

The Canonical and Apocryphal books of the Bible are usually referred to as Gen., Ex., Lev., Nu., Dt., Josh., Judg., Ruth, S(a.), K(i.), Ch[r.], Ezra, Neh., Esth., Job, Ps., Pr., Eccles., C(an)t., Is., Jer., Lam., Ezek., Dan., Hos., Joel, Am., Ob., Jon., Mi., Nah., Hab., Zeph., Hag., Zech., Mal.; 1 Esd., 4 Esd. (*i.e.*, 2 Esd. of EV). Tob., Judith, Wisd., Eccles., Baruch, Epistle of Jeremy (*i.e.*, Bar. ch. 6), Song of the Three Children (Dan. 3₂₃), Susanna, Bel and the Dragon, Prayer of Manasses, 1-4 Macc.; Mt., Mk., Lk., Jn., Acts, Rom., Cor., Gal., Eph., Phil., Col., Thess., Tim., Tit., Philem., Heb., Ja[s.], Pet., 1-3 Jn., Jude, Rev. [or Apoc.].

An explanation of some of the symbols (A, N, B, etc.), now generally used to denote certain Greek MSS of the Old or New Testaments, will be found above, at p. xvi. It may be added that the bracketed index numerals denote the edition of the work to which they are attached: thus OTJC⁽²⁾ = *The Old Testament in the Jewish Church*, 2nd edition (exceptions R^{P(2)}, AOF⁽²⁾; see below). The unbracketed numerals above the line refer to footnotes; for those under the line see below under D₃, E₃, J₂, P₂.

When a foreign book is cited by an English name the reference is to the English translation.

It is suggested that this work be referred to as the *Encyclopædia Biblica*, and that the name may be abbreviated thus: *Ency. Bib.* or *E.Bi.* It will be observed that all the larger articles can be referred to by the numbered sections (§§); or any passage can readily be cited by column and paragraph or line. The columns will be numbered continuously to the end of the work.

ENCYCLOPÆDIA BIBLICA

A

AALAR (אלאאר [B]). 1 Esd. 5:36† AV = Ezra 2:59. IMMER, i.; cp also CHERUB, 2.

AARON (אָרֹן; § 73 see also below, § 4, end; אַרְוֹן [BAL], אַר, [A]; AARON). In the post-exilic parts of the OT (including Ezra, Neh., Ch., and for our present purpose some of the Psalms) Aaron is the ancestor of all lawful priests,¹ and himself the first and typical high-

1. In P. priest. This view is founded upon the priestly document in the Hexateuch, according to which Aaron, the elder brother of Moses, took a prominent part, as Moses' prophet or interpreter, in the negotiations with Pharaoh, and was ultimately, together with his sons, consecrated by Moses to the priesthood. The rank and influence which are assigned to him are manifestly not equal to those of Moses, who stood to Pharaoh as a god (Ex. 7:1). He does, indeed, perform miracles before Pharaoh—he changes his rod into a serpent which swallows up the rods, similarly transformed, of the Egyptian sorcerers; and with the same rod he changes the waters of Egypt into blood, and brings the plagues of frogs and lice—but the order to execute the marvel is in each case communicated to him through Moses (Ex. 7:7). It is Moses, not Aaron, who disables the sorcerers by boils (Ex. 9:8 f.), and causes the final destruction of the Egyptians in the Red Sea (14:15-18). Through his consecration by Moses, Aaron became 'the priest' (so usually) or, as he is elsewhere called, 'the anointed priest' (Lev. 4:35; 16:6; 15) or 'the high-priest' (Lev. 21:10 Nu. 35:25-28). His sons, representing the common priests, act under him (Nu. 3:4). As high-priest he has splendid vestments, different from those of his sons (Ex. 28); he alone is anointed (Ex. 29:7²); he alone, once a year, can enter the holy of holies (Lev. 16). He is the great representative of the tribe of Levi; and his rod, unlike the rods taken to represent the other tribes, buds miraculously, and is laid up for ever by the ark (Nu. 17:6 f. [21 f.]). Within this tribe, however, it is only the direct descendants of Aaron who may approach the altar, so that Korah the Levite, when he claims the power of the priesthood, is consumed by fire from Yahwè (Nu. 16:35). Aaron occasionally receives the law directly from Yahwè (Nu. 18). Even his civil authority is great, for he, with Moses, numbers the people (Nu. 1:37), and it is against him as well as against Moses that the rebellion of the Israelites is directed (Ex. 16:2 Nu. 14:25-26 16:3). This authority would have been greater but for the exceptional position of Moses, for in the priestly portions of Joshua the name of Eleazar (q.v. 1), the next high-priest, is placed before

that of Joshua. The 'priestly' writer mentions only one blot in the character of Aaron: viz., that in some way, which cannot be clearly ascertained in the present state of the text, he rebelled against Yahwè in the wilderness of Zin, when told to 'speak to the rock' and bring forth water (Nu. 20:12). In penalty he dies, outside Canaan, at Mount Hor, on the borders of Edom (v. 22 f.).

As we ascend to the exilic and pre-exilic literature, Aaron is still a prominent figure; but he is no longer either the high-priest or the ancestor of all legitimate priests. Ezekiel traces the origin of the priests at Jerusalem no farther back than to ZADOK (q.v. 1, § 3), in Solomon's time. Dt. 10:6 (which mentions Aaron's death, not at Hor but at Moserah, and the fact that Eleazar succeeded him in the priesthood) is generally and rightly regarded as an interpolation. In Mic. 6:4 (time of Manasseh?) Aaron is mentioned between Moses and Miriam as instrumental in the redemption of Israel. In the Elohistic document of the Hexateuch (E) he is mentioned as the brother of Miriam the prophetess (Ex. 15:20; for other references to him see Ex. 17:12 24:9, 10, 14, Nu. 12:1); but it is Joshua, not Aaron, who is the minister of Moses in sacred things, and keeps guard over the tent of meeting (Ex. 33:11), and 'young men of the children of Israel' offer sacrifice, while the solemn act of sprinkling the blood of the covenant is reserved for Moses (Ex. 24:5, 6). Aaron, however, seems to have counted in the mind of E as the ancestor of the priests at 'the hill of Phinehas' (Josh. 24:33) and perhaps of those at Bethel. At all events, the author of a section added in a later edition of E speaks of Aaron as yielding to the people while Moses is absent on Mount Horeb, and taking the lead in the worship of Yahwè under the form of a golden calf. The narrator, influenced by prophetic teaching, really means to attack the worship carried on at the great sanctuary of Bethel, and looks back to the destruction of Samaria by the Assyrians in 721 as Yahwè's 'visitation' of the idolatrous worship maintained in N. Israel (Ex. 32; see especially v. 34).

It is extremely probable that Aaron's name was absent altogether from the earliest document of the Hexateuch (J) in its original form. In it Aaron appears only to disappear. For example, according to our present text, Pharaoh sends for Moses and Aaron that they may entreat Yahwè to remove the plague of frogs; but in the course of the narrative Aaron is ignored, and the plague is withdrawn simply at 'the word of Moses' (Ex. 8:8-15 a [4-11 a]). Apparently, therefore, the name of Aaron has been introduced here and there into J by the editor who united it to E (cp EXODUS, § 3 n. 1). If that is so we may perhaps agree with Oort that the legend of Aaron belonged originally

2. In earlier writers.

3. In E. historic document of the Hexateuch (E) he is mentioned as the brother of Miriam the prophetess (Ex. 15:20; for other references to him see Ex. 17:12 24:9, 10, 14, Nu. 12:1); but it is Joshua, not Aaron, who is the minister of Moses in sacred things, and keeps guard over the tent of meeting (Ex. 33:11), and 'young men of the children of Israel' offer sacrifice, while the solemn act of sprinkling the blood of the covenant is reserved for Moses (Ex. 24:5, 6). Aaron, however, seems to have counted in the mind of E as the ancestor of the priests at 'the hill of Phinehas' (Josh. 24:33) and perhaps of those at Bethel. At all events, the author of a section added in a later edition of E speaks of Aaron as yielding to the people while Moses is absent on Mount Horeb, and taking the lead in the worship of Yahwè under the form of a golden calf. The narrator, influenced by prophetic teaching, really means to attack the worship carried on at the great sanctuary of Bethel, and looks back to the destruction of Samaria by the Assyrians in 721 as Yahwè's 'visitation' of the idolatrous worship maintained in N. Israel (Ex. 32; see especially v. 34).

4. In J. appears only to disappear. For example, according to our present text, Pharaoh sends for Moses and Aaron that they may entreat Yahwè to remove the plague of frogs; but in the course of the narrative Aaron is ignored, and the plague is withdrawn simply at 'the word of Moses' (Ex. 8:8-15 a [4-11 a]). Apparently, therefore, the name of Aaron has been introduced here and there into J by the editor who united it to E (cp EXODUS, § 3 n. 1). If that is so we may perhaps agree with Oort that the legend of Aaron belonged originally

¹ In 1 Ch. 12:27, if MT is correct, Aaron (AV AAARONITES) is almost a collective term for priests, said by the Chronicler to have joined David at Hebron. In 27:17 RV rightly reads 'Aaron.'

² On passages in P which seem to conflict with this, see the circumspect and conclusive note of Dt. on Lev. 8:12.

same root). There is no instance of the name earlier than Jeremiah. Targ. Nu. 27 vs 10, 32⁴⁹ gives אבא עבדו.

As seen from W. Palestine this range forms a continuous mountain-wall, at a pretty constant level, which is broken only by the valley-mouths of the Yarmük, Zeräk or Jabbok, and Arnon. Across the gulf of the Jordan valley it rises with great impressiveness, and constitutes the eastern horizon (cp Stanley, *SP*; GASM, *HG* 53, 519, 548). The hardly varying edge masks a considerable difference of level behind. On the whole the level is maintained from the foot of Hermon to the S. end of the Dead Sea at a height of from 2000 to 3000 feet above the ocean. The basis throughout is limestone. N. of the Yarmük this is deeply covered by volcanic deposits, and there are extinct craters N.E. of the Lake of Galilee. Between the Yarmük and the Wädü Hesbän, at the N. end of the Dead Sea, run transverse ridges, cut by deep wädies, and well wooded as far S. as the Zeräk. S. of Wädü Hesbän rolls the breezy treeless plateau of Moab, indented in its western edge by short wädies rising quickly to the plateau level, with the headlands that are more properly the Mts. of Abärim between them; and cut right through to the desert by the great trenches of the wädies, Zeräk, Mä'in, and Möjtöb or Arnon. For details see ASIDOTH-PISGAH, BÄMOTH-BAAL, BETH-PEOR, MOAB, NEBO, PISGAH, ZOPHIM, etc., with authorities quoted there. On Nu. 33⁴⁷ see WANDERINGS, § 11. G. A. S.

ABBA (אבא [Ti. WH], *i.e.* אבא, Ab, 'father,' in the 'emphatic state'), an Aram. title of God used by Jesus and his contemporaries, and retained by Greek-speaking Christian Jews. See Mk. 14³⁶ Rom. 8¹⁵ Gal. 4^{6f}; where in each case δ πατήρ is substituted.

ABDA (עבדא, § 51, frequent in Phoen. and Aram. On the form cp Renan, *REJ* v. 165 f. [82], and see NAMES, §§ 37, 51).

1. Father of Adoniram (1 K. 17; אבוא [A]; אברא [B]; אברא [L]).
2. Levite in list of inhabitants of Jerusalem (see EZRA, ii. § 5f, § 15 [1] 24; Neh. 11; אבואים [אבואים 390]; אבואים [אבואים 15]; אבוא [L]; אבואים [L]; 1 Ch. 9¹⁷; אבואים [אבואים 79-81]).

ABDEEL (עבדאל, § 21, 'servant of God'), father of Shelemiah, Jer. 36^{26f}. (Not in \mathfrak{C} .)

ABDI (עבדי, § 52, abbr. for 'servant of Yahwé'?) cp Palm. **עבדי**, and see OBADIAH; אבדיא [L].

1. Father of Kish, a Levite under Hezekiah, mentioned in the genealogy of ETHAN (*q.v.*); 1 Ch. 6⁴⁴ [29] 2 Ch. 20²²; אבדי [L]; [BAL].
2. One of the b'ne ELAM (*q.v.* ii. [1]), in list of those with foreign wives (see EZRA, i. § 5 end), Ezra 10²⁶ (אבדי [אבא [BN.]], -[L.]) = 1 Est. 9²⁷ (RV QABDI S. AV om.; אבדי [אבא [L]]).

ABDIAS (אבדיאס), 4 Est. 1^{39f}. See OBADIAH, 1.

ABDIEL (עבדיאל, §§ 21, 37, 'servant of God'; אבדיאל [B]; -ΔΙΗΛ [A.]), in genealogy of GAD, 1 Ch. 5^{15f}.

ABDON (עבדון; אבδων [AL], see also below), one of the four Levitical cities within the tribe of Asher; Josh. 21³⁰ 1 Ch. 6⁷⁴ [59f]. The site has not been identified, but Güfün has suggested that of 'Abdeh, 10 m. N. from 'Akka (Acre). The same city is referred to in Josh. 19²⁸, where עבדון (AV HEBRON; RV EBRON) is a graphical error for עבדון, Abdon, which, in fact, some MSS. read [Josh. 21³⁰, אבδων [B]; 1 Ch. 6⁷⁴ [59], אבδων [B], om. [L.]; Josh. 19²⁸, אבδων [B], אבδων [AL]].

ABDON (עבדון, § 77; dim. of EBED; אבδων [BAL.]), 1. G. Hillel, of the six minor judges (see JUDGES, §). After judging Israel eight years, he was buried at Pirathon in Ephraim, his native

place. He had forty sons and thirty grandsons, 'that rode on three-score and ten ass colts'—*i.e.*, was head of a large and wealthy family (cp Judg. 5¹⁰), Judg. 12¹³ 15^f (אבδון [AL.], = 15 50 [A]); on Lev. 3's conjecture that his name should be restored in 1 S. 12¹¹, see BEDAN, 1. 2. b. Shushan, a Benjaminite (1 Ch. 7¹⁷, אבדון [B]). 3. b. Joad, the father of Othniel (1 Ch. 3¹⁰, אבדון [B]). 4. b. Mada, a cousin of King Josiah (1 Ch. 33²⁰, אבדון [B], elsewhere called אבדון *q.v.*). See BETH-AN, 2.

ABEDNEGO (עבד נבז, § 86; אבדנעגו [A], a corruption of עבד נבו, 'servant of Nebo,' which occurs in an Assyrio-Aramaic inscription, *CPA* 2¹⁰; אβδενεγω [B] [A 87]; عابد نبو; אבדנעגו) the court name given to Azariah [10], the friend of Daniel (Dan. 1⁷, etc.). On EBED-NEBO-NERGAL.

ABEL (אבל, § 6; אβελ [ABD.]; אβελ, Gen. 4²

f. There are three phases in Jewish beliefs respecting Abel. The second and the third may be mentioned first. The catastrophe of the Exile shifted the mental horizon, and made a right view of the story of Abel impossible. Abel was therefore at first (as it would seem from P) neglected. Afterwards, however, he was restored to more than his old position by devout though uncritical students of Scripture, who saw in him the type of the highest saintliness, that sealed by a martyr's death (cp Kohler, *JQR* v. 413 [93]). The same view appears in parts of the NT (Mt. 23³⁵ = Lk. 11⁵¹; Heb. 11⁴ 12²⁴ 1 John 3¹²). God bore witness, we are told (Heb. 11⁴), that Abel was righteous—*i.e.*, a possessor of true faith, —and it was by faith that Abel offered π είσινα (Cobet conjectures η λόνα) θυσίας. Hence Magee assumes that Abel had received a revelation of the Atonement (*Atonement and Sacrifice*, i. 50-53). The original narrator (J), however, would certainly wish us to regard Abraham as the first believer; the story of Cain and Abel is an early Israelitish legend retained by J as having a profitable tenor. On this earliest phase of belief, see CAIN, § 4f. *Meaning of the name.* The Massoretic attribution of Abel (Heb. 4) to mean 'a breath,' 'vanity' (cp Ps. 39⁶ [7]); but the true meaning, both of Abel and of the collateral form Jahal, must be something concrete, and a right view of the story favours the meaning 'shepherd,' or, more generally, 'herdman.' This is supported by the existence of a group of Semitic names, some of which denote domesticated animals, while others are the corresponding words for their herdmen. Cp, e.g., Ass. *ablu*, 'ram, camel, ass' (but some explain 'wild sheep'; see *Mass.-Ass.* 122); *abnu*, 'herdman,' 'herdsman' (Ass. *abnu*, see *FT*, s.v.); Ar. *ihil*, 'camels,' *ahbil*, 'camel-herd.' The attempt of Lenormant (*Les origines*, i. 177) and others to derive *abnu* (*Hubert Lects.* 186, 236, 249), to find in the name a trace of a nature-myth, Abel (= Bab. *ablu*, 'son') being originally 'the only son of Lamma, who was a shepherd like Lamma and Abé' (Sayce), and whom Lenormant regards as, like Abel in early theology, a kind of type of Christ, is adventurous. The name 'son' is insufficient as a title of Lamma (*abnu*, *abnu*), and there is nothing said of a mourning for Abel's death. The title of 'shepherd' applied to Lamma in 4 K. 17¹¹ is explained by the following word 'lord' (see Jeremiah, *Isaiabur Nimrod*, 50). In the *Targum of Abraham* (ed. James) Abel plays the part of Judge of the nether world, like the Jama (Yima) of the Aryans. G. A. S.

ABEL (אבל, §§ 89-100) occurs, apparently in the sense of 'meadow,' in the place-names dealt with in the following six articles. As a place-name it may be struck out of 1 S. 6^{18b}, where for MT אבן הנדולה it is read (so also Pesh.) אביל reads εως (ε. γ. τ. [L.]) λίθου του μεγάλου, with which the Targ. Jon. agrees (so also RV). Ew., W.e., and others further change the points so as to read: 'and a witness is the great stone.' Dr. suggests as an alternative: 'and still the great stone, whereon'—*etc.* On Abel in 2 S. 20¹⁸, see ABEL-BETH-MAACHAH. G. A. S.

ABEL-BETH-MAACHAH, RV, Abel-Beth-Maacah (2 S. 20¹⁴; אביל בית מעכה, to Abel and Beth-maacah, RV 'unto Abel and to Beth-maac[h]ah' [many strike out the conjunction, but the places may have been different; cp 2 S. 20¹⁵ L,

2 K. 15.20 BAL], ΕΙΣ ΔΒΕΛ ΚΑΙ ΕΙΣ ΒΑΙΘΜΑΧΑ [B]. . . . ΒΗΘΜΑΧΑ [A], κ. ΔΒΗΛΑ κ. ΒΑΙΘΜΑΚΚΩ [L].
 Cp 2 S. 20.15, בְּתֵיבַת בֵּית מִצְרַיִם, EV 'in Abel of Bethmaachah], ΕΙΣ ΔΒΕΛ ΤΗΝ ΒΑΙΘΜΑΧΑ [B], ΕΙΣ Δ. ΕΙΣ ΒΗΘΜΑΧΑ [A], ΕΙΣ ΤΗ Α. κ. ΒΑΙΘΜΑΚΚΩ [L]; 1 K. 15.20, בְּתֵיבַת בְּתֵיבַת אֲבֵל מַעֲיִן (Sic) ΜΑΧΑ [A], ΔΒΕΛΜΑΧΑ [L]; 2 K. 15.20, בְּתֵיבַת אֲבֵל κ. ΤΗ ΒΗΘΜΑΧΑ [B], ΚΑΒΕΛ κ. τ. ΒΕΡΜΑΧΑ [A], ΔΒΕΛ κ. τ. ΒΑΙΘΜΑΧΑ [L]; 2 S. 20.18 (on which see ARAM, § 5), בְּתֵיבַת, EV ABEL, (77) ABEL [Sic BAL].

This place, mentioned, although in now mutilated form [A]-bi-il, by Tiglath-pileser III. (cp Schr. *COT* on 2 K. 15.20), is the present *Abil*—called also *Abil el-Kamh* ('of the wheat') to distinguish it from *Abil es-Suk* (see ABILENE)—a small village inhabited by Christians on the *Nahr Bareighti*, on a hill 1074 ft. above the sea, overlooking the Jordan valley, almost directly opposite to *Bāniās*, and on the main road thence to Sidon and the coast. It is a strong site, with a spring and a (probably artificial) mound; below is a broad level of good soil, whence the modern name. See Yāqūt 156; Rob. *LBK* 372 f. (who argues against *Abel el-Hawā*, a site 8 m. farther north); *PEP Mem.* i. 85 107; Merrill, *East of the Jordan*, 309, 315. In 2 Ch. 16.4, we have, instead of the Abel-beth-maachah of the parallel passage (1 K. 15.20), ABEL-MAIM (בְּתֵיבַת אֲבֵל מַיִן [A]), -מַיִן [B], -מַעֲיִן [L]; cp Jos. *Ant.* viii. 124, Αβελμαϊν], or 'Abel of Waters', a name suitable for so well-watered a neighbourhood. On Judith 44.73 where Pesh. reads Abelmeholah, and N apparently Abelmaim, see BELMEN (cp also BEBAI). On the ancient history of the place see ARAM, § 5. G. A. S.

ABEL-CHERAMIM (אֲבֵל כְּרָמִים), 'meadow of vineyards', § 103; εβελχαρμειν [B]; ΔΒΕΛ ΑΜΠΕΛΩΝΩΝ [AL]; Judg. 11.33† RV), the limit of Jephthah's pursuit and slaughter of the Ammonites. Eus. and Jer. (*OS* 225 § 96.1, "Αβελ χαρμειν, Αβελι χαρμειν") identify it with a village of their day, named 'Αβελ, 7 R. m. from Philadelphia. This Abel may be any of the many fertile levels among the rolling hills around 'Ammān, on which the remains of vineyards and of terraces are not infrequent. G. A. S.

ABEL-MAIM (אֲבֵל מַיִן), 2 Ch. 16.4†], see ABEL-BETH-MAACHAH.

ABEL-MEHOLAH (אֲבֵל מְחֹלָה), i.e., 'dancing meadow'; εβελμαωλα, Δβωμεωγλα, εβελμαω [B]; ΔΒΕΛ ΜΑΧΟΥΛΙΑ, ΒΑΕΛΜΕΟ, [A]; ΔΒΕΛΜΕΟΥΛΙΑ, -ΜΑΧΩΛΑ [L]; ΑΒΕΛΜΑΧΟΥΛΙΑ; Jos. *Ant.* viii. 137, ΔΒΕΛΑ), the home of Elisha the prophet (1 K. 19.16), and probably also of Adriel b. Barzillai 'the Meholahite' (1 S. 18.19; 2 S. 21.8), is mentioned in conjunction with Bethshan as defining the province of one of Solomon's officers (1 K. 4.12). Gideon pursued the Midianites 'as far as Beth-shittah towards Zererah as far as the border'—lit. 'lip,' probably the high bank which marks the edge of the Jordan valley proper—'of Abel-meholah, by Tabbath' (Judg. 7.22). According to Eus. and Jer. (*OS* 97.11 227.35), Abelmala (or 'Αβελμαελά) lay in the *Ghōr*, 10 R. m. to the south of Scythopolis (Bethshan), and was still an inhabited village in their time, with the name Bethaula, Βηθμαελά (though they mention also an *Abelmea*, 'Αβελμαεά). This points to a locality at or near the place where the *W. Málīh*, coming down from 'Ain Málīh, joins the Jordan valley.

ABEL-MIZRAIM (אֲבֵל מִצְרַיִם) [see below], ΠΕΝΘΟΣ ΔΙΥΠΤΙΟΥ [BAL]; so Pesh. Vg.), Gen. 50.11† (†), otherwise (*v.* 10 f.) called GOREN HA-ATAD (הַגֹּרֵן הָאֵתָד); ΑΛΩΝΙ ΑΤΑΔ [B²AL]. Α. ΤΑΔ [B²AL]. Δ. ΑΤΑΤ [D] or 'the threshing-floor of the thorn-shrub' (EV 'of ATAD,' see BRAMBLE, 1), and said to be situated 'beyond Jordan' (cp *v.* 10 J). It was there that Joseph made a second mourning for his father, whence the

etymological play on the name (*v.* 11). After this, Joseph and his brethren carried the embalmed body of Jacob to Machpelah for burial, and then returned to Egypt (*v.* 13 f. J and P). The words 'which is beyond Jordan' (*v.* 10 f.), however, cannot be accurate: the original text of J must, it would seem, have been altered, owing to a misreading or an editorial misunderstanding. The circuitous route round the north end of the Dead Sea has no obvious motive: had it really been meant, something more would have been said about it (cp Nu. 14.25). For הַיַּרְדֵּן, 'the Jordan,' J must have written either הַיַּרְדֵּן (less probably הַיַּרְדֵּן)—i.e., the most easterly arm of the Nile (a frontier of Canaan, according to Josh. 13.3)—or הַנָּהָר, 'the stream'—i.e., the *Wādī el-'Arīsh*, the usual SW. boundary of Canaan (cp Gen. 15.18, where J calls this *Wādī*, not the *נָהָר* but the *נָהָר* of Egypt—i.e., 'the stream on the border of Egypt' (Kautsch-Socin), on which see EGYPT, RIVER OF).

The meaning of the narrative is this. At the first Canaanite village (the first after the border had been crossed) the 'great company' (*v.* 9) halted, while Joseph and his fellow-Hebrews mourned in their own way (cp *v.* 3b) in the very place where wedding and funeral ceremonies are still performed in the Syrian villages (Wetz.). The repetition of 'which is beyond Jordan' must be due to the editor.

It is remarkable that Jer. (*OS* 85.15), though he does not question the reading 'beyond Jordan,' identifies *Area Atath* with *Bethgala*—i.e., BETH-HUGLAH (*q.v.*), which is certainly on the *west* bank of the Jordan. Dillm. is more consistently conservative, and, followed by Sayce (*Crit. and Mon.* 27 f.), finds in the trans-Jordanic Abel-Mizraim a testimony to the Egyptian empire in Palestine in the pre-Mosaic age, proved by the Amarna tablets. The exegetical difficulties of this view, however, are insuperable.

As to the name Abel-mizraim it is not improbable that its original meaning was 'meadow of Musri' (in N. Arabia, see MIZRAIM), but that before J's time it had come to be understood as meaning 'meadow [on the border] of Egypt.' Cp Wi. *Allor. Forsch.* 34, and see EGYPT, RIVER OF. T. K. C.

ABEL-SHITTIM (אֲבֵל שִׁטִּים), § 100, i.e., 'the meadow of the acacias'; Samar. omits the article; ΔΒΕΛ-CAITTEIM [L], Β. . . ΤΤΙΜ [A], -ΤΤΕΙΝ [F], ΒΕΛΑΚΑ [B]; *ABEL-SATIIM*, Num. 33.49), or, more briefly, *Shittim* (שִׁטִּים), 'the acacias, CAITTEIM [BA], -M [L]; but Nu. 25.1 CAITTEIM [F], -N [L]; Josh. 21. EK ATTEIM [A], ΕΖΑΤΤΕΙΝ [F], 31 EKATTEIM [F]; Mic. 6.4† ΤΩΝ ΟΥΝΩΝ [BAQ] (for CYINGON? cp *S.* 54), in the Arabah or Jordan basin at the foot of Mount Peor and opposite Jericho. In the time of Jos. (*Ant.* iv. 8.1, v. 1.2) a town named Abila ('Αβίλα), rich in palm trees, occupied such a site at a distance of 60 stadia (7½ R. m.) from the river. Cp *BJ* iv. 7.6, where it is described as near the Dead Sea, and Jer. (Comm. on Joel), who locates it 6 R. m. from Livias. This seems to point to the neighbourhood of *Khirbet el-Kefrein*, where the *Wādī Kefrein* enters the Jordan valley, and there are ruins, including those of a fortress. It was at Abila, according to Jos., that Moses delivered the exhortations of Dt. The palm trees have disappeared, but there is an acacia grove at no great distance (Tristram, Conder). According to *RP* v. 50, this is the Aupal or 'Abel' mentioned among the places conquered by Thotmes III.

In Joel 3 [4] 18 שִׁטִּים should perhaps be treated as a common noun and translated 'acacias' (so KV mg., and Marti in *HS*; cp τῶν στυλίων [B²NAQ]). At all events the reference is not to Abel-shittim across the Jordan. Some (We., Now.) think the name has been preserved in the *Wādī es-Sanā* (see ELAH, VALLEY OF), but the latter does not require the watering of which Joel speaks; and he intends, rather, some dry gorge nearer Jerusalem, perhaps (like Ez. 47.1-12) some part of the Kedron valley, *Wādī en-Nār* (cp *Dr. ad loc.*; GASM. *HG* 511; also, for acacias on W. of Dead Sea, Tristram, *Land of Isr.* 280, 298).

ABEZ, RV Ebez (אֶבֶז; pēBec [B], ḏmce [A], -MIC [L]; *ABES*; Josh. 19.24f),¹ one of the sixteen cities of Issachar. The site is unknown, but the name is evidently connected with that of the judge IBZAN (*q.v.*) of Bethlehem—*i.e.*, the northern Bethlehem. This Bethlehem, it is true, is Zebulunite, while Ebez is assigned to Issachar; but the places must have been very close to each other, and the frontiers doubtless varied. Conder's identification with *El Beidā*, 2 m. from Beit Lahm, might suit as to position, but 'the white village' can have nothing to do with the old name.

W. R. S.

ABI (אֲבִי, so Targ. Jon.; abbrev. of *ABITAH*; אָבוֹי [BA], -[I]. [L]; Jos. אֲבִיָּא [ap]), daughter of Zedebah, wife of King Abaz, and mother of King Hezekiah (2 K. 18.2f). In the parallel passage (2 Ch. 29.1) the name is given as *ABIJAH* (אֲבִיָּה [B; see Swete], אֲבִיָּהוּ [A], אֲבִיָּה [L]; אֲבִי [i]; *Abiā*), but the probability is perhaps in favour of the contracted form in K. (So Gray, *HPV* 24.)

ABI. Names with. There has been much discussion as to the interpretation of the names compounded with *abi*, *ahi*, and some other words denoting relationship¹ (cp *AMMI*-, *HAMU*-, *DOD*-). Without assuming that this discussion is in all points closed (cp *NAMES*, § 44), the writer thinks it best to state the theory which he has himself long held, adopting certain points (with acknowledgment) from Gray's very lucid and thorough exposition, and then to consider the religious and archaeological aspects of the subject.

The question whether these names are sentences has long been answered by some critics in the affirmative, and the arguments of Gray (*HPV* 75-86) put the student in possession of all the points to be urged. He also ably criticises the alternative view (*viz.*, that the two

1. Are the names sentences? elements in Abimelech, Ammiel, etc., are related as construct and genitive). It is usual to refer on this side to such Phœnician names as אֲבִי־חֵן, in which the term of relation is always fem. in names of women and masc. in those of men. But this is decisive only for Phœnician names, and even in their case only for names in אֲבִי and אֲחֵי ('brother' and 'sister'). Compounds with *ab* ('father') are used indifferently of men and women in Phœnician, just as they are in Hebrew. In the latter case, therefore, at least, the term of relation cannot refer to the bearer of the name—*i.e.*, as Melchizedek in the construct state. No doubt in Ps. 110.4 Melchizedek (which suffers, along with other compound names containing a connective *ī* [see below, § 3], from the same ambiguity as names containing a term of kinship) is understood as a construct relation, 'king of righteousness,' and the phrase אֲבִי־יְהוָה—as we should certainly read in Is. 9.5 [6] אֲבִי־יְהוָה²—obviously means for the writer 'glorious father' (*i.e.*, glorious ruler of the family of Israel; cp Is. 22.21). It would seem, therefore, that in the post-exilic age some names of this type were so understood. But we must remember that in later times the original sense of a formation may be forgotten. Gray's main objections to taking *abi* etc. as originally constructs are as follows: (1) The theory will not account for names like Eliab, Joah, etc. Eliab clearly stands to Abiel as Elijah to Joel; in the latter case the

¹ On some possible but by no means clear instances of *im*, 'mother,' in compound names, see Gray, *HPV* 64 n. 2.

² The interpretation of אֲבִי־יְהוָה as 'everlasting one' stands or falls with the interpretation of, *e.g.*, Abinoam as 'father of graciousness,' and of Abitub as 'father of goodness.' Though defended by reference to such names by Guthe (*Zukunftsbild des Jes.* 41 [85]), it is now generally rejected in favour of 'perpetual father (of his people),' or 'father (i.e. producer) of booty.' But neither of these explanations gives a satisfactory parallel to 'prince of peace.' We must read אֲבִי־יְהוָה. 'Prince of peace' suggests a reminiscence of Abisalom, which the writer probably interpreted 'father of peace,' *i.e.*, peaceful (or prosperous) ruler.

genitive relation is excluded; inferentially it is equally so in the former. (2) The use of *ab* with a noun denoting a quality is a pure Arabism,¹ which should not be lightly admitted, while such an interpretation as 'father of Yah' for Abijah is unlikely. (3) A woman's name like 'brother of graciousness' (Abinoam) is inconceivable.² In favour of taking the names compounded with a term of relationship as sentences Gray urges that, though *ab*, *ah*, *am*, etc., all denote a male relative, the proper names compounded with them are used indifferently of men and women; while, on the other hand, nouns with *ben* (son) prefixed are used exclusively of men, the corresponding names of women having *bath* (daughter) for *ben*. He infers, therefore, that, while in the case of names in *ben* and *bath* the element denoting kindred refers to the bearer of the name, in the case of *ab* etc. it does not.

Assuming that these compound names are sentences, are there grounds for determining which of the

2. Which part two elements is subject and which is predicate? (1) In cases like Abijah,

is predicate? Abijah, only the first part can be regarded as indefinite³ and therefore as predicate. We must, therefore, render 'Yahwē is father,' etc. The same principle would apply to Joab, Joah (if these are really compounds). Quite generally, therefore, whenever one element is a proper name it must be subject.⁴ But (2) a divine proper name may give place to אֱלֹהִים (ēl) or some divine title—*e.g.*, Lord. Hence Abiel, Abimelech, will be best explained on the analogy of Abijah—*i.e.*, 'God is father,' 'the divine king is father.' Lastly (3) the divine name or title may give place to an epithet, such as *ram*, 'lofty.' Here the syntax is at first sight open to doubt. The usages of the terms of relationship in the cases just considered would suggest that *-ram* in *Abi-ram* is subject; but the fact that *ram* nowhere occurs by itself designating Yahwē seems to the writer to show that it must be predicate. Abram, therefore, means, not 'the exalted one is father,' but 'the (divine) father is exalted.' Cp *ADONIRAM*, *JERURAM*.

The question whether the connective *ī*, which occurs in most of the forms, is the suffix of the first pers. sing.,

3. Connective ī, or an old ending, has been variously answered. Should Abinoam, Abinoam be rendered 'my father (or my brother) is graciousness' (so Olshausen, *Lehrb. d. hebr. Spr.* § 277 e), or 'the (divine) father, or brother, is graciousness'? Gray well expounds the reasons for holding the latter view. Thus, there are certain forms in which *ī* does not occur—*e.g.*, Abram, Abisalom, beside Abram, Abisalom. We also find Abiel beside Eliab. Lastly, the analogy of יְהוָה־יִרְמִיָּהוּ (Jeremiah), יְהוָה־יְהִזְקִיָּהוּ (Hezekiah), etc., favours the theory that the names before us contain utterances respecting the relation of a deity to all the members of the tribe or clan which worships him. To some this may appear a slight argument; but to the writer it has long been an influential consideration. An argument on the opposite side offered by Boscawen and Hommel will be considered later (see § 5).

It is not easy at first to appreciate, or even to understand, the conception which underlies compound names

4 Religious of this class. The representation of a

conception. god as the father of a tribe or clan may be less repulsive to us than the representation of him as a brother or as some other kinsman. Even a prophet does not object to the expression 'sons of the living (god)' (Hos. 1.10 [21]; see the commentators); but any one can see that to substitute some other relation

¹ Rare in ancient Arabic (see *NAMES*, § 45).

² Even if in modern Ar. *abū* is so used of a woman (see *NAMES*, § 45, third note).

³ This assumes that the connective *ī* is not pronominal (see below § 3).

⁴ The same principle will apply to other compounds containing, instead of a term of kinship, a title, *e.g.*, as in מַלְאֲכֵי־יְהוָה (*q.v.*), *ADONIJAH*, etc., or a concrete noun, as in *URIAM*.

for sonship would in such a context be impossible. Names in Abi-, Ammi-, etc., are, in fact, of primitive origin, and must be explained in connection with primitive ideas of the kinship of gods and men (see WRS *R5*² Lect. 2). Names like Ahijah, Ahinoam, etc., imply a time when the god was regarded as brother. The question then arises, May we take 'brother' in a wide sense as kinsman? or did such formations descend from a remote age when society was polyandrous? Strabo (164) wrote of a polyandrous society in Arabia Felix that 'all are brothers of all,' and Robertson Smith (*Kin.* 167 f.) was of opinion that far back in the social development of Hebrew life lay a form of fraternal polyandry. Now, supposing that the Hebrews when in this stage conceived themselves to be related to a male deity, it is difficult to see under what other form than brotherhood such relationship could be conceived. Of course, if names expressing this conception were retained in later ages, they would receive a vaguer and more satisfactory meaning, such as 'Yahwè is a kinsman,' or 'protector.'¹

Lastly, to supplement the Hebraistic arguments in § 3, we must briefly consider the argument in favour of the explanation 'My father is peace' for

5. Relationship individual or tribal?

Abshalom, 'My father is graciousness' for Abinoam, etc., based on early Babylonian and S. Arabian names. Boscawen (*Migration of Abraham*, Victoria Institute, Jan. 1886) long ago pointed out a series of primitive Babylonian names such as Ilušu-abišu, 'his god is his father,' Ilušu-ibnišu, 'his god made him,' which, in complete correspondence with the Babylonian penitential psalms, indicate a sense of the relation of a protective god not merely to a clan but to a person; and Hommel, in the interest of a too fascinating historical theory, has more recently given similar lists (*AHT* 71 ff.), to which he has added a catalogue of S. Arabian names (*ib.* 83, 85 f.) compounded with *ibi*, *abi*, where these elements appear to mean 'my God,' 'my father,' etc. The present writer, however, must confess that, though aware of the names collected by Boscawen, he has long been of opinion that the course of the development of Israelitish thought and society is entirely adverse to the view that the relation of the deity described by *abi*, *ahi*, etc., was primarily to the individual. This is a question of historical method—on which no compromise is possible—and not of Assyriology. We cannot argue that because the Babylonians, even in remote ages, bore names which imply a tendency to individualistic religion, the Israelites also—who, as far as our evidence goes, were much less advanced in all kinds of culture than the early Babylonians—had a similar tendency, and gave expression to it in their names. It is, therefore, wise to use these Babylonian and S. Arabian names, not as suggesting a theory to be followed in interpreting Israelitish names, but as monuments of early attainments of Semitic races which foreshadow those of the choicest part of the Jewish people at a much more recent period. The value of these names for explaining the formation of Hebrew proper names may be comparatively slight; but they suggest the idea that it was only the want of the higher spiritual prophecy (as known in Israel), as a teaching and purifying agent, and of somewhat different historical circumstances, which prevented the Babylonians from rivaling the attainments in spiritual religion of the later Jewish church.

T. K. C.

ABIA (אַבִּיָּה), RV *Abijah*. For 1 Ch. 3 to Mt. 17 see *ABIAH*, I; for Lk. 15†, *ibid.*, 6.

ABIAH, an English variant of *ABIAH* (§ 7. v.) in AV of 1 Sam. 8.2 1 Ch. 2.24 6.28[13] 7.8, corrected in RV to the more usual form, except in 1 Ch. 2.24 6.28[13].

ABIALBON, the Arbathite (אַבְיָלְבֹן הָעֲרַבְיִתִּי), § 4.

¹ Cp Barton, 'Kinship of gods and men among the ancient Semites,' *JBL* xv. 168 ff., especially 179 ff. (96).

[ΓΑΔ]ΑΒΙΑ Η ΥΙΟΣ ΤΟΥ ΑΡΑΒΩΘΕΙΟΥ [B], ΔΕΙΛΕΒΩΝ Ο ΑΡΑΒΩΘΕΙΑΣ [A], [ΤΑΛΚ]ΑΒΙΗΣ Ο ΣΑΡΑΒΙΔΩ [L], 2 S. 23.31, the name of one of David's 'thirty,' should in all probability be 'Abibaal a man of Beth-arabah' (so Bu., and partly Klo. and Ki.), the *al* (על) in *Abi-albon* being a relic of *Baal* (בַּעַל), and the final syllable *don* a corruption of *Beth* (בֵּית). עַבְיָלְבֹן, it is true, agrees with 1 Ch. 11.32 (עַבְיָלְבֹן הָעֲרַבְיִתִּי; אֶבְיָלֹן הַגַּרְצַיִתִּי [B], α. δ. ἀραβωθίτης [A], α. δ. ἀραβίτης [L]) in supporting the name *ABIEL* (see Dr. *TBS* 283); but we know that early names of persons contained the name *baal* as a title of Yahwè where later writers would have preferred to see *el* (see *BEEILIADA*).

T. K. C.

ABIASAPH (אַבְיָסָפִי, § 44; 'the (divine) father gathers' or 'removes' or [if the *N* be not original, see below] 'adds' [cp the popular etymologies of *JOSEPH*], unless it be supposed that P and the Chronicler adopted an ancient name indeed [Gray, *HPN* 244], but understood it in the sense 'father of Asaph' [*OT/C* 204 n.]; **ΑΒΙΑΣΑΡ** [B], -αφ [FL], Ex. 6.24 [P], one of the three sons of Korah, i.e. eponym of one of the three divisions of the Korahite guild of Levites, see *ASAPH*,

3. In 1 Ch. 6.23 [8] (אַבְיָסָפִי [B], -ασαφ [AL], אֶבְיָסָפִי [B], *Abiasaphi*, 6.37 [22] (אַבְיָסָפִי [BA], -ασαφ [L], 1.], אֶבְיָסָפִי; *Abiasaph*, 9.19 (אַבְיָסָפִי [BAL], אֶבְיָסָפִי) the name occurs also, without consonantal *n* as *EBIASAPH*, אֶבְיָסָפִי (Samar. text omits *n* in Ex. 6.24), which name ought to be read for that of *ASAPH* also in 1 Ch. 26: (אֶבְיָסָפִי; אֶבְיָסָפִי [B], אֶבְיָסָפִי [AL], אֶבְיָסָפִי. *Asaph*).

ABIATHAR (אַבְיָאֲתָר, § 44, i.e., 'the (divine) father is pre-eminent'; cp *ITHREAM*; אֲבִיָּאֲתָר [BNAAL]; in 1 Ch. 18.19, אֲבִיָּאֲתָר [N*]; אֲבִיָּאֲתָרֹס. Jos. [*Ant.* vi. 146]), the son of Ahimelech and descendant of Eli; the priestly guild or clan to which he belonged seems to have claimed to trace back its origin through Phinehas and Eliezer to Moses, who, in the early tradition (Ex. 33.7, E), guards the sanctuary of Yahwè and delivers his oracles. It was Abiathar's father, Ahimelech, who officiated as chief priest in the sanctuary of Nob when David came thither, fleeing from the jealous fury of Saul. Having no other bread at hand, Ahimelech gave the fugitives the holy loaves from the sanctuary. One of the royal couriers, however (see 1 S. 21.7 [8], with Dr.'s note), saw the act, and betrayed Ahimelech to Saul, who forthwith put the priests to death. No less than eighty-five (according to MT)¹ fell by Doeg's hands, and of the whole number Abiathar alone escaped.

It may be inferred from 1 S. 22.15 that David had before this contracted friendship and alliance with the house of Eli, and we can readily believe that, just as Samuel marked out Saul as the destined leader of Israel, so the priests at Nob, noting the tendency of the king to melancholy madness, and his inability to cope with the difficulties of his position, selected David as the future king and gave a religious sanction to his prospective claims (cp *DAVID*, § 3). Certain it is that the massacre of the priests at Nob told strongly in David's favour. The odium of sacrilegious slaughter clung to Saul, while David won the prestige of close friendship with a great priestly house. Henceforth David was the patron of Abiathar, and Abiathar was bound fast to the interests of David—'Abide thou with me,' said the warrior to the priest, 'for he that seeketh my life seeketh thy life' (1 S. 22.23). Moreover, Abiathar carried the ephod or sacred image into the camp of David: it was in the presence of this image that the lot was cast and answers were obtained from Yahwè: nor does it need much imagination to understand the strength infused into David's band by the confidence that they enjoyed supernatural direction in

¹ See *DAVID*, § 3 n.

their perplexities. Abiathar was faithful to David through every change of fortune. It was with the sanction of the sacred oracle that David settled at Hebron and became king of Judah (2 S. 2:1-3), and it was Abiathar who carried the ark, that palladium of Israel, which David used to consecrate Jerusalem, the capital of his united kingdom (1 K. 2:26). Abiathar maintained his sacerdotal dignity amidst the splendour of the new court, though later (we do not know when) others were added to the list of the royal chaplains—viz., Zadok, of whose origin we have no certain information, and Ira, from the Manassite clan of Jair,¹ while David's sons also officiated as priests (2 S. 8:17 f. 20:26). Zadok and Abiathar both continued faithful to their master during Absalom's revolt, and by means of their sons conveyed secret intelligence to the king after he had left the city.

When David was near his end, Abiathar along with Joab supported the claim of Adonijah to the throne, and consequently incurred the enmity of Solomon, the younger but successful aspirant. Solomon spared Abiathar's life, remembering how long and how faithfully he had served David. But he was banished from the court to Anathoth, his native place, and Zadok, who had chosen the winning side, became chief priest in his stead. To the men of the time, or even long after the time at which it happened, such a proceeding needed no explanation. It was quite in order that the king should place or displace the priests at the royal sanctuary. But in a later age the writer of 1 S. 2:27-36,² who lived after the publication of D, did not think it so light a matter that the house of Eli should be deprived, at a monarch's arbitrary bidding, of the priesthood which they had held by immemorial right. Therefore, he attributes the forfeiture to the guilt of Eli's sons. A 'man of God,' he says, had told Eli himself of the punishment waiting for his descendants, and had announced Yahwe's purpose to substitute another priestly line which was to officiate before God's 'anointed'—i.e., in the royal presence. A late gloss inserted in 1 K. 2:27 calls attention to the fulfilment of this prediction.

A special point which has occasioned some difficulty remains to be noticed. In 2 S. 8:17 [MT **ABIBAL** and Vg.] and 1 Ch. 18:16 [*ib.* and Pesh.; MT, however, reading AHIMELECH], instead of Abiathar b. Ahimelech it is Ahimelech b. Abiathar that is mentioned as priest along with Zadok. In 1 Ch. 24:63 as well, MT has this reading, in v. 6 also **ABIBAL** Pesh.—except that **GA*** reads *uol*; in v. 3 these versions all read 'Ahimelech of the sons of Ithamar,' while in v. 31 MT **ABIBAL** Vg. omit the phrase 'b. Abiathar, and Pesh. the whole passage. It is reasonable to suppose that this confusion is due to an early corruption of the text, and that in 2 S. 8:17 we should read with the Pesh. 'Abiathar b. Ahimelech' (so The. *ad loc.*; Baudissin, *AT Priesterthum*, 195; Dr. *ad loc.*). The Chronicler, however, must have had 2 S. 8:17 before him in its present corrupt form. In Mk. 2:26, by a similar confusion, David is said to have gone into the house of God and received the shewbread 'when Abiathar was high-priest.' In reporting our Lord's words the evangelist has confused Abiathar with Ahimelech, a mistake into which he was led by the constant association of David's name with that of Abiathar. Suggestions made to evade the difficulty—e.g., that father and son each bore the same double name, or that Abiathar officiated during his father's lifetime and in his father's stead—are interesting when we remember the great names which have supported them, but are manifestly baseless (see ZADOK, 1). See Bu. *Ki.Sa* 195f. W. E. A.

ABIB (אַבִּיב), *i.e.*, '[month of] young ears of barley'. See MONTH, §§ 2, 5.

¹ See, however, IBA, 3, where a Judahite origin is suggested.
² The section in its present form is from the school of the Deuteronomist. But the expression 'walk before my anointed' proves conclusively that there is an older substratum.

ABIDA, and (AV in Gen) Abidah (אַבִּידָה, § 44. 'the (divine) father knoweth'? cp Eliada, Beeliada, Jehouada; אַבִּי(ה)אָדָה [BAL], אַבִּי(ה)אָדָה [AV], אַבִּי(ה)אָדָה [L]; **ABIDA**), one of the five 'sons' of Midian, and grandson of Abraham by Keturah (Gen. 25:4 1 Ch. 1:33f). Unexplained, as yet, except that the same name occurs in Sab. inscriptions (אַבִּידָה, cp also יְרֵמָה, Hal. 192, 202, etc.).

ABIDAN (אַבִּידָן, § 44. 'the (divine) father is judge'; cp Homel; אַבִּי(ה)אָדָן [BAL], אַבִּי(ה)אָדָן [AV], אַבִּי(ה)אָדָן [L]; of Benjamin in the time of Moses (Nu. 1:11 2:22 7:66 10:24f). On the age of the name see Gray, *HP.V* 202, 244. Possibly P had a consciousness that *-dan* was archaic (cp DAN, § 1), and therefore suitable in the name of a tribal chief at the time of the Exodus. To infer with Homel (*AHT* 298-301) from such a name as Abidan that P's record is itself ancient, is critically unjustifiable. P also gives the names SHAPHAT and SHIPHAN, which are scarcely archaic.

ABIEL (אַבִּיֵּל, § 4, 44. 'God is father' (of the clan?); אַבִּי(ה)יֵל [BAL]; *ABIEL*).

1. Father of Ner and Kish (1 S. 9:1, also 14:51f, -*np* [B]); see ABER.

2. One of David's thirty mighty men (1 Ch. 11:32); see ABIALEON.

ABIEZER, AV **Abi-ezer** (אַבִּיעֶזֶר, § 44. 'the (divine) father is help,' cp Abiezer; אַבִּיעֶזֶר [BAL]; Judg. 6:34 etc.).

1. The clan from which Gideon sprang belonged to the Gileadite branch of the tribe of Manasseh. In Gideon's time its seat was at Ophrah (Judg. 6:24), an unidentified site, but apparently on the west side of Jordan. It is probable that the first settlements of the Manassites lay to the west of that river, but the date at which their conquests were extended to the eastward is not known (Josh. 17:2 אָרָה [B], אַבִּיעֶזֶר [AV], אַבִּיעֶזֶר [L]; Judg. 6:11:24). In Nu. 26:30 the name Abiezer appears, not as in the parallel 1 Ch. 7:18, but in an abbreviated form as IEZER (יְעִזֶר, AV JEEZER, אַבִּיעֶזֶר [BAL]), and the gentilic as IEZERITE (יְעִזֶרִי, AV JEZERITE, אַבִּיעֶזֶרִי [B], אַבִּיעֶזֶרִי [AL]). In 1 Ch. 7:18 Abiezer finds a place in the Manassite genealogy as son of Hammolecheth the sister of Machir b. Manasseh. The patronymic ABIEZERITE AV, ABIEZERITE RV (אַבִּיעֶזֶרִי, occurs in Judg. 6:11:24) אַבִּיעֶזֶרִי בֶן אַבִּיעֶזֶר [B] 1 π. אַבִּיעֶזֶר, π. τ. אַבִּיעֶזֶר [A]; π. σ. ε. אַבִּיעֶזֶר [L] and אַבִּיעֶזֶרִי as a gloss, see Moore, *ad loc.* 8:32 (אַבִּיעֶזֶר [B], אַבִּיעֶזֶרִי [A], אַבִּיעֶזֶרִי a. [L]).

2. Of Anathoth, one of David's heroes (2 S. 23:27, אַבִּיעֶזֶר [B]; 1 Ch. 11:30:27:12; see DANIEL, § 11:1:1).

ABIGAIL (usually אַבִּיגַיִל, but אַבִּיגַיִל in 1 S. 25:18 Kt., אַבִּיגַיִל in 1 S. 25:32, 2 S. 3:3 Kt., and so RV ABIGAL) in 17:25; and, perhaps with * and transposed, אַבִּיגַיִל in 1 S. 25:33:6; possibly we should point אַבִּיגַיִל, § 45; so oftenest אַבִּיגַיִל, sometimes אַבִּיגַיִל; cp BDB *Lex.* 1:17: אַבִּי(ה)גַיִל [BAL], but in 1 S. 25: אַבִּיגַיִל [A]; meaning uncertain: 'Abi' is a divine title (see NAMES, § 44, and cp *HPN* 77, 85).

1. Wife of NABAL (*q.v.*), and, after his death, of David (1 S. 25). Her tactful speech against the causeless shedding of blood (1 S. 25:22-31) is noteworthy for the history of Israelitish morality. Like Ahinoam, she accompanied David to Gath and Ziklag, and was taken captive by the Amalekites, but was recovered by David (1 S. 27:3:30:5:18). While at Hebron she bore David a son (see DANIEL, 4).

2. A sister of David, who married Jether or Ithra, and became the mother of Amasa, 2 S. 17:25 (see above). 1 Ch. 2:16:17. In MT of the former passage, her father

1 B omits Abigail in 2:16, and BA read אַבִּיעֶזֶרִי for אַבִּיעֶזֶרִי of L.

is called Nahash (an error also found in Θ^B , and clearly produced by the proximity of that name in v. 27; Θ^+ gives the correct reading, 'Jesse, $\epsilon\sigma\sigma\alpha\iota$, and her husband is called 'the Israelite' (so MT; $\epsilon\sigma\alpha\gamma\lambda\epsilon\iota\tau\eta\varsigma$ [B] $\epsilon\sigma\sigma\alpha\iota$), which, however, seems to be a corruption from 'the Jezreelite' ($\epsilon\sigma\alpha\gamma\lambda\epsilon\iota\tau\eta\varsigma$ [L], *de israeliti* [ed. Rom.], *de Hiesreli* [cod. Amiat.]), just as 'Ahihoam the Jezreelitess' (1 S. 27) becomes in B $\alpha\chi\epsilon\iota\omega\alpha\mu\alpha\ \eta\ \epsilon\sigma\alpha\gamma\lambda\epsilon\iota\tau\iota\varsigma$. It is true, in 1 Ch. 12. Jether is called 'the Ishmaelite' ($\epsilon\sigma\mu\alpha\gamma\lambda\epsilon\iota\tau\eta\varsigma$ [L.C.], *ismahelites*), but this is plainly a conjectural emendation of 'the Israelite' (1. indeed has $\epsilon\sigma\mu\alpha$; Pesh. om.). In 2 S. 17.25 the same emendation appears in Θ^A ($\epsilon\sigma\mu\alpha$). David's sister was not likely to marry an Ishmaelite. Heysse wonders to what town Jerome's reading can refer. We can easily answer the question. It was the Jezreel situated in Judah (Josh. 15.56), from which not only David's brother-in-law but also his first wife Ahihoam probably came (so Marq. Fund. 24; see JEZREEL, i. 2). T. K. C.

ABIGAL ($\alpha\beta\iota\gamma\alpha\iota$), 2 S. 17.25 RV⁺. See ABIGAIL, 2.

ABIHAIL ($\alpha\beta\iota\eta\alpha\iota$), § 45, 'the (divine) father is strength,' cp. Sab. $\alpha\beta\iota\eta\alpha\iota$ and the S. Arabian woman's name, Ili-hail [Hommel, *AHT* 320]; written $\alpha\beta\iota\eta\alpha\iota$ [Gi. Bā.] in 2 and 4; Hommel in the Ebers Festschrift, 29; cp. *AHT* 320 compares the same name [with η] in S. Arabian inscriptions from Ghazzat (Gaza); but $\alpha\beta\iota\eta\alpha\iota$ is supported by Θ ; $\alpha\beta\epsilon\iota\chi\lambda\alpha\iota$ [BAL], $\alpha\beta\iota\eta\alpha\iota$, *ABIHAIL, ABIHAIL*.

1. Father of ZURIEL (Nu. 3.35†, $\alpha\beta\iota\chi\lambda\alpha\iota$ [F]).
2. Wife of Abishur the Jerahmeelite (1 Ch. 2.29† $\alpha\beta\iota\eta\alpha\iota$ [Gi. Bā.]; $\alpha\beta\epsilon\iota\chi\lambda\alpha\iota$ [B], $\alpha\beta\epsilon\tau\epsilon$ [A], $\alpha\beta\epsilon\eta\alpha$ [1.]).
3. A Gadite (1 Ch. 5.14†, $\alpha\beta\epsilon\iota\chi\lambda\alpha\iota$ [B.A.], $\alpha\beta\epsilon\eta\alpha$ [1.]).
4. Daughter of Eliab, David's brother, and wife of Rehoboam (2 Ch. 11.14†, $\alpha\beta\iota\eta\alpha\iota$ [Gi. Bā.], $\beta\alpha\iota\alpha\upsilon$ [B], $\alpha\beta\epsilon\tau\epsilon$ [B⁺], $\alpha\beta\epsilon\tau\alpha\lambda$ [A], $\tau\omega\upsilon\ \pi\alpha\tau\epsilon\rho\varsigma\ \alpha\iota\tau\omega\upsilon$ [1., who reads $\alpha\beta\epsilon\tau\alpha\lambda$]).
5. Father of Esther, whose name however is given as Aminadab by Θ (Esth. 2.15 $\alpha\mu\epsilon\iota\sigma\alpha\delta\alpha\beta$ [BAL.], and $\delta\alpha\upsilon$ [N]).

ABIHU ($\alpha\beta\iota\eta\omega$), § 44, 'my father is he': $\alpha\beta\iota\omega\gamma\Delta$ [BAL.], *i.e.* $\alpha\beta\iota\eta\omega\upsilon$ $\alpha\beta\iota\omega\gamma\epsilon\upsilon\phi$ [A in Ex. 6.23], *ABIHU*. See NADAB AND ABIHU.

ABIHUD ($\alpha\beta\iota\eta\delta$), § 45, 'the (divine) father is glory,' a name probably appearing in contracted form in EHUD (*g.v.* i. and ii.), cp. Ammihud, Ishhud, as also $\alpha\beta\iota\eta\delta$ [*abi hud*], an almost certain correction of $\alpha\beta\iota\eta\epsilon$ [EV 'everlasting father'] in Is. 9.5, which, however, is to be treated as an Arabic *kunya*, 'father of glory' [Che. 'Isaiah,' in *SBOT*]; $\alpha\beta\iota\omega\gamma\Delta$ [BAL]; $\alpha\beta\iota\eta\delta$; *ABIHUD*, a Benjaminite (1 Ch. 8.3†).

ABIJAH ($\alpha\beta\iota\eta\alpha$), § 44, 'Yahwè is father'; on names ending in η , $\eta\alpha$, see NAMES, § 24; $\alpha\beta\epsilon\iota\chi\lambda\alpha\iota$ [BAL].

1. Son of Rehoboam for a 'daughter of Absalom' (see MAACAH, 3), and for three years king of Judah (somewhere about 900 B.C.; see CHRONOLOGY, § 32). The writer of the 'epitome' in Kings (see Dr. *Intrad.* 178) only tells us (1 K. 15.1-7)† that he continued his father's war against Israel, and that he

† A mere scribal error, A for A; so invariably in the case of Abigail.

2 Yet BA have $\alpha\beta\iota\omega$ (*i.e.* $\alpha\beta\iota\eta$) 5 times for Abijam. See ABIJAH, 1 end.

3 In Θ^B AL this name is regularly substituted for Abihu of MT exc. Ex. 6.23 [A]. See ABIHU.

4 According to Klo. 1 K. 15.5†, should run thus, 'Because David had done that which was right . . . all the days of his life.' From 'all the days of his life' to 'Abijam' (so read in accordance with the correction in v. 7) and Jeroboam is probably a late gloss from the margin. The notice respecting the war between Abijah and Rehoboam seems to be derived from 2 Ch. 12.2, where alone it is in print.

'walked in all the sins of his father;' and, since the first of these notices is very possibly due to an interpolator, we may confine our attention to the second. Why then does the epitomist take this unfavourable view of Abijah? As Stade points out, he must have read in the Annals of the kings of Judah statements respecting this king which, if judged by the standard of his later day, involved impiety, such as that Abijah, unlike his son Asa, tolerated foreign worship. It is surprising to find that the Chronicler (2 Ch. 13) draws a highly edifying portrait of Abijah, whom he represents as delivering an earnest address to Jeroboam's army (for 'there was war between Abijah and Jeroboam') on the sin of rebellion and schism, and as gaining a great victory over the Israelites, because he and his people 'relied on Yahwè the God of their fathers.' This, however, is a late Midrash, and has no historical value. The Chronicler (or his authority) wished to emphasize the value of the true ritual, and did this by introducing an artificial episode into an empty reign. Cp. Bennett, *Chron.* 326 ff. (Pesh. always $\alpha\beta\iota\eta$); Jos. *abias*: in 1 K. 14.3; 15.1†, MT has five times the corrupt reading $\alpha\beta\iota\eta$ ABIJAM, $\alpha\beta\iota\omega\upsilon$ [BA], $\alpha\beta\iota\alpha$ [L.])

2. A son of Jeroboam I., king of Israel, who died in his father's lifetime.† The account of his illness is given in 1 K. 14.1-18 (MT Θ^A), and in another recension in Θ^B immediately after the narrative of Jeroboam's return from Egypt on the death of Solomon (3 K. 12.24 ff. [Swete], 13.1-13 [L.]). If we accept the former version as original, we are bound to bring it down to the age which was under the influence of Dt., for the prophecy in 1 K. 14.7-16 is in tone and phraseology closely akin to similar predictions in 16.1-4, 21.20-24, 2 K. 9.7-10, the Deuteronomistic affinities of which are unmistakable. Nor is it possible to simplify the narrative without violence. The Θ^B version, on the other hand, can, without arbitrariness, be brought into a simple and very natural form. Jeroboam is not yet king. His wife, not being queen, has no occasion to disguise herself, and Abijah simply predicts the death of the sick child, without any reference to sins of Jeroboam which required this punishment. The writers who supplemented and expanded the older narrative were men of Judah; the original story, however, is presumably Israelitish. (See Kue. *Eint.* 25; St. *GVV* i. 350 n.; Wi. *ATUnters.* 12 ff.) Cp. JEROBOAM, 1.

3. A Benjaminite, 1 Ch. 7.3† (AV ABIAH; $\alpha\beta\iota\omega\upsilon\delta$ [B], $\alpha\beta\iota\omega$ [A]).
4. Wife of Hezron, 1 Ch. 2.24† (EV ABIAH).
5. Son of the prophet Samuel, 1 S. 8.2 (AV ABIAH; $\alpha\beta\iota\eta\alpha$ [L]), 1 Ch. 6.28 [13†] (EV ABIAH).
6. The eighth of the twenty-four courses of PRIESTS (*g.v.*)—that to which Zechariah, father of John the Baptist, belonged, 1 Ch. 24.10 (AV ABIAH); 1 K. 1.5† (AV ABIA).
7. Mother of King Hezekiah, 2 Ch. 29.1. See ABU.
8. Priest in Zerubbabel's band (see EZRA, ii. § 66), Neh. 12.4 ($\alpha\beta\iota\alpha\varsigma$ [L], 17 [B om. *vv.*]); perhaps = No. 6.
9. Priestly signatory to the covenant (see EZRA, i. § 7), Neh. 10.7 [B]. T. K. C.—W. E. A.

ABIJAM ($\alpha\beta\iota\eta\alpha$), 1 K. 14.1†. See ABIJAH, 1.

ABILENE ($\alpha\beta\epsilon\iota\lambda\eta\eta\eta\eta$ [BA; W. and H.], $\alpha\beta\iota\lambda$, [N⁺; Ti.]), given in Lk. 3.1 as the tetrarchy of Lysanias, at the time when Christ's ministry began, was a territory round Abila ($\alpha\beta\iota\lambda\alpha$), a town of some importance in Antilibanus, and known to both Josephus and Ptolemy as Abila of Lysanias (*A. η Λυσανίου*), to distinguish it from others of the same name, especially Abila of the DECAPOLIS (*g.v.*). The Antonine and Peutinger Itineraries place it 18 R. m. from Damascus on the way to Heliopolis or Baalbek, which agrees with that portion of the gorge of the Abana in which the present village, Siḡ Wādy Barādā, lies. Not only are there remains of a large temple on the precipitous heights to the E. of this village, with ancient aqueducts and a Roman road,

1 It is defended, however, by Jastrow, *JBL* xiii. 114 ('94).

2 *i.e.* $\alpha\beta\iota\eta$, see ABIHU.

3 Josephus calls this son 'Oβίμης (*Ant.* viii. 11).

ABINOAM (אַבִּינוֹאָם) § 45, 'the (divine) father is plausiveness', cp **ABINAM**, **Ēlīnām**; אֲבִינְעָם [BAL], אֲבִינְעָם [A in Judg. 4:12]; **ABINOEM**, father of Barak [Judg. 4:6-12 5:14 f.].

ABIRAM (אַבִּירָם) § 44—i.e., 'the Father is the High One', cp **Abi. Nāmis** with § 2: אֲבִירָם [BA], אֲבִירָם [L]; אֲבִירָם; **ABIRUAM**, another form of Abu-ram, which (Abu-rāmu) is a well-attested Babylonian and Assyrian name (it occurs, e.g., in a contract-tablet of the time of Abil-sin, 2324-2300 B.C., and in the Assyrian eponym-canon under B.C. 677).¹ The second element in the name (-ram) is a divine title (cp 'Ράμας ὁ ὑψίστος θεός, Hesych.), but is also, in the plur., of all heavenly beings (Job 21:22). Parallel Hebrew names are Abi-ram, Adoni-ram, Jeho-ram, Malchi-ram (see also **ABRAM**). Ahiramu is the name of a petty Babylonian king under Āsur-nāsir-pal, and Malik-ram-mu that of a king of Edom in the time of Sennacherib (COT 1:95, 281).

1. A fellow conspirator of **DATHAN** (q.v.), Nu. 16 (אֲבִירָם [A once], אֲבִירָם [F twice]); Dt. 116 Ps. 106:17 and (AV **ABIRON**) Eccles. 15:1, 4 Matc. 2:17 f. אֲבִירָם [V^d].

2. Eldest son of Hiel the Bethelite, who died when his father laid the foundation of Jericho anew; 1 K. 16:14 f. אֲבִירָם; L. om. verse; cp Jos. 6:26 אֲבִירָם. See **HIEL**. T. K. C.

ABIRON (אַבִּירֹן), Eccles. 45:18 f. AV. See **ABIRAM**, 1.

ABISEI (**ABISSEI** etc.), 4 Esd. 1:7. See **ABISHUA**, 2.

ABISHAG (אַבִּישָׁג) § 43, mean=אֲבִישָׁג; אֲבִישָׁג [B], אֲבִישָׁג [A], אֲבִישָׁג [L]; אֲבִישָׁג; אֲבִישָׁג the Shunammite, David's concubine (1 K. 1:14), afterwards sought in marriage (2:13 f.) by **ADONIJAH**, 1.

ABISHAI (אַבִּישַׁי) § 45, written אֲבִישַׁי² in 2 S. 10:10 and always [five times] in Ch., where moreover A omits final *y*; meaning doubtful, cp **JESSE**, **AMASA**, and for *לַעֲשֵׂה* *v. s. v.* see **ABNER**; אֲבִישָׁג [B], אֲבִישָׁג [A], אֲבִישָׁג [A], אֲבִישָׁג [A], אֲבִישָׁג [L], also seven times B, and three times A, אֲבִישָׁג [A], 1 Ch. 2:16, אֲבִישָׁג [A], 2 S. 3:39, אֲבִישָׁג [L], 2 S. 20:6], the brother of Joab, is mentioned immediately after the 'first three' and at the head of 'the thirty' in the list of David's worthies (2 S. 23:18 f.; 1 Ch. 11:20 f.); reading 'thirty' for 'three' with **SBOT** (after, *Pesh.*). He was one of David's close associates during his outlawry, and was his companion in the visit to Saul's camp on the hill of Hachilah (1 S. 26:6). He was faithful to him in Absalom's rebellion (2 S. 16:9), commanded a third part of the army (2 S. 18:2), saved David's life when it was threatened by a Philistine (2 S. 21:16-17), and, according to the Chronicler (1 Ch. 18:12), slew 18,000 Edomites in the Valley of Salt (but see **JOAB**, 1).

ABISHALOM (אַבִּישָׁלֹם), 1 K. 15:2 10 f. See **ABSALOM**, 1.

ABISHUA (אַבִּישׁוּא), § 44, for view of Lag, see **ABNER**; 'the (divine) father is opulence'? cp **MALCHISHUA**, and *Abi-šua*, *Wi. GI* 130 n. 3. See also **HOM. AHT** lii. 108 n. 209 n. 1, *ZDMG* xlix. 525 [95].

1. A son of **BELA** (q.v. ii. 2), 1 Ch. 8:4 (אַבִּישׁוּא³ [B], אֲבִישׁוּא [A], אֲבִישׁוּא [L]).

2. b. Phinehas, b. Eleazar, b. Aaron (1 Ch. 6:4 f. [5 20 f.], 30 [35], אֲבִישָׁג [BA], אֲבִישׁוּא [L]; Ezra 7:5.

1 See **Hummel, PNB** 4 xvi 210 [94]; **Sohs, COF** ii. 187.

2 **Fornia** and **Maspéro** connect this name with **Ab-sha**, the Egyptian form of the name of the Asiatic chief represented on a famous wall-painting at Beni-Hasan. But subsidiary evidence is wanting. See **Journées**, 1, 3, 10, and cp **WMM, Art. u. Ezr.** 36 n. 2. **Hommel (AHT** 53) connects **Ab-sha** or **Elshua** with **Abishua**.

3 This presupposes אֲבִישָׁג, a name for which there is no parallel in the OT, cp **SAMSON**, **SHIMSHAI**.

אַבִּישׁוּא [BAL] = 1 Esd. 8:2, **ABISUM** [AV], i.e., אֲבִישׁוּא [243, 248], RV **ABISUE** (אַבִּישׁוּא [B], אֲבִישׁוּא [A], אֲבִישׁוּא [L]). Called **ABISEI** in 4 Esd. 1:7 (1880 [ed. Bensly], *Abisaei* [cod. Amb.]).

ABISHUR (אַבִּישׁוּר) § 44, 'the (divine) father is (as) a wall'? cp **Sab. אַבִּישׁוּר**, Assy. *Abidūrā*; אֲבִישׁוּר [BA], אֲבִישׁוּר [L]; **ABISUR**, b. Shammai the Jerahmeelite (1 Ch. 2:28 f.). **Derenbourg (REF, 1880**, p. 58) gives אֲבִישׁוּר as a Himyaritic divine title (Hal. 1:8, 5). But the second part of **Abi-shur** may be a corruption of אֲבִישׁוּר; cp **ABISHAHAR**.

ABISUM, RV **Abisue** (אַבִּישׁוּמ [243 etc.]), 1 Esd. 8:7 = **Ezr.** 7:5, **ABISHUA**, 2.

ABITAL (אַבִּיטָל) § 45, 'my father is dew'? cp **HAMUTAL**; but should not these names be **Abitub** (אַבִּיטֹב), **Hamuṭub** [cp **AHITUB**]? A name compounded with טֹב seems very improbable. ל and כ might be confounded in Pالمyrene characters; **ABITAL**; wife of **David**, mother of **Shephathiah**; 2 S. 3:4, 1 Ch. 3:3 f. (אַבִּיטָל, תּוֹכַח אֲבִי. [B]; אֲבִיטָל. [A]; -אָבִיטָל, -אָבִיטָל [L]). In 2 Ch. 36:2, אֲבִישׁוּר אֲבִישׁוּר for **HAMUTAL**, the name of **Jehoahaz's** mother. T. K. C.

ABITUB (אַבִּיטֹב): perhaps properly, as in versions, **ABITOR**, 'the (divine) father is good,' see **NAMES**, § 45; cp **Aram. אַבִּיטֹב**; אֲבִיטֹב [BAL]; **ABITOB**, b. **Shaharaim** (1 Ch. 8:17 f.).

ABIUD (אַבִּיוּד [BA], -וּיָד [N*]), i.e., **Abihud**, or **Abihu**, son of **Zerubbabel**, and ancestor of **Joseph**, husband of **Mary** (Mt. 1:13), see **GENEALOGIES OF JESUS**, § 2 c.

ABNER (אַבְנֵר) § 44, but in 1 S. 14:50 אֲבִנֵר; אֲבֵנְנִיָּה [BAL], -עֲנִיָּה [A five times], אֲבֵנִיָּה [A twice]; **ABNER**, *Lag. Ueberl.* 75, holds that **Abner** = אֲבִנֵר [N] = 'son of Ner.' This is suggested by the אֲבִנֵר form 'Abenner'; but cp אֲבִנֵר = אֲבֵנְנִיָּה, אֲבֵנְנִיָּה = *Βοροβία*. 'Abner' or 'Abiner' might mean 'my (divine) father is (as) a lamp'. Captain of the host under **Saul** and under **Ishbaal**. As a late but well-informed writer states, he was **Saul's** first cousin (1 S. 14:50, cp 9:1), **Ner** the father of **Abner** and **Kish** the father of **Saul** being both sons¹ of **Abiel**. The fortunes of **Saul** and **Abner** were as necessarily linked together as those of **David** and **Joab**, but tradition has been even less kind to **Abner** than to his master. Of his warlike exploits we hear nothing, though there was 'sore war against the Philistines all the days of **Saul**' (1 S. 14:52), and tradition loved to extol the prowess of individual heroes. Even at the battle of **Gilboa** there is no mention of **Abner**, though it was a part of his duty, according to **David**, or at least an early narrator, to guard the sacred person of the king (1 S. 26:15). All that we hear of him in **Saul's** reign is that he sat next to the king at table (1 S. 20:25), that, according to one tradition, he introduced **David** to the presence of **Saul** (1 S. 17:57), and that he accompanied the king in his pursuit of **David** (1 S. 26:5 f.). It was natural that upon **Saul's** death he should take up the cause of **Ishbaal** (**DAVID**, § 6). It suffices to mention here some personal incidents of that unhappy time. That **Abner** slew his pursuer **Asahel** (one of **Joab's** brothers) was, doubtless, not his fault but his misfortune. But his motive in passing over from **Ishbaal** to **David** was a shameful one. **Ishbaal** may indeed have been wrong in interpreting **Abner's** conduct to **Rizpah**, **Saul's** concubine, as an act of treason (cp 2 S. 16:21 1 K. 2:22); but to give up the cause of the **Benjamite kingdom** on this account, and transfer his allegiance to **David**, was

1 In 1 S. 14:51 read אֲבִנֵר for אֲבִנֵר with **Jos. Ant.** vi. 6, 6, followed by **Dr., Bu., Klo.** The text of 1 Ch. 8:33 = 9:39 should doubtless run, 'And **Ner** begat **Abner**, and **Kish** begat **Saul** (see **Kau.** note in *HS*).

ABOMINATION

ignoble. The result was not what he had expected—the highest place under a grateful king. He had just left David with the view of procuring a popular assembly for the recognition of David as king of all Israel, when Joab entered him back, and treacherously assassinated him beside the gate of Hebron (see SIRAH, WELL OF), partly perhaps from jealousy, partly in revenge for the death of Asahel (2 S. 3.30).

Abner's death was regarded by David as a national calamity. 'Know ye not,' he said, 'that a prince and a great man is fallen this day in Israel?' He ordered a public mourning for Abner, and himself sang an elegy over his grave, a fragment of which is preserved (2 S. 3.31-39); see POETICAL LITERATURE, § 4. iii. (h). The Chronicler gives Abner a son named JAABIEL (1 Chr. 3.24).

T. K. C.

ABOMINATION, a word occurring over a hundred times in the OT as a rendering of four¹ somewhat technical expressions (sometimes paraphrased 'abominable thing,' etc.).

1. **שֶׂמֶת** (*sigmet*) occurs four times in *exilic* and post-exilic writings (Ez. 4.14 [D 22], Lev. 7.18 *מִמֵּנָהּ*; 19.7 *אֲבוֹתָיו*; Is. 65.4† [עֲבֵרֵי רִשְׁוֹ, 'broth', *לֹמֶזֶן* . . . *מֵמִיּוֹלָמָהּ*; Kt. D 78, 'scraps']) as a technical term for sacrificial flesh become stale (*κρέας ἑλών* or *βέβηλον* in Ez. [BAQ]), which it was unlawful to eat. See SACRIFICE. In the last passage WRS regarded *sigmet* as carrion, or flesh so killed as to retain the blood in it (RS² 343 n. 3).

2. **שֶׁבֶת** (*shebet*), also confined to *exilic* and post-exilic writings² (Ez. 8.8 Lev. 7.21 11 *מִמֵּנָהּ* Is. 66.17†; *βδέλυγμα* [BA]), is a term for what is taboo. See CLEAN AND UNCLEAN.

3. **רִיבָה** (*riḥbas*, variously rendered *βδέλυγμα*, *εἰδωλον*, etc.), a much commoner word, of the same form as (1), and from the same root as (2), occurring once in the present text of Hos. 9.10, is freely used (over twenty times), chiefly from the Exile onwards, as a contemptuous designation oftentimes of images of deities or of foreign deities themselves. See below, ABOMINATION OF DESOLATION AND IDOL, § 2 f.

4. **עֲוֹנוֹת** (*ʿōvōt*; *βδέλυγμα*), a word of uncertain etymology frequently occurring from Dt. onwards (esp. in Ezek.), is by far the commonest of these terms. It designates what gives offence to God (Dt. 12.31) or man (Pr. 29.27), especially the violation of established custom. The former usage is the more common; it applies to such things as rejected cults in general, Dt. 12.31 (see IDOL, § 2 f.), child-sacrifice (Jer. 32.35), ancestral worship (Ez. 43.8), images (Dt. 27.15), imperfect sacrificial victims (Dt. 17.1), sexual irregularities (Ezek. 22.1), false weights and measures (Dt. 25.16), etc. The latter usage, however, is not rare (esp. in Prov.). Thus J tells us eating with foreigners (Gen. 43.32), shepherds (46.34), Hebrew sacrifices (Ex. 8.26 [22]), were an abomination to the Egyptians (see EGYPT, §§ 19, 31).

ABOMINATION OF DESOLATION, THE (ΤΟ ΒΔΕΛΥΓΜΑ ΤΗΣ ΕΡΗΜΟΣΕΩΣ), an eschatological expression in the apocalyptic section (Mt. 24.15-28) of the discourse of Christ respecting His ΠΑΡΟΥΣΙΑ (Mt. 24.15 = Mk. 13.14). The passage containing the phrase runs thus in Mt.—'When therefore ye see the abomination of desolation, which was spoken of by Daniel the prophet, standing (ἐστῶς) in the holy place (let him that readeth understand), then let them that are in Judea flee unto the mountains.' The reference to Daniel, however, which is wanting in Mk., is clearly an addition of Mt. (cp Mt. 2.23 4.14, etc.), and Mark's *ἐσθηκότα* (masc.),

¹ It is also used in 1 S. 13.4 for **שָׂמֶת**, the word rendered 'stank' in 2 S. 106 (AV).

² But in Is. 46. Duham and Cheyne read **שֶׁבֶת**; so also Sam. and some MSS. at Lev. 7.21. In Lev. 11.10 **שֶׂמֶת** we may point **שֶׁבֶת**, and in Ez. 8.10 read **עֲוֹנוֹת** (with B, Co.).

ABOMINATION OF DESOLATION

being more peculiar than Matthew's *ἐσῶς* (neut.), is to be preferred. Both reports agree in inserting the parenthetic appeal to the trained intelligence of the reader, which, being both natural and in accordance with usage in an apocalyptic context, it would be unreasonable to set aside as an 'ecclesiastical note' (Alford). There is an exact parallel to the clause in Rev. 13.18 (cp 17.9): 'Here is wisdom: let him that hath understanding count the number of the beast,' and a parallel of sense in Rev. 27.13: 'He that hath an ear (or, if any man have an ear), let him hear,' i.e. let him understand (as Is. 33.19); the best commentary on which is a *terzina* in Dante (*Inf.* 961-63), 'O voi, che avete gl' intelletti sani,' etc. In fact, the whole section is a *μυστήριον*, not of the class in which Jesus delighted (Mt. 13.11), nor expressed in his highly original style, and is easily separable from its context. It is probably (apart from some editorial changes) the work of a Jewish writer, and was inserted to adapt the discourse, which had been handed down (itself not unaltered) by tradition, to the wants of the next generation.

Some light is thrown upon it by the 'little apocalypse' in 2 Thess. 2.1-12, which evidently presupposes an eschatological tradition (see ANTICHRIST). It is there explained how the *παρουσία* of Christ must be preceded by a great apostasy and by the manifestation of the 'man of sin,' whose *παρουσία* is 'with lying signs and wonders,' and who 'opposest and exalteth himself against all that is called God or that is worshipped, so that he sitteth in the sanctuary (*ναός*) of God, setting himself forth as God,' but whom 'the Lord Jesus will slay with the breath of his mouth.' The resemblance between the two Apocalypses is strong, and we can hardly avoid identifying the 'abomination of desolation' in Mt. and Mk. with the 'man of sin' in 2 Thess. That the one stands and the other sits in the sanctuary constitutes but a slight difference. In both cases a statue is obviously meant. The claimant of divinity would not, of course, be tied to one place, and it was believed that by spells a portion of the divine life could be communicated to idols, so that the idol of the false god was the false god himself. In both cases, too, there is a striking resemblance to the *θηρία* of Rev. 13, the second of whom, indeed, is said to be represented by an image which can speak, trickery coming to the help of superstition (Rev. 13.15). In fact, the 'abomination' or 'the man of sin' is but a humanised form of the original of these *θηρία*—viz., the apocalyptic dragon, who in his turn is but the Hebraised version of the mythical dragon *Tiamat*, which was destroyed by the Babylonian light god (see CREATION, § 2). We can now recover the meaning of *τῆς ἐρημώσεως*. The 'abomination' which thrusts itself into the 'holy place' has for its nature 'desolation'—i.e. finds its pleasure in undoing the divine work of a holy Creator.¹

But why this particular title for the expected opponent of God? Was derived from the first of the great apocalypses. In Dan. 9.27 11.31 12.11, according to the exegetical tradition in B, mention is made (combining the details of the several passages) of an apostasy, of an 'abomination of desolation' (or 'of desolations') in the sanctuary, of a time of unparalleled tribulation, of resurrection, and of glory. That the original writer meant 'abomination' to be taken in the sense described above, and the appended qualification to be rendered 'desolating' or 'of desolation,' cannot indeed be said. **קִרְשָׁי** as used in Daniel means 'image of a false god' (cp 1 K. 11.5; 2 K. 23.13), and the most natural rendering of **קִרְשָׁי** and (if the text be correct) **קִרְשָׁי** or **קִרְשָׁי** is 'appal-

¹ It is no objection that in 1 K. 11.31 the *ἐπιμαρτυρία* is referred to the burning in S.E. Jerusalem by Roman armies: cp Is. 46.25 x. 11.7, where the passages in Dan. are explained of the desolation by the Romans. The true meaning must be decided by Matthew and Mark, where nothing is said of injuries from invaders. The memory of the experiences of 70 A.D. suggested to Luke a new interpretation of the traditional phrase.

ling.' The phrase appears to be an intentional alteration of *baal šāmēm* ('heaven's lord.' That this was a current title of Zeus may be inferred from the Syriac of 2 Macc. 62, where the temple at Jerusalem is called by the emissary of Antiochus 'the temple of *bē'el shemin'* (see Nestle, *ZATW* iv. 248 [84]; cp his *Marginalien u. Materialien*, 35 f.; G. Hoffmann, *Ueb. ein. phön. Inschr.* 1889, p. 29; Bevan, *Daniel*, 193). The author of Daniel (whose meaning is correctly given by *MT*) contemptuously says, 'Call it not 'heaven's lord,' but "an appalling abomination"; and the object to which he refers is an image of Olympian Zeus, which, together with a small *βωμός*, the agents of Antiochus set up on the great altar (*θυσιαστήριον*) of burnt offerings. The statement in 1 Macc. 159 is not destructive of this theory, for altars and idols necessarily went together, and the phrase of the Greek translator of the Hebrew original in *v. 54* *ἡ βωμὸς ἐρημώσθη*; cp *ἡ βωμὸς ἐρημώσθη*, 67) might be used equally well of both or of either.² All this, however, had been forgotten when the apocalyptic section in Mt. 24 and Mk. 13 was written.

Another (a highly plausible) interpretation of the little evangelical apocalypse is given by Spitta (*Die Offenbarung Johannis*, 493-497), who thinks that it was written in apprehension of the erection of a statue of Caligula in the temple (see Schür. *Hist.* ii.). This implies that *τὸ βδέλυγμα ἐρημώσθη* means the statue of a historical king who claimed to be the supreme God, which, considering the nature of the context, is improbable, and is not supported by the use of the Hebrew phrase in Daniel. It is, no doubt, highly probable that apocalyptic writers regarded the mad Caligula as a precursor of the expected embodiment of the principle of 'lawlessness' (*ἀνομία*, 2 Thess. 27); but, without putting some violence on their inherited eschatological phrases, they could not have said that he was *ἐρημώσθη* or *ἀνομία* in person. For, after all, a Roman emperor could not be a purely destructive or lawless agent. Spitta's view, however, is preferable to that of Weiss, who, appealing to Lk. 21²⁰, understands the 'abomination' to be the Roman armies; and to that of Bleek and Alford, who explain it of the desecration of the holy place by the Zelots (Jof. *BJ* iv. 36-8). For the criticism and exegesis of the difficult passages, Dan. 9²⁷ 11³¹, see the commentary of Bevan and the translation and critical notes in Kau, *HS*; cp also Van Leenpe's treatise on the seventy year-weeks of Daniel (Utrecht, 1888), where it is proposed, on amply sufficient grounds, to change the impossible *וְתֵלַע בְּנֵי אָדָם* (9²⁷) into *וְתֵלַע אָדָם*, 'and instead thereof.' The greatest problem is how to explain or rather correct *וְתֵלַע אָדָם* in *וְתֵלַע אָדָם* (11³¹), for *וְתֵלַע אָדָם* we should perhaps read *וְתֵלַע אָדָם*, or delete 'אָדָם' as a gloss from 9²⁷. There is a similar problem in 8¹³.

T. K. C.

ABRAHAM (אַבְרָהָם, § 44; אַבְרָהָם [BAL]; once אַבְרָהָם [A]). The name has no meaning in

1. **Name, etc.** Hebrew, and seems to be another form of *ABRAM* (*q.v.*), due probably to a misunderstanding of an early orthography.³ In J and P, however, the latter is represented as the original name, which was changed at a critical point in the patriarch's life into Abraham (Gen. 17.5, P, where the etymology is a mere word-play; on J's narrative, see Fripp, *Gen.* 53). It is only from the time of Ezekiel

¹ See K^o. *Bibl.* 430.

² Ges., Hertz, Gratz, and others explain the 'abomination' of a statue of Zeus; Hitz., Hilgenfeld, Bleek, Kue., of an altar. The insertion of the didactic story of Nebuchadnezzar's golden image slightly confirms the former view.

³ Hommel maintains that *א* in the Mosaic (S. Arabian) alphabet represents a (*ā*) or, in some cases, *i*. The same peculiarity (*א* for *ā*) characterises the Moabite, the Hebrew, and the Samalite script. אַבְרָהָם, therefore, was originally pronounced *Abām* (Hommel, *Das graphische *א* im Altisraelischen*, 22-24). WMM (*Ab. u. Syr.* 309 n. 23) finds an Egyptian proper name *B'-rj-rj-may = Baal-ram*.

(see Ez. 33²⁴)¹ that Abraham was revered by the Jews as their greatest ancestor; cp Is. 41.8 f. 51.12 63.16 Neh. 9.7; 2 Ch. 20.7 30.6 18. 47.9 [10] 105.6.9.42 Ecclus. 44.19 1 Macc. 2.52 12.21 Mt. 1.1 3.9 Lk. 10.24.30 10.9 Jn. 8.39.53.56 Acts 7.2.13.36 Rom. 4.12.16 Heb. 6.13.11.17 Jas. 2.21, cp Gal. 3.7-9. But to give time to this general reverence to have arisen, we cannot help supposing that the name and, in some form, the story of Abraham were current in certain circles considerably earlier. Local traditions respecting him doubtless existed before the glory of the southern kingdom departed, and these traditions form the basis of the composite אַבְרָהָם or 'family history' of Abraham (P for a special reason substitutes 'Turah') contained in Gen. 11.27-25.18. That these traditions are legends, and not historical records of the times which the 'family history' appears to describe, is certain (see HISTORICAL LITERATURE). But that in their present setting they are much more than legends needs to be not less firmly held. They have been purified both by abridgment and by expansion; and, since the fusion of the original and of the added elements is by no means complete, it is not impossible to study the one from the point of view of prehistoric research, and the other from that of the history of religion. Let us, then, briefly consider these two questions: (1) What did the Abraham narratives of Genesis mean to their first editors and readers? and (2) may any of them be regarded as containing a historical element?

1. The first question can be readily answered. Abraham to J and E is not so much a historical personage as an ideal type of character.

2. **Story of J and E.** This theory alone will account for the 'dreamy, grand, and solemn' impression which this patriarch makes upon us. The framework of the narrative may be derived from myths and legends, but the spirit comes from the ideals stored up in the minds of the narrators. A school of writers (for J and E are not merely individuals) devoted themselves to elaborating a typical example of that unworldly goodness which was rooted in faith and fervently preached by the prophets. That typical example was Abraham, who might, with a better right than the old Babylonian king, Hammurābi, have called himself the prophet of the heaven-god, and indeed is actually recognised by the Pharaoh (Gen. 20.7 E) as a prophet of Elohim. The 'dreaminess' which has been noticed in him is caused by his mental attitude. The Mohammedans appropriately call him 'the first Moslem.' He goes through life listening for the true *tōra*, which is not shut up in formal precepts, but revealed from time to time to the conscience; and this leaning upon God's word is declared to be in Yahwe's sight a proof of genuine righteousness (15.6 J). The *Pirqe Aboth* (*c. 5*; cp *Ber. rabba*, par. 56) reckons ten trials of Abraham's faith, 'in all of which he stood firm'; but this simply marks the intense Jewish reverence for the 'father of the faithful.' The word נֶאֱמָר, '(he) tried,' occurs only once in the narratives (Gen. 22.1), but from the first the faith of Abraham was tried like gold in the fire. He marries a woman who is 'barren' (11.30 18.1 f. both J; 15.2 f. JE). He leaves his home at the divine bidding to seek an unknown land (12.1 J). As the climax, he is commanded to offer up the child of promise as a sacrifice (22.1-13 E). It is characteristic of the pre-exilic age that this privileged life presents no reverses of fortune (contrast Job). But prosperity does no moral harm to Abraham. He retains a pure and disinterested philanthropy, which would even, if possible, have saved wicked Sodom (18.26-33a, a late Yahwistic passage).² Once, indeed, he appears as trusting in an arm of flesh, and defeating mighty kings (Gen. 14.1-17);

¹ This is the earliest mention of Abraham outside the Hexateuch; for Is. 29.22 Jer. 83.26 Mic. 7.20 belong to passages inserted after the Exile.

² See We. *CH* (2) 27 f.; *Documents of the Hex.* i. 26; Fripp, *Gen.* 48.50.

but this unique narrative, so flattering to the pride of the later Jews, is evidently a fragment of a post-exilic midrash on the life of Abraham.¹ It even contains a specimen of the mystic reckoning called 'gematria,' the number 318 in 1414 being suggested by the name of Abraham's servant Eliezer,² of which it is the numerical equivalent, just as it is stated in the Haggada that Abraham served God from his third year, because עקב אשר שמעו עקב (22:18) is equivalent to 172 (he was 175 when he offered up Isaac, according to the Midrash Tanchuma), and as the 'number of the beast' in Rev. 13:18 is 666 (or 616).

The narratives of P differ, it is true, in some respects from those of J and E. This writer, who is a lover of gradual, orderly progress, even in the history of revelation, represents the migration into Canaan as having been planned, without any express divine command, by Terah (Gen. 11:31), and admits no theophany before that of Abraham's ninety-ninth year (17:1). He introduces, also, some important modifications into the character of the patriarch. The friendly intimacy between Yahwé and Abraham has disappeared; when Yahwé at length manifests himself, Abraham falls upon his face (17:317). A legal element, too, finds its way into his righteousness, the rite of circumcision having been undergone, according to P, by Abraham and all the males of his household. Still, it may be said of P as truly as of his predecessors that he regards Abraham as the greatest of men, and exhibits him as the pattern for Israelitish piety. With this object in view, he has no scruple in dealing very freely with the traditional material. Since all things are best at their beginnings, he asserts that the ancestor of Israel was all, and more than all, that his own sober imagination can devise. Later writers attempted to supply his deficiencies. Even in the OT we have a strange reference in Is. 29:22 (post-exilic) to dangers incurred by Abraham, which agrees with the hints dropped in the *Book of Jubilees* (c. 12), and points the way to the well-known legend of the furnace of Nimrod. Not less did the enigmatical war-chronicle in Gen. 14 stimulate later writers. Nicolaus of Damascus, the court historian of Herod the Great, related (Jos. Ant. 1.72; cp Justin, 362) that Abraham came with an army out of Chaldaea and reigned in Damascus, after which he settled in Canaan; he adds that there still exists a village called 'Αβραάμου οικηρος' (see HOBAB). The only Biblical trace of such a story is in Gen. 15:2, where, however, 'it is Damascus' appears to be a gloss (see ELIEZER, 1). It is bold in Ew. (Hist. i. 312) to assume on such a basis that Damascus was a traditional link in the chain of the Hebrew migration. More probably these stories were invented by the Jews of Damascus (who were a numerous body) to glorify the national ancestor. The Moslems took up the tradition with avidity (see Ew. l.c.), and still point to the village of Berza, or Berzat el Halli ('the marriage-tent of Abraham'), one hour N. from Damascus, where the marriage of the patriarch furnishes the occasion of an annual festival (Wetz. ZDMG xxii. 105 [68]).

2. What historical element (if any) do these narratives contain? The Abraham traditions are twofold. Some

belong exclusively to the great patriarch; others are also attached to one or another of his successors. The latter we can disregard: the foundation of the sanctuaries of Shechem and Bethel has a better traditional connection with Jacob (Gen. 33:18-20 23:11-22), and that of Beersheba with Isaac (26:24 f.), while the

¹ Much confusion has been caused by the uncritical use of canonical research (see CHE. *Faunders*, 237 ff.). That the writer of Gen. 11-11 had access, directly or indirectly, to Babylonian sources for some of his statements is denied by none. But this does not make him a historian. See Kue. *Her.* 143, 164; We. *ChB* 206; E. Mey. *G.A.* 165 f. and CP. CHEIRON-LAUBER, MELCHIZEDEK, § 4.

² See, long ago, Hitzig, following *Ber. rabba*, par. 43.

story of the imperilled wife has at least as good (or as bad) a claim to be connected with Isaac (26:1-11). There remain—(a) the migration from Harrán or from Úr Kasdim; (b) the close affinity between Abraham and Sarah, Abraham and Hagar (and Keturah), Abraham and Lot; (c) the abode and burial of Abraham near Hebron; and, underlying all these, (d) the existence of an ancestor of the people of Israel bearing the name of Abraham or Abram. Let us first briefly consider (c) and (d).

i. *Existence of Abraham and connection with Hebron.*—The tradition, as it stands, is doubtless inadmissible. So much may be conceded to that destructive criticism which, denying that the old reverence for the story of Abraham has any justification, would throw that story aside as an outworn and useless myth. But the view taken by the patient reconstructive criticism of our day is that, not only religiously, but even, in a qualified sense, historically also, the narratives of Abraham have a claim on our attention. The religious value is for all; the historical or quasi-historical for students only. In the present connection it is enough to say (but see further HISTORICAL LITERATURE) that, since Abraham may be a genuine personal name, it cannot be unreasonable to hold that there is a kernel of tradition in the narratives. Hebrew legend may have told of an ancient hero (in the Greek sense of the word) bearing this name and connected specially with Hebron. This supposed hero (whose real existence is as doubtful as that of other heroes) cannot originally have been grouped with Jacob or Israel, for the name Abraham has a different linguistic colouring from the two latter. It was natural, however, that when Hebron (q.v.) became Israelitish the southern hero Abraham should be grouped with the northern hero Jacob-Israel, and that the spirits of both heroes should be regarded as having a special connection with their people, and even as entitled to a kind of national cultus (cp IDOLATRY), which, though discouraged by the highest religious teachers, has left traces of itself both in early and in late books, and is characteristically Semitic.² The cultus was no doubt performed at Machpelah, on the possession of which P lays such great stress (c. 23); but that the traditional hero was actually buried there cannot be affirmed. Even among the Arabs there is hardly one well-authenticated case of a tribe which possessed a really ancient tradition as to the place where the tribal ancestor was interred.³

ii. *Relation of Abraham to Sarah, Hagar, Lot.*—With regard to (b) it should be noted that, though an assertion of relationship may be literally correct, it may also merely mean that two particular tribes or peoples have been politically connected. If, with Robertson Smith, we may regard Sarah as a feminine corresponding to Israel, we may take the marriage between Abraham and Sarah (or rather Sarai) to symbolise the political fusion between a southern Israelitish tribe and non-Israelitish clans to the south of Hebron (see, however, SARAH, i. § 2). The relationship between Abraham and Hagar may also have a political meaning, for the close intercourse, and at times political union, between Egypt⁴ and Palestine and parts of Arabia is well attested. The story of the separation between Abraham and Lot⁵ may

¹ It is unnecessary to discuss here P's account of the origin of circumcision (see CHEIRON-LAUBER, *op. cit.* § 43), and the fact that the practice of the four kings in Gen. 14 (see above, § 2), or the birth and subsequent offering up of Isaac (see above, § 8) is not mentioned.

² See I. S. 283 f. (I saw Flavius, i. 18, 66-17; Jos. 31:10, cp 14, 16 in S. 20, and cp Che. *Her.* 143, 164 f.). For parallel Arabian beliefs, see Goldziher, *Kunst u. Myth.*, 200-214, 208-9, 210 f., and for the later Jewish belief in the prayers of the fathers, see 2 Macc. 10:13 f., and Talmudic references in Cassel, *Die Messia*, 104 f.

³ WRS *Kin.* 18.

⁴ We assume provisionally that Hagar is correctly regarded, from the point of view of the original tradition, as an Egyptian. See, however, HANSEN, and especially METZGER, § 2 (6), HEBRON-LAUBER, *op. cit.* § 2.

⁵ On the details of the story, cp WRS *Kin.* 14 f.

be but a foreshadowing of the separation between Israel and Moab and Ammon; but, if Lot is to be explained by Lotan (the eponym of an Edomitish clan, Gen. 36 20-29), the asserted relationship between Abraham and Lot accords with the theory of the original non-Israelitish character of Abraham.

iii. *Connection with Harrân or Ūr.*—As to (a), even if we reject the theory of the migration of a clan called after Abraham from Harrân or Ūr Kasdim, it does not at once follow that the tradition is altogether unhistorical. Not only Abraham, but the wives of Isaac and Jacob also, are declared to have come from Harrân. This cannot be a baseless tradition. Critics, it is true, are divided as to its historical value, nor can we discuss the matter here. But there is, at any rate, as Stade admits, nothing *a priori* improbable in the view that certain Hebrew clans came from the neighbourhood of Harrân to Palestine. The fluctuation of the tradition between Harrân and Ūr Kasdim need not detain us (see special articles). Both Harrân and Uru were seats of the worship of the moon-god under different names, and we can well believe that at some unknown period the moon-worship of Harrân affected the Hebrew clans (cp SARAH, i. § 2, MILCAH, 1). For what critic of to-day can venture to assume that it was repugnance to this worship, and in general to idolatry (cp Josh. 24 2 f.),¹ that prompted the Hebrew clans to leave their early homes? Surely this asserted religious movement is a specimen of that antedating of religious conditions which is characteristic of the OT narrators, and was copied from them by Mohammed. First, the insight of Isaiah is ascribed to Moses; then, as if this were not wonderful enough, it is transferred to Abraham. But how recent is the evidence for either statement, and how inconsistent is the spiritual theism ascribed to Abraham with sound views of historical development! Instead therefore of speaking of 'that life of faith which historically began with Abraham' (H. S. Holland, *Lux Mundi*, 41), should we not rather say 'that life of faith which, though germinally present from the earliest times, first found clear and undoubted expression in the writings of the prophets and in the recast legends of Abraham'?

Hommel's ambitious attempt to prove the strictly historical character of the Abraham narratives from the Arabian personal names of the dynasty of Hammurâbi is, critically regarded, a failure. The existence in early Semitic antiquity of personal names expressing lofty ideas of the divine nature in its relation to man has long been known, though it is only in recent years that such names have been discovered so far back in the stream of history. But hitherto scholars have with good reason abstained from inferring the extreme antiquity of Hebrew narratives in which similar names occurred, because the age of these narratives had necessarily to be first of all determined by the ordinary critical methods, and the existence of such a phrase as 'in the days of Amraphel' (Hammurâbi?) proves only that the writer may have been acquainted with documents in which events of this period were referred to, not that his own narrative is strictly historical.

For the later Haggadic stories concerning Abraham see Beer, *Leben Abrahams nach Auffassung der jüd. Sage*, 1859; Hamburger, *RE für Bib. u. Talm.* (2) (s.v. 'Abraham'); also Grünbaum, *Neue Beitr. zur sem. Sagenkunde*, 1893, pp. 89-131 (Jewish and Mohammedan legends); and, especially, a late apocryphal book called *The Testament of Abraham (Texts and Studies, Cambridge, 1892)*, which presents perhaps the finest imaginable glorification of the character of the patriarch. All that he needs is to see the retributions

¹ The words, 'and worshipped other gods,' belong to R. But the sense of the earlier narrators is correctly given (cp. Gen. 31 19 33 35 4). And, of course, Israel's point of religious departure must, considering primitive circumstances, have been in some sense polytheistic (cp Reinach, *REJ* xv. 311 [87]; Boscawen, *The Migration of Abram*, 20 f.).

of heaven and hell that he may learn (like Jonah) to have pity on sinners (see APOCRYPHA, § 11). For the archæological aspects of the life of the patriarch see Tomkins, *Studies on the Times of Abraham* ('78; second ed. '97). The best critical literature is cited by Ki. *Hist.* i.; add to his list Hal. *REJ* xv. 161 ff. ('87); *Rev. sem.* i. 1 ff. ('93); Renan, *Hist. du peuple d'Israel*, i. (1887); and reviews of Renan by Reinach, *REJ* xv. 302 ff.; and by WRS, *Eng. Hist. Rev.* iii. 128 f. ('88). Renan's statements that the Abraham of Genesis is the type of an Arab sheikh, and that the ancient Hebrews, represented by Abraham, worshipped a 'patriarchal, just, and universal God,' from whom the worship of Yahwé was a falling away, are fantastically erroneous. For Nöldl.'s view that Abraham and Sarah are divine names, see his essay on the patriarchs in *Im neuen Reich*, 1871, p. 508 ff., and on the other side Baethg, *Beitr. z. sem. Kel.-gesch.* 154 ff. See also EDM (§ 2; supposed divine character of Abraham) and HOBAH (his connection with Damascus). T. K. C.

ABRAHAM'S BOSOM (Lk. 16 22†). See HADES.

ABRAM (אַבְרָם, § 44, Gen. 11 27-17 5a 1 Ch. 1 27 Neh. 9 7†; אַבְרָם [BADL], but -פֶּאֶן [A twice in Gen.], -פֶּאֶם [A once in Gen.; B in Ch. and B* vid. NL in Neh.; פֶּאֶם; ABRAM], i.e. probably, in the mind of the priestly writer (Gen. 17 3), 'high father' (patriarch), to which the name Sarai, if taken as another form of SARAH [q.v.], would be a suitable companion. If, however, the name ABRAM be a genuine traditional one, it will be related to ABIRAM [q.v.], as ABNER [q.v.] is to ABINER, and be explained similarly (cp ABRAHAM, § 1).

ABRECH (אַבְרֵחַ, Gen. 41 43†, 'Then he made him ride in the chariot next in rank to his own, and they cried before him Abrech. So he set him over all Egypt' (Kau. HS). The passage occurs in E's (or E₂'s) version of the appointment of Joseph to be grand-vizier, and the strange word Abrech greatly puzzled the ancient interpreters. G^{ÆL} gives καὶ ἐκίρυσεν . . . κίρυσ; the Targums אַבְרֵחַ אַבְרֵחַ Pesh., omitting אַבְרֵחַ, paraphrases **إِدَا مَعْبُودَا** [cp 45 8 Pesh.], and Vg. *clamante præcone ut omnes coram eo genu flecterent*. Jerome himself, however (*Quæst. in Gen.*), remarks, 'Mihî videtur non tam præco sive adgeniculatio . . . intelligenda, quam illud quod Hebræi tradunt, dicentes "patrem tenerum," . . . significante Scripturâ quod iuxta prudentiam quidem pater omnium fuerit, sed iuxta ætatem tenerimus adolescens et puer.' So, in fact, the Midrash (*Ber. rabba*, par. 90) and the two later Targums (as an appendage to 'father of the king') expressly interpret, and in *Bab. Bathra*, 4a we even find this justified by the combination of **רַךְ** and **רֵזַר**. In *Jubilees* 40; (Charles) the form is Abiret, i.e. Abirel ('God is a mighty one,' or, being an imaginary form, 'mighty one of God').

The different views of modern scholars can only be glanced at here. Luther is content with *Landesvater*, EV with 'bow the knee.' RV mg. adopts the view that the original word was 'superior in sound to the Hebrew word meaning to kneel' (so Benfey, Brugsch, Chabas). The Mas. vocalisation, however, is guesswork, and the Hiphil of **רַךְ** occurs only once again (Gen. 24 11), and then in the sense of 'to cause (the camels) to kneel down.' If we look at the context, we shall find reason to doubt whether any outward display of reverence at all (prostration would be more natural than kneeling) can be meant by Abrech. An official title is what the context most favours, not, however, such a title as 'chief of the wise men' (אֲבֵרֵחַ-וּ); but rather 'great lord,' or some other equivalent to 'grand-

¹ Harkavy, *J. As.*, mars-avril 1870, pp. 161-165. I.e. Page Renouf's explanation (*PSB* i. xi. 5 ff. [38]), 'thy command is our desire' (*ab-n-rab*), i.e., 'we are at thy service,' is much less suitable to the context.

vizier.' No such title including the letters b-r-k is quoted from the pure Egyptian vocabulary; but may it not be really a loan-word? This might account for the fact that Abrech is passed over in 6. It is well known that from the fifteenth century onwards there was close intercourse between the Egyptians and the Semitic peoples, and that many technical words were borrowed from the latter. This being the case, it appears reasonable to connect Abrech with the Ass.-Bab. *abaraku* (fem. *abarakatu*), which is applied to one of the five highest dignitaries in the empire.¹ Schrader, who once opposed this view (*COT* i. 139), now thinks that the Amarna discoveries (1888) have made it much more probable; and Brünnow has expressed the opinion that 'the Assyrian a-ba-rak-ku seem undoubtedly to be the prototype of Abrech'² (private letter). In spite of Dillmann's peremptory denial (1892), it has become very difficult to think otherwise. We might, indeed, correct the word out of existence; but Ball's text (*SBOT*) is hardly an improvement except in the substitution of the *רַב־בַּיִת* of the Sam. text (cp 6 Pesh.) for *רַב־בַּיִת*, which is justified by the context, and had already been made by Geiger (*Urschr.* 463). T. K. C.

ABRONAH, AV Ebronah (עֲבְרֹנָה), one of the stages in the wandering in the wilderness (Nu. 33⁴ f. 7, P; *αβρωνά* [B]; EB. [AFL.]; see WANDERINGS §§ 12, 14. On *αβρωνά* [AB] in Judith 224, see ARBONAI.

ABSALOM (אֲבִישָׁלוֹם), § 45, or—less correctly, as Nold. thinks—as in 1 K. 15²¹ אֲבִישָׁלוֹם, *ABISHALOM*, *ABESSALOM*: probably 'the [divine] father is peace,' cp *Yahwé-shalom* Judg. 6²⁴, a title of Yahwé, but not Ps 120⁷; *αβεσσαλωμ* [BA, and in 2 S. 3³ and 1 Chr. also L.]; *εβσα* [A. 2 S. 18¹⁵]; *εβσα* [L.; but in 1 K. 2³⁸ *κολωνωντος*, where also *αβσα*, *αβισσαλωμ*]; *אבשלום*; *αβεσσαλωμ* [A.] 2 S. 18¹⁵; *ישׁוּב. αβεσσαλωμ* and *αψαλωμοσ*; *ABSALOM* was David's third son, his mother being Maacah, daughter of Talmai, king of GESHUR (*q.v.* 2). Born at Hebron, he grew up at Jerusalem, the idol of his father, and popular for his manly beauty and his winning manners. His tragic history is faithfully recorded by an ancient and well-informed writer in 2 S. 13-18.

We first hear of him in connection with the outrage on his sister Tamar by her half-brother Amnon, whom David, out of weak-minded affection for his first-born (2 S. 13¹⁷, 6^{BAL}), omitted to chastise. Absalom soothed his sister, and silently bode his time. Then, after two years, he lured Amnon with the other princes to a feast of sheep-shearing on Absalom's estate at Baal-hazor (see HAZOR, 2), and at a concerted sign his servants slew Amnon during the banquet. The next three years Absalom passed in exile in Geshur (*q.v.* 2), till Joab, knowing that the king pined for the fugitive, contrived by the help of a 'wise woman' from Tekoa to bring him back. The form of the parable (2 S. 14⁵⁻⁷) may belong to the 'wise woman,' but the ideas which it suggested came from Joab. Why was the king so willing to mitigate the custom of blood-vengeance for a stranger, and so hard towards his own son? We die, and are like water spilt on the ground; but God spares the life of him whose thoughts are bent on the restoration of the banished (2 S. 14¹⁴ with Ewald's emendation). The king gave way to this gentle pressure, and allowed his son to come back to Jerusalem, but refused to see him for two whole years. Nor would Joab take any further step, till the impetuous prince set his barley field on fire, and, when Joab came in person to complain, declared that death was better than con-

tinued disgrace. He had his way. The king kissed him and restored him to full favour.

Four years followed (2 S. 15⁷, L. Pesh. and Jos.; MT 6^{BA} Vg. have 'forty') during which Absalom prepared men's minds for coming events. He let his hair grow enormously long (2 S. 14²⁶), in token, as Robertson Smith thinks (*R.S.*⁽²⁾ 484), of the sacredness of his person, though the ordinary view that it was merely a proof of vanity possesses the recommendation of simplicity. He rode in a chariot with horses (then scarcely known in Israel) and was accompanied by a guard of fifty men. He made every suitor's cause his own, and lamented aloud that his power did not match his desire to help (2 S. 15¹⁻⁶). At last he fired the train which had been so long and so carefully laid. On pretence of a sacrificial feast, he withdrew to Hebron, accompanied by 200 men, doubtless needy dependents, who followed him in ignorance of his plan. Here, at the old capital of Judah, amidst a people who were still unreconciled to their absorption in a larger state, he raised the standard of revolt. Ahithophel, a man of southern Judah, he made his principal counsellor; Amasa, Absalom's cousin, also from Judah, took command of the troops (cp GESHUR, 2). But an appeal was also made to the centrifugal forces always at work in the N. tribes, for, as he set out for Hebron, the rebel prince sent men through the land of Israel. At the sound of the trumpet these were to proclaim the accomplished fact, 'Absalom has been made king in Hebron.'

David, once the darling of the nation, was compelled to fly from the capital. Absalom as quickly entered it, and gave that public sign of his accession to the throne which the crafty Ahithophel recommended. The number of his counsellors was now increased by the addition of Hushai, 'David's friend' (on the epithet see HUSHAI), whose flattery he failed to see through. In reality Hushai only pretended to join the rebels. His object was twofold—to frustrate the counsel of Ahithophel, and to betray Absalom's plans to the priests, Zadok and Abiathar. These trusty friends of David were to communicate with a maid, and she was to impart her knowledge to two sons of the priests, who waited to bear it to the king. This counterplot attained its end. Ahithophel, who knew how deceptive was the popular enthusiasm, wished Absalom to 'strike David before there was time for second thoughts' (WRS). But Hushai persuaded the pretender to wait, and so David, who was informed of all that happened at Jerusalem, safely crossed the Jordan and established himself at Mahanaim, once Ishbaal's capital.

Thence, in three divisions, David's army sallied forth, and in the neighbouring forest (see EPHRAIM, WOOD OF) the rebel troops were routed. In the flight Absalom's head (hair?; Heb. שָׂרָא, cp 2 S. 14²⁶) was caught in the branches of a terebinth tree, and his mule left him hanging between heaven and earth. 'Not for a thousand shekels' would the soldier who saw him hanging have taken his life. How could he venture to disregard the king's charge to watch over the young man Absalom? If he had treacherously attempted Absalom's life, would not the king have found it out, and would not Joab himself have stood aloof? But Joab, who felt his courage called in question (2 S. 18¹⁴, 6^{BAL}; see Bu. *SBOT*), with an emphatic denial of the statement, plunged three javelins into Absalom's body. The corpse of the ill-fated prince was flung into a pit, and the soldiers cast stones upon it, that the restless spirit might trouble them no more.¹ Meantime the old king was waiting at the gate of Mahanaim. The pathetic story of his broken-hearted grief at hearing the news of his dearly loved son's death is enshrined in all memories.

Such was the close of the sad tragedy which opened with the barbarous outrage upon Tamar. Just eleven years had passed since that event, so that if Absalom

¹ Friedr. Del., *Heb. in the light of Assyrian Research* (1881), p. 25 f.; cp *Par.* 205; *Ass. Heb.* 12. This brilliant suggestion was temporarily adopted by the present writer (*Mon.* 12th Apr. 1884), who has, since the Amarna discoveries, returned to it.

² So also Sayce (*Acad.* 7th May 1892; *Crit. Mon.* 214 f.), but with an interpretation which needs fuller evidence.

¹ See Tylor's *Prim. Cult.* ii. 29.

was about twenty when he took up his sister's cause, he must have died a little over thirty. Apparently his three sons died before him (2S147 1818). On his 'daughter,' see TAMAR, 3, and ΜΑΑΣΑΗ, 3, 4. The notice respecting Absalom's monument in 2S18:8 is not very clear, perhaps owing to some confusion in the text of vv. 17-19 (50 Klo.). It is evidently parenthetical, and reminds the reader that Absalom had a suitable monument erected, according to Klo.'s reading, by David) in the King's Vale (see SHAVEH, 1, MELCHIZEDEK, § 3). The building close to Jerusalem, now known as Absalom's tomb, is of very late origin, as its Ionic pillars prove.

W. E. A.
2. Father of Mattathias (1 Macc. 11 70; 'Ἀφάλαμος [AV], φαλαμῶδός [K]). Zöckler proposes to read 'Jonathan' for 'Mattathias' here; or else to read Mattathias in 1 Macc. 13 11 also.

3. Father of Jonathan (1 Macc. 13 11; 'Ἀφάλαμος [AVK]), probably the same as (2).

4. An ambassador to Lysias; 2 Macc. 11 17 (Ἀβυσσάλου [A], ἄβυσσαλα Ἰ [sic V]). Possibly also to be identified with (2).

ABUBUS (Ἀβουβός [ANV]); אבובוס, cp Πτολεμαί, 1 Ch. 7 34 Kr.; *ABUBUS*), father of Ptolemy, captain of the plain of Jericho, and son-in-law to Simon the Maccabee (1 Macc. 16 11 15†).

ABYSS, THE (Η ΑΒΥΣΣΟΣ), the term substituted in RV of NT for the 'deep' and the 'bottomless pit' of AV; see Lk. 8 31; Rom. 10 7; Rev. 9 1 f. 11 17 17 8 20 1 3†. In the second of these passages, by an inexact use of the term, 'the abyss' is equivalent to Sheol; 'over the sea' in Dt. 30 13 is taken to mean 'over the world-encircling ocean into which the "rivers" of the underworld (Ps. 184 [5], תהלי בלי יליעל) discharge themselves to "the place where all flesh wanders" (i.e., Sheol; *Enoch* 176). Elsewhere it means the deeply-placed abode of the 'dragon' or devil, of the 'beast' his helper, and of the δαιμόνια, —whether this abode be taken to be 'deep (*ἀβύσσος*) that coucheth beneath' (Gen. 49 25 RV), or the 'waste place' with 'no firmament above and no foundation of earth beneath, by which the fire-filled chasm was thought to be bordered (*Enoch* 18 12; cp 21 27). The former view is in accordance with OT usage, the *thām* of MT and the *ābūssos* of G being the flood or ocean which once enfolded the earth, but is now shut up in subterranean store-chambers (Ps. 33 7); and it is favoured by the use of *θάλασσα* in Rev. 13 1 as synonymous with *ābūssos*. But the latter is more probably right in the Apocalypse, which agrees with *Enoch* in asserting the existence of a lake of fire, destined for the final punishment of the devil and his helpers. This fiery lake is not in either book technically called 'the abyss'; in *Enoch* 10 13 the Greek has τὸ χάος τοῦ πυρός, and in 21 7 διακοπήν εἶχεν ὁ τόπος ἕως τῆς ἀβύσσου. The angelic overseer of this region is Uriel, who is described in *Enoch* 20 2 (Gizeh Gk.) as ὁ ἐπὶ τοῦ κάμου καὶ τοῦ τάρταρου. 'Tartarus' occurs also in Job 41 23, G, in the phrase τὴν τάρταρον τῆς ἀβύσσου [BNA], which, being used in connection with Leviathan, is doubtless to be taken of the subterranean abode of Yahwé's enemy, the dragon (see DRAGON, § 4 f.). Cp ταρταρώσας, used of the fallen angels, 2 Pet. 2 4.

ACACIA (ἡψύς), Ex. 25 5 etc., RV. See SHITTAH TREE.

ACATAN (ἀκατάν [BA]), 1 Esd. 8 38† AV = Ezr. 8 12; ΗΑΚΚΑΤΑΝ.

ACCABA (ἀκκαβα [B]), 1 Esd. 5 30 RV = Ezra 2 46, HAGABE.

ACCAD (ἄκκ: ἀκκαδ [AJ.], אַק: [DE]; אַק: [*ACHAD*]) is one of the four cities mentioned in Gen. 10 10 as forming the beginning of the kingdom of Nimrod in the land of Shinar or Babylonia. In the cuneiform inscriptions the name of Akkad is most frequent.

1 If a Hebrew original could have been suppressed for 2 Macc. 13 10 אבובוס might have represented a transliteration of part of a participle of אבוב (cf. *pephéeres* follows).

quently met with in the title *Iugal Kingi(ki) Uri(ki)*, which is rendered in Semitic by *jar (mātu) Šunēri u (mātu) Akkadī*. This title, which implied dominion over the whole of Babylonia, was borne from the earliest times by the Babylonian kings, and was adopted by those kings of Assyria who conquered Babylon (cp BABYLONIA, § 1). The Akkad referred to in Gen. 10 10 has been identified by some with the ancient city of *Agadé* which was situated in northern Babylonia and attained a position of supremacy over the rest of the country under Sargon I. about 3800 B.C. This identification, however, is entirely hypothetical, and is based only on the superficial resemblance of the names. L. W. K.

ACCARON (ἀκκαρων [A*]), 1 Macc. 10 89† AV = RV EKRON (9. v.).

ACCOB, RV Acco (ἰσῦ), Judg. 1 31 and (see UMMAH) Josh. 19 30†; see PTOLEMAIS.

ACOS (ἀκκωκος [A], ἀκκωκος [N], ἰακκ [V]; same as HAKKOS [9. v.]), grandfather of Eupolemus; 1 Macc. 8 17†.

ACCOZ (ἀκβωκος [B]), 1 Esd. 5 38† AV = Ezra 2 61 RV, HAKKOS, I.

ACCUSER (κατήγορος [Ti., W & H following A], κατήγορος [B*, etc.]). The form of word found in the best texts is simply a Hebraised form [קטגור] of the common word *κατήγορος*. For Rabbinic usage see e.g. Buxt. *Lex.*, Rev. 12 10†. See SATAN, §§ 6 (3) 7.

ACELDAMA AV; RV Akeldama (ἀχελδαμαῖ [Tisch. A, etc.], *ACHELDEMACH* [96 lat.], ἀκε [B* followed by W & H], -δαίμ. [D], *ACHELDEMAH* [d], the name according to Acts 1 19 of a field bought by Judas Iscariot for some unknown purpose. The vet. Lat. of Mt. 27 8 applies the name (not, as in the Gk. MSS., merely in translation, but in the original) also to a field bought by the priests of Jerusalem to bury strangers in.

MS. evidence is so overwhelmingly in favour of some such form as Akeldamach that the RV is quite unjustified in rejecting it, especially when

1. **The name.** corrected the c into k. Acts 1 19 states that in the language of the dwellers at Jerusalem this name meant 'the field of blood' (*χωρίον αἵματος*). *קטג קת* (*hēbēl dēma'akh*), however, is obviously 'the field of thy blood,' an impossible expression. Klostermann has therefore argued with great acuteness (*Probleme in Aposteltexte*, 1-8 [83]) that קת (DMKH) is one word—viz., the well-known Aram. root 'to sleep.' All we have to do, then, is to understand it of the sleep of death, a usage known in Syr., and 'field of sleep' will mean cemetery, which, as Mt. tells us, was what the priests meant to make of the potter's field. Klostermann's argument is very strong—it is certainly natural to suppose that the name originated in some fact known to the people at large, as the transformation of a potter's field into a burying place would be—and his view was adopted by Wendt (*Meyer*⁶ *ad loc.*). But we have no instance of a noun *קת* so used, and *אח, ח*, may = *ח* (cp *ωσηח* [Lk. 3 26, BN, etc.] = *ישׁי*; *Σειραχ*, Sirach = *סירא*, Sira). Hence, whatever may have been the real origin of the name—we can never know—its form was probably קת קת (Dalm. *Gram.* 161 and 105 n. 1 respectively), 'the field of blood' (so Dalm. 161 n. 6; Arn. *Mey. Jesu Muttersprache*, 49 n. 1). On the questions who bought the field and why it was called Akeldama see also ACTS, § 14. Cp JUDAS, 9.

Tradition which goes as far back as to the fourth century has placed Akeldama on a level overhanging the Valley of the Son of Hinnom on the NE. slope of the Hill of Evil Counsel, site.

—a tradition which rests precariously on Jer. 18 f., where the situation of the potter's house in Jeremiah's day is thought to be indicated. Potter's

1 On this form see Dalm. (*Gram.* 304 n. 2), Kau. (*Gram.* 8).

material is still dug out in the neighbourhood. The traditional Acaeldama was used to bury Christian pilgrims in at least from 570 (*Anton. Plac. Itin.* 26): especially during the Crusades, but, according to Maundrell, who says it was then called Campo Santo, even as late as 1697. A charnel house into which the bodies were let down from above has stood here from very early times. The best history and description of the site (with plans) is that by Schick, *PEPQ*, 1892, pp. 283 ff.

G. A. S.—H. W. H.

ACHAIA (Ἀχαΐα [Ti.WH]). It is a fact of some interest that both at the beginning and at the end of their history the word 'Achaean' was used as the general designation of the inhabitants of Greece proper. During the classical period Achaia denoted only the narrow strip of coastland and the adjoining mountain stretching along the S. shore of the Corinthian gulf from the river Sythas (mod. Trikalitikos) 20 m. west of Corinth, to the river Larissus near Cape Araxus (mod. Kalogria). In the time of Paul, Achaia signified the Roman province—i.e., the whole country south of Macedonia and Illyricum, including some of the adjacent islands. The name Achaia was given to it in consequence of the part played by the Achaean League in the last spasmodic effort which occasioned the sack of Corinth and the downfall of Greek independence, 146 B.C. (Paus. vii. 1610). Whether the formation of the province dates from that year, or not, is of no consequence to the student of the Bible. It was in 27 B.C. that Augustus definitely settled the boundaries of Achaia, assigning to it Thessaly, Aetolia, Acarnania, and part of Epirus (Strabo, p. 830). The Achaia of Paul is, therefore, practically synonymous with the modern kingdom of Greece, but a little more extensive towards the north-west. The combination 'Macedonia and Achaia' embraces the whole of European Greece, as in Acts 19:16, *διεμάθων τὴν Μακεδονίαν καὶ Ἀχαΐαν* (see also Rom. 15:26 1 Thess. 1:7 f.). From 27 B.C. Achaia naturally ranked as a senatorial province—i.e., its governor was an ex-prætor, with the title proconsul (Strabo, l.c.). In 15 A.D., however, owing to their financial embarrassments, both Achaia and Macedonia were taken charge of by Tiberius; and it was not until 44 A.D. that Claudius restored them to the Senate (Tac. *Ann.* i. 76; Suet. *Claud.* 25). The writer of Acts 18:12 is thus quite correct in speaking of Gallio in 53 or 54 A.D. as *ἀνθύπατος*—i.e., proconsul. The fiasco of Nero's proclamation made all Greece free, but this state of things lasted only a short time. With this exception, a proconsular governor was stationed in Corinth, the capital of Achaia, until the time of Justinian.

In the NT we hear of only three towns of Achaia—ATHENS, CORINTH, and CENCHIREA;—but the Salutations of the two Corinthian Epistles (esp. 2 Cor. 1:1 ἐν ἔθῳ τῆ Ἀχαΐα) imply other Christian communities in the province. In 1 Cor. 16:15 the 'house of Stephanas' is called the 'first-fruits of Achaia' (ἀπαρχὴ τῆς Ἀχαΐας). In this place, for 'Achaia' we should expect 'Corinth'; for, according to Acts 17:34, Dionysius the Areopagite and other Athenians must have been the first-fruits of teaching in the province of Achaia. In Rom. 16:5, where, according to the Text. Rec., Epænetus is spoken of as the ἀπαρχὴ τῆς Ἀχαΐας, the best texts read 'Aetias' [Ti. W & H, following BAN, etc.]. The charity of Achaean converts is praised in 2 Cor. 9:2 Rom. 15:26; but the reference may be merely to the church at Corinth (cp 2 Cor. 8:10).

W. J. W.

ACHAICUS (Ἀχαϊκός [Ti.WH]), a member of the Corinthian church, who, along with Stephanas and Fortunatus, had carried to Paul at Ephesus news of the Corinthians which had gladdened and refreshed him (1 Cor. 16:17 f.). He is enumerated as one of the Seventy (Lk. 10:1) in *Chron. Pasc.* (Bonn ed. i. 402).

ACHAN (אָחַן, Josh. 7), called **Achar** (אָחַר)—i.e., 'troubled'—, cp OCRAN, אָכְרַן in 1 Ch. 2:7 and **ACHAR** [ed. Bensly]] in 4 Esd. 7:37 [107] RV. Ⓢ's readings are

אָחַר [BF and (except Josh. 7:1; אָחַן)] L.; אָחַן [A; but אָחַר in Josh. 7:24 1 Ch. 2:7]; the son of Carmi b. Zathai b. Zerah b. Judah, who unlawfully took possession of some of the 'devoted' spoil of Jericho (see BAN). His breach of a taboo had involved the whole host in guilt (*RS*² 162), and the community had to free itself of responsibility by destroying not only Achan but also his whole family (Josh. 7). This is quite in accordance with primitive notions (*RS*² 421), although our present text is due to later insertions in v. 24 f. With the variety in the form of the name is to be connected the word-play in Josh. 7:25. Cp CARMi, I.

ACHAZ (אָחָז [Ti.], אָחָז [WH], Mt 140, RV AHAZ 17:30, I.).

ACHBOR (אָכְבוֹר [עֲבֹר]), § 68, i.e., MOUSE [q.v.]; cp Ph. עֲבֹרָה, עֲבֹרָה, עֲבֹרָה; אָכְבוֹר [BAI.].

1. Father of Baal-hanan [I] king of Edom (Gen. 36:38, *חֲבוֹרָה* [A¹ V]); cp: 1 Ch. 1:46, 722; [Aa. CARMi.], אָכְבוֹר [B], χ[.], [I.]; also v. 8: in Ⓢ'. See EDOM, § 2.

2. b. Micah; a courtier of King Josiah (2 K. 22:12 14; Jer. 26:22, MT and Theod. in Q mg. [BAN om.]; Jer. 36:12, אָכְבוֹר [BN], -בֵּן [N²], אָכְבוֹר [Q]); in 2 Ch. 34:20 named אֲבוֹרָן v. 34 (אֲבוֹרָן [B], אֲבוֹרָן [A]).

ACHIACHARUS (Ἀχιαχάρους [BA]; see further below).

1. The prosperous nephew of Tobit (see TOBIT). He was cup-bearer, signet-keeper, steward, and overseer of accounts to Esarhaddon at Nineveh (Tob. 1:2 f.).

In 1880 George Hoffmann pointed out¹ the identity of the Achiacharus of Tob. 1:2 f., 11:8 14:10f with Ahikar (on the name see below), a legendary sage and vezir of Sennacherib, who is the hero of a romance found in certain Syriac and Arabic MSS. According to this romance, he almost lost his life through the base treachery of his sister's son (cp Pesh. in Tob. 11:8), Nadan (= Aman of Tob. 14:10—cp [ἐπίσιπτον] ἀδάμ [B], *παδάβαν*); see AMAN—and probably [Ναδάν] [B] (then or other form) of Tob. 11:8; see NABAS), whom he had adopted. Restored to favour, he gave sundry proofs of his marvellous wisdom, especially in connection with a mission to a foreign king. Assemanni had already observed (*Bib. Or.* 3, pt. 1:266 a) that in the Arabic story 'de Hicaro eadem fere narratur quae de Aesop Phryge'; chaps. 23-32 of the legendary *Life of Aesop* (Maximus Planudes) in fact tell of Aesop and his kinsman Ennos a quite similar story. There can be little doubt that the story is oriental in origin; but it has been argued by Meissner (see below) that the Aesop romance has preserved in some respects a more original form. The Greek recension, however, that must be assumed as the basis of certain Roumanian and Slavonic versions still surviving, was probably an independent version now lost, made from the Syriac. Allusions to an eastern sage *αχαιαρος* are found elsewhere (e.g., Strabo, p. 762); and traces of his story seem to have made their way into the Talmud (*ZDMG* 48:194 f. [94]). The mutual relations of these various recensions are still obscure; but there seems little reason to question that the allusions in Tobit are to an already well-known story. M. R. James (*Guardian*, Feb. 2, 1898, pp. 163 f.) suggests parallels to the same story in the NT.

Of the allusions, that in 11:8 is wanting in the It.; those in 11:8 and 14:10 are absent from the 'Chaldee' and Heb. texts; while the Vg. omits all save that in 11:8 (*Achiachar*)—perhaps the allusions were felt to have little to do with the story of Tobit.

Greek variants of the name are ἀχιαχάρους in 2:1, ἀχιαχάρους in 8:10, ἀχιαχάρους in 11:10, ἀχιαχάρους in 11:18, ἀχιαχάρους in 14:10, cp Ti. *Achiacharus*, and in 14:10 *Achiacharus*. The equivalent Hebrew would be אָחִיכָר, and Meissner has pointed out that Pesh. has אָחִיכָר for אָחִיכָר in 1 Ch. 6:5. The name remains obscure however. Pesh. has אָחִיכָר; 'Chalde' Hg, אָחִיכָר; H1 אָחִיכָר; Vg. *Achiachar*, and Pesh. in 1:2 f. אָחִיכָר.

¹ 'Auszüge aus syrischen Akten persischen Märtyrer,' in *Abhandl. f. d. Kunde d. Morgenlandes*, 7, no. 3, p. 182.

In the romance the forms are **سماح** **حيقار** [cod. Sach.]; **سماح** [cod. in Brit. Mus.].

Published texts—(1) Semitic: Arabic, A. Šahani, *Contes arabes*, 2-20 (Beyrouth, 1890); Ar. and Neo-Syr., M. Lidzbarski, *von cod. Discussions: Bruno Meissner, *ZDMG* 48 171-197 [94]; Jagić (*op. cit.* 107-111); Ernst Kuhn (*ib.* 127-130); Lidzbarski (*l.c.* 3 f.); Bickell, *Athenaeum*, 22nd Nov. 1890, p. 700, and 24th Jan. 1891, p. 123; cp also 20th Nov. 1897, p. 711, and 27th Nov., p. 759; J. R. Harris in *Story of Achikar* (see above), pp. vii-xxviii.

2. 'King of Media' (Tob. 14.15 [N?]). It. *Achicor* = NEBUCHADNEZZAR (B). [B] = AHASUERUS (B). [A]. See TOBIT, BOOK 9 F.

ACHIAS (ACHIAS), 4 Esd. 1:2f. See AHIAH, I.

ACHIM (אָחִים [B^N?]). -N, אָחִים, -הֵן [A etc.], אָחִים [B^N etc.], cp אָחִים = אָחִים, AHIAM, I Ch. 11.35 [BNA], and אָחִים, JACHIN, Gen. 46.10 [A^{vid}], I Ch. 24.17 [6] [B], a name in the ancestry of Joseph (Mt. 1.14). See GENEALOGIES OF JESUS, § 2 c.

ACHIOR (אָחִיעֹר [BNA], § 44), in the romance of JUDITH (*q.v.*), 'captain of all the sons of Ammon.' Having dared to warn Holofernes of the danger of attacking the Israelites, he was handed over to them to share their fate on the expected triumph of the Assyrian arms (6.5 ff.). He was hospitably received, and ultimately became a Jewish proselyte—no doubt to the great edification of Jewish readers of the story.

In some versions of Tobit his name takes the place of that of ACHIACHARUS (*q.v.*)—an error due to the similarity of *h* and *w* in Syriac.

ACHIPHA (אָחִיפָּה [B]), I Esd. 5:31f RV = Ezra 2.51. HAKIPHA.

ACHISH (אָחִישׁ, אַרְחוּשׁ [BA], אַרְחִי. [L]), a Philistine, son of Maach (1 S. 27.2) or Maachah (1 K. 2.39 f.; אַרְחִישׁ [A]); a king of Gath, with whom David and his band took refuge from the persecution of Saul (see DAVID, § 5). He is described as a credulous man whom David found it easy to deceive, representing that his raids against Bedouin tribes were really directed against the Judahites and their allies, and taking care not to leave any of his captives alive to reveal the truth to Achish. At Ziklag, which had been assigned to him as his place of residence, David lived as a freebooter in vassalage to Achish for a year and four months (6 only four months). The confidence, however, with which his suzerain regarded him was not shared by the Philistine lords, who prevailed upon Achish to dismiss David from his army when starting to meet Saul at Gilboa. See 1 S. 27.1-28.2 29.1-11, a connected passage of date prior to 800 (SBOT). In another passage (1 K. 2.39 f.), where the execution of Shimei [1] is accounted for by his having gone to Gath in search of some runaway slaves, it is said that the fugitives went to Achish. No doubt the same king is meant (son of Maachah, *v.* 39), though the reference to Achish has the appearance of being a later ornamental insertion made in oblivion of chronology.

To a very much later writer (see 1 S. 21.10-15 [11-16]) the account in 1 S. 27-29 seemed to reflect on David's patriotism. He therefore devised an entertaining and unobjectionable story, in the style of the Midrash, which he hoped would supplant the no longer intelligible historical tradition. According to him, David went alone, and was compelled to feign madness for safety

till he could escape. The author of the title of Ps. 34 accepted this story, but by mistake (thinking of Gen. 20.2) wrote 'Abimelech' for 'Achish' (αβ[ι]μελεχ [BNAR], αχαιμ. [U], *Achimelech*; Pesh. quite different). T. K. C.

ACHITOB (אָחִיעֹב [B]), I Esd. 8 = 4 Esd. 1:1f AV = Ezra 7.2, AHITUB, 2.

ACHMETHA (אָחִמֶּתָה [B]), Ezra 6.2f, the capital of Media; see ECBATANA.

ACHOR (אָחֹר, אָחוּר [BAL]), a valley on the N. boundary of Judah (Josh. 15.7), which, as we may infer from Josh. 7 (εμμεχαωρ [BAL]) combined with Hos. 2.15 [17], led up from Jericho into the highlands of Judah. In Is. 65.10 it represents the E. portion of Canaan on this side the Jordan. To an Israelite its name naturally suggested gloomy thoughts. Hosea promises that in the future, when Israel has repented, the evil omen shall be nullified, and a much later prophetic writer (Is. *l.c.*) that the valley of Achor shall become a resting-place of flocks. Early legend connected the name with the sin of Achan the 'troubler' of Israel (Josh. 7.24-26f, JE). Many (e.g. Grove, very positively, in Smith's *DTB*) have identified the valley with the Wady el-Kelt, which leads down through a stupendous chasm in the mountains to the plain of the Jordan, and is, to unromantic observers, dark and dismal. This wady, however, is scarcely lifeless enough to be Achor, for its slender torrent-stream rarely dries up. It is also scarcely broad enough; it would never have occurred to the most ecstatic seer that flocks could lie down in the Wady el-Kelt. Some other valley must be intended. According to the OS (217.25 89.34) the valley was to the N. of Jericho, and its old name still clung to it. This cannot be reconciled with the statement in Josh. *l.c.* respecting the N. boundary of Judah.

ACHSAH (אָחְסָה, § 71, 'anklet'; אַחְסָה [B], אַחְסָה [AL], according to Josh. 15.16-19, and אַחְסָה [B], אַחְסָה [B^{vid}]) Judg. 1:22-25 (cp I Ch. 2.49; AV *Achsa*, אֹחְסָה [L]), a daughter of Caleb, who offered her in marriage to the conqueror of Kirjath-sepher. She was won by his younger brother Othniel. At her petition, because her home was to be in the dry southland (Negeb), Caleb bestowed upon her certain coveted waters called the Upper and the Lower Golith (see below). The simple grace of the narrative holds us spell-bound; but we must not, with Kittel (*Hist.* I 209), pronounce the story historical on this account. That some clans should have been named after individuals is not inconceivable; but it is most improbable that we have any true traditions respecting the fortunes of such possible individuals, and it would be throwing away the lessons of experience to admit the lifelikeness of a narrative as an argument for its historicity. According to analogy, Achsa must represent a Kenizite clan, allied in the first instance to the Calebites of Hebron, but also, very closely, to the clan settled at Debir and called Othniel; and the story arose in order to justify the claim of the Achsa clan to the possession of certain springs which lay much nearer to Hebron than to Debir (so Prof. G. F. Moore, on Judg. 1). That the cause is amply sufficient, can hardly be denied (cp the Beersheba and Rehoboth stories in Genesis). It only remains to discover the right springs. We know where to look, having identified Debir with the highest degree of probability. And our search is rewarded. In all other parts of the district the water supply is from cisterns; no streams or springs occur. But about seven miles (Conder N. of *ed-Daheriyeh* (the true Debir), and near Van de Velde's site for Debir (*Kh. ed-Dibek*), are beautiful springs (worthy of being Achsa's prize), which feed a stream that runs for three or four miles, and does not dry up.¹ The springs, which are fourteen, are in three groups.

¹ PEF. Mem. 3.302; see also GASM. *Hist. Geog.* 279 (cp p. 78), who speaks of only two springs.

¹ According to information received from Mr. F. C. Conybeare, there are two Armenian recensions, the earlier of which appears to be in some respects more primitive than the Syriac. There is also, probably, a Georgian version.

and the two which are nearest to the head of the valley may be presumed to be the Upper and Lower Golath. The identification is certainly a valuable one. See, further, GOLAṬH-MAIM.

ACHSHAPH (אֲחִישָׁפַח, i.e. 'sorcery'; ΔΖΕΙΦ [B], ΔΧΣΑΦ [A] ΔΧΑΣ. [L]), one of the unknown sites in the book of Joshua. It lay, according to P, on the border of the Asherite territory (Josh. 19:25; κεαφ [B]). Its king (if the same Achshaph is meant) joined the northern confederation under Jabin, king of Hazor (11:1; αχσφ [A], αχσφ [B], [Γαοαδ] χασαφ [L]); and shared the defeat of his allies (12:20). Rob. (BR, 455) connects it with the modern Kesaf, a village near the bend of the river Litany where there are some ruins of uncertain date; this identification would suit Josh. 11:1, but not 19:25. Maspero, on the other hand, followed by WMM (*As. u. Eur.* 154, cp 173), identifies Achshaph with the *Aksap* of the name-list of Thotmes III. (*KP*², 546). In this part of the list, however, there are names of localities in the region of Jezreel, which is outside the land of Asher. Flinders Petrie (*Hist. of Eg.* 236) connects Aksap with *Asafeh*, 9 m. SSW. of Jeba, which is hazardous. At any rate there were probably several places noted anciently for their sorcerers and therefore called Achshaph. The form κεαφ (see above) has suggested a most improbable identification with Haifa (*PEF Mem.* 1165). The statement of Eus. in OS, 218⁵⁴ ff. (ακαφα) is geographically impossible.

ACHZIB (אֲחִזִּיב; probably 'winter-torrent').

1. A town of Judah in the Shephelah, mentioned with Ke'ilah and Mar'ashah, Jos. 15:44 (ακίεζε κ. κεζεφ [B], αχζεφ [A], αχζεφ [L]), also Mic. 1:14, where ⁶אֲחִזִּיב, losing the intended paronomasia, renders 'the houses of Achzib' *oikos maraiotus*. The name becomes CHEZIB (207; Samar. text, Chazbah; χασβη [AEL]) in Gen. 38:31, where the legend presupposes that Chezib is the centre of the clan of Shelah; and since in 1 Ch. 4:22 'the men of Cozeba' (αζεβη; χασβη [A]), but ²αχζηβα [B], cp ²σωχα = Socoh) are said to belong to the same clan, we may safely recognise COZEBΑ (so RV; AV CHOZEBΑ) as another form of the same name. The

name may perhaps linger in *'Ain el Keebeh*, between Yarmuk (Jarmuth) and Shuweikeh (Socoh), but to the E. of both (So GASm., after *PEF Mem.* 336). Conder's identification of Cozeba with the ruin of Kuweiziba, 2½ m. NE. of Hailhū towards Hebron (*PEF Mem.* 333) is therefore superfluous. Buhl wisely doubts the proposal to identify it with Kusābe SE. of Tell el-Hesi (*Pal.* 192).

2. A Canaanite town, 9 m. to the north of Accho, like which city it was claimed but not conquered by the tribe of Asher, Josh. 19:29 (αχζεφ [B], αχζεφ [A], αχζεφ [A²], αχζεφ [L], ²αχζεφ [A], ²αχζεφ [A], ²αχζεφ [A]). Sennacherib mentions Akzib and Akku together in the Taylor inscription (*RI*² 688). Achzib (Aram. *Achlib*) is the Eclippa, *ἐκδιππα*, of OS, 95:13 22:17, the *ακδιππων* [*RI*² 133], *ακδιππων* (*Act.* 5:12), where it is said to have been also called *ἀρεκη* of Jos., the modern *ez-Zib*. ACIPHA (ΑΧΕΙΦΑ [B]), 1 Esd. 5:31† AV = Ezra 2:51, HAKUPHA.

ACITHO (ΑΚΙΘΩ [A]), Judith 8:1†. RV, AHITUB (*q.v.*, 4).

ACRA (ΑΚΡΑ [ANV]), 1 Macc. 1:33 etc., AV 'strong-hold,' RV 'citadel.' See JERUSALEM.

ACRABBIM (אֲכַרְבִּים), Josh. 15:9†, RV AKRABBIM.

ACRE (אֲכָרָה, ζεγγρος in Is.; for ² in 1 Sam. cp We. *Dr. ad loc.*, Is. 5:10, 1 S. 14:14 AV mg. RV. The Heb. word seems to denote the amount of land which a span or YOKE [*q.v.*] of oxen could plough in the course of a day (cp below); perhaps, like the Egyptian *ἀροπα*, it ultimately became a fixed quantity (cp Now. *Arch.* 1:202). Even at the present day the fellahin of Palestine measure by the *faddān* (=Syr. *paddānā* 'yoke'; cp ZDPV 479) or also Lat. *jugum, jugerum*. The term is not restricted to arable land, being applied in Is. *l.c.* to a vineyard. Winckler, however (*AOF*, and ser., 290), derives *zeded* from Bab. *šamādū* (= *šakūlu*) to weigh, properly to measure off (which is at any rate barely possible), and attempts to show that *zeded* in Is. can denote only a liquid measure (which is by no means obvious). See WEIGHTS AND MEASURES.

ACTS OF THE APOSTLES¹

CONTENTS

The 'W' sections distinct in character from rest of book (§ 1); *Imaginary* (§§ 2-3); 'Tendencies' (§§ 3-7); 'Journey Record' (§ 8-9); Other Sources (§ 10-11); *Trinitarianism* (§§ 12-14); *Authorship* (§ 15); *Date* (§ 16); *Class & hypothesis* (§ 17, 18); *Religious Value of Acts* (§ 19); *Literature* (§ 20).

Apart from scanty notices supplied by the NT epistles, this book is our only source for the history of Christianity during its first thirty or thirty-five years. The question of its trustworthiness is, therefore, of fundamental importance.

The sections in which, as an eye-witness, the writer gives his narrative in the first person plural (16:10-17:20

1. The 'We' sections or Journey Record.

5-15 21:1-18 27:1-28:16) may be implicitly accepted. But it may be regarded as equally certain that they are not by the same writer as the other parts of the book. In the sections named, the book shows acquaintance with the stages of travel of almost every separate day, and with other very unimportant details (20:13 21:2 f. 16 28:11, etc.); outside these limits it has no knowledge even of such an important fact as that of Paul's conflicts with his opponents in Galatia and Corinth, and mentions only three of the twelve adventures catalogued so minutely in 2 Cor. 11:24 f. cp 23 (Acts 14:19 16:22 23 f.). Even had the writer of the book as a whole (assuming him to have been a companion of Paul) been separated from the apostle—remaining behind, e.g., in Macedonia during the interval between 16:17 and 20:5—he would surely afterwards have gathered the needful details from eye-witnesses and embodied them in his

book, instead of satisfying himself with such extraordinarily meagre notes as we have in 18:1-23 20:1-3 or 16:5-8. Even were he following an old journal, he could never have passed over so many important matters in silence simply because they were not to be found in his notes. Further, he contradicts the Epistle to the Galatians so categorically (see GALATIANS, EPISTLE TO, § 5 f., and COUNCIL OF JERUSALEM) that, if we assume his identity with the eye-witness who writes in the first person, we are compelled (see below, § 6) to adopt one of two courses. We must either make Galatians non-Pauline or pronounce the writer of Acts as a whole to be a 'tendency' writer of the most marked character—hardly less so than a post-apostolic author who should have simply invented the 'we' sections. To suppose that the 'we' sections were invented, however, is just as inadmissible as to question the genuineness of Galatians. If the sections had been invented, they would not have been so different from the rest of the book. We must therefore conclude that the sections in question come from a document written by an eye-witness, the so-called 'we' source, and that this was used by a later writer, the compiler of the whole book.

It is upon this assumption of a distinct authorship for

¹ On title see below, § 3 n.

ACTS OF THE APOSTLES

the 'we' sections that we are best able to pass a comparatively favourable judgment on the compiler's deviations from historical facts in other parts of the book. But there is one charge from which he cannot be freed, viz., that he has followed the method of retaining the 'we' without change. In the case of so capable a writer, in whom hardly a trace can be detected, either in vocabulary or in style, of the use of documents, this fact is not to be explained by lack of skill, such as is sometimes met with in the Mediaeval chroniclers. The inference is inevitable that he wished—that has actually happened—that the whole book should be regarded as the work of an eye-witness. An analogous case is to be found in the 'I' taken over from the Memoirs of Ezra and Nehemiah (Ezra 7:27-8:34, 9:1-15; Neh. 1:1-7:5, 12:31, 13:6-31; also in Tob. 1:3-8, and in *Protangelium Jacobi*, 18 f.). Just as Ezra 10 and Neh. 8, as well as the sections just mentioned, must be held to rest on those Memoirs, although modified and with the 'I' dropped out, so in Acts we may assume much other matter to have been drawn from the source from which the 'we' sections are derived. Any attempt, however, to assign to this source whole sections of the book not having the 'we,' and to use the conclusion so gained as a proof of the trustworthiness of everything thus assumed to belong to it, must be postponed until this trustworthiness has been investigated by the means otherwise at our command.

In this investigation we begin with certain obvious inaccuracies—first of all with those which cannot be traced to the influence of any tendency.

2. Inaccuracies uninfluenced by tendency.

Let us take the manifestation of Christ to Paul near Damascus. According to 22:9 his companions see the light from heaven but do not hear the voice of Jesus; according to 9:7 they hear the voice but see no one and do not fall down; according to 26:12-18 they fall down indeed with Paul, but it is he alone who sees the heavenly light, and hears the voice. This last account, moreover, represents him as having received at the time an explanation of what had occurred; according to 22:14 f., he did not receive the explanation until afterwards, through Ananias.

Further inconsistencies of statement are to be found when we compare the explanation of the departure from Jerusalem in 9:25-30 with that in 22:17-21; the account in 10:44 (εἶπε) with that in 11:15 (ἀπεστόμα); the explanation of the offering in 21:20-26 with that in 24:17 f.; the accounts in 21:31-34, 22:23-29, 28:27 with 28:17, according to which Paul was, in Jerusalem, a prisoner of the Jews and not as yet of the Romans; the occasion of the appeal to Caesar in 25:9-11 with that in 28:18 f. The liberation of Paul and Silas from prison at Philippi (16:23-40) is not only a very startling miracle (with resemblances to what we read in Euripides, *Bacchae*, 436-441, 502 f., 606-628 [cp. Nonnus, *Dionysiaca*, 45, 262-283], and as regards Acts 16:25-30, in Lucian, *Toxaris*, 27-33), but is scarcely reconcilable with 1 Thess. 2, where the language of the apostle hardly suggests that his 'boldness in God' was in any measure due to an occurrence of this kind.

So much for inaccuracies that cannot be attributed to any tendency on the part of the writer. There are others—and these of much greater importance—which can only be so explained. Before discussing these, let us ascertain clearly what the tendency of the writer is.

Every historian who is not simply an annalist must have 'tendency' in the wider sense of that word.

3. Tendency of the book.

His trustworthiness is not necessarily affected thereby: indeed, it has actually been urged by one of the apologists for Acts,¹ as an argument for the trustworthiness of the book, that it was designed to be put in as a document at the trial of Paul, and was written entirely with this view—a position that cannot, however, be made good. Now, it is clear that the book does not profess to be a history of the first extension of Christianity, or of the Church in the apostolic age: it covers really only a small portion of this. It is equally certain that the title *πράξεις (ἔργων) ἀποστόλων* does not express the purpose of its

author, who relates hardly anything of James and John, and of nine of the apostles mentions nothing but the names.¹ Neither is the book a history of Peter and Paul, for it tells also of John, of both the Jameses, of the deacons, of Stephen, Philip, Apollos, and others. Nor is it a history of the spread of the gospel from Jerusalem to Rome; for the founding of the Roman church is not described but presupposed (28:15), and all that has any interest for the writer is the arrival there of Paul (19:21, 23:11). It is often supposed that the aim of the book is expressly formulated in 18, and that the purpose of the author was to set forth the spread of Christianity from Jerusalem, through Samaria, and to the ends of the earth. This is much too indefinite to account either for the difference in scale of the various narratives, sometimes so minutely detailed and sometimes so very vague, or for their marked divergences from actual history.

It is, therefore, no prejudice on the part of critics, but the nature of the book itself, that leads us to ascribe tendency to the writer. Only (1) we must not, with the Tübingen School, consider it 'conciliatory.' According to that view, Acts was an attempt from the Pauline side, by means of concessions, to bring Judaism to a recognition of Gentile Christianity. A reconciliation of the two was thus to be effected in face of the danger that threatened both, from Gnosticism on the one side and from state persecution on the other. This cannot have been the purpose. Acts is much too harsh towards non-Christian Jews, for whom Christian Jews continued to retain a certain sympathy (2:23, 7:51-53, 18:3 f., 12:17, 19:1-16, 21:27-36, 23:12-15, etc.); besides, most of the details which it gives have no relation to any such purpose. The main point on which the supposed reconciliation turns, the Apostolic Decree (15:28 f.), is to be explained otherwise (see COUNCIL OF JERUSALEM, § 10). (2) On the other hand, the book is not a mere apology for Paul. If it were, much of its contents would be unsuitable (e.g., the enumeration of the conditions required in an apostle [21 f.], which were not fulfilled in Paul); it does not even give such a view of the personality of Paul as the facts known to us from the epistles demand (see below, §§ 7, 14). There remains only (3) one other possible view of the author's tendency. His aim is to justify the Gentile Christianity of himself and his time, already on the way to Catholicism, and he seeks to do this by means of an account of the origin of Christianity. The apostles, including Paul, are the historical foundation of Christianity, and 4:32 a, where we are told that all Christians were of one heart and soul, may be regarded as forming a motto for the book.

A whole series of demonstrable inaccuracies becomes

4. Inaccuracies resulting from this tendency.

comprehensible when viewed as resulting from this tendency. Paul never comes into conflict with the original apostles or their followers as he does

in Gal. 4:17, 5:7, 10:12; 2 Cor. 10:14 f., 11:13-15, 18-23.

The one misunderstanding (Acts 15) that arises is cleared away by the original apostles; the attempt to enforce the circumcision of Titus (Gal. 2:3-5)—nay, the whole personality of Titus—is just as carefully passed over in silence as are the dispute with Peter at Antioch (Gal. 2:11-21; see COUNCIL OF JERUSALEM, § 3) and the Judaising plots to impose on the Galatians and Corinthians another Gospel, that of circumcision (Gal. 1:8, 6:12 f.), and another Christ (2 Cor. 11:4 f.). Apart

¹ It is not to be inferred from the absence of the article from the title in good MSS (*πράξεις ἀποστόλων* [BD]) that the author meant to say that it was with the acts of only some of the apostles that he proposed to deal; for it would be very strange that he should admit such an incompleteness in the very title of his work. The article before *ἀποστόλων* is omitted because *πράξεις* is without it; and that is so simply because such is the usual practice at the beginning of books (cp. Mt. 1:1 Acts 1:1, and see Winer⁸, § 19.4, 10). Since therefore no form of the title can be assigned to the author of the book, we conclude that the title must date from the time when the book was first united with others in one collection—its first occurrence is in the last third of the second century (Mur. Fragm. Tert. Clem. Al.). The simple *πράξεις* [α], common since Origen, is meaningless as an original title, and intelligible only as an abbreviation.

¹ Aberle, *Tüb. Theol. Quartalschr.* 1863, pp. 84-134.

ACTS OF THE APOSTLES

from the Gentiles, who seldom show hostility to Paul (14.5 16.23 19.37-41). It is (notwithstanding the end of 2 Cor. 11.20) only at the hands of non-Christian Jews that Paul meets with difficulties (13.45 18.6 19.23-24) or persecutions (9.21.7. 23 13.50 14.12 19 17.5-13 18.12.5. 20.12 21.27-36 22.12-21 24.17. 25.23-29). For further illustrations of the operation of this tendency in the writer of Acts see SIMON and BAILEY.

On the other hand, Paul brings forward nothing whatever in which the original apostles had not led the way: far from going beyond them at all, he appears to be entirely dependent on them.

His journeys to Arabia, Syria, and Cilicia (Gal. 1.17-21) are passed over in silence, and thus it is made out that not he but Peter gains the first Gentile convert, for Cornelius, in opposition to 10.2-23.5, where he is a semi-proselyte, is represented in 10.23-45 11.18 15.7 as a pure Gentile. (Historically, however, after Peter had, in face of the doubts of the primitive church, so completely, and as a question of general principle, justified the reception of Cornelius into the Christian community without his being subjected to the requirements of the Mosaic law, as is related in 11.1-8, the question that led to the Council of Jerusalem could never again have sprung up.)

Again, whenever Paul comes into a strange city, he seeks (as we should expect him to do) to establish relations first of all with the synagogue, since, through the proselytes who might be looked for there, he could obtain access to the Gentiles: our view agrees also with Rom. 10.18-21. According to Acts, however, in almost every place where Paul betakes himself with his message to the Gentiles as distinct from the Jews, he has to purchase anew the right to do so, by first of all preaching to the Jews and being rejected by them (13.14.45. 18.4-6 19.8. 28.17-24-28). The only exceptions to this rule are Beroea (17.10-12), Paphos, Lystra, and Athens (13.6 14.17 17.17)—where the narrative passes at once to a quite singular incident—and towns so summarily dealt with as Derbe and Perga (14.21-25), along with Iconium, where Gentiles are brought to Christianity through the sermon in the synagogue (14.1). In 28.17-28, in order to make the right to preach to the Gentiles dependent on the rejection of the gospel by the Jews, the very existence of the Christian church, already according to 28.15, to be found in Rome, is ignored. Such a dependence of Paul's life-work—his mission to the Gentiles—on the department of the Jews, and that too in every individual city, is quite unreasonable with Gal. 1.10 2.7. and with the motives which the author himself indicates in Acts 13.47 28.25, as well as with 24.14.7.

After the appearance of Jesus himself to Paul near Damascus, the apostle has yet further to be introduced to his work by the appearance of the first Christian in Antioch (13.10-19 22.10-14.1), and subsequently (11.23) by DEMAS, who, a member of the original church, and thus happens after the fashion of Antioch—the first Gentile Christian Church, and Paul's first independent congregation—had already been founded by Christians from Jerusalem (11.20-24). (Both of these statements are contradicted by Gal. 1.16; the latter of them also by the order in which Syria and Cilicia are taken in Gal. 1.21.) Moreover, at the Council of Jerusalem (15.2) Paul is only to give in a report and to accept the decisions of the primitive church.

The tendency we have pointed out throws light also on the parallel (which is tolerably close, especially where miracles are concerned) between the acts and experiences of Peter and of Paul.

Both begin by healing a man lame from birth (8.2-10=14.8-10), and go on to the cure of another sick man (9.33.7=28.8); they heal many men at once, both directly (5.16-28.9) and mediately (5.15=19.12), besides doing signs and wonders generally (2.43 5.12=14.15 12.10.11); both bring a dead person to life (9.26-42=20.9-12); both perform a miracle of judgment (5.1-10=18.6-11); both, by the laying-on of hands, confer the gift of the Holy Ghost (8.14-17=19.1-7), and in doing so also impart the gift of tongues (10.44-46=19.6); both have a vision corresponding with one experienced by another man (10.1-22=9.3-16); both are miraculously delivered from prison (5.18.7.11=16.23-24); both are scourged (5.40=16.22); both decline divine honours in almost identical words (10.25.7=14.11-18, cp 28.6).

The life of Paul included many more incidents of this kind than that of Peter; but from what we have already observed we can understand how the author's wish not to allow Peter to fall behind Paul must have influenced the narrative. Still, he has by no means wholly sacrificed history to his imagination; had this been so, he would certainly have brought his narrative into much closer agreement with his own ideals. He has not, for example, introduced in the case of Peter, as in that of Paul, a stoning (14.19), or threats against life (9.23.7. 29.14), or an exorcism (16.16-18). And in like manner the omission of many of the items enumerated in 2 Cor. 11.23-27 12.12 may be explained, at least in part, by the supposition that he had no definite knowledge about them. He has, it would seem, at least in the main,

confined himself to matter preserved by tradition, merely making a selection and putting it into shape.

The author has two tendencies in addition to the religious-theological one.

1. There is first the political tendency, the desire to say as little as possible unfavourable to the Roman civil power.

In the Third Gospel we already find Pilate declaring that he finds no fault in Jesus, and he has this judgment confirmed by Herod, who in the other gospels is not mentioned at all in connection with the examination of Jesus. Pilate declares thrice over that he will release Jesus, and he is prevailed upon to pass adverse sentence only by the insistence of the Jews (Lk. 23.1-25). In Acts (which has even been regarded by some as an apology for Christianity intended to be laid before Gentiles; see above § 1.1), the first converts of Peter and Paul are Roman officers (10.1-13.7), while it is the Roman authorities who definitely declare Paul to be no political criminal as the Jews would have it (18.14. 19.37 23.29 25.18.7. 26.31.7.); it is by them also that he is protected (in more than one instance at any rate) from conspiracies (18.12-17 19.31 21.31-36 23.10-22-33 25.24).

When this political tendency is recognised, the conclusion of the book becomes intelligible. Otherwise it is a riddle. Even if the author meant to add still a *τρίτος λόγος* (third treatise)—which is pure conjecture—he could not suitably have ended the *δέυτερος λόγος* (second treatise) otherwise than with the death of Paul: that he did not survive Paul is even less likely than that he was otherwise interrupted at this point of his work. When we take account of this political tendency, however, 'none forbidding him' (*ἀκαυλώτως*) is really a skillfully devised conclusion. The very last word thus says something favourable to the Roman authorities, and, in order not to efface this impression, the writer leaves the death of Paul unmentioned.

2. Secondly, he has in his mode of narration an aesthetic as well as a political tendency: he aims at being graphic.

This end is promoted very specially by the 'we' and the details, otherwise purposeless, appropriated from the Journey Record; but it is also served by much in chaps. 1-12 that, without having any claim to be regarded as historical, contributes to the enlivening of the picture of the primitive Christian community (see below, § 13); also by the speeches (see § 14), and particularly by the miracle-narratives, which in almost every case where they are not derived from the 'we' document (see § 8) are characterised by touches of remarkable vigour (1.10-12 2.1-13.4; 3.1-11 4.1-12 5.1-12 6.1-12 7.1-12 8.1-12 9.1-12 10.1-12 11.1-12 12.1-12 13.1-12 14.1-12 15.1-12 16.1-12 17.1-12 18.1-12 19.1-12 20.1-12 21.1-12 22.1-12 23.1-12 24.1-12 25.1-12 26.1-12 27.1-12 28.1-12).

The total influence of all these tendencies not having been so great as to lead the author wholly to disregard the matter supplied to him by tradition,

6. Total effect of these tendencies on the history.

the matter supplied to him by tradition, it has often been supposed possible to affirm that he had no such tendencies at all. The inaccuracies of the book are in this case explained simply by the assumption that the writer was not in possession of full information, and that, in a naive yet still unbiassed way, he first represented to himself the conditions of the apostolic age, and afterwards described them, as if they had been similar to those of his own, when the conflict of tendencies in the primitive Christian Church had already been brought to an end. Certain it is that in his unquestioning reverence for the apostles, it was impossible for him to conceive the idea of their having ever been at variance with one another. On the other hand, it cannot possibly be denied that he must at the same time have either passed over accounts that were very well known to him or completely changed them. It is hard to understand how any one can airily say that to this writer, a Paulinist, the Pauline epistles remained unknown. Paradoxical as it sounds, it is certainly the fact that such a lack of acquaintance would be more easily explicable had he been a companion of Paul (a supposition which, however, it is impossible to accept; see above, § 1) than it is on the assumption that he lived in post-apostolic times. It is conceivable, though not probable, that Paul might sometimes have been unable to communicate his epistles to his companions

before sending them off. But a companion of Paul would at least be familiar with the events which are recorded in the epistles—events with which the representation in Acts is inconsistent. If we are not prepared to declare the whole mass of the Pauline epistles to be spurious, and their statements about the events to which they allude unhistorical, there is no way of acquitting the writer of Acts from the charge of having moulded history under the influence of 'tendency.' Only this tendency must be understood as being simply a consistent adherence to the view of the history that he had before he studied his sources.

The tendencies of the author once established in regard to points where his historical inaccuracy admits

7. Possible further influences of tendency.

of definite proof from a trustworthy source, one may perhaps find on them presumptions in regard to matters that admit of no such control. Did Paul circumcise Timothy (163)? Since Timothy's mother is called a Jewess, and Paul held the principle laid down in 1 Cor. 9.20, it is impossible to deny categorically that he did. Nevertheless, it remains in the highest degree improbable, especially after Paul had, just before (Gal. 2.3-5), so triumphantly and as a question of principle, opposed the circumcision of Titus. The difficulty of the case is not much relieved even by the supposition that the circumcision happened before the Council of Jerusalem, and only on account of the Jews of that place (163) and therefore, notwithstanding the statement of the same verse, not with a view to the missionary journeys. Again, did Paul take a Nazirite vow? We leave 18.8 out of account, since the text does not enable us clearly to decide whether that assertion concerns Paul or Aquila, and since a Nazirite could shave his head only in Jerusalem. In 21.25-26, however, Paul is represented as having taken such a vow, not only without waiting for the minimum period of thirty days required by traditional law (21.27; 24.11, cp. Jos. *Ant.* 15.4 [§ 313]; Num. 6.13-21; see NAZIRITE), but also, and above all, with the expressly avowed purpose of proving that the report of his having exempted the Jewish Christians of the Diaspora from obligation to the ceremonial law was not true, and that he himself constantly observed that law (cp 28.17). This would, for Paul, have been simply an untruth, and that, too, on a point of his religious conviction that was fundamental (Gal. 4.9-11; Rom. 10.4, etc.). Just as questionable, morally, would it have been had he really described himself, especially before a court of justice (23.6, cp 24.21; 26.5-8; 28.20), simply as a Pharisee, asserted that he was accused only on account of the doctrine of the resurrection of the dead, and held his peace about his Christianity.

In view of the tendencies that have been pointed out, there is, unhappily, some room for the suspicion that

8. The Journey Record: a. its treatment.

the author has not held himself bound to appropriate the 'we' source in its integrity. This is indeed made antecedently probable by the fact that he has already in the Third Gospel passed over much that lay before him in his sources, and that the sections of the Journey Record actually adopted supply for the most part only superficial notices of the stages passed, or miracle stories. And just in proportion to the freedom of the latter from legendary embellishments (16.16-18; 20.9-12; 28.3-9), and to their credibility even in the eyes of those who wholly reject the supernatural (although, of course, the narrators thought them miraculous), must be our regret at every instance in which the Journey Record has been set aside, or even in which its words (as has been conjectured to be sometimes the case; see above, § 1) are not reproduced exactly.

This free treatment of the Journey Record increases the difficulty of ascertaining who was its author. Had the record been adopted intact, we should have

been certain that it was not composed by any of those who appear among the companions of Paul in the

9. b. Its author.

sections where the narrative 'we' does not occur. But this means of solution is out of the question. And if the source came into the hands of the author of Acts as (let us say) an anonymous document, or if, in the interest of greater vividness, he used the 'we' without regard to the person originally meant, he may also at the same time have spoken of the writer of the Journey Record in the third person, even when he was otherwise following the document. Yet 20.5 is a strong indication that by the 'we' he does not wish us to understand any one at least of the seven mentioned in the immediately preceding verse. Thus the text at all events gives nowhere any ground for thinking of Timothy, who, moreover, is mentioned in 17.14 f. 18.5 in the third person. If we are to regard the record as coming from Silas, the author of Acts must have used it without the 'we,' and, in a very fragmentary way indeed, for long periods during which, according to his own statement (15.40; 16.19; 25.29; 17.4; 18.5), Silas was with Paul. This, though not quite impossible, is very unlikely. Moreover, Silas is never again mentioned in Acts after 18.5; neither, from the same period—that of Paul's first stay in Corinth (2 Cor. 1.19)—is he again mentioned in the Pauline Epistles; and in 1 Pet. 5.12, he appears by the side of Peter. Whoever attributes the Journey Record to Titus must in like manner assume that much of it has been either not used at all or used without the 'we.' For Titus was with Paul at the time of the Council of Jerusalem (Gal. 2.1), and continued to be his companion at least during the latter part of the three years' stay at Ephesus, as also during the subsequent stay in Macedonia (2 Cor. 2.13; 7.8; 16 f. 23; 12.18¹). Besides, the writer of Acts would use a work of Titus somewhat unwillingly, for he completely suppresses his name (see above § 4²). Still, if so valuable a writing by Titus had been really available, the author of Acts would scarcely have completely neglected it.

If it is thus just possible that Titus wrote the Journey Record, it is perhaps still more conceivable that it was written by Luke. In this way we should best be able to explain how, ever since the time of the Muratorian Fragment and Irenæus (*Adv. Haer.* iii. 14.1), the entire book of Acts as well as the Third Gospel came to be ascribed to him. It is true that, in the Pauline Epistles, the first mention of Luke is in Col. 4.14; Phil. 2.4; 2 Tim. 4.11—in other words, not before Paul's imprisonment and the closing years of his life. Nevertheless, he may have been one of Paul's companions at an earlier period, if we are allowed to suppose that he occupied a subordinate position. The most suspicious fact is that, whilst Luke (see LUKE), if we may trust Col. 4.14, was, like Titus (Gal. 2.3), uncircumcised, the writer of the Journey Record not only uses Jewish specifications of date (Acts 16.13; 20.6 f. 27.9), and goes to the synagogue or the Jewish place of prayer (16.16), but also includes himself (16.13) among those who taught there (*Ἰουδαῖοι*, 16.20, must not be pressed, as it may rest on an error on the part of the speakers; cp 16.37). We must thus, perhaps, abandon all attempt to ascribe the Journey Record to any known companion of Paul.

Other sources for Acts, in addition to that just mentioned, have long been conjectured: e.g., a

10. Other Sources.

Barnabas source for chap. 13 f. Here the naming over again of Barnabas and Saul, and the omission of John Mark (13.1), notwithstanding 12.25, are indeed remarkable, as are also

¹ Add to this that, if 2 Tim. 4.10 is to be taken as accurately preserving an incident in Paul's imprisonment at Caesarea, it could hardly have been Titus that accompanied Paul to Rome (Acts 27.28). The notices in the epistle to Titus are too untrustworthy to serve as a foundation for historical combinations.

² It is just as incorrect to suppose that he is named in Acts 18.7 as it is to identify him with Silas.

the circumstance that, apart from 11 30 12 25 15 22 25, it is precisely in these two chapters that Barnabas is often (13 47 14 14; contrast 13 43 46 49 14 20) mentioned before Paul, and that it is only here (14 14) that Paul (with Barnabas) is called an 'apostle' (see APOSTLE).

Of primary importance would be the establishment of sources for chaps. 1-12.

Many traces of distinct sources can be detected. In addition to what is said under GENTILES, STRATONIA, and under COME TO ME (see below, §§ 29, 2 two theories had been recognised as having been thought of. Such a solution of the idea that the blessing of God depended on the possession of the temple (7 48-50), and censure of the national rebellion of the people against the divine will (7 51-53). The stoning of Stephen, moreover, is narrated twice (7 58 and 60a), in a very curious way, and his burial does not follow till 8 2, after the mention of the great persecution and the flight of the Christians except the apostles (8 16c). In 8 5, the persecution is mentioned, not in 8 14, only once in 8 14, and in 8 14. The mention of Saul seems thus throughout (7 58 8 1 2) to be a later insertion into a source in which he was not originally named. Besides, 8 16c seems also to be an interpolation into the account of the last hours of Stephen. In as far as this interpolation speaks of the dispersion of the Christians, it is continued in 11 19, while 8 4 may easily be an ingenious transition in some editor leading to the laying on of hands in 11 19 is further followed by the statement (11 22) that the church at Jerusalem elected a delegate. This representation of the right of the church to elect delegates, which is found also in 6 5, seems to be more primitive than that in 8 14, according to which such an election was made by the apostles. Further, in 8 15-17 the apostles are raised to a rank unknown to the earliest times. For, that Christians did not receive the Holy Ghost by baptism, but only through subsequent laying on of hands, and those in the hands of the apostles, is disproved by Gal. 3 26, and even by the presupposition underlying Acts 19 2 f., although the same notion reappears shortly afterwards (19 6). In like manner, finally, the words 'except the apostles' (8 1) may have been subsequently inserted, to preserve the dignity of the apostles and the certainty of their role in Jerusalem. In 11 30 the friendly gifts destined for distribution during the famine come into the hands of the presbyters, not, as 6 1-6 would have led us to expect, into those of the deacons.

Observations such as the preceding have of late been expanded into comprehensive theories assigning the whole book to one source or to several sources, with additions by one editor or by several editors.

11. Theories as to Sources. No. 3. Weiss, *Einheitsurtheil* (1871, 2nd ed. 1876), § 89, and *Uebersicht*, 113; (vol. 9, 1881, 2nd ed. 4, of *Goldschmidt and Haenke's Text u. Deutung*); Seele, *Entstehung der Apostelgeschichte* (1872); Van Manen, *Paulus, 1. de handelingen der Apostelen* (1879); *Textus, Uebersetzung, Einleitung, Anmerkungen* (1880); Goldschmidt, 142; Spitta, *Apostelgesch.*, 113; Clemens, *Comment. de Paulin*, Br. 1893, and (for chaps. 1-5) in *St. Kr.*, 1895, pp. 297-357; Joh. Weiss, *St. Kr.*, 1893, pp. 480-540, 'Das Judenthum in der Ap. gesch.', etc., and 1895, pp. 252-269, 'Die Chronol. der Paulin. Br.'; Gercke in *Hermes*, 1894, pp. 373-392 (of the first chapters); Jüngst, *Die Quellen der Apostelgesch.*, 1895; Hilgenfeld, *ZfW*, 1895, pp. 65-115, 186-217, 384-447, 488-513, 606 ff., pp. 24-79, 172-186, 218-220, 228-230.

No satisfactory conclusion has as yet been reached along these lines; but the agreement that has been arrived at upon a good many points warrants the hope that at least some conclusions will ultimately gain general recognition. It is certainly undeniable that this kind of work has sharpened the wits of the critics, and rendered visible certain inequalities of representation, joints and seams, even in places where they are not so conspicuous as in 7 58-8 4.

Thus the tumult in Thessalonica is told in 17 for a second time after 17 5 in a disturbing way that leaves it impossible to say who it was that the Jews were trying (17 5) to drag before the people, or why it was that Jason (17 5 f.), whose part in the affair does not become clear till 17 7, was brought before the authorities. It is probable that 13 52 originally followed immediately on 13 49. Similarly, the account of the wholesale miracles of the original apostles (5 12 15 1 f.) is interrupted by the interpolation of a fragment (5 12b 14) which is itself not homogeneous. The least that could be done here would be to arrange as follows: 5 12a 23 16 14 10b 13. But that the text should have become so greatly disarranged by transposition is much less likely than the supposition of several successive interpolations. On 18 24-28 15 2-24, see APOLLOS, and COUNCIL OF JERUSALEM, §§ 4-5. In the latter passage (15 2-3) the attempt has been made, by separation of sources, to solve the questions to which otherwise only tendency-criticism seemed to provide an answer. Similarly in the case of 21 20b-26. After the presbyters have just praised God for the success of Paul's mission to the Gentiles (21 20a) the proposal that he should put it in evidence how strictly legal he is in his views follows with but little fitness.

And had Paul been engaged in carrying out a Nazirite vow, it is hardly likely that his presence in the temple (21 27-29) could have led to an attempt on his life. A reason for this attempt is found (21 28 f.) in the alleged introduction of a Gentile within the sacred precincts of the temple, a proceeding which no one would guess to be simultaneous with the presentation of an offering. Since, moreover, for a Nazirite vow at least thirty days are necessary (see above, § 7), it has been proposed to detach 21 20b-26, and to refer the seven days of 21 27 to the duration of the feast of Pentecost which Paul, according to 20 16, was to spend in Jerusalem. 21 19 20a 27 ff. would then also, along with 20 16 and 21 1-18, belong to the Journey Record.

We come now to the question how far this distribution of the matter among various sources affects the

12. Bearings of these theories on trustworthiness.

trustworthiness of the book. It is (supposed) true that, in the case last mentioned, the archæological mistake of assigning only seven days for the Nazirite rites would become more comprehensible if we recognised a variety of sources; yet even so we should have to admit that there is an error, and that the editor had been guilty of the oversight of incautiously bringing the two accounts together. And he, as well as the source from which 21 20b-26 is perhaps taken, would still remain open to the reproach of having, under the influence of a tendency of the kind described above (§ 6), ascribed to Paul a repudiation of his principles of freedom from the law. It cannot be too strongly insisted that in as far as Acts, viewed as a homogeneous work, has to be regarded as a tendency writing, it is impossible to free it wholly of this character by distributing the matter among the various sources: the most that can be done is in cases of excessive misrepresentation to put this in a softer light. In general, however, the editor has dealt with his sources in so masterful a manner that an unlucky hit in the selection and arrangement of the pieces has but rarely to be noted. It has been a practice among some of the scholars enumerated above to claim absolute trustworthiness for the whole of an assumed source which they suppose themselves to have made out, irrespectively of the nature of some of the contents, as soon as they have found it trustworthy in some particulars. Such an abuse of discrimination of sources in the interest of apologetics is not only illegitimate; it speedily revenges itself. These very critics for the most part find themselves compelled to attribute to their secondary sources and their editors an extraordinary amount of ignorance and awkwardness. In particular, all theories according to which a single assumed source (of which the 'we' sections form part) is taken as a basis for the whole of Acts must from the outset be looked upon with distrust. There is nothing to suggest that any diary-writing companion of Paul also wrote on the beginnings of the church at Jerusalem, and, even if there were, any assumption that his information on such a subject would be as trustworthy as his assertions founded on his own experience, would be quite unwarranted.

The results then with reference to the trustworthiness of Acts, as far as its facts are concerned, are these.

13. Trustworthiness of narrative.

Apart from the 'we' sections no statement merits immediate acceptance on the mere ground of its presence in the book. All that contradicts the Pauline epistles must be absolutely given up, unless we are to regard these as spurious. Positive proofs of the trustworthiness of Acts must be tested with the greatest caution.

Ramsay thinks he has discovered such proofs in the accuracy with which geographical names and contemporary conditions are reproduced in the journeys of Paul (*Church*, 1894, 1-168; *St. Paul*, 1895). Some of the most important of these points will be considered elsewhere (GALATIA, §§ 9-13, 22). Of the other detailed instances many will be found to break down on closer examination.

For example, Ramsay goes so far as to say (*St. Paul*, chap. 11, 4): 'Aquila, a man of Pontus, settled in Rome, bears a Latin

ACTS OF THE APOSTLES

name; and must therefore have belonged to the province and not to non-Roman Pontus. This is a good example of Luke's principle to use the Roman provincial divisions for purposes of classification. As if a Jew from non-Roman Pontus, settled in Rome, could not have assumed a subsidiary Roman name, as countless other Jews are known to have done! And as if Luke would not have found it necessary to call him Πόντιος even if he were from non-Roman Pontus!

But it is not necessary to go thus into details which might be adduced as proving the author's accurate acquaintance with localities and conditions. For Ramsay attributes the same accuracy of local knowledge also to one of the revisers of the text, assigned by him to the second century A. D., whose work is now preserved to us in D, and also to the author of one source of the *Acta Pauli et Thecle* (§ 3), assigned by him to the second half of the first century, whose work, however, he declares to be pure romance (*Church*, 2564). If so, surely any person acquainted with Asia Minor could, even without knowing very much about the experiences of Paul, have been fairly accurate about matters of geography, provided he did not pick up his information so late in the second century as to betray himself by his language, as according to Ramsay (2564 [end] 5 [end] 759 83-6; *St. Paul*, see Index under 'Bezan Text') the above mentioned reviser, whose work lies at the foundation of D, has done. In point of fact, Weizsäcker (*Ap. Zeitalter*, 239f., 2nd ed. 230 f.; ET 1274f.) thinks that in Acts 13f. the account of the route followed does come from an authentic source, but yet that the contents of the narrative are almost legendary.

Such, for example, are the incidents at Paphos in Cyprus, 13 6-12 (see BARBESSES); also 13 14 46f. 111f., spoken of above (§ 4); the speech in 13 16-41 (see below, § 14); the healing of a lame man, 14 8-10, recorded after the model of 3 1-11; the paying of divine honours to Barnabas and Paul, 14 17-13, after the manner of the heathen fables (*Philemon and Baucis*, in adjacent Phrygia, see *Ov. Met.*, 8 621 657f.); and the institution of the presbyterial organisation, 14 23. In the first main division of the book (1-12), great improbability attaches to the publicity with which the Christian community comes to the front, to the sympathy that it meets with even among the masses, although not joined by them (247 421 513), and to the assertion that only the Sadducees had anything against it, and they only on account of the doctrine of the resurrection (4 1f.), while the Pharisees had given up all the enmity they had displayed against Jesus, adopting a slightly expectant attitude. See, further, BARNABAS, BARBESSES, GIFTS, COMMUNITY OF GOODS, PHILIP, PETER, CORNELIUS, CHRISTIAN, and also, for the journeys of Paul to Jerusalem, and the attempted rearrangement of them, COUNCIL OF JERUSALEM, § 1.

But, after every deduction has been made, Acts certainly contains many data that are correct, as, for example, especially in the matter of proper names such as Jason (17 5), Titius Justus, Crispus, Sosthenes (18 7f. 17), or in little touches such as the title *πολιτάρχαι* (17 6), which is verified by inscriptions¹ for Thessalonica, as is the title of *πρωτος* (28 7) for Malta, and probably the name of Sergius Paulus as proconsul for Cyprus (13 7). Only, unfortunately, we do not possess the means of recognising such data as these with certainty, where confirmation from other sources is wanting.

With regard to the speeches, it is beyond doubt that the author constructed them in each case according to

his own conception of the situation. In doing so he simply followed the acknowledged practice of ancient historians. (Thucydides [i. 22] expresses himself distinctly on this point; the others adopt the custom tacitly without any one's seeing in it anything morally questionable.) This is clearly apparent at the very outset, in Acts 1 16-22.

It is not Peter who needs to recount these events to the primitive Church already familiar with them: it is the author of Acts who feels called on to tell his readers of them. And it was only for the readers of the book that there could have been any need of the note that the Aramaic expression *Acceldama* belonged to the Jerusalem dialect, for that was the very dialect

which the supposed hearers were using (cp. further THEUDAS, and JUDAS OF GALILEE).

The speeches of Paul in Acts embody a theology quite different from that of his epistles.

A thought like Acts 17 28 is nowhere to be found in the epistles. Paul derives idolatry, not, as in Acts 17 29f., from excusable ignorance, but from deliberate and criminal rejection of God (Rom. 1 18-32). Only in Acts 13 38f. 16 31 20 28, do some really Pauline principles begin to make themselves heard. The most characteristically Pauline utterances come, in fact, from Peter (15 7-11), or even James (15 19); see COUNCIL OF JERUSALEM, § 8). The speeches of Paul, especially that in 18 16-41, are so like those of Peter in idea, construction, and mode of expression, that the one might easily be taken for the other. For example, Paul's speech in 13 38f. resembles Peter's in 10 43. Or cp. 3 17 13f. (Peter) with 13 27f. (Paul); 2 25-31 with 13 35-37; or 6 34κατος for 'Christ' in 3 with 22 34, but also with Stephen's in 7 52. For the speeches of Paul, especially 13 16-41, show affinities also with that of Stephen: see 13 17-19 22 as compared with 7 2 6f. 36 45f. In like manner, the apologetic discourses of Paul in his own defence betray clearly an unhistorical origin (see § 7).

In short, almost the only element that is historically important is the Christology of the speeches of Peter. This, however, is important in the highest degree. Jesus is there called *παῖς Θεοῦ*—that is to say, according to 4 25, not 'son,' but 'servant' of God (3 13 26),—holy and righteous (3 14 4 27 2 27); he was not constituted Lord and Messiah before his resurrection (2 36); his death was not a divine arrangement for the salvation of men, but a calamity the guilt of which rested on the Jews (3 13-15 5 30), even if it was (according to 2 23 4 28) fore-ordained of God; on earth he was anointed by God (4 27) with holy spirit and with strength, and he went about doing good and performing cures, but, according to 10 38, only upon demons; his qualification for this is in the same passage traced to the fact that God was with him. God performed miracles through him (2 22). A representation of Jesus so simple, and in such exact agreement with the impression left by the most genuine passages¹ of the first three gospels, is nowhere else to be found in the whole NT. It is hardly possible not to believe that this Christology of the speeches of Peter must have come from a primitive source. It is, nevertheless, a fact sufficiently surprising that it has been transmitted to us by a writer who in other places works so freely with his sources. At the same time, however, the *Didaché* or Teaching of the Twelve Apostles, especially 9f., also bears evidence that in the second century, in spite of Paul, and of the Epistles to the Hebrews, to the Colossians, and to the Ephesians, and of the Gospel of John, an equally simple Christology still reappeared at least in many Christian circles. That the writer of Acts also respected it may be conjectured from the fact that he has not put into the mouth even of Paul any utterances that go beyond it (13 23 22 14).

It has already been repeatedly assumed in the preceding sections that the writer of Acts is identical with

the writer of the Third Gospel. The similarity of language, style, and idea, constantly leads back to this conclusion.

Differences of spirit between the two writings are so difficult to find that their existence at any time can be held only on the assumption of a subsequent revision of the Gospel, with a view to their removal, by the author of Acts.

The most important divergence between the two books is that according to Acts 13 (cp. 13 31) the ascension of Jesus did not occur till forty days after his resurrection, while according to Lk. 24 13 29 33 50 f., as also the Epistle of Barnabas (150) and probably even Jn. 20 17, it was on the very evening of the resurrection. According to the original view, as indicated by the absence of any special separate mention of the ascension, in 1 Cor. 15 4-12; Rom. 8 34; Heb. 3 13 10 12 12 2; Eph. 1 20 25f. 4 9 f.; 1 Pet. 3 19 22, and perhaps even also in Acts 2 23-35; (see *oἰν* 2 33) the resurrection and the ascen-

¹ Such passages as Mk. 10 17f.; Mt. 13 30 6 5; Lk. 11 20-32; Mt. 16 5-12 11 5f. 12 31f. as contrasted with those in the same gospels which already present secondary reproductions of the same facts—viz., Mt. 19 16f. 12 23 (ἐξουσιον); see below, § 17 1f.) 24 36 13 38 12 40 14 15-24; Lk. 7 21; Mk. 3 26-30.

¹ A detailed discussion by De Witt Burton will be found in the *Amer. Journ. of Theol.*, 1898, pp. 598-632.

² Unless the passage be indeed a legendary development of Mt. 27 53-10.

sion were the same act, and all appearances of the risen Jesus were thought of as being made from heaven. Whether this follows also from 'goeth before' (ἡγορεύει) in Mk. 16.7 and in Mt. 28.7, may be doubted. In any case the forty days indicate a significant development of the idea, already at work in the Third Gospel, that before his ascension Jesus must have continued on earth to maintain intercourse with his disciples, in order that he might instruct them as to matters which he had not been able to take up before his death. A development of this kind in the story of the ascension required time. Even the repetition of the list of apostles in 1.13 from Lk. 6.14-16 marks Acts as a new work. It is, accordingly, very rash to suppose that Lk. 1.1-4 applies to Acts also, or to draw conclusions from this.

As the book is dedicated to Theophilus, *Blass kirchliche Zeitsch.*, 1895, pp. 700-725) that the latter must, according to the custom that prevailed in antiquity, have been named in the title (that the title *πρὸς τὸν θεοφιλοῦ ἄποστόλων* is not original, see above, § 3 n.). The same custom, too, he argues, would require the author to mention his own name in the title. Accordingly as, since the end of the second century, the author has been believed to be Luke (see above, § 9), Blass thinks he is justified in restoring the title thus—*Λουκᾶ Ἀντιόχειας πρὸς Θεοφιλοῦ Ἀποστόλων*. But this pure conjecture cannot overthrow the proof that the book does not come from a companion of Paul. On the contrary, had the title really run thus, it must have been regarded as a fiction. We should have had to suppose that the author, not content with suggesting (by retaining the 'we' of his source (see § 1)) that he had been a companion of Paul on his missionary journeys, desired to make this claim expressly in the title.

The date of composition of Acts thus falls at least some time later than that of the Third Gospel. The latter is now, on account of its accurate allusions to actual incidents in the destruction of Jerusalem (Lk. 19.43 f. 21.20), almost universally set down to a date later than 70 A.D., and on some other grounds, which, however, it must be said, are less definite, even considerably later (see GOSPELS).

16. **Date.** Similar, for Acts, the dying out of all recollection of the actual conditions of apostolic times—in particular, the ignorance as to the gift of tongues (see GIFTS, SPIRITUAL) and the approaches to hierarchical ideas (1.7-20 8.14-17 15.28 20.28)—points only in a general way to a late period. Hence the surest datum is the author's acquaintance with the writings of Josephus.¹ For an instance see THEUDAS. Josephus completed his *Jewish War* shortly before 79 A.D., his *Antiquities* in 93 or 94, the work *Against Apion* after that, and his *Autobiography* somewhat after 100. As to the inferior limit, Marcion about 140 A.D. had the Third Gospel, but not Acts, in his collection; but we are not aware whether he rejected it or whether it was wholly unknown to him. As for the Apostolic Fathers, 1 Clem. 18.1, if it have any literary connection with Acts 13.24, can just as easily be the earlier as the later; and as regards the rest of their writings, apart from Polycarp 1.2 (= Acts 2.24), dating from about 150 A.D., we can find traces only of the speech of Stephen, in the Epistle of Barnabas (16.2 9.4 f. 6.11 4.14 13.3=Acts 7.50 51 52 40-43), which, in 16.4, speaks of Hadrian's projected building, about 130 A.D., of a heathen temple in place of the Jewish temple as imminent.² In Justin, about 152 A.D. (not 137; see *Acad.* 1896, No. 1239, p. 98), the points of contact are more marked. If Acts 20.18-35 has many ideas in common with those of the Pastoral Epistles, the indiscriminate use of *πρεσβύτεροι* and *ἐπίσκοποι* (20.17-28) shows that the author has not yet reached the stage in the development of church government which characterizes the First Epistle to Timothy, the latest of the Pastoral Epistles, which wishes to see the bishop, conceived of as a sole ruler and represented in the

person of Timothy as apostolic vicar, set over the presbytery (1 Tim. 5.19). The date of Acts must, accordingly, be set down as somewhere between 105 and 130, or, if the gospel of Luke already presupposes acquaintance with all the writings of Josephus, between 110 and 130 A.D.

The conclusions reached in the foregoing sections would have to be withdrawn, however, and the author

17. **Blass's Theory.** of Acts regarded as an eye-witness, if the views recently put forth by Blass³ should prove to be correct. According to Blass, the markedly divergent readings of D, and those of the same character found in some other authorities,² all came from the author's rough draft of the book (which he calls β), while the ordinary text, α, found in B, N, A, C, etc., comes from the fair copy of this intended for Theophilus, which the author (being a poor man) made with his own hand. In doing so he changed his original—without special tendency or motive—and, still more, abridged it as only authors do in copying their own work. And here, as we have intimated, Blass says, the author can be no other than the eye-witness who can give his narrative in the first person with 'we.'³ To pronounce upon this certainly interesting hypothesis is, however, not nearly so simple a matter as Blass allows himself to suppose.

(a) Blass himself says that D and the additions or marginal readings in Syr. hl. in many cases already exhibit a combination of α and β, and that—as is witnessed by 15.5 18.19, etc., where both sources coincide—this occurred even in the archetype itself from which both (directly or indirectly) are derived.

But there are many cases where Blass ought to have expressly recognised this combination, where, instead of merely simply deleting something in β without giving further explanation. For example, *ἐκθαμβοί* at the end of 3.11 comes from α alongside of *οἱ οὐ θεοφιλοῦ ἄποστόλων* in β; but Blass does not recognise the *ἐκθαμβοί* as *ἐκθαμβοί* in β (i.e., by the process of combination just mentioned). Similarly it is supported by the best witnesses for this text, *πιστεύσαντες ἐν τῷ κυρίῳ Ἰησοῦ Χριστῷ* (4.13), coming from α, is an expression parallel to *πιστεύσαντες ἐν αὐτῷ* after *τοῦ μὴ δοῦναι αὐτοῖς περιετοίαν ἐν β* of the second list of names. Here Blass wrongly questions the well-supported *πιστεύσαντες ἐν αὐτῷ*.

He points out other corruptions also in the witnesses to β.

For example, in cod. 137 and Syr. hl. after Ἀριστάρχου Μακεδόνης (21.2), instead of *ἡσυχαστικῶς*, the words *θεοφιλοῦ Ἀποστόλου* Ἀριστάρχου καὶ Σακευκῆς, which call *θεοφιλοῦ* have taken their place in the margin only as a reminiscence of 20.4 and not as a variant. He does well to put such things on one side when trying to reconstruct an old recension β as distinct from α.

¹ *St. Kr.* 1894, pp. 86-110; *Acta Apostolorum*, with philological, crit., 1895, 1. 181, and 2. 174. *Antiquitates* (with notes), 1895, 1. 100-101, Leipzig, 1895. The theory of Blass finds a supporter in Joh. Belsar, *Reise zur Erläuter. d. Ap. gesch. auf Grund der Liasarten des Cod. D. n. seine eigene Version* (Leipzig im Breisgau, 1897); it is argued against by Bernhard Weiss, *Der Codex D in der Ap. gesch.*, 1897, vol. 17 part 1 of Gebb. and Hartung's *Texte u. Untersuchungen* (well worthy of attention, though not comprehensive enough). On Ramsay, see above, § 3.

² The additions and marginal readings of the Hierksian version (Syr. hl.); the Fleury palimpsest (ed. Sam. Berger, 1889); an Old Latin text of Acts 1.1-136 and 28.16-31, inserted in a MS of the Vg. from Perpignan (also edited by Berger; *Un ancien texte latin des actes des apôtres*, 1895, reprinted from *Notices et extraits des manuscrits de la Bibliothèque impériale*, tome 35, 1. partie); Cyprian and Augustine, and in a secondary degree the composite texts E, 137, Guss. Llibron (ed. Belsar, 1879), Sahid., Irenæus, etc.

³ In his second book Blass no longer calls β the rough draft of Luke himself, but says: 'Actorum primum exemplar postquam Romæ confectum est vel mansit libidem vel Christianis Romanis ab auctore ad describendum commodatum est; altera autem forma orientis ab initio fuit ubi Theophilum in seipsum (i. e. in seipsum) putavit (pp. vii. 2). In support of this, he appeals especially (p. xi.) to the more detailed description in α of the journey on the coast of Crete (Acts 27), which would be more interesting in the East than in Rome, and on the other hand to the greater precision in β with regard to the journey by sea to Malta and to Italy, which would be interesting to people at Rome. This seems, however, to be no improvement on his earlier view, since (to mention no other reason) the dedication to Theophilus is to be found also in β.

¹ The evidence for this has of late been brought together with very great completeness by Krenkel (*Josephus und Lucas*, 1894); see also the *Fortnightly Rev.* 22.485-500 [177].
² The reference cannot be to the (historically very doubtful) rebuilding of the Jewish temple (about 120-125). The καὶ after *ἐπὶ* must be deleted, according to the best MSS and indeed as the connection demands.

words crept into the text of DA Vg. Gigas, but in E, on the other hand, with skilful avoidance of tautology, was changed to ἀποδησάτων. The case is similar with the addition in 5 21 (found only in D)—ἐψηθήσετ' ἡ ψαύλ—an addition which, moreover, comes in very awkwardly after παρασημαίνοντες τὴν β' ἡρακλίου and αὐτὸν οὐκ ἐπαύσατο, instead of ἐπαύσατο. It is possible to say αὐτὸν ἐπαύσατο. Here even Blass asks whether perhaps παρασημαίνοντες may have been wanting in β.

Yet, it may be said that, in this and in the similar cases here passed over, the hypothesis of Blass is simply deprived of one of the arguments on which its demonstration rests, while there appear to be enough of them left.

(f) Decisive, however, against this appearance, is the fact that precisely the most characteristic of the variations of the text follows inevitably from the hypothesis itself.

Just in proportion to the clearness and pointedness of β and the weakness of α in these respects, is the improbability of the author's having with his own hands obscured and perverted the sense. And here in the meantime we can leave altogether out of account the question whether or not he was also the eyewitness. In any case, after writing in his draft of 27 that it was on account of his wife Drusilla that Felix left Paul bound, he would not have said in his fair copy simply that it was on account of the Jews—even if, as Blass thinks, both statements were correct. If in his draft he had stated that Paul had proclaimed the apostolic decree, not only in the later copies (19 4), but also in the outset of his new missionary journey (15 4), he would not in his fair copy have omitted to state this in the first and therefore more important of the places. In this instance even Blass considers an interpolation in β as conceivable in 15 41, but chiefly because the expression seems to him to be somewhat obscure. In 22 30 f., although the officer is in fear because a Roman citizen has been bound, Paul is not released, according to the text, till the following day. But in β, immediately (παρὰχρησάμενος). Blass himself says (St. Kr. 108): 'one cannot but be astonished at the carelessness of the abridgement in α.' All the more readily might it have occurred to him that it was the writer of β that perceived and corrected the defects of α. In his *Editio philologica* Blass wishes τῆ ἐπιπέσει without any authority either deleted or changed to τῆ ἐπέσει. This would be just as if the words ἦσαν περὶ αὐτὸν in the narrative, even in α, is all of one piece and absolutely to the point. But such critics as Spitta, Clemen, and Jünger have assigned 22 30 and 21 to the transcriptionist. If it is only the addition of ἐπιπέσει which is in question, either 14 2 in the draft that enables us to understand how it was that in spite of the disturbance (or, according to β, persecution) mentioned in 14 2, Paul and Barnabas remained in Iconium, why does the author omit the words in his fair copy? More accurately considered, they are to be regarded as an interpolation, designed to do away with the contradiction, an interpolation which carried with it the further change of ἐσχίσθη δὲ (14 10) into ἐσχίσθησαν and, in 14 50, the interpolation of iterum and secundo. It is not in D, however, that this interpolation occurs, but only in Syr. hl., which elsewhere also smoothes away the evidences of the work of various hands in D—as for example, in 19 4 by the introduction of εἶπε before εἶπε, in 18 6 by the omission of δὲ after ἀντιπροσέειπεν, and in 14 2 by omitting the last two words in the phrase ἐπιπέσει αὐτὸν ἐπὶ τὸ ἀρχαῖον τῶν Ἰουδαίων καὶ ἀρχιερέων τῆς συναγωγῆς. If, as Blass supposes, it were necessary to hold that Syr. hl. has preserved the original, whom could we possibly imagine, for example, to have added the words τῆς συναγωγῆς, or omitted the word ἔπειτα, or secundo? But, moreover, in 14 2 the changes mentioned above would not have been at all necessary unless first 14 2 had been wrongly interpolated between 14 1 and 14 3. Even though it may perhaps be a fragment from another source, 14 2 has its immediate continuation in 14 4. Here even Ramsay supposes a 'corruption': only it is 14 3 which he takes for a gloss. Thus we come again upon one of the many cases in which Blass holds β to be the original simply because it is more simple, in 19 4 by the introduction of Acts into version. Similarly, for example, he drops from β, and also even from α, the ἐπὶ of 19 14, which is irreconcilable with the ἀποπέσει of 19 16, on the sole authority of D, without recognising that the omission in D may have been a late expedient for removing the contradiction just as much as the αὐτο for ἐπὶ in Gigas. If the author in his draft had already written, after ἦσαν ἐν 15 1, the words ἐπὶ τῆς ἐπιπέσει καὶ τῆς ἐπιπέσει τῶν ἡρακλίου, and in 15 4 had referred to this (by a simple εἶπε), why is it that in the clean copy his first use of the expression is in 15 5, so as almost inevitably to suggest the thought that a piece derived from another source begins at this point? (see COUNCIL OF JERUSALEM, § 4). If, according to the rough draft (not only in 166 f., but also in 17 15-19 20 3), the journeys of Paul were determined by inspiration, why in his clean copy does the author leave behind the last three of the passages? Here, too, we can see the inapplicability of another of Blass's assertions, viz. that nowhere in α or β is the narrative changed so as to become more interesting or more marvellous. Further, the author of this three-fold mention of divine inspiration has fallen into an oversight—that, namely, of attributing to Paul

(19 1) the intention of making a journey to Jerusalem just after he had returned from that city, without even the slightest reference to what had been said immediately before. Paul is not mentioned to have written Blass's supposition that the journey of 19 1 is identical with that which had been intended by Paul, according to the addition of β in 18 21 (found also in TR). This last was actually carried out (18 21, see COUNCIL OF JERUSALEM, § 1). And even if it had not been, the inspiration which hindered it must have been mentioned in 18 21, and not in 19 1, after he had already got back to Phrygia from Caesarea, which is only a few miles from Jerusalem. Cp further BARJESUS, § 1 b.

(g) Over against these instances, the list of which could be greatly increased, there are a few rare cases in which β might really be held to be the original.

The addition καὶ ἐπὶ τῆς ἐπιπέσει αὐτὸν ἐπὶ τὸ ἀρχαῖον τῶν Ἰουδαίων καὶ ἀρχιερέων τῆς συναγωγῆς after 15 1, and possibly for τῆς συναγωγῆς αὐτὸν ἐπὶ τὸ ἀρχαῖον τῶν Ἰουδαίων καὶ ἀρχιερέων τῆς συναγωγῆς after 15 1, are not mentioned in the *editio philologica* of Blass. In his first edition, the quite similar addition of καὶ Μνασὴν after 11 19 (V 11) in D, Blass, and Clemen, thought to have been introduced from 27 5, but also refused to accept the sequenti autem die which we find in d (21 5) instead of οὐκ ἐπὶ τῆς ἡμέρας αὐτῆς ἐπιπέσει αὐτὸν ἐπὶ τὸ ἀρχαῖον τῶν Ἰουδαίων καὶ ἀρχιερέων τῆς συναγωγῆς. On the other hand, in 21 16 the text of α is not materially inferior to that of β, which Blass attaches a very high value; for the imperf. ἀποπέσει of 21 15 does not mean 'we went and arrived at Jerusalem' (this follows in 21 17), but 'we took the road for Jerusalem,' and thus, even according to α, Mnaon may very well be thought of as living in a village between Caesarea and Jerusalem, as is expressly stated in β. The author—in this instance the author of the 'we' source—has here quite naturally taken for granted that the journey from Caesarea to Jerusalem cannot well be made in a single day.

(h) After what has been said, it is clear that there are not many cases in which β might really be held to be the original.

They consist partly of what are simply changes in the construction, or periphraes without changing the sense (for both see the edition of Blass, p. 108), and partly of what are changes expressing the situation which, however, in the cases we have in view, is not more than a merely formal one, introduced by a simple copyist from the adjoining context. Compare, for example, 18 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

(i) But do not these changes—materially so unimportant, but in form so noticeable—show that the two forms of the text, no matter which is the earlier, emanate from the author of the book itself? They do not.

After having seen that precisely in the most significant passages of the book (see above, e and f) this does not hold, one must further remember that in HLL, and also in K, equally important variations are met with (see above, c). These, like those in β, resemble the variation by which each gospel is distinguished from another. Here, accordingly, transcribers have allowed themselves liberties which are usually regarded as permissible only to the authors of independent works. However surprising this may seem to us, the fact cannot be denied. When in Mk. 3 21, for οὐκ ἐξέστη (a reading which is a stumbling-block to many theologians even of the present day) D substitutes οὐκ ἐξέστη αὐτὸς, 'that he has exalted them,' or at least 'that he has stirred them up,' is not the liberty taken with the text just as bold as Mt.'s in the exactly corresponding place, 12 23 (i.e., just before the reference to a league with Beelzebub, when he changes it to ἐξίστατε? But this freedom of treatment is by no means without analogies elsewhere in the literature of the time. The text of Plato in the *Flinders-Petrie papyri* (*Flinders-Petrie Papyri*, *Albany, 1890*) shows a very similar pronounced deviation from the ordinary text—deviations which, according to Usener (*Vachr. a. Gesellch. der Wiss. zu Gött.*, 1892, pp. 25-50, 181-215), are to be attributed to the copyists of the papyri, perhaps as early as within 120 years after Plato's death. In the papyrus text of Hypereides, *Against Philippus* (*Classical Texts*, 1890, *London*), also, *Mss. Oxon.*, Kenyon, 1891), Blass himself discovers 'very often' a 'interpolation of arbitrary emendation,' and in the third Demosthenes letter published in the same collection, 'extensive variation' (*Jahrh. f. class. Philol.*, 1892, p. 42, and 1894, p. 447).

In order more easily to comprehend the possibility of changes in the text on the part of a transcriber, it may be allowable to conjecture that he may have been accustomed to hear the book recited or even himself to recite it (with variations of the kind exemplified), on the basis of a perusal of it, but without its being committed to memory. Such recital was by no means impossible in the second century.

(k) The question whether D shows in the gospels the same variations as in Acts may be left out of account.

ACTS OF THE APOSTLES

It would be important only if it could be answered in the affirmative for Mt., Mk., and Jn. For, that in these cases also the rough draft should have gone into circulation as well as the clean copy is really very improbable. But the independent variations are too few to warrant an affirmative answer. If the same be the case with the Third Gospel, then, according to Blass's hypothesis, we must assume that the draft of it was not copied; but if they are sufficiently numerous, as Blass has recently declared (*Hermathena*, 21, 1895, pp. 121-143; and 22, 1896, pp. 291-313); *Evangelium secundum Lucam... secundum formam quae videtur Romanam*, 1897; *Philology of the Gospels*, 1898), there is nothing to hinder our applying to them the judgment applied to those in Acts, however that judgment may go.

Neither is it decisive of the question that β is frequently not fuller but briefer than α (e.g., 26 b 74).

(f) Very important, on the other hand, is Blass's assertion that the *uniformity of expression in α and β* is a 'very strong proof' that both recensions come from the hand of the author. But it is sufficiently met by Blass's own index.

According to this, there occur in the divergent passages of β (which are by no means of great compass) 64 words never elsewhere met with in Acts or the Third Gospel. If we deduct from these, besides 5 proper names, the 9 vouched for only by the Latin text (although Blass himself has not succeeded in giving them a Greek form that suggests the authorship of Luke), there still remain 50 (not 44, as is stated in Blass's *Editio philologica*, p. 334). After deduction of 4 numbers, and the expressions *στειν* and *στρατοπέδαρχη*, for which no other word could possibly have been chosen, the number stands at 44. So also in his second edition (see the enumeration in his *Evang. sec. Luc.* p. xxvii.), although, from the somewhat different form of text adopted, the words that appear to be peculiar to β are not quite the same.

(m) In support of Blass's highly important assertion that *the eye-witness Luke alone could have given his work in both the forms which we have in α and β* , the most that can be adduced—out of all that have been remarked on in the course of the section—are the passages referred to under (g). But of the 'seven steps' in Jerusalem, Luke, according to Blass's own view, gained his knowledge not from personal observation, but only from the written (or oral) testimony of an eye-witness.

All the same he takes the liberty, according to Blass, of leaving the note out in writing his fair copy. This being so, the omission of the five other details, even if with Blass one carries this back to the author of the book, does not prove that they had formed part of his own experience; he may equally well have obtained them from a written source. Four of them (16:13 20:13 27:13) belong, in point of fact, to the 'we' source. It is not at all easy to see why a transcriber might not have ventured to omit them, with so much else, as of inferior interest. We may therefore thankfully accept them, as well as other data in β which have been shown or may ultimately appear to be more original than α , as contributions to our historical knowledge; but they do not prove more than that there is such a source as has drawn more faithfully from a true source than α has. There remains, accordingly, in favour of the eye-witness as author of Acts, only 11:28, where D (along with, essentially, the Periphan Latin text, and Augustine), instead of *ἀναστάσι δὲ, ἃς ἦν δὲ πολλὰ ἀγαλλύσασθαι συνεστηρομένοις δὲ ἡμῶν ὄψιν*, and then *σημαίνων* instead of *ἐπιμαίνων*. This might possibly be from the 'we' source; but the inference is not that it can only have been by an eye-witness that the 'we' in α was set aside. Or why is it that 'we' is set aside by L in 16:17, by K* (and differently by ABCH in 21:16, by H in 28:16, by P and V in 27:1) (*οὐκ ἔπειτα τὴν Πλάσιον, οὐκ ἔπειτα ἡμῶν*) by HLP in 20:7 21:28 23:16 16:13, by C³ also in 28:1, by D also in 16:13 (*ἐδόκει ἐν ἐνομίῳ εἶναι*)? And why, on the other hand, in 27:19 does it stand only in HLP Pesh.? In all of these cases (except 27:1, see below) Blass has the same reading in β as in α . (In 16:13, that is, in such cases as the *δὲ* mentioned above, but he likewise obtains in α also [by the conjecture *ἐνομίῳ ἐν προσηύξει εἶναι*] a reading in the third person.) He thus acknowledges that it is copyists, not the eye-witness, that allowed themselves to remove the 'we', or to introduce it. Only in 11:28 does Blass assume that it was Luke himself who changed into the third person in the 'we' which he had written in β . So also it is only in one place, and that only in his second edition, that Blass regards the third person in place of 'we' as a reading of β —namely, in 20:5 (on the authority of D), for in 27:1 it is only through a change of the whole of the first part of the verse, rendering *ἡμῶν* impossible, that the third person is introduced. At all events, it is impossible that 11:30 as well as 11:28 can be derived from the 'we' source (see *Council of Jerusalem*, § 4). Even if 11:28 may possibly have been the insertion of a transcriber who knew (with *Exc. H.E.* iii. 46, *Jer. De Vir. Ill. 7*, and the Prologue [earlier than Jerome] to the Third Gospel in codd. Corbeiensis, Colbertinus, Amiatinus, Fuldensis, Aureus, etc.) that Luke was understood to have been a native of Antioch. Or has Blass himself not recognised that Irenaeus also (iii. 14:7), or one of Irenaeus's predecessors, has permitted himself on his own responsibility to say *nos venimus* instead

of *κατέβησαν* in 16:8? The insertion of 'we' in 11:28 would not be bolder than the other infelicitous changes in β . It ought to be noted that Syr. hl. is not implicated in this insertion; and the text of D is by no means in order, for it has *ἐσθῆν* without telling what it was that Agabus did say (in the sense of *ἐλάλει*), while in the whole of the NT it is direct speech, or, as in four isolated exceptions in the case of Paul, at least indirect speech, that is connected with *ἔφη*. In Acts 11:28 the indirect speech depends rather on *σημαίνων*.

(n) A very dangerous support to the theory of Blass has been contributed by Nestle.¹

In his view *ἐθαύωρε* in D (Irenaeus has *αγρῶστας*), instead of *ἠρώσασθε* in 3:14, comes from a confusion of *ἠρώ* (Job 85:16 15:10) and *ἠρώ* in the Semitic source of Acts 1:12 (similarly, before him, Harris, p. 187, but otherwise pp. 162 f.), and in like manner *κόσμος*, instead of *λαός* in 2:47, from confusion of *κόσμος* and *ὄψ* (or in Aramaic *כֹּסְמָא* and *כֶּסְמָא*). In itself considered, all evidence for the existence of a source (now pretty generally conjectured; see above, §§ 10 f.) for Acts 1:12 cannot be otherwise than *we*; or in cod. 137. He thinks he can thus prove that originally all the β readings were united in a single codex, in the copying of which they were partly removed to secure greater agreement with the prevailing text. But the number of β readings used by Chrysostom is insignificantly small when compared with those of which he shows no trace; and of such as do not appear in D, Conybeare has adduced only five. Chrysostom accordingly furnishes no stronger support for Conybeare's thesis than any other witness for β would, for each of them shares some of its readings with D and some with other witnesses for β . But to explain this there is no need of Conybeare's assumption that all β readings are from one hand: it would be explained equally well by supposing them due to the labours of successive copyists (or editors). Conybeare, however, goes much further, and asserts that Luke himself is the author of all these β readings. He ventures to rest this assertion on a single passage—a very small foundation for such a structure. Moreover, it would have been just as easy for another as for Luke to add to 'so natural a phrase' as, according to Conybeare, *συντεκρίτα* is in 19:25.

(o) No happier is an attempt of Conybeare to provide a new prop for Blass's theory.

He points out in the *American Journ. of Philology* (172 [1896], pp. 135-171) the most interesting fact that the Greek commentary of Chrysostom, and, to an even greater extent, the many extracts from it in an Armenian Catena on Acts, follow or at least presuppose a series of β readings to be found partly in D (and other witnesses for the β text), partly only in Syr. hl. or in cod. 137. He thinks he can thus prove that originally all the β readings were united in a single codex, in the copying of which they were partly removed to secure greater agreement with the prevailing text. But the number of β readings used by Chrysostom is insignificantly small when compared with those of which he shows no trace; and of such as do not appear in D, Conybeare has adduced only five. Chrysostom accordingly furnishes no stronger support for Conybeare's thesis than any other witness for β would, for each of them shares some of its readings with D and some with other witnesses for β . But to explain this there is no need of Conybeare's assumption that all β readings are from one hand: it would be explained equally well by supposing them due to the labours of successive copyists (or editors). Conybeare, however, goes much further, and asserts that Luke himself is the author of all these β readings. He ventures to rest this assertion on a single passage—a very small foundation for such a structure. Moreover, it would have been just as easy for another as for Luke to add to 'so natural a phrase' as, according to Conybeare, *συντεκρίτα* is in 19:25.

Blass's theory, then, it would seem, is so inadequately proved that it cannot be held to have subverted any of

18. Estimate of preceding sections of this article. Blass's theory.

It has the merit, however, of having called attention in a very emphatic way to the importance of β . It has also raised new problems for the science of textual criticism—not to speak of the many valuable contributions it has itself made to that science and to the interpretation of the Book of Acts.

The value of Acts as a devout and edifying work, cannot be impaired by criticism. Indeed, the book

19. Religious value of Acts.

is helped by criticism, which leads not only beyond a mere blind faith in its contents, but also beyond the unhistorical assumption that one is entitled to impose on the author the demands of strict historical accuracy and objectivity. Its very ideal, in apostolic times unhappily not reached, according to which the company of believers were of one heart and one mind (4:32), shows that the author knew where the true worth of Christianity was to be found. The early Christians pray everywhere with and for one another; they accompany the apostles and take pathetic farewells of them; they distribute their possessions and have all things in common. Particularly beautiful figures are those of Stephen, Cornelius, Lydia, and the jailer at Philippi. The jailer knows that most important question of religion, 'What must I do to be saved?' (16:30), and Peter also (4:12), as well as Paul, expresses the conviction that Christianity alone has a satisfactory answer to give. The writer of Acts is able to rise above all

¹ *Expositor*, Sept. 1895, pp. 235-239; *St. Kr.*, 1896, pp. 102-104.

meaning is hidden,' but states also that 'he who despises the letter of sacred Scripture will never rise to its spiritual meanings.' Still the completion of the movement (within certain limits) was reserved for the great exegetes of the Reformation—Luther, Melancthon, and Calvin. Thus Luther explicitly says—'It were better to read mere poetic fables than attach one's self to the so-called spiritual and living sense to the exclusion of the literal; and again, 'We should stay by the dry clear words, except where the Scripture itself, by the absurdity of the simple meaning, compels us to understand some sayings figuratively' (quoted by Diestel, *Gesch. des AT in der chr. Kirche*). This predilection for a grammatical and historical interpretation was closely connected with the revival of classical studies, but had its primary justification in the endorsement which the NT appeared to give to the historical accuracy of the story of Paradise. It is the correctness of the historical acceptance of that story which criticism denies, and before proceeding to consider the results of criticism (see CREATION, § I and PARADISE), Protestant students may ask whether Jesus Christ and the NT writers really attached importance to the story of Eden as a piece of history. Our conclusion will of course have a direct bearing on the interpretation of the other early narratives.

Let us turn to (i.) passages spoken or written from a purely Jewish point of view. (a) In Mk. 106-8 (Mt. 19. 2. NT views. 4-6) we have a combined quotation from Gen. 1.27.24. Jesus passes over the facts of the Paradise story altogether, and fastens attention on the statement that man was from the beginning differentiated sexually, and that, by divine ordinance (so no doubt Jesus interprets Gen. 2.24), the marriage union was to be complete. His silence about the facts may no doubt be explained by the circumstances; elsewhere Jesus appears to many to accept the historical character of the deluge story (Mt. 24.37-39; Lk. 17.26-27). But one must be cautious; the reference to the deluge story presupposes the typical character of the early narratives, a theory which is inconsistent with a strictly historical point of view. (b) In Rev. 2.7.22.214, a literalistic view of the tree of life is presupposed. But these passages are undeniably based, not so much on Gen. 2, as on the apocalyptic description in Enoch 24 f. (c) In Rev. 12.9.20.2 we have a description of Satan (*g.v.* § 6) as 'the ancient serpent,' alluding to Gen. 3.1; it is also said that he will 'deceive' the world as he deceived the first man. It is certain, however, that the writer also draws from a well of popular belief, enriched from a wider Oriental source, to which he gives as implicit a belief as to the biblical statement.

Passing to (ii.) the Pauline writings, we find (d) and (e) in Rom. 5.14 and 1 Cor. 15.22.45 references to details in the story of Adam; but the reference is made in a didactic interest. Paul accepts (as also probably does Luke) the Alexandrian idea of the typical character of the early narratives, and of the double character of a heavenly and an earthly Adam. The latter doctrine, which the Alexandrian theology founded on the two separate accounts of creation in Gen. 1 and 2, Paul professes to base on the language of Gen. 2.7. There are also other anthropological ideas which he supports by reference to the fall of Adam. His real interest is in these ideas, not in the story of Paradise. He did not deduce them from the Eden story, and only resorts to that narrative as containing material which may, by the methods of Christian Gnosis, be made to furnish arguments for his ideas. (f) In Phil. 2.6 we have probably a contrast between the first Adam who thought equality with God an ἀπράγμῳς (an object of grasping) and the second Adam who, thinking far otherwise, humbled himself even to the death of the cross, and thereby actually reached equality with God (Hilgenfeld). Here the story of Eden is only illustrative of an idea, though the illustration is suggested

by the favourite typical view already referred to. (g) In 2 Cor. 11.3 there is a mere casual illustration.

(iii.) Other NT writers. (h) In Lk. 3.38 Adam is the last human link in the genealogy of the Saviour. The evangelist suggests a contrast between the first and the second Adam (see Lk. 3); but, scholasticism apart, what he really values is, not the historical character of Adam, but the universal Saviourship of Jesus. (i) John 8.44 contains a reference to Satan which presupposes the reality of the temptation and fall of the first man, but is simply and solely dogmatic, and belongs to the peculiar dualism of the Fourth Gospel. (k) In 1 Tim. 2.12-14 the social doctrine of the subordination of women is apparently inferred from the story of the first woman's temptation.

The conclusion to which these phenomena point could be fully confirmed by a similar examination of (iv.) *Apocrypha* passages—even the references in 4 Esd., which imply so much brooding over the Paradise story, being in close connection with the typical theory of the early narratives, and the whole system of thought being quite as much based on the imaginative book of Enoch as on the sober narrative in Gen. 2-3. As a final proof that a historical character could not be assigned to the latter in the early Christian age, it is enough to refer to the Book of Jubilees (first cent. A. D., but before 70), which, at any rate in its view of the biblical narratives, represents the mental attitude of the times. Here the biblical stories are freely intermixed with legendary and interpretative matter (see Charles's translation).

We conclude, therefore, that the NT writers, whether purely Jewish or touched by Greek influences, regard traditional facts chiefly from a didactic point of view, as furnishing either plausible evidence for theories derived from other sources or at any rate homiletical illustrations.

The literal and historical acceptance of the story in Gen. 2.4-8, which strong church authority still considers 'nearer to the truth than any other interpretation as yet propounded,'¹ may be supposed to be required by the phenomena of the narrative itself. Is this the case? First, are the proper names Adam and Eve found in the original story of Eden? The facts are these.

(a) Adam (אָדָם; אַדָּמָא), as a quasi proper name for the first man (cp ENOSH), belongs with certainty only to P₂ (Gen. 5.3-5),² who has used it just before generally, in the sense of 'man' or 'men' (Gen. 5. אֲנָשִׁים וְאָדָם [AL]) followed by אָדָם אַדָּמָא [ib.] (cp 1.26.27). The Yahwist (J) habitually uses the term אָדָם, 'the man.' One, however, if the text be correct,³ we find אָדָם (ādām) used generically for 'man' or 'men' (2.20.6), and once in lieu of a proper name subsequently to the birth of Cain and Abel (4.25), if we should not rather refer 4.25 f. to an editor. The conclusion is obvious. It is a true insight which is expressed in the quaint old couplet in Exeter Cathedral,

Primus Adam sic pressit Adam, salvet Deus illum,
Is qui venit Adam querere factus Adam.

'Adam' can be used only in one of two senses (1) mankind, (2) the first man (apart from all historical reference), and to compare a supposed proper name Adam.⁴

¹ Bp. John Wordsworth, *The One Religion* (Hampden Lectures for 1881), p. 138. So Bp. H. Browne in the *Speaker's Comm.* and Dr. Leathes in Smith's *D.B.*

² In Gen. 3.19-23 B. J. 204, RV has rightly 'the man' (= אָדָם) for אָדָם 'Adam'; so in Dt. 32.8 'children of men' for 'sons of Adam'; so EV mg. in Job 31.35 'after the manner of men' for 'as [like] Adam' (E otherwise 1.20). In E₂ the article is omitted in Gen. 2.19b אָדָם וְאָדָם 3.10 [L] 3.10.4+25 Dt. 32.8 1 Ch. 1.1 (E₂ also in the last two passages).

³ In 2.20.8.17.21 read אָדָם 'for the man' (אָדָם אַדָּמָא [AEL]) with Schr., Dillm., and Kau. HS.

⁴ The present writer can see no probability in the view of Hommel (*PSBA*, 7th March 1893, pp. 244 f.) that Adam in Gen

to that of the Babylonian divine hero Adapa (Sayce, *Crit. and Mon.* 94), or, stranger still, to the Egyptian Atum (Lichtheim, *TSBA* 94) are specimens of equal audacity. The word *ʿaddin* is of course earlier than any developed creation-myth (*sit venia verbo*), though it implies (cp Ass. *admu*, 'child'—i.e., 'one made' by God),¹ the existence of the central element of all such mythic stories (see CREATION, §§ 20 f.).

(8) We must now proceed to consider the name Eve (Hawwah חַוָּה ; Gen. 3:20 AV mg. CHAVAH, RV mg. HAVVAH, חַוָּה [AL]; Aq. Aua, Symm. Ζωογόνοσ, elsewhere חַוָּה [BA]; חַוָּה ; חַוָּה). This undoubtedly occurs as a proper name (3:20 4:1); but it is most probable that 3:20 formed no part of the original story, and that in 4:1 the name Eve is a later insertion.² Can its meaning be recovered? According to 3:20 Eve was so called 'because she was the mother of all living' (חַוָּה). This suggests the meaning 'a living being,' or, less probably, because an abstract conception, 'life' (חַוָּה).³ It is also possible, no doubt, to compare 1 S. 18:18 (Kau. HS) and render 'mother of every kindred,'⁴ in which case Eve (חַוָּה) will mean 'kinship,' or more strictly 'mother-kinship,' the primitive type of marriage being supposed to be based on mother-kinship (cp Gen. 3:20). It is best, however, to adhere to the first explanation, if we qualify this with the admission that Hawwah may possibly be a Hebraised form of a name in a non-Hebraic story.

Next, did the writer of the Eden story understand it historically? There are at least three points which must be regarded as decisive against this

4. The Narratives.

(1) The *assess* of the description. The same writer (J), in Nu. 22:8, ascribes the speaking of Balaam's ass to a special divine interference; but the speaking serpent and the enchanted trees in Gen. 2f. appear as if altogether natural. Why? Because the author has no fear of being misunderstood. He knows, and his readers know, that he is not dealing with the everyday world, but with a world in which the natural and the supernatural are one. (2) The idealism of the narratives. The writer chiefly values certain ideas which the narrative is so arranged as to suggest. (3) The total disregard of the contents of these stories in the subsequent narratives of the Yahwist. To these most critics will add (4) the licence which the Yahwist appears to have taken of adding certain features to the primitive story, e.g. at any rate the tree of the knowledge of good and evil. It is not safe to add (5) the poetical form of the story in Gen. 2:4b-3 (Briggs), for all that seems probable is that this story is ultimately based to some extent on lost poetical traditions.

It is equally certain, however, that the writer of our Eden story did not explain it allegorically. Reverence for tradition must have assured him that the kernel of it at any rate was trustworthy. After purifying the traditional story by the criticism of his religious sense, he must have supposed it to give an adequate impression of what actually took place once upon a time. Kant, among his other services in refutation of the unhistorical

5-1: interested from a literary point of view. We have no right to take our critical starting-point in a list given to us only in P; apart from this, the theory that the lists of the patriarchs in Gen. 4 and 5 are derived, as they stand, from Babylonian lists is scarcely tenable (see *UAT*, § 8 4 f.).

¹ To the proposal of Wl. (*AOF* 344, following Stucken) to connect חַוָּה with Ar. *adamā*¹⁰⁰, *adim*¹⁰⁰, 'skin,' Del.'s note on Gen. 2:7 (*Gen.* 2:7) will suggest a possible answer.

² Cp Bth. *Urgesch.* 140, 212 f.; St. *Ad Pp.* 180a, pp. 106 ff.

³ Nöldk. *Wörterb.* (with Wl. [see note *Urgesch.* 154] and St.), thinks that חַוָּה properly meant 'serpent' (Aram. חַוָּה), *ZDMG* 42:17. The Mishnah (*Ber. orb.* 10a, 21, 101 Gen. 3:20) actually compares the same Aram. word, explaining the name thus,

'She was given to Adam to glorify his life, but she counselled him like a serpent.' This hardly favours Nöldk.'s suggestion.

⁴ WRS *Kin.* 177. But note that חַוָּה and חַוָּה are standing Hebrew phrases (see *EBD Lex.*).

rationalism of the last century, has the merit of having forcibly recalled attention to the fact that the narrative of Genesis, even if we do not take it literally, must be regarded as presenting a view of the beginnings of the history of the human race (*Muthmasslicher Anfang der Menschheitsgeschichte*, 1766).

What, then, is the Eden story to be called? It is a problem which there is a growing disposition to solve by adopting, in one form or another, what is called the *mythical* theory. The story cannot indeed be called a *myth* in the strict sense of the word, unless we are prepared to place it on one line with the myths of heathenism, produced by the unconscious play of plastic fancy, giving shape to the impressions of natural phenomena on primitive observers. Such a course is to be deprecated. The story of Gen. 2:4b-3 has been too much affected by conscious art and reflection to be combined with truly popular myths. Hermann Schultz has coined the expression 'revelation-myth'; but this is cumbersome, and may suggest to some an entirely erroneous view of the pre-Deuteronomic conception of revelation (cp Smend, *AT Rel.-gesch.* 86, 292). The truth is that the story of Eden cannot be described by a single phrase. The mythic elements which it contains have been moralised far enough for practical needs, but not so far as to rob it of its primeval colouring. The parallel story in the Zoroastrian Scripture called *Vendidad* (Fargard ii.) is dry and pale by comparison. In its union of primitive concreteness with a nascent sense of spiritual realities our Eden story stands alone.

There is therefore no reason for shutting our eyes to the plain results of historical criticism. It is only when, as was the case when the late George Smith made his great discoveries (see his *Chaldean Genesis*), Babylonian myths are adduced as proofs of the historicity of Gen. 1-11, that they may truly be called *ideals* of the Eden story, that constitutes its abiding interest for religious men; and it was owing to a sense of this, quite as much as to a desire to harmonise Greek philosophy with Scripture, that the allegoric spiritualism of Alexandria found so much favour in Greek Christendom. From the point of view of the pre-critical period this system could not but commend itself to earnest and devout thinkers. Who, said Philo, could take the story of the creation of Eve, or of the trees of life and knowledge literally? The ideas, however, which the sage derives from the stories are Greek, not early Jewish. For instance, his interpretation of the creation of Eve is plainly suggested by a Platonic myth. The longing for reunion which love implants in the divided halves of the original dual man is the source of sensual pleasure (symbolised by the serpent), which in turn is the beginning of all transgression. Eve represents the sensuous or perceptive part of man's nature, Adam the reason. The serpent therefore does not venture to attack Adam directly. It is sense which yields to pleasure, and in turn enslaves the reason and destroys its immortal virtue. These ideas are not precisely those which advocates of a mystical interpretation would put forward to-day. There is an equal danger, however, of arbitrariness in modern allegorising, even though it be partly veiled by reverence for exegetical tradition. It is only by applying critical methods to the story, and distinguishing the different elements of which it is composed, that we can do justice to the ideas which the later editor or editors may have sought to convey.

For a discussion of 'Biblical Mythos' see Schultz, *OT Theol.*, c. 2, and cp Smend, *AT Rel.-gesch.* 113, 110-127; WRS *ATP* 10-440. On the Avvian parallels, see Deussen, *Die Zoroastrianer*, 103ff. 5, 126 27 ff., and Kohler, 'The Zoroastrian and Gen. 1-11,' *JQR* [90], 223-229. On apocryphal romance of Adam and Eve, see below, *Apocrypha*, § 6, n.c. 1.

ADAMAH (אָדָמָה). 1. One of the 'fenced cities' of Naphtali (Josh. 19:36) Ἀδαμᾶθ [B], Ἀδαμ[ε]ῖ [AL].

1. The above article is written on the lines and sometimes in the words of WRS.

Apart from its being mentioned along with Chinnereth and Ramah and Hazor we have no clue to its site (cp *Dn. ad. loc.*). Cp ADAMI.

2, see ADAM, i.

ADAMANT (אֲדָמָנִית, *adamas*; see below, § 4). In modern English poetry and rhetorical prose—for the word is now not otherwise used—*adamant* is simply a term for 'the embodiment of surpassing hardness.' In the EV of OT it can be retained only if understood in the sense in which it is employed by Theophrastus—i.e., in the sense of corundum (see § 2). This is crystallised alumina (Al₂O₃), an excessively tough and difficultly frangible mineral; transparent or translucent; vitreous, but pearly to metallic on basal face. Emery is a compact, crystalline, granular variety—grey to indigo-blue. In a purer state corundum occurs in transparent crystals of various tints of colour—red (Ruby), blue (Sapphire), green (Oriental Emerald), yellow (Oriental Topaz), purple (Oriental Amethyst), colourless (White Sapphire)—little inferior to the diamond in brilliancy, though they do not disperse rays of light to the same extent.

The term *adamas*, which is not known to Homer, was applied by the Greeks to that substance which from time to time was the hardest known. In **2. *adamas* to the Greeks.** Hesiod it means hardened iron or steel, and the adamantine bonds by which Prometheus was fastened to a peak of the Caucasus (Æsch. *Pr. 6*, 64) must have been of this material, for the manufacture of which the tribes near the Caucasus, such as the Colchians and the Chalybes, were famous. The *adamas* of Theophrastus, however, though it is not included in his list of twelve stones used for engraving on, nor mentioned as employed in the art of engraving—was (1) a stone and (2) probably the white sapphire (a corundum). This is probable from the fact that a particular kind of carbuncle (ἀσθαλας) found near Miletus and described as hexagonal (γωνιώδης ἐν ᾧ περ καὶ τὰ ξάγωνα) was compared to it. For noble corundums (sapphires, rubies, oriental topaz, and oriental emerald) are, as a matter of fact, found as hexagonal prisms. It is most unlikely that Theophrastus meant the true diamond (see DIAMOND, § 1), though Pliny (*NH* xxxvii. 415) confuses with this his *adamas*, which—being hexagonal (whereas the diamond would be rather described as octohedral, or a double pyramid)—was, like that of Theophrastus, the white sapphire. As, however, Manilius (1st cent. A.D.) knows the real diamond—he says 'sic adamas, punctum lapidis, pretiosior auro est' (*Astronom.* iv. 926)—it is quite possible that Jerome (in the *Vg.*) meant by *adamas* the actual diamond; though in that case he was almost certainly wrong (see DIAMOND, § 1).

In the three places where *Vg.* uses *adamas*, *adamantinus*, it is to render the Hebrew *shāmīr*, a word which may mean either 'sharp-pointed' or 'tenacious.' In each passage the reference is not to a brilliant gem but to something extremely hard: 'harder than flint' (Ezek. 39); parallel to 'a pen of iron' (Jer. 17); similarly *Zech.* 7.12. In the *Pesh.* *shāmīr* appears in the Syr. form *sāmīrā*. Although the Arabic forms *sāmīr* and *sāmīr* are identified by the native lexicographers with 'almās, 'diamond,' the Syriac *sāmīrā* is used not only of *adamas* as the 'hardest stone'—employed in cutting others (Bar Bahlūl, *Lex.* col. 39 l. 14, col. 863 l. 1), or in similes, for something hard (Isaac of Antioch, ed. G. Bickell, 2 62, l. 39)—but also definitely as *σμάρις* or *σμάρις* (Duval-Berthelot, *La Chimie au moyen âge*, 2 9, l. 5). There is some probability, therefore, in Bochart's suggested connection of *שָׁמִיר* with *σμάρις* (whence the English emery), which meant both corundum itself and granulated corundum, emery. Diosc. (v. 166) says:—'*σμάρις* is a stone with which gem-engravers polish gems,' and Hesychius

(s.v. *σμάρις*), 'a kind of sand with which hard stones are polished.' The *σμάριτης λίθος* of Ⓞ (Job 41.7 [13] [B&C]; -τος λ. [A]) = *רָז קוֹרֵף* of MT = 'a close seal' of EV, v. 15) is the same as the *σμάρις* of Dioscorides, by which he meant corundum in mass. Hesychius plainly means corundum in grains—i.e. emery. The latter, called *Naxium* by the Romans (Pliny, *HN* xxxvi. 710) from the island of Naxos, where it is still produced in great quantities, was much used by the Greek engravers of the fourth century B.C. Indeed corundum and emery were the only means of cutting gems known to them up to that time. For Theophrastus (*Lap.* 44), writing in 313 B.C., speaks of it alone as used by the engravers. He identifies it with the stone from which whetstones were made, and says that the best came from Armenia. Both corundum and emery are found in many places in Asia Minor, as well as in several of the Greek islands.

EV renders *shāmīr* by *adamant* only in Ezek. 39 and *Zech.* 7.12. In the remaining passage, Jer. 17, it is less **4. The versions.** happily renders it *diamond*. The word *adamant* occurs also in Eccles. 16.16 AV; but RV, following Ⓞ^{88A}, omits the passage.

Vg. and *Pesh.* have been already dealt with (§ 3). Ⓞ in Ezek. 39 (δία σμαρις [BAQ]) and *Zech.* 7.12 (ἀσθαλα [B&AQT]) represents another reading, while in the case of Jer. 17 it omits the whole passage (B&RQ) (though the verses appear in the Compl. Polygl. and, following Orig. and Theod., on the mg. of Q, where *שָׁמִיר* is rendered by [σμάρι] ἀδαμαντίνου). With *Zech.* 7.12 cp 4 Macc. 16.13. Strangely Ⓞ renders *שָׁמִיר* by *adamas* in Am. 7, EV PLUMBLINE. In the Targum *שָׁמִיר* is identified with *שִׁלְטִין* (see FLINT), although the Talm. regards it as a worm, about which extraordinary legends are told (see ref. in Buxt. *Lex.* or Levy (*NH* II-3 s.v.)) and Paul Cassel in a monograph (59) tried to show that *שָׁמִיר* was an excessively fine, dust-like substance. W. R.

ADAMI. See below, ADAMI-NEKEB.

ADAMI-NEKEB (אֲדָמִי נֶקֶב), i.e. or more correctly, ADAMI-HANNEKEB (אֲדָמִי הַנֶּקֶב), the pass Adami, on the frontier of Naphtali, Josh. 19.37; cp *Vg.* *Adami quæ est Nekeb*. AV makes two names, 'ADAMI, NEKEB.' So Ⓞ, ἈΡΜΕ ΚΑΙ ΝΑΒΩΚ [B], or ἈΡΜΑΙ ΚΑΙ ΝΑΚΕΒ [A]; L, however, ἈΔΕΜΑΗ ἈΝΝΕΚΕ. The Jer. Talm. (*Meg.* 11) also divides the expression, Adami being represented as *Dāmin*, and Hannekeb as *Caidalah*. Neub. (*La Géog. du Talm.* 222) and G&Sm. (*HG* 396) identify Adami with Dānich, 5 m. W. of Tiberias, the site which the PE Survey proposes for the 'fenced city' Adamah of v. 36 (*Mem.* 1384). This, however, seems much too far S. when we consider that the 'tree of Bezananim' (see BEZAANANNIM) was close to Kedesh, while JABNEEL (*q.v.* n. 2) appears to have been a north Galilaean fortress. These are the two localities between which Adami-nekeb is mentioned in Josh. 19.37. It is probable that the name Nkbu in the Karnak list of Thotmes III. (*RP*² 547) means the pass Adami. T. K. C.

ADAR, RV, more correctly, ADDAR (אָדָר; [etc] *צַרְפָּדָא* [B], *ΔΕΛΔΑΡΑ* [AL]), an unknown site mentioned after HEZRON (*q.v.*) as one of the points on the southern frontier of Judah (Josh. 15.37).

ADAR (אָדָר [Aram.], *Ezra* 6.15; אָדָר [Heb.]), *Esth.* 3.7, 13 8.12 9.1-19; 1 Macc. 7.43 49; 2 Macc. 15.36). See MONTH, §§ 3, 5.

ADASA (אֲדָסָא [ANV]), the scene of the victory of Judas the Maccabee over Nicanor (1 Macc. 7.40 45), lay, as is implied in the narrative, not very far from Beth-horon. Josephus (*Ant.* xii. 10.5) makes its distance from Beth-horon 30 stadia, and Jer. and Eus. call it a village near Gophna (*OS*, 93 3 220 6). Gophna being obviously the modern *Jifna* between Jerusalem and Shechem, it is reasonable to identify Adasa with the ruin 'Adaseh, on a bare shapeless down, 8 m. S. of that place (*PEP*

1 Cp Leopold Löw, 'Graphische Requisiten u. Erzeugnisse bei den Juden' (70), pp. 181-83, in *Beitr. z. jüd. Alterthums-kunde*, Bd. 1 of the Leipzig 'Institut zur Förderung d. israel. Literatur.'

Ment. 3:16). The remark of Eus. that Adasa belonged to Judah, at which Jer. expresses so much surprise, rests on a confusion between *adasa*, the C^{A} reading of HADASHAH (*q.v.*) in Josh. 15:37, and the place of like name in the passage before us.

ADBEEL (אֲדַבְעֵל, אֲדַבְעָחָ [AEL in Gen., A in Ch.]; אֲדַבְעָחָ [D in Gen., B in Ch.]; אֲדַבְעֵלָה [L in Ch.]; אֲדַבְעֵלָה [Jos. *Ant.* i. 124]; cp. Sals. 227N; see Ges.-Bu. *s.v.*), one of the twelve sons of Ishmael (Gen. 25:13; 1 Ch. 1:29†). Doubtless the Ambian tribe Idbil'i, mentioned by Tiglath-pileser III. (*ABZ* 2:20 l. 56) with Tema, Sheba, and Ephah, but distinct from the Idbil'ilu named in inscriptions of the same king, who was a *kīpu*—i.e., not 'warden of the marches' but 'governor' (of the N. Arabian land of Musri. See MERRIMAN II. [4]). Cp. We. *Akk.* *Inschr.* 25. For a slightly different view, see ISHMAEL, § 4:134.

ADDAN (אֲדָן, § 57, connected with the divine name Addu; see HADAD, ADONIKAM), the name, or part of the name, of an unidentified town or district in Babylonia, mentioned in the great post-exilic list (see EZRA, ii. § 9): אֲדָן אֲדָן [BAL.] = Neh. 7:54. אֲדָן אֲדָן [BA] = 1 Esd. 5:6, where אֲדָן is represented by *adar*, *-adan* of AV CHARATHALAR, RV CHARATHALAN (i.e., אָדָר [B]. [A]† אָדָר [A]). . . . אָדָר [L]. Cp. CHERUB, ii.

ADDAR (אֲדָר), Josh. 15:3† RV, AV ADAR (*q.v.*).

ADDAR (אֲדָר), 1 Ch. 8:3†. See ARD.

ADDER. The details are given under SERPENT (§ 1, nos. 2, 4, 5, 6, 7). The Hebrew names are:

1. אֲדָר, *'akub* (Ps. 140:3 [4]†), generally believed to be a kind of adder. See SERPENT, § 1 (4).

2. אָדָר, *pehen* (Ps. 58:4 [5] 91:13, AV mg. 'asp,' like AV elsewhere), also believed to be some species of adder or viper. See SERPENT, § 1 (5).

3. אֲדָר, *siph'oni* (Pr. 23:32; mg. like text elsewhere, AV 'cockatrice,' RV 'basilisk,' $\text{C}^{\text{P}}\text{MA}$, *keráptnrs*; also Is. 11:8 59:5 EV mg.), likewise some kind of viper. See SERPENT, § 1 (7).

4. אֲדָר, *serpha* (Is. 14:29 EV mg.). See SERPENT, § 1, no. 6.

5. אֲדָר, *serphiphān* (Gen. 49:17†, AV mg. 'arrow-snake,' RV mg. 'horned snake'), the *cerastes*. See SERPENT, § 2 (2).

ADDI. 1. The sons of Addi in 1 Esd. 9:3† (*addew* [B], אֲדָדִי [A], אֲדָדָה [L]) appear to take the place of the b'ne Pahath Moab of Ezra 10:39; but the name probably represents ADNA (*q.v.*, no. 1), the first in the group. In C^{A} the missing name is restored, but without C^{B} 's usual *ḥy. m. c. s. s.* (see P'ATH-MOAB).

2. Twenty-fourth in the ascending genealogical series, which begins with Joseph, Manu's *h. m. s. s.* in L. 3:29:29 (אֲדָדִי [TI. WH following BBA]). See GENEALOGIES OF JESUS, § 3.

ADDO (אֲדָדָה [A], etc.), 1 Esd. 6:1. See IDDO, ii. 3.

ADDON (אֲדָן), Neh. 7:61 = Ezra 2:99, ADDAN.

ADUŠU. 1. The sons of Adūsu, one of the groups added in 1 Esd. 5:34 [BA] (*addōus*, see Swete; perhaps corresponding to אֲדָרָה [L]) to the 'sons of the servants of Solomon' (see LEVITES) in the great post-exilic list, Ezra 2 = Neh. 7 = 1 Esd. 5; see EZRA, ii. § 8.

2. 1 Esd. 5:38. RV JADDUS. See BARZILLAI, 3.

ADER (אֲדָר), 1 Ch. 8:15†, RV EDER (*q.v.*, ii. 1).

ADIDA (אֲדִידָה [A]). 1 Macc. 12:3 13:13. See HADID.

ADIEL (אֲדִיעֵל, § 38, 'God passes by?'—cp. Adaiah).

1. One of the Simeonite chieftains who dispossessed the Meunim (see RV), 1 Ch. 4:36† (*ediyā* [A], אֲדִיעֵל [L], perhaps אֲדִיעֵל [B]). See GEDOR, 2, and HAM, ii.; and cp. AMALEK, § 4.

2. A prince in the genealogy of Maasai (1 Ch. 9:22† אֲדִיעֵל [BA]).

3. Ancestor of ΑΔΜΑΨΗΘ, *q.v.*, ii. 4 (1 Ch. 27:25† אֲדִיעֵל [BA]).

4. See ADEEL.

ADIN (אֲדִין, § 57, perhaps shortened from אֲדִינָיִמִי, 'Yahwe is pleasant,' cp. ITHOAFDAN, EIO 8:1; אֲדִין [BA], אֲדִין [L], אֲדִין).

The b'ne Adin, a family in the great post-exilic list (see EZRA, ii. § 9): Ezra 2:13 (under B), אֲדִין [A], אֲדִין [L]—Neh. 7:54 (under BBA) = 1 Esd. 5:34 (under C) = 59:11 [B], אֲדִין [A]. EV Adinim. A band of five males of the family name *ad-* with Ezra; Ezra 2:13 = 1 Esd. 5:32 (ΑΔΜΑΨΗΘ [L], *Adm*, Adm and Esd), the names of their head. The family was represented among the signatories to the covenant, Neh. 10:16 [17] (אֲדִין [BA], אֲדִין [L]). See EZRA, i. § 7.

ADINA (אֲדִינָה, § 57, 'blessful,' cp. under ADIN; אֲדִין [BA] [BAL]; אֲדִינָה), a Reubenite chieftain in David's service (1 Ch. 11:42†). See DAVID, § 11 A, ii.

ADINO, 'the Ezuite,' is appended unexpectedly in EV of 2 S. 23:8 to the description of David's principal hero.

The readings of C^{A} are: אֲדִינוֹ אֲדִינוֹ אֲדִינוֹ [B], אֲדִינוֹ אֲדִינוֹ [A], with the *q. r. s.* אֲדִינוֹ אֲדִינוֹ אֲדִינוֹ אֲדִינוֹ אֲדִינוֹ אֲדִינוֹ (to be, though not in the original Ch. 11:3 [PMA], where *AD* is *adino* . . . C^{B} , however, gives the single rendering [of a different text], אֲדִינוֹ אֲדִינוֹ אֲדִינוֹ אֲדִינוֹ אֲדִינוֹ).

A comparison of *r.* 18 shows that what is required to make sense is 'brandished his spear,' אֲדִינוֹ אֲדִינוֹ, and these words are actually given in 1 Ch. 11:11 in lieu of אֲדִינוֹ אֲדִינוֹ, the words out of which *AD* (reading אֲדִינוֹ) and its followers including EV vainly attempt to extract sense. Modern critics (except Klo.) correct MT in accordance with 1 Ch.

Klo.'s correction, 'He is our pride, he is our terrible one' (after which he ventures to render אֲדִינוֹ 'because of') אֲדִינוֹ אֲדִינוֹ אֲדִינוֹ אֲדִינוֹ אֲדִינוֹ, words which are supposed to be a quotation from a warlike song referring to this hero, is too ingenious. The words might, it is true, be viewed as a misplaced marginal quotation relative to *David*; but then we should still have to supply some verb as a predicate to complete the account of David's warrior. See *INTRODUCTION*, JESUS CHRIST.

ADINU (אֲדִינוֹ [A]), 1 Esd. 5:14 RV; AV, RV mg. ADIN.

ADINUS, RV IADINUS (אֲדִין [BA]), 1 Esd. 9:4 = Neh. 8:7, JAMIN.

ADITHAIM (אֲדִיתַיִם, § 107; אֲדִיתַיִם [L]; BA om., but in *r.* 34 A has אֲדִיתַיִם and B has אֲדִיתַיִם for 'Tappuah'), an unknown site in the Shephelah of Judah, apparently somewhere in its NE. portion (Josh. 15:36†).

ADLAI (אֲדִלַי, § 57; אֲדִלַי [BA]; אֲדִלַי [L]; אֲדִלַי; 1 Ch. 27:29†), see SHAPHAT, 5.

ADMAH (אֲדָמָה, אֲדָמָה [BAL]) and Zeboim (Hos. 11:8 EV, Gen. 10:19 AV, Dt. 29:23 [22] AV), or, as in Gen. 14:28 EV and everywhere RV except in Hos., **Zeboim** (Hos. 11:8 Kt. אֲדָמָה, probably = אֲדָמָה [see below]; Gen. 10:19 Kt. אֲדָמָה; 14:28 Dt. 29:23 [22] all Kt. אֲדָמָה; Kr. everywhere אֲדָמָה; אֲדָמָה [BAL]; Samar. text om. both names in Gen. 10:19; אֲדָמָה [F. in Gen. 14:2]), are mentioned together in passages of the Pentateuch and in Hos. 11:8. In Gen. 14:28 they are stated to have had kings of their own (see SHIN-AB) who joined in the revolt of certain southern peoples against Chedorlaomer king of Elam; in Dt. 29:23 [22] (אֲדָמָה [A]) to have shared the fate of Sodom and Gomorrah. In Gen. 10:19 (אֲדָמָה [A]) they are mentioned in the definition of the boundaries of Canaan proper—i.e., the land W. of the Jordan. Except in Hos. 11:8 the names Admah and Zeboim are always preceded by those of Sodom and Gomorrah. Of the Pentateuch passages all except Gen. 10:19 are certainly post-exilic, and it is very possible that Kautzsch and Socin are right in regarding the mention of Gomorrah, Admah, and Zeboim in Gen. 10:19 as interpolated. In this case we have no right to assume it as certain that Admah and Zeboim were among the cities which an early Hebrew tradition stated to have been destroyed by brimstone and fire out of

heaven. Hos. 118 (imitated perhaps in Is. 15⁹) only implies that Admah and Zeboim had suffered some terrible destruction. As to the mode of their destruction and as to their locality no information is given. It is, in fact, not at all likely that the least famous of the 'cities of the plain' should have been selected by Hosea as representatives; Amos (4¹¹) and Isaiah (19¹⁰) mention only Sodom and Gomorrah. It is possible that there was once some distinct legend respecting the destruction of Admah and Zeboim. Possibly, too, Zeboim was not a town, but the name of the district in which Admah was situated. Against this we must not appeal to Gen. 14.2, since the names of the kings there given are probably unhistorical. Nor can one help conjecturing that (if, as Rödiger, in *Ges. Theol.* suggests, אֲדָמָה = צָבִיעִים) Hosea alludes to a story which accounted for the dreary character of the Valley of Zeboim (now the *Wady el-Kelt*; see ZEBOIM, 1), analogous to that connected with the valley of ACHOR. Such stories of overturned villages are not uncommon. See SODOM AND GOMORRAH.

T. K. C.

ADMATHA (אֲדָמָתָא), one of the 'seven princes' (cp Ezra 7¹⁴) at the court of Ahasuerus (Est. 1¹⁴ + [BAN, L om.]). According to Marquart, however, these seven names have arisen from an original three (cp the three satraps, Dan. 6¹ f.) of which CARSHENA (*q. v.*) is one, Shethar and Tarshish are corrupt variations of the second (see SHETHAR), and Meres and Marsena corruptions of the third (see MARSENA). Admatha (or rather אֲדָמָתָא) would then be the father of Haman, and for אֲדָמָתָא (cp note to MEMUCAN) should be substituted אֲדָמָתָא (the designation applied to Haman). See, further, *Fund.* 68 ff. Cp ESTHER, § 3.

ADMIN (אַדְמַיִן [BN]), a link, in the genealogy of Joseph, between Aminnabad and Arni (Aram), in Lk. 3³³ RV mg. and W & H. See GENEALOGIES OF JESUS, § 3.

ADMINISTRATION. See GOVERNMENT.

ADNA. 1. (אֲדָנָה [Ginsb. *q. v.*, עֲדָנָה [Bä.]) One of the b'ne PAHATH-MOAB in the list of those with foreign wives (see EZRA, i. § 5 *end*), EZRA 10²⁹ (אֲדָנָה [B]. *ed.* [B⁹], אֲדָנָה [A], אֲדָנָה [L combining with next name, which in 1 Esd. 9¹¹ (1) is אֲדָנָה], אֲדָנָה [N = Adna + following name, CHELAL] = 1 Esd. 9¹¹ (אֲדָנָה [A], ADDI, 1. With this name should be compared Hadauna, a Jewish name of the fifth century B.C., mentioned by Hilprecht as found at Nippur (cp Hazitu = אֲדָנָה).

2. (אֲדָנָה [Ginsb. Bä.], priest temp. Joiakim (see EZRA, ii. §§ 68, 11), Neh. 12¹⁵ (אֲדָנָה [N⁹ = אֲדָנָה *inf.*], om. [B⁹*A], אֲדָנָה [L]).

ADNAH (אֲדָנָה): אֲדָנָה [BA], -NAC [L], a captain in Jehoshaphat's army (2 Ch. 17¹⁴).

ADNAH (אֲדָנָה) [Ginsb. Bä.], other readings אֲדָנָה, אֲדָנָה; אֲדָנָה [BANL], *Ednas*. A Manassite, who deserted from Saul to David (1 Ch. 12²⁰ [21]). See DAVID, § 11 *a* iii.

ADONAI (אֲדֹנָי). See NAMES, §§ 119, 109 n.

ADONI-BEZEK (אֲדֹנִי-בֶזֶק) in v. 7 with *makkef*; אֲדֹנִי-בֶזֶק [B.M.] Judg. 1:7; *Q* has אֲדֹנִי-בֶזֶק also in Josh. 10:13 where MT has Adoni-zedek; a third variation is אֲדֹנִי-בֶזֶק [os. Procop. *Q*^{cond.}]; the change may be accidental or harmonistic, a Canaanite king whom Judah and Simeon, invading southern Palestine, encountered and defeated at Bezek. Adoni-bezek fled, but was overtaken, made prisoner, and mutilated. He was afterwards carried to Jerusalem, where he died (Judg. 1:7). The name Adoni-bezek is commonly interpreted 'Lord of (the city) Bezek'; but such a

¹ *Q* closes this verse thus, καὶ τὸ κατὰσποντὸν Ἀδῶνα [BNA; *μ* sup. ras. N], i.e., 'and the remnant of Admah.' This may possibly be correct (see Duhm, *Jes.* 105, Ch. *Int.* 12, 97). Moab may be figuratively called Admah, just as Jerusalem is figuratively called Sodom (Is. 1:10).

formation is entirely anomalous. In similar compounds (Adoni with proper name) the second element is regularly the name of a god, never of a place (there are, in fact, no Hebrew or Canaanite proper names of persons in the OT thus compounded with the name of a locality); nor is 'adon used of the sovereign of a city or country. In Jos. 10:1 ff., which, in spite of radical differences, is based on a source closely akin to that of Judg. 1, if not identical with it, the head of the native kings who first made front against the Israelite invasion of the S. is Adoni-zedek, king of Jerusalem (see ADONI-ZEDEK); and it is to Jerusalem that Adoni-bezek is taken (? by his own servants) to die (Judg. 1:7). Hence the conjecture offered under ADONI-ZEDEK appears very probable. See also BEZEK.

G. F. M.

ADONIJAH (אֲדֹנִיָּהּ, 2 S. 3:4; 1 K. 1:57:18 2:8; 1 Ch. 3:2; Neh. 10:16 [17], elsewhere אֲדֹנִיָּהּ; 'Yahwè is lord,' § 36; cp Phoen. אֲדֹנִיָּהּ; אֲדֹנִיָּהּ; אֲדֹנִיָּהּ [BA], ΟΡΝΙΑ [L]).

1. David's fourth son (in 1 Ch. 3:2 אֲדֹנִיָּהּ [BA; so also in 2 K. 2:21 ff., ορνιας [L]). Nothing is known of his mother, Haggith. Like Absalom, he was born at Hebron (2 S. 3:4; ορνια [B], -vias [A]); like him he was conspicuous by his graceful presence, while like all David's sons he never felt the constraint of his father's authority. Absalom's death left him heir to the throne, and 'all Israel,' as he said himself, 'expected that he would become king' (1 K. 2:15). He therefore, in the manifest failure of the old king's faculties, thought it time to assume a semi-royal state, like Absalom before him (1 K. 1:5). On his side were the old and tried servants of David—Joab, the commander of the forces, Abiathar, who represented the old priestly family of Eli, and had been the companion of David's wanderings—followed by the people as a whole (see 1 K. 2:15). The 'new men,' however, Benaiah, captain of the body-guard, and Zadok, a priest of origin comparatively obscure, looked with evil eyes on his pretensions, and with the powerful aid of the prophet Nathan espoused the cause of the son of Bathsheba. The chance of each party, unless David's death was to be followed by civil war, lay in a sudden stroke which would put their claimant in possession and overawe his opponents.

The story is graphically told, though perhaps with a secret sympathy with Adonijah. Nor can we doubt that, like the other narratives of the same writer, it is in the main trustworthy. Adonijah made the first move. He invited all the royal princes save Solomon, together with Joab and Abiathar and 'all the men of Judah,' to a sacrificial feast at a well-known sacred stone (see ZOHELETH) close to Jerusalem (1 K. 1:9 ff.). They had left the weak old king, however, exposed to the machinations of their enemies, while the fortress was in the hands of Benaiah and his trained soldiers. Nathan was quick to seize the opportunity. By the help of Bathsheba, and with a presentation of facts which may or may not have been perfectly accurate,¹ he obtained from David an order for the immediate enthronement of Solomon. Adonijah's banquet was disturbed by news that Solomon reigned by his father's will, and was protected by Benaiah and the foreign guard. The company broke up in dismay, and Adonijah sought an asylum at the horns of the altar. The clemency of Solomon, however, spared his life, and but for an ill-timed revival of his ambitious dreams he might have remained in a happy obscurity. The cause of his ruin was a petition to be allowed to marry Abishag, for which he obtained the support of Bathsheba. Apparently the queen-mother did not detect his secret political

¹ The question is whether the promise of Solomon asserted by Nathan in 1 K. 1:24 is a clever fiction of Nathan, or not, and whether the description of the doings of Adonijah is, or is not, exaggerated. The former point is the more important of the two. We (*CH* 261 n.) and Ki. (*Hist.* ii. 180 f.) take different sides. We's reply is, of course, to us the less palatable one; but we must consider Semitic craftiness, and the improbability of a merely private promise of Solomon. See 1 K. 1:12-13.

motive; indeed Abishag had only nominally been David's concubine. Solomon, however, regarded the proposal as virtually, if not expressly, a claim to the throne, and Adonijah perished by Solomon's sentence and Benaiah's sword.

Compare the narrative of Stade (*Gf i. bk. v. c. 2*), with the somewhat different treatment of the matter by Kittel (*Hist. ii. c. 4*).

W. E. A.
2. A signatory to the covenant (see EZRA, i. § 7). Neh. 10:16 [17] (אֲדוֹנִיָּאם [ADONIKAM] (through the names are otherwise divided), אֲדוֹנִיָּאם [ADONIKAM] [1]). In the great post-exilic list, EZRA 2:2 = Neh. 7:7 = Est. 5 (see EZRA, ii. § 9), and in the list (EZRA) of those who came with EZRA, the name appears (Ezr. 1:3 18 14 13 respectively) perhaps more correctly (so Gray, *HPN* 137, n. 2) as ADONIKAM (q.v.).

3. A Levite, temp. Jehoshaphat; 2 Ch. 17:8 (אֲדוֹנִיָּאם [BA], -מָא [1]).

4. See ABANAH.

5. See ABANAH.

ADONIKAM (אֲדוֹנִיָּאם); 'the Lord is risen up,' cp **ADIKAM**; אֲדוֹנִיָּאם [ADONIKAM] [BAL].

The b'ne Adonikam, a family in the great post-exilic list (see EZRA, ii. § 9, 3v). In the great post-exilic list, EZRA 2:2 = Neh. 7:7 = Est. 5 (see EZRA, ii. § 9), and in the list (EZRA) of those who came with EZRA, the name appears (Ezr. 1:3 18 14 13 respectively) perhaps more correctly (so Gray, *HPN* 137, n. 2) as ADONIKAM (q.v.).

3. A Levite, temp. Jehoshaphat; 2 Ch. 17:8 (אֲדוֹנִיָּאם [BA], -מָא [1]).

4. See ABANAH.

5. See ABANAH.

ADONIRAM (אֲדוֹנִירָם, § 40, 'the Lord is high'; אֲדוֹנִירָם [ADONIRAM] [BAL]; **ADONIRAM**), chief receiver of tribute under David (2 S. 20:23), Solomon (1 K. 4:6; 5:14 [28]), and Rehoboam, on whose deposition he was stoned to death by the Israelites (1 K. 12:18; 2 Ch. 10:18 אֲדוֹנִירָם. HADORAM, אֲדוֹנִירָם [A]).

In 2 S. 20:24 (אֲדוֹנִירָם [1]) and 1 K. 12:18 (אֲדוֹנִירָם [ADONIRAM]), it is incorrectly (cp We. Dr. *TSB*) written ADONIRAM (אֲדוֹנִירָם). Hilprecht (*PEF Qu. St.*, Jan. '98, p. 55), indeed, attempts to explain the form by connecting it with Adduiramu ('Addu is high'), a Jewish name on a tablet from Nippur; notice, however, that י is not expressed and that ADONIRAM reads 'Adoniram.'

ADONIS only in the phrase מְנַטְיִים אֲדוֹנִיָּאם (a double plur., Is. 17:10 RV mg. 'plantings of Adonis'¹ (EV has 'pleasant plants'). In justification of

1. OT reference. the rendering see Che. Is. (2) 1:108, Kittel in *Dl. Is.* (6). To Ewald (*17te Aufl.* 2:110, *Lehrb. d. hebr. Spr.* 7:18, n. 3) and still more to Lag. (*Semítica*, 1:31, *Uebers.* 205, n. 1) is due this important correction of the rendering. Clermont-Ganneau should also be consulted (*Études d'archéol. orientale* 1, 1880, pp. 26 ff.), also WRS *Eng. Hist. Rev.*, 1887, p. 307; but cp We. *Ar. Heid.* (1) 7 n. Na'anam (= pleasant, gracious) was doubtless a title of the 'Lord' (Adon, whence Adonis), and Adonis-worship seems to have penetrated under this title into Syria and Palestine, as we gather from the OT name NAAMAN (q.v.), from the names Numāna and Nāmāna in S. Palestine in pre-Israelitish times (Thotmes III.), and from the *Nahr Na'mān* (N. of Carmel), which seems to be the Belus of the ancients. That Adonis-worship flourished in Palestine when Isaiah wrote can easily be believed. The N. Israelites were at this time specially open to Syrian influences. They 'forgot' Yahweh because he seemed unable to protect them. So Isaiah indignantly exclaims, 'Therefore, though thou plantest (little gardens with) shoots of Adonis, and stockest them with scions (dedicated) to a foreign god. . . the harvest shall vanish in a day of sickness and desperate pain.' The phrase 'shoots of Adonis' points to the so-called 'gardens of Adonis,' baskets containing earth sown with various plants, which quickly sprang up and as quickly withered. In reality they were symbols of the life and death of Adonis; but Isaiah takes the withering as an image of the withered hopes of Israel. On these 'gardens' see Frazer, *Golden Bough* 1:24 f.; WRS *Rel. Sem.* (2) 414; Ohnefalsch Richter, *Kypros* 132 f.; and cp Che. 'Isaiah,' in *SBOT* (Eng.), 146.

Adonis was one of those local gods who live with and in nature, who suffer in summer's drought, die

¹ ὁ φύτεμα ἀπίστον [DRA] (Q1).

with the winter, and live again with the early spring. Legend, however, explained the death of the god as

2. Legend and cult. an event of far-off times. Adonis, it said, was killed whilst hunting the boar in Lebanon, and accordingly in the heat of summer was solemnised the great mourning festival (cp WRS *Rel. Sem.* (2) 411), at which his corpse was exhibited resting upon a bed of flowers—the quickly fading Adonis-garden. Far up in Lebanon, near the fountain of 'Afka, death suddenly overtook him; whereupon the spring became red with his blood. By 'Afka was an ancient temple of the goddess Aphrodite (so Luc. *Dea Syr.* 9; Eus. *Vit. Const.* 355, Sozom. *HE* 2 5), of which the ruins still remain; probably it contained the grave of the god. This legend, and the cult connected with it, must be very ancient. Indeed, in a source as early as the papyrus Anast. I., mention is made of the goddess of the 'mysterious' city of Byblus. In its origin it was distinct from the Babylonian legend of the loves of Ištar and Tammuz, though at an early date both this legend and the Egyptian story of Osiris were combined with it (*Plut. de Is.* 15, Luc. *Dea Syr.* 7; cp Apollodor. ii. 1, 3, 7, etc.). The cult spread through all the Phœnician colonies, especially to Cyprus, whence in the seventh century it was imported into Greece. Adonis, however, is not to be taken as the true name of the god; every god can be called 'Adon,' lord, just as every goddess is entitled to be called Rabbath, 'the lady.' At Byblus (see GERAL, i.) the favourite of the goddess of Byblus was invoked as the 'lord' *par excellence*, and thus it was that the Greeks came to call him Adonis. What his real name was we do not know; for the name Tammuz, which he also bears, is Babylonian, and it is doubtful whether it ever became naturalised in Phœnicia.

Possibly his name survives, unsuspected, among the many divine names. Or perhaps the recollection of his sad fate may have hindered the formation of proper names derived from his; nor is it impossible that in the worship he never received a real name at all.¹ For in point of fact Philo, who never mentions Adonis, says of a certain Elinū (ἑλίνοϋ—φύστος, that he lived with a woman named Erut in Byblus, that he was slain by wild beasts, and was afterwards deified, and that 'his children brought him libations and offerings.' This seems to be the euhemistic version of the Adonis legend. Now in 'Abdat in the neighbourhood of Byblus, where doubtless the village Saarna lay, there has been found an altar Διὸς ἀδωνίου ἡδύστον Σααρναίου ἐρημίου (Renan, 234), and although such attributes are of frequent occurrence in Syria, Renan is probably right in recognising in this 'highest god' the Elinū of Philo, and Adonis. Moreover, according to Philo (ii. 10), the god ἄδωνιος ἦ' ἄγροτος, 'the farmer,' whose brother is called ἄγρος, 'field' (i.e., πεδῆ)² and who had a sacrosanct image and a temple carried about Phœnicia on wheels, was honoured in Byblus as θεὸν ὁ μέγιστος. He also recurs in the Greek inscriptions. In Byblus a temple was erected under Augustus Διὸς ἡδύστον (Renan, 223; cp 232 θεῶν Διὸς . . .) and the same god had a temple deep in the recesses of the mountains near Kālat Fakra to the SE. of Byblus (*CGO* 452, cf. 459, 460) (Elymas, θεῶν ἀδωνίου). The Phœnician name represented by ἄδωνιος is unknown. See TAMMIZ.

LXX. C. § 1000:106 § 2.

ADONI-ZEDEK, or rather **Zedek**, as RV (אֲדוֹנִי־זְדַק), 'Šedek is lord,' cp MELCHIZEDEK, though to later readers the name very probably meant 'lord of righteousness'; אֲדוֹנִי־זְדַק [BAL]; **ADONISEDEK**, a king of Jerusalem at the time of the Israelitish invasion. See Josh. 10:1 ff., where he leads a confederation of five kings of S. Canaan. According to Josh. 10, Joshua came from Gilgal to the relief of the Gibeonites threatened by the coalition; surprised and completely routed the army of the Amorite kings near Gibeon; captured the five kings in the cave of Makkedah; put them to death and impaled their bodies; then, turning back, razed Lachish, Eglon, and Hebron, with many other cities in the region. This story stands in a narrative of the

¹ The inscription from the district of Hippo Diarrhytus (*CIL* viii. 11211) *σωτηριος ἀδωνιο* (ADON) proves nothing as to the cultus-name of the god; Adonis has here, as among the Greeks, become a proper name.

² From the time of Scaliger it has been assumed that this name arose from a corruption or misunderstanding of זֶדֶק (see SHADDAI). This is possible, but very far from certain.

conquest of all Palestine by Joshua in two great campaigns (Josh. 10, f.) which cannot be historical. A much more credible account is to be found, though in an abridged form, in Judg. 1 (see JOSHUA, § 8; JUDGES, § 3). Here Adoni-bezek is the king who opposes the first resistance to the advance of the tribes of Judah and Simeon against the Canaanites of the S. It is therefore in Budde's opinion (*ZATW* 7, 148 ['87]) not improbable that the **G** reading 'Adoni-bezek, king of Jerusalem' in Josh. 10:13 is correct, especially as Judg. 1 may be understood as saying that his own followers carried Adoni-bezek to Jerusalem, and so as implying that that city was his capital. The objection to this view is that the second element in Adoni-bezek ought to be a god, and we know of no god named Bezek. Hence it is very possible that Adoni-bezek in Josh. 10 (**G**^{HAL}) is a scribe's error, and that the original narrative of Judg. 1 had not Adoni-bezek, king of some nameless city, but Adoni-zedek, king of Jerusalem (see ADONI-ZEDEK). W. R. S. — G. F. M.

ADOPTION (ΥΠΟΘΕΣΙΣ). *Rev.* 8:13; 9:4; *Gal.* 4:5; *Eph.* 1:5. See FAMILY.

ADORA (see below) or **Adoraim** (אָדוֹרַיִם); on form of name see NAMES, § 107; אֲדוֹרַיִם [A]. W [A] and *Jos. Ant.* viii. 10:1, -PAM [L]; *ADORAUM*, mentioned with Mareshah, Ziph, and Lachish among the cities fortified by Rehoboam (2 Ch. 11:9†). The sites of all these places having been securely fixed, there can be no hindrance to identifying Adoraim with the modern *Dura*, which is 5 m. W. by S. from Hebron, and is described by Robinson (2:215) as 'one of the largest (villages) in the district.' The site is well adapted for a town, being 'on the gradual eastern slope of a cultivated hill, with olive groves and fields of grain all round' (cp *PEF. Mem.* 3:304). Under the new Egyptian empire an Adoraim is perhaps mentioned twice (*WMM. As. u. Eur.* 167, 174); but it is not clear that Rehoboam's city is intended. At any rate, Adoraim is doubtless the Adora or Dora of Josephus (*Ant.* xiii. 154 and elsewhere) ἡ πόλις ἡ Ἀδωρα, ἡ πόλις ἡ Δωρα and the Ἀδωρα of I Macc. 13:20 (ἡ πόλις ἡ Ἀνωρα [ANW]). In the latter, Adora is a point on the route by which Tryphon entered Judaea; in the former, it is usually coupled as an Idumean city, with Marissa (Mareshah), the fate of which it shared, being captured by John Hyrcanus and compelled to accept circumcision and the Jewish law (*Jos. Ant.* xiii. 9:1; *Bibl.* 2:6). T. K. V.

ADORAM (אָדוֹרַם), 2 S. 20:24; 1 K. 12:26†. See ADORAIM.

ADRAMMELECH (אֲדַרְמֶלֶךְ, אֲדַרְמֶלֶךְ [BL], Ἀδραμελεχ; *Jos.* λεγόντι, ἀναδρωμαίος).

1. A Babylonian deity. According to 2 K. 17:31, after 'the king of Assyria,' i.e., Sargon (see SARGON), had translated the Sepharvaim into Samaria, they there continued to worship Adrammelech and ANAMMELECH (q.v.), the gods of Sepharvaim. This passage presents two difficulties. In the first place, according to the biblical account the worship of Adrammelech was accompanied with the sacrifice of children by fire: 'they burnt their children in fire to Adrammelech and Anammelech.' Throughout the cuneiform inscriptions, however, there is no allusion to human sacrifice, and in the sculptures and reliefs no representation of the rite has been discovered. The second difficulty concerns the explanation of the name Adrammelech and its identification with some known divinity of Babylonia. The name was originally explained as *Adar-malik*, 'Adar the prince,' Adar being regarded as the phonetic rendering of the name of the god *Ninib*. This identification, however, was unsupported by any evidence, and has now been abandoned. A clue to the solution of the problem, however, is afforded by the statement that Adrammelech was a god of Sepharvaim, a city that is generally identified with Sippar (cp SEPHARVAIM). The god whose worship was especially

centred at Sippar was Šamaš the Sun-god. That this was the case is abundantly proved by references throughout the historical and religious texts of the Babylonians and Assyrians, and the remains of the great temple of the sun-god exist in the mounds of Abu-Habbah at the present day. Some scholars, therefore, would see in Adrammelech a subsidiary name or title of the Sun-god himself. Others, however, do not accept this view. They strike at its chief support by repudiating the identification of אֲדַרְמֶלֶךְ with Sippar, suggesting that it is to be identified with *Šabard'in*, a city mentioned in the Babylonian Chronicle. No satisfactory explanation of the name, therefore, has yet been offered. But cp NISROCH. L. W. K.

2. A son of the Assyrian king Sennacherib, who, according to 2 K. 19:37 (ἀδραμελεχ [A]) and Is. 37:38 (ἀδραμελεχ [BN¹AOQ]), ἀδραμ. [S¹], in conjunction with his brother NISAEZER (q.v.), slew his father while he was worshipping in the temple of Nisroch at Nineveh, and thence escaped into Armenia. In the Babylonian Chronicle mention is made of this revolt, in which Sennacherib met his death; but the only trace of the name Adrammelech hitherto found is in Abḏēnu under the form Adramelus, and in Polyhistor under that of Ardu-masanus. Scheil however thinks that ADMELK and Adramelus are corruptions of Aššur-MU-NI-İK (or -GAL), the idiographic reading of the name pronounced Ašur-šum-usābī. This is the name of a son of Sennacherib for whom his father erected a house amidst the gardens of Nineveh. For analogies cp the royal name Sammuḡhes = Šamaš-MU-GI-NA. The Ardu-masanus of Polyhistor may be a corruption of the phonetic form given above, just as Σασσοδοχινοσ is Šamaš-šum-ukin, the phonetic reading of Šamaš-MU-GI-NA. (See Scheil, *ZA* 12:1; *Rev. bib.*, April 1897.) Cp ESAR-HADDON, NISROCH.

ADRAMYTIUM (Ἀδραμύτιον or ἄτρ., the adjective, which alone occurs in the NT, is, as in some cursive MSS of Acts, Ἀδραμύθιον or ἄτρ.; neither inscriptions nor coins give the form -ΤΤΗΝΟΣ of Tisch. following NB⁹; W & H -ΥΝΤΗ, after AB¹). A seaport of Mysia, which gave, and still gives, its name to the gulf, a great triangular indentation along the S. foot of Mt. Ida, whence it was called also the 'Idæan.' Adramyteum, in the E. recess of the gulf, was always important. It would profit by the trade in timber from Ida. There were also copper mines in the neighbourhood, and iron mines at Andeira not far to the NW. Strabo (p. 606) describes it accurately as 'a colony of Athens, a city with a harbour and roadstead'; but its importance goes back to a much earlier epoch if, as Olshausen asserts (*Rhein. Mus. f. Phil.* '53, p. 322; cp Hazar-maveth), the name points to foundation by the Phœnicians. Of necessity Adramyteum was intimately connected with the road system of NW. Asia. The coast road from Ephesus and the inland road from Pergamus converged to Adramyteum, whence they diverged, on the one hand, across the Mysian peninsula to Cyzicus on the sea of Marmora, and, on the other, to Assos, Troas, and the Hellespont. Consequently, it became an assize town, or head of a *conventus juridicus*. Adramyitan coasters such as that in which Paul performed the first stage of his journey to Rome (Acts 27:7) must have been familiar visitors to Cæsarea and the Syrian harbours. *Adramyti* (*Edremid*), which preserves the old name, is 5 m. from the sea. Thus, Kiepert is perhaps right in putting the ancient town on an eminence by the sea, 8 m. SW. of the modern Adramyti (*Z. d. Gesellsch. f. Erdk.*, 1889, 292 f.). Nevertheless, Edremid is heir to the importance of Adramyteum. Silver mines are now worked in the hills behind the town. W. J. W.

ADRIA (ἐν τῷ Ἀδρίᾳ, Acts 27:7 [BNA], ἄδρια; 'stony sea,' *Wiclif*), the division of the Mediterranean which lies between Sicily and Malta on the W. and Crete on the E. So the name is applied by Paus. v. 25:3 (speaking of the straits of Messina), ἐκ τοῦ Ἀδρίων καὶ

ἐξ ἑτέρου πελάγους ὁ καλεῖται Τυρσηνόν. Cp. id. viii. 543. Procopius considers Malta as lying on the boundary (11' i. 14: Γαύλω τε καὶ Μελίτη προσέσχον, αἱ τὸτε Ἀδριατικόν καὶ Τυρρητικόν πελάγους διορίζουσαν). Ptolemy distinguishes between the Adriatic sea and the Adriatic gulf. Acts reproduces the language of the sailors. For this extended application of the name cp Strabo, who, writing about 19 A.D., says that the Ionian Sea is 'part of what is now called Adrias' (p. 123). This implies that the ancient use of the word had been more limited. In medieval times the name was still more widely extended, being practically = 'Levant,' as opposed to 'Ægean' (cp Ram. Paul 298. See MYRA). The question is connected with the identification of the island upon which Paul was cast (Acts 28:1) after fourteen days' drifting in Adria (see MELITA). We may compare the shipwreck of Josephus 'in the middle of the Adria' (κατὰ μέσον τὸν Ἀδριαν): he was picked up by a ship sailing from Cyrene to Puteoli (Vit. 3).

W. J. W.

ADRIEL (אֲדִרְיֵל, not 'God's flock,' but either (a) miswritten for אֲדִירְיֵל, 'God is helper' [cp forms of name in 5, 2 S. 218 below]; or (b) the Aram. form of Heb. אֲדִירְיֵל. The former view is adopted in NAMES, § 28; the latter by Nestle, ZDPV 15:257; cp BARZILLAI; see also H.P.V. 266 n. 1, 309 n. 8). Son of BARZILLAI (q.v., n. 4) the Melohathite, to whom Saul married his daughter MERAB (q.v.); 1 S. 18:19 (om. B; ὄνα [usually = ἠρα] ἄλ [A], ἐδμηλ [L], 2 S. 21:3 (σερεῖ [B], ἠδμή [A], ἐρεῖ [L]).

ADUEL (אֲדוּגַחַל [B], נֶאֱדַחַח [A]; אֲדוּגַחַל), the great grandfather of Tobit (Tob. 1:1). No doubt another form of ADIEL (q.v.).

ADULLAM (אֲדוּלַאִם, אֲדוּלַאִם [BAL], אֲדוּלַאִם [B, 2 Ch. 1; Barid, Mi.; A. 1 S. 1], אֲדוּלַאִם [A, Josh. 15:35], אֲדוּלַאִם [I. 4b.]; אֲדוּלַאִם, variants אֲדוּלַאִם, אֲדוּלַאִם, אֲדוּלַאִם, אֲדוּלַאִם), gentilic אֲדוּלַאִם. **Adullamite**, אֲדוּלַאִמִּי [E], אֲדוּלַאִמִּי [ADEL], אֲדוּלַאִמִּי, אֲדוּלַאִמִּי [E], a town in the Shephelah (Josh. 15:35), with a changeful history. For a considerable time it seems to have remained Canaanitish. We still have a legend in Gen. 38:1 f. (J) which describes the fusion of Judahite clans with a Canaanitish clan whose centre was Adullam. This fusion had apparently not been accomplished in David's time, for Adullam was still outside the 'land of Judah' when David took refuge there (1 S. 22:1; cp v. 5). We cannot therefore accept the editorial statement in Josh. 12:15 (cp v. 7) that Joshua 'smote' the king of Adullam. The Chronicler speaks of Rehoboam as having fortified Adullam (2 Ch. 11:7). He names the place in conjunction with Soco (Shuweikeh), which harmonises geographically with Micah's combination of it (Mic. 1:5, if the text be correct) with Mareshah (Merāsh). It is included in the list of cities which are stated to have been occupied by the Jews in the time of Nehemiah or Zerubbabel (Neh. 11:30; so B¹ & mg. inf. L; B² & A om.); but the list in Neh. 11:25-36 appears to be an archaeological fiction of the Chronicler. Judas the Maccabee, at any rate, in a raid into 'Idumæa,' occupied Adullam and kept the sabbath there (2 Macc. 12:38).

The chief interest of Adullam, however, lies in its connection with DAVID (q.v., § 3). Here, not in some enormous cave (such as that fixed upon by tradition at Khareitūn),² but in the 'stronghold' of the town, David on two occasions found a safe retreat (1 S. 22:1; 2 S. 5:17; cp 23:13).

Where was Adullam? The authority of the Pales-

tine Survey has led many recent writers to adopt the identification of Adullam with 'Id-el-mā, proposed in 1871 by M. Clermont-Ganneau. This is the name of a steep hill on which are 'ruins of indeterminate date,' with an ancient well at the foot, and, near the top, on both sides, caves of moderate size. The site is in the east of the Shephelah, about 3 m. SE. of Soco, and 8 from Mareshah; and, though it is much more from Bethlehem, 'the journey would be nothing for the light-footed mountaineers who surrounded David' (Clermont-Ganneau, PEFQ 177 [75]). The identification, however, is only conjectural. The caves are unimportant (1) because the MT (cp Jos. Ant. vi. 12:3) speaks of a single cave, and (2) because with We., Ki., Bu., and Kau. we should correct קָוָה, 'cave,' in 1 S. 22:1 2 S. 23:13 1 Ch. 11:15, into קָוָה, 'stronghold'; cp 1 S. 22:4 f. 2 S. 23:14. Nor does the position of 'Id-el-mā exactly agree with that assigned to Adullam in the *Olmasticon*. On the very slight resemblance of the name to Adullam no reliance can be placed. Other sites are quite possible. Cp GASm. HG 229 f. See MICAH, § 2 a, n. T. K. C.

ADULTERY. See MARRIAGE, § 4.

ADUMMIM, The Ascent of (אֲדוּמִים מְעַלָּה); Josh. 15:7 אֲדוּמַמִּים [B], אֲדוּמַמִּים [A], אֲדוּמַמִּים [I. 1]; 18:17 אֲדוּמַמִּים [B], אֲדוּמַמִּים [A], אֲדוּמַמִּים [I. 1]; אֲדוּמַמִּים, a point marking the position of the frontier between Judah and Benjamin. The sharp rise near the middle of the road from Jericho to Jerusalem appears to be intended; the name (connected with אָדָם, 'red') was perhaps suggested by the ruddy hue of the chalk rocks in that neighbourhood, to which appears to be due the name of the khān el-Ahmar ('the red'), the traditional 'inn' of the Good Samaritan, and that of *Tal'at ed-Dam* ('the hill of blood'), NE. of the khān. With the latter spot the ascent of Adummim has been plausibly identified (PEF. Mem. 3:172).

ADVERSARY. The word so translated in 1 S. 16:7 (הַיָּבֵשׁ *yāra*, RV 'rival,' אַנְתִּיזְחָלוֹס [L],¹ cp Lev. 18:18 [B.A.]) is the technical term for a fellow-wife, answering to Ass. *yirritu*, Ar. *qarratun*, Syr. *artha* ('arva'). All these forms are dialectal variations of a single Old-Semitic word. Similarly, in Lev. 18:18 the words 'to vex her' are better rendered by RV 'to be a rival to her.' The words that follow may be rendered, interpreting the metaphor, 'marrying the second sister, in addition to the first, in the lifetime of the latter.'

The sense of the metaphor is given by the Arabic *litākūna qarratāha*. See Dr. FRS, *ad loc.* and especially Lag.'s *Mittheilungen* 1:125 f. (GG.V, 1882, no. 13).

W. K. S.

ADVOCATE (ΠΑΡΑΚΛΗΤΟΣ), 1 Jn. 2:1, see PARACLETE.

AEDIA (ΑΗΔΙΑΣ [B]), 1 Esd. 9:27 = Ezra 10:26, RV ELIJAH, 3.

ÆNEAS (ΑΙΝΕΑΣ [BNA]), a paralytic at Lydda healed by Peter (Acts 9:33). The form of the name, Æneās, not as in Homer *Ænēas*, is noteworthy. It is met with in Thucydides, Xenophon, and Pindar.

ÆNON (ΑΙΝΩΝ [Ti. WH]), Jn. 3:23 f. See SALIM. **ÆSORA** (ΑΙΣΩΡΑ [BA], etc.), Judith 4:47 RV = AV ESORA (q.v.).

AFFINITY. See FAMILY, KINSHIP.

AGABA, RV ACCABA (ΑΚΚΑΒΑ [B]), 1 Esd. 5:30 = Ezra 2:46, HAGAB.

AGABUS (ΑΓΑΒΟΣ [Ti. WH]; § 68), one of the 'prophets' who came from Jerusalem to Antioch at the time of the dispersion from Jerusalem 'upon the tribulation that rose about Stephen' (Acts 11:19, cp 8:4). He predicted a great famine over all the world, 'which came to pass in the days of Claudius' (Acts 11:27-28). The reference, doubtless, is to the great dearth which visited Judæa and the surrounding districts—especially Jerusalem—between 44 and 48 A.D. (Jos. Ant. xx. 26; 52;

¹ The text of BA differs.

¹ The word is found both with *ad* and with *on* Aramaic seals; e.g. *ad-on* (CS 2, no. 124) but *ad-on*. 'Horus is a help' (*ibid.* 77).

² The Magharet Khareitūn enters history, not with David, but with an ascetic named Chariton, who, after having been taken by robbers on the way to Jerusalem, founded one of his two lauras here, and died in the cave about 470 A.D.

Eus. *HE* ii. 113}. For other famines in the reign of Claudius, see Suet. *Claud.* 18; Tac. *Ann.* xii. 43.

The next mention of Agabus is in Acts 21 *of.*, where it is said that he 'came down from Judaea' to Caesarea when Paul was there, and, taking Paul's girdle, bound his own feet and hands with it to symbolise the captivity of the apostle. As this reference looks like a first mention of Agabus, those who ascribe the whole of Acts to one writer regard it as an indication that the second half of the book was written first. By others the passage is naturally regarded as one of the indications that the author of Acts did not himself write the 'we' passages, but adopted them from an earlier source. On the other hand, Overbeck and Van Manen regard *τῶν* 10-14 as an interpolation, and suppose that the 'we' was introduced by the last redactor. Jüngst thinks that the prophecy cannot originally have been ascribed to Agabus, but must have been assigned to one of Philip's prophesying daughters, or these would not have been mentioned. At all events, it is to be noted that 'from Judaea' (21 *ro*) does not harmonise with 218, for Caesarea belonged to Judaea.

Agabus is included in the lists of the 'seventy disciples of our Lord' by pseudo-Dorotheus and pseudo-Hippolytus, and is commemorated in the great Greek *Menaia* (Apr. 8), along with Rufus, Herodion, and Asyncretis.

AGAG (אַגַּג, אֲגַג, cp Ass. *agagu*, 'be powerful, vehement, angry'; *Igigi*, the spirits friendly to man, Maspero, *Dawn of Civ.* 634; אַגַּר [BAL]), a king of the Amalekites, so celebrated in early tradition that the Yahwist makes Balaam say, by an obvious anachronism, of the future Israelitic kingdom, 'His king shall be higher than Agag' (Nu. 247; אַגַּר [BAL], following Samar. text). Saul, after his successful campaign against the Amalekites, exempted Agag from the general doom of devotion to the deity by slaughter, and brought him to Gilgal, where Samuel heved him in pieces before Yahweh—i.e., at the great sanctuary where festival sacrifices were offered (1 S. 158 *f.* *of.* 32 *f.*). Making allowance for the endeavour of the narrator to harmonise an old tradition with later ideas (see SAUL, § 3), and throwing ourselves back into the barbarous period which begins to pass away under David, we cannot doubt that the slaughter of Agag was a eucharistic sacrifice (see SACRIFICE), akin to that of the *naki'a* (lit. 'victim rent in pieces'), which was in use among the Arabs after a successful fray, and which might be a human sacrifice (WRS *RS*² 491, cp 363; We. *Ar. Heid.* 112 [87]).

AGAGITE (אַגַּגִּי; for Greek readings see below), a member of the family of Agag; a title applied anachronistically to Haman (Esth. 3:10 835). Haman, as an Amalekite, is opposed to Mordecai, the descendant of Kish (Esth. 25). Neither description is to be taken literally (see ESTHER, § 1, end). The meaning is that there is an internecine struggle between the Jews and their enemies, like that between Saul and Agag of old. Similarly, Haman is called a 'Macedonian' in the Greek parts of Esther; 126 (μακεδονα [L^a]; but βουγατος [BNAALβ]; AV Agagite; RV ΒΟΥΓΑΤΗΣ [BNAALβ]; EV Macedonian; μακεδων [BNAALβ]; but βουγατος [L^a]), and the name has made its way back into 924 (μακεδων [BNAALβ]); cp ESTHER, § 20. Elsewhere the reading is βουγατος [BNAALβ] (only in 3:85 [N^a 886]), perhaps a corruption of Γουγατος (in Nu. 247, the same version has Γωγ for Αγαγ).

AGAR (אַגַּר [BA]). 1. The sons of Agar, Bar. 3:23 RV; AV *Agarenes*. See HAGAR, § 2, n. 2. Gal. 4:24. RV HAGAR (*q.v.*, end).

AGATE (אַגַּתִּי, אֲגַתִּי, אֲגַתִּי [BNAALQ]; אֲגַתִּי, Ez. 27:16 [Ba. Ginsb.], γοργος [BQ], κοργος [A], etc.; אֲגַתִּי, אֲגַתִּי [BAL]) occurs four times in AV, twice for Heb. *kadkod*, RV 'rubies' and twice for *shēbē*. On the identification of these stones, see CHALCEDONY. On the question whether the

agate, which is a variegated chalcedony (translucent quartz) with layers or spots of jasper, was known to Israel, see PRECIOUS STONES.

AGEE (אַגֵּי, אֲגֵי [A]; אֲגֵי [B]; אֲגֵי [L]; Jos. הלוי [gen.]; אֲגֵי, father of SHAMMAH (*q.v.*, 3); 2 S. 23:11. His name should doubtless be corrected to Ela אֲגֵי (so Marq. *Fund.* 17); אֲגֵי and אֲגֵי in the older character were very similar. He is mentioned again in 1 K. 4:18. See ELAH, 6.

AGGABA (אַגַּבָּא [B ab^{sup} Ag A]), 1 Esd. 5:59† RV = Ezra 2:45. HAGABAH.

AGGZEUS, AV Aggeus (*Aggei* [ed. Bensly]), 1 Esd. 6:17, 3 Esd. 1:4†. See HAGGAI.

AGIA (אַגִּיא [BA]), 1 Esd. 5:34† RV = Ezra 2:57, HATHIL.

AGRICULTURE.—Agriculture is here considered (1) as conditioned by the land (§ 1), (2) as conditioned by the people (§§ 2-10), (3) as a factor in the life of the people (§§ 11-15); a concluding paragraph (§ 16) will contain some notes on historical points.

1. The great variety of the conditions in the different natural divisions of Palestine (Dt. 17) must be kept in

mind.¹ The various local products, natural and industrial, of these districts, so often alluded to by the Old Testament writers, the most important of which are wheat and barley, olive and vine and fig, will be described in special articles (*q.v.*). On the seasons see RAIN, DEW. We simply note here—*First*, the long dry season (Apr.-Oct.), including all the harvests, the dates of which vary slightly in the different districts (cp FEASTS, § 10); the *קציר* in spring, when rain seemed miraculous (1 S. 12:16 *f.*) and the steady W. wind every evening made it possible to winnow with ease, barley beginning in April, wheat about a fortnight later; the *קוף*, summer fruits and vegetables, in summer; olives in autumn; the *בציר*, vines, from August onwards. *Second*, the wet season (Oct.-Apr.), the earlier part of which saw the preparation of the soil by the early rain (*יורה, לורה*) for the winter crops, to be brought to maturity by the succeeding showers, especially those in March-April (*שוקת*), before which was the time for sowing the summer crops.

With such stable conditions, all that seems to be needed is a fair amount of intelligent industry; and the lack of this, rather than any great change of climate, is probably the cause of the retrogression of modern times.² The productivity, however, was not uniform (cp parable of sower), and there seems to be a somewhat periodic diminution in the amount of rainfall. Agriculture is also exposed to pests; the easterly wind *קרי*, drought, MILDEW, and LOCUSTS (*q.v.*; see also ANT, § 4).

II. We consider now, more in detail, agriculture as dependent on the energy, skill, and general condition of the inhabitants. Our account must naturally be fragmentary.³ The minute prescriptions of the Mishna must of course be used with caution. We begin with—

1. Technical details of agricultural procedure. (For the most part we shall deal only with the raising of grain crops. For other departments see VINES, GARDEN, CATTLE, etc.) Incidentally the biblical records describe many agricultural processes, and mention by name some of the implements used. Of these implements, however, they give no description; and the only specimens found, up to the present time, are of sickles (see below, § 7).

For Egypt, however, we have fuller sources—many pictures of processes and implements, and some actual specimens. And

¹ See PALESTINE for details in GEOLOGY (§ 3), Physical Divisions (§ 4), Hydrography (§ 13), Climate and Vegetation (§ 14).

² See however Fraas, *Aus dem Orient* 199.

³ There is no Hebrew word corresponding to our term *farming*. Tilling the soil is *עבד הארצה*; husbandman is *עבד*, etc.; field is *קרי*.

expert. The ploughman holds in his left hand a *god* (*messās* = מֵסָס, מֵסָס, מֵסָס, מֵסָס) some eight or nine feet in length, having at one end a metal point, and at the other a metal blade to clean the share.

The *team* (מִטְרָה, מִטְרָה) would, as now, often consist of oxen (Am. 6:12), but sometimes of cows (Job

FIG. 3.—Ploughing, hoeing, and sowing. From the *masfaba* of Ti at Sakkāra (Old Empire). After Baedeker.

1:14, Heb. text), and perhaps sometimes of asses (Is. 30:24; Dt. 22:10). Even camels and mules may now be used occasionally. In Armenia many pairs of oxen draw one plough, the driver sitting on the yoke; but this is hardly the meaning of I K. 19:19.

The *furrows* were called תֵּמֵם, תֵּמֵם (פְּנֵינָה). They are now sometimes very carefully drawn (קֶס, Ps. 129:3), and are some nine to ten inches apart.

Irrigation (מִטְרָה, מִטְרָה; see GARDEN) must have been one of the processes used by Israel.² Palestine, indeed, differed from Egypt (Dt. 11:10 f., on which see EGYPT, § 34, n.) in having a copious supply of rain and in having natural springs

(Deut. 8:7); hence many districts, especially in valleys,⁴ would bear crops without being watered artificially. But later practice shows that even these would yield better harvests if they had artificial irrigation, and there may have been districts under cultivation which were entirely dependent on it. It would not be safe to assign an early date to the elaborate methods and regulations of Mishna times; and it is difficult to determine whether by the streams that were so highly prized (Dt. 8:7; Nu. 24:6, Cant. 4:15),⁵ and without which a garden could not live (Is. 1:30), artificial canals are meant, and whether, e.g., the bucket (בֵּרֵי, Is. 40:15; Num. 24:7) was used in irrigation. The Mishna has regulations concerning *manuring* (מַנְיָה), and there may be a reference to it in such passages as Ps. 83:10 [11] (רִבְחָה) or Is. 25:10 (Kithib). In NT times, at least, manure was used for trees (Lk. 13:8; βάλω κόπρια), as now for figs, olives, etc.; it was worked in at the last yearly ploughing, which was after the first winter rain. For grain crops the use of manure is exceptional (e.g., at Hebron). Remains show that in the hilly country *terracing* (מַנְיָה, Cant. 5:1:?) was used even more than now, especially for vine cultivation; but the wider terraces are still used for grain, the clearing of the soil being called *maqā*.

Fences (מִנְיָה) were employed, perhaps only in vine-

 4 Cp. *R.S.* 298.
 5 The prophets delight to speak of the copious supplies of water that will refresh even the most unlikely places in the ideal future (see Cheyne on Is. 30:25).

yards (Is. 5; Ecclus. 28:8), where hedges (מִנְיָה Is. 5:5) were also in use; and there was sometimes a border, e.g., of *fitches* (see FITCHES, 2) (Is. 28:25). Between grain-fields, however, the commonest practice was to set up *stones* to mark the line of partition (מִנְיָה Hos. 5:10); on the strong sentiment that prevailed as to the unrighteousness of tampering with these, see below (§§ 12, 14).

Whether the various words used for sowing the seed were technical terms we cannot tell. מִנְיָה is a word of general significance.

6. Sowing.

In Is. 28:25 three words are used in one verse: מִנְיָה and יָרַק of scattering יָרַק (see FITCHES, 1) and cummin with the hand; מִנְיָה of setting wheat and barley in the straight furrows.² Nowadays a drill is sometimes used. The common practice is, whether the land has been already ploughed or not, to plough in the seed.³ This protects it from ants and from dryness due to intermission of the early rain.⁴ As to protection from man and beast, see HUR.

To reap is קָצַר. Two names of implements have been preserved (מִנְיָה only in Dt. [169; 23:26]; מִנְיָה only in Jer. [50:16; AV mg. scythe⁵] and Joel

7. Reaping.

[3 (41):3]; δρέπανον); but whether they refer to the same thing or to varieties, we do not know. Perhaps the commonest method was to pull up by the root (see fig. 5), a practice confined in ancient Egypt to certain crops, but still followed both in Egypt and in Palestine. The use of *sickles* in Canaan in very early times is, however, proved by the finding of sickle flints⁶ at Tell-el-Hesi in the earliest and all succeeding layers, while the use of iron sickles by the Jews in at least pre-Hellenistic times is proved

by the finding of the specimen represented in fig. 7. By putting together different allusions,⁷ we can follow the various steps. The reaper (קָצֵר) filled his hand

FIG. 5.—Pulling up grain. After Erman.

1 In Am. 9:13 מִנְיָה is used of the process of sowing.
 2 It is not unlikely that מִנְיָה is to be dropped, with We. Ch. and Du. (agnosca Dt.), מִנְיָה.
 3 According to Strabo, this was done also in Babylon (cp above, col. 78, n. 2), and in ancient Egypt the seed was sometimes, especially in the Old Empire, trodden in by sheep (Erman, *Life in Ancient Egypt*, ET 429; not goats), in the time of Herodotus by swine.
 4 On the stages and accidents of growth cp Vogelstein, § 10.
 5 For מִנְיָה, which AV mg. thrice renders 'scythe,' EV has, more correctly, PRUNING-HOOKS (p. v.).
 6 The method of setting the sickle flints is shown by the specimens found by Dr. Petrie in Egypt (*Illahun*, etc. pl. 7 no. 27; see above, fig. 6).
 7 E.g., Ruth 2:23; Ps. 129:7; Is. 17:5; Job 24:24; Jer. 9:22 [21].

(עָר) with ears (שֵׁבִילִים) of the standing corn (קָמָה), and with his arm (רֶגֶל) reaped them (קָצַר). The stalks (קֶנֶף) were, in Egypt, and still are, in Palestine, cut pretty high up (Anderliind; knee high). They must sometimes have been cut, whether at this or at a later stage, very near the ear (רֶגֶשׁ שֵׁבִילָה Job 24:24). The armfuls (עֲמִיר) would fall (Jer. 9:22 [23]) in a heap (עֲפָרָה) behind the reaper, to be gathered, to be gathered by the reaper, in his bosom (בְּשֵׁמֶרֶת) and tied (מָצִיט) into sheaves (שֵׁבִילִים) and set in heaps (הֲמִילָה) ¹

FIG. 6.—Sickle with cutting edge of flints found at Lilian. After Petrie.

In Egypt the sheaf consisted of two bundles, with their heads in opposite directions. In modern Syria frequently the sheaves are not tied at all. It has been

supposed ² that already in Amos's time the bundles (עָר) may sometimes have been heaped into a heavy

8.—Sickling and bundling. After Lepsius.

load on a cart (עֲלֵהָ Am. 2:13); but the reference may very well be to the threshing-wain. ³ In Egypt they were conveyed in baskets or bags, by men or on donkeys, to the threshing-floor.

Threshing was called עָרַם עֲרָם, עָרַם עָרָם, of which the first describes beating with a rod, the second is indefinite (to break up fine), and the third is literally to trample. (a) The first of these evidently represents the most primitive practice, still followed sometimes in both Palestine and Egypt. Naturally, gleaners (שֹׁבְעִים) and apparently others in certain circumstances—e.g., Gideon in time of danger—beat out the grain; and in much later times

¹ It is hardly possible to determine how many of these terms are practically synonyms. According to Vogelstein *op. cit.* 61 ff., the loose עָרָם were tied into אֲרָפִים and piled into עֲרָם, while עָרָם (see *Excurs. I.*) is an entirely distinct word meaning hay.

² E.g., by Wellhausen.
³ So, e.g., Hoffman and Wetzstein in *ZATW.*

(Is. 28:27) it was usual to beat out cummin and קָמָר (see FITCHES, 1) with rods (מַטֵּה) and שֵׁבֶט respectively. The other processes were probably more common in later times. For these was needed a threshing-floor (רֶגֶל, אֲלוֹשׁ, אֲלוֹשׁ), for which was selected some spot freely exposed to the wind, often a well-known place (2 S. 24:16). ² Beating the floor hard for use may be alluded to in Jer. 51:33 (Heb. Text; and חֲרִיבָה). Sometimes the wheat heads may have been struck off the straws by the sickle onto the threshing-floor (Job 24:24), as Tristram describes (*East. Cust.* 125); but usually the bundles would be first piled in a heap (גִּירָה) on the floor, and then from this a convenient quantity (מִשְׁתָּה) ³ from time to time spread over the floor.

The threshing then seems to have been done in two ways: either (b) by driving cattle round the floor on the loosely scattered stalks till their hoofs gradually trampled (עָרַם) out the grain (עָרָה), for which purpose oxen ⁴ were used (Hos. 10:11), ⁵ or (c) by special implements. ⁶

The instruments mentioned, which were drawn usually by oxen, are (a) חֲרִיבָה (חֲרִיבָה), חֲרִיבָה (חֲרִיבָה); ⁷ (b) עֲרָה with אֲוֶן ⁸ (wheel) prefixed (Is. 28:27), and perhaps alone (Am. 2:13; see, however, *W. ad loc.*). These two sets of expressions probably correspond pretty closely to two instruments still in use in Palestine, and a description of them and their use will be the nearest we can come to an account of their ancient representatives.

a. The Syrian *nōrag* (חֲרִיבָה) is a wooden drag ⁹ (see fig. 10) with a rough under-surface, which when drawn over the stalks chops them up. The illustration needs few explanations. The roughness is produced by the skilful insertion in holes, a cubic inch in size, of blocks of basalt (מַטֵּיִת Is. 41:15) which protrude (when new) some inch and a half. The sledge is weighted by heavy stones, or by the weight of the driver, who, when tired, lies down and even sleeps, or sits on a three-legged stool.

β. The *Hilān* of Northern Syria, called in Egypt by ¹ חֲרִיבָה, ² K. חֲרִיבָה. ³ But in 1 K. 22:11 חֲרִיבָה is probably distinguished by עָרָם. ⁴ So written, without dagesh, by Baer. ⁵ It is not clear how the horses of Is. 28:28 are supposed to be used. Du. proposes to read חֲרִיבָה as a verb. ⁶ In Egypt in later times oxen were so used, three in a line, with their heads bound together at the horns by a beam (see fig. 9), or in the ancient empire, donkeys, ten in a line; so in modern Syria, the line being called a *ḥaran*. ⁷ Just as several rods are used together in method (a), so there could be duplicates of *ḥaran* (b), or of implement (c), or mixtures of (b) and (c) used simultaneously, as now in Ḥaurān. ⁸ Threshing-wain, Job 41:30 [31] RV. ⁹ Clearly some kind of sharp instrument of iron (2 S. 12:31 = 1 C1; 20:3), E.V. "harrow," Hoffman, *ibid.* חֲרִיבָה חֲרִיבָה.

¹ Perhaps by a gloss we have here independent names for one thing (Is. 41:15). By חֲרִיבָה (Judg. 8:7, 16), which some would add here, the Talmud (with חֲרִיבָה [once]); *ḤḤAL* (once) translates understands "thistles": a view that is confirmed by the existence in modern Egyptian Arabic of a word *berkūn* as the name of a thorny plant. See BIERER, 1.
² *Op. cit.* alone = (threshing) wheel, Prov. 20:26 RV
³ Some 7 ft. x 3 ft. x 2 in.

the name of the unused *nōraḡ* (see fig. 11), and known to the Romans as *plostellum Poenicum*, has in place of sharp stones revolving metal discs, which, when pressed down by the weight of the driver seated in a rude arm-chair, effectually cut up the straw

FIG. 9.—Carrying from harvest-field, and threshing. After Rosellini.

The work is done sometimes by horses, but most commonly, as of old, by oxen, either singly or (oftener) in pairs, sometimes muzzled, contrary to ancient Egyptian usage and Hebrew *maxim*.¹

The modern floor is a circle some fifty feet in diameter,

FIG. 10.—Syrian threshing-sledge. After Benzinger.

with the heap (*hadis*) in the centre, from which a supply (*tarha*) is from time to time spread all round in ring form, some two feet deep and seven or eight feet broad. When one *tarha* has been thoroughly threshed—to insure which, it is from time to time stirred up with the

FIG. 11.—Modern Egyptian threshing-machine (*nōraḡ*). After Wilkinson.

handle of the winnowing instrument, or even with a special two-pronged fork (*deiḡal*, δειγέλλα)—the mixed mass (*daris*) of grain (*habb*), chopped straw (*tibn* תבן), and chaff etc. (*tayyār*), is formed into a heap (*'arama*), to make room for a new *tarha*.

¹ The Mishna seems to assume the practice in *Kelim* 107 טל תבן—טל. טל תבן. It is doubtful whether the preceding phrase referring to a practice, reported by some travellers, of bandaging the eyes of the oxen in threshing. Philological considerations would give the preference to Maimonides's explanation: 'Saccus pellicus in quem colligunt stercus jumentis ne possint trivivum dum trivivatur.'

The process of winnowing (רר) is often mentioned. Two names of instruments are preserved, the *nōra* (EV 9. Winnowing, 'fan') in Is. (30²⁴) and Jer. (15⁷), and the *raḡ* (EV 'shovel') in Is. alone (30²⁴).¹ They seem to refer to different things: perhaps to

the implements still called by similar names in Palestine²—the fork and the shovel. The products are grain (רז), chopped straw (רזב), and chaff (רז, רז, רז, רז, רז). The first is heaped up in round heaps (רז Ru. 3⁷; Cant. 7³, Heb. Text). The second is kept for provender (Is. 11⁷). The third is blown away by the wind (Ps. 14).

In modern Syria the *midrā* (see fig. given in Wetzstein, *op. cit.* below, § 17) is a wooden fork almost 6 ft. in length, with some at least of its five or six prongs separately inserted, so that they are easily repaired. The prongs are bound together by fresh hide, which on shrinking forms a tight band. The *raḡ* is a kind of wooden shovel (see fig. in Wetzstein, *l.c.*), with a handle 4 ft. long. It is used chiefly for piling the grain, but also for winnowing leguminous plants and certain parts of the *daris* that have had to be re-threshed. The winnowers stand to the E. of the *'arama* heap, and (sometimes first with a two-pronged fork called *sha'ul* and then), with the *midrā*, either toss

the *daris* against the wind or straight up, or simply let it fall from the inverted fork, according to the strength of the evening W. breeze. While the chaff is blown away some 10 to 15 ft. or more, the straw (*tibn*) falls at a shorter distance, and is preserved for fodder; the heavy grain, unbruised ears, and joints of stems, fall almost where they were, ready for sifting.

Strange to say, in the case of sifting it is the names of the implement that are best preserved. The *nōra* is called *Kēḡhārāh* (רזרז, ³ Am. 9²¹) and *ḡāḡ* (רז, Is. 30²⁸). In the former case probably the good grain, in the latter probably the refuse, passes through. In modern Syria there are

FIG. 12.—Winnowing. After Erman.

FIG. 13.—Sifting. After Lepsius.

probably the good grain, in the latter probably the refuse, passes through. In modern Syria there are

¹ Ⓞ omits these words; but πρῶτον occurs repeatedly in the NT.
² Fleischer denies any philological connection between *Ar. raḡ* and *רז*, regarding the former as a Persian word, borrowed in the sense of *tool*.
³ But Ⓞ ἄκωος.

two main kinds of sieve used on the threshing-floor. They are made of a hoop of wood with a mesh-work of strips of camel-hide put on fresh, and become tight in drying. The coarser meshed *kirbāl* is like the *kebhārah* of Amos. When the winnowed heap is sifted with it, the grains of wheat pass through, while the unbruised ears etc. remain in the sieve,¹ and are flung back into the *tarha* to be re-threshed. The finer meshed *ghirbāl* is like the *מַנְהַל* of Is. 30:28; all dust, bruised grains, etc. pass through, but none of the good wheat.

When the grain has been finally separated, it is heaped with the *raht* in hemispherical piles (*sobba*), which probably represent the *ārema* (עֵרְמָה) of the metaphor in Cant. 7:3 (Heb.). By this Boaz slept (Ru. 3:7), as do the owners still, while (as a further precaution) private marks are made on the surface, and a scarecrow is set up.

Storage.—In Jer., Dt., Joel, Ps., 2 Ch., there are names of places for keeping stores of grain;² but we do not know anything about them.³ In the dark days of Gedaliah corn and other stores were hidden in the ground (Jer. 41:8); dry cisterns hewn out of the rock are still so used. For a representation of an ancient cistern see ZDPV 8, opp. p. 69. The mouth is just wide enough to admit a man's body, and can be carefully covered over. Grain will keep in these cisterns for years.

2. Next falls to be considered the dependence of agriculture on the general condition of the people, a dependence that is very obvious from the present state of agriculture in Palestine.

In the days of Israel's greatness, when agriculture was the chief occupation of the people, the population,

11. **General conditions.** whatever may have been its numerical strength, was certainly enough to bring the country, even in places that are now quite barren, into a state of cultivation. The land would be full of husbandmen tilling their fields by day, and returning to their villages at night. Yet, down to the end of the monarchy, the old nomadic life still had its admirers (Jer. 35), who, like the Bedouin of to-day, would despise the settled tiller of the soil. At the other extreme also, in such a society as is described, e.g., by Amos and Isaiah, there was an aristocracy that had little immediate connection with the land it owned. Slave labour would doubtless, as elsewhere, be a weak point in the agricultural system, tending to lower its status (Zech. 13:5; Ecclus. 7:15 [16]); though this would not preclude the existence, at some period or other, of honourable offices such as those attributed by the Chronicler to the age of David (1 Ch. 27:25-31). After making allowance for homiletic colouring, we are bound to suppose that agricultural enterprise must have suffered grievously from a sense of insecurity in regard to the claims of property, and from the accumulation of debts, with their attendant horrors. Civil disturbances (such as those abounding in the later years of Hosea) and foreign wars would, in later times, take the place of exposure to the inroads of nomadic tribes. The burden of taxation and forced labour (1 S. 8:12) would, as now in many eastern lands, foster the feelings that find expression in the narrative of the great schism (1 K. 12:4) and in some of the accounts of the rise of the kingdom (on the 'king's mowings,' Am. 7:1, see MOWINGS and GOVERNMENT, § 20).

The existence of an effort to ameliorate evils of the kind to which allusion has just been made, and of a consciousness of their inconsistency with the true national life, is attested by the

12. **Laws.** inclusion in the Pentateuchal codes of a considerable number of dicta on agricultural matters, in which we see

¹ For מַנְהַל is most likely *stones*.

² מִקְדָּשֵׁי, מִקְדָּשֵׁי, מִקְדָּשֵׁי, מִקְדָּשֵׁי, מִקְדָּשֵׁי, NT ἀποθήκη.

³ In Egypt corn was stored in buildings with a flat roof reached by an outside stair. There were two openings, or sets of openings, near the top, for pouring in the grain, and near the bottom, for withdrawing it (see model in Brit. Mus.).

how religious sanctions became attached to traditional agricultural practices.

Already in the *Book of the Covenant* a fallow year (Ex. 23:11), once in seven, is prescribed for the sake of the poor and the beast, and a day of rest (v. 12), once in seven, for the sake of the cattle and the slave; while the principle is laid down that for damage done to a neighbour's field reparation must be made (Ex. 22:5 f. [4 f.]). In the *Deuteronomic Code*, if there is already the precept against sowing in a vineyard two kinds of seed (22:9), or ploughing with an ox and an ass together (22:10), and the requirement of a tithe (14:22), there are still such maxims as the sacredness of property (19:14, landmarks; = Prov. 22:28 = 23:10a [cp Job 24:2], and, in the form of a curse, Dt. 27:17) on the one hand, and, on the other, generous regard for the needs of others (23:25 [26], plucking ears; 24:19, sheaf; 20, olive; 21:23-24 [23], grapes), even of beasts (25:4, muzzle), with a provision against abuse of the privilege (23:25 [26], no sickle; 23:24 [25], no vessel); while an effort is made to moderate the damage done to agriculture by war (20:7, exemption from conscription; 20:19 f., preserve trees). In the *Priestly Code* there is still, in the remarkable collection preceding the last chapter of Leviticus, a further development of the provision for the poor at harvest time (19:9, corners = 23:22), with a repetition of the charitable maxims (19:9 f.); but there is on the whole an emphasising of such prescriptions as non-mixture of seeds (19:19), defilement of seed (11:37 f.), uncircumcision of fruit-trees (19:23-25), strict calculation of dates of agricultural year (23:16); while the Jubile year makes its appearance. Here we are appreciably nearer the details of such discussions as those in *Zera'im* etc. Of course, the question how far such maxims made themselves felt in actual practice, or even as a moral directive force, is not answered by pointing out their existence in literary form.

III. We pass now to the consideration of agriculture as a factor in the life of the people.

That agriculture was an important element in popular life is very evident. Land was measured by yokes

13. **Common life.** (1 S. 14:14; Is. 5:10) and valued by the amount of seed it needed (Lev. 27:16).

Time was measured by harvests (Judith 22:7), and places were identified by the crops growing on them (2 S. 23:11, lentils; 1 Ch. 11:13, barley). Tilling the soil was proverbially the source of wealth (Pr. 12:11; 28:19); implements not needed for other purposes would as a matter of course be turned to agricultural use (Is. 2:4)—and so on. That work in the fields was not confined to slaves and people of no culture is evident, not only from the existence of such narratives as that of Joseph's dream, but also from what is told of Saul (1 S. 11:5), and Elisha (1 K. 19:19), and Amos (7:14) before they appeared on the stage of history. On the other hand, the narrator of the story of Ruth seems to represent neither Boaz himself nor his deputy as doing more than overseeing and encouraging the labourers (Ru. 2:5); and in the time of the writer of Zech. 13:5 (RV) a tiller of the soil seemed to be most naturally a purchased slave, while the ideal of the writer of Is. 61:5 is that ploughmen and vine-dressers should be aliens.

At all times, however, even the rich owner entered naturally into the spirit of the agricultural life. If it was perhaps only in the earlier times that he actually ploughed or even followed the oxen, he would at all times be present on the cheerful harvest field and visit his vineyard to see the work of the labourers (Mt. 20:8), his sons included (Mt. 21:28), and give directions about the work (Lk. 13:7), when he would listen respectfully to the counsel of his men (Lk. 13:8 f.). It was not derogatory, in the mind of the Chronicler, to kingly dignity to interest one's self in agriculture (2 Ch. 26:10).²

¹ The text of 2 S. 23:11 is very beautiful; cp Dr. *ad loc.*

² The meaning of Ecclus. 5:9 [8] is obscure.

and a proverb-writer points out the superiority of the quiet prosperity of the husbandman to an insecure *chaulem* (Prov. 27 23-27).

Not unnaturally it is the life of harvest-time that has been most fully preserved to us. We can see the men, especially the younger men (Ru. 29), cutting the grain, the young children¹ going out to their fathers (2 K. 4:18) in the field, the jealousies that might spring up between the reapers (Gen. 37), and the dangers that young men and maidens might be exposed to (Ru. 29 perh. Hos. 9:1 f.), the simple fare of the reapers (Ru. 2:14), and the unrestrained joviality of the evening meal (Ru. 37) after the hot day's work (2 K. 4:10), the poor women and girls gleaning behind the reapers and usually finding more than they seem sometimes to find nowadays, beating out the grain (Ru. 2:17) in the evening and carrying it away in a mantle to the older ones at home (Ru. 3:15), not only the labourers but also the owners sleeping by the corn heaps at night (Ru. 37), so that the villages would, as now in Palestine and Egypt, be largely emptied of inhabitants. The Egyptian monuments could be drawn on for further illustrations.

Such a mode of life had naturally a profound effect on the popular sentiment, the religious conscience, and, in time, the literary thought of the people; and, to complete our survey of the subject, a few words must be said here on these matters.

That the agricultural mode of life was regarded as originating in the earliest ages is evident from Gen. 3 and 4;² but it was sometimes regarded as a curse (3:17 f.), or at least as inferior to pastoral life (4:3 f.), while at other times nomadic life was a curse (4:12), instead of being a natural stage (4:20). These two sides are perhaps reflected in the glowing descriptions in which certain writers delight—e.g., Dt. 33:28: a tilled land of corn and wine and oil (Dt. 87-9), a pasture land flowing with milk and honey (Ezek. 206). This land, which is lovingly contrasted with other lands (Ezek. 206:15), was felt to be a gift of Yahwè to his people, and specially under his watchful care (Dt. 11:12). The agricultural life was, therefore, also of his appointment (Gen. 3:23; Ecclus. 7:15 [16]), and indeed lay as the basis of his Torah. From him the husbandman received the principles of his practice (Is. 28:26), as also, he depended absolutely on Yahwè for the bringing into operation of the natural forces (Dt. 11:14) without which all his labour would be in vain (v. 17). This, however, was only a ground of special security (Dt. 11:12), for no other god could give such blessings as rain (Jer. 14:22), and Yahwè did give them (Jer. 5:24). If they were not forthcoming, therefore, it was because Yahwè had withheld them (Am. 4:7), and this was because of his people's sins (Jer. 5:25), which also brought more special curses (Dt. 28:38-40). The recognition of Yahwè had, therefore, a prominent place in connection with the stages of agricultural industry (see FEASTS, § 4), the success of which was felt to depend on the nation's rendering him in general loyal obedience (Dt. 11:8-17); the land itself was Yahwè's; the people were but tenants (Lev. 25:23); and the moving of the ancient landmarks, though not unknown, was a great wrong (Job 24:2). Some of the moral aspects of agricultural life have been already sufficiently touched on. It is probable that many of the maxims referred to were widely observed, being congruent with the better spirit of the people. Thus Amos records it as an outrage on the ordinary sentiments of common charity, that even the refuse of the wheat should be sold for gain (Am. 8:6). Other maxims, again, can be little traced in practice.

In this description of Hebrew ideas we have taken no note of the differences between earlier and later times. Deuteronomy and the prophets have been the main

¹ Several children may sometimes now be seen weighting and driving the threshing-sledge.

² Cp also Gen. 1:28 f. and WRS *R52*: 307.

authority. In the public consciousness, however, there lived on much of the old Canaanitish popular belief, in which the *Bd'ālim* hold the place here assigned to Yahwè, so that, e.g., the fertile spot is the Baal's plot of land, who waters it from unseen sources, underground or in the heavens (see BAAL, § 1)—a mode of expression that lived on into Mishna times, although its original meaning had been long forgotten.

The influence on Hebrew literature was very deep. The most cursory reader¹ must have observed how much

15. Literature. the modes of expression reflect the agricultural life. Prophetic descriptions of an ideal future abound in scenes conceived in agricultural imagery.² Great joy is likened to the joy of harvest (Is. 16:6 f.); what is evanescent is like chaff that is burned up or blown away; something unexpected is like cold (Pr. 25:13), or rain (Pr. 26:1), in harvest—and so on. Lack of space prevents proof in detail of how, on the one hand, figures and modes of speech are drawn from all the operations and natural phenomena of agriculture, while, on the other hand, every conceivable subject is didactically or artistically illustrated by ideas and expressions from the same source. It is a natural carrying forward in the NT of this mode of thought, to find Jesus publishing his epoch-making doctrines of the 'kingdom' so largely through the help of the same imagery. No doubt the commonest general expression is 'kingdom'; but even this often becomes a vineyard, or a field, or a tree, or a seed; and it is extended by sowing etc. It is unnecessary to pursue the subject farther. The whole mode of thought has passed over into historical Christianity, and thus into all the languages of the world.

16. Historical. We shall now in closing give some fragmentary notes towards a historical outline of the subject.

The traditional account of the mode of life of the ancestors of Israel in the earliest times introduces agricultural activity only as an exceptional incident. Agriculture must be rudimentary in the case of a nomadic people. That Canaan, on the other hand, was for the most part well under cultivation,³ when the Israelites settled in the highlands, there can be no doubt. The Egyptian Mohar found a garden at Joppa,⁴ and of the agricultural produce claimed by Thotmes III. at the hands of the Rutennu⁵ some at least must have been grown in Palestine. Israel doubtless learned from the Canaanite not only the art of war (Judg. 3:2), but also the more peaceful arts of tilling the soil, which, as the narratives of Judges and Samuel prove, were practised with success, while it is even stated that Solomon sent to Hiram yearly 20,000 Kor of wheat and 20,000 Bath of oil (1 K. 5:11 [25] Var. Bible). Later, Ezekiel (27:17; see Cornill) tells us how Judah bartered wheat with Tyre,⁶ as well as honey, oil, balm, and *zib* (see PANNAG); which illustrates the tradition in 1 K. 20:34 (see COT) that there were bazaars (see TRADE; STRANGER, § 2) for Israelitish merchants in Damascus, and for those of Damascus in Samaria. It is strange, but true, that in the very period to which this last notice refers, there arose a popular reaction against the precious legacies of Canaanitish civilisation (see RECHABITES). The Assyrian conquest of Samaria naturally checked for a time the cultivation of the soil (2 K. 17:25, lions), the colonists introduced by Sargon and Āsur-bāni-pal being imperfectly adapted to their new home. In Judaea under Gedaliah the Jews 'gathered wine and summer

⁵ *Ibid.* 23 and cp Brugsch, *Egypt under the Pharaohs* (91), p. 167.

⁶ Cp a similar relation in the time of Herod (Acts 12:20).

fruits very much' (Jer. 40, 12), and had stores of wheat, barley, oil, and honey, carefully hidden in the ground (Jer. 41, 8). In Is. 41, 15 mention is for the first time explicitly made of a threshing instrument with teeth (מַסְבֵּי); but whether this was of recent introduction it is impossible to determine. On the fall of the Babylonian power the old relations with Tyre were doubtless renewed (Ezra 3, 7; cp Is. 23, 15, 18). The imperial tribute, however, is regarded as heavier than the agricultural resources of the country could then well bear (Neh. 5, 3 f.). This tribute may have been partly in money (5, 4), but also apparently to a considerable extent in produce (Neh. 9, 37, אֲבוּרֵי). In Joel, of course, there is a description of agricultural distress, but in such a way as to imply that agriculture was in general receiving full attention. In Eccles. (25, f.) there is acquaintance, as in other things, so in agriculture, with several artificial contrivances. To go into the detailed accounts of the Mishna is beyond the present purpose.

AGRIPPA (אַרְיִיפָּא), Acts 25, f. + See HERODIAN FAMILY, 7.

AGUR (אָגוּר; so Pesh.; אָגוּר; but C and Vg. translating, φοβηθητι [BAM]; *Conjunctivus*), b. Jakeh, an author of moral verses (Prov. 30, 1). His name is variously explained as 'hiring' of wisdom (Bar Bahlul) and 'collector' of words of Torah (Midr. *Schemot R.*, par. 6). Such theories assume that Solomon is the author of the verses, which (see PROVERBS) is impossible. All the description given of him in the heading is 'the author of wise poems' (read, not אָגוּרֵי, but אָגוּרֵי, with Grätz, Cheyne, Bickell). Very possibly the name is a pseudonym. The poet who 'takes up his parable' in v. 5 expresses sentiments very different from those of Agur; he seeks to counteract the bold and scarcely Israelitish sentiments of his predecessor.

See *Ew., Salom. Schriften* 250 ff.; *Che., Job and Solomon* 149 ff.; *Jewish Rel. Life*, Lect. V.; *Smeid, AT Rel.-gesch.* 479 f.; and, with caution, *Dillon, Scriptures of the OT*, 131 ff. 269 ff. Cp also PROVERBS; ITHIEL II.; LEMUEL. T. K. C.

AHAB (אַחָאב; § 65, 'father's brother', cp Ahiam and the Assy. woman's name, Ahat-abüsu, and Wi. ZA, 1898, Heft 1; also אַחָאב [for אַחָאב] on an inscription from Sata *Journ.*, As. 1881, 19, 493 f.). 1. אַחָאב [BAI], -אָאָ [A once]; *Achab*; Assy. *Ahabbu*.) Son of Omri, and king of Israel (875-853? B.C. Cp CHRONOLOGY, § 32, and table in § 37). The importance of this king's reign is shown by the large space devoted to it in the Book of Kings.

1. Sources. To obtain a just idea of his character, however, is not easy, the Israelitish traditions being derived from two very different sources, in one of which the main interest was the glorification of the prophets, while the other was coloured by patriotic feelings, and showed a strong partiality for the brave and bold king. To the former belong 1 K. 17-19 and 21; to the latter, chaps. 20 and 22.² Both groups of narratives are very old; but the former is more difficult than the latter to understand historically. In chaps. 20 and 22 we

seem to get nearer to the facts of history than in chaps. 17-19, 21; at the same time we must remember that even here we have to deal, not with extracts from the royal annals, but with popular traditions which are liable to exaggeration, especially at the hands of well-meaning interpolators.¹ The story of Ahab in his relation to Elijah has been considered elsewhere (see ELIJAH, § 1, f.). We can hardly deny that the writer exalts the prophet to the disadvantage of the king. Ahab

2. Ahab's policy. was not an irreligious man, but his interests were mainly secular. He wished to see Israel free and prosperous, and he did not believe that the road to political salvation and physical ease lay through the isolation of his people from all foreign nations. The most pressing danger to Israel seemed to him to lie in its being slowly but surely Aramaised, which would involve the depression and perhaps the ultimate extinction of its national peculiarities. Both under Baasha and under Omri, districts of Israelitish territory had been annexed to the kingdom of Damascus, and it seemed to Ahab to be his life's work to guide himself, not by the requirements of Yahwé's prophets, but by those of political prudence. Hence he not only maintained a firm hold on Moab, but also made himself indispensable as an ally to the king of Judah, if he did not even become, in a qualified sense, his suzerain (see JHOSIAPIAH, 1). Besides this, he formed a close alliance with Ethbaal, king of Tyre (Jos. *Ant.*, viii, 13, 1), whose daughter Jezebel (Baalzebel?) he married. The object of this alliance was doubtless the improvement of Israel's commerce. The drawback of it was that it required on Ahab's part an official recognition of the Tyrian Baal² (commonly known as Melkart), which was the more offensive because the contrast between the cultus even of the Canaanitish Baalim and that of the God of Israel was becoming stronger and stronger, owing to the prophetic reaction against the earlier fusion of worships. Ahab himself had no thought of apostatising from Yahwé, nor did he destroy the altars of Yahwé and slay his prophets. Indeed, four hundred prophets of Yahwé are said to have prophesied before him when he set out on his fatal journey to Ramath Gilead. His children, too, receive the significant names of Athaliah, Ahaziah, and Jehoram.

We can understand Ahab's point of view. But for its moral dangers, we might call it thoroughly justifiable. It was of urgent importance to recover the lost Israelitish territory and to secure the kingdom of Israel against foreign invasion. If Israel were absorbed by Damascus, what would become of the worship of Yahwé? To this question Elijah would have given the answer which AMOS (v. v., § 18) gave after him: 'Perish Israel, rather than that the commandments of Yahwé should be dishonoured.' Jezebel's judicial murder of Naboth and Ahab's tame acquiescence showed Elijah what might be expected from the continued combination of two heterogeneous religions. It was for the murder of Naboth that Elijah threatened king Ahab with death.³

¹ We must begin, however, with an analysis of the narratives. Van Doornik (*U. v. l.*, 1896, pp. 271-274) has made it highly probable that the narrative of the siege of Samaria and the battle of Aphek in 1 K. 20 has received many interpolations tending to make the deliverance of the Israelites more wonderful, in addition to those already pointed out by We. (*U. v. l.*, 1896, p. 271) and Kautz. (*U. v. l.*, § 25, n. 10).

² Of Baalath, the female counterpart of Baal, the Hebrew tradition makes no mention. It is an interpolator who has introduced into 1 K. 18, 10 the words 'and the prophets of the Ashera, 400,' which are wanting in the MT of v. 22, though supplied in *Chil.* [Chil. omits 400 in v. 22] (cp WRS, *RS* 189; We. *U. v. l.* 281; Klo. *Sa.* *As.* 367; Ki. in *Kau.* 115). Of course, Baalath may have had her cultus by the side of Baal, but not in such a way as to strike Israelitish observers. Nor could either Baalath or Astarte (Jezebel's father) had been a priest of Astarte, Jos. *c. A. J.* 18 (Jezebel was called 'the Asherah' by a contemporary writer).

³ Note that 1 K. 21, 23, 26—in which (1) the whole house of Ahab is threatened, and (2) the punishment is connected with Ahab's religious policy—forms no part of the old narrative (see Ki. in *Kau.* 115).

¹ Cp Nöldeke, 'Verwandschaftsnamen als Personennamen' in *Kleinigkeiten zur semitischen Onomastologie* (*WZKM* 6, 307-316 [1902]).

² See KINGS, § 8, and cp Ki. *Gesch.* 2, 134-136 [ET. 2, 214-216].

and it was probably for this, or for other unrecorded moral offences of Ahab and the partizans of Baal, that the uncourtly prophet Micaiah 'never prophesied good concerning Ahab, but evil' (1 K. 228).

To what precise period of Ahab's reign his encounters with Elijah belong, we are not told. Nor is it at all certain to which years the events recorded in 1 K. 20 are to be referred. To the popular traditions further reference is made elsewhere (see ISRAEL, HISTORY OF, § 29). Suffice it to say here that they show us Ahab's better side; we can understand from them that to such a king much could be forgiven. Our remaining

3. Mesha space will be devoted to the two inscriptions relative to episodes in the life of Ahab. The earliest record comes from MOAB (*q.v.*).

Inscription. King Mesha informs us in his famous inscription (*l. 8*) that Moab had been made tributary to Israel by Omri, and that this subjection had continued 'during Omri's days and half of his son's days, forty years,' after which took place the great revolt of Moab.¹ How this statement is to be reconciled with that in 2 K. 1:34 need not be here considered. It is, at any rate, clear that the loss of the large Moabitish tribute, and of the contingent which Moab would have to furnish to Israelitish armies, must

have been felt by Ahab severely. The

4. Shalmaneser II.'s second mention of this king occurs in the Monolith Inscription of SHALMANESER II. (*l. 27-8*). In the list there

given of the allied kings of Syria whose forces were defeated by Shalmaneser at the battle of Karkar (near the river Orontes) in 854 B.C. occurs the name of Ahabbu Sir'lai, which, as most scholars are now agreed, can only mean Ahab² of Israel³ (or, as Hommel thinks, of Jezreel). Two important questions arise out of this record. (1) Did Ahab join Bir'idri

5. Why was Ahab at Karkar? (Benhadad I.) of Damascus of his own accord, jealousies being neutralised by dread of a common foe?

or was he a vassal of Bir'idri, bound to accept the foreign policy of his suzerain and to support it with (or at any rate through) his warriors on the field of battle? The former alternative is adopted by Kittel⁴ and M'Curdy; the latter by Wellhausen and Winckler. To discuss this here at length is impossible. The remarks of Wellhausen will seem to most students very cogent. 'If feelings of hostility existed at all between Ahab and Benhadad, then Ahab could not do otherwise than congratulate himself that in the person of Shalmaneser II. there had arisen against Benhadad an enemy who would be able to keep him effectually in check. That Shalmaneser might prove dangerous to himself probably did not at that time occur to him; but if it had, he would still have chosen the remote in preference to the immediately threatening evil. For it was the political existence of Israel that was at stake in the struggle with Damascus.'⁵ Cp BEN-HADAD, § 2.

It does not follow, however, that we must give Wellhausen's answer to the second question, which is (2) Are the events related in 1 K. 20:22, with the exception of the contest for Ramath Gilead, to be placed before or after the battle of Karkar (854 B.C.)? It is, no doubt, highly plausible to suppose that

¹ For a somewhat different view, see CHRONOLOGY, § 20, n. 1.

² Against Kamph's view, that Ahab is mentioned by a mistake of the Assyrian scribe instead of Joram, cp Schr. *AGF* 290.

³ The form Sir'lai may be illustrated by the vocalisation אֲחָב אֲשֶׁר לְיִשְׂרָאֵל, 1 Ch. 4:16, which Lag. (*Uebes.* 132) thinks may represent the original pronunciation rather than אֲחָבִי.

⁴ Ki., however, after adopting this view of the course of events in his narrative, turns round, and with some hesitation indicates his preference for the view of Kamph. (*Chronologie der Hebr. Kön.* 80), held also formerly by We., according to which the Assyrian scribe confounds Ahab with his son Jehoram (*Hist.* 2:273). On the whole question cp Schr. *AGF* 356-371.

⁵ *Hist.* (61). So the conservative critic Köhler (*Bibl. Gesch.* 379). On the other side, see M'Curdy, *Hist. Proph. Mon.* 1:277 ff.

Ahab took advantage of the blow dealt to the power of Damascus at Karkar to shake off the suzerainty of Benhadad: so far, at least, it seems reasonable to follow Wellhausen. But it is not likely that, considering the threatening attitude of Assyria, Benhadad would have thought it prudent to fritter away his strength on those 'furious attacks' on Israel to which Wellhausen refers;¹ it is not likely, in short, that the siege of Samaria and the battle of Aphek are to be placed after 854 B.C. It may be asked, if they are not placed thus, where are we to find room for them? In 1 K. 20:23-34, Ahab is represented as gaining the mastery over Benhadad, who has to make most humiliating concessions to him. After such a success, how can we account for Ahab's enforced presence at Karkar as vassal of Benhadad? The answer is that tradition selects its facts, and that the facts which it selects it idealises as an artist would idealise them. We may admit that Ahab, in his obstinate and patriotic resistance to Damascus, was not unvisited by gleams of good fortune; but the fact, which tradition itself records, that he was once actually besieged in his capital, cannot have stood alone. Of Ahab's other misfortunes in war tradition is silent; but we can easily imagine that the power which was too strong for Omri was at last able to force his son to send a large contingent to the army which was to meet Shalmaneser at Karkar.

That the siege of Samaria, at any rate, was before 854 B.C. is rendered probable by the criticism given elsewhere (see JEHORAM, 1, § 2) of the narrative in 2 K. 7. In particular, the kings of the Hittites and of *Musri*, who are referred to in v. 6, are just those with whom Benhadad would have to deal before 854 B.C., while Shalmaneser was still occupied at a distance.

The above solution of the historical problem is that of Winckler, which unites elements of Wellhausen's view and of that of Kittel.

The last-named critic deserves credit for an ingenious explanation (*Gesch.* 2:232) of the magnanimity attributed to Ahab in 1 K. 20:31-34. It will be remembered that, according to Kittel, Ahab sent forces to Karkar of his own accord, not as a vassal of Benhadad. This enables him to suggest that the king of Israel may have spared his rival's life in order to enlist him in a coalition against Assyria, the idea of which (according to this hypothesis) was Ahab's. It must be confessed, however, that this view ascribes more foresight to Ahab than, according to Amos (*q.v.*, § 5), was possessed by the Israelites even at a later day, and it was certainly unknown to the compiler of our traditions, who makes no mention of the battle of Karkar.

We may regard it, then, as highly probable that the battle of Karkar was fought at some time in the 'three (?) years without war between Syria and Israel' mentioned in 1 K. 22:1.

The numbers of the force assigned by Shalmaneser in his inscription to Ahab (2000 chariots, 10,000 men),

7. Ahab's army. as compared with those assigned to other kings,² deserve attention. It is possible, no doubt, as Winckler suggests, that contingents from Judah and Moab were reckoned among the warriors of Ahab.³ This does not, however, greatly diminish the significance of the numbers. After all, the men of Judah were southern Israelites. Even if Moabitish warriors were untrustworthy against a foe such as Benhadad, there is no reason to doubt that the men of Judah would sooner see Israel free from Benhadad than swallowed up by its deadly foe. Ahab was

8. His death. certainly no contemptible antagonist in respect to the number of warriors he could bring into the field. He himself, like David (2 S. 18:3), was 'worth ten thousand,' and the dread with which he inspired the Syrians is strikingly shown in the account of his last campaign. We read that

¹ *J.H.* 80: 2nd and 3rd ed. p. 71.

² Bir'idri (Benhadad) has 1200 chariots, 1200 horsemen, 20,000 men (Schrader, *COT* 1:186).

³ That Jehoshaphat's military support of Ahab was not altogether voluntary is surmised by We. and positively asserted by Wl. That it only began at the expedition to Ramath Gilead is too hastily supposed by Ki. (*Gesch.* 2:232 [ET, 2:272]).

down for himself. It is more important, however, to notice that this time, apparently, the tribute for Assyria was provided without any increase in the taxation. Isaiah, we may suppose, would have approved of this.

Isaiah's forecasts were verified, not, indeed, to such an extent as much modern speculation about the prophetic books demands, but as far as his own generation required. Damascus fell in 732; Samaria had a breathing time till 722; and, according to Sennacherib, there was a partial captivity of Judah in the next reign. It was after the first of these events that Ahaz first came in contact with an Assyrian king. In 734 the name of Jauhazi of Judah occurs among the names of the kings who had paid tribute to Tiglath-pileser; but we have no reason to suppose that he paid it in person. It was in 732, after the fall of Damascus, that he paid homage in person to his suzerain. On this occasion he 'saw the altar that was at Damascus' (2 K. 16. 10), and, on aesthetic grounds, liked it better than the bronze altar which had hitherto been used at Jerusalem for burnt offerings. It was probably an Assyrian altar, for the Assyrians on principle introduced their own cultus into conquered cities. So Ahaz sent a model of the altar to the chief priest Uriah (cp Is. 8. 2), who at once made an altar upon the pattern, and transferred the old altar to a new position. This was, doubtless, against the will of Isaiah, who in his earliest extant prophecy so strongly denounces the love of foreign fashions. Possibly at the same time Ahaz borrowed the sun-dial (if EV rightly paraphrases the expression, 'the steps of Ahaz'; see, however, DIAL). Nor is it likely that Ahaz paused here.¹ A suggestive allusion to the addition of Ahaz to foreign worship is traceable in 2 K. 23. 12; but there is a textual difficulty in the passage (see Kamphausen's note in *Kau. IHS.*)²

The reign of Ahaz was inglorious, but on the whole peaceful. It was a severe blow to the commerce of Judah when Rezin, on the accession of Ahaz, attacked and captured Elath (on the Arabian Gulf), and restored it to its former possessors, the Edomites; but at the close of Ahaz's reign Isaiah was able to contrast the peace enjoyed by 'the poor of Yahwè's people' with the chastisement by Assyria on the restless Philistines.³

Other readings of אֶחָז are אֶחָז [B. often, *Alte Entz. 2* 100, 101, once, Qa once], אֶחָז [A twice], אֶחָז [A, 2 Ch. 18]. In Jer. 22. 15 אֶחָז 'Ahaz' takes the place of the true reading 'Ahab' of אֶחָז (see *Archiep. 1* 100).

2. אֶחָז [A]; אֶחָז [L.D. a descendant of Saul]; 1 Ch. 8. 37 (20x) [B]; 24. 10 (1x); EV MT אֶחָז; but originally inserted by G. P. B. 242 (אֶחָז) [B]. See BENJAMIN, § 9 ii. 3.

T. K. C.—W. E. A.

AHAZIAH (אֶחִיָּזָה, אֶחִיָּזָה, 'he whom Yahwè supports'; אֶחָז[ע]יָזָח [BAL]; for other readings see end of no. 2). 1. Son of Ahab and Jezebel, and king of Israel (853-851? B.C. Cp CHRONOLOGY, § 28 and table in § 37). A poor successor to the heroic Ahab. Once more Israel must have been dependent on Damascus, while Moab (see AHAB, § 2) continued to enjoy its recovered independence. The single political action reported of him is his offer to JEHOSEPHAT (*q.v.*, 1) to join in a trading expedition to Ophir (1 K. 22. 50). The close of his life is described in a prophetic legend of very late origin (see ELIJAH, § 3). He fell through the lattice of an upper room in his palace in Samaria, and though he lingered on a sick-bed for some time, did not recover. The story (2 K. 1. 2-17) is a painful one, and was used by Jesus to point the contrast between the unchastened zeal of his disciples and the true evangelical spirit (Lk. 9. 54-56). The one probably historical element is the consultation by Ahaziah of the oracle of Baal-zebub of Ekron. To most of Ahaziah's contemporaries his

action would have seemed quite natural' (cp 2 K. 5. 87 ff.).

2. Son of Jehoram (or Joram) and Ahab's daughter Athaliah, king of Judah (843-842? B.C. Cp CHRONOLOGY, § 28 and table in § 37). He was only twenty-two when he ascended the throne,² and only one event in his brief reign has been recorded—the part which he took with Jehoram king of Israel in a campaign against Hazael of Damascus. The kings of Israel and Judah laid siege to Ramah in Gilead (the place before which Ahab lost his life in battle) which was still held by the Arameans. Jehoram withdrew wounded. Ahaziah also went to his home, but afterwards visited his sick kinsman at Jezreel. During this visit JEHU (*q.v.*) revolted, and the two kings (equally obnoxious to Jehu) went forth in their chariots to meet him. Ahaziah saw his uncle Jehoram pierced by an arrow, and took to flight. As he fled in the direction of BETH-HAGGAN (*q.v.*; 2 K. 9. 27, C) Jehu dashed after him with the cry, 'Him too.' At the ascent of Gur by Ibleam, on the road to Jerusalem, he too was struck by an arrow. Thereupon he turned his horse northwest, and reached Megiddo, but died there of his wound. He was buried in the royal cemetery at Jerusalem. The conflicting account in 2 Ch. 22. 9, from whatever late source derived, is of no historical value.

(Other readings: 2 K. 9. 27 אֶחָזִיָּזָה [B]; 2 K. 14. 13 אֶחָזִיָּזָה [B]; once [A], 1 Sam. 1; 1 Ch. 22. 9 אֶחָזִיָּזָה [B]; once [A]. In 2 Ch. 22. 9 he is called Jehoram, and in 22. 9 אֶחָזִיָּזָה, 20x JERUSALEM.)

AHBAN (אֶחְבָּן, § 45, meaning obscure, for form cp Eshban, 'brother of an intelligent one' [B] [B], or less improbably 'brother has given heed,' so Gray, *III*, V 83, n. 2, who suggests the vocalisation אֶחְבָּן, i. e. Jerahmeelite family name, 1 Ch. 2. 20 (אֶחְבָּן) [B], OZA [A], נֶאֱמָר [L. cp *Ev. 2* 100]).

AHER (אֶהֶר; אֶהֶר [B], אֶהֶר [A], om. [L Pesh.]; *AHER*), a very doubtful Benjaminite name (1 Ch. 7. 12†). See II. SHIM, 2; DAN, § 9; BENJAMIN, § 9 B. a.

Be. (*in loc.*) explains the name as meaning 'the other one,' and conjectures it to be a euphemism for Dan, the express mention of the name of this tribe seeming in more than one instance to have been omitted. (See *Benjamin* 1 100, § 9.) On the other hand אֶהֶר reads 'his son' for 'the sons of' (12 for 12), and the name is entirely wanting in B1 and Pesh., the former (but perhaps originally also the latter) connecting Hushim (אֶהֶר, *hūšū*) with what goes before (see IR). See also AHARAH.

AHI (אֶהִי, § 52, probably abbrev. from AHIJAH).

1. In genealogy of GAD, 1 Ch. 5. 15† (Vg. wrongly translated, *fratris generis*; Pesh. and B. om.). B. om. with the preceding name *fratris generis* [B]; אֶהִי אֶהִי [A].

2. In genealogy of ASUBER (1 Ch. 8. 14, 7. 47). B. 1, AHIAH being part of the following name (see I. AHIAH), produces אֶהִי אֶהִי [A], or אֶהִי אֶהִי [B]; but B. has 777.

AHI, NAMES WITH. See ABI, NAMES WITH.

AHIAH, frequently in AV and once (Neh. 10. 26 [25]) inconsistently in RV. See AHIJAH, 1 f. 4.

AHIAM (אֶהִיָּם, § 63, for which we should probably point אֶהִיָּם, 'mother's brother' [cp AHAB], analogous to the Sab. pr.n. אֶהִיָּם, 'sister of his mother'; cp *III*, N 64, n. 2, once in David's list, b. S. 23; אֶהִיָּם [B], om. [L]; 1 Ch. 11. 34† אֶהִיָּם [B], אֶהִיָּם [A]). See DAVID, § 11 2 f.

AHIAN (אֶהִיָּן, § 65, 'relative, cousin,' cp אֶהִיָּן; אֶהִיָּן [B], אֶהִיָּן [A], אֶהִיָּן [L]; *Archiep.*, a Mish. name (1 Ch. 7. 19†). See SHEMIDA.

AHIEZER (אֶהִיעֶזֶר, § 44, 'the [divine] brother is help,' cp Abiezer, Eliezer; אֶהִיעֶזֶר [BAF1]).

1. b. Amishaddai, chief of the Danites, temp. Moses (P) (Nu. 1. 12 22x; Ex. 17; 7. 40 10 05).

2. One of David's archers (1 Ch. 12. 5†). See DAVID, § 14 10.

1. *Shemid.*, of *P. Rel. 2* 100, 101.

2. So 2 K. 8. 26. In 2 Ch. 22. 3 his age is given as forty-two (2 Ch. 20); but this is clearly miswritten for twenty-two (so B1; cp 21. 50).

¹ Schr. *COT* 1 249 255; Wl. *GBA* 234.

² For אֶחָז read אֶחָז; cp the קָרִיב אֶחָזִיָּזָה for אֶחָזִיָּזָה.

³ The heading of Is. 14. 28-32 is probably correct. See Che. *Intr.* Is. 30. f.; but cp Duhm *ad loc.*

αχιασαμ [A. am. sup. ras. A¹]. cp v. 18; 2 Sam. 22 (αχισουου [BA]). 32 (αχισουου [B]); 1 Ch. 3†.

AHIO (אִיּוֹ), §§ 24, 43, possibly if MT is correct, 'brother of Yahwé,' or 'Yahwé is brother.' The analogy of other names ending in *o* seems against this view; JASTROW, *IBL*, 1894, p. 101.

v. b. Ahimadab, brother of UZZAI (*g. v.*, 1, 2 S. 6:3; 1 Ch. 13:7 has 'his brethren,' and We. reads אִיּוֹ, 'his brother'; see Dr. in each case, however, אִיּוֹ בְּרֵאֵי אֲדֵלֵפוֹי אֹתוֹ, i.e., אִיּוֹ, in 2 S.).

2. In genealogy of BENJAMIN (§ 9 ii. β), one of the sons of Beriah, who had to fight the inhabitants of Gath, 1 Ch. 9:1 (ἀδελφοί αὐτοῦ, 'his brother' [B], of ἀδελφοί αὐ., 'his brethren' [A], of δ. αὐτῶν, 'their brethren' [L]; Be. and Kau. אִיּוֹ; We. אִיּוֹ [De Gent. f. 29]; Ki. אִיּוֹר).

3. In genealogy of BENJAMIN (§ 9 ii. β), son of Jehiel, the 'father of Gihon'; 1 Ch. 8:1 (ἀδελφοί αὐτοῦ [B], φῶς αὐ. [A], οὐ δὲ. αὐ. [I])—9:37† (BA om. αὐτοῦ).

AHIRA (אֲחִירָא; אַחִירָא [BAFL]; אַחִירָא); **AHIRA**. A Naphtali family-name reported in P (Nu. 1:5 2:20 7:28 8:10 27:1). The old interpretation 'my brother is evil' must be abandoned. Either *y* is miswritten for *z* (see the Palmyrene characters), in which case we get the good Heb. name Ahiram,¹ or we have here a half-Egyptian name meaning 'Ra' (or Re—i.e., the Egyptian sun-god) is brother or protector' (so Che. *Isa.* 2:44). The latter view is quite possible (cp the Egyptian name Pet-baal). The Canaanites, who were strong in the territory of Naphtali, were very receptive of foreign religious influences.² Cp ASHUR, HUR, HARNEPHER. The reading of Pesh. (uniformly Ahida') is no doubt either merely a natural variant, or a copyist's substitution of a more normal for a rarer form; cp AHIDA. T. K. C.

AHIRAM (אֲחִירָאָם; אַחִירָאָם [BAFL]; אַחִירָאָם); **AHIRAM**. 1. In the genealogy of BENJAMIN (§ 9 i.); Nu. 26:38 (where we have also the gentilic **Ahiramite**; אַחִירָאָם; אַחִירָאָם [I], ea. . . יעי [B], אַחִירָאָם [A], -אירָאָם [F])=Gen. 46:21, where 'Ahiram, Shephupham' ought no doubt to be read for 'Ehi and Rosh, Muppim' (עֲשֵׂה־שֵׁפְחָם for עֲשֵׂה־רוֹשׁ), cp ROSH. In the similar list in 1 Ch. 8 we find in v. 1 AHARAB [*g. v.*] (אֲחָרָב), and in that in 1 Ch. 7:6 ff. in v. 12, AHER [*g. v.*] (אֲחָר), cp HUSHIM, 2; DAN, § 9.

2. Perhaps we should read Ahiram also for AHIRA (*g. v.*) in Nu. 15, etc.

AHISAMACH (אֲחִישַׁמַּח; אַחִישַׁמַּח [BAFL]; אַחִישַׁמַּח); **AHISAMACH**. 1. In the genealogy of BENJAMIN (§ 9 i.); Ex. 31:6 (אַחִישַׁמַּח [B]) 35:34 35:23 [P]. See DAN, § 9 n.

AHISHAHAR (אֲחִישַׁחָר; אַחִישַׁחָר [BAFL]; אַחִישַׁחָר); **AHISHAHAR**. 1. In the genealogy of BENJAMIN (§ 9 ii. a.), 1 Ch. 7:10†. See JEDIAEL, 1.

AHISHAR (אֲחִישָׁר; אַחִישָׁר [BAFL]; אַחִישָׁר); **AHISHAR**. 1. In the genealogy of the palace (1 K. 4:6†). The name, however, is suspicious.

2. Gives the double rendering, אַחִישָׁר וְאֲחִישַׁמַּח, and אַחִישָׁר וְאֲחִישַׁמַּח, and perhaps even a third rendering אַחִישָׁר וְאֲחִישַׁמַּח וְאֲחִישַׁמַּח, and may be the true 2 reading. But MT (אֲחִישַׁמַּח) has yet to be accounted for. For אֲחִישַׁמַּח we should probably read אֲחִישָׁר, Zabud, who has just been mentioned, is described as not merely a priest but 'the officer (placed) over the palace' (so Klo.). See ZABUD, 1. T. K. C.

AHITHOPHEL (אֲחִיתּוֹפֵל; אַחִיתּוֹפֵל [BAFL]; אֲחִיתּוֹפֵל); **AHITHOPHEL** [BAL], -לוֹס, Jos.), a Gilonite (see GILON), a counsellor of David much esteemed for his

¹ *Agypte* in 3 K. 2:46b [B] answers to Adoniram (cp 1 K. 4:6) of MT.

² On names of foreign deities in Israelite names, see under ELIDAD, and NAMES, §§ 42, 81, 83.

unerring insight (2 S. 15:12 16:23). His son ELIAM (*g. v.*, 1) was, like Uriah, a member of David's body-guard (2 S. 23:34; cp DAVID, § 11 2 3), and since Bathsheba, the wife of Uriah, is described as the daughter of Eliam (2 S. 11:3), it has been conjectured that Ahithophel was her grandfather, and that indignation at David's conduct to Bathsheba led Ahithophel to cast in his lot with Absalom's rebellion. This, however, is a mere possibility, and ambition would be a sufficient motive for Ahithophel's treason to David, just as the slight involved in Absalom's preference of Hushai's counsel to his own was certainly one chief cause of his final withdrawal from Absalom. At first, indeed, he had full possession of the ear of the pretender. It was by his advice that Absalom took public possession of his father's concubines, and so pledged himself to a claim to the throne, from which there was no retreat (2 S. 16:20 ff.). Ahithophel was also eager in his own person to take another bold and decisive step. He wished to pursue David with 12,000 men and cut the old king down in the first confusion and entanglement of his flight towards the Jordan (2 S. 17:1-4). This plan was defeated by Hushai, whereupon Ahithophel, seeing that all hope was gone, went to Giloh and strangled himself.

In 1 Ch. 11:36 'Ahithophel the Gilonite' has been corrupted into 'Ahijah the Pelonite' אֲחִיָּה הַפֶּלִיטִי for אֲחִיתּוֹפֵל הַגִּילֹנִי; cp Klo. *Sines*, *ad loc.* (אֲחִישָׁרָא [BAFL]), and see GILON, *omd.* W. E. A.

AHITOB (אַחִיתּוֹב [B], etc.), 1 Esd. 8:2 RV, 4 Esd. 1:1 RV. See below, AHITUB, 2.

AHITUB (אַחִיתּוֹב; אַחִיתּוֹב [BAFL]; אַחִיתּוֹב); **AHITUB**. 1 S. 14:3 22:9 20; § 45; cp Ahitubai אֲחִיתּוֹבַי 5, no. 1144 אַחִיתּוֹבַי [BAFL].

1. A member of the family in which the priesthood, first at Shiloh, then at Nob, appears for some generations to have been hereditary. He was grandson of Eli, son of Phinehas, and elder brother of Ichabod (1 S. 14:3; cp 4:19-21). His son, Ahijah, is mentioned as priest in 1 S. 14:3; another son, Ahimelech, appears as priest in 1 S. 22:9 11 12 20. It is unnecessary with Thenius and Bertheau to identify Ahimelech with Ahijah; but that Ahitub, the father of Ahimelech, is identical with Ahitub, the father of Ahijah, is clear from 1 K. 2:27, which implies that Abiathar, the son of Ahimelech (1 S. 22:20), was of the house of Eli. Nothing further is directly told of Ahitub; but, if Wellhausen's suggestion that the destruction of Shiloh (Jer. 7:12) took place after the battle of Aphek (1 S. 4) be accepted, the transference of the priestly centre from Shiloh to Nob (1 S. 22:9-11), will have taken place under him.

The description of Ahitub as father of Zadok (2 S. 8:17 = 1 Ch. 18:16, 1 Ch. 6:8 [Dn] 5; 1 Ch. 18 due to an uncorrected *לְעֵזֶר* corruption of the text in Samuel, which originally ran 'Abiathar, the son of Ahimelech, the son of Ahitub, and Zadok were priests' (see the uncorrected text in We. 7:20 22:20)).

2. Father of a (later) Zadok, mentioned in 1 Ch. 6:17 f. 2 and 2, and in pedigree of Ezra (see EZRA, i. § 1) Ezra 7:2 = 1 Esd. 8:2 = 2 Esd. 11 (in the last two passages AV ACHITON, RV AHITON) and a priest, father of Meraioth and grandfather of Zadok, in the list of inhabitants of Jerusalem (EZRA, ii. § 5 [δ], 15 [1] δ), 1 Ch. 9:11 Neh. 11:1 (αὐτοῦ ἀδελφῶν [B], αὐτοῦ ἀδελφῶν [A]). These references, however, are probably due to intentional or accidental amplification of the original genealogy, and do not refer to any actual person. Kyle, apparently takes another view; see his notes on Ezra 7:15, and Neh. 11:11.

4. Ancestor of Judith; Judith 8:1 RV, AV following אַחִיתּוֹב אַחִיתּוֹב, Achitob; so also It., Syr.; om. B. G. B. G.

AHLAB (אֲחִלָּב; אַחִלָּב [BAFL]; אֲחִלָּב); **AHLAB**. 1. e. e., אַחִלָּב (Clermont Ganneu points out the place-name Mahaleb, N. of Tyre (*Rev. Crit.* 1897, p. 503)), a Canaanite town claimed by Asher (Judg. 1:31), and referred to probably in Josh. 19:29, at the end of which verse there appears to have been originally a list of names including (by a correction of the text) Ahlab and Achbiz.¹ See HELBAH.

¹ Josh. 19:29 ends thus, אַחִלָּב וְאֲחִיבִּיז, which AV renders 'at the sea from the coast to Achbiz,' and RV 'at the sea by the

occupied by Benjamites; Ezra 2:28 (אֵיָא [BA])=Neh. 7:32 (אֵיָא [BA], אֵי [A])=Esd. 5:24 (אֵיָא and אֵיָא om.; גַּא [L]). In the time of Eusebius (OS 181, 76, Αγγαί) it was once more deserted; but its situation was still pointed out. Its name was prophetic of its history. Or had it some other name before its destruction by Joshua?

2. (אָ; without article; Γαι [Q]; Symm. ἡ Ἰαχίβ) an Ammonite city, if the text in Jer. 49:3† is correct (SBOT omits; Rothstein in Kau. HS and Co. in SBOT, after Graf, read 'Ar אָ'). T. K. C.

AIAH, more strictly Ayyah (אֵיָא, 'falcon'). 1. An Edomite tribal name (Hebrew), Gen. 36:24 (AV AIAH; ΔΙΕ ΑΙΔ, N. 1E; N precedes), ΔΙΔΙ L. 1) = 1 Ch. 1:40 (ΔΙΘ [B], ΔΙΔ [AL]). The tribe seems to have broken off from that of Zibeon, and to have been less important than that of ANAH (q.v.). To identify this insignificant Aiah with the 'goodly land' in which Se-nuhyt the Egyptian exile found a home, according to the old story (so Maspero, RP² 2:1723; PSBA 18:106 [96]) is unsafe. On the Iaa (Maspero, Aia) of the story of Se-nuhyt, see WMM AS. u. Eur. 47.

2. Father of Saul's concubine Rizpah (2S. 37, αὐλὸν φορτὴ αἰᾶ B*, αὐλὸν φορτὴ αὐλ [B], Ἰολ. A, Σαῖα L, Σαῖαρος [Jos.]; 218 ff. Aa BA, Ασαία L.). To draw a critical inference (with Mez, Der Bibel des Jos. 35 f.), from L's Σαῖα in 37 seems unwise. We must not assume that Ziba is the original reading rather than Aiah. α and γ could very easily be confounded, and from Σια to Σαῖα was but a step. The name of one of Rizpah's sons was Mephibosheth (Meribaal), and the son of Jonathan, whose steward was Ziba, was also called Mephibosheth (Meribaal). The question as to the source or sources of the passages in which RIZPAH (q.v.) is referred to, remains therefore where it was.

AIATH (אֵיָת), Is. 10:28†. See AI, 1.

AIAJA (אֵיָיָא), Neh. 11:31. See AI, 1.

AIJALON, or (Josh. 10:12 19:42; 2 Ch. 28:8†, all AV)

less correctly AJALON (אֵיָלֹן from אֵלֹן 'hart'; ΔΙΛΩΝ [BAL]).

1. A town in the Shephelah, assigned to Dan in Josh. 19:42 (אֵיָלֹן B, אֵלֹן A, אֵל. L.); but with אֵלֹן v. 43 for Eilon], and named as a Danite Levitical city in 21:24 [Eilon] (אֵלֹן [A])=1 Ch. 6:69 [54] (corrected text, see Ball *ad loc.* in Ellcott's Bible; עֵלָאָם [B], ηλῶν [A]). It is the modern Yāḏ, situated on a ridge on the south side of the broad level valley of Ajjalon, well known from Joshua's poetical speech (Josh. 10:12; αἰλῶν [L]), and now called Merj (the meadow of) Ibn 'Umar. It is about 5 m. from Lower Beth-horon, and 14 from Jerusalem. In the time of the Judges it was still in the hands of the Amorites (Judg. 1:35; apparently misread αἰ ἀρκοῖ [BAL], and translated a second time μαραίνων [B], which, however, stands for HERES in L), but was afterwards occupied by Benjamites, 1 Ch. 8:13 (αἰλαμ [B], αἰμα [A], αλων [L]); cp. 2 Ch. 11:10. The Chronicler states that Rehoboam fortified it (2 Ch. 11:10, αἰλῶν [B], αἰαλων [AL]), and that Ahaz lost it to the Philistines (2 Ch. 28:18, αἰλῶ [B]), on whose territory it bordered. In 1 S. 14:31, the occurrence of the word is doubtful. For 'to Ajjalon' Klost. and Budde (SBOT) read 'until night.' SBOT omits altogether. Some fresh references to Ajjalon are derived from Egyptian sources. For instance, Shishak (Sheshonk I.) mentions Aiyurun—i.e., Ajjalon—among the conquered cities of Judah in his Karnak list, and there is an earlier mention still in the Amarna tablets, where Aialuna appears as one of the first cities wrested from the Egyptian governors. A vivid sketch of the battle-scenes of the valley of Ajjalon will be found in GASM. HG 210-13.

2. (Judg. 12:12; and Αἰλωμ [B], Αἰεμ [AL]), a locality in Zebulun, the burial-place of ELON (q.v., ii. 1 f.).

Its name ought probably to be pointed אֵיָלֹן (Ēlōn), and etymologically connected with אֵלֹן or אֵלָא, 'oak' or 'terebinth' (see TEREBINTH, § 1), indicating a sacred spot. Cp ALLON, 2. T. K. C.

AJELETH-SHAHAR, UPON, RV 'set to Ajeleth hash-Shahar (הַשְּׁהָרִים הַיְהוּדִים, ἰσὴρ) τῆς ἀντιλήψεως τῆς ἐσθραῖος ΒΑΝΑ; Αἰ. ἰσὴρ τῆς ἐσθραῖος τῆς ἡλιμῶνις, Ps. 22, title. If we consider the tendency of the phrase, 'Upon ALAMOTH (q.v.), to get corrupted, it seems highly probable that 'Ajeleth' should rather be read 'Alamoth' (א and y confounded), while Shahar should perhaps rather be שִׁיר שִׁיר, 'a new song.' (The article prefixed to Shahar may be in the interests of an exegetical theory.) The latter corruption has very probably taken place in Ps. 57:9 (see Che. Ps. 57). A 'new song' would be a song upon a new model.

AIN (אֵין). 1. If MT may be followed, this is the name of a city in the Negeb of Judah (Josh. 15:32) assigned to Simeon (197; cp 1 Ch. 4:32). According to Josh. 21:16 it was one of the priests' cities; but the parallel list in 1 Ch. 6:59 [44] probably correctly substitutes ASHAN (q.v.) which is mentioned in Josh. 19:7 [MT SBOT] alongside of Ain as a distinct place. The name being thus removed from this list, Ain always appears in close conjunction with Rimmon, and Mühlah (HWB 20:5.v. 'Ain') suggests that the two places may have lain so close together that in course of time they joined. Hence he would account for the EN-RIMMON (עֵין רִמּוֹן; om. BNA; κ. εν ριμμων Νεστωρ. int.; κ. εν ριμμων L.) of Neh. 11:29. But if we consider the phenomena of א (see below), and the erroneous summation (if MT be adhered to) in Josh. 15:32, it becomes evident that Bennett's thorough revision of the readings in his Joshua (SBOT) is critically justified (cp ASHAN), and that the real name is EN-RIMMON¹ (q.v.).

How, indeed, could a place dedicated to the god Rimmōn (Rammān) have been without a sacred fountain?

Josh. 15:32, καὶ ριμμωθ [B], καὶ ριμμων [AL, καὶ αἰν καὶ ριμμων [L]; Josh. 19:7, αἰν κ. ριμμωθ [A], αἰν κ. ριμμων [L], but ριμμων [B]; Josh. 21:16, αἰν [L] which favours γῶν 'ASHAN' (γῶν), αἰν [AL, ραερ [L], which harmonise with MT. In 1 Ch. 4:32 (κ. ριμμων [B], κ. ηρ [L], [P. sup. 145] followed by αἰν καὶ αἰ; κ. ριμμων [L]) we should also, with Kt., read Rimmōn.

2. (אֵין), the article being included; (עֵין) πηγάς [BAL]; Yg. (contra) fontem Daphnim; Tg. Onk. as MT; for the rest see below.) A place mentioned in Nu. 34:11 to define the situation of one of the points on the ideal eastern frontier of Canaan: 'to Harbel on the east side of Ain' is the phrase. Though both AV and RV sanction this view of עֵין, it is more natural to render 'the fountain,' and to find here a reference to some noted spring. Jerome thought of the spring which rose in the famous grove of Daphne, near Antioch; in this he followed the Targums of Ps. Jon. and Jerus. which render '(the) Riblah' (רִיבְלָה) by 'Daphne,' and 'the fountain' (פְּעֵין) by 'Ainūthā. Robinson² and Conder prefer the fountain which is the source of the Orontes. Both these views rest on the assumption that Riblah on the Orontes has just been referred to, which is a pure mistake (see RIBLAH). The fountain must at any rate be not too far N. of the Lake of Gennesaret which is mentioned at the end of the verse. Most probably it is the source of the Nahr Hāshāny, one of the streams which unite to form the Jordan (see RIBLAH). From this fountain to the 'east shoulder' of the Lake of Gennesaret a straight line of water runs forming the clearest of boundaries. If, however, we place Baal-gad at Bānias, we shall then, of course, identify 'the fountain'

¹ Except of course in Josh. 21:16 (see above). In Zech. 13:10 the first half of the name is omitted (see EN-RIMMONS).

² See BR 4534. Rob.'s view (p. 393) on the Daphnis of Yg. (connecting it with the spring at Diftnei, near Tell-el-Khady) seems erroneous.

with that which springs from the famous and romantic cavern at the southern base of the Hermon mountains. It should be added that it is not impossible to alter the pointing and read אירוס (eastward) of IJON, Ijon being mentioned elsewhere as on the N. frontier of the land of Israel. But then why did the writer introduce it merely incidentally?

T. K. C.

AIRUS (ΑΙΡΙΟΥΣ [A]), 1 Esd. 5:31 AV = Ezra 2:47 REATAH, 3.

AJAH (אִיָּה), Gen. 36:24† AV = RV MAH (y. v., 1).

AJALON (אִיָּלוֹן), Josh. 19:42 AV = RV AJALON, 1.

AKAN (אִיקָן), Gen. 36:27 = 1 Ch. 1:42 AV JAKAN.

AKATAN (ΑΚΑΤΑΝ [BA]), 1 Esd. 8:38† RV = Ezra 8:12 HAKKATAN.

AKELDAMA (ΑΚΕΛΔΑΜΑΧ [B]), Acts 1:19† RV, AV ACELDAMA.

AIKOS (ΑΙΚΩΣ [B]), 1 Esd. 5:38† RV = Ezra 2:61 HAKKOS, 1.

AIKUB (אִיקוּב), 'posthumous,' but the name seems corrupt; ΑΙΚΟΥΒ [BA], AIK [L], 1. E. ΕΙΣΟΜΑΙ, six generations removed from Zerubbabel; 1 Ch. 3:24 (αἰκουβ [B], ακουβ [A], ακου [L]).

2. The fine Aikub, a group of doorkeepers in the great post-exilic list (see EZRA, ii. § 6†; Ezra 2:45 (αἰκουβ [BA], ακου [L]) = Neh. 7:25 (αἰκουβ [BA], αἰκουβ [L]) = 1 Esd. 5:38 (ΑΙΚΟΥΒ; RV ACUDA; αἰκουβ [A], ΑΙΚΟΥΒ [B]). Aikub is a pointer in the list of inhabitants of Jerusalem (see EZRA, ii. § 6 § 8 [1 Esd. 5:38, 39] = Neh. 11:20 (αἰκουβ [B]) = Neh. 12:25 (αἰκουβ [B]) = 1 Esd. 9:25 (where, however, the name is omitted between Shelumai and Terebith). He is mentioned also in Neh. 12:25 (αἰκουβ [B] = 1 Esd. 9:25; see B⁹ A).

3. An expounder of the Law (see EZRA, ii. § 13 [L]; cp i. § 8, ii. § 8 § 10 [L], 15 [L]). Neh. 8:7 (αἰκουβ [L], om. B⁹) = 1 Esd. 9:48 (EV, ΑΙΚΟΥΒ; αἰκουβ [A], αἰκουβ [L]).

4. The fine Aikub, a family of NETHINIM (y. v.) in the great post-exilic list (see EZRA, ii. § 9, Ezra 2:45 (αἰκουβ [B]) = Neh. 7:25 (αἰκουβ [A], αἰκουβ [B]) = 1 Esd. 5:38 (ΑΙΚΟΥΒ [BA]; AV ACUA; RV AIKUB).

AKRABATTINE, RV; AV incorrectly ARABATTINE 1 Macc. 5:3†, Jos. Ant. xii. 8†; ΑΚΡΑΒΑΤΤΙΝΗ [NA]; -ΑΤΤΑΝΗ [N^a V]; AKRABATTINE [Cod. Am.]; אַקְרַבַּתִּינָה, cp Judith 7 18, below), a district where Judas the Maccabee fought against the Edomites, situated 'in Idumæa' [NV Jos.] or 'in Judæa' [A]. The district intended is no doubt that to the SE. of Judæa, in Idumæa (see AKRABBIM). There is no sufficient ground for the opinion of Ewald that the Edomites had settled as far N. as another Akrabatta, a toparchy or district in Central Palestine, to the N. of Judæa (Akrabatta, ακραβητα, etc. [Jos. BJ iii. 3 § 5; Pl. HN v. 14 iv. 9 § 4]; ακραβητειν [Eus. OS² 2146†]), apparently represented by the modern 'Akrabeh, 8 m. SE. of Nāblūs. (The reading ἐν Ἰουδαίᾳ in 1 Macc. must therefore be rejected.) See Schür. Hist. 1220 n. 2, 3 158.

Doubtless, however, we should identify with 'Akrabeh the ΕΚΡΑΒΕΛ (εργρηβηλ), ΕΚΡΕΒΗΛ [A]; אַקְרַבַּתִּינָה, near Chusi, on the Brook Mochmur (Judith 7:18†), the names being almost the same in the Syr. (= Talm. אַקְרַבַּתִּינָה).

T. K. C.

AKRABBIM, Ascent of, so always in RV; also Nu. 34:4 in AV, which has in Judg. 1:36 'going up to Akrabim,' in Josh. 15:3† mg. '... to ACRABBIM,' text MAALAH-ACRABBIM (מַעְלֵה עַקְרַבִּים), i. e., 'ascent of Scorpions,' [ΠΡΟΣ]ΑΝΑΒΑΘΙΣ² ΑΚΡΑΒΕΙΝ [BAL]; ascentus scorpionum), mentioned in Josh. 15:3 (ΑΚΡΑΒΒΕΙΜ [sup. ras. A¹ vid.], ΕΚΡΑΒΕΙΝ [L]) as one of the localities marking the southern frontier of Judah.

It must have been one of the passes leading up from the southern continuation of the Ghôr into the waste mountain country to the west. Knobel identifies it

1 Cp ΒΑΚΥΚ.

2 εναυω for αρω ηνω αναβασις in Judg. 1:36 [AL; Lag. points ἐν εναυω].

with the pass of es-Safā, leading up towards Hebron out of the W. el-Fikreh on the road from Petra. Robinson (B⁹ 2180 f.) describes this pass as being 'as steep as a man can readily climb.' 'The rock is in general porous and rough, but yet in many spots smooth and dangerous for animals. In such places a path has been hewn in the rock in former days; the slant of the rock being sometimes levelled, and sometimes overcome by steps cut in it. The vestiges of this road are more frequent near the top. The appearance is that of a very ancient pass' (B⁹ 2291). Robinson, however, identifies this Nakb es-Safā with Zephath or Hormah, and not with Akrabim (see also HALAK, MOUNT). Scorpions are of frequent occurrence throughout this neighbourhood.

AKUD (ΑΚΟΥΔ [B]), 1 Esd. 5:30 RV = Ezra 2:45 AKKUB, 4.

ALABASTER (ΑΛΑΒΑΣΤΡΟΝ [accus. Ti WH] Mk. 14:3, also with art., ΤΗΝ Δ. [W & H after B⁹], ΤΟΝ Δ. [Ti. after N^a A], ΤΟ Δ. [Tr after G, etc.; also F in Lk. 7:37]; cp Ο ΑΛΑ. [B], ΤΟ ΑΛΑ. [A] 2 K. 21:13 [for πηλός 'dish,' 'cup'] was found in large quantities in Mesopotamia, and from it are made the huge bulls which are to be seen in the British Museum and in the Louvre. The alabaster of the ancients was a stalagmitic carbonate of lime hence called by mineralogists 'Oriental alabaster' to distinguish it from the modern alabaster, which is the sulphate of lime. See EB⁹, s.v. ALABASTER. In Greek the word ἀλάβαστρος or ἀλβάστρος is frequently used of vases or vessels made to hold unguents, as these were generally fashioned out of this material, which was thought by many (cp e.g., Pl. HN xiii. 3) to preserve the aroma of the ointment: Theocritus (Id. 15 114) is able to speak of 'golden alabasters.' Many alabaster vases have been found in Egypt, and the specialised sense given to πηλός in the Egyptian Greek version of Kings (see above) is natural enough. The town of Alabastro, near the famous quarries of Hat-nub¹ (cp Erman, Anc. Eg. 470, n. 3), was well known for the manufacture of such articles (in fact it seems to have derived its name from the material).² Many of these go back to nearly 4000 B.C. and often show fine workmanship. Similar articles have been found in Assyria dating from the time of Sargon (8th cent. B.C.).

Such a vessel was the 'alabaster cruse' which was emptied upon Jesus's head by the woman at the house of Simon the Leper at Bethany (Mt. 26:7 = Mk. 14:3 Lk. 7:37†). The expression 'brake' in Mark does not refer, it would seem, to the breaking of a seal or of the neck of the vessel; the object was to prevent profanation of the vessel by subsequent use for any commoner purpose (cp Comm., ad loc.).

ALAMETH (עֲלֵמֶת), 1 Ch. 7:8 AV, RV ALEMETH.

ALAMMELECH, RV ALLAMMELECH (אֲלַמְמֶלֶךְ [Bā.], אֲלַמְמֶלֶךְ [Gi.], אֲלַמְמֶלֶךְ [v. d. Hooght]; ελεμμελεχ [B], ελεμλεχ [L; om. A]), a place in Asher on the border of Zebulun (Josh. 19:26†), the name of which is possibly echoed in that of the Wady el-melech, which drains the plain of the Buttaf (Asochis), and joins the Nahr el-Mukattā' (Kishon). So Di., Buhl. The pointing of the Heb. is peculiar: אֲלַמְמֶלֶךְ is usually explained as if אֲלַמְמֶלֶךְ, 'sacred tree of Melech'; but n can hardly have been assimilated to m, nor is this the best reading. Possibly the real name was אֲלַמְמֶלֶךְ (אֲלַמְמֶלֶךְ), El Melech; cp El Paran. The authors of the points may have wished to avoid confusion with the personal name Elimelech. Or the name might be a corruption of ēlamāk (see ALMUG TREES), if Solomon was able to naturalise this tree.

T. K. C.

¹ Near Tell el-'Amāra (see PSBA 1674 [194]).
² The reverse supposition is sometimes held, viz. that the material is derived from the place-name. The ultimate origin of the word is unknown.

ALAMOTH, UPON (עַל־עֲלֹמֹת), a technical musical phrase of uncertain meaning; cp MUSIC, § 6.

(a) Ps. 46 title (1) (עַל־עֲלֹמֹת קְרֹפְיִים [BARK] אֲשֶׁר־עַל־יָם; om. A; אֲשֶׁר־עַל־הַיַּם אֲשֶׁר־עַל־יָם אֲשֶׁר־עַל־יָם; Symm. עַל־עֲלֹמֹת אֲשֶׁר־עַל־יָם); (b) Ch. 15:90 (עַל־עֲלֹמֹת [B], . . . אֲשֶׁר־[R], . . . אֲשֶׁר־[A], עַל־עֲלֹמֹת קְרֹפְיִים [L]; two anonymous GK versions have עַל־עֲלֹמֹת אֲשֶׁר־עַל־יָם [L] and עַל־עֲלֹמֹת אֲשֶׁר־עַל־יָם [L]); (c) Ps. 9 title (1) (עַל־עֲלֹמֹת קְרֹפְיִים [BARK]; אֲשֶׁר־עַל־יָם אֲשֶׁר־עַל־יָם; Symm. עַל־עֲלֹמֹת אֲשֶׁר־עַל־יָם אֲשֶׁר־עַל־יָם; Th. Quint. עַל־עֲלֹמֹת קְרֹפְיִים; Sept. עַל־עֲלֹמֹת קְרֹפְיִים); (d) in Ps. 48:14 (13) (עַל־עֲלֹמֹת אֲשֶׁר־עַל־יָם; apparently E; [B] om. A; אֲשֶׁר־עַל־יָם אֲשֶׁר־עַל־יָם; Symm. עַל־עֲלֹמֹת אֲשֶׁר־עַל־יָם); it appears in the corrupt form אֲשֶׁר־עַל־יָם, which Tg. takes to be אֲשֶׁר־עַל־יָם 'youth' (C).

Thus we find it three times forming part of a heading of a psalm (for עַל־יָם in d should be restored as עַל־יָם) from its present position to the heading of Ps. 49, on the analogy of Ps. 46). Of the two half-translations of AV and RV respectively ('upon Alamoth', 'set to Alamoth'), the former presupposes that the phrase denotes the particular instrumental accompaniment; the latter, that Alamoth is the name of a tune. Most moderns explain 'for sopranos', 'Alamoth having the constant meaning 'maidens.' Whether soprano voices would be suitable for Ps. 46, the musical reader may judge. Grätz and Wellhausen suppose a reference to some *Elamite* instrument. There is, however, a more probable solution. See PSALMS, and cp MUTHLAGGEN, MAHALATH, NEHILOTH, and AHELETH-SHAHAR.

ALCIMUS (ΔΑΚΙΜΟΣ [AN], occasional forms ἸΝ, -ΕΙΜ, -ΧΙ, [A], -ΙΜ, [B]); in several cursive MSS of 1 and 2 Macc., and in Jos., in *Ant.* xii. 97 with add. [ΚΑΙ Ε Ο Κ, [I]Ω]ΑΚ[Ε]ΙΜΩC; in *Ant.* xx. 103, and one cursive at 1 Macc. 7:4 simply [I]Ω]ΑΚ[Ε]ΙΜΩC; i.e., אֱלִיכִים or יהויאכִים, for which he adopted the like-sounding Greek name by which he is known; cp NAMES, § 86), a priest 'of the race of Aaron'¹ (*Ant.* x. 103, admitted by the inimical² writer of 1 Macc.; 'of the seed of Aaron,'³ 7:14), i.e., a Zadokite, though not of the family of Onias ('not of this house,'⁴ *Ant.* x. 103).

(*Ant.* xii. 97, indeed equates 'another house' (ἑτέρου οἴκου) with 'not of the stock of the high priests [at all]' (οὐκ ἄντι τῆς τοῦ ἀρχιερέων γενέσεως); but the source here followed by Jos. is on other grounds apparently inferior, and we may conclude that Alcimus was really more eligible⁵ to the high priest's office than his enemies the house of Hasmon, who were ordinary priests.

When, therefore, the victorious king of Syria, DEMETRIUS I. (q.v., 1) determined (1 Macc. 7:9) to support his claim to the high priest's office (v. 5) with force, Alcimus was accepted, not only by the Hellenising party but also (v. 13) largely by the legitimist party, the Assideans (q.v.).

The treaty (1 Macc. 6:9) of Lysias (and the youthful Antiochus V. Eupator) in 162 B.C., which satisfied the aims of the Assideans and made it unnecessary for them further to identify themselves with the 'friends of Judas' (1 Macc. 9:26; cp 28), had been immediately followed, if we may trust *Ant.* xii. 97, by the execution of the now 'impossible' high priest MENELAUS (q.v., 1 Macc., our most important source, not having mentioned Menelaus at all, says nothing of what took place between his tenure of office and the effective appointment (ἑστρέφωσ ἀνδρῶν τ. ἱερωσύνης, 7:9; cp 2 Macc. 14:13 καταστρέφωσ) of Alcimus by Demetrius). According to the same passage in Jos., which states also that a young Onias, son of Onias III., made his way to Egypt on the death of his father (on which, however, see ONIAS, ISRAEL, § 69), Alcimus became (γένετο) high priest on (ὑπὲρ) the death of Menelaus, the office being indeed bestowed (δίδωσκ) on him by the king (Antiochus V., according to the present context). According to 2 Macc. 14:3, too, Alcimus had been at some time high priest before his appointment by Demetrius. We know really nothing certain about the events of this short interval. We first reach firm ground with the intervention of Demetrius.

Demetrius did not mean to resume the hopeless policy of his uncle Epiphanes (or the Assideans would have

held aloof); but he wanted Alcimus and his friends to help him in crippling the Hasmonean party of political independence.

There would be a special reason for Alcimus being active against the Hasmoneans: if he was allowed success he himself (what we now know) that their ultimate goal must be the high priesthood. (On the other hand the 'calumny' [v. 27] put into his mouth by the author of 2 Macc. 14:4 (that Isidore had already been made high priest seems historically impossible; it is due only to the distorted story of 2 Macc., see next note.)

Bacchides (q.v.) was the agent selected for the task.¹ At first the presence of Alcimus was a great help; his legitimacy was a source of strength.

This would have special weight if his predecessor Menelaus is really to be regarded, with 2 Macc. (84+42) as a 'Benjaminite,' and with Wellhausen (*IJG* 200, n. 1, 2nd ed. 235, n. 1) as one of the Tobidae (see, however, LUCIUS, *Der Essenzismus* 77, and cp ISRAEL, § 69). If we could trust the Talmud there would be a special point in his favour in his connection with Jose b. Jozer, leader of the Sanhedrin (his uncle, *Ber. Rabba*, ch. 65; his father, *Bab. Bathra*, 133 a).

The mass of the people seem to have followed the Assideans in accepting Alcimus (1 Macc. 7:13 'first'; cp *We. Phar. u. Sad.* 84, n. 2); but the severity of the measures taken by the representatives of Demetrius,² sixty men (perhaps those that had been till now much implicated with the Hasmonean party)³ being slain in one day (1 Macc. 7:16), in face of solemn pledges of peaceable intentions, entirely changed the situation. Fear and dread fell on all the people (1 Macc. 7:18). After some further severities Bacchides considered his task accomplished and returned to Antioch. The late severities, however, had turned the heart of the people again to Judas, who was trying to strengthen his position (1 Macc. 7:24), and Alcimus judged it prudent to withdraw (*Ant.* xi. 25). He had of course no difficulty in bringing forth other incriminating charges against Judas (*ibid.* and *Ant.* xii. 103). This time NICANOR (q.v.) was entrusted with the task of restoring Alcimus. During the various exciting incidents of the next interval,—the diplomacy, battles, and death of Nicanor,—we hear nothing of Alcimus⁴ (1 Macc. 7:26-50).

Of course in the rejoicings over Nicanor's day and the recovery of the Maccabean party he had no part; perhaps he was absent. (It is at this point, indeed, that *Ant.* xii. 106 makes Alcimus die⁵ but this belongs to the story there followed of Judas's succeeding to the high-priesthood, on which see MACCABEES, i. § 4 and cp below.)

When Bacchides came a second time (1 Macc. 9:1) to carry through what Nicanor had been unable to accomplish, Judas failed to find adequate support and fell (160 B.C.), and the Maccabean party were without a leader. Alcimus was once more installed, and probably accepted by all except the Maccabees, who ere long chose Jonathan as successor to his brother.

How far the Hellenistic tendencies of Alcimus carried him we do not know. At his death (159 B.C.⁶) he seems to have been engaged on some changes in the temple enclosure, the nature and even the object of which we do not know with any certainty.

According to Josephus he had 'formed the intention of pulling down the wall of the temple' (ἐπιπέμψεν σκοπέωσιν τὸν τοῦ ἱεροῦ ἕξω τὴν ἐκκλῆσιαν, 1 Macc. xii. 106 b.). 1 Macc. states (9:5) that it was the wall of the inner court of the temple (τὸ τ. τῆς εὐχῆς τὸν ἕξω τὴν ἐσωτέρας) that he commanded (ἐπέταξεν) to pull down, adds that he pulled down the works (τὰ ἔργα) of the prophets, and then appends the peculiar statement that he began the pulling

¹ So 1 Macc. 7:1; on the distorted account in 2 Macc., where 14:2 has to do duty for both 1 Macc. 7:8 and 7:26, see KOSTERS, *Th. T. 12:533-535*, and on the displacement of Bacchides to 2 Macc. 8:30, *ib.* 504 f. (cp the place of Bacchides in Jos. *B. J.* 1:2).

² How far these transactions are to be attributed directly to Alcimus (so apparently 1 Macc. 7:14 ff. 23), and how far they were due to Bacchides (so apparently *Ant.* xii. 102; cp 1 Macc. 7:19) we cannot say.

³ His uncle being, according to *Ber. Rabba* and *Baba Bathra* (*l.c.*), of the number.

⁴ On the motive of the author of 2 Macc. in representing Nicanor as untrue to his master (2 Macc. 14:28-35) and thus bringing Alcimus again on the scene (v. 26) see KOSTERS, p. 535.

⁵ And when he was dead the people bestowed the high-priesthood on Judas, who, hearing of the power of the Romans, etc. (= 1 Macc. 8).

⁶ Josephus assigns him variously three years (*Ant.* x. 103) or four years (*ib.* xii. 106) of office.

down. It seems rash to assume that this confused account is in its original form. If the last clause is not an interpolation (and there is cursive MS authority for its omission, see H & P), and even perhaps if it is, should we not perhaps read 'to pull for the pulled (עשהוהוה for עשהוהוה)?'

The much discussed question what the wall (τείχος) referred to was, we have really not the means of determining. Its identification with a low barrier in the Herodian temple beyond which Gentiles must not pass, the *שורג* (שורג) described in *Middoth* 2:3 is at the best precarious! (see the remarks of Schürer, *GV* 1:176, n. 5, and the discussions there referred to).

The somewhat sudden death of Alcimus (1 Macc. 9:55 f.; cp however, *Ant.* xii, 10, σφαγῆς ἡμεῶν) was naturally treated by his enemies as a sign of divine displeasure. The moderation (such as it is) of the writer of 1 Macc. was not at all to the taste of the later rabbis (see the stories in Hamburger, *RE* 428 f., Derenbourg, *Hist. Pal.* 52, n. 2). That on the whole, however, Alcimus did not interfere much with ritual and practice is plain, or at least probable, from this last act being all that is mentioned against him, and even in this case we do not know his motive (cp Grimm *ad loc.*, and We. 216, *IIG* (2) 262). Still, if he has been rather severely judged, even for the evidence supplied by the opposite party, Wellhausen (*l.c.*) seems to go to the other extreme.

The historical importance of this, perhaps in himself somewhat insignificant character (who figures all the more strikingly on the scene that we cannot find very clear traces of any immediate predecessor or successor²), lies in the fact that his tenure of office formed a turning-point in the development of Jewish parties.³ The Assideans refused to follow the Hasmonaens. Two generations later, the meaning of this became more apparent (see ASSIDEANS, PHARISEES, ESSENES).

The primary source is 1 Macc. 7:9. Cp Jos. *Ant.* xii, 97-112, xx, 10, 3, and on the relation of these see MACCABEES, FIRST, I, § 9; on the relative value of a Macc. 14 see the elaborate article of Koster, 'De polemieek van het tweede boek der Maccabeen,' *Ph. A.* 12:401-552 (75), especially associated also; on parties, We. *Phar. u. Sad.* § 8, 76 ff. LAUSUS *loc.*; on later Jewish sentiment concerning Alcimus, Hamburger, *RE* 428 f.; on שורג, etc. Schürer, *GV* 1:6, n. 5, and Grätz in *Meq. Taan.*, 1976, pp. 285-297; on festival of 23rd Marchesvan in *Meq. Taan.*, Derenbourg, *l.c.*, and Grätz, *l.c.* § 34, 894 ff. n. w. 41.

ALCOVE (אֲלוֹכָה), Nu. 25:8 RV mg., AV TENT (*g.v.*).

ALEMA (עַן אֲלֵמֹהִים 'A', -אֵלֵמ, 'N'), אֲלֵימָה. Nu. 21:3, V. SYR. ܐܠܡܝܗ, in *Alimisi*, a place mentioned along with Bosora, Carnaim, etc. (1 Macc. 5:26). Being in Gilead it cannot be, as some say, the Beer-elim spoken of in Is. 15:8 as belonging to Moab, and the Beer of Nu. 21:16 (see BOSOR). It has been placed by Merrill at Alma, S. of Edrei, and by Schumacher at Kefr el-Mā, E. of Lake of Galilee; but it is probably 'Imi, 10 m. SW. of the Lejā, and of Busr el-Hariri, which is probably Bosor. (Cp *Buhl Topog. des N. Ostjordanlandes* 13; We. *IIG* 212 [3rd ed. 257] n.). G. A. S.

ALEMETH or **ALLEMETH** (אֲלֵמֶת); so everywhere [Bib.], except 1 Ch. 7:2 'in pause' אֲלֵמֶת. ALAMETH, ΓΑΜΕΘ B. ΕΑΜΕΘΕΩ V.; ordinary old. have אֲלֵמֶת, whence RV ALLEMETH in 1 Ch. 6:6 [45] = Josh. 21:18, where the form is ALMON, אֲלֵמֹן, ΓΑΜΑΛΑ B. ΔΛΩΜΟΝ A.; ΕΛΜ. I.; usually ΓΑΛΕΜΘ B. A., ΔΛΑΜΩΘ [L], a Levitical town in Benjamin (1 Ch. 6:6 [45], ΓΑΛΗΜΘ [A]), the name of which appears in 1 Ch. 8:36 (ΑΛΑΙΜΑΘ [B], ΓΑΛΕΜ. [A], ΔΛΕΦ [L]) = 9:42f. (ΓΑΛΕΜΘ [B], ΔΛΕΦ. I.) that of a descendant, or family of BENJAMIN (§ 9, ii, β). See also ZALMON,

¹ The seventeenth of the thirty-five festivals prescribed in *Meq. Taan.*—עֲשׂוּתָא. ² Maccabees—based by some, e.g., Grätz, been brought into connection with the *שורג* and Alcimus. This is however contested, e.g., by Derenbourg, *Hist. Pal.* 60 f. (see text of *Meq. Taan.*, ii, 442 ff.).

³ Josephus, ignoring his previous irreconcilable statement in xii, 106, already quoted above, expressly says (*Ant.* xii, 10) that on the death of Alcimus the office of high priest was vacant for seven years.

⁴ Cp We. *Phar. u. Sad.* § 8, v.; Lucius *Der Essenienus*, etc. 75 ff. [81], with Schürer's review (*TLZ* [81], especially col. 494).

ii. (end), ELAM, ii. 1. Robinson's identification (*LBR*) with the modern 'Almit, 1 m. NE. from 'Anāka (Anathoth), is generally accepted.

ALEXANDER (Ἀλεξανδρος [ANV], 'helper of men'). 1. Alexander III., king of Macedonia (336-323 B.C.), surnamed the Great. The victories of Alexander powerfully impressed the Jewish imagination; yet the only biblical passages in which he is mentioned by name are 1 Macc. 1:1-8 62. The writer of Daniel (166 or 164 B.C.) recalls a 'mighty king' ruling 'with great dominion,' whose kingdom is 'broken' after his death (Dan. 11:3 f.). In the vision of chap. 7, it is the fourth of a series of 'beasts'; it is 'dreadful and terrible,' and 'devoured and brake in pieces, and stamped' the rest. Naturally, it was the destructive side of Alexander's work that impressed the imagination; the fall of Tyre and Gaza would bring that aspect into prominence. His Palestinian conquests are thought to be alluded to in *Zech.* 9:1-8 (see ZECHARIAH, BOOK OF); and in Is. 25 f., the fate of Tyre may be contrasted tacitly with that of Jerusalem (see ISAIAH, ii, § 13). It is during the seven months' siege of Tyre that Jewish history comes into connection with Alexander (333-332 B.C.). The tradition is given by Jos. *Ant.* xi, 83 ff. (cp *Yoma*, 69a).

The Jews refused compliance with Alexander's requisitions. After the two months' siege of Gaza he advanced on Jerusalem; but Jaddua (Jaddus), the high priest (cp Neh. 12:12), warned by a dream how to avert his anger, met the conqueror at Scopus. Alexander worshipped the Name on the high priest's mitre, and entering Jerusalem sacrificed in the Temple, heard Daniel's prophecies relating to himself, and gave the Jews autonomy, not only in Jerusalem but also in Babylon.

As to all this other writers preserve absolute silence, and the story in Josephus seems inconsistent with the statement in Arr. iii, 1, that in seven days from Gaza Alexander was at Pelusium in Egypt. Yet Just. xi, 10 says that 'many kings wearing fillets met him'; and Curt. iv, 517, that he visited some who refused to submit. Jewish soldiers were certainly in his armies, even on his most distant expeditions; and in Alexandria, founded immediately after the supposed visit, the Jewish element was large. The privileges conferred on the Jews are a feature of subsequent history. It is possible that Alexander derived from the Jews much valuable information about the interior of Asia (Mahaffy, *Greek Life*, chap. 20). Whether true or false, the episode strikes a true note in Alexander's character. Nevertheless, it raises suspicion to find the story appropriated by the Samaritans. Still more, to remember the visit to Gordium before the battle of Issus, and that to the oracle of Ammon before the Persian expedition. Finally, the king's action at Babylon is a curious parallel (Arr. iii, 16). He there rebuilt the shrines destroyed by Xerxes, especially that of Belus—*ῥῆς ἄλλα και τῷ Βήλω καθά ἐκεῖνοι ἐξηγοῦντο ἕτερον*.

The Jerusalem episode must be characterised as an attempt to secure Jerusalem a place in the cycle of Alexander-legends, on the model of the visit to the Egyptian Ammon. (Cp H. Bois, *Rev. de théol. et phil.*, Lausanne, 1891; Henrichsen, *St. Kr.*, 1871.) w. j. w.

2. Alexander Balas, a man of low origin, who passed himself off as the son of Alexander Epiphanes (cp 1 Macc. 10:1, 'Α. ο τοῦ Ἀρριόχοιο ὁ Ἐπιφανῆς' ANV, see MACCABEES, FIRST BOOK OF, § 2); 'Ἀλέξανδρος [A] in v. 58. His real name was Balas (so Strabo [p. 751], τὸν Βάλαν Ἀλέξανδρον; Jos. [*Ant.* xiii, 48], on the other hand, 'Α. ὁ Βάλαν λεγόμενος), which may possibly be connected with אֲבָטָא, 'Lord.' The additional name 'Alexander' seems to have been given him by Attalus II. of Pergamum, who was one of the first to support him against DEMETRIUS. In rivalry with the latter Balas exerted himself to secure an alliance with JONATHAN (1 Macc. 10:1 ff.), and by conferring upon him the title of 'high priest of the nation and friend of the king,' was successful (v. 20). After a varying career he was compelled to flee to Arabia,

ΛΑΘΑΙΝ [A] 2. 47†; apparently the same as BETH-DIBLATHAIM (p. 7).

ALMOND, ALMOND TREE, ALMOND BLOSSOM

(779)¹ ΚΑΡΥΟΝ [ADL.] Gen. 43 11, Num. 17 9 [23] ΚΑΡΟΙΑ [B]; ΔΑΜΥΓΔΑΛΟΝ [BNAC] Ecclus. 12 5; as an adjective ΚΑΡΥΙΝΗΝ [B] and practically ΝΑ]. Jer. 1 1†; 779² = 'made like almond blossoms,' ΕΚΤΕΤΥ-ΠΩΜΕΝΟΙ ΚΑΡΥΙΚΟΥΣ [BAFL.] Ex. 25 18 f.: ΚΑΡΥ-ΩΤΑ [BAL] 37 19 f.). The Hebrew root means to 'wake' or 'watch'; and the tree is said to be so named because it is the first to awake from the sleep of winter.² The etymology is alluded to in Jer. 1 1 f.

The almond is referred to in the story of Jacob, who (Gen. 43 11, J) instructs his sons to take with them into Egypt a present of the fruits of Palestine including almonds. The verisimilitude of this detail cannot be questioned. It was natural for a Hebrew to presume that Palestinian almonds would be prized in Egypt, nor need we trouble ourselves as to the exact date of the acclimatisation of the almond tree on the banks of the Nile.³

The original native country of the almond (*Prunus Amygdalus*, Stokes) was W. Asia, from which it has gradually spread, in the main probably by human intervention, throughout the Mediterranean region. Almonds are still an important article of commerce in the Persian Gulf, nor is there anything improbable in their being exported from Syria into Egypt in early or even in more recent times. No ancient writer, according to Celsius (*Hierob.* 1 298), mentions them as grown in Egypt.

The 'cups made like almond blossoms' on the branches of the golden candlestick, consisting each of 'a knop' or knob 'and a flower' (Ex. 25 33 f. 37 19 f.) represented, says Dillm. (*ad loc.*), 'not the corolla but the calyx of the almond flower.' Some have proposed to translate אֲשֵׁרֶתֶת 'awakened' *i.e.*, fully opened (as opposed to closed buds); but this is certainly untenable. In Jer. 1 11 an almond staff seen by the prophet becomes, from the associations of its name, a symbol of Yahweh's watchfulness. The most interesting reference is in the difficult passage Ecclus. 12 5. There are three clauses in the verse, and in each unfortunately there is some obscurity. It is the first, rendered by AV, 'The almond tree shall flourish, [RV blossom,] which now concerns us. As regards this, it has been doubted, (1) whether אֲשֵׁרֶתֶת by itself can mean the almond tree; (2) whether the pinkish-white blossoms are a likely metaphor (according to the ordinary view) for an old man's white hairs; and (3) what is the meaning of the verb (אֲשֵׁרֶתֶת). The consonants of the Heb. text support the meaning 'he will reject the almond,' *i.e.*, will be unable to eat it, though a delicacy; but the vowel-points and all the ancient versions have the same rendering as EV. This seems on the whole more probable. Though Jer. 1 11 is not sufficient to prove that אֲשֵׁרֶתֶת can mean the tree, the equivalent form in Syriac, *šegdā*, appears to have this sense. The metaphor is possible if we remember that the flowers come out as a pale flash on the dark leafless branches; if the metaphor is to be pressed closer, the flowers are, as Koch describes them, 'white or of a pale red.'⁴

(2) See HAZEL.

N. M.—W. T. T.-D.

ALMS. The English word is derived through

1. Terms. A.S. form 'ælmæsse' from the eccl. Lat. *elemosyna*, which again is borrowed from

¹ Syriac has the same word in the form *šegdā*; and the Arabic for almond is *lauz*—Hebrew לָאֵז (see HAZEL).

² *Isag. C'hebrae.* 45. Cp Plin. 16 25 (quoted by Celsius): 'Ex his que hieme aquila exoriente concipiunt, flosa prima omnium amygdala mense Januario; Martio vero pomum maturat.'

³ Cp Maspero, *Revue* of 1897, 27.

⁴ Prof. Cheyne informs us that the wild almond, now rare, was noticed in a glaise of Hermon by Robertson Smith, who found its blossoms distinctly white. Tristram speaks of many wild almond trees on Mt. Carmel (*NHB* 332).

the Greek *ἑλεμωσίνη*. The Greek word, which is exceedingly rare in classical authors, means *pity*, and in the Greek of the NT (Lk. 11 41; 12 33; Acts 3 2 f. 10 9 26 10 4 31) signifies also a special result of pity—*viz.*, relief given in money or kind to the poor. In biblical Hebrew there is no corresponding word, and it is not even quite certain that the technical and restricted use of the word *ἑλεμωσίνη* occurs in G. No doubt in such passages as Ecclus. 7 10 and Tob. 4 7 128-11, the author or translator has almsgiving chiefly or even exclusively in view. Still *κατὴν ἑλεμωσίνην* does not in itself mean more than *κατὰ ἔλεος*, 'to do that which is merciful or kindly.' On the other hand, the NT use of 'to give *ἑλεμωσίνας*,' etc., is quite decisive for the specialised sense of the word.

The close connection between religion and deeds of mercy frequently appears in ancient religion. The

2. OT estimate. Bedouin Arabs, maintaining therein a primeval usage, regard the wayfarer as 'the guest of Allāh,' to whom hospitality is due (Doughty, *Ar. Des.* 1 228). The sacrificial meal often included an act of charity to the poor. Thus the poor were allowed to take handfuls from the meal-offering made to the Arab god, al-'Okaisir (WRS *Rel. Sem.* (2) 223), and the same use of sacrifice was familiar to the Greeks (see, e.g., Xen. *Anab.* v. 39). Indeed the general law of sacrificial feasts was open-handed hospitality in which the poor shared.

The OT, however, carries this beneficent tendency farther than any other ancient religion. It made systematic provision for the poor, and institutions of this kind can be traced throughout the religious history of Israel, from the eighth century onwards. Indeed it is significant that in the OT scarcely a trace of beggars and begging in the strict sense is to be found (see, however, 1 S. 2 36 Ps. 109 10). In the 'Book of the Covenant' (see EXODUS, II, § 3), Ex. 23 10 f., the Hebrew landowner is directed to leave his land fallow each seventh year 'that the poor of thy people may eat.' The merciful spirit of the Deuteronomist is conspicuous in the stress he lays on the care for the poor. Every third year the owner was to bring forth a tenth from his granaries and bestow it exclusively on the poor, including the Levites (Dt. 14 28 f.). According to a custom still preserved in Palestine, every Israelite was free to pick and eat grapes from his neighbour's vineyard, or to pluck ears from the cornfield, as he passed along (Dt. 23 24 f. [25 f.]). Out of consideration for the poor, the owner must not, in a grasping spirit, glean to the uttermost his cornfield, vineyard, or oliveyard (Dt. 24 19-22). The earliest part of the Priestly Code, *viz.*, the 'Law of Holiness' (see LEVITICUS), reflects the same precept (Lev. 19 9 f. 23 22); besides this, in Deuteronomy and generally in the later writers of the OT, private and voluntary almsgiving is especially commended. On the whole it may be said that the prophets plead the rights of the poor as their advocates, while in Deuteronomy and in post-exilic literature, the needy Israelite is commended to the charity of his brethren. See, among passages too numerous to quote, Is. 58 7 (a very late passage) Prov. 14 21 19 17 Ps. 112 9 Job 29 12 f. One reference to almsgiving—*viz.* Dan. 1 27 [24]—deserves special notice. Probably the force of the Aramaic words is 'redeem' or 'make good thine iniquities . . . by showing mercy to the poor,' and if this interpretation of *קָנָה* be correct, we have here a clear indication of the later Jewish doctrine that alms had a redemptive or atoning power.

In the OT Apocrypha and in Rabbinical literature almsgiving assumes a new and excessive prominence.

3. Apocrypha and Rabbin. So much was this the case that *קָנָה*, which in the older writings means 'righteousness' in general, came to

be used for almsgiving in particular, and this use of the word has been naturalised in the Arab. *ṣadaqat*¹⁰⁰ 'alms for God' (*Kor. Sur.* 9 104, etc.;

Doughty, *Ar. Des.* 1.446), and the Syr. *sedk'atha* (Pesh. Lk. 11.41, etc.).

The following citations furnish examples of the propitiatory virtue ascribed to alms in later Judaism: 'Shut up mercy (ἀνευσθίω, perh. 'alms' in thy treasures, and it shall deliver thee from all affliction' (Ecclesi. 29.12); 'Mercy' (or 'alms') 'delivereth from death' (Tob. 4.10); 'Through alms a man partakes of eternal life' (*Rosh hashshana* 3); 'He who says, I give this piece of money as alms, that I or my sons may inherit eternal life, is a perfectly righteous man' (Pesachim, 5; Reff. from Weber, *Altsynag. Theol.* 276 f.); 'Almsdeeds are more meritorious than all sacrifices' (San. 43 b); 'As sin-offering makes atonement for Israel, so alms for the Gentiles' (*Baba Bath.* 10 b; Reff. from Levy, *NHIB*, s.v. 777).

Alms were systematically collected in the synagogue of the Diaspora for poor Jews in Palestine (this custom is mentioned by Jerome as existing in his time), and also every week for the poor of the synagogue itself. Officers were appointed to make the collection, and boxes for the reception of alms also were placed in the synagogues (Vitring, *Syn. Vet.* iii. 113). In Mk. 12.41 f., however, the reference is not to alms-chests but to one of thirteen trumpet-shaped boxes, placed in the court of the women to receive contributions towards the expenses of the temple worship (Schr. *GF* 2.209).

Jesus, then, did not need to awaken zeal for almsgiving among his countrymen: it was there already;

4. NT. it, since in the NT we meet with persons who were, in consequence of bodily infirmity, beggars by profession (Mk. 10.46 Lk. 18.35 Jn. 9. f., and note the technical term *πρωστῆρις*). He purified it from the ostentation which often corrupted it (Mt. 6.2-4); he accentuated the feeling of compassion, without which it is worthless (Lk. 10.33); above all, he taught that the disposition which gives alms by mechanical rule and bargains with God for compensation here or hereafter should yield to that impulse of the new heart which sees the supreme reward in likeness to a heavenly Father (Mt. 5.45). We cannot wonder then that, in the infant church at Jerusalem, without compulsion or rigid communistic system (see Acts 5.4), there was an ideal charity which made 'all things common' (Acts 4.32), and prompted rich men like Barnabas to sell their property for the sake of the needy (Acts 4.36 f.). No doubt the expectation that Christ's second coming was at hand stimulated this uncalculating generosity; but low esteem of worldly goods and love of the brethren were the mainsprings of this new development. It is also significant that the first election of Christian officers was made to secure a due distribution of alms. The Gentile churches, moreover, were bound to the mother church at Jerusalem by the offerings which they made for the poor in that city (Rom. 15.26 f. 1 Cor. 16.1-3 2 Cor. 9.1 f. Acts 24.17). Of course almsgiving found other channels. The author of the epistle to the Hebrews assumes that it is a necessary feature of the Christian life, and speaks of it as a sacrifice of thanksgiving which continues after the Jewish altar has been done away with. From very early days each church had its lists of poor (1 Tim. 5.9) and its common fund (Ignat. *Ad Polyc.* 4); and whereas in heathen clubs 'charity was an accident, in Christian associations it was of the essence' (Hatch, *Organ. of Early Christ. Church* 36). Cp COMMUNITY OF GOODS, especially § 5. W. E. A.

ALMUG OR ALGUM TREES אֲלֻמִּיּוֹת אֲלֻמִּיּוֹת

[BA], ΔΤ. [L]. 1 K. 10.11 f. f; אֲלֻמִּיּוֹת. ΠΕΥΚΙΝΑ [BAL], 2 Ch. 28 [7] 9.11 f. [T. ΑΠΕΛΕΧΑΝΑ. L. 7. 10; ΔΠΕΛ., L. v. 11 f.] yielded a precious wood, which was brought to Solomon, along with gold and gems, from OPHIR (q.v.); cp SOLOMON by the ships of Hiram, and was used to make 'pillars' (מַסְמָרִים, *יְפוֹסְתְּרִימָתָא* [BAL], RV mg. 'a railing' 1 K. 10.12 = 2 Ch. 9.11 מַסְמָרִים *diversitates* [BAL], EV

¹ The two forms, though differently rendered by Ⓞ and other versions, are obviously variants of the same word. The etymology is unknown.

'terraces') for the temple and the palace, as well as 'harps and psalteries.' In 2 Ch. 28[7], these trees appear along with cedars and firs among the products of Lebanon, with which Solomon asks Hiram to furnish him; but there is no mention of them in the parallel passage in Kings.¹

The very various opinions that have been held as to the identity of the tree are enumerated by Celsius (*Historia* 1.171 ff.).

Three may be mentioned: (1) The Jewish traditional rendering is 'coral'; but this is obviously unsuitable, unless we may understand by 'coral-wood' simply a red wood. (2) Kimhi takes it to be 'brazil-wood,' the *bakkam* of the Arabs, a red dye-wood found in India. (3) Most moderns, following Celsius (see his reasons, *op. cit.* 1.179 ff.), believe it to be 'sandalwood,' probably of the redder sort (*Pterocarpus Santalinus*, Linn.), which is still used in India for purposes similar to those recorded in Chronicles. The ancient versions yield no light; but see below.²

The evidence appears to point to some valuable Oriental wood brought (like lign aloes and cassia) into the Eastern Mediterranean by the ancient commerce of the Red Sea. If we may assume it to be a red wood adapted for carving, it may well be either (1) brazil-wood (a name of uncertain origin; the French *braise*, a glowing coal, has been suggested; it was transferred to the S. American country) = *Casalpinia Sappan*, Linn., a tree of India and the Malay Isles, apparently the *bakkam* of the Arabs; or it may be (2) red sandalwood, *Pterocarpus Santalinus*, Linn., an inodorous dye-wood, still surviving as a colouring matter in pharmacy,³ a native of Southern India, where it is much valued for temple pillars. Possibly both species may be included under the expression.

Ⓞ in 2 Ch. 28.9.10 f. gives ἔλαια πευκίνα, which agrees with the Chronicler's statement that the algum-wood came from Lebanon. Cheyne, therefore, proposes to identify 'almug' (the form attested by the earlier record, that in Kings) with *Flammula*, the name of one of the trees used by Sennacherib in building his palaces. The tree seems from its name to have been of Flamite origin; but so useful a tree may have been planted in Hermon and Lebanon. For מַסְמָרִים in 1 K. 10.11, it is possible to read מַסְמָרִים. Less probably we may suppose with Hommel that this hard and rare wood was 'a product of the trade of Ophir.' See *Exp. T.* 9.470 ff. 523 ('98), and cp ALAMMELECH.] N. M.—W. T. T.-D.

ALNATHAN (ἄλναθάν [A]). 1 Esd. 8.44, RV ELNATHAN, 2.

ALOES and (once) Lign Aloes (אֲלֻמִּיּוֹת; Num. 24.6 ΚΗΝΑΙ [BAL], EV 'lign aloes'; Pr. 7.17 ΤΟΝ ΟΙΚΟΝ ΜΟΥ [BNA], or ΟΙΚΟΝ ΤΗΣ ΠΣ. 458 [9].

1. Substance. מֵאֲלֻמִּיּוֹת [Aq. ΔΛΩΘ]. Cant. 4.14 ΔΛΩΘ [BA], ΔΛΩΘ 'N. [Aq. ΔΛΩΘ, SYR. ΘΥΜΙΑΜΑΔΑ]. Jn. 19.39† ΔΛΩΘ [BNA],⁵ the modern *egg-wood*, a precious wood exported from SE. Asia, which yields a fragrant odour when burnt. It is entirely distinct from (1) the common bitter 'aloe' used in medicine, to which alone the name was given by classical writers;⁶ (2) the plant

¹ The Chronicler has probably mistaken an imported article of merchandise for a native product of Phenicia.

² Jerome renders *thyina*—i.e., 'citron wood' (*Callitris quadrivalvis*, Vent.)—an Algerian tree inordinately valued by the Romans for tables, not likely to have been known in biblical times or to biblical people.

³ It was the 'sanders' used in mediæval cookery for colouring sauces.

⁴ I.e., lignum *aloes*, a hybrid phrase; *vide* Skeat, *Etyim. Dict.* s.v.

⁵ [The critical student will not fail to observe that three of the four OT passages in which אֲלֻמִּיּוֹת or אֲלֻמִּיּוֹת occurs—beside to books or parts of books which eminent critics have regarded as post-exilic, and may be reminded here that the occurrence of rare plant-names is one of the phenomena which have to be considered in fixing the period of such documents. He will also notice that the reading of the fourth passage has on good grounds been amended. See the close of this article.—Ed.]

⁶ This latter is described, among ancient writers, by Pliny (*HN* 27.4) and Dioscorides (822), and its bitterness alluded to by Juvenal (6.181; 'plus aloes quam mellis habet').

commonly known as the American aloe (*Agave americana*), celebrated for the long period which elapses before its flowering. The biblical wood most probably corresponds to that described by Dioscorides (121) under the name ἀγάλλοχον¹ (cp Ges. *Theo.* 2798a)—a wood imported from India and Arabia, resembling thyme wood (Rev. 1812), compact, aromatic, in taste astringent and rather bitter, with a skin-like and somewhat variegated bark.² He speaks of its medicinal use—sweetening the breath and improving the internal condition of the body—and adds that it is burned instead of frankincense (cp Ar. *hūtūr* and see INCENSE).

The Hebrew name עֵשֶׂבֶת אוֹרֵן and the Greek ἀγάλλοχον² are almost certainly, and the Greek δόλη (or 'elwāi), Pers. *alwa*³ have an entirely separate origin: the Syriac word often means the bitter medicinal aloes (so in the majority of references quoted in Pⁿ *Theo.*, s.v.), and the Persian word is so explained by the lexicographers.⁴ In that case we have an instance of what is not uncommon in language, viz., that two things have arrived at the same name from different starting-points.

It is, however, possible that Gr. δόλη, Syr. 'alwai (or 'elwāi), Pers. *alwa*³ have an entirely separate origin: the Syriac word often means the bitter medicinal aloes (so in the majority of references quoted in Pⁿ *Theo.*, s.v.), and the Persian word is so explained by the lexicographers.⁴ In that case we have an instance of what is not uncommon in language, viz., that two things have arrived at the same name from different starting-points.

The 'aloes' and 'lign aloes' of the Bible are thus identified with the product of some tree of the genus

3. Source. *Aquilaria*, the chief home of which is in SE. Asia. According to Arab writers there were many different varieties of the *aqhālūjī* or 'ūd found in different parts of India and Ceylon, differing from one another in value according to the greater or less compactness of the wood, though all had the property of yielding a fragrant vapour if burned when dry.⁵ They speak of its use in perfuming clothes and persons, thus illustrating Ps. 45^b [9] and Cant. 4:14; and there are parallels to the usage mentioned in Pr. 7:17.

It would seem that the kind of eagle-wood most likely to be introduced into Europe in classical times was that yielded by a tree generally distributed through the Malayan region, which in early Eastern commerce would therefore naturally be associated with cassia. This is *Aquilaria malaccensis*, which is figured by Rumphius under the name of *cauro* and has from ancient times been esteemed by the Chinese. To this day 'it is the most important product of the forests of S. Tenasserim and the Mergui Archipelago.' Another eagle-wood is obtained in NE. India from *Aquilaria Agallocha*; but it is less likely that this should have formed an article of commerce in biblical times. Other kinds were obtained from the East in the Middle Ages; what the early Arab travellers have to say about them may be seen in Dymock, *Pharmacographia Indica* 3 218 220. They were similar but no doubt inferior products derived from different trees, and are probably to be regarded as comparatively modern substitutes.

Eagle-wood consists of diseased wood, infiltrated with odoriferous oil and resin. It occurs in irregular pieces varying in colour from grey to dark brown. It

¹ In later Greek also called *εὐαλόδιον*.
² This latter passed into Arabic as *aqhālūjī* or *aqhālūkkī*; but Arab writers usually call it *al-'ūd* 'the wood' *par excellence*, or *al-'ūd al-Hindī*, 'the Indian wood.'

³ These three are evidently forms of the same word; but here again it is difficult to say which way the etymology flowed.

⁴ On the other hand, in the single instance mentioned by Dozy (*Suppl.*) of the occurrence of the same word (*alwiy*) in Arabic—viz., in a poem quoted by Al-Makḡarī (*Hist. and Lit. of Arabs in Spain*, ed. Dozy, etc. 2 776, l. 15)—it seems to have the same meaning as the biblical word. Describing the pride of certain people, the poet says, with allusion to the old Arab custom of lighting fires in prominent places near their dwellings to attract wanderers to hospitable entertainments, 'and they throw on the fire of hospitality, from pride, their *alwiy* and their *kiba*' (the latter also is said to be a species of *agallochum*).

⁵ See the Arabic references discussed at length in Celsius, *Hierobot.* 1:135-171.

is found in the centre of the tree, and the search for it is laborious. The account of Dioscorides (see above, § 1) is accurate. The exterior, which cannot of course be the bark, is veined with a darker colour.

As regards the importation of this substance into W. Asia no difficulty arises when we remember the undoubted fact of a trade carried on by China with India and Arabia in early times, of which Ceylon was probably a chief depot. See on this subject Flückerig and Hanbury, *Pharmacographia*, 2d ed., p. 520 f. A difficulty, however, appears when we consider Balaam's words (Num. 24 5 f.):—

'How good are thy tents, O Jacob,
Thy dwelling-places, O Israel!
As valleys stretched forth,
As gardens beside a river,
As *lign aloes*! which Yahweh has planted,
As cedars beside waters.'

The wood may, indeed, have been imported by the Phœnicians, and thus be mentioned side by side with myrrh, cassia, cinnamon, etc., the spices of Arabia and India; but how could a Palestinian writer use, as a suggestive simile for the expansion of Israel, the growth of a tree which *ex hypothesi* was never seen in Palestine, but only far away in SE. Asia? The difficulty is pointed out by Dillmann, who remarks, 'Perhaps the original reading was עֵשֶׂבֶת (palms, Ex. 15 27; Gen. 14 6).' The word suggested, however, seems generally to mean 'terebinths'; Prof. Cheyne points out the parallel in Is. 61:3.² *Pistacia Terebinthus*, though often only a bush, may be a tree of from twenty to forty feet.

N. M.—W. T. D.

ALOTH (אֱלוֹת). According to 1 K. 4:16 Solomon had a prefect, Baanah, 'in Asher and in Aloth' (עַן תְּי מַלְאָלָא [B], . . . גַּלְאָלָא [L] omitting 'Asher'; עַן אֲשֶׁר וְכֵן מַלְאָלָא [A]). It is better, as in RV and Kau. HS, to read 'in Asher and Bealoth.' See BAALATH-BEER. Klostermann, recognising that a more northerly place is desirable, suggests the emendation 'Zebulun' (notice 'Naphtali,' v. 15, and 'Issachar,' v. 17).

ALPHA AND OMEGA (ΤΟ ΑΛΦΑ ΚΑΙ ΤΟ Ω [Ti. WH] Rev. 18 21 6 and [TO Δ IN B] 22:13). For similar use of first and last letters of the alphabet in Rabbinic writings see Schottgen, *Horæ Hebraicæ* 1:1 20 f.

ALPHABET. See WRITING.

ALPHÆUS (ΑΛΦΑΙΟΣ [Ti. WH]; Heb. [Aram.] אֱלִיָּהוּ [עֲלִיָּהוּ]), either a contraction from אֱלִיָּהוּ or a gentilicium from the place-name Heleph; on account of the η W & H write 'Alphaios).

1. Father of Levi the publican, named only in Mark (Mk. 2:14 = Lk. 5:27 = Mt. 9:9 [where Matthew is usually identified with Levi]).

2. Father of the second James in the lists of apostles (Mt. 10:3 Mk. 3:18 Lk. 6:15, Acts 1:13; see APOSTLE, § 1), not to be identified with Clopas and so made a brother of Joseph the father of Jesus. See CLOPAS, § 3.

There is no reason for identifying (1) and (2). The Itala, it is true, and apparently also the more important of the MSS known to Origen, as well as D, read Ἰάκωβον instead of Λευεὺν in Mk. 2:14; but if this had been the original reading, it would be impossible to account for the subsequent substitution for James of a quite unknown Levi. The reading Ἰάκωβον arose simply because, at a very early date, a copyist knew of no son of Alphæus but James, and therefore took Λευεὺν for an error which he was bound to correct. If the Alphæus of Mk. 2:14 were to be identified with the Alphæus of the lists of apostles, on the assumption that Levi and the second James were brothers, then we should expect to find these two

¹ Instead of אֱלִיָּהוּ EBRAF reads אֱלִיָּהוּ, 'tents'; but this is obviously unsuitable. Cp its rendering in Pr. 7:12 (עֵשֶׂבֶת אוֹרֵן מִן הַיָּבֵשׁ).

² But see SBOT, Heb. on Is. 61, and cp CEDAR.

brothers forming a pair in the lists just as Peter and Andrew do, or John and the first James. This objection to the identification, however, is valid only on the assumption that Levi under the name of Matthew was admitted into the number of the twelve.

The Syrian writer Amrus in the 14th cent. makes Alphaeus accompany Nathanael (identified with Bartholomew) on his journeyings through Nisibis, Mesopotamia, and the rest of Western Asia (Lapsus, *Apost. Ab. apoc. h. ii. 201 f.*). p. w. s.

ALTANEUS (ΑΛΤΑΝΑΙΟΣ [A]). RV MALTANEUS, 1 Ead. 933† + Era 1033 MATTHEW, 2.

ALTAR.¹ The Heb. **מִזְבֵּחַ** means literally 'a place of slaughter or sacrifice' (cp Ar. *Madbah*,² and Syr. *Madhāhān*). The Gk. and Lat. terms,

1. Names. *βωμῆς* (cp *βωμός*), *ara* (cp *ἀραιώω*), *altare* (cp *altus*), on the other hand, describe the form of the altar as a raised structure without reference to its purpose. Occasionally (23 times) **Θ** uses the Gk. word *βωμῆς*; as a rule, however, **מִזְבֵּחַ** is rendered by *θυσιαστήριον*. The translation thus effected is close and exact; but *θυσιαστήριον* is unknown in classical literature, being apparently confined to biblical, Jewish,³ and ecclesiastical writers. In the NT *βωμῆς* occurs only once (Acts 17:23), and there the writer is speaking of an altar used for heathen worship. Elsewhere *θυσιαστήριον* is always employed.

We have, then, in the Hebrew word an accurate definition of the altar: it is a place of sacrifice. Why

2. Primitive idea. an altar should be required in order that the victim may be slain in a manner acceptable to the deity, and advantageous to

the worshipper, is not so obvious as we might at first be inclined to think. We might deem it a sufficient explanation to say that the altar served ends of obvious convenience. The flesh of the victim being placed on a raised platform specially appropriated to this object, the sacrifice was separated from contact with common things and from contamination, while a means was provided for performing the rite with due solemnity and in full sight of those who desired to associate themselves with the sacred offering. There is evidence, however, that in primitive times the altar possessed a much deeper significance than this. (The development of this primitive idea is traced elsewhere. See **IDOLATRY**, § 2; **SACRIFICE**; **MASSEBAH**.)

To the Arabs any stone might become for the nonce an altar, and evidently their Hebrew kinsfolk followed

3. Usage. originally the same ancient way. Thus, after the victory of Michmash, when Saul was told that his hungry warriors were devouring the flesh meat which they had taken as booty, without reserving the blood as an offering to Yahwē, he commanded his people to roll a great stone towards him, and on this natural altar the blood, the mysterious seat of the soul, was poured out, so that all was in order (1 S. 14:32-35). It is to be observed that here there is no question of burning. In Gideon's sacrifice, of which we have an account in Judg. 6:11 ff., the offering of cooked flesh and unleavened cakes is indeed consumed by fire miraculously kindled; but the altar on which the gifts are placed is simply a rock, and the broth of the cooked flesh is poured out upon it or at its base.

According to Ex. 20:24-26, on the other hand—a passage which, whatever be its date (see **EXODUS**, ii. § 3), may represent an ancient usage—the altar is to be of earth—a material used in early times by other nations—e.g., Carthaginians, Romans, and Greeks (for references see *Di.*, *ad loc.*)—or, if of stone, then of unhewn stone, the reason given being that an iron instrument would

¹ On references to Greek altars see **UNKNOWN GOD** and **ABOMINATION**, ii.

² The Arabic *Madbah* does not mean 'altar'. It has acquired that meaning through translations of the Bible. It is also used in the sense of 'rough' (from which see **WKS** *Ed. Nov.* (5) 341, n. 1; cp the remarks on *ghadghah*, *op. cit.* 240 f., 108 228).

³ Prof. Moore has pointed out that it occurs, not only as is sometimes stated, in Philo, but also in Eupolemus, *Ep. Arist.*, Jos., and other Jewish authors.

destroy the sanctity of the altar. Originally, it can scarcely be doubted, the idea was that changing the form of the sacred stone would drive the deity from his abode (cp **IDOLATRY**, § 4); but such ideas had passed away when the compiler wrote, and iron tools continued to be forbidden in deference to ancient custom no longer understood. Further, the altar here prescribed was to have no steps. In this way the person of the sacrificer was to be saved from exposure, an object secured by the priestly legislator in a very different way—viz., by making 'linen breeches,' or drawers, part of the priestly attire. Altars so constructed might be erected all over Israel: see **HIGH PLACE**, § 2 f. On the recognition of the altar as a sanctuary for homicides see **WRS** *Rel. Sem.* 183 f., and cp **ASYLUM**.

Very different was the altar erected in the foreground of Solomon's temple at Jerusalem. The first

4. Solomon's temple. Book of Kings (9:25) makes direct mention of the fact that Solomon built an altar on which he offered sacrifice three

times a year. So, too, in 8:64, reference is made to the altar which 'stood before Yahwē'—i.e., in front of the temple proper—and it is described as the 'brazen altar' (**מִזְבֵּחַ נְחָשִׁים**). Thus the material itself offers a striking contrast to the altars of earth and stone which had been in use previously. Like the rest of the temple and its furniture, it was the work of a Phœnician artist, Hiram-Abi (2 Ch. 2:13, perhaps rightly; see, however, **HIRAM**, 2). Unfortunately, the account of the altar, which we should expect before 1 K. 7:23, is wanting.

The text of the passage has been mutilated because a later editor, misinterpreting 1 K. 8:4 (itself a very late insertion), supposed that the furniture of the tabernacle, including, of course, the brazen altar, had been moved by Solomon into his temple, so that no further altar of this kind was needed. The excision of the passage describing Solomon's brazen altar must have been effected in comparatively modern times, for the Chronicler shows that he had it before him in the text of the Books of Kings which he used (see *St.* in *ZATW*'s 157 [83]).

The Chronicler (2 Ch. 4:1) gives its dimensions. It was 20 cubits long and broad by 10 cubits high. Now, these are precisely the measurements of the altar in Ezekiel's temple (Ez. 43:13 ff.). The prophet really constructs his ideal temple of the future from his recollections of the old temple in which he may very well have served as a priest. We shall, therefore, not go far wrong if, with most modern archaeologists, we take Ezekiel's description as applicable to Solomon's altar. On that supposition, although the altar was 20 cubits broad and long at the base, the altar-hearth¹ was only 12 cubits by 12. The altar consisted of three platforms or ledges, the higher being in each case two ells narrower than the lower ledge. At the base was a gutter (EV 'the bottom,' RV mg. 'the hollow,' Ez. 43:13) one ell broad (**קַרְתָּ**, *κόλπωμα*, *κοίλωμα*, *κύκλωμα* in **Θ**), intended apparently for the reception of the sacrificial blood; and there was a similar gutter at the top round the altar-

5. Horns of altar, etc. heath. At the four corners of the altar were four projections called 'horns.'

Possibly they represent, as Stade has suggested, the beginning of an attempt to carve the altar stone into the form of an ox, which symbolised the power of Yahwē² (Nu. 23:22-24:8). Be that as it may, down to the latest times the horns of the altar were regarded as specially sacred, so that in the consecration of priests (Ex. 29:12) and in the ritual of the sin offering (Lev. 4:7 ff.) the blood was sprinkled upon them. It has been inferred from Ps. 118:27 that at one time the horns were used also for fastening the victim; but the meaning of the words is exceedingly obscure, and no conclusion of any value can be deduced from them.

The ascent to the altar was made by a flight of steps¹ The word for hearth or place for burning, which should probably be written **מִזְבֵּחַ** (see **ARIEL**, 2), occurs not only in Is. 29:1 ff., but also on the stone of Mesha (*Il.* 12 17 f.).

² Robertson Smith, however, regards the 'horns of the altar' as a modern substitute for the actual horns of sacrificial victims, such as the heads of oxen which are common symbols on Greek altars (*RS* 436).

on the E. side, and it is plain that an arrangement of this kind was absolutely necessary, when we consider the great height of the structure.

On the whole matter we must remember that Solomon had no strict rule to follow: he simply desired, with the help

of Phœnician art, to consult for the splendour of the royal worship. We need not, therefore, wonder that one of his successors, Ahaz (2 K. 16. 10 ff.), with the co-operation of Uriah the priest, constructed a new altar after the pattern of one that he had seen at Damascus, and made it the chief place of sacrifice.

Solomon's altar was placed, as has been already implied, in front—i.e., on the E. side—of the temple proper. Can we identify the exact site? Not

perhaps with anything like certainty; but it is worth while to mention the theory advocated by Willis, and more recently by Nowack. The Kubbet es-sahra, or dome of the rock, which stands on the temple area, covers a great rock pierced by a channel which passes into a sink beneath, and is connected with a water-pipe. The rock has been an object of the highest veneration to Christians, and (especially) to Moslems. It has been supposed that the rock stood on the threshing-floor of Araunah the Jebusite (on the name see ARAUNAH), that it was there David saw the angel (2 S. 24. 16 ff.) and erected his altar, and that Solomon (2 Ch. 3. 1 ff.) afterwards included the ground within the temple site. Solomon would naturally build his altar on the spot already chosen by his father and hallowed by the apparition; nor is it incredible, when we consider how tenaciously Orientals, under changed modes of belief, cling to the old sacred places, that David and Solomon built their altars on the rock now covered by the Kubbet es-sahra. The story of the apparition to David would, on this hypothesis, find a parallel in the apparition to Gideon (Judg. 6. 11 ff.), and in that to Manoah (Judg. 13. 19). The perforation, the water, and the sink would be explained as means for carrying off blood and ofal from the altar. It is true, as Dean Stanley has pointed out, that the rugged form of the rock would make it unsuitable for a threshing-floor; but that is no reason why the rock should not have stood 'by the threshing-floor' and been the place where the angel appeared. Cp ARAUNAH.

Within the temple proper, and in front of the Debir or innermost shrine, stood another altar, mentioned in

1 K. 6. 25 f. The text, which is corrupt, should be emended thus, with the help of **8. Altar of shewbread.** ἄ (ἀέθρον): 'he made an altar of cedar in front of the Debir.' From Ez. 41. 22 we learn that it was 3 cubits high by 2 cubits broad, and that the altar had 'corners' which took the place of the horns of the brazen altar. Ezekiel speaks of it also as a 'table'. Upon it, from ancient times (1 S. 21. 6[7]), the shewbread was placed before Yahwè, to be afterwards consumed by the priests.

We assume here that the TABERNACLE (*g.v.*), as described by the 'priestly writer,' is an ideal structure.

Said to have been made at Sinai, it was in reality an imaginary modification of the temple, suitable (so it was supposed) to the circumstances of the time when the Israelites wandered in the wilderness.

(a) The altar, called simply 'the altar' (Ex. 27. 1. 30. 18 40. 32, etc.), 'the altar of burnt offering' (Ex. 30. 8 31. 9, etc.), or 'the brazen altar' (Ex. 38. 30 39. 39), stood in the outer court, and was square, 5 cubits broad and long, by 3 high. Instead of being wholly of brass, it was a hollow framework of acacia planks overlaid with brass. It was thus small and portable. It had four 'horns'; midway between top and bottom ran a projecting ledge (so RV, AV 'compass'; קרנב; 27. 5), intended, perhaps, as a place for the priests to stand upon when they ministered, though the meaning of the word and the purpose intended are disputed.

Below this ledge there was a brazen grating (so RV, AV 'grate'; 27. 4) or NETWORK (קְרָמָח רָחֵק, קְרָמָח רָחֵק, which may have been a device to support the ledge and admit the passage of the blood poured out at the base of the altar. There were four brazen rings at the corners of this network, and into them the staves for carrying the altar were inserted. These staves, like the altar itself, were of acacia wood, overlaid with brass. So, too, the altar utensils—viz., קִירֹת, or pans for clearing away ashes, וַיִּים, or shovels, מִקְרָחֹת, basins or saucers for catching the blood and sprinkling, מִקְלָוֹת, fleshhooks for forks, חֲתָחֹת, or fire-pans for removing coals, etc.—were all of brass. Perpetual fire was to burn on this altar (Lev. 6. 12 f.).

(β) Ezekiel, as we have seen, mentions an altar within the 'holy place,' which he also calls 'the table of P's 'table,' which stands before Yahwè.' The 'priestly writer' calls it 'the table' (Ex. 25. 23 37. 10), 'the table of the face or presence' (Nu. 4. 7, קְרָחַת פָּנִים, cp RITUAL, § 2), because it stood before Yahwè (Ezek. 41. 22), 'the pure table' (Lev. 24. 6). In 2 Ch. 29. 18 it is spoken of as 'the table of shewbread,' מִשְׁחָתֵן הַשֶּׁמֶן—lit., the table on which rows (of loaves) were laid—to describe the purpose for which it was intended. It was of acacia wood overlaid with gold, and was 2 cubits long, 1 cubit broad, 1½ high. It was surrounded by a golden rim or moulding (רֵם, Ex. 25. 11; see CROWN), and at the bottom there was a border or ledge (הַתְּקֵנָה, Ex. 25. 25, EV 'border'), with a golden rim of its own. Where the feet of the table joined the ledge, golden rings were placed for the insertion of staves. The table was furnished with deep plates (קִירֹת, Ex. 25. 29, EV 'dishes'), 'spoons' or saucers (צִפְחֹת) for the incense (Lev. 24. 7), 'flagons' (קִיָּוֹת, Ex. 25. 29 [see FLAGON]) for the wine, 'bowls' (so EV, מִקְרָחֹת 25. 29) for pouring the wine in libations.

(γ) The altar of incense (קִיָּוֹת קִטְשֵׁי קְרָחַת, Ex. 30. 1, or מִקְרָחַת קְרָחַת, also called 'the golden altar' (Ex. 39. 38),

belongs only to the secondary sections of the Priestly Code. Ezekiel knows of no altar within the temple proper save the altar of the shewbread, and originally 'the golden altar' was only another name for this table. The Priestly Code, in its original form, speaks of the brazen altar as 'the altar'; and, whilst in Ex. 30. 10 the high priest on the day of atonement is to place blood on the horns of the altar of incense, in Lev. 16, where the solemn ritual of that great day is minutely prescribed, nothing is said of an altar of incense. The mention of the altar in the books of Chronicles and Maccabees (as also in the interpolated passage 1 K. 7. 48) is due simply to the influence of these novellæ in the 'Priestly Code.'

This altar was to be made of acacia wood; it was to be 2 cubits high, 1 cubit broad and long; the flat surface on the top (22, Ez. 43. 13, AV 'higher place,' RV 'base'), and the sides and horns, were overlaid with gold. It had a golden moulding round it (רֵם), and beneath this at the four corners were golden rings for the staves, which also were overlaid with gold.

In the reign of Darius a new altar of burnt offering was built, probably on the old site (cp Hagg. 2. 15), but, in accordance with the law in

12. Post-exilic. Ex. 20. 25, of unhewn stone (1 Macc. 4. 44 ff.). It was desecrated, and, according to Josephus (*Ant.* xii. 5. 4), removed by Antiochus Epiphanes. A new altar, also of unhewn stone, was built by Judas Maccabæus. Within the temple proper were the table for the shewbread and the golden altar of incense (1 Macc. 1. 21 4. 49 f.); but the latter, as far as it was distinct from the table, seems to have been introduced late, for Hecatæus (*Jos. c. Ap.* 1. 22) mentions only the

candlestick and one altar (or table) as the furniture of the holy place.

In Herod's temple the altar of burnt offering in the court of the priests was still of unhewn stones. The

13. **Herod's temple.** Mishna (*Middoth* 31) states that it was 32 cubits square at the base, and gradually narrowed to 24 cubits at the top; but the dimensions are differently given by Josephus (*B.V.* 56), and, before him, by Herodotus (*Miller, Fragm.* 2, 204). The priests approached it by an ascent of unhewn stone. There was a pipe to receive the blood, which was afterwards carried by a subterranean passage into the Jordan, and there was a cavity beneath the altar for the drink offerings. On the N. side were brazen rings for securing the victims. A red thread marked the place for sprinkling the blood. The altar of incense stood within the holy place, between the golden candlestick and the table of shewbread.

As we have seen (§ 1), the word *θυσιαστήριον* is frequently used in the NT for the Jewish altars; and the 14. **NT.** Apocalypse speaks of 'the golden altar' (83, and 'altar' in the same sense *passim*), because the writer pictures the worship of heaven under forms drawn from the old temple worship. In a passage which is unique, the author of Hebrews (1310) speaks of a Christian altar. The altar is, of course, not material but spiritual; it is the cross on which Christ offered himself, and the author is following the same line of thought when he exhorts believers 'to do good and communicate, since with such sacrifices God is well pleased.'

For the origin of altars see *Hebrews*, § 2; *Synonymes*: *Hebr. Pharis.* § 2, and *WRS Heb. Syn.*; for the Hebrew altars in later times Benzinger's *Hebr. Syn.* 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

AL-TASCHITH, RV **Al-Tashheth** (אל־תַּשְׁחִית); **ΠΕΡΙ ΤΩ ΣΥΜΜΗ**, **ΑΝ ΔΙΑΦΘΕΙΡΗΣ**; **SYMM.** Ps. 75†, **ΠΕΡΙ ΑΦΘΑΡΕΙΑΣ**. It is used to signify 'to destroy' before the phrase (Ps. 57-59 75†, headings [v. 1]), and to explain 'To the tune of "Destroy not"' (cp *Is.* 658; so *WRS OTYC* 209). If, however, the view of the musical notes in the headings taken in *PSALMS* is correct, there can be no doubt that the phrase is corrupt, and that we should read with *Grätz* **נְשַׁחֲתֵנּוּ**, 'on the Sheminith' (see *SHEMINITH*).

ALUSH (אַלּוּשׁ; Sam. אֱלּוּשׁ; ΔΙΛΟΥΣ [AFL]-ΛΕΙΜ [B]; *ALUS*), a desert station of the Israelites between Dophkah and Rephidim (Nu. 3313† [P]). Not identified with certainty; and see *Di.* on *Ex.* 171. The *R.* (ed. Lag.) reads *al-wathanain*, 'the two idols,' probably because the translator understood by *Alush* the heathen temple at Elusa (see *BERED*, i. 1, and cp. *WRS Kin.* 293f.). See *WANDERINGS*, §§ 12, 14.

ALVAH (אַלְוָה; ΓΑΛΛΑ [ΔΕΛΕ] = אֶלְוָה; *ALVA*), *Gen.* 3640 = *1 Ch.* 13†, *Kr.* (EV **ALIAH** after *Kt.* אֶלְוָה; BA as above; **αλουα** [L]), one of the 'dukes' (?) of *ELIOM* 172, § 4. Cp. **ALVAN**.

ALVAN (אַלְוָן; ΓΑΛΩΝ [A]-ΩΜ [DE]-ΔΜ [L] transposing 5 and 1), *Gen.* 3623 = *1 Ch.* 140† **ALIAN** (אַלְוָן, but in many MSS אֶלְוָן; so **ΑΛΟΥΔΑΝ** [L], but **αλαδμ** [B], **αλαδμ** [A]), a name in the genealogy of *Seir*. Cp. **ALVAH**.

AMAD (אַמָּד; ΔΜΙΔΑ [B], ΔΜΑΔ [A], ΔΛΦΑΔ [L]), an unidentified point in the border of Asher (*Josh.* 1926†). **AM** presupposes *Ammiel*. There are several other place-names compounded with **am**. See *Gray, HPN* 48f., who rightly declines the explanation of

1 **AM** points to a reading אֶלִים, *Elim*. Perhaps the writer, wishing to fill up the interval between the wilderness of Sin and Rephidim (cp *Ex.* 171), repeated *Elim*, the name of an earlier station. See *ELIM*.

Am'ad as 'people of eternity.' **AM**'s **αλφασδ** may point to **ἐλπαλ** (*ELPAAL*) for which **AM** in *1 Ch.* 811 gives **αλφασδ**. This may be correct. T. K. C.

AMADATHA, RV **Amadathus** (אַמָּאדָּאָתָּה [B]), *Esth.* 166, etc. See **HAMMEDATHA**.

AMAL (אַמָּל; ΔΜΑΔ [BA], ΔΛΔΜ [L]), in genealogy of *ASHER* (§ 4 ii. 1, *1 Ch.* 735†).

AMALEK (אַמְלֵק; ΔΜΑΛΗΚ [BAL]), but -ΗΚ *1 S.* 15 25 [A]; gentilic, **Amalekite**, אֶמְלֵקִי, ΔΜΑΛΗΚ [BAL].

1. **Seat.** but also -κ[ε]ΤΗΚ [BAL], a tribe with

which the ancient Israelites, at several periods of their history, were engaged in warfare. According to two passages, each of which confirms the other, there appears to have been a time when Amalekites dwelt even in Central Palestine: in the Song of Deborah we read of 'Ephraim whose root is in Amalek' (*Judg.* 514; **AM**AL, however, ἐν κοιλίᾳ), and Pirathon in Ephraim (the modern *Ferati*, about 6 m. WSW. of Nablûs) was situated 'on the mountains of the Amalekite,' or 'of the Amalekites' (*Judg.* 1215, **λαρακ** [AL]). Of these northern Amalekites nothing further is known. According to several passages of the OT, the home of Amalek was in the desert of the Sinaitic peninsula, the modern *Tih*, S. and SW. of Judea. It is scarcely safe to conclude from *Nu.* 1329 1425 43 45 that they once had settlements also in southern Judæa; still less can we build any such theory upon *Gen.* 147, although the geographical allusions in this chapter have more authority than the legendary narrative itself. When the Israelites

2. **Exodus.** came out of Egypt into the desert of Sinai, they had an encounter with the Amalekites at Rephidim (*Ex.* 178-16), which is not very far from Mount Sinai (*Nu.* 3315). It was natural enough that the nomads, who lived on the scanty products of this region, should do their utmost to expel the intruders, nor can we wonder at the mortal hatred with which the Israelites thenceforth regarded Amalek. That the narrative, in spite of its legendary features, has a historical foundation cannot be doubted. The story of an encounter in the desert of Paran—*i.e.*, the *Tih* itself (*Nu.* 1425 43 45)—is probably nothing more than a less accurate version of the same struggle, which, it is true, can hardly have been limited to a single skirmish. Whether the account of the Deuteronomist (*Dt.* 2517-19) was derived from any other source besides *Ex.* 178 ff. is not quite clear, although he mentions one additional circumstance, namely 'the cutting off of those who were wounded (7)'—the term **עַשְׂרֵהוּ** was perhaps suggested by **עַשְׂרֵהוּ** in *Ex.* 1713. The verbal repetition of the curse is worthy of note. In *1 S.* 152, there is an obvious allusion to the passage in *Exodus*.

The mention of the Amalekites in *Judg.* 313 is perhaps due only to an ancient dittography (עַשְׂרֵהוּ עַשְׂרֵהוּ, a reading which, at all events, must have been known to the author of the Maccabean Psalm 83—see *v.* 7 [8]); but it may be questioned whether Budde is justified in considering the reference to the Amalekites in connection with the Midianites (*Judg.* 6333 712) as a mere gloss; it is in fact by no means improbable that besides the Midianites various other nomadic tribes made inroads upon the Israelite peasantry at the period in question.

The account of the wars of Saul against the Amalekites (*1 S.* 15) is unfortunately not altogether trustworthy.

3. **Saul and David.** Even in its original form it must have contained many exaggerations; and it has been subjected to considerable revision.

The high figures which appear in the narrative have no historical value. The same may be said of the vast extent attributed to the Amalekite territory in a passage imitated from *Gen.* 2518 (*1 S.* 156). We may with some certainty, however, conclude that the very first king of Israel inflicted severe losses upon the wild nomads (cp *SAUL*, § 3). In this connection we read of King Agag (the only

Amalekite proper name known to us, it may be noticed in passing), to whom the words of Balaam in Nu. 24.7 refer. The description of the death of Agag, obscure as it is, has a very antique colouring, and reminds us of Judg. 8:18-21. Popular tradition has strangely interwoven the fate of the Amalekites with that of Saul. According to one story, which does not agree with the narrative in 1 S. 31, Saul was slain by an Amalekite, who forthwith carried the news to David, but instead of being rewarded was put to death. Even in the book of Esther, composed many centuries later, reference is made to the enmity between Saul and Agag, as the Rabbins long ago observed: the righteous Mordecai is descended from the one, and the wicked Haman from the other.

At the moment when Saul fell on Mount Gilboa, the Amalekites, as it happened, were signally defeated by David. An ancient and well-informed narrator tells us how David, an exile at the court of the king of Gath, while professing to be very differently occupied (see ACHISH, DAVID, § 5), was in reality carrying on a war of extermination against the aboriginal tribes, in particular the Amalekites (1 S. 27.8). On one occasion the Amalekites profited by his absence to seize his residence, Ziklag, and carried off all its inhabitants. He pursued them, however, made a sudden attack with a band of only 600 men, rescued the whole of the spoil, and slew them all, with the exception of 400 who escaped on their camels (1 S. 30). Even the details of this narrative may, for the most part, be regarded as historical; it is obvious that the struggles here described were not wars on a large scale but mere raids such as are usual in the desert.

In after times Amalek does not come into prominence. The words of Balaam, which describe it as 'the first-born of nations' (*i.e.*, primeval nation?), and at the same time foretell its overthrow, are spoken rather from the point of view of the age in which Balaam is placed than from the point of view of the real author, who seems to have lived about the eighth century B.C. (cp BALAAM).

According to the remarkable notice contained in 1 Ch. 4.42 ff., 500 men of the tribe of Simeon, under leaders whose names are specified, exterminated the last remnant of the Amalekites in the mountain country of Seir and settled down in their place. Hence it would appear that the last Amalekites dwelt in the mountains of Edom. With this it agrees that Gen. 36, the substance of which must be at all events pre-exilic, represents Amalek as the son of Esau's first-born, Eliphaz, by a concubine—*i.e.*, as an Edomite tribe of inferior rank: see Gen. 36.12 (of which 1 Ch. 1.36 is an incorrect version), and compare 2.16. The concubine in question is Timna, according to 2.22 (= 1 Ch. 1.39), a sister of Lotan of Seir, and according to the second list in 2.40 ff. (where Amalek is omitted), an Edomite tribe or settlement. Thus the remnants of Amalek are, to some extent, reckoned as members of the Edomite race.

The mention of Amalek among the contemporaneous enemies of Israel, by a psalmist of the Maccabean period (Ps. 83.7[8]), is merely an example of the poetical licence whereby an ancient name is applied to a modern people, just as, *e.g.*, Greek writers of the sixth century A.D. call Goths 'Scythians.' As far as we can judge, the Amalekites were never a very important tribe; at their first appearance in history they are threatened with total destruction, and it would seem that neither Egyptian nor Assyrian records allude to their existence. Ancient Arabic authors, indeed, describe them as a mighty nation which dwelt in Arabia, Egypt, and other countries, and lasted down into post-Christian times. The present writer, however, thinks that in his short essay 'On the Amalekites' (Göttingen, 1864), he has succeeded in proving that these and other similar statements are either fancies suggested by passages in

the OT, or else deliberate fictions, and therefore have no historical value. At the present day this opinion seems to be generally accepted.

One branch of the Amalekites, it is true, appears to have lasted somewhat longer than the rest. When Saul attacked the Amalekites he ordered the doomed people, on the ground that they had shown kindness to Israel at the time of the exodus (1 S. 15.6). The Kenites must therefore have belonged to Amalek, or must, at least, have stood in close connection with them (cp Judg. 1.16 as in *SHOT*). Thus we find that the oracle of Balaam (Nu. 24.21 ff.) mentions this people, under the name of Kain (2.22, EV mg.), immediately after Amalek. Their friendly relations with Israel are, moreover, shown by the fact that, according to Judg. 1.16, the father-in-law of Moses was a Kenite (elsewhere a Midianite), and also by the fact that his descendants entered Palestine in company with the tribe of Judah. Hence the Kenites are reckoned as a part of Judah (1 S. 30.29, cp 1 Ch. 2.55); but according to the more accurate view they were a distinct people, though they dwelt in the south of Judaea, and were recognised as kinsmen by David (1 S. 27.10). From 1 Ch. 2.55, it would appear that the Rechabites, with whom the nomadic life had become a religious institution, were included among the Kenites (Jer. 35. 2 K. 10.15.23). In another district, the great plain of S. Galilee, we meet with Heber the Kenite (Judg. 4.7). For W. Max Müller is mistaken when he derives the name from a city called Kln (*As. u. Eur.* 174); the Song of Deborah reckons Jael, the wife of Heber, among 'women in the tent' (Judg. 5.24), which shows that the people in question are nomads. Accordingly we have no right to regard these Kenites as wholly distinct from those in the South. The oracle of Balaam mentions Kenites in the rocky hills of the South, foretelling that they will be carried away captive by the Assyrians. Gen. 15.19 includes the Kenites among the ten nations whose land God will give to Israel.

This people must therefore have been a nomadic tribe, which, at least in part, belonged to Amalek, in part was absorbed into Israel, and in part, it may be, maintained a separate existence for some time longer. It is not impossible that the Bedouin tribe, Kain, which dwelt in the desert of Sinai and the neighbouring districts about six centuries after Christ, may be connected with the Kenites (Kain) of the OT, as the present writer, following Ewald, has stated (*op. cit.*). At the present time, some further arguments might be brought forward in favour of this hypothesis, which, however, is still very far from being absolutely proved.

On the other hand, there are many objections to the theory that Cain, the fratricide, is a representative of the

7. Cain. Bedouin tribe of the Kenites, as well as to other hypotheses of Stade/*ATH* 14.2. [194], great as is the acuteness with which they are supported. A few points alone can be here referred to. Cain, the brother of Abel the shepherd, is expressly described as a *husbandman*. After his evil deed he becomes 'a wanderer and a fugitive'—*i.e.*, an outlawed, homeless criminal. This is something quite different from a nomad, who regularly goes to and fro within the same pastures in the 'desert.' That the Kenites, from among whom Moses fetched a wife, and who have a good name almost everywhere in the OT, were a tribe of smiths¹ (and therefore of pariahs), has no evidence in its favour, nor can we find any indication that the later Arabian tribe of Kain (Bal-Kain) was of such a character. In the Ar. *kain*, which, it is true, also means 'smith, craftsman,' several words appear to be combined. Besides, blood-vengeance, which is first mentioned in the story of Cain, is by no means a

¹ Similarly Sayce, *Revue of OT* 115. 'They formed an important guild in an age when the art of metalurgy was confined to a few.' See however Doughty, *Ar. Des.* 1.280-281.

the 'anointed' of Yahweh and the founder of the one legitimate dynasty (We *Psalm* 130).

3. A priest, temp. David (1 Ch. 15:24).
4. Ancestor of Mahath, a Kohathite Levite, temp. Hezekiah; probably a family name; cp no. 1 (2 Ch. 29:24); *מַשָּׂא* [Bā], *אַמַּשָּׂאִי* [L].
5. See below, AMASHAI.

AMASHAI, or rather, as in RV, **Amasheal** (אַמַּשְׂאֵל), where **D** implies a reading *עַמְשֵׁי* based on a false derivation from *עַמְשֵׁי*; perhaps really to be read Amishai, see AMASAI), a priestly name in the post-exilic list of inhabitants of Jerusalem (see EZRA, II, § 15 a), Neh. 11:13 (אַמַּשְׂאֵל [Bā]). - *מַשָּׂא* [L]. - *מַעְשָׂא* [L] (1 Ch. 9:2) where the name is MAASAL AV MAASIAI (מַעְשֵׂי מַאֲסִיאִי [Bā, Gi.]), some authorities *מַעְ* [Gi.]; *מַאֲסִיאִי* [B.], -*מַעְ* [L], *מַאֲסִיאִי* [L]; *מַאֲסִיאִי* in Neh. 11:13.

AMASIAH (אַמַּשִּׁיָּה) § 29. 'Yahweh bears,' cp AMOS; *מַאֲסִיאִי* [B.], *אַמַּשִּׁיָּה* [L.], *אַמַּשִּׁיָּה* [L.], one of Jehoshaphat's captains (2 Ch. 17:9 f.).

AMATHEIS (אַמַּתְּהִישׁ [B.]), 1 Esd. 5:29 AV = Ezra 10:29 *ATHAL*.

AMATHIS (אַמַּתְּהִישׁ [A.]), 1 Macc. 12:25† AV, RV HAMATH (2:2).

AMAZIAH (אַמַּזִּיָּה) and in nos. 2-4, *אַמַּזִּיָּה*, § 29, 'Yahweh is mighty,' cp AMOZ; *אַמַּצְעִלְיָה* [BāL.], -*צִדְדִּי* [M.], -*מַאֲצִלְיָה* [BāQ.], -*מַאֲצִי* [L.].

1. b. Joash; father of Uzziah and king of Judah *circa* 780-740 B.C., see CHRONOLOGY, § 35, 37 f. 2 K. 11:1-19:2. Two points in his favour are mentioned in Kings—viz., that he punished his father's murderers and that he reconquered the Edomites who had revolted (see EDOM, § 3; JORTHIEL, 2). Whether he was to any extent successful against that restless and warlike people has indeed been doubted, but on grounds which will not bear examination.

Am. 1:11 f. is, in fact, more than probably a later insertion (see AMOS, § 9), so that the inference, drawn from this passage by Stade (in 37) and Kittel, that Amos knew of no great calamity befalling Edom in recent times, falls to the ground.

Amaziah's unfortunate challenge to Joash king of Israel (who treated him, according to the narrative, 'as a good-natured giant might treat a dwarf,' 2 K. 14:8 ff.) ended seriously enough, in the strengthening of the old supremacy of northern over southern Israel (see ISRAEL, § 31). It is quite possible that the Edomites took advantage of the weakness of Judah to recover in some degree their independence; but of this we have no information.

The Chronicler assures us (2 Ch. 25:14) that, on his return from the sanguinary battle in the 'valley of salt' (cp 2 K. 14:7), Amaziah adopted the worship of the Edomitic deities, forgetting that such an act would be possible only if the Edomites were either the masters or the allies of the people of Judah.

Like his father, Amaziah died a violent death; possibly, as Wellhausen, Stade, and Kittel suppose, the conspiracy against him was not unconnected with the disgrace which he had brought on his country. The Chronicler's treatment of Amaziah's reign is of special significance for the Chronicler's period (see Bennett, *Chron.* 413-417, and cp Kue. *Finl.* § 51, n. 4).

Sources. The account given in Kings is of composite origin. 2 K. 14:1-14 comes from a somewhat unfriendly source, which may be of N. Israelitic origin. The rest of Ch. 14 belongs to the Deuteronomitic compiler, who lays stress on Amaziah's better side, and who at the close of his story probably makes use of the royal annals.

1. Priest of Bethel, temp. Amos (Am. 7:10-12). See AMOS, § 1.
2. A SIMONIDE (1 Ch. 14:34 *אַמַּשִּׁיָּה*) [BāL.], -*אַמַּשִּׁיָּה* [L.].
3. A Merarite, temp. David (1 Ch. 6:45 [30] *אַמַּשִּׁיָּה* (?) [B.], -*אַמַּשִּׁיָּה* [L.], *מַאֲסִיאִי* [A]).

T. K. C.

AMBASSADOR, the EV rendering of the following three Hebrew words:—

1. *Mēšāh* (מֵשָׂחַ) in 2 Ch. 82:31 (*מְשָׁחִים*), more properly 'interpreter' (as EV in Gen. 42:23 [*מְשָׁחִים*]), in Is. 43:27 (RV mg. *ambassadors*, *ἀμπασι* [B.], but Av. Sym. *ἐρμηνεῖς*), and in Job 38:23 (*מְשָׁחִים* have *ἀμπασι* [B.]).
2. *Amšāh* (אַמְשָׁח) in 2 Ch. 35:21 Is. 30:4-38 f. Ez. 17:15 (x *מְשָׁחִים* send; cp *DBD Lex.*, *ad loc.*; *ἀγγελλοσ*), a word used indefinitely

of any messenger; see, e.g., of a priest (cp Mal. 2:7), a prophet (Is. 42:19; *οἱ ἀμπασι*), or (as *Evangelist*) an angel. *Amšāh*, accordingly, often approximates to the idea of 'ambassador': cp the emissaries sent to Edom, Sihan king of the Amorites, and Ammon (1 S. 20:14 21:2 *מְשָׁחִים*, Job. 1:12; EV 'messengers').

3. *šir* (שִׁיר) in Is. 18:2 (*שִׁירָא* [BāM.], and Th. but Av. *מְשָׁחִים*, Sym. *ἀμπασι*, *ἀμπασι*), *שִׁירָא*, cp 1 Macc. 1:28 7:20 8:1, 10:1, 15:37; RV (AV 'messengers'; *αγγελλοσ*), Job. 49:14 Th. 17 25:13 (EV in the last, *messengers*; *αγγελλοσ*) and Ob. 1:4 (*שִׁירָא*, a confusion with *שִׁירָא* or *שִׁירָא*). The denom. *w. šir*, 'to feign one's self an ambassador,' found in MT of Jos. 9 (cp EV) should be read *שִׁירָא*, 'take provision' (so RV mg. after most versions; cp Bennett, *A History*, *ad loc.*).

In the Assyriac 'ambassadors' represents *muššaru*, *muššaru* in 1 Macc. 9:70 11:14 21:1 (*μυσηρ* [BāV] in 1 Macc. 9:70 11:14 21:1), and *muššaru* in 2 Macc. 11:14 15:14 15:15 15:16 15:17 15:18 15:19 15:20 15:21 15:22 15:23 15:24 15:25 15:26 15:27 15:28 15:29 15:30 15:31 15:32 15:33 15:34 15:35 15:36 15:37 15:38 15:39 15:40 15:41 15:42 15:43 15:44 15:45 15:46 15:47 15:48 15:49 15:50 15:51 15:52 15:53 15:54 15:55 15:56 15:57 15:58 15:59 15:60 15:61 15:62 15:63 15:64 15:65 15:66 15:67 15:68 15:69 15:70 15:71 15:72 15:73 15:74 15:75 15:76 15:77 15:78 15:79 15:80 15:81 15:82 15:83 15:84 15:85 15:86 15:87 15:88 15:89 15:90 15:91 15:92 15:93 15:94 15:95 15:96 15:97 15:98 15:99 15:100 15:101 15:102 15:103 15:104 15:105 15:106 15:107 15:108 15:109 15:110 15:111 15:112 15:113 15:114 15:115 15:116 15:117 15:118 15:119 15:120 15:121 15:122 15:123 15:124 15:125 15:126 15:127 15:128 15:129 15:130 15:131 15:132 15:133 15:134 15:135 15:136 15:137 15:138 15:139 15:140 15:141 15:142 15:143 15:144 15:145 15:146 15:147 15:148 15:149 15:150 15:151 15:152 15:153 15:154 15:155 15:156 15:157 15:158 15:159 15:160 15:161 15:162 15:163 15:164 15:165 15:166 15:167 15:168 15:169 15:170 15:171 15:172 15:173 15:174 15:175 15:176 15:177 15:178 15:179 15:180 15:181 15:182 15:183 15:184 15:185 15:186 15:187 15:188 15:189 15:190 15:191 15:192 15:193 15:194 15:195 15:196 15:197 15:198 15:199 15:200 15:201 15:202 15:203 15:204 15:205 15:206 15:207 15:208 15:209 15:210 15:211 15:212 15:213 15:214 15:215 15:216 15:217 15:218 15:219 15:220 15:221 15:222 15:223 15:224 15:225 15:226 15:227 15:228 15:229 15:230 15:231 15:232 15:233 15:234 15:235 15:236 15:237 15:238 15:239 15:240 15:241 15:242 15:243 15:244 15:245 15:246 15:247 15:248 15:249 15:250 15:251 15:252 15:253 15:254 15:255 15:256 15:257 15:258 15:259 15:260 15:261 15:262 15:263 15:264 15:265 15:266 15:267 15:268 15:269 15:270 15:271 15:272 15:273 15:274 15:275 15:276 15:277 15:278 15:279 15:280 15:281 15:282 15:283 15:284 15:285 15:286 15:287 15:288 15:289 15:290 15:291 15:292 15:293 15:294 15:295 15:296 15:297 15:298 15:299 15:300 15:301 15:302 15:303 15:304 15:305 15:306 15:307 15:308 15:309 15:310 15:311 15:312 15:313 15:314 15:315 15:316 15:317 15:318 15:319 15:320 15:321 15:322 15:323 15:324 15:325 15:326 15:327 15:328 15:329 15:330 15:331 15:332 15:333 15:334 15:335 15:336 15:337 15:338 15:339 15:928 15:929 15:930 15:931 15:932 15:933 15:934 15:935 15:936 15:937 15:938 15:939 15:940 15:941 15:942 15:943 15:944 15:945 15:946 15:947 15:948 15:949 15:950 15:951 15:952 15:953 15:954 15:955 15:956 15:957 15:958 15:959 15:960 15:961 15:962 15:963 15:964 15:965 15:966 15:967 15:968 15:969 15:970 15:971 15:972 15:973 15:974 15:975 15:976 15:977 15:978 15:979 15:980 15:981 15:982 15:983 15:984 15:985 15:986 15:987 15:988 15:989 15:990 15:991 15:992 15:993 15:994 15:995 15:996 15:997 15:998 15:999 1600).

A distinction between messengers and diplomatic agents naturally presupposes an acquaintance with state-craft hardly possible in Israel before the monarchy, and even in David's time emissaries from one court to another were liable to be abused, although the punishment inflicted upon the offenders may suggest that ambassadorial rights were beginning to be recognised (see 2 S. 10:1 ff.).

The first use of *šir*, apparently the only approach to a specific word for 'ambassador,' naturally belongs to the time when Israel had been forced into diplomatic relations with Egypt and Assyria (of whose frequent intercommunication at a much earlier period the Amarna tablets tell us so much). From the nature of the case *šir* is presumably a loan-word.² The employment of the term *mēšāh*, 'interpreter,' is the more interesting since Aramaic was the language of diplomacy for Assyrians and Hebrews; cp Is. 36:11, and see ARAMAIC LANGUAGE, § 2. See POST, *Kaushakh*, 80-81 f.

AMBER (אַמְבֵּר; in pause [Ez. 8, 2, where, however, Co. regards it as a gloss] *אַמְבֵּרָה*).

Cp EGYPT, *hmn*, 'electrum' or 'bronzite'; see EGYPT, § 36 last note, also Lag. *Electrum*, 187; but cp *Electrum*, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514,

himself usually employs the expression 'pale gold' when he alludes to the native alloy. Sophocles, too (*l.c.*), shows that he is employing the word in an unusual and extended way, by appending the qualifying phrase 'from Sardis'.

Usually the word has quite another meaning.

In Homer, *ελε*, where the word occurs thrice and is significantly applied to an article trafficked in by Phoenicians, the trader who captured Eumeus is described (*Od.* 15.46) as having a golden necklace (αετία δ' ἠλεκτροσάν-ερατο) strung with pieces of electrum (similarly in *Od.* 18.26, ἠλεκτροσάν ερατόν). The use of the term in the plural in these passages forbids us by any possibility taking it as meaning the gold and silver alloy.

If, then, by electrum the versions do not mean metallic electrum they must mean amber. There are, however, two kinds of amber, and it remains to consider which is meant. The one, usually a dark red (rarely of a light colour), is found in the south of Europe (Catania, Reggio) and in the Lebanon; the other, usually of a yellow or golden colour, but occasionally darker in hue, has from ancient times been met with in great abundance on the shores of the Baltic (whence our chief modern supply is derived), and also occurs on the coasts of the North Sea. As the Phoenician had red amber thus at his very door, he may early have learned to employ it for purposes of art and ornament, just as he learned his art of dyeing with purple from having the murex in abundance by his shores. Moreover, red amber is, as stated above, also to be found in Sicily, and may have been procured thence. As increased demand called for an increased supply, traders, sailing round the coast of the Aegean in quest of new fishing grounds for the purple-fish, would naturally search keenly for fresh supplies of the precious substance, for the ancients prized amber far beyond its modern value.

Its power of attracting light substances, and the fact that when warmed it emitted a faint perfume, invested it for them with an odour of HESPERIS. How far they actually ascribed to it certain medicinal properties, as is still the case in the East with ambergris—an animal substance that has lent its name (adopted by us from the Arabs) to amber—it is impossible to say. As these two substances, which have really nothing in common save the power to emit a kind of perfume, have been called by the same name, the fact that ambergris is prized as an aphrodisiac may perhaps indicate that there was some belief that amber (electrum) possessed some similar potency. This is actually stated by Pliny (*VII* xxxvii. 311), who tells us that in his own time the peasant women in the regions north of the Po wore amber necklaces, chiefly as an ornament, but also for medical reasons, and goes on to enumerate a number of ailments for which it was regarded as a specific, either taken as a potion or applied externally. That its property of attraction (whence our modern word electricity) was early known to the Greeks is proved by the notice of Thales.

But how would red amber naturally give a name to a metallic electrum? To the eye of the Greek the

essential difference between pure gold and the alloy (to which we have a

2. Perhaps yellow amber. English confined the name electrum) being the pale colour of the latter (λευκός χρυσός), any name which he would apply to it to differentiate it from pure gold would naturally be one which would indicate this paleness. The reddish amber of the South would not furnish such a name, having no resemblance in hue to metallic electrum. But the yellow Baltic amber, varying as it does in shade from almost white to a bright golden, would give a fairly accurate description of the alloy, whose hue varies with the proportion of its component parts. Similarly when, in the second passage quoted above from the *Odyssey*, a necklace of gold set with pieces of amber is likened to the sun (ἥλιου ὤς), the golden (Baltic) amber answers to the description far better than the red. We may assume, then, that from remote ages supplies of Baltic (yellow) amber as well as of red amber were available.

Nor is this a mere hypothesis. It has been removed from the realm of probability into that of established fact, by the finding of amber in the tombs discovered at Mycenæ by D. Schliemann in 1876, and of beads of the same material in his more recent excavations at Tiryns. As the red amber and the Baltic amber differ essentially in chemical composition, Dr. Helm, an eminent chemist of Dantzig, has been able to prove

by actual analysis that this amber is the Baltic variety (Schliemann's *Tiryns*, 1886, App. p. 374).

It was, doubtless, from the German tribes along one of the highways which were in constant use in historic times that the ancient supplies of Baltic amber were obtained. We know that down to the time of Herodotus (about 430 B.C.) the Greeks had not as yet opened up any line of communication with the amber coasts from the side of the Euxine.

Herodotus visited Olbia, and though he has given a pretty full account of those regions, mentioning a trade-route leading towards the East, and though we know from his own words (311) that the amber trade was a subject which had excited his attention, he expresses the commonly received opinion that it was obtained at the mouth of the Eridanus [Po].

Neither does Baltic amber seem to have reached Greece in his time by any Russian-Balkan route (59). Down to the time of Theophrastus (315 B.C.) it was entirely through northern Italy that the Greeks got their supply of it.¹ The lake-dwellings of Switzerland and the valley of the Po have yielded abundance of beads of Baltic amber, and similar beads are well known in the tombs of central Italy. We need have little hesitation, therefore, in believing the statement of Pliny² (*VII* xxxvii. 344) that it was brought by the Germans into Pannonia and thence reached the Veneti, who dwelt at the head of the Adriatic.³ As the main lines of commerce change but little through the ages, it was probably by this route that the amber beads reached Mycenæ and Tiryns in the bronze age, and articles of the same kind may even have reached Palestine. The bead found at Lachish, however, has been proved, since this article was in print, to be not Baltic amber, but, like that found at Tell-Zakariya (*PEF*), April 1899, p. 107), a resin, and no trace of amber has yet been found in Mesopotamia (Per-*Chip.*, *Art. Child.* 2362). Nevertheless it is possible that even the yellow variety may have reached Palestine in the sixth century B.C., and the view of the ancient versions that the Hebrew *hashmal* indicates this substance may be correct.

W. R.

AMEN אָמֵן: ⁴ in \mathfrak{S} usually גְּבוּרָה; ⁵ in work of Chriener אָמֵן, and so in NT very often,⁶ an adj.

1. In OT, signifying stability, used only as an interjection expressive of assent of one kind or another.⁸ Three stages may be distinguished: (1) *Initial Amen*, referring back to words of another speaker: probably the earliest usage, occurring even in common speech⁹ (1 K. 136 Jer. 286 115), the only certainly pre-exilic Amen).¹⁰ (2) *Detached Amen*, the complementary sentence being suppressed (Dt. 27 15-26 Neh. 5 13; double in

¹ They appear to have confused with it a stone called *Λυγούριον* or *lygurium*; as so often occurs they mistake the region whence the article was transmitted to them for the actual place of production (Theophr. *De Lap.* 16).

² Pliny's statement is confirmed by a remark of Herodotus (196) from which it appears that the only knowledge then obtainable respecting central Europe came by way of the Veneti, a fact which shows that the Greeks knew of a line of communication in this direction.

³ Pytheas of Massilia had, in the fourth century B.C., found the Guttones gathering it and giving it in trade to the Tuttones.

⁴ It probably occurs in twelve places in the Hebrew, for in Is. 65 16, although אָמֵן (עֲשֵׂיתָמֵן), Sym., Pesh., and Hg. have *amen*, it should probably (so Che. Di. Du. Rys. in Vg., and perhaps Targ. Jon. אָמֵן אָמֵן) be vocalised otherwise, perhaps אָמֵן (as in Is. 25 1, where indeed the Gk. Vss. [but Sym. not, as usual, אָמֵן, but πῆσαι] and Vg. read *amen*).

⁵ \mathfrak{S} read it also, in a corrupt text, in Jer. 35 11 and in Jer. 39 19. EV has *amen* always; RV even in Jer. 13 5. It occurs in six places in \mathfrak{S} Apoc. (for Judg. 13 20 cp Eih. Pesh.). Vg. adds *Isaiah* 12 13 and 2 Esd. [Neh.] 13 31; in Ecclesi. 60 29 it is probably late.

⁶ Eight (eleven) times, ἀληθῶς ONCE.
⁷ There is much variety of text. TR has it in some 119 places, of which RV rejects 10 (see below, § 2).

⁸ See, however, Barth. *36* § 3 and 7A.

⁹ For three kinds see *Sheshu'oth* 36a (mid.).

¹⁰ It seems most likely that in Jer. 39 19 \mathfrak{S} read אָמֵן as אָמֵן = אָמֵן אָמֵן.

¹¹ \mathfrak{S} has it also in Jer. 39 15 11 (Is. 25 1 is not pre-exilic).

Nu. 5:22 and in Neh. 8:6 = 1 Esd. 9:47). Amen must have been in liturgical use in the time of the Chronicler (1 Ch. 16:36 = Ps. 106:4). Later, but very similar, are Judith 13:20 Tob. 9:12 (Vg.), and Tob. 8:8. With the fact that none of these relates to temple service may be compared, e.g., *Jer. Berach. 14c*. The Chronicler, however, appends Amen (*l.c.*) to extracts from Pss. 105 and 96.¹ (3) An apparent final Amen, there being no change of speaker; frequent from NT Epp. onwards, but in OT only (*a*) in subscription to first three (four) divisions of Psalter and 3 and 4 Macc., and (*b*) at end of prayer, Neh. 13:31 and Tob. 13:18 (both only in Vg.). In Tob. 14:15 (BKA) we have almost a fourth stage: (4) a simple *subscriptional* Amen, like that, e.g., of the TR of Lk., without, strictly speaking, any preceding doxology.²

Just as Θ translates, as we have seen, by $\gamma\epsilon\nu\alpha\iota\omicron$ in the Law, the Prophets, and even the Psalter, but has

2. In NT. $\alpha\mu\epsilon\eta\upsilon$ in the Chronicler and $\alpha\mu\epsilon\eta\sigma\upsilon\phi\alpha$,³ so in NT Lk. often avoids (omits or translates) Amen, and so even Mt. and to a less extent Mk. Stage (1) is represented by only Rev. 7:14 19:4 22:20; (2) by Rev. 5:14 and the usage testified to by 1 Cor. 14:16; (3) by usage of Epistles (fifteen doxologies, mostly well-attested; ⁴ nineteen blessings, mostly ill-attested).⁵ There is no real instance of (4).

The Amens of the Gospels (fifty-two in Synopt., twenty-five in Jn.) are a peculiar class, declared by Delitzsch⁷ unparalleled in Hebrew literature: initial Amens⁸ like group (1), but lacking the backward reference. The sayings that they introduce are only sometimes at all related to what now precedes them. The double $\alpha\mu\epsilon\eta\upsilon$ (twenty-five times) of the Fourth Gospel, which occurs even in Jn. 13:38 (= Mk. 14:30, etc.), Delitzsch tried (*l.c.*) to explain as = Aram. *amen amēna* (= *amen amēnā* = $\alpha\mu\epsilon\eta\upsilon$ $\alpha\gamma\omega\omega$), which sounded like $\alpha\mu\epsilon\eta\upsilon$ $\alpha\mu\epsilon\eta\upsilon$; but Dalman argues strongly against this.⁹ For a suggestion of a different kind see GOSPELS, § 50 n.10.

The key to Rev. 3:14 (δ $\alpha\mu\epsilon\eta\upsilon$), 'the faithful and true witness', is doubtless the traditional Massoretic pointing of Is. 65:16 (at least as old as Sym.) with possibly a reminiscence of the practice of Jesus and of 2 Cor. 1:20. Here, again, $\alpha\mu\epsilon\eta\upsilon$ is neut., and the meaning is not quite so clear; but probably $\alpha\mu\epsilon\eta\upsilon$ has about the same meaning as in 1 Cor. 14:16.

The liturgical use of Amen, vouched for in apostolic times by this last passage, is attested, as regards the Eucharist, by Justin Martyr for the second century (*Apol. 1. 65*, δ $\sigma\upsilon\mu\beta\alpha\lambda\omicron$ $\lambda\alpha\omicron\upsilon\varsigma$ $\epsilon\upsilon\theta\upsilon\delta\epsilon\iota\sigma\tau\omicron\varsigma$ $\lambda\epsilon\upsilon\gamma\omega\omega$ $\lambda\iota\tau\upsilon\gamma\iota\omicron$), and,

3. Elsewhere. $\alpha\mu\epsilon\eta$ in the second century (*Apol. 1. 65*, δ $\sigma\upsilon\mu\beta\alpha\lambda\omicron$ $\lambda\alpha\omicron\upsilon\varsigma$ $\epsilon\upsilon\theta\upsilon\delta\epsilon\iota\sigma\tau\omicron\varsigma$ $\lambda\epsilon\upsilon\gamma\omega\omega$ $\lambda\iota\tau\upsilon\gamma\iota\omicron$), and, e.g., by Jerome two centuries later (preface to *Mohammedans are in the habit of adding it after reciting the first Surah of the Koran*). The synagogue still uses it,¹⁴ and Mohammedans are in the habit of adding it after reciting the first *Surah* of the Koran.

For references to older literature see, e.g., Vigouroux, *Bib. Dict.*, s.v.; for references to passages in Talm. see, e.g., Kohut's *Aruch*, s.v.; for usage of temple doxology

4. Literature. *Gratz, Mithr.*, 1872, pp. 481-96, and *Paulinen 62 f.*, 91 ff.; for Rabbinic treatment, e.g., Jehuda Khalas, *Seder ha-Miṣṣer*, *Perq.*, 4 (ed. Mantu, 42); Yosef Caro, *Beth Ya'acōf (Orach-Najyim)* ed.

¹ Gratz accordingly argues that our Psalms are a synagogal arrangement.

² This is hardly true of Θ .

³ Except Judith 13:20.

⁴ W & H give, in square brackets, also a final 'Amen.'

⁵ All except 2 Pet. 3:18.

⁶ Also Rev. 1:7 (after $\nu\alpha\iota$; neither doxology (?) nor benediction). Rev. 1:18 1 Jn. 5:21 2 Jn. 13 are excluded in RV. Cp *JQR* 98, n. 2.

⁷ *Talm. Stud.* ix. $\alpha\mu\epsilon\eta$ $\alpha\mu\epsilon\eta$ in *ZLTh.*, 1856, pp. 422-4.

⁸ All in sayings of Jesus. The five finals (Mt. 6:13 28:20 Lk. 24:53 Jn. 21:25 Mk. 16:20) are wanting in the best MSS.

AMETHYST (אֲמֵתִישֵׁט, Ἀμεθυστος [BAF], $\cdot\text{COC}$

[L], *amethystus*, احم حم). The amethyst is a variety of quartz (SiO_2) or rock-crystal (see CRYSTAL) of a clear purple or bluish violet colour (from iron peroxide or manganese), often marked by zigzag or undulating lines (the colour being disposed in clouds). The Greek name (Rev. 21:20; cp Ex. 28:19 = 39:12 [36:19 in Θ]), which was adopted into Latin, implies an ancient belief that the wearer of an amethyst could drink wine freely without fear of intoxication. The source of the belief is found in Theophrastus (*Lap.* 31), who is the earliest Greek writer to mention the stone, which he calls $\tau\omicron$ $\alpha\mu\epsilon\theta\upsilon\sigma\tau\omicron\varsigma$. It is a simple case of sympathetic magic, for Theophrastus says (*Lap.* 31) $\tau\omicron$ $\delta\epsilon$ $\alpha\mu\epsilon\theta\upsilon\sigma\tau\omicron\varsigma$ $\alpha\iota\omega\sigma\tau\omicron\upsilon\sigma\iota$ $\tau\omicron$ $\lambda\omicron\upsilon\sigma\iota$ ι $\tau\omicron$ $\nu\iota\omega$ wine-coloured, hence its amuletic potency against the effects of wine. Greek engravers, accordingly, not infrequently cut Bacchanalian subjects on this stone. Hence the point of several epigrams in the *Anthologia Graeca* (e.g., ix. 752, on the ring of Cleopatra, adorned with Methē, Drunkenness; and ix. 748, on a gem engraved with a figure of Bacchus). It seems also to have been believed that the amethyst caused those who wore it to dream, or to have propitious dreams (cp the extract from Burhan in Lag. *Mithr.* 1:236). Hence the engraved *ahlamā* of the 'Breastplate' of P (Ex. 28:19 = 39:12; explained by Kimchi as the dream-stone; in אהלהם 'to dream') has been commonly identified with the amethyst (thus apparently Θ), so much engraved by the Greeks. Cp PRECIOUS STONES.

Del., on the other hand (*Heb. Lang.* 36 n.), derives the name from *Ahlāmā*, an Armenian people and district often mentioned in Babylonian and Assyrian texts, supporting the suggestion by referring to Sennacherib's repeated mention of Armenia and its neighbourhood 'as a rich mine of certain precious stones. Bondi considers it an Egyptian loan-word (*akhlāmā*), while Dh. connects it with אהלהם, the mallow, and adopts the explanation 'green malachite.' W. R.

AMI (אֲמִי), Ezra 2:57 = Neh. 7:59 AMON (אֲמוֹן, 3)

AMINADAB (אֲמִינָדָב [Ti. WH]), Mt. 14 and (אֲדָמַיִן [WH], mg. אֲדָמַיִן) Lk. 3:33 AV = RV AMINADAB (אֲמִינָדָב, 1).

AMITTAI (אֲמִיטַי, § 52, from אִמְתָּ, 'truth,' perhaps a theophrasous compound; אֲמַחֲזֵר [BAL]), father of the prophet Jonah (2 K. 14:25 Jonah 1:1).

AMMAH, The Hill (אֲמָה, אֲמָה; \circ BOYHOC אֲמָמָה [B], אֲמָמָה [A], אֲמָמָה [L], אֲמָמָה [BAF], [Jos. *Ant.* vii. 13]), an unknown hill 'that lieth before Giah (?)', where Joab and Abishai stayed their pursuit after Abner (2 S. 24:4). From a comparison of $\nu\tau$. 24 and 25 it is probable that we should restore the name also in $\nu\tau$. 25 for 'an hill,' AV 'an hill' (אֲמָה [B]).

So Bu. (SOT), Sam. ad *loc.*, following We.'s suggestion that the two hills are the same. Otherwise Lk., who in $\nu\tau$. 25 conjectures אֲמִיטַי (אֲמִיטַי), the ascent of Adummim.

In $\nu\tau$. 24 Sym. (אֲמָה, gully) Theod. (ἀδραμαγός) and Vg. (*aqueductus*) give the word a meaning which it bears only in post-biblical Heb.; moreover, since the word אֲמָה has no article prefixed, it cannot be an appellative here.

AMMI (Hos. 2:1, and in Lo-ammi, 2:23[25]). See L^o-RUHAMAH.

AMMI, Names with. The element 'ammi (אֲמִי) or, at the end of words, 'am (אֲמִי) has been interpreted in

three different ways—viz., as meaning (1) [my] people, or (2) [my] kinsman or uncle, or else as being (3) the proper name of a paternal uncle.

So long as this group of names¹ was regarded by itself in the light of Hebrew philology alone,

¹ The exact limits of the group are uncertain; for in the case of several names that have been included in it, it is impossible to doubt

relations between the Israelites on the one hand and the Moabites and the Ammonites on the other (Dt. 2.9-19). All we can say is that the story in Gen. 19.36-38 (J) proves an early Israelitish sense of kinship (combined however with moral repugnance) to the Moabites and Ammonites, so that it is not in itself incredible that the Israelites should have refrained from attacking these two peoples. True, in Jos. 13.25 (P) we are told that 'half the land of the Ammonites was assigned to the tribe of Gad; but the district intended here may be the Amoritish kingdom of Sihon, and so pre-supposed the view of history given in Judg. 11.13-22 (see above, § 2).

Dt. 23.4 [3] affirms that the Ammonites and Moabites hired Balaam to curse Israel, and did not supply Israel with provisions, as a punishment for which they are to be excluded from the Israelitish community to the tenth generation.

The spirit and purport of this passage, however, is at variance with that of Dt. 2.7, and the narrative of Balaam in Nu. 22-25 (mainly JE) speaks only of the Moabites. For several reasons it is very probable that Dt. 23.1-8 [2-6] (see BALAAM, § 7) is a record, not of the pre-exilic, but of the post-exilic period when 'the problem as to who should and who should not be admitted into the community was a burning question' (Ku. *Hex.* 265). At any rate the view which this passage presents of the Ammonites cannot be accepted.

It is of more historical interest that in Nu. 22 we have a combination of two distinct traditions (E and J) respecting the origin of Balaam, one of which represents him as an Ammonite (see BALAAM, § 1).

The settlement of Israelitish tribes in Gilead and Bashan (see MANASSEH) could not but excite the animosity of the neighbouring peoples. No doubt there was a chronic border-warfare sometimes developing into more serious hostilities, sometimes mitigated by truce, alliances, or the subjection of one or other of the combatants. In Judg. 10.6-12 we have an account of the deliverance of the Israelites of Gilead from Ammonitish oppressors by a recalled outlaw named Jephthah. The traditional stories have been much edited (see JUDGES, § 17) and tell us naturally more about Jephthah (who was one of the actors in a most

moving tragedy) than about the Ammonites. We are upon safer ground in the story of Saul. The victory of this heroic chieftain over the Ammonitish king Nahash, who, encouraged by the weakness of cis-Jordanic Israel, had besieged Jabesh-gilead, and displayed his deep contempt for his foes, is doubtless historical (1 S. 11). It is also thoroughly credible that David, when out of favour with Saul, received friendly treatment from Nahash (so we must interpret 2 S. 10.2). Equally intelligible is it that a change ensued in the relations between David and the Ammonitish court when the former had taken up the work, interrupted by the death of Saul, of liberating and uniting the Israelitish tribes. Only we must not, it would seem, place the war with the Ammonites too late. The gross insult offered by Hanun, the son of Nahash, to the ambassadors of David implies that the power of the latter had not yet been so consolidated as to wipe out the recollection of the days of Israel's humiliation. The insult was bitterly avenged. Ammon and its allies were defeated, and the power of the former was, for the time, broken (see 2 S. 12.31).

It is noteworthy that Shobi, son of Nahash, of Rabbath-ammon, was friendly to David during Absalom's revolt (2 S. 17.27), that ZELK, an Ammonite, was among David's 'thirty' (2 S. 23.7), and that Solomon had an Ammonitish wife (NAAMAH, 2) whom one account (see Klostermann) makes the granddaughter of Nahash, and who became the mother of Rehoboam (1 K. 14.21; the details in 1 K. 11.1-8 are untrustworthy). See NAHASH, 3.

It is probable that the Ammonites recovered their independence after Solomon's death. Later, like the kings of N. Israel, they became tributaries of the Assyrians; this is expressly mentioned by Shalmaneser II., Tiglath-pileser III., Sennacherib, and Esarhaddon (Schr. *KGF* and *COT*). So far as our oldest evidence goes, they caused no serious trouble again to the Israelites till the time of Jeroboam II., when, as Amos tells us (Am. 1.13), they made incursions into Gilead, and displayed great

inhumanity, which probably from their own point of view was but justifiable revenge. The Chronicler, indeed, relates victories over the Ammonites won by Jehoshaphat and Jotham (2 Ch. 20.27-5, cp 28.6); but these, according to Robertson Smith (*OT/C*¹) 146, are Midrash. From Jer. 49.1, we may infer that after the deportation of the trans-Jordanic Israelites in 734 the Ammonites occupied the land of Gad; and, even if Jer. 49 be post-exilic, the fact is too probable to be doubted. It is this outrage upon 'Yahwe's people' which seems to be alluded to in Zeph. 2.8-11 Jer. 3.26 [25] 25.21. Once again the vindictiveness of the Ammonites was manifested when, in the reign of Jehoiaikim, they made incursions into Judah as the auxiliaries of Nebuchadnezzar (2 K. 24.2). This is probably referred to in Ezek. 21.28 f. [25 f.]. Later, however, the general fear of the Babylonian rule seems to have altered the policy of the Ammonites, for Jer. 27.3 brings before us the king of Ammon entering into a league against Babylon with Zedekiah and other princes. It is to this act of rebellion that Ezekiel refers (21.18-32 [13 f.]) when he anticipates the punishment of the Ammonites, while in 25.1-7 he threatens the same people with destruction for their malicious demeanour at the captivity of the Jews. Did the Ammonites withdraw in time from the anti-Babylonian league? It is a very probable conjecture, and, strange as it may seem, Jewish fugitives are said to have sought refuge with Baalis, king of Ammon, who instigated them basely to assassinate the noble (GEBELAH, 1 [Jer. 40.14]).

In Daniel's time we find an Ammonite¹ among the chief opponents of Nehemiah, and at the same time connected by marriage with distinguished Jews (Neh. 6.1; 13.4; cp TOBIATH, 4).

6. Persian and Greek. Other Ammonitish women had married into Jewish families (Ezra 9.1 f.)—i.e., according to Kisters, into families which had remained on Jewish soil and not been touched by the reforming spirit of Ezra (see EZRA, ii. § 12). This would be all the easier if we are right in inferring from Jos. 13.24 (27.12-23 belong to P) that in *post-exilic* times there was in Benjamin a place called 'Village of the Ammonites' (CHEPHAR-HAAMMONAI). It is to this period of mixed marriages that we should not improbably refer the composition of Dt. 23.1-8 (see above), in which passage are mentioned the same three peoples as in Ezra 9.2.²

Nearly three hundred years later the Ammonites (Timotheus) among the enemies defeated by Judas Maccabæus (1 Macc. 5.6-8); they are also mentioned in a psalm assigned by some to the same critical period (Ps. 83.7).³ Up to this time, then, Ezekiel's threat (Ezek. 25) against the Ammonites as well as against the Moabites and (virtually) the Edomites that they should be dispossessed by the 'sons of the East' (i.e., the Arabian nomads) had not been fulfilled so far as the Ammonites are concerned. Their fate, however, cannot have been very long delayed. In the fifth century B.C. we already find 'Arabians' among the enemies of Nehemiah (Neh. 2.9.14 [1]), and we can hardly doubt that by degrees the Ammonites, like the Moabites before them, had to amalgamate with the land-hungry intruders.

It is true, Justin Martyr, who died 166 A.D., states (cp *Tryph.* 119) that the Ammonites were still numerous in his time; but Josephus (*Ant.* 1.11.5) once says precisely the same thing of the Moabites, though elsewhere he speaks of the Moabites and Gileadites as Arabians (*Ant.* xiii. 9.2), which agrees with the statement of Origen (*in Jobum* 1) that the term Ammonites had become merged in that of Arabs. This makes it probable that the omission of 'Ammonites' in 1 Esd. 8.69 (= Ezra 9.1) was not accidental but deliberate.

The close connection of Ammon with Moab, and, in

¹ See, however, BETH-HORON, 4.

² Prof. Ryle (*Ezra* and *Neh.* 115) thinks that 'the mention of the Ammonite, Moabite, and Egyptian together, suggests the influence of Deut. 23.3-7 [4 ff.]'. Guthe (*SBOT*) assigns the enumeration of the peoples to the Chronicler.

³ Cp. also ACHTIS.

a less degree, with Israel, and the fact that the Moabites

7. Language. spoke a dialect of Hebrew (see HEBREW, § 6) renders it almost certain that the Ammonites also spoke the 'language of Canaan.' This view is confirmed by Ammonitish proper names, e.g., Hanun, 2 S. 10:1 (חנן 'treated graciously'); Nahash, 1 S. 11:1 (נחש 'serpent'); Naamah, 1 K. 11:21 (נעמז 'pleasant'); and the royal names Amminadab (see above, § 1), Padihu = Abded (Jer. 36:6), and Ba-sha = Baasha (Schr. *COI* 1:167).

8. Religion. Baethgen's argument (in his *Beiträge* to the polytheism of the Ammonites) is based partly on Judg. 10:6, partly on the analogy of Moabitish religion. The only extant Ammonitish proper name, however, which can be held to be compounded with a divine name other than that of the supreme God, is Baalis (see BAALIS). At any rate Milcom was as much the great national god of Ammon as Chemosh was of Moab (see MOLOCH); the strange slip by which Jephthah is made to speak of Chemosh as the god of Ammon suggests that 'Ammon' has been substituted by an editor for 'Moab' in the passage (Judg. 11:22-23) in which it occurs. In 2 S. 12:30 where Milcom (*q.v.*) should be read instead of *malikim* 'their king,' reference seems to be made to a huge statue of Milcom in the capital city. The statement that Solomon became a worshipper of Milcom in his old age rests on no good authority (see SOLOMON). When we pass to later times, it is tempting to infer with We. (*JIG* 2:156, n. 1) from the name of Nehemiah's Ammonitish enemy that the worship of Yahwê had begun to attract the Ammonites. The dissolution of the old national bonds may have favoured the growth of a monotheistic tendency. T. K. C. (W.H.B.)

AMMONITES (עַמּוֹנִים), 2 Ch. 20:1, RV⁹⁵ MEUNIM (עֲמוֹנִים).
AMMONITISS (עַמּוֹנִית), 1 K. 14:21 ff. 2 Ch. 12:13 24:26. See AMMON.
AMNON (אֲמֹנִן), in 2 S. 13:20f אֲמֹנִן, i.e., 'safe', by some regarded as a diminutive used in a contemptuous sense [cp Dr. *TBS*, *ad loc.* *Wt. Ar. Gram.* (2) I. § 269; Ges. *Heb. Gram.* [ET 98] 250, n. 1]; We. [*JIG* (2) 24, n. 2] explains as אֲמֹנִינִן, 'my mother is the serpent,' see NUN; אֲמֹנֹן [BAL], אֲמֹנֹן [A, 2 S. 13:26 *sup.*].
 1. David's eldest son (see DAVID, § 41 iii. d), slain by Absalom in revenge for his outrage on Tamar (2 S. 3:2 13:1 ff.; 1 Ch. 3:1 f).
 2. In genealogy of JUDAH (1 Ch. 4:26f).

AMOK (אֲמוֹק), 'deep, inscrutable', post-exilic priestly family; Neh. 12:720 (om. BN^aA); אֲמוֹק [L and, in 7:7, N⁹⁵ *sup.* *sup.*, in 7:2, N⁹⁵ *sup.* *inf.* אֲמוֹק]. See EZRA, 2, § 6 b, § 11.
AMOMUM (אֲמוֹמוֹן [Ti. WH following N^aAC]), an unidentified aromatic substance, mentioned only in RV mg., Rev. 18:13 (RV Spice, AV om. with BN^c; Wyclif, however, gives 'amome'). The classical 'amomum' (= 'blameless') was a shrub of Eastern origin ('Assyrium vulgo nascetur amomum,' Verg. *Ecl.* 4:25), from which were made oil for funeral rites and unguents for the hair. As, however, it is used also of any odour pure and sweet (Salm. *ad Solin.* 284), its identification is uncertain. It may possibly be the vine *Cissus vitifera* (Linn.), a native of Armenia. The modern term is applied to a genus of aromatic plants (N.O. Zingibraceae), including the cardamon and seeds of Paradise.
AMON (אֲמוֹן), Jer. 46:25 RV. See NO-AMON.
AMON (אֲמוֹן, אֲמוֹן, § 67; 'firm'? workmaster'? but see below). 1. (אֲמוֹן [BA], -אֹן [L]; אֲמוֹן.) Fairly well attested as the name of the son of king Manasseh, himself also king of Judah; 2 K. 21:28-26 (אֲמוֹן [A],

1 Ch. 3:14 (אֲמוֹן [B^a*. see Swete], 2 Ch. 33:20-22. After a reign of 'two years' (circa 638 B.C.; see CHRONOLOGY, § 36) he was assassinated by certain of his courtiers (see Kittel, *Hist.* 2:378). The event produced a profound sensation. Amon, though disliked by religious reformers, was a favourite with the people, who avenged his death. If his name is derived from the Egyptian (Theban) sun-god, it is an interesting proof of the fluctuations of political party (Egyptian and Assyrian) in the reign of Manasseh (cp ISRAEL, § 36).

2. (Σαμων [AL]) less certainly, the name of a governor of Samaria under Ahab; 1 K. 22:26 (Σαμων [B], Ammon [A]) = 2 Ch. 18:22 (Lump [L]). Σ is plainly strongly assimilated to the pronunciation of the Hebrew Ammon. Σαμων, however, can hardly be correct, but Emer or Emmer is the Σ form for the Inner of MT in Jer. 29:1 and elsewhere (see ISRAEL, *sup.*) and of this form both Amon and Semei (שִׁמְעִי) can easily have arisen as misunderstandings. See STA. 2:4 ff. 5:12-173 ff.

3. (אמעי [L]). The b'ne Amon (50 MT), a group of 'Solomon's servants' (see NETHINIM) in the great post-exilic list (see EZRA, ii, § 9); Neh. 7:59 (אמעי [BMA]) = Ezra 2:57 אמעי (אָמַי); cp EB: ἀμωκιστῶν; אמעי [BA] = Ezr. 2:54 אַמְוִי, RV ΑΛΕΩΝ (αλλων [B], αλλ, [A], etc., ΑΛΩΝ ΔΑ for M). T. K. C.

AMORITES (אֲמֹרִי, collective, and always with article, except Nu. 21:29 Ezek. 16:45; ΑΜΟΡΑΙΟΙ [BAL]).

Other Σ readings are 1-αμωροι [Is. 17:9], αμωραϊοι [Dt. 1:4 f., 1 K. 21:1 A, 1 Ch. 1:14], αμωραϊοι [Isa. 17:9], αμωροι [Gen. 14:13 A], αμωριε [Ezra 9:1 BAL], αμωραϊοι [1 K. 17:43 B].

In the List of Peoples 'the Amorite' appears among sons 'begotten' by Canaan (Gen. 10:16 J = 1 Ch. 1:14).

The term is used: (1) of a pre-Israelitish people living E. of the Jordan, Nu. 21:13 21:25 Josh. 24:8 (all E), also Josh. 2:10 9:10 (JE), Dt. 1:4 3:8 49 Judg. 10:9 11:1 K. 4:19 (S⁹⁵ *om.*), Ps. 137:1 136:19, and elsewhere; (2) of a people on the W. of Jordan, Josh. 10:25 24:11 24:18 (all E), also J. 11:7 (JE), 24:10 (S⁹⁵ *om.*); (3) of southern people, Dt. 17:44, cp Gen. 14:7; (4) of the ancient population of Canaan in general, Gen. 15:16 (J or R), 48:22 (E, Am. 2:9 f., and Is. 17:9) (Eng. WRS Ch. following S⁹⁵ *sup.*) with the Hivites.

The Amorites are mentioned also in the lists of Canaanitish peoples subjugated by the Israelites (Gen. 15:21 Ex. 38 and elsewhere). The lists commonly include the Canaanites, Girgashites, Hittites, Hivites, Jebusites, and Perizites, and once, in Gen. 15:19-21, the Kenites, Kenizites, Kadmonites, and Rephaim, for which reference must be made to the separate articles. On the variation in the order of these enumerations, which are obviously 'rhetorical rather than geographical or historical,' cp Dr. *Deut.* 66 ff.

The passage in Amos (2:6f) is remarkable, because Amorite is used, precisely as by the Elohist (E), as a general term for the primitive population of Canaan, and because the Amorites, as an extinct race, are invested with a half-mythical character (like the Anakim).

Wellhausen (*CH* 341 f.) regards the designation 'Amorites' as substantially synonymous with that of Canaanites, though not quite so comprehensive. According to this view, the Canaanites, in the time of the biblical narrators, are still living in the land (i.e., in the cities of the plain which were not occupied by the Israelites). The Amorites, on the other hand, are thought of as the old inhabitants of the hill-country E. and W. of the Jordan, now inhabited by the Israelites. Thus the Amorites belonged exclusively to the past; they had their day and ceased to be (Gen. 15). This explains how it is that, although under ordinary peaceful circumstances the Canaanites are spoken of as the old inhabitants of the land, whenever mention is made of war and conquest, the Amorites at once take their place (Gen. 48:22). So Moses' adversaries, Sihon and Og, are kings of the 'Amorites'; and, similarly, it is with the twelve kings of the Amorites that Joshua has to deal W. of the Jordan. Winckler however (*Gen* 1:52 ff.) disputes the synonymy of the terms 'Canaanites' and 'Amorites' on the ground that, as the Amarna letters show, the coast-land as far N. as Sidon or even farther, was called Kinahî (= Canaan), and that

the Amorite population had its seat in the interior. He explains the distinction in the nomenclatures from the different local origin of the two writers (an Ephraimite and a Judahite respectively). On the extra-biblical facts, and on the inferences to be drawn, see CANAAN, §§ 3-4 and cp PHENICIA.

AMOS (אָמּוֹס), § 56, 'borne [by God]'; cp AMA-SIAH, *Ac.* *Amos*, PHEN. אָמּוֹסִין, אָמּוֹס (BAQ[.]).

1. Prophetic activity.

Amos is the earliest of the prophets whose discourses and predictions were possess written records with an accompanying statement of their authorship. Of the external facts of his life we should know little but for the narrative digression in 7:10-17, which interrupts the series of prophetic visions on the fall of Israel. From a statement there assigned to Amaziah, 'the land is not able to bear all his words,' we may reasonably infer that Amos's ministry in the northern kingdom had lasted for some time, when it was brought to an abrupt close by an act worthy of the heroic Elijah. Amos, it appears, came forward at length in a place where success was more difficult than anywhere else, and uttered a prophecy to this effect—'Jeroboam shall die by the sword, and Israel shall be carried away from its land.' It was in Bethel, the seat of the royal temple corresponding to that of Jerusalem in the south, and probably at some great festival, that Amos said this; and the priesthood, faithful to its royal head, took the alarm. Not so much as the prophets of the preceding period, did the reigning dynasty (for he had not done so in the interests of any upstart noble) as because he had begun to weaken the moral courage of the Israelitish people (Jer. 38:4). With the half-contemptuous speech, 'Carry thy prophecies to those in the neighbouring country who may think them worth paying for,' Amaziah, the head priest of Bethel, by the royal authority, bade Amos fly from the land of Israel. Amos would not retire without a parting testimony. These are his significant words: 'No prophet, no member of a guild of prophets, am I'; that is, I am no ecstatic enthusiast, like the prophets of Bethel, whose prophesying is a trade, and whose oracles are mere heathenish divination (cp Mic. 3:1). 'But a sheep-breeder am I,'¹ he continues, 'and one who tends sycamore figs' (see SHEEP, SYCOMORE); that is, I am above the sordid temptation to take fees. 'Yahwè took me from following the flock; Yahwè said unto me, Go, prophesy unto my people Israel.' That is, My prophesying has an immediate practical object which concerns the whole nation, and it is due to a moral impulse which has come straight from Israel's God. Then, in answer to the command, Prophesy not against Israel, Amos repeats his message with a startling personal application (cp Is. 22:17-18).

Such was Amos—a strange phenomenon to the head priest of Bethel, as representing an entirely new type of prophecy. Whence then did this prophet come? Was he a native of Israel or a 'sojourner' from Judah? The heading of the book (on the origin of which see below, § 4) at first sight appears to be decisive in favour of the latter view. Budde has made it probable² that we should render 'Amos, who had been among the sheep-breeders, (a man) of Tekoa.' In any case, Amos is represented as a Tekoite. Now, there is no trace in ancient or in modern nomenclature of more than one TEKOA (q.v.). That Amos belonged to the southern kingdom has, nevertheless, been doubted,³

¹ *Roud* 275, with *Out.*, We. (Σ, α, αμωσ); cp 11. *Mesha* is also called אָמּוֹס (2 K. 3:4). The word refers to a breed of stunted sheep, valued for their fine wool (see SHEEP).
² *Kolbe, Aemite, Aemite in 10th ff.*
³ According to Oort, Amos was an Israelite who cultivated sycomores in his own country, but after his expulsion dwelt among the shepherds of Tekoa (7:6, 7:20, etc. [91]). Grätz (and so formerly Oort), following Kimhi, supposes a second Tekoa in the north.

¹ *Roud* 275, with *Out.*, We. (Σ, α, αμωσ); cp 11. *Mesha* is also called אָמּוֹס (2 K. 3:4). The word refers to a breed of stunted sheep, valued for their fine wool (see SHEEP).
² *Kolbe, Aemite, Aemite in 10th ff.*
³ According to Oort, Amos was an Israelite who cultivated sycomores in his own country, but after his expulsion dwelt among the shepherds of Tekoa (7:6, 7:20, etc. [91]). Grätz (and so formerly Oort), following Kimhi, supposes a second Tekoa in the north.

on the twofold ground (1) that the interest of Amos is absorbed by (northern) Israel, and (2) that Tekoa lies too high for sycomores to be grown there. As to the first point, Amos, though deeply interested in Israel, is not, like the native Israelitish prophet Hosea, a sympathetic observer of the life and manners of the north. The inner impulse from above sending him to Israel is psychologically accounted for by the vastly greater importance of Israel as compared with Judah in religion, in politics, and, we may add, in literature. As to the second, Amos may very well have possessed a plantation of sycomores in some low-lying district in the Shephelah or in the Jordan valley (see SYCOMORE). We may accept it, then, as a fact, that Amos was a Judahite, and sprang from a place famous in the time of David for the quick wits of its inhabitants (2 S. 14:2).

3. Preparation. The situation, too, of Tekoa, was well fitted to develop the future prophet's capacities. From the extensive view which his own hill commanded, he would gain, at any rate, a sense of natural grandeur, though we must not infer from this that he was capable as a Tekoite of writing Am. 4:13 and the parallel passages.¹ Not far off, he would meet with the caravans of the Dedanites (Is. 21:13) and other Arabian peoples, and would imbibe from them a longing to see other men and manners. Possibly, too, such an idiom as אָמּוֹס אָמּוֹס (4:10) may be explained from Arabian influence (so We.).² Whatever the social position of Amos may have been, he was not tied to the soil, and may, before his journey to Samaria, have wandered, either on business or from curiosity, far away from home, and have seen and heard much of which his neighbours were ignorant. To suppose this is not to deny that even the stayer at home had opportunities of hearing news,³ but to try to understand the alertness of Amos's intellect, the width of his knowledge, and the striking culture and refinement of his style. At any rate, it is plain that he studied thoroughly, on the spot, the condition of life and thought in the northern kingdom, and we must regret that we have no further contemporary traditions respecting him, than that contained in 7:10-17. One very singular tradition, indeed, we have, which appears to be a very late distortion of his story. It is the story (1 K. 13) of the man of God from Judah, who went to Bethel in the reign of Jeroboam I. and threatened the altar there with destruction by an earthquake⁴ (cp Am. 3:14 7:9 9:1). Though this teaches us much concerning a late view of prophecy, however, it affords no fresh glimpse of Amos.

A post-exilic editor says (Am. 1:1) that Amos prophesied during the contemporary reigns of Uzziah of Judah, and Jeroboam II. of Israel. Of

4. Notes of date. Uzziah there is no express mention in the book; but the description of the careless ease of Jerusalem in 6:1a accords with the circumstances of his reign; to Jeroboam II. the prophet refers in 7:9, and his biographer in 7:10f. The heading also states that the prophecy as a whole was delivered (*i.e.*, in its original form) 'two years before the earthquake.' Unfortunately, our only other authority for this earthquake⁵ in Uzziah's reign is about as late as this note (Zech. 14:4). It is no doubt plausible to defend its historical character by referring to 4:11 ('I wrought an overthrow among you'), and by our prophet's vivid idea of earthquakes as one of God's means of punishment (8:8; cp Is. 2:19 21). Am. 88, however, is certainly an interpolation, and it is not impossible that the rather too precise

¹ G. A. Smith (*HG* 315) has given eloquent expression to this view. In *Twelve Prophets*, however, he admits the late origin of the passages.
² On the intellectual opportunities of Tekoa see Stieckel (*Hibb* 269-276), who makes Job to have been written in this district.
³ Robertson, *Early Religion of Israel* 510.
⁴ *Kis.* *Sam. u. Kana*, 340; and cp *KINGS*, § 8, note.
⁵ *Jos.* (*Ant.* ix. 10:4) gives a long fabulous story about it.

statement in 1r is merely an exegetical inference from 736 (cp 78 8a), which seemed to the editor to imply that Israel's punishment had been twice postponed, and that each postponement meant a year's grace (so G. Hoffmann; cp CHRONOLOGY, § 3). It is remarkable that the author of the heading, if he had access to tradition, did not rather refer to the solar eclipse prophesied in 89 (in its present form). This seems to be the eclipse which an Assyrian list of eponyms assigns to the month Sivan 763 B.C.¹ It is less important that, according to the same list, pestilences ravaged Assyria in 765 (the year of a campaign in the land of Hadrach, near Damascus and Hamath) and in 759. Pestilence in the land of Israel is indeed mentioned in Am. 4.10; but it is described as 'after the manner of Egypt'. The Egyptian Delta was of course not the only source of pestilences: the Assyrian plague

may have germinated elsewhere. Still, it remains true that the period indicated by these last dates sufficiently accords with hints dropped in the Book of Amos. For example, the Israelites, according to Amos, have no apprehension of a speedy attack from Assyria. The circumstances of the period just mentioned enable us fully to account for this. Shalmaneser III. (783-773) had too much trouble with the land of Urartu (see ARARAT, § 2, ASSYRIA, § 32), and his successor Ashur-dan III. (772-755) had too many revolts at home to put down, to be dangerous to the kingdom of Israel. Assyria being thus occupied, it was easy for Jeroboam II. to recover from Damascus (repeatedly humiliated of late by Assyria) the districts which Hazael had taken from Israel. Hence, when Amos wrote, the extent of the Israelitish dominion was 'from the point where the Hamathite territory begins (חֲמַתְיָא) to the torrent of the Arābah,' a definition which is presumably equivalent to that in 2 K. 14.25, which gives 'the sea of the Arābah'—i.e., the Dead Sea. The prophet's hearers delighted to sun themselves in this new prosperity, and boasted of the capture of LODEBAR and KARNAIM in Gilead as a great military feat (see LODEBAR, and We. on Am. 6.13). True, melancholy thoughts of the past would sometimes intrude—thoughts of the recent terrible earthquake, of the famines and pestilences, of the friends and neighbours lost in battle, and of the revolting cruelties of the Syrians and their Ammonitish allies in Gilead (13.13 46-11). Nor is it arbitrary to connect the splendour and fulness of Israelitish ritual in the prophet's time with the popular anxiety lest Yahwè should renew the troubles of the past. On the whole, however, the tone of Israelitish society is joyous and optimistic. As in Isaiah's earliest discourses, the upper classes appear as self-indulgent and luxurious, and, as in Isaiah, the women come in for a share of the blame (4.1; cp Is. 3.16). Not only the king (1 K. 22.39) but also the nobles have houses inlaid with ivory (3.15 cp 6.4a). Feasting is habitual (6.4-6), and the new custom of half-reclining on the divan² has been introduced at Samaria (3.12b). The good old sentiment of brotherliness is dying away; oppression and injustice are rampant (26-8 39 end, 10 41 51f. 84-6). This indicates that great economic changes are going on (Isaiah makes the same complaint, Is. 5). Side by side with this we notice a keen interest in the ritual side of religion (4.4f. 5.21-23 8.14 9.1). Jubilant worshippers sing the praises of the incomparable 'God of Jeshurun' (5.23; cp Deut. 33.26), and, as they think of his deliverances in the past, they even 'desire the battle day of Yahwè' (5.18). Amos, a stranger, alone sees below the surface of things. He does not, indeed, once name Assyria,³ and seems to have

¹ See Sahr. *COT* 2.101; Sayce, *TSBA* 3.149; Sahr. *KGF* 338 f., and cp CHRONOLOGY, § 24.

² In 3.12 render 'that sit in Samaria in the corner of a couch, and on the cushion of a divan' (for חֲמַתְיָא read חֲמַתְיָא, an obvious correction, which We. has somehow not made). See *JQR* 10.572.

³ According to *QBAQ*, however, there is once an express mention of Assyria (39. יִשְׂרָאֵל מִן אֲשׁוּר, for יִשְׂרָאֵל, Ashdod).

no clear idea of the geography of the region 'beyond Damascus'; but every one knows what he means when he warns his hearers that Yahwè 'will raise up against them a nation' (6.14; cp Is. 5.26, where read '15'), and 'will carry them into captivity beyond Damascus' (5.27). On the whole, we may probably date the original prophecies of Amos between 765 and 750 B.C.¹

There are only two passages which may be regarded as inconsistent with this date, as referring to later events.

6. Objections to 766-750 B.C. In 1.5² it is predicted that 'the people of Aram shall go into captivity unto Kir,' which was fulfilled, according to 2 K. 16.9, on the capture of Damascus by Tiglath-Pileser III. in 732. The prediction, however, was not meant to be taken so literally. 'Unto Kir' is evidently suggested by the tradition (9.7) that the Aramaeans came from Kir; the prophet cannot mean to lay stress upon such points as the locality of a captivity; otherwise, why does he describe the scene of Israel's captivity so vaguely? The 'fulfilment' in 2 K. 16.9 is obviously due to interpolation; the later view of prophecy differed from that held by the great prophets themselves. (b) The other passage is 6.2, which, as emended by Geiger⁴ (to make sense), reads thus, 'Pass ye to Calneh, and look; and go thence to Great Hamath, and go down to Philistian Gath; are ye better than these kingdoms, or is your region greater than theirs?' These places, says the writer, have already succumbed to the common enemy; how can Israel hope to escape? Calneh (not the Calneh of Gen. 10.10, but the N. Syrian city Kullani) was conquered by Tiglath-pileser III. in 738, Hamath by Sargon in 720, and Gath by the same king in 711;⁵ and the passage breaks the connection between 6.1 and 4, and is not in the rhythm which is so closely adhered to in 6.13-7. The verse must, therefore, be a later insertion, by a scribe or editor who had read Is. 10.9 (Calno = Calneh), and is properly a marginal gloss on the words, 'Woe to them that are at ease in Zion' (6.1). Observe that Great Hamath (H. Rabba) contrasts with the simple Hamath of 7. 14.

A strict analysis is indispensable, both for a sound view of the origin of this book, and for a due comprehension of the great prophet himself.

7. Analysis of Book. We must, therefore, test the common assertion that the book possesses such a true literary unity as Amos, when in retirement, might naturally wish to give to his remembered prophecies. So much, at any rate, is clear, that, as it now stands, the book has three well-marked divisions. (1) Chaps. 1.2-2.16 present a series of judgments on the peoples of Syria and Palestine, each framed on the same plan, and coupling the description of an unpardonable moral fault with the declaration of punishment. The most detailed of the accusations is that brought against Israel, which forms a striking culmination of the series. The vaguest and least impressive is Judah's, which comes next before Israel's, and somewhat spoils its effect. (2) Chaps. 3-6 seem at first sight to contain three discourses, each introduced by 'Hear ye this word' and closing with a prediction of national ruin. Upon a closer examination, however, none of the 'discourses'

¹ The reason offered for a later date (745-744) by Zeydner and Valetton (in Wildeboer, *Eintl.* 110) is insufficient. Any observer who was not blinded by a fanatical religious belief could see that the inactivity of Assyria was only temporary, not to mention that the year 765 saw the Assyrians on the northern border of Palestine. Besides, the events which accompanied the accession of Tiglath-pileser III. in 745, seem of too momentous a nature not to have suggested to Amos a fuller and more precise threatening than we find in his prophecies.

² On the former part of this verse see BETH-EDEN and AVEV, 3.

³ On *QBAQ*'s readings see KIR.

⁴ *Urschrift* 96 f. Torrey's hesitation to remove v. 2 from the context which it dissents (*JBL.* 1894, p. 60 f.) seems very needless.

⁵ Sahr.'s view of Calneh (*COT* 2.143 f.; *HWB* 125a) seems untenable (see CALNEH).

proves to have more than a semblance of unity. The section may be analysed into ten loosely connected passages—3.1 f. 3.3-8 3.9-15 4.1-3 4.4 f. 4.6-13 5.1-17¹ 5.18-27 6.1-7 6.8-14. (3) Chaps. 7-9. This is a series of five visions, interrupted, first by a short biographical elucidation of the third vision (7.10-15), and then by a threatening address (8.4-14), and followed by an evidently composite discourse, closing with most unexpected promises of the regeneration of Judah.

Now, if this summary is correct, it becomes impossible to maintain the true literary unity of the book. More than one editor must have been concerned in its arrangement, and the latest editor has had considerable difficulty in so disposing his material as to produce three portions, each one of a reasonable length. Considering that the book of the Twelve Minor Prophets comes to us from the post-exilic age (see CANON, § 39), and that the primary object of the later editors was not critical accuracy but

8. Post-exilic insertions:

Such an insertion we find at the very outset. The opening verse (1.2) has been often viewed as the text of the following discourse; but it seems very ill-adapted for that purpose, for the object of the discourse is not to exhibit the connection between Yahwè and a privileged sanctuary, but to show that even Israel (which has so many altars of Yahwè, 2.8) shall be punished like the other nations. Nor is the elegiac tone of 1.2b at all in harmony with the cycle of stern declarations which follows. The truth is that 1.2a is borrowed from Joel 3[4] 16a, where alone the words suit the context, and 1.2b has a close phraseological affinity to Joel and other late writings.² It is no argument to the contrary that in 38 Yahwè is said to 'roar' and that the phrase 'the top of Carmel' is used by Amos in 9.3; the editor had naturally made some slight study of the language of Amos. The reason of the insertion will be clear if we compare (a) 1.9 f. with Joel 3.2-6, (b) 1.11 f. with Joel 3.19, and (c) 9.13 with Joel 3[4] 18. These passages can all be shown to be late insertions, and 1.2 can be understood only in connection with them.

First, as to (a) and (b) it will be noticed that 1.9 f. differs from 1.6 f. only in the substitution of 'Tyre' for 'Gaza,' and in the addition of the 9. chap. 1.9 f. 11 f. words, 'and remembered not the covenant of brethren.' (Even if, with Winckler, we correct $\gamma\delta$ in *v. 9 f.* into $\gamma\delta\epsilon$ —i.e., the N. Arabian Muṣri [see MIZRAIM],—part of the following argument is still applicable.) It seems incredible that Amos should have condescended to repeat himself in this way, and doubtful whether the early Israelitish prophets knew anything about such an act as is imputed to Tyre in 1.9. And what can be the meaning of 'the covenant of brethren' in Amos's mouth? Many critics, indeed, have found in the phrase an allusion to the alliance between Solomon and Hiram (RV mg. refers to 1 K. 5.1 9.11-14); but this was a purely personal connection, and lay far back in the past. We might also think of the covenant between the kings of Israel and Tyre presupposed in 1 K. 16.31 f.; but would the Elijah-like prophet Amos have been the man to recognise this? Moreover, this was a personal or family covenant, whereas the charge against Edom in 1.11, that he 'pursued his brother with the sword,' presupposes a true national covenant resting on kinship (cp Mal. 1.2).

¹ Observe that between Am. 5.15 and 1.6 something analogous to $\tau\omega$. 7.10 must have fallen out ($\tau\omega$. 8.9 are an interpolation). *Vr.* 14.17 should correspond to $\tau\omega$. 4.7 10-13.

² $\beta\gamma\delta$ metaphorically, as Joel 1.10; $\mu\eta\lambda$, as Joel 1.19 f. 2.2; $\epsilon\omega$, as Joel 1.12. Cp also 1.2b as a whole with Jer. 9[10] 23 25 27; Is. 33.9; Nah. 1.4 (all post-exilic passages except the first). See Che. *Introd.* to WRS's *Pr. Isr.* xv. f. [Volz. has lately expressed the same view (*Die israel. Jahresprophetie* p. 19 f.), which Nowack (*Kl. Proph.*, ad loc.) does not refute.]

This view is confirmed by Obad. 12, where 'in the day of thy brother' implies the same charge that is brought against Edom in the words quoted from Am. 1.11. Thus, the fault imputed to Tyre is that it co-operated with Edom in the time of Israel's distress, by making raids into Israelitish territory and selling captive Israelites to their unnatural 'brethren.' Was there ever such a time of distress for Israel between the age of David and that of Amos? It is, of course, the history of Judah, not that of N. Israel, that we have to search, for the claim to the overlordship of Edom was maintained by the Davidic family. The answer depends primarily on the results of our criticism of Chronicles. If we can regard the Chronicler as an only slightly prejudiced recorder of old traditions, we may believe that the Philistines and Arabians broke into and plundered Jerusalem (2 Ch. 21.16 f.), and conjecture that Tyrian slave-merchants drew their profit from the circumstances. Further, if, some time before that, the Edomites revolted from Judah and defeated King Joram (this, happily, is a fact attested not only in 2 Ch. but also in 2 K. 8.20-22), it is easily conceivable that Edomitish passion vented itself in a great slaughter of fugitive Israelites. Is it worth while, however, to defend the integrity of Am. 1 and the accuracy of the Chronicler by such a lavish use of conjectures? A prophet such as Amos was could not have fastened on such an offence of the Edomites to the exclusion of the cruel treatment of Edomites by Judahites referred to in 2 K. 14.7 (cp 2 Ch. 25.12), and we ought not to imagine a case of special barbarity in the ninth century when there is a well attested one in the sixth. It was, in fact, at the fall of Jerusalem in 586 that the Edomites, who had no such stern moralists as Amos and Isaiah to reprove them, filled up the measure of their revenge, to the indignation of Jewish writers, who forgot the cruelties of their own ancestors. Hence, to explain Am. 1.11-12 aright, we must refer to Ezek. 25.12 35.5 Is. 34 Obad. 10-14 Ps. 137.7, together with Joel 3[4] 19; and, to understand 1.9 f., we must compare (besides the passages just mentioned) the description of the offence of Tyre in Joel 3[4] 2-6 (subsidiary evidence for the late date of Am. 1.11 f. is given below).¹ If it be asked, when these judgments on Tyre and Edom were inserted, the answer is, during (or much more probably after) the Exile, at a time when some fresh insult on the part of the Edomites reminded Jewish writers of earlier and deeper injuries (see ISAIAH, ii. § 14).

Next as to (c). Plainly, Joel 3[4] 18a is the original of Am. 9.13b. The opposite view would be inconsistent with

10. chap. 9.8-15. the fact that Am. 9.13a is dependent on LEVITICUS. Am. 9.13, however, is not a later insertion in the section in which it occurs. From 9.11 (or rather from 9.8) onwards, we are struck by affinities in expression or idea to works of the Babylonian and Persian periods, and by corresponding divergences from the style and thought of Amos.² That *v. 7* cannot have been the conclusion of the prophecy is certain; but we have to regard *vv.* 8-15 as a post-exilic substitute for the original close. The editor cannot endure the idea of the final destruction of the whole house of Israel, and so he makes Amos declare in a strangely softened mood that only the 'sinful kingdom' (i.e., that of Ephraim) will be wiped out, whereas the less guilty Judahites will

¹ Notice (1) the vague description of the offence of Edom. Does it consist in the purchase of Israelitish slaves from the Tyrian slave-merchants? or in the slaughter of Israelitish fugitives? or, more probably, did Edom prove that 'he kept his wrath for ever' in both these ways? (2) The mention of 'Teman' and 'Bozrah,' which names seem first to occur in Jer. 49.7 13. Cp the threat in 1.12 with that in Obad. 9.

² For the evidence, which is singularly strong, see Cheyne, 'Notes on the Prophets,' *Expositor*, Jan. 1897, pp. 44-47. On Am. 9.8-15 see also Preuschen, *ZATW* 15.24-27 (95); Torrey, 'Notes on Am. 27 etc.,' *JBL* 168-172 (96); Driver, *Joel and Amos* 120. β , who vainly endeavours to diminish the force of the arguments.

suffer the milder doom of dispersion among the nations. Even this will be only for a time. Israel shall return, the old Davidic kingdom shall be restored, and the sweet commonplaces of prophetic idylls shall be fulfilled.

Now, can we not see the reason of the insertion of the opening verse or prologue? It was to assure the post-exilic readers of Amos that the threats of the prophet had long since been fulfilled, and that restored Zion should be safe under the care of its lion-like divine protector. In other words, Amos was to be read in the light of the concluding portion of Joel. The insertion of the epilogue (98-15), in which we ought to note the reference to Edom (cp Joel 319), has a similar reason.¹

Here, then, are already four certain post-exilic insertions. The companion passages now to be enumerated are equally noteworthy. No satisfactory picture of the prophet Amos is possible till we have recognised them.

First, Am. 24b is too deficient in concreteness to be the work of Amos, and is, on phraseological

11. chap. 24f. grounds, late.² If so, the whole of the judgment upon Judah also must be late.

This is every way a gain. In particular, we can now see better how thoroughly Amos was absorbed in his mission to N. Israel. He cannot perhaps forget Judah; but his native country is only a fragment: the national pulse beats most vigorously in Ephraim (cp Is. 98f. [7f.]). The post-exilic editor, however, felt the need of a distinct reference to the sin and punishment of Judah, which he meant to be taken in combination with the encouraging statements of 12 and 911-15. It was a different feeling which prompted the insertion

12. chaps. 4 and 13 of 413 (with which 412b is connected) 5f. 95f. The conception of God had become deeper and fuller; the

germs long ago deposited by the preaching of Amos and Isaiah had, through a widened experience, developed into the rich theology of II. Isaiah and the Book of Job. Not only by the wonders of history but also by those of nature was the sole divinity of Yahwé proved, and an ordinary reader of Amos inserted these doxologies (as we may call them) to relieve the gloom of the prophetic pictures.³ Another such insertion was made (according to the text used by G) in Hos. 134.

We now pass on to Am. 526. The construction and rendering of this passage have been much disputed.

13. chaps. 52662. On the assumption that Am. 525-27 was all written by Amos, it is perhaps easiest (see Driver) to render וְשִׂמְתֶם, 'So ye shall take up . . . (Succoth) your king and Kaiwan your god, which ye made for yourselves,' וְהִנֵּנִי, 'and I will carry (you) into exile.'⁴ But how unnatural this is! Nowhere else does the prophet mention an inclination of the Israelites to the worship of Assyrian gods, and the carrying of Assyrian gods by Israelites into Assyria is a very strange feature in a treat. Hence the whole verse is more than probably

¹ There are similar interpolations in Hosea (e.g. 17 11-21 [21-3] and the words 'David their king' in 85). See HOSEA, § 4.

² Cp 2 K. 1615, Deuteronomistic. Critics on the other side quote Is. 524; Hos. 22 [4]; Ex. 1816; Deut. 3010; but they do not meet the argument from weakness of style, and produce no parallel for the second part of the description of Judah's sin. Moreover, the two Pentateuch passages are not in point. Nor have critics realised the consequences of admitting the post-exilic origin of the prophetic books in their present form.

³ The style is that of II. Isaiah and the later poets (cp Stöckel, *Hilb* p. 276), not that of Amos. The strings of participles remind us of Is. 40 22f.; Job 12 17-24; Zech. 121; Dan. 221f. Notice also וְרָא עֵינֵיבְחִי, *Int. Isa.* xxi. 252, וְרָא עֵינֵיבְחִי וְרָא עֵינֵיבְחִי וְרָא עֵינֵיבְחִי, *Int.* 95 וְרָא עֵינֵיבְחִי וְרָא עֵינֵיבְחִי וְרָא עֵינֵיבְחִי. This violates the usage of Amos (but cp G). The ideas are equally late, though they are such as Amos, had he met with them, would have owned. *Inter alia*, comp. the third descriptive phrase in 413 with Ps. 1382. It is probable that 50f. originally stood after 413. Am. 95f. is, however, presumably theirs in its original position.

⁴ On the text see, besides the commentaries, N. Schmidt, *JBL*, 1894, p. 1 ff.; Torrey, *ib.* p. 67; Wiles and Che., *Proph. Isa.* 229 ff.; G. Hoffmann, *ZATW* 812 f.; Tiele, *Gesch. van het godsdienst* 315. On the construction see Dr. in Smith, *DB* 122 (art. AMOS).

a later insertion, which took the place of a passage that had become illegible. The case of Is. 1042 seems exactly parallel (see *SBOT*, ad loc.). Whether or no Succoth-benoth, the name of a god in 2 K. 1730, contains the divine name Succuth,¹ we may suppose that the writer of the inserted passage merely antedates a worship introduced into Samaria by the Babylonian colonists after 722 B.C. The awkwardness of the connection need not surprise us (this against König, *Synt.* § 368 b); the ו in וְשִׂמְתֶם is simply the *Waw explicativum* so often prefixed to glosses. Render, 'That is, ye carried in procession'; cp Is. 4520. See CHUN AND SUCCOTH.

Am. 62, another insertion, has been treated of already (see § 6 [d]). We pass on to 8811f. Verse 8

14. chaps. 314b is not at all suitable as a description of the threatened punishment (see We., 513-15 629 Nowack). The comparison with the 8811f. Nile recurs in an interpolated verse

(95). Passing on, we note that v. 13 speaks of literal thirst (suggested by the mention of the festivals in v. 10); but in v. 11 the hunger and thirst are metaphorical. Verses 9f. 13f. announce a sudden catastrophe; but in v. 11f. a lengthened time of misery is described. The passage is clearly late, and is parallel to Is. 820f. (partly late). The silence of prophecy is spoken of as a sore trial in Ps. 749. Other probable late insertions are 314b 513-15 (cp Mic. 76), and the expression יָרַד בְּרִירָה in 65 (see DAVID, § 13); and 69f. is at any rate misplaced. To these it is plausible to add the reference to 'those who are at ease in Zion' in 61 (but it may be better to correct יָרַד בְּרִירָה to הָרָה; so Che. *JQR* 10 573); also 37, which, as Duhm points out, may be a gloss on v. 8; certainly it interrupts a noble passage (v. 8 for יָרַד read יָרַד with We., or, much better, יָרַד). The last insertion is 98-15 (see § 10).

After these insertions have been removed, may we safely suppose that the rest of the book represents what

15. Pre-exilic editing. Amos and his public? No: the analogy of the prophecies of Isaiah makes such a supposition highly improbable.

Let us be content with knowing that we have a truthful record of the prophetic certainties of Amos, even though he did not always utter them in public. The manner and the contents of the passages into which the true Book of Amos falls must be our guide in determining the class (whether that of public or of private prophecies) to which they severally belong. It is both inherently difficult and contrary to analogy to suppose that 12-216 was ever really uttered; at any rate, 12-262 8 is more adapted to produce an effect on readers than on hearers. Nor can we possibly imagine that the visions in chaps. 7-9 were used by the prophet as texts of spoken addresses; passages from discourses are no doubt here and there introduced, but they come from the arranging hand of the editor of this part.

It is a further question whether the arrangement of the different sections may be due to Amos himself. In answering it we must leave sufficient room for the *growth* of the book. It is not unreasonable to suppose that on his expulsion from Bethel the prophet paid a visit (perhaps a second visit; cp 61) to Jerusalem, and there 'noted' his prophecies 'in (on) a book for a later day' (Is. 308), when the judgment upon Israel should have been accomplished. There, too, he may have committed his record (enriched with some never-spoken prophetic certainties) to the custody of those 'disciples' of Yahwé and of his prophets (see Is. 816), who began the long succession of students and editors of the religious literature. In their hands we may suppose that the book assumed by degrees its present form. At any rate, a written record of Amos must have become quickly known; for Isaiah, it is clear, steeped himself in the originality of Amos before displaying his own truly

¹ So Del. *Par.* 215f., but see SUCCOTH-BENOTH.

original genius. To Hosea, however, such a record cannot be proved to have been known (see We. on Hos. 8.14 4.15 10.58): in other words, the circulation of Amos's prophecies was, originally at least, confined to Judah. The latest editor of the book, as we have seen, was post-exilic.

A special interest attaches to the description of the visions, together with the historical interludes in chaps. 7-9, partly because they exhibit the growth of Amos's prophetic certainty respecting the fall of Samaria, and partly because, like Is. 6.71-8.18, and 20 (in their original form), they appear to come from a partly biographic, partly prophetic, work, written or dictated by the prophet himself.

Some have been surprised to find 'a plain countryman' like Amos possessed of such a refined and yet vigorous style.¹ They forget that the

16. Amos's style.

differences of culture in the East are still sometimes comparatively trifling, and that a man of low rank may express himself with considerable elegance. It is still more in point to remark that the most classic Arabic poems are the work of men who had a calling similar to that of Amos, while, even under the new Moslem empire, sons of the desert went to appear at court and win a rich guerdon by the finished style of their improvisations. Such critics have also forgotten the opportunities of self-culture which, both at Tekoa and elsewhere, Amos must have enjoyed; and when even G. Baur and Ewald point to certain 'solecisms in pronunciation and orthography' as evidences of provincialism, it may be replied that the errors in question may reasonably be ascribed to late copyists.² That Amos delights in images drawn from nature is clearly no fault (see, e.g. 2.9 3.4 f. 8.12 5.19, and the first, second, and fourth visions). Only one of them is distinctively the comparison of a shepherd (3.12); and Amos is just as willing to speak of wonders of which he knows only by hearsay—such as the giant cedar trees (2.9), and (if the text be correct) the inundation of the Nile (8.8)—or of which he has a true Israelitish dread—such as an earthquake or a solar eclipse (8.8 f.), or the mysterious sea which yields no harvest (6.12; cp ἀπύρετος), and which somewhere hides the terrible serpent of primitive mythology (9.3; see SERPENT, § 3 f.). It is a pity that, for reasons already given, we cannot speak of Amos as a sympathetic observer of the sky³—that is an essential characteristic of a much later poet (see JOB). As a literary craftsman he ranks high. In 1.3-2.16 we have a literary prophecy, which, until Amos forgets his art in his grief at the manifold offences of Israel, is marked by great regularity of structure. So in 4.6-11 we have the literary model of an equally symmetrical passage in Isaiah (Is. 9.8-21 [7-20] 5.26-30 10.1-4), and in 5.2 we have a short but strictly rhythmical elegy. Altogether, the Book of

17. Degree of originality.

Amos forms a literary as well as a prophetic phenomenon. It is true that both as a writer and as a speaker he must have had models; J and E were, of course, not the only writers of the pre-Amosian period, and Elijah and Elisha (of whose doings a faint echo has reached us) were not the only prophetic reformers (Am. 2.11 f. 3.7). There is no occasion, however, to suppose that there were prophets of precisely Amos's type before him—prophets who had exactly his conception of their duties, and were also, in a qualified sense, writers. It would be a mistake to infer, from Amos's use of formulae, that he was acquainted with earlier written prophecies. Prophetic formulae could be transmitted by word of mouth

as well as by the pen. That Amos had left Tekoa at intervals before his prophetic call is not only inherently probable, but also follows from such a passage as 3.7 f. (if correct), which Amos could hardly have written unless he had had the most vivid and direct ocular evidence of the effects of a true prophetic impulse even before his own turn came to receive one. His originality is shown, not only in his prophetic message, but also in his being (probably) the first to conceive the idea of using the pen in aid of the voice. The *Isra*-literature of the priests had already taken a considerable development (Hos. 8.12); Amos was, it appears, the first prophet who followed the example of the literary priests. The importance of this step it was beyond his power to estimate. Within a generation he expected Israel as a nation to disappear; but he thought it worth while to gather disciples who, like himself, could praise Yahwê even in the midst of ruin; and, after all, who could tell but Yahwê might have some other secret to reveal to one of these—to a Hosea or to an Isaiah? See § 18.

That Amos's message is a gloomy one is in accordance with his conception of the divine character. In

18. **Pessimism.** an age like his, the divine purpose could not be one of peace, though it required an immense devotion to Yahwê to be able to declare, seemingly unmoved, that He purposed the complete destruction of Israel (or, as we should say, of Israel and Judah). In spite of the universal scepticism which meets him (for how, it is said, can Yahwê be conceived of apart from his people?), Amos persists in his message, and even conceives the possibility that legendary supernatural agencies may be used to make the destruction more complete (9.3). It is not, therefore, open to us to account for the confidence of Amos simply by the advance of the Assyrian power. He does, indeed, regard Assyria as the chief destructive agent (6.14 7.17); but Assyria, when Amos spoke and wrote, was passing through a period of decline; consequently his conviction must have some other ground which naturally sharpens his eyes for the still present danger from Assyria. To this it must be added that, according to Amos, it would be easy for Yahwê, if the agency of Assyria were not available, to bring some other hostile nation from some corner of the earth, just as he 'brought up the Philistines from Caphtor, and the Aramaeans from Kir' (9.7). The real ground of Amos's prophetic pessimism is the increasingly unsound religious condition of his people. He may very possibly have admitted that there were fifty or at least ten Israelites who lived by the same pure religion as himself; but he could not conceive of Yahwê's saying, 'I will not destroy the land for ten's sake.' The righteous must, according to him, suffer with the wicked (9.10 was inserted to correct this idea), though he might perhaps have left a door of hope open for those who, like himself and his disciples, had close personal contact with the true God: the nation might perish; but when this had happened, God might have some secret purpose for those who 'knew' him.

Of this vague hope we hear nothing from Amos (cp ISAIAH). What the popular religion was, we know but too well. Whatever the nobler minds may have believed, 'the mass of the people,' as Robertson Smith well says, 'still thought of Him as exclusively concerned with the affairs of Israel,' and the connection between Yahwê and Israel had a non-moral, natural, basis. Ritual tended to make morality almost superfluous, and by its increasing costliness actually promoted that injustice and inhumanity which Yahwê abhorred. There were also immoral superstitions at which Amos glanced less (see 2.7) than Hosea. To this

19. **Idea of God.** pernicious system the religion of Amos is diametrically opposed. Once, at a rate, he uses the striking title, 'Yahwê, the God of the Hosts' (5.27 is admittedly a genuine passage)—i.e., the God of celestial as well as earthly

¹ Against Jerome's application of Paul's self-deprecating language in a Cor. 11.6 to Amos see Lowth, *Proleg.* 21 (*Lectures*, ET. 249 f.).

² Take, e.g., פָּתַח (7.9) for פָּתַח. The same form occurs in Jer. 38.26. Ps. 106.2. Both post-exilic passages. In 5.11 פָּתַח is not a 'dualist form' for פָּתַח; the scribe wrote פָּ by an error, and then corrected it by writing פָּ. Read simply פָּתַח with We.

³ GASm. (HG 315).

legions—together with 'the Lord Yahwè' (perhaps nineteen times), in antithesis to the nationalistic expression, 'Yahwè, the God of Israel.'¹ The Yahwè whom he himself worshipped was, in virtue of his perfect moral nature, the Sovereign alike of nature and of nations. Amos had not, indeed, fathomed the depths of this conception as had the Second Isaiah and the author of Job (Am. 4:13 and the parallel passages are later insertions: see above, § 12); but he is already to all intents and purposes an ethical monotheist, and his conviction of the impending destruction of Israel does but intensify his sense of the majesty of the one God. He does not, indeed, reject the old belief in the connection between Yahwè and Israel altogether (cp 7:15 'my people Israel'): he moralises it. For some wise object, Yahwè brought Israel out of Egypt (3:19), and entered into a personal moral relation to it; but his will, at any rate, is not unknown to the other nations, and their history is equally under his direction. Once, indeed, under the stress of moral passion, Amos even places the 'sons of Israel' on a level with the 'sons of the Cushites'²; this occurs near the end of his prophecy (9:7), and is evidently intended as a final withdrawal of a temporary and conditional privilege. It is not, however, on all the nations of the earth, but only on those which are in close proximity to Israel, that judgment is pronounced by Amos, as the spokesman of Yahwè; he aims at no theoretic consistency. These nations are to suffer the same doom as Israel at the hand of Assyria, because they, like Israel, have violated the unwritten law of justice and humanity. [Thus we can divine Amos's free attitude towards the lately written ethico-religious priestly laws (see EXODUS, § 3). He is probably acquainted with such laws (28; cp Ex. 22:25 f.); but he does not recognise them as of primary authority, for he nowhere appeals to them.³] And if by many favours, including the crowning favour of prophecy (2:11), Yahwè has made himself specially known to the Israelites, it follows that he will judge Israel more strictly than he will judge the other nations (3:12). As a faithful friend, Amos assures his people that if they would only 'seek' the true Yahwè they would 'live' (5:4, 14)—i.e., would escape captivity and enjoy prosperity in their own land (cp Hos. 6:2 f.). He has no hope, however, that they will do so: the false popular religion is too deeply rooted. Indeed, Am. 5 has been so much interfered with by editors that it is doubtful whether vv. 4, 14 can be appealed to as authorities on such a point; v. 14, at all events, appears to belong to an inserted section (see Nowack).

It is not idolatry that Amos complains of. When he says, ironically, 'Go to Bethel and transgress' (4:4), he means, as he expressly tells us, 'Carry out the prescriptions of your wilfully devised ritual law.' Nor can we venture

to say that a protest against the 'golden calves' is implied,⁴ for no prophet is more explicit than Amos in mentioning the sins of his people. The two passages in which a reproach of Israelitish idolatry does appear to occur are certainly interpolations. In 8:14, for 'the sin of Samaria'⁵ we should read 'the god of Bethel' (cp Gen. 31:13), in parallelism to 'thy god (7:78), O Dan,' and 'thy patron (read 7:77 with W. and see DOD), O Beersheba,' and the whole of 5:26 is a later insertion,

¹ 'Thy God (O Israel)' is put into Amos's mouth by a later editor (4:10b; see above, § 12).

² Who these Cushites are, is uncertain (see CLAUDE, I, § 2 d). Apparently they had recently experienced some calamity.

³ Here he contrasts with Hosea, who clearly invests the written *šeršāh* which arose in certain priestly circles with primary authority (Hos. 8:12). Perhaps, as Duhm suggests, Hosea was himself a priest.

⁴ So Davidson (*Expository*: 188 f., p. 175). To say that Amos does not protest against the 'golden calves,' is of course not to assert that he thinks them worthy symbols of Yahwè. Cp St. *GLY* 1:279; WRS, *Prophe.*, 275 f.

⁵ The text appears to have been altered by the same editor who inserted the reference to 'the two iniquities' in Hos. 10:10.

and is not true to the facts of the age of Amos (see above, § 12). What Amos most vehemently denounces is sacrifice. One may perhaps be tempted to suppose that he says more than he means, and that he does not object to sacrifices altogether, but only to the belief that when duly performed they can change the mind of the Deity. His language, however, seems too strong to be thus explained away, especially when we find him appealing in support of his statement to the fact that in the olden time, when Yahwè was so near to Israel, no sacrifices were offered (5:25). Is there, then, no form of worship in which Yahwè delights? None, except the practice of righteousness—i.e., justice and humanity (see 5:21, 24). But, alas, the Israelite will not recognise this. Pilgrims who are wholly indifferent to plain moral duties crowd to the sanctuaries of Bethel and Gilgal, and even to the far-off southern shrine of Beersheba¹ (5:5, 8, 14, cp Hosea 4:15), and parade their devotion to the different local forms of Yahwè in pious oaths, as if the true Yahwè could be pleased with the offerings or the oaths of such worshippers. How painful will be the awakening from this moral sleep, when the greatest of all realities makes its existence known, annihilating at one blow the sanctuaries of Israel and their worshippers (9:1)! Such was the announcement of the shepherd of Tekoa.

21. Estimate of Amos. Taken in connection with the ideas on which it is based, it seems to justify us in calling him a surprising phenomenon. That the phenomenon can be partly explained there is no doubt. Neither Amos nor his special follower Isaiah is so entirely abnormal a product as an unthinking study of the works of either might suggest (see PROPHECY). But not the most comprehensive study of the history of Israel will altogether account for their appearance. And if they neither of them saw the whole truth, and both needed the correction of history and of later prophets and sages, we may still pay them the reverence which belongs to those who first uttered great moral and religious truths with the power that belongs to God-possessed men.

AMRAPHEL (אֲמֵרָפֶל; אַמְרָפָל [ADEL]; Jos. 'Αμαρὰ Φίλως), king of Sennar (Gen. 14:1 f.) = Hammurabi, king of Babylon, who, according to trustworthy cuneiform data, may have flourished about 2250 B.C. This assumes that אַמְרָפֶל is corrupted from אַמְרָבִּי (Lindl, Sayce) and אַמְרָבִּי; but see CHEDORLAOMER (§ 4 f.), and cp Schr. *COT* 2:99 f.; Hommel, *BAG* 169, *AHT* 103; We. *AOF* 143 f.; *Woid.*, *PSB* 11 10 f. 88]. Targ. Jon. ingeniously, if uncritically, identifies Amraphel with Nimrod, who "commanded Abram to be cast into the furnace." If the identification with Hammurabi be accepted, we may be reminded that Nabopolassar and Nebuchadrezzar delighted to imitate this founder of Babylonian greatness, both in his building plans and in his methods of administration (see BABYLONIA, § 66, and cp Rogers, *Outlines of Early Bab. Hist.* 27-30). It may be that some Jewish favourite at the Babylonian court, who had received a Babylonian education (Sanabassar or Sheshbazzar for instance—note the Babylonian name), heard Hammurabi spoken of, and made historical notes from cuneiform tablets on events which had happened 'in the days of Amraphel,' also that one of these was adopted by later writers as the basis of a Midrash on Abraham and Melchizedek. On the other hand, those who identify NIMROD (q.v.) with Nazi-maraddāz (Nazi-maraddāz) may incline to think that the setting of contemporary history may be derived from an early pre-exilic traditional source, though the narrative in its present form is undoubtedly the production of post-exilic writers. The latter view is the more difficult one, but not therefore to be hastily rejected. Cp Lehmann, *Zwei Hauptprobleme der altorient. Chronologie* (1898) 84, and see ABRAHAM, § 4. CHEDORLAOMER (§§ 2, 3 (ח)), HAM (i.), MELCHIZEDEK (§ 2), SHAVEH, I. T. K. C.

AMULETS is the RV rendering of *ḥēḥīlīm*, אִמְלִיטִים, Is. 3:20, a word used elsewhere of any charm (Is. 33, אִמְלִיטִים; נְבוֹן לְאִישׁ, RV 'skilful enchanter'—not 'eloquent orator' or 'skilful of speech' as in AV and AV mg.), or, more specifically, of a charm against serpents (Jer. 8:17 Eccles. 10:11). In Is. 3:20 some sort of female ornament is meant, most probably earrings (so AV), which seem to be treated as idolatrous in Gen. 35:4. Doubtless, as WRS suggests ('Divination and Magic' in *J. Phil.* 14:122 [85]), the amulet is worn in the ear to prevent an incantation from taking effect. Among early

peoples amulets and ornaments are closely connected (cp We. *Heid.* (2) 165). When the early significance of the protective power of the object is forgotten it serves as a simple adornment.¹ The Syr. equivalent *ḥēḥīlā* is properly 'a holy thing,' and the same idea is seen in the occurrence of the root in the old Yemenite *ḥēḥīlās*, 'pearls'; cp WRS *Rel. Sem.* (2) 453; and see MAGIC, § 3 (3), cp also RING, § 2.

AMZI (אֲמִצִּי, § 52, perhaps abbrev. from Amaziah).

1. In the genealogy of ETHAN: 1 Ch. 6:46 [31] (אַמְצִיָּא [B], אַמְצִיָּא [A], אַמְצִיָּא [L]). See also LEVI.

2. In genealogy of Adaiab, 3, the priest (see MALCHIJAH, 3); Neh. 11:12 (אַמְצִיָּא) [B], אַמְצִיָּא [L], אַמְצִיָּא [B], omitted, however, in the 1 = Ch. 12.

ANAB (אֲנָב, אַנְוָב [AL]), a hill-town of Judah, Josh. 15:50 (אַנְוָב [B], אַנְוָב [L]), one of the seats of the Anakim; Josh. 11:21 (אַנְוָבָוּ [B]). It is doubtless to be connected with Hiniannabi (עֲנִיָּנָבִי), mentioned in *Am. Tab.* 237, 26 with Magdai (see MIGDAL-GAD) and other cities of the land of *Gar* (SW. Judah). There is still a place of the name ('*Anāb*') on the west side of the Wādy el-Khalil, about 14 miles to the SW. of Hebron, and 4 or 5 m. W. from Shuweikheh (Rob. *BR* 2:159; *so PE Mem.* 3:392 f.). See also ANUB.

ANAEL (אַנְאֵל [BNA], i.e., אַנְאֵל, HANANEEL), brother of Tobit and father of ACHIACHARUS (Tob. 1:2). See also AMAN.

ANAH (אֲנָה, meaning uncertain, cp Gray, *HPV* 110; אַנָּה [BADEL]), a Horite clan-name (Gen. 36). As the text stands the descent of Anah is represented in three ways. Anah is

1. Daughter of Zibeon (*avan* [L]), in *vv.* 2:14, 'Hivite' in *v.* 2 being obviously an old error of the text for 'Horite.'

2. Son of Seir and brother of Zibeon, *v.* 20 (*avan* [L]), 1 Ch. 1:38 (*Avan* [L]).

3. Son of Zibeon, *v.* 24 bis (*avan* [AD], *avan* [L], *awa* [E], *awas* [AE]), also 1 Ch. 1:40 f. (*Σωσαν* [B], *σωσα* [A]; *v.* 41 *awa*, *avan* [L]), 25 bis *zv.*

The first of these may, however, safely be disregarded. 'Daughter of Zibeon' is a variant (based on *v.* 24) of 'daughter of Anah' (dependent on *vv.* 20-25), which has intruded into the text (so DI., Kau.). As to (2) and (3), the differences of statement need not surprise us, for the genealogy only symbolises tribal relations. Anah was originally a sub-clan of the clan called Zibeon, and both alike were 'sons of Seir'—i.e., Horites. A twofold tradition, therefore, could easily arise. The 'mules' which, from *v.* 24 AV, Anah would appear to have 'found in the wilderness' are an invention of the Midrash, some Rabbis explaining אַמֵּן (*amein* [ADE], *eamn* [L]) by *ḥūmōs*, others by *ḥūsun* (*Der. rabba*, par. lxxxii.). The 'hot springs' of Vg. and RV are purely conjectural; the word אַמֵּן is evidently corrupt. As Ball points out (*SBOT* Gen. crit. notes, 93), it may have come in from *v.* 22 (רִמְתָּם). In *vv.* 2:14 and 18 (where AEL omits), Anah is called the father of Oholibamah, the wife of Esau. See BASHEMATH.

T. K. C.

ANAHARATH (אֲנָחָרָת; פְּנְרָוֹת K. אַנְאָרְעֶוּ [B], פְּנְרָוֹת K. אַנְאָרְעֶוּ [A], אַנְאָרְעֶוּ [L]), a site on the border of ISSACHAR (Josh. 19:19) f. The reading seems corrupt (note the conflate readings of *Ḥ^{BA}*). Perhaps we should read אַנְחָרָת and identify with '*Arrāneh*, a village on rising ground in the plain of Esdraelon, a little northward of Jenin (= En-gannim). So Schenkel's *Bib.-Lex.* and Riehm's *HWB* (after Knobel).

Knobel's alternative view (adopted from de Sauly by Conder) identifies Anaharath with en-Nā'ūra, which is not far from Iksāil (Chesulloth) and Solām (Shunem), and is therefore not altogether unsuitable, but somewhat remote from every attested form of the ancient name.

¹ For analogies cp CUTTINGS OF THE FLESH.

ANAIHAH (אִנְיָהָ, § 33, 'Yahweh has answered'; **ANANIAH**(c) [BNAI], thus identifying the name with ANANIAH).

1. In list of Ezra's supporters (see EZRA, ii. § 13 f.; cp i. § 8) at the making of the law (Noh. 8, 20-21; Est. 9, 43 ANANIAS, 4); 2. Signatory to the covenant; Neh. 10, 22 [23] (ANAH); ANAA [AW]. See EZRA, I § 7.

ANAK. See ANAKIM.

ANAKIM RV; AV, less correctly, ANAKIMS (אֲנָקִים; and אֲנָקִים); in Targg. generally rendered אֲנָקִים 'gigants'; ENAK [ε]ΙΑ [BAFL], but -N [F² 212 DL 2 10]; AN 9203.

The Anakim are mentioned in Dt. 2, 10 f. or Josh. 11, 21 f. 14, 12 15 Jer. 47, 5 (ANAK); Heb. reads 'of their valley'; elsewhere called 'sons of Anak' (אֲנָקִים [BAL]) Nu. 13, 23 (ANAK [BF]); Dt. 9, 21 and (MT 'sons of the Anak') Josh. 15, 14a; Judg. 1, 20; 'sons of the Anakim, Dt. 1, 28) אֲנָקִים יָצְאוּ [BAL] 9, 22 (אֲנָקִים 'Anak'); the children ('sons') of Anak ('MT' the Anak') Nu. 13, 22 b (ANAK [B]), ANAA [A], Josh. 15, 14b. The phrases are exactly parallel to 'Rephaim' and 'children of the Kapha' (see REPHAIM); indeed in Dt. 2, 21 a writer of the Deuteronomistic school, 'interested in history and archaeology' (Kue.), makes the Anakim a branch of the Rephaim.

These and other descriptive terms (which are not to be mistaken for race-names) are given at any rate to some portions of the pre-Israelitish population of Palestine, whom, like the Amorites, tradition endowed with colossal height (cp Nu. 13, 31). On the inhabitants of Palestine generally see CANAAN.

According to Josh. 11, 21 (D₂), the Anakim were to be found in the mountains about Hebron, in the fenced cities Debir and Anab, and, in general, in the mountains of Judah and Israel, whence Joshua and Israel drove them out. Verse 22 also states that a remnant of them survived in the Philistine cities of Gaza, Gath, and Ashdod (cp Jer. 47, 5; οἱ καταλοιποι ενακμ [BAL]), where MT has 'the remnant of their valley'. The oldest narrator, however, gives the credit of their expulsion to Caleb, who drove out from Kirjath-arba the three sons of Anak: Sheshai, Ahiman, and Talmai—i.e., the three tribes or clans which bore those names (Josh. 15, 14). The editor of Judg. 1, quoting this passage, refers the deed to the tribe of Judah (v. 10; see HEBRON. In later times, a too literal interpretation of 'sons,' and genealogical interest, led to the transformation of Anak, and—what is still stranger—of Arba ('four') in the place-name Kirjath-arba, into personal names. Thus Anak (virtually a personal name where it has the article) becomes father of SHESHAI, AHIMAN (1), and TALMAI (1), and son of Kirjath-arba; cp Josh. 21, 11 (MT אֲנָקִים, 15, 14 f.; Judg. 1, 10; ANAK [A]).

The proof of this is supplied by B², which in Josh. 15, 13 21, 11 instead of 'father of Anak' has μητροποιος των ανακ. Kirjath-arba, or Hebron, was an important city (a 'mother,' cp 2 S. 20, 10) of the Anakim. A later scribe, prepared to find a genealogical notice and therefore surprised to find the word 'mother' in apposition to Arba, altered 'mother' (מִת) into 'father' (אב). Thus he obtained the statement that Hebron was the city of one Arba, who was the father of ('the) Anak.' In Josh. 14, 15, however, he took a different course. The true reading must be that of B², which gives (nearly as in the parallel passages) πόλις αβη (I.), αβη [A], αρχος [B], μητροποιος των ανακ [ε]μ αυτη. For this the scribe substituted 'the city of Arba, the greatest man among the Anakim.' The consequence was that Sheshai, Ahiman, and Talmi (the three Anakites mentioned in Josh. 15, 14) became, literally, 'sons of (the) Anak,' and grandsons of Arba—no contemptible acquisition for genealogists. So virtually Schlusser (Thes., zv. μητροποιος); but see especially Moore, Judges 24 f. Cp also Schwally, ZATW, 1898, p. 139 ff. T. K. C.

ANAMIM (אֲנָמִים), one of the peoples of Mizraim, Gen. 10, 13 = 1 Ch. 1, 11 f.; unidentified. See GEOGRAPHY, § 15 (2).

ANAMMELECH (אֲנַמְמֶלֶךְ, ANHMELEH [B], ANH-[A]; om. L.; אַנְמֶלֶךְ; Anamelech), a Babylonian

1. Anak, 'long-necked' (St. and most), or 'those with necklaces' (Klo.), with which cp Heb. 'anāk, 'a chain for the neck,' Aram. 'anāk, Ar. 'anā, 'neck.'

deity, whose worship was carried by the Sepharvites into Samaria when, along with the inhabitants of other Babylonian cities, they were transplanted thither by Sargon. As in the case of the kindly deity Adramelech (see, however, ADRAMMELECH, 1), the worship of Anammelech was accompanied by the rite of human sacrifice (2 K. 17, 31). The name Anammelech is probably to be explained as *Anu-malik* 'Anu is the decider or prince' (Schr., Del.), although there is no evidence that Anu enjoyed any special veneration in Sippara (see SEPHARVAIM), a city that was especially devoted to the worship of Sams the Sun-god.

It is very possible, however, that the text is corrupt (Hommel proposes a further elaborate restoration [Ezr. 7, 20, 21]. It is also possible (see NISROCH) that Anammelech is merely a faulty variant of Adramelech (rather Adramelech). In 2 K. 17, 31 has only ἀδραμελεχ.

Anu was the god of Heaven, and with him were identified a number of gods representing personifications of powers or localities of the upper region, such as Uras, Anshargal, Anshar, Enshar, Dugar, Luqman, Ekur, Alala, Alala-alam, and Enurula. He stood at the head of the Babylonian pantheon, forming one of the supreme triad of Babylonian divinities, in which he was associated with Bel, the god of Earth and of created things, and Ea, the god of the Abyss and all that is beneath the earth. See BABYLONIA, § 26. According to G. Hoffmann (ZA, 1896, p. 258), however, the name is אֲנַח-מַלְכָּא—i.e., Anath-malk. Cp Astar[ti]-Kemosh and Melk[at]-Astart. Anath (Anta) was the consort of Anu (see ANATH). L. W. K.

ANAN (אָנָן, § 50; shortened from ANANIAH). 1. Signatory to the covenant (see EZRA, i. § 7); Neh. 10, 20 [21] (ANAN [B]), ANA [X], -AN [A], ANAN [L-1]. 2. Anan (אֲנָנְיָהּ [BAL]) in 1 Esd. 5, 30 = HANAN, 3 (37) Ezra 2, 46.

ANANI (אָנָנִי, § 50, abbr. from ANANIAH, cp Sab. 122 and Palm. 222; ANANI [B], ANANI [A], -IAC [L]), descendant of ZERUBABEL (1 Ch. 3, 24).

ANANIAH (אֲנָנְיָהּ, AN²A. OHL. ANANIAH [N² = mg. mt.], ANIA [L]) in Benjamin, mentioned (v. 11) in the list of villages, Neh. 11, 20-26 (see EZRA, 2, § 5, § 15, 11, 22), along with Nob and Ramah (Neh. 11, 32), and possibly represented by the modern Beit-Hanina, 3½ m. NNW. of Jerusalem.

ANANIAH (אֲנָנְיָהּ, §§ 33, 50; ANANIA [BAL]), ancestor of one of Nehemiah's builders (Neh. 3, 23).

ANANIAS (ANANIAS [BAL]), the Gk. form of HANANIAH or ANANIAH.

- RV ANNIS, mg. ANNIS, a family in the great post-exilic list (see EZRA, ii. § 6), mentioned only in 1 Esd. 5, 16 (ANIAS [B], ANIAS [A], om. L). The name has probably arisen from a misreading of Hoshai (חֹשַׁי תְּרַסֵּי תְּרַסֵּי; cp Neh. 10, 17 f., and see HODIAH, 2. Cp also Meyer, EJ 7, 143, 155.
- 1 Esd. 9, 21 = Ezra 10, 20 HANAN, 3.
- 1 Esd. 9, 20 = Ezra 10, 20 HANANIAS, 7.
- 1 Esd. 9, 45 = Neh. 8, 8 ANANIAS, 4.
- 1 Esd. 9, 45 (ANANIAS [B]) = Neh. 8, 8 HANAN, 4.
- A kinsman of Tobit. The archangel Raphael, while in disguise, claimed to be his son (Tob. 5, 12). He is designated Ananias 'the great,' son of Semesus or Semelius (see SHEMAIAH, 23), also called 'the great.'
- b. Gideon, ancestor of Judith (Judith 8, 1, om. B).
- In Song of Three Children, v. 66 (S Theod. Dan. 3, 80); see HANANIAS, 1.

9. Son of Nedebaios (Ant. xx. 52, Νεδεδαιός in some MSS [AE] νεδεδαιος; cp NEDABIAH), high priest, circa 47-59 A.D., under Herod Agrippa II., king of Chalcis. He is mentioned in Acts 23, f. 24: as the high priest before whom Paul was accused during the procuratorship of Felix. He flourished in the degenerate days of the priesthood, and, though Josephus says (Ant. xx. 92) that after his retirement he 'increased in glory every day,' allusion is made to him in the Talmud (Pesahim) in terms of the greatest contempt. Cp ANNAS (end).

1. In which case cp Anu(m) Iarru-Anu the king, the usual title of the god Anu (Muss-Arn. Ass. Dict. 65).

ANANIEL

10. Husband of SAPHIRA (*q.v.*), Acts 5:1. See COMMUNITY OF GOODS, § 3.

11. A 'disciple' at Damascus, who was the means of introducing Paul, after his conversion, to the Christian community there (Acts 9:10-19).

ANANIEL (ΑΝΑΝΙΑῖ [BNA]; Heb. [ed. Neubauer] אֲנַנְיָאֵל, Hananeel), Tobit's grandfather (Tob. 1:1).

ANATH (אָנַת; ΑΝΑΘ [BAL]), a divine name, mentioned in connection with Shamgar in Judg. 3:31 (ΣΕΙΝΑΧ [B] and ΣΕΦ [ΚΕΝΑΘ [A]). If SHAMGAR (*q.v.*) were an Israelite, and b. Anath ('son of Anath') his second name, it would be tempting to take 'Anath' in 'ben Anath' as shortened from Ebed Anath 'servant of Anath' (so Baethgen, *Beitr.* 141; but see Nöldeke, *ZDMG* 42:479 [188]). More probably, however, Ben-anath is a Hebraised form of the name of a foreign oppressor who succeeded Shamgar¹ (certainly a foreign name), and in this case Anath must designate a foreign deity.

Who then was this deity? Evidently the well-known goddess worshipped in very early times in Syria and Palestine (as appears, *e.g.*, from the names mentioned below), and adopted, as the growing evidence of early Babylonian influence on Palestine scarcely permits us to doubt, from the Babylonian pantheon. An(a)tu was in fact the daughter of the primitive god Anu, whose name is mentioned as that of a Syrian deity in 2 K. 17:31 (see ANAMMELECH, SEPHARVAIM). Of her character as a war-deity there can be no doubt. In ancient Egypt, where her cultus was introduced from Syria, she was frequently coupled with the terrible war-goddess Astart, and on an Egyptian stele in the British Museum she appears with a helmet on the head, with a shield and a javelin in the right hand, and brandishing a battle-axe in the left. She was, therefore, a fit patron-deity for Shamgar or for Sisera. That the fragmentary Israelitish traditions make no direct reference to her cultus, need not be matter for surprise. The names ANATHOTH, BETH-ANATH, BETH-ANOTH, compensate us for this omission. Wellhausen thinks that we have also one mention of Anath in Hos. 14:8[9], where he renders an emended text 'I am his Anath and his Asherah' (in clause 2)—surely an improbable view. For a less difficult correction see Che. *Exp. Times*, April 1898.

For Archaeology see Jensen, *Kosm.* 193 272 f.; E. Meyer, *ZDMG* 31:717 [771]; Tiele, *Gesch. van den Godsdienst in die Oudheid*, etc. (93), 224; WMM *As. u. Eur.* 313. T. K. C.

ANATHEMA. See BAN, § 3.

ANATHOTH (אָנַתוֹת, ΑΝΑΘΩΘ [BAL]), a town of Benjamin (cp below, 2), theoretically included by later writers among the so-called Levitical cities (see LEVITES), Josh. 21:18 P; 1 Ch. 6:60[45] (ΑΓΓΑΧ [B], ΓΩC and ΑΝΑΘΩΘ [A], ΕΝΑΘΩΘ [L], Neh. 7:57 ΝΑΘΩΘ [A; om. B]).

The form of the ethnic varies in ed. and versions² (cp also ANATHOTHITE). ANATHOTH is called ΕΝΑΘΩΘ, 2 S. 23:27. AV the ANETHOTHITE (αναθεττης [B], αναθωθ. [A], -ωθ. [L]), 1 Ch. 25:12 (AV, ΑΝΕΘΗΘΗΤΕ, ὅ ἐστι ἀναθωθ. [BAL]), and finally 77777. 1 Ch. 11:28 (AV ANATHOTHITE, αναθωθ. [BA], -ωθ. [L]). The last-mentioned form is used to designate JERU, 5, in 1 Ch. 12:36 (αναθωθ. [BA], -ωθ. [L]; 2 αναθωθ. [BA] in Heb. or 5). RV in each case ANATHOTHITE.

The name appears to be the plural of ANATH, and may refer to some images of that goddess which once stood there. Under the form Anath the place seems to be once referred to in the Talmud (*Yoma* 10a), where its building is assigned to Ahiman the Anakite. Tradition said that Abiathar, the priest in David's time, had 'fields' at Anathoth (1 K. 2:26); and

¹ Reading in Judg. 5:6. 'In the days of Shamgar and Ben Anath.' The notice in 8:31, which is much later than the song (see Moore) is, of course, valueless.

² Bā. and Ginsb., however, read everywhere אָנַתוֹת (cp the former's note on 1 Ch. 11:28). Exceptionally in Sam. *Lc.* Ginsb. אָנַתוֹת.

ANDRONICUS

Jeremiah was born of a priestly family which had property there (Jer. 1:1 29:27 32:7-9, ἀναθωθ [A^ov. 7] 37:12). It is once referred to by Isaiah (Isa. 10:30), and is mentioned in the great post-exilic list (see EZRA, ii. § 9), Ezra 2:23 = Neh. 7:27 = 1 Esd. 5:18 (εναρωθ [B]).

The connection of Anathoth with Jeremiah gives a special interest to its identification. A tradition, not older than the 15th century, fixes it at Kariet el-'Enab (Robinson's Kirjath-jearim); but, as Robinson has shown, it can only be the village now called 'Andta, which is situated NE. of Jerusalem, just at the distance required by the *Onomastic*, and by the reference in Isa. 10:30. 'Anata is well-placed, but only from a strategical point of view. Eastward and south-eastward its inhabitants look down on the Dead Sea and the Lower Jordan—striking elements in a landscape, no doubt, but depressing. Jerusalem is quickly accessible by the Wady Sulem and Scopus, but is not within sight. Here the saddest of the prophets presumably spent his earlier years.

2. b. FISCHER (*q.v.*) in genealogy of BENJAMIN (§ 9, ii. a), (Ch. 7) (אנאθωθ [BEM]).
3. Signatory to the covenant (Neh. 10:19[20]). See EZRA, i. § 7. T. K. C.

ANCHOR (ἀγκυρα), Acts 27:29. See SHIP.

ANDREW (ἀνδρεας [Ti. WH] 'manly'), one of Christ's twelve disciples. Like Philip, he bore a Greek name; but so did many Jews of his time, and in Dio Cassius (68:32) we meet with another instance of a Jew called Andrew.

Besides the account of his call (see PETER), and his inclusion in the lists of the apostles (see APOSTLE, § 1), nothing is said of Andrew in the Synoptics, except that, in Mk. 13:3, he appears as one of the inner circle within the twelve, for he is one of the four who question Christ 'privately' about the impending ruin of the temple.

In the Fourth Gospel the picture is more fully drawn, and in one respect completes and explains the account of Andrew's call given in the Synoptics. We read that he belonged originally to Bethsaida (Jn. 1:44), that he was a disciple of the Baptist and heard his witness to Christ, that he and a companion (no doubt John) asked the wandering teacher where he dwelt, and went with him to his temporary home. Then, having 'found the Messiah,' Andrew made his brother, Simon Peter, a sharer in his joy.

We next meet with Andrew, on the E. of the lake of Galilee, at the miraculous feeding of the multitude, on which occasion it is he that tells our Lord (68 f.) of the lad in the crowd who has 'five barley loaves and two fishes.' Once more, when the end is near, he shows in a memorable scene his special intimacy with the Master. When Greeks approach Philip with the 'desire to see Jesus,' it is to Andrew first that Philip communicates the request which they together lay before Christ (Jn. 12:22).

The rest of the NT, apart from the list of the disciples in Acts 1:13, is absolutely silent about Andrew. Such an order as this as we have is worthless.

Ensebius (*HE* iii.) speaks of him as preaching in Scythia, and we have in Andrew's 'Acts' the story of his martyrdom, at Patrae in Achaia, on a cross-shaped like the letter X. Acts of Andrew the Apostle were in circulation among the Gnostics of the second century, but survived only in various Coptic recensions of much later date. Harnack enumerates (1) *Acta Andreae et Mathiae* (and their mission to the Anthropophagi) in Greek (edited by Tisch. *Act. Apost. Apostroph.*); Syrian (edited by Wright, *Apoc. Acts of the Apostles*); Ethiopic, and Coptic (fragmentary). The Latin version survives only in its influence on the Anglo-Saxon *Andreas and Elene* by Cynewulf, and in the *Miracula B. Andreae* by Gregory of Tours; see Lips. *Apokr. Ap. gesch.* 1543 ff., cp. p. 27. (2) *Acta Petri et Andreae*, in Greek (fragments edited by Tisch.) as well as in an Ethiopic recension and a Slavonic translation (cp Lips. 1 353 f.). (3) *Martyrium Andreae* in various Greek recensions (one edited by Tisch.) and in Latin (Harnack, *Alchist. Lit.* 1 127 f., cp Lips. 1 564 ff.). A 'gospel of Andrew' is mentioned in the *Decretum Gelasii*.

ANDRONICUS (ἀνδρονικός [VA; ἀνδρονιον] 2 Macc. 4:38 A^o). 1. The Deputy of Antiochus Epiphanes

in Antioch, who (according to 2 Macc. 4.31 ff.), at the instigation of Menelaus, put to death the deposed high priest Onias—a deed for which he was himself slain with ignominy on the return of the king. See MACCABEES, SECOND, § 3, end.

2. Deputy of Antiochus at Gerizim (2 Macc. 5.23). See MACCABEES, SECOND, § 3, end.

3. Andronicus and Junias are named in Rom. 16.7 as kinsmen and fellow-prisoners of Paul, as of note among the apostles, and as having been 'in Christ' before him. The expression 'kinsmen,' if taken literally, seems to imply that they were Jews by birth; 'fellow-prisoners,' on the hypothesis that Rom. 16.3-20 belongs really to an Ephesian Epistle, has been conjectured by Weizsäcker to allude to an imprisonment which they shared with Paul in Ephesus, most likely in connection with the great 'affliction' (2 Cor. 1.8-11), which ultimately led to his leaving that city (Acts 19.23-20); on the application of the term 'apostle' to them see APOSTLE, § 3. The name Andronicus was not uncommon among Greek slaves; and it has been conjectured that this Andronicus may have been the Jewish freedman of a Greek master.

In the lists of 'the seventy disciples' which we owe to the Pseudo-Dorotheus and the Pseudo-Hippolytus Andronicus is spoken of as bishop of 'Byzantion, or of 'Spain.' In the fragments of the (Coptic) *apostol*, *Isis*, and *Isis*—Irenaeus figure prominently as hosts of the apostle John at Ephesus, and he is represented as having been made by that apostle *ἐπίσκοπος*, or president, of the church of Smyrna. In the Greek church Andronicus is commemorated, along with Crescens, Silas, and Epaphroditus, on 30th July. See Lipsius, *Apokr. Ap.-gesch.* (Index, p. 184).

ANEM (אָנֵם), 1 Ch. 6.73 [58] = Josh. 19.21 EN-GANNIM (גַּנִּים).

ANER (אָנֵר), 1. (Sam. עֲנַיִם; *anvar* [ADEL]; Jos. ΕΝΝΗΡΟΣ, a Hebronite Gen. 14.13.24f. Perhaps a local name; cp *An'ur*, a hill near Hebron (ZDMG 12.479 [58]). The correctness of the name Aner, however, is doubtful. The *anvar* of G points to אָנֵר, Enan (i.e., place of a spring), a name which may refer to one of the six springs near Hebron—e.g., the deep spring of Sarah called *Ain Jedideh* (Baed. (2) 137), at the E. foot of the hill on which ancient Hebron lay.

2. (אָנֵר [B], עֲנַיִם [A], אָנֵר [L]) a city in Western Manasseh (1 Ch. 6.70 [55])—perhaps a corruption of TAANACH (תַּנַּח); cp Josh. 21.25. T. K. C.

ANETHOTHITE, ANETOTHITE. See ANATHOTH, 1.

ANGEL. The English word 'angel' is a transcription of ἄγγελος, G's translation of Heb. מַלְאָכִים

1. Names. (מַלְאָכִים). The English word denotes primarily superhuman beings; but both the Hebrew and the Greek terms are quite general, and, signifying simply messenger, are used indifferently of human or superhuman beings.¹ Other terms, less ambiguous in this particular respect, also occur.

These are: 'gods' (אֱלֹהִים) cp Ps. 85 [6], and see AV, RV mg. 82.16, 97.138 f., 'sons of [the] goddess' (בְּנֵי אֱלֹהִים) cp Gen. 6.24 Job. 1.6 2.138 f., or אֱלֹהִים Ps. 29.139-141, EV text, 'sons of [the] mighty,' 'mighty ones' (בְּנֵי עֲצֻמָּה) Ps. 78.25, cp Job. 10.8-10, 'body ones' (בְּנֵי גִבּוֹרִים) Job. 9.1 Ps. 89 [6] Zech. 14.5 Dan. 4.17 [8] 13, 'watchers' (בְּנֵי שֹׁמְרֵי) Dan. 4.14 [17], 'host of heaven' (צְבָאוֹת) 8.25; 1 K. 22.19 Dt. 1.7, 'host of the height' (צְבָאוֹת) 18.24, or 'host of Yahwè' (צְבָאוֹת) Josh. 5.14, cp use of צְבָאוֹת in Ps. 103.21 148.2 Neh. 9.6, and 'God's camp,' צְבָאוֹת 8.25 Gen. 32.2 [3]. In the case of Ps. 68 [17] אֱלֹהִים (אֱלֹהִים) we owe the AV rendering 'thousands of angels' to old Heb. tradition (Targ. Saad. and Abulw.), which treated the difficult אֱלֹהִים as a synonym of מַלְאָכִים (cp Del., *ad loc.*). RV 'thousands upon thousands' is equally hazardous; cp Dan. 7.10.

In the NT also we find other terms in use: 'spirits' (πνεύματα, Heb. 1.14), 'principalities' (ἀρχαί, Rom. 8.38), 'powers' (δυνάμεις

ἰδ., ἐξουσία, Eph. 6.12), 'thrones' (θρόνοι, Col. 1.16), and 'dominions' (κυριότητες, ἰδ.), cp further Cramer, *Lez.* 37 ff. 20 ff. 237, and the Heb. and NT Lexicons, *avv.*

The earliest OT writings contain no definite or systematic angelology, but indicate a prevalent belief

2. **Pre-exilic.** in other superhuman beings besides

Yahwè. These were (1) the 'other gods' or 'gods of the nations,' who were credited with real existence and activity; cp, e.g., Nu. 21.29 Judg. 11.24 and v. Baudissin, *Stud.* 155-79. (2) Closely connected with these were the 'sons of God'—i.e., members of the divine guild. There is but one pre-exilic reference to these (Gen. 6.24), whence it appears that they were not subject to Yahwè, but might break through the natural order of his world with impunity. (3) Attendants on Yahwè—in Is. 6 some of these attendants are termed Seraphim (see SERAPHIM), but others distinct from these seem to be implied; cp v. 8. In a similar scene (1 K. 22.19-22), those who attend Yahwè and form his council are termed collectively 'the host of heaven.' Such divine councils are also implied in Gen. 3.22 11.7 (both J); cp the plurals in these passages with that in Is. 6.8, and the question in 1 K. 22.20.

In another passage (Jos. 5.14 ff.)—the pre-exilic origin of which, however, has been questioned (Kue. *Hex.* 248 ET)—the host of Yahwè appears as disciplined and under a captain. According to some, the 'hosts' in the phrase 'Yahwè (God of) hosts'—a phrase current in early times, were angels (Che. *Proph.* 1.114 ff.; see further NAMES, § 123). The original text of Deut. 33.2 f. contained no reference to angels (see Dillm. *Comm.*; cp also Driver). Another element in early Hebrew folklore worthy of notice in the present connection is the belief in the horsemen of the air (2 K. 2.12 6.17).

For a parallel in modern Bedouin folklore cp Doughty, *Ar. De.* 1.449. 'The melniks are seen in the air like horsemen, tilting to and fro.'

Angelic horsemen play a considerable part in later literature—e.g., in Zech., 1 Apoc.

The most noteworthy features, then, of the pre-exilic angelology are the following:—(1) except in Gen. 28.32, these beings are never termed 'angels.' 'Angel' occurs frequently in the singular, but only in the phrase 'angel of Yahwè' (more rarely, 'of God'), which denotes, not a messenger of, and distinct from, Yahwè, but a manifestation of Yahwè himself in human form (see THEOPHANIES, § 4). Koster treats even Gen. 28.10-12 17.32 [1] 18.1 f. 19.1 f. as statements of the manifestation of the one God in many forms (cp WRS *Rel. Sem.* 426 f., 2nd ed. 445 f.), and concludes that, before the Exile, *מַלְאָכִים* was used exclusively of appearances of Yahwè. Against this, Schultz's reference (*OT Theol.* 2.104) to 1 S. 29.9 2 S. 14.17 19.25 [1] is not quite conclusive. (2) These attendants on Yahwè are not also messengers to men. Even if the angels of Gen. 28.32 be distinct from God, they bring no message. For such a function there was no need so long as Yahwè himself appeared to men. (3) Beside these subordinate divine beings that attend Yahwè, but have no relations with men, there are other beings ('other gods,' 'sons of the gods') which are not subject to Yahwè, and do enter into relations with men.

Comparatively few as are the early references to angels or kindred beliefs (cp DEMONS, § 1), they are

3. **Later.** yet such as to justify us in attributing a comparatively rich folk-lore on these matters to the early Hebrews; but it is not until the exile and post-exilic periods that angels come into prominence theologically. They do so then in consequence of the maturing belief, on the one hand, in the transcendence of Yahwè, on the other, in his supremacy. The development of angelology at this time must also have been favoured by the contact of the Jews with the Persians; and some details of the later doctrine may be due to the same influence—e.g., the naming of angels, although the great majority of the names themselves (as in

¹ Karppe (*Journ. As. ser.* ix., 9.126) reads מַלְאָכִים, a derivative of מַלְאָךְ, as if 'the walker' = 'the messenger,' or Yahwè marching (Is. 63.1, *SBOT*) as opposed to Yahwè mounted on the cherub (Ps. 18.10 [11]).

Enoch 6 69) are quite clearly Hebraic, though of a late type (cp *HPN*, p. 210).

With the growing sense of Yahwè's transcendence, belief in his self-manifestation in human form ceased; and thus the phrase 'angel of Yahwè,' set free from its old meaning, now came to denote one of the beings intermediate between Yahwè and men. At first it was apparently the title of a particular angel (*Zech. 111 f.*), but subsequently it became a quite general term (note the pl. *Ps. 103 20*, cp *347 [8]* and *NT passim*). It is now by angels, and no longer directly, that Yahwè communicates with men—even prophets. The experience of Ezekiel marks the transition—Yahwè speaks to him, sometimes directly (442), sometimes through another (403). With Zechariah the change is complete. He never sees Yahwè; he receives all divine instructions through angels (contrast *Am. 7 f.*). Daniel receives the explanation of his visions in the same way; and in *NT*, warnings or other communications of the divine will are given by angels (*Mt. 12 213*, *Lk. 110*, *Acts 103 20*). The angels thus become the intermediaries of Yahwè's revelation; but they are also the instruments of his aid (*Ps. 91 11*, *Dan. 3 28*, and frequently; cp later, 2 *Macc. 116 3* *Macc. 618*, *Susan. 42 ff.* [in *LXX*, but not in *Theod.*], *Bel and Drag. 34-39*; cp *Acts 8 26 39 f.*, *Tobit, passim*, *Acts 12 ff.*, and especially *Heb. 114*), or punishment (*Ps. 7 20 35 5 f.*, *Enoch 53*; 611 621 631 *Apoc. Bar. 21 23*, *Rev. 6 f.*, also in *5 Job 20 15 33 23 40 11 [v. 6 in Heb. and EV]* and see further below, § 5). Especially prominent in the apocalyptic literature is the cognate belief in the intercession of angels with God, in behalf of the righteous, or against the unrighteous: see, e.g., *Enoch 9 10 15 2 406* (where the function is specially referred to Gabriel, 4069; yet cp also *Tob. 12 12 13* where Raphael intercedes) 99 316 1041 *Rev. 8 3*. Cp also in *OT, Zech. 1 12 Job 5 1 33 23 Eccles. 5 6 [5]*, and perhaps in *NT, Mt. 18 10*, unless this be a case of angelic guardianship.

In other respects also, the later angelology shows the influence of the growing sense of Yahwè's transcendence; the angels, exalted far above men by the functions just mentioned, are themselves abased before God (*Job 4 18*).

4. Supremacy of Yahwè.

The awful exaltation of even angels above men, is prominent in Daniel (*Dan. 8 16-18 10 16 f.*). The countless number of the angels is emphasised (*Job 33 23*, *Dan. 7 20*, and later, *Enoch 40 1 718 Mt. 26 53 Heb. 12 22 Apoc. Bar. 48 10 51 11 59 11*), and they are divided into ranks. Even in *Zech.* the angel of Yahwè is a 'kind of grand vizier receiving the report of (less exalted) angels' (*Smend*). This conception of ranks becomes, later, more detailed¹ (see *Dan. 10 13 12 1 Tob. 12 15*, and *Enoch—e.g.*, chap. 40), and creates in *Gk.* the term ἀρχάγγελος (see *Charles, Book of Enoch*, p. 67; 1 *The. 4 16 Jude 9*); it may be traced farther, in *NT*, in the

¹ [The influence of non-Jewish upon Jewish beliefs can here scarcely be denied. These are the facts of the case: in *Dan. 10 13* we hear of a class of 'chief princes,' two of whom (*GABRIEL* and *MICHAEL*, 11) are named (chaps. 10-12; cp also *KAPHAËL* and *URIEL*). In *Tob.* (12 15) the number of the 'holy angels who present the prayers of the saints, and go in before the glory of the Holy One,' is given as seven (if the text is correct). In *Enoch* the number of the chief angels varies between, three, four, six, and seven (see chaps. 20 42 78 1 89 1 90 21 31, and other passages). Manifestly this highest class of angels was suggested by the Zoroastrian Amesha Spentas or Amshaspands ('immortal holy ones'), who (like the counsellors of the king of Persia, *Ezra 7 14*) are seven; and this seems to be confirmed by the reference to the archangels in the *Book of Tobit*, which also mentions the Zend name of the chief demon (see *ASMODEUS*). In referring to this Iranian belief, however, we must not forget the possibility that it is to some extent historically connected with Babylonian spirit-lore. The cultus of the seven planets is no doubt primal in Babylon, and may have spread thence to the Iranian peoples. To explain the belief in the archangels solely from Babylonian sources would be plausible only if the Zoroastrian Gáthas, which are pervaded by the belief in the Amshaspands, were not earlier than the time of Philo. For this bold theory see Darmesteter, *Le Zendavesta* 8 56 (62), etc.; but contrast the same writer's earlier theory in *SBB (Zendavesta*, I. *Intro.*),—T. K. C.]

references to the 'seven spirits of God' (*Rev. 4 5 cp 8 2*), and to Michael (*Jude 9 Rev. 12 7*) and Gabriel (*Lk. 1 19*); probably also in the use of several terms together, in certain passages (*e.g.*, thrones, dominions, principalities, powers, *Col. 1 16*), and perhaps in the term 'elect angels' (1 *Tim. 5 21*).

The doctrine of Yahwè's supremacy involved either an absolute denial of the existence of other superhuman beings or their subordination to him. To the latter method of accommodation post-exilic angelology owes some striking features. Thus, the patron angels of nations (clearly referred to in *Dan. 10 13 20 12 1*, probably also in *Is. 24 21 ff.* *Joel 3 [4] 11*, *Comm. 2 5 8 10*; see *Ch. Book of Psalms*¹ 229 ff. and *82*), are merely the ancient 'gods of the nations'—for which, in this connection, cp especially *Dt. 4 19 29 25 f.* 338 6—transformed to suit the new doctrine. Again, the 'sons of the Elohim'—formerly independent of Yahwè, whose laws they broke with impunity—now become identified with the angels (cp *Ps. 29 11* with 103 20, and 6's translation of *Gen. 6 2* [not *L*] *Job 1 6* etc., cp also *Lk. 20 36*); as such they constitute his council and do his bidding (*Job 1 6 2 1*; cp *Zech. 1 11 f.*). Similarly, the host of heaven, which in the later years of the monarchy had been favourite objects of worship (cp, e.g., *Zeph. 1 5 Jer. 8 2 Dt. 4 19*), and therefore rivals of Yahwè, now again become subject to him and do him homage (*Neh. 9 6*); he is supreme over them as over men (*Is. 45 12*, cp 40 26); he is equally supreme over all gods (*e.g.*, cp *Ps. 96 4*).

On the other hand, the difficulty with which Yahwè's claim to universal worship against all others was established is also reflected in the new angelology. Yahwè's supremacy over the 'gods,' or the 'host of heaven,' was won and maintained only by force (*Job 25 2 cp 21 22 Is. 24 21 34 45*; cp 27 1—for the passages in *Job* see Davidson's, for those in *Isaiah*, *Cheyne's Comm.*). This incomplete assimilation of the 'other gods' etc. to beings wholly subservient to Yahwè, combined with a growing dislike to attribute evil or disorder directly to him, led to the differentiation of angels as beneficent or maleficent (see *DEMONS*, § 5, *SATAN*, § 3); but the *OT* nowhere lays stress on the moral character of angels, or knows anything of their 'fall.' Consequently, angels were divided not into good and bad, but into those who worked wholly, and those who worked only partly, in obedience to God. This latter division still seems to hold its own in *NT* alongside of the former; and, for this reason, in passages such as *Rom. 8 38 1 Cor. 15 24 f.*, the question 'Are the angels referred to good or bad?' is probably out of place (cp *Everling*).

For several centuries after the Exile the belief in angels did not gain equal prevalence in all circles: thus

6. Schools of belief.

P never mentions them (on *Gen. 16 2 1r* see *Dillm.*); the Priestly Chronicler does so but rarely—save when quoting directly from his sources—and *Esther*, *Ecclesiasticus*, *Wisdom*, and *Maccabees*, are marked more by the absence than by the presence of such references; 'Angel' does not occur in the Hebrew of *Eccles. 48 21*. Still later the differences become conspicuous; the Sadducees were credited with complete scepticism (*Acts 23 8*); the *ESSENES* (*q.v.*, § 3) attached an exaggerated importance to the doctrine; the popular Pharisaic party and all the *NT* writers share, in general, the popular beliefs. Yet in *John* angels are alluded to only in 20 12 13 1 (a passage based on an *OT* narrative), 12 29 (a saying of the populace), and the intrusive verse 5 4; the epistles contain no mention of them (cp the comparative infrequency of references in *John* to demons (*q.v.*, § 6)).

Several features of *NT* angelology have been already incidentally discussed; they are common to both Jewish

7. Apocalypses and NT.

and Christian writings. Scarcely less influential over the writers of the *NT* than the *OT* were the apocalypses then already extant—especially *Enoch*. It is in *Enoch* we

first see elaborated a doctrine of the 'fall' of angels. The fall is regarded as the punishment for the intercourse mentioned in Gen. 6:2-4, and for an improper revelation of 'the secret things of the world' (cp in NT Jude 6 2 Pet. 2:4). Through their fall they become inferior to men, who therefore judge them (En. 14:4-7 15:2; cp 1 Cor. 6:3 Heb. 2). Enoch should be especially compared with Revelation.

The influence of the OT may be clearly seen in the NT angelophanies, which seem modelled on those of the early OT narratives,—only that now, under the influence of the later development, the angel is quite distinct from God (Acts 10:3 f. is not an exception). These angelophanies abound in the nativity and resurrection narratives and in Acts (5:19 8:26-40 10:3-7 30-32 12:7-11 27:23), but are conspicuous by their absence from the narratives of the life of Christ—the badly attested passage Lk. 22:43 being unique, except so far as Mt. 4:11=Mk. 1:13 (contrast Lk. 4:4 f.) may be considered parallel.

Jesus accepts the popular belief in the existence of angels, but never (even in Mt. 18:10 or 26:53) countenances the belief that they influence life in

8. Jesus. the present—perhaps in the parable of the wheat and the tares (Mt. 13:24-30 37-40) he directly discontenances it. All he says of them has reference to themselves alone, or to their relations to men after life. Thus, at the second coming they will accompany the Son of Man (Mt. 16:27 and parallels; Jn. 1:51), and will then separate the good from the evil (e.g., Mt. 13:41; cp Lk. 16:22). They do not marry (Mt. 22:30, and parallels); their knowledge is limited (Mt. 24:36=Mk. 13:32); and they rejoice over repentant sinners (Lk. 15:10; cp Lk. 12:8 f., with which contrast Mt. 10:32 f., and cp earlier, Job 33:23). In particular, Jesus breaks away from the prevailing tendency to make angels the intermediaries of revelation: he himself becomes the sole revealer (Mt. 11:27 Jn. 17:6; cp 14:6 f.), he will himself always be with his disciples (Mt. 28:20), and will instruct them directly (Lk. 21:15), or through the Spirit whom he sends (Jn. 15:26 14:17-26). Thus this part of the doctrine of angels was doomed to give way to the Christian doctrines of the abiding presence of Christ and of the Holy Spirit. It still survives, however, in Revelation (1:7 17:21; cp also in the contemporary Jewish *Apoc. Bar.* 55:3, 'The angel Ramid who presides over true visions'); also in Acts (10:3 f. 27:23?)—yet here alongside of the new belief (10:13-16). Paul

9. Paul. already shows the influence of the teaching of Jesus—he claims to receive his gospel direct from him (Gal. 1:12 15 f.; cp Acts 9:3-6)—but still shares (Gal. 3:19) the common belief (Acts 7:53 Heb. 2:2 Jos. *Ant.* xv. 53; cp Dt. 33:2 6) in the past instrumentality of angels in revelation, perhaps also in the present possibility of the same (Gal. 1:8; cp 7:14). With him, too, angels still play a large part in human life; his own practice and practical exhortations are governed by this belief (1 Cor. 4:9 6:11-10). An emphatic warning, however, is uttered against a practice (which was springing up in some quarters) of worshipping angels (Col. 2:18 cp Rev. 19:10). In the same epistle the creation of angels is asserted (1:16)—a point to which, as might be expected, no reference had been made in OT, where they are once mentioned as being present at the creation of the world, Job 38:7 (in Jewish literature, cp Jub. 2:2 Apoc. Bar. 21:6). The question whether Paul associated angels with cosmical forces turns on the interpretation of τὰ στοιχεῖα τοῦ κόσμου. Gal. 4:3 Col. 2:8 (see, on the one hand, Lightfoot, *in loc.*, on the other, Everling, as cited below, and cp ELEMENTS). Such an association would, at least, have accorded with the tendency of the time: note the angels of winds, sun, fire, and water, etc. (Rev. 7:1 19:17 14:18 16 cp Heb. 1:7 and Jn. 5:4, and, somewhat earlier, Enoch 60:11 ff. 61:10). The tendency began much earlier; in the OT angels and stars are closely associated (cp Job

38:7 Is. 34:4, and, in general, the double meaning attaching to the phrase 'host of heaven'); and the transition from Ps. 104:4 to a fixed belief in elemental angels is easy. See PERSIA.

The literature of the subject is large; all the Old and New Testament Theologies contain discussions; on the OT, Piepenbring's *Théol. de l'ancien Test.* 1000 (L.T.).

10. Literature. New York, '93) and Smend's *AT Rel.-gesch.* ('93) are especially helpful. The chief monographs for the OT are by Koster's ('De Mal'ach Yahwe' and 'Het ontstaan en de ontwikkeling der Angelologie onder Israëli' *Th. Tijdschr.* 1906-1915 [1915], 1924-69, 112-141 [1915]; for the Pauline Doctrine, by Everling (*Die Paulinische Angelologie und Dämonologie* [188]). On the vocabulary of the subject see M. Schwab, *Vocabulaire de l'angelologie d'après manuscrits hébreux* (Paris, '97). The question of foreign influence is discussed by Kohut (*Ueber d. jüd. Angelologie u. Demonologie in ihrer Abhängigkeit vom Parsismus*), for further literature on this point see Che. *OP's* 382. See further the valuable discussions of Montetouze (*Hist. Lat.* viii., 104-11, 429 ff.) and Chassigne (*OP's* 322-327, 334-337), and cp Lucken, *Michael* ('98).

G. B. G.

ANGLE (Is. 19:8 Hab. 1:15). See HOOK, 3. FISH, 3.

ANIM (אַנִּים, surely not 'mouning of the people' [Ges.], but miswritten [see 6] for אַנִּים, see ELIAM; differently Gray, *HPN* 44 n. 1, who would omit 't', and derive from אַנִּים; ἀλλήλειμ [B], ἀνίμια [A], ἐν, [L.], in genealogy of MANASSEH (1 Ch. 7:19†). T. K. C.

ANIM (אַנִּים, אֲנִים [B], אַנִּים [A], אִים [L.]). Josh. 15:50†, a hill town of Judah, mentioned after Eshtemoa (a name equally distorted in 6). Perhaps the modern el-Ghuwein, which lies to the south of el-Khalil (Hebron) between es-Semū' and Tell 'Arād.

ANISE (ἀνηθῶν [Ti. WH], Mt. 23:23†) or DILL (RV mg.) is the plant *Anethum graveolens*.¹ The correct rendering is 'dill,'² and the plant is distinct from *Pimpinella Anisum*, which is the modern 'anise.' The biblical plant is described (Flückiger and Hanbury's *Pharmacographia* (2) 327 f.), as 'an erect, glaucous annual plant, with finely striated stems, usually one foot to one foot and a half in height, pinnate leaves with setaceous linear segments, and yellow flowers. It is indigenous to the Mediterranean region, Southern Russia, and the Caucasian provinces, but is found as a cornfield weed in many other countries, and is frequently cultivated in gardens.'³

It is mentioned in Mt. 23:23, along with mint and cummin,⁴ as being subjected by the scribes and Pharisees to a title. This practice accords with the general principle stated at the commencement of the Mishnic tract on 'tithes' ('Whatever is food, and is private possession, and has its increase out of the earth, is subject to tithing'—a rule based on the precept of Deut. 14:22, 'Thou shalt surely tithe all the increase of thy seed, that which cometh forth of the field year by year'), and the liability of dill in particular to tithing is, in the Talmud, specially mentioned (see the references in Celsius, *Hierobot.* 1:497). N. M.—W. T. T.-D.

ANKLETS and ANKLE-CHAINS. These have ever been favourite ornaments among Orientals.⁵ Probably the oldest specimens are some in gold and silver which have been found in Egypt, where they appear to have been worn by men as well as women. The chains obliged the wearers to take short and tripping steps. To enhance the effect, bells were (at

¹ The Syriac and the Arabic versions correctly render by the word *shibhētā, shibītā*—a name for this plant which is probably derived from Persian (see Löw, 373).

² This, though supplanted by 'anise' in all the English versions from Wyclif onwards, is the word used in the A.S. version, 'myntan and dille and cymmynt.'

³ Virgil gives it a place in the flower-garden (*Fel.* 2:48), and Pliny in the vegetable-garden (*HN* xix. 8:5). Cp the Greek *reff.* in Liddell and Scott.

⁴ In the parallel passage in Lk. (11:42) dill is not mentioned—'mint and rue and every herb (πᾶν ἄχραντον).'

⁵ Cp Ar. *halhal*, and Gk. *περισφύρα* and *περισκέλις*, the latter of which is 6's rendering of the Heb. אַנְכָּלִים (in the plur. or dual) 'breeches.'

2 S. 121), paint on a ceiling, Jer. 22¹⁴ (here translated in EV by 'painted'),—and probably we should interpret the word similarly in the recurring phrase (e.g., in Ex. 29a) 'wafers unleavened anointed with oil'; (2) of the application of unguents to persons or things as a *religious rite*; for details see below (§ 3 ff.), but observe that, with the possible¹ exception of Am. 6, *משוח* is never used in the sense of שָׁח. In its metaphorical sense שָׁח is used of the divine appointment or selection of a man for a particular purpose—viz., for the kingship (1 S. 10¹ 15¹⁷; 2 S. 12²; 2 K. 9¹⁶ 10¹²; Ps. 45⁷ [8] 89¹⁰ [11] 2 Ch. 22⁷; cp below, § 5). For the relation of the term שָׁח to the usages under discussion see MESSIAH, § 1. 'Anoint' in Ps. 92¹⁰ [11] corresponds to Heb. שָׁח, ² in Ps. 23⁵ it corresponds to שָׁח; 'anointing' in the probably corrupt passage Is. 10²⁷ corresponds to שָׁח (S⁹RAV om.) and 'anointed ones' in Zech. 4¹⁴ (AV; but RV 'sons of oil'; S⁹RAV יְהוֹשֻׁעַ וְיִחִיָּה וְשֵׁנֵי הַכֹּהֲנִים הַיְהוּדָיִם 22).

In NT the EV also confuses two sharply distinguished terms. *χρίω*, which in the LXX, as in classical Greek, may be used in a physical sense, as in the NT used *ex-citissime* (Lk. 4¹ [cp Is. 61¹]; Acts 4²⁷ 10³; 20³⁰ [12]) of God in a metaphorical sense; for we can hardly regard the quotation from Ps. 45⁷ [8] in Heb. 1⁹ as an exception. The derivatives *χρίσμα* (1 Jn. 2²⁰ 27) and *χριστός* are used similarly; but the compounds *ἐχρίω* (Rev. 3¹⁸ also Tob. 6⁸ [5] 11⁸) and *ἐπιχρίω* (Jn. 9⁶ 11) retain the original physical sense.

Thus the NT use of *χρίω* resembles the metaphorical use of שָׁח. The other NT term, *ἀλείφω*, is always used of the application of unguents to the body, whether (like the Heb. שָׁח which it frequently represents, e.g., Ruth 3³ Micah 6¹⁵; cp also 2 K. 4² S⁹BAL) for toilet purposes (Mt. 6¹⁷ Lk. 7³⁸ 46 Jn. 11²), or medicinally (Mk. 6¹³ Ja. 5¹⁴), or as a tribute of respect to the dead (Mk. 16¹ cp Jn. 12³⁷).³

From the foregoing analysis of the terms, it will be clear that 'anointing' was practised by the

2. Toilet. Hebrews both for secular and for sacred purposes. The unguent used was olive oil, with or without the addition of aromatic spices; for details see OIL. Anointing formed among the Hebrews, as among many other peoples (cp, e.g., Pl. *HV* xii. 1-6), a regular part of a full toilet, being in particular associated with washing (Ruth 3³ Ezek. 16⁹ Sus. 17); the omission of it was a sign of mourning, the resumption of the practice a sign that mourning was over (2 S. 11² Dan. 10³ [cp Mt. 6¹⁷]; 2 S. 12²⁰; Judith 10³ cp Is. 61³ Eccl. 9⁸); and hence 'to anoint' is a suitable figure for 'to make glad' (Ps. 23⁵ cp 45⁷ [8]). The head and face appear to have been most usually anointed (Ps. 104¹⁵ Judith 16¹⁹ Mt. 6¹⁷ Lk. 7³⁸; cp Ps. 23⁵ 141⁵ Eccles. 9⁸), and the anointing of the feet to have been a special luxury (Lk. 7⁴⁶ Jn. 12³). The medicinal use of unguents is referred to not only in Ja. 5¹⁴ Mk. 6¹³, but also in Is. 16 Lk. 10³⁴. On anointing the dead see EMBALMING.

Leaving the significance of anointing as a religious rite to a final section, we will here simply classify the

3. Religious persons or objects which were so rite: anointing of persons. The kings. In the OT, especially in the earlier writings, there are numerous references to the anointing of kings (cp, e.g., 1 S. 16³ 12

¹ Possible, but hardly probable (cp Ges.-Bud., *שָׁח*). The first described in the context is *שְׁמִינִי*; see 7¹, and cp WRS *Rel. Sem.* (2) 241, 258, 430 n. 4, and note that the word used in v. 6 for bowl (*קִיבִי*) is elsewhere exclusively used in connection with sacrifice; cp Driver (*ad loc.*), who, however, takes the passage as a description of effeminate luxury.

² The text, however, is very questionable. Many (e.g., Cheyne, *Psalms* (2), Baethgen), following S⁹BART Sym. Jer., point בְּלִי שְׁמֵחַ instead of בְּלִי שָׁח, and translate 'my old age' or 'my waning strength' instead of 'I am anointed.' In *Psalms* (2) Che. reads בְּלִי שָׁח = אֶחָדָה.

³ In Mk. 14⁸ 'anoint' is ἀνρίω (see MYRRH, 2).

9:6 2 K. 23³¹ Eccles. 46¹⁵), and so frequently of the Hebrew kings to whom the term 'Messiah of Yahwé' belonged pre-eminently, if not exclusively, in the days of the monarchy and even later (Lam. 4²⁰); for the anointing of a *Syrian* king (by a Hebrew prophet) see 1 K. 19¹⁵, and cp the general reference in Judg. 9⁸ 15, and Am. Tab. 376 'Manahé(r)ia, king of Egypt, . . . established my father . . . over the kingdom, and poured oil on his head.' (b) *The prophet.* How far it was usual to anoint a prophet we cannot say; but we have one allusion (in a narrative of the 9th or 8th cent.) to such an anointing which cannot be reasonably explained away; if 'anoint' in 1 K. 19¹⁵ 16a be literal, it would be unnatural to consider it in 7: 16b (as in Is. 61¹) metaphorical; cp Eccles. 48⁸. (c) *The priest.* References to the anointing of priests, as part of the rite of consecration, are numerous in P. We have to distinguish, however, between those passages which refer to the anointing of the high priest (Aaron) alone, and those which refer to the anointing of the priests in general (for the former cp Ex. 29⁷; Lev. 8¹² 6²⁰ [13], and, outside P, Ps. 133² Eccles. 45¹⁵; for the latter, Ex. 30³⁰ 40¹³ 15). It seems probable that passages of the latter class are secondary (cp We. *CH* 141 f.; Di. on Lev. 8¹⁰-12; Nowack, *Arch.* 2 124). In this case the anointing of the high priest may be inferred to have been an earlier custom than that of anointing all priests. This would account for the origin of the term *הַכֹּהֵן הַגָּדוֹל*, 'the anointed priest' applied to the high priest (Lev. 4⁵ 20⁹ 6²⁰ [13]; cp Nu. 35²⁵; Lev. 21¹⁰ 2 Macc. 1¹⁰, and perhaps Dan. 9²⁵ f.), and for its subsequent disappearance when all priests were anointed (cp *הַכֹּהֲנִים הַמְשֻׁחִים* Nu. 33). We may infer from Zech. 4¹⁴ that the custom of anointing the high priest was at least as ancient as the close of the sixth century; but we have no earlier evidence. On the other hand, the contrast between a priest and 'Yahwé's anointed' (1 S. 2³⁵—a Deuteronic passage), and the different terms in which the Chronicler (1 Ch. 29²²) and the earlier historian (1 K. 2³⁵) refer to Zadok's appointment, are worthy of attention. Cp further (for some differences of view) Baudissin, *Die Gesch. des AT Priesterthums* 25 f. 48 f. 140 253.

Lifeless objects also were anointed. (a) Gen. 28¹³ 31¹³ 35¹⁴ are, as far as OT is concerned, isolated references to the anointing of *sacred pillars*

4. Lifeless objects. (see MASSEBAH); but the custom was well-known in antiquity (cp Di. on Gen. 28¹³; WRS *Rel. Sem.* (2) 232). (b) *The tabernacle* and its appurtenances. P contains directions or statements about anointing 'the tent of meeting' and all its furniture (which is mentioned in detail, Ex. 30²⁶), or 'the tabernacle and all that is therein' (Ex. 40⁹ Lev. 8¹⁰ Nu. 7¹), as part of the rite of consecration. Special reference is made to the anointing of the altar (Nu. 7¹⁰ 8⁸). In Dan. 9²⁴ we find an allusion to the anointing of 'the most holy' (probably = the altar) in the reconsecration after the pollution of the temple by Antiochus Epiphanes.

NT contains no reference to anointing as a religious rite, unless, indeed, we ought to infer from Mk. 6¹³ Ja. 5¹⁴ that magical—and so far religious—properties were attributed to the oil used in anointing the sick (as distinct from the wounded, Lk. 10³⁴); but before the close of the second century A.D. it had come to form part of the ceremony of baptism. See Smith and Cheetham, *Dict. of Christ. Antiq.*, s.vv. 'Chrism,' 'Uncion'; Mayor's *Comm.* on James (on 5¹⁴).

Anointing occurs repeatedly as a metaphorical term to express a religious idea. As we have seen (1) the

5. Metaphors. NT term (*χρίω*) always used metaphorically with God as subject. The metaphor may have originated in, as it was certainly subsequently used to express, the idea of God pouring out his spirit

on a man (or people) for a particular purpose—e.g., on Saul to smite the Amalekites (1 S. 15.17), on Jehu to smite the house of Ahab (2 K. 9.6 f.), on 'the Servant' to preach good tidings' (Is. 61.1). Thus, after Yahwé has anointed Saul (1 S. 10.1), the spirit of Yahwé comes mightily upon him (v. 6), cp 1 S. 16.13; and the connection between the outpouring of the spirit and anointing is clear in Is. 61.1 (Lk. 4.18) 2 Cor. 1.21, and especially in Acts 10.38. Similarly, 'the anointing from the holy one' (1 Jn. 2.20-27) is the illumination of the Holy Spirit, which teaches those that receive it concerning all things. Hence, the term 'anointed' could suitably be applied to Israel as a people—e.g., Hab. 3.13; see further MESSIAH, § 3. In Ps. 45.7 89.20, the whole phrase 'to anoint with oil' is used with God as subject; in these cases either the whole phrase is a metaphor, or *mišah* has acquired a quasi-causative sense.

On the relation of the various terms and customs to one another there have been different views, some of which must be briefly referred to.

6. Primitive significance. Some (e.g., Kamphausen in the article 'Salbe' in *HWB*²) derive the religious from the toilet use, seeing in the rite of anointing both the means of setting apart to God some person or thing as clean and sweet-smelling, and also the symbol of such a condition. But (1) it may be questioned whether the sharp distinction of terms relative to the two uses (cp § 1) be not against this view; (2) there is no positive evidence that the Hebrews interpreted the rite in this way, unless we so regard the custom of mixing sweet-smelling substances in the anointing oil—a custom which cannot be traced before P; and (3) the metaphorical use cannot be satisfactorily explained in this way. Reasons have been given in the preceding section for thinking that the religious rite of anointing men was at any rate understood at an early period to symbolise the outpouring of the divine spirit; but it is possible that this symbolism is not original, even in the case of persons. It certainly does not explain the anointing of things—particularly the pillar at Bethel. This custom Robertson Smith (*Rel. Sem.*² 233 379 ff., especially 313 ff., cp SACRIFICE) seeks to explain as a sacrifice, the oil being a substitute for the animal fat which was smeared (smearing, it is to be remembered, being the original sense of *ḥṣṣ*) by the Arabs on similar pillars, and played a considerable part in many other forms of sacrifice. Fat being, according to ancient thought, one of the great seats of life, was peculiarly fitted for the food of the gods (hence the anointing of the pillar), and also for imparting living virtue to the persons to whom it might be applied (hence the anointing of things or other persons). In this case the view that anointing symbolised the imparting of the divine spirit, is a refinement of the idea in which the custom may be presumed to have originated (cp COVENANT, § 5 end). The anointing of the temple and sacred furniture will then be a survival similar to that of sprinkling them with blood. G. B. G.

ANOS (אַנֹּוֹס [BA; om. L], 1 Esd. 9.34, apparently VANIAH of Ezra 10.36.

ANT (אַנְתָּ) מַּיְמַחֵז [BXA]; *formica*, Pr. 6.6.80²⁵†.

1. Name and allusions. Classical writers often refer to the industry, forethought, and ingenuity of the ant, and especially to its habit

¹ The etymology of this word is very doubtful. It has been proposed to derive it (1) from a doubtful Heb. verb *an* (cp *an*) 'to cut', referring either to the shape of the ant's body (= 'insect'), or to its habit of cutting seeds from the corn-ears, or to the incision it is supposed to make in the seeds themselves to prevent their sprouting (though this last was hardly known to the ancient Hebrews); (2) from Ar. *anama* 'to creep' or 'to ascend by creeping'; (3) from supposed root akin to Heb. *an*, 'to make a slight sound'. The connection with Ar. *anama* is certain; but possibly the meaning of the verb may be derived from the noun. A kindred word is Ar. *anmul*, 'finger-tip' (Lag. *Ubers.* 21). The Syr. equivalent is *zūmānā* 'keen-scented'; Ar. has the same word as Heb. *namān*.

of storing grain-seeds beneath the ground in time of harvest.¹

Thus Ælian tells us that so great is the industry of ants that, when there is moonlight, they work by night as well as by day. It was noticed how carefully their work was organised; they were described as marching like an army, the oldest acting as generals; when they reached the cornfield, the older ants ascended the stalks and threw down the grains to the others, who stood around the foot. Each took its part in carrying away the food to their subterranean homes, which were carefully constructed with several chambers, and protected above by walls of earth to keep out the rain. The seeds were divided into two, sometimes into four, segments, and in other cases peeled, to prevent their sprouting; if wetted by rain, they were brought out and carefully dried in the sun. The ant showed a weather-knowledge far surpassing man's. It was in all respects a πολιτικὸν ζῷον, and is so classed by Aristotle along with the crane and the bee.

The same observations are repeated in later times by Arabic and Jewish writers.

The Mohammedans seem to have associated the ant with Solomon; the 27th chapter of the Koran is styled 'the ant', because it mentions that Solomon, on his march, once entered 'the valley of ants,' whereupon an ant said, 'O ants, enter into your habitations, lest Solomon and his army tread you underfoot and perceive it not.' It was a custom with the Arabs, says Bochart, to place an ant in the hand of a new-born child, with a prayer that he might grow up wise and sagacious.

The only two passages in the OT which mention the ant obviously refer to some species of Harvesting Ant

2. Species.—probably either to *Aphaenogaster* (formerly called *Atta*) *barbara*, or to *A. structor*, or to *Pheidole megacephala*, which are to this day found in Syria, and, indeed, all round the Mediterranean basin.

Numerous other species of ant have been described in Palestine; but, as far as is known, they resemble in their habits the ants of temperate and colder climates, and do not lay up any store of provisions against the winter: it is possible that, like the latter, they pass the cold season in a torpor or winter sleep.

The harvesting ants all belong to the genus *Aphaenogaster*, or are closely allied to it. Their habits were well known to the ancients and

3. Harvesting ant. to mediæval writers. These observers, generalising on insufficient data, assumed that all ants stored up food for winter consumption.

When, however, the centre of learning shifting farther N. from the shores of the Mediterranean, the leaders of science were found in central and northern Europe, the position of things was reversed.

Naturalists, noticing that the ants whose habits they observed did not store grain and seeds, arrived at the conclusion that no ants did, and attempted to explain the accounts of the earlier writers by pointing out that they had probably mistaken for seeds the pupæ which, when anything disturbs the ants' nest, are at once seized and borne to a place of safety. The consensus of opinion, accordingly, until about a quarter of a century ago, was that ants never lay up stores of food.

The investigations of Moggridge and Lespès, however, showed that, although this opinion is probably correct as far as ants in more northern climates are concerned, many of the ants in the countries bordering on the Mediterranean store up seeds collected from different plants. Not only do they collect seeds that have fallen, but they also frequently tear the fruit or seed-pod off the plants and bear them to the *formicarium* or nest. They will, moreover, travel considerable distances to obtain their food, marching in two nearly continuous parallel lines, the length of the column sometimes measuring 24 yards or more. The two lines are moving in contrary directions—the one toiling laden with spoils towards the nest, the other hurrying back with empty mouths to the harvest ground.

The nests both of *A. barbara* and of *A. structor* are simply excavations in the ground—long cylindrical passages

4. Nests: are to some extent smoothed and cemented. In these hollows, about the size of a billiard

¹ See the list of passages quoted in Bochart, *Hier.*—among them *Hor. Sat.* l. 1. 33; *Virg. Æn.* 4.402; *Plin.* *NH* 11.30; Ælian, 2.25 4.43 6.43. A brief account of the Jewish notices by Rev. A. Lowy in *PSBA* 8.88 [1880-81].

ball, the seeds are stored. In one nest Moggridge counted seeds from twelve different species of plant, and he enumerates eighteen distinct botanical families containing plants which furnish ants with seeds. *A. structor* is frequently found in the neighbourhood of towns or villages, and even in the streets; *A. barbara*, usually in the country.

The ants' nests are entered by one or two holes, whose presence is usually indicated by small heaps of refuse, partly composed of the earth excavated from the nest, and partly built up of the husks and other useless matter, which is carefully removed from the seeds before the latter are stored up. All this refuse is scrupulously removed from the nest, which is kept very clean. The ants do not allow the seeds to sprout; possibly by making an incision in them.

The amount of seed collected and stored in the granaries is very considerable and may cause serious loss to the agriculturist; from one nest an amount of seed estimated at 1 lb. in weight was taken, and there must be many hundreds of nests to the acre. The seed stores of the ants of Palestine are sufficiently important to be mentioned in the Mishna, which records the rules adopted as to their ownership.

The industry of the harvesting ants, and the amount of work they accomplish, justify their being held up as examples of untiring energy. They begin work early in the morning and keep at it far into the night, working as hard in the dark as in the sunlight. Meer Hasan Ali in his *History of the Mussulmans* describes how eight or twelve very small harvesting ants will find it difficult to move a grain of wheat, and yet they manage to transport such grains over a distance of 1000 yards to their nest. Their great sagacity is shown in numerous ways—the complexity of the organisation of their colonies (involving the differentiation of individuals to perform different duties), their powers of communicating one with another, and their slavemaking propensities. Their habit of laying-up food for the future, and even (in some South-American species) of actually cultivating certain fungi for food, places them with the bees and wasps, as regards intelligence, second only to man in the animal kingdom.

The ants belong to the order Hymenoptera (which includes bees, wasps, and saw-flies), and to the family Formicidae. N. M.—A. E. S.

ANTELOPE (אַנְטֵלוֹפִּיָּה *Antelopya*, Du. 14 § 1; אַנְטֵלוֹפִּיָּה *Antelopya*, Is. 51 200; אַנְטֵלוֹפִּיָּה *Antelopya* in Du.; and *Ant. Syn. Theol.* in Is.); אַנְטֵלוֹפִּיָּה [ἄντιλοπος in Is.], an unclean animal mentioned along with the pygarg and chamois. The above is the rendering of RV and is much preferable to AV WILD OX, WILD BULL. (which is based upon Targ. Gr. Ven., and is accepted by Kim.), although wild oxen and wild bulls were common enough throughout Palestine and Mesopotamia (see CATTLE, § 4). The allusion in Is. (*i.e.*) to the capture of the animal by means of a net wholly agrees with what is known of the manner in which antelopes, gazelles, etc. were usually captured.

The species here intended may be the *Antelope leucoryx* (or oryx, cp אַנְטֵלוֹפִּיָּה), or the *A. bubalis*. Against the former proposal the objection has been raised that the oryx is called in the modern vernacular of N. Africa *yahmur*, which = Heb. אַנְטֵלוֹפִּיָּה 'fallow-deer' (see ROE); but it is not uncommon for the same name to be given to members of different species by different peoples.¹ On OX-ANTELOPE see UNICORN (*ibid.*). S. A. C.

ANTHOTHIAH (אַנְתֹּוֹתִיָּהָ *Anthothia*) 1 Ch. 8:24†, RV, AV ANTOOTHIAH (*q.v.*).

ANTICHRIST (ἀντιχριστός [Ti. WH]). *History of the Question*.² Researches into **1. History**: the meaning of 'Antichrist' have **Early Period**, always started from the exegesis of

2 Thess. 2:1-12 and certain passages in the Apocalypse (chap. 13).

The first period of the history of the discussion embraces the Greek and Latin ecclesiastical writers down to the beginning of the Middle Ages. Within this period the tradition is unusually stable. The Antichrist is taken to be a manifestation which is to be made at the end of time—a definite personality, as to whose origin, career, and end, perfectly definite and traditionally fixed views are set forth, which rest but partially on the NT. This exegetical tradition, the importance of which is greatly undervalued by recent commentators such as Bornemann, is, for reasons which will afterwards appear, of the utmost value. To say that the naive dogmatic belief of the church-fathers in 'the truth of this eschatological phantasy down to its least detail' was absolute does not in any way disprove the correctness of their exegesis.

Of the two methods that came into vogue during the Middle Ages—the ecclesiastical-political method with polemical purpose (since Joachim of Floris, afterwards in chief favour with Protestant scholars, especially in the form hostile to papal claims) and the universal-historical (perhaps, since Nicolas de Lyra)—neither advanced the question in the least.

The beginnings of a truly scientific manner of looking at these as well as at other eschatological traditions were made by certain Spanish and French **2. Modern** Jesuits, who threw themselves into the polemical Protestant attacks with great learning and acumen. Their first step was to revert to the tradition of the church fathers, which they embodied in extensive works.¹ Thus the futurist method was restored to its ascendancy.

This method maintained its ground, until quite recently, among all scientific interpreters of the apologetic school. There is one point, however, in which the exegesis of the moderns—as, for example, Hofman (*Schriftbeweis*) and Luthardt (*Die Lehre von dem letzten Zeitalter*)—differs almost throughout from all former writers on the subject—falls far below that of the church fathers; the concrete eschatological figures are more or less spiritualised. Thus, Antichrist becomes an impersonal general tendency; the 'temple' (2 Thess. 2:4) is interpreted as meaning Christendom; and the κατεχων, as law and order.

It is in the work of Ludovico Alcasar (*Investigatio arcani sensus in Apocal.*, Antwerp, 1614) that we find the earliest indications of a thoroughly scientific, historical, and critical handling of this question. The labours and the method of the Jesuit scholars, however, were afterwards made available for the Protestant Church by Hugo Grotius (*Annotationes*, Paris, 1644), who in the treatment of Antichrist may be regarded as the founder of the 'historical' or 'preterist' method. He interpreted 2 Thess. 2:1-12, point by point, as referring to the occurrences of the reign of Caligula. In this method he was followed by Wetstein, Hammond, Clericus, and Harduin; and, since Kern (*Tab. Z. f. Theol.*, 1833, i.), the preterist interpretation of the Antichrist has become almost universal, but as referring to Nero redivivus (so F. C. Baur, *Theol. Jahrb.*, 1855; Holtzmann, in *Bl.*; Hilgenfeld, *ZW*, 1862, 1866; Hausrath; and many others, including Renan, *L'Antechrist*, 1876). Following an example partly given by Klöpffer, however, Spitta (*Zam. Gesch. u. Art. des Christentums*, 109 ff.) has again sought the explanation of the predictions regarding Antichrist in the circumstances of the reign of Caligula.

Abandoning this (on the whole, mistaken) line, a few scholars have sought an interpretation of Antichrist in a

3. Recent. Jewish tradition dating farther back than the Christian era and not resting on any historical events.

Among these scholars may be named Reiche, De Wette, Linaemann, and Bornemann (in their respective commentaries) and Kähler (in *PA*). Kähler's observations in *PA*, 7, 200 ff., *WZ*, 1851, p. 250, and 1860, p. 241, are of special interest:

¹ Maivenda's *De Anti-christo* (Lyons, 1547) being perhaps the fullest. The commentaries of Ribeira (Salamanca, 1591) and Blasius Viegas (Ebora, 1601) were specially influential.

¹ For other examples see UNICORN, note.
² Cp. Luncke, *Evangel. in d. Offenb.*, 106, 205 ff.; Bornemann, 'Die Theosodotikerbriefe' in Meyer's *Handbuch*, 200 ff.

for the first time he combined 2 Thess. 2 with Mt. 24 15 ff. and Rev. 11 3 ff., and thus the problem ceased to be one of exegesis merely. The best work in this direction has been that of Schneckenburger (see Böhm's survey of his writings in *Jahrb. f. deutsche Theol.*, 1859), who endeavoured systematically (as the only true method) to ascertain the kindred Jewish tradition that lay at the basis of the NT passages. (Preliminary researches in the same sense had been contributed by Corradi, *Krit. Gesch. des 4. Jahrhunderts*, 1781, ff.; Bierschmid, *Christol.*, 1811, § 17; and Vitellesco, *Interpretazione dei V. e. 24 Mt. 24 ff. 30 ff. 31 ff.*) Schneckenburger also brought Mt. 24 Rev. 11 and 12. 24 into the field of his survey, and his view may be said on the whole to have stood the test of time.¹

Still more recently Bousset (*Der Antichrist in der Ueberrückführung des Judenthums, aus NT. u. der Alten Kirche*, 1895), following up the suggestions of Gunkel's *Schöpfung u. Chaos* (1895), and the method then for the first time securely laid down, has sought to supplement these investigations in two directions: (1) by a comprehensive induction based on all the eschatological portions of the NT that belong to the same circle of ideas, and the careful exclusion of all that do not so belong; and (2) by an attempt at a comprehensive and complete presentation of the tradition (which comes before us in the NT only in a fragmentary way) as it is to be met with in the Jewish sources, and, still more, in the later Christian exegetical and apocalyptic tradition. This tradition is in great measure quite independent of the NT, and in all probability dates, as far as its sources are concerned, from pre-Christian times.²

The NT Tradition. The name ἀντίχριστος occurs in the NT only in the Johannine Epistles (1 Jn. 2 18 22 :

43 : 2 Jn. 7), and thus in all probability its formation belongs to the late NT period. For an answer to the question who or what is meant by the name, it is best to start from the well-known (probably Pauline) passage in 2 Thess. 2 1-12, where we read that before the end of all things the man of sin, or, rather, of lawlessness (ὁ ἀνθρώπος τῆς ἀνομίας), the lawless one (ὁ ἀνομίος), the son of perdition (ὁ υἱὸς τῆς ἀπωλείας), must be revealed. This 'man of sin,' it is clear, is to make his appearance as a false Messiah—an observation which, from the outset, precludes us from referring the expression to any foreign potentate such as Caligula³ or Nero. He is sent to 'them that are perishing' (namely the Jews), because they received not the love of the truth (the true Messiah).⁴ He does not employ any outward force, but accomplishes his work by means of false signs and lying wonders (cp the tradition of the Church fathers, as continued by De Wette, Ewald, Schneckenburger, B. Weiss, Lünemann, Bornemann). He will make his appearance in Jerusalem. In this account of the Antichrist the specially perplexing assertions are that he is to seat himself in the temple of God and that he is to declare himself to be God. This last act, at any rate, does not belong to the rôle of a false Messiah. It is also doubtful who or what ought to be understood by ὁ κατέχω, τὸ κατέχω, the power that stands in the way of the manifestation of Antichrist. If once a reference in the passage to a Jewish false Messiah be accepted, the mystery of iniquity (lawlessness; τὸ μυστ. τῆς ἀνομίας) will most probably mean the cruelty which the Jews as a whole had begun to show towards the Christians (same authorities as above). At this point we obtain a clear light upon Rev. 11. The perplexing fact that there the beast rises out of the deep and makes its appearance in Jerusalem (a view of the passage that appears certain—not only from 11 8, but also from the connection of 11 12 with 11 3—as against the other interpretations referring it to Rome) is explained by 2 Thess. 2. The beast that rises out of the deep and appears in

Jerusalem is the Antichrist. If this be so, we are supplied with the following additional elements in the tradition: (1) a great drought that comes over the world in the last times (in Rev. through the two witnesses); (2) the two witnesses, their slaughter by the Antichrist, and their resurrection; (3) a previous assemblage of many nations in the neighbourhood of Jerusalem. The dim and fragmentary character of the whole narrative, however, is striking. In another place in the Apocalypse we find another parallel to the figure of the Antichrist—in Rev. 13 11 ff. The beast that 'had two horns like unto a lamb' (RV) is designated by the author of Revelation himself as a False Prophet. When it is spoken of as 'coming up from the land' (not 'earth' as in EV), we may reasonably understand Palestine to be meant. This false prophet also does his work by means of signs and wonders. Here we meet with a new and rather perplexing consideration: the sealing on their foreheads and hands of those whom he has led astray, and the buying and selling of them that is thus made possible. To the same great group of traditions a part of the eschatological discourse in the Synoptic Gospels (especially in Mt.) also appears to belong. Older theories of the βδέλυγμα τῆς ἐρημώσεως of Mt. 24 15 having broken down, and Spitta's explanation of it as referring to Caligula being beset with difficulties (indeed, an apocalypse which arose only in 40-41 A.D. could surely not have found its way among utterances of the Lord which were already becoming fixed), we seem compelled to fall back on an older tradition, and to explain the strange phrase of the Antichrist of 2 Thess. 2 4 sitting in the Temple (on these points cp ABOMINATION OF DESOLATION). In this case we arrive at new elements in the tradition: the subsequent flight of those who have believed, the shortening of the days (Mt. 24 22), and the picture of the end of the world and of the final judgment (Mt. 24 29 ff.). Here again the fragmentary brevity of the tradition is surprising.

If we now survey these eschatological fragments as a whole, two conjectures immediately force themselves on

us: (1) that all these eschatological phantasies were not independently conceived by the various authors from whom we derive them;¹ that, on the contrary, the authors are mostly reproducing a tradition which already lay before them; and (2) that it is a single consistent tradition that underlies all these (partly coincident, partly complementary) fragments. If the second conjecture be true, we may venture to think that the tradition in question has not been lost beyond all possibility of recovery. In point of fact, our very first glance at later Christian apocalyptic literature satisfies us that this literature rests upon a tradition which is but partially dependent on the NT.

*The Tradition of the Early Church regarding Antichrist. Sources.*² The tradition becomes tangible as soon as we have a

Christian literature copious enough. The influence of this tradition is already visible in the *Teachings of the Twelve Apostles* (chap. 16). Irenaeus (*adv. haer.* 2 25-30) also presents himself in this connection. Special importance, however, among the earlier witnesses, attaches to Hippolytus's ἀποκάλυψις τοῦ ἀντιχριστοῦ, the *Commentary of Commodian*, Lactantius's *Inst. Div.* 7 15 ff. (Commodian and Lactantius have a place of their own in the tradition), and the *Commentary on the Apocalypse of Victorinus*. A further group of writings ascribed to an ecclesiastical writer of very great influence, Ephraim Syrus, must be mentioned. Under his name are current three Homilies on the Antichrist: (1) One in Syriac (De Lamy, 3 187 ff.,—all of it genuine with the exception of a few chapters); (2) one in Greek (Assemani, 2 222-30 3 154-113), perhaps genuine; and (3) one in Latin (Caspari, *ut sup.* 208 ff.). The historical event from which all these prophecies start is the

¹ See the detailed argument for the impossibility of this in Gunkel, *Schöpfung u. Chaos*.

² See Malvenda, *De Antichristo* (1647); Ebert, 'On Commodian's "Carmen Apologeticum"' in *Abh. d. Rom. Sacha. Ges. d. Wissensch.* 3 37 ff.; Caspari, *Brüche und Abhängigkeiten* ('90) 208 ff. 420 ff., and, for the later period, Zeschwitz, *Vom römischen Kaiserthum deutscher Nation*, 1877; Gutschmid, *Kleine Schriften* 5 505 ff.; W. Meyer, *Ludus de Antichristo*, 1880.

¹ This applies also to the first part of the *Apocalyptiche Studien* of B. Weiss, 1869.

² Attempts in this direction had already been made by Berthold and Schneckenburger.

³ 2 Thess. 2 4 does not at all fit in with Spitta's interpretation of the passage as referring to Caligula's proposal to set up a statue of himself in Jerusalem.

⁴ Cp Jn. 5 43.

beginning of the great barbarian migrations, the invasion of the eastward regions of the Roman Empire by the Huns (Gog and Magog).

Allied in character to the foregoing are Cyril's *Catechesis* (xv), the pseudo-Johannean Apocalypse (12ch. *Apoc. apoc.*), the Commentary on the Apocalypses by Nektarios of Cassinos. Dependent on Epiphanius' Greek homily are the *ἑσχατὰ τῶν χρόνων* (ed. Lagarde) of the pseudo-Hippolytus, and the *Visio* of Philip Solitarius (1330 ff.; Nigro, *P. Gr.* 127). This whole mass of tradition is essentially valuable on account of its anachronistic character. Of the older Slavonic fathers, Jerome also (*Ad Agrippam*, Quæst. 2; *In Danielis*, 12) and the Commentary on the Apocalypses (52), but not Augustine, and of the later, John Damascenus (*ἑσχατὰ* 47) claim special attention.

As, in the uniform view of these apocalyptic interpreters, the advent of the Antichrist is after the downfall of Rome, one might reckon almost with certainty on finding evidence of the currency of the tradition about the time of that downfall. Such evidence we actually possess in the primary document which was the common source of both the so-called Apocalypses of Daniel, the Greek (ed. K. Nitzschmann, 1866), and the Armenian (G. Kalendaris, *II* 100-12, 6-102 ff.; *op. Latins*, *ἑσχατὰ τῶν χρόνων* 3-113 ff.). Again, at the time of the Mohammedan conquests a new rallying-point was given for this eschatological tradition, as we see in the apocalypse of the pseudo-Methodius (7th century, *Orthodoxographia*², Basel, 1569), closely connected with which is the later Apocalypse of Peter, now extant in Syriac, Arabic, and Ethiopic editions (Braske, *ZWT*, 1892), and also a series of late Byzantine (Vasiliev, *Anecdota Græco-Byzantina* 1, Moscow, 1893), and late Jewish apocalypses (Jellinek, *Bet-ha-Midrash*; cp Bousset, 64 ff. 173 ff.). This body of tradition reached the west through a compilation (*Libro Apocalypsis*) by the monk Avico (Nigro, *P. Gr.* 100, 124 ff.), based on the work of Methodius and on a Sybiline homily which is to be found also in a refracted form in the works of Beda (Migne, 90 1183) and dates perhaps from the fourth century. Lastly, an isolated and very archaic source is to be found also in the Apocalypse of Zephaniah (Stern, *Z.A.*, 1886).

7. He who Subjoined is a brief summary of this tradition as it occurs, almost uniformly, in the sources that have been named.

In the first place, the universally prevalent conviction is that the *καταρα* (2 Thess. 2) is the Roman empire. This, we may be sure, was the view of Pagan antiquity: if he executed a Jewish false Messiah, then the Jewish power left which could have been the Roman empire (cp on this point 4 Esd. 41 ff.). The political rôle played by this idea in the history of Christianity may be seen in Tertullian (*Apoc.*, ed. Saur, 2) and Lactantius (*Inst. div.* 725).

8. Antichrist. Of equally uniform prevalence is the conception of Antichrist, not as a Roman or Jewish ruler, but as a false Messiah, who is to arise among the Jews themselves in Jerusalem. Almost universally (with the exceptions to be afterwards mentioned) it is predicted that he is to establish himself in the temple and lay claim to Messianic (and, so far, divine) honours. (Sometimes, as in *Isidore*, *Isidore*, *Vitæ in apoc.* 1342, and in the Ethiopic Apocalypse of Peter, we read that he will set up his statue in the temple—doubtless a reminiscence of the Caligula episode.) After the destruction of Jerusalem, accordingly, the expectation that the Antichrist will rebuild the temple in Jerusalem becomes universal. He will show special favour to the Jews, will receive circumcision himself, and will compel others to do so. He will arise from the tribe of Dan (*q. v.*, § 9; Jewish haggada is at the root of this [cp *Testam. Dan* 57; also the omission of Dan in Rev. 7 § 8, to which see *Iran*, v. 302, perhaps also even the Jews themselves in *712*]; see Schneckenburger-Bühner, 412). If, hearing all this in mind, we once more turn to 2 Thess. 2 § 8, *In* 543 Rev. 11 3 ff., it immediately becomes plain that any 'historical' or preterist interpretation of the Antichrist is out of the question. On the basis of a haggadic view of Dan. 11 43 78, there came into the tradition this further element, that the Antichrist, at his first appearing, is to conquer the kings of Egypt, Ethiopia, and Libya. Another invariable element of the tradition under consideration is the enumeration of the miracles to be wrought by the Antichrist, particularly celestial signs (Rev. 18 11 f.), and miracles of healing (although that of raising the dead is beyond his reach). Hereupon the Antichrist will achieve the dominion of the whole world, and gather round himself to his capital all peoples and vast armies (4 Esd. 13 1 ff., *Apoc. Bar.* 40 Rev. 11 9 ff.).

9. Conflict. Next, a given element and of course will come to mind, the whole earth (differently and less clearly put in Rev. 11 6), and in these straits the Antichrist will order his servants (spoken of also as demons) to mark men with his mark (according to the Latin Homily of the pseudo-Ephraim, a serpent mark), so that only those who bear it shall be permitted to buy bread (Rev. 18 7 ff.). Against the Antichrist come forward the two witnesses (almost unanimously taken to be Elijah and Enoch), who disclose his real character, so that many turn away from him (otherwise, and very obscure, what we read in Rev. 11 3 ff.). It is noteworthy that in many sources there is no mention of the resurrection of the two witnesses—doubtless an incident introduced for the first time by the author

of Rev. 11. At the preaching of the witnesses a considerable company of Israel are converted and begin to oppose to the Antichrist (perhaps Rom. 9 so is to be interpreted in this connection). The 144,000 who are sealed in Rev. 7 § 8, certainly have their explanation here. The faithful now betake themselves to the wilderness or to the mountains (Mt. 24 14 ff.); and the days of Antichrist's reign of terror shall be shortened. The years shall become months, the months days, the days hours (Mt. 24 22). Then the Antichrist will send his armies in pursuit of the faithful who have fled into the wilderness; but there they shall be delivered by the angels of God or by the Messiah (Rev. 12 13 ff.), and the army of the Antichrist destroyed (cp the mysterious angelic battle outside the city in Rev. 16 14 ff.); in connection with this, the appearance of the lamb with the

10. Defeat of finally slain, according to authorities, by the Antichrist. Messiah, with the breath of his mouth (Is. 11 4 2 Thess. 2—the same statement is found in late Jewish sources, such as Targ. Jon. on Is. 11 4 and others). Perhaps an older tradition may be traced in the view that the archangel Michael is to be the conqueror of the Antichrist (Dan. 12 1 Rev. 12 6, *Ass. Mos.* 10). Now is seen a mighty sign in heaven (Mt. 24 30)—the sign of the Son of Man—interpreted by later writers (cp already *Did. 10 6*, *συνεῖον ἐκτεταγμένον ἐν οὐρανῷ*) as referring to the Cross, but originally, we may be sure, betokening the Divine Judge of the world (Bousset, 154).

He follows the coming of the Divine Messiah to judgment, amid mighty convulsions of nature (Mt. 24 29; Rev. 6 12 ff.). From the four corners of heaven desolating storms burst upon earth and cleanse it (Rev. 7 ff.), and before the divine advent descends a tempest of fire, which burns the earth down to its depths, and dries up the sea and the rivers (Rev. 21 1).

At its very first glance it is plain that, in this tradition, we are dealing not with an artificial exegetical mosaic of the various passages of the New Testament (and the Old

11. Coherence which here come into account, but with an original body of tradition, organically and inherently consistent; and that the separate eschatological fragments of this tradition in the NT become intelligible only when they are brought into their organic place in the scheme of the tradition as a whole, so that their essential consistency becomes manifest.

Origin of the Tradition.—Naturally we turn, in the first instance, to the eschatological ideas of the OT.

12. OT Schneckenburger will have it that the idea of the Antichrist originates from the prophetic concerning Gog and Magog in Ezek. (38 ff.). That in every form of the tradition the prophecy concerning Gog and Magog occurs in close connection with the story of the Antichrist is indeed true to the extent that they are made to appear, sometimes after (Rev. 20 7 f.), and sometimes before, the time of his rule. Positive identification of Gog with Antichrist, however, does not occur till the seventh century, and even then only in Jewish sources. Many of the details of the traditions can be traced, as has been already said, to Jewish haggada. In this particular point Dan. 7 11 f. is approximated to most nearly; but even here there is a marked difference, and the originality of the view outlined above is conspicuous. In Daniel the disturber is a foreign power; but here the seducer, who personates God or simulates the Messiah, rises up from amid the people of God. Thus there has been an important development since Daniel. Perhaps, as was suggested in conversation to the present writer by Prof. Smend, the historical occasion for this advance was supplied by the experiences of Israel under the Maccabees and the Herods. In any case, we must note a parallel in Jewish Apocalyptic.

13. Belial. That ideas allied to those in our tradition were active among the Jews about the time of Christ is shown by 4 Esd. 5 1 ff. (56; regnabit quom non sperant), *Apoc. Bar.* 36-40, *Synell.* 3 65 ff. (2 10 ff.), *Test. Issak* 5, *Ass. Mos.* 8 ff., and the (probably Jewish) nucleus of *Asc. Jes.* (3 23-4 13). Now, in this tradition, the constantly recurring name of the great enemy of the last times—a name already known to the apostle Paul (2 Cor. 6 15)—is Belial (Beliar). But, according to many passages of the *Testaments*, Belial is a spirit of the air, ruler of the evil spirits. According to *Test. Dan* 5, the Messiah will fight against him in the last days. The supporters of Belial are the children of Dan. In *Sib. 3 63 ff.* (probably dating from the time of Cleopatra), Belial is already presented in an aspect closely resembling that

¹ For the references in detail see Bousset, *Der Antichrist*, Gött. 1895.

of Antichrist (still more so in the *Ascensio*, which, however, has unquestionably undergone Christian revision). In the *Ascensio* the angel Sammael interchanges parts with Belial, and Sammael figures also in later Jewish tradition as the enemy of the last times¹ (on the origin of Belial, and on the various developments of meaning, see BELIAL). Suggestions of the same idea occur in Lk. 10:18 Jn. 12:31 (Col. 2:15). Here we would seem to have an aspect of the tradition that, in point of time and contents, comes a great deal nearer that of Antichrist (2 Cor. 6:15: 'and what concord hath Christ with Beliar?'), which is not of historical but of purely eschatological origin: the idea of a rebellion of an angelic power against God at the end of time. Perhaps it is out of this figure—behind which in

14. Dragon. turn stands the wilder figure of the dragon rising in rebellion against God in the last times, which Gunkel conjectures to have its origin in the Babylonian creation-myth (see CREATION, § 2f.)—that, under the experiences of the Maccabean period, the humanised figure of a pseudo-Messiah came into existence. In this way we can explain also the superhuman traits in the picture, such as his declaring himself to be God (2 Thess. 2:4), and his sitting in the temple of God (cp the myth of the storming of heaven by the dragon in Rev. 12:1 ff.). These conjectures find further confirmation in the fact that, in later tradition, the ghostly-demonic element in the portrayal of Antichrist comes again more conspicuously to the front, and the Antichrist is even represented as a demon who rebels against God (cp the writings of Ephraim Syrus, and Apoc. Zeph.).

Points of Contact with other Traditions. One legend that comes into relation with that of Antichrist in many ways is that of Nero redivivus.

15. Nero redivivus. Not that the figure of Antichrist had its beginning in the story of Nero. Originally both legends had currency side by side. It was only after Nero's return at the head of the Parthians (at first conceived of in a purely human way—cp the nucleus of Rev. 17) had become indefinitely delayed, and after men had begun to expect the returning Nero only as a spirit from the under-world, that they gradually transferred to him some traits belonging to the Antichrist² (cp *Sib. 361 ff.*, where, in like manner, Belial is interpreted to mean one of the Caesars; see APOCALYPTIC, § 95). Such an amalgamation of the two figures is already met with in Rev. 13 and 17 (in their present form). The old form of Antichrist, however, retains such vitality that in the end (Rev. 13:11 ff.) it appears as a second beast, servant of the first and on the same scene. A similar and (as far as its occasion is concerned) still more manifest doubling of Antichrist is seen in Commodian's *Carmen Apologeticum*, in Lactantius (as above), in Martin (see Sulpicius Severus, *Dial.* 214), and in the *βιβλίον Κλημεντος* (Lagarde, *Reliq. juris ecl.* 80 ff.). There is a complete fusion in the *Ascensio Jesaie*, and in the commentary on the Apocalypse of Victorinus. This complicated figure of Nero redivivus took special hold on the Sibylline literature of the second century,³ and here again, in the delineation of this, we meet once more with the old features of the dragon myth. A fusion between the Antichrist tradition and the Simon Magus legend has already been observed by Schneckenburger, and traced in a variety of points by the present writer. The same tradition comes into fusion with the later Alexander legend and the old German saga of the end of the world (Muspilli, *Edda*).

On this and other connected subjects see Bousset, *Dev. Antichrist*, in the English translation of which (1896) special attention has been bestowed on the index (see, e.g., 'Simon Magus,' 'Alexander'). See also E. Wadstein, 'Die eschatologische Ideengruppe: Antichrist, Weltabbath, Weltende und Weltgericht in ihrer christlich-mittelalterlichen Gesamtentwicklung,' *ZWT*, 1895 and 1896. ANTIOCH (ΑΝΤΙΟΧΕΙΑ [Ti. WH]). 1. in Pisidia; more correctly, 'Antioch towards Pisidia' ('Αντιόχεια ἢ πρὸς Πισιδίαν), to distinguish it from the Antioch on the Meander (the form 'Pisidian Antioch,' 'Αντιόχεια ἢ Πισιδία [Ti. WH], Acts 13:14, arose to distinguish it from the more famous Antioch of Syria). It was really a Phrygian city; but in NT times it was of course included within the Roman province Galatia. Strabo (p. 577) accurately describes it as lying 'on a hill,' on the south side of the range now called Sultan Dagh, in Phrygia Paroreia; but it was not until 1833 that Arundell found its ruins at *Yalobatch*. The town was founded about 300 B.C. by the Seleucid kings, and the transportation of 2000 Jewish families to the fortresses of Lydia and Phrygia, as recorded by Josephus (*Ant.* xii. 3), must in part refer to Antioch. By Augustus it was made a Roman colony (6 B.C.); hence its coins bear the legend Caesarea. Antioch was adopted as the centre of military and civil administration in Southern Galatia, and from it radiated the roads to the colonies designed to check the unruly highlanders of Pisidia and Isauria. As an element in the pacification of this district, the privileges of the Jews were confirmed by the Emperors, and Paul found a large Jewish colony in the city. The Romanisation of this part of Galatia was in especially active progress during the reign of Claudius, 41-54 A.D. At the time of Paul's visit, therefore, Antioch was at the height of its importance. Besides its relations with Apamea (on the W.) and with Ieonium, Lystra, and eastern Asia Minor, it must have had a commercial connection with the Pamphylian seaports, among them Atalia and Perga; and Paul must have reached Antioch by following this southern trade-route, which probably ran through Atlada (*Kara Baulo*, *Bavlo* being the modern pronunciation of the apostle's name). There was a large body of Jewish proselytes in Antioch, many of them women of position through whom the Jews were able to influence the magistrates against the apostles (Acts 13:50). The magistrates had summary jurisdiction over disturbers of the public peace, such as the apostles were alleged to be (cp v. 44, *πᾶσα ἡ πόλις συνήχθη*, and v. 45, *ἰδόντες τοὺς ὄχλους*); but the 'casting of them out of the borders' of the colony could not imply permanent banishment—at any rate in the case of Paul, who was a Roman citizen. Accordingly we find the latter returning to Antioch from Derbe (Acts 14:21) and perhaps revisiting the city at least twice (Acts 16:18, 23; see GALATIA). If the trade of Antioch was concentrated in the hands of the Jews, we can the more easily understand Paul's first success here in Asia Minor: the new teaching did not conflict with any commercial interests of the gentle inhabitants, as it did at Ephesus and Philippi, while at the same time the Jewish proselytising had prepared the people for its reception. It is also not without significance that on the death of king Amyntas, some seventy years before Paul's visit, the ancient worship of 'Mên' (Μην Ἀρκαῖος, Ἀρκαῖος Strabo, Ἀσκηρός coins) had been abolished, so that there was probably no gentile hierarchy in existence to oppose the apostles. Hence the effect of their preaching was more marked here than in any other case, except Corinth (Acts 13:44, 48 f.). All the more strange is the subsequent unimportance of the South Galatian churches.

2. In Syria (1 and 2 Macc. AV ANTIOCHIA). This great city, the third metropolis of the Roman world,

1. City. the Queen of the East (ἡ καλή Athen. 175; orientis apex pulcher), and the residence of the imperial Legate of Syria, survives in *Antâkîeh*,

a town of only 6000 inhabitants. It is situated at the point of junction of the ranges of Libānus and Taurus, on a fine site hard by the left bank of the Orontes, just where the river turns westwards to run between Mt. Pieria on the N. and Mt. Casium on the S., to the sea 16 m. distant. A little higher up the river Antiochia had been built in 307 B.C. by Antigonos; but seven years later Seleucus Nicator transferred its inhabitants to his new city of Antioch.

Strabo's meagre account (p. 750) is the foundation of our topographical knowledge of the city. Like the district in which it lay, Antioch was a *τεράπιον*, an agglomeration of four parts.

The first contained the population of Antiochia; the second the bulk of the citizens. The third part was the creation of Seleucus Callinicus (246-226 B.C.), and the fourth, on Mt. Silpius, of Antiochus Epiphanes. Each part had its own wall; but in addition, the whole vast area, larger than that of Rome, was surrounded by huge walls running over the mountains and across the ravines. From Nicator's time dates the well-known statue 'the Fortune' (Τύχη) of Antioch, a work of the Sicilian Euxychides, a pupil of Lysippus (Paus. vi. 27). The memory of it is preserved on the coins, and in a small marble statuette in the Vatican. The goddess, a graceful gentle figure, rests negligently on a rock; while the river, a vigorous youth, seems to swim out from under her feet.

Seleucus Nicator also embellished DAPHNE (Δάφνη [VA]), 5 m. distant from Antioch, but reckoned a suburb. It was a spot musical with fountains; its groves, crowded with temples, halls, and baths, were the seat of a cult of Apollo and Artemis.

Among its artistic treasures was a statue of Apollo Musagētes by the Athenian Bryaxis. The precincts of Daphne were endowed with the right of asylum and naturally became the haunt of villany—of runaway slaves, debtors, and cut-throats (Tac. *Ann.* 366; Tiberius in 22 A.D. attempted to regulate this abuse in several cities); if we may trust the story of Onias in 2 Macc. 4.33, Daphne 'flung away the one rare chance of sheltering virtue.' The site is now called *Bēt el Mā'*, the 'house of Water.' It retains no traces of its former magnificence.

From this suburb, which Roman wealth, Greek art, and Oriental licentiousness conspired to make unique even in the East, Antioch took its distinguishing name—*ἡ ἐπὶ Δάφνῃ*. In itself the title bore no reference to the pleasure pursuits of the suburb—as though insinuating that there the true life of the city was to be found: it was a genuine official title.

Accordingly we find it on coins (cp. *Ἀντιοχείων τῶν ἐπὶ Κλαύδιον: τῶν ἐν Μυθόδοξοι; τῶν πρὸς τῷ Δάφνῃ*). Hence Pliny (*HN* 5.21 (18)) writes 'Antiochia Epiphaphnes.' Tacitus (*Ann.* 2.83) transliterates the Greek, and calls the suburb itself 'Epiphaphna.'

Holm has summed up in a striking sentence the historical position of Antioch under the Seleucid kings:

2. Character. Although close to the sea (*ἀνάπλοισι ἀθήμερον* Strabo, p. 751), it was yet no seaport; on the borders of the desert, it was yet something more than a centre for the caravan trade between the East and the West. The city reflected the character of the kingdom of which it was the capital, a kingdom which itself also was neither a genuine naval nor a genuine land power. Antioch was a Greek city, just as the Seleucid kingdom was an attempt to impose upon the Orient the political ideas and forms of Hellas. Yet, in the capital as in the kingdom at large, there was no true Hellenism; the commingling of Oriental and Western elements resulted in the perpetuation of the worst features of both races, and the moral worthlessness of the Syrian found in the brilliance and artistic temperament of the Greek merely the means of concealing the crudities of his own life. The characteristic failing of the Greek also was exhibited on a great scale. A third element, and that the one most important for biblical history, was provided by the Jews. The colony was in fact coeval with the city, for it dated from the time of Seleucus Nicator, who gave the Jews the same privileges as he gave the Greeks (Jos. *Ant.* xii. 31).¹ For this connection with the Syrian kings see 1 Macc. 11.42f. Herod completed the marble-paved street which we can

¹ According to 2 Macc. 4.9 (cp. also v. 19) Jason conferred on the people of Jerusalem the status of citizens of Antioch (ANTIOCHIANS) on which see *Th. T.* 12.544 (78).

trace from the 'Gate of St. Paul' to the modern town (Jos. *Ant.* xvi. 53). Thus all the forms of the civilised life of the Empire found in Antioch some representative.

In its agora, said Libanius, the customs of the world might be studied. In no city was pleasure more earnestly pursued. *Daphnici mores* were proverbial; the Orontes was synonymous with superstition and depravity (Juv. *Sat.* 36a). Yet it would be of value to discover to what extent the lower and middle orders of the population were really affected by the luxury and *abandon* of which we hear so much; that is after all but one side of the city's life, and there is a temptation to exaggerate it. There was little real intellectual life; epigram and light prose were the most flourishing forms of literature. Cicero (*Pro Arch.* 3, § 4) is exaggerating with his 'eruditissimis hominibus liberalissimisque studiis adfluenti.' Antioch is far less celebrated than Alexandria in the literature of the first and second centuries A.D. This intellectual attitude is a fact of some importance, in its relation to the first Christian teaching.

The mixture of Roman, Greek, and Jewish elements admirably adapted Antioch for the great part she played

3. Christianity. In the early history of Christianity, the city was the cradle of the church. There, as elsewhere, Judaism prepared the ground for the seed of the word (cp. Chrys. *Hom.* xxv.). 'Nicolas, a proselyte of Antioch,' one of the first deacons (Acts 6:5), was only one of a 'vast multitude of Greeks' who in that city were attracted to the Jewish doctrine and ritual (Jos. *H.* vii. 33; cp. Acts 11.19-21). The ancient and honourable status of the Jews in Antioch gave to the infant church a firm and confident organisation. Very early the city became a centre on a level with Jerusalem in importance (Acts 11.22-30 13:1). The cosmopolitanism of its inhabitants inevitably reacted upon the Christians in the way of familiarising them with universalist ideas, and Antioch consequently became the centre of missionary labour. It was Paul's starting-point on his first journey with Barnabas (Acts 13:1-3), and thither he always returned with his report of work done (Acts 14.26f. 15.30 18:22). It was at the instance of the church at Antioch that the council of Jerusalem sent the circular letter to the gentle Christians (Acts 15.23 Gal. 2.4-14), and, according to Acts 11.26 (on which see CHRISTIAN, beginning, and § 2 [end]), it was in Antioch that 'the disciples were called Christians first'—undoubtedly as a nickname. We know that the people of Antioch were noted for their scurrilous wit (Philost. *Vit.* 3.16 Zos. 3.11 4.1 Procop. *BP* 2.3).

ANTIOCHIANS (ΑΝΤΙΟΧΕΙΟΙ [VA]). 2 Macc. 4.19 (-χιῶν [A]), and in AV also v. 9 (-χων [V]), where RV has 'citizens of Antioch.' See ANTIOCH 2, § 2 n.

ANTIOCHIS (ΑΝΤΙΟΧ[Ε]ΙΣ [VA]), concubine of Antiochus IV. Epiphanes (2 Macc. 4.30).

ANTIOCHUS (ΑΝΤΙΟΧΟΣ [ANV]; ΑΝΤΙΩΧΟΣ* once, V* once, A once). 1. Antiochus III., surnamed the Great, was the son of Seleucus Callinicus, and ascended the Syrian throne at the age of fifteen, on the death of his brother Seleucus Ceraunus. He is the earliest of the great SELEUCIDÆ (q.v.) mentioned in the Apocrypha, but Antiochus II., Theos and Antiochus I. Soter (his grandfather and great-grandfather respectively) are alluded to in Dan. 11 (see DANIEL, § 6). His reign (223-178 B.C.) embraced a series of wars against revolted provinces and neighbouring kingdoms, wars in the prosecution of which his disasters and successes were equally great. The events of his life are briefly alluded to in Dan. 11.10 ff.—notably his expedition in Asia Minor in 197 B.C. (cp. v. 18) which, after varying fortune, ended in a crushing defeat at the hands of Scipio Africanus near Magnesia in 190 B.C. (cp. v. 18). This was one of the exploits of the Romans which

ANTIOCHUS

Judas the Maccabee is said to have heard of (1 Macc. 8:1-3).

The account in its present form is not free from inaccuracies. Thus, the writer states that Antiochus, the 'great king of Asia', had with him 200 elephants (6, 10, *ἑκατόν* [κ']); but according to Livy (37:30) there were only fifty-four. 'It is not unlikely that in the popular tradition the original number was exaggerated' (Cambr. Bible, *ad loc.*). Cp. MACCABEES, FIRST, § 10.

One of the conditions of the humiliating peace imposed in 188 B.C. was that twenty hostages, including a son of the king (cp 1 Macc. 1:10 and below, 2), should be sent to reside in Rome. Antiochus the Great was killed in an attempt to plunder the temple at Elymais (187 B.C.), and was succeeded by his son Seleucus IV. Philopator. See SELEUCIDÆ.

2. Antiochus IV. Epiphanes ('Ἐπιφανής' the illustrious' [cp 1 Macc. 1:10 where A -eis], called in mockery 'Ἐπιμανής' the madcap'), youngest son of no. 1. On his place as hostage (see above, 1) being taken by his nephew DEMETRIUS, he returned to the East, and—his elder brother, Seleucus IV., having meanwhile been murdered—seized the Syrian throne (175 B.C.), and soon became famous for his conquests in Coele-Syria, Palestine, and Egypt (cp 1 Macc. 1:16 ff.; 2 Macc. 5:1 ff. and see Dan. 11:21 ff.). During his Egyptian campaign he twice took Jerusalem (1 Macc. 1:21 ff.; 2 Macc. 5:13 ff.). In spite of the presence of a strong favourable Hellenistic party (see JASON, MENELAUS), Antiochus appears to have seen that he could never hope to subdue Judæa until he had rooted out the peculiar Jewish religion (see ISRAEL, § 69 f.). He accordingly promulgated a decree enjoining uniformity of worship throughout his dominions (1 Macc. 1:42 ff.), and even went so far as to endeavour to force upon the Jews the worship of heathen deities (see ABOMINATION, II.). His persecuting policy was responsible for the rise of the ASSIDEANS, and stirred up the successful resistance of the Maccabees. His end (164 B.C.) is variously described. According to 1 Macc. 6:1-16 he was visiting a rich and celebrated temple in Persia (see ELYMAIS), when tidings of the ill-success of his troops in Judæa, and remorse for his sacrilege at Jerusalem, caused his death—according to Polybius (31:2) at Tabæ in Persia.¹ The usually accepted reference to his end in 2 Macc. 1:10-17 is not very probable, see MACCABEES, SECOND, § 7. He is doubtless alluded to in Ps. 75:4 f., and there are numerous references to his life and character in DANIEL (*q. v.*, §§ 1, 6, 8, 10, 18).

The post-Talmudic tract *Megillath Antiochus* is a legendary account, in Aramaic, of the persecutions in his reign; cp Schü. *C. l. v.* 11:3 (see MACCABEES, SECOND, § 11). See SELEUCIDÆ.

3. Antiochus V. Eupator (*Ἐπάτωρ*), the young son of Antiochus IV. Epiphanes (see 2, above), was left under the care of LYSIAS, whilst the father conducted his wars in Persia (1 Macc. 3:32 f.). On the death of Epiphanes (164 B.C.) Lysias obtained the regency, ousting his rival PHILIP, 5, and set up Epiphanes' son as king, giving him at the same time the surname Eupator (1 Macc. 6:14 ff.)—'on account of the virtues of his father' (Appian). Together they entered Judæa (see ISRAEL, § 75 beg.) and, encamping at Beth-zacharias, besieged Bethsura (see BETH-ZUR). The Maccabees were defeated and the famous ELEAZAR (*q. v.*, 7) was killed (1 Macc. 6:28 ff.).² The war was brought to an abrupt close, however, by the news that Philip had occupied Antioch, and a hasty peace was concluded restoring to the Jews the privileges they had enjoyed previous to the persecutions of Antiochus Epiphanes (cp ISRAEL, *l. c.*). In the following year (162 B.C.) the king and his guardian were put away by DEMETRIUS [*q. v.*, 1] (1 Macc. 7:1 ff.; 2 Macc. 14:1 ff.). See SELEUCIDÆ.

4. Antiochus VI., surnamed THEOS (Θεός), son of Alexander Balas, spent his early youth as a ward of

¹ His father, Antiochus III. the Great, died whilst engaged in this same district upon a similar errand. Tradition may have confused the son with the father.

² 2 Macc. 13:21 ascribes their ill-success to treachery (see RHODES).

ANTIPATRIS

an Arabian (see IMALCUE). He was brought forward by Tryphon, a former follower of Balas, and set up as king in opposition to Demetrius Nicator (see DEMETRIUS, 2) who was rapidly becoming unpopular (1 Macc. 11:39-54; 14:5 B.C.). On his coronation he received the surnames 'Epiphanes' and 'Dionysus.' Henceforth he became a mere tool in the hands of Tryphon, who ultimately found an opportunity of slaying him (1 Macc. 13:31). See further TRYPHON, SELEUCIDÆ.

5. Antiochus VII. Sidetes (Σιδήτης),—*i. e.*, man of Side in Pamphylia,—called also *Ἐδωκῆς* (Jos. *Ant.* xiii. 82), was the son of Demetrius I. and younger brother of Demetrius II. Nicator. The capture of his brother by the Parthians gave Sidetes the opportunity of asserting his claim to the Syrian throne in opposition to the unpopular TRYPHON. To win over the Jews he wrote, from Rhodes, to Simon 'the chief priest and governor,' and by advantageous concessions, remission of royal debts, and the formal permission to coin money, attained his end (1 Macc. 15:1 ff.; *ἄντιπατρις* [n^o v. 1]). Tryphon was besieged at Dor (*v.* 25), and ultimately forced to flee to Orthosia (*v.* 37). The situation immediately changed. Antiochus felt his position secure, and sent Athenobius to Simon demanding Joppa, Gazara, the citadel of Jerusalem, and the arrears of tribute (28 ff.). The refusal of these demands brought about war, and CENDEBEUS was dispatched against the Jews (15:38 ff.). Sidetes appears no more in 1 Macc.; but in the time of John Hyrcanus (see MACCABEES, i. § 7) he came and besieged Jerusalem (133 B.C.), and five years later met his death whilst fighting the Parthians under Phraortes II. (Arsaces VII., 128 B.C.). See SELEUCIDÆ.

6. Father of NUMENIUS (1 Macc. 12:16 14:22).

ANTIPAS (ἄντιπᾶσις [Ti. WH], abbrev. from *ἀντιπασις*, see Jos. *Ant.* xiv. 13; cp Cleopas from *Κλεοπάσις*). 1. See HERODIAN FAMILY, 2.

2. The faithful witness' of Pergamum named in Rev. 2:13. According to the *Acta Sanctorum* (Apr. 11) he was bishop of Pergamum, and suffered death (by the 'brazen bull') under Domitian.

ANTIPATER (ἄντιπατρις [ANV]), son of Jason [3], an ambassador sent by the Jews to the Lacedæmonians (1 Macc. 12:16 14:22). See SPARTA. For the Antipater from whom Antipatris (see below) was named see HERODIAN FAMILY, 1.

ANTIPATRIS (ἄντιπατρις [Ti. WH]) was founded by Herod the Great on 'the finest plain' of his kingdom

1. **Allusions.**—*i. e.*, Sharon—in memory of his father Antipater (Jos. *BJ* i. 21:9), but also, as the history of the town abundantly proves, for strategic reasons. The other details given by Josephus are, that it lay 'close to the mountains' (*BJ* i. 4:7) on the plain of Kaphar Saba (*Καφαρσαβᾶ*), fertile and well-watered, that a river encompassed the city, and a grove of very fine trees (*Ant.* xvi. 5:2). In another passage, probably from a different source, Josephus identifies it with Kaphar Saba (*Χαλκισαβᾶ* ἢ *νῦν* *Ἀντιπατρὶς καλεῖται*), and tells how, to resist Antiochus on his march against the Arabians (*circa* 85 B.C.), Alexander Jannæus made a deep ditch and a wall, which however Antiochus destroyed, extending thence, a distance of 150 (?) stadia, to the sea at Joppa (*ib.* xiii. 15:1). During Roman times Antipatris was a station at or near the junction of the military roads from Lydda and from Jerusalem respectively to Cæsarea, where the latter road issued from the hills. Thus Paul was brought by night from Jerusalem to Antipatris and thence, part of his escort returning, to Cæsarea (*Acts* 23:31). The return of so much of Paul's escort is explained by the fact that, Antipatris being according to the Talmud (*Talm. Bab.*, *Gittin*, 76a) on the limits of Jewish soil, all danger of an attack by the threatened Jewish ambush (*Acts* 23:16-20 ff.) was now past. There, in 66 A.D., Cestius Gallus halted on his way to Lydda (*BJ* ii. 19:1), and to this point, on his subsequent retreat from Jerusalem, he was pursued by the Jews (*ib.* 9). There,

too, in the same year, Vespasian halted on his march from Caesarea to Lydda (*id.* iv. 81).

Antipatris is not marked in the *Tab. Pent.* The Bordeaux Pilgrim (333 A.D.) gives it as 10 R.M. from the Lydda and 26 from Caesarea; the *Itin. Ant.*

2. Site. as 28 from Caesarea; and Eus. and Jer. in the *Onom.* as 6 S. from Galgulis (in all probability the present Jiljūliyah). Schürer (*Hist.* 3.130) and others, following Rob. (*BR* 4.139 f.), identify it with the present Kefr Sābā, 23 R.M. (as the crow flies) from Caesarea. But, as Kefr Sābā is no less than 17 R.M. from Lydda and 2 R.M. N. from Jiljūliyah; as, besides, it has no ancient remains, nor any such wealth of water or encompassing river as Josephus describes, it is more probable that Antipatris lay farther S. on the upper waters of the 'Aujeh, which are about 29 R.M. from Caesarea, 4 S. of Jiljūliyah, and about 11 N. of Lydda, in a district which better suits the data of Josephus. Here Dr. Sandreczky and Sir C. W. Wilson (*PEF Qu. St.*, 1874, p. 192 f.) have suggested the site of *Kal'at Rās el-'Ain*, at the very copious sources of the 'Aujeh, which they identify with the crusading castle of Mirabel (el-Mirr being a neighbouring place-name). They point out, too, that the valley of the 'Aujeh would be a more natural line for the great ditch of Alexander Jannæus than a line from Kefr Sābā to the sea. Although Neubauer (*Géog. du Talm.* 80 ff.) thinks that the Talmud distinguishes between Kefr Sābā and Antipatris, this is doubtful, for, while their names are given separately, both are defined as border towns—between Samaria, a heathen country, and Judæa. These are all the data for the question of position. Without excavation on the sites named, and the discovery of the rest of the Roman road—probably the road by which Paul was brought—traced by Eli Smith in 1843 from Gophna to the plain, but lost at the edge of the hills (*Biblioth. Sac.* 1.478 ff.), it is impossible for us to be certain where exactly Antipatris stood. We cannot expect to find many ruins on the site. Unlike other Herodian sites, it is not stated to have been embellished by great buildings; and the town did not afterwards develop. Buhl (*Pal.* 199) favours Rās el-'Ain.

In 333 the Bordeaux Pilgrim calls it a *mutatio*, or change-house, not a *ciuitas* like Lydda (the next 'change' he mentions is Bethbar, 17 Km. towards Caesarea—perhaps the present *Beit Bar*, *PEF Mem.* 2.108). In 454 the *Itin. 2.3* *Palæst.* calls it 'seminarium oppidulum'. In 451 it had a bishop (*Acts of the Council of Chalcedon*: 54 *Presb. Irenæus* *Jerusalem*, 300, 301, 302), and in 744 it still contained Christians. With their disappearance before the Arabs, the Greek ecclesiastical name would vanish, and has not been recovered (but see the curious statement of a native in *PEF Mem.* 2.134, that the name of Kefr Sābā is Antipatris). The Crusaders wrongly identified Antipatris with 'Arsif, the ancient Apollonia. G. A. S.

ANTONIA. See JERUSALEM.

ANTOTHIJAH, or rather RV ANTHOTHIJAH (ענתותיה, ענתותיה [Gi.], ענתותיה [Ba.]; probably a feminine adjective formed from ANATHOTI [q. v.]), in genealogy of BENJAMIN (*Gen.* 46. 21, § 9 ii. 37, 1 Ch. 7. 34) [ΑΝΑΘΟΤΙΩΝ] [ΑΝΑΘΟΤΩΝ. Α] ΚΑΙ ΑΘΕΙΝ [Α] [ΑΝΑΘΟΤΩΝ] [Α].

ANTOTHITE (ענתותיה), 1 Ch. 11. 28 AV. See ANATHOTH, 1.

ANUB (אנוב); ENNON[?] [B], ERNΩB[?] [A], ANOB[?] [I.]; ANOB), a Judahite, descendant of Coz (RV Hakkoz) (1 Ch. 48). Probably to be identified with ANAB (We.).

ANUS (ΑΝΝΑC [B]). 1 Esd. 9. 48 AV = Neh. 8. 7 HANAN. 4.

ANVIL (פועם), Is. 41. 7. See METAL WORK.

APAME (ΑΠΑΜΗ [BA], -ΠΗ [I.]; *فامه*), *APAME*, daughter of Bartauc and concubine of Darius (1 Esd. 4. 29).

APAMEA (Jer. Talm. *Kil.* 9. 32c שפמיא, but oftener שפמיא), mentioned in the Yg. text of *Judith* 3. 14, apparently as a district ('pertransiens . . . omnem Apameam') in the line of march of Holofernes.

'Αφάρσιον, one of the ten districts of N. Syria under Rome (*Pal. Geog.* s. 15. 19), took its name from 'Αφάρσιος, a famous town (named after Seleucus Nicator's Persian wife), built on a hill some six or seven miles east of the Orontes, half-way between Emesa and Antioch, and now represented by an important town under the village that occupies the site of the old citadel, now called *Kal'at el-Mudik*. See Strabo, p. 728; Ritter, *Landtafel* 17, Abt. ii. 1075-86; E. Sachau, *Reise in Syrien u. Mesopot.* 71-72 (photographs and map); also *loc. cit.* Boettig. *Lea. Jes.*

APE (אֵפֶה, אֵפֶה; ΠΙΘΗΚΗ [BAL]; *stima*, 1 K. 10. 22, *Μηλον τομαριτων* [B]). עפ 2. 11; 2 Ch. 35. 7. An animal mentioned among the rarities brought from Ophir by Solomon's fleet. The Heb. *kōph*, 'ape,' is evidently a loan-word,¹ and is usually connected with *kapi*,² the Sanser. name of the ape; thus the home of the animal, though not necessarily the situation of Ophir, will be indicated. It is mentioned in each case, in MT (the phenomena of *ס* are here very peculiar), in connection with the peacocks (if the common theory is correct) imported by Solomon from OPHIR. Perhaps 'monkey' would be a more correct modern English rendering than 'ape,' which suggests the tailless *quadrumana*, while the animals of this order represented on the Assyrian and Egyptian inscriptions have tails. Just so, *kōphai* would have been a better Greek rendering than *πίθηκοι* (the LXX word), if Aristotle is correct in making the *πίθηκοι* tailless. Four kinds of monkeys are represented on the Assyrian monuments. Those on the black obelisk of Salmanneser II. seem to belong to an Indian species; they appear in company with the Indian elephant and the Bactrian camel (Houghton, 'On the Mammalia of the Assyrian Sculptures,' *TSBA* 5. 319 f. [77]). Monkeys (*gōb*) and baboons were much in request in Egypt. Queen Hatshepsut ('Hatasu,' 18th dynasty) received them among other rarities from the (African) land of Punt; see the picture of the native ambassadors leading specimens of the *Cynocephalus P. mandrillus* and the *Cynocephalus Babianus*.³ Halévy, however (*RE* 12. 63 f.), would identify Solomon's עֵפֶה and עֵפֶה (see PEACOCKS) with the *tuku* and *kikuyi* mentioned in the Amarna tablets in the requests of the Asiatic princes—i. e., different sorts of vessels full of aromatic oil, etc.⁴ Plutarch (*de Is. et Osir.* 81) gives an account of the sixteen ingredients of the Egyptian *kōph*.⁵ S. M.—A. L. S.

APELLES (ΑΠΕΛΛΗC [Ti. WII], contracted from 'Απολλώδαρος) is saluted in Rom. 16. 10, where he is called 'the approved (δόκιμος) in Christ,' an expression which seems to suggest that he had shown constancy as a confessor in time of trial. Nothing further is known of him. Weizsäcker suggests that his Christian activity may have been chiefly within the household of Aristobulus also mentioned in *v.* 10 (*Apost. Age* 1. 359).

In the list of the 'seventy apostles' which we owe to Pseudo-Dorotheus, Apelles is represented as bishop of Heraclea; that of Pseudo-Epiphanius mentions Smyrna. According to the *ύπόμνημα* of Peter and Paul by the Pseudo-Symeon Metaphrastes, he was consecrated bishop of Smyrna by Peter.

APHAEREMA (ΑΦΑΙΡΕΜΑ [SV¹]), 1 Mac. 11. 24 RV. AV AMPHEREMA.

APHARSACHITES (אפארסאכיים [Ba.]; אפאר [Gi.]; ΑΦΑΡCΑΧΑΙΟΙ [BA], but -CΑΚΚΑΙΟΙ [B] in Ezra 56; -PACΘΑΧΑΙΟΙ [L]; see also next article), a word used (Ezra 5. 66 f.) apparently as the title of certain officers under Darius. Another form is APHARSATHTCHITES; see Ezra 4. 9, where the word is misunderstood (see EZRA, ii.

¹ If it belongs to the original text: see ELLIOTT, § 26.

² Whose also *apilob* or *omnis*, and *ling. ap.*

³ Edouard, *Pharaoles, Evénements, and P. pharaon* and. See also the apes and baboons on a wall-painting in a tomb at *Bersheh* (Egypt. Explor. Fund), Pl. II, plate xi.; cp p. 29.

⁴ See Am. Tab. B. 28 = *Wi.* 294, col. 2, 40; 1. kukupu ša . . . [ka]-du nakamtisii, 'a kukupu . . . with its lid'; col. 3, 43 . . . kukubu šamni [abi], ' . . . a kukubu of good oil'; B. 5, 1, 25 (recto) šamni ka tabu alhya ukiranni *li duk* kukupu 'send me, my brother, good oil, two vessels *kukupu*' (so Hal., not in *Wi.*). *Duk* or *tuk* (pl. *tukū*) is the ordinary ideogram for 'vessel, receptacle.'

⁵ The Assyriological notices are mostly due to Prof. Cheyne.

§ 10) and treated as the name of a tribe settled in Palestine by ASNAPPER. Its etymology is still very uncertain. See G. Hoffmann, *ZA* 254 f.; Marquart, *Fund.* 64; and Andreas in Marti, *Bibl.-aram. Gram.*, Glossary, p. 53^r.

APHARSATHCHITES, The (אִפְרָסְתְּחִיטִים [Ba.]; אִפְרָסְתְּחִיטִי [Gl.]; φαρσθαχαιοι [B]. ἀφάρσαθ- [A]. ἀφάρσταχ- [L.], Ezra 49f. See APHARSACHITES.

APHARSITES (אִפְרָסִיטִים [Ba. Gl.]; ἀφρασαιοι [B], ἀφρασαι [A]; φαρσθαχαιοι [L.], mentioned in Ezra 49f as a tribe settled in Palestine by ASNAPPER. Various attempts at identification have been made (*Persians*, by Rawlinson, *Pulp. Com.* ad loc., but see *KAT*² 376; *Parsua*, a Median tribe, by Del. *Par.* 327; but the word is best regarded as a scribe's error, related (some think) to אִפְרָסִיטִים (EV APHARSACHITES, Ezra 56 66), or, more probably, miswritten for סִפְרָיִם, 'scribes.' The last letter of אִפְרָסִיטִים (MT סִפְרָיִם, see TARPELITES was attached by dittography to the next word (Marquart, *Fund.* 64).

APHEK (אֶפֶק [B. AL]). It is not easy to determine how many places of this name are mentioned in the OT. Only one of them has been satisfactorily identified.

1. In Josh. 13₄ (אֶפֶק [B], ἀφεκα [A], -אק. [L]) Apek appears as the limit of the Sidonian country, apparently as its northern limit towards the Gîlbites or Byblians. This Apek, therefore, is commonly identified with Aphaca (now *Afka*), famous for its sanctuary of Astarte, which lies at the source of the river of Byblus, the Adonis or (as it is now called) Nahr Ibrahim; cp Lucian, *Dea Syria* 6-8.

2. The Apek assigned in Josh. 19₃₀ to the tribe of Asher is mentioned in Judg. 13₁ (where the name is written אֶפֶק, אֶפֶק, אֶפֶק [AL], אַעִי [B]) as one of the towns which the Canaanites were able to maintain against the invaders. Here also some suppose that Aphaca is meant; but it is difficult to believe that Asher ever attempted to extend so far north, and, as it appears from Josh. 17₁₁ that Asher had a theoretical claim to part of the plain of Sharon S. of Mt. Carmel as far at least as Dor, it is probable that Apek in Sharon (no. 3) is meant.

3. In Josh. 12₁₈ (אֶפֶק [B]) we read, in the list of the kings smitten by Joshua, 'the king of Apek, one; the king of Lasharon, one', but it is better to emend the verse with the aid of ⁵B ('Ὁφὲκ τῆς Ἀρώκ) and read 'the king of Apek in the (plain of) Sharon, one' (see Di. on the passage). This Apek in Sharon, as Wellhausen has pointed out, is the city (a) from which the Syrians of Damascus made repeated attacks on Samaria, 1 K. 20₂₅; (b) ἀφεκα [BA], -אק. [L.], 2 K. 13₁₇,² and (c) and from which the Philistines assembled their forces for war with Israel before the battles of Gilboa (1 S. 29₁) and of Eben-ezer (1 S. 4₁; Jos. ἀμπεκα or ἀφεκα).

(a) As regards the Apek of Kings: that it lay in a lowland plain is clear from 1 K. 20₂₃, and that the plain is that of Sharon follows from 2 K. 13₂₂ ⁵B, where we find the addition (undoubtedly genuine) 'and Hazael took the Philistine from his hand from the Western sea to Apek.' Apek therefore lay on the verge of Philistia —i.e., in Sharon—and we must understand that, both in Benhadad's time and in the time of Hazael, the Syrians avoided the difficulties of a direct attack on the central mountain-land of Canaan by striking into the maritime plain south of Carmel and so securing the mastery of the fertile coast-land without having to besiege Samaria. Their route would, in fact, be the present great road from Damascus to Ramleh through Megiddo.³ At Apek,

somewhere in the north of the Sharon Plain, they had a great military post from which they could direct their armies either against Samaria or against the Philistines (2 K. 12₁₇ [18]).

(b) As regards the Apek of Samuel: it is clear that a point in the northern part of the Sharon Plain, on the road to Megiddo and the plain of Esdraelon, is appropriate to 1 S. 29₁. The mustering-place of the Philistines cannot have been in the heart of the Hebrew territory, least of all at such a place as el-Fakū' on Mt. Gilboa (in the rear of Saul's army!) where it is absurdly placed by Conder and Armstrong. It is argued that the Philistines were at Shunem (1 S. 28₄) before they reached Apek; but to argue thus is to forget that 1 S. 28₃₋₅, the story of Saul and the witch of Endor, is a distinct narrative, by a different hand, and that 29₁ originally followed directly on 28₁f.

(c) Finally, the attack on central Israel which issued in the battle of Eben-ezer and the destruction of Shiloh (1 S. 4) would naturally be taken to have been made from the same Apek, were it not that commentators have assumed that the position of Eben-ezer, and therefore of Apek, is fixed somewhere near Mizpah by 1 S. 7₁₂. It is certainly safer, however, to distinguish the battlefield of Eben-ezer in 1 S. 4₁ from the stone Eben-ezer set up by Samuel many years later, than to assume the existence of two Apeks fitted to be the starting-point of a Philistine campaign (cp EBEN-EZER). And here also it is to be observed that chaps. 4 and 7 are derived from distinct documents, and that the historical value of the second is very insecure.

From what has been said it will appear without further argument that it is illegitimate to seek an Apek in the region, between Mt. Tabor and the Sea of Galilee, to which Eus. and Jer. give the name of Saron, or to place the Apek of Kings at the caravan-station of Fik in the mountains to the E. of the Sea of Galilee. This may be the Aphaca near Hippus or Hippe of OS 91 24 and 219 72; but is not a biblical site. W. R. S.

The existence of an Apek in Sharon is put beyond doubt by the following additional evidence. *First*, in the lists of Thotmes III. (c. 1600 B.C.) nos. 60-76 form a group by themselves; 62 is Joppa, 64 Lydda, 65 Ono. Then come 66 Apukn, 67 Suka, 68 Yhm. At this last place, Thotmes had to decide which of three roads he should take over Carmel. Yhm must therefore have lain near the most southerly road—that is, somewhat south of the mouth of the Wady 'Abu Nâr—and may be the present Yemma by the high road along the edge of the Samaritan Hills. Suka is doubtless the present Shuweikeh, 2 m. farther S. Apukn therefore lay between it and Ono. Maspero, it is true, identified Suka and Apukn with the Judæan Shochoh and Apeka of Josh. 15₄₈ 53; but W. Max Müller (*As. u. Eur.* 161) has shown that the list contains nothing S. of Ajalon. The *n* of Apukn may be the common termination of place-names ^π. Max Müller says it may also be read as *i*. *Secondly*, in the autumn of 66 A.D. Cestius Gallus, advancing on Jerusalem from Caesarea, reached Antipatris, and 'sent before' a party to drive the Jews out of 'the tower of Apek' (Πύργος Ἀφεκοῦ). After taking the tower he marched on Lydda (Jos. *B. J.* ii. 19₁). This agrees with the data of Thotmes III. and places Apek between the River 'Aujeh and Lydda. Here there is now no place-name which affords any help in the case, unless it be that of the village Fejeh—i.e., originally, Feggeh—about 9 m. NE. of Joppa (which, however, does not lie quite near enough to the E. limit of the plain to suit Lucian's text of 2 K. 13₂₂), and it ought not to be overlooked that in a list of mediæval Arab place-names quoted by Röhrich (*ZDPV*, 1896) there occur both Sar Fuka and Fakin. *Again*, in a fragment of Esarhaddon (681-668 B.C.) a city Apku is described as 30 'kasbu-kakkar' from Raphia on the Egyptian frontier. Schrader (*KAT*² 204), who translates kasbu-kakkar by 'double leagues,' takes Apku to lie on

³ *ibid.* 3.

⁴ Cp the route of Al-Nābulus, ed. Thuch.

also attributed the work to Cerinthus (Eus. *HE* iii. 282). From the retortation of Iulian by Hippolytus (επιβολαα καρα Γαλου, Assen. *Bibl. Or.* vi. 115; fragments in Gwynn, *Hermach.* 6 307-118; cp also the writing catalogued in the inscription on the *Θεοσυνεσιον του κατα Ιουλιανου επισημασμενου και αποκαλυφτικου*) we learn that Caius directly took up and continued the criticism of the Alogi.

The criticism of Dionysius of Alexandria (Eus. *HE* vii. 25) was more moderate and more effective. He does not hold Cerinthus to have been the author of the Apocalypse, but conjectures that it must have been the work of some other John than the son of Zebedee, arguing from a comparison between the Apocalypse on the one hand and the Gospel and Epistles on the other as to style, language, and contents. The criticism of Dionysius was afterwards taken up by Eusebius, who was the first to provide a firm basis for the conjecture of Dionysius as to a second John by a reference to what Papias says of 'both' Johns (*HE* iii. 39) and inclines to class the Apocalypse with the spurious books, *ροβου* (*HE* iii. 254).

Henceforward the view of Dionysius and Eusebius became the prevailing one in the Eastern Church.

The book was recognised, indeed, by Methodius of Tyre (*Synops.* 136-84, 96) and Pamphilus (*Apoc.* ed. de la Rue, 425 31), but on the other hand unrecognised (by Cyril *Orthodox.* 438 70; *Orig.* 11, 1111).

5. Eastern Church. The Synod of Laodicea (Can. 64, see Zahn, *op. cit.* 217 ff.), the *Antilegomena* (Antilegomena) (Can. 85 [84]; Zahn, 2 102 ff.), the *Fanabites* of Seleucus (Zahn, 2 217). The Apocalypse is not mentioned by Theodore of Mopsuestia, or by Chrysostom (cp the *epitaphia* of the Synopsis of Chrysostom, Zahn, 2 230), or by Theodoret. In the *Stichometry* of Nicephorus manipulated in Jerusalem (circa 850; Zahn, 2 288 206 f.) it figures among the *Antilegomena*; in the list of the sixty canonical books it is not found, though it is again introduced into the *Synopsis* of Athanasius.

The unfavourable judgment of the Syrian church regarding it is very noteworthy.

The *Doctrine of Adlai* which, in the form in which we now have it, dates from about 400 A.D., recognises, as authoritative scripture, nothing beyond the four gospels.

6. Syrian Canon. The Pauline Epistles, and Acts. From **Church.** The Peshitta it is wholly absent. Whether Ephraim recognises the Apocalypse as canonical is, to say the least, doubtful. The Greek works that pass under his name, being of uncertain authenticity, cannot here be taken into account, and thus the evidence that he did appear to rest mainly on a single passage (*Opera*, Assen. 2 22, cp Rev. 51-2).¹ In any case, the noteworthy fact remains that Ephraim cites the Apocalypse but little, and develops his apocalyptic ideas on lines supplied by other writings. Besides, the Syrian Church did not look upon the book with favour.² Jacob of Edessa (ob. 708) cites it (Ephraemi opera, ed. Assen. 1 192), and ʿʿr Salib (ob. 1171), bishop of Mabug (Mabogh), comments on it (Gwynn, lxxviii 63); but Bar Hebraeus (ob. 1286) holds it to be the work of Cerinthus or of the 'other' John (Assen. *Bibl. Or.* 875), and 'Ebed Jesu' (ob. 1318) omits it from his list of canonical scriptures. In an Armenian Canon also, by Mechlitar of Aivirvan (1290), the Apocalypse is reckoned among the *Antilegomena*.

Though the opposition to the Apocalypse was thus persistent in the Syrian Church, it gradually died away in the other Eastern provinces.

7. Rest of East. The book is acknowledged by Athanasius, Didymus, Cyr. Alex., Nilus, Isidore of Pelusium (Egypt), Gregory of Nyssa, Epiphanius of Salamis, and Johannes Damascenus. Andrew, archbishop of Caesarea in Cappadocia, wrote his commentary on it in the first half of the fifth century. He was not, however, followed in this until the ninth century, when Arethas, his successor in office, also undertook the task.

In the Western Church, on the other hand, the Apocalypse was accepted unanimously from the first.

8. West. Hippolytus (see above) defended and commented on it in a no longer extant work, and makes copious quotations from it in his Commentary on Daniel and in his *De Antichristo*.

Similarly, it is recognised by Lactantius (*Inst.* 2 27 10, *epit.* 42; cp 715 ff.), Hilary (*De Trin.* 6 20 42), Ambrose

¹ Gwynn (*The Apocryphous of St. John in a Syriac Version*, Dublin-London, 1897, p. ciii) cites also De Lamy, *Hymn.* 1 66—a passage which the present writer finds himself unable to accept as proof.

² Thomas of Harkel, it is true, included it in his translation, as probably also (according to the latest researches of Gwynn) did Philoxenus of Mabug (Mabogh).

³ See Linke, *Versuch einer vollständigen Einleitung in die Offenbarung Johannis* (9, Bonn, 1852).

(*De Virg.* 14, *De Spiritu* 302), Rufinus (*Exp. in Synod.* 37); on Novatus, Commodian, Arnobius, and others see Lardner, *Credibility of the Gospel History*.

Augustine (*in Evang. Joh.* 13 36, *Epist.* 118, *Civ. Dei* 217) insists on the identity of the author of the Gospel with the writer of the Apocalypse.

The book was acknowledged at the synods of Hippo (393) and Carthage (397). As early as the end of the third century it was commented on by Victorinus, bishop of Pettau (ob. 303 A.D.). He was followed by the Donatist Ticonius (before 380).

An exceptional position was taken up by Jerome, who, under eastern influence, relegated the Apocalypse to the second class of *scripturae ecclesiasticae* (*in Pt.* 149), as also afterwards by Philastrius, if it be indeed the case that the book was not mentioned in the Canon of his *De haeresibus* 87 f.

At a later date the capitulum Aquigranense (*Corp. Jur. Germ.*, ed. Walter, i. 177 f., cap. 20), adopting the decision of the Synod of Laodicea, removed it from the Canon.

At the Reformation the view of Jerome was revived by Erasmus in his *Annotationes*. Luther's well-known

9. Since Re- adverse judgment, pronounced in his **formation.** preface of 1522, rests more on a religious than on a scientific foundation. Subsequently he gradually modified his view in a sense more favourable to the book.

In his translation, however, he indicated his unfavourable opinion so far as at all events that he relegated James, Jude, Hebrews, and the Apocalypse to the end of the NT without pagination. The last edition of the NT in this form appeared in 1689. Carlstadt (*Libellus de canonibus scripturarum*, 1520), falling back on the criticism of Eusebius, classed the Apocalypse among the seven *Antilegomena*. The opposition to its reception lasted down to the following century, and disappeared only after the introduction of John Gerhard's cunningly devised distinction between canonical and deuterocanonical writings (*Loc. theol.* i. cap. 9, § 241). In the reformed churches the opposition disappeared much earlier—from the time of Calvin, indeed.

In the eighteenth century the question was again revived by Abauzit (*Discours hist. sur l'Apoc.* in *Œuvres diverses*, tom. 1, 1770); Hermann Oeder (*Christlich freie Unterricht*, 16. d. sogenannte *Offenb. Joh.*, published by Semler, Halle, 1769), reverting to the view of Caius of Rome, attributed the book to Cerinthus. He was followed by Semler (*Freie Unterricht des Canons*, 1772), and in many contemporary writings, and by Corrodi (*Gesch. des Chiliasmus*, 1781). The best defence was that of Hartwig (*Apologie der Apok.*, 1780-83). Cp also the successive editions of J. P. Michaelis, *Einl. in die göttlichen Schriften* from 1750 onwards.

Our sources for the text are the following:—

A. Greek MSS.—(1) Uncials. It exists in MAC (89-514 7 14-17 85-9 16 10 10-11 3 10 13-18 2 19 5-22 21 being absent), also in P Porfirianus Chioviensis sc. 2, Act. Cath. Pal.

10. Text.¹ Apoc. (16 12-17 1 19 12-20 2 26 21 being absent), the material, and Q (in Tischendorf, B). Vaticanus 2066 sc. 8 (Apoc. only). (2) Cursive. Of these some seventy are more or less collated. Their readings can be learned from the editions and collations of Mill-Kuster (1710), Bengel (1734 ff.), Weistein (1751-2), Matthæi (1782-88, tom. x.), Alter (1786-87), Birch (*l'arie Lect.* in *Apok.*, 1800), Scholz (30-36), Scrivener (*Codex Augienses*, 1859; *Adversaria Critica*, 93), Tregelles (57-72), Tischendorf (ed. octava major), Alford (*New Test.* vol. iv. ed. 2, 1885), Simcox (*J. Phil.* 22 205 ff.).

B. Versions.—(1) Latin.—A good deal is now known about these. The oldest stage is represented by h (Floriacensis), the Latin translation used by Primasius (Hausseleiter, *Forschungen zur Gesch. des Kanons* iv.); the intermediate, by the Gigas Holmensis (ed. Belsheim, 79). The best material for the Vulgate is brought together in Lachmann (*Nov. Test.*) and Tischendorf. (2) Syriac.—A valuable Syriac rendering (probably the Philoxeniana) has recently been edited by Gwynn (*op. cit.*).² The Syriac MSS hitherto known (see Gwynn, xiv. ff.) represent the text of Thomas of Harkel. (3) Importance also attaches to the still comparatively unexplored Coptic (see Goussen, *Stud. Theol.* i.) and Armenian versions.

C. Church Fathers.—There are copious citations in Origen, Hippolytus (especially in the *De Antichristo*) and in the com-

¹ See F. Delitzsch, *Handschriftliche Funde*, 1861; B. Weiss, 'Die Joh.-Apok.' in *Texte u. Untersuch.* 73 (91); W. Rousset, 'Text-kritische Studien in Texte u. Untersuch.' 114 (94); Gwynn, *The Apocalypse in a Syriac version*, 1897; on which see T. K. Abbot, 'Syriac version of Apocalypse,' *Hermathena*, 1897, pp. 27-35.

² See last note.

mentary on Daniel; see the new edition by Bonwetsch and Achelis, and Syriac. The text used by Andrew of Caesarea and Arethas in their commentaries has not as yet been fully established. The text of the last commentary of Ticonius can best be made out from the excerpt from the commentary on the Pseudo-Augustinian Homilies.

In the attempt to classify this material, it is best to begin with the class which shows the latest text—namely,

11. Classification. (1) the Arethas class, so named because a text of this order was used by Arethas for his Commentary (hence also many cursives of this class are, strictly speaking, MSS of Arethas-Commentaries). To this class belong C and about forty of the more or less known cursives. The material being so defective, separate groups within the class can hardly be distinguished.

Tentatively and under great reservation a few may here be suggested. (i) 3, 6, 10, 27, 33 are somewhat closely connected (cp *TLZ*, 1894, p. 658); (ii) 2, 8, (14), 140, 151, 29, 50, 97 (the last three very intimately related), 94; (iii) 6, 11, 21, (47); (iv.) 7, 16, 39, 45, 69 represent the transition-stage between this class (1) and the next class (2).

The second class, which we can detach from the rest as having arisen out of a later redaction, is (2) the so-called 'Andrew' class—the class to which the text used by Andrew (see above, § 10 C) in his commentary belonged. It falls into several clearly distinguishable subordinate groups.

(i.) The group consisting of 35, 68, 87, 121 stands almost entirely apart, presenting as it does many points of contact with the Arethas group, but often showing a very peculiar text. The following three groups, on the other hand, are very closely akin. (ii) 7, 12, 13, 18, 20, 21, with a very ancient Latinising substratum; (iii) 28, 73, 79, 89, 92; (iv) 10, 17, 37, 49, (72), 91, 96, (104), 105. C¹ and P¹ (products of being read with this class) as a whole, but cannot be associated with any of the subordinate groups in particular.

Of all the known cursives there are only (3) four—[26], 38, 51, 95—which it has hitherto been found impossible to classify; they show an amount text.

It is as yet difficult to detect the 'Western text' (see *FLX*) in the Apocalypse; but this will gradually become practicable as in recent years new sources have become accessible.

Witnesses to it, though only in part, are the uncial α (with a very erratic and only partially ancient text), the text of Primasius (identical, according to Hausleiter's investigations, with Cyprian's text, and thus old African), the fragments of δ , the Gigas Holmensis ζ , Ticonius (containing a later development of the text), and the Syriac version edited by Gwynn and designated Σ (the later version known as S shows a text almost everywhere corrected in accordance with the Arethas class, though in many places also it contains a text older than Σ). To the same category belong also, in part, the group 1, 12, 36, 81, 152 (cp Gwynn, cxi.), and, finally, the Armenian version, which, unfortunately, is not yet sufficiently known (note the coincidence of 1, 12, 36, etc. with arm.; cp Bousset, *Komm.*, 178). A further point worthy of notice is the close affinity of α , Σ (S), and Origen; one might almost venture to constitute α Or Σ a distinct group in the Western Class (Bousset, 181; Gwynn, lv ff.).

Distinctly the best text is that presented by ACVg. The Vulgate furnishes us with good means of controlling the text of ACV, especially where

13. Result. the two differ or where C is wanting. AVg., therefore, where C is wanting, often constitutes a stronger testimony than that of all the other witnesses together.

'I John am he that heard and saw these things' (22 α RV; cp 149). Are we to identify this John with the

14. Professed author. apostle, the son of Zebedee? Within the book itself 214 might fairly be urged against this identification. The

first to submit the question to thorough discussion was Dionysius of Alexandria (see above, § 4); in the result he attributed the book to another John. This theory of a second John, adopted also by Eusebius (*HE* iii. 39: ff.), was revived in the present century (Bleek, Ewald, de Wette, Lücke, Neander, Düsterdieck, etc.), the John of the Apocalypse being usually in this case identified with the 'Presbyter' of *Eus. HE* iii. 39: ff. Criticism advanced another step, however,

and declared the whole tradition regarding the presence of John the Apostle (and Evangelist) in Asia Minor to have been due to a confusion between his name and that of the presbyter.

So Vaghi, *Der Evangelist Johannes*, 1874; *Lehrbücher*, *Die kirchliche Tradition über den Apostel Johannes*, 1893; Keim, *Gesch. Jesu von Nazareth*, 1877, I 101 f.; Scholten, *Das Ap. Johannes in Kleinasien*, 1872; Weidmann, *Das Fragment*, 1874; Thoma, *Das Johannieverb.*, 1882; and others. Against Scholten cp Hilgenfeld, *ZWT*, 1876-77, also Zahn, *St. Kr.*, 1886, p. 649 ff.; *Acta Joannis* clv., Steitz, *St. Kr.*, 1888, p. 399 ff.; *Herzog*, *R. H.* 11: 38 ff.

The question is difficult. The first remark to be made upon it is that the assumption that there were two Johns

15. Only one John in Asia Minor. —the apostle and the presbyter —finds only slender support in ancient tradition. Whatever the interpretation we may put on the important testimonies of

Papias preserved by Eusebius (*HE* iii. 39: ff.), it is at least certain that Papias speaks not of two Johns in Asia Minor—the apostle and the presbyter—but of one John, whom we are to look for as a near neighbour of Papias in space and time. Of a second John the second century and the first half of the third know nothing; he is unknown to Irenæus and to those who disputed the claims of the Fourth Gospel, to the Alogi and to Caius, to Tertullian, to Clement, and to Origen. Not till the time of Dionysius of Alexandria is reached do we find any indication of the sort (*Eus. HE* vii. 25:16). Even Dionysius alleges no other evidence than that in his day two graves of 'John' were shown.

The inference he draws from this—that there must have been two Johns—is by no means a reasonable one. It would not be unreasonable to suppose that in his day the precise burial-place of John was no longer known, or that the two $\alpha\mu\alpha\tau\alpha$ represented two distinct holy 'places' of John (so Jer. *de vir. ill. 9: due memoria*; Zahn, *Acta Jo. clv*). For this supposition, Eusebius has supplied a plausible basis by combining the statement of Papias about two Johns with the traditions mentioned by Dionysius about two graves of John at Ephesus.

If the assumption that there were two Johns in Asia Minor proves to be a baseless hypothesis—and its baselessness is shown by the fact, among other things, that the John of Asia Minor is so often spoken of without distinguishing phrase of any kind—the question which next arises is as to whether this John was the apostle or the presbyter.

16. Viz., the Presbyter.

At this point the important testimony of Papias turns the scale in favour of the presbyter. For his contemporary and the authority whom he quotes is—next to Aristion—the 'presbyter' John (*Eus. HE* iii. 39:4); and Aristion and John are doubtless also to be identified with the $\pi\alpha\tau\epsilon\rho\iota\sigma\tau\epsilon\rho\omega\iota$ whom, according to *Eus. HE* iii. 39:3, Papias could still directly interrogate. The evidence of 2 Jn. and 3 Jn., claiming as they do to be written by the $\pi\alpha\tau\epsilon\rho\iota\sigma\tau\epsilon\rho\omega\iota$, points in the same direction. Moreover, as has already been pointed out (§ 1), the Apocalypse apparently does not profess to have been written by the apostle. On the other side, it is true, we already find Justin (*Dial.* 81; see above, § 2) asserting the apostolic authorship. It is, however, noticeable that Irenæus—for whom the Gospel, the Epistles, and the Apocalypse are all by one and the same author—speaks of John as an apostle only in indefinite expressions similar to those in Gal. 1:10, but elsewhere invariably designates him as 'disciple' ($\mu\alpha\theta\eta\tau\eta\varsigma$); see Bousset, *op. cit.* 41 f. Further, Irenæus, who calls Papias a disciple of John, also speaks of Polycarp as his fellow disciple (*Eus. HE* iii. 39:1). If we refuse to suppose that Irenæus had already confounded the presbyter with the apostle, then the great teacher of Polycarp was also, according to Irenæus, the 'presbyter' John; for Papias was a disciple of the presbyter. In the Muratorian canon, further, John is called simply 'discipulus,' whereas Andrew is 'apostolus.' The testimony also of Polycrates in the letter to Victor (ap. *Eus. HE* v. 24: ff.) claims particular attention in this connection. Here, in a passage where everything turns upon the exact titles of the persons named, Polycrates designates

beginnings of an interpretation looking to contemporary conditions. Bullinger (*Predigten*, 1575) and Junius (*Apoc. Joh. Tetzelsatze*, 1591) have a good deal in common with Bisthauser.

Wildest and most fantastic of all are the English commentaries of this period.

Among them may be named Napier of Merchiston, the inventor of logarithms (*A Plain Discovery of the whole Revelation of Sacred John*, 1593), Thomas Brightman (*Apocalypsis Apocalypsis*, Frankfurt, 1625), Joseph Mede (*De locis apocalypsicis*, 1627), and Sir Isaac Newton (*Observations upon the Prophecies of Daniel and the Apocalypse of St. John*, 1728—dependent upon Mede).

The history of a strictly scientific interpretation of the Apocalypse, on the other hand, must be held to

22. Scientific. begin with the learned commentaries of French and Spanish Catholic theologians. They meet the Protestant polemic with conspicuous and indeed often astounding erudition, and, going back to the point of view of the earlier Church fathers, lay the foundations of a cautious and for the most part purely eschatological interpretation.

In this connection the works of Francisco Kibeira (1578), Basilio Vargas (*Compendio de las Revelaciones de San Juan*, lit. text. De Antichristo), Benedictus Perona (1662), and Cornelius a Lapide (1682) are well worthy of mention.

Conspicuous above them all is the *Vestigatio arcani sensus in Apocalypsi* of Ludovicus ab Alcazar. That writer was the first to carry out consistently the idea that the Apocalypse in its earlier part is directed against Judaism, and in its second against Paganism, so that in chaps. 12 *f.* we read of the first persecution of the Christians in the Roman Empire, and in ch. 19 of the final conversion of that Empire. He thus presents us with the first serious attempt to arrive at a historical and psychological understanding of the book.

His idea worked out by Alcazar had already been expressed by Hentenius in the preface to his edition of *Apothecia commentarii*, ed. Morelius et Hentenius 2), and by Salmeron (*Opera*, 12, Cologne, 1614, 'In sacrum Jo. Apoc. præliudia'). It ought to be added here that the explanation of the wounded head as referring to Nero Redivivus is found for the first time since Victorinus) in the commentary of the Jesuit Juan Mariana. It was from the Jesuits that Protestant science first learned how to work this field.

Grotius (*Annot. ad NT*, Paris, 1664), who is so often spoken of as the founder of scientific exegesis, is, in his remarks on the Apocalypse at any rate, entirely dependent on Alcazar, whose interpretation, indeed, he has not improved by the details assuming references to universal history and contemporary events which he has introduced into it.

Grotius in turn was followed by Hammond (cp the Latin editions of Clericus, tom. 1, Amsterdam, 1698, and Clericus's notes to Hammond), Bossuet (1693), and Hervey (1684). In Holland and Germany the fantastic school of interpretation continued to flourish for some time longer, prominent representatives being, in Holland, Vitrings, with his profoundly learned *ἀνακρισις ἀποκαλιψεύου* (1705; dependent on Mede), and his many followers, and in Germany, Bengel, with his commentary (1740-46-58) and sixty practical discourses on the Apocalypse. Much greater sobriety is shown by Joh. Marck in his *In Apoc. Comm.* 1699, with its copious exegetical material and valuable introduction; also by a group of eschatological interpreters in which are included Eleonora Peters (1696), Antonius Driessens (1717), and Joachim Lange (*Apokalypstische Lieder des Rosenk.*, 1704).

In the eighteenth century, although Aubert de Verse (*La clef de l'apocalypse*, 1703) followed the lines laid

23. Since down by Grotius, Hammond, and Bossuet, the interpretation founded on **18th century.** allusions to contemporary events gained the ascendancy, and in a very narrow form. At this period it took for the most part the very unfortunate course of endeavouring to treat the whole of the Apocalypse, after the analogy of Mt. 24, as a prophecy of the destruction of Jerusalem.

In this category must be placed the expositions of Abauzit (*Essai sur l'apoc.*, 1723), Harduin (1741), Wetstein (*Lectures de crisin atque interpretationem NT* ed. Semler, 1766), Harenberg (1759), Hartwig (cp § 9), and, finally, Züllig (1834).

On the other hand, we find much that is rightly said in Semler's notes to Wetstein in Corrodi's *Gesch. des Chiliasmus*. And a return was made to the sounder general principles of Alcazar by Herrenscheider

(*Inaugural diss.*, Strassburg, 1786) and by Eichhorn (*Commentarius*, 1761). Even those strands of the interpretation that look to universal history, which had still persisted in showing themselves in Alcazar's work, were now stripped away, and thus a provisional resting-place was reached.

This stage is seen in the works of Bleek (*Die 72 Episteln des Heiligen Johannes Evangelisten über die Apokalypsis*, 1821), and in other, especially German, works, *Die Jesuiten*, 1820; *Die Wege der Erkenntnis*, 1821-24; *Lehrbuch der christlichen vollständigen Einleitung in die Offenbarung*, 1821 and 1822; Volkmar ('62), and also, for the most part, Döderlehn (1877).

In all these works the interpretation from contemporary history is consistently carried out. All set forth from the decisive observation that in chap. 11 the preservation of the temple is predicted, and all, accordingly, date the book from before 70 A.D. Further, they all rightly recognise that the main drift of the Apocalypse is directed against Rome; all, too (except Döderlehn), recognise Nero Redivivus in the wounded head. In particular, since the discovery, independently arrived at by Fritzsche, Benary, and Reuss, that the number 666 is intended for קמץ קמץ, the reference to Nero has become the *rocher de bronze* of all exegesis of the Apocalypse.

In passing, mention may be made of some works which, although following obsolete exegetical methods, are not without a scientific value: Hengstenberg (49^o-51^o-61), Ebrard (53), Elliott (*Howe's Apocalypsis*, 1851; univ.-hist.), Auberlen (54^o-74), Christian ('61), Luthardt ('61), Alford (*New Testament*, 4, 2), Kliefoth ('74), Bleek (*Zerkl. von Offenb.*, 1-xii; eschat.) and Kübel (in Strack-Zöckler's *HT*, 1888; this takes a mediating course between the standpoints of contemporary history and eschatology). See also Zahn, 'Apokalyptische Studien', in *ZKW L*, 1885-85.

The interpretation of the Apocalypse entered on a new phase¹ as soon as doubts arose regarding the unity

24. Question of the work and the method of literary **of unity.** criticism to be applied. The conjecture, which had been hazarded more than once,² that the Apocalypse was really a composite work was again taken up independently (1) by Daniel Volter, at the suggestion of Weizsacker, whose pupil he was. The particular hypothesis put forth by Volter³ as to the composition of the Apocalypse may for convenience be called the redaction hypothesis (*Ueberarbeitungs-Hypothese*).

It assumed in his first sketch, which he has not substantially modified, a fundamental text (*Grundtext*) consisting (apart from single verses) of 11-4 4-6 7-1-8 *f.*, 14-17 18-19-4 14-14-20 19-5-10 dating from the sixties, and an appendix 10-11-13-17, dating from 68-70 A.D. This underwent three (or rather four) redactions, of which the latest was in 140 A.D.—or, at all events, later than 130.

The work of Volter is based on a few happy observations. For example, he saw that 14-14-20 really forms the close of an apocalypse, recognised the divergence between 7-1-8 and 7-9-17, the true character of 10-11-13, —and so forth. Nevertheless, broadly, Volter's performance gave the student an impression of excessive arbitrariness, and was rejected on almost every hand.

Against the first edition see Harnack, *TLZ*, 1882, Dec.; Harnack, *ZLZ*, 1884, p. 188; W. H. W. 1884, p. 188; against the second edition, Jülicher, *GG A*, 1886, pp. 25-38; Zahn, *ZKW L*, 1886.

The question was next taken up from an entirely different side (2) by E. Vischer ('Die Offenb. Joh. eine jüdische Schrift in christlicher Bearbeitung,' in *Texte u. Unters.*, 1886, 2nd ed. 1895); the result has been a lively and fruitful discussion. Vischer believed himself to have discovered that the ruling chapters (11 *f.*) of the Apocalypse can be understood only on the as-

¹ In connection with what follows see Holtzmann, *JPT*, 1891; Baldensonges, *St. J. Revue*, 11, 2, 1892, 1894; A. Meyer, *Lehrb. Kyntheus*, 1897, Hefte 2-3.

² Grotius, Hammond, Vogel (*Comm. vii. De Apoc. Joh.*, 1811-1816), Bleek (*Berl. theol. Ztschr.*, 2 240 *f.*); he abandoned his view in *Beir. u. Evang.-Kritik*, 1846, p. 81; *St. Kr.*, 1855, p. 220 *f.*

³ *Die Entsch. der Apok.*, 1860, 2nd ed. 1885; *Th. J.*, 1861, pp. 259 *f.*, 608 *f.*; *Prot. KZ*, 1880, p. 32 *f.*; *Das Problem der Apoc.*, 1893.

sumption of a Jewish origin. As he nevertheless continued to be convinced of the essential unity of the book, he inferred that in the form in which we now have it it is a Christian redaction of a Jewish writing. To the Christian redactor, besides isolated expressions, he attributed the following passages: 1-3 6-14 7 9-17 12 13 13a 14 15 15 16 15 17 14 19 20 18 20 4-6 21 26-8 22-24.

Vischer's able treatise found wide acceptance. Among those who signified their acceptance of his main thesis were Iselin (*Biblioth. des bibl. de Bern*, 1877; Apocalyptic studies); an anonymous writer in *Die Zeit.*, 1877; *Ostwald* in *VLZ*, 1879; p. 19; *Mosler* in *Rev. des bibl.*, 1881, p. 10; *Krause* in *GLZ*, 1887, pp. 46-7; *Simon* in *Hebräisch*, 1887, p. 405 f. On the other hand, Volter (*Die Offenb. Joh. eine jüdische Schrift*, 1884, 1886), *Beyschlag* (*Dr. Kr.*, 1885), and *Halgensfeld* (*Dr. F.*, 1890) declared themselves against it.

Although it must be cordially acknowledged that to Vischer belongs the honour of having first raised the question in its entirety, it must be said that he was not successful in his attempt to solve it. He has neither proved the Jewish character of chap. 11 f. nor justified his fundamental thesis regarding the unity of the book. We shall be doing him no injustice if we classify him among those who uphold the 'redaction' hypothesis.

The earliest exponent of the 'sources' hypothesis (*Quellen-Hypothese*), which has lately come into competition with that of redaction, was Weyland, who wrote almost contemporaneously with Vischer (*VLZ*, 1886, pp. 454-470; and *Annuaire de la Commission biblique internationale de l'Apoc.*, 1888). Weyland finds in the Apocalypse two Jewish sources (K and L) which have been worked over by a Christian redactor.

K corresponds, roughly, to Volter's primary document; L to the first and second of Volter's redactors (in Volter's Appendix K and L are separated). Weyland's Christian redactor corresponds to a general way with Vischer's redaction. *Ernst* (*Die Offenb. des J.*) signified his adherence to Weyland.

Against both the hypotheses we have just described serious and far-reaching objections present themselves.

27. Objections. Against the 'sources' hypothesis must be urged, in substance, the linguistic unity of the book (see below, § 34); against the redaction theory it has to be observed (a) that the fundamental document made out by Volter and his followers (see above, § 25) has no special character of its own, inasmuch as all the really living and concrete passages occurring within it are attributed to the redactor; (b) that the disappearance of every trace of these numerous later redactions is remarkable.

From such considerations the necessity for a third way became apparent. This third way was first pointed out by Weizsäcker in his *Apostolic Age*. He rightly discerned in the

28. Fragment hypothesis. Apocalypticist's thrice repeated number of seven the fixed plan of an author who wrote the Apocalypse as a whole, and gave to his work the character of a literary unity. Into this literary unity certain interpolations intrude with disturbing effect (7 1-8 9-17 11 1-13 12 1-11 12-17 13 17). Thus Weizsäcker arrived at his fragment hypothesis. According to him the Apocalypse is a literary unity proceeding from a single author, into which, however, apocalyptic fragments of various date have been introduced by the author himself. In the opinion of the present writer these are the lines along which the true solution of the problem is to be sought. All later investigators in this field have followed one or other of the three hypotheses just enumerated.

Oscar Holtzmann (*GV 2* 658-664) assumes a Jewish groundwork into which again a still older source (18 14-15) has been worked in a Christian revision. Pfeleider (*Urchristenthum*, 1887, pp. 318-56) steers an eclectic course; Sabatier (*Les origines littéraires de l'Apocalypse*, 1887) and Schen (*L'origine de l'Apoc.*, 1889) represent a combination of Weizsäcker and Vischer (regarding the Apocalypse as the work of a Christian author who has embodied Jewish fragments in his book).

A thoroughly elaborated 'sources' theory is that of Spitta (*Offenb. Joh.*, 1884). In diametrical opposition to Weizsäcker, he claims to see, in the thrice repeated series of seven, three sources.

These are (a) the seal source or Christian primitive Apocalypse (U \approx $\text{U}^{\text{U}}^{\text{U}}^{\text{U}}^{\text{U}}^{\text{U}}$), written soon after the A.D. 68, (b) the trumpet source J (J = $\text{J}^{\text{J}}^{\text{J}}^{\text{J}}^{\text{J}}^{\text{J}}$), written shortly after the reign of Caligula (7 1-8 9 10 1-7 11 12 13 14-15 16 17 18 19 20 21 22 23 24); (c) the vials source J², from the time of Pompey (containing, approximately, the remainder of the book).

These three have been worked together into a collected whole by a Christian redactor. (The additions assigned to him by Spitta are of about the same extent as those assigned to him by Vischer.)

The sources theory was next carried to the utmost by P. Schmidt (*Anmerkungen über die Comp. der Offenb. Joh.*, 1891).

Erbes (*Die Offenb. Joh.*, 1891) in his separation of the literary sources agrees in the main with O. Holtzmann, but also maintains with Volter (whose hypothesis he simplifies) the thoroughly Christian character of the whole book. Bruston (*Les origines de l'Apocalypse*, 1893) proposes a path of his own. *Annales de bibliogr. théol.*, 1 [188] pp. 41-45 assumed two Jewish apocalypses and a Christian redactor.

The unity of the book is defended by certain scholars: Not only by the critics of Vischer mentioned above, but also by B. Weiss (*Zeits. des Ver. d. bibl. Stud.*, Bonn (*Revue de théol. et phil.*, 1887, pp. 329-62), Hirsch (*Die Apoc. u. ihre neueste Kritik*, 1895), and Blom (*Dr. F.*, 1885-84). An expectant attitude is taken by H. Holtzmann (*Rev.*, 1892; *Handk.*, 1893).

Finally, altogether new lines of investigation were opened up by Gunkel in his *Schöpfung u. Chaos* ('94). He controverted sharply, and sometimes per-

30. Gunkel.haps not altogether fairly, both the current methods of interpreting the Apocalypse (that which looks to contemporary history for a clue, and that which adheres to literary critical methods), and proposed to substitute for them, or at least to co-ordinate with them, a history of apocalyptic tradition. He insisted with emphasis upon the thesis that the (one) Apocalypticist was not himself the creator of his own representations; that his prophecies were only links in a long chain of tradition. In his investigation of this apocalyptic tradition he greatly enlarged the scope of the usual question 'Jewish or Christian?' by his endeavours to prove for chap. 12 a Babylonian origin, and in other places also (see below, § 40) to trace Babylonian influences in the book. Even if we grant that Gunkel has often overshot the mark,—as, for example, when he refuses to recognise Nero in the beast and its number—it is undeniable that his book marks the beginning of a new epoch in the interpretation of the Apocalypse.

Stimulated by Gunkel, and accepting some of his results, Bousset (*Der Antichrist in der Ueberlieferung des Judenthums, des neuen Testaments, und der neuen Kirche*, 1895) proceeded

to illustrate Gunkel's method by applying it to a definite concrete example, investigating the entire tradition regarding Antichrist, and endeavouring to show that in this instance a stream of essentially uniform tradition can be traced from New Testament times right through the Middle Ages and beyond them. In his view the Apocalypse can be shown to be dependent in a series of passages, particularly in chap. 11, on this already ancient tradition regarding Antichrist.

This view has been controverted by Erbes (*Theologische Arbeiten aus dem biblisch-archäologischen Prolegomena gewandt*, Neue Folge, 1, Freiburg, i. B., 1897), who, as against it, argues for the contemporary-history method in its most perverse form.

Finally, in the *Kritisch-exegetische Kommentar* ('96), Bousset has sought to bring to a focus the result of the labours of previous workers. In his method of interpretation he follows Weizsäcker (fragment hypothesis), and therefore gives a continuous commentary, describing the character of each particular fragment in its own place. In his exegesis he has given special attention to

book predicts is the great conflict about to break out all over the world between Christianity on the one hand and the Roman Empire (with the Roman state religion, the worship of the emperors) on the other (cp ANTICHRIST, § 7).

(d) This great battle will begin with the return of Nero Redivivus.

In common with the rest of the men of his day, the Apocalyptic shares the popular expectation of the coming again of that emperor. Nero (13-12 p. 1) the head-tin was wounded to death and afterwards healed. He is only 'as it were' (6c) slain, like the lamb (5f). For as the latter continues to live on in heaven, so does Nero prolong a shadowy existence in hell. Out of the abyss (17b) he will again return, and as Roman Emperor demand adoration. Then will be the days of the great future struggle. Hence the name of the beast is Nero, 6c, 6d, 6e (cp ANTICHRIST, § 7).

(e) Thus the date of the Apocalypse admits of being approximately determined. The end of the first century is already sufficiently indicated by the fact that the Apocalyptic expects the return of Nero from hell (Th. Zahn, 'Apocal. Stud.' in ZA¹W, 1885, pp. 561-76, 1886, pp. 337-52 393-495; see below, § 45). The following consideration points to the same inference. Behind the Apocalyptic in point of time there already lies a great persecution. He himself is again living in times of persecution, and is expecting worse to come. Inasmuch as the former persecution must be assumed to be the Neronian, we are compelled to carry the Apocalypse down to the later period of Domitian. When we do so the fact that 11.1 ff. points to a time before the destruction of Jerusalem need not cause us any misgiving: doubtless the passage comes from an earlier source. On the other side we should be able to fix an inferior limit for the date, could it be shown that the epistles were already known to Ignatius (see above, § 2). The date thus indicated—the close of the first century—was in point of fact the date at which, it would seem, the general persecutions of the Christians, turning substantially on the rendering of divine honour to the emperor, first broke out (see CHRISTIAN, § 6). The Apocalypse, as we now have it, presupposes conditions very similar to those which we meet in the well-known correspondence between Pliny and Trajan. In this it is not implied that the Apocalypse could not have been written some ten years or more earlier.

In the conclusion just indicated we find ourselves in agreement with the best attested tradition as to the date of the writing of the Apocalypse.

According to Irenæus (v. 30.2; cp v. 20.7), the Apocalypse was "seen" at the close of Domitian's reign at Patmos, and therefore, of course, to say the least, not written earlier (cp Vict. Pettau. *Comment. on Apoc.* 1911; *Pass. H. E.* iii. 15; *Jes. [v. 19. 23]* 190; *Sulp. Sev. Chron.* 2.31). A different tradition is met with, it is true—perhaps in Tertullian, who (*De preser. Her.* 36) mentions the martyrdom of John (by boiling oil—a death from which he was miraculously delivered), and his subsequent banishment, in connection with the martyrdoms of Peter and Paul (but see, on the other hand, *Scorpice* 13). It is certain that at all events Jerome (*Adv. Jov.* 1.26 1.16; *ibid.* 4.33). Finally, as assigning this martyrdom and banishment of John to the reign of Nero (cp Eus. *Dem. Evang.* 3; the superscription of the Syriac translation of the Apocalypse edited by Ludovicus de Dieu; the Gnostic *Acts of John*; Theophylact [who gives the date as thirty-two years after the Ascension; cp the notes of some of the Greek cursives of the Fourth Gospel; thirty years after the Ascension, under Domitian (9); Erbes, 43). Finally, Epiphanius (*Her.* 51 12 33) will have it that the book was written under Claudius. The same statement occurs in the Commentary of Apringius (upon whom see Bousset, *GGN*, 1895, p. 2), whence it found its way into that of Beatus (ed. Florez, 33).

The Apocalypse is distinguished from the apocalyptic literature of Judaism from the time of the book of

36. Personality of Apocalypticist. Daniel onwards by the high prophetic consciousness which it displays. The Apocalypticist as he stands at one of the turning-points of the world's history looks with a clear eye into the future and feels himself to be a prophet. He is a Christian of an especial type. For the prophets are servants of God in a peculiar sense (1: 10; 11: 8 226 [cp 15.3]); they are the fellow-servants of the angels (22g); other Christians are so only in so far as they follow the revelation of the prophets

(22g). God is master of the spirits of the prophets (226 cp 17 17 19.10). Hence the author directly claims for his work the rank of a sacred book. It is intended from the first to be publicly read (1.3); those who hear it and obey what is written therein are blessed (1.3 227), and whosoever adds to or takes away from it falls under the most grievous curse (22: 18 f.). The frequent mention of the prophets along with the saints (*i.e.*, Christians in general)—see 11: 8 16 18 20 24—is a proof, not, as many critics have supposed, of the Jewish, but of the Christian, origin of the related passages. The Apocalypse in this respect was the forerunner of Montanism, and it is no matter for surprise that it was specially valued in Montanistic circles. It is also noteworthy that the Apocalypticist speaks to his own age and time. Whilst Daniel is represented as receiving, at the close of his vision, the command to seal the book for long, here in sharp contrast we read (22: 10) 'Seal not up the words of the prophecy.' The Apocalypticist seems to have been a Jewish Christian of universalistic sympathies. For him the name of Jew is a name of honour (2: 9 3: 9); he seems to uphold a certain prerogative for the Jewish people (7: 8 11: 1-13 20: 7 f.). He shows himself intimately familiar with the language of the OT.

Into the apocalyptic unity thus defined, isolated fragments have been introduced in a manner which can

37. Details of criticism. Of these the more important at least must now be discussed, and some detailed account of the more noteworthy results of criticism given.

Of recent critics the majority (Vischer, Völter, Weyland, Pfeleiderer, O. Holtzmann, Schmidt) regard the epistles to the seven churches (chaps.

38. Chaps. 1-6. 1-3) as having been originally separate from the rest of the book and as having been prefixed only after the Apocalypse had in other respects assumed its present form; but Spitta has shown good grounds for believing that chaps. 1-3 and 4-6 ought not to be separated, and (as against Vischer and others) has established for the whole of chaps. 4-6 that Christian character which unquestionably belongs to 5: 6 ff. Thus Spitta takes chaps. 1-6 as a single original document (Christian primitive apocalypse = U).

He seeks to prove this by pointing out that there is a definite close at the end of 6, and a fresh beginning of a new apocalypse in 7: 1 (so also P. Schmidt). But the sixth seal (6: 12 ff.) does not represent the final catastrophe; it only pictures a great earthquake in the typical apocalyptic manner. In 6: 15 ff. the end is still to come, and if, with Spitta, we pass on to 7: 9-17 immediately after 6: 17, any representation of the end of all things has completely disappeared from our reconstructed Apocalypse. In any case, it is impossible that one should fail to recognise an interpolated fragment in the short passage (6: 9-11) relating to the fifth seal. We have an exact parallel to it in 4: 5-6. 4: 35 (cp also *Æthiop. Enoch* 47). And the tradition of 4: 5-6 should be regarded as the original one. It speaks quite generally of a predestined number of the righteous which has to be fulfilled before the coming of the end, whilst in the Apocalypse the conception is applied to the predestined number of the martyrs—a modification which can be explained very easily from his general position (see above, § 35).

Spitta's view that 7: 1-8 constitutes a fresh beginning, which has nothing to do with the preceding chapters,

39. Chap. 7: 1-8. is certainly correct; but neither has the passage anything to do with that which follows it (7: 9-17); as to this practically all critics are agreed. These facts, however, will not justify us in attributing 7: 9-17 to the redactor (as do Völter, Vischer, Pfeleiderer and Schmidt), nor yet in carrying out a system of deletions in chap. 7 (as do Erbes, Weyl., Rauch) until the two disparate sections have been brought into harmony. Our proper course is to recognise (cp also Spitta) in 7: 1-8 an interpolated fragment—probably Jewish.

The sudden mention of the four winds, which are held by the angels and are nowhere in the succeeding narrative left loose, points to this conclusion, as also does the introduction of the 144,000 Israelites of the twelve tribes—a number which in 14: 1 ff. is interpreted in a sense inconsistent with the original intention.

Bousset has hazarded the conjecture that here we have a fragment of the Antichrist legend.

The next passage which presents special difficulties is 11:1-13. Here all critics are agreed in recognising a

40. Chap. fragment interpolated between the sixth trumpet and the seventh (cp 9:11 and 11:1-13, 11:14). Further, almost all critics agree in regarding chap. 10 as an introductory chapter connected with this fragment. On closer examination it is found, moreover, that 11:1-13 really consists of two smaller fragments: (a) 11:1 f., a prediction of the preservation of the temple, written before the destruction of Jerusalem, and presenting points of contact with Lk. 21:24; (b) the prophecy relating to the beast and the two witnesses (11:3-13). This latter piece is of an extremely fragmentary and enigmatical character.

Certain matters are introduced without any preparation: the two witnesses, the beast from the abyss, the war of the beast with the witnesses, the peoples and tribes rejoicing over the death of these last. All these are *disjecta membra* which point to some larger connection.

In this passage, too, Bousset has sought to show that we have a fragment from the Antichrist legend.

In accordance with Jewish and primitive Christian anticipation the Antichrist is destined to appear as a god-defying ruler in Jerusalem, to lead the people astray and tyrannise over them, and to gather together a great army from all nations. Against him will arise the two prophets Elijah and Enoch, and Israelites to a definite number (7+8?) will be converted. A great famine and drought will come. Then Antichrist will put to death the two witnesses, and the end will draw near. It is evident that here we have a coherent tradition, of which some fragments are preserved in chap. 11.

Chap. 12 is the most difficult in the book. It also falls into two sections, 12:1-12 and 12:13-17, and

41. Chap. betrays itself as a foreign intrusion both by its unfamiliar character and by its strange and bizarre representations.

A. Dietrich (Abraxas) was the first who sought to trace in the chapter an adaptation of the myth of the birth of Apollo; he held the pregnant fugitive woman to be Leto, the dragon was the Python, Michael being a later introduction) was Apollo. The water which in the Greek myth figured as a protecting power has here become auxiliary to the dragon.

Recently Gunkel, in his *Schöpfung u. Chaos*, has directed special attention to this chapter, and shown that an adequate understanding of it could be arrived at neither on the assumption of a Christian nor on that of a Jewish origin (Vischer, Weyland, Spitta)—that on either hypothesis there remains an intractable residuum, bearing a mythological character. Here, accordingly, as elsewhere in the Apocalypse (cp the seven angels, stars, candlesticks, torches [EV 'lamps'], eyes, pp. 294-302; the twenty-four elders, 302-8; Armageddon, 263-66, and p. 325 n. 2; the number 33, pp. 266-70; also chaps. 13 and 17, 379 ff.), he found elements taken from Babylonian mythology, and in particular the myth of the birth of the sun-god Marduk and of the persecution of Marduk by the dragon Tiāmat. The difficulty in this construction of Gunkel's is that down to the present date it has been impossible to find in the Babylonian mythology any trace of the myth of the birth and persecution of the youthful sun-god. Bousset (*Apok.* 410 f.), however, has called attention to parallels with one chapter in Egyptian mythology (the myth of the birth of Horus).

In the result, there seems much probability in the supposition that chap. 12 embodies a myth of the birth of the sun-god and the persecution of the young child by the dragon, the deity of winter and of night. The Apocalypticist has changed the sun-god, however, into the *παῖς Ἰησοῦς Χριστός*, the persecutor into the devil, and the deliverance of the child into the resurrection (observe the inconcinnity of this adaptation). In this treatment of the material laid to his hand, he was not able to give full significance to the flight of the woman, which is so prominent a feature in the original myth. This is accordingly only briefly touched on in 12:6; but it receives copious and special treatment in the second half of the chapter (vv. 13-17). Hence the incongruity between 12:1 ff. and 12:13 ff. which Weizsäcker pointed out.

What historical occurrence is intended by the flight of the woman in 12:13-17 is not quite clear. Usually the

42. Chap. flight is taken as referring to circumstances connected with the destruction of Jerusalem 12:13-17. —either to the destruction and (in a sense) the deliverance of Judaism, or, better, to the flight of the primitive Christian Church.

Erlies, who seeks to explain ch. 13 as referring to the Caligula period (see below), interprets the flight and deliverance of the woman in connection with the first persecution of Christians at Jerusalem, strictly taking st. 17, 'the remnant of her seed who hold the testimony of Jesus,' as pointing to the Jews (?) at the time of the Caligula persecution. Spitta actually takes the persecution of the woman as representing an occurrence in heaven. 'The remnant of the seed of the woman' represents, he thinks, the actual Israel as contrasted with the ideal pre-existent Jerusalem (Israel?). Others (Vischer) interpret the remnant as meaning believers as distinguished from the Messiah.

Chap. 13 also contains two passages of a peculiar character—those describing the first beast and the

43. Chap. 13: second. O. Holtzmann, Spitta, and Erlies were agreed in recognising here a Jewish (Holtzm., Sp.) or a Christian (Erl.) source dating from the time of Caligula.

Independently of each other, they all (as had already been done by Th. Zahn) accepted the number 616 which is given in some MSS (C. 11 Ticonius), instead of 666, and interpreted it as meaning Ἰάσος Καίσαρ. The beast demanding worship, whose image (εἰκόνη) is repeatedly spoken of, is, on this view, the half-mad tyrant Caius Caligula, who in 39 A.D. ordered his procurator, Petronius, to set up his statue in the temple at Jerusalem. Parallels to this prophecy belonging to the same date were found in Mt. 24 ('abomination of desolation') and in 2 Thess. 2. The 'wound' (πληγή) of the beast was interpreted by Spitta as meaning the sickness which befel Caligula towards the beginning of his reign. These conjectures are by no means impossible; but if they are accepted, certain important particulars in the chapter must be deleted—in particular, references to the wounded head of the beast. This and the number 666 (ἑξήκοντα ἑξήκοντα) show distinctly that (in its present form) the chapter was intended to be understood of the return of Nero Redivivus. Whether an older source dating from Caligula's time has here been worked over remains doubtful.

As compared with this interpretation, the view which takes the wounded head to be Julius Caesar (Gunkel, Bruston) has little to be said for it—since the number 666 in that case remains unexplained; nor can we reasonably interpret the death-wound to mean the interregnum of Galba-Otho-Vitellius, or refer the number to the Roman empire (Ἀρτέμιδος, Dünsterdieck; קיסר רומי, Ewald).

Still greater has been the perplexity of interpreters over the second beast. All attempts to make it out to be some definite personality have hitherto

44. The second beast. been unsuccessful. Bousset (*op. cit.*) upholds the view that it is in reality a modification of the older conception of Antichrist, who is here represented as serving the first beast, the Roman emperor, and perhaps is to be interpreted as signifying the Roman provincial priesthood, the active agency in promoting the worship of the emperor.

The objection usually urged against referring the passage to Nero—that the beast whose number is 666 cannot mean Nero the man; that it must mean the Roman empire—is not valid. To the Apocalypticist Nero Redivivus is at the same time the incarnation of all that is dreadful in the Roman empire. The number of the beast is the number of a man: cp 17:11, 'and the beast . . . is himself also an eighth' (καὶ αὐτὸς ὄγδοος ἔσται).

Chap. 17 is intimately connected with chap. 13, and this duplicate treatment of the same subjects is in itself proof

45. Chap. 17. sufficient that the Apocalypticist had before him older prophecies, which he has worked over more than once. In this chapter also the reference to the returning Nero is clear. Since Eichhorn, however, it has further been recognised on all hands (cp De Wette, Bleek, Lübeck), and with justice, that the kings with whom the beast returns for the destruction of Rome are

the Parthians, whose satraps might already be regarded as independent kings (Mommsen, *Röm. Kaisergesch.* 521). Thus our present chapter also comes into a larger historical connection. As early as the year 69 A.D. a pseudo-Nero had raised commotions in Asia Minor and Greece (Tac. *Hist.* 28f.; Dio Cassius, 649; Zonaras, 1115); in the reign of Titus a second pseudo-Nero showed himself on the Euphrates (Zonaras, 1118) and was acknowledged by the Parthian King Artabānus (Mommsen, 521). About 88 A.D. a third pseudo-Nero again made his appearance, also among the Parthians, and threatened the Roman empire (Suet. *Nero*, 50; Tac. *Hist.* 12). In this form we find the same expectation also in the fourth Sibylline book, written shortly after 79 A.D. (Sibyll. 419 ff. 132 ff.), and in the oldest portion of the fifth book, written about 74 A.D. (5143 ff. 361 ff.); in the last passage it is associated with a denunciation of Babylon and a prophecy of the rebuilding of Jerusalem (Rev. 1821); cp Zahn's exhaustive researches (as above, § 38). By both passages our chapter (perhaps associated with the threatening utterance against Rome and the prophecy of a new Jerusalem) belongs to the same circle of expectations and predictions. It was doubtless written in Asia Minor; but the exact date is disputed.

According to 17 the Apocalypst represents himself as being among the sixth emperor, but having lived a seventh before and to come, to be succeeded by the eighth, who is the one of the seven (Nero). In reckoning it is possible to begin either with Julius Caesar or with Augustus, to count or not to count the interregnum of Galba-Otho-Vitellius, and finally to ask whether the passage was really written under the sixth emperor, and not, rather, as a *raucium ex eventu*, under the seventh or eighth. Thus interpreters have taken the sixth emperor to be now Nero (so all who hold the Apocalypse to have been written before 70 A.D.; also Völter), now Vespasian, and, conformably, take the chapter to have been written now under the last-named emperor, now under Titus (the seventh; Weyland) or Domitian, who is then taken, on rationalising lines, as Nero Redivivus (Erlécs).

The parallels cited above appear to render the reign of Vespasian the most probable date. The writer—probably a Christian—expected after Vespasian a short reign for his successor also. The tradition was that seven Roman emperors were destined to reign. Thereafter Nero was to come back with the Parthians, and, in alliance with these, to take vengeance on Rome, the bloody persecutor of the Christians (176; 'with the blood of the saints'; the words 'with the blood of the martyrs of Jesus' appear to be a gloss). The denunciation of Rome (chap. 18) connects itself very well with this prophecy (see *Sibyll.* 5).

It is further to be noted that chap. 17 has already, in the form in which we now have it, undergone redaction.

On the one hand, Nero is simply the eighth ruler who was one of the seven; on the other, he is the beast who comes up from the abyss. On the one hand, he wages war along with the Parthians against Rome; on the other, he wages war along with the kings of the earth against the lamb. In this redacted form (17812-14 or 15; cp also Völter) Nero is designated as the dread spectre of the time of the end who comes back from hell. Now, we find the same expectation in chap. 18, where Nero is plainly represented as dead (ὡς ἐθαψάνην, 'as though it had been smitten unto death') and as counterpart (Wiederspiel) of the lamb that had been slain and is to come again. This mode of representing Nero probably comes from the latest redactor. Parallels to it can be found in the later portions of the fifth book of the Sibyllines (33f. 215-26), and in the eighth book (1-215).

The legend of Nero Redivivus first arose towards the end of the century, a full generation after Nero's death, when he could no longer well be supposed to be still alive among the Parthians (cp Zahn, as above). Its reception into the Apocalypse supplies one of the elements for determining the date of the book.

Chap. 1612 ff. (the sixth and seventh vials) also must have originally belonged to chap. 17. In this passage the

46. Various fragments. angel pours out his vial upon the Euphrates, 'that the way may be made ready for the kings from the east' (cp 913 ff., with its reference to the angels bound and loosed at the Euphrates; on which, see Iselin in *Theol. Z. aus der*

Schweiz, 1887, as above, § 25). The representation of the gathering of the kings at Armageddon (Har-Magedon) in this passage is noteworthy; it is not very intelligible, as we read of no mountain of Megiddo, but only of a plain (but see ARMAGEDDON). It recalls the ancient accounts of battles of the gods upon the mountains (Gunkel, *Schöpfung*, 263 ff. 389 n. 2).

Chap. 1414-20 also appears to be an ancient fragment. It thus early sets forth a final judgment by the Son of Man. The passage, however, is so very fragmentary that it is hardly possible for us to make out what its original character may have been (cp the expression 'without the city' in 1420). Bousset has sought to explain it by reference to the Antichrist legend.

Fragments of older date seem to have been introduced into the account of the chaining of the dragon, the millennium, the irruption of Gog and Magog (2010-15; cp 209, παραβολή των ἀντων, πάντες ἡγαπημένοι, and Athiop. *Enoch* 56, *Sibyll.* 3319-322). The description of the binding and loosing of Satan recalls the Persian legend of the chaining of the dragon Azi Dahak on Mt. Demavend. Finally, a continuous piece—perhaps of Jewish origin (see 2124-26 222)—lies before us in the description of the new Jerusalem, 219-225.

We ought to compare Tob. 1316 ff., Ps. Salom. 1723 ff., *Sibyll.* 5247-85, 414-33, and the Hebrew *Apocalypse of Elijah*, edited by M. Buttenwieser, 65-67. In this last-named Jewish source also we find the new Jerusalem coming down from heaven.

To summarise the results of the foregoing analysis: With the conclusion of the epistles to the seven churches

47. Summary. (chaps. 1-3) the Apocalypse, properly so called, begins. Here the first six seals succeeded one another uninterruptedly, till the interpolated fragment in 71-8 is reached. As a pendant to this fragment, with its distinctly Jewish character, the Apocalypst prophetically introduces in 79-17 a picture of the blessedness of believers from every nation who have come out of the great tribulation. Now follow the seventh seal and, arising out of this, the seven trumpets (chaps. 8-11). Between the sixth and the seventh trumpet, the passage 101-113 has been interpolated. In chap. 10 the Apocalypst indicates to some extent what the 'disposition' of the remainder of the book is to be (cp 1011). It is to be observed that in chaps. 9 ff., in addition to the distribution under seven trumpets, the Apocalypst has attempted a second under three woes. The first wo answers to the fifth trumpet; the second, the mention of which might have been expected after the sixth trumpet, does not come up until 1114, after the great interpolation has been reached. The third great wo (which is not expressly named by the Apocalypst) is doubtless indicated in 1212. It is hardly likely that we have here a redaction from an older source. Before, then, he comes to the culmination of his prophecy, in chap. 13, the Apocalypst casts his glance backwards in chap. 12. Borrowing the imagery of an ancient sun-myth, he depicts the birth, persecution, and rescue of the Saviour, and afterwards the persecution of the Church. In chap. 13 he goes on to foretell the coming final struggle, the last great and decisive battle between the faithful ones and the beast who demands adoration. For him the supreme crisis of this struggle still lies in the future, when Nero Redivivus is to appear. In the bright picture which he prophetically introduces at 145 by way of contrast to chap. 13, he adapts and modifies 71-8. 146-13 is intended to effect the transition to what follows. 1414-20 is a smaller interpolated fragment. The great finale remains. The Apocalypst still had to work in the prophecies contained in chap. 17 f.; by way of introduction to these, chap. 15 f. are given. Then follows, after an intermediate passage (191-10), the picture of the final judgment (1911-218); after which we have a new fragment, 219-225, followed by the close.

INTRODUCTORY: The objects and nature of apocalyptic literature (§§ 1-4).

I. APOCALYPSE OF BARUCH I.—A composite work derived from at least five authors, written mainly in

1. Synopsis Palestine, if not in Jerusalem, by Pharisees of **Article**, 770. A.D. 100. Preserved only in SYRIAC (§§ 5-17).

II. ETHIOPIC BOOK OF ENOCH.—Written originally in Hebrew or Aramaic by at least five Assidean authors (200-64 B.C.) in Palestine. Part I, chaps. 1-36 earlier than 170 B.C. Part II, chaps. 38-90, 166-161 B.C. Part III, chaps. 91-104, 134-95 B.C. Part IV. (the Similitudes) chaps. 37-70, 93-94 B.C. Part V. (the Book of Celestial Physics) chaps. 72-78, 82, 70. Part VI. (Fragments of a post-Apocalyptic Noah) (§§ 11, 10).

III. SLAVONIC BOOK OF ENOCH, OF THE BOOK OF THE SEVENTH OF ENOCH.—Written by an Alexandrian Jew, mainly from pre-existing materials, about A.D. 150. Eclectic in character; preserved only in Slavonic (§§ 33-41).

IV. ASCENSION OF ISAIAH.—A composite work, written originally in Greek, partly by Jewish, partly by Christian authors, A.D. 1-100. Preserved in Ethiopic and partially in Latin (§§ 42-47).

V. BOOK OF JUBILEES.—Written originally in Hebrew by a Palestinian Jew, a Pharisee of the Pharisees, probably 40-10 B.C. Preserved in Ethiopic and partially in Hebrew, SYRIAC, GREEK, LATIN, and SLAVONIC (§§ 48-53).

VI. ASSUMPTION OF MOSES.—Written in Palestine, in Hebrew, 70-100 A.D., by a Pharisee. Preserved only in Latin (§§ 49-47).

VII. TESTAMENTS OF THE TWELVE PATRIARCHS.—A composite work written originally in Hebrew by two Jewish authors representing respectively the legalistic and the apocalyptic sides of Pharisaism, 130 B.C.-10 A.D., and interpolated by a succession of Christian writers from the close of the 1st century down to the 4th century A.D. Preserved in Greek, Armenian, and Slavonic versions (§§ 68-76).

VIII. PSALMS OF SOLOMON.—Written originally in Hebrew, possibly in Jerusalem, by two or more Pharisees, 70-40 B.C. (§§ 77-85).

IX. SIBYLLINE ORACLES.—Written in Greek hexameters by Jewish and Christian authors, mainly by the latter—the earliest portions belonging to the 2nd century B.C., the latest not earlier than the 3rd century A.D. (§§ 86-95).

INTRODUCTORY.—The object of apocalyptic literature in general was to solve the difficulties connected with

2. Problem. a belief in God's righteousness and the suffering condition of his servants on earth. The righteousness of God postulated the temporal prosperity of the righteous, and this postulate was accepted and enforced by the Law. But while the continuous exposition of the Law in the post-exilic period confirmed the people in their monotheistic faith and intensified their hostility to heathenism, their expectations of material well-being, which likewise the Law had fostered, were repeatedly falsified, and a grave contradiction thus emerged between the old prophetic ideals and the actual experience of the nation, between the promises of God and the bondage and persecution which the people had daily to endure at the hands of their pagan oppressors. The difficulties arising from this conflict between promise and experience might be shortly resolved into two, which deal respectively with the position (1) of the righteous as a community, and (2) of the righteous man as an individual.

The OT prophets had concerned themselves chiefly with the former, and pointed in the main to the restoration (or 'resurrection') of Israel as a nation, and to Israel's ultimate possession of the earth as a reward of righteousness. Later, with the growing claims of the individual, and the acknowledgment of these in the

religious and intellectual life, the second problem pressed itself irresistibly on the notice of religious thinkers, and made it impossible for any conception of the divine rule and righteousness which did not render adequate satisfaction to the claims of the righteous individual to gain acceptance. Thus, in order to justify the righteousness of God, there was postulated not only the resurrection of the righteous nation but also the resurrection of the righteous individual. Apocalyptic literature, therefore, strove to show that, in respect alike of the nation and of the individual, the righteousness of God would be fully vindicated; and, in order to justify its contention, it sketched in outline the history of the world and of mankind, the origin of evil and its course, and the final consummation of all things; and thus, in fact, it presented a Semitic philosophy of religion (cp *CHRONOLOGY OF OT*, § 1). The righteous as a nation should yet possess the earth either in an eternal or in a temporary Messianic kingdom, and the destiny of the righteous individual should finally be determined according to his works. For, though he might perish untimely amid the world's disorders, he would not fail to attain through the resurrection the recompense that was his due in the Messianic kingdom, or in heaven itself. The conceptions as to the duration and character of the risen life vary with each writer.

The writings that are treated of in the rest of this article, however, deal not only with the Messianic expectations but also with the exposition and application of the Law to the numberless circumstances of life. As Schürer has rightly observed, the two subjects with which Jewish thought and enthusiasm were concerned were the Law and the Messianic kingdom. These were, in fact, parallel developments of Pharisaism. As we have the former—its legalistic side—represented in the *Book of Jubilees*, so we have the latter—its apocalyptic and mystical side—set forth in the *Book of Enoch*. The *Testaments of the Twelve Patriarchs* give expression to both sides of Pharisaism; but this book, as we shall see in the sequel, is really a composite work and springs from authors of different schools. The rest of the books here discussed belong mainly to the apocalyptic side of Pharisaism.

It is a characteristic of apocalyptic as distinguished from prophecy that the former trusts to the written, the latter to the spoken, word. This is due

3. Method. largely to the fact that the prophet addresses himself chiefly to the present and its concerns, and that, when he fixes his gaze on the future, his prophecy springs naturally from the circumstances of the present. The apocalyptic writer, on the other hand, almost wholly despairs of the present; his main interests are supramundane. He entertains no hope of arousing his contemporaries to faith and duty by direct and personal appeals. His pessimism and want of faith in the present thus naturally lead him to pseudonymous authorship, and so he approaches his countrymen with a writing which purports to be the work of some great figure in their history, such as Enoch, Moses, Daniel, or Baruch. The standpoint thus assumed is as skillfully preserved as the historical knowledge and conditions of the pseudonymous author admit, and the future of Israel is 'foretold' in a form enigmatical indeed

¹ On other Apocalypses of Baruch, see below, *APOCRYPHA*, § 20.

² On chaps. 71-80, see § 30.

APOCALYPTIC LITERATURE

but generally intelligible. All precession ceases, however, when we come to the real author's own time: his predictions, thenceforward, are mere products of the religious imagination, and vary with each writer. In nearly every case, we should add, these books claim to be supernatural revelations given to the men by whose names they are designated.

It will not be amiss here to notice the gross misapprehension under which Jobst, Graetz, and other Jewish writers laboured when they pro-

4. Historical nounced this literature to be destitute of value for the history of Jewish religion. To such statements it is a sufficient answer that from 200 B.C. to 70 A.D. the religious and political ideals that really shaped the history of Judaism found their expression in this literature. It is not in the discussions and logomachies of the Rabbinical schools that we are to look for the influences and aims that called forth some of the noblest patriotism and self-sacrifice the world has ever witnessed, and educated the nation for the destinies that waited it in the first century of our era, but in the apocalyptic and pseudépi-graphic books which, beginning with Daniel, had a large share in preparing the most religious and ardent minds of Galilee and Judea either to pass over into Christianity, or else to hurl themselves in fruitless efforts against the invincible might of Rome, and thereby all but annihilate their country and name. Still it is true that the work of the scribes and the exposition of the schools had opened the way for this new religious and literary development. The eschatological element, moreover, which later attained its full growth in such pseudépi-graphic writings as Daniel, Enoch, Noah, etc., had already strongly asserted itself in later prophets such as Is. 24-27, Joel, Zech. 12-14. Not only the beginnings, therefore, but also a well-defined and developed type of this literature had already established itself in the OT. Its further developments were moulded, as we have pointed out above, by the necessities of the thought and by the historical exigencies of the time.

(Continued in introductory essay on Jewish apocalyptic, *ZATW* 3:200-28 (3); Schurer, *Hist.* 5:44 ff.; Hilgenfeld, *Die jüd. Apokalypsen ihrer geschichtlichen Entstehung*, 137f. (Erbil).)

1. THE APOCALYPSE OF BARUCH.—The Apocalypse of Baruch was for the first time made known to the modern world through a Latin version of Ceriani in 1866 (*Mon. Sacr.* i. 273-98). This version was made from a Syriac MS of the sixth century, the text of which was also in due course published by the same scholar, in ordinary type in 1871, and in a photo-lithographic facsimile in 1883. An examination of the Syriac version makes it clear that this version is a translation from the Greek. It occasionally transliterates Greek words, and the text is at times explicable only on the supposition that the wrong alternatives of two possible meanings of certain Greek words have been followed by the translator. Even before Ceriani's publication, however, we had some knowledge of the Apocalypse of Baruch; for chaps. 78-86, which contain Baruch's Epistle to the nine tribes and a half that were in captivity, had already appeared in Syriac and Latin, in the London and the Paris Polyglots, in Syriac alone in Lagarde's *Lib. Vet. Test. Apoc. Syr.* 1861, in Latin alone in Fabricius's *Cod. Pseudep. Vet. Test.*, and in English in Whiston's *Authentic Records*. Ceriani's Latin version was republished in Fritzsche's *Lib. Apoc. Vet. Test.* ('71) in a slightly emended form; but, as the Syriac text was still inaccessible, Fritzsche's emendations are only guesses more or less fortunate—generally less.

We have just remarked that the Syriac version is a translation from the Greek. We shall now enumerate the reasons from which it appears that the Greek was in turn translated from a Hebrew original.

7. The original Hebrew.

(i.) The quotations from, or unconscious reproductions of, the OT agree in all cases but one with the Massoretic text against Q. (ii.) Hebrew idioms survive in the Syriac text. Thus there are many instances of the familiar Hebrew idiom of the infinitive absolute combined with the finite verb, and many breaches of Syriac grammar in the Syriac text are probably to be explained as survivals of Hebrew order and Hebrew syntax. (iii.) Unintelligible expressions in the Syriac can be explained and the text restored by retranslation into Hebrew. Thus, among many others, the passages 21:9, 11, 13, 21:2 and 42:7 can be restored by retranslation into Greek and thence into Hebrew. The Syriac in these verses is the stock rendering of *δικαιοσύνη*, and this in turn of *צדק*; but *צדק* also *δικαιος* *εἶναι*, and this is the meaning required in the above passages, where the Greek translator erroneously adopted the commoner rendering, (iv.) Many *paronomasiae* disclose themselves on retranslation into Hebrew. See Charles, *Apoc. Bar.* 41-53.

The final editor of this work assumes for literary purposes the person of Baruch, the son of Neriah.

8. Contents. The scene is laid in the neighbourhood of Jerusalem; the supposed time is the period immediately preceding and subsequent to the capture of the city by the Chaldeans. Baruch, who begins by declaring that the word of the Lord came to him in the twenty-fifth year of Jeconiah,¹ speaks throughout in the first person. If we exclude the letter to the tribes in the captivity (chaps. 78-87), the work naturally divides itself into seven sections, separated from one another in all but one instance (*i.e.* after 35) by fasts which are, save at the end of the first section, of seven days' duration. The omission of a fast after chap. 35 may have been due either to an original oversight of the final editor or to the carelessness of a copyist.

That the text requires the insertion of such a fast is to be concluded on the following grounds:—According to the scheme of the final editor events proceed in each section in a certain order (see Charles, *Apoc. Bar.* 9, 36, 61). Thus first we find a fast, then generally a prayer, then a divine message or disclosure, and finally an announcement of this to an individual or to the people. Thus in the fifth section, 21-34, we have a seven-days' fast (21), a prayer (24-26), a revelation (22-30), and an address to the people (21-24). Then another seven-days' fast should ensue at the beginning of the sixth section (36-40). With the exception of this omission events follow in this section as in the others.

These sections are very unequal in length—1-56

57-8 9-124 125-20 21-35 36-46 47-77—a fact that, though it does not in itself make against unity of authorship, confirms the grounds afterwards to be adduced for regarding the work as composite.

1. The first section (1-56) opens with God's revelation to Baruch regarding the coming destruction of Jerusalem. But a time of prosperity should return.

2. According to the next section (57-91), Baruch fasts until the evening, and the Chaldeans encompass Jerusalem next day. In a vision Baruch sees the sacred vessels removed from the temple by angels and hidden in the earth till the last times. The angels next overthrow the walls, the enemy are admitted and the people carried away captive to Babylon.

3. In the third section (92-124), Baruch fasts seven days, and receives a divine command to tell Jeremiah to go to Babylon; but Baruch himself is to remain at Jerusalem to receive God's revelations regarding the future. Baruch bewails Jerusalem and the lot of the survivors. God sends him a sign of his anger, and that that hods a heart, O dust, that ye might go and announce in Sheol and say to the dead: "Blessed are ye more than we who live."

4. In the fourth section (125-20), Baruch fasts for seven days, and is told by God that he will be preserved till the end of time in order to bear testimony against the nations that oppressed Zion. When Baruch complains of the prosperity of the wicked, and the calamities of the righteous, God answers that the future world is made on account of the righteous—that the blessings of life are to be reckoned not by its length but by its quality and its end. Baruch is bidden not to publish this revelation (20:3).

5. In the fifth section (21-35), Baruch fasts, as usual, seven days. He deplores the bitterness of life, and supplicates God to bring about the promised end. God sends him of his ignorance, and declares that the end, though close at hand, cannot arrive till the predestined number of men be fulfilled, and again, in answer to Baruch's question respecting the nature and the duration of the judgment of the ungodly, describes the coming time of tribulation, which will be divided into twelve parts. At its close the Messiah will be revealed. Baruch summons a meeting of the elders in the valley of Kedron, and announces to them the future glory of Zion.

6. The sixth section (36-46) should begin with the missing fast of seven days. Shortly after, he has a vision of a cedar and a vine

1 We may observe here that Jeconiah reigned only three months, and was carried captive to Babylon eleven years before the fall of Jerusalem.

215

216

which symbolise the Roman power and the triumph of the Messiah. When Baruch asks who shall share in the future blessedness, God answers: "To those who have believed there will be the blessedness that was spoken of anon:time. Baruch then (44-47) unites together his first-born son and seven of the elders, tells them of his approaching end, and exhorts them to keep the law, for 'a wise man will not be wanting to Israel, nor a son of the law to the race of Jacob.'

7. After a fast of seven days, Baruch in the seventh section (47-77) prays for Israel. The revelations that ensue tell of the coming tribulation. Baruch bewails the evil effects of Adam's fall. In answer to his request, he is instructed as to the nature of the resurrection body, and in a *new vision* (53-74), he sees a cloud ascending from the sea and covering the whole earth. There was lightning about its summit, and soon it began to discharge first black waters and then clear, and again black waters and then clear, and so on till there had been six black waters and six clear. At last it rained black waters, darker than had been all that were before. Thereupon, the lightning on the summit of the cloud flashed forth and healed the earth where the last waters had fallen, and twelve streams came up from the sea and became subject to that lightning.

In the following chapters the vision is interpreted. The cloud is the world, and the twelve successive discharges of black waters and clear waters symbolise six evil periods and six good periods of the world's history. The eleventh period, symbolised by the black waters, pointed to the supposed present tribulation of Jerusalem. The rest of the interpretation follows to the future tense. The twelfth clear waters point to the renewed prosperity of Israel and the rebuilding of Jerusalem. The last black waters that were to flow pointed to troubles, earthquakes, and wars over the whole earth. Such as survived these were to fall by the hands of the Messiah. These blackest of all the waters were to be followed by clear waters, which symbolised the blessedness beyond a line between corruption and incorruption. "That time is the consummation of that which is corruptible, and the beginning of that which is incorruptible." Baruch thanks God for the revelation vouchsafed. He is then informed of his coming departure from the earth, but is bidden first to go and instruct the people. He admonishes them to be faithful (chap. 77), and at their request sends two epistles, one to their brethren in Babylon (the two and a half tribes) and the other to the tribes (nine and a half) beyond the Euphrates. The latter is given in chaps. 78-87. It is probable that the lost letter to the two tribes and a half is identical with, or is the source of, the Greek Baruch 3:9-29. See Charles, *Apoc. Bar.* 65-67.

From the discovery of the Apocalypse of Baruch in 1866 till 1861, it was regarded by scholars

9. Kabisch's theory of sources. In 1866 till 1861, it was regarded by scholars as the work of one author. In the latter year, Kabisch, in an article entitled 'Die Quellen der Apokalypse Baruchs' (*JPT*, 1870, pp. 66-107), showed beyond the possibility of question that the work was composite and derived from at least three or four authors.

This he distinguishes 1-24, 30-34, 41-52, and 75-87 as the groundwork written after 70 A.D., since these chapters imply the destruction of the temple. He further observes that these parts are marked by a despair which no longer looked for peace and happiness in this world, but fixed its regards on the world of incorruption. In the other pieces of the book there is a strong faith in Israel's ultimate triumph here, and an optimism which looks for the consummation of Messianic bliss in this life; and, as Kabisch rightly remarks, the temple is still standing. Between these sections, however, are the work not of one writer but of three, being constituted as follows: a short *Apoc.* 24: 29, the Vine and Cedar Vision 36-40, and the Cloud Vision 53-74: 30: 52-4, 35 are due to the final editor.

This theory is certainly in the right direction. It is open, however, to unanswerable objections. There is no unity in the so-called groundwork.

10. Present writer's results. When submitted to a detailed criticism, it exhibits a mass of conflicting conceptions and statements. The results of such a criticism may be stated briefly as follows (for the details see Charles, *Apoc. Bar.* 53-67). 1-26 31-35 41-52 75-87 were written after the fall of Jerusalem, and were derived from three or possibly four authors, B₁, B₂, B₃, and possibly S.

B₁ = 1-9 43-44 47 57-82 84 86 f., written by a Pharisee who expected Jerusalem to be rebuilt and the dispersion to be brought back from exile.

B₂ = 12 13-25 30-35 41 f. 44-45 47-52 75 f. 88, also by a Pharisee who looked for no national restoration, but only for the recompense of the righteous in heaven.

B₃ = 85, written by a Jew in exile.
S. = 106-124, possibly by a Sadducee, but perhaps to be assigned to B₂.

The rest of the book was written before the fall of Jerusalem. It consists of an Apocalypse 27-30 (= A₁)

and the two Visions 36-40 (= A₂) and 53-74 (= A₃) already mentioned. All these different elements were combined by the final editor, to whom we owe also 4-6 26 28 47 52-4 and possibly some other additions.

Jewish religious thought inspired itself, as already observed, mainly with two subjects, the Messianic hope

11. Critical criteria. and the Law, and in proportion to the one became more prominent the other fell into the background. Now, the chapters written before 70 A.D. are mainly Messianic.

Chaps. 27-30 (A₁) and 36-40 (A₂) take account of the Law only indirectly, whereas in those written after that date the whole thought and hopes of the writers centre in the Law as their present mainstay and their source of future bliss. In chaps. 53-74 (A₃), again, the Messianic hope and the Law are equally emphasized. This writing marks the fusion of early Rabbinism and the popular Messianic expectation. (See Charles, *op. cit.*)

In the sections B₁ and B₂, on the other hand, written after the fall of Jerusalem, we have two distinct outlooks as to the future. In B₁ the writer is still hopeful as to the future of Jerusalem.

It is delivered into the hands of its enemies indeed, but only for a time (41:6). The consolation of Zion should yet be accomplished (44:7 81:4), and the ten tribes brought back from their captivity (75:84-10). Moreover, the tribulation of the Gentiles was close at hand (82:9), and in due time would arrive the judgment, in which God's justice and truth should exact their mighty due (85:9).

In B₂, on the other hand (and if possible still more in B₃—chap. 85), the writer is full of irremediable despair as to the earthly fortunes of Zion and its people in this world (106-11).

Destruction awaits this world of corruption (21:19 31:3). The righteous have naught to look for save the new world (44:12) the world that dies not (51:3), the world of incorruption (85:5). Only in the world to come will every man be recompensed in the resurrection according to his works (50:7), when the wicked shall go into torment and the righteous shall be made like unto the angels.

In the sections written before the fall of Jerusalem, the Messianic element, which was wanting in B₁, B₂, and B₃, is predominant. The three Apocalypses 27-30 (A₁) 36-40 (A₂) 53-74 (A₃) have many features in common—such as an optimistic outlook as to Israel's earthly prosperity, the earthly rule of the Messiah till the close of this world, and the material blessings of his kingdom. There are, however, good grounds for regarding them as of different authorship. The Messianic reign is to close with the final judgment. On the Eschatology of the book see, further, *ESCHATOLOGY*, § 78.

All the elements of this book are distinctly Jewish. Its authors, as already observed, were Pharisees, full of confidence in the future glories of their nation, either in this world or in the next, notwithstanding their present humilitations. They entertain the most lofty conceptions as to the divine election and the absolute pre-eminence of their race.

It was on Israel's account that not only the present world (14:19) but also the coming world (15:7) was created. Israel is God's chosen people whose life is not on earth (48:20); the perpetual felicity of Israel lay in the fact that they had not mingled with the nations (48:22). The one law which they had received from the one God (48:24) could help and justify them (51:3); for so far as they kept its ordinances they could not fall (48:22); their works would save them (14:12 51:6 83:3). In due time also all nations should serve Israel; but such of them as had injured Israel should be given to the sword (72:6). The carnal sensuous nature of the Messiah, and the resurrection (72:6-74) is essentially Pharisaic. There was to be a general resurrection (42:8 12); but apparently only Israel should be saved (51:4).

1 It is possible to determine approximately the earlier limit of the composition of A₃ by means of what we might call the Enochic canon. This is: *No early Jewish book which extols Enoch could have been written after 50 A.D., and the assertion of Enoch's words and achievements as a law-giver to other OT heroes is a sign that it was written after the Pauline A.D. onwards (cp. Enoch) is to be traced to Enoch's acceptance among the Christians as a Messianic prophet.* For the grounds and illustrations of this canon see Charles, *Apoc. Bar.* 21-22, 107. Now, in 50 51:11 of this Apocalypse many of Enoch's functions and revelations are assigned to Moses. Hence A₃ was written after 50 A.D.

The affinities of Apoc. Bar. with 4 Esdras are so striking and so many that Ewald ascribed the two books to the same author. Though this view has not

13. Affinity with 4 Esd. been accepted in later criticism, it will not be amiss to draw attention to these affinities. (1) The main features of the two books are similar. They have one and the same object—to deplore Israel's present calamities and awaken hope in the coming glories, temporal or spiritual, of their race.

In both the speaker is a notable figure of the time of the Babylonian captivity. In both there is a sevenfold division of the work, and an interval (as a rule, of seven days) between each two divisions; and, whereas in the one Ezra devotes forty days to the restoration of the scriptures, in the other Baruch is bidden to spend forty days in admonishing Israel before his departure from the earth.

(2) They have many doctrinal peculiarities in common. According to both, man is saved by his works (4 Esd. 7 77 8 33 9 7, *Ap. Bar.* 2 24 12 etc.); the world was created in behalf of Israel (4 Esd. 6 85 7 119 13, *Ap. Bar.* 14 19 15 etc.); man came not into the world of his own will (4 Esd. 8 5, *Ap. Bar.* 14 11 48 75); a predetermined number of men must be attained before the end (4 Esd. 4 36 7, *Ap. Bar.* 23 45); God will visit his creation (4 Esd. 5 55 6 33 9 2, *Ap. Bar.* 20 24 4); Adam's sin was the cause of physical death (4 Esd. 3 7, *Ap. Bar.* 23 4); the souls of the good are kept safe in treasures till the resurrection (4 Esd. 4 35 37 32 8 9 55, *Ap. Bar.* 20 20 0).

This list might have been indefinitely added to. On the other hand, there are clear points of divergence.

14. Divergence with 4 Esd. In Esdras the Messianic reign is limited to 400 years (7 28 f.), whereas in Baruch this period is quite indeterminate. Again, in the former (7 29) the Messiah is to die, and the Messianic reign is to close with the death of all living things; whereas in the latter, according to 30, the Messiah is to return in glory to heaven at the close of his reign, and, according to 73 f., this reign is to be eternal, though it is to belong partly to this world and partly to the next.

Again, in Esdras the writer urges that God's people should be punished by God's own hands and not by the hands of their enemies (5 29 f.), for these have overthrown the altar and destroyed the temple, and made the holy place a desolation (10 21 f.). In Baruch it is described at length how the holy vessels were removed by angels and the walls of Jerusalem demolished by the same agency before the enemy drew nigh (6-8).

On the question of original sin likewise these two books are at variance. Whilst in Esdras the entire stream of physical and ethical death is traced to Adam (3 7 21 f., 4 30 7 48), and the guilt of his descendants minimised at the cost of their first parent (yet see 8 55-61), Baruch derives physical death indeed from Adam's transgression (17 3 23 4 54 15), but as to ethical death declares that "each man is the Adam of his own soul" (54 19; yet see 48 42).

It will be clear from the facts set forth above that the relations of these two apocalypses constitute a complex problem. If we attempt to deal with this problem on the supposition that each book is derived from a single author, no solution is possible; and the barrenness of criticism hitherto in this direction is due to this supposition of their unity. When, however, we come perforce to recognise their composite nature, we enter at the same time on the road that leads to the desired goal. For a provisional study of the relations between the various constituents of this apocalypse and 4 Esdras, the reader can consult Charles, *Apoc. Bar.* 67-76. The results of this study tend to show that, whilst some of the constituents of 4 Esdras are older than the latest of Baruch, other constituents of Baruch are decidedly older than the remaining ones of 4 Esdras.

The points of contact between this apocalypse and the NT are many; but they are for the most part insufficient to establish a relation of dependence on either side. The thoughts and expressions in questions are explicable from pre-existing literature or as commonplaces of the time.

15. Real relation. Such, among many others, are Mt. 3 16, *Ap. Bar.* 23 1, Mt. 26 24, *Ap. Bar.* 10 6, Lk. 21 28, *Ap. Bar.* 23 7, Rom. 8 18, *Ap. Bar.* 15 8. The following passages are of a different nature and postulate the dependence of our apocalypse on the

NT, or possibly, in one or two of the instances, of both on a common source.

With Mt. 16 26, 'For what shall a man be profited, if he shall gain the whole world and forfeit his soul? or what shall a man give in exchange for his soul?' cp *Ap. Bar.* 51 15, 'For what then have men lost their life, or for what have those who were on the earth exchanged their soul?' Also with 1 Cor. 15 19, 'If in this life only we have hoped in Christ, we are of all men most miserable,' cp *Apoc. Bar.* 21 13, 'For if there were this life only . . . nothing could be more bitter than this.' Also with 1 Cor. 15 35, 'How are the dead raised and with what manner of body do they come?' cp 49 2, 'In what shape will those live who live in that day?' Cp also Lk. 1 42 with *Ap. Bar.* 54 10, Jas. 1 2 with 52 6, and Rev. 4 6 with 51 2.

As the Apocalypse of Baruch was written between 50 and 100 A.D. it furnishes us with the historical setting and background of many of the NT problems, and thereby enables us to estimate the contributions made in this respect by Christian thought. Thus, whereas, from 49-51, we see that the Pauline doctrine of the resurrection in 1 Cor. 15 35-50 was not an innovation but a developed and more spiritual exposition of ideas already current in Judaism, it is clear, on the other hand, from the teaching of this book on Works and Justification, Forgiveness and Original Sin and Freewill (see Charles, *op. cit.* pp. 80-85), what a crying need there was for the Pauline dialectic, and what an immense gulf lay herein between Christian and Rabbinic teaching. No ancient book is so valuable in attesting the Jewish doctrine of that period.

17. Value. *Bibliography.*—In addition to the works already mentioned, the reader may consult Langen, *De Apoc. Bar. comm.* (67); Ew. *GGA* (67), 1706-17, 1720; *Hist. of Israel*, 8 57-61; Drummond, *The Jewish Messiah* (77), 117-132; Kneucker, *Das Buch Bar.* (79), 190-198; Di. 'Pseudep.' in *PRE* (2), 12 356-358; Deane, *Pseudep.* (91), 130-162.

II. THE BOOK OF ENOCH.—By the exegesis of later times, the statement that Enoch walked with God (Gen. 5 24; see ENOCH) was taken to mean that he enjoyed superhuman privileges of intercourse with God, and in this intercourse received revelations as to the nature of the heavens and the earth, the present lot and the destinies of men and angels. It was natural, therefore, that an apocalyptic literature should seek the shelter and authority of his name in ages when such literature became current. In the *Book of Enoch* preserved in Ethiopic we have large fragments of this literature proceeding from a variety of Jewish writers in Palestine; and in the *Book of the Secrets of Enoch* preserved in Slavonic we have further portions of it, written originally by Hellenistic Jews in Egypt. To the latter book we shall return.

The Book of Enoch as translated into Ethiopic belongs to the last two centuries B.C. All the writers of the NT were familiar with it and were more or less influenced by it in thought and diction. It is quoted as a genuine production in the Epistle of Jude (14 f.) and as Scripture in that of Barnabas (*Ep.* 4 3 16 5). The authors of the *Secrets of Enoch*, *Jubilees*, *Test. xii. Patr.*, *Apoc. Bar.* and 4 Esd. laid it under contribution. With the earlier Fathers and Apologists it had all the weight of a canonical book; but towards the close of the third and the beginning of the fourth centuries it began to be discredited, and finally it fell under the ban of the Church. The latest references to it are to be found in Synellus and Cedrenus, who have preserved large fragments of the Greek version. The book was then lost sight of till 1773, when two MSS of the Ethiopic version were discovered by Bruce. From one of these MSS Lawrence made the first modern translation of Enoch in 1821.

18. Jewish view of Enoch. Enoch was originally written in Heb. or Aram., not in Greek. On this question the chief Apocalyptic scholars are practically agreed.

19. Book of Enoch: its fortunes. In the case of chaps. 1-82 this view is established beyond the reach of controversy; for in 10 9 19 18 8 27 2 28 1 29 1 31 1 of the Greek version we find that the translator transliterated Heb. or

Enoch was originally written in Heb. or Aram., not in Greek. On this question the chief Apocalyptic scholars are practically agreed.

20. Language. In the case of chaps. 1-82 this view is established beyond the reach of controversy; for in 10 9 19 18 8 27 2 28 1 29 1 31 1 of the Greek version we find that the translator transliterated Heb. or

Aram. words that were unintelligible to him. The same view as to the remaining chapters has been amply proved in the *Journ. As. Soc.* (187) 352-355 by Halevy, who regards the entire work as derived from a Hebrew original. See also Charles, *Book of Enoch*, 21-22, 305. Recently some Dutch and German scholars have argued for an Aram. original on the ground that three Aram. forms have been preserved in the Gizeh Greek fragment—viz. *fovea* in 184, *ἄσπασμα* in 281, and *ἄσπασμα* in 291. The first is, it is true, an Aram. form of *ῥῶ* and the two latter of *ῥῶ*. This argument, however, is inconclusive. We find *fovea* in 2 k. 147 [BA⁷] as a transliteration of *ῥῶ*, and *Asa* in Neh. 2:14 [BR] as a transliteration of *ῥῶ*; and there are other instances of the same peculiarity in *ῥῶ*. Hence the presence of such Aramaisms in a text is not sufficient in itself to establish an Aram. original.

The Heb. original was translated into Greek, and from Greek into Ethiopic and Latin. Of the Greek

21. Versions

—Greek. version chaps. 6:9-8:10-14 15:16: have come down to us through Syncellus (circ. 800 A.D.), and 89:42-49 through a Vatican MS.; but the most important fragment of this version—the Gizeh Greek fragment—was discovered only a few years ago by the Mission Archéologique Française at Cairo, and published in 1892.

M. Lods's critical edition of this fragment, accompanied by a translation, appeared almost simultaneously, and next year it was edited by the present writer, with an exhaustive comparison of the Greek and Ethiopic versions of 1-32, as an Appendix to his work on *Enoch*. The other Greek fragments will be found in the same work. The Gizeh fragment was edited also by Dillmann (*SB.H.* [97], li. iii. 1039-1054, 1079-1092). The fragments of the Greek *Enoch* with a critical apparatus are to be published in the 2nd edition of vol. iii. of Swete's Cambridge LXX.

The Latin version is wholly lost—with the exception of 19, which is found in a treatise of the Pseudo-Cyprian

22. Latin.

mentioned in *Act. Apostolorum* (see Zahn's *Grundr. d. N.T. kanon. 2:57-58*), and 106:1-18, which owes its discovery to Mr. James, in an eighth-century MS in the British Museum. This fragment is critically edited in Charles's *Book of Enoch*, 372-375. *Times*, *Illustrated Annual*, 149-150.

The Ethiopic version alone preserves the entire text, and that in a more accurate and trustworthy form than

23. Ethiopic.

the other versions. It has fewer additions, fewer omissions, and fewer and less serious corruptions.

I. *The Ethiopic MSS.* The Ethiopic MSS are comparatively many. There are about twenty scattered throughout the libraries of Europe; half of them are found in the British Museum. The best of all the known MSS is undoubtedly that designated *Bezae*, 78 in the British Museum.

II. *Editions of the Ethiopic Text.*—Only two editions have appeared: that of Lawrence in 1868 from one MS, and that of Dillmann in 1851 from five MSS. Unhappily, these MSS were late and corrupt. The present writer hopes to issue a text based on the incomparably better MSS now accessible to scholars. Such a text is actually presupposed in his Translation and Commentary of 1893.

III. *Translations and Commentaries.*—Translations accompanied by Commentaries have been issued by Lawrence (21), Hoffmann (33-38), Dillmann (53), Schodde (52), and Charles (93). Of Dillmann's and Schodde's Translations the reader will find a short review in Charles (6-9).

IV. *Critical Inquiries.*—Some account of these will be found in Schürer, *Hist. Jews*, and in Charles's *Book of Enoch*, 302-311. Of the many works on this book the following deserve special mention here. Lücke, *Einl. in d. Offenb. des Joh.* (2d ed.) Ew. *Abhandl. über d. heb. Buches Henoch* (Leipzig, 1852), *Sinn, und Zusammensetzung* (55); Köstlin, 'Ueb. die Entsteh. d. B. Henoch' (*Theol. Jahrb.* 1856, pp. 240-279 370-387). Hilgenfeldt, *Die jüdische Apokalypsis* (57), 91-94; Goldbardt, 'Die 70 Hirten des Buches Henoch und drei Deutungen' (*Merk's Archiv f. wissenschaftl. Erforschung des A.T.* 1872, vol. ii. Heft 2:163-246); Drummond, *The Jewish Messiah* (87), 175-1; Lipsius in Smith and Wace's *Dict. of Chr. Biog.* (89), 2:14-128; Schürer, *Hist.* 5:54-73; Lawlor, *Journ. Phil.* vol. 88, pp. 164-168 [87].

The Book of Enoch is a fragmentary survival of an entire literature that once circulated under his name.

24. Compositeness.

To this fact the plurality of books assigned to Enoch from the first may in some sense point to: as, for instance, the expression 'books' in 104:12; *Test. xii. Patr.* Jud. 18; Origen, *c. Celsum*, 5:54, and elsewhere. Of this literature five distinct fragments have been preserved in the five books into which the Book of Enoch is divided (1-36

37-71 72-82 83-90 91-108). These books were originally separate treatises; in later times they were collected and edited, but were much mutilated in the course of redaction and incorporation into a single work. In addition to this Enoch literature, the final editor of the book made use of a lost apocalypse, the Book of Noah (mentioned in Jubilees 10:13 21:10), from which he drew 6:11 (7) 17-19 34:14 41:1 43:17 54:7 55:4 59:7 65:69-75 106:6. Another fragment of the Book of Noah has been embodied in the Book of Jubilees (see below, § 57).

We have already remarked that in the five books into which the whole work is divided we have the writings

25. Criticism. of five different authors. Before we proceed to give some of the grounds for this statement, we shall give in merest outline the different constituents found in the work by the chief scholars who have studied the subject.

Lücke in his *Einl.* (see above, § 23) regards the book as consisting of two parts. The first part embraces 1-36 72-105, written at the beginning of the Maccabean revolt, or about the year of his later view, in the reign of John Hyrcanus; the second consists of the Similitudes (36-71), and was written in the early days of Herod the Great. In the latter, however, there are some interpolations. Hoffmann (J. Chr. K.) ascribes the entire work to a Christian author of the second century. In this view he was followed later by Weisse and Philippi. Hoffmann deserves mention in this connection on the ground of his having been the first to give the correct interpretation of the seven shepherds in 89:6. Ew. in his *Abhandl.* (see above, § 23) gives the following scheme:—Book I. (67-71) (72-105) 106:1-18; Book II. (1-4) 1-4 74 74-105 (106:1-18); Book III. (20-26) 20-26 100:7 (106:1-18) 106:1-18; 108 later; Book IV., the Book of Noah (65:6-7 8:1-9 10:13 11:1 12:1 17-19 51:7-9 52:1-3 53:1-3 54:1-3) somewhat later than the preceding. Köstlin in his essay (see above, § 23), a contribution of great worth, arrives at the following analysis:—the groundwork, 1:1-15 21:1-26 72:10-11, 73:1-10; the Similitudes (37-71 and 17-19) before 64 B.C.; Noachic fragments 64:7-10 65:1-3 66:1-3 67:1-3 68:1-3 69:1-3 70:1-3 71:1-3 106:1-18; 108 is an Enochic addition. Hilgenfeldt (see above) regards the groundwork, consisting of 1-16 20-36 72-105, as written before 98 B.C.; and the remaining chapters as coming from the hand of a Christian Gnostic after the time of Saturninus. The interesting study of Tideman (*ZfM.* [1875] 261-266), and the works of Lipsius, Schürer, Drummond, enumerated above (§ 23), and Schodde (*The Book of Enoch*, 2d ed. 1893) only be mentioned here. As Dillmann changed his mind three times, and in each instance for the better, it will be enough to give his final analysis. The groundwork (1-36 72-105), in the time of John Hyrcanus; the Similitudes and 17-19, before 64 B.C.; the Noachic fragments (65:6-7 8:1-9 10:13 11:1 12:1 17-19 51:7-9 52:1-3 53:1-3 54:1-3) 106:1-18; 108 from a later hand.

We shall now proceed to discuss this question *disjunct*, and endeavour to find the criticism of the book one further stage towards finality.

Disregarding the interpolations from the Book of Noah already mentioned as well as the closing chapter, we find that all critics are agreed in ascribing the Similitudes (37-70) to an authorship different from the rest. The remaining chapters (1-36 72-104) have been regarded by all critics except Ewald and Lipsius as proceeding from one and the same author; but these scholars, while differing from each other, have not persuaded any one but themselves as to the justness of their respective analyses. In their contention, however, as to the compositeness of these chapters they were undoubtedly right. This question has been gone into at length in Charles's *Book of Enoch*, 55 f., 187-189, 220 f., 260-263, where grounds are given for believing that sections 1-36, 72-82, 83-90, and 91-104 are writings distinct as to authorship, system of thought, and date. We must now proceed to sketch briefly the various independent writings contained in the entire work, assigning to each its most probable date.

Part I., consisting of chaps. 1-36 (for the Noachic interpolations, see § 24), was written at latest before

27. Chaps. 170 B.C., and mainly from the prophetic standpoint of such chapters as Is. 65.

1-36. This is, undoubtedly, the oldest part of the book, being anterior to 72-82, 83-90, 91-104, as it is used by the writers of these sections.

As 83-90 was written not later than 161 B.C., 1-36 must be some years earlier, and, as there is no allusion to the Maccabees

APOCALYPTIC LITERATURE

of Antiochus Epiphanes, the above date, 170, is the latest reasonable limit for its composition.

This book (1.1-1.36) is the oldest piece of Jewish literature that teaches the general resurrection of Israel, describes Sheol according to the conception that prevails in the NT as opposed to that of the OT, or represents Gehenna as a final place of punishment (cp *ESCHATOLOGY*, § 63). The problem of the author is to justify the ways of God to men.

The righteous will not suffer always (11). Sin is the cause of this suffering, and the sin of man is due to the lust of the angels—the Watchers (9.6-10.9). Hence the Watchers, their companions, and their children, must be punished. Their destruction will form the prelude to the first world-judgment, of which the Deluge will form the completion (10.1-3). Sin still prevailed after the Deluge, however, through the influence of the evil spirits that went forth from the slaughtered children of the Watchers and the daughters of men (10.1). These act with impunity till the final judgment. In the meantime character finds its recompense in some measure immediately after death (22). In the last judgment the Watchers, the demons, and all classes of Israelites with one exception, will receive their final award (1.9-2.213). This judgment is preceded by a general resurrection of Israel (22). The wicked are cast into Gehenna (27.2); the earth is cleansed from sin (10.20-22); the Messianic kingdom is established, with Jerusalem as a centre (25.5); and God abides with men (25.3). The Gentiles are converted (10.12). The righteous eat of the tree of life (25.4-6) and thereby enjoy patriarchal lives (5.9). As to what befalls the righteous after the second death there is no hint in this fragmentary section.

Part II., consisting of 83-90, was written between 100 and 170 B.C., mainly from the same standpoint as Daniel. On a variety of grounds, we are obliged to discriminate this section from the preceding.

It will be enough to mention that, whereas in this there is a Messiah, in the preceding there was none; in this the life of the righteous is apparently unending, in the other it was finite; in this the scene of the kingdom is the New Jerusalem set up by God himself, in the other it was Jerusalem and the entire earth unchanged though purified. Finally, the picture in 83-90 is developed and spiritual, whilst that in 1-36 was naive, primitive, and sensuous.

The date assigned above is not difficult to fix.

The Hasidim (see *ASIDEANS*), symbolised by the lambs that are born to the white sheep (90.6), are already an organised party in the Maccabean revolt; the lambs that become horned are the Maccabean family, and the great horn who is still waxing while the author of the section is writing is Judas the Maccabee (90.9), who died in 161 B.C.

Chapters 83-90 recount two visions: 83-7, dealing with the first world-judgment; 85-90, dealing with the entire history of the world till the final judgment. In the second vision the author considers the question of Israel's unmerited suffering.

Israel has indeed sinned; but the punishment immeasurably transcends its guilt. These undue severities, the author shows, have not come from the hand of God; they are the doing of the seventy shepherds into whose care God committed Israel (89.59). These shepherds or angels have proved faithless to their trust; but not with impunity. An account has been taken of all their deeds (89.61-64), and for them and for their victims there is laid up a due recompense (90.33). Moreover, when the outlook is darkest, a league of the righteous is organised in Israel (90.6). In it there will arise a family from which will come forth the deliverer of Israel, Judas the Maccabee (90.9-16). Every effort of the Gentiles to destroy him will prove vain, and God's appearance in person to judge will be the signal for their destruction. The apostates will be cast into Gehenna, and the wicked angels into an abyss of fire (90.20-25). God himself will set up the New Jerusalem (90.25-29); the surviving Gentiles will be converted and serve Israel (90.29); the righteous dead will be raised to take part in the kingdom; and finally the Messiah will appear among them (90.37). The Messianic kingdom lasts on earth for ever, and its members enjoy everlasting blessedness.

It will be observed that this is the earliest appearance of the Messiah in non-canonical literature (see *MESSIAH*, § 5; *ESCHATOLOGY*, § 60). He has, however, no rôle to play: he has not as yet vindicated for himself a place in the apocalyptic doctrine of the last things.

Part III., consisting of 91-104, was written between 134 and 95 B.C. The well-defined opposition of the

29. Chaps. 91-104. Pharisees and the Sadducees depicted in this section cannot have been earlier than the breach between John Hyrcanus and the Pharisees (see *ISRAEL*, § 78; *SCRIBES*, § 18); hence not earlier than 134 B.C. On the other hand, it cannot

have been later than 95 B.C. as the merely passing reference to persecution in 103.15 could hardly be interpreted of Janneus after his savage massacres of the Pharisees in 95 B.C., which won for him the title, 'the slayer of the pious.'

This section was originally, like 83-90, an independent writing. In adapting it to its present environment, the redactor of the entire work broke up its original arrangement. In order to recover this we must read it in the following order—92.01-1-10 93.1-10 91.12-10 94-104. On a variety of grounds (see Charles, *Book of Enoch*, 260-263), we must attribute this work to quite another author than that of either of the preceding sections.

In passing from 83-90 to 91-104 we enter on a world of new conceptions (cp *ESCHATOLOGY*, § 64. f.). In all previous apocalyptic writings the resurrection and the final judgment have been the prelude to an everlasting Messianic kingdom; whereas in the present writing these great events are relegated to the close of the Messianic kingdom, and not till then do the righteous enter into their reward. This kingdom is temporary (91.12-15); there is no Messiah; the righteous with God's help vindicate their just cause and destroy their oppressors. On the close of the kingdom follow the final judgment (91.15) and the risen spiritual life of blessedness in a new heaven (91.10-92.3). In this view of the future the centre of interest has obviously passed from the material world to the spiritual, and the Messianic kingdom is no longer the goal of the hopes of the righteous. Their faith finds its satisfaction only in a blessed immortality in heaven itself. This immortality is an immortality of the soul only (103.3-4). As for the wicked, they will descend into the pain of Sheol and abide there everlastingly (98.3-104.7). Here (103.7) Sheol appears as Hell for possibly the first time.

Part IV. The Similitudes, consisting of **30. Similitudes**; 37-70, were written between 94 and 79 B.C., or between 70 and 64 B.C.

'The kings and the mighty,' so often denounced, are the later Maccabean princes and their Sadducean supporters: the later Maccabean princes, for the blood of the righteous was not shed (as the writer complains, 47.2.2) before 95 B.C.; not the Herods, for the Sadducees were not allies of the Herods, and Rome was not as yet known to the writer as one of the great world-powers. This last fact necessitates an earlier date than 64 B.C., when Rome interposed authoritatively in the affairs of Judaea.

In his attempt to solve the problem of the suffering of the righteous, the author of the Similitudes has no interest save for the moral and spiritual world. His view, too, is strongly apocalyptic, and follows closely in the wake of Daniel.

The origin of sin is traced one stage farther back than in 1-36. The first authors of sin were the Satans (40.7). The Watchers fell through becoming subject to these and leading mankind astray (54.6). Though the Watchers were forthwith confined in a deep abyss, sin still flourishes in the world and sinners deny the name of the Lord of Spirits (38.2) and of his Anointed (48.10), and the kings and the mighty oppress the children of God (62.11). Suddenly there will appear the Head of 140ys, and with him the Son of Man (40.2-3 48.2), to execute judgment upon all alike. To this end there will be a resurrection of all Israel (51.1-61.5), and all judgment will be committed to the Son of Man (41.9 69.27), who will judge all according to their deeds (41.1). Sin and wrong-doing will be bani-shed from the earth (49.2), and heaven and earth be transformed (45.4.5), and the righteous will have their mansions in Paradise (39.6-41.2). The Elect One will dwell among them (45.4); they will be clad in garments of life (62.15.16), become angels in heaven (61.4), and continue to grow in knowledge and righteousness (68.5).

It will be observed that the Messianic doctrine in this section is unique, not only as regards the other sections of Enoch but also in Jewish literature as a whole (see, further, *ESCHATOLOGY*, § 66).

The Messiah exists from the beginning (48.2); he sits on the throne of God (45.3 47.3), and possesses universal dominion (62.6); and all judgment is committed unto him (69.27). If we turn to the other sections we find that in 1-36 and 91-104 there is no Messiah at all; whilst in 83-90 the Messiah is evidently human, and has no rôle to play in the doctrine of the last things.

If the reader will turn to the list of Noachic interpolations (see above, § 24) he will find that many of them are to be found in this section.

They have as a rule been drawn from an already existing Apocalypsis of Noah, and adapted by an editor to their present context in Enoch. This he does by borrowing from the Similitudes characteristic terms, such as 'Lord of Spirits', 'Head of Days', 'Son of Man', to which, however, either through ignorance or of set intention, he generally gives a new connotation.

Chapter 71 does not belong to the Similitudes. It shows the same misuse of characteristic phrases as the interpolations just referred to (see Charles, *Book of Enoch*, 183 f.).

Part V., the Book of Celestial Physics, consists of

31. Celestial 72-78 82 79. This, like the preceding
Physics (chaps. sections, is a work of independent
72-78, 82, 79). authorship. There are no means of determining its date.

It has suffered from both disarrangements and interpolations at the hands of the editor of the whole work. In the first place, 80 f. is a manifest intrusion written from a standpoint quite different from that of the rest. In the next place, 82 does not stand in its original position. The opening words of 79 in fact presuppose 82 as already read. We have found a similar dislocation of the text in Part III.

Part VI., the Noachian and other interpolations. These have been enumerated above (§ 24).

The influence of Enoch on Jewish literature (to exclude

32. Influence for the moment the NT) is seen in
of Enoch. *Jubilees* (written about the beginning of the Christian era), in the Slavonic *Enoch* (1-50 A.D.), *Test. xii. Patr.*, *Apo. Bar.*, and in 4 Esdras.

In Jewish apocalyphe before 40 A.D. Enoch was the chief figure next to Daniel; but his acceptance by the Christians as a Messianic prophet led to his rejection by the Jews. See note on § 10.

In patristic literature, Enoch is twice cited as Scripture in Ep. Barn. (43 165). It is also quoted with approval, though not always by name, by Justin Martyr, Iren. and Athenag., Tert., Clem. Alex., Orig., Anatolius. Thenceforward it is mentioned with disapproval by Hilary, Chrys., Jer., August., and finally condemned in explicit terms in the *const. Ap. 6* 16.

Far more important than its influence on Jewish literature, was its influence on NT diction (a) and doctrine (b).

(a) We shall here draw attention only to the indubitable instances. Enoch is quoted directly in Jude 14 f. Phrases, clauses, or thoughts derived from it, or of closest kin with it, are found in *Judea* 1: 7; *Rev.* 2: 7 3: 10 4: 6 7: 9 9: 1 14: 20 14 5; *Rom.* 8: 28 9: 5; *1 Joh. 1: 1*; *1 Joh. 1: 13*; *Acts* 9: 14; *Jn.* 5: 22 27; *Lk.* 9: 35 16: 25 1; *Mt.* 19: 28 25: 41 29: 28.

(b) The doctrines in Enoch that had a share in moulding the analogous NT doctrines, or formed a necessary link in the development of doctrine from the OT to the NT, are those concerning the Messianic kingdom and the Messiah, Sheol and the resurrection, and demonology, on which reference must be made to the separate articles on these heads and to ESCHATOLOGY. We here content ourselves with remarking, as regards the doctrine of the Messiah, that four titles, afterwards reproduced in the New Testament, are first applied to the personal Messiah in the Similitudes. These titles are 'Christ' or 'the Anointed One,' 'the Righteous One,' 'the Elect One,' and 'the Son of Man.' The first title, found repeatedly in earlier writings but always in reference to actual contemporary kings or priests, is now for the first time (48 to 52 4) applied to the ideal Messianic king that is to come. It is here associated with supernatural attributes. The second and the third of these titles, found first in Enoch, have passed over into the NT—the former occurring in *Acts* 3: 14 7: 52 22: 14, the latter in *Lk.* 9: 35 23: 35. The last title, that of 'the Son of Man,' is historically the source of the New Testament designation. To the latter it contributes some of its most characteristic contents (see Charles, *Book of Enoch*, 312-317).

III. THE BOOK OF THE SECRETS OF ENOCH.—This book has, as far as is yet known, been preserved only in

33. Secrets Slavonic. For the sake of convenience
of Enoch: we shall call it 'the Slavonic Enoch,'
its fortunes. in contradistinction to the older book, which for the same reason we shall designate 'the Ethiopic Enoch.'

This new fragment of the Enochic literature has only recently come to light through certain MSS, some of which were found in Russia and some in Servia. Although the very knowledge of such a book was lost for probably twelve hundred years, the book was much used by both Christians and heretics in the early centuries.

Citations appear from it, though without acknowledgment, in the *Book of Adam and Eve*, *Apo. Bar.* and *Pand.* (400-500 A.D.), *Sibylline Oracles*, *Asc. Joh.* and *h. of Bar.* (70-90 A.D.). It is quoted by name in the apocalyptic portions of the *Test. of the xii. Patr.* (circa A.D.). It was referred to by Orig. and probably by Clem. Alex., and was used by Iren. Some phrases of the NT may have derived from it.

There are five Slavonic MSS: in two of them the complete text is found, while the remaining three supply only a shortened and incomplete redaction. For the edition published by the present writer the two best of the above MSS (A and B) were translated and put at the service of the editor by Mr. Morfill.

34. The The editor had at his disposal also Mr. Morfill's translation of Prof. Sokolov's text, which is founded on these and other MSS. In 1856 Prof. Bonawitsh published his *Das Slavonische Henochbuch*, in which he gives a German translation of the MSS A and B side by side, preceded by a short introduction.

(a) The main part of the 'Slavonic Enoch' was written in Greek.

This is clear from such statements as (1) 80 13, 'And I gave him a name (i.e., Adam) from the four substances: the East, the West, the North, and the South.' Adam's name is thus derived from the initial letters of the Greek names of the four quarters—*ανατολη*, *δυσος*, *αρκτος*, *μεσημβρια*. This derivation was first elaborated in Greek: it is impossible in the Semitic languages. (2) The writer follows the chronology of *Eccl.* (3) In 50 4 he reproduces the *Eccl.* text of *Eccl.* 32 35 against the Hebrew. (4) He constantly uses Ecclesiasticus, which was current chiefly in Egypt.

(b) Certain portions were based on Hebrew originals. Such a hypothesis is necessary to account for the quotations from it or references to it which appear in the *Test. xii. Patr.* The fact that the latter work was written in Hebrew obliges us to conclude that its author drew upon Hebrew originals in quotations and references.

36. Place. The book was written in Egypt.

This is deducible from the following facts:—(1) The variety of speculations which it holds in common with Hellenic and other Hellenistic works; these souls were created before the foundation of the world, 23 5 (ep. Philo, *De Somn.*, 102; *Wisd. Solom.*). Again, man had seven natures, 80 9 (ep. Philo, *De Mundi Op.*, 40). (2) The whole Messianic teaching of the OT does not find a single echo in the work of this Hellenised Israelite of Egypt, although he shows familiarity with most of its books. (3) Such monstrous creatures as appear in chap. 12 are natural products of the Egyptian imagination. (4) The fantastic character of the creation narrative in 25 f. betrays Egyptian elements.

Materials originally derived from this book are discoverable in Joel and Cedrenus (1050-1200 A.D.), though in these authors the materials are assigned to other names. Two passages of the *books of Adam and Eve* (see

37. Relation to other works.

to other works. *ΜΕΤΕΦΥΣΙΑ*, § 10) in 1E and 1E are all but quotations from 29 f. and 31 f. of our book. Again in the *Apo. Mosei*, 10 (ed. Tisch. 1866), we have a further development of 14 2-4 of our text, just as in *Apo. Paul.* 64 οὐδὲ ἐστιν ὁ παράδεισος, εἶδη . . . δένδρον . . . ἐν ᾧ ἐπαυκασιετο τὸ πνεῦμα τὸ ἅγιον is a Christian adaptation of 83, 'And in the midst (of Paradise) is the tree of life—on which God rests when he comes into Paradise.' The section on the derivation of Adam's name in the anonymous *De Montibus Sinae et Zion*, 4, is to be referred to 23-30 13, and Augustine's speculation, *De Civ.* xxii. 80 50, on the eighth eternal day to 32 2.

Still earlier we find almost a verbal reproduction of 50 5-51 1 in the Sibylline Oracles, 275. In Irenæus, *Contra Her.* v. 28 3, the Jewish speculation of 33 f. is reproduced, and possibly in Origen (see Lommatschek ed., vol. xxi. 59). However this may be, there is no doubt as to the derivation of 23-30 13 in the *De Princ.* 1: 32, 'Nam et in eo libello . . . quem Hermas conscripsit, ita refertur: Primo omnium crede, quia unus est Deus, qui esse fecit omnia . . . sed et in Enoch libro his similia describuntur.' There are good grounds for believing that in a still earlier period (50-100 A.D.) the writers of *Asc. Isr.* 8: 16 and of *Apo. Bar.* 4: 5 were acquainted with the Slavonic book respectively. In *Ep. Barn.* 15 8-9 and in 23-30 13 the thought and diction are dependent on 32-33 and 30 15.

In the NT the similarity of matter and language is sufficiently great to establish a close connection if not a literary dependence.

With *Mt.* 50, 'Blessed are the peacemakers,' cp 52 11, 'Blessed is he who establishes peace'; with *Mt.* 5 34 35 37, 'I swear not at all,' etc., cp 40 1, 'I will not swear by a simple oath, neither by heaven, nor by earth, nor by any other creature which God made. . . . If there is no truth in men, let them swear by a word,

yea, yea, or nay, nay.' Again, with Mt. 7:30 and 26:34, cp 42:24 and 9:1; with Ju. 14:2 cp 61:2; with Ezech. 4:25 cp 42:12; with Rev. 9:1 and 10:7 cp 42:1 and 46:7. Still earlier we find this book not only used but quoted by name in the *Test. Iosef.* 5, where the statement reads *καταμαρτυροῦντες ἑαυτοὺς ὅτι ἐν βιβλίῳ Ἐνὼχ τοῦ δικαίου, ὅτι ὁ ἄγγελος ἠνάγκασεν ὁ Σατανᾶς* is drawn from 18:3. 'These are the Origi (i.e. *Egypti*) who with their prince Satanai rejected the holy Lord.' Finally, the references to Enoch in *Test. Napht. 4, Test. Sim. 5, Test. Benj. 9*, are adaptations of 84:2-3.

The question as to the date has, to a large extent, been determined already. The portions which have a Hebrew background are at latest pre-Christian.

38. Date. This follows from the fact of their quotation in the *Test. xii. Patr.* Turning to the rest of the book, we find that the *terminus a quo* is determined by the fact that it frequently uses *Ecclus.* (cp 43:2 f., 47:5 52:8 61:2, 4, etc.; see the writer's edition of the Slavonic Enoch). The Ethiopic Enoch, further, is continually presupposed to be in the background. Its phraseology and conceptions are reproduced (7:17 f., 33:19 f., 39:2, etc.). At times its views are put forward in a developed form (8:15 f., 40:13 64:5), and occasionally divergent conceptions are enunciated (16:7 18:4). Finally, explanations are claimed to have been given by this writer which, as a matter of fact, are to be found not in his writings but in the *Eth. En.* (see 40:5 f., 8 f.). It is possible that the Book of Wisdom also was used by our author; see 65:4.

Since, therefore, *Ecclus.*, the *Eth. Enoch*, and *Wisdom (?)* were used by this author, his work cannot have been earlier than 30 B.C.

The *terminus ad quem* must be set down as earlier than 70 A.D. For (1) the temple is still standing. (2) This book was known and used by the writers of *Ez. Barn.* and *Asc. Isa.*, and probably by some of the writers of the NT. We may with reasonable certainty, therefore, assign the composition of the book in Greek to the period 50 A.D. The author is thus a contemporary of Philo, with whom, accordingly, we find that he holds many speculations in common. Much of the book, however, goes back to a Hebrew background of an earlier date.

The author was thus an orthodox Hellenistic Jew who lived in Egypt. He believed in the value of sacrifices

39. Authorship. (42:6 59:1 66:2)—though he is careful to regard to them 15:3 f., 61:4 f.)—in the law (52:8 f.), and in a blessed immortality (50:6 55:8 f.), in which the righteous will wear 'the raiment of God's glory' (22:8). In questions affecting the origin of the earth, of sin, and of death, he allows himself the most unrestricted freedom and borrows from every quarter. Thus Platonic (30:16), Egyptian (25:2), and Zend (58:4-6) elements are incorporated in his system. The result is highly syncretistic.

The book opens with a short account of Enoch as 'a very wise man' whom 'God loved and received so that he should see the heavenly abodes, the kingdoms of the wise, great, and never-changing God.'

40. Contents. In chap. 1 two angels appear to Enoch and bid him make ready to ascend with them into heaven. In chap. 2 he admonishes his sons and directs them not to seek for him till he is brought back to them. Thereupon (3-11) he is carried up through the air into the first heaven, where he beholds a great sea, and the elders, the rulers of the orders of the stars, and the treasures of the sun and the four streams of honey, milk, oil, and wine, that water the garden, and go down to the Paradise of Eden, between corruptibility and incorruptibility. The angels inform Enoch that 'this place is prepared as an eternal inheritance' for those 'who turn their eyes from unrighteousness, and accomplish a righteous judgment, and give bread to the hungry, and clothe the naked, and raise the fallen. . . and walk without blame before the face of the Lord.' Enoch and his sons then to the northern region of this heaven (10), and shown 'a very terrible place' of 'savage darkness and impenetrable gloom,' with 'fire on all sides, cold, and ice.' He is told that 'this place is prepared as an eternal inheritance' for those 'who commit evil deeds on earth, sodomy, witchcraft' . . . who oppress the poor, who are guilty of stealing, lying, envy, evil thoughts, fornication, murder, who 'worship gods without life.'

Then Enoch is conducted to the fourth heaven, where he is shown the courses of the sun and moon (11), and the phoenixes,

and the chalkadri (?) (12; cp CUCKATRICE), and the eastern and western gates of the sun (13-16), and 'an armed host serving the Lord with cymbals and organs' (17).

In 18 he is taken up to the fifth heaven, where he sees the Watchers who had rebelled; their brethren were already confined in torment in the second heaven. Then he passes to the sixth heaven (19), where are the angels who regulate all the powers of nature and the courses of the stars, and write down the deeds of men. Finally, he is raised to the seventh heaven (20 f.), where he sees God sitting on his throne, and the heavenly hosts in their orders on the steps of the throne, and the Seraphim singing the trisagion. He falls down and worships (22). At God's command, Michael takes from him his earthly robe, anoints him with the holy oil, and clothes him with the raiment of God's glory. Thus Enoch becomes like one of the glorious ones. Under the instruction of Vretil (chap. 28), he writes 365 books, in thirty days and thirty nights, about things in heaven and earth, and about the souls of men created from eternity, and their future dwelling-places.

In 24-26 God makes known to Enoch how he created the invisible out of the visible; how he commanded Adol (possibly a corruption of Uriel, regarded as=light of God), and Arkhas (possibly from ארץ or Aram. ארץ=earth), to come forth and burst asunder; and so the light on high and the world below were produced. And God divided the light and the darkness (27), and made the seven heavens, and caused the waters under the heaven to be gathered into one place, and made the earth from the waters (28). Such were the creations of the first day. And on the second day God created the heavenly hosts (29:1-3). And one of the archangels (Satanai) rebelled, and God cast him down (29:4 f.) from the heights. On the third day (30:1 2) God caused the earth to produce trees and herbs, and planted Paradise. On the fourth (30:3-5), he ordered great light to be in the various arch into one place, and made Venus, Mars, the Sun, Jupiter, Mercury, the Moon. . . On the fifth (30:7-15), he created the fish of the sea, and the fowl of heaven, and every thing that moveth on the earth, and on the sixth he made man from seven substances, and called him Adam, and showed him the two ways. While Adam was in Paradise he could see the angels in heaven (31); but Satan envied him and deceived him (32), and God established the eighth day (33:1-2), at the beginning of which time should be no more. The corruption of the earth and the deluge are then foretold, and the preservation of Noah (35). God bids Enoch return to the earth for thirty days and teach his sons during that time (36-38). Enoch admonishes and instructs his sons, tells them what he has seen, and gives utterance to nine beatitudes (39-42). He impresses on them the incomparable dignity of goodness—'none is greater than he who fears God' (43). They are not to revile the person of man, but to present their offerings; yet they must not value these unduly, but consider the heart from which they spring (44-46). Enoch gives his books to his sons (47); instructs them not to swear (49); and bids them in meekness accomplish the number of their days, and be open-handed to those in need (50 f.). Again he enumerates seven beatitudes and the woes which they are to undergo (52). The departed saints, he says, do not intercede for the living (53). At the close of the appointed time (55-59) Enoch again addresses his sons. He declares that no soul shall perish till the final judgment, and that the souls of beasts will then bring charges against the men who ill-treated them. Further instruction follows, as to sacrifice and man's duty to the needy, and warning against pride and lying (60-63). The people assemble in Achuzan to take leave of Enoch, who addresses them on various topics and exhorts them to faithfulness. He is then carried up to the highest heaven. His sons build an altar in Achuzan and hold high festival, rejoicing and praising God (64-68).

The value of the book, in elucidating contemporary

41. Value. and subsequent religious thought, may be exemplified by the fresh evidence it contributes on the following beliefs:—

1. *The millennium.*—This Jewish conception is first found in 32:3-32. From this its origin is clear. The account in Genesis of the first week of creation came in pre-Christian times to be regarded not only as a history of the past, but also as a sketch of the future of the world. Thus, as the world was created in six days, its history was to last 6000 years; for 1000 years with God are as one day (Ps. 90:4; Job. 4:30; 2 Pet. 3:8); and as God rested on the seventh day, so at the close of 6000 years there should be a rest of 1000 years—i.e., the millennium.

2. *The seven heavens.*—The detailed account of the seven heavens in this book has served to explain difficulties in the NT conceptions of the heavens, and has shown beyond the reach of controversy that the sevenfold division of the heavens was believed by Paul, by the author of Hebrews, and probably by the author of Revelation. On the Secrets of Enoch see also ESCHATOLOGY, § 75.

IV. THE ASCENSION OF ISAIAH.—This apocryph has come down to us in its entirety only in the Ethiopic **42. Ascens. Isa.**; version. It is a composite work, as we **its fortunes.** shall see; and two, if not three, of its constituents existed independently before their incorporation in the present work. Of these the oldest is undoubtedly 21-312 and 51-14, which contains an account of the martyrdom of Isaiah (cp ISAIAH, i. § 1, end). From this section, which is of Jewish authorship, seem to have been derived such statements as: 'they were sawn asunder, they were tempted, . . . they went about in sheepskins . . . being destitute . . . wandering in deserts and mountains' (Heb. 11 37f.; cp 210-12 31-2).

The next probable reference is in Justin Martyr (*c. Tryph.* 120), where he says: 'ye sawest (Isaiah) in twain with a wooden saw. So we find it in 51. In Tertul. (*De patientia*, 14) the reference is unmistakable, while in Origen the book or its matter is discussed; it is there called ἀποκρυφὸν Ἠσαίου, or simply ἀποκρυφόν (*Ep. ad Africanum*, 9; *id. Blatt.* 13 97 23 27; *In Isaiam homil.* 15). The first reference to the second part (6-11) is in Ephraim (*Haer.* 40 and 67 3), where we are told that certain heretics made use of this work, which he calls τὸ ἀρπακτικὸν Ἠσαίου, to support their opinions. Jerome speaks of an *Ascensio Isaiae*, and in the list of the Canon edited by Montfaucon and others it is called Ἠσαίου ὄρασις.

The various constituents of the book were written originally in Greek. Thus, in 419-21 63 6 is

43. Language. followed where it differs from the Hebrew. Of the Greek the greater part has come down to us in a MS found in the National Library in Paris, and edited by Gebhardt in Hilgenfeld's *Zeitschrift* (1878)—though it is not the original work, but a free recast and rearrangement of it (see below).

Translations from the Greek were made into Latin, Ethiopic, and Slavonic. Of the *Latin* version, 6-11

44. Versions. were extant in the sixteenth century and were printed at Venice in 1522, but had long been lost to view when Geseler re-edited them in 1832. Two other fragments, 214-313 and 71-10, were discovered and published in 1828 by Mai, though that editor was not aware that they belonged to this apocryph. Happily, as remarked above, the entire work has been preserved in *Ethiopic*, and on the whole faithfully, as we can infer from the Greek and the Latin fragments.

The sources of its corruptions are often immediately recognisable by retranslation into Greek. Thus in 9 35 the Ethiopic = 'qui se ad te advertit,' the Latin = 'precipiens.' The original of both is ἐπιτρέπω, as we find in the Greek; but the Ethiopic translator has followed an inappropriate meaning. That followed by the Latin translator is admissible; but the context requires the ordinary sense of ἐπιτρέπω = 'permitting.'

The Ethiopic version was first edited by Laurence in 1819 from one MS, and afterwards in 1877 by Dillmann from three MSS. To the latter edition are appended the Latin fragments. Next year, as we have already noticed, Gebhardt edited the Greek text. Although a free recast of our apocryph, it is very valuable for critical purposes, and in many respects confirms the critical acumen of Dillmann. Still there is need of a work which will give a text emended and corrected with the help of this Greek MS as well as of the Slavonic version and will deal more exhaustively with the different elements from which the apocryph is composed. This need Charles has tried to meet in his forthcoming work, *The Ascension of Isaiah*.

Ewald was the first to recognise the composite structure of this book, finding in it the works of three distinct authors. Subsequent criticisms,

45. Composite-ness. however, have only in part confirmed his analysis, and the best work as yet done in this direction is that of Dillmann. Dillmann's hypothesis is as follows:—There were originally two independent works: one, an account of the martyrdom of Isaiah (21-312 52-14), of Jewish origin; the other, the vision of Isaiah (6-11 23-40), of Christian authorship. These two works were next combined into one volume by a Christian, who supplied them with a prologue and an epilogue (1 1 f. 4b-13 11 4a f.). Finally,

when the book had assumed this shape, another editor inserted 1 34a 313-51 15 f. 11 2-22 41. This will do as a provisional hypothesis, but it is not final; and Gebhardt, Schürer, and Deane are wrong in saying that it is borne out by external testimony, averring that in the Greek work there is no trace of the sections 313-5 11 2-22. By a minute examination of the Greek certain phrases which imply the author's acquaintance with 313 17 48 11 19 are discoverable (see Charles, *op. cit.*). Thus the final editing was completed before the composition of the Greek legend. Further, since 313 is found in one of the Latin fragments published by Mai, this section (*i.e.*, 313-51) was already present before the Latin version was made. Too much stress must not be laid on the fact that 11 2-22 is represented in the Latin version by only a few lines; for it is characteristic of this version to abridge the text it is rendering.

The following is an outline of the contents of the book.

In the twenty-sixth year of his reign Hezekiah summons Manasseh in order to entrust to him certain writings touching the future of Israel. Hezekiah directs to Hezekiah

46. Contents. *Isaiah's martyrdom at the hands of Manasseh (17-13).* On the death of Hezekiah, Manasseh abandons the service of God for that of Satan; and thus, owing to the evils perpetrated in Jerusalem, Isaiah and other prophets withdraw into the wilderness (2). Thereupon Balkira, a Samaritan, accuses Isaiah and the prophets of professing evil things against the king's heart, and Isaiah has gained possession of the king's heart, the king sends and seizes Isaiah (3-12). There is a sudden break in the narrative here (the conclusion of the martyrdom of Isaiah follows in 52-14), to explain the reason of Berial's anger—viz., Isaiah's vision and the revelation in which he laid bare the future rule and destruction of Sammael, as well as the coming redemption by Christ. In fact, we have the history of the Christian Church summarised briefly from the coming of Christ to the New Testament persecution and the last judgment (313-51). In this short apocalypse we have the account of an eye-witness of the condition of the early Church, 50-80 A.D. Church organisation is still in its infancy; the rulers are called presbyters and pastors; bishops are nowhere mentioned. There are disputes about the second advent; prophecy has not yet disappeared; the vice and greed of the Christian teachers are conspicuously dealt with. The writer feels that the end is at hand. On 510 4, see above.

With 6 begins the vision which Isaiah saw in the twentieth year of the reign of Hezekiah; he discloses it to the king and to Josab his son. In this vision Isaiah is conducted by an angel through the firmament and the six lower heavens, and is shown the chief wonders in each (7 f.). Next he is raised to the seventh heaven, where he sees people, the righteous from Adam downwards. He is then told of the coming advent of the Beloved into the world, and of his crucifixion and resurrection. Finally, he sees the Beloved in the form of an angel, and likewise the Holy Spirit in the same form, and 'the Great Glory'—*i.e.*, God—worshipped by the Beloved and the Spirit (9). In 10, Isaiah hears God commissioning his Son to descend into the world, and thereupon follows an account of this descent. In the concluding chapter are revealed the birth of Jesus and the history of his life on earth down to his crucifixion and resurrection, and ascension through the seven heavens to his seat at the right hand of God.

The Martyrdom of Isaiah proper (21-312 52-14), which is of Jewish authorship, was written some time in the

47. Date. first century of our era; the Vision (6-11) probably about its close; and the apocalyptic section (313-51) *circa* 50-80 A. D.

For additional bibliography on this book, see Schürer, *Hist.* 5 143-148; C. Oulton, *The Ascension of Isaiah*.

V. THE BOOK OF JUBILEES.—The Book of Jubilees, which is really a haggadic commentary on Genesis, is important as being the chief monument

48. Book of Jubilees; its value. (practically the sole monument) of legalistic Pharisaism belonging to the century immediately preceding the Christian era.

Just as we have the other side of Pharisaism, its apocalyptic and mystical side, represented in the Book of Enoch, so here we have its natural complement in the hard and inexorable legalism to whose yoke, according to the author, creation was subject from the beginning and must be subject for evermore.

Jubilees is not only indispensable to students of the NT and of the history of the Pharisaic movement; it is likewise of first-class importance as a witness to the readings of the Hebrew text of Genesis about the

beginning of the Christian era. In this respect it comes next in worth to **6** and the Samaritan text, and presents us with much earlier readings than are to be found in the Syr. or Lat. versions, or in Targ. Onk. In the matter of determining the respective values of the Samaritan, **6**, and Massoretic chronologies its evidence will be practically of decisive weight.

This book has been variously named at different stages of its career. Its original name seems to have

been 'Jubilees,' and not the 'Book of Jubilees.' So we find it in the Syriac fragment, and likewise in Epiphanius, where it is designated $\tau\acute{\alpha}$ $\lambda\omicron\upsilon\beta\eta\tau\alpha$ $\eta\upsilon\alpha\iota\omega\tau\eta\varsigma$ or $\alpha\iota$ $\lambda\omicron\upsilon\beta\eta\tau\alpha\iota\omega\tau\eta\varsigma$.

It is also called η $\alpha\epsilon\tau\epsilon\tau\alpha$ $\epsilon\upsilon\sigma\epsilon\upsilon\alpha\iota\varsigma$ in Epiphanius, Syncellus, and others—a title pointing back to $\alpha\epsilon\tau\epsilon\tau\alpha$ $\epsilon\upsilon\sigma\epsilon\upsilon\alpha\iota\varsigma$. This name was given to it not because of its smaller bulk—for it is greater than that of the canonical Genesis—but on the ground of its inferior authority. Other variations of this title are $\chi\omicron\mu\omicron\upsilon\sigma\epsilon\upsilon\alpha\iota\varsigma$ and $\tau\acute{\alpha}$ $\alpha\epsilon\tau\tau\alpha$ $\epsilon\upsilon\sigma\epsilon\upsilon\alpha\iota\varsigma$. In the Abyssinian Church it is named the 'Book of the Division,' from the first words of the inscription at the beginning, and we find still other designations. Thus, in the decree of Gelasius, according to Rönisch's emendation, we find 'Liber de filiabus Adæ, hoc est Leptogenesis.' This name, as Ceriani observed, was given to the book because it contains the names of all the Patriarchs' wives and assigns them a prominent rôle in the course of events—a view that is confirmed by the Syriac fragment. Again, it seems to be identified by Syncellus with 'the so-called Life of Adam'— δ $\alpha\gamma\iota\omega\gamma\alpha\sigma$ $\beta\iota\omicron\varsigma$ $\alpha\delta\alpha\mu$ —for he cites as from that book three passages that occur in Jubilees. This *Life of Adam* may have been identical with a part of Jubilees, or a later enlargement of a portion of it. Jubilees is once described as the 'Testament of Moses,' and once as the 'Apocalypse of Moses,' but only by very late writers.

Such being the origin of Jubilees and the conditions under which it was produced, it was naturally written

50. Language. in the sacred language of Palestine. Of this we have direct testimony in Jer. *Ep.* 78, *ad Fabiolam*, *mansione* 18, where he discusses a Hebrew word for which he could cite no authority save that of this book. The entire cast and the idiom of the book confirm the statement of Jerome.

We have further testimony to the same effect in the title of the Syriac fragment, in which the present book is designated 'The Hebrew Book called Jubilees.' It is, further, impossible to deal with the textual corruptions unless we deal with them on this presupposition. In the case of many of these it is only necessary to retranslate them into Hebrew in order to discover the original misconception or misreading of the Greek translator. Some interesting transliterations of Hebrew words, moreover, still survive in the text.

Finally, fragments of the Hebrew original have come down to us embedded in the Midrashim. In these at times an entire sentence survives, preserving not only the words, but even their original order, as we can infer from the evidence of the versions.

There were probably four versions of Jubilees—Greek, Syriac, Ethiopic, and Latin. The first two were

51. Versions. made from the original Hebrew. Of the Greek only some fragments have come down to us in Epiphanius and through such annalists as Syncellus and Cedrenus. Of the Syriac only a small fragment, containing the names of the Patriarchs' wives and a few other facts, survives.

The Ethiopic and the Latin versions were made from the Greek version, not from the original text. The

52. Ethiopic. former survives almost in its entirety, and from an exhaustive comparison of the best attainable text with all existing materials we find that it is most accurate and trustworthy. It is, indeed, as a rule, servilely literal.

It has, of course, suffered from the corruptions naturally incidental to transmission through MSS; but it is singularly free from the glosses and corrections of unscrupulous scribes, though the temptation to bring it into accord with the Ethiopic version of Genesis must have been great. Only in about a dozen instances did the temptation prove too great, with the result that changes were introduced into the text in subservience to that version.

Of the Latin version (made, as we have seen, from the Greek) more than a fourth has been preserved.

53. Latin. First published in 1861 by Ceriani (*Mon. sacra et prof. tom.* 1, fasc. 3, pp. 15-62), it was next edited with great learning by Rönisch in 1871 (*Das Buch der Jub. unter Berufung d. recensionen Testes der . . . lat. Fragmente*). Rönisch

emended the text in many passages; but as he was not aware that it had been corrected in conformity both with **6** and with the *Vg.*, and as, further, he had only a late representative of the Ethiopic version before him, his work is defective and far from final. A critically revised text of these fragments is given in Charles's edition of the Ethiopic text.

The Ethiopic MSS, of which there are four, belong respectively to the National Library in Paris (A), the British Museum

(B), the University Library in Tübingen (C), and to M. d'Abbadie (D). B is by far the

54. Text of most valuable; next in value comes A; and D are late and very corrupt. In addition to these MSS, however, there is a vast wealth of materials for the criticism and reconstruction of the text in the Mas. and Sam. Texts, and in the Gr., Syr., Aram., and Lat. versions of Genesis; and in the fragments of the Greek, Syriac, and Latin versions of Jubilees mentioned above; and in abundant other documents of a less directly serviceable nature. (a) *The Ethiopic Text* has been edited twice—first by Di. in 1859 from two MSS (C, D), and next, by the present writer from A, B, C, D.¹ Though Di. made no use of the critical materials just enumerated in the formation of his text, and it was, accordingly, in no sense a critical edition, it was a great boon to scholars at the time. (b) *Three translations* have appeared: the first by Di. in 1850 from one MS (*i.e.*, C); the second by Schwöbe (*Bibl. Sacra*, 1885) from Di.'s edition of the text; and the third by the present writer (*JQR*, 1894, 1895) from the text published in 1895 referred to above.

Jubilees cannot have been written later than 70 A.D.; for the temple is throughout supposed to be standing.

55. Date. As the book repeatedly uses Enoch (1-36 72-104), it cannot have been written much before 60 B.C. Though there is some evidence that would place it nearer the earlier than the later date, we shall leave the date undefined for the present.

The author was a Palestinian Jew and a Pharisee.

Frankel's view (*MGWJ*, 1856, pp. 311-316, 380-400) that it was written by a Hellenistic Jew belonging to Egypt is rendered untenable by the fact that it was written originally in Hebrew. Nor can the writer have been a Samaritan, as Beer supposes (*Das Buch der Jub.*, 1855; $\lambda\omicron\upsilon\beta\eta\tau\alpha$ $\eta\upsilon\alpha\iota\omega\tau\eta\varsigma$ $\alpha\iota$ $\lambda\omicron\upsilon\beta\eta\tau\alpha\iota\omega\tau\eta\varsigma$, 1857); 57, whereas the text agrees in turn with MT, **6**, Syr., *Vg.*, with Onkelos, and even with the Ar. against all the rest, it never, strange to say, agrees thus with the Samaritan. This evidence is conclusive in itself; but we might further observe that, in speaking of the four places most favoured of God in all the earth, the author enumerates Eden, Sinai, Zion, and the mountain in the East, but not Gerizim. Again, that he is not a Sadducee is proved by the fact that he believes in angels and in the immortality of the soul. Nor, finally, was he an Essene; for, though some characteristics (a highly-developed angelology, the doctrine of the immortality of the soul without the resurrection of the body, the exaggerated reverence for the Sabbath and the number seven) would seem to argue an Essene origin, such an origin is absolutely precluded by the enforcement of animal sacrifice and the absolute silence as to the washings and purifications that were of such importance among the Essenes. Thus, though in some legal questions of less moment (Beer, *Das Buch der Jub.*) the author's views are at variance with traditional Pharisaism, in all essentials he is emphatically a Pharisee of the Pharisees.

That Palestine was the home of the author is deducible

in the first instance from the language in which he wrote. A Hellenistic Jew would not have written in Hebrew. Again (not to press other details), the duty of absolute separation from the heathen, which is repeatedly enforced, would have been impossible of fulfilment for any Jew outside Palestine.

There are several lacunæ in the book; but as far as evidence is forthcoming, these seem to be slight. It appears, on the other hand, to be free from interpolations.

A curious phenomenon, however, presents itself in chap. 7. Verses 20-39 seem to be an extract from the Book or Apocalypse of Noah, beginning in an indirect form with *v.* 20 and changing into the direct with *v.* 26, whence to the end Noah admonishes his sons in the first person. These verses are similar to the Noachic interpolations in the Book of Enoch (see above, § 24).

The contents of Jubilees may be briefly described as a haggadic commentary on the biblical text, from the creation of the world to the institution

57. Integrity. of the Passover, in the spirit, and from the point of view, of later Judaism. Its aim is to prove the everlasting validity of the law. The work assumes the form of a revelation to Moses, made on Mt. Sinai by the 'angel of the presence' in the first year

58. Contents and character.

of the Passover, in the spirit, and from the point of view, of later Judaism. Its aim is to prove the everlasting validity of the law. The work assumes the form of a revelation to Moses, made on Mt. Sinai by the 'angel of the presence' in the first year

¹ *The Eth. Vers. of the Heb. Book of Jubilees*, ed. from four MSS. R. H. Charles, M.A., 1895. Clar. Press, Oxford.

of the Exodus. The author thereby seeks to secure a divine sanction for the additions he makes to the biblical narrative. Among these the most important novelty is his chronological system.

In this system the basis of reckoning is the jubilee period of forty-nine years. This jubilee period is subdivided into seven year-weeks of seven years each. Hence, in order to date any event exactly, the author determines it as occurring on a certain day of a certain month of a certain year in a certain year-week of a certain jubilee period. Fifty of these jubilee periods are assumed as the interval between the creation and the entrance of the Israelites into Canaan. His year strangely consists of fifty-two weeks (i.e., 364 days), and, in opposition to the Pharisaism of his time, he claims that the year should be regulated by the movements of the sun without reference to those of the moon. The dates assigned to the various events, though presenting many difficulties, favour in the main the Samaritan chronology.

Another object of the author is to carry the Jewish cultus back into the patriarchal or even pre-Adamic period.

Thus we are given to understand that the angels observed the rite of circumcision; while, as regards the great annual festivals, the Feast of Weeks was observed by Noah and Abram, the Feast of Tabernacles was first celebrated by Abram about the time of the birth of Isaac, and the Day of Atonement was established by Jacob in memory of the loss of Joseph. Again, the law regarding the purification of women after childbirth (Lev. 12) is traced to the time that Adam was created in the first week and Eve in the second; to this is due the command 'Seven days for a man-child and two weeks for a maid-child.'

Certain variations from the prescribed ritual are observable in relation to the festivals. Thus, the injunction of fasting on the Day of Atonement and the exclusion of the uncircumcised from Tabernacles there is no reference to the custom of drawing water from the pool of Siloam and pouring it out upon the altar. Though in the last instance the author agrees with the Sadducees, it must be admitted that the practice was a Pharisaic innovation and that the Sadducees had the law on their side.

Another notable characteristic of the work is the increased rigour of many of the Levitical ordinances.

Thus, the man who eats food is to be utterly destroyed, and the father who gives his daughter, or the brother who gives his sister, in marriage to a heathen, is to be stoned to death, and the woman to be burned. Death is to be the universal penalty for breaking the Sabbath; and the Sabbath is broken by buying or selling, by lighting a fire, by drawing water, by talking of an intended journey, or by lying with one's wife.

Another no less interesting characteristic is the care either to leave unrecorded or to palliate the faults of the Patriarchs as well as to multiply their virtues.

Thus, from the first they were scrupulous observers of the ritual and ceremonial law before its authoritative promulgation on Sinai. There is no mention made of Abram's deceit at the court of Pharaoh; Jacob's answer to Isaac's question 'Art thou my very son Esau?' is cleared from verbal falsehood by representing him as answering 'I am thy son.' This quibble is found likewise in the Talmud, and may therefore have been a stock interpretation of Jewish exegesis. Again, whereas in Genesis Levi is cursed for his share in the destruction of Shechem, in Jubiles he is highly honoured for the same action and his posterity elected to an everlasting priesthood. We find the same view taken by Philo (*De Hebriæte*, 23).

Akin to the aim just described is the attempt to justify from the standpoint of a later age the severities practised by Israel in their conquest of Canaan.

It is a Jewish prototype of Rousseau's Social Contract. Thus it is represented that, in the presence of an angel, Noah divided the earth by lot amongst his three sons, and bound them and their successors by the most sacred oaths to observe the arrangement. Destruction was invoked on the head of him who transgressed it. According to the sequel, Canaan seized upon Shem's inheritance; and thus our author justifies the extermination of his descendants by Israel.

As has already been pointed out, though the immortality of the soul is taught, there is no resurrection of the body. In the restored theocracy that is foreshadowed there may be a Messiah. See, further, ESCHATOLOGY, § 72.

For the literature of this book see Ritsch, *Das Buch der Jub.* 422-439; Schürer *in loc.*; Charles, *The Book of Jubiles*.

VI. THE ASSUMPTION OF MOSES.—Of this book, which from the twelfth century was regarded as lost, a

69. Assumpt. Mos. : its fortunes. large fragment was rediscovered by Ceriani in the Ambrosian Library in Milan and published by him in 1861 (*Mon. tom. i. fasc. i. pp. 55-64*). This fragment was part of an old Latin version, and is written on a palimpsest of the sixth century—the same

MS that contains the Latin version of *Jubiles*—which originally belonged to the monastery of Bobbio.

Before this discovery, however, we were, from various sources, in some degree acquainted with the contents of the book.

Thus, the account of the strife between the archangel Michael and Satan about the body of Moses was drawn, as we know (Origen, *De Princip.* 3.2.1), from the apocryphal book entitled the *Assumptio Moysis*, κατὰ τὸν Μωϋσῆν. Many other witnesses testify to the existence of this apocryph. Besides the references already noticed in Origen, there are other references or citations in Clem. Alex. (*Strom.* 1.23.153 0.15.132); in Origen (*In Joannem* *ibidem* 21.), Didymus Nov. (*In ep. Joh. omnes*), in Gallandi, *ibidem*, (*Patr.* 6.399), in Evodius, Apollinaris, the Stichometrist, and in the *Acta synodi Nicænæ*, 1.10. The most reference must be given in full as the passage quoted is found in Ceriani's fragment. — ΜΕΛΛΟΝΤΟ ΠΡΟΒΟΛΕΘΕ ΜΩΥΣΗΣ ΕΙΣ ΤΟΝ ΟΥΡΑΝΟΝ, ΩΣ ΥΠΕΡΑΣΤΕΝ ΟΙΣ ΠΙΣΤΟΙΣ ΑΝΘΡΩΠΙΝΟΝ ΜΟΡΤΑΛΟΝ, ΠΡΟΚΑΤΑΡΚΗΤΟΝ ΤΗΝΟΥ ΤΟΥΤΟΥ ΝΑΟΥ ΚΑΙ ΔΙΑΚΟΝΟΥΣ ΤΑΙΣ ΑΝΤΙΟΧΙΑΙΣ ΕΠΙ ΤΗΣ ΠΡΟΒΟΛΗΣ ΤΑΙΣ ΜΕ ΟΘΕΙΣ ΠΡΟΣ ΚΑΤΑΒΑΣΕΙΣ, ΚΑΤΑΝΟΟΝΤΑΣ ΜΕ ΤΗΣ ΔΕΘΕΟΥΣ ΑΙΤΙΩΣ ΜΟΡΤΑΛΟΝ. The words quoted are thus rendered in the Latin fragment (*Text. Latine exogitatus et invenit me, qui alio initio orbis terrarum preparatus sum, ut sim arbiter testamenti illius. The rest of the quotations are in the main from the part of this book which is lost.*

Of the derivation of our Latin text from the Greek there can be no question. Thus Greek words are transliterated; as *chedrio* from κεδρία 17,

60. Latin based on Greek. *heronius* from ἡρωναῖος 3.1.1, *lethi* from ἄλγος 37, and *acretio* from ἀκρητοῦ 8.1.

Again, we are not infrequently obliged to adopt not the Latin text but the Greek it presupposes, which has been misrendered by the translator. Thus 'ab oriente usque ad occidentem,' which means 'from the east to the west,' is derived from ἀπὸ ἡλίου ἀνατολῆος μέχρι δύσεως, which means also 'from sunrise to sunset'—the meaning required by our context. For similar instances see 11.1.18. Finally, retranslation into Greek makes it evident that in the case of some corruptions in the Latin the error arose through the confusion of different though similar forms of words: cp 27.34.56.11.6. In 41 we have the Greek article rendered by *hic*.

The derivation of our text from a Semitic original was stoutly denied by Volkmar, Hilgenfeld, and others.

61. Hebrew original. This position, however, can no longer be persevered in. A Semitic original must now be conceded. It remains a matter of debate whether the balance of evidence is in favour of an Aramaic or of a Hebrew source. Rosenthal decides for the latter; Schmidt-Merx, Colani, and Carrière for the former. Notwithstanding all that has been advanced by these three scholars, however, in support of their contention, the evidence points decidedly in the direction of a Hebrew original.

Rosenthal restores three or four passages by means of retranslation into Hebrew. In Charles's *Assumption of Moses* (1897) the necessity of such an hypothesis is shown alike in the Hebrew character of the Latin version and in the possibility of removing most of its corruptions by means of retranslation into Hebrew. Thus in 6.36 we must follow the Hebrew presupposed by the Latin; next, in 6.4 there is a play upon words possible only in the Hebrew; again, there are Hebrew phrases and constructions retranslated into Latin. Hebrew that we can understand the text or get rid of its corruptions in 4.9.5.10.9.10.12.7.

Schürer has already pointed out (*Hist.* 32.) that the Latin version we possess is in reality a 'Testament of

62. Real name Test. Moses. Moses,' although quoted in the Acts of the Council of Nicea as the *Ἀποκάλυψις Μωϋσέως*, and has conjectured that 'these designations were the titles of two separate divisions of one and the same work, the first of which has been preserved, whereas the quotations in the Fathers almost all belong to the second.' The present writer's studies tend in some degree to support this conjecture.

Thus in the Latin version (1.15 and 10.13) Moses' death is stated in 10.12 before it was interpolated by the editor who joined the 'Testament' and the 'Assumption of Moses' into one book. Thus in 10.12 the text is: 'erunt enim a morte-receptione-m(e) usque ad adventum Illius tempora CCL.' Schmidt-Merx omits 'morte,' and Hilgenfeld omits 'receptione,' these critics failing to see that 'receptione' was introduced by the final

editor into the text of the 'Testament' which recounted nothing of Moses' Assumption, in order to prepare the reader for the main subject of the added work, the 'Assumption of Moses.'

Schürer apparently assumes that both the 'Testament' and the 'Assumption' were from one and the same author; but the facts stated above are against this supposition. The Latin fragment is the *Διαθήκη Μωσέως* mentioned in the Stichometry of Nicephorus. It is there said to consist of 1100 lines. Of these about half have survived. Some writers have sought to identify this 'Testament' with the Book of Jubilees. This is impossible. Since 4300 lines are assigned to Genesis in Nicephorus' Stichometry, this 'Testament of Moses' would have above 5000 or 6000 if it were the Book of Jubilees, for the latter is much longer than Genesis.

About one-half of the original Testament has been preserved by our Latin Version.¹ It is possible that the latter half dealt with certain revelations about creation made by Moses, and that it closed with his disappearance in a cloud, so that his death was hid from human sight.

63. Lost portion.

We make this conjecture on the ground of the following statement in an old Catena on the Pentateuch (Fabric. *Cod. Pseud. V. T.* ii. 121-122). 'Est quidem in apocrypho mysticoque *επιθυμω λεγετο. ubi de creatis rebus subitaneus actus, nubes lucidam, quo tempore mortuus est Moses, locum sepulchri complexam oculos circumstantium perstrinxisse ita, ut nullus neque morientem legislatorem neque locum videre poterit, ubi cadaver conderetur.'* On the 'bright cloud' see also Jos. *Ant.* iv. 849.

On the question of the date of the Assumption of Moses the opinions of critics oscillate between the death of Herod the Great and the death of

64. Date. Bar-Cochba. The latter date is impossible. Ewald, Wieseler, Drummond, Dillmann, and Schürer assign it to the first decade after Herod's death; Hilgenfeld assigns it to 44-45 A.D.; Merx to 54-64 A.D., and so also Fritzsche; Baldensperger to 50-70 A.D. On various grounds all these determinations are unsatisfactory. The real date appears to lie between 4 B.C. and 30 A.D. It cannot be later than 30 A.D. Towards the close of chap. 6 it is stated that the sons of Herod should reign for a shorter period (*breuiora tempora*) than their father—a statement that could have been made only while they were still living, since it is true of Archelaus alone; for Antipas reigned forty-three years, Philip thirty-seven, and Herod himself only thirty-four. The book must, therefore, have been written at the latest less than thirty-four years after Herod's death (4 B.C.)—i.e., earlier, at all events, than 30 A.D. The limits may, however, be defined more closely; for the prediction that Herod's sons should rule for shorter periods than their father, may owe its origin to the general expectation that the sons of such a wicked king could not long preserve their authority, but still more to the actual deposition of Archelaus in 6 A.D.—an event that would naturally be construed by our author in the light of a divine judgment and suggest to him the prediction that appears in the text as to the impending fate of Philip and Antipas. Hence the earliest limit of composition is 7 A.D.

As for the author, he was not a Sadducee; for according to chap. 10 he looks forward to the establishment of the Messianic kingdom by God in

65. Author. person. Nor is it possible, with Wieseler and Schürer, to regard him as a Zealot; for (1) there is not a single incentive held forth to encourage men to take arms in behalf of the theocracy; (2) the actual advent of the kingdom is brought about, not by any action of the righteous in Israel, but

by the archangel Michael (10:2) and God himself (10:3-7); (3) the author's ideal of duty as regards preparation for the Messianic kingdom is that depicted in 9—i.e., absolute obedience to the law and non-resistance. The faithful Israelite was quietly to do his duty and await God's will. The writer, accordingly, glorifies the old ideals cherished and pursued by the Hasid and Early Pharisaic party, which the Pharisaism of the first century B.C. had begun to disown in favour of a more active rôle in the life of the nation. See § 81. God would in his own good time interpose in person (10); at all events, he would avenge the death of his servants (97). Our author pours the most scathing invective on his religious and political opponents, the Sadducees, whom in 7 he describes in terms that frequently recall the anti-Sadducean Pss. of Solomon. (Through some inexplicable misapprehension, Schürer and others have regarded this chapter as a description of the Pharisees.) The author, therefore, was a Pharisee, and a Pharisee who was the antithesis of the Zealot exactly in those respects in which Pharisaism differed from Zealotism. His book was designed as a protection against the growing secularisation of the Pharisaic party through its adoption of political ideals and popular Messianic beliefs. To guard against the possible suggestion of an Essene author, we may remark that such a derivation is absolutely precluded by the recognition of animal sacrifices, by the declaration of the speedy coming of the Messianic or Theocratic kingdom, and by the strong sense of national life, unity, and triumph. See Charles's *The Assumption of Moses*, pp. 51-54; and cp *ESCHATOLOGY*, § 73.

The following is an outline of the contents of *Ass. Moses* 1:1-9: Introduction. 10:1-12 Moses tells Joshua that he is about to die, and commits certain books of prophecy to his safe keeping. In 2f. the subsequent history

66. Contents. of Israel down to the captivity is briefly but clearly outlined. In their captivity the tribes remember that all that had befallen them had already been foretold by Moses. In 4, owing to the prayers of one who is over them (Daniel), God will take pity on them and raise up a king (Cyrus) who will restore some fragments of their tribes to their own land. These will mourn because of their inability to sacrifice to the God of their fathers. Judgment (5) will overtake their oppressors (the Seleucid kings). Yet they themselves (the Sadducees and the Hasids) will be divided as to what is true, and the altar and temple will be defiled by men who are not priests (as Menelaus, who was a Benjamite), but slaves born of slaves (5:2-4) (the pagansising high-priests who were nominees of the Seleucidae) and many of them (the Sadducean priesthood and aristocracy), moreover, will be respecters of persons and unjust, and their country will be filled with unrighteousness (5:5-6). Then (6:1-5) a fresh vengeance will alight upon them, in which the king of kings (Antiochus) will crucify those who confess to their circumcision, and force them to bear on their shoulders impure idols, and to blaspheme the word 'A man of the tribe of Levi (9:17), whose name is Taxo (i.e., Eleazar [2 Mac. 6:19]; for, as Burkit has discovered, Taxo is a mistake for Taxoc=ταξος=תקסן which by gematria=תקסן), will say to his seven sons: 'Let us fast three days, and on the fourth let us go into a cave which is in the field and die, rather than transgress the commands of the God of our fathers.' In 6:7 we are told of the assumption of royal power by the Maccabees, and of Herod as their successor who is to reign for thirty-four years (8). He will beget sons, who will reign as his successors, but for shorter periods. Then follows (8:8f.) the capture of Jerusalem by a king of the west (Varus). Soon after, Judaea becomes a Roman province. The author next launches out into a scathing denunciation of the Sadducees, of whose injustice, greed, and gluttony we have an account in 7. Thereupon (10:1-10) the times are filled, and God appears to judge the enemies of Israel (10). Moses is then represented as exhorting Joshua to guard these words and this book (10:11). When Joshua deprecates his inability to lead Israel (11), Moses bids him not to depreciate himself and not to despair of the future of his people (12). Here the fragment ends.

Ceriani, *Mon. Sacr.* vol. 1. fasc. 1 (1861); Hilgenfeld, *Messias Judaeorum* (1869), 435-438, cp *Prot.* 70-76, and *Revue de Rome, Égée.*

67. Biblio- *Mose Prophetie und Himmelfahrt* (1867); Schmidt graphy. and Merx (*Archiv f. wiss. Erforschung des Apoc. VT* (1871), 700-730; cp *Prot.* 32-36; Fritzsche, *Libri Apoc. VT* (1871), 700-730; cp *Prot.* 32-36; Drummond, *The Jewish Messiah* (1877), 74-84; Baldensperger, *Das Selbstbewusstsein* (1888), 29-31, 114-118; Deane, *Prophetie* (1891), 255-259; Schürer, *Ant.* 1:258-261; Charles, *The Last Man* (1897). For complete bibliography, see the two works last mentioned.

¹ It is to be remarked that we have in this Latin Fragment a clear instance of dislocation of the text. The perception of this fact removes some of the main difficulties in the way of interpretation. In order to recover the original order, we have to restore 8 f. to their original position, before 6. For the grounds of this restoration of the text, see the present writer's edition of the book.

VII. THE TESTAMENTS OF THE XII. PATRIARCHS.—
 The earliest reference to this book by name is in
68. Test. xii. Origin in his *Hom. in Josiam*, 156 (Ed.
 Patr.; its fortunes.
 Lommatzsch 11 144): 'In aliquo quodam
 libello qui appellatur testamentum duo-
 decim patriarcharum, quamvis non habeatur
 in canone, talem tamen quandam sensum invenimus,
 quod per singulos peccantes singuli Satanæ intelli-
 geantur' (cp Reuben 3). It is possible, indeed, that in
 the preceding century the ideas of *Fragment 17* in
 Sieren's edition of Irenæus (1 836-837) are derived
 from this book—εξ ὧν ὁ Χριστὸς προσηγορεύθη καὶ
 ἐπερυσσάθη καὶ ἐγέννηθη· ἐν ἑνὶ γὰρ τῶν ἰσχυρῶν προσηγο-
 ρασιῶν· ἐκ δὲ τοῦ Αἰεὶ καὶ τοῦ Ἰουδα τοῦ κατὰ σάρκα, ὡς
 βασιλεὺς καὶ ἱερεὺς ἐγέννηθη· δὲ δὲ τοῦ Σιμωνος ἐν τῷ
 παρ' ἐπερυσσάθη. . . δὲ δὲ τοῦ Βενιαμιν, τοῦ Παύλου,
 εἰς πάντα τὸν κόσμον κηρύχεται ἑδοξάσθη. This con-
 junction of Simeon and Levi is found in Sim. 7; Lev.
 2; Dan 5; Gad 8; Jos. 19; Benj. 11. Since, how-
 ever, it is now demonstrable that the Christian elements
 in the Testaments are due to interpolation, it is not
 possible at the present stage of criticism to determine
 the relative chronology of these elements and the
 writings of Irenæus.

The passages in Tertullian *Adv. Marc.* 51, *Scorpiace* 38,
 which most critics from Origen onwards have regarded as based
 on Benj. 11, are due, as Schürer has already recognised, simply
 to the patristic interpretation of Gen. 49 7. This eleventh chap.
 of Benj., which contains the striking account of Paul, is not
 found in the Armenian version, and is for the most part wanting
 in the Greek MS R. On these and on other grounds we may
 safely regard it as one of the latest of the Christian inter-
 polations.

There is possibly an allusion to this book in the con-
 temptuous words of Jerome, *Adv. Vigilant.* 6. The
 Testaments are next mentioned in the Stichometry of
 Nicephorus, in the *Synopsis Athanasii* as well as in the
 anonymous list of books edited by Montfaucon, Petra,
 and others. In these lists the book is simply called
 Πατριάρχαι. After this date the Testaments are lost to
 knowledge till their reappearance in the thirteenth
 century, when Robert Grosseteste, Bishop of Lincoln,
 translated them from Greek into Latin. The MS
 from which the translation was made is the tenth
 century Cambridge MS of this book (Sinker). This
 Latin version was the parent of almost all the European
 versions.

The work consists, as its present title indicates, of
 the dying commands of the twelve sons of Jacob to their
 children. Each Testament deals with a fresh

69. Title. and special side of the ethical life, with some
 virtue or vice which finds apt illustration in the life of
 the particular patriarch. Thus, according to the titles
 in Sinker's text, Simeon deals with the vice of envy,
 Zebulun with compassion and mercy, Dan with anger
 and lying, Gad with hatred, Joseph with chastity, and
 Benjamin with a pure mind. These titles are appropri-
 ate; but in manuscripts O and R all mention of
 the virtues and vices is omitted; in P they are
 generally wanting, and when they are given they differ
 in all but two instances from Sinker's text, while in the
 Armenian version they are wanting in Simeon, Issachar,
 Zebulun, and Benjamin; for 'concerning chastity' in
 the title of the Test. Joseph we have 'concerning envy';
 they differ in the case of Levi, Gad, and Asher; only
 in the case of Judah do they give a divided support
 to the Cambridge MS, which Sinker follows. We may,
 therefore, regard the title of each Testament as origi-
 nally consisting of the word *Διαθήκη*, followed by the
 name of the patriarch to whom it was attributed. It
 is possible, moreover, that the title was originally still
 shorter—i.e., as we find it in the Oxford MS, merely the
 name of the patriarch. The fact that in the Sticho-
 metry of Nicephorus and in the Synopsis Athanasii,
 as well as in the anonymous list of books edited by
 Montfaucon, Petra, and others, this book as a whole
 is designated simply *Πατριάρχαι* points in the same
 direction; and this evidence is the more weighty since

the adjoining books in these lists have their full titles
 given. This supposition receives further support from
 the initial words of the Testaments themselves. In the
 case of seven of the Testaments the contents are simply
 described as the λόγοι of the Patriarchs, which they
 spake or ordained (λαλεῖν, εἰπεῖν, or διατίθεσθαι) before
 they died. It is only in the case of the remaining five
 that each is described as a διαθήκη which the patriarch
 spake, enjoined, or ordained (λαλεῖν, εἰπεῖν, ἐντέλλεσθαι,
 διατίθεσθαι). It is probable, therefore, that the original
 title of the entire book was 'The Twelve Patriarchs.'

In the next place, it is noteworthy that in each of the
 Testaments three elements are distinguishable. (1) In

70. Contents. each instance the patriarch gives a brief
 or detailed account of his life, in which his
 particular virtues or vices are vigorously emphasised.
 The biblical notices of his life are expanded and en-
 riched after the manner of haggadic Midrash. In a
 few instances their place is taken by materials that
 conflict directly with the biblical narrative. (2) The
 patriarch next proceeds to press upon his children a
 series of exhortations based upon and naturally sug-
 gested by the virtues or the vices conspicuous in his
 own career; they are to imitate the one and to shun
 the other. (3) Finally, the patriarch gives utterance to
 certain predictions which bear upon the future of his
 descendants, and the evils of overthrow and captivity
 which they will entail upon themselves by their sins and
 apostasies, and their breach with the tribes of Levi and
 Judah. These predictions are generally (a) of purely
 Jewish authorship; but many are (b) distinctively
 Christian.

To account for the difficulties which confront us in
 this work, Grabe (*Christ. Patr.* 171 1), 172-174

71. Com- 335-374) was the first to suggest that a
 positiveness. book was written by a Jew and subse-
 quently interpolated by a Christian. This
 hypothesis was for the time so successfully combated
 by Corrodi (*Krit. Gesch. des Chiliasmus*, 210-110) that
 most subsequent writers, such as Nitzsch, Lücke, Ritschl,
 Vorstman, Hilgenfeld, Dillmann, and Sinker, have
 practically ignored the question of the integrity of the
 book and confined themselves mainly to the discussion
 of the religious and national affinities of the author.

Nitzsch (*Die Test. xii. Patriarcharum*, 181 1), 182-184, Witten-
 berg, 1810) describes the author as a Jewish Christian of Alex-
 andria who had imbibed many of the Essene doctrines that were
 then current. Ritschl (*Entwickel. der alttestam. Archæol.* 1, Aufl.
 322 ff) assigns the book to a Gentile Christian, appealing
 principally to Benj. 11 (a chapter really due to Christian inter-
 polation; see § 68). Ritschl's view was vigorously assailed by
 Kayser (*Die Test. d. zwölf Patr.*, in Reuss and Cunitz's *Beitr.
 zu den theol. Wissenschaften* 1751, 307-340), who, on several
 grounds derives the book from Ebionitic circles, reviving on a
 large scale Grabe's theory of interpolation in order to arrive at
 this result. Kayser's treatise was in turn examined by Vorstman
 (*De Test. xii. Patriarcharum origine et pratice*, 1857), who,
 after a detailed criticism of Kayser's arguments, concluded that
 the Testaments present no trace of Ebionism, but were the work
 of a Gentile Christian. Hardly had Vorstman thus vindicated
 the view of Ritschl when a second edition of this scholar's
 work (see above) appeared, in which his former contention
 (pp. 175-177) was abandoned as impossible, and the theory of a
 Nazarene authorship was advocated. Ritschl's first view, how-
 ever, has received the continued support of Hilgenfeld (*ZfW* 7
 [1838], 395 ff. [1871] 300 ff.), while Lamgen (*Das Judentum in
 Pal. zur Zeit Christi*, 140-157) and Sinker (*The Test. xii. Patr.*
 [1869], 16-34; art. 'Test. xii. Patr.' in Smith's *Dictionary of
 Christian Biography*, 4 885-874) hold fast to the theory of a
 Jewish Christian authorship.

If there were no other methods of determining the
 questions of authorship and date than those pursued by
 Nitzsch and his successors, finality or even progress
 in such matters would be a sheer impossibility. To
 Schnapp (*Die Test. der xii. Patr. untersucht*, Halle,
 1884), however, is due the credit of lifting the criticism
 of this book out of the arena of fruitless logomachies by
 returning to Grabe's hypothesis of Christian interpolation
 of an originally Jewish work. Schnapp's theory is that
 in its original form the book consisted of biographical
 details respecting each of the patriarchs and of exhorta-
 tions suggested by these details. Thus the work com-

in Hebrew. The additions of the Jewish interpolator were, as far as I have examined them, in the same language. Christian interpolations were introduced at the close of the first century of the Christian era, and some probably as late as the third or the fourth.

The earliest versions were the Greek, the Syrian, and the Armenian. Of the *Armenian* version only a fragment survives, preserved in the British Museum (*lit. et. of Syrian MSS.* 800-804). Of the *Armenian* version six MSS. varying in date from 1625 to 1707, are in Venice (in the Library of the Mechitarists of San Lazzaro); one, of 1388, in Vienna; another, of the fourteenth century, in the library of Lord de la Zouche; and a ninth, in the possession of the British and Foreign Bible Society. An edition of the Armenian version by the Mechitarist Fathers is soon to issue from the press. No trace has as yet been discovered of a *Latin* version anterior to that of Grosteste in the thirteenth century. This version and the later European versions are of no critical worth. There is also an old *Slavonic* version published by Tichonraw in the *Denks. der altruss. Apocri. Lit.*, St. Petersburg, 1863.

Four¹ of these MSS have already been made known to the public: the Cambridge MS of the tenth century, and the Oxford MS of the fourteenth, through Sinker's edition of the Greek text; the Vatican MS of the thirteenth and the Patmos MS of the sixteenth, through the Appendix he published in 1870. These four MSS are designated by their editor respectively as C O R P, and this notation has been followed in the present article.

It has already been observed that the process of Christian interpolation probably extended from the close of the first century A.D. to the fourth.

75. Date. As regards the apocalyptic sections (see ESCHATOLOGY, § 61), which are due to a Jewish interpolator, we have no means at present of determining their date with any exactness. Some of them are the oldest portions in the book, and were probably written in the second century B.C.; but some of them are very much later, since they contain citations from the Ethiopic and the Slavonic Enoch. As far as the present writer has examined them, he is inclined to regard them as all springing from a Hebrew original. The date, therefore, of these interpolations may possibly extend from the second century B.C. to 30 A.D. It may be added, partly on the evidence of the Armenian version and partly from the context, that it is clear that in Levi 15, Judith 23, and Dan 5, there are no references to the Roman destruction of the temple in 70 A.D. The groundwork may have been written about the beginning of the Christian era. We can hardly suppose it to be based upon Jubilees, for it never mentions it; yet, since it possesses in common with it a vast mass of biographical details as well as the same chronological system, it is natural to regard both works as almost contemporary and as emanating from the same school of thought.

No attempt has been made to give a systematic statement of the Christology, since the passages relating to this subject are derived not from one writer or period, but from a variety of scribes and times. The value, therefore, of the Christological portions in this book is slight.

76. Christology. VIII. THE PSALMS OF SOLOMON.—Very little is known of the early history of these psalms. Only six direct and undoubted references to them are found in early literature.

77. Pas. Sol.; its fortunes. Four of these occur in catalogues of canonical and uncanonical books—viz., in the *Synopsis Athanasii*, the Stichometry of Nicephorus, the 'Sixty Books,' and the table of contents in the Alexandrian MS. The fifth reference is found in the fifty-ninth canon of the Council of Laodicea, which ordains *ὅτι οὐ δεῖ θρησκείας ψαλμοὺς λέγεσθαι ἐν τῇ ἐκκλησίᾳ, οὐδὲ ἀκούεσθαι θύβαν, ἀλλὰ μόνον τὴν κωνσταντῆν καὶ παλαιὰν καὶ κωνσταντινουπόλεως. ἡ δὲ ἕκτη ἀναγιγνωσκέται ἐν τῇ ἐκκλησίᾳ καὶ κωνσταντινουπόλεως.* The sixth belongs to the twelfth century, and consists merely of a note on this canon. With doubtful references we have here to concern.

Four of these occur in catalogues of canonical and uncanonical books—viz., in the *Synopsis Athanasii*, the Stichometry of Nicephorus, the 'Sixty Books,' and the table of contents in the Alexandrian MS. The fifth reference is found in the fifty-ninth canon of the Council of Laodicea, which ordains *ὅτι οὐ δεῖ θρησκείας ψαλμοὺς λέγεσθαι ἐν τῇ ἐκκλησίᾳ, οὐδὲ ἀκούεσθαι θύβαν, ἀλλὰ μόνον τὴν κωνσταντῆν καὶ παλαιὰν καὶ κωνσταντινουπόλεως. ἡ δὲ ἕκτη ἀναγιγνωσκέται ἐν τῇ ἐκκλησίᾳ καὶ κωνσταντινουπόλεως.* The sixth belongs to the twelfth century, and consists merely of a note on this canon. With doubtful references we have here to concern.

¹ Mr. Sinker has since discovered two other Greek MSS; and these six MSS, with the other versions, he is using as the foundation of a new Greek Text which, we hope, will see the light soon.

It is obvious, therefore, that the book never attained a large circulation. On the other hand, as Ryle and James point out, 'where it was read' it was 'read with respect'; for 'it is the solitary instance of an OT book which, from being merely ἀντιλεγόμενον, became ἀποκριφόν.' As belonging to the former it appears in the first two lists above mentioned; as an ἀποκριφόν it is enrolled in the 'Sixty Books.'

It is notable in the next place that, whereas these psalms are designated in the first two lists as ψαλμοὶ καὶ ᾠδῆς (I) ἱερουσαλὴμ καὶ Σολομῶντος (II) ἡ δὲ ἕκτη ἀναγιγνωσκέται ἐν τῇ ἐκκλησίᾳ καὶ κωνσταντινουπόλεως, in the next two they are described simply as ψαλμοὶ Σολομῶντος, with the addition of ᾠδῆ in the case of A. The book, therefore, circulated as early as the fifth century in two forms: one consisting simply of the eighteen 'Psalms of Solomon,' the other of these together with certain Odes. The first form is the older. The second probably originated in an attempt to supplement a defective edition of the first by certain odes or songs, partly of Jewish, partly of Christian, authorship, that were current under Solomon's name.

78. Extent. For if we accept the number of στιχοὶ assigned to the psalms in the MSS (i.e., 1000), we must regard the present psalms as deficient to the extent of 300. On the other hand, as the Stichometry of Nicephorus assigns 2100 στιχοὶ to the psalms and the odes combined, the odes themselves must have been about the same length as the psalms. Of the odes only five have been preserved. These are edited in an appendix to the edition of Ryle and James.

Up to the present, five MSS of this book have been found; but of these the Augsburg MS has long been lost, though we possess a record of its existence in the Catalogue

79. Text. edition, which was based upon it. The second codex is that of Vatican (V). This MS was collated by Haupt for Hilgenfeldt, two volumes (*Gr. Lit.*, 1856, 1857), and *Monast. Indulgens.*, 1859, pp. 556-561, 562; but the collation has been recently shown to be inaccurate. The next edition is that of Geiger, *Die Text. Sacrorum Scriptur. B. ebr.* (1871), based on the same critical materials as Hilgenfeldt's. Though agreeing with Hilgenfeldt as to the date and situation, Geiger maintains, in opposition to him, the Hebrew original. Fritzsche's edition was published in the same year (*Lit. et. VT. Græc.*, 569-89); and that of Pick in 1883 (*Presb. Rev.*, 775-813). The third codex is the Copenhagen one (H), to which attention was first called by Graux in the *Rev. Crit.* (1877), 291-293. The Moscow (—M) and Paris (—P) MSS were discovered and collated by Gelhardt. All these authorities have been used in the edition of Ryle and James (*Canon. Solomonicus. Liber Psalmorum et Odam. Græc. et Lat. Textus. 1880*). This edition, eminent alike for its learning and for its critical insight, the reader will find everything worth knowing on the subject.² For the remaining literature on these psalms we must refer the student to this work (*Introduct.* 13-21), and to Schür. (*in loc.*); but we must not forget two of the most fruitful studies that have yet been made—namely, an article by Meyers in Herder's *Kirchen-Lexikon* (1847), and an Appendix to We.'s *Die Phar. u. Sadd.* (1874), which contains the translation with notes.

The date must be determined by the references to

¹ Ryle and James make it clear that in both cases 'we should read the plural, against the best MSS.'

² Since the above account was written two new editions of the text have appeared. The first is that of Swete (*Text of Greek. 3 vols.*, 1892). This editor has made a valuable contribution to the criticism of the text by means of a hitherto uncollected MS (which Gelhardt designates K) belonging to the Vatican. According to Gelhardt, however, his collation of this MS is deficient in point of accuracy. The second edition is that of O. von Gebhardt (*Græc. Solomonicus. Græc. et Lat. Textus. 1894*). This edition is based upon the Vatican MS, and is a valuable addition to the literature on the subject. In the formation of his text Gebhardt has used the MSS C H J L R. Of these only H (the Copenhagen MS) was used by Ryle and James, and H R by Swete. Hence C J L are here used for the first time. These are respectively the Codd. Ibericus, Laura-Klostu, and Casanatensis. The remaining MSS M P V, Gelhardt regards as not deserving consideration. He gives the following genealogy of all the MSS. Z represents the archetype:—

contemporary events; and, as these are many and varied, there will be little difficulty in assigning a definite period to the activities of the authors.

The book opens with the alarms of war (12, 81) in the midst of a period of great material prosperity (13f. 82); but the prosperity is only seeming; from their ruler to the vilest of the people they are altogether sinful (17 21 f.). The king, too, belongs to the family that has usurped the throne of David (17-68). A righteous judgment, however, speedily comes upon them. A hostile army advances against them, led by a 'mighty striker,' who came from the ends of the earth (816). The princes of the land go forth to meet him with joy, and greet him with the words, 'Blessed is thy path; come ye, enter in with peace' (818). When he has established himself within the city he seizes its strongholds (821); he casts down its fenced walls with the battering ram (21). Then the Gentiles tread Jerusalem under foot (220); yea, they pollute even the altar with their presence (22). Its princes and wise counsellors are put to the sword, and the blood of its inhabitants flows like water (823); its sons and daughters are carried away captive to the West (824 17 14) to serve in bondage (22), and its princes to grace the triumph of their conqueror (17 14). But the dragon who has conquered Jerusalem (220), aimed at lordship of land and sea, and thought himself to be more than man, at last meets with shameful death on the shores of Egypt, and there is none to bury him (230 f.).

There can be little doubt now as to the interpretation of these facts. The family that had usurped the throne of David are the Asmonæans, who, since 105 B.C., had assumed the regal name. The 'mighty striker' who comes 'from the ends of the earth' is Pompey. The princes who welcomed his approach are Aristobolus II. and Hyrcanus II. When the followers of the latter opened the gates to Pompey, the party of Aristobolus shut themselves up within the temple, where they were besieged by Pompey and their defences battered down with battering-rams. The massacre that follows, and the carrying away captive to the West of princes and people, agree only with the capture of Jerusalem by Pompey. Finally, the circumstances attending the death of the conqueror on the shores of Egypt recall the death of Pompey in a manner that cannot be misconceived.

We conclude, therefore, that the second psalm was written very soon after the death of Pompey in 48 B.C., and that 1, 8, 17 were composed between 63 and 48, as they presuppose Pompey's capture of Jerusalem but show no knowledge of his death. Psalms 5, 7, 9, 13, and 15 seem to allude to the same sequence of events as 1, 8, and 17, and therefore to belong to the same period. In 4 and 12, on the other hand, 'the sinners' are denounced; but as yet no visitation by the Gentiles is spoken of, nor any interposition of the Gentiles in Jewish affairs foretold. Hence these psalms are probably anterior to 64 B.C. Psalms 3, 4, 11, 14, and 16 betray no distinctly historical colouring; but there is nothing in them which requires us to assume different authorship and date from those of the other psalms. We may, therefore, with Kyle and James, safely assign 70-40 B.C. as the limits within which the psalms were written.

It may be added that Movers, Del, and Keim have identified the invader of Palestine with Herod; but this is impossible on many grounds; and just as many difficulties attend Ew's identification of this personage with Antiochus Epiphanes. In fact, all modern critics support the view advocated above.

The authors were clearly Pharisees. Thus they divide their countrymen into 'righteous' (*δίκαιοι*; 238f. 33-57f.

81. Author. 14 49c etc.) and 'sinners' (*ἀμαρτωλοὶ*; 238 313 49 135 67 etc.), 'saints' (*ἅγιοι*; 3 10 47 840 etc.) and 'transgressors' (*παράνομοι*; 4 11 13 21 27 121-4 17 27), of whom the former were the Pharisees and the latter the Sadducees. They assail the 'sinners' for having usurped the throne of David (17 58) and laid violent hands on the high-priesthood (176). This assault on the Asmonæan house evidently emanates from a Pharisee.

The authors further denounce the priests for polluting the holy things by their uncleanness and their neglect of the true observances (23 5 8 13 26), and likewise for outdoing the heathen in their abominations (18 80). Their attitude, moreover, to the law, their conception of the theocracy, their ideal of the bearing of a righteous man in the case of Greek oppression, all alike mark them out as belonging to the Pharisaic school. To the

same school appertains the doctrine taught regarding future retribution and the Messiah. In regard to the latter, Kyle and James observe with justice that the Messianic conception in these psalms 'marks the revolution which had passed over Pharisaic thought since the time, not a century before, when Israel's mission in the world was identified only with the fulfilment and dissemination of the law. . . . The heroic deeds of Judas Maccabeus and his brothers had rekindled the ardour of the people for a Jewish dynasty, a Jewish kingdom; and the Pharisaic supporters of a theocracy were powerless so long as their teaching showed no sympathy with this patriotic enthusiasm.' But as it was hopeless to look for Israel's redemption to the helpless and hated later Asmonæans, so it is just at this crisis that the author of these psalms 'combines the recognition of the failure of the Asmonæan house with the popular enthusiasm for a Jewish monarchy' (1, 57). Thus the Pharisees 'appealed to the patriotic feelings of those who had no power to appreciate the abstract beauty of the old legalism. By its hope for a "son of David" it proclaimed the downfall of the Levitical Asmonæan house. By its ideal reign of "wisdom and righteousness," it asserted the fundamental Pharisaic position that the law was supreme.' Thus 'the Messianic representation of our seventeenth psalm marks the stage at which Pharisaic thought passed beyond the narrow limits of its earlier teaching and availed itself of the popular aspiration for an earthly kingdom.' This step, however, 'entailed upon the theocratic party no policy beyond the exercise of patience till God should raise up the king, and until then the minute observance of this law' (p. 58). Against the attitude adopted by the writers of this book, *the assumption of Moses* is a protest from beginning to end (see above, § 65).

We give below (§ 85) some grounds for assuming that pss. 1-16 and 17-18 are due to different writers.

As the main interests of the psalms center

82. Place. Jerusalem, the writer probably lived in that city.

It is 'the City of the Sanctuary' (84); in it shall the song of triumph be sung when God brings back its children from the east and from the west (11 13-1). Though Jerusalem has now been trodden under foot by the Gentiles (22), the Messiah will cleanse it from all such pollution (17 25 33), and thither all the nations of the earth will go up to see the Messiah's glory (17 34). The psalmist's indictment of the Sadducean members of the Sanhedrim (41), and his account of their vices and abominations, are best understood as coming from a contemporary inhabitant of Jerusalem. To the west of psalms 2, 8, and 12, that city is the centre of all the world, and the history of other nations or world-empires is of moment only in as far as it connects itself with 'the Holy City.'

The circumstances connected with these psalms point undoubtedly to a Hebrew original—*i.e.*, their composition, *circa* 70-40 B.C., by a Pharisee

83. Language. residing in Jerusalem;—and, notwithstanding Hilgenfeld's strong advocacy of a Greek original, all modern scholars admit that the psalms were composed in Hebrew.

This fact was first established by Geiger in opposition to Hilgenfeld's view. It has further been substantiated by Kyle and James with a fulness and insight that cannot fail to win conviction (*Introd.* pp. 77-87). As for the Greek

84. Greek version. translation, we may provisionally accept the date assigned by the editors just named, who, by a hypothetical train of reasoning, show that it 'is not later than the middle of the first century A.D.'

We will now sketch in a few words some of the teaching of these psalms regarding the Messiah and the resurrection. First, in regard to the Messiah,

85. Eschatology. the writer of psalm 17 returns to the conception of the prophets and describes him as 'the son of David' (17 23). He calls him also 'the Anointed One' (v. 36, cp 1868)—a title that had been applied a few years before to the ideal Messianic king in association with supernatural attributes (Enoch 48 10 524). Here, however, the Messiah is a man and nothing more.

He is to be raised up by God himself (17 23, cp 1868). He is to destroy the supremacy of the Gentiles (the Romans) and drive them forth from the borders of Israel (17 25 37 31). The 'proud sinners' (the Sadducees) will be expelled from the heritage of God which they had unlawfully seized (*cp.* 26 f. 41 51). The Messiah will purge Jerusalem from all impurity and make it his capital (*cp.* 33-35); he will bring back to Palestine the dispersed tribes (*cp.* 28 34 50); the Gentiles will become tributary and be converted to the faith of Israel (*cp.* 31 f. 34). He shall himself be free from sin (v. 41), and as his people will be his (*cp.* 35). Further, he will not conquer by force of arms (v. 37), but will smite the earth with the word of his mouth (v. 39). Finally, his rule is temporary (v. 42): 'He shall not faint all his days.' Only the surviving righteous share in his kingdom (17 50); the departed righteous are not raised to participate in it.

As these hopes of the Messiah are confined to pss. 17 f., and as not even the remotest hint of such hopes can be discovered in the preceding sixteen psalms, it appears necessary to assume for them a difference of authorship.

In these, we should observe, there is not a hint that redress for present evils is to be looked for from the Messiah. In every instance the Psalmist expresses his faith that wrong will be set right, either by God's present judgments, which his righteousness is or shall be justified (29: 49, 87, 93), or by his final judgment of the world, when the righteous shall rise to eternal life (3: 16, 146), and hell and destruction and darkness shall be the heritage of transgressors (13: 1-14). This final judgment is spoken of as a 'visitation' of God upon the righteous and the wicked (3: 14-16, 15, 14, f.); it is likewise called in respect of the righteous 'the day of mercy for the righteous' (146, 186), whereas in respect of the wicked it is named 'the day of the judgment of the Lord' (16, 13).

Since there is in pss. 1-16 only a resurrection of the righteous, Sheol was conceived as the perpetual abode of the wicked, 162. Into Sheol, thus conceived as hell, the wicked enter immediately on death (162 compared with 146, 15, 11). The intermediate abode of the righteous is probably to be regarded as the 'treasuries' of which we find the first reference in Eth. En. 100, 5. See also ESCHATOLOGY, § 67.

IX. THE SIBYLLINE ORACLES. The Sibylline literature belongs to a class of productions highly characteristic of Hellenistic Judaism.

86. Propagandist literature.

'These,' as Schürer aptly remarks, 'were Jewish works under a heathen mask.' However divergent the outward form assumed, they all exhibited one characteristic in common: they addressed themselves to heathen readers, under cloak of some name that was influential in the heathen world, and in the form most natural to their alleged origin. Indirectly or directly, their aim was the propagation of Judaism among the Gentiles. Whilst the works ascribed to Hecateus and Aristeas belong to the former category (indirect propaganda), the Sibyllines are distinctly of the latter.

The Sibyl was regarded in the ancient world as an inspired prophetess. She belonged to no prophetic order or priestly caste, but held a position free and uncontrolled as a superhumanly gifted organ of the will and counsels of the gods.

The number of such Sibyls is variously stated at different times. Heracitus in *Protrepticus* (*De Heb. orig.*, 5), *Vespertianus* (*Par.*, 1095), and Plato (*Phaedr.*, 23), speak of only one. Tacitus (*Ann.*, 6, 12) is doubtful whether there were more than one. Pausanias (*Descr. Græc.*, 10, 12) mentions four, while Varro (in Lactantius, *Div. Instit.*, 16) specifies ten. For further information on this subject the reader should consult Alexander, *Vetus. Sibylline* (1857, vol. 1), 3-77; 2, 1-101; *Manus. de Sibyllinarum Infulentia* (1879), and the arts. on the subject in Smith's *Dict. of Gr. and Rom. Biogr.*, and the *Ency. Brit.*, 9.

Written accounts of the oracles delivered by the Sibyls obtained in Greece and Asia Minor only a private circulation. Still though they were not preserved by the State or publicly consulted, we must not underrate their importance in the life and thought of the Eastern classical world. In Rome, however, they acquired quite a unique position. It is not necessary to treat here of the very ancient collection of these oracles, said to have been purchased by King Tarquin, or to record the frequent occasions on which they were consulted by the state before their destruction in the fire that consumed the Capitol in B.C. 83. (Alexandre [2, 198] has traced sixty such occasions.) Their place was soon afterwards taken (75 B.C.) by a collection, amounting in all to about 1000 verses, made in Greece, Asia Minor, Africa, and Italy, by order of the Senate. (After being revised under Augustus, it seems finally to have been burnt by the order of Stilicho in 404 A.D.)

88. Sibylline Oracles.

Inasmuch as such oracles enjoyed high authority and a wide circulation in the East,—inasmuch, likewise, as they were anonymous in origin, free from authoritative revision, and capable of modification or enlargement at pleasure by those in whose hands they were for the

time being,—they offered to the missionary spirit of Hellenistic Judaism a form of literature which would readily admit the disguised expression of its highest beliefs, and at the same time procure for them a hearing in Gentile circles. It is not unlikely, too, that the prolonged search of Roman officials for Sibylline oracles in the East may have further stimulated the inventive faculties of the Alexandrian Jews, and led to the composition of many of the verses in our present collection. In this method of propaganda the Christians proved themselves later to be apt pupils of the Jews. So common, indeed, had become in early Christian times the invention of such oracles that Celsus (*Orig. contr. Cels.*, 561) terms Christians *Σιβυλλισταί*, believers in sibyls, or sibyl-mongers.

This charge of Celsus was not unmerited; for with the exception of a citation about the tower of Babel made by Alexander Polyhistor, 80-40 B.C. (see *Eus. Chron.*, 1, 23), and found likewise in Josephus (*Ant.*, 1, 43), it is to Christian writers that we are indebted, not only for all other references, but also for the preservation of the entire collection that has come down to us.

Hermas (*Vit. 2*) mentions the Sibyl, but not her verses; but quotations are frequent in Clement Alex. and Lactantius. A collection of the Patristic quotations from the Sibyllines will be found in Struve (*Fragmenta librorum Sibyllinarum quæ apud Lactantium reperiuntur*: 1817), in Vervorst (*De Carminibus Sibyllinis apud sanctos Patres disceptatio*, Paris, 1844), in Besançon (*De l'empire que les Sibylles ont eu sur les esprits des oracles sibyllins*: Montauban, 1851), and in Alexandre (*2*, 234-317).

The Sibylline Oracles, as we now have them, are a chaotic medley. They consist of twelve books—there were originally fourteen—of various

89. Surviving collection.

authorship, date, and religious conception.* This arrangement, which is due to an unknown editor of the sixth century (Alexandre), does not in itself determine identity of authorship, or of time, or of religious belief; for many of the books are merely arbitrary groupings of unrelated fragments. As the editor, moreover, was guided by caprice as often as by any discernible principle of editing, it is not strange that the same passage frequently recurs in different contexts.

The first printed edition of these Oracles was published at Basel, in 1545, from an Augsburg (now a Munich) MS, and consisted of eight books. A metrical Latin translation of these books by Sebastian

90. Editions.

Castalio appeared in the following year, and an emended Greek text from the same scholar in 1555. The most valuable of the early editions is that of Opsopodeus (*i.e.*, Koch), Paris, 1599, in which fresh MS evidence is brought to bear upon the text. These were followed by that of Gallesius, Amsterdam, 1689; but his work is of no critical worth. These eight Sibylline books were likewise reprinted in Gallandi's *Bibliotheca Vett. Patr.* (Venice, 1788). Book 14 was first edited by Mai in 1819 from a Milan MS and Books 11-14 from two Vatican MSS in 1828 by the same scholar. Books 9 and 10 have not been recovered. All these editions have been superseded by the first edition of Alexandre's *Oracula Sibyllina* (2 vols. Paris, 1841-1856), and his second edition of 1869, in which the valuable excursions of the first are omitted; and by the edition of Friedlieb (Leipzig, 1853). The latter has a useful introduction, and is accompanied by a translation into German hexameters; but the text is untrustworthy.

By far the best text that has yet appeared is that of Rzsch, *Oracula Sibyllina* (Vienna, 1891). For the formation of this text fourteen MSS have been used; the text has been further emended by an exhaustive collation of quotations in the Fathers. Our citations will be made from this text.

For further literature on the subject, see Alexandre's work (1st ed. 271-82; 2nd ed. 418-419); Schürer (*Hist.*, 5, 288-292). English readers will find the subject well treated in the work of Schürer just mentioned; *Edm. Rev.* (July 1877, pp. 31-67); and Deane (*Pseudepigr.*, 1891, pp. 276-344).

The relation of the Jewish and the Christian Sibyllines to the ancient heathen ones it is practically impossible

91. Rel. to heathen Sibyl.

to determine. 1. They assumed, of course, the outward form of the older Oracles, being written in Homeric hexameter verse; but they transgress every rule of prosody. Short syllables are lengthened through the in-

fluence of the accent, or even without it, owing to the exigencies of the verse; and long syllables are likewise shortened.

For peculiarities of metre and syntax, see *Alexandre, 1. 3. 10-11*. It must be acknowledged, however, that many of these disappear in the better text of *Rzach*. Of acrostic verses, which, according to *Diogn. Hal.* (4.62) and *Cicero (De Div. 2. 54)*, was the form of the most ancient Sibyllines, only one specimen is still preserved—viz., in 8.217-250, the initials of which are ΗΙΣΟΥΣ ΧΡΕΙΣΤΟΣ ΘΕΟΥ ΥΙΟΣ ΣΙΒΥΡΗ ΣΤΑΥΡΟΣ. It should be observed, further, that without the last word of the initials of the verse composed of the word ΙΧΘΥΣ—a fish—a frequent symbol of the Christian faith on early monuments.

2. As regards the matter, it is more than probable that the later Sibyls used much of the older material lying ready to hand.

Thus, in 3.414-418 (the passage about Helen), 'the Erinnyes from Sparta,' is from a heathen source; so likewise the punning couplet in 4.99-100, which frequently recurs:

καὶ Σπάρτην ἄλλοτε ἴσταντο ὅτι ἠελώσται καλλιῶνα
 ἄλλοτε δ' αἶμα τῆν ἑβραίων ἄβραμ ὅν μακρὰ τὰ ἄλλοτα.

Another notable instance is 8.361, where a line from an ancient Delphic oracle is given verbatim. See *Herod. 1.47*.

We must turn from such questions to discuss the various elements of which the work is composed.

92. **Composite character.** These, as we have already observed, are both Jewish and Christian, and the latter largely preponderate. Owing, however, to the character of the work, it is not always possible to distinguish between the two. It is therefore only on some of the smaller portions that we can arrive at any certainty. Much is of a neutral character, and, as far therefore as internal evidence goes, may equally well have proceeded from either class of writers. There is a great lack of external evidence. We shall now deal with the various elements of the work in their chronological order as far as that is possible. Our space does not admit of an analysis of all the books; we shall, however, give a short survey of the more important.

The first and oldest part is 3.97-829^a and probably the Proemium. The latter is not found in our MSS; it

93. **Proemium.** ^{istaken from the *Act Autobiogon* of Theophilus (180 A.D.).} It consists of two fragments, of thirty-five and forty-nine lines respectively. *Rzach* (pp. 232-238) and *Alexandre* link them together by another short fragment of three lines. On very inadequate grounds the latter editor assigns them to Christian authorship; but they contain nothing of an essentially Christian cast (on their

94. 3.97-829. contents, see *ESCHATOLOGY*, § 58). With regard to 3.97-829 opinions are conflicting. *Bleek* regards verses 97-807—with the exception of 3.350-380, a later Christian interpolation—as the work of an Alexandrian Jew, 170-160 B.C.; *Hilgenfeld* thinks that the whole of 97-817 was written about 140 B.C.; *Ewald* brings down the date to 124 B.C. *Alexandre* assigns 3.97-204, 489-828, to 168, but 295-488 to the age of the Antonines. The strongest evidence in favour of *Alexandre's* view is to be found in the difficulty of interpreting adequately such passages as 3.464-473 as applying to the civil war and the dissensions of *Marius* and *Sulla* (*Friedlieb*, p. 33).

3.97-818 falls naturally into three groups: (a) 97-204; (b) 205-488; (c) 489-818. The first (a) opens abruptly with the building and the destruction of *Babel* (97-104). Then the earth is peopled and its rule is divided between *Cronos*, *Titan*, and *Japetos* (106-110). In the strife that subsequently arose between the *Cronides* and the *Titans* these races were destroyed, and there arose in succession the great kingdoms of the earth—those of *Egypt*, *Persia*, *Media*, *Æthiopia*, *Assyria*, *Macedonia*, again of *Egypt*, and of *Rome* (115-164). This closes the retrospect of the Sibyl; now begins her prophecy (164-166). First, she predicts the rise of the Jewish (under *Solomon*), the *Macedonian*, and the *Roman* kingdoms; during the reign of the seventh king of *Egypt*, of *Hellenic* race, the people of *God* will again become powerful (167-195). Then are recounted the judgments of *God*—

1 A Latin rendering with the last seven verses omitted is given in *Augustine's De Civ. 18. 43*.
 2 Where *Friedlieb* and *Alexandre* give 828, *Rzach* gives 829 verses.

3 In the detailed analysis that follows, certain verses, unimportant for the present purpose, are (for the sake of brevity) left unaccounted for.

on the kingdoms of the world and on the Jews (195-212). Next, the Sibyl takes as her theme the praise of the Jewish nation, their virtues, and the salient points in their history from their departure from *Egypt* down to *Cyrus* (218-294).

The second group (b) is mainly concerned with judgments against *Babylon*, *Egypt*, *Gog* and *Magog*, *Libya* (295-333), and likewise against various cities (341-366). Then follows the promise of *Messianic* prosperity and peace (367-380), and this group closes with oracles regarding *Antiochus* *Epiphanes* and his successors, and various countries, towns, and islands (381-488). In 419-432 we have the celebrated diatribe against *Homer*.

The third group (c) opens with oracles against *Phoenicia*, *Crete*, *Thrace*, *Gog* and *Magog*, and the *Hellenes* (489-572). Then *Israel* is praised for its worship of the true God (573-600). Thereupon comes a second prophecy of judgment about a call to conversion, and an account of the evils that were to befall the ungodly (601-651). Then the Sibyl foretells the coming of the *Messianic* king, who would take vengeance on his adversaries; next comes a detailed account of the period of *Messianic* prosperity (652-731), and, finally, the signs that are to herald the end of all things (736-808). The Sibyl declares that she is neither the *Erythraean* Sibyl nor yet the *Cumaean* (809-818).

3. Though it is obvious from the above epitome that 3.97-818 is not a single and homogeneous composition but rather an aggregate of separate oracles, we are safe (with *Schürer*) in regarding the three groups as derived in the main from one author, and as dating from the same period, the reign of the seventh Ptolemy, which is referred to in all three groups (192-193, 316-318, 608-610).

Ptolemy VII. *Physcon* reigned first in conjunction with his brother *Ptolemy VI.* *Philometor* (170-164 B.C.). He was then banished, but recovered the throne in 145 and reigned as sole king till 117 B.C. That the composition dates from the latter period is clear (500-572) from the prophecy of the complete subjugation of all *Hellenic* lands. *Hilgenfeld*, *Schürer*, and *Drummond* point out, this cannot have been written before the fall of *Corinth* (146 B.C.). The doom of *Corinth* is actually referred to (487), and possibly that of *Carthage* (492-503). Verses 388-400, which deal with the *Seleucid* kings, were written (according to *Hilgenfeld's* interpretation) about 140 B.C. Therefore, since the author represents the *Messianic* kingdom as beginning during the reign of *Ptolemy Physcon*, we may safely take 97-818 to have been written in the second half of the second century B.C. The *Proemium*, with which we have already dealt (see above § 93), most probably formed the introduction to these verses, and *Schürer* adduces external evidence from *Lactantius* (iv. 65) to that effect.

Before proceeding to discuss 3.1-96, we should add that *Friedlieb* and others reject 819-828 as a later addition, as these verses are at variance with 809-811.

With regard, however, to 3.1-92 all previous critics seem to have gone wrong in connecting 63-92 with the

95. 3.1-92. preceding verses. In 63-92 the end of all things is to come during the sway of *Rome* over the world (75-80). In 1-62, on the other hand, only the partial judgments that are to take effect on the coming of the *Messianic* king in 49 f. are recounted. The Sibyl then promises in 61 f. to enumerate the cities that are to suffer; but here the account breaks off, and not a word more is said in 63-92 in fulfilment of her promise. Hence these two sections are of different authorship. 63-92 is certainly late and *Christian*. On 3.1-62, see also *ESCHATOLOGY*, § 68.

In 63-74 we have a reproduction of the myth concerning *Nero*, according to which *Beliar* was to return in the form of that emperor and work many mighty signs. This idea recurs in 2.167-170 (a distinctly *Christian* product), and in the *Asc. Isa.* 3.13-51 (cp *ANTICHRIST*, § 15).

As regards 3.1-62, it may be derived from one author, and v. 52 may refer to the triumvirate of *Antony*, *Octavius*, and *Lepidus*. In that case this section was written before 31 B.C.

Book 4 is, with *Friedlieb*, *Ewald*, *Hilgenfeld*, *Alexandre*, and *Schürer*, to be regarded as of Jewish authorship, and was written about 80 A.D. or somewhat later. This

96. Book 4. date is determined by two allusions: the destruction of *Jerusalem* (70 A.D.) in 115-127, and the eruption of *Vesuvius* (79 A.D.) in 130-136. The latter was to be the immediate precursor of the vengeance that was to be wreaked on *Rome* by *Nero*, returning with many myriads from the East (137-139). There are no grounds for assigning this book, with *Ew.* and *Hilgenfeld*, to *Essene* authorship; for, with the exception of the reference to ablations in 163-165, there is no mention of anything characteristic of the *Essenes*, and the words in question are most naturally taken as referring to proselyte baptism (*Schürer*). The teaching enforced in 179-192 shows that the author cannot have been a *Jew* of *Alexandria*, but probably belonged to *Palestine*; for the eschatology is very naive. From the bones and ashes of men's bodies *God*

will fashion anew the bodies in which they will rise to judgment. The judgment will then proceed according to their deeds. The wicked will again die, but the righteous live again on earth. This recalls Enoch 1-36.

Book 5 professes to be the work of an Egyptian Sibyl, the sister of Isis (v. 53). It is mainly Jewish; but there may be Christian elements. There is a marked absence of ideas characteristic of Judaism or Christianity, and also of internal connection. Friedlieb attributes the book to an Egyptian Jew in the time of Hadrian; Alexandre to a Christian Jew of Alexandria in the age of the Antonines. The first fifty-one lines are in effect a chronological oracle ending with Hadrian. As the rest of the book deals with Egyptian affairs, it is probably of different authorship and date, and we may, with Ewald, Hilgenfeld, and Schirer, accept 80 A.D. as an approximate date for 52-531. Some passages are decidedly Jewish: vv. 260-285 (announcement of woes upon the idolatrous Gentiles; but of blessing on Israel), 277, 397-413 (the destruction of the Temple in Jerusalem), 205, 414-420, 499-511 (the building of a new temple in Egypt which is to take the place of that already destroyed at Leontopolis); there are others also. The one passage that seems to be certainly Christian is 256-259:

ἐς δὲ τὰ ἔθνη αὐτὴ ἀπ' αὐτῶν ἔλασεν ἀντὶ τοῦ πᾶσι καὶ ἠγάπησεν ἐπὶ τῶν ἀγαλλοκῶν. Ἐβραῖοι δὲ ἤρασαν, ὅτι καὶ ἐπὶ πάντων ἀγαλλοκῶν ἠγάπησεν ἡμῶν τοὺς ἀδελφούς καὶ χυδαίους ἄλλοιους.

Book 6 is the work of a Gnostic or Christian. Jesus, the natural son of Joseph, is united with Christ at baptism. The

11-14 1/. somewhat after the manner of the apocryphal gospels. Book 7 is of like authorship and is not earlier than the third (see above,

§ 91, 1) century A.D. Book 8, in which the famous acrostic occurs, is of Christian origin but of divided authorship. 1-429 belongs to the second century; 430-501 to the third. As to Books 1 f. and 11-14, there is a great variety of opinion. Alexandre assigns the former to a Christian author of the third century, and the latter to an Alexandrian Jew of about the year 267. Friedlieb places 1/. at the close of the second century; 11-14 he ascribes to Jewish writers of the second and the third centuries A.D. respectively; 12 1/ to Christian writers of the third century.

Some of these judgments are simply hypotheses; there is still room for indefinite study on these questions. R. H. C.

 - V. Didactic (§ 31).

Bibliography (§ 32).

It is proposed in the present article to give, in the first place, a general survey of the very miscellaneous collection of books known as 'the Apocrypha' (details being reserved for special articles), and then to proceed to an enumeration and classification of the larger literature which lies beyond the limits of that collection. Fuller treatment of the subdivision 'Apocryphal,' however, will be reserved for a special article (see above, APOCALYPTIC), where will be found an account of the following nine works:—Apoc. of Baruch, Ethiopic Book of Enoch, Slavonic Book of Enoch, Ascension of Isaiah, Jubilees, Assumption of Moses, Test. xii. Patr., Psalms of Solomon, Sibylline Oracles. The later Christian literature will be excluded, only those writings being considered which contain portions assignable, at latest, to the early years of the second century.

The name Apocrypha (nom. pl. neut. of Gk. adj. ἀποκρυφός, *hidden*) is used to denote a large body of

2. Name. Jewish and Christian literature, consisting of writings which either their authors or their admirers have sought to include among canonical scriptures, but which have ultimately failed to secure such a position in the estimation of the Church at large.

This special usage of the word is derived from the practice common among sects, religious or philosophic, of embodying their special tenets or formulæ in books withheld from public use, and communicated to an inner circle of believers. Such books, generally bearing the name of some patriarch, prophet, or apostle, were called by their possessors apocryphal, the designation implying that they were hidden from the outer world, and even from the ordinary members of the sect itself; in such cases the epithet apocryphal was used in a laudatory sense. Since, however, the books were forgeries, the epithet gradually came to take colour from that fact, and in process of time was employed to indicate other writings that had been forged. In the common parlance of to-day, it denotes any story or document which is false or spurious.

One of the earliest instances—and certainly a typical instance—of the use of the word *apocryphal* in its laudatory sense, occurs

in a magical book of Moses edited from a Leyden papyrus of the third or fourth century by Leeman and by Dieterich (*Liber Iasus*, 1893). The book may be as old as the first century A.D. Its title is: Μωυσῆος ἡμῶν βιβλίον ἀποκρυφῶν ἐκκαθάρσεως ἡμῶν, 'A Holy and Secret Book of Moses, called the Eighth, or the Holy.' For the strictest use of the word, *apocryphal*, however, on the other hand, we have to turn probably to Cyril of Alexandria (348 A.D.); and for a more frequent and clear employment of the adjective in a disparaging sense, to Jerome, whose constant use of it is probably responsible for our employment of it at the present day as the equivalent of 'non-canonical.'

Finally the name Apocrypha has come to be applied, and is now applied, by the reformed communions to a particular collection of writings. While some of these are genuine and authentic treatises, others legendary histories, and the rest apocryphal in the disparaging sense of bearing names to which they have no right, all come under the definition proposed above, for each of them has at one time or another been treated as canonical.¹

I. The Apocrypha Proper.

3. Apocrypha. This collection of books may be classified in several ways. We might classification. classify them critically thus:—

1. *Additions to canonical books*:—
 - 1. Esdras (interpolated form of Ezra): see below, § 4, ii.
 - Additions to Esther: see below, § 5, 1.
 - Additions to Daniel: see below, § 5, 2.
 - Prayer of Manasses: see below, § 6, 3.
2. *Pseudographical writings*:—
 - 4. Esdras: see below, § 7.
 - Wisdom of Solomon: see below, § 8, 2.
 - Baruch: see below, § 6, 1.
 - Epistle of Jeremy: see below, § 6, 2.
3. *Legendary or Hagiographic writings*:—
 - 1. Tobit: see below, § 5, 3.
 - Judith: see below, § 5, 4.
4. *Genuine and authentic treatises*:—
 - Ecclesiasticus: see below, § 8, 1.
 - 1, 2 Maccabees: see below, § 4, i.

Probably the most natural and convenient division

¹ It does not seem necessary to devote space here to commenting upon the use of the word Deutero-canonical, as applied to these books by the Church of Rome; for it is expressly said by the authorities of that Church that no distinction of authority is implied in the term.

will be one depending upon the kind of literature which each book represents, as thus:—

- I. Narrative: (a) Historical; (b) *Legendary* (or Haggadic).
 II. (a) Prophetic; or (b) Apocalyptic.
 III. Didactic.

1. (a) HISTORICAL. i. *The Books of Maccabees*.
 1. *Maccabees*.—An important and generally trustworthy history, extant in Greek. It was

4. **Historical.** translated from a Hebrew original, which survived as late as the time of Jerome. On this and the following see MACCABEES, BOOKS OF.

2. *Maccabees*.—Extant in Greek; an abridgment of a work in five books by Jason of Cyrene (see 223). Prefixed to it are two letters, from the Jews of Jerusalem to the Jews of Egypt, commonly held to be spurious (see, however, MACCABEES, SECOND, § 7).

3. *Maccabees*.—Greek. A fragmentary history of an attempted massacre of the Jews under Ptolemy Philopator, and of their miraculous deliverance. This book and the following are not included by the Roman Church in its Canon, and do not appear in the Vg. though found in G.

4. *Maccabees*.—Greek. A philosophical discourse, illustrating the triumph of Reason over Matter, by the story of the martyrdom of Eleazar, and of the 'Seven Maccabees' and their mother. The work was traditionally attributed to Josephus. An edition of the Syriac version with kindred documents, prepared by the late Prof. Bensly, has been printed under the supervision of W. E. Barnes.

ii. 1. *Esdras*.—Greek. A recasting of the canonical Ezra, to which is added the legendary tale of the Dispute of the Three Courtiers (known to Josephus). This book appears in Vg. as an appendix to the NT; but no authority is attributed to it by the Church of Rome. See ESDRAS, BOOKS OF, First and Second.

(b) LEGENDARY. 1. *Additions to Esther*.—Greek. They consist of a number of letters, prayers, visions, and the like, which are found intercalated into the canonical book of

5. **Legendary.** Esther in G. See ESTHER, § 10.

2. *Additions to Daniel*.—Greek. These are three in number:—

- (i.) The Story of Susanna, prefixed to the book.
- (ii.) The Song of the Three Children, inserted in ch. 3.
- (iii.) The Story of Bel and the Dragon, following ch. 12 and attributed to Habakkuk.

They are found both in the G Version and in that of Theodotion. What is said to be the Hebrew original of part of the Song of the Three Children has been recently found by Dr. M. Gaster in the Chronicle of Jerahmeel, and printed by him in *TSBA*, 1894. Cp DANIEL, § 5.

3. *Tobit*.—Greek and 'Chaldee.' A romantic narrative of the period of the Captivity, written not later than the first century A.D. at latest, and perhaps in Egypt. The book has a literary connection with the story of Ahiqar (see ACHIACHARUS). The date cannot at present be considered at all certain. The 'Chaldee' or Aramaic version (on the name see ARAMAIC, § 4, end), published by Dr. Neubauer in 1878, is probably not the earliest form of the book. Of the Greek there are three recensions, and there are three old Latin recensions besides Jerome's Vg. version. There are also two Hebrew texts, one derived from G, and the other from the Aramaic. Dr. Gaster has printed some fresh Hebrew texts of the story in *TSBA*, 1896. See TOBIT.

4. *Judith*.—Greek. A romance which, in its present form, may date from the first century B.C. It tells the story of the deliverance of the city Bethulia from the Assyrians under Holofernes, through the bravery of Judith, a Hebrew widow. No miraculous element appears in the story. See JUDITH.

¹ So called in EV and G (e.g. Swete (B)). In G^A (subscr.) it is called *ἰερεῖς*; in Lag. s. Luc. it is *Ἐσθῆρα Β'*, and in Vg. it is 3 Esdras.

II. (a) PROPHETICAL. 1. *Baruch*.—Greek. A pseudepigraphical book (i.e. one written under a false name), ascribed to Baruch son of Neriah,

6. **Prophetical.** amanuensis of Jeremiah. It consists of two parts: (1) 1-38, which may date from the times of the Persian supremacy, possibly has a Hebrew original, and certainly shows close affinities with Dan. 9; (2) 39-59 (end), originally written in Greek, probably after 70 A.D.; chap. 5 is modelled on the 11th Psalm of Solomon. Edited most fully by Kneucker. Appended to this book is—

2. *The Epistle of Jeremy* (Baruch 6 in our Apocrypha).—Greek, also pseudepigraphic, purporting to be a letter of Jeremiah addressed to the Jews at Babylon, inveighing against the worship of idols.

3. *The Prayer of Manasses*.—Greek. This is attributed to Manasseh, king of Judah, when in prison. It is very likely an extract from a legendary history of Manasseh, of which other portions appear to be quoted (in connection with the prayer) in the *Apostolical Constitutions* (222); or possibly it was written with a view to insertion into the text of 2 Chron. 33. It is not in the Roman canon, but is appended thereto.

(b) APOCALYPTIC.—Of this large and important class of writings only one specimen is contained in our Apocrypha,

namely:—

4. *Esdras*.—Latin, Syriac, Arabic, Ethiopic, and Armenian. The original Greek is lost. Only chaps. 3-14 appear in any Version save the Latin; chaps. 1f. 15f. are later accretions, probably of two different dates, 1f. being perhaps of second century, and 15f. of third century; 3-14 are a Jewish apocalypse, probably written about 97 A.D.; 1f. are Christian, 15f. most likely Jewish. Rejected by the Roman Church, it is printed as an appendix to the Vg. See ESDRAS, BOOKS OF and APOCALYPTIC LITERATURE, §§ 13-15.

III. DIDACTIC. 1. *Wisdom of Jesus the Son of Sirach*, commonly called *Ecclesiasticus*.—Greek, avowedly

8. **Didactic.** translated from the Hebrew of which a considerable portion has lately been recovered. A genuine authentic treatise, in parts of high literary excellence. The author was a Palestinian Jew of the second century B.C. See ECCLESIASTICUS.

2. *Wisdom of Solomon*.—Greek. Written under the name of Solomon, perhaps by Philo (according to an early tradition), certainly by a Jew of Alexandria in the first century. It is of great merit in parts; but the tone deteriorates towards the end. The book seems, moreover, to be incomplete. See WISDOM, BOOK OF.

II. Other Apocryphal Literature.

Our survey of the remaining literature is a much more difficult matter. The idea of classifying the books upon chronological principles must be

9. **Other literature.** set aside at once as impracticable; the data are in a majority of cases far too

vague. The simplest division that can be made is between those books which have to do with the OT and those which associate themselves with the New. Within those the classification will be made, as in the case of the apocrypha already described, according to kinds of literature represented; writings which unite more than one element will be arranged according to their most prominent feature. In the case of the OT literature, slightly modifying our previous classification, we can include all the documents we possess under the following headings:—i. *Legendary or Haggadic Narratives*. ii. *Prophetical and Apocalyptic books*. iii. *Poetical*. iv. *Didactic*.

¹ Called a *Esdras* in EV, but often, as here, 4 *Esdras*—i.e., 4th after 1st *Esdras*, the Heb. Ezra, and Nehemiah. It is called 3 *Esdras*, when Ezra-Neh. are counted one book, as in G. In an Amiens MS chaps. 1f. 3-14 15f. are called 3rd, 4th, and 5th *Esdr.* respectively.

A. OLD TESTAMENT (§§ 10-25).

I. LEGENDARY OR HAGGADIC NARRATIVES (§§ 10-18).
10. Adam and Eve. 1. *Testament (or Apocalypse, or Penitence) of Adam: Book of the Conflict of Adam and Eve.*—Extant partially in Greek, Latin, Syriac, Arabic, Ethiopic [and Coptic].

These versions represent variously developed forms or fragments of a Jewish romance dealing with the life of Adam and Eve after the Fall, and with their death and burial. We no longer possess the romance in its original form.

The remains of it must be sought in the following documents:—
 (a) Greek *Apocalypse of Moses*, more properly *Ἀποκάλυψις τοῦ Ἀδάμ καὶ Ἐβῶα*. Edited by Tischendorf (*Apocalypsa Adamicae*, 1866) and, in a fragmentary text, from the best MS, by Ceriani (*Monumenta sacra et profana*, 521). It is principally concerned with the death of Adam and Eve, and includes an important narrative of the Fall. It is essentially Jewish.

(b) Latin *Vita Adæ et Evæ*: extant in many MSS, printed by Will. Meyer in *Abh. d. Monch. Akad.*, Philolog. philol., Kl. 14, 1879. It covers the same ground as (a) and introduces elements which occur in (c) and (d).

(c) Arabic and Ethiopic *Book of Adam and Eve or Conflict of Adam and Eve*. A long romance, Christianized throughout, dealing with the sufferings and temptations of Adam and Eve after the Fall. The history is continued to the birth of Christ, and has close affinities with the *Cave of Treasures* (ed. Bezold; *Solostastische*). It is derived in large part from the lost Jewish romance. First translated by Hilmann (*Das hebräisch-äthiopische des Morgenlandes*, 1833); Ethiopic text by Trumm in *Abh. d. Münch. Akad.* 15, 1879, 81; English version by S. C. Malan (*Book of Adam and Eve*, 1882). See too the article 'Adam, Books of,' by Hort, in *Dict. Christ. Biogr.*

(d) Greek, Syriac, and Arabic fragments of the *Testament of Adam*. Prophetic and apocalyptic in character; some are extracts from the old romance in its original form; others are Christianized. Edited by Renan in *Journ. As.* (1853, pp. 477-479); the Greek by M. R. James (*Apocrypha Anecdota: Texts and Studies*, ii, 3 138).

(e) Coptic. A leaf from a Moses-Adam apocalypse, gnosticized. Edited by Schmidt and Harnack in *Sitzungsber. d. k. pr. Akad. d. Wiss.*, 1891, p. 1045. It is now recognised by Harnack to be part of the late Coptic *Apocalypse of Bartholomew*.

2. *Book of Jubilees, Little Genesis (Leptogenesis), Apocalypse (or Testament) of Moses.*—A 'haggadic commentary upon Genesis.' The book is in the form of a revelation made to Moses on Mount Sinai by the angel of the Presence. Hence it has been called the *Apocalypse of Moses*. The narrative communicated by the angel begins with the Creation, and extends to the giving of the law, and the whole time is reckoned in periods of Jubilees: hence the name *Book of Jubilees*. The events narrated in Genesis are for the most part sketched slightly with the addition of details of a legendary character: hence the name *Leptogenesis*, 'a detailed treatment of Genesis' (see, however, ESCHATOLOGY, §49). These details include the names of the wives of the patriarchs, the wars of Jacob and Esau, the last words of Abraham and Isaac. Much of the legendary element in *Test. xii. Patr.* (see below) is derived from this book: see APOCALYPTIC, §§ 48-58.

3. *Testaments of the Three Patriarchs (Abraham, Isaac, and Jacob).*—Referred to in the *Apost. Const.* (6 16).

11. Patriarchs. Books under these names, combining the legendary, apocalyptic, and didactic elements Christianized, are found in Greek, Slavonic, and Roumanian (*Testament [or Apocalypse] of Abraham*), and in Arabic and Ethiopic (*Testaments of Abraham, Isaac, and Jacob*). They narrate the circumstances attending the deaths of the three patriarchs. Their early date is maintained by the present writer (one is quoted by Origen), but is not universally allowed. Dr. Kohler (*JQR*, 1895) assigns an Essene origin to the *Test. of Abraham*.

Edited by M. R. James ('Test. of Abraham': *Texts and Studies*, 2) and by Dr. Gaster ('Roumanian version of Apoc. of Abraham', *PSBA*, 1887). The Greek version is printed from one MS by Vassiliev (*Anecdota Græco-Byzantina*, 1893).

4. *Apocalypse of Abraham.*—Slavonic, from Greek. An interesting Jewish book with Christian insertions. The first part is haggadic, and gives the story of Abraham's conversion: the second is an expansion of the

vision narrated in Gen. 15: edited by N. Bonwetsch in *Studien zur Geschichte d. Theologie u. Kirche*, 1897.

5. *Testaments of the Twelve Patriarchs.*—A book combining the three elements of legendary, apocalyptic and didactic matter in twelve sections, each of which gives the last dying speech of one of the sons of Jacob: see APOCALYPTIC, §§ 68-76.

6. *Life (or Confession) of Aseneth.*—A Jewish legend of early date; Christianized. Extant in Greek and Latin. Syriac (and Latin). It is connected

with the *Test. xii. Patr.*, and narrates the circumstances attending the marriage of Aseneth with Joseph. There is much beauty in the story. The Latin version was, according to the present writer's belief, made by or for Grosseteste, at the same time as that of the *Testaments*.

The Greek and Latin are edited by P. Batiffol, *Studia Patristica*, 1889. The Syriac will be found in Land, *Anced. Syr.*, and Oppenheim, *Fabula Josephi et Asenethe*, 1886. See Hort's article in *Dict. Chr. Biogr.*

7. *Testament of Job.*—A Midrash on Job, containing a mythical story of his life, Christianized to a very limited extent. It is ascribed to his brother

13. Job. *Npheis* (Nahor). Job's wife is called Sitis. Elihu is represented as inspired by Satan. The story is worth reading.

It exists in Greek and seems to be quoted in the *Apoc. Paul.* Printed from a Vatican MS by Mai (*Script. Vet. Nov. Coll.* 7 100); a French translation in Migne's *Dict. des Apocryphes*; edited last from two MSS by M. R. James, *Apocrypha Anecdota*, ii, 1897.

8. *Testament of Solomon.*—Greek. Practically a magical book, though interspersed with large haggadic sections. It is mainly Jewish, though

14. Solomon, Christian touches have been introduced. etc.

It narrates the circumstances under which Solomon attained power over the world of spirits, details his interviews with the demons, and ends with an account of his fall and loss of power.

Ed. first by F. F. Fleck in *Wissenschaftl. Reise*; reprinted in Migne's *Cœdesus*, vol. ii., as an appendix to Pesslus's writings. A German translation by Bornemann in Ilgen's *Z. f. Kirchengesch.*, 1843.

9. *Contradictio Salomonis.*—A work under this name is contained in the 'Gelasian' *Devero d. recipiendis et non recipiendis libris*. It was in all likelihood an account of Solomon's contest in wisdom with Hiram, and was the groundwork of the romance still extant in many forms and under many names—e.g., Dialogue of Solomon and Saturn (Anglo-Saxon), Solomon and Kitovras (i.e. Kentauros, Slavonic), Solomon and Marcolph (Latin, etc.). Josephus mentions the Hiram-legend.

See on all these books J. M. Kemble's Introduction to the *Anglo-Saxon Dialogue of Solomon and Saturn*, Edinb. Society, 1843, and compare ACHIACHARUS.

10. *Ascension of Isaiah.*—Partly haggadic, but chiefly important as an apocalypse—under which heading it will be treated. See APOCALYPTIC, §§ 42-47.

11. Pseudo-Philo's *Libri antiquitatum Biblicarum.*—Latin, from Greek, and that from Hebrew. Printed

15. Pseudo-Philo. thrice in the 16th century (in 1527, in 1550, and in 1560), this book had practically escaped the knowledge of all modern scholars (except Cardinal Pitra) until Mr. Leopold Cohn reintroduced it to the world in an article in the *Jewish Quarterly Review*, 1898. It is a haggadic summary of Bible history from Adam to the death of Saul, full of most interesting visions, prophecies, and legends.

The Latin version, the only form in which the book is known, very much resembles the version of 4 Esd. Four fragments published by the present writer (Prayer of Moses, Vision of Kenaz, Lament of Seila, and Song of David—*Apoc. Anecd. i*) turn out to be extracts from this work of Pseudo-Philo. It is apparently pre-Christian and merits careful study.

12. *Book of Jasher.*—A haggadic commentary upon the Hexateuch, containing ancient elements, but preserved in a mediæval form. There is

16. Jasher. a French translation by Drach in Migne's *Dict. des Apocryphes*, vol. ii.

13. *Book of Noah*.—Haggadic and apocalyptic fragments of this work are incorporated in the Book of Enoch; 17. **Noah**. there is also a Hebrew Midrash under this name printed by Jellinek in *Bet-ha-Midrash*, 3 155, partly based on the *Book of Jubilees*. See Rönisch and Charles, and cp. *APOCALYPTIC*, §§ 24, 57.

14. *Book of Lamech*.—The title 'Lamech' occurs in Greek lists of apocryphal books. A story of Lamech

18. **Lost Books**. which is found separately in Slavonic may or may not be identical with this. There can be little doubt that the old book treated (as the Slavonic one does) of the accidental slaying of Cain by Lamech.

15. *Book of Og*.—In the Gelasian Decree a book is mentioned as 'The Book of Og the giant, whom the heretics feign to have fought with a dragon after the Flood.' It was, according to the present writer's belief, identical with a book *Παγχαρτία τῶν Γγάρτων* or *Treatise of the Giants*, which is mentioned in a list of Manichaean apocrypha by Timotheus of Constantinople (Fabricius, *Cod. apoc. NT* 1 139).

It was no doubt a Jewish haggada, containing, to judge from the title, some stirring incidents. Possibly it may have given a Jewish form of the ancient Dragon-myth of Babylonia, on which see Gunkel (*Schöpfung*).

16. *Penitence of Jannes and Mambres*.—Mentioned also in the Gelasian Decree, and perhaps, like the *Penitentia Cypriani*, a confession of the wicked magical arts of the two Egyptian wizards. See an article by Iselin in Hilgenfeld's *ZIWT*, 1894. There is a fragment (in Latin and Anglo-Saxon) apparently belonging to this book in the Cotton MS Tib. B. V.; but it has not yet been printed.

17. *Esther*. Origen on Romans (92 : p. 646) has the following passage, which clearly refers to a romance about Esther: 'We have found it written in a certain book of an apocryphal nature (*secretiore*) that there is an angel of grace who takes his name from grace. For he is called Ananehel (51 Anahel), which being interpreted means the *grace of God*. Now in this writing it was said that this angel was sent by the Lord to Esther to give her grace in the sight of the king.'

There are, besides, many haggadic histories—e.g., of David, Jonah, the Captivity, and (see *Rev. Sév.*, 1898) the Rechabites—in Syriac, Carshunic, Arabic, and Ethiopic, which are still unpublished; they are to be found in MS at Paris and elsewhere.

See Zotenberg's *Cat. des MSS Syriacques* and *Cat. des MSS Éthiopiennes de la Bibliothèque Nationale*, and Wright's *Catalogues of Ethiopic and of Syriac MSS* in the British Museum. Much Slavonic apocryphal literature also remains unknown to critics, though most of it has been printed. See Kozak's list of Slavonic apocryphal literature in *JPT* xviii., and Bonwetsch in Harnack's *Altchristl. Lit.* 902-917.

II. APOCALYPTIC. 1. *Book of Enoch*; and 2.

19. **Apocalyptic**: *Secrets of Enoch*.—See APOCALYPTIC, §§ 18-32 and 33-41 respectively.

3. *Sibylline Oracles*.—Greek hexameter verse, in fourteen books of various dates. See APOCALYPTIC, §§ 86-98.

4. *Assumption of Moses*.—Quoted in the epistle of Jude, as well as by later Christian writers; extant in Latin, incomplete. See APOCALYPTIC, §§ 59-67.

5. *Apocalypse of Baruch*.—A long and important apocalypse, closely resembling 4 Esdras in style and thought. See APOCALYPTIC, §§ 5-7.

20. **Baruch**, 17, and also below under *Zoroaster*

Jeremiah, etc. (§ 23, no. 15).

6. Other *Apocalypses of Baruch* (a), (b), (c).—As far as is known at present (a) is contained in only a single Greek MS (Brit. Mus. Add. 10,073); edited by M. R. James, *Apoc. Anecd.* ii., with a translation of the Slavonic version by W. R. Morfill: Bonwetsch also has published a German translation of the Slavonic. The Greek text has two Christian passages. In the main it may very well be Jewish and of early date. It contains revelations about the course of the sun and

moon, the history of the Tower of Babel, the Vine (Christian), and the offering of the prayers of men to God by Michael. (c) An Ethiopic *Apocalypse of Baruch*, preserved in a British Museum MS (118 in Dillmann's *Catalogue*) is apparently the production, in part at least, of an Abyssinian Christian. This, or another, is mentioned in Wright's *Catalogue* (No. 27, 6, etc.). A quotation from Baruch not found in any existing book of his, is in the *Altercatio Simonis et Theophilii* (*Text. cu. Unters.* 13), and a larger one in some MSS of Cypriani's *Testimonia*, 329. It is noticed by Dr. J. Rendel Harris in *The Rest of the Words of Baruch*, p. 10.

7. *Reliqua verborum Baruchi* (*The rest of the words of Baruch*), or *Paralipomena Jeremie*.—Greek and Ethiopic. There is hardly anything really apocalyptic in this book, which is a Christian appendix to the *Apocalypse of Baruch*, haggadic in character. It narrates the destruction of Jerusalem by Nebuchadnezzar, the miraculous rescue of Ebed-melech, and the martyrdom of Jeremiah.

Printed first in Ethiopic by Di. (*Chrestomathia Ethiopica*), in Greek by Ceriani (*Gloss. sacr. et prof.*), and lastly in Greek by Dr. J. Rendel Harris (*Rest of the Words of Baruch*, 1909). Harris regards it as an *aitenikon* rebellion by the church of Jerusalem to the synagogue after the Bar-Cochba revolt. It was often printed in variously abridged forms in the *Book Menaea*.

8. A short *Prophecy of Jeremiah* is uniformly attached to the *Epistle of Jeremiah* in Ethiopic MSS of the Old Testament. It consists of only a few lines, and is written to justify the quotation from 'Jeremy the prophet' in Mt. 279. It is addressed to Pashur. Jerome had seen a Hebrew volume in which a similar passage occurred. Dillmann printed it in his *Chrestomathia Ethiopica*, 1866 (p. viii n. 2).

9. *Ascension of Isaiah*.—See APOCALYPTIC, §§ 42-47.

10. *Apocalypse of Elias*, and

11. *Apocalypse of Zephaniah*.

The first of these was supposed to be the source of Paul's quotation in 1 Cor. 29, 'Eye hath not seen,' etc.

21. **Elias**, Alexandria. They both survive in

Zephaniah, etc. two dialects of Coptic. Fragments of

10 and 11 were published by Bouriant in the *Mémoires de la Mission archéologique au Caire*. Stern translated them into German in *ZÄ*, 1886. The whole, with additional fragments, has been edited by Steindorff in Harnack and Gebhardt's *Texte u. Unters.* The

Apocalypse of Elias is fairly complete: the editor assigns only one leaf to the Apocalypse of Zephaniah and a large fragment to an unknown Apocalypse. It is the present writer's belief that this last is from an Apocalypse of Zephaniah. Both are seemingly Christianized forms of Jewish books, containing sections descriptive of heaven and hell, and prophecies of Antichrist, and his conflict with Tabitha and the two witnesses. There is an Apocalypse of Elias in Hebrew and one was printed in Jellinek's *Bet-ha-Midrash* and edited in 1897 by Buttenswieser. A passage from a Gnostic Vision of Elias is quoted by Epiphanius (*Har.* 20 13).

12. *A Revelation of Moses*, containing a visit to the unseen world, has been translated from Hebrew by Dr. Gaster (*JRAS*, 1893).

13. *An Apocalypse of Esdras*, extant in Syriac, edited by Baethgen from a late MS, and published

22. **Esdras, etc.** with a translation in *ZATW* (6 199-210 [86]), is by some thought to be an old Jewish apocalypse which was remodelled in Mohammedan times. There is an Ethiopic *Apoc. of Esd.* in the British Museum (see Wright's *Catalogue*).

14. The same remark applies to a Persian *History of Daniel* edited and translated by Zotenberg in *Merx's Archiv* (1 386), which in its present form is certainly mediaeval. The Armenian, the Coptic, and the Greek *Visions of Daniel*,¹ which are printed respectively by

¹ It may be noticed in this connection that in *SA* of Theodotion's Daniel the whole book is divided into twelve *Visions* (ὄρασεις).

Kalemkiar, by Woide, by Klostermann, and by Vassiliev (*Anecdota Græco-Hispanica*, 1893), are also very late, but contain ancient elements. See on these books W. Bousset's recent work, *Der Antichrist*, and compare ANTICHRIST. It is through by Zahn that Hippolytus commented upon the apocryphal Apocalypse of Daniel as well as on the canonical Apocalypse (*Forschungen*, 5100).

15. *Books of Zoroaster*.—Zoroaster, as we learn from the Clementines (*Recogn.* 129; *Hom.* 94), was identified with Ham, son of Noah; and mystical prophecies, most likely of Jewish origin, were current under both names. Clement of Alexandria quotes a prophecy of Ham (*Strom.* 634^c), and there are oracles of Zoroaster in Greek verse (with commentaries by Gemistius Pletho and Michael Psellus) printed, e.g., in Opsopæus's *Syllogia*, 1607. Zoroaster was also identified by Eastern scholars with Baruch. Solomon of Bassora in the Book of the Bee cites a prophecy of his concerning the Star of the Epiphany (ed. Budge, *circa* 37). The prophecy is, of course, Christian.

16. *Books of Seth*.—The Sethians possessed writings called Books of Seth and others under the names of the *Adopocis* (Ἀδοποκίς), a term which meant the sons of Seth. Hippolytus (*Ref. Hæc.*) quotes much from a Sethian book. *Pseudepigrapha* of this kind, however, to which might be added the prophecies of Parchor (Clem. Alex.), the Gospel of Eve (Epiphanius), and Justin the Gnostic's Book of Baruch (Hippolytus, *Ref. Hæc.* 5), are hardly to be reckoned among apocryphal literature, since there seems to have been in them little or no attempt at verisimilitude of attribution.

17. *Prayer of Joseph*.—Quoted by Origen and Procopius (*in Genesim*). It represented Jacob as an incarnation of a pre-existent angel Israel; in the fragments we possess, Jacob is the speaker. The book extended to 1100 στιχοι, being of about the same length as the Wisdom of Solomon.

18. *Eldad and Medad*.—A prophecy attributed to these two elders (for whom see Nu. 11) is quoted in the Shepherd of Hermas (*Vis.* 234). It consisted of 400 στιχοι (about twice the length of the Song of Solomon).

III. POETICAL. 1. *Psalms of Solomon*.—Greek,

24. **Poetical.** from Hebrew (lost). A collection of eighteen (or nineteen) Psalms. See APOCALYPTIC, §§ 77-85.

2. *Additions to the Psalter*.—(a) Ps. 151, on David's victory over Goliath, is appended to the \mathfrak{C} Version of the Psalter. It is a very simple composition, of some merit. (b) Three apocryphal psalms in Syriac, edited by W. Wright (*PSB.A.*, 1887, p. 257), viz. a prayer of Hezekiah, a psalm on the Return, and two thanksgivings by David on his victory over the lion and the 'wolf.' They are probably Jewish, and of considerable antiquity.

3. *A Lamentation of Job's Wife*, inserted in the \mathfrak{C} text of Job 2, is closely connected with the Testament of Job.

IV. DIDACTIC.—The three main members of this class, the Wisdom of Solomon, Baruch, and the Epistle of Jeremy, have been already noticed (§ 8, 2; § 6, 1; and § 6, 2 respectively). *The Testaments of the Twelve Patriarchs* (see APOCALYPTIC, §§ 68-76) have a large didactic element. Besides these there is little to note, save perhaps certain *Magical Books of Moses*.—Extant in Greek papyri found in Egypt; they have been printed by Leemans and Dieterich (*in Abraxas*). They are not purely Jewish; Jewish names are employed, but there is a large Orphic element. The story of Achiacharus (see ACHIACHARUS) also ought to be mentioned in this place.

Besides the many extant books and titles, there were probably others of which we know nothing; yet it is the belief of the present writer that many more apocalypses at least have been postulated by recent criticism (e.g., Spitta on the Johannine Apoca-

lypse, and Kabisch on the apocalypses of Esdras and of Baruch) than the probabilities of the case will warrant.

B. *New Testaments* (§§ 26-31).

Under this head only a few of the most prominent NT apocrypha can be mentioned; much of this literature is excluded by its late date.

I. GOSPELS. 1. *Gospel according to the Hebrews*.—The relation of this book to the canonical Gospel of Matthew cannot be discussed here (see GOSPELS). The facts known about the book are that it was in Aramaic, that Jerome translated it into Greek and into Latin, and that in his time it was in use among the 'Nazarenes' of Syria. Jerome's versions have perished; but he repeatedly quotes from the Latin one. The fragments preserved by him, by Origen and Eusebius, and by Codex Tischendorf III. of ninth century (566 in Gregory) number about twenty-two. They will be found in Hilgenfeld's *NT extra Canonem receptum*, 4, in the monographs of Nicholson, and Handmann (*Texte u. Unters.*), in Westcott's *Introduct. to the Study of the Gospels*, and in Zahn's *Gesch. des NTlichen Kanons*, 22, etc. The fragments quoted contain additions both to the narrative and to the sayings of Jesus. Some of the sayings differ only in form from similar sayings in the canonical gospels; others are independent. The account of the baptism is distinctly Ebionitic. The longest continuous passage describes the appearance of Jesus to James the Just after the resurrection.

2. *Gospel of the Ebionites or Gospel of the Twelve*.—Epiphanius is the only writer who has preserved us any fragments of this gospel (*adv. Hæc.* 30), and from these it is plain that the book was a 'tendency-writing' put into the mouths of the Twelve Apostles (who describe their call, using the first person), and related to the Greek Matthew. It was naturally strongly Ebionitic, and it began with the baptism.

3. *Gospel according to the Egyptians*.—Probably the earliest Gnostic gospel. A passage is quoted by Clement of Alexandria, who tells us that one Julius Cassianus, a Doctetic teacher, used the same words; they also appear in the so-called second epistle of Clement (of Rome). The passage quoted is Encratite in its bearing.

4. *Gospel according to Peter*.—Of this book we have knowledge from the following sources:—(1) A fragment of a letter of Serapion, Bishop of Antioch (A.D. 200-203), addressed to the church of Rhossus, condemning the gospel (after perusal) as Doctetic (*Eus. HE.* 612). (2) A statement by Origen (*in Matth.* tom. 17¹⁰) that the book represented the brethren of Jesus as sons of Joseph by a former marriage. (3) A long and important fragment, containing an account of the Passion and Resurrection, found by the French Archaeological Mission in a tomb at Akhimm in 1885, published first in their *Mémoires* (1892), and repeatedly since then. Among German editions must be mentioned those of Harnack, of Schubert, and of Zahn; among English ones, those of Robinson and of Swete. The literature is very considerable. The conclusions upon which critics seem agreed at this moment are: that the fragment is Doctetic and anti-Jewish, though saturated with allusions to the Old Testament; and that it shows a knowledge of all four canonical gospels. Its use by Justin Martyr is held probable by most, but denied by Swete (p. xxxiv *f.*).

5. *The Fayûm gospel-fragment*.—Contained in a tiny fragment of papyrus among the Rainer papyri at Vienna; discovered by Bickell. It gives the words of Christ to Peter at the Last Supper in a form which diverges largely by omissions from any in the canonical gospels. Hort contended for the view that it was a fragment of a patristic homily and merely a loose quotation. Ed. Harnack, *Texte u. Unters.* 54, etc.

6. *The Logia*.—This is the name given by the first editors, Grenfell and Hunt, to the contents of a

¹ On these see also GOSPELS (index).

single leaf of a papyrus book found by them at Oxyrhynchus. It contains a small number of sayings of Jesus which in part agree with sayings contained in the canonical gospels and in part differ from them. Harnack believes them to be extracted from the *Gospel according to the Egyptians*; but it is as yet not possible to express a final opinion on their character.

7. *Gospel of Matthias*.—Probably identical with the *Traditions of Matthias*, from which we have quotations. It was most likely a Basilidian work, for the Basilidians professed to regard Matthias as their special authority among the apostles. See Zahn, *Gesch. d. NT Kanons*, ii. 2751.

8. *Évva Mapias* (the Descent of Mary), quoted by Epiphanius (*Hær.* 26¹²), was a Gnostic anti-Jewish romance representing Zacharias as having been killed by the Jews because he had seen the God of the Jews in the temple in the form of an ass.

9. *Zacharias, the father of John Baptist*.—A. Berendts in *Studien zur Zacharias-apokryphen u. Zach.-legende* gives a translation of a Slavonic legend of Zacharias which may be taken from an early book, subsequently incorporated into the *Book of James*.

Almost every one of the apostles had a gospel fathered upon him by one early sect or another, if we may judge from the list of books condemned in the so-called Gelasian Decree, and from other patristic allusions.

Of a gospel of Philip we have fragments, descriptive of the progress of the soul through the next world, showing it to have been a Gnostic composition; it was probably very much like the *Pistis Sophia* (a long Gnostic treatise in Coptic), in which Philip plays a prominent rôle. The *Questions of Mary* (Great and Little) was the title of two Gnostic books of the most revolting type, quoted by Epiphanius (*Hær.* 268).

A Coptic papyrus volume recently acquired by Berlin contains texts as yet unpublished of two Gnostic books connected with the names of the Virgin and John, and also a portion of some early Acts of Peter.

For the most part, however, these heretical pseudographs, where we know anything of their contents, must be assigned to a period later than that contemplated by our present scope. Of extant apocryphal gospels two must be mentioned.

27. Extant Gospels.

1. *Book of James*, commonly called *Protevangelium* (this name being due to Guillaume Postel, who first noticed the book, in the sixteenth century).—Extant in Greek, Syriac, Coptic, etc. A narrative extending from the Conception of the Virgin to the death of Zacharias. The James meant is perhaps James the Just. In one place, where Joseph is speaking, the narrative suddenly adopts the first person. Origen, and perhaps Justin, knew the book. A Hebrew original has been postulated for it. It is undoubtedly very ancient, and may possibly fall within the first century. From it we ultimately derive the traditional names of the Virgin's parents, Joachim and Anne. The work has been edited by Tischendorf (*Evangelia Apocrypha*).

2. *Acts of Pilate*, often called the *Gospel of Nicodemus*.—Greek, Latin, Coptic, etc. In two parts: (1) an account of the Passion and Resurrection; (2) a narrative of the Descent into Hell. Part I. may be alluded to by Justin Martyr, who more than once appeals to Acts of Christ's Passion. It is possible, however, that he may be referring to another apocryphal document which exists in many forms—the *Anaphora Pilati* or official Report of Pilate to Tiberius. In any case, the *Acta Pilati* (Part I.) in some form probably date from early in the second century. Edited by Tischendorf (*l.c.*); see also Lipsius, *Die Pilatusakten*, and Schubert on the Gospel of Peter.

II. ACTS. 1. *Assents of James* (Ἀναβαθμῶν Ἰακώβου), only mentioned by Epiphanius (*Hær.* 30).—An Ebionite and anti-Pauline book of which we most

28. **Acts.** likely have an abstract in the end of the first book of the *Clementine Recognitions*. It contained

addresses delivered by James the Just in the Temple. See Lightfoot, *Galatians*, 330, 367.

2. *Acts of Paul and Thecla*.—Greek, Syriac, etc. Tertullian tells us that this romance was composed in honour of Paul by a presbyter of Asia, who afterwards confessed the forgery (*De Baptismo*, 17); and Jerome, quoting Tertullian (probably from the Greek text of the same treatise), adds the detail that the exposure took place in the presence of John. In the present writer's opinion, this may be a false reading: 'apud Iconium' may have been corrupted into 'apud Johannem.' Undoubtedly the romance is the earliest of the kind which we possess. It details the adventures and trials of a virgin, Thecla of Iconium, who was converted by Paul. Ed. Lipsius (*Acta Petri et Pauli*). Professor Ramsay contends for the historical accuracy of much of the local detail. It is now clear that this episode formed part of the *Acts of Paul* which has just been discovered by Carl Schmidt in a fragmentary form in Coptic. Until the text is published, however, little can be said.

The Acts of Paul, Peter, John, Thomas, Andrew, and Philip have all survived in part. They may be referred to some time in the second century. The author of all of them, save the first and last, was most likely one Leucius. The Passions and Acts of the remaining apostles are all later.

III. EPISTLES. 1. *The Abgarus Letters*.—A letter from Abgar Uchama, king of Edessa, to our Lord, begging him to visit Edessa and take

29. **Epistles.** up his abode there, and an answer from our Lord, promising to send an apostle to Abgarus, are given by Eusebius (*HE* 1¹³), who translates them from Syriac, and derives them from the archives of Edessa. They are very early, and are intimately connected with the legend of the apostolate of Addai or Thaddeus at Edessa. A fragment of a fourth-century papyrus text of the letters (which are very short) is in the Bodleian. They are found also in Syriac.

2. *Epistle of Paul to the Laodiceans*.—Latin. It was founded upon Col. 416, and is a short cento of Pauline phrases. An Epistle to the Laodiceans is mentioned in the Muratorian Canon. See Lightfoot's *Colossians*, 347 ff., and Zahn, *Gesch. d. NT Kan.* ii. 566; also *COLOSSIANS AND EPHESIANS*, § 14.

3. *Epistle of Paul to the Alexandrines*.—Also mentioned in the Muratorian Canon, and nowhere else. Zahn (*l.c.* 58) has printed, from the Bobbio Sacramentary and Lectionary, a lesson purporting to be taken from the Epistle to the Colossians, which he assigns to the Epistle to the Alexandrines, or to some similar Pauline apocryph.

4. *Third Epistle of Paul to the Corinthians (and letter from Corinth to Paul)*.—Armenian and Latin (and Coptic). These are now known to have formed part of the *Acta Pauli*.

There are but few other spurious epistles, and these are all of a distinctly later character.

IV. APOCALYPSES. 1. *Apocalypse of Peter*.—Greek. Quoted by Clement of Alexandria and by the heathen

30. **Apoc-** antagonist of Macarius Magnes (who is
lypses. possibly Porphyry), and mentioned in the Muratorian Canon. We have now a

considerable fragment of it, which was discovered in the same MS as was the excerpt from the Gospel of Peter (see § 26 no. 4). This contains the end of a prophecy of Jesus about the last times, and a vision of the state of the blessed, followed by a much longer description of the torments of various classes of sinners. It was probably written rather early in the second century, and has had an enormous influence on later Christian visions of heaven and hell. Dieterich, in his *Nekyia*, has pointed out the strong influence which the Orphic literature has had on the writer. A trace of the influence of this apocalypse on Latin documents has been recently pointed out by Harnack in the Pseudo-Cyprianic tract *De Laude Martyrii*, and earlier by Robinson in the

Passion of St. Perpetua, and there is a possible trace in the earlier tract *De Aleatoribus*. The Arabic and the Ethiopic *Revelation of Peter on Books of Clement* (see an article by Bratke in Hilgenfeld's *Zeitschr.*, 1893) seem not to contain the old book embedded in them; but as yet they are not very well known. Ed. Dieterich, Harnack, James.

2. *Prophecy of Hystaspes*.—Lost. There are quotations from it in the *Preaching of Paul* (quoted by Clem. Alex.), in Justin Martyr (*Apol.* 130 44), and in Lactantius (*Div. Inst.* 7 15 18). In every case it is coupled with the Sibylline Oracles, with which it is clearly to be associated, as a Christian forgery in pagan form. Ammianus Marcellinus (236) calls Hystaspes a 'very wise king, father of Darius,' Lactantius, 'a very ancient king of the Medes, who has handed down to posterity a most wonderful dream as interpreted by a prophesying boy (sub interpretatione vaticinantis pueri).' The same author represents Hystaspes as saying that the Roman name was to be wiped out, and, further, that in the last days the righteous would cry to God and God would hear them. Justin says that he prophesied the destruction of all things by fire, and the quotation in Clement makes him declare that the kings of the earth should hate and persecute the Son of God—the Christ—and his followers. It is this last passage which fixes the book as Christian rather than Jewish.

V. DIDACTIC. 1. *Teaching of the Apostles* (Didaché).—Greek. The literature of this manual of ethics and church discipline is enormous, and the history of its various forms cannot be

applied here. It was discovered by Philotheos Bryennios in a MS of 1056 at Constantinople, and printed first in the year 1883. It consists of two distinct parts: the first an ethical manual which may be founded on a Jewish document, and reappears in the *Epistle of Barnabas*; the second relating to church matters, containing disciplinary rules and liturgical *formulae*. Opinions as to its date differ widely. Harnack would assign it in its present form (which is probably not primitive) to 130-160. It forms the groundwork of the 7th Book of the Apostolic Constitutions.

2. *Preaching of Peter*.—Apparently an orthodox second-century book, of which Heracleon and Clem. Alex. have preserved important fragments containing warnings against Judaism and polytheism, and words of Jesus to the apostles. Another set of fragments, which there is no sufficient reason for repudiating, contains a lament of Peter for his denial, and various ethical maxims. There are strong similarities between the first set of fragments and the *Apology of Aristides*. Dobschütz (in a monograph in *Texte u. Unters.*) rejects the second set. The relation of the book (a) to a supposed *Preaching of Paul*, the existence of which is very doubtful, and (b) to the Pseudo-Clementine literature, is by no means clear. A Syriac *Preaching of Simon Cephas*, published by Cureton, has none of the matter appearing in the quotations from the Greek book.

32. **Bibliography.** For the books noticed above, and the later documents not named (which are many), the student must consult—

Editions of individual writings have been specified under their proper headings.

M. R. J.

APOLLONIA (ΑΠΟΛΛΩΝΙΑ [Ti. WH]). A town on the Egnatian Road, in that part of Macedonia which had the name Mygdonia and lay between the rivers Strymon and Axios. It was near Lake Bolbe (*Betschik Göl*); but its exact site is not yet known. From the

Ilin. Ant. we learn that it was 30 R. m. from Amphipolis, and 37 from Thessalonica. Lenke places it to the S. of the lake, at the modern village *Folina*; and this is probably right, though others are inclined to look for it more to the W. at the post-station of Klisali, which is seven hours from Thessalonica. Apollonia was at any rate on the main road between Amphipolis and Thessalonica by the Aulon, or pass of Arethusa. Paul and Silas, therefore, 'passed through' the town on their way to Thessalonica (*Acts 17:1*).† W. J. W.

APOLLONIUS (ΑΠΟΛΛΩΝΙΟΣ [VA]; ΑΠΟΛΛΩΝΙΟΥΣ; ܐܦܘܠܠܘܢܝܘܨ).

1. (Son of) THRASEAS [*g. v.*]; the governor of Cælesyria and Phœnicia who, according to 2 Macc. (35-44), induced Seleucus IV. to plunder the rich temple treasury of Jerusalem (see HELIODORUS). He may possibly be the same as—

2. The governor of Cælesyria under Alexander Balas, who came to the help of Alexander's rival, Demetrius II. (Nikátor), who made him chief of the army. This is more explicable if, as in Polyb. xxxi. 212, Apollonius was the foster-brother (*σύντροφος*) of Demetrius I. He was besieged at Joppa, and was entirely defeated by Jonathan near Azotus (Ashdod) in 147 B. C. (1 Macc. 10 69 ff.). Jos. (*Ant.* xiii. 43) calls him Δαός (or rather Ταός, Niese)—*i. e.*, one of the Dai (the classical Dahæ) on the E. of the Caspian Sea—and erroneously represents him as fighting on the side of Alexander Balas.

3. General of Samaria, one of the officers of Antiochus Epiphanes, beaten and slain by Judas the Maccabee, 166 B. C. (1 Macc. 3 30 ff.). He is probably the chief tax-commissioner (*ἀρχὴν φορολογίας*), who previously (168-167 B. C.) had been sent to hellenize Jerusalem, and by taking advantage of the sabbath had routed the Jews and occupied a fort there (1 Macc. 1 29 ff. 2 Macc. 5 24 ff.). He may perhaps be identified with—

4. The son of Menestheus sent by Antiochus Epiphanes to congratulate Ptolemy VI. Philometor on his accession (*δια τὰ πρωτοκλήσια*: 2 Macc. 4 20).

5. Son of GENNEUS (6 πύτ Γενναίου); a Syrian general under Antiochus V. Epipátor (2 Macc. 12 2).

APOLLOPHANES (ΑΠΟΛΛΟΦΑΝΗΣ [VA]; Συγ. has ܐܦܘܠܠܘܢܝܘܨ, Apollonius?), a Syrian slain by the men of Judas the Maccabee (2 Macc. 10 37).

APOLLOS (ΑΠΟΛΛΩC [Ti. WH]), according to 1 Cor., our most important source, was a missionary

1. **In 1 Cor.** and teacher who continued Paul's work in Corinth after the first visit of the latter (36), and was afterwards his companion in Ephesus, though not perhaps at the time the Epistle was being written (see *hp* in 16 12). Shortly before the writing of the First Epistle four parties had arisen in Corinth (1 10-12), one of which claimed to be 'of Paul,' and another 'of Apollos'; it argues, therefore, delicacy of feeling in Apollos that he did not comply with Paul's invitation to revisit Corinth again. The invitation itself, on the other hand, makes it plain that there were no very fundamental differences between the two men, least of all as to doctrine. Yet neither is it conceivable that the party-division turned upon nothing more than the personal attachment of their individual converts to the two men respectively. On that supposition there would be nothing so blameworthy about it; and it would be impossible to explain the existence, alongside of them, of the party of Christ, and still more of that of Peter. Our earliest authority for Peter's ever having been in Corinth at all is Dionysius, bishop of Corinth about 170 (Eus. *HE* ii. 258), who, contrary to all the known facts of history, will have it that Peter

† By contraction, or rather abbreviation, (*ὅτι Ζηνὸς* from Ζηνόδοτος, Ἀλέξανδρος from Ἀλεξάνδριος, and so on (cp NAMES, § 86, note)). The fuller form is more probably Ἀπολλωνιάδης than Ἀπολλωδότης, of which the usual contractions were Ἀπολλῶδης, Ἀπολλῶδης, or Ἀπολλῶδης. The reading Ἀπολλωνιάδης is actually given by D in *Acts 18:24*. By analogy the accentuation Ἀπολλῶδης ought to be preferred to the currently adopted Ἀπολλῶδης.

came both to Corinth and to Italy simultaneously with Paul. Thus the formation of an Apollos party, as distinguished from the party of Paul, can have been due to the individuality and manner of teaching of Apollos. Paul finds it necessary to defend himself against the charge that 'wisdom' is absent from his teaching. His answer (17-34) is that in substance 'wisdom' is really contained in the simple preaching of the Cross, but that in form he offers it only to Christians of mature growth, and (this not being the Corinthians' case) that he has purposely kept it in the background in his dealings with them. The teachers who offered 'wisdom,' and thus excelled Paul in the eyes of many of the Corinthians, however, were assuredly not the Judaizers among whom the parties of Christ and of Peter found their supporters. Apollos, therefore, must be meant. Paul actually says that on the foundation laid by himself in Corinth, besides the gold, silver, and precious stones, wood, hay, and stubble have been built (3:12). But the energy with which he pronounces his judgment in 19 f. 29 25 can be explained only by the fact that the adherents of Apollos overvalued their teacher and subordinated substance to form.

With this agrees the notice in Acts 18:24-28 (our secondary source; see ACTS),¹ that Apollos was an

2. In Acts. eloquent man, mighty in the Scriptures, and an Alexandrian Jew. We may accordingly assume that the distinguishing quality in Apollos' teaching of 'wisdom' showed itself in an allegorising interpretation of the OT, such as we see in Philo or in the Epistle of Barnabas. But the fact that he was a Christian and taught the doctrine of Jesus 'exactly' (ἀκριβῶς; 18:25b) contradicts the statements (on the one hand) that he knew only the baptism of John (18:25c) and (on the other) that he had to be instructed more perfectly in Christianity by Priscilla and Aquila (18:26c). Whilst, therefore, it is possible for us to regard 18:24, 25a, b as derived from a written source which the compiler had before him, 18:25, 26b, c would seem to be later accretions. The effect of these last expressions (even if they are traditional) is to represent Apollos as subordinate to Paul; for, according to 19:1-7, the rest of the disciples of John must receive the gift of the Holy Ghost for the first time at the hands of Paul. As to the rest, the fact that in 19:1-3 mention is made of these as of something new goes to show that originally in 18:25 there was no reference to a disciple of John. Further, Acts 18:28 is not easily reconcilable with what is said in 1 Cor. 3:6; that the mission of Apollos was directed to the same persons as that of Paul, and that the church of Corinth consisted almost entirely of Gentile Christians (1 Cor. 12:2 compared with 7:18). In that case Acts 18:26a may be attributed to the same author to whom 18:28 (and 18:25, 26b, c?) must be ascribed.

Of the most recent attempts to deny the existence of the contradictions indicated above none can be pronounced successful. Bliss's *Exp. Times*, 7, 1897-98, pp. 124, 127, 128, and *History of the Gospels*, 1898, p. 30 f. supposes Apollos to have derived his knowledge of Christianity from a book where, as in the second canonical gospel, the baptismal precept was wanting. Arthur Wright (*Exp. Times*, 9, 1897-98, pp. 8-12, 437 f.) replies, with reason (as it seems to us), that such use of a book could not have been intended by the word *κατηχησάου*. It is only of *ἀκούσας* that Bliss has been able to show that in some few cases it is practically equivalent to 'learning by reading' (see the examples, in Stephanus, *Theo.* I, Paris, 1831, p. 1265 A and B. They are not, however, all of them quite certain. Nor is Jn. 12:34 a case in point; the meaning is 'Our teachers have read in the law, and have told us by word of mouth that the Christ abideth for ever'). No single instance can be adduced in which *κατηχησάου* denotes acquisition of knowledge without intervention of a teacher. In particular, in Rom. 2:17, f. the meaning is, 'thou bearest the name of a Jew and . . . provest the things that differ, being instructed out of the law' [by frequenting the synagogue, or the instruction of the scribes]; and even in those cases where *ἀκούειν* has practically the sense of 'read,' the underlying idea is always that the book is read not by the 'hearer' himself, but by some other person, as for example, a slave, so that the primary sense of the word has never entirely disappeared. In the case of Apollos, however, the idea that he

used a Christian book, not however reading it himself but getting it read to him by some other person, is too far-fetched to be brought into requisition here. To the suggestion (referred to by Bliss's *Acta Apostolorum*, ed. Philon. 1895, ad loc.) that Apollos may have been orally instructed by a man whose knowledge of Christianity in its turn was limited to the contents of a book from which the baptismal command was absent, it has to be replied that the supposition is irreconcilable with the *ἀκριβῶς* of Acts 17:25. Wright himself, however, contributes nothing new to the solution of the question, except the suggestion of ἀκούειν into ἀκρωλείν (so D), the verb being then taken as meaning 'to repeat by rote' or at least 'to glibly recite.' Even if such a meaning could be established for the word, it would not nearly suffice to remove the difficulties of the passage. Lastly, Baldensperger (*Dev. Prolog. des 4. Evangeliums*, 1866, pp. 93-99) is constrained to take refuge in the view that what Apollos taught *κατηχησάου* consisted only of Messianic matters as enumerated in such passages as Heb. 6:1; that the editor of the source of Acts here employed *σὰς τὰ πρὸς τὸν Ἰησοῦν* only from a point of view of his own, meaning all the while not the historical Jesus but simply the Messiah in the larger sense, in whose coming the disciples of John also believed. If this be so, he could not possibly have expressed his meaning in a less appropriate and more misleading way.

Tit. 3:13, the only other NT passage in which Apollos is named, cannot be used as a historical source; and

3. Other points. there is no ground for the conjecture that what constituted the difference between Apollos and Paul lay in the value attached by the former to the administration of baptism with his own hands (1 Cor. 13:17), and that thereby he gave an impulse to the practice of baptism for the dead (1 Cor. 15:29). Paul, indeed, regards the church of Corinth, although he has personally baptized hardly any of its members, as wholly his own (1 Cor. 4:15 and often). On the other hand, the hypothesis put forward by Luther (as having already been suggested somewhere) that Apollos wrote the Epistle to the Hebrews is, at all events, preferable to any other that ventures to condescend on a name.

In the lists of 'the Seventy' (Lk. 10:1), dating from the fifth and sixth centuries, Apollos is enumerated, and has the diocese of Caesarea assigned to him (*Chron. Pasc.* Bonn ed., i. 442, ii. 126). P. W. S.

APOLLYON (ΑΠΟΛΛΥΩΝ [Ti. WH]). Rev. 9:11. See ABADDON.

APOSTLE (ΑΠΟΣΤΟΛΟΣ, 'a messenger')² was the title conferred by Jesus on the twelve disciples whom

1. The Twelve. he sent forth, on a certain occasion, to preach and heal the sick. In the earliest Gospel tradition the disciples appear to be spoken of as apostles only in reference to this special mission (Mk. 3:14 [NB]; Lk. 6:13, up Mt. 10:2; and Mk. 6:30 = Lk. 9:10); but the name soon became a customary designation, and is so employed in Lk. (17:5 24:10) and Acts (12, etc.). The number twelve was symbolical, corresponding to the twelve tribes of Israel; and when Judas fell from his 'apostolate' (Acts 1:25) the number was restored by the election of Matthias.³ It is used in this symbolical and representative sense in Rev. 21:14. *Lists of the Twelve.*—In the four lists (Mt. 10:2 Mk. 3:16 Lk. 6:14 Acts 1:13) the names fall into three groups of four names, the first name in each group being constant, while the order of the rest changes. Thus:—

I. Mk.	Peter	James	John	Andrew.
Mt. Lk.	Peter	Andrew	James	John.
Acts	Peter	John	Mt.	Andrew.
II. Mk.	Philip	Bartholomew	Matthew	Thomas.
Mt.	Philip	Bartholomew	Thomas	Matthew.
Acts	Philip	Thomas	Bartholomew	Matthew.
III. Mk. Mt.	James	Thaddeus	Simon	Judas.
	of Alphaeus		Cananana	Isariot.
Lk. (Acts)	James	Simon Zelotes	Judas of Alphaeus	Judas Iscariot.

Mark's order of the first group recurs in Mk. 13:3. It puts first the three who were selected as witnesses of the raising of Jairus's daughter (Mk. 5:27), of the Transfiguration (9:2), and of the Agony (14:33). Their importance is further marked by surnames given by Jesus, Peter (=Cephas) and Boanerges. Mt. and Lk.

¹ Bliss now (*Phil. of Gospels*) expressly rejects the idea. ² *ἀπόστολος*, a stronger word than *εἰρημολός*, properly denotes not a mere messenger, but rather the delegate of the person who sends him. It seems to have been used among the Jews of the fourth century A.D., of persons sent on a mission of responsibility, especially for the collection of moneys for religious purposes. ³ On this subject, see MATTHIAS, I.

¹ The reference to Acts 18:24-28 occurs in § 11.

drop the Aramaic surname Boanerges, and class the brothers together ('Peter and Andrew his brother'). In Acts the order is accounted for by the prominence of Peter and John in the opening chapters. This seems to have had a reflex action on the writer's mind, for in Lk. 8:51-9:28 we have 'Peter and John and James, though where Peter is not mentioned we have 'James and John, 9:54.

The original significance of the τ μ (delegate or missionary) is recalled by its application to Barnabas and Saul (Acts 14:14), who had been selected

2. Paul. under the direct guidance of the Spirit from among the prophets and teachers of the church of Antioch and sent forth on a mission. enterprises. Paul in his epistles defends his claim to be an apostle in the highest sense, as one directly commissioned by God; and in this connection he emphasises his personal acquaintance with the risen Christ (Gal. 1:12 Cor. 11:5 1 Cor. 9:1: 'Am I not an apostle, have I not seen Jesus our Lord?'). As 'apostle to the Gentiles' (Rom. 11:13) he received full recognition from the chief apostles in Jerusalem (Gal. 2:7-9).

The stress laid by Paul on his own apostolate, as 'not a whit behind that of the Twelve, was probably a main factor in the subsequent restriction of the title to the original apostles and himself.

3. Others. In the NT, however, it is certainly applied to Barnabas, as we have seen, and almost certainly to Silvanus (1 Thess. 26), Andronicus, and Junias (Rom. 16:7)—apart from its more limited reference in the case of the 'apostles of the churches' (2 Cor. 8:23) and Epaphroditus (Phil. 2:25 'your apostle'). Moreover, we see it claimed in the church of Ephesus by certain persons to whom it is denied only after they have been tested and 'found false' (Rev. 2:2).

Rules for deciding the validity of such claims are given in the early medieval canon, *The Foundation of the Apostles*. This book, which shows us a primitive type of Church life existing in the locality in which it was written, confirms the view suggested by the NT of the extension of the title of apostle beyond the limits of the Twelve and Paul. Apostles are here spoken of as teachers essentially itinerant; ranking above the prophets who may or may not be settled in one place, and in no specified relation to the bishops and deacons who are responsible for the ordinary local administration of the community. Even as the first apostles were sent forth 'without purse or scrip,' so these, 'according to the ordinance of the gospel,' move from place to place, and are not to remain in a settled church more than two days, nor to receive money or more than a day's rations. These wandering missionaries are referred to by Eusebius as 'holding the first rank of the succession of the apostles' (HE 3:37:5:10; he avoids the actual designation 'apostle,' perhaps in deference to later usage); and the strict regulations in the *Teaching* prove that there was a danger lest the frequency of their visits should become burdensome to settled churches.

It is interesting to observe that the tradition of the application of the title to missionaries survives at the present day in the East. Among the Greeks the word for a missionary is ἀπαπόστολος, and the delegates of the Archbishop of Canterbury's mission to the Nestorians are regularly called apostles by the Syrians of Urm.

Having thus clearly established the wider use of the term 'apostle,' we must return and consider the uniqueness of the position occupied by the

4. Apostolate. Twelve and Paul, to whom *par excellence* the title belongs. The distinction of their office which first comes under notice is that they were witnesses of the Resurrection. This is emphasised at the election of the new apostle in Acts 1:21 f. 'Of the men which have accompanied with us all the time that the Lord Jesus went in and out among us, one of these must with us be a witness of his resurrection.' Their personal discipleship to Jesus, however, and the special training which he had bestowed upon them, had fitted them to be not only the preachers of faith and repentance to the multitudes, but also the authoritative instructors of the 'brethren' (cp Acts 2:42 'the apostles' doctrine'). Their commission was derived directly from Christ, even as his was from the Father (Jn. 20:21, and cp 1 Clem. 45: 'Christ then is from God, and the apostles from Christ'). In performing cures they lay stress upon the fact that they are his representatives; their acts are in fact his (cp especially Acts 3:16-9:34). Certain functions are in the first instance

exercised exclusively by the apostles: as the laying on of hands, to convey the Pentecostal gift to the baptized, and the appointment of local officers in the church. In the earliest stage, too, the contributions of wealthy believers are laid 'at the apostles' feet': though at a later time it is 'the presbyters' who receive the offerings made for 'the brethren in Judaea' (Acts 4:34 f. 11:30).

The authority implied in their commission is nowhere formally defined; but on two important occasions we are permitted to observe the method of its exercise. Thus, in the appointment of the Seven the apostles call on the whole body of believers to elect, and thereupon themselves appoint the chosen persons to their work by a solemn ordination. Again, when the question of the obligation of Gentile believers to observe the Mosaic ritual arises in Antioch, it is referred to 'the apostles and elders' in Jerusalem (see COUNCIL, ii.), and a letter is written in their joint names ('the apostles and elder brethren'). This letter is couched in terms of authoritative advice rather than of direct command; and the authority which it implies, with regard to the distant communities whose interests are involved, is moral rather than formal.

In the churches of Paul's foundation we find that apostle acting with a consciousness of the fullest authority, in appointing presbyters, conveying the gift of the Spirit, and settling all kinds of controverted questions (Acts 14:23 19:6 1 Cor. 7:17). His relation to the Twelve is marked by a firm sense of independence together with an earnest desire for concerted action. In the case of Timothy at Ephesus and of Titus in Crete we see him delegating for a time during his own absence his apostolic authority.

For the relation of the apostolate to other forms of the Christian ministry, see CHURCH, § 12.

Bishop Lightfoot's note 'on the name and office of an Apostle' (Comm. on Gal. 2:1 ed. 32-33) had, even before

Literature. the recovery of the *Teaching*, destroyed the fiction of the limitation of the term in the first age. It needs now to be supplemented by Harnack's important discussion, *Lehre der Apostel*, 93-118. The whole subject has been freshly and vigorously treated by Hort in *Ecclesia* (Passim). J. V. R.

APOTHECARY (אָפּוֹטֵקָר Ex. 30:25 35, אָפּוֹטֵקָר Eccl. 10:1).

The Heb. word means 'perfumer.' See CONFECTION, PERFUME. ὁ's term is μυρεψός, the medical or magical aspects (see φαρμακία, -κευσι, -κον in ὁ) of whose trade may be seen in Eccl. 38, where his skill in compounding the medicines (v. 4 φαρμακία, medicamenta) that the Lord created out of the earth is referred to. In Neh. 3:8 is mentioned a guild of perfumers, one of the 'sons' or members of which was Hananiah (the idiom is given in RV, and misinterpreted in AV, which gives 'son of one of the apothecaries').

APPAIM אֲפַיִם: ΕΦΡΑΙΜ [P]; ΑΦΦ [A]; ΩΦΕΙΜ [L], a Jerahmeelite (1 Ch. 2:30 f.).

APPARITION (ΦΑΝΤΑΣΜΑ), Mt. 14:26 RV. See DIVINATION, § 3 (33 SOUL).

APEAL On inferior and superior courts, or what might be called courts of review or of appellate jurisdiction in the Hebrew commonwealth, see GOVERNMENT, §§ 19, 31, and LAW AND JUSTICE, § 19. As regards Roman criminal procedure,—the appeal of Paul to Cæsar is best understood from the narrative of Festus to Agrippa (Acts 25:14-21). Accused by his compatriots in 'certain questions of their own superstition,' and asked whether he was willing to go to Jerusalem and there be judged, he had 'appealed' (ἐπικαλεσαμένου) to be reserved for the hearing (διδάσκων, cognitionem) of Cæsar. The apostle as a Roman citizen was well within his rights when he invoked the authority of the emperor and thereby virtually declined the jurisdiction alike of the Jewish courts and of the Roman procurator; and his reasons for choosing to do so are not far to seek.—Under the republican procedure every Roman citizen had the right of *provocatio*

ad populum. From the time of Augustus the populus ceased to exercise sovereign criminal jurisdiction; the emperor himself took cognisance of criminal cases as a court of first instance, having co-ordinate jurisdiction with the senate.—The *questio* procedure continued as before to be the ordinary mode of trial.

APPHIA (Ἀπφία [Ti. WH], etc., *APPĪA*, etc. Cp especially Light. *Col.* and *Philem.* 372 ff.), probably the wife of Philemon (*Philem.* 2).

APPHUS (Ἀφφύους [A.], *SAFFUS* [NV]), 1 Mac. 2.5. See JONATHAN, 18. MACCABEES, § 5.

APPĪI FORUM, RV 'Market of Appius' (Ἀππιῶν φόρον [Ti. WH]; modern *Via Appia Appio*), a well-known halting-place on the *Via Appia*, where Paul was met by brethren from Rome (*Acts* 28.15). The distance from Rome is given in the *Itin. Anton.* (107) as 43 R. m. (and so perhaps *It. Hier.*—e.g., Migne, *PL.* 8.794; but in other edd. [611 f.] as 37).

For inscription on κλιῖη milestone, found near Foro Appio, see *CIL.* x. pt. i. 686. The road leading to Appii Forum from the south through the district of the Pontine Marshes was often abandoned in favour of a journey by boat (cp *Horace, Sat.* i. 5.400, where Appii Forum is described (e.g.) as being 'Diferentia nautis, cauponibus atque malignis.' See also THREE TAVERNS.

APPLE (ἄππῆ); Pr. 25.11 Cant. 2.35 78[9] 8.5 Joel 1.12†, see also FRUIT, § 12), by some understood as a generic name including various fruits, and

1. Name. by others supposed to mean not the apple but the quince, citron, or apricot. The origin of the Hebrew name is not quite certain; but there seems no sufficient reason for rejecting the accepted derivation from *מָנָה*, to breathe;¹ the name thus alludes to the perfume of the fruit. *מָנָה* in post-biblical Hebrew, and the corresponding word *tuffāh*² in Arabic, ordinarily denote the 'apple'; and this rendering is, so far, supported by the ancient versions—Greek, Syriac, Arabic, Latin, and the Targum. It must be admitted, however, that all the words used—*μήλον*, *hazzōrā*,³ *מָנָה*, *tuffāh*, *malum* (s. *pomum*)—are capable, with or without the addition of an epithet, of being applied to other fruits; *μήλον*, indeed, originally meant 'large tree,' or fruit in general, and only gradually became confined to the apple;⁴ cp the very wide use of *pomum*, *poma* in Latin. Still, an examination of the biblical passages where *מָנָה* occurs seems to show that some particular fruit is intended; and the question must be answered by considering (1) which kind of fruit possesses in the highest degree the qualities of beauty of colour and form, of fragrance, and of efficacy in overcoming the feeling of sickness; and (2) which fruit-tree was most likely, under the conditions of climate and of botanical history, to be found abundant in Palestine during biblical times. [Though all the six occurrences of *מָנָה* are possibly, not to say certainly, post-exilic, the antiquity of the cultivation of the tree (or class of trees?) in Palestine is proved by the place-names Tappuah and Beth-Tappuah.]

The following identifications have been proposed:—(1) apricot (Tristram, *FFP* 294); (2) apple (especially

WRS, *J. Phil.* 1365 f.); (3) citron or orange (Del. *Comm. on Prov.*); (4) quince (Houghton, *PSBA* 12.42-48 [1889-90]).

¹ It seems doubtful whether there was, as postulated by Löw (*Arabis, Pflanzennamen*, 156) and Houghton (*PSBA* 12.47 [1889-90]), any word *מָנָה* to swell, even in Rabbinic Hebrew. It is at all events unknown to biblical Hebrew, to Syriac, and to Arabic. See, further, Lag. *Uebers.* 111, 129; and F. Hommel, *Antiquities u. Abhandl.* 107, and in *ZDMG* 44.520 (190).

² This must be a loan-word in Arabic (Fränkel, *Arabisch. Fremdw.* 140), probably from Aramaic, though no trace of it has yet been found in Syriac.

³ Lag. is inclined to derive this, the Aramaic equivalent of *מָנָה*, from the Armenian word for apple (*hntar*) and thus prove that the fruit-name to Semite lands from Armenia (*Uebers. II.* cc.); but Hommel shows the probability of the word being genuinely Semite, connecting it with an Arabic root *ʿanaza* (*Aufsätze u. Abhandl.* 107).

⁴ Hehn and Stallybrass, *Wanderings of Plants and Animals*,

1. With regard to the first of these—the apricot (*Prunus Armeniaca*, L.)—it is to be remarked that it is not mentioned by Theophrastus, and does not appear to have been known to the Greeks or the Romans before the commencement of the Christian era (De C. *Orig.* (2) 171).

Its original home was E. Asia (probably China), whence it gradually spread westward to Armenia (μήλον Ἀρμενιάκον, *malum armeniaticum*); but Tristram is certainly wrong in saying (*Nat. Hist.* 335) that it is native there.

The present abundance of the apricot in Palestine is almost certainly post-biblical.

2. The apple—*Pyrus Malus*, L.—is found without doubt in a wild state in Northern Asia Minor, especially about Trebizond, and occasionally forms small woods.

It extends eastwards to Transcaucasia, and apparently to Persia (cp Boissier, *Fl. Orient.* 265f.). Sir Joseph Hooker says that it is 'apparently wild' in N.W. Himalaya and W. Tibet, but that everywhere else in India it is cultivated (*Jl. Brit. Ind.* 2.373). De Candolle (*Orig.* 180) thinks the apple was indigenous and cultivated in Europe in prehistoric times; but Boissier (*l.c.*) restricts its natural occurrence to Macedonia and Euboea.

In any case the original apple clearly required a cool climate. Under cultivation there have been obtained varieties which will tolerate and even require a warmer one;¹ but these are notoriously modern inventions, and it is absurd to take account of them in considering the ancient history of the fruit. In truth the original apple—and the apple of biblical times was presumably somewhat similar—cannot have been very attractive: it was in fact a 'crab' only about an inch in diameter.

Sir Joseph Hooker says (from his own knowledge) 'Palestine is too hot for apples.' With this agrees Tristram's account:

'Though the apple is cultivated with success in the higher parts of Lebanon, out of the boundaries of the Holy Land, yet it barely exists in the country itself. There are, indeed, a few trees in the gardens of Jaffa; but they do not thrive, and have a wretched, woolly fruit. Perhaps there may be some at 'Askalan'. What English and American writers have called the "apple," however, is really the quince. The climate is far too hot for our apple tree' (*NHB* 334 f.).

As there is no evidence of the apple ever having been found native in Syria, those who render *tappuah* 'apple' have to show (1) that it was introduced from without (Pontus), and (2) that it became established when introduced. Both propositions are improbable. What is said above of the introduction of a few modern sorts into Syrian gardens is true;² but it is impossible to infer from this fact that the biblical *tappuah* was the apple.

The strongest argument for the apple is that *tuffāh* is used in modern Arabic for this fruit; but, as we have seen above, the word may have wider significance, and it is exceedingly probable that in such passages as those quoted by Robertson Smith in an article (*Journ. Phil.* 65 f.) which, though short, appeared to him (prematurely?) to be almost decisive, it is really the quince that is meant. Even if 'apple' be the usual modern meaning of *tuffāh*, it is far from uncommon in botanical history for a name to pass from one to another of two plants so nearly allied as the quince and the apple.

[J. Neil (*Pal. Explored*, '82, p. 186) differs widely from Prof. G. Post of Beyrout (Hastings, *DB*, 'Apple'), who argues that the apple as grown in Palestine and Syria to-day alone fulfils all the conditions of the *tappuah*.

Post remarks, 'almost all the apples of Syria and Palestine are sweet (Cant. 2.5). To European and American palates they seem insipid. But they have the delicious aroma of the better kinds. . . . Sick persons almost invariably ask the doctor if they may have an apple; and if he objects they urge their case with the plea that they only want it to smell.' This being so, it is needless to conjecture that 'such an epicure as Solomon would have had many of the choicest kinds', for, according to Post, the 'ordinary and (to us) disappointing Syrian apple can still, without poetic idealisation, be referred to in the language of Canticles. But was Canticles written for Syria?]

3. No citrus (orange or citron) will do. The citron has its home in the sub-Himalayan tract of N.

¹ Thus the best American apples succeed in Great Britain only under glass.

² Similarly, in the Deccan four sorts of apples are now found; but these are all introduced, two from England and two from Persia.

to mean a district rather than a town, and in this connection it is interesting that A^{B} renders 'Ar Moab' in Is. 15 by Moabitis. Our present knowledge of the topography of Moab does not enable us to identify the site of 'Ar, the city.

We may be sure it was not the modern Raiba (so the *PEF* map), the Anopolis which in the fourth century of our era was the capital of Moab. Others have suggested the Medinet el-Haj on the left bank of the Arnon opposite Aroer (see Burckhardt, *SP*, 394).

More probably (cp Nu. 22:36) it lay at the E. end of one or other of the Arnon valleys.

There Langer (*Reisebericht*, vii.) has proposed Lejin (Legio?) described in Doughty's *Notes* (*Diary*, 1, 103) as 'a turreted, limestone-built, walled town in ruins, the walls and corner towers of dry block-building, at the midst of every wall a gate.'

G. A. S.

ARA (אָרָה; אַרָּא [BA] אַי [L]), in a genology of ASHER $\text{g. v. 1, } \S 4$, U Ch 7 v. 7 . Perhaps אָרָּא should be pronounced אָרָּא, U Ch 7 v. 7 . See U Ch 7 v. 7 .

ARAB (אַרָּב, אֲרָבָה [B], אַרְבַּי [AL]), a site in the hill-country of Judah (Josh. 15:52). If DUMAH (*g. v. 4*) is ed-Dōmeh, there may possibly be an echo of Arab in *er-Rābiyeh*, the name of a site, with ruins, in the mountains of Judah, S. of Hebron (*PEF Mem.* 3:31).

ARABAH (הָעֲרָבָה, Η ΑΡΑΒΑ [BAL]), often translated by Η ΠΙΠΡΟΣ (εἶς, εἶη, κατα) ΔΥΣΜΑς, sometimes by ΚΑΘ' ΟΥΠΡΟΣ ΕΥΣΤΕΡΑΝ [BAL], as a common noun, from a root probably meaning 'dry' (cp ARABIA, § 1), is used as a parallel (Is. 35:6, etc.) to עֲרָבָה, 'desert-steppe,' and to עֲרָבָה, 'parched ground,' with much the same force. As a proper name, with the article, it is generally confined to the great depression of the Dead Sea valley, 'the 'Arābah.' So correctly in RV; in AV it is more usually translated 'plain' (*g. v. 6*) or 'wilderness' (but in Josh. 18:13 'Arābah.' G^{BAL} Βαβαραβα, see BETH-ARABAH). Along with the hill-country, the slopes, the Shephelah, and the Negeb, it is reckoned as one of the great parallel divisions of the land (Dt. 17 Josh. 11:6 12:8), and it is clear that the name was applied not only to the depression from the Lake of Galilee (Dt. 3:17; cp ARBATTINE to Jericho (2 K. 25:4) and the Dead Sea (which was called the Sea of the 'Arābah': Dt. 4:49, etc., Josh. 3:16, etc.), but also to the rest of the same great hollow as far as the Gulf of 'Akābah (Dt. 1:1).

Different parts of the 'Arābah were called 'Arbōth (construct plur. of 'Arābah); cp Josh. 5:10 Jer. 39:5, etc., EV 'plains of Jericho'; Nu. 22:1 26:3, etc., 'plains of Moab.' See too ARBATTINE.

To-day the name *El-Araba* is confined to the south of the line of cliffs that crosses the valley obliquely a few miles south of the southern end of the Dead Sea; and all N. of this is known as *El-Ghor*, 'the depression' (Rob. *BR* 249a).

The singular geological formation of the 'Arābah is indicated under PALESTINE (§ 3). Here it is sufficient to explain how such a name was applied to the valley even N. of the Dead Sea. In spite of the enormous possible fertility of the Jordan valley under proper irrigation, the vast stretches of jungle, marl, saline soil, and parched hillsides out of reach of the streams, along with the sparseness of cultivation in most ages (owing to the great heat, unhealthy climate, and wild beasts), fully justify the name 'Arābah. In the NT also the valley is called a wilderness (ἡ ἐρήμος Mk. 14).

For the 'Arābah S. of the Dead Sea, see Rob. *BR* i. and ii., Hull, *PEF Mem.*, 'Geology,' and for the part N. of the Dead Sea, Stanley, *SP* 7; Comber, *Tent Work in Pal. 14*; GASM. *IG* 22.

G. A. S.

ARABAH, BROOK OF THE, AV River of the Wilderness (הַנָּחַל הָעֲרָבָה), is in Am. 6:14 the southern limit of the land of Israel in opposition to the northern Pass of Hamath. The name occurs nowhere else; but by some has been taken as another form of Brook of the 'Arābim (עֲרָבִים); EV BROOK OF THE WILLOWS [AV^{ms} BROOK OF THE ARABAHS]—rather of the *Populus euphratica*: ZDPV 2 209),

given in Is. 15:7 as the southern boundary of Moab. This may be the long Wādy el-Hāsy (or Hessi, *PEF* Map) which Doughty (*Ar. Des.* 126) describes as dividing the uplands of Moab and Edom, and running into the S. end of the Dead Sea; by some thought to be also the Brook ZERED. It is doubtful, however, whether the Israelite kingdom could ever have been described as extending S. of the Arnon. Hoffmann (*ZATW* 3 115 [83]) suggests that the Brook of the Arābah may have lain at the N. end of the Dead Sea. G^{S} rendering, τοῦ χειμάρρου τῶν δυσμῶν [BAQ], is no help. It is to be noted that N. Israel under Jeroboam II. in the time of Amos is stated in 2 K. 14:25 to have extended from 'the entering in of Hamath unto the Sea of the Arābah.' The difficulty is increased by the uncertainty as to whether Amos means to include Judah. G. A. S.

ARABATTINE (ἀκραβαττινή [AN]), 1 Macc. 5:37 AV, RV ARABATTINE.

ARABIA, ARABIANS (עֲרָב; gentilic עֲרָבִי and in Neh. עֲרָבִי, pl. עֲרָבִים, also once עֲרָבִים, and once Kt. עֲרָבִים; אַרָּב[ε]ία decl. and indecl. [BNAL, etc.], -BICCA [BNA], אַרָּאψ (-ABO) [BNAL, etc.], אַרָּב[ε]י [BNA]).

The name 'Arab' (עֲרָב) seems originally to have meant nothing more than 'desert': hence 'people of the desert.' So Isaiah uses the word,

1. **Earlier** 'In the forest in the desert ('Arab); but

OT usage. G^{S} ἐσπέρας ye halt for the night' (Is. 21:13).

More usual in Hebrew is the fem. form 'arābīh (*e.g.*, Job 24:5 39:6), a word employed as a proper name to denote the desolate valley, in which the Dead Sea is situated, reaching to the north-eastern extremity of the Red Sea (see ARABAH, i.). In the OT the term 'Arab, as the name of a particular nation and country, is confined to comparatively late writings; it must therefore appear highly improbable that the Homeric Ἐρεβῆσσι (*Od.* 484) are to be identified with the Arabs. The lists in Genesis, which specify various Arabian tribes, do not mention the name—a very significant indication of their antiquity. The word being certainly an appellative ('desert') in Is. 21:13 (with EV cp Hab. 18 G^{S} , Zeph. 3:3 G^{S}), the heading בְּקֶרֶת עֲרָבָה 'Oracle concerning the Arabs,' cannot be in accordance with the author's real meaning.² No certain instance of the use of 'Arab as a proper name occurs before the time of Jeremiah. He speaks of 'all the kings of 'Arab' (עֲרָבִים, Jer. 25:24). The words which follow in MT, וְאֵת כָּל־הָעֲרָבִים, are of course a dittography; in order to make sense the scribes pronounced עֲרָבָה 'the mixed people,' a form which really occurs in *v. 20*, as well as in Ez. 30:5 and 1 K. 10:15 (where G^{S} reads הָעֲרָבִים for עֲרָבָה). The Greek text of Jer. 25:24 (κ. πάντας τ. συμμικτούς [BNA]),⁴ it may be noticed, does not presuppose a repetition, and moreover (followed by Co.) omits the word 'kings,' necessary though it is to the sense. The phrase, 'like a 'Arabī in the desert' (Jer. 3:2, κοπιῶντι [BNA]; Aq. ἀραβί [Q^{ms}]), may be explained to mean either 'like an Arab' or 'like a Nomad'—the word has not yet acquired a strictly ethnographical signification. The same thing applies to a passage dating from the end of the Babylonian Exile, 'No 'Arabī shall pitch his tent there, nor shall shepherds cause their flocks to lie down there' (Is. 13:20, Ἀραβῆς [BNA^{ms}]). In Ez. 27:21, however, Arab (עֲרָב; Αραβ[ε]ία [BAQ], with the note εὐσπείρα [Q^{ms}]), appears as the name of a people, coupled with Kedar, a desert tribe very frequently mentioned at that period (see ISHMAEL, § 4 [2]).

¹ Isaiah's authorship, it is true, has been disputed (see ISAIHAH, § 9).
² G^{S} omits it; but Aq. Symm. Theod. all have it.
³ Giesebr., however, while agreeing as to the dittography which follows, denies that 'and all the kings of 'Arab' are the words of Jeremiah; the closing words of the verse ('who dwell in the wilderness') alone are genuine; they give the locality of those 'who have the corners of their hair pulled' (*v. 23*). Cp. 9:26 [25], 'all that have, etc., who dwell in the wilderness.'
⁴ G^{S} has κ. π. τ. σ. αὐτοῦ.

It would seem that the name of the Arabs came into use among the Hebrews at a time when the old names Ishmael, Midian, etc., were disappearing from ordinary speech. This change may be connected with the fact that during the period in question various tribes were advancing from the S. into the northern deserts and dispossessing the former inhabitants, who, in all probability, were closely akin to the Hebrews. Such shiftings of the population have occurred repeatedly in the course of ages. However unproductive the districts to the E. and to the S. of Palestine may appear to us, they are nevertheless, from the point of view of the Nomads, decidedly preferable to many parts of Arabia proper.

From the ninth century B.C. and onwards, the name of the Arabs occurs in the Assyrian inscriptions, where it presents a variety of forms¹ (*Arabi, Arubu, Aribi*, etc.), the adjective being *Arbāyā*.

The name *Urbi* (*KB 284 f.*), however, can scarcely be, as Delitzsch (*l.c.*) supposes, another form of the same word and the equivalent of the Arab. *Urbī*, which appears to be quite late, and of the Heb. *ʾurbī*. The Arabs mentioned in the cuneiform inscriptions were probably all, or for the most part, natives of the Syrian desert, though we have no reason to assume that the name was applied to them exclusively as distinguished from the inhabitants of Arabia proper.

The inscriptions of the Persian King Darius (*e.g.*, Behistūn, I, 15) mention *Arabīya* among the subject lands, always placing it after Babylonia and *Athura* (*i.e.*, Assyria, Mesopotamia proper, and possibly northern Syria) and before Egypt; here also the word must refer to the great deserts of Syria—perhaps also to those of Mesopotamia and the Sinaitic peninsula. Æschylus (*Pers.* 316), the first extant Greek writer in whose works the name occurs, speaks of a distinguished Arab in the army of Xerxes, and the contemporary authority whom Herodotus follows in his account of the Persian army makes mention of Arabs on the same occasion (*Herod.* 7.69). While the notions of Æschylus, however, about the geographical position of the Arabs, are altogether fantastic—he represents them as dwelling near the Caucasus (*Prom.* 422)—Herodotus shows himself much better informed. He applies the term Arabia to the whole peninsula (cp *Herod.* 2.113 107-113 439); but, as might have been expected, he refers in particular to those Arabs who inhabited the country between Syria and Egypt (2.12 30 34 7 f. 880 91, etc.).

It is also to be remarked that, in accordance with a peculiar classification, he gives the name of Arabia to that part of Egypt which lies to the E. of the Nile valley (28, etc.). Xenophon (*Anab.* vii. 8.25) speaks of a governor set by the Persian king over 'Phœnicia and Arabia,' by which is meant the S. of Syria, including Palestine and the neighbouring desert—a separate governor being set over Syria and Assyria.' Similarly in the *Cyropædia* he doubtless always means by Arabia the desert lands which were to some extent dependencies of the Persian Empire, not the peninsula itself; we must remember, further, that Xenophon had no definite ideas about these countries, through which he had not himself travelled. The name Arabia is used, in particular, for the desert of Mesopotamia (*Anab.* I. 51); it can hardly be an accident that this very district is called *Arab* by Syriac writers from the third century after Christ and onwards. Whilst, however, the term is regularly applied to that part of the desert which remained under Roman dominion till the Mohammedan conquest, the eastern portion, which belonged to Persia, is more commonly known as *Bēth 'Arabayē* (or *Bā 'Arbāyā* in the Arabicised form)—*i.e.*, 'land of the Arabs.' Traces of this usage are found in late Greek authors also.

A strictly ethnographical sense belongs to the word

'Arab' in the writings of a contemporary of Herodotus,

3. Later OT writers. Nehemiah, who suffered much from the enmity of an Arab (*Neh.* 2.19 61 6) and enumerates 'the Arabs' as such in the

list of his opponents (*Neh.* 4.7 [1]). The Arab in question bears a name which, according to the Massoretic vocalisation, is to be pronounced GESHEM (*g. v.*) or Gashmū, and appears in the Greek text as Γησαῦ (ΓΗΣΑ). Γησαῦ [L]; the correct form is probably *Gushamū*, a well-known Arabic name. It is very likely that at that time the great migration of the Nabateans had already happened (see *EDOM*, §9, *NABATEANS*). The Chronicler too refers to 'the Arabians.' They brought tribute, he tells us, to the pious King Jehoshaphat (2 *Ch.* 17.11). He relates, also, how Jehu punished the wicked Joram by means of the Philistines and 'the Arabians who were beside the Ethiopians' (2 *Ch.* 21.16, cp 22.1), and how he scourged the pious Uzziah in the war against 'the Arabians that dwell in GUR-BAAI' [*g. v.*] and other nations (2 *Ch.* 26.7)—all this is written from the point of view of the author's own time (*circa* 200 B.C.), and has no claim to be regarded as historical.

By the beginning of the Maccabean period the kingdom of the NABATEANS [*g. v.*] had long been firmly established. At that time various other Arabian tribes were also to be found in the great Syrian desert, and from among these certain families and persons rose to great power during the decline of the Seleucid Empire. In several Syrian towns we find Arabian sovereigns, and at Palmyra, at least, there was an Arabian aristocracy; elsewhere also Arabian chieftains occasionally played an important part in the politics of that period. 1 Macc. several times mentions Nabateans and other Arabs (5 28 29 9 11 17 30 12 30 34 p. 2 Macc. 5 12 107 7).

The apostle Paul, after his conversion, retired into Arabia (*Gal.* 1.17)—probably some desert tract in the Nabatean kingdom. When he speaks of

4. NT. Arabia he of course includes the Sinaitic peninsula (*Gal.* 4.25). Similarly, 'Arabs' (Arabian Jews or proselytes) in Acts 2.11 probably means natives of the Nabatean kingdom (see *NABATEANS*) or of the Roman province of Arabia which covered almost the whole extent of that kingdom. The province was constituted by A. Cornelius Palma, governor of Syria (*circa* 105 A.D.).

At what period certain tribes began to call themselves Arabs, and at what period the name was adopted by the whole nation, cannot be determined.

5. Native Arabian usage. The distinguished scholar, D. H. Müller,¹ has maintained that the name 'Arab' was unknown to the natives of Arabia till Mohammed introduced it as a national designation. This view, however, is scarcely tenable. The present writer does not happen to have made any notes on the occurrence of the name in the pre-Islamic poetry;² but the verse in Tabari, I, 10365, which dates from the beginning of the seventh century, is a sufficient proof of its occurrence—the poet, who can have known nothing of Mohammed, speaks of 3000 Arabs as opposed to 2000 foreigners. The events there described happened in the neighbourhood of the lower Euphrates—that is to say, in a district where Arabs, Arameans, and Persians frequently came into contact with one another, and where, for that very reason, a special term to denote the Arabian nationality and language was absolutely required. When we take into account the frequent communication between the Arabs of this district and those of the distant W. and S., and the great uniformity of the Arabian nation, it must appear highly probable that the name had long been generally used in Arabia itself.

¹ *Neue Freie Presse*, 1864, 26th April.

² He would not lay great stress on the words *Arabāyā*, *Arbāyā*, 'villages of Arabian women,' or *Araba*, 'Arabian,' 'Arabian villages,' in a verse ascribed to the old poet Imra' al-kays (about 550 A.D.), 392 (Abulwardi), the fragment being very obscure and the text not quite to be trusted. Nor could he affirm the genuineness of the verses ascribed to old poets in *Asād* ix. 10 second last line, x. 149—where the word 'Arab' occurs.

¹ See *Del. Par.* 295 304 ff.; and cp *Schr. KGF*, 100 ff.

scription of Tiglath-pileser III. (745-727 B.C.), and an inscription of Sennacherib (705-681 B.C.). (See Del. *l.c.* 278, Schr. *KAT* 116, *KB* 284). The name occurs also in a few other Assyrian inscriptions; but, owing to the imperfection of the writing, it may sometimes be doubted whether the word is really אַרַם, 'Aram,' and not some such form as אַרְמֵי, אַרְמֵי, or אַרְמֵי. It is remarkable that the cuneiform inscriptions, at least according to the opinion of Del. and Schr., never give the name of 'Aramaans' to the Aramaic-speaking populations W. of the Euphrates, whereas in the OT this is the Aramaean country *per excellence* (ARAM-NAHARAIM, MESOPOTAMIA, § 1).

Though at several periods the whole, or the greater part, of the Aramaean domain has been subject to a

2. **Language.** single foreign power, the Aramaeans have never formed an independent political unity; in fact, so far as we know, there has never existed a state comprehending the Aramaeans of the main part of Syria or of Mesopotamia proper, to the exclusion of other races. From a very early time, however, the population of these countries must have been predominantly Aramaean, as is shown by the fact that all the other nationalities were gradually eliminated, so that, even before the Christian era, the various dialects of the Aramaic (or, as the Greeks say, Syrian) language prevailed almost exclusively in the cultivated lands which lie between the Mediterranean and the Mountains of Armenia and Kurdistan. Aramaic was used by the neighbouring Arabs as the language of writing; it also took possession of the *desert* (see § 2, *infra*). It is indeed very unlikely that, as early as the time of Solomon, there was an important Aramaean element in Palestine, as W. Müller suggests (*l.c.* 285, 171); the ending *-ā* in many names of Palestinian cities in the list drawn up by the Egyptian king Sosenk is probably nothing more than the Hebrew ending *-ā*, expressing motion towards—the so-called *Hebraeate*. Even in some books composed before the Exile, however, the influence of the language spoken by the neighbouring Aramaeans is occasionally perceptible. This influence became very much greater after the Exile (when those Israelites who remained, or founded settlements in Judaea, Samaria, and Galilee, were at first feeble in numbers) and little by little the Aramaic tongue spread over the whole country. Though the language of such parts of the OT as Esther, Ecclesiastes, and several of the Psalms is Hebrew in form, its spirit is almost entirely Aramaic. The compiler of Ezra inserted into his book an extract from an Aramaic work composed, it would seem, about 300 B.C.; and half of the Book of Daniel (which was written in 167 or 166 B.C.) is in Aramaic. Moreover, a dialect of this language was spoken by Christ and the apostles, and in it the discourses reported in the Gospels were originally delivered. Nor did the Latin language (under the Roman rule) ever threaten to supplant the prevalent Aramaic. Greek, it is true, gained some footing in Syria, and, since it was the vehicle of intercourse and literary culture, exercised a great influence on the native dialects. It was the conquests of the Moslems, however, that suddenly brought to an end the ascendancy of Aramaic after it had lasted for more than 1000 years. The Arabic language was diffused with surprising rapidity, and at the present day there are only a few outlying districts in which Aramaic dialects are spoken.

What group of tribes the author of Gen. 10:23 includes under the name of Aram, we are unable to say precisely.

3. **In Pentateuch.** Of the 'sons of Aram' enumerated there is unfortunately none that can be identified with tolerable certainty (see GEOGRAPHY, § 24). The position of 'Uz,' although it occurs several times in the OT, is unknown. It must, however, have been situated not far from Palestine. 'Mash' is usually supposed to be the country of the *Μάσιον ὄρος* (Strabo, 506, etc.), the source of the river Mashē (*n'har*

Mashē, in Arabic *Hirmās*), which flowed by Nisibis ([pseudo-]Dionysius of Tel-Mahrē, ed. Chalot, 718, and Thomas of Margā, ed. Budge, 346 19); this is, however, by no means certain. Other theories respecting the names in Gen. 10:23 might be mentioned; but they are all open to question.

A second list, in Gen. 22:21, represents Aram as a son of Kemuel, son of Nahor and brother of Uz, Kesed (EV Chesed; the eponym of the Chaldeans), Bethuel, and others. Bethuel is called an 'Aramaean' in Gen. 25:20 28:5, as is also his son Laban in Gen. 25:20 31:20 24. The passages in question belong, it is true, to different sources; but they may have been harmonised by the redactor. All these statements seem to point to the district of Harrān (HARAN, *q.v.*), where, as Hebrew tradition affirms with remarkable distinctness, the patriarchs (Abraham, Jacob), and the patriarchs' wives (Rebecca, Leah, Rachel), either were born or sojourned for a long time. Here, in remote antiquity, Hebrew tribes and Aramaean tribes (represented by Nahor) probably dwelt side by side.¹ Hence it is said in Dt. 26:5 'a nomad Aramaean was my father.' In one of the sources of Genesis the country of Laban is called 'Aram of the two rivers,'² which seems to mean, as has long been held, the Aramaean land between the Euphrates and the Tigris, or between the Euphrates and the Chaborās (Kiepert, *Lehrb. d. alt. Geogr.* 154). What is meant by Paddan Arām, however, the name given to the dwelling-place of Laban and his kinsmen in the other source (see PADDAN), is not clear. In Assyrian (?) and Aramaic Paddan signifies 'yoke,' and by a change of meaning, found also in other languages, it comes to denote a certain area of land, and finally 'corn-land,' but not a 'plain,' as is sometimes assumed by those who wrongly take the phrase 'field of Aram' (Hos. 12:13[12]) to be a translation of 'Paddan Aram.' This latter can scarcely be the name of a country. It may denote a *locality* situated in the land of Aram. We might, therefore, be tempted to identify Paddan Aram with a place near Harrān called *Paddānā* (see Wright, *Int. Syn. MSS.* 1127 1, *Geogr.* 1100 1000). Nestor, 129, l. 21), in Gr. *φαδανᾶ* (Sozom. 6:33), and in Ar. *Faddān*, in the neighbourhood of which *Tell Faddān* is situated (see Yākūt *s.v.*). It is, however, a somewhat suspicious consideration that several of the passages which have been cited mention the patriarchs in connection with the place. Hence the name may be due to a mere localisation of the biblical story on the part of the early Christians. According to the narrative of Balaam, 'Pethor' is in Aram (Nu. 22:5 23:7; see PETHOR). If Schr. (*KAT* 155 ff. *KB* 1133) be right in identifying it with the city of *Pitru*, mentioned in Assyrian inscriptions, and situated on the river Sagur (Sājūr)—that is to say, not far from Mambij (Hierapolis)—the statement that Pethor is on the Euphrates itself cannot be quite correct. Such an inaccuracy, however, would not be surprising.

What historical foundation there may be for the account of the subjugation of Israel by Cushan Rishathaim (*q.v.*), 'king of Aram of the Two Rivers' (Judg. 3:8-10), is uncertain.

Of all the Aramaean states, by far the most important from the point of view of the Israelites, during the kingly period, was Damascus, the inhabitants of which, from the time of David (*q.v.*, § 86) onward, were often at war with their Israelite neighbours; but there must also have been much peaceable intercourse between the two nations. In most cases where the OT speaks of Aram the reference is to Damascus (even though the latter name be not expressly mentioned), the small Aramaean states of the neighbourhood being sometimes included. That

¹ On this point see ISRAELIT., § 1.

² It is not necessary to suppose with W. Max Müller (*l.c.* 252, 253) that the Dual *māhararaim* is a mistake for the plural *māharim*. On this subject, however, cp ARAM-NAHARAIM, MESOPOTAMIA, § 1.

this mode of speaking was actually current in early times is proved by such passages as Am. 1 59 Is. 7 24f. 8. Cp DAMASCUS.

Not far from Damascus lay the Aramean districts of Maacah (ג. 21) and Geshur (ג. 11). That Maacah

was Aramean is not expressly stated—except in 1 Ch. 196, where the text is very doubtful;¹ but it seems to be indicated by

Gen. 22.24, where Maacah is represented as

a son, or daughter, of Nahor by a concubine. Moreover, in 1 Ch. 7.16 Machir, the chief representative of the tribe of Manasseh beyond the Jordan, is the husband of Maacah, and in v. 14 of the same chapter he is a son of Manasseh by an Aramean concubine—whence we may infer that the Israelite tribe which had penetrated furthest to the NE. became mingled with the Arameans of Maacah. That the Maacathites were not included in Israel, though they dwelt among the Israelites, is stated in Josh. 13.13. Their geographical situation is to some extent determined by the fact that Abel, though regarded as an ancient Israelite city (2 S. 20.19), is sometimes called Abel-beth-Maacah, 'Abel in the land of Maacah' (2 S. 20.14, 2 etc.), in order to distinguish it from other places bearing the name Abel.

In accordance with the statements in 1 K. 15.20 2 K. 15.29 (to which must be added 2 S. 20.18, a passage preserved in \mathfrak{C} but mutilated in MT), this Abel is now generally admitted to be identical with the northern Abil, near Hünin, on one of the brooks which unite to compose the Jordan (see ABEL-BETH-MAACAH). That this region, on the slopes of Hermon, was the home of the Maacathites appears from Dt. 3.14 Josh. 12.5 13.13, where they are mentioned together with the Geshurites, another foreign people who continued to dwell among the Israelites (Josh. 13.13), and belonged to Aram (2 S. 15.8; cp also 1 Ch. 2.23, where the text, it must be admitted, is obscure and seems to be corrupt). Not far off was the territory of Rehob or Beth Rehob, which included the city of Dan (Judg. 18.28, often mentioned as the northern limit of Israel, the modern Tell el-kādi, a few miles east of the aforesaid Abil. In Josh. 19.28 Rehob, it is true, is reckoned as belonging to the Israelite tribe of Asher; but, according to 2 S. 10.6, its inhabitants were Arameans. Thus it appears fairly certain that several Aramean tribes were settled near, or within, the borders of the northern tribes of Israel (Naphtali, Asher, and Eastern Manasseh). In these parts the Aramean population seems to have extended, with scarcely any interruption, as far as Damascus. The Arameans of Maacah and Rehob fought on the side of the Ammonites against David (2 S. 10.6 = 1 Ch. 19.6). David married a daughter of the king of the Geshurites,³ and she became the mother of Absalom. It is remarkable that she bore the name of Maacah (2 S. 3.3 = 1 Ch. 3.2), which, as we have seen, occurs often in connection with Geshur; and the same name was given by Absalom to his daughter,⁴ afterwards the mother of two kings of Judah (1 K. 15.2 10.13 2 Ch. 11.20 ff.). After he had murdered his brother Amnon, Absalom took refuge with his grandfather the king of Geshur, and remained there for a considerable time (2 S. 13.38 14.23.2). The king of Geshur must, therefore, have been to some extent independent of David. Of all these Aramean tribes we hear nothing more in later times; but one of them has left a trace in 'the Maacathite' (see MAACAH, 1), an appellation borne by the father of Jaazaniah, a contemporary of Jeremiah the prophet (2 K. 25.23 Jer.

¹ Instead of מַאכָּה אֲרָמִי, 'Arameans of Maacah,' the parallel passage 2 S. 10.6 has מַאכָּה בֶּן־נָחֹר, 'the king of Manasseh,' for which \mathfrak{C} reads Βασιλεύς Ἀραμῶν. Here the word Ἀραμῶν is certainly due to a mistake (\mathfrak{C} has βασιλεύς); but Βασιλεύς [BAL] supports the Massoretic reading מַאכָּה.

² In this verse we should no doubt read מַאכָּה בֶּן־נָחֹר and with it Ex. i, Wellh., and others.

³ See, however, GESHUR, 2, where the view is proposed that David's wife was from the Southern Geshur.

⁴ On this see, however, MAACAH, ii.

408). These Arameans, who were so closely connected with the Israelites, probably played an important part in the diffusion of the Aramaic language over Palestine.

Another state, also described as Aramean, was that of ZOBAB (g. v.) (2 S. 10.68; cp 1 Ch. 19.6 Ps. 60 [title]).

6. Zobab. which seems to have been for a while of greater consequence. In it was situated the city of BEROTHAI (2 S. 10.8). No doubt identical with BEROTHAI (g. v.), which in Ez. 47.16 is placed between Hamath and Damascus. With this it agrees that, according to the statements of the historical books, Zobab had relations with Hamath on the one side, and with Damascus on the other. Its site must, therefore, be approximately in the neighbourhood of Emesa; and we may hope that archaeological researches will throw further light upon the subject.¹

The statement about Saul's wars with 'the kings of Zobab' (1 S. 14.47) is open to grave suspicion; it is, in fact, doubtful whether the warlike operations of Saul ever extended so far (see SAUL, § 3). A little later, however, we find Zobab and Damascus assisting the Ammonites in their war against David (see DAVID, § 8d). At length Hadad'ezer, king of Zobab, even brought to his help Arameans from beyond the Euphrates, but was utterly defeated, together with the king of the Ammonites, and David carried off a rich booty. Upon this the king of Hamath, who had been at war with the king of Zobab, sent an embassy to the Judean king, expressing great satisfaction (2 S. 8.10). According to 2 S. 23.36, one of David's heroes (among whom were several non-Israelites) came from Zobab; in 1 Ch. 11.38, however, the reading is quite different (see ZOBAB). A servant of the above-mentioned Hadad'ezer, named Rezon, fled from his master, became the chief of a band of robbers, and after David's death founded a kingdom at Damascus (1 K. 11.23 ff.; see DAMASCUS, § 3). It is not easy to extract a satisfactory sense from the passage which describes the capture of 'Hamath of Zobab' by Solomon (2 Ch. 8.3), and there is reason to suspect the integrity of the text. After the time of Solomon we find no mention of Zobab in the OT; but Assyrian monuments bear witness to the existence of this city in the seventh century B.C.—if, as seems likely, the same place be meant.

In the account of the wars of David against the Ammonites and their allies, these latter are classed

7. 'Arameans,' together under the name of 'Arameans' (2 S. 10.8 ff. 14 ff.); but this is perhaps nothing more than a classification *a priori*. It is of more importance to notice that the army of Nebuchadrezzar is called by a contemporary 'the army of the Chaldeans and of the Arameans' (Jer. 35.11). That the great mass of the Babylonian army was composed of Arameans might have been naturally inferred, even if we had not this explicit statement on the subject.

Cp Noldeke, 'Die Namen der Aram. Nation u. Sprache,' in *Z. D. M. G.* 25.113 ff.; *Assyriens Syrisches Syrius in Formos.* 3.143 ff.; and the section on the Aramaic dialects in Art. 'Semitic Languages,' *EB* 99, published separately in German, *Die Sem. Sprachen*, Leipzig, 1857, p. 27 ff., and ed. 1859.

² An Asherite (1 Ch. 7.34); [אַשְׁרָתִי] [B], אַשְׁרָתִי [AL]. See also RAM, 1, and ARAM.

ARAMAIC LANGUAGE.² Aramaic is nearly related to Hebrew-Phœnician; there is, nevertheless, a sharp line of demarcation. Of its **1. Geographical extent.** original home nothing certain is known. In the OT 'Aram' appears at an early period as a designation of certain districts in Syria (see ARAM, § 1) and in Mesopotamia. The language of the Arameans gradually spread far and wide. It occupied all Syria—both those regions which had been in the possession of non-Semitic peoples, and

¹ It would appear that the Assyrian inscriptions sometimes mention this place as *Suhutu* or *Suhiti* (see Del. *Par.* 279 ff.; Schrader, *KGF* 122, *KAT* 182 ff.); but they have not enabled us to fix the site.

² Revised and adapted by the author from art. 'Semitic Languages' (Aramaic section) in *EB* 99.21.

those which were most likely inhabited by Canaanite tribes. Last of all, Palestine became Aramaised (*ibid.* § 2). Towards the E. this language was spoken on the Euphrates, and throughout the districts of the Tigris S. and W. of the Armenian and Kurdish mountains; the province in which the capitals of the Arsacides and the Sasanians were situated was called 'the country of the Arameans.' In Babylonia and Assyria a large, or perhaps the larger, portion of the population were most probably Arameans, even at a very early date, whilst Assyria was the language of the government.

Some short Aramaic inscriptions of the Assyrian period, principally on weights, have long been known.

To these have recently been added longer **2. Earlier ones** from the most northern part of Syria (Zenjirli, about 37° N.). In these, as in the weight inscriptions, the language differs markedly from later Aramaic, especially by its close approximation to Hebrew-Canaanite or, perhaps, to Assyrian; but Aramaic it undoubtedly is. It is to be hoped that more of these inscriptions, important alike for their language and for their contents, may yet be discovered.¹

In the Persian period Aramaic was the official language of the provinces W. of the Euphrates; and this explains the fact that some inscriptions of Cilicia and many coins which were struck by governors and vassal princes in Asia Minor (of which the stamp was in some cases the work of skilled Greek artists) bear Aramaic inscriptions, whilst those of other coins are Greek. This, of course, does not prove that Aramaic was ever spoken in Asia Minor, and as far north as Sinope and the Hellespont.

In Egypt Aramaic inscriptions have been found of the Persian period, one bearing the date of the fourth year of Xerxes (482 B.C.);² we have also official documents on papyrus, unfortunately in a very tattered condition for the most part, which prove that the Persians preferred using this convenient language to mastering the difficulties of the Egyptian systems of writing. It is further possible that at that time there were many Arameans in Egypt, just as there were many Phoenicians, Greeks, and Jews.

This preference for Aramaic, however, probably originated under the Assyrian Empire, in which a very large proportion of the population spoke Aramaic; in it this language would naturally occupy a more important position than it did under the Persians. Thus we understand why it was taken for granted that a great Assyrian officer could speak Aramaic (2 K. 18:26 = Is. 36:11), and why the dignitaries of Judah appear to have learned the language (*ibid.*); namely, in order to communicate with the Assyrians. The short dominion of the Chaldeans probably strengthened this preponderance of Aramaic.

A few ancient Aramaic inscriptions have been discovered far within the limits of Arabia, in the palm oasis of Teima (in the north of the Hijaz); the oldest and by far the most important of these was perhaps made somewhat before the Persian period.³ We may presume that Aramaic was introduced into the district by a mercantile colony, which settled in the ancient seat of commerce; and, in consequence, Aramaic may have remained for some time the literary language of the neighbouring Arabs. Those Aramaic monuments, which we may with more or less certainty ascribe to the Persian period, exhibit a language which is almost absolutely uniform. The Egyptian monuments bear marks of Hebrew, or (better) Phoenician, influence.

Intercourse with Arameans caused some Aramaic

words to be imported into Hebrew at a comparatively early date. This influence of Aramaic on

3. Biblical Hebrew steadily grew, and shows itself so strongly in the language of Ecclesiastes, for example, as almost to compel the inference that Aramaic was the writer's mother-tongue, and Hebrew one subsequently acquired, without complete mastery.

Certain portions of the OT (Ezra 4:8-6:18 7:12-26 Dan. 2:4-8:28; also the ancient gloss in Jer. 10:11) are written in Aramaic. The free and arbitrary interchange between Aramaic and Hebrew, between the current popular speech and the old sacred and learned language, is peculiarly characteristic in Daniel (167 or 166 B.C.); see DANIEL, ii. § 11 f. Isolated passages in Ezra perhaps belong to the Persian period, but have certainly been remodelled by a later writer.⁴ Still in Ezra we find a few antique forms which do not occur in Daniel.

The Aramaic pieces contained in the OT have the great advantage of being furnished with vowels and other orthographical signs. These were not inserted until long after the composition of the books (they are sometimes at variance with the text itself); but Aramaic was still a living language when the punctuation came into use, and the lapse of time was not so very great. The tradition ran less risk of corruption, therefore, than in the case of Hebrew. Its general correctness is further attested by the innumerable points of resemblance between this language and Syriac, with which we are accurately acquainted. The Aramaic of the OT exhibits various antique characteristics which afterwards disappeared—for example, the formation of the passive by means of internal vowel-change, and of the causative with *ha* instead of with *a*—phenomena which have been falsely explained as Hebraisms.

Biblical Aramaic agrees in all essential respects with the language used in the many inscriptions of Palmyra

4. Nabataean, etc. (beginning soon before the Christian era and extending to about the end of the third century), and on the Nabataean coins and stone monuments (concluding about the year 100 A.D.). Aramaic was the language of Palmyra, the aristocracy of which were largely of Arabian extraction. In the northern portion of the Nabataean kingdom (not far from Damascus) there was probably a large Aramaic population; but Arabic was spoken farther south. At that time, however, Aramaic was highly esteemed as a cultivated language, for which reason the Arabs in question made use of it, as their own language was not reduced to writing, just as in those ages Greek inscriptions were set up in many districts where no one spoke Greek. The great inscriptions cease with the overthrow of the Nabataean kingdom by Trajan (105 A.D.); but, down to a later period, the Arabian nomads in those countries, especially in the Sinaitic peninsula, often scratched their names on the rocks, adding some benedictory formula in Aramaic. These inscriptions having now been deciphered with completeness and certainty, there is no longer room for discussion of their Israelitic origin, or of any similar fantastic theories concerning them. That several centuries afterwards the name of 'Nabataean' was used by the Arabs as synonymous with 'Aramaean' was probably due to the gradual spread of Aramaic over a great part of what had once been the country of the Nabataeans. In any case, Aramaic then exercised an immense influence. This is proved by the place which it occupies in the strange Pahlavi writing, various branches of which date from the time of the Parthian empire. Biblical Aramaic, as also the language of the Palmyrene and the Nabataean inscriptions, may be described as an older form of Western Aramaic. The opinion that the Palestinian Jews brought their Aramaic dialect directly from Babylon—whence the incorrect name 'Chaldee'—is untenable.

¹ The decree which is said to have been sent by Artaxerxes (Ezra 7:12-26) is in its present form a comparatively late production (cp. EZRA, ii. § 10).

ARAMAIC LANGUAGE

By the time of Christ Aramaic had long been the current popular speech of the Jews in Palestine, and

5. NT. the use, spoken and written, of Hebrew (in a greatly modified form) was confined to scholars. Christ and the apostles spoke Aramaic, and the original preaching of Christianity, the *Εὐαγγέλιον*, was in the same language. And this, too, not in the dialect current in Jerusalem, which roughly coincided with the literary language of the period, but in that of Galilee, which, it would seem, had developed more rapidly, or, as is now often but erroneously said, had become corrupted. Unfortunately, it is impossible for us to know the Galilean dialect of that period with accuracy. The attempts made in our days to reduce the words of Jesus from Greek to their original language have, therefore, failed.

In general, few of the sources from which we derive our knowledge of the Palestinian dialect of that period can be implicitly trusted. In the synagogues it was necessary that the reading of the OT should be followed by an oral 'targum'—a translation, or rather a paraphrase into Aramaic, the language of the people—which was at a later period fixed in writing; but the officially sanctioned form of the Targum to the Pentateuch (the so-called Targum of Onkelos) and of that to the prophets (the so-called Jonathan) was not finally settled till the fourth or fifth century, and not in Palestine but in Babylonia.

The redactors of the Targum preserved, on the whole, the older Palestinian dialect; yet that of Babylon, which differed considerably from the former, exercised a vitiating influence. The punctuation, which was added later (first in Babylonia) is not so trustworthy as that of the Aramaic passages in the OT. The manuscripts which have the Babylonian superlinear punctuation may, nevertheless, be relied upon to a great extent. The language of Onkelos and Jonathan differs but little from biblical Aramaic. The language spoken some time afterwards by the Palestinian Jews, especially in Galilee, is exhibited in a series of rabbinical works—the so-called Jerusalem Targums, a few Midrashic works, and the Jerusalem Talmud. Of the Jerusalem Targums, at least that to the Pentateuch contains remains that go back to a very early date, and, to a considerable extent, presents a much more ancient aspect than that of Onkelos, which has been heavily revised throughout;¹ but the language, as we now have it, belongs to the later time. The Targums to the Hagiographa are, in part, very late indeed. All these books, of which the Midrashim and the Talmud contain much Hebrew as well as Aramaic, have been handed down without care, and require to be used with great caution for linguistic purposes. Moreover, the influence of the older language and orthography has, in part, obscured the characteristics of these popular dialects; for example, various gutturals are still written, although they are no longer pronounced. The adaptation of the spelling to the real pronunciation is carried furthest in the Jerusalem Talmud, but not in a consistent manner. All these books are without vowel-points; but the frequent use of vowel-letters in the later Jewish works renders this defect less noticeable (cp TEXT, § 64).

Not only the Jews but also the Christians of Palestine retained their native dialect for some time as an ecclesiastical and literary language. We possess

7. Christian Palestinian. translations of great portions of the Bible (especially of the Gospels) and fragments of other works in this dialect by the Palestinian Christians dating from about the fifth century, partly accompanied by a punctuation which was not added till some time later. This dialect, the native country of which was apparently not Galilee, but Judea, closely resembles that of the Palestinian Jews, as was to be expected

from the fact that those who spoke it were of Jewish origin.

Finally, the Samaritans, among the inhabitants of Palestine, translated their sacred book, the Pentateuch, into their own dialect: see TEXT,

8. Samaritan dialect. § 48. The critical study of this translation proves that the language which lies at its base was very much the same as that of the neighbouring Jews. Perhaps, indeed, the Samaritans may have carried the softening of the gutturals a little farther than the Jews of Galilee. Their absurd attempt to embellish the language of the translation by arbitrarily introducing forms borrowed from the Hebrew original has given rise to the false notion that Samaritan is a mixture of Hebrew and Aramaic. The introduction of Hebrew and even of Arabic words and forms was practised in Samaria on a still larger scale by copyists who lived after Aramaic had become extinct. The later works written in the Samaritan dialect are, from a linguistic point of view, as worthless as the compositions of Samaritans in Hebrew: the writers, who spoke Arabic, endeavoured to write in a language with which they were but half acquainted.

All these Western Aramaic dialects, including that of the oldest inscriptions, have this characteristic among others in common, that they form the third person singular masculine and the third person plural masculine and feminine in the imperfect by prefixing *y*, as do the other Semitic languages. And in these dialects the termination *d* (the so-called *status emphaticus*) still retained the meaning of a definite article down to a tolerably late period.

As early as the seventh century the conquests of the Moslems greatly circumscribed the domain of Aramaic, and a few centuries later it was almost completely supplanted in the W. by Arabic. For the Christians of those countries, who, like every one else, spoke Arabic, the Palestinian dialect was no longer of importance. They adopted as their ecclesiastical language the dialect of the other Aramaean Christians, the Syriac (Edessan; see § 11 f.). The only localities where a W. Aramaic dialect still survives are a few villages in Anti-Libanus.¹

The popular Aramaic dialect of Babylonia, from the fourth to the sixth century of our era, is exhibited in the

10. Babylonian and Mandæan. Babylonian Talmud, in which, however, as in the Jerusalem Talmud, there is a constant mingling of Aramaic and Hebrew passages. To a somewhat later period, and probably to a somewhat different district of Babylonia, belong the writings of the Mandæans, a strange sect, half Christian and half heathen, who, from a linguistic point of view, possess the peculiar advantage of having remained almost entirely free from the influence of Hebrew, which is so perceptible in the Aramaic writings of Jews as well as in those of Christians. The orthography of the Mandæans comes nearer than that of the Talmud to the real pronunciation, and in it the softening of the gutturals is most clearly seen. In other respects there is a close resemblance between Mandæan and the language of the Babylonian Talmud. The forms of the imperfect which we have enumerated above take in these dialects *z* or *l*. In Babylonia, as in Syria, the language of the Arabic conquerors rapidly drove out that of the country. The latter has long been extinct—unless, which is possible, a few surviving Mandæans still speak among themselves a more modern form of their dialect.

At Edessa, in the W. of Mesopotamia, the native dialect had already been used for some time as a literary

11. Syriac or Edessan Aramaic. language, and had been reduced to rule through the influence of the schools (as is proved by the fixity of the grammar and the orthography) even before Christianity

¹ This in opposition to Dalman's *Gramm. d. jud. pal. Avam.* (Leipzig, 94)—a book highly to be commended for the fullness and accuracy of its facts, but less so for its theories.

¹ On this subject we have now very valuable information in a series of articles by M. Parissot (*Journ. As.*, 1869); moreover it is hoped that Professors Prym and Socin will soon be able to furnish more ample details.

acquired power in the country, in the second century. At an early period the Old and the New Testaments were here translated, with the help of Jewish tradition (see TEXT, § 59). This version (the so-called Peshîta or Peshito) became the Bible of Aramaean Christendom, and Edessa became its capital. Thus the Aramaean Christians of the neighbouring countries, even those who were subjects of the Persian empire, adopted the Edessan dialect as the language of the church, of literature, and of cultivated intercourse. Since the ancient name of the inhabitants, 'Aramaëans,' just like that of 'Ἑλληγες, had acquired in the minds of Jews and Christians the unpleasant signification of 'heathens,' it was generally avoided, and in its place the Greek terms 'Syrians' and 'Syriac' were used. 'Syriac,' however, was also the name given by the Jews and the Christians of Palestine to their own language, and 'Syrians' was applied by both Greeks and Persians to the Aramaëans of Babylonia. It is, therefore, incorrect to employ the word 'Syriac' as meaning the language of Edessa alone; but, since it was the most important of these dialects, it has the best claim to this generally received appellation. It has, as we have said, a form very definitely fixed; and in it the above-mentioned forms of the imperfect take an *n*. As in the Babylonian dialects, the termination *dn* has become so completely a part of the substantive to which it is added that it has wholly lost the meaning of the definite article; whereby the clearness of the language is perceptibly impaired. The influence exercised by Greek is very apparent in Syriac.

From the third to the seventh century an extensive literature was produced in this language, consisting chiefly, but not entirely, of ecclesiastical

12. Its history. works. In the development of this literature the Syrians of the Persian empire took an eager part. In the Eastern Roman empire Syriac was, after Greek, by far the most important language; and under the Persian kings it virtually occupied a more prominent position as an organ of culture than the Persian language itself. The conquests of the Arabs totally changed this state of things. Meanwhile, even in Edessa, a considerable difference had arisen between the written language and the popular speech, in which the process of modification was still going on. About the year 700 it became a matter of absolute necessity to systematise the grammar of the language and to introduce some means of clearly expressing the vowels. The chief object aimed at was that the text of the Syriac Bible should be recited in a correct manner. It happened, however, that the eastern pronunciation differed in many respects from that of the W. The local dialects had, to some extent, exercised an influence over the pronunciation of the literary tongue; and, on the other hand, the political separation between Rome and Persia, and yet more the ecclesiastical schism—since the Syrians of the E. were mostly Nestorians, those of the W. Monophysites and Catholics—had produced divergences between the traditions of the various schools. Starting, therefore, from a common source, two distinct systems of punctuation were formed, of which the western is the more convenient, but the eastern the more exact, and generally more in accordance with the ancient pronunciation: it has, for example, *d* in place of the western *dh*, and *dh* in many cases where the western Syrians pronounce *dh*. In later times the two systems have been intermingled in various ways.

Arabic everywhere put a speedy end to the pre-dominance of Aramaic—a predominance which had lasted for more than a thousand years—and soon began to drive Syriac out of use. Nevertheless, up to the present day Syriac has remained in use for literary and ecclesiastical purposes, and may perhaps be even spoken in some monasteries and schools; but it has long been a dead language. When Syriac became extinct in Edessa and its neighbourhood is not known with certainty. It is very desirable that theologians who interest them-

selves scientifically in the history of the first centuries of Christianity should learn some Syriac. The task is not very difficult for those who know Hebrew.

In some districts of northern Mesopotamia, of the Mosul territory, of Kurdistan, and on Lake Urmia, Aramaic dialects are spoken by Christians and occasionally by Jews. Amongst those that of Urmia has become the most important, since American missionaries have formed a new literary language of it. Moreover, the Roman Propaganda has printed books in two of the Neo-Syriac dialects.

On the Aramaic dialects in general, see Noldeke, 'Die Namen d. Aram. Nation u. Sprache in d. Bible,' 25 ff. (1871); Wright, *Conf. Aramaic* (1861); 2. Kuntz, *Die Aramaic Inschriften aus Assyrien, Babel, u. d. Arab. Landern*, 1861.

14. Literature. The Aramaic inscriptions from Assyria, Babel, u. d. Arab. Landern, and Egypt are found in the second part of the *IA* (the Sinitic and Palmyrene inscriptions have not yet appeared). For the Nabataean the most important publication is Euting's *Nabatäische Inschriften*, Berlin, 1855. Others are to be found in various journals. Of these the most considerable is the great inscription of Petra, first published by Van der Vliet, 1808, and 8 pp. ff. Many Syriac are contained in Euting's *Armenische Inschriften*, Cassel, and of the Palmyrene in the *Corpus Inscriptionum Antiquarum*, Paris, 1851. The most convenient for use. Many others are to be found scattered through journals devoted to Oriental subjects, the most important being the great Fiscal Inscription in Palmyrene and Greek; see *ZDMG* 4. 329 ff. (1850), where the literature is cited. A few Palmyrene inscriptions, annotated, are appended to Bevan's *Commentary on Daniel*.

The most complete Syriac grammar is Noldeke's *Syriac Grammatik* (Leipzig, '80; 2nd ed., '98). Duval's (Paris, '81) is useful for comparison with the other Aramaic dialects, and Nestle's, in the *Porta Linguarum Orientalium* (2nd ed., Berlin, '85), is an introductory handbook. Theologians wishing to learn Syriac, Roediger's *Chrestomathia syriaca* (3rd ed., Halle, '92) may be highly recommended. Articles on the Nabataean, the Palmyrene, and the Christian-Palestinian dialects by Noldeke are to be found in the *ZDMG* 11. 250 ff. (1857), 214 ff. (1858), 72 ff. (1860). Of Syriac dictionaries (see also for a long time the only one of general utility, Rosenthal's three have appeared), Payne Smith's great *Thesaurus* (unfortunately not yet finished), Brockelmann's and Braun's. Of glossaries, besides the few inscriptions we must now add to Leakey's *Text. de mon. phoenices Palmyreniensis* ('87) the glossary of Stanley A. Cook (Cambridge, '98) and Lidzbarski's *Handbuch der nordsem. Sprachen Epigraphik* ('98).

For the various dialects used in early Jewish literature, including the Hebrew parts of it, we have, besides the old Buxtorff (*Heb. Lexic. Jewish*, Leipzig, 1773), the *Lexicon* of Leipsic (1876-84), and the shorter one of J. Dalman (part 1, Leipsic, '97). Levy had previously edited a *Chald. Wörterb. u. d. d. Lexicon* (Leipsic, '72).

On the biblical Aramaic there are, besides the grammar of Kautsch ('84), the little books of Strack (2nd ed., Leipsic, '97) and of Marti (Leipsic, '96). For the Targum dialects there is no grammar that meets the requirements of modern science. Nor is there yet an adequate grammar of the Aramaic dialect of the Babylonian Talmud, although the little tract of S. D. Luzzatto, *Lezioni grammatiche sulla lingua aramaica del Talmudico Babilonense* (Padua, '65), is a very useful work. For the Palestine Jewish dialects see Dalman's *Grammatik* (Leipsic, '94); for the Samaritan, the grammar of Uhlemann (Leipsic, '37) and Petermann (Berlin, '73). Neither of these, naturally, represents the results of modern scholarship. For the Aramaic, see that of Noldeke (Halle, '75), for the Neo-Syriac that of the same author (Leipsic, '68), and especially the most valuable grammar of A. T. Maclean (Cambridge, '95). T. N.

ARAMAIC VERSIONS. See TEXT, §§ 59 f., 64.

ARAMEAN אַרְמֵי, Dt. 26. 17 RV, and Aramitess (אַרְמִיָּת), 1 Ch. 7. 14 EV. See ARAM dequining.

ARAM-MAACAH אַרְמֵי מַעַח, 1 Ch. 196. RV. See MAACAH, 1.

ARAM-NAHARAIM אַרְמֵי נַחְרַיִם, EV ἡμετέρας the form Aram-naharaim only in Ps. 60 (title: μεσοποταμίας σελος [BHT], אַרְמֵי נַחְרַיִם in Dt. 33. 1) RV: ἡμετέρας, where the phrase is invariably rendered

1. OT expression. MESOPOTAMIA, even in Judg. 3. 10 (so B. σελος μεσοποταμίας where BHT has simply אַרְמֵי נַחְרַיִם; σελος [A], 1. com. also ἡμετέρας). The forms are: Judg. 3. 10, μεσοποταμίας σελος [B], σελος μεσοποταμίας [A]; 1 Ch. 196. σελος μεσοποταμίας [BHT].

Apart from Judg. 38, where its genuineness is more than doubtful (see CUSHAN-RISHATHAIM), and the confused editorial data of 1 Ch. 196 and Ps. 60 (title in

EV), which are, of course, too late to be anything but antiquarian lore.¹ The phrase Aram-nahar(a)im occurs in MT only twice—once in J, defining the position of the 'city of Nahor' (or perhaps rather 'of Harrān'; see NAHOR), Gen. 24 10, and once in D, defining the position of PETHOR on the west bank of the Euphrates (Dt. 23 5 [4]). Whilst the two towns in question are Aramaean cities known in later² as well as in earlier³ periods of history, the stories connected with them in the passages cited are legends of prehistorical times, whose interpretation is necessarily more or less conjectural (see NAHOR, BALAAM). We have no other evidence for the actual currency of a compound geographical expression Aram-nahar(a)im. Indeed, Aram is properly a race-name rather than the name of a district: apart from the passages cited, there does not appear to be any unambiguous case of its use, whether alone or in combination, as a geographical expression. Naharim, or Naharin (see below, § 2), on the other hand, is well known as an ancient name for Northern Syria and the country stretching eastwards from it. Aram-Naharaim, or (better) Aram-Naharin, might then be, like Aram-Zobah, etc., properly the name of a people rather than of a territory—unless, indeed, Aram be perhaps a simple gloss explaining Nahar(a)im (cp the converse case of Yahwēlohīm in Gen. 2). That Nahar(a)im is a dual ('the two rivers') is extremely doubtful (cp Moore on Judg. 38)—the word, as already hinted, should probably be pronounced Naharin (see § 2).

The form *Μεσοποταμία* (see § 1) is explained by the Greek geographers as meaning 'between the rivers'; but they need not have been right in assuming that the rivers referred to were two. It seems not improbable that the Greek name is really connected with the ancient name.⁴

The form Naharin (the spelling varies: on this pronunciation see WMM, *As. u. Eur.* 251, 252 n. 3 [*in can.*], of course, also be read *in.*—WMM]) is attested by the Egyptian records of the

2. The name Naharin. New Empire, when this name seems to take the place of the earlier phrase Upper Rutenū (*ib.* 249). W. M. Müller regards the form as plural⁵ (252); but it may also be a locative like Ephraim, etc. (see NAMI, § 107).

In Assyrian or Babylonian inscriptions the name has not yet been met with (see § 3); but in the Amarna letters it occurs repeatedly as *miṭa* Nahrīma or Narīma, from which we learn the valuable fact that in Phœnicia (Gebal) and Palestine (Jerusalem) the form with *m* was usual.

Naharin (Nahrīma) was, as the meaning of the name ('river-land') would suggest, a term of physical rather than of political geography. It need not, therefore, have been used with a very great definiteness (cp the ancient names Παρμαποταμία, Polyb. v. 69; and the mod. Riviera); and the inscriptions, in fact, bear this out.

It seems to have extended from the valley of the Orontes, across the Euphrates, somewhat indefinitely eastwards (*As. u. Eur.* 249). Explanations, based on the view that *aim* is dual, like those of Dillmann (the territory between the Chaborās and the Euphrates), of Schrader in *KAT*⁽²⁾ (between the middle Euphrates and the Balḫ), and of Halévy in *Rev. Sem.* July 1894 (the neighbourhood of Damascus, watered by the so-called Abana and the Pharpar) seem less satisfactory. In its widest application, the whole water-system drain-

¹ The passages in which the phrase has been inserted are obviously borrowed from 2 S.

² Pethor mentioned by Shalmaneser II.

³ Pethor mentioned by Thotmes III.

⁴ It is at least worth considering whether Mesopotamia may not be a translation of the Aramaean expression *ܡܝܢ ܒܝܢ ܢܗܪܝܢ* 'district of rivers', a natural rendering (cp the Syriac Beth 'Arbayē for Xenophon's Ἀρβαία) of Naharin ('riverland'), afterwards—by an easy misunderstanding (of which there are examples)—due to the two like-sounding words *both*—supposed to mean 'between rivers.'

⁵ If the suggestion made in the preceding footnote be adopted, *μεσοποταμία* implied in Mesopotamia will be plural.

ing into the Persian Gulf could be called 'the waters' or 'the great water system' 'of Naharin' (*As. u. Eur.* 253-255). In its stricter (narrower) application it probably, at one time, included or formed part of Hanigalbat (Hani-rabbat). On the history of this whole district see MESOPOTAMIA.

H. W. H.

ARAM-ZOBAH (אֲרָם צוֹבָה). See ARAM, § 6, DAVID, § 9, and ZOBAH.

ARAN (אֲרָן, perhaps 'mountain goat'—cp EPHER—but Nöld. and Di. question this; אֲרָן [BAL]), a 'son' of Dishan the Horite; Gen. 36 28 (אֲרָן [Sam.]). אֲרָם [AE] = I Ch. 142 (אֲרָם [L.]). C. Niebuhr (influenced by the preceding name Uz) prefers the reading Aram, which is supported by some Heb. MSS, Targ. Jon., & Vg. and *Onk.* (cp *Gesch.* 129). The MT is, however, probably correct (cp OREN, I Ch. 225), though if Oren is the right pronunciation of אֲרָן in I Ch. 225, it is probably correct also in I Ch. 142, and *vice versa* (see We. *De gent.* 391).

ARARAT (אַרְרָט; ἀρρατ [BAL]). I. Ararat is mentioned in the OT as a country; 2 K. 19 37 (אַרְרָט

1. Country. [B], אֲרָדָד [V], Is. 37 36 (אַרְמֵנִיָּה [B&AQQ]); cp Tob. 1 21 (אַרְרָט [B]) AV

allusions. ARARATH, Jer. 51 27 (אַרְטֵי תַּיִר עִמּוֹיָהּ [B&S]; אַרְרָט [A]; אַרְרֵט [Q]). The first two passages referred to are parallel; they relate that the two sons of Sennacherib (Sin-ah-irba), after having slain their father, 'escaped into the land of Ararat' (so RV). A collateral confirmation of this report is given by an inscription of Esar-haddon 2 (Asur-ah-iddina) which states that on the news of the murder of his father he quickly collected the forces (with which he was probably carrying on a campaign in Cappadocia or Cilicia), marched against Nineveh, and defeated the army of the murderers at Hani-rabbat (Hanigalmit? Schrader). This district lies in the neighbourhood of Melitēne, just where, at a later time, the Romans entered Armenia (*i.e.*, Ararat). In Jer. *l.c.* the prophetic writer summons the kingdoms (or, as אֲרָם, the kings) of Ararat, Minni, and Ashkenaz to fight against Babylon. This too agrees with the representations of the inscriptions, which constantly distinguish between the land of Mannu and Urartu or Ararat. Mannu (which lay to the S. or SE. of Lake Urmīla) was generally subject to the Assyrians, but at least once was conquered from them by Argištis son of Menuas (see Tiele, *BAG* 208, 215). See further MINNI, ASHKENAZ.

The name Urartū appears in the Assyrian texts from the thirteenth century onwards. It appears to be interchangeable with Nairi (*i.e.*, the streams), the old Semitic name of the country,

2. Assyrian texts, etc. which it bore, for example, under Tiglath-pileser I. (*circa* 1108 B.C.) and, as appears from the notices in the Egyptian inscriptions of the eighteenth dynasty, at a much earlier date (*circa* 1400 B.C.).

The kings, who are called by the Assyrians Urartians, never apply this name to themselves. Sarduris I., the first king whose inscriptions, written in Assyrian (*circa* 830 B.C.), have come down to us, calls himself king of Nairi, a title which the Assyrians naturally did not grant him, because they themselves laid claim to his country. His successors, who use their own language, call their land Biaina, out of which the later name Van has arisen, a name which must at that time have been transferred from the district where the kings resided to the whole kingdom.

Next, as to the extent of the kingdom of Urartu or Nairi. The greater part of the later Armenia was, sometimes at any rate, included within its limits; for Vannic inscriptions have been found even in Malatīyah, near Palu on the Upper Euphrates, and as far away as the Russian province Erivan. It would appear that originally Nairi denoted a more southerly region, where

¹ On Ornan see ARAUNAH.

² 3 R. 15, col. 117.

the Tigris and the Euphrates rise, whilst Ararat proper (Urartu) lay to the N., in the plain of the Araxes; but that between the eleventh century and the ninth, the Urartians (whom their language shows to have been a non-Semitic people) conquered the more southerly region, and established there the chief seat of their dominion—a conquest which they were enabled to make by the great decline of Assyria at that time. Afterwards, both names, Nairi and Urartu, were used for the whole country. The Assyrian king Sargon broke the power of Urartu for a long time; but his successors did not succeed in their endeavours to destroy it, and so it is not unnatural that Assyriologists have sometimes defended the pre-exilic origin of the long prophecy against Babylon at the end of the Book of Jeremiah, on this ground among others, that the kingdoms of Ararat and Minni are still well known to the Israelites, and considered to be formidable powers.¹ Kuenen, however (*Opus.* 2nd ed. *ibid.* 235 f.), has sufficiently shown that these arguments are not conclusive. Proper names like Ararat and Minni simply prove the literary and antiquarian research of the author, and the phenomena of the prophecy as a whole appear to both the present writers to presuppose a period later than that of Jeremiah. (See JEREMIAH, ii.)

2. Ararat is mentioned also in the post-exilic version of the Deluge-story. The statement runs thus: 'And the ark rested . . . upon the mountains of Ararat' (Gen. 8:4 RV; Samar. text 2777).

3. Deluge-story. This is precisely parallel to the statement of the cognate Babylonian story (see DELUGE, § 4): 'The mountain of the land of Nisir stopped the ship,' or, as the following lines give it, 'The mountain Nisir stopped the ship.' That Nisir (protection? deliverance?) is properly the name of a mountain or mountain range seems to be clear from Āsur-nāsir-pal's inscription (see *KB* 177), and Ararat too, in the intention of the Hebrew writer, will be the name of a mountain or mountain range. The situation of Nisir is clear from the inscription just referred to. It was in Media, E. of the Lower Zāb, and S. of the Caspian Sea. There lies Elburz, the Hara, berezāiti, or Hara haraiti bars, thus named by the N. Iranians after their mythic sky-mountain. Now, it is remarkable that Nicolaus Damascenus (in *Jos. Ant.* i. 36, cp also *OS* 209 48) names the mountain of the ark Baris, and places it 'above Minyas'—i.e., Minni (Mannu). Baris (*bars*)—highly appears to be a fragment of the Iranian name of Elburz, which this writer took for the whole name.² It may be conjectured that this was the mountain which the Hebrew writer, in accordance with the Babylonian tradition, had in view. If so, he gave it the name which it bore in his own time, Hara haraiti, shortening it into Ararat, not perhaps without confusing it involuntarily with the land of Urartu, which latter name may have had a different origin.

It was natural enough that the most widely spread tradition accepted the identity of the Ararat of the Hebrew Deluge-story with the kingdom of Ararat spoken of above. There (i.e., in the plain of the Araxes) a lofty mountain rises, worthy, so it may have appeared, to be the scene of such a great event as the stranding of

¹ Sayce, *Proc. Mon.* 485 f. Prof. Sayce is uncertain whether Jeremiah 'has made use of some earlier prophecy of which Nineveh was the burden, or whether 'the prophecy belongs to a time when Babylon had already taken the place of Nineveh, but when in other respects the political condition of W. Asia still remained what it was in the closing days of the Assyrian Empire.' 'In any case the prophecy must be earlier than the age of the second Isaiah, to which modern criticism has so often referred it.' This was printed in 1894, five years after the appearance of vol. ii. of the most authoritative summary of 'modern criticism,' Kuenen's *Onderzoek* (2nd), and two years after that of the German translation. Prof. Tiele, who, in 1886 (*BAG* 480), from an incomplete view of the critical arguments, maintained Jer. 50 f. to have been written before Cyrus among the exiles in Babylon, now accepts Kuenen's main conclusions as expressed in the work referred to.

² Whether Lubar, the name of the mountain of the ark in *Jubilees*, chaps. 5 and 10, has any connection with Baris, it is unimportant to decide.

the ark. Of its two conical peaks, one is crowned with perpetual snow, and rises 17,000 ft. above the sea-level; the other is 4000 ft. lower. That the Hebrew writer thought of these mountains as in the highest degree improbable (see *Di. Genesis*, 131). Another tradition identified Ararat with the land of Cardu (so Pesh., Targ.)—i.e., the ancient Korduene or Karduchia on the left bank of the Upper Tigris, and the mountain of the ark with the Jebel Judi, SW. of Lake Van, which has become the traditional site with the Moslems.

In the Table of Nations (Gen. 10) the name of Ararat does not occur; but Ashkenaz, Riphath (or Diphath), and Togarmah (see special articles) probably denote districts of W. and NW. Armenia.

For the geography of Urartu cp especially Sayce, 'Cuneiform Inscr. of Van,' *JRAS* xiv. pt. ii. 388 ff., where, however, the Armenians, who entered the country from the W., and are related to the Aryan races of Asia Minor, are regarded as Iranians. It is against this view that, shortly after the first mention of the name Urartu by Āsur-nāsir-pal, names of an Aryan sound occur in an inscription of his son Shalmaneser II. (ARTASATI and DATI). CP. T. E. W. H. K. K.

ARARATH. AV⁹⁸² 4 Isrl. 1348; RV. ARARATH.

ARARITE (אַרְרָתִי), 2 S. 23:36 RV; AV. HARARITE, 3.

ARATHES (ἀραθῆς [VA]), 1 Macc. 15:22 RV, AV. ARIARATHES (q.v.).

ARAUHAH (אַרְוִיָּה), so Kt. everywhere in 2 S. 24, but Kt. אַרְוִיָּה : 16, אַרְוִיָּה : 18, אַרְוִיָּה : 22, 24, or ORNAN (אֲרָנָן in Ch.), a Jebusite, whose threshing-floor, consecrated by the presence of the angel of Yahweh, David purchased as a site for an altar (cp MORIAH). The story is told in two forms, which agree in essentials. On 1 Ch. 21:20 see note to Kittel's translation in *SBOT* (2 S. 24:16 ff.; 1 Ch. 21:15 ff.; 2 Ch. 31). אַרְוִיָּה [AV] : 1 cp אַרְוִיָּה [OS. INT. 10] 38, אַרְוִיָּה [OS. INT. 10] 38, however, was not Arauhah, which is thoroughly un-Hebraic, and presumably un-Canaanitish. The critics have in this case not been critical enough. Even Budde (*SBOT*, Heb. ed., note on 2 S. 24:16) admits, rather doubtfully, the form Arauhah. Klost. prefers אֲרָנָן's form Orna, which, however, is no better than the Ornan of the Chronicler. One has a right to require a definitely Hebrew name, and such a name this Jebusite MT actually gives us in 2 S. 24:18—viz., אַרְוִיָּה = Adonijah (cp אַרְוִיָּה [AL.] = Adonijah in 2 S. 34, and in אֲרָנָן of 1 Ch. 32, and in 1 K. 1 f.). It is proposed, therefore, to correct 'Arauhah' into 'Adonijah' throughout, except in v. 23 (on which see below); cp 'Adonizebek,' miswritten in Judg. 1 for 'ADONIZEDEC' (q.v.).

The critics have been very near making this correction. They have rightly rejected the pretty romance based on the phrase 'Arauhah the king' in 2 S. 24:23 (MT), from which Ewald (*Hist.* 3:163) inferred that Arauhah was the old dethroned king of Jebus. They have also rejected the makeshift rendering of RV, 'All this, O king, doth Arauhah give unto the king,' because a subject speaking to his sovereign was bound to call himself humbly 'the king's servant' (cp 1 S. 26:19 1 K. 1:26). As Wellhausen first saw, the sense required is, 'All this doth the servant of my lord the king give unto the king.' This means correcting אַרְוִיָּה into אֲדֹנִיָּה, and prefixing אֲדֹנִיָּה—a capital correction which only needs to be supplemented by the emendation of אֲדֹנִיָּה elsewhere into אֲדֹנִיָּה (see above).

An additional argument has thus been gained for the substitution of 'Adonijah' for 'Arauhah.' The correction is certain, and it is of the highest interest. The Israelite king and his Jebusite subject worship the same god—the god of the land of Canaan. Adonijah too was not an ex-king, but simply a member of the Jebusite community, which continued to exist even after the conquest of Jerusalem. אֲדֹנִיָּה (2 S. 66 'אֲדֹנִיָּה. Heb. אֲדֹנִיָּה)

apparently identified the place with the threshing-floor at Perez-Uzzah (see NACHOS). T. K. C.

ARBA (אַרְבָּא; אַרְבּוֹב [H], אַרְבּוֹ [A] -Be [I.], 'the greatest man among the Anakim' (Josh. 14.10). See ANAK, and HEBRON, 1.

ARBAH (אַרְבָּן) Gen. 35.27 AV. See HEBRON, 1.

ARBATHITE (אַרְבַּתִּי) *i.e.*, a man of Beth-arabah (2 S. 23.31 1 Ch. 11.32). See ARB-ALBON.

ARBATTIS AV, or rather **Arbatta** RV (ἐν ἀρβατικοῖς [AN^a]; -BANOIC [N^a], -BATN. [V^a], -TAN. [W^a]; *Vg. in Arabot*); the SYRIAC gives the strange form *Arbatit*, ܐܪܒܬܝܬܝܢ, 1 Macc. 5.23 f. Simon the Maccabee, after his successes in Galilee against the Gentiles, brought back to Judea 'those [Jews] that were of (reading *ek* for *en*) Galilee and in Arbatta.' A district rather than a town is obviously to be understood. Ewald (*Hist.* 5.314) thinks of the plain called el-Batīna on the NE. shore of the Sea of Galilee (cp the SYRIAC form); more probably the Arabah or Araboth (אַרְבּוֹת) of Jordan is intended. See ARABAH, 1.

ARBELA (ἐν ἀρβηλοῖς [ANV]), 1 Macc. 9.2. Bacchides and Alcimus, in their second expedition into Judea, 'went forth by the way that leadeth to Galgala (γαλααδ [codd. 64, 93]), and pitched their tents before Masaloth (RV Mesaloth; *μεσσαλωθ* [A], *μαισα* [NV]), which is in Arbela.' There are four alternative explanations (but see CHISLOTII-TABOR).

First: Josephus (*Ant.* xii. 111) seems to have read for 'Galgala,' 'Galilee,' which Wellhausen (*JG* 261, n. 2, where he quotes the parallel case,

1. In Galilee?

Jos. xii. 23 ܘܫܪ ܩܠܝܠܝܝܐ) adopts, and, without explaining Masaloth, takes Arbela to be the well-known spot at the head of the cliffs overhanging the western border of the plain of Haṭṭin, the modern Irbid. The interchangeableness of the two forms Arbel and Arbel is proved by the Arab geographers. Nāsīr-i-Khusrāu, 1047 A.D., calls it Irbil; Yākfūt in 1235 A.D., and others, call it Irbid. The limestone caverns near Irbid were the haunts of bandits, who were only with difficulty dispossessed by Herod the Great; the methods he employed are graphically described by Josephus (*Ant.* xiv. 154 *ET* 1. 162 *ff.*). Robinson, who, with most moderns, accepts this identification, conjectures that Mesaloth 'which is in Arbela' represents the Heb. מִסְלּוֹת in the sense of *steps, storeys, terraces*, and describes the fortress on the face of the almost perpendicular cliff (3 239). With more reason Tuch (*Quest. de Flav. Jos. Libb. Hist.*), followed by Wellhausen (*l.c.*), proposes to read *Μεσαδωθ* (cp HP 93. *Μεσσαδωθ*) as if for מִסְלּוֹת 'strongholds.' The objections to this identification are that Josephus is the only authority for the reading Γαλααλα, and that, by all we can learn from him, the task of reducing Arbela would have cost Bacchides more time than in the circumstances he was likely to be willing to spend. The direction through Galilee by Arbela would, however, be a natural one for the Syrians to take.

Second: As natural a line of march for the Syrian army lay along the coast down to the mouth of the valley of Ajalon, and up that valley or one of the parallel defiles farther S. On this line there was a Γαλαλα, the present Jiljūiyeh, a little more than 13 m. NE. of Joppa, on a site so important that the main road might well be described as ὁδὸν τῆς εἰς Γαλαλα. There is, however, no trace along it of a *Μεσσαλωθ* or an *Ἀρβηλα*.

Third: If Bacchides wished to avoid the road by the coast and up Ajalon, which had proved so fatal to Nicanor, he may have taken the road from Esdraelon S. through Samaria, which Holofernes is represented in Judith as taking—the road which this book (47) expressly calls 'The

anabasis of the hill-country,' 'the entrance into Judæa.'

Upon it there stand two Gilgals, one near Shechem, and one 5 m. N. of Gophna, which Ewald (*Hist. Eng.* ed. 5.223) takes to be the Galgala of the narrative (but see GILGAL). On this route Masaloth might be Meselteh or Meithalūn, respectively 5 and 8 m. S. of Jenin, each of them a natural point at which to resist an invader. A greater difficulty is presented by ἐν Ἀρβηλοῖς. The plural form evidently signifies a considerable district. Now, Eusebius (*OS* 29 *Ἀρβηλά*) notes the name as extant in his day, on Esdraelon, 9 R. m. from Lejjūn, while the entrances from Esdraelon on Meselieh and Meithalūn are 9½ R. m. from Lejjūn. It is therefore possible that the name Ἀρβηλά covered in earlier days the whole of this district. The suggestion is, however, far from being capable of proof. The chief points in its favour are the straight road from the N., which was regarded as a natural line of invasion, and the existence along the road of a Jiljūiyeh, a Meselieh, and a Meithalūn.

Fourth: There is some MS authority¹ for reading γαλααδ instead of γαλαλα; and if the march of

4. In Gilead? Bacchides be conceived as having been through Gilead, the Arbela of 1 Macc. 9.2 may be the Ἀρβηλά (mod. Irbid) which Eusebius (*OS* 214 73) vaguely defines as a certain village beyond Jordan on the confines of Pella. This Irbid, however, lies very far E. and not in a direct line from the N. Even from Damascus, it would be a roundabout way for the Syrian troops marching with speed on Jerusalem. (We can hardly compare the advance of Antiochus III. upon Ptolemy IV. [Polyb. 5.6], in the course of which Antiochus, after taking Tabor and Betshean, crossed Jordan and overran Gilead from Arbela to Rabbath-ammon.)

Of these four alternatives the first and third seem the most probable. The difficulties of all, however, are so great that most historians (*e.g.* Schürer and Stade) shirk discussion of the line of march, and bring Bacchides without delay to the walls of Jerusalem. G. A. S.

ARBITE, THE (אַרְבִּיתִּי), 2 S. 23.35. probably an error for Archite. See PAARAI.

ARBONAI (ἀρβωνά [BA], χερβων [N]; ܐܪܒܘܢܐ 'Jabbok' [Syr.]; *mamb're*). In Judith 2.24 it is stated that Nebuchadnezzar 'went through Mesopotamia, and destroyed all the high cities that were upon the river (χεῖμαρος) Arbonai till ye come to the sea.' Various commentators, following Grotius, have taken the Chabōras to be meant. There is much plausibility, however, in the suggestion of Movers that the proper name may have arisen out of a failure to understand the original, which he conjectures to have been הַרְבֵּי בְּנֵי (the cities which were) beyond the river, 'בְּנֵי' having been taken for a proper name and supplied with a Greek ending.

ARCHANGEL (ἀρχαγγελοῦ [Ti. WH]), Judg. 9. See ANGEL, § 4.

ARCHELAUS (ἀρχελαοῦ [Ti. WH], Mt. 2.22^f), son of Herod the Great by Malthakē, and elder brother of Herod Antipas. By his father's will he was made ruler over Judea and Samaria, and his visit to Augustus for the confirmation of this inheritance doubtless suggested a point in the parable Lk. 19.12 *ff.* Upon his coins he bears the family name of Herod and is called 'Eth-narch,' for 'king' he never was, in spite of his assumptions (cp Jos. *Ant.* xvii. 45). He may, however, have been popularly called 'king.' (Cp Jos. *Ant.* xviii. 43, and the use of βασιλεύει in Mt. 2.22. See further HERODIAN FAMILY, 3.)

ARCHER. See WAR, WEAPONS.

ARCHES is the rendering in the EV of אֲרֻכָּיִם, etc., in Ez. 40.16 *ff.* The word אֲרֻכָּיִם or אֲרֻכָּי occurs in MT only in this chapter; but ^{EBAL} transliterates αλαμ also where MT has אֲרֻכָּי, אֲרֻכָּי. Whatever explanation be adopted of the variation of form, the meaning is 1 HP οδοῦ εἰς γῆν γαλααδ [cod. 64], ο. πῆν εἰς γαλααδ [cod. 93].

ARCHEVITES

doubtless the same throughout—viz., 'porch.' See PORCH, PALACE, TEMPLE.

That the principle of the arch early became known to Israel is a probable inference from the shape of their TOMBS.

ARCHEVITES (Kt. אֲרֻכִּי, cp Kau. *Gram. d. bibl. Aram.* § 616; Kr. אֲרֻכִּי; S. Swetes. ἀρχαίοι; ἀρχαίοι [B]; ἀρχαίοι [A]; ἀρχ. [L]), mentioned in Ezra 4⁹ as a tribes-settle in Palestine (AS NAPPLER 172 f.).

The word is not to be regarded as meaning inhabitants of Erech (Ryssel, Ryle), or as equivalent to ἀρχαῖρες (Jensen, *TLZ*, 1895, n. 20), but rather as miswritten for (אֲרֻכִּי, 'who are Cushites' (see 2 K. 17³⁴ 'from Babylon and from Cuthah,' etc.). So Marc. *Ficoid.* 64 f.

ARCHI (אֲרֻכִּי). Josh. 16: AV. RV ARCHITES.

ARCHIPPUS (ἀρχιππος [Ti. WH]) is included as a 'fellow-soldier' of Paul and Timothy in the address of the epistle to Philemon (Philem. 2), and in that to the Colossians (4:17) he received this message: 'Take heed to the ministry (διακονία) which thou hast received in the Lord, that thou fulfil it.' Most probably he had recently become the minister (more than 'deacon' in the narrower sense) of the church at Colossae, perhaps in succession to Epaphras, who was now with the apostle. In *Ap. Const.* (7:46) he is said to have been apostolically ordained bishop of Laodicea in Phrygia.

ARCHITES, AV ARCHI (אֲרֻכִּי); TOY APXOI [L]; SBA combine the word with the following Ataroth, χαταρωθαι [B], ἀρχαταρωθ [A]), a clan mentioned in the difficult phrase בְּנֵי הָאָרֶץ עֵבֶר הַיַּמִּית (Josh. 16:2) in the delimitation of the southern frontier of Joseph. Probably we should reverse the order of the last two words and read 'the border of Ataroth-of-the-Archites.' Indeed, we might plausibly go a step further and change אֲרֻכִּי (or אֲרֻכִּי) (אֲרֻכִּי), 'Addarites' (or 'Ardites'). See ATAROTH, 2. That the name Archi lingers in that of the village 'Ain 'Arikh, 5 m. WSW. of Beitin (*PEF Mem.* 37), is at best a hazardous hypothesis (P. Utl, and Buhl *Pal.* 170 f.). The home of the clan of Archites to which HUSHAI and, according to S (2 S. 23:11) דָּוִד, ὁ ἀρχαῖος [BA], ὁ ἀρχαῖ [L]; and אֲרֻכִּי [T] (ὁ ἀρχαῖος) ἀρχαῖ [B], ὁ ἀρχαῖος [A], ὁ ἀρχαῖος [L]), SHAMMAH [g.v., 3 and 4] and PAARAI, two of David's heroes, belonged, may have been farther S.

ARCHITECTURE. See CONDUITS AND RESERVOIRS, FORTRESS, HOUSE, PALACE, TEMPLE, TOMB.

ARCHIVES. See HISTORICAL LITERATURE, § 5.

ARCTURUS, AV's rendering of אֲרֻכִּי (Job 9:9) and אֲרֻכִּי (Job 38:32); RV BEAR. Most probably, however, אֲרֻכִּי in Job 9:9 has arisen from dittography of אֲרֻכִּי which precedes, for אֲרֻכִּי follows without א. The whole verse seems to be an unmetrical interpolation (see Bickell); Duhm. agrees as to אֲרֻכִּי, and goes so far as to excise 7:8-10 (so also Beer). Observe that Am. 5:8, which is certainly (see AMOS, § 12) an interpolation, and very possibly alludes to Job 9:9 (as Am. 4:13, also interpolated, may allude to Job 9:8), does not include אֲרֻכִּי among the constellations. We have, therefore, only to explain the אֲרֻכִּי (אֲרֻכִּי?) of Job 38:32. That the Pleiades are meant is not unlikely (see STARS, § 3:10); cp Tg. (38:32) אֲרֻכִּי אֲרֻכִּי, 'the hen with her chickens'. Cheyne, however, prefers 'the Lion with his sons' (on Job 38:31, etc. *JBL*, 1898, 103 ff.). Epping's list of 'stations' for Venus and Mars, obtained from Seleucidian tablets, gives as the tenth 'the fourth son behind the king' (ρ Leonis). The 'king' is Regulus (α Leonis); he is preceded by ρις αρι 'Lion's head' (ε Leonis).

(Genepov [BA]; *Klythō* [Pesh.]; *arcturion* [Vg. 9:9], *zosterion* [ib. 38:32]. In 9:9 S, B, Bsh., presuppose the order אֲרֻכִּי אֲרֻכִּי) Cp MAZZAROTH, ORION, PLEIADAE.

C. F. B.—T. K. C.

AREOPAGUS, AREOPAGITE

ARD (אֲרֻכִּי. Gen. 16:2 Nu. 26:40 cp ARDON, ARDIT), perhaps a better form than ADDAR (אֲדָר) of אֲרֻכִּי 1 Ch. 8:37 (Gen. אֲרֻכִּי [ADL]; B lacking; Jos. *CAPODICE*; Nu. אֲדָר [B], אֲדָר [AFL]; 1 Ch. אֲרֻכִּי [A], אֲדָר [L]) in genealogy of BENJAMIN (*g.v.*, § 9; ii. β); variously designated son of Benjamin (Gen. MT), son of Bela (Nu. and 1 Ch.), son of Gera b. Bela (Gen. [ADL], B lacking); Gentile ARDITE (אֲרֻכִּי); SBA om., ὁ ἀρεπ [L. 7:7].

ARDATH, RV Ardat, the name of a field mentioned only in 4 Esd. 9:26 as the scene of a vision of Esdras.

The Eth. and Syr. read *Arshad*, which Fritzsche and Hildt follow. The Lat. Vss. vary: *ardath* [Vg.], *ardar* [S.], *ardath* [A], etc.; cp Bensly *ad loc.* Supported by the description in 7:24 ('a field . . . where no house is builded'), Volkmar would emend to *Arba*, 'desert' (more correctly *Araba*). Similarly Rendel Harris, who, however, connects Arba with Kirjath-arba (*Geneal. of the sons of Joseph*, 1 and 2, 209), in which name 'ard' in 14:1 will be Abraham's oak of Hebron. On the other hand, we should then expect rather the usual name Hebron, or, at least, the fuller form, Kirjath-Arba. If Ardat is indeed to be sought for in this district (in 3:1 Esdras is in Babylon) we might follow T. Rec. more closely and identify it with the well-known Arad, which also was situated in a desert. See ARAD, 1.

ARDITES (אֲרֻכִּי), Nu. 26:40. See ARD.

ARDON (אֲרֻכִּי); OPNA [BA], אֲרֻכִּי [L]), b. Azubah, a Calebite (1 Ch. 2:18). See AZUBAH, 1.

ARELI (אֲרֻכִּי); Gen. 46:16; ἀρηιαί [D], ἀρηιαί [A], ἀρηιαί [L]; Gen. 46:16, also τῶν ἀρηιαί [BFL], om. A; see ARIEL, b. Gad. In Nu. 26:17b the name is used also collectively with the art. (EV 'the *Aremites*': ὁ ἀρηιαί [BFL]), with consciousness that 'son of Gad' = Gadite clan. Doubtless *v. 17b* should be corrected to 'Of Ariel (אֲרֻכִּי)', the family of the Arielites (אֲרֻכִּי), and it is possible that the names should rather be Uriel, Urielites (see NAMES, § 35).

AREOPAGUS, AREOPAGITE (Acts 17:19 ΕΠΙ ΤΟΝ ΑΡΕΙΟΝ ΠΑΓΟΝ [Ti. WH] EV 'unto [the] Areopagus')

1. **The hill.** ^{7:22} AV 'Mars Hill. RV 'Areopagus'. The name of the hill Areopagus, Acts 17:19, ἀρειοπαγίτης [Ti.], ἄρειος [WH]. DEMONIA is caused by the fact that the name signifies both a hill and a court. The hill is that formless mass of rock which lies between the NW. below the Acropolis, separated from it by a depression now largely filled with earth (Herod. 8:52; Luc. *Pisc.* 42). The NE. corner of the hill is a precipice, to the top of which we ascend by means of sixteen ruined steps, cut in the rock at the SE. angle. At the head of the stair are the remains of an altar. The deep chasm at the foot of the precipice was connected with the worship of the Sennai (Eumenides or Furies). 'The whole place was sacred to the most awful associations. Mythology had here lent to the majesty of the law a

2. **The Court.** most solemn background.' As a Court, the Areopagus was, before the development of the democratic spirit, the supreme authority in Athens. Its powers were of two kinds, definite and indefinite. 'The definite powers were:—(1) a limited criminal jurisdiction; (2) the supreme direction of religious worship especially of the cultus of the Eumenides. The indefinite powers were:—a general supervision or guardianship (1) of all magistrates and law courts; (2) of the laws; (3) of the education of the young; and (4) of public morals—in addition to which there was (5) the competence to assume in political and national emergencies a dictatorial authority.'

During the earlier history of the city the court held its sittings, for the trial of blood-guiltiness, upon the hill itself. For the hill was the Hill of the Arae, the Curses or Imprecations—'the place for the solemn irrevocable oath, the natural court for the trial of terrible offences of blood-shedding that might not be tried under a roof.' Moreover, to the early city, the Areopagus was the

place *without* the gates, a place to condemn the criminal, to erect a monument for the outcast tyrant, to bury the stranger (Robert, *Aus Kydathen*, 101). It was during the earlier and the later periods of Athenian history that the Court of the Areopagus (ἡ ἐκ τοῦ Ἀρείου πάγου βουλῆ) enjoyed its powers to the full. In the interval Ephialtes, aided perhaps by Themistocles (Arist. *Const. Ath.* 25; 462 B.C.), abolished most of its indefinite functions, and thus deprived it of its strongest influence; it became merely a 'criminal court of narrow competence.' Therefore, as in Aristotle's time, it dealt only with cases of wilful homicide, of poisoning, and of arson (*Const. Ath.* 57), while the superintendence of religion was in the hands of the King Archon. As indictments for impiety (ἐνδείξεις ἀσεβείας) came, in their preliminary stages, before the latter, cases which once would have gone before the Areopagus were now tried before the popular jury-courts. It was in this way, therefore, that Socrates, accused like Paul of not worshipping the gods of the city and of introducing new divinities,¹ was tried. As the regular place of business of the King Archon was the Stoa Basileios—the associations of which were, in later days, exclusively religious—it was within that portico that the charge of impiety was brought against the philosopher. It is probable, however, that the Areopagus also always met within the Stoa (Dem. in *Aristog.* 776) when ritual did not demand a midnight-sitting on the open rock—in other words, in all cases other than those of murder. When, with the advent of the Romans, the Areopagus reappeared, after its long eclipse, as once more the supreme authority of the city (cp Cic. *Ep. ad Fam.* xiii. 15; *Nat. Deor.* 274), and the specific control of religion fell again within its competence, it would naturally continue to meet there.

There it was, therefore, and before that body, that Paul was summoned. To speak of him as 'perhaps standing on the very stone where had once stood the ugly Greek who was answering the very same charge' (Farrar, *St. Paul*, 390) is to sacrifice historical truth to sentiment. We must relinquish the fond idea that Athens has the interesting distinction of being the one city of the world where we can tread in the very footsteps of the apostle. The view now generally taken errs in a double manner. It maintains, first, that the proceedings were in no sense legal or magisterial; and secondly, that they were upon the hill. The marginal rendering (AV 2, 22) is no doubt right in representing that it was before the court that Paul was brought. Can we believe that a crowd of idlers, parodying the judicial procedure of the court, could have been allowed to defile the neighbourhood of 'that temple of the awful goddesses whose presence was specially supposed to overshadow this solemn spot, and the dread of whose name was sufficient to prevent Nero, stained as he was with the guilt of matricide, from setting foot within the famous city' (Suet. *Ver.* 31; Dio Cas. 43.14)? Such a view requires better support than is given by the bare assertion that 'the Athenians were far less in earnest about their religion than in the days of Socrates, and if this was meant for a trial it could only have been by way of conscious parody' (Farrar, *op. cit.* 390, n. 3). Nor can an appeal to Acts 9:27 prove that ἐπιλαβόμενοι (Acts 17:19, AV 'took') is here not used in the sense of 'arrest.'

The view advocated by Curtius (*Stadtgesch. von Athen*, 262 f.) is correct. Paul was taken not to the Areopagus hill,—a place not adapted either for hearing or for speaking, upon an occasion such as this,—but to the Stoa Basileios (ἐπὶ τὸν Ἀρείου πάγου; cp Acts 9:21, 16:19, etc.) for a preliminary examination (ἀνάκρισις). There it was to be decided whether the new teaching would justify a prosecution for the introduction of a new religion. Standing in the midst of the assembled

¹ Cp Xen. *Mem.* 1:1 with Acts 17:16. Yet there is probably no conscious reference on the part of the Christian writer to the trial of Socrates, though the contrary has been asserted.

Areopagites (ἐν μέσῳ τοῦ Ἀρείου πάγου, cp Cic. *ad Att.* i. 145; *Pantheos d' Epistulae*, 108, Ἀρείου πάγου λόγους ἐνοήσαντο), he made his defence. Much of what fell from his lips may be presumed to have awakened an echo in the breasts of his audience (on the speech see HELLENISM, § 9); but the mention of the resurrection of the body seemed to remove the case altogether out of the domain of the serious and practical. The court refused to continue the examination, and Paul was contemptuously dismissed (ἐχέλευσεν v. 32 f.). Curtius, *Paulus in Athen*, dismisses his view. For another view, see Rams. *Paul*, 243 f. See also Findlay, *Ann. Brit. Sch.* 178 f. W. J. W.

ARES (ἄρεα [BA]), 1 Esd. 5:10 = Ezra 2:5, ARAM, 2.

ARETAS (ἄρετας [Ti. WH]), an ancient name (strictly Hāthra; 𐤀𐤓𐤓𐤓 in inscriptions; e.g., Euting *Nab. Inschr.* No. 16) of Nabatean princes, mentioned in the story of Jason the high priest (in the time of Antiochus Epiphanes), 2 Macc. 5:8 (ἄρετας [VA]). The Aretas of this passage is called 'king of the Arabians'; he was hostile to JASON (q.v.). Another Aretas was master of Damascus in the time of Paul—three years after the apostle's conversion. His 'ethnarch' sought (see below) to apprehend Paul, who, however, made good his escape (2 Cor. 11:32 f.). The story of the Nabateans has been told elsewhere (see DAMASCUS, § 12, NABATEANS). It is certain that about 85 B.C. they had possession of Damascus; but it should be added that the autonomy of Damascus in 70-69 B.C. is established by numismatic evidence. The first collision with the Romans was in 64-62 B.C., when the Nabatean king, Aretas III., intervened in the struggles between Hyrcanus and Aristobolus. Damascus now came under Roman sovereignty. During the following decennia the Nabatean kingdom became involved in the wars occasioned by the Parthians—with varying but for the most part ill success. The king also had various disputes with his neighbour Herod the Great. Aretas IV. (9 B.C.–40 A.D.) had tact and skill enough to keep terms with Augustus; his daughter became wife of Herod Antipas (Jos. *Ant.* xviii. 51), but was set aside in favour of Herodias. Disputes on frontier questions furnished the aggrieved father with pretexts for war. Vitellius was ordered by Tiberius to avenge the defeat inflicted by Aretas upon Herod; but the death of the Emperor put an end to the scheme (cp CHRONOLOGY, § 78). At this time, according to 2 Cor. 11:32, Damascus must again have fallen into the hands of Aretas; Damascene coins of Tiberius do not occur later than 33-34 A.D. A tempting conjecture is that it was Caligula that sought at this price, after his accession,¹ to buy over Aretas, against whom Tiberius had so recently ordered war; yet, in our complete ignorance of this chapter of history, we are not precluded from supposing that Tiberius himself in 34 A.D. had already taken occasion to present Aretas with the city as a peace-offering (cp CHRONOLOGY, § 78). A violent capture of the city by Aretas is not to be thought of: such a deed would have called for exemplary punishment at the hands of the Romans. Equally improbable is the view of Marquardt (*Röm. Staatsverwaltungs.* 1:405) and Mommsen (*Röm. Gesch.* 5:476) that Damascus had remained subject to the king of Arabia continuously from the beginning of the Roman period till 106 A.D. For (1) in Pompey's time Damascus belonged to the Decapolis (Plin. *HN* v. 1874; Ptol. v. 15:22; cp DECAPOLIS, § 2); (2) in the reign of Tiberius it was the Roman governor that gave the authoritative decision on a question of frontier between Damascus and Sidon (Tac. *Ann.* xvii. 63); (3) we have imperial coins of Damascus with figures of Augustus, Tiberius, and Nero; (4) in Domitian's time there was a cohort raised in Damascus, the Cohors Flavia (CIL

¹ So also Gutschmid (Excursus in Euting's *Nab. Inschr.* 85) and Schürer (*GHV* 1:618, ET 2:357 f.).

name will become no longer Uriel, but (by a slight modification) Ariel—*i.e.*, altar-hearth. The reading Uriel seems to have been known to the author of 319: 'says Yahwé, who has a fire (אֵשׁ) in Zion and a furnace in Jerusalem.' The other explanations of this prophetic name are (1) lion, or lioness, of God (*Ew., Di., Che., Isa.* 10); (2) hearth of God (*Del., König, Kittel*); (3) altar-hearth (*Stade, Duhm, Che., SBOT*). Of these, the third is probably the easiest; but none of them quite accounts for the selection of the new name for David's city, nor for the expression 'and will become to me like (an) Ariel (*v. 26*). T. K. C.

ARIMATHÆA (ΑΡΙΜΑΘΑΙΑ [Ti. WH]), Mt. 27. 57. etc. See RAMATHAIM-ZOPTHIM.

ARIOCH (אִרְיֹחַ; אַרְיֹחַ [BADEL, §7. N³⁰], אֲרִיחַ [87 in Dan. 2.14 f.]). Probably a Hebraised form of an *ari* Babylonian name; see CH. DORLANDER, § 31. 1880f., (1) possibly with archaeological accuracy, in Gen. 14.19 of an ally of an ancient king of Elam; (2) by a literary fiction, of Nebuchadrezzar's captain of the guard (*Dan. 2.14 f., 24 f.*); and (3) of a king of Elam (so the Syriac) in alliance with Nebuchadrezzar (*Judith 16, אַרְיֹחַ [N³⁰]*, Cp Bezold, *Babyl. Assyriol.*, lit. 53).

ARISAI (אַרְסַי; Αῤῥαῖος [BNI], -φάνου [A]), unless we regard this as an intruder and identify Arisai with the succeeding name *Araios*; see ARIDAI, son of Haman (*Est. 9.6*). See ESTHER, § 3. 100f.

ARISTARCHUS (ΑΡΙΣΤΑΡΧΟΣ [Ti. WH]), a Thessalonian (*Acts 20.4, 27.2*), one of Paul's companions in travel (*Acts 19.29*), was among those who accompanied him from Europe on his last recorded visit to Jerusalem (*Acts 20.4*), and also on his voyage to Rome, having joined him at Caesarea (*Acts 27.2*). As the apostle's 'fellow-prisoner' (συναρχιμάχωτος) he unites with him in saluting the Colossians (*Col. 4.10*). Cp COLOSSIANS, § 10 f. He joins in the salutation to Philemon (*Philem. 24*), but in this passage is designated simply as 'fellow-worker,' Epaphras alone being called 'fellow-prisoner.' From this it has been inferred, with much probability, that the companions of Paul relieved one another in voluntarily sharing his captivity.

In the lists of the 'seventy disciples' given by the Pseudo-Dorotheus and Pseudo-Hippolytus (not earlier than the fifth cent.), Aristarchus is bishop of Apamea in Syria. Pseudo-Dorotheus also has it that along with Pudens and Trophimus he was beheaded in Rome at the same time as Paul.

ARISTOBULUS (ΑΡΙΣΤΟΒΟΥΛΟΣ [VA; Ti. WH]), a Greek name adopted by Romans and Jews, and borne by several members of the Maccabean and Herodian families.

1. The teacher (διδάσκαλος) of Ptolemy (no. 1), to whom *Judas* (the Maccabee) sent letters (2 *Macc. 1.10*). He is the well-known Jewish-Hellenistic philosopher of that name, who resided at the court of Ptolemy VI. Philometor (180-145 B.C.). He was of priestly descent (ἀπὸ τοῦ τῶν Χριστῶν ἱερέων γένους; *v. 10*); cp *Lew. 4.17, 27, 27, 27*), and was the author of (among other writings) certain works on the Pentateuch, fragments of which are preserved in Clement of Alexandria and in Eusebius. See *Schür. G11. 2. 700. ff.*, *Ew. G11. 4. 155*, and *Kitt. Godsd.* 2. 433 ff.

2. 'The chief of the household of Aristobulus' are saluted in *Rom. 16.10*. It is not implied that Aristobulus himself was a Christian. The name was a common one in the dynasty of Herod. The list of the 'seventy disciples' given by the Pseudo-Dorotheus names Aristobulus as bishop of Britain.

ARIUS (Αῤῥῆς [ANV; Ἔ; is not certain, see Swete], *ARMS*, 1 *Macc. 12.20*; RV; see SHARTA).

ARK. See DELUGE, § 10.

1 Isaiah's authorship is doubted (*Ch. Intr. Isa. 204*). It is unlikely that Isaiah explained Uriel 'God's fire'; the paronomasia in *v. 26* would then disappear. Moreover אֵשׁ in the sense of fire seems to be late. Cp 30.32 f.; 33.17 (late).

ARK OF THE COVENANT or Sacred Ark (אֲרוֹן; אֲרוֹן הַבְּרִית [BNI]; *ARSA*).

There is nothing more significant than the changes in the titles of sacred objects. We must, therefore, be careful to place these titles in their chronological order. According to Seyring (*ZATW* 11.116 [91]) the oldest name of the ark (or sacred chest) is 'the ark of Yahwé the God of Hosts (Sēbā'ōth) who is enthroned upon the cherubim.'

1. Names: logical order. According to Seyring (*ZATW* 11.116 [91]) the oldest name of the ark (or sacred chest) is 'the ark of Yahwé the God of Hosts (Sēbā'ōth) who is enthroned upon the cherubim.' This title is reached by an analysis of the designations of the ark in (a) 2 S. 6.2 and (b) 1 S. 4.4 (both passages belong to early documents). The titles given in (a) are 'ark of God' (*hā-ēlōhīm*), and 'called by the name of Yahwé Sēbā'ōth that is enthroned upon the cherubim.'² In (b) the title is 'ark of the *brith* of Yahwé Sēbā'ōth who is enthroned upon the cherubim.' Recombining the supposed oldest elements in these titles, Seyring obtains the title mentioned above. This usually careful scholar, however, has overlooked, in dealing with (b), Ḥ's reading in the preceding verse—viz., 'the ark of our God' (אֲרוֹן אֱלֹהֵינוּ תוֹי תְּהוֹי הָיָא [B], *τ. κ. τῆς θεότητος τοῦ θ. ἡ. [A]*, *τ. κ. τ. δ. κυρίου τ. θ. ἡ. [L]*), which is self-evidently more correct than the Deuteronomic formula³ of MT, and, taken together with *v. 6* ('ark of Yahwé'), justifies us in assuming that the equally simple title 'ark of Yahwé' stood originally in *v. 4* and *v. 5*, and 'ark of God' (*cp 2v. 11 17 19-22*) in *v. 4b*. Nor has Seyring noticed that after 'ark of God' in (a) the relative clause which follows is superfluous, and presumably a later insertion. It must be added that it remains most improbable that the divine name Yahwé Sēbā'ōth is older than the Assyrian period, to which indeed Amos who undoubtedly uses it belongs; at any rate the theory that this name represents Yahwé as the God of Israel's hosts, and has any special connection with the ark, has insuperable difficulties.⁴ Thus, so far as (a) and (b) are concerned, the popular names for the ark were very short—viz., 'ark of Yahwé,' 'ark of God,' and 'ark of our God,'—and from the context of the former passage we find that there was a still shorter name, 'the ark' (2 S. 6.4), which occurs thrice in old parts of Samuel, and five times (or seven, including *Josh. 3.14 17*; see *Kau. HS*) in the Hexateuch. The title 'ark of God' (אֲרוֹן אֱלֹהִים, or twice אֲרוֹן אֱלֹהִים) occurs often in old parts of Samuel, and also in Chronicles. In a solemn speech of David in 1 Ch. 15.12 14 we find the sonorous phrase 'the ark of Yahwé the God of Israel,' which reminds us of the phrase used by the Philistines in 1 S. 5.7 f. 11.⁵ Side by side with 'the ark of Elohīm' we naturally find the phrase 'the ark of Yahwé.' It occurs first in the composite work JE, and may reasonably be ascribed in the first instance to J, though in some passages it may have been inserted by the editor, either as an altogether new addition, or in lieu of the phrase 'the ark of God,' which was probably used in E. Once (*Josh. 3.13*) we find this remarkable addition 'the Lord of the whole earth,' which, apart from *2v. 11 13*, occurs only in late writings, and, as Seyring points out, is

¹ Cp *Ass. rev., revēu (revēnu)*, 'bos,' 'resceptacle' (*DELUGE*, § 10).

² The same renderings are given for אֲרוֹן, Noah's ark, but not for אֲרוֹן, the 'ark' in the bulrushes.

³ This rendering implies that אֲרוֹן, 'name,' occurs twice in MT by pure accident. Otherwise we should have to suppose that the name by which the ark was called was 'the name of Yahwé Sēbā'ōth,' etc.

⁴ Similarly arguments (*Kel.-gesch.* 185 ff.), weakly met by Marti (*Gesch. der Jer. Rel.* 140), appear conclusive, only he should have fortified himself by Assyrian parallels. Thus, Ašur is said to rule kiššat ilāni 'the mass, or entire multitude, of the Gods,' Nebo to be the overseer kiššat šamē u iršitum 'of the mass (multitude) of heaven and earth.' Amos and his school represent Yahwé as the lord of all supernatural beings in the universe, in opposition to all rival deities. See however, *NAMES*, § 173.

⁵ On these points see further, Budde's crit. note in *SBOT*; Comand, *ZATW* 12.71 [92, n. 1]; *Wec. TBS* 167 (especially as to the right rendering of 1 Ch. 16).

ARK OF THE COVENANT

presumably due to a post-exilic writer whose idea of Yahweh differed from that of JE. The phrase 'the ark of Yahwé' passed from JE into the terminology of the historical books in general (including Chronicles).

A new title for the ark seems to have been coined by the author of the original Deuteronomy (Deut. 10:8), and

2. Ark of b'rith. adapted from him by writers and editors who shared his religious point of view, and even (strange to say) by the Chronicler, who, in general, stands so completely under the influence of the Priestly Code. This phrase is 'the ark of the *b'rith*' (usually rendered 'covenant'; see below), either simply (Josh. 3-6) or in various combinations, such as 'ark of the *b'rith* of Yahwé,' 'ark of the *b'rith* of Elohim,' and 'ark of the *b'rith* of Adonai.' The Deuteronomistic editors have freely introduced the term *b'rith* into the titles of the ark in the older sources which they edited. The work of the editor clearly betrays itself in such phrases as ארון הברית (ארון ה' אלהים) ארון הברית, where the editor has forgotten to make the omission of the article, necessitated by the introduction of a dependent genitive.

And now as to the correct meaning of the phrase ארון הברית. It is rendered by ἡ κειραὶς τῆς διαθηκῆς, by *Ve arca foederis et arca testamenti* (Nu. 14:44), and by *EV 'ark of the covenant.'* That *b'rith* cannot, however, in this phrase mean 'covenant' in our sense of the word is clear from 1 K. 8:21 (= 2 Ch. 6:11), where we are told that 'the *b'rith* of Yahwé was 'in the ark.' The phrase is parallel to that in Ex. 25:16 21, 'into the ark thou shalt put the testimony' (ארון הברית), which (see below) is a technical term for the 'two tables' of the Decalogue. Hence Kau. *HS* rightly rejects the obscure if not misleading phrase 'ark of the covenant,' and substitutes 'ark with the law (of Yahwé),' which is at any rate, by common admission, the best approximate rendering (cp COVENANT, § 1).

The latest phase in the historical development of the names of the ark is marked by the title which occurs

3. Ark of 'ēdūth. eleven times in the Priestly Code and also in Josh. 4:16 (introduced into JE by the editor?), meaning 'ark of the publicly delivered ordinance' (ἡ κειραὶς τῆς διαθηκῆς τῶν μαρτυριῶν, *Vg. arca testimonii*, *EV*, ark of the testimony). The meaning given above is confirmed by Ex. 31:18 (P:?) 32:15 (E:) 34:29 (P), where we hear of 'the two tables of the *np̄*.' Probably this new title appeared to the priestly writer clearer and more definite than that introduced by Deuteronomy. It did not, however, displace the older phrases, which reappear not only in Chronicles but also in the Greek Apocrypha, and (κ. τῆς διαθηκῆς) in the NT (see below, § 15).

On looking back, we see that the names and titles of the ark fall into three classes. We have, first, the names 'ark of Yahwé,' 'ark of God,' 'ark of our God,' which indicate that the ark contained an object which in some way symbolised and represented Israel's God; and next, the names, 'ark of the law,' 'ark of the ordinance,' which suggest that the object contained in the ark was inscribed with laws; and lastly, attached to the older names, titles such as those in Josh. 3(11) 13 2 S. 6:2, which indicate a desire to correct the materialistic interpretation which might seem to convert the ark into an idol. A critical study of the texts is the necessary commentary on these deductions from names. The following sections aim at bringing together the chief notices of the ark, indicating the sources from which they are derived, and then, at fitting points, giving the reader some idea of the results which follow from a critical treatment of these notices.

We turn first of all to the documents called J and E (as far as we can separate the one from the other) in the Hexateuch. It is more than probable¹ that both J and

E, in their original form, related how Yahwé or Elohim, at Sinai or at Horeb, directed an ark to be made as a

4. Traditional origin of ark: JE. substitute for his personal presence as leader of his people. These passages were omitted by the editor, who preferred the much more suitable account

(so he must have deemed it) given in P' (see below, § 13), but has preserved the tradition of J and E that, both in the wilderness and on the entrance into Canaan, the ark led the van of the host. In referring to this J quotes two poetic formulae: (Nu. 10:35 36), which he says were spoken by Moses at the beginning and the end of a day's march, but which more probably arose at a later time.² Whether J and E agreed with Deuteronomy in stating that the 'two tables of stone' were placed in the ark is a matter which can be only conjecturally decided.

There is, however, a very strong probability that they did not. E's story, at any rate, is much more forcible if we suppose no renewal of the shattered tables (Ex. 32:19), and we cannot believe J to have differed on this important point from E. Historical considerations (see below, § 10) confirm this conclusion. In particular, the ark was not, in the succeeding narratives of J and E, a symbol of the revealed law, but the focus of divine powers. Twice, we are told, the Israelites omitted to take the ark with them and were defeated (Nu. 14:44 Josh. 7:4), and on the latter occasion Joshua prostrated himself before the ark,³ and remonstrated with Yahwé, the God of Israel. The crowning proof of the potency of the ark was given when the Israelites crossed the Jordan (according to one of the traditions, at harvest time), and captured Jericho (Josh. 3 f. 6). The Deuteronomist editor has made the former part of the narrative difficult to restore to its original form (which was a combination of J and E); but it is probable that J and E already described the priests (not, 'the priests, (i.e. Levites)') as bearers of the ark. In the latter part it is not very difficult to recover a simpler, more natural, and presumably earlier account, in which no express mention is made of the ark, and nothing is said of the falling down of the walls of Jericho (on the narrative see *JOSHUA*, ii, § 7).⁴ Thus far, then, the most genuine tradition is clear and intelligible.

[The invention of portable sanctuaries, and especially of portable idols, may possibly go back to the nomadic Semites and to a time when the gods were still tribal rather than local; but the probabilities are all against such a view. There is less trace of such an institution in Arabia than in any other part of the Semitic world, and nowhere else is the principle so strongly marked that a tribe that changes its seats changes its gods. Even the ark of Yahwé is not carried back by Hebrew tradition to patriarchal times; the patriarchs do worship only where they have a fixed altar. It is, therefore, more likely that portable symbols of the godhead first arose among the settled Semites and in connection with the religion of the army in war. In this connection the idea of a portable god involves no great breach with the conception that each deity has a local home, for when the campaign is over the god returns to his temple. When the notion of portable gods was once established, however, its application could easily be extended and would serve to smooth away the difficulty of establishing new permanent sanctuaries in conquered regions or colonies over the sea. A Greek colony always carried its gods with it, and it is probable that this was often done by the Phœnician colonists also. Even in Israel we find that the sanctuary of Yahwé at Dan was constituted by setting up the image from Micah's sanctuary (Judg. 18 30), just as David gave a religious character to his new capital by transferring the ark to it.]⁴

But with what critical process can we bring simplicity

¹ Delitzsch, however, defends the Mosaic authorship, *J & E* 3 205-215 [30].

ARK OF THE COVENANT

into the episode of the capture and restoration of the sacred ark by the Philistines (1 S. 4:1-7:1)? Some facts are admitted. That at the end of the period of the Judges the ark rested at the Ephraimitish sanctuary of Shiloh is a trustworthy statement, guaranteed by 1 S. 4:3 f. (chap. 3 we must regretfully pass over, as coming from a different hand and later writer; see SAMUEL, ii.). It must, also, be a fact that the Philistines had defeated the Israelites near Eben-ezer (ISRAEL, § 11). Tradition doubtless added that the leaders of Israel attributed their misfortune to the absence of the ark from the host, and that they therefore fetched the sacred chest from Shiloh. The immediate consequences are graphically described. On the arrival of the ark the Israelites were in a state of wild delight; and the Philistines who heard the shoutings were proportionately alarmed, for 'who (said they) can deliver us from these great gods?' (*elohim*). Nevertheless, with the courage of despair, the Philistines renewed the fight with complete success, and were even able to carry off the ark in triumph. Then begins a series of wonderful incidents from which it is difficult to extract a kernel of early tradition. Stade thinks (*GIT I 202 f.*) that in chaps. 5 and 6 he can find the remnants of two distinct accounts; but the recognition of this would only diminish the number of difficult features in the narrative. It would obviously not provide an intelligible statement of facts. Of the difficult details referred to there is only one which it is necessary to criticise here. It is a statement which the study of the Assyrian monuments seems to make historically impossible. The Philistines, we are told, under the pressure of pestilence, returned the 'gods' which they had captured from Israel. Ancient nations did not act thus in such circumstances. For example, we know that the image of the goddess Nanā (see NAN-ĒA) was taken from Erech by an Elamite king, and detained in Elam for 1635 years. Did any calamity ever suggest to the Elamites the idea that Nanā was chastising them for the insult to her image? No. Ashurbanipal, king of Assyria, had to devote all his energies to the task of crushing the Elamites before he could restore the image to its ancient home (cp ASUR-BANI-PAL, § 8). Similar stories of reconquered idols are told in connection with the names of Ashurbanipal's grandfather Sennacherib (cp ASSYRIA, § 20) and the old Babylonian king Agu-kak-ri¹.

The fragmentary document which we have thus far studied closes with the statement that the ark was placed in the house of Abinadab at Kirjath-jearim, and that Abinadab's son was consecrated to keep it. It is to an entirely different (and probably earlier) source² that we owe the narrative of the bringing of the ark to Zion. We learn here that at the time when David bethought himself of the ark, it rested at a place called Baal in Judah (2 S. 6:2; see Driver *ad loc.*). During the whole of Saul's reign and during David's seven-years' reign in Hebron, it had lain forgotten in a provincial town. Neither Saul nor David had thought of taking it into battle; nor, so far as our evidence goes, had it been visited by the people. What, then, had been the effect of the repeated attestations which the divine judgments had given to its supernatural power? Let us see whether the narrative in 2 S. 6 (which appears to be older than that in 1 S. 4:1-7:1), when critically treated, suggests any way out of our manifold difficulties. It is permissible, and indeed necessary, to disregard so much of chap. 6 as relates to the death of Uzzah (a passage which in its difficulty resembles parts of the story in 1 S. 5 f., and the growth of which can be accounted for), and to fix our attention on the simpler narrative in *vv.* 10-15, the kernel of which is that, early in David's reign, the ark

was in the house of one Obed-edom of Gath, and that David fetched it thence with much jubilation to Zion. How came the ark to be there? That David of his own accord entrusted such a sacred object to a Philistine is highly improbable; but how if Obed-edom was not a Philistine sojourning in Judah, but a foe residing in his native town of Gath? How if the ark had never left Philistine territory, though it had been shifted from Dagon's temple to a private house? How if David acted as Assyrian kings acted in similar circumstances, and reconquered the precious object which was to him in some sense the dwelling of his God? This is the hypothesis of Kosters, who held not only, with Kittel and Budde, that 2 S. 21:15-22 is properly the continuation of the narrative in 2 S. 5:17-25, but also that the sequel of the story of the battle in Gath (2 S. 21:20) was once the notice that David fetched the ark from the house of Obed-edom in Gath and deposited it for a time at Baal.¹ After this, according to Kosters, came originally the story of the capture of Jerusalem (an event which this critic places *after* the hostilities referred to in 2 S. 5:17 ff.), and of the bringing up of the ark to Zion. The editor to whom the present form of 2 S. 6:1-12 is due appears to have had a religious rather than a historical motive. The facts as stated in the original narrative might suggest to some readers that Yahvé needed the interference of David to deliver him from captivity: in other words, that David was stronger than his God. The editor shrank from inventing an entirely new narrative, but, to counteract that idea, put the central facts in the traditional story in an entirely new setting.

This hypothesis, the present writer has long felt, is absolutely required to clear up an important historical episode.² Without it the central facts of tradition, including David's almost ecstatic joy (2 S. 6:14), are hopelessly obscure. A glance at 2 S. 6:1 f. will convince the reader that there is nothing arbitrary in the view proposed. That *vv.* 2-10a cannot have been the original sequel of *v.* 1 must be clear. Unless *v.* 1 is simply misplaced, it must have been followed by a record of some martial exploit of David. To the present writer it seems probable (see DAVID, § 7) that the exploit consisted in a great victory near Gath (cp 2 S. 21:20 f.), which so weakened the Philistines that they offered to restore the ark on condition of David's making with them a treaty of peace, and that David himself fetched the ark from Obed-edom's house. It will be remembered that when David defeated the Philistines at Baal-perazim he had 'taken away the images' (2 S. 5:21) which, by their presence, should have ensured a Philistine victory. It seems probable that when the Philistines restored the ark David gave back the captured 'images.' Cleverness was a characteristic of this king. It was all-important to him not to wage an internecine warfare with the Philistines, and he therefore 'contented himself with a peace honourable for both parties' (Kamphausen). The original story may have referred to this restoration of the images captured at Baal-perazim, and this compound name may have suggested the mention of 'Baal' and 'Perez-uzzah' in 2 S. 6 as it now stands. In a certain sense, indeed, the ark *was* recovered from Baal-perazim.

Our next notice of the ark is in 2 S. 7, a passage full of varied interest, though in its present form not older than the sixth century. It tells us (and no doubt the

¹ The reason why David deposited the ark at Baal was, according to Kosters, that he had not yet conquered Jebus or Jerusalem. Those who hold another view as to the time of the conquest of Jebus will give a different reason. David had indeed conquered Jebus, but had not yet adapted it by fresh buildings to serve the purpose of a capital. See DAVID, § 10.

² Since the above was written, Winckler has made another attempt to produce an intelligible view of the history of the ark (*GI 70 ff.*). It is difficult to see that there is any solid ground for his very revolutionary hypothesis; but, at any rate, he perceives a problem which escaped the earlier writers before Kosters.

¹ Tiele, *BAG* 122 f. 305 f. 392 ff., referred to by Kosters, *ThT* 27:364 [93].

² The reference in 2 S. 6:3 to the house of Abinadab seems to be an editorial insertion (see KOSTERS, *op. cit.* 368).

ARK OF THE COVENANT

statement is historical) that David wished to build a cedar-house for the ark, but was forbidden by an oracle.

6. Permanent abode. We can understand, therefore, that for a time (as 2 S. 11:11 suggests) the ark was still carried with the army as an insurance against defeat.¹ The capture of it by the Philistines, however, had already given a blow to the primitive, fetishistic conception of the ark, and an occasion arose when David, it would seem, was inwardly moved to express a far higher view. It was probably a turning-point in Israel's, as well as in David's, religious development. The circumstances were these. David was fleeing from Jerusalem before Absalom. Zadok wished to carry the 'ark of God' with David and his body-guard. The king, however, protested, and commanded Zadok to carry it back, 'that it may be seated in its place' (2 S. 15:25, 26). He was conscious (if v. 26 may be followed) that Yahwé might have cause to be displeased with him, and would rather suffer his punishment meekly than seem, by having the ark with him, to demand the interposition of Yahwé as a natural right. Henceforth, therefore, the symbol of Yahwé's presence should no more 'leave its place': Yahwé would direct Israel's affairs, both in peace and in war, from Zion. Early in Solomon's reign the greatest of all Israel's sanctuaries was erected. Much as the original passage of Solomon's biography has been edited (see Kau. *HS* and cp 2), it is beyond question that this king transported the ark from its temporary abode to the sanctuary of his temple. There—so both he and David hoped—it was to serve as a national centre, and complete the unification of Israel. The hope was, however, disappointed; nor do even the writers of Judah spend a word on the ark, or give a hint as to the feelings of the people towards it.

Our next news of the ark is indirect, and comes from an exotic or post-exilic passage of the Book of Jeremiah (3:16). The passage runs thus: "In those days no more shall one say, 'The ark of the *Érith* of Yahwé,' neither shall it come into one's mind, neither shall one think upon it, nor miss it, neither shall it be made again.' The full import of the words may be doubtful; but at least one thing is clear—the ark, on the possession of which the weal or woe of Israel had once seemed to depend, had passed away. This is too patent from later writings to be denied. Ezra 1 and 1 Macc. 4 do not mention the ark among the sacred vessels. Josephus (*BJ* v. 55) declares that the Holy of Holies contained nothing at all. Lastly, Tacitus, relating the entrance of Pompey into the temple, uses the emphatic words, 'Inde vulgatum nullas intus deum effigies; vacuum sedem et inania arcana' (*Hist.* 59). How the ark disappeared will be considered presently (see next §).

Suffice it to add here that the *sépher tôrah* or 'Book of the Law' succeeded to the undivided reverence of true Israelites, and is still, with its embroidered mantle and ornaments, the most sacred object in every synagogue. When, then, and how did this holy thing, which, according to Jer. 3:16, was by many so painfully missed, pass out of sight? We have accounted for one strange gap in our historical notices respecting the ark: how shall we explain the still longer and stranger lacuna which extends from (say) 960 to 586 B.C.? Why is it that neither the historians nor the prophets of this period (so far as we possess their works) refer to the fortunes of the ark or to the popular reverence for it in their own time? Three answers seem possible. (1) Soon after 960 the ark may have been captured by an enemy—a calamity which was deliberately suppressed by the historians, just as they suppressed the

destruction of the temple of Shiloh. Giesebrecht and Couard have pointed to the invasion of Judah by Shishak (Sesonk I.), king of Egypt, about 928, as the occasion of this (see 1 K. 14:26). The objection is that Shishak's campaign, as the bas-reliefs at Karnak appear to prove,¹ was against Israel as well as Judah, and that, Egypt being too weak at that time to think of permanent conquests, the expedition must have been simply due to vainglory and to greed. If Shishak took away from Palestine anything in the nature of an idol, it must have been the 'golden calves' of Jeroboam, and not the outwardly unattractive wooden chest in the sanctuary of the temple of Rehoboam. Besides, Rehoboam and his priests would never have allowed the capture of the ark to become known: they would certainly, in the interests of the temple, have substituted a new chest, for which pious fiction the supposed discoveries of Babylonian kings mentioned by Tiele (*H.G.* 461) may perhaps furnish a parallel. (2) The ark may have been carried away with the temple treasures in 785, by Joash, king of Israel (2 K. 14:14), who would hardly have omitted to reclaim the long-lost treasure of the Ephraimitish sanctuary at Shiloh. The objection to this is that the ark had long ceased to be the special possession of a tribe, and that events had proved that Joash could well dispense with the ark, while to have carried it away would have been an offence against the great hero of united Israel—David. (3) The ark (which was probably renewed by the priests, when decayed from age) may have retained its place till the great catastrophe in 586, and previously to this may have lost much of its ancient prestige owing to the growing sense of the inconsistency of identifying such an object as the ark with the great God Yahwé, and perhaps also to discourses of the prophets against a superstitious reverence for the ark which have been lost, or even suppressed by editors. This view—which is in the main that adopted in 4 Esd. 10:22, and implied by the legend in 2 Macc. 25 (cp below, § 15), that Jeremiah² hid the tabernacle and the ark and the altar of incense in a cave—is by no means an improbable one. The only obvious objection to it can easily be met. The assertion in Deut. 10:1, that the ark was simply the repository of two inscribed tables of stone need not imply that D, like P, is an archaeologist, and that the object which is thus wrongly described no longer existed. It is more natural to suppose that, like the other fetiches to which this writer is so vehemently opposed, the sacred stones which (as we shall see) were the objects venerated of old in the ark still held their place, concealed from view but secure. The Deuteronomist, speaking in the name of Moses, could not help assuming the sanctity of the ark and its contents. In the interests of piety, however, he transformed (as far as words could do it) the nature of the objects in the ark. That venerable coffer was not, he meant to say, in any sense the dwelling of the deity, whom no temple could hold (1 K. 8:27): it simply contained a perfect written embodiment of the fundamental demands of Israel's righteous God.

This leads us to consider the origin and affinities of the ark. For the ark of the Deuteronomist (and of P¹, 9. Real nature. Mr. Rassam's discovery of a coffer with two inscribed alabaster tablets in a little temple at Balawat, near Mosul;³ but the coffer (which was not placed in the sanctuary) also was of alabaster, and with its contents corresponds to the chests containing sacred books which were among the regular appurtenances of Egyptian (and probably of Syrian) temples, but were not meant to be carried. For the ark known to the earliest Hel rew traditions, however, there are many monumental

1 We must not refer here to 1 K. 2:26, which states, according to MT, that Abiathar used to 'bear the ark before David'—i.e., in his campaigns. The right reading is, not *ark*, but *tabernacle*, 'ephod'; cp 1 S. 23:69. Cp the same mistake in 1 S. 14:18, MT. (So first Theinus.)

1 St. *GTI* 35:1; WMM. *Ass. u. Exc.* 166-166a.
2 In the Talmud (*H. Or. 12b*) it is Josiah who hides the ark and other sacred objects, including the pot of manna (see below, § 15).
3 Sayce, *Hibbert Lectures*, 65; cp Pinches, *TSEA* 783.

ARK OF THE COVENANT

parallels. In Egypt, for instance (from which Renan too hastily derives the Israelite ark), no festival procession could be sculptured or painted without them.¹ The arks, with their images, were placed on boats, which were ornamented at the ends with heads of the divinities within; the king himself, being divine, also had his ark-boat. Such an ark-boat, too, is referred to in the strange story of the daughter of the king of Bahtan,² where an image of the god Honsu is said to have been transported to Syria, to deliver a princess from the spirit that oppressed her. These shrine-boats must originally have had their parallels in Babylonia; the constant expression for the sacred arks in the cuneiform texts is *elippi*³—i. e., 'ships.' Within the best-known historical periods, however, it was in simple arks or coffers that the images of the gods were borne in procession at the Babylonian (and Assyrian) festivals.

Thus it appears that two things were essential in a sacred ark—that it should be of a size and a material which would permit it to be carried, and that it should contain a representation or mystic symbol of a deity. The ark known to David and Solomon doubtless complied with these conditions. It was a simple wooden box, such as the ancestors of the Israelites had used in their nomadic state for their few valuables,⁴ without either the coating of gold or the cherubim with which the reverence of a later writer provided it. As to its

10. Contents. contents, the inscribed 'tables of stone,' which we should never have expected to find in the Holy of Holies, were but a substitute of the imagination for some mystic symbol or representation of Yahwè. Of what did that symbol consist? We are, of course, bound to do what we can to minimise the fiction or error of the Deuteronomist; but we must not deviate from the paths of historical analogy. These duties are reconciled by the supposition that the ark contained two sacred stones (or one).⁵ This view, no doubt, implies a survival of fetishism; but there are traces enough of fetishism (on which see IDOLATRY, § 4) elsewhere in Hebrew antiquity to justify it. The stones (or stone) must have been ancient in the extreme. They (or it) originally had no association with Yahwè; they represented the stage when mysterious personality and power were attached to lifeless matter. Being portable, however, they were different from the sacred stones of Bethel, Beth-shemesh, Shechem, and En-rogel, and are most naturally viewed as specimens of those bœtyls, animated stones, which, according to Sancho-niathon, were formed by the heaven-god, and were presumably meteorites. They may have belonged originally to the tribe afterwards called Ephraim; and when the several tribes united in worshipping Yahwè, the God of Moses, the Ephraimitish ark with its contents may have been adopted as the chief sacred symbol of Yahwè. The earliest narrators (see above, § 3, end) viewed the ark (which was virtually one with what it contained) as a substitute for the immediate presence of Yahwè, the sin of the 'Golden Calf' at Sinai having proved the Israelites to be unripe for such an immense privilege. The primitive Israelites, however, who knew nothing of the story referred to, must have regarded it, not as a substitute, but as the reality itself.

The portableness of the Israelitish ark did not, it is true, lend to its being carried about in processions. Its reason is that, to the Israelite, the object within the ark was much more than an

¹ See the procession of the arks of Amen Rê, Mât, and Honsu (the Theban triad) in the second court of the temple of Ramesses III. at Medinet Habû (Wilkinson, *Anc. Egyptians*, 289), and Plate V. in Naville's *Festival Hall of Osorkon*, 2 (cp p. 18).

⁴ Cp Daughte, *Anc. Des.* 1 27.
⁵ Cp Vartke, *Die Kel. des A* 1 321; St. GVI 457 f.; Beninger, *Hebr. Arch.* 370. There were and still are two sacred stones, a black and a white, built into the wall of the Ka'ba at Mecca (WRS, *Kin.* 297 f.).

idol. It was not merely one of a class of objects, each of which contained a portion of the magical virtue of the deity whom it represented:¹ it was the only object with which Yahwè was so closely connected that the ark (for reverence forbade mention of the stones) and Yahwè were practically synonymous terms. It was, therefore, too sacred to be moved for a slight reason. Worshipers would rather make a procession round or before the ark (cp 2 S. 6 14) than bear it in procession themselves. The reverence implied in the story in 2 S. 6 6 f. may represent the feeling of an age later than David's; but circumstances had long been leading up to that extreme exaggeration. The higher the conception of Yahwè became, the greater was the awfulness which encompassed the ark,² until (it appears probable) by a natural reaction the nobler Israelites rejected the fetishistic conception of the ark and its contents altogether. Thus we get one great distinction between the ark of the Israelites and other sacred arks: it was not subservient to idolatry. The only occasions on which it left its resting-place were times of war. Then, indeed, it was carried with the host into the fray, just as the Philistine images were carried into battle by the Philistines (2 S. 5 21)—not to speak of Arabian and Carthaginian parallels.³ It was not specially a 'warlike palladium,' however, except for the periods when war rather than peace was the normal state of the people;⁴ and we have found even David, at a great crisis in his life, deciding to put his trust in his God without the presence of the ark.

The notices of later writers are valuable mainly for the religious history of the period of their authors.

12. Later notices. show us how, near the close of the pre-exilic (and afterwards in the post-exilic) age, pious men imagined to themselves the nature and circumstances of the ark. It is, therefore, unsafe to infer with Bertheau, from 2 Ch. 35 3, that the ark was removed from the sanctuary by Manasseh; unsafe, also, to infer, with the old Cambridge scholar Spencer, from P's description of the ark, that it was designedly made like the arks of Egypt, in order that the Israelites might miss no splendour or elegance which had charmed their eyes at Zoan. That Manasseh, with his syncretistic liberality, would have removed the ark is altogether improbable. Spencer's theory, on the other hand, may contain an element of truth, and is, at any rate, more plausible than the view developed out of P's account by Riehm.⁵ It is probable that the priestly legislator (P₂), in his description of the ark, did, unconsciously and in no servile manner, take suggestions from the sacred chests of Babylonia and Egypt, which he had seen or heard of. The simple chest of which J and E had doubtless spoken was unworthy (he thought) to be in any sense the symbol of the 'Lord of the whole earth.' Not such an ark could Moses have ordered to be made, for Yahwè was all-wise and must have 'filled' the artificers of the ark and the tabernacle 'with a divine spirit in wisdom and understanding' (Ex. 35 31). We must not, however, overlook the references to the ark in writings of the Deuteronomic school. We are told (Dt. 10 8) that Yahwè 'separated the tribe of Levi to bear the ark of the *b'riah* of Yahwè,' and in Dt. 31 9 (cp 25 f.) we find a special title given to 'the priests the sons of Levi,' which is derived from this function (cp Josh. 3 3). For other Deuteronomic references to the ark, see Dt. 31 25 f.; Josh. 8 33 1 K. 3 15 6 19 8 9 21.

¹ Cp Maspero, *RPP* 3 433, n. 2.
² Cp 1 S. 3 200. 'And the men of Beth-shemesh said, Who is able to stand before Yahwè, this holy God?'

³ See WRS, *Rel. Sem.* 37.
⁴ Kautzsch and Kraetzschmar (see 'Literature') hardly seem to hit the mark. We cannot lay any stress on the titles in 1 S. 4 4 2 S. 6 2, on grounds stated already (above, § 1).

⁵ Riehm thinks (*HWB*), art. 'Bundeslade' that the ark was constructed in such a way as to show the diametrical opposition between the religion of revelation and the religion of nature worship, the presence of Yahwè (symbolised by the cherubim on the ark) being conditional on Israel's performance of its covenant-duties.

We now return to the much more important notices in the Priestly Code and in Chronicles. A full description of the ark is given in Ex. 25 10-22

13. P's 37 1-9. It was made of acacia wood. **description.** This statement is possibly based on tradition which is particular as to the materials of sacred objects. The shittah-tree grows not only in Arabia, but also in parts of Palestine: the ark, therefore, could be renewed if necessary. It was oblong—two cubits and a half in length, one and a half in breadth and in height. Gold was overlaid on it within and without, and on the lid, which had a projecting golden rim (7), was a plate of pure gold (2277); see MERCY-SEAT), sustaining two golden cherubim (see CHERUB, 1.), or winged figures, whose wings extended over the ark. From these cherubim Yahweh promised to communicate with Moses, and reveal his will for Israel. According to Ex. 30 26, the ark was to be anointed along with the tabernacle and the rest of its furniture. When made, it was brought, we are told, to Moses (39 35), and placed by him in the tabernacle, screened by the veil (102, in the Holy of Holies; see 26 33 2. 1. In Lev. 16 9 the sanctity of the ark is emphasised by the command that Aaron (i.e., the High Priest) shall enter the Holy of Holies only once a year. In Nu. 3 31 the charge of the ark is committed to the Kohathites, and in 4 5 it is commanded that when the tabernacle is moved Aaron and his sons (i.e., the priests) shall carefully cover up the ark with the veil, before the Kohathites take it up, in order that the latter may neither see (v. 20) nor touch (7. 15) the holy things. In 7 89 (RV) the Voice (i.e., of Yahweh) speaks to Moses from the 'Mercy-Seat.' The gloss in Judg. 20 27 f.—a gloss added under the influence of P₂—states that the ark was at Bethel in the days of Phinehas, and the editors, who follow P₂, doubtless understood that the ark was always in the tabernacle till the battle of Aphek (cp TABERNACLE).

The Chronicler adds scarcely any fresh incidents to the account of the ark, and cites the earlier narratives in Samuel and Kings on the assumption that the regulations of the Priestly Code were observed throughout the history. In 1 Ch.

14. Chronicler, 15 1 f. he makes David say, 'None ought to carry the ark of God but the Levites, and they carry it accordingly; and at first sight it appears as if the Philistine Obad-edom became a Levite (77. 18 21 24); see however OBEDI-EDOM, 2. A profound sense of the sanctity of the ark is shown in 1 Ch. 28 2, where the ark or the 'Mercy-seat' is called 'the footstool of God,' and in 2 Ch. 8 11, where Solomon refuses to let Pharaoh's daughter dwell in the palace of David, 'because the places (?) are holy, wherunto the ark of Yahweh hath come.' In 35 3, Josiah commands the Levites to 'put the holy ark in the Temple'; 'it shall not be a burden on your shoulders.'

The only direct references to the ark in the Psalms are in Ps. 132 8 (cp 2 Ch. 6 41), where it is styled ארון אלהים 'ark of thy strength'; and in Ps. 78 60, where God is said to have delivered his 'strength' (i.e., the ark) into captivity. An indirect reference has often been supposed in Pss. 24 47 and 68; but this involves the untenable assumption of their pre-exilic origin.

The ark is only twice mentioned in the NT. It and its contents are described in Heb. 9 4 as in P₂, except

15. NT. that the pot of manna (see above, § 8, note) is said to have been *in* (instead of *beside*) the ark. In Rev. 11 19, after the seventh angel has sounded, 'the temple of God in heaven' is opened, and 'the ark of God's covenant' is seen within. The words 'in heaven' (ὁ ἐν τῷ οὐρανῷ) are however probably an editorial insertion (Spitta). It is the earthly (not the heavenly) temple that is referred to, and the meaning of the statement is that the ark which was hidden (so

tradition variously said) by Jeremiah or Josiah, shall suddenly reappear in the sanctuary in the latter days.

See, besides Spitta, *Die heiligen Hebräer* (1883), *Saying* (on the names of the ark), *ZATW* II 314-324 [93]; *Comment* (on the ark), *ZATW* II 329; *Konrad* (on the ark), *ZATW* II 330-331; *Yahweh* (on the ark), *ZATW* II 331-332; *Konrad*, *ZATW* II 331-332 [93]; *De. 10 1-5*; *Nawak* and *Boissier*, *Heb. Arch.*, Winkler, *ed.* I (1891) 2-17; *Kronenberg*, *Die Bundesversteigerung*, *ibid.* pp. 20-21; *Edo.*, *ibid.* 147-151; (on other sacred arks); *Simpson*, 'Ark-shrine of Japan,' *J. O. L.* 5 550-554.

16. Literature. **ARKITE** (אֲרָכִיתִי—i.e., the 'Arkite, man of 'Arka'; ΑΡΧΗΚΙΟΣ [ARX. I. 100 385 6; 91100 377 2]), a Samaritan (Phoenician) title, *ibid.* 1010-1011 2 1 1 1 (100). **ARAKEI** [A.], see *GEORGIEFF*, *ibid.* 101 1. *ARAKI* אֲרָכִי, *Jos. l.c.* is mentioned among the cities taken by Tiglath-pileser III. (cp *KAT* 104, 254 f.), and, at a much earlier period, in the Amarna tablets (e.g., 78, 12, *Arkata*; once [126, 22] *Arkat*; the *Arkintu* of Thotmes III. seems to be a collateral form).¹ The lofty *tell* commanding the remains of the ancient city was discovered by Shaw in 1722. At its S. foot flows the Nahr 'Arka in a deep rocky bed, towards the sea, two hours distant. To the E. of the *tell* is the village of 'Arka, about 22 m. N. of Tripolis. It was an important place in the Roman period, when, through being the birthplace of Alexander Severus, it was called Caesarea Libani. It was famous for the worship of Astarte. See *Smith's Dict. of Ant. and Arch.*, *Arka*; *Salm.* *GIJ* 1 498 n.

ARMAGEDDON, ἌΡΜΑΓΕΔΩΝ (ΑΡΜΑΓΕΔΩ-ΔΩΝ [TR.], Ἀρμαγεδών [WH.], Ἀρμαγεδών [L. Tr. 22]; see *Ann. Armen. Acad.*, *ibid.*)

1. How understood by author. ΕΡΜΑΚΕΔΩΝ, *vers. Memphis*, the name of the last great battle (see *Rev. 16*). Between the sixth vial and the seventh is inserted a vision (Rev. 16 13, 16) which has no connection with the context, being apparently the sequel of the vision of the three angels in Rev. 14 6-11. The three angels proclaim the coming judgment upon the world-power and the way to escape it; the three demoniacal spirits (from the dragon, the beast, and the false prophet) seek to counteract this by 'gathering the kings of the whole world for the war of the great day of God the Almighty.' The junction of forces is made at 'the place which is called in Hebrew Har-Magedon.'

Two questions have to be asked; (1) What did the writer understand by Har-Magedon (if this is the correct reading)? and (2) What was the meaning of the term in the source, whether written or oral, from which he drew? It is in the highest degree probable that the writer himself interpreted the phrase, 'the mountains of Megiddo' (cp Ἀρμαγεδών = Mount Gerizim, Eupolemos *ap. Eus. PE* 9 17). Both from its natural advantages and from its history the *Plain* of Megiddo (*Zech.* 12 11) would have been the more obvious scene of such a great gathering; but the writer could plausibly justify the substitution of 'mountains' for 'plain' by the much-studied apocalyptic descriptions of Ez. 38 8 21 39 2 17, where the hordes of Gog are said to meet their end 'upon the mountains of Israel.' Megiddo itself is, of course, a hill-town, though close to the great Plain of which it commands the southern entrance: there is nothing incorrect, therefore, in the phrase 'the mountain-district of Megiddo.' Har-Magedon is no doubt half-Hebrew; but it would be strange if readers of Jewish Greek could not interpret it (cp terms like *Ναζαρέθ* in *Ϟ*). See *APOCALYPSE*, § 46.

If, however, we hold it to be probable that the small apocalypse (see Spitta, *Offenb.* 568) to which 16 16 belongs is a translation of a Hebrew original, and

2. Original meaning. certain, at any rate, that the writer built to a considerable extent on traditional

¹ Cp the ethnic *Irkanatai* on the month of Shalmaneser II. (281; *KAT* 179). See Hommel, *Gesch. Sem.*, Ed. Meyer 'Glossen z. d. Thontaf. von Et-Am,' *Aegyptica* (97), p. 69; cp WMM, *As. u. Eur.* 247.

¹ This inclusion is in harmony with the transcendentalism of the later conception of the divine nature.

semi-mythic stories eschatologically interpreted, it becomes a question whether his interpretation of the name of the great battlefield as meaning 'mountains of Megiddo' is correct. The restoration of the original text offered by a writer in *ZATW* 7 170 [87], *הר מנין* ('will gather them unto his fruitful mountain'—*i.e.*, the mountain-land of Israel), does not give a definite locality, which seems to be required in this context. Nor are the attempted numerical explanations quoted by Spitta (*Offenb.* 402) more probable. Gunkel, therefore, thinks (*Schöpfung*, 266) that 'Harmagedon' must be a name of mythic origin, connected in some way with the fortunes of the dragon who is the lineal heir of the Babylonian dragon Tiamat, the personification of chaos and all evil (cp CREATION, § 1). On p. 389 of the same work Zimmern communicates a conjecture of Jensen that *μαγεδων* is identical with *μαγαδων* in the divine name *Τεμεμγαδων*, the husband of *Ερεσχιγυαλ* (= Bab. Ereškigal), the Babylonian goddess of the underworld. See *Rhein. Mus.* 49.49, where in a magic formula given by Kuhnert from Greek papyri we read, *θεοῖς χθονίοις Τεμεμγαδων καὶ κοίτην Περσεφώνη Έρεσχιγυαλ κ.τ.λ.* (1886 also HADAD-RIMMON). The same two (doubtless Babylonian) names occur on a lead tablet from Alexandria, *Rhein. Mus.* 18 563, where the former is given as *Τεμεμγαδων*. It would be natural that the spot where Tiamat was defeated (and was again to be defeated) by Marduk should be called by a name which included that of a god of the underworld.

T. K. C.

ARMENIA (אַרְמֵינָה), 2 K. 19.37 1s. 37.38† AV. RV ARARAT.

ARMLET (אַרְמֵלֶת), *εμπλοκιον* [BAFL], so RV for AV TABLET in Ex 35.26 (περικελευσθιον? [BAFL]), Nu. 31.50. It may be doubted, however, whether the word does not mean an ornament for the neck (so RVmg, NECKLACE)—perhaps a necklace consisting of a number of little spheres, cp Ar. *kumza*^m, a little ball. See ORNAMENTS.

ARMONI (אַרְמֹנִי), 'Palatium'?; *ερμωνοσι* [B], *נִיעַר* [A], *אַרְי* [L], a son of Saul sacrificed by David to the vengeance of the Gibeonites (2 S. 21.8†). See RIZPAH. Neither he nor Mephiboseth [I], the two sons of Rizpah, is mentioned elsewhere.

ARMOUR, ARMS (אַרְמִיּוֹת), 1 S. 17.54. See BREAST-PLATE, 1. HELMET, GLOVES, SHIELD; and cp WAR, and WEAPONS.

ARMOUR-BEARER (נֹשֵׂא בְרִיחַים), which happens to occur only with a suffix, *נֹשֵׂא בְרִיחַי*, Judg. 9.54, etc., or in the CONSTR. ST., *נֹשֵׂא בְרִיחַ יוֹאָב*, 2 S. 23.37 1 Ch. 11.39). Abimelech, Saul, Joab, all had armour-bearers; Goliath's squire is called a shield-bearer (1 S. 17.7). On the age of armour-bearers, cp WRS, *OT/C*² 431; Che. *Aids to Crit.* 77 n. 1s. 52 n. 1. *נֹשֵׂא בְרִיחַי* (EV 'Ye that bear the vessels of the Lord') is taken by most commentators (Aben Ezra, Kimchi, Cheyne formerly) to mean 'armour-bearers of Yahwē'; but this is improbable (see Di. *ad loc.*).

ARMOURY. In Neh. 3.19 *הַנְּשִׂימֹת*, 'weapons, arming,' (*ἄρμα*, ἡ *συνάπτουσα*), and in Jer. 50.25 *הַנְּשִׂימֹת*, 'treasure, store,' are probably contractions for *בֵּית הַנְּשִׂימֹת*, 'house of weapons,' and *בֵּית הַנְּשִׂימֹת*, 'house of treasure' respectively. In Cant. 4.4 'thy neck is like the tower of David builded for an armoury' *לְהַנְּשִׂימֹת* is difficult. Vg. renders it *cum propugnaculis*, while G merely transliterates (*θαλαπιωθ* [BN], *ἀρμ.* [A]), and OS² 202, 84 has *θαλαπιωθ*—*ἐπαλῆξ* ἢ *ψῆλα*. The meaning 'armoury' has no philological basis (see Del. *ad loc.*), and yet it is the only meaning which suits the context. Cheyne (*Exp. Times*, June '98) supposes corruption of

the text and reads *לְשִׂמֵתִים* 'for the shields.' The neck of the Shulamite is compared to the tower of David adorned with small metal plates—*i.e.*, perhaps to the 'house of the forest of Lebanon' in which were suspended the shields and targets of gold. Fancifully the poet represents these shields as suspended on the outside (cp Ezek. 27.11). Budde and Siegfried agree in placing the 'tower' at Jerusalem.

ARMY (צְבָאָה, חֵיל, מִעֲרֵבָה, חֵיל). The main army of Israel, like that of all primitive nations, and, in the last

1. **General resort**, of all nations, consisted of the whole able-bodied adult male population. In Nu. 1.1-3 (P), twenty is fixed as the age at which a man became a soldier; but it is not probable that any such regulation was rigidly observed in practice. This general levy constituted the fighting force of Israel in the wilderness, at the time of the settlement and under the 'Judges,' and remained its chief military resource throughout its national history. Under the 'Judges,' the armies mentioned are, for the most part, the levy of the tribes or clans immediately concerned. On special occasions, however, such as the war against Sisera, and Saul's relief of Jabesh-gilead, all the fighting men of Israel were summoned, and their obedience to the summons was represented as a paramount religious duty.

The armies obtained from such levies varied greatly in number and efficiency; a clan, or even a tribe, whose immediate interests were threatened, would readily take the field in its full strength. An appeal for a general levy of Israel would scarcely ever be more than partially responded to; Deborah (Judg. 5) complains of the absence of Reuben, Gilead, Dan, and Asher; the national leaders sought to prevent such derelictions from duty by the most solemn appeals to religious sanctions—Deborah curses Meroz (Judg. 5.23), and Saul, when a spirit (or impulse) from God came upon him, threatened to cut in pieces the oxen of all recreants (1 S. 11.6).

When armies were required these national or tribal levies were called together by messenger (*בְּרִי הַמְּבִיאִים* Judg. 1 S. 11.7), sound of trumpet (*שֹׁפָר* Judg. 6.34), or erection of standard, or other signal (*נֶזֶן* Jer. 46, see ENSIGN); when the emergency was over they dispersed to their homes. They were well suited to carry on or repel border forays, but could not maintain prolonged warfare, especially at any distance from their own territory, or even oppose adequate resistance to any formidable invasion. These levies were composed entirely of infantry (*בְּרִי* 1 S. 4.10 15.4); the Israelite territory, in early times, was chiefly hill-country, where cavalry force could neither be formed nor used. The first Israelite who is mentioned as possessing horses is Absalom, 2 S. 15.1 (cp HORSE, § 3).

Such armies were very loosely organised. As Wellhausen (*HI* 436 [85]) points out, 'what there was of

2. **Command**, hands of the elders and heads of houses; in time of war they commanded each his own household force.' So Abraham leads the expedition to rescue Lot (Gen. 14), and Jair conquers the 'tent villages of Jair' (Nu. 32.41). Similarly, P describes the 'princes' of the tribes as also their captains in war (Nu. 1. f.). Deborah (Judg. 5.14 f.) speaks of the princes and leaders of Issachar and other tribes (see GOVERNMENT, § 21). In practice, however, the hereditary heads of tribes and clans were often set aside on account of the ability and self-assertion of other leaders. Indeed, these hereditary heads of houses play a very small part in the actual history, possibly because history emphasises what is exceptional. The 'judges,' whose main function was to head the Israelite armies in special emergencies, were men called by a kind of divine inspiration. Gideon and Saul are not the heads of their tribes or even clans:

Gideon's family was 'poor in Manasseh and he was the least in his father's house' (Judg 6:15), and Saul's family is described in almost identical terms (1 S. 9:21). In the absence of any other widely recognised authority, the priests of the great sanctuaries, and especially of the ark, sometimes assumed the command of armies, when called by ambition or the sense of duty (DEBORAH [7:2], the house of ELI [7:1], SAMUEL [7:2]). When the tribes were partly merged in the kingdoms, and the clans and families were in a measure superseded by the towns and village communities, the levy would naturally follow the new order (Amos 5:3). Probably under the kings the levies did not always assemble by clans, but men were collected by the royal officials from the various districts (cp GOVERNMENT, § 20). In any case, the organisation of the levies was subordinated to that of the standing army, and they were divided into 'thousands,' 'hundreds,' 'fifties,' and 'tens,' institutions which are said by an ancient tradition, Ex. 18:25 (JE), to have originated with Moses.

A second important element of the military strength of Israel, as of all nations at a similar stage of development, lay in the personal following of men who made war their occupation.

3. Bands. These 'bands' (בָּנָיִם, also used of a division of an army) may be roughly likened to the vassals of feudal chiefs, the 'free companies' of the middle ages, and even to the banditti in unsettled districts. As in the case of England and Scotland, the 'bands' flourished specially on the frontiers; the territory of Israel had a frontier very long in proportion to its area. Such 'bands' could take the field much sooner than a clan-levy, and would be better disciplined and much more expert in warfare. More than once they rendered signal service to the nation. The 'vain fellows' whom that captain of banditti, Jephthah, gathered round him (בָּנָיִם רֵיקִים, Judg. 11:3) were the kernel of the army which defeated Ammon, and David's following was one chief instrument in the restoration of Israel after Gilboa. 1 S. 22:30 gives us a detailed account of the formation, character, and career of such a body (see DAVID, § 4). It was a self-constituted frontier-guard, living on the plunder of the neighbouring tribes and by levying blackmail on their fellow-countrymen, whom they claimed to protect. The warlike services rendered by the 'bands' were accompanied by serious drawbacks. They added to the danger of civil war; they embittered the relations with neighbouring tribes; and they were capable, like David, of taking service with foreigners even against their own countrymen. We do not hear of them after David's time; they would scarcely be tolerated by powerful kings, but were sure to reappear in unsettled times.

As the main function of a king was that of permanent commander-in-chief, a monarchy implied some sort of

4. Army. standing army and permanent military organisation. In time of peace the king kept a bodyguard as the main support of his authority, and this bodyguard formed the nucleus of the army in war (cp GOVERNMENT, § 18). We find Saul 'choosing' 3000 men (1 S. 13:2) and sending the rest of the people to their tents. He did not keep these chosen men as a permanent army, for in 1 S. 24:2 he chooses another 3000 when he wishes to pursue David. Probably he did his best throughout his reign to keep by him a picked force, which was virtually a standing army. He had a permanent commander-in-chief, Abner (אֲבִנֵר 1 S. 14:50), and his personal following must have included other permanent military officers (cp GOVERNMENT, § 21). David's band of followers during his exile served as the kernel of a much more complete and extended military organisation. The office of commander-in-chief remained a permanent institution, and the captains of the host (הַצֵּה 2 S. 24:4) also appear as permanent officers. A bodyguard, practically a

continuation of David's companions in exile, was formed, and its captain is mentioned as one of the great officers of state (2 S. 8:18 בְּרִיבְרִיבִים, בְּרִיבְרִיבֵי הַמֶּלֶךְ, בְּרִיבְרִיבֵי הַמֶּלֶךְ). Now, however, the bodyguard had come to consist of foreign mercenaries, 'Cherethites and Pelethites,' probably Philistines (see CHERETHITES, CAPHTOR). In 2 S. 15:18 we find 600 Philistines from Gath in David's army; 6's μαχηται, however (in a doublet), suggests a reading *gibborim*, or 'mighty men,' for *gittim*, or 'Gittites.' If the latter is the correct reading, the Gittites may have been either part of the bodyguard, or else an independent band of mercenaries (see DAVID, § 11(4)). The Cherethites and Pelethites are not mentioned after the death of David; but the bodyguard of foreign mercenaries must have remained a permanent institution. 1 K. 14:27 speaks of the captains of the guard, literally 'runners' (רָצִים, רָצִים), that kept the palace gates (cp 2 K. 10:25). 2 K. 11:4 speaks of 'the centurions of the Carites and of the guards' (הַבְּרִיבְרִיבִים וְהַבְּרִיבְרִיבִים), where the Carites are possibly identical with the Cherethites. If the reading in 2 S. 23:8 is correct, and if רֵאשֵׁי הַבְּרִיבְרִיבִים (AV 'chief among the captains'; RV 'chief of the captains') is rightly explained as referring to the third occupant of a chariot (Πρωστάρχης [BAL], Ex. 14:15, etc.), it may indicate the use of chariots by David, though it is probably used in its later sense of 'captain' (see CHARIOT, § 10).

With the very doubtful exception of these 'shalshim,' we have no reference to Israelite chariots and cavalry before the end of David's reign.

According to EV of 2 S. 8:4, he reserved horses for a hundred chariots out of the spoil taken from Hadoram ben Bishai, king of Zobah; BAL translates 'reserved for himself a hundred chariots.' Reuss and Kautsch translate 'a hundred chariot horses.' No reference is made to the use of these chariots or horses in war; moreover, the passage probably belongs to the last editor of Samuel.

Solomon, however, established a force of 1400 chariots and 12,000 horsemen (1 K. 10:26), and accordingly we find mentioned among his officers 'captains of his chariots and of his horsemen' (בְּרִיבְרִיבֵי הַבָּיִת וְבְרִיבְרִיבֵי הַסּוּסִים, 1 K. 9:22). Occasional references occur in the later history to Israelite chariots and horsemen (2 K. 8:21, 13:7). Probably the armies of Israel and Judah were modelled on the army of Solomon till the end of these monarchies; but their main reliance would be on the infantry. Towards the close of the Jewish monarchy a quasi-religious feeling against the use of chariots and cavalry seems to have arisen, and Dt. 17:16 forbids the king to multiply horses (cp. Dt. 20:1 Is. 31:1). The references to the houghing of horses by Joshua (Josh. 11:6) and David (2 S. 8:4) are probably due to a Deuteronomic redactor.

Nothing is said about paying soldiers. In earlier times the Israelites who formed the national levy would find their own weapons and provisions, the latter being often obtained from the enemy by plunder or from friends by gift or exaction. Probably throughout the history the general levy was mostly provided for in this way; though, as the royal government became more powerful and more completely organised, it may have done something towards feeding and arming these levies (see GOVERNMENT, § 20).

The bodyguard and the rest of the standing army, including the charioteers and cavalry, stood on a different footing. They were maintained by the government (1 K. 4:7), chariot cities being assigned as a provision for the chariots and cavalry. They were probably paid; certainly the foreigners in the bodyguard did not serve for nothing. The plunder taken from enemies would be an important part of the remuneration of the soldiers, and a principle of division between the actual combatants and the reserve is laid down in 1 S. 30:24. The rules as to exemption from military service in

Dt. 20 are probably an ideal based on traditional public opinion.

No reliance can be placed on the numbers which are given for Israelite armies. At the same time, the two kingdoms seem to have been populous in prosperous times, and a general levy of able-bodied adults may sometimes have attained very large dimensions.

Under powerful kings the Israelite armies were strengthened by the auxiliary forces of subject allies—e.g., Edom (2 K. 3). Doubtless such assistance was sometimes purchased, after the manner of the narrative in 2 Ch. 25.

The details as to the Levites in the account of the deposition of Athaliah in 2 Ch. 23 (cp 2 K. 11) were probably suggested by the institutions of the Chronicler's own time (*circa* 300 B.C.).

6. Levitical guard. These details seem to show that the Levitical guard of the Temple was then in existence. As this guard is not provided for in the Priestly Code, it was probably formed after the time of Ezra. Possibly the *προσδράμης τοῦ ἱεροῦ* [V.] in 2 Macc. 3.4 may have been the captain of this guard. If so, however, it is difficult to suppose that the present text is correct in ascribing him to the tribe of Benjamin (see, however, BENJAMIN, § 7 end). The captain of this guard, under the title of *στρατηγός*, is mentioned by Josephus in his account of the time of Claudius Caesar (*Ant.* xx. 62), and of the destruction of the Temple (*BJ* vi. 53), and in *1 Kk.* 22.4 and *Acts* 4.1.5. Probably the officers, *ὑπηρέται*, who assisted in the arrest of Jesus (*Jn.* 18.3, cp 7.32.45) belonged to this body.

In the post-exilic period, under the suzerainty of the Persians, and of the Greek kings of Egypt and Syria, the Jews could scarcely be said to have an army. The Book of Nehemiah clearly shows that they had to trust to their own energy and courage for protection against hostile neighbours; but they fought as a city militia rather than as a peasant levy.

The revolt of the Maccabees made Judæa a military power. The long wars not only habituated the bulk of the people to arms, but also produced a standing army, which soon included many foreign mercenaries. Jewish soldiers also received pay (1 Macc. 14.32), probably, however, only picked bands that formed the standing army and ranked with the other mercenaries. Josephus (*BJ* i. 25) tells us that Hyrcanus I. (135-107 B.C.) was the first Jew who maintained foreign mercenaries (*ἑτεροπορεῖν*). Alexander Jannæus (106-79 B.C.) employed Pisdian and Cilician mercenaries, and at one time was at the head of a mercenary army of 1000 horse and 8000 foot, in addition to 10,000 Jews. These mercenaries are styled 'Greeks' (*BJ* i. 435, cp 54). As the Jews had long been subjects of the Greek kings of Egypt and Syria, their armies would be equipped and disciplined after the Greek fashion.

When the East fell under the supremacy of Rome, the Herods, as clients of Rome, formed their armies on the Roman model. Indeed, Herod the

8. Roman Period. Great was at times in command of Roman forces, and Jewish and mercenary 'cohorts' (*στραταί*) are spoken of as fighting side by side with the Romans (*BJ* i. 156.162). Herod's army consisted largely of mercenaries drawn chiefly from the Teutonic subjects and neighbours of the empire—Thracians, Germans, and Gauls (*BJ* i. 339).

The insurgent armies in the Jewish war were very heterogeneous. The national government appointed military commanders for the various districts, among whom was Josephus. He tells us that he organised an army of 100,000 on the Roman model, including 4500 mercenaries, a bodyguard of 600, but only 250 horsemen; a typical Hebrew army in its constitution. The garrison of Jerusalem is said to have consisted of 23,400 men, including Idumæans and bands of Zealots. They seem to have possessed some organisation and dis-

cipline, but were divided into adverse factions (*BJ* v. 61).

The armies of the other states of Syria did not differ essentially from those of Israel. From the first, however, they made use of chariots and cavalry,

9. Foreign armies. and throughout the history, except during the reign of Solomon, the Syrians were superior to the Israelites in these arms (*Josh.* 11.4.17.10 *Judg.* 1.10.47.1 S. 135.2 S. 84.1 K. 20.25.22.31, etc.). On the other hand, the great military empires of Egypt, Assyria, and Babylon possessed a much more extensive and effective military organisation. They had corps of chariots, light-armed and heavy-armed cavalry and infantry, together with archers and slingers and engineers. Their armies included large forces of mercenaries and tributaries. For military purposes these great empires stood to the Syrian kingdoms in about the same relation as that of a first-class European power to the smaller Asiatic states.

It is not necessary to notice the Persian army, and of the armies of the Ptolemies and Seleucides we need say only that they were modelled on the Macedonian armies of Philip and Alexander, with some modifications due to Oriental influences. For example, they employed elephants (1 Macc. 1.17, etc.).

The Roman army is incidentally alluded to in the NT. The legion (*Mt.* 26.53 *Mk.* 5.9.15 *Lk.* 8.30) varied

10. Roman army. considerably at different times in numbers and in constitution; during the early empire it was a composite force, consisting of about 6000 legionary infantry, together with cavalry, light-armed auxiliaries, and military engines. The legionary infantry, or legion proper, were divided into ten cohorts. The 'band' (*στραία*) which took Jesus (*Mt.* 27.27 *Mk.* 15.16 *Jn.* 18.312) was probably a cohort (so RV¹⁸⁸⁶) forming the Roman garrison in Jerusalem. The same cohort is mentioned in *Acts* 21.31. In *Acts* 10.1 we read of the Italian band, and in 27.1 of the Augustan 'band.' The Italian 'band' may have been an independent cohort of Italian volunteers (*Schür.* *GJ* 1.386). The 'Augustan band' (*στραία Σεβαστη*) may have been part of the Sebasteus—i.e., Samaritan—auxiliaries, who, according to Josephus (*Ant.* xx. 87), formed a large part of the Roman garrison of Palestine. The name might be, and doubtless was, understood as 'Augustan' as well as 'Sebasteus' (the title 'Augustan' was borne by some of the Roman legions). See further, CORNELIUS, § 1. The officers of the legion were the tribunes and centurions. Six tribunes were attached to a legion and were associated in command. We frequently find a tribune holding independent command of a cohort or larger force: the 'chief captain' (*Jn.* 18.12 *Acts* 21-25), *χιλιάρχος*, commanding the cohort at Jerusalem was a tribune. Each cohort contained ten centuries or bodies nominally consisting of a hundred men; these were commanded by centurions. As the independent cohorts were organised on the model of the legions, it is probable that the cohorts, tribunes, and centurions of the NT belonged to the auxiliary forces. Commens says of the Roman garrison in Palestine that it consisted, as elsewhere in provinces of the second rank, of a moderate number of cavalry and infantry divisions, in this case of Samaritans and Syrian Greeks—subsequently one ala and five cohorts or about 3000 men. The province, therefore, did not receive a legionary garrison. A small force under a Roman commandant occupied the citadel at Jerusalem. During the time of the Passover this was reinforced by stationing a stronger division of Roman soldiers in one of the temple buildings (*Prov. Rom. Emp.*, ET, 2.186).

W. H. B.

ARNA (*ARNA*) b. Ozias, in the genealogy of Ezra (4 *Esd.* 1.2), apparently = ZERUBBATH in *Ezra* 7.4.

ARNAN (אָרְנָן; אֲרָנָא [BA], אֲרָנֹן [L]). According to MT of 1 Ch. 3.21, the 'sons of Arnan' occur in the

prevents us from reading Ur-Casdim (written אר כשדר) in Gen. 19 as between Asshur and Lud.

8. The name given in Judith i. to the king of Media who was formerly identified with Deioceus the founder of Eclatana, or with Phraortes his son. The name, however, has been borrowed to give an air of antiquity to the narrative, and, as in the cases of Holofernes, and others in this book, stands for some more modern personage, probably Mithradates. See JUDITH, ii.

T. K. C.

ARROW, see WEAPONS, DIVINATION, § 211.

ARROW-SNAKE in Gen. 49:17 AV^{ms}: אֲרָוֹת; 'cerastes'. ΕΡΚΑΘΗΜΕΝΟΣ [C¹BAD¹]. SERPENT, § 1, no. 101, and in Is. 31:4 RV אֲרָוֹת (ΕΙΧΙΝΟΣ [C¹MM²]). AV GREAT OWL (q.v., 2); see SERPENT, § 1, no. 8.

ARSACES (ΑΡΣΑΚΗΣ [AN. -σac. (N once) V]), 'king of Persia and Media, by whom Demetrius Nicator (DEMETRIUS [2]) was defeated and made a prisoner (1 Macc. 11:7. 15. 22). See PERSIA.

ARSARETH. RV ARZARETH (so Lat. *arzareth*, also ארזרת, ארזרת; AV^{ms}: ARARATH—i.e. ארררר ארררר [cp Dt. 29:27 [28] Jer. 22:26])—'the other land,'¹ the region, a journey of one year and a half beyond the Euphrates, where the exiled tribes were supposed to be settled (4 Esd. 13:45; cp v. 49). This belief in the 'Lost Tribes' is found already in Jos. (*Ant.* xi. 52).

ARSIPHURITH (αρσιφουριθ [BA]), 1 Esd. 5:16, RV; see JORAM.

ARTAXERXES ארתחששתא, Ezra 4:7, or ארתחששתא, Ezra 4:7a, or ארתחששתא, Ezra 4:7b, or ארתחששתא, Neh. 2:1. 5:14. 13:6. Baez's text: ΑΡΘΑΘΑ [B]; ΑΡΘΑΧΑΘΑ [A]; ΑΡ-ΑΡΑΘΑΘΑ [N¹]; ΑΡΑΧΑΘΑ [N²]; ΑΡΑΧΑΘΑ [N³]; ΑΡΑΧΑΘΑ [N⁴]. The following variants occur:—

Ezra 4:7a¹: ΑΡΑΡΑΘΑ [B], ΑΡΑΧΑΘΑ [A], 11 (ΑΡΑΡΑΘΑ [B], ΑΑ ΘΑ [A]), 6:14 (ΑΡΑΡΑΘΑ [B]), 7:1 (ΑΡΑΧΑΘΑ [B]), 7:11 (ΑΡΑΧΑΘΑ [B]), 12 (ΑΡΑΡΑΘΑ [BA]), 21 (ΑΡΑΡΑΘΑ [B]), 21 (ΑΡΑΧΑΘΑ [B]), Neh. 2:1 (ΑΡΑΡΑΘΑ [B], ΑΡΑΧΑΘΑ [N¹]), ΑΡΑΧΑΘΑ [N²], ΑΡΑΧΑΘΑ [N³], 5:14 (ΑΡΑΡΑΘΑ [B], ΑΡΑΧΑΘΑ [N]), ΑΡΑΧΑΘΑ [N], 13:6 (ΑΡΑΡΑΘΑ [BN]).

Artaxerxes is the name given to the king of Persia, who, we are told (Neh. 2:1. 5:14. 13:6), gave permission to Nehemiah his cupbearer to rebuild the walls of Jerusalem, and to this end made him governor (*peha*; cp Assy. *bel-pahiti*, town governor, and *pihātu*, province, satrapy). The same name is borne by the king who permitted Ezra and his band to return to Palestine, and, along with his ministers and princes, lavished tokens of favour on the returning exiles (Ezra 7). The statement in Ezra 4:7-23 that earlier efforts of the Jews to rebuild the walls of Jerusalem ceased at this king's command is unhistorical (see EZRA, ii. § 10), and the account in Ezra 7:11-26 of the favour shown by him to the temple and its ministers is probably exaggerated (see EZRA, i. § 2). It is certainly incorrect to name him along with Cyrus and Darius as having promoted the building of the temple (Ezra 6:14), for this had already been completed in the reign of Darius.

The name, which is certainly identical with the Persian *Artakshatra* ('the true, or legitimate, kingdom,' an expression taken from the teaching of the Avesta; Assy. *Artakitsu*, Susian *Artakhsata*),—forms more closely approximating the Hebrew, was pronounced by the Greeks Artaxerxes (so in 1 Esd. B; but ΑΡΑΧΑΘΑ ΑΡΒΑ sometimes). The king intended is beyond doubt one or another of the three Persian rulers who bore that name. The attempts to identify him with Cambyses, or with Pseudo-Smerdis, or with Xerxes, on the false assumption that Artakshatra was not a name but a title, were abandoned long ago. The only question is, Which of the three?

The third in the list, Artaxerxes Ochus, is excluded, both by chronology and by the known character of that energetic despot and zealot for the Mazdaean

creed, which alike prohibit the supposition that he can have been the benevolent patron of Nehemiah and Ezra. Which of the remaining two is meant is still disputed among scholars.

As in Ezra 4:6, the name follows immediately on that of Ahasuerus, and no more precise designation is added, it is natural enough to think of Artaxerxes I. If, however, as seems probable (see EZRA, ii. § 10), Ezra did not come to Palestine till after Nehemiah, and if it be true, as we read in Ezra 7:7, that the date of Ezra's arrival was in the seventh year of Artaxerxes, while the established date of Nehemiah's arrival is the twentieth year of Artaxerxes, then Ezra's expedition must have been under Artaxerxes Mnemon, and so more than half a century after Nehemiah's mission. This, however, is not at all probable, and it seems preferable to assume that the date assigned to Ezra's arrival (in the seventh year of Artaxerxes) is an invention that had been suggested by the transposition of the two expeditions.

We have thus good reason for assuming, with Kuenen, Rysel, Ryle, and others, that by Artaxerxes we ought throughout to understand Artaxerxes I., Longimanus, a surname which is doubtless to be taken in the same sense as the expression in the inscription of Darius (Naḫš i Rustem, inscr. a, § 4, L. 43 f.) to the effect that the spear of the Persian reaches far. He is described as having been a good-hearted but weak sovereign, ruled by his wives and favourites,—an account which harmonises with what we learn from Nehemiah.

C. P. T.—W. H. K.

ARTEMAS (ΑΡΤΕΜΑΣ [Ti. WH]), most probably a contraction from ΑΡΤΕΜΙΔΩΡΟΣ; see Varro, *De Ling. Lat.* 8:9 (§ 21), and cp APOLLOS, § i n., a companion or messenger of Paul, mentioned once in the Pastoral Epistles (Tit. 3:12: 'When I shall send Artemas unto thee . . . give diligence to come unto me').

In the lists of the 'seventy disciples' which we owe to Pseudo-Dorotheus and Pseudo-Hippolytus we appear as bishop of Lystra.

ARTEMIS (ΑΡΤΕΜΙΣ [Ti. WH]), Acts 19:24. 27. 34 f. RV^{ms}; EV DIANA.

ARTILLERY (אֲרִיָּה), 1 S. 20:40 AV; AV^{ms}: 'instruments,' RV WEAPONS (q.v.).

ARUBOTH (אֲרֻבוֹת)—i.e. as in RV *Arubboth*; ΕΝ ΑΡΑΒΩΘ [A]. . . . ΒΗΡ ΒΗΘ . . . [L]. . . . Θ. ΒΗΡ . . . [B]), 1 K. 4:10 f., the seat of the third of Solomon's twelve prefects (see BEN-HESED). The third is one of the districts omitted by Jos. (*Ant.* viii. 23, ed Niese). See BEN-HESED. Cp Schick, 'Wady 'Arubb, the Aruboth of Scripture,' *PEF Qu. St.* Oct. 1898, pp. 238 ff.

ARUMAH אֲרֻמָּה, Kr. אֲרֻמָּה, with prep. ב; ΑΡΜΑ [B], ΑΡΙΜΑ [A], and OS⁹ 225, 2, ΕΡΜΑ [V¹], the place where Abimelech dwelt before his capture of Shechem—obviously not very far from that town (Judg. 9:41). Perhaps it is represented by the modern *el-'Ormah*, 6 m. SSE. from Shechem, where there are ruins still (Van de Velde, *Reisen*, 2:268). Otherwise the place is quite unknown.

For אֲרֻמָּה (v. 31: אֲרֻמָּה [B]) אֲרֻמָּה [A], AV 'privily,' RV 'craftily,' RV^{ms}: 'in Tormah' (so Jos. Kimhi, who took it to be the name of a town), it is best to read אֲרֻמָּה, 'in Arumah.' Eus. wrongly identifies it with *ρωμά* near Diopolis = Lydda (cp RUMAH).

ARVAD (אֲרָוֹד [Bā.]), אֲרָוֹד [Gi.]), whence the gentilic *Arvadite* (אֲרָוִדִי), Gen. 10:18 = 1 Ch. 1:10 f. (so C¹BAD¹ everywhere ΑΡΑΔΙΟΣ, but ΑΡΑΒΑΔΕΙ 1 Ch. 1:16 [L]; Egypt. *'Aravu[us]*, etc.; Assy. usually *Arm(u)ada*; ΑΡΑΔΙΟΣ, for ΑΡΑΔΙΟΣ, 1 Macc. 15:23; Targ. Jer. אֲרָוִדִי—i.e. of Antaradus;—Jos. *Ant.* i. 62 ΑΡΑΔΙΟΣ, etc.; mod. *Ruvād*, etc.), a town referred to by Ezekiel (27:8) in his elegy on Tyre as one of some thirty cities and countries that had contributed to its

¹ Less probably אֲרֻמָּה, land of Arat—i.e., Ararat (Volkmar).

heroes in 1 Ch. 27 (v. 7), where we find Asahel commander of a division of David's army. The incompatibility of this statement with his death before David became king of Israel was obvious. The present text, accordingly, adds 'and Zebudiah his son after him,' for which אֲשָׁאֵל has 'son καὶ ἰδὲ ἀδελφοί,' to which אֲשָׁאֵל adds ὁπίσσω αὐτοῦ.

2. An itinerating Levitical teacher temp. Jehoshaphat, 2 Ch. 178 (אֲשָׁאֵל [BA], אֲשָׁאֵל [B]).

3. An overseer of chambers in the temple temp. Hezekiah (2 Ch. 31:1).

4. 'Father' or ancestor of JONATHAN [13], temp. Ezra; Ezra 10:1 (אֲשָׁאֵל [B], אֲשָׁאֵל [B], אֲשָׁאֵל [B] as in 1) = 1 Esd. 9:14, AZARIL (אֲשָׁאֵל [A]).

ASAHI AH (אֲשָׁאֵל), 2 K. 22:12-14, RV ASAIAH, 2.

ASAIAH (אֲשָׁאֵל), § 31, 'Yahwê hath made'; אַצְאִיא [BAL].

1. One of the Simeonite chieftains who dispossessed the Manassites (see RV), 1 Ch. 4:31-41 (Azracl [B]).

2. 'King's servant': Azracl, 2 K. 22:12, AV ASAMEIAH (אֲשָׁאֵל [A], אֲשָׁאֵל [B], אֲשָׁאֵל [B] אֲשָׁאֵל [B] אֲשָׁאֵל [B]) = 2 Ch. 34:20 (אֲשָׁאֵל [B], אֲשָׁאֵל [B]).

3. A Manassite family, 1 Ch. 6:30 [13] (Azraha [B]), 159 (Azracl [B], אֲשָׁאֵל [A]), 11 (אֲשָׁאֵל [A]).

4. A Simeonite family, 1 Ch. 15 (Azra [B]), probably same as 3), but cp MAASEIAH, II. 16 (Neh. 11).

ASANA (אֲשָׁאֵל [B]), 1 Esd. 5:31 = Ezra 2:59, ASNAH.

ASAPH (אֲשָׁאֵל) an abbreviated name, § 50, אַצְאִיפ [BAL].

1. The father of Joah, the recorder, 2 K. 18:18 (אֲשָׁאֵל [BA], אֲשָׁאֵל [L]), 37 (אֲשָׁאֵל [B]) = Is. 36:322; but אֲשָׁאֵל suggests the reading 'Shaphan' or 'Shaphat.'

2. The keeper of the royal 'paradise' or forest (probably in Palestine), Neh. 2:2 (אֲשָׁאֵל [L], אֲשָׁאֵל [Jos.]).

3. The eponym of the Asaphite guild of singers, Ezra 2:41 315, Neh. 7:44 11:17 (only אֲשָׁאֵל in אֲשָׁאֵל [BA]) 1 Ch. 25:1 f., and elsewhere, who is represented by the Chronicler as a seer (2 Ch. 29:30) and as a contemporary of David and Solomon, and chief of the singers of his time, Neh. 12:46 1 Ch. 15:17 (אֲשָׁאֵל [N]) 16:5 (אֲשָׁאֵל [N]) 2 Ch. 5:12, etc.² On the later equation of Asaph with the Ar. Lokman and Gk. Aesop, cp *Story of Ahiqar*, lxxvii. f. Complicated as the history of these guilds is, we are able to see from Ezra 2:41 that at one time the terms 'b'ne Asaph' and 'singers' were identical, and that the singers were kept distinct from the Levites. The guilds of the b'ne Asaph and b'ne Korah were the two hereditary choirs that superintended the musical services of the temple. They do not seem to have been very prominent before the Exile. More important, however, was the triple division. This comprised the three great names of Asaph, Heman, and Ethan (or Jeduthun), which were reckoned to the three Levitical houses of Gershon, Kohath, and Merari (1 Ch. 6; see PSALMS). A still older attempt to incorporate the name among the Levites may, according to WRS, *OT/C* (2) 204, n. 1, be seen perhaps in the occurrence of the name ABIASAPH (q.v.), the eponym of the Asaphite guild, as a Korahite. Of the threefold division of singers a clear example may be seen in Neh. 12:24 where Hashabiah, Sherabiah, and Jeshua, the chiefs of the Levites, are appointed to praise. Similarly, in Neh. 11:17 three singers are mentioned—Mattaniah, Abda, and Bakkukiah. Mattaniah and Abda are descendants of Asaph and Jeduthun. 'Bakkukiah' we should correct to 'Bukkiyah,' a son of Heman. Thus, each of the three great guilds finds its representative. See ETHAN, 2, HEMAN, JEDUTHUN.

The name Asaph occurs in the titles of certain Psalms (see PSALMS).

4. The best supported reading in Mt. 17 (אֲשָׁאֵל [Ti. WH]), cp RV^{mg}; on this reading see ASA, footnote.

1 In 2 Ch. 34:21 אֲשָׁאֵל has אֲשָׁאֵל for אֲשָׁאֵל.
2 In 1 Ch. 25:1 אֲשָׁאֵל reads אֲשָׁאֵל, which corresponds very nearly to 1 Ch. 9:10 (אֲשָׁאֵל [A]). In 2 Ch. 34:13 אֲשָׁאֵל reads אֲשָׁאֵל.

where TR and EV have Asa. See GENEALOGIES OF JESUS, § 2 b.

ASARA (אַצְאָרָא [BA]), 1 Esd. 5:31 RV; AV AZARA.

ASARAMEL, a name occurring in the inscription set up in honour of Simon the Maccabee (1 Macc. 14:28). The writing begins as follows:—'On the 18th day of Elul in the 172nd year, this is the third year of Simon, the high priest *en asarameel* (so אֲשָׁאֵל, whence AV SARAMEL, *en asarameel* [NV], *asarameel* [Vg.]) in a great congregation'—etc. It has long been recognised that this expression is a transliteration of some Hebrew word which stood in the original, as is the case with the difficult *sarbeth sabañai el* in the title of this book (see MACCABEES, FIRST, § 1). By some it is taken to represent a place—e.g., it might be a corruption of Jerusalem (Castellio)—or to represent the Heb. אֲשָׁאֵל אֲשָׁאֵל, 'the court of the people of God'—i.e., the great court of the temple (Keil); cp Ev. *Geseh* (1432)—or אֲשָׁאֵל אֲשָׁאֵל, the court of Millo (Grotius), or אֲשָׁאֵל אֲשָׁאֵל, 'the gate of the people of God.' It is better, however, to see in this expression an honorific title. From 1 Macc. 13:42 we see that contracts were dated from the first year of Simon 'the great high priest, and captain and leader of the Jews' (cp the titles given him in 14:47 and 15:1), and it seems natural that in an inscription written in honour of Simon we should find more than the simple title 'high priest.' (Cp the Pesh. אֲשָׁאֵל אֲשָׁאֵל, 'leader [or "great one"] in Israel'.) Hence Asarameel is taken by many (Wernsdorf, Scholz, Grimm, Zöckler, etc.) to represent אֲשָׁאֵל אֲשָׁאֵל, 'prince of the people of God.' The great difficulty would then lie in the presence of the preposition *en*. This, however, may have been inserted by a copyist who supposed that the word was the name of a place not of a person.¹ Possibly *en* is an integral part of the word, and we should read אֲשָׁאֵל אֲשָׁאֵל, 'the sprout (cp Is. 11:1) of the people of God,' or, better, אֲשָׁאֵל אֲשָׁאֵל, 'protector of the people of God' (cp v. 47b).

ASAREEL, or, better, RV Asarel (אֲשָׁאֵל), § 67; cp אֲשָׁאֵל, and see AHAB, § 4, n. 5; אֲשָׁאֵל [B], cc. [A] אֲשָׁאֵל [L] which adds καὶ אֲשָׁאֵל, 'son' of (the unknown) Jehalehel (1 Ch. 4:16) and 'brother' of ZIPH (q.v., 2), Ziphah and Tiria.

ASARELAH (אֲשָׁאֵל [Bä. Ginsb.]), § 73; cp אֲשָׁאֵל; אֲשָׁאֵל [B], אֲשָׁאֵל [A], אֲשָׁאֵל [L], a 'son of Asaph' 1 Ch. 25:2; called Jesarelah, EV JESHARELAH (אֲשָׁאֵל; אֲשָׁאֵל [B], אֲשָׁאֵל [A]) in v. 14.

ASBACAPHATH (אַצְבָּאָפָּאֶת [B]; in Pesh. the name is אֲשָׁאֵל). 1 Esd. 5:69 RV^{mg}, AV 11:61 (1) Asbazareth, RV Asbasareth (אַצְבָּאָפָּאֶת [A]), the name answering in 1 Esd. 5:69 אֲשָׁאֵל to the Esarhadon of || Ezra 4:2 (which is reproduced by אֲשָׁאֵל, אֲשָׁאֵל). The right reading is אֲשָׁאֵל, which represents אֲשָׁאֵל. This is evidently an alternative to the reading אֲשָׁאֵל of Ezra 4:10, and it suggests that the writer of the gloss in Ezra 4:9 f. (see 'Ezra' in *SBOT*) found, not אֲשָׁאֵל, but אֲשָׁאֵל, in his text of Ezra 4:2. So Marq. (*Pund.* 59); but, in connection with the difficult theory that the name originally given in Ezra 4:2 was אֲשָׁאֵל, Sargon; see ASNAPPER.

ASCALON (אַצְכָּאֶלֹּן), 1 Macc. 10:86, etc., RV ASHKELON (q.v.).

ASCENT OF THE CORNER (עֲלִית הַקֶּנֶת; אֲנָא

1 The prefixed *en* is explained by Schürer (*CVI* 1 197, n. 17) as a corruption of *ayen* (אֵינִי), which corresponds to the Gr. στρατηγός. Renan's suggestion (*Hist. d'Isra.* ix. cap. 1 *ad fin.*) that *en asarameel* is a corruption of some *wisah*, may be mentioned in his view the expression is similar to those which Arabian authors often add to the names of persons.

ASEEBEBIA, RV **Aseebias** (ΑCΕΒΗΒΙΑC [BA]). 1 Esd. 8:47 = Ezra 8:18, SIEREBIAH, *q.v.*

ASEBIA (ΑCΕΒΙΑΝ [A]). 1 Esd. 8:47 AV. RV **Asebias** = Ezra 8:19, HĀSHĀBIAH, 7.

ASENATH (ΑΣΗΝΑΘ; ΑCΕΝΝΕΘ [ADE], -ΕΝΕ. [E]). ACCENEΘ [L], daughter of Potipherah, priest of On; wife of Joseph (Gen. 41:45-50, 46-50). A genuine Egyptian name. See JOSEPH I, § 4; and in the apocryphal 'Life of Aseneth,' APOCRYPHA, § 12.

ASER, RV ASHER (ΑCΗΡ [BA]), Tob. 1:2. See HAZOR, 1.

ASEREB, RV SERAR (CΕΡΑΡ [BA]), 1 Esd. 5:32 = Ezra 2:53, SISERA, 2.

ASH (ἄσ. ΠΙΤΥC), better RV **Fire-Tree**, seems to be named (Is. 44:14) as a tree used by makers of idols. If *ash* is genuine (see below) we may reasonably hold it to be the Assyrian *irin*—cedar or fir.

'Ash' is supported by the versions (scelus, pinus) and by the Rabbis (ref. in Ges. *Theo.*); Tristram's suggestion, *Pinus halepensis*, Mill. *bot. Alpina* Pinus (VAB, 13), is attractive. That Heb. *ash* = Lat. *pinus* is improbable; פֶּן cannot be *Fraxinus ornus*, L., the Manna Ash, a native of S. Europe, not found further E. than W. Asia Minor. Celsius (*Historical*, 185 ff.) held פֶּן to be the *arvis* of Abulfadl, and the 'thorny tree' that he meant it is not difficult to make out. *Telios-argentea* (Celsius) and *chrysea* (Celsius) like *Sorbus Aucuparia* is called *ash*, *ash* (*chrysea*, *ash* in the flora of Egypt, 200), and that the little tree grows in Arabia, though not yet proved, is by no means improbable. *Rhus typhina*, which also might be thought of, resembles *Sorbus aucuparia* more closely.

The reading, however, is uncertain. It occurs only in this passage, and a Mass. note calls attention to the 'small *p*,' which seems to point to a reading פֶּן 'cedar.' Perhaps a better emendation would be פֶּן ('God').

So Klo, and Che. (SBOT, Heb. 138), following G. The word פֶּן is wanting in nearly all the best MSS (BBAQT) of C, and in others appears as a Hexaplaric addition with an asterisk. The text of the whole verse as it appears in B² and other MSS is simply—ἀσκηθὲν ἔκαστος ἐκ τῶν ἄμικτων ὁ οὐρανὸς καὶ ἐκ τῶν ἄμικτων (the Peshitta is even shorter, 'the wood that was cut down from the thicket, that by rain was nurtured'). Between *ash* and *ash* Origen inserted in the Hexaplaric text this addition, from Aq. and Theod., *αὐτὰρ κέδρον, καὶ ἄσκηθον αὐτῶν καὶ ἄσκηθον αὐτῶν* and similarly added *scelus* after ὁ οὐρανός; see Fiebig's *Hexapla* in loc.

N. M.—W. T. T. -D.

ASHAN (אַשָׁן; ACAN [BA], ACENNA [A], ACANNA [L]), an unidentified site in the lowland of Judah, apparently in its most southern part (Josh. 15:42, ANOX [B], ACENNA [A], CANN, [L]), assigned in Josh. 19:7 (ACAM [A]) to Simeon, and named among the priests' cities in 1 Ch. 6:59 [44] = Josh. 21:16 (where for MT אַשָׁן, EV AIN, AIN [A], NAËIN [L]), we should probably read אַשָׁן, Ashan; cp C² ACAN; so Bennett in *SBOT*. Ashan may perhaps be the same as the BOK-ASHAN [*q.v.*], or CHOR-ASHAN (RV COR-ASHAN) of 1 S. 30:30, the site of some well or reservoir.

ASHARELAH (אַשְׁרֵלָה; ἄCASHAL. Ba. Ginsb.), 1 Ch. 25:2 RV, AV ASARELAH.

ASHBEA (אַשְׁבֵּעָ, § 42, for אַשְׁבֵּעָ?; ECOBA [BA], ACEBA [L]). The 'house of Ashbea' included 'the (Judahite) families of the house of those that wrought fine linen' (1 Ch. 4:21); or Beth Ashbea may be the name of their dwelling-place. Nothing further is known of this weaving guild.

ASHBEL (אַשְׁבֵּל, § 43; ACBHA [ADL]; ACABHALOC [Jos.]; Sam. אַשְׁבֵּל, gentile *Ashebelite*, Nu. 26:38

(אֲשְׁדּוֹד, אַCΥΒΗΡ[Ε] [BAF], -CΟΥΒΗΡ[Ι] [L]), in a genealogy of BENJAMIN (*q.v.*, § 6 [B]), Gen. 46:21 = Nu. 26:38 (אַCΥΒΗΡ [BAF], -CΟΥΒ [L]) = 1 Ch. 8:1 (αCBA [B]); apparently represented by ISHBAEL in 1 Ch. 7:6-11 (1 Ch. 7). Probably the name is a corruption of ISHBAAL (*q.v.*).

ASHCHENAZ (אַשְׁכְּנַז), Jer. 51:27 AV; RV ASH-KENAZ, *q.v.*

ASHDOD, AZOTUS (אֲשְׁדּוֹד, 'strength, strongly-founded' or perhaps 'man [men] of Dod, Dudu'; cp ASIHUR, BENE-BERAK?; ΑCΩΤΙC [BA]C² 1:1, hence its name in Apoc., NT, etc.), gentile **Ashdodite**, AV **Ashdodthite** אַשְׁדּוֹדִי, Josh. 13:3 (αCΩΤΙC)ΙOC [BAL]; pl. fem. אַשְׁדּוֹדִי; Neh. 13:23 in Kr. אַשְׁדּוֹדִי; αCΩΤΙC [BAL], -ΙΔAC [B]), a famous Philistine city some 2-3 m. from the Mediterranean coast, about half-way between Gaza and Joppa. It was one of the five confederated towns of the Philistines, and stood far above the others in importance—a pre-eminence due doubtless to its commanding position on the great military road between Syria and Egypt, at the spot where a branch of it leads off to Ekron and Ramleh. It survives in the modern *Esdud*, a miserable little village on a woody and beautiful height, to the W. of which, at an hour's distance, are still found the traces of a harbour now called *Minet el-Kal'a*.¹

JE assigns Ashdod to Judah (Josh. 15:46 f., *אַשְׁדּוֹד*, *ασειδωθ* [B], *ασδοθ* [A, in v. 47 om.], *ασωδ* [L]); but this statement clearly needs modification in view of Josh. 13:3-14, cp 11:11—*ασειδωθ* [B], *ασωθ* [A], *ασωθωθ* [F], *ασειδωθ* [L]), which is supported by the fact that Israel seems never to have subdued the Philistine stronghold (2 Ch. 26:6 is doubtful). In Samuel's time the ark was removed thither from Eben-ezer, and placed in the temple of Dagon (1 S. 5 f.), whose cult was more particularly associated with Ashdod (cp 1 Macc. 10:8; 11:4).² Ashdod is denounced by Amos with other Philistine towns for the infamous slave-raids upon Judah, and the same prophet alludes to it again in terms which show that in the middle of the eighth century it was a place of no little repute (39 [Egypt], C² reads 'Assyria,' against which cp We., Now.; Aq., Sym., Theod. read Ashdod). Although unmentioned in the annals of Tiglath-pileser's campaign against Philistia and Phœnicia (cp Wi. *GIT* 1:23) it probably suffered at his hands. On the other hand, we are fortunately well-informed of its fate some years later in the siege alluded to in Is. 20:1 (711 B.C.).³ As a commemorative record relates (cp A. 17²) 398 f., *KB* 265 f.), Azuri (cp Heb. *ḥy*, *Azzur*), king of Asdudu, had been superseded⁴ by his brother Ahi-miti (cp Ahimoth, Mahath), who in turn was overthrown by the anti-Assyrian party (the Ha-at-ti)⁵ in favour of Yamani (or Yavani = the Ionian?). Ashdod was besieged, not by Sargon, but, as the MT more correctly states, by his general or TARTAN [*q.v.*]. This siege, as Is. 20:6 suggests, involved the surrounding peoples, and ultimately resulted in the flight of Yavani to the land of Musri, which belongs to Miliuhha, the district lying in N. Arabia, bordering on Edom (see MIZRAIM, § 2b). The same tablet records the destruction of (*tr*) *Gimtu Asudimmu*, which, according to Schrader, is 'Gath of

¹ In early Christian times Ἄζωτος παραλιος and Ἄζωτος μεσόγειος are kept distinct. Josephus sometimes speaks of Ashdod (and similarly of Jabneh, Jamnia) as an inland town (*Ant.* xiv. 4:4, *Bf* i. 77), at other times as a coast town (*Ant.* xiii. 15:4). There may have been a harbour here in the time of Sargon; cp above.

² Hence it has been conjectured that Dagan-takala in the Amarna tablets (*KB* 625 f.) belonged to Ashdod.

³ For the date, etc., cp Ch. *Intr.* 120 f.; Wi. *Alt. Unt.* 149 ff.

⁴ He had sought to ally himself with the surrounding kings against Assyria. Another inscription relates that the men of Philistia, Judah, Edom, and Moab had sent presents to Pir'u, king of Musri, for a like purpose (cp *KB* 264 f., and note).

⁵ These Ha-at-ti of Ashdod seem to have been closely related to Musri (cp also Wi., 'Musri, etc.' in *MG*, 1898, 126 f.).

the Ashdodites' (cp 'Gath of the Philistines,' Am. 6.2, and for a wider use of Ashdod see below). Others (Del. *Par.* 289 f., Wl. Che.) read as two names, and explain the latter as אֲשְׁדוֹד *i.e.*, the port of Ashdod (cp note 1, below).

Ashdod soon regained its power, and in the following century the 'great city of Syria' (Herod 2.157) was besieged by Pсамметихus for twenty-nine years, an allusion to which is seen in Jer. 25.20 (less probably also Zeph. 2.4; see ZEPHANIAH, II.). Further evidence of its independence may be seen in the mention of Ahi-milki, king of Ashdod, temp. Esarhaddon (*A.C.* 17 355 12).

The Ashdodites were allied with the Arabians and the Ammonites against the Jews of Jerusalem (Neh. 4.7 [1]), and Nehemiah, denouncing the foreign marriages, mentions the women of Ashdod (also of Ammon and Moab), whose offspring speak a degraded dialect called אֲשְׁדוֹדִית (Neh. 13.23 f., ἀσδωσθ[ε]ν [B.N.A.L.]): cp the allusion in Zech. 9.6. The use of Ashdod in these passages is peculiar, and, if genuine, suggests that the name Ashdod comprised also the surrounding district (cp Schrader's explanation of *asudimmu* above).¹

Ashdod and its neighbourhood was ravaged by Julius (1 Macc. 5.68, cp 4.15), and in 147 B.C. his brother Jonathan defeated Apollonius there and burnt the temple of Dagon (1 Macc. 10.77 ff., cp 11.4). John Hyrcanus burnt the towers in the surrounding fields after defeating Cendebeus (1 Macc. 16.10). In the time of Alexander Jannæus it belonged to Judæa (Jos. *Ant.* xiii. 15.4); but it was separated from it under Ptolemy (Jos. *R.* i. 7.7). In the NT it is mentioned only once, in connection with Philip's return from Gaza to Cæsarea (Acts 8.40). See Schürer, *GIT* 207 f., Wl. *GIT* 1.223 f.; and cp PHILISTINES.

ASHDOTH-PISGAH (אֲשְׁדוֹת הַפִּסְגָּה) is uniformly translated, in RV, 'the slopes (*margin*) or springs of Pisgah' (Dt. 3.17 4.49 [here also AV] Josh. 12.3 [no marg. note] 13.20; for B's readings see PISGAH). In like manner, the Heb. אֲשְׁדוֹת, rendered 'springs' in Josh. 10.40 12.8, is in RV 'slopes.' The declivities or shoulders of a mountain plateau, where it sinks sharply into the plain, are meant. The word is perhaps derived from אֲשַׁר in the sense of 'pouring out';² the explanation usually given is that the Ashdôth are the line on the mountain-side where springs break forth. See PISGAH.

ASHER (אֲשֵׁר; אֲשֵׁר [B.A.L.], אֲשֵׁר [A.*Nu. 7.2], אֲשֵׁר [B.], Josh. 17.10; Jos. אֲשֵׁר; gentilic אֲשֵׁרִי).

1. Name and origin. Asherite), the eponymous head of the tribe of the same name. Unimportant for the history of Israel—it is traced by the Yahwist to Zilpah, Leah's maid (Gen. 30.12 f.),—this tribe, perhaps more than the other Zilpah and Bilhah tribes (see ISRAEL, § 5), raises questions difficult to answer. Is the popular etymology (Gen. 30.13, probably also alluded to in the 'Blessings') correct, or does the name not rather point to some deity—in which case it is natural to connect it with the root אֲשַׁר ('to be propitious,' whence the name of the Assyrian God Ašur?³ In what relation does Asher stand to a once somewhat important state called *Aseru*,

As(s)aru, which occupied W. Galilee in the time of Seti I. and Ramses II. (WMM, *As. u. Eur.* 236-9)? Did that ancient people to some extent throw in their lot with the invaders from the wilderness (cp HARNEPHER), or is Asher in the OT simply a geographical name for some Israelites who settled in a district already long known as Asher? Hommel (*AH* 228, 237) thinks that the Asherites were one of several Israelitish tribes which, before the time of Moses, had encamped in the district between Egypt and Judah (cp SHIHOR-LIBNATH) and that they are the Habiri referred to in the Amarna letters as having burst into Palestine from the south. Jastrow, on the other hand, inclines to identify the Habiri with the Asherite clan Heber (see below, § 4) and to connect the Asherite clan Malchiel with the followers of Milkili, the writer of several of the Amarna letters, while G. A. Barton suggests that the sons of Abd-äsirta (b'nê Ebed Ašera), of whom we hear so much in the letters of Rib-Addi of Gebal, may have become an important constituent part of the OT tribe of Asher, so that it inherited their name in abbreviated form. That the OT Asherites were at all events not

2. Earlier references. very closely bound to Israel is proved by our earliest historical notice of the tribe, according to which it took no interest in the rising against Sisera: 'Asher sat still at the shore of the sea, and abode by his creeks' (Judg. 5.17).¹ Moreover, that they were somewhat mixed up with older inhabitants appears clearly enough in Judg. 1.32. Whilst, therefore, the fertility ascribed in the 'Blessings of Jacob and Moses' to the district where Asher dwelt, although it at once suggests the popular etymology (see above), is known to have been really characteristic of the part of Galilee in question (see ref. in Dr. on Dt. 33.24, and cp BIRZATH), we can hardly say how far the distinctness from the Phœnicians of the coast, apparently implied in v. 25 of the later Blessing, was an actual fact. On the other hand, the writer of the account of ISHBAAL (*q.v.*, 1) seems to have thought Asher worth mentioning as included in the Benjaminite claim (see ASHURITES, GESUR, 1). It is not surprising in view of the prevailing vagueness, that the 'Blessing of Jacob' speaks of ZEBULON in almost the same words that the Song of Deborah had applied to Asher, and that the 'Blessing of Moses' then associates ISACHAR with Zebulun. Definite boundary there can hardly have been, whilst the distribution of the population must have changed somewhat from age to age. We need not wonder that the account of Asher's territory

3. Boundaries. which the priestly compiler has given us in Josh. 19.24-31 (in which some scholars have found traces of JE) is unusually vague. Not many of the places can be identified with certainty. ALAMMELECH (Wady el-Melek), JIPHATH-EL (Jefat), CABUL (Kabül), KANAH (Kāna) have probably been identified, and possibly also ELRON (*i.e.*, ABRON, I.) and HAMMON, 1 (Umm el 'Amüd). UMMAH probably should be read ACHO. SHIHOR-LIBNATH (*q.v.*) may perhaps be the Nahr ez-Zarkä. MISHAL and HOSAH (*q.v.*) are probably to be recognised in Egyptian and Assyrian inscriptions.

That Acho or Achizib or Sidon was ever included in an Israelitish tribe Asher, is a purely ideal conception, and the same is clearly true (Judg. 1.31 f.) of other cities in the list. For indications of an Aramean element in the population (2 S. 10.6) see ARAM, § 5.

The tribe to the S. of Asher was Manasseh. In Josh. 17.11 we have a Yahwistic passage which is commonly interpreted as declaring that Dor lay within the limits of territory ideally assigned to Asher, although it really belonged to Manasseh. This interpretation gives support to the hypothesis that Shihor-Libnath (Josh. 19.26) is to be taken as the southern boundary of Asher, and to be identified with the river Zarkä, which enters the sea almost midway between Dor and Cæsarea. If Asher really moved northwards from an earlier home

¹ So in 1 Macc. 14.34 Gazara (in reality 17 m. to NE.) is 'upon the borders of Azotus'; cp also (doubtfully) 2 Ch. 26.6.

² Delitzsch compares the Ass. *isdu*, pl. *isdüti*, the 'base' of anything (*Prof.* 46; cp Dr. on *Deut.* 3.17).

³ Title long ago wrote, 'Asher, like Gad, is a god of good fortune, the consort of Asherah' (*Vergegenw. Gesch. von Ägypt. u. Mesopotam. Götterdiensten*, 1872, p. 542), and both parts of this statement may still be defended. So Che. *Proph.* 1.3(1) 1.103 (on Is. 17.9). Cp Del. *Ass. Hist.* 148. G. A. Barton (*JBL* 15.174 [1906]) suggests a connection with the divine name implied in the name Abd-äsirta referred to towards the end of § 1 (see ASHERAH, § 2). Jensen (*Hilfere u. Armenier*) offers proof that the name of the consort of the goddess Ašratu was Hadad or Rammän the storm-god. Had he also the title Ašir? Lastly G. H. Skipwith (*JQR* 11.241 [1901]) even suggests a connection between אֲשֵׁר and Osiris (the father of Horus; cp HARNEPHER).

¹ On the statement in Judg. 6.35 7.23, that Asher took part in the conflict with Midian, see Moore, *ad loc.*

in S. Palestine (see above, § 1), traces or at least memorials of it may have long survived (see SHIHOR-LIBNATH). This would make it not quite so difficult to understand the account of P, even if it is a fact that he really brings Asher farther S. than Carmel (Josh. 19:26).

The linguistic peculiarities of the verse Josh. 17:11 support the suggestion of Dillmann (*ad loc.*) that all that follows the word 'Asher' except 'the three heights' belongs really to 22:12, taking the place there of the words 'those cities' (cp Josh. 17:17); but we do not know what 'the three heights' are (though they certainly might include 'the heights of Dor'; cp Josh. 11:22). There is, however, little historical importance in the question whether Dor is represented as belonging to Asher, since, as a matter of fact, it and the cities mentioned with it remained in the possession of the Canaanites or Phoenicians.

On the other three sides the territory of Asher is even less defined. According to Josh. 19:27, it was continuous with Zebulun on the E., while according to 2:34 it stood in the same relation to Naphtali. It is difficult to bring it into relation with Issachar. In general, Asher must be regarded as the north-western-most district connected with Israel, and as stretching indefinitely W. and N. and losing itself gradually amongst the Phoenicians of the coast.

(1.) P's genealogy of Asher (given twice: Nu. 26:44, probably the more original, = Gen. 46:17), which is reproduced in almost identical form by the Chronicler (1 Ch. 7:30, f.), is very simple, consisting probably of (primarily) the three clans, the Imnites (perhaps really Jamin; so $\mathfrak{S}^{\text{BAL}}$ in Nu. and perhaps \mathfrak{S}^{B} in 1 Ch.), Ishvites (doubtful), and Bertites.

With the last mentioned are associated as secondary clans the Heberites (known as a Kenite name)² and the Machilites (known as a personal name in the Amarna letters from S. Palestine) as 'sons,' and Serah (perhaps an Aram. name; root not found in Hebrew) as sister. There is no earlier mention, however, of any of these names in connection with Asher, though the first and third are well known in the central highlands of Palestine.

(ii.) To this simple genealogy the Chronicler appends (1 Ch. 7:30) a remarkable list of thirty Machilites and over thirty Heberites—remarkable because the names are not of the distinctive type that abounds in the Chronicler. The list, if we remove certain textual corruptions,³ looks as if it were meant to be schematic (e.g., 3 sons and 3 x 3 grandsons, followed by some seventeen in the fourth, fifth, and sixth generations); but we cannot reach a text that inspires confidence. It must be remembered, however, that many of the names may well be foreign. Harnepher has been referred to above. The affinities of some of the names are worthy of note: note, e.g., the remarkable groups Heber, Ithran, Jether; so also Beria, Shelesh = Shilsha of v. 37 (Shalishat cp \mathfrak{S}^{B}), Shual.

1 K. 2:36 speaks of a certain Anna as being of the tribe of Asher (but see GENEALOGIES, i. § 8).

2. Tob. 1:2 RV, AV ASER. See HAZOR, 1.

H. W. H.

ASHER (אָשֶׁר; אֲשֶׁר [BAL]), a town on the southern border of Manasseh, mentioned in Josh. 17:7 (RV) in the following terms:—'And the border of Manasseh was from Asher to Michmethath which is before [i.e., E. of] Shechem.' After this we are told that 'the border went along to the right hand [i.e., to the S.], unto the inhabitants [i.e., the district] of Entappuah.' These statements must be taken in connection with the description of the N. border of Ephraim in 16:6, where the names which correspond to Asher and Michmethath are Michmethath and Taanath-Shiloh, and Taanath-Shiloh is stated to be E. of Michmethath. On the assumption that En-tappuah is SW. of Shechem (see TAPPUAH, 2), Asher must lie somewhere to the E. of Shechem, between Michmethath and Taanath-shiloh. Thus far we have proceeded on the

theory that RV's reading is correct; it is in fact that of most scholars, including Dillmann and Kautzsch. The rendering seems, however, to need revision. Considering that MICHMETHATH (*q.v.*) stands in 17:7 in close proximity to Asher (without any connecting *and*), and that it would be natural to distinguish this Asher from the better known one (with which indeed Kerr in *PEFQu St.*, 1877, p. 45, actually confounds it) by adding the name of the district in which it was (cp 'Kedesh-Naphtali'), it seems probable that Michmethath is the name of a district, and that we should render (against the accents and Targ., but in accordance with $\mathfrak{S}^{\text{BAL}}$), 'And the border of Manasseh was from Asher of (the) Michmethath,' the starting-point alone being mentioned in the opening clause, as in 15:2 (so Reland, J. Schwarz, Conder). The description in 17:7 will then exactly correspond to that in 16:6 in so far as Michmethath is the first point mentioned on the border between Ephraim and Manasseh. 'Asher of the Michmethath' might be some place in the N. of the district called 'the Michmethath.' If this district is the plain of *el-Makhdha*, two ruined places at once suggest themselves, now called the upper and the lower *Makhdha* respectively (Guérin, *Sam.* 1 459 f.). Here, however, no villages preserve any traces of the ancient name. Eus. and Jer. (*OS* 22:29 93:28) suggest another identification. They refer to a village called Asher, 15 R. m. from Neapolis on the road to Scythopolis, a description which points to *Tevāsīr*, 1 R. m. NE. of Thebez, where the 15th R. milestone has actually been discovered (Séjourné, *Rev. Bibl.*, 1895, p. 617 f.). *Tevāsīr* is now a mud hamlet; but it succeeds a place of some importance. Rock-cut sepulchres abound (Guérin, *Sam.* 1 108). It is not probable, however, that Eus. and Jer. had a clear or correct view of the boundary line, and the transition from Asher to *Tevāsīr* is not an easy one. (The latter name seems to be the plur. of *tevasir*, but 2 $\mathfrak{S}^{\text{BAL}}$ *tevasira*. So Kämpfmeier, *ZDPV* 16:2.) T. K. 1.

ASHERAH, plur. **Asherim**, the RV transliteration of the Heb. אֲשֵׁרִים (pl. אֲשֵׁרִים); in three late passages

1. The אֲשֵׁרִים, a word which AV, following \mathfrak{S}^{B} **Ashera** (אֲשֵׁרָה [BAL]) and Vg. (*Iucus*), renders **post. grove, groves**. That this translation is mistaken has long been universally recognised. RV avoids the error by not translating the word at all; but, by consistently treating the word as a proper noun, it gives occasion to more serious misunderstanding.

The *āshērā* was a wooden post or mast, which stood at Canaanite places of worship (Ex. 34:13 Judg. 6:25 and frequently), and, down to the seventh century, also, by the altars of Yahweh, not only on the high places, or at Samaria (2 K. 13:6) and Bethel (2 K. 23:15), but also in the temple in Jerusalem (2 K. 23:6). The *āshera* is frequently named in conjunction with the upright stone or stèle (*massibā, hammām*; see MASSEBAH and IDOLATRY, § 4). The pole or post might be of considerable size (cp Judg. 6:25 f.); it was perhaps sometimes carved (1 K. 15:13)¹ or draped (2 K. 23:7), but the draping especially is doubtful. The shape of an *āshera* is unknown. Many Cypriote and Phoenician gems and seals representing an act of adoration show two (more rarely three) posts, generally of about the height of a man, of extremely variable forms,² which are supposed by many archaeologists to be the *āsheras* (and *massēbas*) of the OT (see PHENICIA). This is not improbable, though direct evidence is thus far lacking; but in view of the

1 'A shocking thing (Jewish tradition, *phal'us*) as an *āshera*'; on 2 K. 23:7 see below.

2 See Lagarde, *Antiquité Méridionale*, 1877, f.; Osmundsch-Richter, *Kypros*, 1893, where a great many of these pieces are collected. Similar figures are found on Assyrian reliefs, and on Carthaginian *cièpe*. We may compare the Egyptian *dedu* column (at Busiris), the Indian sacrificial post (Oldenberg, *Religion des Veda*, 91), the so-called 'totem-posts' of the N. American Indians, etc. See in general Lippert, *Kulturgeschichte*, 2 376 f., and Jevons, *Inst. Hist. Rel.* 134 f.

great variety of types, and the age and origin of the figures in question, it can hardly be confidently inferred that the *asherahs* of the Old Canaanites and Israelites were of similar forms. The representations do not give any support to the theory that the *asherah* was a phallic emblem.

It is the common opinion that the *asherah* was originally a living tree (*Sifre* on Dt. 12₃, *Aboda sara*, fol. 45

2. Not a tree. The pole or mast was a conventional substitute.¹ This is antecedently not very probable. The sacred tree had in Hebrew a specific name of its own (*el, ʔlā, ʔlōn*, or, with a different and perhaps artificial pronunciation, *allā, allōn*), which would naturally have attached to the artificial representative also; nor is it easy to explain, upon this hypothesis, how the *asherah* came to be set up beneath the living tree (2 K. 17₁₀). The only passage in the OT which can be cited in support of the theory is Dt. 16₂₁: 'Thou shalt not plant thee an *asherah* of any kind of tree (RV) beside the altar of Yahwē thy God,' or, more grammatically, 'an *asherah*—any kind of tree' (אֲשֵׁרָה לִי עֵץ). As, however, in the seventh century the *asherah* was certainly not ordinarily a tree, this epexegetical would be very strange. In the context, whether the words in question be original or a gloss, we expect, not a restriction of the prohibition such as this rendering in effect gives us, but a sweeping extension of it. We must, therefore, translate, 'an *asherah*—any wooden object.'²

It does not appear from the OT that the *asherahs* belonged exclusively to the worship of any one deity. The *asherah* at Ophrah (Judg. 6₂₅) was sacred to Baal; the prohibitions of the law (Dt. 16_{21 f.}) are sufficient proof that they were erected to Yahwē,³ nor is there any reason to think that those at Bethel, Samaria, and Jerusalem were dedicated to any other god. The assertion, still often made, that in the religion of Canaan the *mesophus* were sacred to male, the *asherahs* to female deities, is supported by no proof whatever.

From certain passages in the OT (especially Judg. 3₇ 1 K. 18₁₉ 2 K. 23₄),⁴ it has been thought that there was

3. A goddess? also a Canaanite goddess *Ashera*, whose symbol or idol was the *asherah* post. Since in the places cited the names of Baal and *Ashera* are coupled precisely as those of Baal and Astarte are elsewhere (Judg. 2₁₃ 106 1 S. 7₄ [שֵׁשׁ־בַּאֲשֵׁרָה אֲשֵׁרָתוֹ] 12₁ [שֵׁשׁ־בַּאֲשֵׁרָה אֲשֵׁרָתוֹ] 12₁ [שֵׁשׁ־בַּאֲשֵׁרָה אֲשֵׁרָתוֹ]), many scholars have inferred, further, that *Ashera* was only another name or form of the great Semitic goddess, Astarte (Theodoret, *Quest.* 55 in *iv. Reg.*, Selden, Spencer, etc.); whilst others attempt in various ways to distinguish them—*e.g.*, Astarte, a pure celestial deity, *Ashera*, an impure 'telluric' divinity (Movers); or the former a goddess of the Northern Canaanites, the latter of the Southern (Tiele, Sayce). Conservative scholars such as Hengstenberg, Bachmann, and Baethgen, however, have contended that in the passages in question the symbol of Astarte is merely put by metonymy for the name of the goddess; and many recent critics⁵ see in these places only a confusion (on the part of late writers) of the sacred post with the goddess Astarte.⁶ A critical examination of the passages makes it highly probable

¹ See Ohnefalsch-Richter, *Kypros*, etc., Pl. lxxvix, 3 and 7, where in precisely similar relations to the scene a carved post (supposed *asherah*) takes the place of a cypress tree.

² It is not only a tree, but also a *stake* (Dt. 21₂₂ and often). That the trees depicted on Phen. coins, etc., were called *asherahs* (Pietschmann, *Phönizier*, 213) is merely inferred from the OT.

³ The condemnation is based, not on the fact that the presence of these symbols presumes the worship of other gods, but on the principle that Israel shall not worship Yahwē as the Canaanites worship their gods (Dt. 12_{2 f.}).

⁴ In 2 K. 21₇, 'the image of the *asherah*,' the word *image* is a gloss; cp *v.* 3 and 2 Ch. 33₇. On 1 K. 15₁₃ and 2 K. 23₇, see above. In 1 K. 18₁₉ the 400 prophets of *Ashera* are interpolated (We., Klo., Dr.).

⁵ We., G. Hoffmann, E. Mey., St., WRS, and others.

⁶ This confusion is found in a still greater measure in the versions.

that in the OT the supposed goddess *Ashera* owes her existence only to this confusion. In the Amarna correspondence, however, there is frequent mention of a Canaanite who bears the name *Abd-āsratum*, equivalent to Heb. 'Ebed-*āshērā*, sometimes with the divine determinative,—*i.e.*, Servant of (the divine) *Ashera*. This has not unnaturally been regarded as conclusive evidence that a goddess *Ashera* was worshipped in Palestine in the fifteenth century B.C.¹ The determinative might here signify no more than that the *asherah* post was esteemed divine—a fetish, or a cultus-god—as no one doubts that it was in OT times; cp Phœnician names such as 'Ebed-sūsīm, Servant of (the sacred) horses (CS i. 46, 49, 53, 933, etc.); or 'Ebed-hēkal, Gēhēkal (G. Hoffmann), which might in Assyrian writing have the same determinative; further, Assyr. *ākurru*, 'temple, sanctuary,' in pl. sometimes 'deities' (Del. *HVB* 718). The name of the 'goddess *Āsratum*,' however, occurs in other cuneiform texts, where this explanation seems not to be admissible; viz., on a hæmatite cylinder published by Sayce (*ZA* 6₁₆₁); in an astronomical work copied in the year 138 B.C., published by Strassmaier (*ZA* 6₂₄₁, l. 9 ff.); and in a hymn published by Reiserer (*Sumer.-babylon. Hymnen*, 92)—in the last in connection with a god *Amurru*, which suggests that the worship may have been introduced from the West. See Jensen, 'Die Götter *Amurru* (*ā*) and *Āsratu*,' *ZA* 11₃₀₂₋₃₀₅.

The word *asherah* occurs also in an enigmatical Phœnician inscription from Mašūb, which records a dedication 'to the Astarte in the *asherah* of El-hannom' (G. Hoffmann); where it is at least clear that *asherah* cannot be the name of a deity. The most natural interpretation in the context would be 'in the sacred precincts.' In an inscription from Citium in which the word was formerly read (Schroeder, *ZDMG* 35₄₂₄, 'mother *Ashera*'; contra, St. *ZATW* 1344 f.; cp E. Mey. in Roscher, 2870), the reading and interpretation are insecure (see CS i. no. 13). Cp PHœNICIA.

The etymology and the meaning of the word are obscure. The most plausible hypothesis perhaps is that

4. Etymology. *āshērīm* originally denoted only the sign-posts set up to mark the site or the boundaries of the holy place (G. Hoffmann, *l.c.* 26). The use of the word in the Mašūb inscription for the sacred precincts would then be readily explained, and also the Assyrian *āširtu* plur. *āšrūtī* (*ēšrūtī*), defined in the syllabaries as meaning 'high place, oracle, sanctuary.' In any case, *āshērā* is a *nomen unitatis*, and its gender has no other than a grammatical significance.

For some further questions connected with the prophetic opposition to the use of *asherahs* in the worship of Yahwē and the prohibition in the laws, see IDOLATRY, § 8.

The older literature is cited under ASHTORETH [p. v.]. For recent discussion see We. *CH* 281 f. note; St. *GLI* 1458 ff.; *ZA* 11₁ 225, 4 202 ff. 283 ff.; G. Hoffmann, *Ägypt. religionsph. Inschriften*, 26 ff.; *Rev. Sem.* 2^e 187 ff. On the other side, Schr. *ZA* 3₃₆₄. Reference may be made also to Baethgen, *Beitr.* 218 ff.; and to Collins, *PSBA* 11₂₀₁ ff., who endeavours to show that the *asherah* was a phallic emblem sacred to Baal. G. F. M.

ASHES (אֲשֵׁרָה, of uncertain derivation) is used in various figures of speech typifying humiliation, frailty, nothingness, etc.; *e.g.*, to sit in, or be covered with, ashes (Job 28, cp Ez. 27₃₀ Lam. 3₁₆), to eat ashes (Ps. 102₉), to follow after ashes (Is. 44₃₀, *Ch. ad loc.*, cp Hos. 12₁). To throw ashes on the head (2 S. 13₁₉ Is. 61₃), or to wear ashes and sackcloth (Dan. 9₃ Esth. 4₁ Jonah 3₆, cp Mt. 11₂₁ Lk. 10₁₃), was a common way of showing one's grief; see MOURNING CUSTOMS, § 1. The combination 'dust and ashes' (אֲשֵׁרָה וְעָפָר; cp also DUST) is found in Gen. 18₂₇ Job 42₆ (cp Ecclus. 10₉)—note the striking assonance אֲשֵׁרָה וְעָפָר Is. 61₃, 'instead of ashes a coronal'; cp Ewald's 'Schmuck statt

¹ Schr. *ZA* 3₃₆₄, and many. The name is once written with the common ideogram for the goddess Ištar (Br. Mus. 33 obv. 1, 3).

Schmutz' 'Proverbs of ashes' (Job 13:12) is a symbolism of empty trifling sayings.¹

To denote the 'ashes' of sacrificial victims the above word is found only in Nu. 19:9 f., where the ashes of the burnt heifer are represented as endowed with the power of rendering clean or unclean the person who came into contact with them (cp Heb. 9:13). The usual term is אֶשֶׁתֶּן *dešen*, prop. 'fatness,' which comes to be used of the ashes of the victims mixed with fat. From Lev. 1:16 (P) it would seem that these were placed on the east side of the altar, and afterwards removed to a place 'outside the camp' (ib. 4:14, cp 6:14; [L. P]).²

It is noteworthy that אֶשֶׁתֶּן occurs only twice outside P: viz. Jos. 31:40 and 1 K. 18:35 (the latter in a passage which is a late addition to the book; see KINGS, § 5, n. 1). אֶשֶׁתֶּן אֶשֶׁתֶּן 'ashes (RV mg. 'soot'); cp Ges.-Ba. of the furnace, Ex. 27:10 (אֶשֶׁתֶּן אֶשֶׁתֶּן is quite obsolete; see FURNACE, אֶשֶׁתֶּן, אֶשֶׁתֶּן usual rendering of אֶשֶׁתֶּן (cp also in NT, ib. above); is found again in 2 Mac. 13:5, in connection with the tower full of ashes at Betea (2) wherein Menelaus met his death. Τέφρα (of which the verb τείφω, 'to turn to ashes,' is used in 2 Pet. 2: of Sodom and Gomorrah) is found only in Tob. 6:16 & 2, 'ashes of perfume' (or 'incense,' RV) and Wisd. 2:3, 'our body shall be turned to ashes.'

ASHHUR (אֶשְׁחֻר) RV; AV ASHUR אֶשְׁחֻר, § 81, originally 'man of Horus' [on this class of names see also ELLIARD] in 1 Ch. 2:36, אֶשְׁחֻר [B], אֶשְׁחֻר [A], אֶשְׁחֻר [L]; in 4 Ch. 2:36 [B], אֶשְׁחֻר [A], אֶשְׁחֻר [L]. אֶשְׁחֻר, אֶשְׁחֻר, mentioned apart from the more important branches of Hezron—Jerahmeel, Ram, and 1 Meneptah (Caleb) as a posthumous child (1 Ch. 2:24 & 3), father of Tekoa (see JUDAH).

ASHIMA אֶשִׁימָה אֶשִׁימָה [B], אֶשִׁימָה [A], a Hamathite deity (2 K. 17:30^f). On the true form of the name (cp C) and its meaning, see HAMATH.

ASHKELON אֶשְׁקֶלֶן, deriv. unknown, אֶשְׁקֶלֶן [B], אֶשְׁקֶלֶן [A];³ ethnic אֶשְׁקֶלֶן, [-E]תִּירוֹת, Ashkelonite, Josh. 13:3 RV, AV ESHKALONITE; mod. 'Ashkalān [with initial ʔ], one of the five cities of the Philistines, the only one (it is generally held)⁴ just on the sea coast (cp Jer. 47:7), lies 12 m. N. from Gaza. The site is a rocky amphitheatre, with traces of an old dock, filled with Herodian and Crusading ruins. It has no natural strength; its military value seems to be due to its command of the sea, though the harbour was small and difficult of access.

Under the Egyptian rule Ashkelon was a fortress; letters from its governor Jitia appear in the Amarna correspondence (Am. Tab. 211 f.), and Abd-hiba of Jerusalem complains that the territories of Ashkaluna and Gazri have joined in the alliance against him (ib. 180, 14). Ashkelon seems to have revolted from Rameses II. (WMM, *As. u. Eur.* 222; cp EGYPT, § 58), and from Menepthah (see EGYPT, § 60, n.); but it was reconquered by them.⁵ The storming of the city

¹ In 1 K. 20:38 & 41 it is almost certain that with RV we should point אֶשֶׁתֶּן instead of אֶשֶׁתֶּן (AV ashes) and render 'head-band'; see THOMAS.

² Hence the denominative אֶשֶׁתֶּן, 'to clear away the fat-ashes' Ng. 402 Ex. 27:3; see ARAV, § 13.

³ Ashkalon and Ekron are confused in C more than once; e.g., 1 S. 31.

⁴ (With regard to the site of Ashkelon proper, it is possible to hold that, like other Philistine cities, it lay a little inland; Antoninus Martyr (ch. 33, ed. Gildemeister, 23), indeed, in the sixth century A.D., expressly distinguishes it from the sea-side town, and in 576 A.D. a synodical letter was signed, both by the Bishop of Ascalon and by the Bishop of Maiumas Ascalon. According to Clement Ganneau (see *Rev. archéol.* 27:368), the inland town was on the site represented by the modern villages, *Hammam* and *el-Mejdel* (see *Courcier, Jud.* 2:109; Cl. Ganneau, *Arch. Res. in Pal.* 2:190). In a Greek translation of a lost Syriac text (published by Raabe) Ascalon appears to be described as bearing the name of *πάλαμα-ιτε*, *πάλαμα* (dove) in allusion to the sacred doves of Astarte, and as being about 2 m. from the sea. The Ar. name *Hammam* means 'dove.' There are, however, two other theories respecting *el-Mejdel*, one of which possesses much plausibility (see MIGNAL-GAU).

⁵ Ascalon (Askalni) is one of the places in Palestine which Meneptah, on the Israel-stele, claims to have captured.

is represented on a wall of the Ramesseum at Thebes; the inhabitants are depicted in the sculptures with Hittite features.

Ashkelon is not enumerated among the towns of Judah in Josh. 15, and apparently in Judg. 1:18 also we ought, with C, to read a negative; cp Josh. 13:3. It was Philistine in the days of Samson (Judg. 14:19), Samuel (1 S. 6:17), David (2 S. 1:20), Amos (Am. 1:8), Zephaniah (2:47), and Jeremiah (Jer. 25:47-71, and in the *Chronicle age* (Zech. 9:5)). It was taken by Sennacherib (Schröder, *KAT* 1:165 f., *Iskaluna*), who deposited its king Sidka in favour of Surludari, son of Rukibiti, 701 B.C. In the time of Ashurbanipal it had a king Miinti.

The fish-goddess, Derketo (see ATARGATIS), had a temple to the east of the city on a tank, of which, between *el-Mejdel* and *Ashkalān*, some traces still remain. After the conquest of Alexander the Great, Ashkelon became, like the other Philistine cities, thoroughly Hellenic; but, more prudent than they, it twice opened its gates to Jonathan the Maccabee (1 Mac. 10:86 11:60), and again to Alexander Jannæus. It was the birth-place of Herod the Great, who gave it various buildings (Jos. *H. J.* 2:111) and was afterwards the residence of his sister Salome (Jos. *H. J.* 6:3). It is said to have been 'burnt to the ground' by the Jews in their revolt against Rome (Jos. *H. J.* ii. 181), but then to have repulsed the enemy twice (ib. iii. 212). In Roman times it was a centre of Hellenic scholarship; and under the Arabs, who called it the 'Bride' and the 'Summit of Syria,' was a frequent object of struggle. It was taken by the Christians in 1154; retaken by Saladin in 1187; dismantled and then rebuilt by Richard in 1192 (cp Vinsauf, *Itin. Ricard.* 54 ff.); and finally demolished in 1270. There are considerable ruins, which have been described by Guérin (*Jud.* 2:153-171), and, best and most recently, by Guthe (*ZDFV* 2:164 ff., with plan; cp *PEF. Mem.* 3:237-247). The neighbourhood is well watered and exceedingly fertile, the *Ascalonia capra*, scallion (shallot) or onion of Ascalon, being among its characteristic products. See, further, PHILISTINES, and, for Rabbinical references, Hildesheimer, *Beitr. zur Gesch. Palästinas*, i. 76. G. A. S.

ASHKENAZ אֶשְׁכְּנַז; אֶשְׁכְּנַז [B], אֶשְׁכְּנַז [A]; CENEZ). The people of Ashkenaz are mentioned in Gen. 10:3 and (אֶשְׁכְּנַז) 3:10, 1 Ch. 1:9, in connection with Gomer; in Jer. 51:27 (אֶשְׁכְּנַזֶּעֶס אֶשְׁכְּנַזֶּעֶס אֶשְׁכְּנַזֶּעֶס [B], אֶשְׁכְּנַז, אֶשְׁכְּנַז [Q]) after Minni. There is no occasion to connect their name with the proper name Askanios in Hom. II. 2:862 13:793, nor with the Ascanian tribes in Phrygia and Bithynia, and infer that the original home of Ashkenaz was in Phrygia (Lenormant, E. Meyer, Di.). Rather Ashkenaz must have been one of the migratory peoples which in the time of Esar-haddon burst upon the northern provinces of Asia Minor, and upon Armenia. One branch of this great migration appears to have reached Lake Urumiyeh; for in the revolt which Esar-haddon chastised (1 R. 45, col. 2, 27 ff.), the Mannai, who lived to the SW. of that lake, sought the help of Ispakai 'of the land of Ašguza,' a name (originally perhaps Ašgunza) which the scepticism of Dillmann need not hinder us from identifying with Ashkenaz, and from considering as that of a horde from the north, of Indo-Germanic origin, which settled on the south of Lake Urumiyeh. (See Schr. *COT* 2:293; Wi. *GBA* 269; *AM* 6:488-491; similarly FRIEDR. Del., Sayce, Knudtzon.) T. K. C.

ASHENAH (אֶשְׁנָה, אֶשְׁנָה [AL]), the name of two unidentified sites in the lowland of Judah; one apparently in the more north-easterly portion (Josh. 15:33 אֶשְׁנָה [B]), the other much farther south (15:43, אֶשְׁנָה [B], אֶשְׁנָה [A], -CANN- [L]).

ASH-PAN (אֶשְׁפָּן), 1 K. 7:50 AV¹⁹⁰⁷; see CENSER, 2.

ASHPENAZ אֶשְׁפְּנַז, אֶשְׁפְּנַז [C], [Tω] אֶשְׁפְּנַז [Theod. BA], chief of the eunuchs under Nebuchad-

rezzar [Dan. 13]. The current explanations are untenable,¹ and the cause is obvious. The name is corrupt, and has been brought into a delusive resemblance to Ashkenaz. An earlier form of the name, equally corrupt, and brought into an equally delusive resemblance to an ancient Hebrew name, is Abiezir (אביעזר; see ABIEZER, 1); this is the form adopted by S. What is the original name concealed in these two apparently dissimilar forms? S enables us to discover it by its reading, evidently more nearly accurate than that of MT in Dan. 11: *καὶ ἄρα τὸν Δαριῶν Ἀβιεζερὶ τῷ ἀνάδελφῷ αὐτοῦ ἀγαπήσας αὐτὸν Δαριῶν*. . . . The MT indeed, in vs. 11:16, represents Daniel as communicating with a third person called Melzar, or 'the Melzar'; but a comparison of vs. 37-10:18 shows that this representation must be incorrect. It was the 'prince of the eunuchs' that Daniel must have addressed in vs. 11; a slight transposition and a change of one point are indispensable (see MELZAR). We have now, therefore, four forms to compare; (a) אביעזר, (b) אשפז, (c) המלצר, and (d) שפיצר² (Pesh. in vs. 11). Of these, (c), (e), and (d), virtually agree as to the last two letters (if in a we neglect the final *z*, which is not recognised in Syro-Hex. or by Ephrem). These letters are *z*. Next, (a), (b), (c), and (d) agree as to the presence of a labial; and the first two are for a mute, the others for a liquid. Also (b) and (c) attest a *z* or *z*, and (a) and (d) a *z*, which might be a fragment of a *z*, while (b) and (d) present us with a *z*, and the *z* in (a) looks like a fragment. Next, (a), (b), and (c) attest an *h* or *h*, and lastly, (a), (c), and (d) agree as to *z*. The almost inevitable conclusion is that the name of the chief eunuch was בלשצר, commonly pronounced Belshazzar. This is not the only occasion on which the name Balshazer (= Belshazzar) has suffered in transmission (see BILSHAN, SAREZER). T. K. C.

ASHRIEL (אֲשִׁרְיֵל), 1 Ch. 7:14, AV, RV ASRIEL.

ASHTAROTH (עֲשִׁתְרֹת)—i.e., Ashtoreth in her different representations;—ΑΣΤΑΡΩΘ [BAL], -ΤΑΓΩ. [1] [Josh. 9:11]. ΑΣΘΑΡΩΜ [A] [Josh. 13:31]; the adjective is Ashterathite, 'עֲשִׁתְרָתִי, Ο ΑΣΤΑΡΩΘ[Ε] [BA], ΘΕCΤ. [A], ΕCΘΑΡΩΘ[Ε] [1], 1 Ch. 11:44. Ashteroth-Karnaim (רְנַיִם עֲשִׁתְרֹת; ΑΣΤΑΡΩΘ ΚΑΡΝΑΙΜ [A], -ΤΕΡ ΚΑΙΝ. [1])—i.e., 'Ashteroth of the two horns'—'Ashteroth of (=near) Karnaim'?) in Gen. 14:5,³ and Be-esh-terah (בֵּית עֲשִׁתְרָה, i.e., 'house of

1. References. Astarte'; ΒΟCΡΑΝ[B], -ΠΡΑ [L], ΒΕΓ-ΘΑΡΑ [A]) in Josh. 21:27, but עֲשִׁתְרֹת simply in Dt. 14 Josh. 9:10 12:4 13:12,31, where it appears, along with Edrei, as a chief city of Og, king of Bashan; and in 1 Ch. 6:56 [71] ΑCΘΡΩΘ [B] ΡΑΜΩΘ [A]) as a Levitical city. Then, in Am. 6:13 (Grätz's restored reading) we have Karnaim as the name of a city E. of the Jordan taken by Israel, and in 1 and 2 Macc. Karnaim or Karnion as a city in Gilead with a temple of ATARGATIS [g.v.] attached to it. The lists of THOMES III. (circa 1650 B.C.) contain an 'A-s-ti-ra-ty (R² 205:545; WMM, *As. u. Eur.* 162, 313; cp Ashtarti, Bezold and Budge, *Tell el-Amarna Tabl.* in *Brit. Mus.* 43, 64). Whether these names represent one place or two places is, on the biblical data, uncertain.

It is significant, however, that Eusebius and Jerome

¹ For example, Halevy compares Pers. *astari*, 'hospitium' [*JAs.*, 188, 228: f); Nestle too explains 'hospes' from the Armenian (*Marg.*, 38). Frd. Del. and Schr. offer no explanation.

² If we adopt the form אשפז, a slight difference in the summation will be the result.

³ Here it is described as the abode of the Rephaim at the time of the invasion of Chedorlaomer. Or were there two neighbouring cities? Kuennen, Buhl, and Siegrf.-St. read 'Ashtaroth and Karnaim,' claiming Θ as on their side. Probably, however, the right Θ reading is ΑΣΤΑΡΩΘ ΚΑΡΝΑΙΜ [AL] (see Nestle, *Marg.*). Moore explains 'the Astarte of the two-peaked mountain'; see especially G. F. Moore, *JBL* 156 ff. (197), and cp col. 336, n. 3.

(OS²) 2096:1 845 268:8² 108:17) record the existence in

2. The OS Astaroth-Karnaim, 'which lay 9 R. m. apart, between Adara (Edrei) and Abila' of the Decapolis; one of them, 'the city of Og,' (say) 6 R. m. from Edrei, the other 'a very large town of Arabia [in which] they show the house of Job'; and in the *Peregrinatio* of S. Silva of Aquitaine (4th cent.) Carnes is mentioned as the place where she saw Job's house. Now, at the present day there is a *Tell 'Ashtarath* on the Bashan plateau, on the W. of Haurān, 21 m. E. of the Lake of Galilee (long. 36° E., lat. 32° 50' N.), 1900 ft. above the sea; and 2 m. N. lies El-Merkez, where the tombs of Job and his wife are shown, and there was the ancient Christian monastery of Job, while 1 m. farther N., at Sheikh Sa'd, is a basalt monolith, with Egyptian figures, known as Job's stone (see Erman, *ZDPV* 15 205-211). In this neighbourhood, then, must have lain one of the Ashtaroths of the OS. It does not suit the datum of the latter—'between Adara and Abila'; but this may be one of the not infrequent inaccuracies of the OS. From this Ashtaroth Eusebius places the other 9 R. m. distant. Now, 6 R. m. S., near the W. el-Ehrēr (the upper Yarmūk), lies Tell el-Ash'ari, which some (like van Kasteren) take as the second Ashtaroth.³ This, Buhl (*Geog.* 249) prefers to find 8 R. m. S. of Tell 'Ashtarath in Muzerib, the great station on the *Haj* road, with a lake and an island with ruins of pre-Mohammedan fortifications. A market has been here since the Middle Ages, and the place must have been important in ancient times. Moreover, it suits another datum of the OS, in lying about 6 R. m. from Edrei.

Much more difficult is the question of identifying any of these sites, or the two Ashtaroths of the OS, with the corresponding names of OT.

3. OT sites. Names in this part of Palestine have always been in a state of drift. That Tell 'Ashtarath is the 'Ashteroth Karnaim of Gen. 14:5 or the 'Ashteroth of other texts has in its favour, besides its name, the existence of a sanctuary, even though this has been transferred in Christian times to Job. On the other hand, Muzerib must have been of too great importance not to be set down to some great place-name of the OT; and its accessibility from Edrei suits the association, frequent in the OT, of the latter with Ashtoreth. As to the Karnaim of 1 Macc. 5:26 (which, of course, is the same as the Karnaim of Am. 6:13), it cannot have been Muzerib, as Buhl contends, for in such a case the lake would certainly have been mentioned in connection with the assault of Judas upon it (a lake is mentioned near Caspis or CASPHON [g.v.] which Judas took previously); and in 2 Macc. 12:21 Karnion is said to be difficult to get at *διὰ τὴν πύκνωσιν τῶν τόπων στυβήθηα*. This does not suit Muzerib, or Tell 'Ashtarath, or Sheikh Sa'd. Furrer, therefore, has suggested for Karnion *K'ron* or *G'ron*, the Agrena of the Romans, in the inaccessible *Lefj*. Till the various sites have been dug into and the ancient name of Muzerib is recovered, however, we must be content to know that there was an 'Ashteroth Karnaim near *Tell 'Ashtarath*, and that possibly there was a second site of the same name in the same region in OT times.

On the whole subject see especially *ZDPV* xiii. xiv. and xv., Schumacher, *Across the Jordan* (203-210), and Buhl, *Stud. zur Topogr. des N. Ostjordanlandes*, 1:1 ff., *Pal.* 248-250; also Moore, *JBL* 16:155 ff., and, for an etymological explanation of the name 'Ashtoreth of the two horns,' WMM, *As. u. Eur.* 313.

G. A. S.

ASHTORETH (עֲשִׁתְרֹת), a goddess of the Canaanites

¹ *Sub Aor. Kapnaev.*

² *Sub Kapnaevu.*

³ So Schumacher. 'The double peak of the southern summit of *Tell el-Ash'ari*, formed by the depression running from N. to S., would make the appellation of Karnaim, or "double-horned," extremely appropriate' (*Across Jordan*, 208). In a Talmudic discussion as to the constructions for the Feast of Booths it is said that Ashteroth Karnaim was situated between two mountains which gave much shade (*Succa*, 2a; cp Neub. *Géog.* 246). Many regard this statement as purely imaginative.

and Phœnicians. The Massoretic vowel-pointing, which

is followed by EV, gives the word the vowels of *bīsheth*, 'scandalous thing' (cp Molech for Melek); the true pronunciation, as we know from the Gr. Ἀσθάρη also even Ἐσθάρη, alongside of Ἀσθάρη [BAL] and from Augustine,¹ was 'Ashtart.' In the OT the name in the plural (the 'Ashtārōth) is coupled with the Baals, in the general sense, 'the heathen gods and goddesses,'² a usage with which the Assyrian *ilīni u-īštarāti* is compared. Solomon is said to have built on the Mt. of Olives (1 K. 11.5, cp 33) for the Phœnician 'Ashtart a high place, which was destroyed more than three centuries later by Josiah (2 K. 23.13).

Of the character of this goddess and her religion we learn nothing directly from the OT. Her name does

not occur either in the prophets or in historical texts in any other connections than those cited above; it is nowhere intimated that the licentious characteristics of the worship at the high places were derived from the cultus of Astarte. The weeping for Tammuz (Ez. 8.14), which Cyril of Alexandria and Jerome identify with the Phœnician mourning for Adonis (so Ἐσθάρη), was more probably a direct importation of the Babylonian cult.³ This is doubtless true also of the worship of the 'Queen of Heaven' (Jer. 7.18 [Ἐσθάρη ἡ στρατιὰ τοῦ οὐρανοῦ], 44.17 ἴ.), whatever the name may mean (see QUEEN OF HEAVEN). The law which forbids women to wear men's garments, or men women's (Dt. 22.5), may be aimed at obscene rites such as obtained in the worship of many deities in Syria and Asia Minor, but need not refer specifically to the cult of Astarte.

Many inscriptions from the mother-country and its colonies, as well as the testimony of Greek and Latin

writers, prove the prominent place which the worship of Astarte had among the Phœnicians; Egyptian documents place the 'Ashtart of the Hittite country' by the side of the 'Sutech of Heta,' the principal male divinity; the Philistines deposited Saul's armour as a trophy in the temple of 'Ashtart (1 S. 31.10 Ἐσθάρη το ἀστροπ[ε]ϊον), perhaps the famous temple at Ashkelon of which Herodotus writes (1.105);⁴ the stele of Mesha, king of Moab (9th cent. B.C.), tells how he devoted his prisoners to Ashtar-Chemosh; a city in Bashan often mentioned in the OT bears the name Ashtaroth (cp also Ashteroth Karnaim, Gen. 14.5, and Beeshterah, Josh. 21.27; see ASHTAROTH). 'Ashtart was worshipped in Babylonia and Assyria under the name Ištar (considerable fragments of her myth have been preserved); in Southern Arabia as 'Athtar (masc.); in Abyssinia as 'Astar';⁵ in Syria as 'Atar or 'Athar (in proper names: cp ATARGATIS [q.v.] = Dercêto). The Arabs are the only Semitic people among whom we do not find this deity; and even here it is possible that al-Lât and al-'Uzza were originally only titles of Astarte. The normal phonetic changes in the word show that the worship of Astarte did not spread from one of these peoples to the others, but was common to them before their separation. The fem. ending is peculiar to the Palestinian branch of the race, and, as has been observed, in Southern Arabia 'Athtar was a god, not a goddess.

Unlike Baal, Astarte is a proper name; but under this name many diverse divinities were worshipped. The Ištar of Arbela was recognised by the Assyrians themselves as a goddess different from the Ištar of

Nineveh; the Ištar of Agadê from the Ištar of Urku (see ASSYRIA, § 9, BABYLONIA, § 26). The inscription of Eshmunazar shows that more than one 'Ashtart had a temple in Sidon; and we know many others. Whether those differences are only the consequence of natural divergence in the worship of the primitive Semitic deity, in the immense tract of time and space, or, as is altogether more probable, in great part due to the identification of originally unconnected local *numina* with Astarte, the result is the same:¹ there were many Astartes who were distinguished from one another by character, attributes, and cultus—a class of goddesses rather than a single goddess of the name.²

Astarte was often the tutelary divinity of a city, its 'prophetress' (*bā'alat*); and then, of course, its protectress and champion, a warlike goddess.

On the other hand, she was a goddess of fertility and reproduction, as appears strikingly in the myth of the descent of Ištar. These two characters might be attributed to different Astartes, as among the Assyrians (cp the Aphroditis); but they might also coexist in one and the same goddess, and this is doubtless the older conception.

The figures from Babylonia and Susiana, as well as from Phœnicia and Cyprus, which are believed to represent Astartes, express by rude exaggeration of sexuality the attributes of the goddess of generation.³ That the cultus-images of Astarte were of similar types is not probable. At Paphos she was worshipped in a conical stone, and many representations show the evolution from this of a partially iconic idol.

In the astro-theology of the Babylonians the planet Venus was the star of Ištar. It is a common but ill-founded opinion that in Palestine Astarte was a moon goddess. The name of the city, Ashteroth Karnaim, is often alleged in support of this theory. Even if the translation, 'the horned Astarte,' be right, however, it is a very doubtful assumption that the horns represented the crescent moon—it is quite as natural to think of the horns of a cow or a sheep, or of an image of the goddess made after an Egyptian type (see EGYPT, § 13);⁴—and it is a still more unwarranted assumption that Astarte was elsewhere in Palestine represented in the same way. It would be a much more logical inference that the horns were the distinctive attribute of this particular Astarte.⁵ The other testimony to the lunar character of Astarte is neither of an age nor of a nature to justify much confidence (*De dea Syr.* 4; Herodian, v. 64). The point to be insisted on is that the widely accepted theory that Astarte was primarily a moon goddess, by the side of the sun god, Baal, has as little foundation in the one case as in the other.

In Dt. 7.13 'the *ashtārōth* of the flocks' are parallel to the 'offspring of the herds,' from which it has been ingeniously argued that among the nomadic Semites Astarte was a sheep-goddess (WRS, *Rel. Sem.* 12.310, and 469 ἴ.); but this also seems hazardous.

Of the cultus of Astarte we know comparatively little. Religious prostitution (Hdt. 1.199; Strabo xvi. 120;

Ep. Jerem. 4.2 ἴ.; Bar. 1.4 ἴ.); *1 K. 16.31*;

5. Cultus. 6, etc.) was not confined to the temples of Astarte, nor to the worship of female divinities. Nu. 25.1-5 connects it with Baal-peor; Am. 27 Dt. 23.18 (17), etc., show that in Israel similar practices infected even the worship of Yahwê. There is no doubt, however, that the cultus of Astarte was saturated with these abominations.

¹ In the period from which most of our monumental evidence comes, still another cause must be recognised: syncretism with the Egyptian religions (see EGYPT, § 16).

² This use predominates in Hebrew, which has, indeed, no other word for 'goddess'; but, as has been remarked above, it is found in Assyrian also.

³ Heuzey, *Nouv. découvertes assyriennes*, 1889, p. 1 ἴ.; Olauson-Richter, *Kypros*, etc. On the origin of this type see, however, S. Reinhardt, *Rel. Archæol.* v. 287, 288, 289, p. 300 ἴ.

⁴ Cp the representation of Baah of Byblos, *J. A. S.* 11, Pl. 1.

⁵ On Ashteroth Karnaim see *J. A. S.* 16, 17, 18 ἴ.

¹ *Quæst.* 16 in *Int.*. Estart, Astart. Confirmatory evidence is given by the Egyptian transcription.

² *Judg.* 2.1; 10.1 ἴ. S. 7 ἴ. (Ἐσθάρη) § 12.10 (Ἐσθάρη τοῖς Ἀσσορίοις); all belonging to the later el-histric (B₂) or dendro-nomic school.

³ The identification of Tammuz with Adonis is found also in Melito (Curetton, *Spicil.* 25). The connection of the myths is unquestioned. See TAMMUZ.

⁴ It is, of course, not to be inferred that the Philistines worshipped Astarte before they invaded Palestine. The temple was an old Canaanite sanctuary.

⁵ Halévy's discovery is confirmed by the recent publication of the Axum inscriptions.

The origin and the meaning of the name are obscure ; but this is hardly a sufficient reason for supposing that the most universally worshipped of Semitic divinities was of non-Semitic extraction (see Haupt, *ZDMG* 34 758). The relation between Astarte and Aphrodite is an interesting and important question, upon which we cannot touch here.

ASHUR (אֲשׁוּר), 1 Ch. 24 AV, RV ASHUR.

ASHURITES, THE (אֲשׁוּרִי, ΤΟΝ ΘΑΔΑΙΡΟΙ [B], ΘΑΔΑΙΡ [A], אַשּׁוּרִי [L]; 'Jezreel follows'), are mentioned in 2 Sam. 23 among various clans subject to the authority of Ishbaid. *Pesh. Vig.* read אַשּׁוּרִי, the Gesurites, which is accepted by some (see GESUR), while others (Kamph. Ki. Klo. Gr.) follow the Targ. (אֲשׁוּרִי אֲשׁוּרִי, cp. 66) and read אַשּׁוּרִי (cp. Judg. 13a)—i.e., 'the Asherites,' whose land lay to the W. of Jordan above Jezreel, which is mentioned next, the enumeration proceeding from N. to S.

ASHVATH (אֲשׁוּבָת; אֲשׁוּבָת [BA], 'צוּבָא [L]), in a genealogy of ASHER (1 Ch. 24 § 4 ii), 1 Ch. 7 33f.

ASIA (ἡ Ἀσία [Ti. WH]). Great uncertainty prevailed during the apostolic period as to the usage of the names of the districts of Asia Minor. The boundaries of several of the districts had long been uncertain—those between Mysia and Phrygia were proverbially so (Strabo, 564). This confusion arose from the fact that the names denoted ethnological rather than political divisions, and belonged to diverse epochs. They are like geological strata, which are clear enough when seen in section but impossible to disentangle when represented on a single plane. A further complication arose when the Romans imposed upon the country the provincial system. The official nomenclature was applied without any account being taken of the older history or of ethnical facts or popular usage. In the case of Lycia, Bithynia, or Pamphylia there was no distinction of any moment between the old and the new usage; but in the case of Galatia and Asia the difficulty of distinguishing the precise sense of the names is very great.

The province of Asia was formed in 133-130 B.C. when Attalus III. of Pergamum left his kingdom by will to Rome; the name Asia had early come into use because there was no other single term to denote the Aegean coast lands. The area of the province was subsequently increased, first by the addition of Phrygia (116 B.C.); we are, therefore, confronted by the difficulty of distinguishing whether, in any given case, the word Asia is restricted to the coast or extended to the entire province—in other words, whether it includes Phrygia or not.

In Acts 20, Asia indicates the towns of the highly civilized coast land, for the enumeration is popular and Greek in style, as is proved by the mention of Phrygia *as by the* Asia: according to the Roman mode of speaking, Phrygia was included in Asia, with the exception of that small part round Antioch (Phrygia Galatica) which fell to the province Galatia. Such names as Phrygia, Mysia, or Lydia were to a Roman without any political significance, being merely geographical terms denoting parts of the province of Asia, used on occasion to specify exactly the region referred to by the speaker (Cic. *pro Flac.* xviii. § 65; 'Asia vestra constat ex Phrygia, Mysia, C. Asia, Lydia'). Such use can be paralleled from the NT. In Acts 167 *κατὰ τὴν Μυσίαν* [Ti. WH] is used to define rigidly the part reached by the apostles when warned from Bithynia. In Acts 60, a decision is more difficult. The Jews who 'disputed' with Stephen were probably those educated in the schools of Smyrna or Pergamum; but we cannot on a *strict* ground decide that some of them did not belong to Phrygia. Here, therefore, Asia may or may not be used in its Roman sense. So also in Acts 21 27=24 18.

The whole question of the sense in which geographical terms are used by the writer of Acts centres round Acts 166, where the apostles are forbidden to preach in Asia (καλοῦντες . . . λαλῆσαι τὸν λόγον ἐν τῇ Ἀσίᾳ [Ti. WH]). Those interpreters (e.g., Con. and Hows. 1324) who take the preceding words (διήλθον δὲ τὴν Φρυγίαν καὶ Γαλατικὴν χώραν [Ti. WH]) to express the opening up of new ground by missionary enterprise N. of Antioch in Pisidia are compelled to restrict the prohibition of preaching in Asia to the coast land—in other words, to take Phrygia, Galatia, and Asia in their popular non-Roman sense—for all Phrygia N. of Antioch belonged to Asia in its Roman or administrative sense. Yet we must ask if the simple διήλθον (AV 'gone throughout') can be taken to imply preaching.¹ If, however, the apostles did not preach in their passage through the district called here ἡ Φρυγία καὶ Γαλατικὴ χώρα, there appears to be no necessity for giving a popular meaning to the geographical terms here used, unless in the interests of what Ramsay calls the N. Galatian theory (see GALATIA, §§ 7-30, especially §§ 9-16). On this view, then, the words indicate such parts of Galatic Phrygia as had not been traversed at the time of receiving the prohibition (or, more probably, that part of Phrygia which belonged to the province Asia), together with Old or North Galatia. In favour of this is the fact that the part καλοῦντες must be prior in time to, i.e. contain the ground of, the action denoted by διήλθον,—'they traversed . . . because they had been forbidden.' If, in face of the difficulties of the N. Galatian view, we fall back upon the S. Galatian theory, the district ἡ Φρυγία καὶ Γαλατικὴ χώρα must be regarded as partly identical with that called τὴν Γαλατικὴν χώραν καὶ Φρυγίαν in Acts 18 23 (which can hardly be other than that of the S. Galatian churches); and also it must already have been traversed wholly or in part before the prohibition to preach in Asia (Rams. *Expos.* May 1895, p. 392; *Church*, 5 ed. p. 75). Ramsay consequently attempts to interpret the words διήλθον καλοῦντες as—διήλθον καὶ ἐκάλυψαν (διεκέλευσαν ἐκάλυψαν), or on purely subjective grounds adopts, with Lightfoot, the reading διεκέλευσαν δὲ from inferior MSS (*St. Paul* (1), p. 195). It seems better to take διήλθον δὲ as resumptive and as summing up the previous verses, with an ellipse—'so then they traversed . . . (neglecting Asia) having been forbidden': in which case, here, as elsewhere throughout the narrative of Paul's journeyings, the word Asia is used in its technical, Roman, sense.

This sense is clearly the best in the following passages:—during Paul's residence in Ephesus, 'all they which dwell in Asia heard the word of the Lord Jesus' (Acts 19 10; see also *sv.* 22, 26 f.). The deputies escort the apostle from Corinth as far as Asia (Acts 20 4); other instances in the same chap. are *sv.* 16 (Ephesus was virtually capital of the province) and 18. In 21 2, *κατὰ τὴν Ἀσίαν τόπους* [Ti. WH], there is nothing to forbid our taking the word in its Roman sense. Similarly, in the Epistles, the technical sense is required—e.g., Rom. 16 5, Ephesus the first-fruits of Asia (RV); 1 Cor. 16 19, the churches of Asia; 2 Cor. 18, (probably) alluding to the riot at Ephesus, or to dangerous illness there; 2 Tim. 1 15. The Roman province is meant also in 1 Pet. 1 1, where the enumeration Pontus, Galatia, Cappadocia, Asia, Bithynia (= Bithynia-Pontus) sums up all Asia Minor within the Taurus. Finally, in Rev. 14, the seven churches of Asia are those established in the chief towns of the Roman province. In 1 Macc. 8 6, 'Antiochus, the great king of Asia,' the word is used in a wider sense=Asia Minor, with Syria (so also 11 13, 'the diadem of Asia'; 12 39 18 32 2 Macc. 8 3; cp. *Jos. Ant.* xii. 3 3 18 4 7). In 2 Esd. 15 46, 'Asia, that art partaker in the beauty of Babylon,' the sense is still wider=Persian empire (16 1; cp. Herod. 1 66 177; *Jos. Ant.* xi. 8 3). W. J. W.

ASIARCH (οἱ Ἀσιαρχαί [Ti. WH], AV 'the chief of Asia'; RV 'chief officers of Asia'). An officer

¹ See Acts 15 41, διήγρητο, but with ἐπιστηρίων added; 16 4, διεσπορεύον, but with παρέδιδον added. On the other hand we have 13 14, διεσπορεύοντες ἀπὸ τῆς Περσῆς—no preaching on the way; and 17 1, διεσπορεύοντες τῆς Ἀσίας, ἅμα καὶ τῆν Ἀπολλωνίαν [Ti. WH], where also there was no attempt at evangelisation, so far as we can tell. (But see Rams. *Expos.* May 1895, p. 385 f.)

heard or only once in the NT—viz., in the account of the riot made by 'Demetrius and the craftsmen' at Ephesus (Acts 19:31). The annual assembly of civic deputies (*κοινὸν Ἀσίας*), over which he presided, was combined, in Asia, as in other provinces, with an annual festival in honour of the reigning emperor and the imperial system.

Soon after the victory of Actium, in fact as early as 29 B.C., Augustus had allowed temples to himself and Roma to be dedicated in Pergamum, the *de jure* capital of Asia, as well as in Nicomedia and Ancyra, the capitals respectively of Bithynia and Galatia (Tac. *Ann.* iv, 37-41). This blending of a religious with an administrative institution became a leading idea of the imperial policy; but, as regards the pomp of the festivals and the civic rivalries excited, the institution nowhere developed as it did in Asia. Naturally, the conduct of the games and festival in honour of the emperor fell to the president of the provincial Diet.

As the Asiarch bore most of the expense, though some was borne by voluntary subscription or apportioned to the several towns, this politico-religious office was open only to the wealthy—the prosperity of Tralles, for example, was shown by its continuous series of Asiarchs—and the title was retained after the expiration of the year of office. To find Paul counting friends among the Asiarchs—i.e., among those who then held or who previously had held the office—throws, therefore, a valuable side-light upon the attitude adopted towards Christianity by the upper classes of the provincials: it was an Asiarch, Philip, who at Smyrna resisted the cry of the mob to 'let loose a lion on Polycarp' (Eus. *H. E.* 4:15, § 27).

It would be a mistake, then, to imagine that the Asiarch, as such, had any connection with the Ephesian worship of *Artemis*.

In fact Ephesus, like Miletus, was expressly rejected by Tiberius as a claimant for the honour of an imperial temple, probably because of the risk of Caesar's worship being overshadowed by the local cult (Tac. *Ann.* iv, 55-6). It would naturally have been the right to put forward a candidate for the Asiarchate. We hear of similar offices in other provinces—e.g., a *ῥατοστάτης* in Bithynia, a *ῥυτάρχης*, and a *ἑπαρχός*. The last of these titles is clearly originally a political office—the head of the *langue* (Strabo, 602).

There was thus, at first, but one Asiarch in office at a time in all Asia—the president of the Diet at Ephesus; but as temples dedicated to Caesar multiplied in the province,² and each of them became the centre of an annual festival, the chief priests at such temples performed the functions discharged at the festival at Ephesus by the Asiarch, and finally the presidency of the festival even at Ephesus was taken from the chairman of the Diet and given to the chief priest. The Diet and its civil functions thus fell into the background, and the name Asiarch came to mean the priestly provider of a popular festival in connection with the worship of a dead or reigning emperor. With the growing importance of this worship the religious influence of the priestly Asiarchs extended; and as the worship of the emperor became the outward sign of loyalty to the empire, it was through the provincial chief-priesthoods that the old and the new faith came into contact. Hence Julian writes to the Galatarch as the proper medium for his anti-Christian propaganda. (See Momms. *Provinces*, I 344 fol. ET, Rams. *Class. Rev.* 3:174. A different view in a long article by Brandis in Pauly's *R. Enc.* new ed. s.v.) W. J. W.

ASIBIAS (Ἀσιβίας [B], Ἀσιβίας [A], Μελίτιος [L]), in the list of those with foreign wives (see EZRA, i, § 5, end), 1 Esd. 9:26 = Ezra 10:25 (Ἀσβία [N], Ἀ. [A], B. om.). See MALCHIJAH, 5. Asibias is probably a Greecised form of HASHABIAH.

ASIEL (Ἀσιήλ, § 31; Ἀσιήλ [BAL]). 1. A name in the genealogy of SIMEON (1 Ch. 4:35).

¹ καὶ αἱ ἄλλοι τρεῖς ἐξ αὐτῆς εἰσὶν οἱ ἀποστόλοις κατὰ τὴν ἐπαρχίαν, οὓς Ἀσπαρχος καλοῦσιν (Strabo, 649).

² Already in 26 A.D., for example, a temple was erected in Smyrna to Tiberius, jointly with his mother Livia, and the Senate (Tac. *Ann.* iv, 154-63).

2. A scribe, 4 Esd. 14:24 (Ἀσβία).

3. Tob. 1: RV, AV ASAEI (g.v.).

ASIPHA (Ἀσιφθα [A]), 1 Esd. 5:29 = Ezra 2:43. HASUPHA.

ASKELON (Ἀσκλων), Judg. 1:18 AV, RV ASHKELON.

ASMODEUS, RV *Asmodeus* (Ἀσμοδαίου, [B] Ἀσμοδ[NA], -ἄεος [N]), called 'the evil demon' (Tob. 3:8, 17). Considering (1) the close connection of the story of Tobit with Media, (2) the affinity of the seven archangels in Tob. 12:15 to the seven Mazdean Ameshaspentas, and (3) the impossibility of deriving Asmodeus or Asmodai (or the later Hebrew forms, on which see below) from אשפה, 'to destroy,' we are obliged to look for an arch-demon of similar name and attributes in Mazdean demonology. The Asmodeus of Tobit has two attributes: he is lustful (like a satyr), and has the power to slay those who oppose his will (Tob. 3:8 f. 15 [B]). Now, it is true that there is no demon in Mazdeism of similar name who has exactly those characteristics; but one of the seven arch-demons who are opposed to the seven Mazdean archangels is called *Ashma*, and is the impersonation of anger (the primary meaning) and rapine. So constantly is he mentioned in the Avesta beside Angra Mainyu or Ahriman (with his weapon 'the wounding spear') that we could not wonder if he became naturalised in the spirit-world of the Jews in the Persian period. Once adopted, he would naturally assume a somewhat different form; his attributes would be modified by the sovereign will of the popular imagination. This was actually the course of history, as modern critics hold. By the time the Book of Tobit was written *Ashma* had already a well-defined *rité*, and, though vindictive as ever, had exchanged the field of battle for less noble haunts. The Asmodai of Tobit is, in fact, the counterpart of LILITH (g.v.), and in still later times divided with her the dominion of the *shēdim* or demons. Asmodai, or, as his name is written in Targ. and Talmud, אשמואי, אשמואי, was as dangerous to women as Lilith was to men, though we also find him represented in a less odious character as a potent, wise, and sometimes even ocular elf (see *Gittin*, 68a, in Wünsche's *1 er bab. Talm.* 2:180-183). The second part of the name *Asmodai* is of uncertain origin. Most connect it with the Zend *dāeva*, 'demon'; but, though the combination *Ashmo dāeva* is not impossible, it is nowhere found in the texts. Kohut's explanations (*Jüd. Angelologie und Aruch*, s.v.) are precarious.

Cp *Zendavesta and Pahlavi Texts in SBE*; Spiegel, *Eröbn. Alterthumskunde*, 2:131 f.; Grünbaum, *ZDMG* 31:204, etc.; Kohut's *Jüd. Angelologie*, 72, etc. T. K. C.

ASNAB (אשנב, 'thornbush'; אשנב [BA]; -ננא [L]; *asena*). The B ne *Asnah*, a family of NETHINIM in the great post-exilic list (see EZRA, ii, § 9), Ezra 2:50 = 1 Esd. 5:41, ASANA (אשנא [B], אשנא [A]) = Neh. 7:52 B (EV, following BNA, om.).

ASNAPPER, RV OSNAPPAR, better *Asenappar* (אשנפאר; אשנפאר [A], אשנפאר [B], אשנפאר [C], אשנפאר [L], *ASENAPHAR*), Ezra 4:9 f. To 'the great and noble *Asenappar*' is ascribed the transplanting of several nations into Samaria from beyond the Euphrates. The two epithets naturally suggest that an Assyrian king is referred to, and, as Bosanquet in G. Smith's *Hist. of Assyrian Empire*, 364 [71], suggested, the king can only be the conqueror of Susa—*Asur-bāni-pal* (אשורבניפל) = אשורבניפל.¹ This view is confirmed by the discovery (due to Marq. *Fund.* 59) of a various reading of אשנפאר which underlies the impossible ASBACAPHATH (g.v.) of 1 Esd. 5:69, viz. אשנפאר. The two readings supplement each other, and are explained by a common original אשנפאר, which is clearly *Asur-bāni-pal*. This great king's name which have stood both in Ezra 4:2

¹ An explanation, in the form which Gelzer gave to it (*AZ* 75 f. [75]), now widely accepted. Cp, however, Halévy, *RE* ix, 12.

('Esarhaddon' being an ignorant scribe's alteration) and in the source from which the statement in Ezra 4:2 is derived (perhaps 2 K. 17:24, which at present merely refers to 'the king of Assyria'). See further, ASUR-BAN-PAL.

ASOM (אסוֹם [BA]), 1 Esd. 9:33 = Ezra 10:33, HANSEM.

ASP (אֶסֶף, *pothion*; אֶסֶפֶת [BAL.]) in Dt. 32:33 Job 29:14-16 (ΔΡΑΚΟΝ [BNAC]) Is. 11:8 AV, in Ps. 58:4 91:13 AV¹⁹⁶ = ΒΑΚΙΛΙΚΟΝ [BNAR] E, and in Rom. 3:13; probably some species of viper (cp ADDER, 2), see SERPENT, § 4, D. 5.

ASPALATHUS (ΑΣΠΑΛΑΘΟΣ [BNA]); *calisamum* is associated with cinnamon and other perfumes in the Praise of Wisdom (Eccl. 2:15). Theophrastus (*Hist.* 9:7) mentions it along with various spices, etc., used in making unguents, and in Pliny (*H.N.* 22:24) it is '*radix unguentis expetite*'. Fraas, the most recent writer on classical botany (*Synopsis Plantarum Florae Classicae*, 49), refers it conjecturally to *Genista acanthoclada*, D.C., a native of Greece and the Grecian archipelago; but the most that can safely be said is that it seems to have been a prickly shrub, probably leguminous, with a scented wood or root. The ante-Linnaean commentaries devoted much attention to it, but with no more definite result. It has evidently been lost sight of since classical times, and supplanted by other perfumes. W. T. T.-D.

ASPATHA (אֶסְפָּתָה, פֶּאֶסְפָּתָה [BNA]); פִּיֶּאֶסְפָּתָה [N¹]. φά. [V]. φάσα [L]. one of the ten sons of HAMAN (cp. 1 Esd. 9:7). Pott and Benfey explain the name as the Pers. *aspadata*, 'ab equo sacro datus' (cp Be.-Rys.); but the MT reading is too insufficiently supported.

ASPHAR, THE POOL (ΑΔΚΚΟ¹ ΑΣΦΑΡ [NV]; Jos. 1:11 ΑΣΦΑΛ [A]; *lacus Asphar* [Vg.]), in the wilderness of Tekoa, is mentioned in connection with the struggle of Jonathan and Simon the Maccabees with Bacchides (1 Macc. 9:33; cp Jos. *Ant.* xiii. 1:2). The Be'er Asphar is probably the modern *Bir-Selhub*, a considerable reservoir in the wilderness, 6 m. WSW. of Engedi, and near the junction of several ancient roads (described by Rob. *BR* 2:202); the hills around still bear the name *Šufrā*, an equivalent of Asphar. A less probable identification is that with the ruins and cistern, *es-Za'ferāneh* to the S. of Tekoa (Buhl, *Pal.* 158). G. A. S.

ASPHARASUS (ΑΣΦΑΡΑΣΟΣ [BA]), 1 Esd. 5:8 = Ezra 2:2, ΜΙΖΡΑΡ.

ASRIEL (אַסְרִיֶּלֶךְ, § 67, אֶסְרִיֶּל [BAL]; the patronymic is **Asrielite**, אֶסְרִיֶּלֶךְ, -[A] [BAF]. סַר. [L]), a Gileadite family, descended from Manasseh through Machir, Josh. 17:2 (יעֶזְרֵיחַ [B], עִרִי. [A], Nu. 26:31 (סַרְיִי. [L]). In 1 Ch. 7:14-19 (אֶסְרֵיֶּחַ [B], AV ASHRIEL; see MANASSEH), a very different Manassite genealogy, the name is probably dittography of the syllables immediately following (אֶסְרִיֶּלֶךְ; cp also text of 6¹); read, 'The sons of Manasseh whom his concubine the Aramitess bore' (cp Gen. 46:20 6). The name may be old, though it comes to us from later writers.

ASS (אֶסֶס, § 2 fem. אֶסֶס; ² אֶסֶס [BAL]; *asinus*, *asinus*). **Wild Ass** (אֶסֶס) or אֶסֶס (Chald. אֶסֶס; ⁴ *onos asyrius*; *anager*), and **Young Ass** (אֶסֶס, *παιος* [BAL]).

The following are the passages: (a) for 'ass' Gen. 12:16 22:3 49:14 (אֶסֶס *to esāss*). Ex. 13:23 Nu. 22:28 11. 22 to Judg. 5:10 (אֶסֶס *to esāss*) [A.L.] 15:15 = K. 6:25 Is. 21:7 Zech. 9:9 (אֶסֶס *to esāss*) Mt. 21:2 1 K. 13:15 etc.; (b) for 'wild ass' Job 6:5 11:12 (אֶסֶס *to esāss*) 24:5 (אֶסֶס *to esāss*) 29:5 Ps. 104:11 (אֶסֶס *to esāss*). Is. 32:14 Jer.

¹ The usual rendering of אֶסֶס or אֶסֶס in 6.
² Root אֶסֶס, 'to be red.' On the form cp Lag. *Uebers.* 11, Barth. *AV* 150.
³ The Ar. verb '*atana*' = 'contracto brevique gressu incessit'; but this may be denominative. אֶסֶס has of course no connection with *asinus*. See Lag. *Uebers.* 57, 817.
⁴ Lag. derives אֶסֶס from '*arada*', 'he threw a stone far,' referring to the effect of the animal's trampling hoofs (*Uebers.* 38 f.). אֶסֶס seems to be connected with the notion of swift flight.

2:4 (אֶסֶס *to esāss*) 14:6 Dan. 5:21 (אֶסֶס *to esāss*) Hos. 8:9 (אֶסֶס *to esāss*) Gen. 16:12 RV (אֶסֶס *to esāss*); there was perhaps originally a reference to the wild ass also in 1 S. 24:14 [15] 26:20, where MT now reads אֶסֶס = FLEA [Vg.]. (c) For 'young ass' Is. 30:6 (אֶסֶס *to esāss*), 24 (אֶסֶס *to esāss*), EV 'foal', EV 'foal', EV 'colt', Zech. 9:9, and (אֶסֶס *to esāss*) Job 11:2, EV 'ass-colt', Judg. 10:4 12:14.

A comparison of the passages in which אֶסֶס and אֶסֶס respectively occur shows that the former was more used for carrying burdens and for agriculture, the latter for riding. Hence some have thought that אֶסֶס denotes a superior breed and not simply 'she-ass'; but this opinion is now given up. We must conclude that she-asses were preferred for riding. As the name אֶסֶס shows, the Eastern ass is generally reddish in colour; ¹ white asses are rarer, and, therefore, used by the rich and distinguished. This explains the reference in Judg. 5:10.²

The אֶסֶס (young ass, colt, foal; in Ar. specifically wild ass; see Hommel, *Säugethiere*, 127 ff.) was used variously for carrying burdens (Is. 30:6), for agriculture (1. 24), and for riding on (Zech. 9:9). On Judg. 10:4 12:14, see JAIR. On the place of the ass and on its employment among the Jews see generally Jos. c. *Ap.* 27.

The ass has been from the most ancient times a domesticated animal, and probably, in Egypt at any rate, preceded the horse as a servant of man. It is even questioned whether the wild stock from which it was derived survives at the present day, some authorities holding that the flocks of wild asses met with in various parts of Asia and Africa are but the descendants of those which have escaped from the domesticated state.

The domestic ass, *Equus asinus*, is believed to be descended from the wild ass of Africa, *E. asinus*, of which there are two varieties, *Africanus* and *Somalicus*; and the strong disinclination to ford even narrow streams which these animals show, and their delight in rolling in the dust, are regarded as indications that their origin is from some desert-dwelling animal. In former times this species seems to have extended into Arabia.

In the East the ass plays a large part in the life of the people, and has received a corresponding amount of care at their hands. Much trouble is taken in breeding and rearing the young. Darwin distinguishes four different breeds in Syria: 'first, a light and graceful animal (with an agreeable gait), used by ladies; secondly, an Arab breed reserved exclusively for the saddle; thirdly, a stouter animal used for ploughing and various purposes; and lastly, the large Damascus breed, with . . . peculiarly long body and ears.'

The wild asses which roam in small herds over a considerable part of Asia are sometimes regarded as belonging to one species, the *Equus hemionus*; sometimes to three, the *E. hemippus* found in Syria, the *E. onager*, the Onager of Persia, Beluchistan, and parts of Northern India, and the *E. hemionus* of the high table-lands of Tibet. Sven Hedin describes the last-named as resembling a mule. Living at such high altitudes it has unusually large nostrils. These are artificially produced by the Persians, who slit the nostrils of their tame asses when about to use them for transport purposes in mountainous districts. The Syrian species or sub-species rarely enters the N. of Palestine at the present time. Wild asses congregate in herds, each with a leader, and are said to migrate towards the south at the approach of winter. They are so fleet that only the swiftest horses can keep pace with them, a fact recorded both by Xenophon and by Layard; and they are so suspicious that it is difficult to approach within rifle-shot of them. They are eaten by the Arabs and the Persians. N. M.—A. E. S.

ASSABIAS (ΑΣΑΒΙΑΣ [L]), RV SABMAS, 1 Esd. 19:2 = 2 Ch. 35:9, HASHABIAH, 6.

ASSALIMOTH (ΑΣΣΑΛΙΜΩΘ [really -AC CAA. A]), 1 Esd. 8:36 AV = Ezra 8:10, SHELOMITH, 4.

ASSANIAS, RV **Assamias** (ΑΣΣΑΜΙΑΣ [B]), 1 Esd. 8:54 = Ezra 8:24, HASHABIAH, 7.

ASSAPHIOTH (ΑΣΣΑΦΕΙΩΘ [B]), 1 Esd. 5:33 RV = Ezra 2:55, HASSOPHERETH.

¹ Cp Plutarch's statement that the Egyptians excrete the ass *διὰ τὸ μακρὸν γενομένην τὸν Τυβιάνα, καὶ ἀνοῖξεν τὴν χροῖαν* (quoted by Bochart).
² אֶסֶס *צִירִית*, not strictly *white*, but white spotted with red, as the same word means in Arabic, where it is specially applied to the she-ass.

of אַשּׁוּר ("Ashur") was misunderstood by the authors of the vowel-points. The reference intended was, according to Hommel, to Ashur in S. Palestine; he proposes to read Ashur, not Asshur, also in Nu. 24.22 24. The latter view, at any rate, is very improbable (see BALAAM, § 6). Cp also GESHUR, 2.

ASSIDEANS, RV 'Hasidreans,' RV^{mg}, 'that is חַסִּידִים' (Ἀσιδαῖοι [ANV]), is a transcription of the Hebrew *hasidim*, *pious ones* (AV, generally, *saints*). It is often used of faithful Israelites in the Psalms (17 times in plur., 5 times in sing.), and sometimes unquestionably of the so-called Assideans (e.g. 116:15 149:59). In 1 Macc. the name appears as the designation of a society of men zealous for the law (1 Macc. 2:42—according to the correct text as given by Fritzsche), and closely connected with the scribes (1 Macc. 7:12 f.). It is plain from these passages that this society of 'pious ones,' who held fast to the law under the guidance of the scribes in opposition to the 'godless' Hellenising party, was properly a religious, not a political, organisation. For a time they joined the revolt against the Seleucids. The direct identification of the Assideans with the Maccabees party in 2 Macc. 14:6, however, is one of the many false statements of that book, and directly contradictory to the trustworthy narrative of 1 Macc. 7, which shows that they were strictly a religious party, who scrupled to oppose the legitimate high priest, even when he was on the Greek side, and withdrew from the war of freedom as soon as the attempt to interfere with the exercise of the Jewish religion was given up. We are not to suppose that the Assidean society first arose in the time of the Maccabees. The need of protesting against heathen culture was doubtless felt earlier in the Greek period. The 'former *hasidim*,' as a Jewish tradition (*Nedarim*, 10 a) assures us, were ascetic legalists. Under the Asmonean rule the Assideans developed into the better known party of the Pharisees, and assumed new relations to the ruling dynasty. It appears, from the *Psalter of Solomon*, which represents the views of the Pharisees, that the party continued to affect the title of 'pious ones' (ἁγίοι), but less frequently than that of 'righteous ones' (δικαιοί). Indeed, the third Jewish party of the Asmonean period had already appropriated the former name, if we may adopt Schürer's derivation of ESENE (q.v.). See We. Ph. u. Sadd. ('74), p. 76 ff., whose results WRS adopted, and cp Schür. *Hist. ET* 1:212; Che. *OPs*, 56 (on the use of 'Assideans'), and other passages (index under *khasidim*). W. R. S.—T. K. C.

ASSIR (אַסִּיר, 'prisoner'; but perhaps rather אֲסִיר = Osiris; 1 cp HUR).

1. (In Ex. אַסִּיר [PF], אַסִּיר [AL]; in 1 Ch. אַסִּיר, אַסִּיר, אַסִּיר [B], אַסִּיר [A], אַסִּיר אַסִּיר [L]; *al-ḥi*). The *eposon* of one of the families or divisions of the Korahite guild of Levites; Ex. 6:24 [P]. Cp 1 Ch. 6:22 f. 37 [2 f. 20], and for the interpretation of these discrepant genealogies see KORAH.

2. Son of Jeconiah (1 Ch. 3:17; אַסִּיר [BAL]). So AV, following a Jewish view that Assir and Shealtiel are the names of two different sons of Jehoiachin (*Syntheson*, 37 a; Midrash *Pesikta*, par. x; Midr. *Sifre hasidim*, no. 89; so Kimchi); but the best texts (B⁹, G⁹insb) make 'Jeconiah-Assir' the name of one man. Kau. *HS* and *SBOT* rightly restore the article before Assir (the preceding word ends in *n*). Render, therefore, 'Jeconiah the captive' (so RV). Cp SHEALTIEL.

ASSOS, or ASSUS (Ἀσσός [Ti. WH]), Acts 20:13,¹ a town and seaport in the Roman province of Asia; now *Bekram Kalesi*. Strabo, who ranks Assus and Adramyteum together as 'cities of note,' pithily describes the former as lying in a lofty situation, with splendid fortifications, and communicating with its harbours by means of a long flight of steps (610, 614). So strong was the position that it gave rise to a pun by the musician Stratonicus, who applied to it the line

ἄσσον ἴθ' ὡς κεν θάσσον δαίμονον περὶαὶ ἔθνη.
'Come again, that anon thou mayest enter the toils of death' (Hom. *Il.* vi. 143). The joke lay in reading "ἄσσον ἴθ' = 'Come to Assus.' The town was always singularly Greek in character. Leake observes that its ruins give 'perhaps the most perfect idea of a Greek city that anywhere exists.' The material is granite, which partly accounts for their immunity from spoliation. One of the most interesting parts is the Via Sacra, or Street of Tombs, extending to a great distance to the NW. from the gate of the city. It is bordered by granite collins, some of them of great size. In Roman times, owing to its supposed power of accelerating the decay of corpses (Pl. *HN* 2:98 30:27), the stone of Assus received the name *sarcophagus*. Paul must have entered the city by the Street of Tombs on his last journey to Jerusalem (Acts 20:13 14). The apostle had landed at Troas and walked or rode the 20 m. thence to Assus in time to join his companions, who had meanwhile sailed round Cape Lectum.

A good account of Assos is given in Fellows, *Asia Minor*, 52; Murray's *Handbook of A. M.* 64; for its inscriptions see *Report of the American Expedition*, 157. W. J. W.

Aššur, the name of the country known to us as Assyria, was written in Hebrew אַשּׁוּר, EV ASSHUR, or more fully אַשּׁוּר יָרְדֵן, in the LXX

1. **Names.** Ἀσσυρία and Ἀσσυρία (sometimes Ἀσσυρ) by Josephus and the Greek historians Ἀσσυρία, in the Greek of the Alexandrian epoch Ἀσσυρία, and in Aramaic *Athūr*, *Athūriyā*, in which form the name survived as that of a diocese of the Nestorian Church.

Other forms occurring once in \mathfrak{S} are:—*assur* in E and in A; *assurur* in D, in A, and in I, respectively; *asur* in E; *assurur*

in A¹; *assurur* in B²; *assur* in Bab. \mathfrak{S} 28 f. a, c, d (and twice in A); *sur* in R³.

By the Assyrians themselves the name of their country was written phonetically אֲשׁוּר אֲשׁוּר אֲשׁוּר, or (combining the two) אֲשׁוּר אֲשׁוּר, the signs אֲשׁ and אֲשׁוּ being determinatives respectively for 'land' and 'place.' Subsequently, the two signs that formed the word, אֲ (= aš) and אֲשׁ (= šur), were run together and the name was written אֲשׁוּ אֲשׁוּ אֲשׁוּ,

1 In 20:13 Vg. translates ἀπὸ τῆς ἀσσοῦ (Ti. WH) by *cim sustuliventi de Asson*, taking the word (incorrectly) as the name of the city.

¹ Nestle, *Eiernamen*, 111; Che. *Proph. Is.* (B) 2:144 300, and on Is. 10:1 in *SBOT*; see also NAMES, § 82.
² For literature see BABYLONIA, § 19 f.

𐎶 → 𐎶, and finally the writing of the name was abbreviated to the single horizontal stroke that forms its first syllable, 𐎶 → 𐎶, 𐎶 → 𐎶. The name was also written 𐎶 → 𐎶, 𐎶 → 𐎶, 𐎶 → 𐎶.

𐎶 → 𐎶 or 𐎶 → 𐎶 → 𐎶 (𐎶 = i.e., 'land of the god Ašur'.¹ In fact, it is probable that the city of Ašur, from which the land of Aššur was named, received its title from the national god. Other instances are known in which a god has given his name to the country or city that worshipped him. The land of Guti that lay to the E. of Assyria beyond the Lower Zāb appears to have taken its name from Guti its national god, whilst the god Sušinak gave his name to the city of Sušinak or Susa, the principal town on the banks of the Euleus. The general term among the Greeks for all subjects of the Assyrian empire was Ἀσσυριοί, which was more usually shortened to Σύριοι or Σύροι.² The abbreviated form of the word was, however, gradually confined to the western Aramaic nations, being at last adopted by the Arameans themselves. These people, on becoming Christians, dropped their old name in consequence of the heathen associations it had acquired in their translation of the NT, and styled themselves Συριαῖοι, whence the modern term 'Syria.' The unabbreviated name was used to designate the district on the banks of the Tigris, and this form of the word, passing from the Greeks to the Romans, finally reached the nations of northern Europe.

References to Assyria or the Assyrians in the OT are very numerous, though they are in the main confined to the historical and the prophetic books; the former describing the relations of Assyria with the later kings of Israel and Judah, the latter commenting on these relations and offering advice. The prophets, in their denunciations and predictions, sometimes refer to the Assyrians by name; at other times, though not actually naming them, they describe them in terms which their hearers could not possibly mistake.

The principal references may be classified under the following three headings: (a) Geographical use of the name Assyria; to describe the course of the Tigris in the account of the garden of Eden (Gen. 2, 14), and to indicate the region inhabited by the sons of Ishmael (25, 18). (b) References to historical events: the foundation of the Assyrian empire (Gen. 10, 11), and its classification among the nations (10, 10); Menahem's tribute to K. Jer. 2, 35; the captivity of northern Israel (Is. 7, 18, 20; 2 K. 17, 34; 2 Ch. 32, 29); the assistance of Assyria to Tiglath-pileser, followed by the capture and captivity of Damascus (2 K. 17, 31; 2 Ch. 28, 23); Hezekiah's submission to Sennacherib (2 K. 18, 17; 2 Ch. 32, 23); the siege and capture of Samaria (2 K. 18, 9-12), and the colonisation of the country by foreigners (17, 24 ff.); Sennacherib's invasion of Palestine and Hezekiah's payment of tribute, his refusal to submit to further demands, the escape of Jerusalem from the Assyrian vengeance, and Sennacherib's death (Is. 37, 36-38; 2 K. 19, 35-37; 2 Ch. 32, 23); the trade of Assyria with Tyre (Ezek. 27, 23); general references to past captivity or oppression by Assyria (Is. 52, 4; Jer. 50, 17; Lam. 5, 6; Ezek. 23, 5 ff., 25); reference to the punishment that overtook Assyria (Jer. 50, 18); reference to the colonisation of Palestine by Esarhaddon (Ezra 4, 2). (c) Prophetic criticism and forecasts: evil or captivity threatened or foretold to coming from Assyria (Nu. 24, 10; Hos. 9, 11; Is. 7, 17 ff., 10, 5, 23, 24; Ezek. 25, 2, 22, 24; Ps. 83, 9); the fulfilment of prophecy on Assyrian heathenism (Is. 5, 27, 28; Hos. 10, 15; Jer. 2, 18, 30); the participation of Israel in Assyrian idolatry (Ezek. 16, 28, 28, 5 ff.); prophecies of the return from captivity in Assyria (Hos. 11, 11; Mic. 7, 12; Is. 11, 11, 16; Zech. 10, 10); predictions of overthrow or misfortune for Assyria (Nu. 24, 24; Mic. 5, 5 ff.; Is. 10, 24 ff., 14, 25, 30, 31, 31, 8; Ezek. 31, 3 ff.; the prophecy of Nahum;

Zeph. 2, 13; Zech. 10, 11); references to Assyria as taking part in the final invasion and reconquest of mankind (Ezra 1, 19, 25; Is. 45, 13). In some of these passages, however, Assyria may = SYRIA (q. v.).

It is difficult to define exactly the boundaries of Assyria. The extent of the country varied from time to time according to the additional territory acquired in conquest by its monarchs, and the name itself has at times suffered from a somewhat vague and general application. The classical writers employed it in a conventional sense for the whole area watered by the Tigris and the Euphrates, including northern Babylonia, whilst its use has even been extended so as to cover the entire tract of country from the coast of the Mediterranean to the mountains of Kurdistan. In a definition of the extent of Assyria proper, however, any vague use of the name may be ignored, for, although at one time the Assyrian empire embraced the greater part of western Asia, the provinces she included in her rule were merely foreign states not attached to herself by any organic connection, but retained by force of arms.

In general terms, therefore, the land of Assyria may be said to have been situated in the upper portion of the Mesopotamian valley about the middle course of the river Tigris, and here we may trace certain natural limits which may be regarded as the proper boundaries of the country. The mountain chains of Armenia and Kurdistan form natural barriers on the N. and E. On the S. the boundary that divided Assyria from Babylonia was in a constant state of fluctuation; but the point at which the character of the country changes from the flat alluvial soil of the Babylonian plain into the slightly higher and more undulating tracts to the N. gives a sufficiently well-defined line of demarcation. On the W., Assyria in its earliest period did not extend beyond the territory watered by the Tigris; but, finding no check to its advance in that direction, it gradually absorbed the whole of Mesopotamia as far S. as Babylon, until it found a frontier in the waters of the Euphrates.

The chief feature of the country is the river TIGRIS (q. v.), which, rising in the mountains of Armenia, runs southward and divides Assyria into an E. and a W. district. That part of Assyria which is situated on the E. or left bank of the Tigris, though the smaller, has always been much the more important. The country on that side of the river consists of a continuous plain broken up by low detached ranges of limestone hills into a series of shallow valleys through which small streams run. All the main tributaries, too, that feed the Tigris rise in the Kurdish mountains, and flow through the E. division of the country. The E. Khābūr, the Great or Upper Zāb, the Little or Lower Zāb, the Adhem, and the Diyālā join the Tigris on its left or E. bank. Being therefore so amply supplied with water, this portion of the country is very fertile, and well suited by nature for the rise of important cities. On the other hand, W. Assyria, which lies between the Tigris and the Euphrates, is a much drier and more barren region. The fall of the two rivers between the point where they issue from the spurs of the Taurus and the point where they enter the Babylonian alluvium—a distance of six hundred or seven hundred miles—amounts to about one thousand feet, the Tigris having the shorter course, and being, therefore, more rapid. The country between the rivers consists of a plain, sloping gently from the NW. to the SE. In its upper part this region is somewhat rugged; it is intersected by many streams, which unite to form the Belikh and W. Khābūr. The rivers flowing S. join the Euphrates, and the district through which they pass is watered sufficiently for purposes of cultivation. In the SW., however, the supply of water is scanty, and the country tends to become a desert, its slightly undulating surface being broken only by the Sinjār range, a single row of limestone hills. The district

¹ Throughout the present article the form Ašur is employed for the name of the god and city, Aššur for that of the land. In the inscriptions the name of the land is written with the doubled sibilant, an original Assyrian form that is not inconsistent with the later Greek and Aramaic renderings of the name (see Nöldke, *ZA* 1, 268 ff.). The name of the god, however, is written in the inscriptions both with the single and double sibilant, of which the former may be regarded as the more correct on the basis of the Greek and Hebrew transliteration of certain proper names, in which the name Ašur occurs (see Jensen, *ZA* 1, 1 ff. and Schrader, *ib.* 205 ff.).

² On this see SYRIA.

S. of these hills is waterless for the greater part of the year; the few streams and springs are for the most part brackish, while in some places the country consists of salt deserts, and in others vegetation is rendered impossible by the nitrous character of the soil. It is true that on the edges of this waterless region there are gullies (from one to two miles wide) which present a more fertile appearance. These have been hollowed out by the streams in the rainy season, and, being submerged when the river rises, have in the course of time been filled with alluvial soil. At the present day they are the only spots between the hill-country in the north and the Babylonian plain in the south where permanent cultivation is possible. It has been urged that this portion of the country may have changed its character since the time of the Assyrian empire, and it is possible that in certain districts extensive irrigation may have considerably increased its productiveness; but at best this portion of Assyria is fitted rather for the hunter than for the tiller of the soil. The land to the left of the Tigris is, therefore, much better suited for sustaining a large population, and it is in

5. Cities.

This district that the mounds marking the sites of the ancient cities are to be found. Ašur, the earliest city of Assyria, is indeed situated to the west of the Tigris, near the spot where Kal'at Sherik it now stands; but its site is within a short distance of the river, and it was the only city of importance on that side of the stream. Apart from its earliest capital, the chief cities of Assyria were Nineveh, Calah, and Dūr-Sargina. Nineveh, whose foundation must date from a period not much more recent than that of Ašur, was considerably to the N. of that city, opposite the modern town of Mosul (*Mawasil*), on the E. bank of the Tigris, at the point where the small stream of the Khosr empties its waters; its site is marked by the mounds of Kuyunjik and Nebi Yünüs (cp NINEVEH). Calah, founded by Shalmaneser I., corresponds to the modern Nimrūd, occupying a position to the S. of Nineveh on the tongue of land formed by the junction of the Upper Zāb with the Tigris (cp CALAH). Dūr-Sargina, 'the wall of Sargon,' was founded by that monarch, who removed his court thither; the site of the city is marked by the modern village of Khorsābād, to the NE. of Nineveh (cp SARGON). It will be seen that there was a tendency throughout Assyrian history to move the centre of the kingdom northwards, following the course of the Tigris. Other cities of importance were Arba'il or Irba'il (Arbēla) on the E. of the Upper Zāb; Ingur-Bēl (corresponding to the modern Tell-Balawāt), situated to the SE. of Nineveh; and Tarbis, its site now marked by the village of Sherif-Khān, lying to the NW. of Nineveh.

From the above brief description of the country, it may be inferred that Assyria presents considerable differences of climate. E. Assyria was

the most favoured region, possessing a good rainfall during winter and even in the spring, and having, in virtue of its proximity to the Kurdish mountains and its abundant supply of water, a climate cooler and moister than was generally enjoyed to the W. of the Tigris. In this latter region the somewhat rigorous climate of the mountainous district in the N. presents a strong contrast to the arid character of the waterless steppes in the centre and the S. The frequent descriptions of the extreme fertility of Assyria in the classical writers may, therefore, be regarded as in part referring to the rich alluvial plains of Babylonia. Not that Assyria was by any means a barren land. She supplemented her rainfall by extensive artificial irrigation, and thus secured for her fields in the hot season a continual supply of water. Her cereal crops were good. Olives were not uncommon, and the citrons of Assyria were famous in antiquity. Fruit trees were extensively cultivated, and, although the dates of Assyria

were much inferior to those of Babylonia, orange, lemon, pomegranate, apricot, mulberry, vine, and fig were grown successfully. The tamarisk was an exceedingly common shrub; oleanders and myrtles grew in the eastern district; but, except along the rivers and on the mountain slopes, trees were scanty. The trees, however, included the silver poplar, the dwarf oak, the plane, the sycamore, and the walnut. Vegetables such as beans, peas, cucumbers, onions, and lentils were grown throughout the country. Though Assyria could not compete with Babylonia in fertility, her supply of stone and minerals far exceeded that of the southern country. Dig where you will in the alluvial soil of the south, you come upon no strata of rock or stone to reward your efforts. In Assyria limestone, sandstone, and conglomerate rock were common, whilst gray alabaster of a soft kind, an excellent material for sculpture in relief, abounds on the left bank of the Tigris; hard basaltic rock and various marbles were also accessible in the mountains of Kurdistan. Iron, copper, and lead were to be found in the hill country not far from Nineveh, while lead and copper were obtained from the region of the upper Tigris in the neighbourhood of the modern town of Diārbekr. Sulphur, alum, salt, naphtha, and bitumen were also common; bitumen was extensively employed, in place of mortar or cement, in building (cp BITUMEN). Of the wild animals of Assyria the lion and the wild bull are those most often mentioned in the historical inscriptions as affording big game for the Assyrian kings. Less ambitious sportsmen might content themselves with the wild boar and the deer, the gazelle, the ibex, and the hare; while the wild ass, the bear, the fox, the jackal, the wild cat, and wild sheep were to be found. The most common of the birds were the kite or eagle, the vulture, the bustard, the crane, the stork, the wild goose, wild duck, teal, tern, partridge (red and black), the sand grouse, and the plover. We know from the monuments that fish were common. Of the domestic animals of the Assyrians the principal were camels, horses, mules, asses, oxen, sheep, and goats. Dogs, resembling the mastiff in appearance, were employed for hunting. From the fact that heavy stone weights carved in the form of ducks have been found, it may be assumed that the duck was domesticated.

The Assyrians belonged to the northern family of Semites, and were closely akin to the Phœnicians, the 7. National Aramaeans, and the Hebrews. Their character. robust physical proportions and facial characteristics are well known from the monuments, and tally with what we know of their character from their own inscriptions and the writings of the Hebrew prophets. Is. 33 19 describes the Assyrians as 'a fierce people'—an epithet that fits a nation whose history is one perpetual warfare. The dividing line between courage and ferocity is easily overpassed, and in a military nation, such as the Assyrians were, it was but natural that there should be customs which to a later age seem barbarous. The practice of impaling the defenders of a captured city was almost universal with the Assyrians; the torturing of prisoners was common; and the practice of beheading the slain, whilst adding insult to the vanquished, was adopted as a convenient method of computing the enemy's loss, for it was easier to count heads than to count bodies. The difference in character between the Assyrians and the milder Babylonians was due partly to the absence of that non-Semitic element which gave rise to and continued to influence the more ancient civilisation of the latter (see BABYLONIA, § 5); partly, also, to differences of climate and geographical position. The ferocity and the courage of the Assyrians are to a great extent absent from the Babylonian character. It has been asserted that the Semites never make great soldiers, yet there have been two prominent exceptions to this generalisation—the Assyrians and the Carthaginians. The former indeed not

MAP OF SYRIA, ASSYRIA, AND BABYLONIA

only displayed the energy of conquest, but also combined with it a great power of administration by which they organised the empire they had acquired. It was, however, the custom of the Greek historians, and afterwards of the Romans, to paint the Assyrians as a singularly luxurious and sensual nation. Their monarchs, from the founder of the empire down to the last king who held the throne, were described as given up to pleasure. It is possible that as regards the later empire this tradition contains a substratum of truth, for the growing luxury of Assyria may well have been one of the causes that brought about her fall. For the earlier and the middle period of Assyrian history, however, the statement is proved to be untrue, both by the records of Assyria herself and by the negative evidence of the Hebrew prophets. These contemporaries of Assyria, who hated her with the bitter hatred which the oppressed must always feel for their oppressors, rarely, if ever, denounce her luxury; it was her violence and robbery that impressed her victims. In the language of prophecy the nation is pictured as a lion (Nah. 2.12), and it is not as a centre of vice but as 'the bloody city' that Nahum foretells the destruction of her capital (3.1).

The Assyrians spoke a Semitic language, which they inherited from the Babylonians—a language that was

more closely allied to Hebrew and Aramaic than to Arabic and the other dialects of the S. Semitic group. They wrote a non-Semitic character, one of the varieties of the cuneiform writing (see BABYLONIA, § 5 ff.). Like their language, this system of writing came to them from the Babylonians, who had themselves inherited it from the previous non-Semitic inhabitants of Babylonia.

The Assyrians, although retaining the Babylonian signs, made sundry changes in the formation of them, and in some it is possible to trace a steady development throughout the whole period covered by the Assyrian inscriptions.

The forms of some of the characters in the inscriptions of almost every Assyrian king display slight variations from those employed by his predecessors. Indeed, in some few cases, the forms used at different periods differ more widely from one another than they do from their Babylonian original.

The literature of the Assyrians was borrowed. In a sense they were without a literature, for they were not a literary people. They were a nation of warriors, not of scholars. In this they present the greatest contrast to their kindred in the S. Possessed of abundant practical energy, they were without the meditative temperament which fostered the growth of Babylonian literature; and, although displaying courage in battle and devotion to the chase, they lacked the epic spirit in which to tell the tales of their enterprise. The majority of the historical inscriptions which they have left behind them are not literature: they are merely lists of conquered cities, catalogues of captured spoil, and statistics of the slain.

Though not original, however, the Assyrians were far from being illiterate. They took over, root and branch, the whole literature of Babylonia, in the copying, the collection, and the arrangement of which they displayed the same energy and vigour with which they prosecuted a campaign. It was natural that the priests and scribes, whose duty it was to copy and collate, should attempt compositions of their own; but they merely reproduced the matter and the methods of their predecessors. In a word, the Assyrians made excellent librarians, and it is to their powers of organisation that we owe the greater part of our knowledge of Babylonian literature. Since, therefore, the language, the system of writing, and the literature of the Assyrians were not of their own making, but merely an inheritance into which they entered, the description of them in greater detail falls more naturally under the article BABYLONIA (see § 19 ff.).

The religion of the Assyrians resembles in the main that of the Babylonians, from which it was derived. The early colonists from the south carried with them the

gods of the country which they were leaving; but from the very first they appear to have somewhat modified the system and to have given a distinctly national character to the pantheon they borrowed.

9. Religion. This end they achieved by the introduction of the worship of Ašur, their peculiarly national god, who was for them the symbol of their separate existence. Ašur they set above all the Babylonian deities, even Anu, Bēl, and Ea taking a subordinate position in the hierarchy. It is true that we find Bēl mentioned at times as though he were on an equal footing with Ašur, especially in the double royal title 'Governor of Bēl, Representative of Ašur,' while Assyria is sometimes termed 'the land of Bēl' and Nineveh 'the city of Bēl.' These titles, however, were not inconsistent with Ašur's supremacy. He was 'the king of all the gods,' and any national success was regarded as the result of his initiative. It was Ašur who marked out the kings of Assyria from their birth, and in due time called them to the throne. It was he who invested them with power and gave them victory over their enemies, listened to their prayers, and dictated the policy they should pursue. The Assyrian army were 'the troops of Ašur'; the national foe was 'Ašur's enemy'; and every expedition is stated to have been undertaken only at his direct command. In fact, the life of the nation was consecrated to his service, and its energies were spent in the attempt to vindicate his majesty among the nations that surrounded them. His symbol was the winged circle in which was frequently enclosed a draped male figure wearing a head-dress with three horns and with his hand extended; at other times he is represented as holding a bow or drawing it to its full extent. The symbol may, perhaps, be explained as a visible representation that Ašur's might had no equal, his influence no limit, and his existence no end. This symbol is often to be found on the monuments as the accompaniment of royalty, signifying that the Assyrian king, as Ašur's representative, was under his especial protection; and we find it not only sculptured above the king's image but also graven on his seal and even embroidered on his garment. It is possible that we may trace in this exaltation of the god Ašur the Semitic tendency to monotheism, the complete vindication of which first found expression in the Hebrew prophets. It must not be supposed, however, that the new deity stood in any opposition to the older gods. These retained the respect and worship of the Assyrians, and stood by Ašur's side—not so powerful, it is true, but retaining considerable influence and lending their aid without prejudice to the advancement of the nation's interests.

The spouse of Ašur was Bēlīt—that is, 'the Lady' *par excellence*—and she was identified with the goddess Ištar (see especially 3 R. 24, 80; 53, n. 2, 36 f.), and in particular with Ištar of Nineveh. Another goddess who enjoyed especial veneration in Assyria was Ištar of Arbela, who became particularly prominent under Sennacherib and his successors, and was generally mentioned by the side of her namesake of Nineveh. She was especially the goddess of battle, and from Ašur-bāni-pal we know the conventional form in which she was presented. This monarch, on the eve of an engagement with the Elamites, feeling far from confident of his own success, appealed for encouragement and guidance to Ištar of Arbela. The goddess answered the king's prayer by appearing that night in a vision to a certain seer while he slept. On recounting his dream to the king, the seer described the appearance of the goddess in these words: 'Ištar, who dwells in Arbela, entered. On the left and the right of her hung quivers; in her hand she held a bow; and a sharp sword did she draw for the waging of battle.'

Besides Ašur and Ištar, two other gods were held in particular respect by the Assyrians—Ninib, the god of battle, and Nergal, the god of the chase. Almost all

the Assyrian kings, however, had their own pantheons, to whom they owed especial allegiance. In many cases the names constituting the pantheon occur in the king's inscriptions in a set order that does not often vary.

Such were the principal changes which the Assyrians made in the pantheon of Babylonia, the majority of whose gods they inherited, with their functions and attributes to a great extent unchanged. It is true that our knowledge of Babylonian religion, like that of Babylonian literature, comes to us mainly through Assyrian sources; but though it passed to them, its origin and development are closely interwoven with the history of the older country. The cosmology of the Assyrians and their conception of the universe were entirely Babylonian (see BABYLONIA, § 25); their astrology (*ib.* § 34), their science of omens (§ 32), their system of ritual and their ceremonial observances (§ 29 *f.*) were an inheritance from the temples and worship of the south.

Though in language, writing, and literature Assyria so closely resembles Babylonia, in her architecture she presents a striking contrast. The alluvial plains of the southern country contained no stone, and the Babylonian buildings were, therefore, mainly composed of brick. The resources of Assyria were not so poor; the limestone and the alabaster with which her land abounded stood her in good stead.

The palace was the most important building among the Assyrians, for the principal builders were the kings. It was erected, usually, on an artificial platform of bricks or earth; in which fact we may possibly see a survival of a custom of Babylonia, where such precautions against inundation were necessary. The platform was generally faced with stone, and was at times built in terraces which were connected by steps. The palace itself was composed of halls, galleries, and smaller chambers built round open courts, the walls of the former being ornamented with elaborate sculptures in relief. It is only from their foundations that our knowledge of the Assyrian palaces has been obtained. From these remains a good idea of their extent can be gathered; but there is no means of telling the appearance they presented when complete. Their upper portion has been totally destroyed; it is a matter of conjecture whether they consisted of more than one story. The paving of the open courts was as a rule composed of brick; but sometimes stone slabs, covered with shallow carving in conventional patterns, were employed.

The temple was subordinate to the palace. Our knowledge of its appearance is based mainly on its representation on the monuments, from which it would appear that the Assyrians inherited the Babylonian *zikkurratu* (temple-tower), a building in stages which diminish as they ascend (see BABYLONIA, § 16, *beg.*). Unmistakable remains of a building of this description were uncovered on the N. side of the mound at Nimrud. Another type of building depicted on the monuments has been identified as a shrine or a temple; it was a single-storied structure, with a broad entablature supported by columns or pilasters.

The domestic architecture of the Assyrians has perished. The dwellings of the more wealthy must have resembled the royal residence. On the bas-reliefs are to be found villages which bear a striking resemblance to those of modern Mesopotamia; and, having regard to the eternal nature of things eastern, we may regard it as not unlikely that the humbler subjects of Assyria were housed neither better nor worse than the villagers of to-day.

It was to adorn their palaces and temples that the Assyrians employed the sculptured slabs and bas-reliefs

with which their name is peculiarly associated. The majority of these have come from the palaces of Ašur-nāsir-pal, Sargon, Sennacherib, and Ašur-bāni-pal. The work of the earliest of these kings is distinguished from that of his successors by a certain breadth and grandeur of treatment; but the constant repetition of his own figure, accompanied

by attendants, human or divine, becomes monotonous.

The work of Sargon presents a greater variety of subject and treatment; but it is in the sculptures of Sennacherib and Ašur-bāni-pal that the most varied episodes of Assyrian life and history are portrayed. It was natural that battle-scenes should chiefly occupy the sculptor; yet even here the artist could give his fancy play. Whilst he was bound by convention to depict the vulture devouring the slain, he could carve at the top of his slab a sow with her litter trampling through a reed-bed. Armies in camp or on the march, the siege of cities or battles in the open, the counting of the slain and the treatment of prisoners—all are rendered with absolute fidelity. When an army crosses a river and boats for transport are not to be had, the troops are represented as swimming over with the help of inflated skins¹—a custom that survives on the banks of the Tigris to the present day.

Though the sculptures of Sennacherib and Ašur-bāni-pal have much in common, as regards both their matter and the method of their treatment, each king had his own favourite subject for portrayal on his monuments. Sennacherib liked most to perpetuate his building operations; Ašur-bāni-pal, his own deeds of valour in the chase. Sennacherib erected two palaces at Nineveh—the one at Nebi Yūnus, the other at Kuyunjik—but it is only at Kuyunjik that the palace has been thoroughly explored. On the walls of this latter edifice he caused to be carved a series of scenes in which his buildiers are represented at their work. Stone and timber are being carried down the Tigris upon rafts; gangs of slaves are collecting smaller stones in baskets, and piling them up to form the terrace on which the palace is to stand; others are wheeling hand-carts full of tools and ropes for scaffolding, or transporting on sledges huge blocks of stone for the colossal statues. The hunting-scenes of Ašur-bāni-pal may be regarded as marking the acme of Assyrian art. Background and accessories are for the most part absent. Thus, grotesque efforts at perspective, common to the most of early art, are avoided, with the result that the limitations in the methods of the early artist are not so apparent. The scenes portrayed are always spirited. The figures are all in motion. Whilst the elaboration of detail is not carried to an extreme, action is represented with complete success. This series of hunting-scenes contains pieces of great beauty. It is in striking contrast to the large majority of Assyrian sculptures, which tend to excite interest rather than admiration. Still, even the earlier work has not entirely failed in its purpose—ornamentation. The stiff arrangement of a battlefield has often a decorative effect; and the representation of a river with the curves and scrolls of its water contrasting with the stiff symmetrical line of reeds upon its bank, is always pleasing. Indeed, from a decorative point of view, Assyrian art attained no small success. Traces of colour are still to be found on some of the bas-reliefs, on the hair and beards of figures, on parts of the clothing, on the belts, the sandals, etc.; but the question whether the whole stone-work was originally covered

¹ A singular detail may be noticed with reference to the representation of these skins. The soldier places the skin beneath his belly, and by means of his arms and legs paddles himself across the water. Even with this assistance he would need all his breath before his efforts landed him on the opposite bank; but in the sculptures each soldier is represented as retaining in his mouth one of the legs of the inflated skin, into which he continues to blow as into a bagpipe. The inflation of the skin could be accomplished far more effectually on land before he started, and the last leg of the beast could then be tied up so that the swimmer need not trouble himself further about his apparatus, but devote his entire attention to his stroke. This, no doubt, was what actually happened; but the sculptor wishes to indicate that his skins are not solid bodies but full of air, and he can find no better way of showing it than by making his swimmers continue blowing out the skins, though in the act of crossing. This instance may be taken as typical of the spirit of primitive art, which, diffident of its own powers of portrayal, or distrusting the imagination of the beholder, seeks to make its meaning clear by means of conventional devices.

with paint, or only parts of it picked out in colour, cannot be decided.

Even more famous than their sculptured slabs are the colossal winged lions and human-headed bulls of the Assyrians. They fired the imagination of the Hebrew prophet Ezekiel, and they impress the beholder of to-day. These creatures were set on either side of a doorway or entrance, and were intended to be viewed both from the front and from the side—a fact that explains why they are invariably represented with five legs. A very curious effect was often produced by running inscriptions across the bodies of these beasts without regard to any detail of carving or design. *Asūr-nāsir-pal* was a great offender in this respect. Not content with scarring his colossi in this manner, he ran inscriptions over his bas-reliefs as well, and displayed a lack of imagination by repeating the same short inscription again and again with but few variations.

Carving in the round was rarely practised. A stone statuette of *Asūr-nāsir-pal*, a seated stone figure of *Shalmaneser II.*, and some colossal statues of the god *Nebo* have been found; but, though the proportions of the figure are more or less correct, their treatment is exceedingly stiff and formal. Modelling in clay, however, was common. A few small clay figures of gods have been discovered, and we possess clay models of the favourite hounds of *Asūr-bāni-pal*. We know, too, that the stone bas-reliefs were first of all designed and modelled on a smaller scale in clay: the British Museum possesses fragments of these clay designs, as well as the rough drafts on clay tablets which the Assyrian masons copied when they chiselled the inscriptions.

In their metal work the Assyrians were very skilful. This we may gather both from the monuments and from the actual examples of the art that have come down to us. A good majority of the originals of the metal trappings, ornaments, etc., that are represented on the monuments must have been cast. The metal weights in the form of lions are among the best actual examples of casting that we possess. In the British Museum, moreover, there is to be seen an ancient mould that was employed for casting. It was found near *Mösul*, and, although it must be assigned to a period about two centuries subsequent to the fall of *Nineveh*, it probably represents the traditional form of that class of matrix, and we shall not be far wrong in supposing that such moulds were extensively employed in the Assyrian foundries of at least the later empire. The mould in question is made of bronze, and is formed in four pieces which fit together accurately. Three holes may be observed on the flat upper surface. Into these holes the molten metal was poured. When the mould was opened after its contents had been given time to cool, there would be seen lying within it three barbed arrow-heads.

It was, however, in the more legitimate art of metal-beating that the Assyrians excelled. Much of the embossed work that adorned their thrones, their weapons, and their armour was wrought with the hammer, while the dishes and bowls from *Nimrūd* and the shields from the neighbourhood of *Lake Van* are covered with delicate *repoussé* work, the design on the upper side being finished and defined by means of a graving tool. The largest and finest examples of this class of work that have been preserved are the bronze sheathings of the gates of *Shalmaneser II.*, which were excavated at *Tell-Balawāt* in 1870 and are now to be seen in the British Museum. The bronze gates of nations in antiquity were not cast in solid metal. They would have been too heavy to move, and metal was not obtained in sufficient quantities to warrant such an extravagance. The gate was built principally of wood, on which plates of metal were fastened; the object being to strengthen the gate against an enemy's assault, and especially to protect its wooden interior from destruction by fire. The metal coverings of *Shalmaneser's*

gate consist of bronze bands which at one time strengthened and adorned it. A brief inscription runs round them, while the space is filled with designs in delicate relief illustrating the battles and conquests of the king and in general treatment resembling the bas-reliefs of stone to which reference has been made.

Iron was used by the Assyrians; but bronze was the favourite substance of the metal-worker. Specimens of the bronze employed have been analysed, and it has been ascertained that it consists roughly of one part of tin to ten parts of copper. We know from the jewels represented on the monuments that ornamental work in silver and in gold was not uncommon, and specimens of inlaid work and of work in ivory have been found at *Nimrūd*. Many of the examples we possess, however, betray a strong Egyptian influence, apparent in the general method of treatment and in the occurrence of the scarabæus, the cartouche, and a few hieroglyphs. Thus they must be regarded not as genuine Assyrian productions, but rather as the work of Phœnician artists copying Egyptian designs. Enamelling of bricks was extensively employed as a means of decoration. The designs consist sometimes of patterns, and sometimes of scenes in which men and animals take part. The colouring is subdued, and the general effect is harmonious. The fact that the tones of the colouring are so subdued is regarded by some as a proof that they have faded. Some excellent examples of enamelled architectural ornamentation in terra-cotta have been found at *Nimrūd*. They bear the name of *Asūr-nāsir-pal*.

Engraving on gems and the rarer stones and marbles was an art to which the Assyrians especially devoted themselves. There have been found a few gems and seals that are oval in shape; but the general form adopted was that of a cylinder. Those of cylindrical form vary from about an inch and a half to two inches in length and from about half an inch to an inch in diameter. They were pierced along the centre so that the wearer could suspend them from his person by a cord. The use to which they were put was precisely similar to that of the signet ring. A Babylonian or an Assyrian, instead of signing a document, ran his cylinder over the damp clay tablet on which the deed he was attesting had been inscribed. No two cylinder seals were precisely alike, and thus this method of signature worked very well. As every wealthy Assyrian carried his own seal-cylinder, it is not surprising that time has spared a good many of them. (It may be noticed in passing that the class of poorer merchants and artisans did not carry cylinders. When they attested a document they did so by impressing their thumb-nail on the clay of the tablet. Whether a certain social status brought with it the privilege of carrying a cylinder, or whether the possession of one depended solely on the choice or rather on the wealth of its possessor, is a question that has never been solved.)

The work on the cylinders is always *intaglio*, the engraver aiming at rendering beautiful the seal impression rather than the seal itself. The subjects represented, which are various, include acts of worship, such as the introduction by a priest of a worshipper to his god, mythological episodes, emblems of gods, animals, trees, etc.: the engravings are generally religious or symbolical. The official seal of the Assyrian kings forms the principal exception to this general rule; it is circular and represents a royal personage slaying a lion with his hands. The character of the work itself varies from the rudest scratches to the most polished workmanship, and it may be regarded as a general rule that the more excellent the workmanship the later the date. The earlier seals are inscribed by means of the simplest form of drill and graver, and the marks of the tools employed for hollowing are not obliterated, the heads of the figures being represented by mere holes, while the bodies resemble fish-bones; it should be noted, however, that

early Babylonian seals of great beauty have been found at Telloh.

It is strange that the Babylonian and the Assyrian, living in a land of clay, building their houses of brick

13. Pottery. and writing on clay tablets—in fact, with plastic clay constantly passing through their hands—produced no striking specimens of pottery. They employed clay for all their vessels; but the forms these assumed do not show great originality, and ornamentation was but niggardly applied. That the Assyrians were glass-blowers is shown by the discovery of small glass bottles and bowls.¹

The domestic furniture of the Assyrians does not demand a detailed description. All that was made of

14. Furniture and embroidery. wood has perished. Only the metal fittings survive; but these, with the evidence of the bas-reliefs, point to a high development of art in this direction. Perhaps the most sumptuous specimens of Assyrian furniture that the monuments portray are the throne in which Sennacherib is seated before Lachish, the furniture in the 'garden-scene' of Ašur-bāni-pal (both in the British Museum), and the chair of state or throne of Sargon on a slab from Khorsabad in the Louvre.

Of the art of embroidery, also, as practised by the Assyrian ladies, the invaluable evidence of the monuments gives us an idea. The clothes of the sculptured figures are richly covered with needle-work, especially on the sleeves and along the bottom of robes and tunics, while the royal robes of Ašur-nāsir-pal are embroidered from edge to edge. The general character of the designs, whether consisting of patterns or of figures, resembles that of the monuments themselves.

One other subject must be noted in this connection,—it does not strictly fall under the heading either of art or

15. Mechanics of architecture, though it is closely connected with branches of both,—the knowledge of mechanics that the Assyrians display. To those who have had any experience in the removal or fixing of Assyrian sculpture, and know the thickness of the bas-reliefs and the weight of even the smallest slab, the energy and skill required by the Assyrians to quarry, transport, and fix them in position is little short of marvellous. Yet all this was accomplished with the aid of only a wedge, a lever, a roller, and a rope. Representations of three of these implements in use are to be seen in the building-slabs of Sennacherib.

Among mechanical contrivances may be mentioned the crane for raising water from the rivers to irrigate the fields, and the pulley employed for lowering or raising a bucket in a well. The ingenuity of the Assyrians is apparent also in their various engines of war and the elaborate siege-train that accompanied their armies. The battering-rams, the scaling-ladders, the shields and pent-houses to protect sappers while undermining a wall—not to mention their chariots, weapons, and defensive armour—all testify to their mechanical skill.

The position of Assyria was favourable for commerce. Occupying part of the most fertile valley of W. Asia,

16. Commerce. she formed the highway between E. and W. Of her two great rivers, the Euphrates approaches within one hundred miles of the Mediterranean coast, yet empties its waters into the Persian Gulf. At the time of the Assyrian empire a highway of commerce must have lain from the Phœnician coast to Damascus and thence along the Euphrates to the Indian Ocean. Many important caravan routes

¹ They shine with beautiful prismatic tints. Most glass that has been buried for a considerable period, indeed, whether of Assyrian, Egyptian, Greek, or Roman manufacture, presents this iridescent appearance. It is a popular error to suppose that it possessed these tints from the beginning and that the art by which the colouring was attained has perished with those who practised it. The ancients must not be allowed to take the credit due to nature. The earth and the atmosphere acting on the surface of the glass have liberated the silicæ, and the process of decomposition is attended with the iridescent appearance.

also lay through Assyria. Nineveh maintained commercial relations with the districts around Lake Urū-miyah, and with Ecbatāna, while to the west he Phœnician traders journeyed by the Sinjar range to Thapsācus on the Euphrates, thence south to Tadmor and through Damascus into Phœnicia: a second western caravan route lay through Harrān into upper Syria and Asia Minor, while Egypt's trade with Assyria as early as the fifteenth century is attested by the Amarna tablets. The prophet Ezekiel has borne witness to the presence of Assyrian merchants at Tyre in his time; yet it was the nations that traded with Assyria rather than Assyria with the nations, for the Assyrians were essentially a people who preferred to acquire their wealth by conquest rather than in the market-place. The internal trade of Assyria is represented by the contract tablets dating from the ninth century to the end of the empire, that have been found at Kuyunjik. These tablets—not nearly so many as those discovered throughout Babylonia (*q.v.*, § 19, beg.)—deal with the sale of slaves, cattle, and produce, the purchase of land, etc., and bear witness to the internal prosperity of Assyria. They are written more carefully than the majority of those of Babylonia; and the Babylonian device of wrapping the tablet in an envelope of clay on which the contract was inscribed in duplicate, with a view to its safer preservation, was not often adopted.

The form of government in Assyria throughout the whole course of her history was that of a military despotism. The king was supreme. He

17. Government. was Ašur's representative on earth and under the special protection of the gods.

Whatever policy he might adopt was Ašur's policy, and it was the duty of every subject of Assyria to carry out his will. The nation therefore existed for the monarchy, not the monarchy for the nation. The kingship rested on the army, on which it relied to quell rebellion and maintain authority as well as to conquer foreign lands. The army was in consequence the greatest power in the state. Its commander-in-chief, the *turtan* or *tartan*, held a position next to that of the king himself, in whose absence he led the troops and directed operations (cp TARTAN). The *šakū* was an important lower officer; the *rab-kišir* was his superior; and the *šud-šakē* and *rab-šakē* were only second to the *turtan* (cp RABSHAKH). The titles of many court officers are known; but it is difficult to ascertain their functions. The more important were eligible for the office of the *limmu*, to which they succeeded in order, each giving his name to the year during which he held office (see § 19 and CHRONOLOGY, § 23). In a military state such as Assyria a system of civil administration, it may be said, had almost disappeared. The governors of the various cities in the realm, whose duty it was to maintain order and send periodical accounts to the king, were not civilians. In fact, every position of importance in the empire was filled from the army. Priests and judges exercised a certain authority; but it was small in comparison with that of similar classes in Babylonia.

18. Excavations. It was Assyria that at first attracted the attention of explorers, though within recent years Babylonia has enjoyed a monopoly of excavation and discovery

In the year 1820 Rich, the resident of the East India Company at Bagdad, visited Mōsul and made a superficial examination of the mounds of Kuyunjik and Nebi Yūnus. He obtained some fragments of pottery and a few bricks inscribed in cuneiform characters, and he published an account of what he had seen. It was not until 1842 that attention was again attracted to these mounds. Botta, the French Consul at Mōsul, then began to explore Kuyunjik. His efforts, however, did not meet with much success, and next year he transferred his attention to Khorsabad, 15 m. to the N. of Mōsul. There he came across the remains of a large building that subsequently proved to be the palace of Sargon, king of Assyria (722-705 B.C.). The majority of the sculptures that he and Victor Place excavated on this site are to be found in the Louvre; some, however, were obtained for the British Museum by Sir Henry Rawlinson.

In 1845 Sir Henry Layard explored the mounds at Nimrid

and Kuyunjik, undertaking excavations at these places for the trustees of the British Museum; these diggings were continued by Loftus, Rassam, and others, under the direction of Sir Henry Rawlinson, who was then serving as Consul-General and political agent at Bagdad, and they resulted in the discovery of the principal remains of Assyrian art that have been recovered. At Nimrud the palaces of Āšur-nāṣir-pal (884-860 B.C.), Šalmaneser II. (860-824 B.C.), and Esarhaddon (681-669 B.C.) have been unearthed (cp CALAH), and at Kuyunjik (cp NINEVEH) the palace of Sennacherib (705-681), and that of Āšur-bāni-pal (669-625). The bas-reliefs, inscriptions, etc., from that palace are preserved in the British Museum. At Kuyunjik (1852-54) the famous library of Assyrian art that have been recovered, part of our knowledge of Babylonian and Assyrian literature is derived, was discovered. At Kal'at Šerkāt and at Sherif Khān excavations were successful; important stone inscriptions and clay cylinders of the early kings were found at Kal'at Šerkāt.

The years 1878-79 were times of remarkable discoveries. During this period the 'finds' at Kuyunjik included the great cylinder of Āšur-bāni-pal (q.v.), the most perfect specimen of its kind extant; at Nimrud a large temple, dating from the time of Āšur-nāṣir-pal was unearthed, while excavation at Tell-Balawat resulted in the recovery of a second temple of Āšur-nāṣir-pal and the bronze coverings of the gate of Šalmaneser II. (cp *supra*). Besides the excavators and explorers of Assyria to whom reference has been made, two others should be mentioned—George Smith and E. A. Wallis Budge. George Smith, in the years 1873, 1874, and 1875, and his assistants, explorers in that country, on the last of which he lost his life. The most recent additions to the collection of cuneiform tablets from Kuyunjik were made by Budge in the years 1888 and 1891.

Of the Assyrian antiquities which have been recovered, most of the sculptures of Sargon from Khorsabad are in the Louvre; Berlin possesses a stele of Sargon found at Cyprus (cp SARGON) and a stele of Esarhaddon; a large slab from the palace of Āšur-nāṣir-pal has found their way into the museums at Edinburgh, the Hague, Munich, Zürich, and Constantinople, and others from Kuyunjik into private galleries; almost all else is to be found within the walls of the British Museum.

There are four main sources of information for the settlement of Assyrian chronology—the so-called 'Eponym lists' (see below), the chronological notices scattered throughout

19. Chronology. the historical inscriptions (see § 20, beg.), the genealogies some of the kings give of themselves (see § 20, end), and lastly those two most important documents which have been styled the 'Synchronous History' (§ 21, beg.) and the 'Babylonian Chronicle' (§ 21, end).

The early Babylonians had counted time by great events, such as the taking of a city, or the construction of a canal (cp CHRONOLOGY, § 2, beg.). This primitive system of reckoning, by which a period or date could be but roughly estimated, gave place among the later Babylonians to the fashion of counting time according to the years of the reigning king.

The Assyrians adopted neither of these methods. They invented a system of their own. They named the years after certain officers, each of whom may possibly have been termed a *limu* or *limmu*, though the majority of scholars agree in regarding this term as referring not to the officer himself, but to his period of office. These officers or eponyms were appointed in a general rotation; each in succession held office for a year and gave his name to that year; the office was similar to that of the archonate at Athens or the consulate at Rome. Lists of the *limmu*s have been preserved from the reign of Rammān-nirari II. (911-890 B.C.) down to that of Āšur-bāni-pal (669-625 B.C.). Some of them merely state the name of the eponym; others add short accounts of the principal events during his term of office. Now, it is obvious that the dates of all the years in this known succession will be known if there be any of them that can be determined independently. It fortunately happens that there is such a year. From the list we know that in the eponymy of Pur-Sagali in the month of Sivan (May-June) the sun was eclipsed, and astronomers have calculated that there was a total eclipse at Nineveh on the 15th of June 763 B.C. Hence the year of Pur-Sagali is fixed as 763, and the dates of the eponyms for the whole period covered by the lists are determined (see further CHRONOLOGY, § 24, and cp below, § 32).

For the chronology before this period other sources must be sought. Approximately it can sometimes be

determined by means of data supplied by the inscriptions of the kings in the form of chronological notices or remarks. For example, Sennacherib in his inscription engraved on

20. Earlier period. the rock at Bavian (see *KB 2 116 ff.*), in recounting his conquest of Babylon (689 B.C.), adds that Rammān and Sala, the gods of the city of Ekallātī which Marduk-nādin-aḥē, king of Akkad, in the time of Tiglath-pileser, king of Assyria, had carried away to Babylon, he now recovered and restored to their place after a lapse of 418 years (cp below, § 28). According to Sennacherib's computation, therefore, Tiglath-pileser I. must have been reigning in the year 1107 B.C., and from the inscription of Tiglath-pileser himself on his cylinders (cp below, § 28, beg.) we know that this year is probably not among the first five of his reign (cp below, § 28). Moreover, Tiglath-pileser himself tells us that he rebuilt the temple of Anu and Rammān, which sixty years previously had been pulled down by Āšur-dān because it had fallen into decay in the course of 641 years since its foundation by Samsi-Rammān (cp below, § 25). This notice, therefore, proves that Āšur-dān must have been on the throne about the years 1170 or 1180 B.C., and further approximately fixes the date of Samsi-Rammān as about the year 1820.

The date of one other Assyrian king can be fixed by means of a reference made to him by one of his successors. Sennacherib narrates (cp below, § 27) that a seal of Tukulti-Ninib I. had been brought from Assyria to Babylon, where after 600 years he found it on his conquest of that city. Sennacherib conquered Babylon twice, once in 702 and again in 689; it may be concluded, therefore, that Tukulti-Ninib reigned in any case before 1289 B.C., and possibly before 1302 B.C. We thus have four settled points or pegs on which to hang the early history of Assyria.

Further assistance in the arrangement of the earlier kings is obtained from genealogies. Rammān-nirari I., for example, styles himself the son of Pudi (Pudi-ilu), grandson of Bēl-nirari, great grandson of Āšur-uballit, all of whom, he states, preceded him on the throne of Assyria. Most of the Assyrian kings of whom we possess inscriptions at least state the name of their father, while in one instance we know the relationship between two early kings from a considerably later occupant of the throne, Tiglath-pileser I., informing us that Samsi-Rammān was the son of Išmi-Dagan and that each was an early *patesi* of Assyria. We thus know to a great extent the order in which the kings must be arranged, and in cases where a son succeeds his father we can assign approximately the possible limits of their respective rules.

A further aid is found in the 'Synchronous History' of Assyria and Babylonia. This inscription was an official document drawn up with the aim of giving a brief summary of the relations between Babylonia and Assyria from the earliest times in regard to the boundary line dividing the two countries. The chief tablet on which this record is inscribed is, unfortunately, broken; but much still remains which renders the document one of the most important sources for Babylonian and Assyrian history. From it we ascertain for considerable periods which kings of Babylonia and Assyria were contemporaries.

Similar information for the period from about 775 to 669 B.C. is obtained from the Babylonian Chronicle.

Now, we know the order and the length of the reigns of a great majority of the Babylonian kings from the Babylonian lists of kings that have been discovered, and the dates of some can be fixed, like those of the earlier Assyrian kings, from subsequent chronological notices (cp BABYLONIA, § 38). The dates and order, therefore, of the kings of both Babylonia and Assyria can to some extent be approximately settled independently of one another, and each line of kings can be controlled

from the other by means of the bridges thrown across between the two by the 'Synchronous History' and the 'Babylonian Chronicle.'

A further means of control is supplied by the points of contact that we can trace between Assyria and Egypt. Such are the Egyptian campaigns of Āšūr-bāni-pal recounted on his cylinder inscription and the letter from Āšūr-uballiṭ to Amenophis IV., recently found at Tell el-'Amārna, and now preserved in the Gizeh Museum. These points of contact are not, however, sufficient to warrant a separate classification; and to go to Egyptian chronology to fetch help for that of Assyria would be to embark on an explanation *ignoti per ignotius* (cp EGYPT, § 55 f., and CHRONOLOGY, § 10). Assyrian chronology, therefore, unlike that of early Babylonia, may be regarded as tolerably fixed. The dates of the later Assyrian kings, with the exception of the successors of Āšūr-bāni-pal, can be settled almost to a year, while the dates assigned by various scholars to the earlier Assyrian kings, though differing, do not differ very widely. The data summarised above, which must form the basis of every system of Assyrian chronology, are not elastic beyond a certain point. Thus, whilst no two historians agree precisely as to the dates to be assigned to many of these earlier kings, the maximum of their disagreement is inconsiderable, and the results arrived at by almost any one of them may be considered approximately correct.

With the Semitic races in general and the Babylonians and Assyrians in particular proper names retained their original forms with great persistency. Among these two nations,

in fact, many names consist of short sentences, complete and perfectly grammatical; indeed, were it not for the determinatives placed before them to show that they are names (𐎲 for males, 𐎠 for females) the difficulty of reading Assyrian texts would be considerably increased.

The following are translations of some of the names of Assyrian kings the interpretation of which may be regarded as certain. Where the real Assyrian form of the name differs from the form now in common use it is added in brackets:—

Īsmi-Dagan	'Dagon hath heard.'
Šam-Ši-Rammān	'My sun is Rimmon.'
Āšūr-bēl-niṣū	'Āšur is lord of his people.'
Puzur-Āšur	'Hillion in Āšur.'
Āšūr-nādin-ahē	'Āšur giveth brethren.'
Āšūr-uballiṭ	'Āšur hath quickened to life.'
Bēl-nirari	'Bēl is my helper.'
Rammān-nirari	'Rimmon is my helper.'
Šulmanēser (Šulmanu-ašaridu)	'Sulman is chief.'
Tukulti-Ninib	'My help is Ninib.'
Bēl-kudur-usur	'Bēl, protect the boundary!'
Ninib-paḫ-Ēšara	'Ninib is the son of Ēšara.'
Āšūr-dān	'Āšur is judge.'
Āšūr-rēš-iši	'Āšur, raise the head!'
Tiglath-pileser (Tukulti-pal-Ēšara)	'My help is the son of Ēšara.'
Āšūr-bēl-kala	'Āšur is lord of all.'
Āšūr-nāsir-pal	'Āšur protecteth the son.'
Āšūr-nirari	'Āšur is my helper.'
Sargon (Šarru-kinu)	'The legitimate king.'
Sennacherib (Sin-aḫ-ē-erba)	'Sin (i.e., the Moon-god) hath increased "brethren."
Esarhaddon (Āšur-aḫ-iddina)	'Āšur hath given a brother.'
Āšūr-bāni-pal	'Āšur is the creator of a son.'
Āšūr-etil-ilāni	'Āšur is prince of the gods.'
Sin-šar-iškun	'Sin hath established the king.'

The beginnings of the Assyrian empire are not, like those of Babylonia, lost in remote antiquity. It is far more recent in its origin. The account

23. History. contained in Gen. 10:11 to the effect that the Assyrians went forth from the Babylonians and founded their own cities is supported by all the evidence we can gather from the inscriptions. It is true that no actual account of this emigration has yet been found among the archives of either nation; but every indication of their origin tends to support the biblical account, for the Assyrians in all that they have left behind them

betray their Babylonian origin. Their language and method of writing, their literature, their religion, and their science were taken over from their southern neighbours with but little modification, and their very history is so interwoven with that of Babylonia that it is often difficult to treat the two countries separately.

The period at which the Assyrian offshoot left its parent stem, though not accurately known, can be set within certain limits. It must have

24. Settlement. been at least before 2300 B.C. The Babylonian emigrants, pushing northwards along the course of the Tigris, formed their first important settlement on its W. bank some distance to the N. of its point of junction with the Lower Zab. Here they founded a city, and called it Āšur after the name of their national god,—a city that long continued to be the royal capital of the kingdom.

The oldest Assyrian rulers did not bear the title of king. They bore that of *iškaku*, a term equivalent to

the title *patesi*, assumed by many rulers of the old Babylonian cities in the S. The phrase '*iškaku* of the god Āšur' is not to be taken in the sense of 'priest.' In all probability it implies that the ruler was the representative of his god—an explanation that is quite in accordance with the theocratic feeling of the period.

The earliest *iškakus* at present known to us are Īsmi-Dagan and his son Šam-Ši-Rammān. The latter built a temple to the gods Anu and Rammān, which, Tiglath-pileser I. tells us, fell into decay; 641 years afterwards Āšūr-dān pulled it down, and 60 years later it was rebuilt by Tiglath-pileser himself. This reference enables us to fix the date of Šam-Ši-Rammān at about 1820, and it is usual to assign to Īsmi-Dagan, his father, a date some twenty years earlier, *circa* 1840 B.C. In addition to his buildings at Āšur, Šam-Ši-Rammān restored a temple of Ištar at Nineveh. The names of other *iškakus* are known, although their dates cannot be determined.

Bricks, for example, have been found at Kal'at-Sherkat, the site of the ancient city of Āšur, which bear the name of a second Šam-Ši-Rammān, the son of Īgur-kapkapu, and record that he erected a temple to the national god in that city. Another brick from the same place is inscribed with the name of Irīsum, the son of Hallu, commemorating his dedication of a building to the god Āšur for the preservation of his own life and that of his son.

There are no data for determining the relation of Assyria to Babylonia at this period. Whether the early *iškakus* still owed allegiance to their mother country or had already repudiated her claims of control is a question that cannot be decided with certainty. It is generally supposed, however, that at some period between 1700 and 1600 B.C. Assyria finally attained her independence.

The oldest Assyrian king whose name is known to us is Bēl-kapkapu. Rammān-nirari III., in an obscure

26. First kings. passage in one of his inscriptions, mentions Bēl-kapkapu as one of his earliest predecessors on the throne of Assyria. This passage is, however, the only indication we possess of the time at which he ruled. The first Assyrian king of whom we have more certain information is Āšūr-bēl-niṣū. With this king our knowledge of Assyrian history becomes more connected, and we can trace in greater detail the doings of the various kings and the relations they maintained with Babylonia. The source of information that now becomes available is the 'Synchronous History' (see above, § 21).

From this document we learn that Āšūr-bēl-niṣū was on friendly terms with Kara-indaš, a king of the third Babylonian dynasty, with whom he formed a compact and determined the boundary that should divide their respective kingdoms. These friendly relations were maintained by Puzur-Āšur, king of Assyria, who concluded similar treaties with Burna-Buriāš, king of Babylonia. Puzur-Āšur was probably succeeded by Āšūr-nādin-ahē (*circa* 1420). This king is mentioned in a letter of Āšūr-uballiṭ to Amenophis IV., king of Egypt, in which he refers to Āšūr-nādin-ahē as his father. How long the friendly relations between Assyria and Babylonia continued we

cannot say; but it was impossible that friction should always be avoided. Assyria was proud of her independence, while Babylonia could not but be jealous of her growing strength. This it was not long before their relations became hostile. It is under

circa 1410. Āsur-uballiṭ that we first find the two nations in open conflict. Āsur-uballiṭ, to cement his friendship with Babylonia, had given his daughter Muḫallib-šerīa in marriage to a Babylonian king, and Kara-bardaš, the offspring of this union, in time succeeded his father on the throne. He was slain, however, in a revolt, and Nazi-bugaš, a man of unknown origin, was set up in his stead. To avenge the death of his grandson, Āsur-uballiṭ invaded Babylonia, slew Nazi-bugaš, and set the youngest son of Burna-Buriaš, Kurigalzu II, on the throne. (Such is the account given in the 'Synchronous History' of Āsur-uballiṭ's intervention in the Babylonian affairs. It may be mentioned, however, that a parallel text contains a somewhat different version of the affair, with which the account in the 'Synchronous History' has not yet been satisfactorily reconciled.) Kurigalzu did not long maintain friendship with Assyria. Soon we find him at war with Āsur-uballiṭ's son

circa 1380. and successor, Bēl-nirari. Bēl-nirari, however, defeated him at the city of Saggas, and then plundering his camp added to the Assyrian territory half of the country from the land of Subaru to Babylonia. Bēl-nirari's son Pudi-lu (*circa 1360*) retained the territory his father had acquired, but did not attempt to make further encroachments on the S. He undertook successful expeditions, however, against the tribes on the E. and S.E. of Assyria. We possess an inscription on a brick from his palace at Āsur, and another inscription of his on a six-sided stone (in the British Museum) records that he erected a temple to Šamaš the Sun-god. His son

circa 1345. Ramman-nirari I, after strengthening the Assyrian rule in the territory recently acquired by his father, turned his attention to his S. boundary. He conquered the Babylonian king Nazi-narutaš in Kār-Ištar-Akarsallu, and added considerably to his empire.

Ramman-nirari was succeeded by his son Šalmaneser I. He has left us no account of the expeditions he

circa 1320. undertook; but that he was a great conqueror we gather from a reference in the annals of Āsur-nāsir-pal. This king relates that in his reign the Assyrians whom

27. Šalmaneser I.
etc. Šalmaneser, king of Assyria, a prince who preceded him, had settled in the city of Halziḫipha revolted under Iḫuli, their governor, and took the royal Assyrian city of Damlamusa. These places lay on the upper course of the Tigris; and it is evident from Āsur-nāsir-pal's account that Šalmaneser had formed a sort of military outpost at this spot which shows that he must have undertaken successful expeditions against the countries to the NW. of Assyria. We may conclude that it was in consequence of this extension of his territory along the Tigris that Šalmaneser transferred his capital from Āsur in the south, which had formed the royal residence of Assyria, to Calah, a city of which he was the founder, as we learn from Āsur-nāsir-pal. This new capital was situated about eighteen miles S. of Nineveh (cp CALAH). Šalmaneser, however, did not neglect the older capital. He enlarged its royal palace and restored the great temples. We know also that he restored the great temple of Ištar at Nineveh.

On his death he was succeeded by his son Tukulti-Ninib, who, like his father, busied himself in extending the NW. limits of his kingdom. At *circa 1290.* the sources of the Subnat, a river that joins the Tigris some distance above the modern Diār-bekr, he caused an image of himself to be hewn in the rock. He conquered Babylonia, and for seven years governed the country by means of tributary princes. Though we have not recovered any actual inscription of this king, we possess a copy of one made by the orders of Sennacherib, on a clay tablet in the British Museum. The original was inscribed on a seal of lapis-lazuli, and Sennacherib tells us it had been carried from Assyria to Babylon. Six hundred years later, says Sennacherib, on his conquest of that city, he found the seal among the treasures of Babylon and brought it back (cp above, § 20). The inscription itself is short, merely containing the name and titles of Tukulti-Ninib, and calling down the vengeance of Āsur and Ramman on any one who should destroy the record. How or at what period the seal was brought to Babylon cannot be said with certainty; but it is not improbable that it found its way

there during Tukulti-Ninib's occupation of the country. This occupation was not permanent. At the end of seven years the nobles of Babylon revolted, and set Ramman-šum-nāsir, or Ramman-šum-nār (the name may be read in either way), on the throne there as an independent king. Tukulti-Ninib was not a popular ruler, for he was slain in a revolt by his own nobles, who set his son, Āsur-nāsir-pal, upon the throne. We possess an Assyrian copy of a letter written by a Babylonian king named Ramman-šum-nāsir to Āsur-nārara and Nabū-daia, kings of Assyria. If, as has been suggested, the writer of this letter and the king who succeeded Tukulti-Ninib on the throne of Babylon are identical, we obtain the names of two other Assyrian kings of this period.

A few years later, under Bēl-kudur-ūsur (*circa 1210*), we find the Assyrians and Babylonians again in conflict. Bēl-kudur-ūsur, *circa 1205.* the Assyrian king, was slain in the battle; but Ninib-pal-Ešara retreated with the Assyrian army, and when the Babylonians followed up their advantage by an invasion the Assyrians he defeated them and drove them from the country. The Babylonians, however, though repulsed, appear to have regained a considerable part of their former territory from the Assyrians. The next occupant of the throne was

circa 1200. Āsur-īdān, the son of Nib-pal-Ešara. He retrieved the disasters which his father had sustained at the hands of the Babylonians. He invaded Babylonia, capturing Zamama-šum-iddin, captured the cities of Zabab, Iria, and Akarsallu, and returned with rich booty to Assyria. The only other fact that we know of this king was that he pulled down the temple of Ramman and Āsur which had been erected by Šamši-Ramman, but had since fallen into decay. His must have been an energetic reign, to justify the eulogy pronounced on him by his great-grandson Tiglath-pileser I. This monarch describes him as one 'who wielded a shining sceptre, who ruled the men of Bēl, whose deeds and offerings pleased the great gods, and who lived to a good old age.' Āsur-īdān was succeeded by his son

circa 1140. Āsur-rēš-iši, whom Tiglath-pileser calls 'a mighty king who conquered the limits of the land and overthrow all the exalted'; and from a clay bowl of his, bearing an inscription, we learn that the peoples of Lullēni and Kari were among those he overthrew. He was victorious against the Babylonians. The Babylonian king, Nebuchadrezzar I, desiring to extend the northern limits of his country invaded Assyria and besieged a border fortress. Āsur-rēš-iši, however, summoned his chariots of war, and on his advance the Babylonians retreated, leaving their siege-train. Nebuchadrezzar, with fresh chariots and troops, soon returned; but Āsur-rēš-iši, after reinforcing his own army, gave him battle and inflicted on him a crushing defeat. The Babylonian camp was plundered, and forty chariots fell into the hands of the Assyrians.

On the death of Āsur-rēš-iši the throne passed to his *circa 1120.* son Tiglath-pileser I, whose reign marks an epoch in Assyrian history. He is, moreover, the first Assyrian monarch who has left us a detailed

28. Tiglath-pileser I. record of his achievements. The great inscription of this king is contained on four octagonal cylinders of clay which he buried at the four corners of the temple of Ramman at Āsur to serve as a permanent record of his greatness and of the extent of the Assyrian empire during his reign. Each of the four cylinders contains the same inscription. Where one is broken or obscure the text can be made out from the others.¹

In the course of the introduction with which he prefaces the account of his expeditions he gives the following description of himself: 'Tiglath-pileser, the mighty king, the king of hosts who has rivalled the king of the four quarters, the king of all rulers, the lord of lords, . . . the king of kings, the excellent priest who, at the command of the Sun-god, was entrusted with the shining sceptre and has ruled all men who are subject to Bēl, the true shepherd whose name has been proclaimed unto the rulers, the exalted governor whose weapons Āsur has commanded and whose name for the rule of the four quarters he has proclaimed for ever, . . . the mighty one, the destroyer who like the blast of a hurricane over the hostile land has proved his power, who by the will of Bēl has no rival and has destroyed the foes of Āsur.' On the conclusion of this preface the inscription goes on to recount the various campaigns in which Tiglath-pileser was engaged during the first five years of his reign. He first advanced against the inhabitants of Mušku (the Meshach of the OT; see TUBAL), who had overrun and conquered the land of Kummān on both sides of the Euphrates to the NW. of Assyria. Tiglath-pileser, therefore, crossed the intervening mountainous region and defeated their

¹ Translation in *KB* I 14-47.

five kings with great slaughter. 'The bodies of their warriors,' he says, 'in the destructive battle did I cast down like a meast. Their blood I caused to flow over the valleys and heights of the mountains. Their heads I cut off, and around their cities I heaped them like . . . Their spoil, their possessions, their property without limit, I brought out. Six thousand men, the remainder of their armies, who before my weapons had fled, clasped my feet (*i.e.*, tendered their submission). I carried them away and reckoned them as the inhabitants of my land.' Tiglath-pileser then attacked the land of Kumuh, burnt the cities, besieged and destroyed the fortress of Šerīe on the Tigris, and captured the king. He defeated the tribes that came to the assistance of Kumuh, and after receiving the submission of the neighbouring city of Uraṛjāna returned to Assyria with great booty, part of which he dedicated to the gods Ašur and Ramman.

This expedition was followed by one against the land of Šubari (or Subarti), in the course of which he defeated four thousand warriors of the Hatti (see HITTITES) and captured one hundred and twenty chariots. Another campaign in the mountainous regions of the N.W. met with similar success, and resulted in the submission of many small states and cities. Tiglath-pileser now devoted his energies to extending his border in another direction. He crossed the Lower Zab and overran the districts of Murattāš and Sarada's to the S. of Assyria. Shortly afterwards, however, he returned to the N., whence he brought back with him the captured images of twenty-five gods, which he set up as trophies in the temples of his own land. Tiglath-pileser next extended his conquests still farther north into the district around the upper course of the Euphrates. The mountains he passed with great difficulty, and crossed the Euphrates itself on rafts which his troops constructed out of the trees that clothed the hill-sides. Here twenty-three kings of the land of Armi, and at the same time the combined forces to give him battle. 'But,' writes Tiglath-pileser, 'with the violence of my mighty weapons I oppressed them, and the destruction of their numerous host I accomplished like the onslaught of the Storm-god. The corpses of their warriors I scattered in the plains and on the mountain-heights.'

After completing the subjugation of the district he restored the kings he had captured to their thrones, and the spoil he had received from them as tribute twelve thousand horses and two thousand oxen. The Assyrian king now turned his troops against the region of the W. Euphrates. He subdued the district around the city of Carchemish, and even extended his conquests beyond the river, which his army crossed on rafts buoyed up by inflated skins. The last campaign of which we have a detailed account is that against the land of Armi to the N. of Assyria, the warriors of which, when at length driven into the chief city of Armi, tendered their submission. Tiglath-pileser then marched through the neighbouring country carrying with him fire and sword, burning the cities he took and digging up their foundations. The royal scribe, speaking in his master's name, concludes his record of these early conquests of Tiglath-pileser with the following summary: 'In all forty-two lands and their kings from beyond the Lower Zab, from the border of the distant mountains as far as the farther side of the Euphrates up to the land of Hatti and as far as the upper sea of the setting sun (*i.e.*, Lake Van), from the beginning of my sovereignty until my fifth year, has my hand conquered. One command have I caused them to hear; their hostages have I taken; tribute and tax have I imposed upon them.'

The cylinder-inscription of Tiglath-pileser does not recount the later expeditions of his reign. From the 'Synchronic History,' however, which deals with his relations with Babylonia, we learn that Tiglath-pileser, king of Assyria, and Marduk-nādin-ahē, king of Babylonia, had 'a second time' set in battle array their chariots of war that were assembled above the Lower Zab in Arzubina. In the second year they fought in Akkad, where Tiglath-pileser 'captured the cities of Dir-Kurtagina, Sippar of the Sun-god, Sippar of Anunita, Babylon, Opis, the great cities together with their fortifications; at the same time he plundered Akarsallu as far as the city of Lubdi, and the land of Šubi (on the Euphrates to the N.W. of Babylon) in its entirety up to the city of Rapiqu he subdued.' The phrase 'a second time' is puzzling, for the 'Synchronic History' does not relate a previous campaign of Tiglath-pileser against Babylonia. Some scholars therefore suggest that it refers merely to the former struggle of Ašur-rēš-iši, Tiglath-pileser's father, with the Babylonian king Nebuchadrezzar I.; but it must be remembered that Tiglath-pileser did not meet with unvarying success in his relations with Babylonia, for Sennacherib mentions that during his reign Ramman and Sala, the gods of the city of Ekallati, had been carried off by Tiglath-pileser's extensive conquests in Babylonia (see above, § 20). The question whether this conquest of Ekallati was before or after Tiglath-pileser's successful Babylonian campaign is still indeed an open one; but the supposition is plausible that Marduk-nādin-ahē's advance against Assyria was in the first year of hostilities between the two countries, and that his success was merely temporary, being followed 'in the second year' by Tiglath-pileser's extensive conquests in Babylonia as related in the 'Synchronic History.'

Tiglath-pileser was a great hunter. He kept a record of the beasts he slew in the desert. This was inserted in the cylinder-inscription after the account of his campaigns. From it we learn that with the help of the gods Ninib and Nergal

he slew 'four wild oxen, mighty and terrible in the desert of the land of Miāni and in Azaiki, which is in front of the land of Hatti,' ten elephants in the district of Harrān and on the banks of the Khābūr, one hundred and twenty lions on foot, and eight hundred with spears while in his chariot. He caught four elephants alive, and brought them back, together with the hides and tusks of those he had slain, to the city of Ašur. No less energetic was the king in his building operations. The temples of the gods in Ašur that were in ruins he restored; he repaired the palaces throughout the country that his predecessors had allowed to fall into decay; he extended his water-supply by the construction of canals; he accumulated considerable quantities of grain. As a result of his conquests, he kept Assyria supplied with horses, cattle, and sheep, and brought back from his campaigns foreign trees and plants, which became acclimatised.

The reign of Tiglath-pileser was a period of great prosperity for Assyria. He pushed his conquests until the bounds of his empire extended from below the Lower Zab to Lake Van and the district of the Upper Euphrates, and from the mountains to the E. of Assyria to Syria on the W., including the region watered by the Khābūr. He was a good warrior; yet he did not neglect the internal administration of his realm, devoting the spoil of his campaigns to the general improvement of the country. In fact, the summary he gives of his own reign is a just one: 'To the land of Ašur I added land; to its people I added people. The condition of my people I improved; I caused them to dwell in a peaceful habitation.'

The prosperity which Assyria had enjoyed under Tiglath-pileser does not appear to have long survived his death.

At the time of Ašur-bēl-kala, Tiglath-pileser's son, relations between Assyria and Babylonia were of a friendly nature. Ašur-bēl-kala at first made treaties with Marduk-šāpik-zēr-miti, king of Babylon; and later, when Ramman-aplu-ildina, a man of obscure extraction, ascended the throne of Babylonia, he further strengthened the connection between the two countries by contracting an alliance with the daughter of the Babylonian king. Šamši-Ramman, another son of Tiglath-pileser I., also succeeded to the throne, but whether before or after his brother Ašur-bēl-kala cannot be determined. The only inscription of this king that we possess records that he restored the temple of the goddess Istar in Nineveh.

Such are the only facts we know concerning the immediate successors of Tiglath-pileser I., and at this

29. Gap. point a gap of more than one hundred years occurs in our knowledge of the *circa* 1070-950. history of Assyria. We may surmise that the period was one of misfortune for the empire. What little can be gathered from the inscriptions concerning these years speaks of disaster.

Shalmaneser II., in his monolith-inscription,¹ states that he recaptured the cities of Pethor and Mutkinu (beyond the Euphrates), which had been originally taken by Tiglath-pileser I., but had meanwhile been lost by Assyria in the time of a king named Ašur . . . (the latter half of the name being broken). This king may be identified with Ašur-erbi, and in that case he must have met with at least some success in the W., for we know that at a place on the coast of Phoenicia Ašur-erbi cut an image of himself in the rock, near which at a later time Shalmaneser II. caused his own to be set. The names of two other kings are known: Erba-Ramman and Ašur-nādin-ahē, whose reigns must have fallen during this period. They are mentioned in the so-called 'hunting inscription' of Ašur-nāsir-pal as having erected buildings in the city of Ašur, which were restored by Ašur-nāsir-pal.

No direct light is thrown on this dark period by the 'Synchronic History.' As, however, it is written with a strong Assyrian bias, its silence is an additional testimony that during this period Assyria must have suffered misfortunes.

When we once more take up the thread of Assyria's history, our knowledge of the succession of her kings is unbroken down to the time of Ašur-bān-pal.

Tiglath-pileser II. heads this succession of rulers; but of him we know nothing beyond his name, which occurs in an inscription of his grandson Ramman-nirari II.,² who styles him 'king of hosts, king of Assyria.' Tiglath-pileser II. was succeeded by his son Ašur-dān II. Of this king we know that he constructed a canal, which, however, in the course of thirty years fell into disrepair, and was therefore made good

911. by Ašur-nāsir-pal. Ramman-nirari II., who succeeded his father, has left behind him only the short inscription (just

¹ K B 1 193.¹ K B 1 150 ff.² K B 1 48.

mentioned) recording his own name and those of his father and grandfather. He was an energetic ruler, as is evinced by the 'Synchronic History,' which records various successes of his against the Babylonians—first against the Babylonian king, Samsa-mudammik, and later against his successor, Nabu-šum-iškun, who had set himself up upon the throne. From this latter monarch he captured many cities and much spoil. He did not, however, press his victory. He concluded a truce with the Babylonian king, either Nabu-šum-iškun or his successor, and each added the other's daughter to his harem. His 890. son, Tukulti-Ninib, succeeded him, and from an inscription of this monarch at Sebeneh-Su we may infer that he undertook successful expeditions to the N. of Assyria, at least.

Tukulti-Ninib was succeeded by his son **Āšur-nāšir-pal**, 884. one of the greatest monarchs Assyria ever produced. The annals of his reign he inscribed on a slab of stone, which he set up in the temple of the god Ninib at Calah. In this inscription, 81. **Āšur-nāšir-pal**, one of the longest historical inscriptions of Assyria, he gives an account of the various campaigns he undertook.

In the first years of his reign, he tells us, he went against the land of Nimrud, a most fertile tract of country to the N. of Assyria, and subdued the lands and cities in its neighbourhood. The king then proceeded against the district of Kiriri that lay along the W. shores of Lake Urūmīyah. Turning W. from Kiriri, he passed through the lands of Kirūn on the Upper Tigris, and city after city fell into his hands. He returned to Assyria with the booty he had collected, and brought with him Ninu, the son of Buhā, a rebel against the king, to whom he had met with an obstinate resistance. This wretch he flayed alive in Arbela, nailing his skin to the city wall. In the same year he again repaired to the region of the Upper Tigris, against the cities at the foot of the mountains of Nipur and Pašatu. He then passed westward to the land of Kumuh, quelling a revolt in the city of Sūru on the Khabīr, and seizing the rebel leader Ašalabā, who was brought back to Ninewa, where he was flayed. The tribes surrounding the disaffected region tendered their submission. In the next year the first act of the king was to stamp out another rebellion. News was brought to him that the city of Halāzidīyah, which Shalmaneser II. had colonised (see above, § 27, beg.), was in a state of revolution, and had attacked the Assyrian city of Dāmandama. While on his way against the rebels he set up an image of himself, at the source of the river Sūnat, beside images of two of his predecessors, Tiglath-pileser I. and Tukulti-Ninib. He then defeated the rebels at the city of Kinabū, which he captured, and proceeded to punish the revolt with severity, flaying the rebel leader Hulāl. Next he attacked the city of Tēla and burnt it, mutilating the prisoners by cutting off their ears and hands and putting out their eyes. These wretches, while still alive, he piled up in a great heap; he made another heap out of the heads of the slain, while other heads he fastened to trees round the city; the youths and maidens he burnt alive. These details may suffice to show the brutal practices of this great conqueror. **Āšur-nāšir-pal** next proceeded to the city of Tušā, which had been deserted by the Assyrians in consequence of a famine. After restoring and strengthening its walls, he built a palace for himself and brought back to Ninewa the remains of the city. After his return he again undertook a pillaging expedition in the mountainous regions of the north. The next two years were mainly taken up with campaigns in Dagara and Zamua, which were in a state of insurrection, Nār-Rammān, the chief of Dagara, leading the revolt. The war was a protracted one, and three expeditions were required before order was completely restored. These expeditions were followed by others in the region of Kumuh and in the land of Na'iri. From his residence at Tušā, the king then crossed the Tigris and captured Pitura and certain towns round the city of Arbaki. **Āšur-nāšir-pal** records at this point the death of Amme'ala, one of his nobles, who was murdered by his subordinates. The king's anger, however, was appeased by a large tribute, although, according to one account, he flayed **Rammān**, the chief rebel, and nailed his skin to the wall of Ninewa.

One of the most important campaigns in the reign of **Āšur-nāšir-pal** was that against the land of Suhi. Although Šadudu, the ruler of that land, obtained help from Nabū-aplu-iddina, king of Babylonia, his capital Sūru was taken and he himself escaped only by flight. A second campaign led to the subjugation of the whole district and a considerable extension of the Assyrian sphere of influence along the Euphrates. **Āšur-nāšir-pal** next crossed the river and carried his arms into N. Syria. He first made his way to Carchemish and received the submission of Sangara, king of the land of Hatti. Proceeding SW. and exacting tribute from the districts through which he passed, he crossed the Orontes and marched S. into the district of Lebanon. The cities on the coast of the Mediterranean, including Tyre, Sidon, Byblos, and Arvad (Arvad), sent presents. In the N. districts he cut down cedars, which he used on his return in building temples and received the submission of Sangara, king of the land of Hatti. One more expedition **Āšur-nāšir-pal** undertook on the N. of Assyria, traversing the land of Kumuh and again penetrating to the upper reaches of the Tigris.

Āšur-nāšir-pal firmly established the rule of Assyria in the NW. and the N., while he extended his empire eastward and laid the foundations of Assyria's later supremacy in the W. on the coast of the Mediterranean. He was one of Assyria's greatest conquerors; but his rule was one of iron, and his barbarity was exceptional even for his time. He was a great builder. At Nineveh he restored the royal palace and rebuilt the temple of Istar. The city of Calah, which Shalmaneser I. had founded, he rebuilt, peopling it with captives taken on his expeditions. He connected it with the Upper Zāb by means of a canal, and erected two temples and a huge palace, from which his bas-reliefs, now in the British Museum, were obtained (cp above, § 18).

Āšur-nāšir-pal was succeeded by his son Shalmaneser II. who extended the kingdom of his father beyond Lake 860. Van and Lake Urūmīyah. He exercised a protectorate over Babylonia in the S., and his kingdom included Damascus, which he had conquered. During his reign, for the first time in history, Assyria came into direct contact with Israel; he mentions Ahab of Israel as one of the allies of Denhadad of Damascus (cp SHALMANESER II.). His later years were troubled by the revolt of his son **Āšur-dānīn-pal**; but his younger son, Samsī-Rammān, put down the rebellion, and on his father's death succeeded to the throne.

On a monolith of Samsī-Rammān II., now in the British Museum, is an inscription in archaic characters narrating 824. four campaigns of this monarch. He restored order to the kingdom, which had been thrown into confusion by the rebellion of his brother, and, having established his own authority over the territory subjugated by his father, extended it on the E. He routed the Babylonian king, Marduk-balaṣu-ikbi, in spite of the large army the latter had collected, comprising drafts from Elam and Chaldea in addition to his regular troops.

Samsī-Rammān II. was succeeded by his son, Rammān-nirari III.

Two inscriptions on stone slabs from Calah, an inscription on a stone statue of the god Nebo, and an inscription on a tablet from the monument of Nebo-Vinosa, are the only ones, 811. dating from his reign; but these are supplemented by a short notice in the 'Synchronic History,' and a list of 1000 Canon, which adds short notices of the principal events during each year of his reign.

Rammān-nirari III. undertook expeditions in Media, Parsua, and the region of Lake Urūmīyah on the E.; conquered the land of Na'iri on the N.; and subjugated all the coastlands on the W., including Tyre, Sidon, Israel, Edom, and Philistia. Mari', king of Damascus (see BENHADAD, § 3), attempted no defence of his capital. He sent to Rammān-nirari his submission, paying a heavy tribute in silver, gold, copper, and iron, besides quantities of cloth and furniture. A considerable portion of Babylonia also owned the supremacy of Rammān-nirari. In his inscription on the statue of Nebo, he mentions the name of his wife Sammuramat (the Assyrian form of the Greek Semiramis). He was a great monarch. His energetic rule and extensive conquests recall those of Shalmaneser II. his grandfather.

Of the three kings that follow not much is known. 782. Shalmaneser III. succeeded Rammān-nirari, and from the Epitome Canon we gather that he undertook campaigns against Urtaru (Armenia), Itu', Damascus, and Hatarika (Hadrach). He was succeeded by **Āšur-dān III.** This king made foreign ex- 772. peditions. His was a troubled reign. The most important event recorded in his time was the eclipse of the sun in 763 (cp above, § 19, end; AMOS, § 4; ECLIPSE, § 1). The same year saw the outbreak of civil war: the ancient city of **Āšur** had revolted. In 761 the rebellion was joined by the city of Arapha, and in 759 by the city of Gozan. In 758, however, after it had lasted six years, the revolt was brought to an end; Gozan was captured, and order once more restored. The troubles of Assyria during the reign of **Āšur-dān**

¹ KBI 59 ff., RP 2 134 ff.

were aggravated in the years 765 and 759 by visitations of the plague. On his death he was succeeded by Ašurnirari.

754 This king undertook expeditions against Hadrach and Arpad, and later two campaigns against the Zimri, for the greater part of his reign he was inactive. In 746 the city of Calah revolted, and next year a man of

unusual energy usurped the throne, and, assuming the name of Tiglath-pileser, extended Assyrian supremacy farther than it had ever reached. In the reign of Tiglath-pileser III. Assyria came into close contact with the Hebrews, a contact that continued under each of his successors until the reign of Esarhaddon. The events of their reigns and the influence they exerted on the history of Israel and Judah are described in the separate articles on these successive kings.

Tiglath-pileser III. was succeeded in 727 by SHAL-MANESER IV. (*q.v.*), and he in 722 by the usurper SARGON (*q.v.*), to whom succeeded in 705 his son SENNACHERIB (*q.v.*), in 680 his grandson ESARHADDON (*q.v.*), and in 669 his great-grandson AŠUR-BANI-PAL. For the expeditions of the last-named monarch in Egypt, Ham, Arabia, etc. see AŠUR-BANI-PAL. His literary tastes found expression in the collecting of a great library at Nineveh. The Eponym list and his own inscriptions cover only the first part of his reign; his later years are clouded in uncertainty, and the date of his death is a matter of conjecture. The period from his death until the fall of Nineveh is equally obscure. We know the names of two of his sons, Ašur-etil-ilāni and Sin-šar-iškun, who both occupied the throne; but the length of their respective reigns and even the order of their succession are matters of dispute. It used to be assumed that during this period Assyria was entirely stripped of her power and foreign possessions; but this view has now been modified in consequence of recently discovered contract-tablets dated from both northern and southern Babylonian cities according to the regnal years of the last two Assyrian kings. These prove that the Assyrian supremacy in Babylonia continued for some little time at least. Assyria's power, however, was waning. A long career of conquest had been followed by an age of luxury, and her strength was sapped. The Scythian hordes that had swept across W. Asia had further weakened her. Thus, when Nabopolassar, repudiating Assyrian control, allied himself with Cyaxares, king of Media, and their combined forces invaded the country, her resistance met with no success.

34. Decline and fall. Though Nineveh held out for two years, the city was at last captured and destroyed, and Assyria was annexed to the empire of the Medes. The most recent, and at the same time most scientific, work on Assyrian art and architecture is Perrot and Chipiez *Hist. de l'Assyrie* (Paris, 1884). Other works which appeared soon after the discovery of the remains of Assyrian art, and do not attempt a scientific treatment, one of the earliest was Flotta and Flaudin's *Monuments de Ninive*, 5 vols., Paris, 1849-50. The two works of Sir Henry Layard, *Niniveh and its Remains* and *Monuments of Niniveh*, contain a good account of his discoveries. In *Assyrian Discoveries*, Lond. 1875, George Smith has described the results of his own explorations.

For the history of Assyria the principal work is Tiele's *Bab.-Ass. Gesch.* Gotha, 1886-88. Reference may also be made to Hommel's *Gesch. Bab. u. Ass.* Berlin, 1885-88, the *Gesch. Bab. u. Ass.* by Mürdter and Delitzsch, Calw and Stuttgart, 1891, and Winckler's *Gesch. Bab. u. Ass.* Leipzig, 1892. Among English works dealing with the history of Assyria, see George Smith's *Assyria* (SPCK, Oxf. 1875), and Prof. G. Rawlinson's *Five Great Monarchies of the Eastern World*, vols. 1. and 2. Lond. 1871. Both these works have been superseded on several points in consequence of later discoveries.

Assyrian history can be rightly understood only if followed in the inscriptions themselves. Translations of most of the historical inscriptions of Assyria are given in Schrader's *KB.* I. and II. Berlin, 1889-93, each of which contains an explanatory map. A series of popular English translations of Egyptian and Assyrian monuments was founded and edited by Dr. S. Birch of the British

Museum and entitled *RP* (12 vols. Lond. 1873-81), of which vols. i. iii. v. vii. ix. and xi. deal with Assyrian and Babylonian inscriptions. These translations have now, of course, been superseded. In a new series edited by A. H. Sayce (6 vols. Lond. 1888-92) the old methods and plan were not modified. As a collection of all the points in the OT illustrated or explained by the monuments, Schrader's *COT* is still unrivalled.

For works treating of the religion of the Assyrians see BABYLONIA, § 71.

For the student who would gain a more than superficial knowledge of Assyriology it is needless to give a list of works, as this has already been done in Bezdant's *Handb. Ass. Lit.* Leipzig, 1885; the literature since 1886 can be ascertained from the bibliographies appended to the *Z.A.* and to the *American Journal of Semitic Languages and Literatures*, and from the *Or. Bibliographie*. L. W. K.

ASTAD (אֶסְטָא [א]), 1 Esd. 5:13 RV = Ezra 2:12, AZGAD.

ASTAROTH (אֶשְׁתְּרֵת), Dt 14; RV ASHTAROTH.

ASTARTE. See ASHTORETH.

ASTATH (אֶסְתָּא [א]) אֶסְתָּא [א], 1 Esd. 8:36 = Ezra 8:36, AZGAD.

ASTROLOGER (Dan. 1:20 etc., אֶשְׁרָף), RV ENCHANFER; and Is. 47:13 אֶשְׁרָף הַרְבֵּי יָמִים, RV¹⁸⁸⁵ 'divider of the heavens.' See STARS, § 5; also DIVINATION; § 2 § 3; and MAGI, § 3 § 4.

ASTYAGES (Ἀστυαγῆς [BAQ]), according to Theodotus' text of Bel and the Dragon (7. 1), was the predecessor of Cyrus in the kingdom of Persia. See CYRUS.

ASUPPIM and HOUSE OF ASUPPIM (1 Ch. 26:17, אֶשְׁרָפִים; εἰς τὸ ἀσάφειν [A], εἰ. εἰσεφ. [B]; τοῖς ἀσάφειμ [C]; אֶשְׁרָפִים בְּיַד הַרְבֵּי יָמִים, οἰκοῦ ἀσάφειν [A], ο. εἰσεφειν [B], ο. ἀσάφειν [C]; حُجْرَةُ مَغَازِي; RV in each case 'the storehouse.' In Neh. 12:25† AV renders the same word 'the thresholds' [marg. 'treasuries,' 'assemblies']; חֶבְרָא, ἐν τῷ εὐαγγελίῳ με [different vocalisation]; RV 'the storehouses', a word used by the Chronicler to describe certain storehouses situated at the temple gates (Neh. 12:25), perhaps specially the southern gate (1 Ch. 26:15). See TEMPLE.

ASUR (Ἀσούρ [BA]), 1 Esd. 5:33 RV = Ezra 2:51, HARBUR.

AŠUR-BANI-PAL. Though mentioned by name only once or twice in OT (see ASNAPPER), Ašur-bāni-pal is important to OT literature from his deportation of troublesome populations to the region of Samaria (see SAMARIA, SAMARITANS, and cp below, § 12); also from references to his campaigns in Egypt and Arabia in the prophecies (see ISAIAH, ii. § 9, and NAHUM, § 2). He was one of Assyria's greatest kings, and famous not less for his devotion to art and literature than for his extensive conquests. His name, which is best read Ašur-bāni (or bani)-apli, means 'Ašur is the creator of a son.' He was the eldest son of Esarhaddon, and ascended the throne in 668 B.C. His succession had been secured by his having been publicly proclaimed king before his father's death, while his brother, Samaš-sum-ukin, was installed in Babylon as viceroy or tributary prince.

From the moment of his accession he was plunged into a prolonged war in Egypt, for Tarkū (TIRHAKAH),

1. 1st Egyptian king of Ethiopia, in the words of Ašur-bāni-pal, 'forgot the might of campaign. Ašur, Ištar, and the great gods my lords, and trusted in his own strength'; that is, he raised a large army and descended upon Egypt.

The prefects and governors appointed by Esarhaddon fled at Tarkū's approach. He captured Thebes, descended the Nile to Memphis where he fixed his capital, and proclaimed himself king of Egypt. On receiving the news of this disaster, Ašur-bāni-pal determined to recover Egypt. During the passage of his army through Syria and along the coast of the Mediterranean, reinforcements in men and ships, in addition to the customary tribute, were received from twenty-two subject kings of

returning by way of Gambulu, exacted a terrible vengeance from that land.

We now approach the greatest crisis in the history of Ašur-bāni-pal.

On ascending the throne of Assyria he had appointed his younger brother Šamaš-šum-ukin king of Babylon, without renouncing his own suzerainty. Šamaš-šum-ukin, however, was dissatisfied with his dependent position, and resolved to revive, if possible, the relations between Assyria and Babylon. His own resources being insufficient for subjugating Assyria, he began to form a coalition of the neighbouring nations, all glad of an opportunity to strike a blow at their powerful neighbour. The Chaldeans and the Aramean tribes of the coast gave assistance; Ummanigaš, king of Elam, threw over his patron Ašur-bāni-pal, and joined the revolt; Arabia, Ethiopia, and possibly Egypt, sent help. Ašur-bāni-pal did not lose an instant, but set out with the whole of his force to the S.E., where he successfully kept his enemies in check.

Fortune favoured him by neutralising to some extent the assistance which Šamaš-šum-ukin expected to receive from Elam, his most powerful ally. That country was thrown by internal revolution into a state bordering on anarchy, Ummanigaš and the whole of his family having been slain by Tammaritu, who in turn was dethroned by Indabigaš, and only saved his life by flight to Assyria.

Ašur-bāni-pal hastened to attack the allied forces, easily defeated them, and proceeded to besiege the four cities—Babylon, Borsippa, Sippara, and Cutha—in which they had sought shelter after their defeat. The defenders held out stubbornly for some time. When all was over, Šamaš-šum-ukin, to avoid his brother's vengeance, set fire to his palace and perished in the flames.

After stamping out the rest of the rebellion and restoring order throughout Babylonia and Chaldea,

Ašur-bāni-pal directed his forces against Elam, where for the next two or three years he carried on a war with Ummanaldaš II., who had ascended the throne of Elam after slaying Indabigaš, his predecessor. It is true that for a short time during this period Ummanaldaš was driven into the mountains by Ašur-bāni-pal, who set Tammaritu on the throne of Elam in his stead; but, as soon as the Assyrian army had withdrawn, Ummanaldaš came out from his retirement, gathered his forces, and compelled Ašur-bāni-pal again to take the field against him. On the appearance of the Assyrian army Ummanaldaš retired, allowing Ašur-bāni-pal to capture the cities and lay waste the country on his march. At length, however, he hazarded a battle. He met with a signal defeat and was again driven to take refuge in the mountains, while Susa and its accumulated riches fell into the hands of the conquerors.

By the will of Ašur and Ištar, boasts Ašur-bāni-pal, 'into its palaces I entered and sat myself down rejoicing. Then opened I their treasure-houses, within which silver and gold, furniture and goods, were stored, which the former kings of Elam and the kings who had ruled even to these days had collected and placed therein, whereon no other foe besides myself had set his hands; I brought it forth and as spoil I counted it.' He recovered also all the treasures with which Šamaš-šum-ukin and his predecessors had purchased Elamite support. Susa itself was rased to the ground; the royal stores were carried to Assyria; the groves were cut down and burnt, and the temples violated.

After the subjugation of Elam the annals of Ašur-bāni-pal relate a series of conflicts with Arabia (Smith,

9. Arabia. *Hist. of Assur.* 256 ff.). This was the last great war in which this monarch is known to have engaged. At the beginning of his reign he appears to have had friendly relations with the Arabian king Uaite'; but on the revolt of Šamaš-šum-ukin the latter joined the coalition against Assyria. Uaite' himself attacked Palestine, overrunning Edom and Moab, and penetrating almost as far N. as Damascus. Here, however, he was defeated by the Assyrians.

Leaving his camp standing, Uaite' fled alone to Nabatea. He

appears, however, to have surrendered to Ašur-bāni-pal, who threw him into chains, and kept him a prisoner in a kennel with his hounds—Adiyā his wife, and the king of Kedar, his ally, sharing the same fate. The other division of the Arabian army, which had joined the forces of Šamaš-šum-ukin, shared his defeat and perished in Babylonia. Abiyate', their leader, surrendered to Ašur-bāni-pal, kissed his foot in token of submission, and was appointed king of Arabia in the place of Uaite'. No sooner, however, had he returned to his country, than he associated himself with the Nabateans in a series of joint attacks on the frontier of Assyria. Ašur-bāni-pal, therefore, crossed the Tigris with his army, and embarked on a difficult march through the Syrian desert. The Assyrians, after some minor conflicts in which they were successful, eventually engaged the main body of the Arabian army in the mountains of Hukkuru, to the S.E. of Damascus. The Arabians were defeated, Abiyate' and Ayamu were taken, and Ašur-bāni-pal set out for Assyria with immense numbers of captives and herds of cattle; on his return camels were distributed throughout Assyria 'like sheep.'

The annals conclude their record of the wars of **10. Closing years.** Ašur-bāni-pal with an account of his triumphal procession through Nineveh in celebration of his victories.

Ummanaldaš, the Elamite, who had shortly before been captured, Tammaritu and Pa'e, two other captive Elamite kings, with Uaite', the king of Arabia, were fastened to the yoke of the chariot in which he rode. He then entered the temple of his gods, offering sacrifices and praising them for the triumphs they had vouchsafed him over his enemies.

Ašur-bāni-pal probably reigned till 625 B.C.; but of his later years the royal records do not speak. It is impossible to assign with certainty a reason for this silence. Possibly the kingdom, which had been shaken to its foundations by the revolt of Šamaš-šum-ukin during these years, showed signs of its approaching end. It is certain, at any rate, that the Medes, whom Ašur-bāni-pal had earlier in his reign defeated, again showed signs of activity (see PERSIA); and it is probable that during his reign the wild hordes of the Scythians descended from the N. and the N.E., slaying and plundering and carrying all before them. The question whether the empire of Assyria declined only under Ašur-bāni-pal's successors, or had already become disintegrated before his death, is one that cannot be answered with certainty.

Turning from foreign politics to the internal condition of Assyria during the reign of Ašur-bāni-pal, we find the country, superficially, at least, prosperous.

11. Policy and buildings, etc. Though the constant wars of Ašur-bāni-pal must have been a great drain on the manhood of the nation, his almost unvarying success resulted in a great accumulation of wealth—the spoil of the conquered cities. Not only did his generals carry off the gold and silver, and anything else of value that was portable; not only did they drive to Assyria the flocks and herds of the whole country; the population itself they deported. It was the Assyrian policy (see above, § 1) to weaken the patriotic feeling of the conquered races in this way, and so to lessen the chances of revolt. A secondary object of the conquerors, however, had reference to Assyria herself, for huge bands of captives were brought back in chains to replenish the labouring populace at home. Many of these wretches found their way into the possession of private owners; but the majority of them were retained as slaves by the king himself, who, like his predecessors, sought to gratify his desire for splendour and to perpetuate his name by the erection of huge buildings in the capital. The most important of these buildings of Ašur-bāni-pal was his own palace, which he built to the north of that of his grandfather Sennacherib—the remains exist at the present day in the mound of Kuyunjik opposite the modern town of Mōsul. The walls of its chambers he lined with sculptures in relief, representing his own exploits on the field of battle and in the chase, in which the details are most carefully and elaborately carved, while the designs themselves mark the acme of Assyrian art. Ašur-bāni-pal restored the palace of Sennacherib, strengthened the fortifications of Nineveh, and built

or restored various temples throughout Assyria and Babylonia.

It was the custom of the classical historians to represent Ašur-bāni-pal as of an effeminate and luxurious disposition, spending his life at Nineveh in idleness and dissipation. The Assyrian records have dissipated this illusion. Though it is probable that many of his campaigns were conducted by his generals, the king's personal valour in the field and in the hunt is undoubted. His skill as an administrator is testified by his organisation of the immense territory acquired in his victorious campaigns. His palaces and buildings, even to this day, bear witness to his love for art and architecture. It is for none of these things, however, that his memory is honoured above that of other kings of Assyria. He was the first of his nation to make a systematic and universal study and collection of his country's literature, and it is to the library he collected in his palace that we owe the greater part of our knowledge of Babylonian and Assyrian literature and language. L. W. K.

ASYLUM, a sanctuary, within whose precincts those who take refuge may not be harmed without sacrilege.

1. General principle. In early times, holy places, as the homes or haunts of the gods, extended over everything in them the protection of their own inviolability. Wild animals, and sometimes even domestic animals which strayed into them, shared this protection with debtors, fugitive slaves, and criminals, as well as the victims of unjust pursuit or violence. Manslayers sought refuge in them from the sword of the avenging kinsmen, and the right of asylum had an especial importance among those peoples in which the primitive law of blood vengeance was most persistently maintained.¹ The right of asylum was possessed by different sanctuaries in various degrees, depending on prescription, the holiness of the place, and other circumstances; it sometimes extended to an entire city, or even to a mark beyond its walls. Even within the same sanctuary it was, of course, a greater sacrilege to drag the suppliant away from the altar or from the image of the god, or to slay him there, than merely to violate the sacred precincts. In later times the abuse of these privileges led to legal regulation and restriction (cp. *é.g.*, *Tit. Ann.* 36-64 114).

In Israel the oldest law (Ex. 21 12-14) recognises the right of asylum, but denies its protection to the murderer with malice aforethought: 'from beside my altar thou shalt take him to die.'

2. Early practice. Doubtless every altar of Yahwé (Ex. 20 24 f.) was an asylum; but not all were equally venerated, nor would the village high-place protect the suppliant as securely as the more famous sanctuaries. The only historical instances in the OT in which men who fear for their lives take refuge at God's altar are those of Adonijah (1 K. 15-53) and Joab (1 K. 22-34; on the text cp. *Q* and *Klo.*). Adonijah was persuaded to leave the asylum; Joab, by Solomon's orders, was slain at the very altar.

When the drastic reforms of Josiah (621 B.C.) destroyed and desecrated all the old holy places of

3. In Dt. Yahwé in his kingdom except the temple in Jerusalem, one of the necessary measures of the reform laws was to provide a substitute for the asyla thus abolished; since it was obviously impossible that manslayers from the remote parts of the land should escape to Jerusalem. Accordingly, six cities of refuge are appointed—three E. of the Jordan (Dt. 4 41-43),² three W. of it (Dt. 19 2 f.)—with eventual provision for three more, in Philistia, Phoenicia, and Coele-Syria (Dt. 19 8-10). The distinction between manslaughter and murder is clearly defined and illustrated; the case is

¹ So, *e.g.*, in Greece; whilst in Rome, where blood vengeance was early abolished by law, the right of asylum was almost exclusively reserved for slaves.

² These verses are out of place, and probably secondary; see *Die Hebräer*, § 20.

tried at the place where the offence was committed, and if the verdict be murder the elders of the city in whose territory the defendant resides are empowered to take him from the asylum and deliver him to the next kinsman of the murdered man, as the natural executor of the sentence.¹

The post-exilic law also (Nu. 35 9 ff., cp. Josh. 20-2-6) appoints six cities of refuge (עֲרֵי מִקְדָּוֹת), and defines the

4. In P. crimes in substantially the same way; but it differs radically from the Deuteronomic legislation in providing (1) that the manslayer shall be brought from his asylum to be tried before the 'congregation' ('*edah*')—i.e., the religious community of the post-exilic Jerusalem (Nu. 35 12 24 f.)—and (2) that at the death of the high priest the manslayer may without peril return to his home and estates (*vv.* 25 28).² Further, it is explicitly forbidden to compound the crime by taking a bloodwite, or to allow the homicide upon payment of a fine to leave the city of refuge before the death of the high priest.

The cities designated are, E. of the Jordan, Bezer, Ramoth in Gilead, and Golan in Bashan (Dt. 4 41-43

Josh. 20 8); W. of the Jordan, Kedesh in Galilee, Shechem, and Hebron (Josh. 20 7).

5. Cities of refuge. The last three were all venerable sanctuaries,

older, indeed, than the Israelite invasion, and were probably chosen not only on account of their location, but also because they were already asyla of established sanctity. It may be assumed that this was the case also with the cities of refuge E. of the Jordan, of which, with the exception of Ramoth, we know little. Jewish scholars, with some plausibility, maintain that, besides these, all the other Levitical cities, of which there were forty-four, many of them seats of ancient sanctuaries, possessed the right of asylum in a lower degree.³ Whether this system was ever actually introduced in its whole extent is doubtful. Neither in the brief years between Josiah's reform and the fall of the Judean kingdom nor after the restoration did Judah possess more than a small part of the territory contemplated by these laws.

In the Greek period, and later (under Roman rule) many Hellenistic cities in Syria enjoyed the privileges of

6. Parallels. sanctuaries of Apollo and Artemis at Daphne, near Antioch, where the Jewish high priest, Onias, is said to have taken refuge (2 Macc. 4 33 ff., cp. Strabo, xvi. 26), the title *ἀστυ* appears on coins of Caesarea, Pnias, Diocæsarea (Sepphoris) in Galilee, Ptolemais (Acco), Dora (Dor), Scythopolis (Beth-shean), Gadara and Abila in the Decapolis, and others. According to Josephus (*Ant.* xiii. 23), this character was conferred on Jerusalem by Demetrius I.; but 1 Macc. 10 31 knows nothing of it. Cp. ASHTORETH, ASHERAH.

There is no recent and adequate work on this subject. See *Das Gesetz des Asylum in Israel*, by A. P. Bissell (Leipzig, 1902) is a laboured attempt to prove that the laws must all have originated in the age of Moses. See also S. Ohlenburg, *Die biblischen Festen im Zusammenhang*, 1895; and *Antiquitates Sæculæ*, art. 'Asylum' in *Paulys-Realencyclopædie der class. Altertumswiss.* On the wide diffusion of the fundamental conception of asylums, and on its possible origin, see J. G. Frazer's article on 'The Origin of Totemism and Exogamy' in *Fort. Rev.*, April 1899. G. F. M.

ASYNCRITUS (ΑΣΥΚΡΙΤΟΣ [Ti.], -ΥΝΚ, [VH]) is one of five who, with 'the brethren that are with them,' are saluted in Rom. 16 14. They seem to have been Christian heads of households, or perhaps class leaders of some sort.

Asyncritus figures in the list of the 'seventy disciples' by the

¹ In all these particulars there is a striking and instructive resemblance to the Athenian code of Draco (624 B.C.).

² In this provision it is evident that the sojourn in the city of refuge is regarded as a species of exile, a punishment which was removed by a general amnesty at the ascension of the new high priest, the real sovereign. Accordingly, in the Mishna, and in Jewish jurisprudence generally, residence in the city of refuge is called *erlah*, 'exile,' cp. *e.g.* *Makoth*, 3.

³ See Maimonides, *Yad Hanakha*, Hilkoth Ruseh, ch. 8.

Pseudo-Dorotheus as bishop of 'Urbania,' and in that of the Pseudo-Hippolytus as bishop of 'Hycuntia' (doubtless the preferable reading). In the great Greek *Menela* he is commemorated along with Herodion and Agabus on 8th April.

ATAD (אָטאַד), Gen. 50:10. See ABEL-MIZRAIM.

ATAR (אַטאַר [A]), 1 Esd. 5:28 RV = Ezra 2:42, ATER, 2.

ATARAH (אַטאַרָה, 'crown'; אַטאַרָה [B], אַטַרָה [A]), second wife of Jorhannem (1 Ch. 2:26). In genealogical phraseology this signifies that the clan occupied a new region (cp Caleb's wife Ephrath; and see AZUBAH, CALEB), and presumably, like Caleb, it moved farther N., in which case we may compare Atarah with ATROTH-BETH-JOAB, mentioned along with Bethlehem, etc., in 1 Ch. 2:54.

ATARGATIS, TEMPLE OF (ΤΟ ΑΤΕΡΓΑΤΙΟΝ [AV]), 2 Macc. 12:20; cp 1 Macc. 5:42 f. In the walled enclosure of this trans-Jordanic temple the Ammonites and Arabians defeated by Judas the Maccabee, after throwing away their arms, took refuge (see ASHTAROTH, § 1). It was in 164 B.C., the year after the re-dedication of the temple at Jerusalem, which had animated the foes of the church-nation to a deadly persecution (1 Macc. 5:2). Judas had already acted with the severity of the old Israelitish law of war, dealing with the trans-Jordanic towns and the heathen part of their peoples as Joshua had dealt with Jericho (1 Macc. 5:28; cp Josh. 6:24, JE), but with the added zeal against idolatry justified by Dt. 7:12. Naturally, this champion of monotheism, like his successor Jonathan at Ashdod (1 Macc. 10:8), had no scruple in violating the temple precincts. The unarmed multitude he slew (2 Macc.), and the temple-buildings, with all the objects polluted by idolatry, he burned (1 Macc.).

Atargátis (אַטאַרְגַּאָטִיס; cp Vogüé, *Syr. Cent.* n. 3; also *וּתְרַגַּאָטִיס*; cp ZDMG [52] 6 473 f.), to whom the temple belonged, is in *The Speaker's Commentary* (n. on 1 Macc. 5:26) identified with Astarte. This is a natural error, for Carnaim is no doubt Ashteroth-Karnaim—so called from the addition of the town to the worship of various forms of Ashteroth or Astarte. We know, however, that these deities were different; for at Ascalon there were temples of Astarte and of Atargátis (Derkêto) side by side. All that is true is that the first part of the name Atargátis (i.e., אַטַר), is the Aramaic equivalent of the Phoenician and Heb. אַטַרְתַּיִם without the fem. ending (see PHOENICIA); but the religious significance of this Atar ('Atâr for 'Athtar) is profoundly modified by its union with 'Athe (usually written אַתַּה or אַתַּי), a Palmyrene divinity whose name is well attested, and occurs in many proper names.¹ Atargátis is, in fact, that form of Astar[t]e which has absorbed into itself the characteristics of another deity called 'Athe (cp Ashtar-Kamosh in the inscription of Meshah). Lucian, in his *De Dea Syria*, has left us a minute account of the temple and worship of the Syrian goddess (who was no doubt Atargátis) at Hierapolis (Mabug), which illustrates the Jewish hatred of it.

The connection of this 'omnipotent and all-producing goddess' (Apuleius) with sacred life-giving waters has been studied by Prof. W. R. Smith (*RSZ* 172-175). See also Prof. W. Wright, *TSBA* 6 438 f.; Baethgen, *Beitr.* 68 ff. 256 f.; Baudissin, art. 'Atargatis,' in Herzog-Plitt, *PRE* vol. 1, (who notices the different forms under which the goddess was represented); Fuchsstein, *ZA* 9 420; Roscher, *Lex. s.v.* 'Astarte,' 4 (4). T. K. C.

ATAROTH (אַטַרְוֹת), 'crowns' or 'wreaths,' cp Is. 28:1 Zech. 6:11 14, etc.; אַטַרְוֹת [BAL].

1. 1 Ch. 2:54. See ATROTH-BETH-JOAB.

2. **Ataroth-Addar** (אַטַרְוֹת אַדָּר), Josh. 16:5, אַטַרְוֹת וְאֵדָר [B], ar. k. אַדָּר [A], ar. אַדָּר [L]; 18 vs. AV **Ataroth-Adar**, אַטַרְוֹת אַדָּר [B], ar. אַדָּר [A], ar. אַדָּר [L], called also simply ATAROTH, Josh. 16:2, אַטַרְוֹת [B], where אַ is all that is left of אַדָּר, perhaps the present 'Atârâ on the high road from

¹ The oldest center of the worship of 'Athe is thought by Hommel (*FStBA*, 1897, p. 81) to have been the E. of Asia Minor, whence the cult spread to W. Asia Minor and N. Syria.

Jerusalem to Bethel, 3½ m. S. of Bethel, and 6 E. of the upper Beth-horon (see Guérin, *Judée*, 36 f.; but on the other side Robinson, 2 314). As it is a Benjamite locality, we might plausibly identify ADDAR with the Benjamite clan-name ADDAR, ARD [g.v.].

3. An unknown site (אָטַרְוֹת, Josh. 16:7, אַטַרְוֹת [B]) between Janoah and Naarah, on the north-eastern frontier of the territory of Ephraim.

4. A city of Gad (אָטַרְוֹת, Nu. 32:34, אַטַרְוֹת [A] 34, אַטַרְוֹת [F] 34), mentioned in the inscription of Meshah (L. 11, אָטַרְוֹת, as reconquered by him, along with a 'land of 'Atoth (L. 10) dwelt in from of old by the men of Gad.' The name survives as that of a mountain, and a ruined site 'Atârâs, at the top of the Wady Zerka Ma'in, 10 m. E. of the Dead Sea. (Tristram, *Moab*, 272-276.) The OS (Eus. 214 51, אַטַרְוֹת; Jer. 87 17) wrongly identify with no. 1, presumably confusing Joab with Job, whom tradition associates with Ashtaroth-Karnaim. See ATROTH-SHOPIAN. G. A. S.

ATER (אַטַר), § 66; אַטַר [BA]; 'left-handed' ? cp Judg. 3:15 Heb., and the Lat. name Scævola).

1. The line Ater of Hezekiah (אָטַרְוֹת אֶתֶר; אָטַרְוֹת אֶתֶר [BA]), a family in the great post-exilic list (see EZRA, ii. § 9, § 30), EZRA 2:16 (אָטַרְוֹת אֶתֶר [B]), Neh. 7:21 (אָטַרְוֹת אֶתֶר [B]), 1 Esd. 5:17 (אָטַרְוֹת אֶתֶר [A]), אָטַרְוֹת אֶתֶר [B], אָטַרְוֹת אֶתֶר [L], Aterezias, RV ATER of EZEKIAS, ATER HEZEKIAS, AV ATER HEZEKIAH (אָטַרְוֹת אֶתֶר), appears also among the signatories to the covenant (see EZRA, i. § 7, Neh. 10:17 [18] (אָטַרְוֹת אֶתֶר [B]), אָטַרְוֹת אֶתֶר [A], אָטַרְוֹת אֶתֶר [L]).

2. The line Ater (אָטַרְוֹת אֶתֶר [BA]), אָטַרְוֹת אֶתֶר [L]), a family of doorkeepers in the great post-exilic list (see EZRA, ii. § 9) (אָטַרְוֹת אֶתֶר [B]), EZRA 2:42 (אָטַרְוֹת אֶתֶר [A])=Neh. 7:45 (אָטַרְוֹת אֶתֶר [B])=1 Esd. 5:28, JATAL, RV ATAR (om. B. אָטַרְוֹת אֶתֶר [L]).

ATERGATIS (ΤΟ ΑΤΕΡΓΑΤΙΟΝ [VA]), 2 Macc. 12:26 RV, AV ATARGATIS.

ATETA (אַטַטָּה [A]), 1 Esd. 5:28 RV = Ezra 2:42, HAVITA.

ATHACH (אַתַּח, 'inn' ? [Ges.]; NOO [B], NOMBE [TR], אַתַּח [A], אַתַּח [L]), one of the towns of Judah to which David sent a part of the Analekite spoil (1 S. 30:30f). According to Wellhausen, Driver, and Budde, it is the ETHER (g.v.) of Josh. 15:42 (אַתַּח [B], אַתַּח [A], 1 Ch. 2:26 [B], אַתַּח [A], אַתַּח [L]); those scholars decline to decide which of the variants is correct, though Budde retains אַתַּח in the text of 1 S. The *νοο*, *νομβε*, and *παγεθ* of certain MSS may, however, point to a various reading NOB. Guérin visited a place called *Nâbâ*, near *Kharis*, and W. of the *Kh. Kîlâ* (Keilah), which, he thinks, may be meant by *νομβε* (*Judée*, 334p). That there must have been several places called NOB is generally admitted. Klostermann suggests אַתַּח, ANAB (Josh. 11:21), a place near Hebron (Hebron follows), and the question arises whether NOB itself may not be a shortened form of Anâb (see NOB). In Josh. 11:21 אַתַּח gives אַתַּח אַתַּח = אַתַּח, out of which both אַתַּח TOCHEN [g.v.] and אַתַּח Athach may perhaps have arisen by the loss of one letter and the transposition and slight corruption of other letters. It so happens that there are to-day two 'Anâbs S. of Hebron called the great and little. These may represent the Anaboth or Grape-towns. T. K. C.

ATHALIAH (אַתַּלְיָה, § 39, meaning obscure; cp Gray, *III.V* 297; אַתַּלְיָה [B], אַתַּלְיָה [A], אַתַּלְיָה [S], אַתַּלְיָה אַתַּלְיָה [L]; ATHALIAS), in list of Judahite inhabitants of Jerusalem (see EZRA, ii. § 5 [6], § 15 [17] a), Neh. 11:4 = 1 Ch. 9:47, UTHAI (אַתַּלְיָה; אַתַּלְיָה [B]), אַתַּלְיָה [L]), where different links are given between him and Perez.

ATHALIAH (אַתַּלְיָה, אַתַּלְיָה, § 39, 50: 'Yahwé is great'; cp with Che., Ass. *etellu*, 'great, high,' also 'lord,' used of gods and kings [Del. *Ass. HWB*, s.v.], 1. (γῶθολία [BAL], but -θῶλ. [A vid. in 2 K. 11:13]), Daughter of Ahab and Jezebel, and wife of Jehoram.

containing the words *ἀσθη ἡ πόλις τοῦ κυρίου* (Ps. 118:20); this might have belonged to the entrance of a synagogue. The Hellenic belief *ἀπὰς θανόντων οὐκ ἐστὶ ἀνάστασις* was not, in Athens, reduced by the powerful solvent of Judaism. Hence, the moment the apostle uttered the words 'raised from the dead' his audience revolted. Elsewhere his difficulties centred round another point—whether Jesus was the Messiah or not. In Athens, where Jewish thought had no hold, the idea of the resurrection of the body was unfamiliar—least so to the Stoics, although it would be an anachronism to quote here the remarkable approach made by such Stoics as Seneca to Christian modes of thought. Little wonder, then, that Paul's work at Athens was a comparative failure, and that he felt it to be so (Acts 17:34 1 Cor. 2:3). His visit to the city was a mistake; and perhaps it was from the first to be so (Acts 17:34 1 Cor. 2:3). His visit to the city was a mistake; and perhaps it was from the first to be so (Acts 17:34 1 Cor. 2:3). In the hurried departure from Berea (Acts 17:10 ff.), there would be little time for making plans or for choosing modes of transport, and the apostle's abode in Athens seems to have been largely, if not entirely, due to the necessity he was under of waiting for his companions (Acts 17:15 f.).

W. J. W.

ATHLAI (אֲתָלַי, אֲתָלַי, §§ 30, 52, ATHALAI, *q. v.*), in list of those with foreign wives (see EZRA, i. § 5, end), EZRA 10:25 (אֲתָלַי [B], אֲתָלַי [S], אֲתָלַי [A], אֲתָלַי [L]; אֲתָלַי [I]; אֲתָלַי [J]; אֲתָלַי [K]; אֲתָלַי [L]; אֲתָלַי [M]; אֲתָלַי [N]; אֲתָלַי [O]; אֲתָלַי [P]; אֲתָלַי [Q]; אֲתָלַי [R]; אֲתָלַי [S]; אֲתָלַי [T]; אֲתָלַי [U]; אֲתָלַי [V]; אֲתָלַי [W]; אֲתָלַי [X]; אֲתָלַי [Y]; אֲתָלַי [Z]).

ATIPHA (ΑΤΙΦΑ [B.Λ.]), 1 Esd. 5:32 = Ezra 2:54, ΑΤΙΦΑ.

ATONE, ATONEMENT (כִּפֶּר, אֲשִׁילֶכְעִין; אֲשִׁילֶכְעִין, אֲשִׁילֶכְעִין; אֲשִׁילֶכְעִין, אֲשִׁילֶכְעִין). The expression 'to atone' (כִּפֶּר) generally describes the effect of the sacrifices in removing guilt. The pure religious idea of atonement, however, as W. R. Smith remarks (*OTJC* (1) 439) is to be found in the Prophets (and, surely, in Ps. 51; see *zv. i* [2] 2 [3] 7 [8] 9 [10]; also, with כִּפֶּר in 65:3 78:38 79:6). There it has no relation to sacrificing, and we cannot fail to see the appropriateness of this scholar's explanation of כִּפֶּר *kipper* as meaning primarily 'to wipe out.' This is in accordance with Syriac usage; but the only OT passage in which the sense of 'wipe out' is possible is in Is. 28:18, where the reading is much disputed (Houbigant, Lowth, Du. [but not Di., Che.] read *אֲשִׁילֶכְעִין* instead of *כִּפֶּר*), and where it is at any rate open to us to obtain the sense 'wiped out' indirectly from the common reading ('covered over'; cp Gen. 6:14). The usual view is that a propitiation is expressed by *kipper* metaphorically, as a 'covering' (cp Ar. *kafara*: in i. stem *text*, in ii. *expiravit*), as when Jacob, fearing Esau's anger, says, 'I will cover his face with a present' (cp Gen. 20:16 Job 9:24). The Hebraistic usage of the word is well set forth by Driver, *Deut.* 425, 439. W. R. Smith's note in *OTJC* (1) 438-440 also deserves attention; but *OTJC* (2) 381, etc., should here be compared.

In the NT 'atonement' is given by AV for *καταλλαγή*, Rom. 5:11; but RV, with a proper regard to consistency, substitutes 'reconciliation'; cp 2 Cor. 5:18 f., 'the ministry, the word, of reconciliation.' Elsewhere *καταλλαγή* occurs in Rom. 5:10 f. 11:15; cp Col. 1:21; it is hardly one of S's words, being found only in 2 Macc. 5:20. See further, ATONEMENT, DAY OF, MERCY-SEAT, RANSOM, SACRIFICE; and cp WRS, *Rel. Sem.* (2) 237, 320, 437, etc.; also We. *CH* 335 f.

See also Kittish, *Die christl. Lehre von d. Reuefertigung* u. d. *Verwöhnung*, ii.; Weiss, *Bibl. Theol. of NT* 1:110-112; 2:200-216; Dale, *The Doctrine of the Atonement*; Wilson, *Hebrew Lectures on the Atonement* (1899). The semi-popular literature is extensive.

ATONEMENT, DAY OF (יוֹם הַכִּפּוּרִים); later, יוֹם הַכִּפּוּר, in Talmud יוֹם הַכִּפּוּר, 'the great day,' יוֹמֵי הַכִּפּוּר, 'the day,' יוֹמֵי הַכִּפּוּר, 'the great fast'; cp Acts 27:9, Η ΝΗΧΤΕΙΑ—as the only fast enjoined by the law).

The law relating to this day (Lev. 16), which as it now stands connects with the story of Nadab and

1. Analysis Abihu in Lev. 10:1-7, is not in its present form a homogeneous unity.¹ This is evident, not only from the duplicate verses 6 and 11, and from peculiarities of the arrangement, but also from the contents of the law.

The chapter as a whole treats of two quite distinct subjects: viz., (1) the warning of the high priest that he is to enter the Holy of Holies not at pleasure, but only under certain specified precautions; (2) the ordering of a yearly Day of Atonement, for which an exact ritual is prescribed. 1. is contained in vs. 3-4 6:2 13:14, and belongs to 17:2-22, is itself complete. (2) 7:29-34 is a complete direction for the annual observance of a day of fasting and humiliation, on which the sanctuary and people are to be cleansed by 'the priest who shall be anointed' (cp 8:12)—i.e., the high priest of the time; the atonement is supposed by the lawgiver to be carried out in accordance with the ritual (which, originally, immediately preceded it) of Lev. 9, and with the law of the sin-offering laid down in Nu. 15:24. On critical grounds this law also must be held to belong to P.² (3) vs. 5:7-10, 14-28, on the other hand, by which the quite peculiar ritual of the Day of Atonement is prescribed, are the work of a much later hand.

Why and when these various portions of the present law were combined into one are questions that will be discussed elsewhere (see LEVITICUS, § 6 f., and HEXATEUCH); the important fact, gained from critical analysis, is that the Day of Atonement, as far as its ceremonies are described in Lev. 16, is of comparatively recent origin, and the result of a very interesting development.

This conclusion is supported by a variety of considerations. (a) That the pre-exilic worship knew of

2. Stages of development. no such day as is described in Lev. 16 is evident, not only from the absence of all mention of it (an omission which cannot

be accidental, the other high days being referred to), but also from the fact that consciousness of sin and sense of need of a propitiation, which are the necessary conditions of such an institution, first became prominent in the time of Ezekiel (see FEASTS, § 11). (b) The earliest trace of public days of fasting and humiliation in the exilic period appears in Zech. 7:3 8:19; the four yearly fasts there mentioned were commemorative of the national calamities at the fall of Jerusalem, and appear to have been still observed in post-exilic times.

Ezekiel, in this as in other respects the forerunner of the priestly law, had enjoined two atonement-days (the first day of the first month and the first of the seventh, 45:18-20, 3). A young bullock as a sin-offering was to be brought, and with its blood were to be smeared the posts of the house, the four corners of the altar, and the posts of the gate of the inner court—'so shall ye make atonement for the house'; together with this, certain sin-offerings for priest and people are enjoined for the passover-day (Ezek. 45:22).

(c) When we turn to the detailed account of the reading of the law in Neh. 8 f., we find mentioned a joyous celebration on the first day of the seventh month, and a celebration of the Feast of Tabernacles on the fifteenth, without any reference to a Day of Atonement on the tenth.³ On the twenty-fourth day, on the other hand, a general fast with confession of sin was held, by no means in accordance with the ritual of Lev. 16:14-28. This makes it clear that what stood in the Law-book used by Ezra (P₂) was not the Levitical ritual (Lev. 16:14-28), but only a precept of a yearly fast-day with sabbatic rest—in other words, the precept laid down in Lev. 16:29-34.

The change from the tenth to the twenty-fourth at the first celebration is intelligible enough on the assumption that the fast-day was not at first so prominent in the law-book as it afterwards became in Lev. 16:14-28.

Even in the still later list of high days in Lev. 23:27 and Nu. 29:7 we do not find any reference to the specific ritual of Lev. 16:14-28; the tenth day of the

¹ See Benzinger's study, *ZATW* 9:65 f. (189), and cp Stade, *GV* 2:258, and LEVITICUS, § 2.

² The text of Ezek. 45:20 should be emended in accordance with אֲשִׁילֶכְעִין בְּהַרְסֵי בְּהַרְסֵי.

³ Cp. Reuss, *Gesch. der heil. Schr.* (2) 500 f. (Holzinger, *Heb.* 750, note, differs).

ATONEMENT, DAY OF

seventh month is simply marked by fasting, sabbath rest, and the usual sin-offerings. The Day of Atonement described in Lev. 16 must have been the result of a long process of development, and the *pariosope* formed by Lev. 16: 7-10: 14-28 must belong to the very latest portions of P. The precept in Ex. 30: 10 is, of course, a still later addition to the ritual, enjoining that the blood of the sin-offering should also be applied to the altar of incense.

It is a significant fact that, as the later title proves (see above, § 1), the Day of Atonement became the most important in the ecclesiastical year; Jewish feeling in the later age inevitably led to this. Now as to the meaning of the law. The terms of Lev. 16 permit no uncertainty. The law has reference to the thorough purification of the people and sanctuary. The sin-offerings throughout the year have left many unknown or 'secret' sins; and since the people, the land, and, above all, the sanctuary are rendered impure by sin (Lev. 15: 31 Nu. 19: 13-20 Ez. 45: 18 Lev. 16: 10), there was a danger that the sacrificial services might lose their efficacy and even that Yahwé might desert his defiled sanctuary. This was the reason for the institution of the Day of Atonement—that the Israelites might annually make a complete atonement for all sin, and that the sanctuary might be cleansed (Lev. 16: 33). The leading idea of the entire Priestly Law found here its best expression. The Day of Atonement quickened, on the one hand, the people's sense of sin and dread of Yahwé's avenging holiness, and, on the other hand, their assurance of reconciliation and of their renewed holiness. This holiness was guaranteed by their religious system, the efficacy of which, marred by sin, was again restored by this solemnity of expiation. It is the key-stone of the whole system, the last consequence of the principle, 'Ye shall be [ceremonially] holy, for I am holy.'

3. Fundamental principle, etc.

If we turn to the ritual, we can without difficulty discover its fundamental ideas. The high priest, after bathing, puts on plain white linen garments instead of his elaborate vestments, for he is to appear as a humble suppliant before the Holy One whom only the pure may approach. Of course, before he can make atonement for the people he must first do so for himself and for his 'house'—i.e., for the entire priesthood. On entering the Holy of Holies he is to envelop in a cloud of holy incense-smoke the place of God's personal presence, lest he die. The ritual of blood-sprinkling, as far as it is peculiar to this day, is only an elaboration, required by the extreme closeness of the approach to God, of the usual procedure in sacrificial offerings. The conception has been explained by Robertson Smith¹ as an inheritance from primitive ideas about sacrifice. See SACRIFICE, § 22.

The Day of Atonement has been called by Delitzsch the Good Friday of the Law. This can hardly be maintained with regard to its earlier period. Good Friday was not instituted to restore the impaired ceremonial holiness of the community; it had from the first a reference to the individual and to spiritual religion. It was otherwise with the *Yôm Kippûrim*, even if its institutors were not personally opposed to the supplementing and counteracting agency of teachers of a nobler religion. We will not deny that the poetic prayers composed for the 'great day' during the Dispersion touch the Christian deeply from their extraordinary spiritual depth and their sense of individual religion. These prayers, however, are no evidence of the spirit of the original institution. It is not necessary to dwell on the Azazel-ritual. The ritual of the Day of Atonement has grown (this can be shown by literary analysis as well as by archaeological con-

siderations),¹ and the Azazel-ritual is the latest portion of it. We might perhaps suppose that those who continued Ezra's work were not up to his level; but when we look at Lev. 16: 29-30a, which is the earliest part of the law (cp 9: 7 ff.), we still find in it provisions opposed in tendency to the pure religion of the greatest prophets and psalmists. The procedure with the blood may be archaeologically explained so as to minimise the shock which it causes us; it may also be spiritualised, so as to assume a totally new appearance; but it is, as has been stated, out of harmony with that prophetic religion which is restated in Pss. 40: 50-51. It is also in this part of the law that we find an expression which, when correctly explained, condenses the unspiritual elements of the law into a nutshell. It is the expression *Sabbath Sabbathôn*, which may well be more ancient than the day to which it is applied. RV renders Lev. 16: 31 thus: 'It is a sabbath of solemn rest unto you, and ye shall afflict your souls; it is a statute for ever.' Jastrow (*Amor. Lexicon*, *Thes.* 1: 307 [1908]) has made it probable that *Sabbath* and *Sabbathôn* answer—the latter more exactly² than the former—to the Babylonian ceremonial term *Sabbatum*, which means a day of propitiation with reference to the *dies nefasti* of the kings. If so, the terms *Sabbath* and *Sabbathôn*, which are derived from *שבת*, to rest, imply that by the usages on the day to which these terms are applied, rest is given to an angry God.³ The expression 'to afflict the soul' (*innâ nephesh*), used in the same verse, is not less archaic in spirit, even if much later in use;⁴ it was adopted by late theologians as a synonym of the old word *צום*, 'to fast.' This, too, implies an unspiritual doctrine—viz., that by denying the body certain generally desired goods the mind of a deity can be influenced by his worshippers.

To examine the full force of the ceremonies of the Day of Atonement, archaeologically viewed, is not our purpose. Our purpose is to emphasise their strictly propitiatory character. That same character belonged, according to the Jewish liturgy, to the ritual of New Year's Day (*Roš haš-Sanah*). It was believed,⁵ through the influence of Babylonian mythology, that the fate of man was decreed on New Year's Day (the festival of Creation), and that on the Day of Atonement the decree was 'sealed.' No wonder that the nine days which intervened between the first day of the seventh month (New Year's Day) and the tenth (the Day of Atonement) were regarded by the Jews as penitential days. Precisely when this view of New Year's Day as the Day of Destiny began to be taken, we know not. Probably it began among the Jews of the Eastern Dispersion. It gives a new force, however, (1) to the collocation of *Yôm Kippûrim* and *Roš haš-Sanah* in the same month, and (2) to the designation of both days (see Lev. 23: 24) as *Sabbathôn*. To what extent, if at all, the ritual of these days is a revival of primitive custom, is obscure. It is quite possible that in primitive times Israelitish ritual, at any rate in certain places, approxi-

mated rather more to Babylonian than was afterwards the case. One could wish this to be true, for it would then be easier to account for the ceremonies of the *Yôm Kippûrim*, so archaic in spirit, and so contrary to the tendency of Jer. 31 31-34 Ezek. 36 25-27 Mic. 7 19.

At any rate, the propitiation-days of the post-exilic Israelites were nobler than those of the Babylonians, in

as far as they were for the benefit of the whole people, and not merely for that of the rulers. The Babylonian regulations of the 'days of appeasement' (*šabattum* = שַׁבָּט) bear upon the conduct of the king; but, since 'the whole congregation is holy,' those of the *Yôm Kippûrim* necessarily touch the conduct of all faithful Jews and even of 'sojourners' (Lev. 16 29). In this respect the Jewish religion has a much closer affinity with the Zoroastrian than with the Babylonian or the Assyrian. If the provision for giving the uneducated populace a visible sign of the forgiveness of all its sins and the removal of their punishment appears to us barbaric and unspiritual (see AZÄZEL, § 1)—if, too, the populace was only too likely to misinterpret the comprehensive expressions of Lev. 16 16 21 30, and to think that all sins whatever were cancelled by the ritual—we must remember (as regards Azazel) the compromising spirit natural to large educational churches, and (as regards the other point) the difficulty in an Eastern language of guarding against all possible misinterpretations of phrases. A misinterpretation it certainly is when a Mishna treatise declares that—

'The goat which is dismissed atones for all (other) transgressions, as well the light as the grave, the intentional and the unintentional, those foreknown and those not foreknown' (*Shebu'oth* 16).

The analogy of Lev. 4 21 3 etc. Nu. 15 24 distinctly shows that in such propitiatory ordinances it is accidental transgressions (שְׁגָגָה), not deliberate transgressions (בְּדַר, דְּבַר), that are referred to; and in *Yômä* 89 we read, 'He who says, I will sin, the Day atones; to him the Day will bring no atonement.'¹

In NT times the Jews had advanced religiously beyond the contemporaries of Ezra. In the Epistle to the Hebrews and in that of Barnabas

we meet with a Christian gnosis; but there was, no doubt, also an allegorising gnosis that was Jewish. There must have been both poetic symbolisers (cp Ps. 51 7 [9]) and typologists. What Barnabas says (78) about the scarlet cloth tied on the neck of the 'scapegoat' is absurd; but it is an exquisite allegory that the Epistle to the Hebrews suggests in the words (Heb. 10 11 22)—

'Having therefore boldness to use the entrance into the holy place with the blood of Jesus—the entrance which he dedicated for us—a fresh and living way—through the veil, that is to say, his flesh, and having a great priest over the house of God, let us approach,' etc.

Christians are, strictly, no priests (Christ is the 'great priest'); but the rending of the flesh of Christ, which brought him, the perfect one, near to God, enables his followers to make a nearer approach to the divine presence than the greatest priests and prophets of the age before him could make. The entrance of Christ into the heavenly regions through death is likened to the entrance of the high priest once in the year into the Holy of Holies. Of these two entrances the same epistle speaks thus (Heb. 9 12):

'Nor yet through blood of goats and bulls,² but through his own blood, he entered once for all into the holy place.'

The Jewish high priest entered the holiest through the blood of goats and bulls. The goat was the offering for the people; the bullock for the high priest himself (Lev. 16 11 15). Christ entered through his own blood. The high priest went in once in the

year; Christ once for all, as the representative of his people, that they might ever after have free access to God. 'Once for all' (ἐφάραξ) is to be explained by 9 25, 'the high priest enters the holy place every year with blood not his own' (ἐν αἵματι ἑαυτοῦ).

The point is not how many times in the day the high priest entered the holiest, but that he entered on one day in the year. Of course, he went in more than once on the 'great day'; the Mishna says four times—(1) with the incense; (2) with the blood of the bullock; (3) with that of the goat; (4) after the evening burnt-offering, to bring away the censer and the incense-plate. Lev. 16 13-15 also implies more than one entrance.

There is a reference to the ritual in Heb. 13 11, where the death of Jesus outside the gate is compared with the burning of the remnants of the sin-offering without the camp. This, however, as Davidson has shown,¹ disjoins the ritual, and is really a mere isolated analogy.

The treatise *Yômä* (cp also Jos. *Ant.* iii. 10 3 and Ep. Barn. ch. 7) throws much fresh light on the details of the ritual; we must not, however, suppose

7. Details in that it is in all respects literally accurate.

In the Cambridge MS (Palestinian recension) it is called *Masseketh Kippurim*, which is its true title, as the commentary of Maimonides on the Mishna also proves. J. Derenbourg has attempted a restoration of the oldest recension (see below, § 8).

The minute directions for the purification of the high priest need not detain us. Three confessions of sin (*vidduy*) form the most beautiful part of the ritual; they are preserved in *Yômä* 38 4 2 and 6 2, and have passed with slight changes into the Jewish liturgy. In each of these confessions the sacred Tetragrammaton (יהוה) occurs; altogether it was pronounced ten times, and as often as the high priest came to the name those who stood near fell on their faces, while the multitude responded: 'Blessed be the Name, the Name of the glory of his kingdom, for ever and ever.' The first part of the service (including the blood-sprinkling) was gone through close to the Most Holy Place. The rest was performed close to the worshippers, in the eastern part of the court of the priests, north of the altar, where stood two goats and an urn with two lots. The high priest drew the lots, and it was held to be a good omen if his right hand drew forth the lot 'for Yahwè.' To the horn of the 'goat for Azazel' a 'tongue' of scarlet cloth was tied.

The high priest then went to the bullock, over which he had already confessed the sins of himself and his house, and now confessed those also of 'the seed of Aaron, thy holy tribe.' Hearing the censer and the incense, he was seen to disappear within the sanctuary. There he stood alone; he rested his censer on a stone called שִׁטְרִי² which stood in the place of the ark. Outside the Holy of Holies he uttered a prayer; it had to be a short one, lest the people should become anxious.³ Again the rite of blood-sprinkling is performed in the Holiest, and then the 'goat for Yahwè' is sacrificed. A third time the high priest enters the Holiest, and again there is blood-sprinkling in all parts of the sanctuary. Forty-three such sprinklings have purified the sanctuary. But the people at large have to receive the visible sign of forgiveness. The 'goat for Azazel' now becomes prominent. A *vidduy* or confession is uttered over the animal's head, which is now to be led to the precipice marked out for the destruction of the goat. Men of rank from Jerusalem accompany it; cries and curses hasten its progress (see AZÄZEL, § 4). Meantime the high priest puts on his 'golden vestments';⁴ then he puts them off again, and a fourth time (see above) enters the Holiest.

The evening of the 'great day' closed with a banquet for the high priest and his friends, and with dancing in the vineyards for the maidens of Jerusalem. Probably this dance was primitive; it attached itself to the Day of Atonement, as a natural mode of relief to tired human nature (*Taanith* 48). See, further, DANCING, § 8; CANTICLES, § 8.

The treatise *Yômä* (*Mishna*) by Surenhusius; *Yômä* alone ed. Strack; cp Wünsche, *Der bab. Talm.* 1 240 ff.; J. §§ 1-3 l. 6.; §§ 4-8 T. K. C.

ATROTH (Nu. 32:35 AV). See ATROTH-SHOPHAN.

ATROTH-BETH JOAB (אֲתָרוֹת בֵּית יוֹאָב—i. e., 'crowns of the house of Joab'): ΑΤΑΡΘΟΘ ΟΙΚΟΥ ΙΩΑΒ [B] & Ο ΙΩΑΒΑΒ [A]; ΑΤΑΡΘΟ ΒΗΘΙΩΑΒ [L. 1], an unknown locality, mentioned in 1 Ch. 2:54 along with Bethlehem and Netophah, in a Calebite connection; its people were sons of Salma b. Hur b. Caleb (see JABEZ). Salma was the 'father' of Beth-lehem, the burial-place of Joab's father ZERUIAH [q. v.]. Meyer (*Ent.* 147) suggests a connection with the valley of CHARASHIM.

ATROTH-SHOPHAN, AV ATROTH, SHOPHAN (אֲתָרוֹת שׁוֹפְחָן; צוֹפָר [BA], -AN [F], צוֹפָר [L.]). Eus. 214:54), a town of Gad (Nu. 32:35); perhaps one of the two localities in Moab still called 'Attarus'. See ATAROTH, 4.

ATA (אָטָא, perhaps abbrev. of ATHAIAS).

1. Son of the Egyptian JARH, by the daughter of Shechem the Jerahmeelite; his son was NATHAN; 1 Ch. 2:27. (עֲתָא [B], עֲתָא [L], עֲתָא [A]). See JARH, JEROME.

2. One of David's warriors; 1 Ch. 12:11. (עֲתָא [B], עֲתָא [L]). See DAVID, § 11, a, iii.

3. Son of Rehoboam; 2 Ch. 11:20 (עֲתָא [B]).

ATTALIA (ΑΤΤΑΛΕΙΑ [-IA TI. WH]). A town on the coast of Pamphylia, founded by Attalus Philadelphus, king of Pergamus, for the Syrian and Egyptian trade, which it shared with Perga. There has been some discussion about the site, as Strabo (p. 667), enumerating from west to east, mentions Olbia, the river Catarhactes, and then Attalia; from which it would seem that Attalia must be the modern *Laura*. Ptolemy, however, is more exact: he puts it west of the Catarhactes. Thus, it is equivalent to the modern *Adalia*, which is still a port with considerable trade. The town has a picturesque appearance, being perched on the long line of cliffs created by the calcareous deposits of the Catarhactes, which pours over them in torrents to the sea. The remains are almost entirely Roman. The apostle Paul passed through the town on his return from his 'first missionary tour' in the interior (Acts 14:25). It is still a bishopric. [See PERGA, and Ramsay, *Hist. Geogr. of Asia Minor*, 420.] W. J. W.

ATTALUS (ΑΤΤΑΛΟΣ [ANV]). Three kings of Pergamus bore this name; but we are here concerned with the last two—Attalus II., Philadelphus, 159-138 B. C., and his nephew Attalus III., Philometor, 138-133 B. C. The Pergamene kings were all allies of Rome, and the last made the Roman people his heir (see ASIA). In 1 Macc. 15:22 we read that 'Lucius, consul of the Romans,' wrote letters in favour of the Jews to Ptolemy, Attalus, Ariarathes, and others. Attalus II. is probably meant; but, as the date of the letters falls in 139-138 B. C., it is possible that they were sent to his successor. Attalus III. was the son of Eumenes by Stratonice, the daughter of Ariarathes, king of Cappadocia, who was a close ally of the Romans, sharing the fate of Publius Licinius Crassus in the war with the Pergamene pretender Aristonicus, 130 B. C. Josephus (*Ant. xiv.* 10:22) quotes a Pergamene decree in favour of the Jews about the time of Hyrcanus.

W. J. W.

ATTHARATES (ΑΤΤΑΡΑΘ [B], ΑΤΘΑΡΑΘ [A], ΑΘΑΡΑΘΑΘ [L. 1]), 1 Esd. 9:49 = Neh. 8:9, TIRSHATHA.

ATTHARIAS (ΑΤΘΑΡΙΑΣ [BA]), 1 Esd. 5:40, RV = Ezra 2:65, TIRSHATHA.

ATTIRE. For Ezek. 23:15 (אֲתִירָה, *ʾāḥīrām*) see TURBAN; for Jer. 2:32 (אֲתִירָה, *ʾāḥīrām*) see GIRDLE; for Prov. 7:10 (אֲתִירָה, *ʾāḥīrām*) see DRESS, § 1 (4).

1 After **AT** we may assume a separate place-name Ataroth; see ATARAH.

ATTUS (ΑΤΤΟΥΣ [AL]), 1 Esd. 8:29, RV = Ezra 8:2, HATTUSS, 1.

AUGIA (ΑΥΓΙ[Ε]ΙΑ [BAL.]), 1 Esd. 5:3. Not in Ezra 2:61 = Neh. 7:63. See BARZILLAI, 3.

AUGURY ('one who practises augury,' RV Lev. 19:26 Dt. 18:10-14 2 K. 21:6; AV 'observer of times,' אֲבִירָה). See DIVINATION, § 2 (2).

AUGUSTUS (ΑΥΓΟΥΣΤΟΣ [TI. WH]), an honorific title bestowed upon Octavian (27 B. C.), and from him handed on to his successors. It is applied to him, along with the title of CÆSAR (q. v.), in Lk. 2:1; EV. For his reign, in as far as it concerns Jewish history, see HERODIAN FAMILY, 1, and ISRAEL; and for the difficulties raised by Lk. 2:1 with regard to the census, see CHRONOLOGY, § 5:7.

In Acts 25:21-25 the AV 'Augustus' for *σεβαστός* should rather be, as in RV, simply 'the emperor,' or, as in RV^{mc}, 'the Augustus.' The reference is to Nero (see CÆSAR). For 'Augustus's band,' or rather (as in RV) 'the Augustan band' (Acts 27:1 *σπερμαὶ Σεβαστῆς*), see ARMY, § 10.

AURANUS (ΑΥΡΑΝΟΥ [VA]; cp AVARAN), leader of the Assassins in Jerusalem in the time of Lysimachus (2 Macc. 4:40).

AUTEAS (ΑΥΤΑΙΔΑΣ [BA]). 1 Esd. 9:49 = Neh. 8:7, HODIAH, 2.

AUTHORITIES (ΕΞΟΥΧΙΑΙ). 1 Pet. 3:20. See ANGELS, §§ 1, 9.

AVA (אָוָא), 2 K. 17:24 AV; RV AVVA.

AVARAN (ΑΥΑΡΑΝ [ANV]), 1 Macc. 2:5. See ELEAZAR, 7; MACCABEES, 1, § 37; CPÆURANUS.

AVEN (אָוֵן; אֵוֵן [BAQI]) in Hos. 10:8 Am. 1:5, but *ἡλίους ποταμούς* [BVA] in Ezek. 30:12. 1. In Ezek. 30:12 the reference is doubtless to the Egyptian Heliopolis (see ON).

2. In Hos. 10:8 (EV 'the high places of Aven') Targ. Jon. has *בֵּיתֵאָר*, Bethel, which explanation is given by all ancient and most modern interpreters; but, in consideration of the well-attested use of אָוֵן (*aven*) in the sense of 'false worship,' 'idolatry' (see, e.g., Hos. 12:12 [11]), it is a question (1) whether we should not render with G. A. Smith, 'Destroyed are the high places of idolatry, the sin of Israel,' and (2) whether, when we have regard to the parallel passage Am. 7:9, and to the probably not infrequent occurrence of glosses in the MT of the prophetic writings (see, e.g., Mic. 1:5b), the words *הֵמָּה אֵוֵן* should not be either omitted or printed in a different type as an editorial insertion. The passage, as Wellhausen remarks, gains greatly by this omission. Vg.'s reading, *excelsus idoli*, favours the view here taken of אָוֵן. Ibn Ezra paraphrases *בְּבֵית אֵוֵן* 'the high places of the Baals.'

3. In Am. 1:5 Maundrell (1697), Grove, W. A. Wright, and G. A. Smith (with Hitzig) are inclined, in company with **AV**, to identify the 'plain (or broad valley) of Aven' (BIKATH-AVEN; so AV^{mc}) with the great plain between Lebanon and Antilibanus (the so-called *Beká*), in which the famous temple of the Syrian Heliopolis (Baalbec) was situated. The vocalisation אָוֵן will then imply a play on the name—not On, but Aven. This, however, is a far-fetched supposition. On (= Egyptian *Anu*) represents the secular, not the religious, name of the Egyptian Heliopolis (see BETH-SHEMESH, 4). It is very doubtful, moreover, whether the second Heliopolis (Baalbec) was an Aramean city in the time of Amos, and it is a plausible view of Wellhausen that אָוֵן, 'false worship,' has been substituted for the name of some god. Cp Winckler, *AT Unters.* 183, n.

AVENGER (אָוֵן), Nu. 35:12. See GOEL.

AVIM, AVIMS, AVITES. See AVVIM.

AVITH (אִיִּית, in 1 Ch. Kt. עִיִּית; Γεθθαδ[α]M [BADEL]), the city of Hadad I., king of Edom, Gen. 36:35 1 Ch. 1:46 [Γεθθαδ[α]M [A], εγθθ [L]]. G's reading of the Hebrew must have been אִיִּית, Gittaim, which is clearly correct. The city of the next king had a name of similar meaning (Masrekah). See GITTAIM. T. K. C.

AVVA, AV AVA (אֲוָוָא or אֲוָוָה; Vg. *Avvah*); 2 K. 17:24 (אֲוָוָה [BA], אֲוָוָה [L]). RV; also **Ivvhav**, AV IVVAH, אֲוָוָה (omitted or only represented in corrupt form in G; Vg. *Avva*); 2 K. 18:34 אֲוָוָה [A]; not in G¹. 19:13 (אֲוָוָה [B], אֲוָוָה [A], om. L) = Is. 37:33 (אֲוָוָה [B], אֲוָוָה [A], om. L) = Is. 37:33 (אֲוָוָה [B], אֲוָוָה [A], om. L). In the latter group of passages the punctuation implies an exegetical mistake (see commentators on Is.); the name throughout should be Avva or Avvah, and it used to be thought that the city referred to the same as that from which the king of Assyria brought colonists to the 'cities of Samaria' (2 K. 17:24). It is clear, however (Wi. *AT Untersuch.* 101 f.), that 2 K. 17:24 31 have been interpolated by some one who supposed SEPHARVAIM [q.v.] in 2 K. 18:34 19:13 to be the Babylonian city of that name. It is only in the speeches of Sennacherib's envoys that Avva has a right of existence; 'Avva or 'Avvah, however, is surely a corruption of 'Azzah (אֲזָח), 'Gaza.' Tiglath-pileser, when he conquered Gaza in 734 B.C., appears to have introduced the cultus of Ašur (Wi. *GBA* 228, 333). 'Where,' then, 'are the gods of Sepharvaim and of Gaza?' (So Che. *Exp. Times*, June 1899.) T. K. C.

AVVIM (אֲוִיִּים, so RV; AV AVIM, AVIMS, AVITES [Avvites, RV]). 1. According to Dt. 2:23, the Avvim inhabited the Philistine coast 'as far as Gaza' before they were 'destroyed' by the Caphtorim—i.e., the Philistines. The same late writer, in whom the antiquary's interest is prominent,¹ states that the Avvim dwelt in villages or settlements (עֲרָבִים; see HAZOR); G and Vg., however, read אֲוִיִּים, 'the Hivites' (αἱ εἰσθαῖ [BAFL]; *Hevati*). In Josh. 13:2-6 (an editorial insertion which expands the simple statement of JE in v. 1) we find the Avvim again introduced, and described (if RV is right) as belonging to the S. of Philistia; probably, however, 'on the south' belongs to the whole region defined in vv. 2-3. Here G and Vg. once more read 'the Hivites.' Sir G. Grove (in Smith's *DB*) suggests that the Avvim may be identical with the Hivites (cp G Vg. above); but the latter name is uniformly found in the singular (הִיִּת). The word might, to a Hebrew ear, mean, yet probably does not mean, 'ruins' (cp IIM). Not improbably it is a mutilated form of עֲרָבִים, 'Arabians' (Che. *Exp. Times*, June 1899). The Avvim (so-called) were Bedawin who had begun to adopt a settled life.

2. אֲוִיִּים, with def. art., 'the ruins' (אֲוִיִּים [B], אֲוִיִּים [AL], Vg. *Avva*), an unidentified place in Benjamin (Josh. 18:23). It is mentioned in immediate connection with Bethel and Parah, and on this account has been conjectured by Knobel to be the same as Ai.

3. In Josh. 15:20 G¹ reads 'Avvim' for 'Iim.' See IIM (1).
4. The people of AVVA (q.v.). 2 K. 17:31. G again of אֲוָוָה [BAL] (there is a second rendering, אֲוָוָה in L); Vg. *Hevati*. T. K. C.

AWL (אֲוִלָּה, lit. 'borer'; ὀπθῆσιον [BAFL]). An instrument for boring, mentioned in the description of the 'law of slavery' (Ex. 21:6 Dt. 15:17). It probably resembled the Egyptian boring instruments depicted in Kitto (s.v.), or those more recently discovered by Bliss at Tell el Hesi (see *A Mound of Many Cities*, 81). Such instruments were used by workers in leather (see Erman, *Life in Ancient Egypt*, 450 f.). Cp SLAVERY.

AWNING (אֲוִנָּה), cp Gen. 8:13, Ezek. 27:7 RV, correcting the punctuation (אֲוִנָּה), AV 'that which covered thee'. Cp DRESS, § I (4).

¹ Cp Kue. *Hex.* 117-119; Mey. *G.d* 1:217 (§ 179).

AXE. From the rude stone chisels and hatchets ('celts') of palaeolithic man, bronze and iron axe, hatchet, tomahawk, and adze were gradually developed. Various early forms of these implements (needed alike in war and in peace) are found in our museums of Egyptian and Babylonian antiquities; the monuments also give ample evidence of their existence. See HANDICRAFTS and WEAPONS.

Of the OT words for 'axe,' three at least may be nearly synonymous:

1. אֲזָח, *gazzan* (*gazzaris*); Dt. 19:5 (*ἀξίον*); 20:9 (*ἀξίον*); 1 K. 6:7 (*ἀξίον*); Is. 10:15 (*ἀξίον*), everywhere an implement for felling trees or hewing large timber for building. The word is used thrice in the Siloam inscription (*ll.* 2, 4), in the sense of a quarryman's or miner's pick. On 2 S. 12:31 2 K. 6:5, cp IRON, § 2.

2. אֲזָח, *gazzan*, *gazzaris* (Judg. 9:48 Ps. 74:5 1 S. 13:20 Jer. 46:22), perhaps specially used for felling trees; if so, it would have a heavier head than the *gazzan*.

3. אֲזָח, *gazzan*, *gazzaris*, Ps. 74:6; in Tg. Jer. 46:22 for Heb. אֲזָח. RV gives 'hatchet,' apparently to suggest a diminutive axe. G, Sym., Pesh., however, read, אֲזָח אֲזָח 'its carved work,' but אֲזָח אֲזָח 'its gates.' The rather improbable word אֲזָח אֲזָח should perhaps be אֲזָח אֲזָח (Che. *Pz.* 2), and in the light of the Tg. we should emend אֲזָח אֲזָח to אֲזָח אֲזָח 'two-edged' (Herz, Che. 2), 'with two-edged axe.' Somewhat different from these, and probably adze-shaped, is:

4. אֲזָח, *gazzan*, *gazzaris* (HNAQ, reading אֲזָח אֲזָח, *gazzan* in Jer. 10:3 Is. 44:12 (*gazzan*, *lim*, AV 'tongs') and by emendation of the text in Is. 10:33 (Duhm) and Zech. 11:3 (1) (see FOREST). Kimhi understands something lighter than the *gazzan*, or axe. In Jer. 10:3 *ma'asid* is a tool suitable for fashioning or carving wood.

Two other words are doubtful.

5. אֲזָח in Ezek. 26:9, EV 'axe,' an insecure rendering. The text is possibly corrupt (see Co., *ταῖς μαχαίραις* [BAQ], *τοῖς οὐραῖς* [1906] f.).

6. אֲזָח, 2 S. 12:31 (*ὑποστῆσις* [A]) = 1 Ch. 20:3, אֲזָח, which Berth. and Kittel conform to Sam. The text, however, perhaps needs more extensive emendation. Che. reads אֲזָח אֲזָח a marginal correction of the אֲזָח (cp אֲזָח) which found its way into the text (*Exp. Times*, Nov. 1898, p. 365). See SAW.

Of the NT names the *ἀξίον* of Mt. 8:10 Lk. 3:9 is the woodman's axe; but Rev. 20:4 (*παλαιστήριον*; cp G 1 K. 5:18) refers to the axe of the headman (*στέλεον*).

Axes were among the emblems of high rank in Egypt and at Mycenae (see the axe figured in Erman, *Egypt*, 73; Schliemann, *Mycenae*, 252). In the OT it is rather the mace that is the favourite emblem of sovereign power (see ROD). There is, however, a sarcastic passage in Bar. 6:15 which suggests that the axe could be an emblem of divinity; and we may perhaps illustrate it by Frazer's learned note on Paus. x. 141. The double-headed axe is characteristic of so-called Hittite sculptures. The Labrandean Zeus of Caria also is represented on coins as carrying a double-headed axe (*Iabrus*=axe in Lydian; Plut. *Quaest. Graec.* 45). There appears on the coins of Tenedos a similar axe, which, being generally accompanied by a cluster of grapes, may be a symbol of the worship of Dionysus. Cp also Ohnefalsch-Richter, *Agrippos*, 1:257.² Of course, the bow and the sword, not the axe, are the emblems of Yahwé, though in Ezek. 9:2 the supernatural agents of Yahwé carry mauls (or like weapons). See BATTLE-AXE.

AYEPHIM (אֵיִפִּים), the rendering of RV¹⁹⁰⁶ in 2 S. 16:14, where the text has, 'and the king and all the people that were with him came weary.' So G, ἐκλελυμένοι [BL], ὁ ἐκλελυμένος [A]. The name of

¹ Cp 1 K. 19:17 as it stands does not make sense. For proposed emendations see Che. (*SBOT*), Isaiab, Heb., Duhm, Di-Ki.

² With a terrible crash' (בְּהִרְעָרְעָה) is only a conjectural rendering of MT.

³ Perhaps, however, the axe was depicted as a survival of the time, before the introduction of coined money, when it may have been the unit of barter (Ridgeway, *Origin of Metallic Currency*, etc., 317 f.). Perhaps too the 'tongue' (אֵפִים) of gold in Josh. 7:1 was in the shape of an axe; see *Exp. Times*, Nov. 1897, p. 61.

some place seems to be required by the context. If *Ayyahim* be indeed a place-name, the locality it indicates remains unidentified. On the other hand, it may be a corruption, or the place-name may have dropped out. Cp *W. e. in loc.*; Ⓢ adds *παρά τῶν Ἰσραηλιτῶν*.

G. A. S.

AYYAH (אִיָּיָהּ [Ba. Gl.]), 1 Ch. 7:28† RV⁹⁸ = AV GAZA [7:2, 2]. See AL. 1.

AZAEI (αζαηαι [BA]), 1 Esd. 9:14 = Ezra 10:15, ASAPH, 4.

AZAEIUS (αζαηαιος [B]), 1 Esd. 9:34 = Ezra 10:41, RV AZAREEL, 5.

AZAL, or rather RV AZEL (אֲזַל; אֲזַל [BNI]), אֲזַל [AQ], the point to which the cleft of the mountain is to reach when Yahwé descends upon the Mt. of Olives in battle (Zech. 14:5). This place, presumably situated near Jerusalem, is often identified with the equally obscure BETHEZEL. Kohler, Wright, and others (after Vg. Symm.), with less probability, take אֲזַל to be an adverbial expression, 'very near, hard by' (cp Osh. § 1677; but see also König, § 330 f. [7]). Clermont Ganneau thinks of the Wady Yásil, a little valley on the right of the 'Ain el-Löz, in the Wady en-Nâr (*PEFQU.*, 1871, p. 101).

AZALIAH (אֲזַלְיָהּ, εὐσεβίου [AL]), father of Shaphan the secretary, 2 K. 22: 6; εὐσεβίου [B] = 2 Ch. 24: 6; εὐσεβία [BA].

AZANIAH (אֲזַנְיָהּ, § 32, 'Yahwé weighs,' cp Jaazaniah; אֲזַנְיָהּ [BA], אֲזַנְיָהּ [B], אֲזַנְיָהּ [L], אֲזַנְיָהּ [I.]), a Levite signatory to the covenant (see EZRA, i. § 7), Neh. 19: 1 = I.

AZAPHEION (αζαφειων [B]), 1 Esd. 5:33 AV = Ezra 2:55 RV, HANNOPIERTH [7:2, 2].

AZARA, RV ASARA (αζαρα [BA]), a family of NETHINIM mentioned after Phinees (= P^hhaseah) in the great post-exilic list (see EZRA, ii. § 61, 1 Esd. 5:33†, Unmentioned in ¶ Ezra 2:40 Neh. 7:51).

AZARAEI (αζαρηαι [BA]), Neh. 12:36 AV, RV AZAREEL, 4.

AZARIAS, 1. AV SARAIAS, 1 Esd. 8:1 (αζαρηαιος [B], αζαρηαιος [AL]) = Ezra 7:1, SERAIAH, 7.

2. AV AZARIAS (2 Esd. 1:1); see AZARIAH, 3.

AZAREEL, or rather, as in RV, **Azarel** (אֲזַרְעֵל, § 28; 'God helps'; εζρηηλ [AL], cp AZRIEL).

1. One of David's warriors (1 Ch. 12:6; αζαρηηλ [B], εζρηηλ [A]; εζρηηλ [L], See DAVID, § 11, a. iii).

2. ONE OF THE SONS OF HEMAI (see LEVI), 1 Ch. 25:18 (αζαρηηλ [B]; αζαρηηλ [L]; cp UZZIEL).

3. A Debraie 'prince' under David (1 Ch. 27:22; αζαρηηλ [B], αζαρηηλ [L]). See DAVID, § 41, e. i.

4. A priest in list of inhabitants of Jerusalem (see EZRA, ii. § 5 [4], § 15 [1 a]), Neh. 11:23 (αζαρηηλ [B]); in the profession at the dedication of the wall (see EZRA, ii. § 13 [2], Neh. 12:36, AV AZARAEI, αζαρηηλ [B*], αζαρηηλ [B*] ρ SHUPSETI.).

5. In list of those with foreign wives (see EZRA, i. § 5, end), Ezra 10:41 (αζαρηηλ [B], αζαρηηλ [B]) = 1 Esd. 9:34 (SERAI, RV EZRAI, εζρηηηλ [BA], εζρηηηλ [L]), apparently repeated as AZARAEI (αζαρηηλ [A], αζαρηηλ [B], om. L).

AZARIAH (אֲזַרְיָהּ, §§ 28 84 [or אֲזַרְיָהּ]; in nos. 1, 2, 6, 7, 8, 13, 15, 19, 20; cp Baer on 1 Ch. 2:38, 'Yahwé helps'; cp ELEAZAR, AZRIEL; αζαρηαιος [BA]).

1. b. Zadok; priest, temp. Solomon, 1 K. 4: 4 (αζαρηαιος [B]). See BEN-HUR.

2. Chief priest, temp. Azariah (2 Ch. 26:17-20).

3. Chief priest, temp. Hezekiah (2 Ch. 31:10-13).

In 1 Ch. 6:9-14 (5:35-39) the name of Azariah is borne by the twelfth, the fourteenth, and the twentieth in descent from Aaron in the line of Eleazar (1 Ch. 9:11 13 αζαρηαιος [B]); of the fourteenth it is said that he 'executed the priest's office in the house that Solomon built in Jerusalem' (1 Ch. 6:10 f. [5:36 f.]). Omissions and transpositions allowed for, the three Azariahs in this series may be held to be identical with nos. 1, 2, and 3 above; at

the same time, it is difficult to suppose that the Hilkiah of 1 Ch. 6:11 f. (5:37 f.) should be distinguished from the Hilkiah of 1 Ch. 9:11 and Ezra 7:1 (ζαρηου [B]); if we identify these, Azariah (3) was a contemporary of Josiah, not of Hezekiah. This name appears also as Azarias, Azaraias, Aziei, Ezarias, and Ezias.

4. Expositor of law (see EZRA, ii. § 13 f., cp L § 8; il. § 16 [L], § 15 [L.]). Neh. 8:7 (om. BZA) = 1 Esd. 9:46 (AZARAIAS) and signatory to the covenant (see EZRA, i. § 7); Neh. 19:11 (αζαρηαιος [B] = AZA); ζαρηαιος [B*]. See also Neh. 2:23 (αζαρηαιος [B]), 24 (αζαρηαιος [B]), οίκου αζ. [L.]). He is apparently the Hilkiah of Neh. 12:11.

5. A Kothathite Levite (1 Ch. 6:36 [31], αζαρηαιος [B]), cp 1 Ch. 26:12, 22, 23, 24. In 1 Ch. 6:36 [31] his place is taken by I. AZARAI.

6. b. Nathan, supervisor of Solomon's twelve prefects (1 K. 4:5). Probably he had to see that the contributions of the different departments were punctually furnished. His father was most likely the well-known prophet who in 2 S. 12:1 is called simply Nathan (so Ew., Wel., Klo.). Others (e.g., Hübner) make Azariah Solomon's nephew; cp 2 S. 14 (8) οπιεζαρηαιος [B*]. See, however, ZADOK.

7. A son of King Jehoshaphat, twice enumerated (as Azariah and Azariahu) in 2 Ch. 21: 2, but omitted in B [B].

8. A son of Jehoram, king of Judah in 2 Ch. 22:6 (αζαρηαιος [B]); but it is clear from 2 K. 8:29, as well as from 2 Ch. 22:1, that AZAHIAH [2] is meant. In 2 Ch. 21:17 he is called JEHOAHIAH (7:7, 3).

9. King of Judah; otherwise known as UZZIAH (7:7, 1).

10. One of the 'three children,' companions of Daniel; otherwise called ABEDNEGO (7:7.) (Dan. 1:6 7 11 19 Song of Three Children, v. 66 [B], Theod. Dan. 3:88), AZARIAS, 7).

11. A Judahite, son of Ethnan, 1 Ch. 2: 2† (αζαρηαιος [B]; αζαρηαιος [A]).

12. A Jerahmeelite, 1 Ch. 2:38 f. (αζαρηαιος [B]).

13. b. Obed, a prophet of Judah, whose prophecy to King Aza is recorded in 2 Ch. 15:1-8. The prophecy is attributed to Obed in v. 8.

14. Son of Jeroham; one of the captains who were associated with Jehoiahad in deposing Athaliah (2 Ch. 23:1).

15. Son of Obed; another of the captains associated with Jehoiahad (2 Ch. 23:1; cp 1 Ch. 2:38 f.).

16. Son of Hoshai; an opponent of Jeremiah, Jer. 43:2 (αζαρηαιος [B*]). Cp HANNOPIERTH, 2.

17. Leader (see EZRA, ii. § 82) in the great post-exilic list (7a, ii. 9), Neh. 7: 4 (αζαρηαιος [B]), -pre [A]) = Ezra 2:2, SERAIAH; see EZRA (αζαρηαιος [B*], αζαρηαιος [A*], L).

18. In procession at dedication of wall (see EZRA, i. § 13 g), Neh. 12:33, ζαρηαιος [B] (see Baer), cp (4).

19. An Ephraimite, temp. Ahaz, who took part in restoring the captives of Judah, 2 Ch. 28:12 (αζαρηαιος [B]).

20. b. JERAHMEEL, a Merarite Levite, 2 Ch. 23:12 (ζαρηαιος [BA]).

AZARIAS (αζαρηαιος [BA]), the Greek form of AZARIAH.

1. 1 Esd. 9:21 = Ezra 10:21, UZZIAH, 3.

2. In list of Ezra's supporters (1 Esd. 9:43), wanting in B [B]. 84; see *Be. ad loc.*

3. 1 Esd. 9:48 = Neh. 8:7, AZARIAH (4).

4. RV AZARIAS (2 Esd. 1:1), b. Helkias; see AZARIAH (3).

5. The name assumed by the angel RAPHAEL (7:7) when accompanying Tobias (Tobit 1:5 2:6 3:1 8:9).

6. A captain in the army of Judas the Maccabee, 1 Macc. 5:18 56:60 (in 7: 56 ζαρηαιος [AR]).

7. Song of Three Children, 65 (B Theod. Dan. 3:88); see AZARIAH (10).

AZARU (αζαρου [B]), 1 Esd. 5:15 RV; AV AZURAN.

AZAZ (אֲזַז, οζοζ [BA]); but L gives ιαζαζ = i.e., Joazaz; cp Azaziah, a Reubenite name (1 Ch. 8:3†).

AZAZEL (אֲזַזְעֵל).¹ Of the two goats set apart for the great Day of Atonement (see ATONEMENT, DAY 1. LITURGICAL), one was chosen by lot for a sin-offering (Lev. 16:8-10). After the sin-offering had been made in behalf of the people, the high priest was to lay both hands upon the head of the goat for 'Azâ'zel, and confess over it all the sins of the Israelites (cp the confession of sin in Mishna, *Yômâ* 6z), laying them on its head and sending it out into the wilderness to Azâzel (v. 21 f.). The meaning of this act, which is further described in the Targum of pseudo-Jonathan, is clear. The goat symbolically bears away the sins of the people. Something analogous is found in Lev. 14:4 f., where, for the purification of the leper, one bird is to be killed, and the other, charged with the disease, is to be let loose

¹ AV renders 'scapegoat.' For the renderings in B, see col. 395, note 7.

into the open field. Cp also *Lech. 5 ff.*, where sin is carried away bodily into the land of Shinar.¹

The meaning of Azazel is much disputed; it is, of course, a subject closely connected with the inquiry into the origin of the custom. It is at least

2. Who was certain that, as Azazel receives one goat while Yahweh receives the other, both must be personal beings.

The theory of the Jewish interpreters (Tg. ps.-Jon., Rashi, Kimbi; cp Ibn Ezra's references to current views), that Azazel is a place in the wilderness, is inadmissible; and equally so are the views of Aq., Symm., Jer., AV, that it means the goat itself (ἡ ἀθωμένη ἀνομιὰ καὶ ἡ ἀνομιὰ, cp *ibid.* 1205, 'scape-goat'), and of Merx in Schenkel's *Bib. Lex.* 1 256, and others, that it is an abstract term = 'complete removal or dismissal' (from אָזַז), a view probably taken by Q.²

It seems most natural to connect the belief in question with the demonology and angelology which developed so largely in the post-exilic age (*Enoch* 67:8-9:104). One group of interpreters, on this view, take Azazel as a prominent member of the class of se'irim, or demons of the field and the desert, to whom sacrifices were offered in post-exilic times (Lev. 17:7; see SATYR, § 2),—to whom possibly all the sins of the people with their evil effects were symbolically sent every year (so, with various modifications, Ew., Di., Dr. [*Expos.*], Now., Benz.). We need not, however (with the first three scholars), regard the conception as a primitive one, or as having been taken over by the religion of Yahweh from an earlier stage; and least of all is there any imitation of the symbolic vengeance taken by the Egyptians on Set-Typhon³ (see Brugsch, *Relig. u. Mythol. d. alt. Äg.* 710). On the other hand, Cheyne ('The Date and Origin of the Ritual of 'Azazel' in *ZATW* 15 153-156 [95]) considers it to have been one of the objects of the ritual 'to do away with the cultus of se'irim by substituting a personal angel for the crowd of impersonal and dangerous se'irim.'⁴ His arguments for this very attractive view are (a) the form of the name (deliberately altered from אָזַז, 'God strengthens'; cp וְיָזַק, 1 Ch. 15:21), which seems to be akin to that of the other names of angels; and (b) more especially the passages of the Book of Enoch referring to Azazel as a leader of the evil angels (Gen. 6:24). 'Azazel is therefore of literary not of popular origin; he is due to the same school of speculative students of Scripture to which we owe the other names of angels, good and evil, in the later literature.' In any case, we must admit that the old interpreters who identified Azazel with Satan⁵ had some plausibility on their side (Orig., *Cels.* 6:305; Iren. *Her.* 1:12, followed by Spencer, Hengstenberg, Kalisch, and Volck). We may at least venture to say with Reuss⁶ that 'the conception of Azazel lies on the way which led later to that of the devil.' For Azazel is certainly described as in some sense a being hostile to God.

L. B.

It is strange that so many modern critics should have failed to comprehend the ritual of the scapegoat, and

3. Recent criticism. have rejected with much positiveness the name only natural explanation of the name Azazel, so that it has become a kind of dogma that אָזַז is not from אָזַז, but either a weakened form of אָזַז, meaning 'averruncus,' or 'porro abiens,' or 'amotio' (Ol., Merx, Stade, Kautzsch-Ges., Volck),⁷ or else a broken plural of difficult interpretation

¹ For extra-biblical parallels, see below, § 3; also Ew. *Ant.* 258; WRS, *Rel. Sem.* 422 [and for an Assyriological explanation of the reference to the wilderness, see RITUAL, § 10].

² Cp, however, below, note 7.

³ This view has left a trace in Smith, *DB* 1 207, but has received no sanction from Di. or Dr., whose names are mentioned. Against it see Diestel, *Zf. hist. Theol.* (66), pp. 159 ff.

⁴ Prof. G. F. Moore suggests a reference to Nachmanides on Lev. 16:8.

⁵ The Rabbinic identification of Satan with Samael as 'chief of the Satans' (*Midr. R.* on Dt. 11:3) may here be chronicled.

⁶ *Ueber die Schichten des A.P.*, 301.

⁷ Some critics refer to it as having initiated the theory of an abstract formation. Certainly in Lev. 16:10, ὁ ἄθεός renders

ἀθεός ἐστὶν τὴν ἀνομιάν; and in 26, ἐὶς ἀθεόν. What the

(perhaps some particular class of unfriendly demons; see Steiner in Schenkel, *Bib. Lex.* 5 599, and Bochart)¹ The truth is that the old derivation of Azazel from אָזַז, 'to be strong' (see Tg. ps.-Jon., Saadia), needed to assume a new form in order to commend itself.

The explanation of the name as אָזַז אָזַז (which was retracted by Diestel's author) implies an un-Hebraic mode of formation, says Di., and the names of angels compounded with אָזַז belong to the later Jewish theology. The former objection is not absolutely decisive; the name Abirel in *Jubilees* seems to be אָזַז אָזַז (see ABRECH). Still, there is no necessity to follow Diestel; the later Jews could form names correctly, and the explanation offered above, which, with the connected theory, may claim to be virtually a new one, is not open to Di.'s objection. Di.'s second objection points the way to the true reason why modern scholars have often given such far-fetched and improbable (however learnedly justified) etymologies. They felt that a name formed on the analogy of Michael and Gabriel must be late; but their theory compelled them to suppose that Azazel was early, and that the name Azazel in *Enoch* (like Belial and Beelzebub, Delitzsch ventures to add) was simply borrowed from the OT.² Thus the light thrown on the name by the Book of Enoch was missed. Nor was sufficient use made of the Mishna treatise called *ḥōmā*, with its strange but not imaginary details, although the description comes from a time not very far removed from that of the later portions of the priestly code. Nor did critics give heed enough to the facts of comparative folklore, which illustrate certain details in the *ḥōmā*.

The more we study the Priestly Code, the more we are struck by the combination of firmness and laxity which its compilers display. They are firmness itself as regards the essential principles of the law,³ but very compliant to minor popular superstitions. Nothing, therefore, can be more probable than that the legal authorities to whom the later portions of Lev. 16 are due gave their sanction to a custom which it had perhaps been found impossible to root out, on condition of its being regulated and modified by themselves. Assuming this to have been the case, we can explain the name Azazel, and even account for the spelling, which has struck many scholars as inconsistent with the etymology אָזַז אָזַז. From the point of view here adopted—viz., that the priestly code is not Mosaic, but a combination of diverse elements due to many different persons in the exile and the post-exilic periods, and framed in a statesmanlike, compromising spirit—there can be no doubt that the view here mentioned is correct. There is no uncertainty as to the meaning of the name Azazel, and very little as to the origin and significance of the rite.

To supplement the account of the present writer's theory given above, it may be said that, like Diestel 4. Jewish superstitions. formerly, he opposes the widely received view that Azazel was a

κακοδαίμων to whom the sin of the people and the resulting calamities were sent, and that the belief goes back to pre-exilic times.

The first part of this view was that of Beninger (*Arch.* 478) in 1891; it is, however, scarcely tenable. The sultan of the *ḥōmā*, to whom the se'irim propitiated by the Jews in post-exilic times correspond (see SATYR, § 2), has no personal name; and his subjects are impersonal. If Azazel were a demon we should hear of him in other parts of Leviticus. Nor is it likely that even a later legislator would have adopted Azazel as an evil demon.

translator means by this, however, is ἀποεργάτωτος (so Theodoret, *Quaest.* 22 in Lev.). In short, he agrees with Aq., Symm., Jer. in deriving the name from אָזַז and אָזַז. This gives the right interpretation of ἀνομιάναιος (BAFL), which answers to Azazel in v. 104. *Averruncus*, in this view of the facts, is not the equivalent of *se'irim*'s term, as Ew. (*Ant.* 362) supposes.

¹ Del. is not happy in his explanation, 'Defier of God.' He traces the name to Arabic mythology: 'azz is used of a horse which successfully resists its rider (*ZKW* 1 18a [80]); but König is no more successful—'fortis decedens' is his rendering (*Lepros.* 2 a, 477).

² So Driver (*Expositor*, 1885, b. p. 215). In Hastings' *DB* (art. 'Azazel') no very definite conclusion is reached; but reference is duly made to the too generally neglected analogies of other popular religions.

³ Kalisch rightly says that 'although Azazel and his goat are a stain on the Levitical legislation, they do not taint the main principle of Judaism—God's absolute sovereignty' (*Leviticus*, 2 204).

Azazel¹ to the Jewish theologians (including the authors of the scapegoat ritual) was a fallen angel, evil in doubt, yet not altogether unfriendly to man, for he was the true Tubal-cain, one of the 'sons of Enoch' mentioned in Gen 6:1-2² (see *Enoch* 66 f. 83 and especially 104-8 131). He was said to have been bound hand and foot, and placed in 'an opening in the desert which is in Dudäel'; rough and jagged rocks have been laid upon him. Now, Dudäel is not 'God's caldron' (Di.), but (Geiger, Charles) a fantastic modification of Hadulo in Beth Hadulo, where was the crag (צַר) down which, according to *Yämä* (64; cp Tg. ps.-Jon. Lev. 16 22), the 'goat for Azazel' was pushed, which crag Schick³ identifies with mod. *Bet-hudäun*, on the edge of a chalk cliff, overhanging a rocky chasm, at the right distance from Jerusalem. The coincidence seems too striking to permit a doubt as to the true character of Azazel.

It was this personal angel (the later Jews gave a quasi-personality to the angels) that the author of the scapegoat-ritual substituted for the crowd of *se'irim* (or earth-demons) to whom the people sacrificed; just as the scapegoat was the substitute for the sacrificial victims.⁴ The need must have been great indeed. In the marriage songs of the Canticles we twice find (it is probable) the strange appeal, 'I charge you, O ye daughters of Jerusalem, by the fairy-hosts and by the tree-spirits.'⁵ In such a poem the name of Yahweh could not be lightly used: all the world, however, knew of the supernatural beings who haunted thickets and sometimes inhabited trees, and like the *jinn* to-day, were sometimes friendly to man, sometimes unfriendly.⁶ The substitution appears to have produced an effect: at least, the Chronicler, in the third century, represents the custom of sacrificing to the *se'irim* as pre-exilic (2 Ch. 11 15). Certainly, too, we may infer from the details respecting the *שַׂעִיר הַמִּזְבֵּחַ* ('the dismissed goat') in *Yämä* that the popularity of the institution was great. The cries, 'Take (them) away and get out,'⁷ reported by the Gemara on *Yämä* 64, show how intensely the lower classes (Babylonians they are disparagingly called) believed in the removal of their sins by the goat. See also Ep. Barn. 7; Tertull. *adv. Marc.* 37; *adv. Jud.* 14; Just. *c. Tryph.* 40. That the 'goat for Azazel' was really pushed over the precipice (*Yämä*, 6), we have no reason to doubt. It is instructive to notice, however, that the scribe who inserted the directions in Lev. 16 could not bring himself to put down all that actually happened. What we read is that Aaron was to confess all the sins of the Israelites (there is great emphasis on 'all') over the goat, and to send him away in the charge of a certain man into a solitary land (צִדְוֹן וְאֶרֶץ נִזְרָה v. 21 f.). This is explained in Tg. ps.-Jon., 'and shall send him away by a man prepared from the preceding year, to take him into a rocky desert which is Beth-hadürē' (see above). In compensation for this, it is Leviticus that gives us one detail not preserved in *Yämä*. In v. 10 it is said that the goat for Azazel is to be presented alive before Yahweh, that atoning rites may be performed over him (כִּפְּרִי לַיהוָה); which recalls the direction about the 'living bird' (see § 1) that forms a parallel to the scapegoat in the law of cleansing the leper (Lev. 14 6 f.).

¹ Another form of the name may have been Uzziel (cp Tg. ps.-Jon. on Gen. 64 with *Enoch* 6). The form *Azazel* also is found.
² It is not worth while to examine the Jewish interpretations of this strange passage (see *Enoch*, Tg. ps.-Jon., Jude).
³ *J. J. W.*, *Rel. Sem.* 3, 214 f. (1891).
⁴ See WRS, *Rel. Sem.* 3, 418, 420, 466.

⁵ Cant. 27 9-5, אֲנִי וְאֵלֵי, אֲנִי וְאֵלֵי. The change in the pointing is very slight; אֵלֵי should be אֵלֵי. The usual explanation is very fanciful (see Budde). The sacred trees (especially the locust- or ash-tree) have still remained in Palestine as being possessed.
⁶ See WRS, *Rel. Sem.* 3, 120-121; Budde's passage, *PEP*, *St. J.*, July '93, p. 204 ff. Some of the *jinn* are believed to be dangerous to newly married people. Don't play with love, says the passage (Cant. 27),—for fear of the *jinn*.

⁷ בְּלֹא מִלֵּךְ וְלֹא מִלֵּךְ.
 בְּלֹא מִלֵּךְ וְלֹא מִלֵּךְ.

To resume and to supplement: the usages described in *Yämä* are a combination of a primitive sacrifice to the demons of untiled or (especially) mountainous country with a superstitious custom still widely prevalent, according to which evils of all kinds were sought to be got rid of by the device of lading them on some animal, which was thereupon driven away from the community like the scapegoat (see Lyall, *Fortnightly Review*, 1872, p. 131; Frazer, *Golden Bough*, 2 ed., ch. vi, § 1, 111 ff.; *House of the Ancestors*, 1917, 221 ff.). Such a custom, as Frazer points out, tend to become periodic, like the rite of the scapegoat. See, further, ATONEMENT, DAVAO.

AZETAS (ΑΖΗΤΑΣ [A], om. L), a family in the great post-exilic list (see EZRA, ii. § 9, § 8 c) in 1 Esd. 5 15, but not in || Ezra 2 16 = Neh. 7 21; perhaps the name owes its presence to some mistake (Mey. *Ent.* 155 n.).

AZGAD (אַזְגָּד; § 43—i. e., 'strong is Gad' [cp Azbaal, *CIS* 1 118, and see GAD], or, 'fat is hard' (?); אַזְגָּד [AL]). The B'ne Azgad, in the great post-exilic list (see EZRA, ii. § 9), Ezra 2 12 (reckoned at 1222; אַזְגָּד [B], אַזְגָּד [A], אַזְגָּד [L], Neh. 7 17 (reckoned at 2322; אַזְגָּד [B], אַזְגָּד [A], אַזְגָּד [N]) = 1 Esd. 5 13, AV SADAS, RV ASTAD [אַרְסָא [B, where the number of the family is given as 1322], אַרְסָא [A]), A band of 110 males of them came up with Ezra, Ezra 8 18 (see EZRA, ii. § 5 21 § 3) (אַזְגָּד [B]) = 1 Esd. 8 38, EV ASTATH, RV^{ms}. Azgad (אַרְסָא [B]), and they were represented among the signatories to the covenant (see EZRA, i. § 7), Neh. 10 15 [16] (אַרְסָא [B], אַרְסָא [N]).

AZIA (αζαιου [B]). 1. Esd. 5:31 = AV Ezra 2:49, UZZA, 2.

AZIEI (אזיעי [Esd. 1:2]) in the genealogy of Ezra, see AZARIAH, 3.

AZIEL (אזיאל [1 Ch. 15:26]). See JAAZIEL.

AZIZA (אזיזא [1 Ch. 15:26]). 'strong'; אַזיזא [A], -א [BN], אַזיזא [A], in list of those with foreign wives (EZRA, i. § 5, end), Ezra 10:27 = 1. Esd. 9:28, ΣΑΒΡΕΙΣ, RV ZABRUIS (Σαβραϊας [B], Σαβραϊας [A], אַזיזא [L]).

AZMAVETH (אזמבית), perhaps 'Death is strong' [cp Cant. 8:6], a possible name for a hero [see AHIMOTH, and cp Gray, HFN 2:31]; acc. to Kittel the ending should be -*moth* or -*math* [SBOT 1 Ch. 1:26]; om. BA. AZMOTH (אזמות), אצמ. [L]. A Benjamite place near Gebla (Neh. 12:26), usually identified with *et-Hizmah*, a village 4 m. NE. of Jerusalem, between Jeba' and 'ANATA [LDDP 2:143; PEF. Mem. 30].

The b'ne Azmaveth occur in the great post-exilic list (see EZRA, ii. § 9). EZRA 2:24 (אזמבית [B]). . . אַזמבית [L] = Neh. 7:28 (אזמבית [B]). א. ב'ת. [A], בית אצמבית [L]. BETHAZMAVETH (בית אזמבית) [1 Ch. 15:26] = AZMOTH, which is preferable to AV BETHSAMOS (Βαθσαμων [B], Βαθσαμων [A]).

AZMAVETH (אזמבית), see above; אצמ. [B], אצמ. [A].

1. One of David's thirty mighty men, 2 S. 23:31 (אצמב [B*], אצמ. [B]). . . אצמב [A], אצמב [L] = 1 Ch. 11:13 (אצמב [B]), a native of BATHRIM (בית רימ) [1 Ch. 1:24] אצמב [A], being both miswritten for בית רימ [We. Dr.]. Azmaveth, the 'father' of JEZIEL and PELET, 2 (1 Ch. 12:1; אצמב [B]). two of David's warriors, may, however, be the place-name; cp above. See HAVTH, § 11 (C) ii.

2. b. Jehoadab or Jarah; a descendant of Saul in a genealogy of BENJAMIN (§ 9, ii. [B]), 1 Ch. 8:30 (אצמב [B]). 3:42 (אצמב [B]).

3. b. Adiel, one of David's overseers (1 Ch. 27:25). See HAVTH, § 11 (C) i.

AZMON (אצמון), an unidentified site, marking the western portion of the southern frontier of Judah before the point where 'it went out at the brook of Egypt' (Josh. 15:4 Nu. 34:4). א has Αζωμων [BAL]. Σαζμων [BA], Ασελμωνα [AFL]; Targ. has אצמ, on which last precarious reading Trumbull bases his identification of Azmon with 'Ain el-Kasème in the W. Kasème. With Azmon cp Ezem (אצמ).

AZNOTH-TABOR (אצנת תבור) — 'ears, or outliars, of Tabor'—§ 99; cp UZZEN-SHEERAH), a landmark of Naphtali, doubtless near Mt. Tabor, Josh. 19:34 (אצנת תבור [B]). AZANATHO. [A]. According to *Onom.*, אצנת (OS² 224, 88) lay near Diocæsarea or Sepphoris; cp CHISLOTH-TABOR, and see TABOR.

AZOR (אזור [Ti. WH]), Mt. I 13; see GENEALOGIES, ii. § 2.

AZOTUS (αζωτος [ANV]). Jos. Ant. xii. 11:2, εζακ [ed. Niese], αζακ αζαρα, the 'mount' to which Bacchides pursued the Jews in the battle (Apr. 161 B.C.) in which Judas the Maccabæe lost his life (1 Macc. 9:15), is unknown. Michaelis has very plausibly conjectured that the expression may be due to a mistranslation of the Heb. אַשְׁדוֹת־פִּישְׁגַּח (cp ASHDOTH-PISGAH), meaning the slopes where the hill country of Judah descends into the Shephelah. Ewald (*Gesch.*² 4:422, n. 2) compares Atârâ W. of Bir ez-Zêt, a small hill.

2. The Azotus (αζωτος [Ti. WH]) of Acts 8:40 1 Macc. 4:15 5:98 10:77 f. 84 11:4 14:34 16:10 Judith 2:28 is ASHDOD [g. v.]. Some (including Buhl, p. 188) also identify with Ashdod the Azotus of 1 Macc. 9:15.

AZRIEL (אזריאל), perhaps 'help of God,' § 29).

1. On the vocalisation and א's readings cp HAZARMAVETH. 2. אַזְרִיִּאל is an Aram. pronunciation (cp אַזְרִיִּאל), and it is noteworthy that here, contrarily to its usual practice, א prefers the Hebrew vocalisation (cp Kittel, SBOT ad loc.).

1. One of the chiefs of Manasseh-beyond-Jordan, 1 Ch. 5:24f (אזריאל [B], אַזְרִיִּאל [A], אַזְרִיִּאל [L]). 2. A Naphtalite, 1 Ch. 27:10 (אזריאל [B]); but some Hebrew MSS have UZZIEL, a reading supported by אַזְרִיִּאל. 3. Father of Seraiah [2], Jer. 36:26f (אזריאל [B]), אַזְרִיִּאל [A], אַזְרִיִּאל [L]).

AZRIKAM (אזריקם), ΕΖΡΙΚΑΜ [A].

1. Levite, in list of Judahite inhabitants of Jerusalem (EZRA, ii. § 8 [L]), Neh. 11:15 (אזריקם [B], ΕΖΡΙΚΑΜ [A], ΕΖΡΙΚΑΜ [L]). 2. A descendant of Zerubbabel, 1 Ch. 3:23 (אזריקם [B], ΕΖΡΙΚΑΜ [A], אַזְרִיִּקָם [L]).

3. Descendant of Saul in a genealogy of BENJAMIN (§ 9, ii. [B]), 1 Ch. 8:30 (אזריקם [B]), ΕΖΡΙΚΑΜ [A]) = 1 Ch. 9:44 (אזריקם [B]).

4. 'Ruler of the house' under Ahaz, 2 Ch. 28:7 (אזריקם [B], ΕΖΡΙΚΑΜ [A]).

AZUBAH (אזובה), 'forsaken'; ΑΖΟΥΒΑ [BAL].

1. Wife of CALEB [g. v.] in 1 Ch. 2:18 f. ΑΖΟΥΒΑ [B], A in v. 19], Αζουβָא [L]. The names in this passage are as peculiar as the constructions. Kittel (SBOT) renders an emended text thus: 'And Caleb b. Hezron took Azubah (deserted one) to wife, and begat Jerioth (tent-curtains); and these are her sons, Jeshur (uprightness), Shobab (backsliding), and Ardoun.' As to the names of these sons, Jeshur may be read Joashar (Yahwè is right), and Sholab Jashub (one who turns to God), and Ardoun Ornan (אֶרְדוֹן). But אַזְרִיִּאל can hardly be thus used of God (in spite of Dt. 32:4 Ps. 119:137), and Ornan, or (1 Ch. 3:21 Mt) Arnan, has a suspicious aspect. Hence Klostermann (*Gesch.* 115) takes v. 18 to be a record of a shortlived colony of Calebites, founded on the spot where there had been a pastoral settlement. He renders 'Caleb b. Hezron made the deserted one—the woman of tent-curtains—to bear children, namely, Upright, and Backslider, and Destruction' (reading אֶרְדוֹן אֶשְׁתִּי אַזְרִיִּאל). The colonists began well, but 'left the paths of uprightness' (Pr. 2:13), and were given up to 'destruction' (= Sheol, Pr. 15:11). Wellhausen also (*De Gen.* 33 f.) notices the symbolic character of the names; אַזְרִיִּאל, according to him, = אֶשְׁתִּי, Jeshurun; אֶרְדוֹן (so he reads) is a tent-dwelling woman; אֶשְׁתִּי, the desert region inhabited at first by the Calibites.

2. Mother of Jehoshaphat, 1 K. 22:42 (אזובה [B]) = 2 Ch. 20:31. T. K. C.

AZUR (אזר), Jer. 28; Ezek. 11; AV; RV better AZZUR [g. v., 1 f.].

AZURAN, RV AZARU, RV^{ms} Azuru (ΑΖΑΡΟΥ [B], -αζουρ [A], om. L), family in the great post-exilic list (see EZRA, ii. § 9, § 8 c), in 1 Esd. 5:15, but not in Ezra 2:48 = Neh. 7:21; probably identical with AZZUR, 2 (Neh. 10:17 [18]). Note in each case the occurrence of the preceding names, Adin, Ater, and Herekiah.

AZZAH, AV GAZA (אזרה), ΓΑΖΑ [B], ΓΑΖΗC [A], ΑΔΙΑ [L]), 1 Ch. 7:28 RV. Many Hebrew MSS here read אַזְרָה (Ayyah; cp אַזְרָה), a reading recommended by the context. The place was apparently N. of Shechem. See GAZA.

AZZAN (אזן), 'gifted with strength'; אַזְנֵן [BAFL]), father of PALTIEL, 2 (Nu. 34:26f.).

AZZUR (אזר), אַזְרִיִּאל [2], 'helped [by God]'; see NAMES, § 56, and cp Azuri of ASHDOD.

1. Father of Hananiah, the prophet, of Gibeon, Jer. 28 [B ch. 35] 1 (אזר [BMSQ]). AV AZUR. 2. Father of JAAZANIAH (4), Ezek. 11:1 (אזר [B], אַזְרָה [A], אַזְרָה [L], אַזְרָה [QMB], אַזְרָה [TL]). AV AZUR. 3. One of the signatories to the covenant (see EZRA, i. § 7); Neh. 10:17 (אזר [B], אַזְרָה [MAL]); AV AZURAN; perhaps also a Gibeonite?

B

BAAL¹ (בַּעַל; ♂ often הַבַּעַל, indicating that the reader is to substitute ΔΙΟΥΣΥΝΗ; the substitute has found its way into the text in 1 K. 18 19 26, as the corresponding בַּעַל local numina. has in the Heb. text of Jer. 32 and elsewhere; see Di. *MIBA* Phil.-hist. Kl. 1881) is a word common to all the Semitic languages, which primarily signifies *owner, proprietor, possessor*. It is used, for example, of the owner of a house, a field, cattle, and the like; the freeholders of a city are its *bē'ālim*. In a secondary sense *bā'al* means *husband*; but it is not used of the relation of a master to his slave or of a superior to his inferior; nor is it synonymous with the Heb. and Phœn. *ādīn*, Syr. *mār*, Arab. *rabb*, in the general sense of *lord, master*. When a divine being (*el*) is called *bā'al* it is not as the lord of the worshipper, but as the proprietor and inhabitant of some place or district, or the possessor of some distinctive character or attribute, and therefore a complement is always required. Each of the multitude of local Baals is distinguished by the name of his own place. There was a Baal of Tyre, a Baal of Sidon, a Baal of Harran, a Baal of Tarsus; a Baal of the Lebanon, and a Baal of Mt. Hermon; a Baalat of Byblos,—and so on.² We know that in some cases the Baal of a place had a proper name: the Baal of Tyre was Melkart; in Southern Arabia Dhū Samāwī was the Baal of Bākir, 'Athtar of Gumdān, and so on. In other cases the local Baal was distinguished in some other way. The god of Shechem was Baal-berith (perhaps as presiding over an alliance; but see BAAL-BERITH); Baalzebub (to whom was ascribed control of flies; cp BAALZEBUB) had a celebrated oracle at Ekron; a βαλμαρκως, κόρανος κώμων (Baal-markod), is known from inscriptions found near Beirūt; a בַּעַל סַפְרָא (*sanator*?) in Cyprus, and so on. In Baal-gad and Baal-zephon the second element seems to be the name of a god (see FORTUNE, BAAL-ZEPHON). On Baal-hammon and Baal-shamem see below, § 3f. There is nothing in these peculiar forms to shake the general conclusion that Baal is primarily the title of a god as inhabitant or as owner of a place.

There were thus innumerable Baals—as many as there were towns (Jer. 23 11 13), sanctuaries, natural objects, or qualities which had a religious significance for the worshippers. Accordingly, we frequently find in the OT the plural, Baalim, the Baals, which we must interpret not, as many still do,³ of the multitude of idols, or of local differentiations of one god, but of originally distinct local numina. The Baals of different places were doubtless of diverse character; but in general they were regarded as the authors of the fertility of the soil and the increase of the flocks (Hos. 2 5 12), and were worshipped by agricultural festivals and offerings of the bounty of nature (Hos. 2 8 13). An interesting survival of this conception is the Talmudic phrase, field of the baal, place of the baal, and the Arab *bā'l*, for land fertilised, not by rain, but by subterranean waters (cp *Rel. Sem.*⁽²⁾ 97 ff.). Proper names of persons such as Hannibal (Favour of Baal), Hasdrubal (Help of Baal), Baal-yatan (Baal has given), Shama'-ba'al (Baal hears), compared with similar Yahwē names, Hananiah, Azariah, Jonathan, Shemaiah, show that Phœnician peoples acknowledged in the gift

of children the goodness of Baal, as Israelite parents that of Yahwē.

That Baal was primarily a sun-god was for a long time almost a dogma among scholars,¹ and is still often repeated. This doctrine is connected with theories of the origin of religion which are now almost universally abandoned.

The worship of the heavenly bodies is not the beginning of religion. Moreover, there was not, as this theory assumes, one god Baal, worshipped under different forms and names by the Semitic peoples, but a multitude of local Baals, each the inhabitant of his own place, the protector and benefactor of those who worshipped him there. Even in the astro-theology of the Babylonians the star of Bēl was not the sun; it was the planet Jupiter. There is no intimation in the OT that any of the Canaanite Baals were sun-gods, or that the worship of the sun (Shemesh), of which we have ample evidence, both early and late, was connected with that of the Baals; in 2 K. 23 5 cp 11 the cults are treated as distinct.

The *hammānim* (חַמְמַיִם), included in the inventory of places of idolatrous worship with *massēbas* and *ashīras* (Ez. 6 4 6 and elsewhere), have indeed, since

3. Baal-hammon. Rashi, been connected with the late biblical *hammon*. and Mishnic *hammā* (חַמָּה), 'sun,' and explained as *sun images* (RV), sun pillars;² and it has further been conjectured that the *hammānim* belonged specifically to the cultus of Baal-hammon, whose name occurs innumerable times in Punic inscriptions,³ and is commonly explained 'the glowing Baal'—i.e., the Sun.⁴ This translation, however, can hardly be right; the article would be expected: according to all analogy, *hammōn* should be a genitive. 'The deity which dwells in the sun-pillars' would be formally possible; but with the direct connection of Baal-hammon with the sun, one of the chief arguments for interpreting *hammānim* to mean 'sun-pillars' falls to the ground. In this state of the case we cannot be sure that Baal-hammon was a solar deity; and if fresh evidence should prove that he was, it would be unwarrantable to infer that the Baals universally bore the same character.

Another Baal, whose cultus was more widely diffused than that of Baal-hammon—in later times he rose

4. Baal-shamem. above all the local Baals, and perhaps in many places supplanted them—was Baal-shamem, whose name we must interpret, not 'Lord of Heaven,' but 'The god who dwells in the heaven,' to whom the heavens belong.⁵ Philo of Byblos identifies Baal-shamem (κύριος οὐρανοῦ) with the Sun ('Ἥλιος; see *Fragm. Hist. Gr.* 3 565 f.); Macrobius says that the god of Heliopolis was at once Jupiter and Sol (*Sat.* 1 23); a Palmyrene bilingual (Vog., no. 16) seems to give Ἥλιος for בַּעַלְשַׁמַּיִם, but the reading is not quite certain. The Greeks and the Hellenised Syrians identify Baal-shamem with Zeus (e.g., Ζεὺς μέγιστος κεραυνίος), which is better in accord with the obvious significance of the name.⁶

When the Israelites invaded Western Palestine and

¹ See, for example, Creuzer, *Symb. u. Myth.*⁽²⁾ 2413; Mövers, *Phoen.* 1 499 ff.

² It is singular that this interpretation did not suggest itself to any of the ancient translators. See further, MASSEBA, § 6.

³ In Phœnician; also E. J. HANUMON.

⁴ In a Palmyrene inscription a *hammānim* is dedicated to the sun; De Vogüé, no. 123 a.

⁵ The name is equivalent to Dhū Samāwī in Southern Arabia.

⁶ Baal-shamem in Dem. 12 21 (perverted by Jewish wit to Shēbās, Sēmōm, 'the appalling abomination') was probably a Roman Jupiter (see ABOMINATION, II.).

¹ See *Phœnic. Rel. Sem.*⁽²⁾ 92 ff.

² Cp in the OT Baal-hazor, Baal-meon, Baal-peor, Baal-tamar, and the like.

³ For example, Baetigen.

passed over from a nomadic to an agricultural life, they learned from the older inhabitants not only how to plough and sow and reap, but also the religious rites which were a part of Canaanite agriculture—the worship of the Baals who gave the increase of the land, the festivals of the husbandman's year. At first, probably, this worship of the Baals of the land went side by side with that of Yahwé, the God of their nomadic fathers. When Israel came into full possession of Canaan, however, Yahwé himself became the Baal of the land. Names like Jerubaal (Gideon), Eshbaal (son of Saul), Baal-jada (son of David), prove that Israelites in whom the national spirit was strongest had no scruple in calling Yahwé their Baal. The worship on the high places was worship of Yahwé in worship; its rites were those of the old Baal cult. The prophets of the eighth century, especially Hosea, denounced this religion as pure heathenism. In whose name it is practised is to them immaterial: it is not the name but the character of God that makes the difference between the religion of Israel and that of the heathen.

In the preceding century Elijah had roused the spirit of national Yahwism in revolt against the introduction of the worship of the Tyrian Baal (Melkart) by Ahab, and Jehu had stamped out with sanguinary thoroughness the foreign religion; but this conflict was of a character wholly different from that in which the prophets of the eighth century engaged with the Canaanite Baal-religion practised in Yahwé's name. In the seventh century, with the introduction of Assyrian cults, there was a marked recrudescence of the kindred Old Israelite and Canaanite religions, which provoked the violent measures of Josiah, but was only temporarily checked by them, as we see from Jeremiah and Ezekiel.

With the cultus of the Baals in Canaan we are acquainted chiefly through the descriptions which the prophets give of the Baalised—*sit venia verbo*—worship of Yahwé. The places of worship were on the hill-tops, under the evergreen trees; they were marked by *ashéras*, *massébas*, *hamminim*. Images were not always, perhaps seldom, present: an image required a shrine or temple. At the altars on the high places, offerings of the fruits of the land and the increase of the flocks were made; beside them fornication was licensed—nay, consecrated. The Baals had their priests (CHEMARIM, *q.v.*) and prophets. At the great contest on Carmel they leap upon the altar, and cry, and gash themselves with knives 'after their manner.' We may supplement these scanty notices by descriptions of Phœnician worship, especially of the Tyrian Baal, Melkart, and of the Punic 'Kronos,' in Greek authors. See, further, HIGH PLACES, IDOLATRY, and, with reference to human sacrifices, MOLECH.

BAAL (בַּעַל, 'Lord'; עַבְדֵי בַּעַל, 1 Ch. 8:35).
 1. In a genealogy of REUBEN; 1 Ch. 5:1 (אֹהֶל [B], בַּאֵל [A], בַּאֵלָא [L]).

2. In a genealogy of BENJAMIN (*q.v.*, § 9, ii. β); 1 Ch. 8:30 (בַּאֵל־נָאֻמִּים, *i.e.* בַּאֵלָא קַי? [B], בַּאֵל [קַי וְנָרָה] [A], בַּאֵל [קַי וְנָרָה] [L]).—9:6 (בַּאֵל [BA], בַּאֵל [L]). It is more probable that MT, followed by some ancestor of 9:7, dropped *Nr* (נָרָה) in 1 Ch. 8 than that it has been added elsewhere (so *SBOT*). The conjecture (We. *TBS* 31 n.) that Baal and Nadab are to be read together as a compound name is thus unsupported; it is also unnecessary, since Melech

1 Punic temple inscriptions defining the dues of the priests for various kinds of sacrifice (so-called Tariffs of Marseilles and Carthage) show that both the animals offered and the classes of sacrifice were closely similar to those of the Hebrew laws.

(הָבֵל) likewise occurs (1 Ch. 8:35 etc.) alone as a proper name. See NAMES, § 42.

BAAL (בַּעַל), 1 Ch. 4:33f. See BAALATH-BEER.

BAALAH (בַּעֲלָה, § 96). 1. See KIRJATH-JEARIM.

2. A city in the Negeb of Judah, Josh. 15:29 (בַּאֵלָא [B], באַלא [AL]). In Josh. 19:3 the name is written בַּאֵלָאִי (הָבֵלָה; בַּאֵלָא [B], בַּעֲלָבָלָא [A], בַּאֵלָא [L]), and the place is assigned to Simeon. In 1 Ch. 4:29 it appears as בִּיהַחֵה (הָבֵלָה; אֶבְלָאָא [B], בַּאֵלָא [A], בַּאֵלָאֵד [L]). The reading is uncertain and the site unknown.

3. Mt. Baalah, a landmark on the boundary of Judah between Shikkeron and Jabneel, Josh. 15:11 (δρυα ἐπὶ Λύβָא [B], δρυα γῆς βַּאֵלָא [A*], ο. γ. γαββαλα [A124], ο. τῆς βַּאֵלָאω [L]). The site is unknown, unless with Clermont-Ganneau (*Rev. Crit.*, 97, p. 902) we should read נָרָה for נָרָה, and identify the 'river of the Baal' with the Nahr Rúbín (see JABNEEL, 1). More than one river in Palestine, doubtless, was dedicated to Baal.

BAALATH. See KIRJATH-JEARIM.

BAALATH-BEER (בַּעֲלָת בַּיֵּר, Josh. 19:8 באַרעק [B*], БААЛЕК [B34]). БААΛΟΘΕΡΗΡΡΑΜΩΘ [A], БААЛЕК ВΗΡΡΑΘΜΩΘ [L] or Baal (1 Ch. 4:33), also called RAMAH of the South (רַמַּת [B], Josh. 19:8) or RAMOTH of the South (1 S. 30:27 ראַמָא [BL], -θ [A] βρότου; perhaps the same as the Bealoth (בַּעֲלֹת) בַּמַּיִן [B], באַלֹּת [AL]) of Josh. 15:24 (and 1 K. 4:16; see ALOTH), an unidentified site in the Negeb—probably its most southern part—of Judah. The name implies that it had a well and was a seat of Baal-worship.

BAAL-BERITH (בַּרִית בַּעַל *i.e.*, 'the [protecting] Baal of the covenant'), a form of the Canaanitish Baal worshipped at Shechem (Judg. 9:4), called El-berith (אֵל בַּרִית, 'God of the covenant') in Judg. 9:46 RV.

It has in Judg. 9:4 באַל־בַּרִית [B], באַל־בַּרִיתִים [A], באַל־בַּרִיתִים [B34]; in 1 K. 4:16 באַלֹּת בַּרִית [B], באַלֹּתִים [A], אֵל־בַּרִית [L]; in 8:33 באַל־בַּרִית [A], באַל־בַּרִיתִים [L], באַל־בַּרִיתִים [B].

The covenant intended was probably that between Shechem and some neighbouring Canaanitish towns, which were originally independent, but were at length brought under Israelitish supremacy (Ew., Kue., We.). Of the rival views—viz., (a) that the covenant was between Baal and his worshippers (Baethgen, Sayce in Smith's *DB*(3)), and (b) that it was between the Canaanitish and the Israelitish inhabitants of Shechem (Be., Ki.)—the former gives an undue extension to a specially Israelitish idea, and the latter misconceives the relation of the Israelites within Shechem to the Canaanites. Gen. 14:13 cannot possibly establish the former (Baethgen), nor can the name of Gaal's father, or the speech of GAAL (*q.v.*) in Judg. 9:28, be used to support the theory of an influential Israelitish element in the population of Shechem. Any Israelites who might be dwelling in Shechem would be simply ַרָבִי or protected strangers, and not parties to a covenant. The title of Baal-berith had a treasury from which the citizens made a contribution to Abimelech (Judg. 9:4). It was there that Gaal first came forward as a leader of the rebellion (9:7), and within its precinct the inhabitants of the tower of Shechem (the 'acropolis,' We.) found a temporary refuge from Abimelech at the close of the revolt (9:46). The deuteronomic editor mistakenly accuses the Israelites of apostatising to Baal-berith after Gideon's death (Judg. 8:33; see Moore's note). T. K. C.

BAALE JUDAH. See KIRJATH-JEARIM.

1 Or may not Baal-berith, El-berith, simply mean 'God of the community' (עַבְדֵי הַקְּהִלָּה, § 9)? The original story probably gave the name of the god of Shechem (Prof. N. Schmidt).

BAAL-GAD (בַּעַל גַּד) *‘Lord of Good Fortune’*; cp Gudubal-Gad Baal [Hoffmann, *Ueber einige phön. Inschr.* 27]; ΒΑΛΓΑΔ [FL], and through corruption ΒΑΛ(Δ)ΓΑΔ(Δ) [BA].¹ ‘in the valley of Lebanon, under Mt. Hermon,’ is thrice mentioned in Joshua (11 17 12 7; 13 Γαλιλαία [B], γαλιλαία [A], βαλεγκαδ [L.] as marking the northern limit of Joshua’s conquests. Though Sayce and others identify it with Baalbek because it is described as in the בְּקֵיף of Lebanon, it is much more probably the BAAL-HERMON of 1 Ch. 5 23 (cp also the ‘mount Baal-hermon’ of Judg. 3 3), now known as *Lidnā*; see CASAREA, § 7 f., and DAN, 1.

BAAL-HAMON (בַּעַל הַחֲמוֹן) Βεεθολαμμων [B], Βεελα. [N], Βεελ. [A], a place where, according to a marriage song of no historical authority (Cant. 8 11), Solomon had a vineyard which he entrusted to keepers. Some (e.g., Del., Oettli) have identified it with the Balamo(n) of Judith 8 3, which seems to have been not far from Dathan. It is obvious, however, that some well-known place is meant, and the references to N. Israelitish scenery elsewhere in the Song of Songs give some weight to Gratz’s conjecture that for ‘Baal-hamon’ we should read ‘Baal-hermon’ (Judg. 3 3 1 Ch. 5 23). If Socin (*Baed.* 331) is right, Baal-hermon and Baal-gad are the same, and it is to be sought at the mod. Hāsbeiyā (see, however, CASAREA PHILIPPI): on the luxuriant terraces on both sides of the valley vines and other fruit-trees are still cultivated. Most probably, however, ‘in Baal-hamon’ is due to a corrupt repetition of ‘to Solomon.’ Bickell is right in omitting it.

T. K. C.

BAAL-HANAN (בַּעַל חֲנָנִי) § 42. Baal has been gracious; cp Johanan, Ph. הַנְּבִיל, and the well-known ‘Hannibal,’ also Ass. *Baalhanunu*, *COT.* 189).

1. Ben Achbor; one of the kings of Edom, according to Gen. 36 37. βαλενανος [A], βαλενανου [P], βαλενανου [E], βαλενανου [L], βαλενανου [C], βαλενανου [B], βαλενανου [A], βαλενανου [L]. Strangely enough, the name of his city or district is not given. Moreover, the scribe’s error עֲבָרִים ‘Hebrews’ for עֲבָרִים ‘mice’ in 1 S. 14 11 (see Bu. *SBOT*) suggests that בֶּן עֲבָרִי (ben Achbor) in v. 38 f. may be a variant to בֶּן עֲבָרִי in v. 32. Now, as Hadad II., an important king, (probably) the founder of a dynasty, has no father’s name given, it seems likely that Baal-hanan is the lost father’s name; and thus the text should run, ‘And Saul died, and Hadad, ben Baal-hanan, reigned in his stead’ (so Marq. *Fund.* 10 f.; see, however, BELA [ii.]). See EDOM, § 4, HADAD.

2. A Gederite; according to the Chronicler, superintendent of olives and sycamores in the Shephelah of Judah in the time of David; 1 Ch. 27 28 (βαλανας [B], βαλανα [A], βαλασαν [L]). See DAVID, § 11 c.

BAAL-HAZOR (בַּעַל הַצֹּר) §§ 93, 96. 2 S. 13 23. See HAZOR, 2.

BAAL-HERMON (בַּעַל הַרְמוֹן) § 93. ΒΑΛΗΙΜ [B*], ΒΑΛΛΗΙΜ [B⁰], ΒΑΛΛ ΕΡΜΩΝ [AL], 1 Ch. 5 23; see BAAL-GAD, BAAL-HAMON, and, especially, CASAREA PHILIPPI.

BAALI (בַּעֲלִי), Hos. 2 16 EV; mg. rightly ‘my lord’ AV, RV ‘my master.’ See HOSEA, § 6.

BAALIM (בַּעֲלִים), Judg. 2 11. See BAAL, § 1.

BAALIS (בַּעֲלִיס) ΒεΑ[ε]ι[σ]α [B⁰BAQ], ΒΕΝΕCΑ [N*] ΒΑΔΛΙC [Q⁰MG], cp Sw. *ad loc.*; Jos. *Ant.* x. 9 3. § 164. ΒΑΔΛΙΜΟC—i.e. Βε[ε]λ[ι]μ as some Heb. MSS read, king of the Ammonites, the prime mover in the murder of Gedaliah (Jer. 40 [47] 14; cp 41 10). The name is interesting as an etymological problem. Some render ‘Son of exultation,’ on the precarious supposition that in this name and a few others ב stands for בן (see

¹ Through confusion of λ, α, and δ in the uncial writing.

BIDKAR); while Baethgen (*Beitr. zur Sem. Rel.-gesch.* 16) compares the Phœnician 𐤁𐤏𐤃 (CIS 1, no. 308; 𐤁𐤏𐤃, *ib.* no. 50) and renders ‘husband of Isis’—a still more precarious derivation. See AMMON, § 8. W. R. S.

BAAL-MEON (בַּעַל מְעוֹן) §§ 93, 96. Nu. 32 1 20ek. 25 9 1 Ch. 5 8, otherwise Beth-baal-meon (Josh. 13 17), Beth-meon [Jer. 48 2], or Beon [Jud. 11 22 1].

Its readings are, in Nu. 32 Βελαμων [BA], in Lev. 25 9, Βελαμων [B*], Βελαμων [B⁰BAQ]; 1 Ch. 5 8 Βελαμων [B], Βελαμων [A], Βελαμων [L], Βελαμων [C], Βελαμων [B], Βελαμων [A], Βελαμων [L], in Jer. 48 2 Βελαμων [BQ], Βελαμων [B], Βελαμων [N*], in Nu. 32 Βελαμων [B⁰BAQ], Βελαμων [A].

The place is assigned in Numbers, Joshua, and Chronicles to the Keubenites. It is twice mentioned, once as Beth-baal-meon and once as Baal-meon, in the inscription of Meshah (*Il.* 9 30), from which we learn that it was Moabite before the time of Omri and became so again under Meshah. It was Moabite also in the time of Jeremiah (Jer. 48 23), and in that of Ezekiel, who names it with Beth-jeshimoto and Kiriathaim as ‘the glory of the country’ (Ezek. 25 9). It is represented by the modern Mā’in, in the W. Zerka Mā’in on the Moabite plateau, 2861 ft. above sea-level, 5 m. SW. from Madaba. There are extensive ruins (*Baed.* 177).

It may probably be identified with the Maccabean BEAN [g.v.]. The *Onomastica* (OS² 32 4 101 32) quote the Reubenite city under the forms βααν, Bean, πολις τοῦ Ἀσφαριου.

BAAL-PEOR (בַּעַל פְּעוֹר) Βεελφεωρ Βεβαφειρ, or, rather, the Baal of Peor (so RV²² Nu. 25 3; see BAAL, § 1), the Moabite god to whose cult Israel yielded itself while in Shittim (Nu. *Lc.* JE, Dt. 4 3 Ps. 106 29, thrice in later writings abbreviated to PEOR [g.v., 2]. The name occurs in Hos. 9 10 as a *place-name*—an abbreviation, it would seem, for Beth-Baal-Peor (see BETH-PEOR). The nature of the worship of this god is unknown, although it is not improbable that it was a local cult of Chemosh (Gray, *IMPV.* 131). For the old speculations, based mostly upon precarious etymologies, see Selden, *De Dis Syris*. See, further, PEOR, and cp Baal-peor, *Strabon.* 2. 10 2 1. *Itin.* 14 f. 261, and *Dt. Num. ad loc.*, Dr. 1 *cut. ad loc.*

BAAL-PERAZIM (בַּעַל פְּרָצִים) § 89, a place mentioned in connection with a battle between David and the Philistines in the valley of REPHAIM (g.v.), hard by Jerusalem, 2 S. 5 23 (ἐπάνω [or, ἐπίνω] διακοσιῶν [BA]). 1 Ch. 11 11 ἐπὶ φαλαγγαστικῆ . . . διακοσῆ φαστικῆ [B], φαλασσῶ φαστικῆ . . . διακοσῆ φαστικῆ [N], Βαλφασαστικῆ . . . διακοσῆ φαστικῆ [A]; Βαλφασαστικῆ bis [L]. According to the narrator, the name was so called because David had said, ‘Yahvé has broken through my foes before me as at a breaking through of water,’ Baal-perazim (i.e., ‘Lord of acts of breaking through’) being regarded as a title of the God of Israel. The same event seems to be referred to in 1 S. 28 21, where the place is called Mt. Perazim (ὄρος ἀσβεῶν [BNAQ], ὄρος ἡμῶν διακοσίων [A], in 1 Ch. 11 11 ὄρος ἡμῶν τῶν διακοσίων [Sym. Theod. in Q⁰MG]). This form of the name suggests the most complete explanation of David’s question, ‘Shall I go up against the Philistines?’ (v. 19). He asks whether he shall come upon the Philistines from the chain of hills which bounds the valley of Rephaim on the east (in v. 20 read, ‘And David came from Baal-perazim,’ with G and K). he starts, be it remembered, from Jerusalem (see DAVID, § 7). On the next occasion he did not ‘go up’ (on the hills), but came upon his foes from the rear (v. 19). In spite of this narrative, which is written from the later Israelitish point of view, the name Baal-perazim must have existed long before David. It is analogous to RIMMON-PEREZ, which means ‘Rimmon (Rammán) of Perez,’ and belonged properly to some point in the chain of hills referred to, which was specially known

¹ ἐπάνω cannot=ἐπί, being preceded in v. 20 21 by ἐκ τῶν.

by Canaanitish Baal-worshippers. David, however, beyond doubt took Baal as synonymous with Yahwè; the name gave him a happy omen, and received a fresh significance from his victory. Whether 'Perazim' was originally a name descriptive of the physical appearance of the hills E. of the valley of Rephaim, or whether it had some accidental origin, cannot be determined.

T. K. C.

BAALSAMUS (Βαλασάμος [BA]), 1 *Esd.* 9:43 RV = *Neb.* 8:4, MAASEIAH, 15.

BAAL-SHALISHA, RV *Baal-Shalishah*, (בַּעַל שְׁלִישָׁה בַּעַל שְׁלִישָׁה, Βαιθασαλιστα [B*^s.^vid. (ras σα Λ³)], ΒΗΘΣΑΛΙΣΤΑ [L]), in Ephraim, evidently near GILGAL (2 K. 4:42), doubtless identical with the *Bethsalisa* and Βαιθσαλισα of Jer. and Eus. (*OS* 107:11 239:92). 15 R. m. N. of Diospolis (Lydda). These conditions seem to be met by *Kh. Sirisidā*, which is exactly 13 Eng. m., or about 14½ R. m. from Lydda (*PEF/P*, '76, p. 68). Four miles further on is the village Kh. Kefr. Thilth, with which Baal-shalisha is now identified by Conder (*PEF/P* 2:285). In illustration of 2 K. 1:c. the Talmud (*Sanh.* 12 a) states that nowhere did the fruits of the earth ripen so quickly as at Baal-shalisha. See SHALISHA, LAND OF, and cp ZELZAH.

BAAL-TAMAR (בַּעַל תְּמָר) —i.e., 'Baal of the Palm,' §§ 96 103. Βααλ Θαμαρ [BAL], an unidentified locality in the neighbourhood of Gibeah, where the Israelites put themselves in array against the Benjamites (*Judg.* 20:33). Some think of 'the Palm of Deborah' (*Judg.* 4:5), which, however, was too remote (Moore). Eus. (*OS* 238 75) speaks of a Beth-thamar near Gibeah.

BAALZEBUB (בַּעַל זְבוּב); EN TH A v. 2, BA *REV.* 6:6; ΔΙΑ ΤΟΥ. L. v. 1 f. ΒΑΑΛ ΜΥΙΑΝ

1. Not Fly-god. [BA], taking ΖΟΥΒ or ΜΥΙΑ as the name of the god; so *Jos. Ant.* ix. 21), a god of Ekron, whose oracle was consulted by Ahaziah king of Israel in his last illness (2 K. 12 f. 6:16 f.). The name is commonly explained 'lord of flies.' True, there is no Semitic analogy for this; but Pausanias (viii. 267; cp J. G. Frazer's note on v. 14) tells us of a *Zēds ἀπύμυτος* who drove away dangerous swarms of flies from Olympia, and Clement of Alexandria attests the cultus of the same god in Elis (*Protrep.* 2:38) and we may, if we will, interpret the title 'a god who sends as well as removes a plague of flies' (so Baudissin), which lifts the god up a little. Let us, however, look further.

Bezold (*Catalogue*, K. 3500) thought that in an Assyrian inscription of the 12th cent. B.C. he had met

2. Not god of Zebub. with Baal-zabubi as the name of one of the gods of the Ebrî nârî (on which see EBER, § 1), in which case Baal-zebub was a widely known divine name, adopted for the god of Ekron. The restoration of the final syllable *-bi*, however, is admittedly quite uncertain, and the reading Baal-sapuna (see BAAL-ZEPHON, 1) seems much more probable.¹ Winckler, therefore, suggests that Zebub might be some very ancient name of a locality in Ekron² (no longer to be explained etymologically), on the analogy of Baal-Sidon, Baal-Hermon, Baal-Lebanon. No such locality, however, is known, and Ekron, not any locality in Ekron, was the territory of the Baal. It is, therefore, more probable that Baal-

3. Real name Baal-zēbūl. zebub, 'lord of flies' (which occurs only in a 'very late' narrative, one which has a pronounced didactic tendency),³ is a contemptuous unepiaphonic Jewish modification of the true name, which was probably Baal-zebul, 'lord of the

high house' (cp 1 K. 8:13, and Schrader's note in *COT*). This is a title such as any god with a fine temple might bear, and was probably not confined to the god of Ekron (in the Panamum inscription of Zenjirî, *I.* 22, the god Rakibêl bears the title בַּעַל בֵּית, 'lord of the house'). The second part of it strongly reminds us of E-saglia, the 'high house' of the god Marduk (see BABYLON, § 5). 'High house' (zēbūl) would at the same time refer to the dwelling-place of the gods on the *הר המנוחה* or 'mountain of assembly' in the far north¹ (see CONGREGATION, MOUNT OF). There is some reason to think that the Phœnicians knew of such a dwelling-place. The conception is implied in the divine name Baal-Saphon, 'Lord of the north' (see BAAL-ZEPHON), and in the Elegy on the king of Tyre (Ez. 28:12 f.); and the Semitized Philistines also probably knew of it. At any rate, the late Hebrew narrator—or, if we will, an early scribe—may have resented the application of such a title as 'Lord of the high house' (which suggested to him either Solomon's temple [בַּיִת הַזֶּה] 1 K. 8:13) or the heavenly dwelling of Yahwè [בְּעֵינַי, Dt. 26:15 Ps. 68:6]) to the Ekronite god, and changed it to 'Lord of flies,' Baal-zebub. See BEEZEBUB. This explanation throws light on three proper names,—JEZEBEL, ZEBUL, and ZEBULON—also on Is. 63:15, 'from thy zēbūl (high house) of holiness and glory.' The same term zēbūl could be applied to the mansion of the moon in the sky (*Hab.* 3:11, We.). T. K. C.

BAAL-ZEPHON (בַּעַל צְפוֹן), or, no doubt more accurately, Baal-Zaphon (בַּעַל צְפוֹן), 2.

1. The name of a Phœnician god, formed like Baal-Gad, Baal-Hermon, and meaning 'Baal of the north.' Though not mentioned in OT, it is important as enabling us to account for certain ancient Israelitish proper names (ZAPHON, ZEPHON, ZEPHONITES, ZIPHION), and also for the enigmatical reference to a mountain abode of the Elōhim, situated 'in the recesses of the north' (*Is.* 14:13; see CONGREGATION, MOUNT OF). The latter conception was evidently believed by Ezekiel (28:13 f.) to be familiar to the Phœnicians, and is clearly connected with the divine name in question, which describes and designates 'the Baal whose throne is on the sacred mountain of the gods in the north' (*Baethg. Beitr.* 23, 261). The Assyrian inscriptions contain several references to this god. A text of Esar-haddon speaks of Baal-sapunu as one of the 'gods of Ebrî-nârî' (see EBER, 1), and more than one mountain-district may have borne the name of Baal-Zaphon.² The chief seat of the god, however, must have been in the centre of Mount Lebanon. Elsewhere (*COPPER*, § 3) other texts are referred to in which Baal-sapuna is described as rich in copper, which appears to have been the case with Lebanon. Altogether we cannot be wrong in identifying Baal-Zaphon with Baal-Lebanon, 'the Baal of Lebanon.' The relation of this national deity of the Phœnicians to the Baal-Zaphon of Goshen requires separate consideration (see 2). On the question whether Baal-Zaphon was known under another of his names in Philistia, and even perhaps among the Israelites, see BEEZEBUL, § 2. T. K. C.

2. בעלצפון: so most MSS, but many MSS³ בעלזפון; Vg. *Beelzephon* (-sejon in *Jer. OS*; Targ. יִצְחָקִי, cp Syr. Bē'el-Sēphān; Arab. Walton, 'Safūn, the idol,' *safūn al-tāghūt*), a place near the point where the Israelites crossed the Red Sea, and opposite their encampment (*Ex.* 14:29 Nu. 33:7). The name is usually understood to point to a national Phœnician god of the

¹ This is akin to the theory of Movers, who makes Baal-zēbūl ('Lord of the heavenly dwelling') originally a name of Saturn, a theory which lacks evidence.
² Tiglath-pileser III. (*K B ii.* 26 f.) speaks first of the mountains of Lebanon and then of the land of Baalî-sapuna as far as the mountains of Ammana.
³ *E. G.*, AF 710, perhaps L. This form also seems to be Hexaplaric (see the Bohêric version; the older Sâhidic text has *mp* for *φ*).

¹ *Wi. Gf.* 1 223, 225; Hommel, *AHT* 196, 255. Halévy has made a similar mistake (see next note).
² Halévy (*Rev. sem.* 123) thought that he had proved this; but in *Ann. Rab.* 174, 16, to which he refers for an Ekronite Zabulu, the right reading is *Sapuna*.
³ Kuenen, *Oud.* 1 409 (f. 25, n. 5).

same name; but the Egyptians who mention a goddess Ba'al(1)-sapuna as worshipped at Memphis¹ connect this cultus, very significantly, with that of *Sapdu* (a), a local god of Western Goshen (see GOSHEN, § 2). This divinity was, therefore, evidently not a Phœnician deity; her domain, at any rate, was either in or near the region of Goshen. Consequently, the Baal whom this local Ba'al or Beltis implies was not also the Phœnician Baal-Zephon, though whether he had an independent origin or not, cannot as yet be determined. Like most of the local names of Goshen, Baal-Zephon (or rather—see (1)—Baal-Zaphon) is clearly Semitic.²

The honour accorded by the Egyptians to the consort of 'Baal-Zephon' no doubt proves the importance of that town of Goshen. It is difficult, however, at present, to determine the situation of the place (see EXODUS, i. § 6). The expression 'before Baal-Zephon, over against it' (obscured in Nu. 33.7 f.) need not signify 'eastward of,' which in ordinary Hebrew would be the most natural meaning; it seems rather to indicate here some point not yet touched on the N.E. (or S. 7).

Such identifications as that with Heroopolis (Forster), 'Ajrud (Nubeh), etc. had to be given up even before the situation of Goshen and Heroopolis was determined by Naville's excavations. For the value of more modern theories (Brugsch, = Mount Casius; Ebers, on the 'Atika mountain, SW. of Suez; Naville, on Lake Thirsai, near Suez en-Nedek), see EXODUS, i. § 7 f. 1, T. K. C. = 2, W. M. M.

BAANA (בַּאנָא), probably = BAANAH [below]; בַּאנָא [BNA].

1. b. Ahilud (or perhaps better Ahimelech; see AHILUD, 2; AHIMELECH, 1), Solomon's prefect in the valley of Jezreel; 1 K. 4.12 (בַּאנָא [B], אַחִימֶלֶךְ [L]).

2. b. Hushai, prefect in Asher; 1 K. 4.16 (בַּאנָא [L], בַּאנָה [L]). His father, Hushai, is no doubt the well-known courier of David (2 S. 15.32). Cp AHILUD, 2.

3. Uribe of ZADOK [L. 7]; Neh. 3.4 (om. A.; Baana [L]).

4. 1 Esd. 5.8; Neh. 7.7; BAANAH, 3.

BAANAH (בַּעֲנָה); cp Nabataean בַּעֲנָה [CNS 2.299]; BAANA [BNA].

1. b. Rimmon, a Beerothite, one of the murderers of Ishbaal, 2 S. 4.2 f. (Baana [L.], and in B. Baana [77.5], Baana [78.1]; Jos. Baana, Baana [L]). See RIMMON, 1, 2 S. 29.1.

2. Father of one of David's heroes, 2 S. 23.29 (Βαναμειν? [B], Baana [L]). 1 Ch. 11.20 (Βαναμειν [B], Baana [L]).

3. A leader (see EZRA, ii. § 8 c) in the great post-exilic list (ib. ii. § 6). EZRA 2.2 (Baana [B], Baana [L]). Neh. 7.7 = 1 Esd. 5.8, BAANA [L].

4. Signatory to the covenant (see EZRA, i. § 7); Neh. 10.27 [28] (om. L.).

BAANI (בַּאנִי [ε] [BA]). 1 Esd. 9.34 = EZRA 10.34, BANI, 2.

BAANIAS (ΒΑΝΝΙΑΙΟΣ [BA]), 1 Esd. 9.26, AV = EZRA 10.25, BENAIAM, 7.

BAARA (בַּעֲרָה), a 'wife' of SHAHARAIM (q.v.), in genealogy of BENJAMIN (§ 9 ii. β), 1 Ch. 8.8 (Βααρά [B], Βααρά [A], Βααρά [L]).

BAASEIAH (בַּעֲשִׂיָּה), no doubt a textual error for בַּעֲשִׂיָּה, see MAASEIAH), a Gershonite Levite; 1 Ch. 6.40 [25] (Μαααί [B], Βαααία [A], Βααία [L]).

BAASHA (בַּעֲשָׂה or בַּעֲשָׂה), § 51 (cp Bā. on 2 Ch. 16.1). BAACA [BAL]; Jos. Ant. vii. 12.3, ΒΑΑΧΗC; BAASA. Ba'sa occurs on the monolith inscription of

¹ Sall. 4.1, rev.; cp WMM, *Is. u. Eur.* 375. The reading *Ba'aly* (so Goodwin, Brugsch, etc.) is incorrect.

² What Baal-Zaphon (at any rate the Baal-Zaphon of Goshen) signifies is disputed. 'Watch-tower' (עֲשָׂה) it certainly does not mean. Gesenius (after Forster) compared the Gk. Τυφών (originally a wind god), who was identified by the Greeks with the Egyptian Set, Σεθ (EGYPT, § 14), on the basis of the later confusion with the giant Τυφώνεύς. Quite inadmissibly. Nor can the equation be supported by the unfortunate assertion that 'Tep' was a name of 'Set' (cp Renouf, *Hibb. Lects.* for 1879, p. 114). A much more reasonable explanation is 'master of the north. *Le.*, 'north point'; Baal-Zephon was indeed near the north end of the Gulf. Others (e.g., Ebers) explain Zaphon as 'the north wind,' this wind being important for the sailors on the Red Sea, who would make their orisons at the sanctuary of BAAL-ZAPHON. Cp the name Baal-sapuna on Hamathite territory (Tig.-pil. 111), Hommel, *AHT*, 255, WMM, *Is. u. Eur.* 375. See also ZAPHON.

Shalmaneser II. as the name of an Ammonite king [*Isrl. Par.* 294, *Schr. A. 17* = 196, *Mon. Hist. Proph. Mon.* 1273].¹ b. Ahijah, an Issacharite, became king of Israel in succession to Nadab, whom he conspired against and slew at the Philistine town of Gibbethon, afterwards killing all the rest of Jeroboam's family (1 K. 15.27 f.). The fact that the Philistines were able to resume war against Israel leads to the supposition that there had been a military revolution in which Baasha, one of Nadab's generals, was the leader (cp *Ki. Hist.* 2.254). His reign was marked by his energetic operations against ASA² (q.v.). By building Ramah (1 K. 15.17) Baasha had endeavoured to shut off Jerusalem from intercourse with the outer world, and ASA was saved only by the purchased aid of Benhadad (q.v., § 2), who invaded Israel 'unto Naphtali' (1 K. 15.20, cp 6). We know but little of his 'acts' or of his 'might' (חַיִּל, 1 K. 16.5). He was one of the few kings who died a natural death. He was buried at Tirzah, which was still the royal residence (1 K. 15.21.33), having been made such by Jeroboam (see TIRZAH), Baasha was the head of the second dynasty, which was extirpated at a later time by Zimri, 'in accordance with the word of Yahuweh which he spake against Baasha by Jehu the prophet' (see JEHU, 2, b. Hanani). The fate of the house of Baasha b. Ahijah, as also that of Jeroboam b. Nebat, is referred to by later writers; cp 1 K. 21.22 2 K. 19.6. See ISRAEL, § 26, CHRONOLOGY, § 8, and, for his date (about 900 B.C.), CHRONOLOGY, § 32.

BABEL,³ TOWER OF (Gen. 11.1-9). The story of the tower (בֵּילְתַר), when its lacunae have been filled up, is to this effect. All mankind had still

1. **OT story.** one language, and kept together. On one of their nomadic journeys they found a spot which suggested the adoption of a settled life; it was the plain of Shinar. Having no building material, they devised the plan of baking clay into bricks, and using bitumen for cement. They were the first city-builders. Their design, however, was to build, not only a city, but also a stupendously high tower which should be at once a monument of their strength and a centre or rallying-point that would prevent their ever being dispersed. Uneasy at their newly awakened activity, Yahuweh 'came down' to take a nearer view of the buildings, and then returned (to his lofty mountain abode, Ezek. 28.14) to take counsel with the sons of Elohim. This, he said, is but the beginning of human ambition; nothing will soon be too hard for man to do. Come, let us go down (together), and bring their speech into confusion. Hence arose the present variety of languages and the dispersion of mankind, and hence the name of the well-known city called Babylon.

This naive narrative, which is Yahwistic, probably comes from the same writer as the story of Paradise.⁴

2. **General character.** Both narratives bear the same childlike curiosity about causes, the same strongly anthropomorphic and in some sense polytheistic conception of the divine nature (cp v. 6 f. with

¹ We (*Heb.* 3. 6) suggests that אַשְׁמֶנֶת may be a contraction for אֶשְׁמֶנֶת. Similar contractions are seen in the Phoen. בַּעֲשָׂה and Aram. (from the Hauran) בַּעֲשָׂה. Sa is possibly a divine name and seems to recur in the names Alislah, Ammi-sha (or Amasa), etc.; see JERUSALEM. It may also be the same as the god y mentioned in a S. Arab. inscription (*Erf.* T. 10.329). Its identification with a Pahn. deity אַשְׁ is open to question.

² Cp the tradition referred to in Jer. 41.9 (S. omits the name).

³ On the name (בֵּילְתַר), see BABYLON, § 7, and below, col. 411, n. 4 & 6.

⁴ According to the non-critical view, the survivors of the Deluge made their way from the mountain on which the ark had rested to the land of Shinar (so Sayce, *Crit. Mon.* 155). The Deluge-story, however, makes Shem, Ham, and Japheth themselves the progenitors of the different sections of mankind, and has thus no need of the Tower-story. Even if such a narrative had been introduced into the Deluge-story, how could 'Shem, Ham, and Japheth' be called 'all the earth' (11.1)? See *We. CH.* 13; but cp Stade, *ZATW* 14. 276 f. [94].

BABEL, TOWER OF

822); both, therefore, have in all ages given occasion to the enemy to blaspheme. Philo (*De Confusione Linguarum*) thought that, to avoid 'the most surpassing impiety,' the anti-monothelism must be interpreted allegorically. If we are not prepared to follow him in this, we must once more apply the mythological key (see *ANNALES ÉPIQ.*, § 4).

It is perhaps the second *extant* chapter in the mythic chronicle of the first family that we have before us: the passage which originally linked the story of the Tower to that of Paradise has been lost (see NEPHILIM). It is clear, however, that the first men had not gone far from Paradise: they are still on their journeys 'in the east' when this ambitious project occurs to them (see GEOGRAPHY, § 13).

The narrative may be regarded in two aspects. While explaining how the city of Babylon, with its

3. Origin of diverse tongues. gigantic terrace-temples, came to be built (see § 4), it accounts for the division of men into different nations, separated in abode and speech. Not to be able to understand one's neighbour seemed to the primitive men a curse (cp *GEN. 11: 1-9*). It is not improbable that there was an ancient N. Semitic myth which explained how this curse arose. It is said that there are many such myths elsewhere,¹ and some of them (e.g., that reported by Livingstone from Lake Ngami, and that mentioned in the Bengal Census Report for 1872—to mention only two of the best attested) have a certain similarity to the Hebrew story. It is credible, therefore, that the N. Semites ascribed the curse of many languages to the attempt to erect a tower by which men might climb up 'above the stars of God' and 'sit on the mountain of assembly' and 'make themselves like the Most High' (*Is. 14: 13 f.*).

The old myth, like that which seems to underlie the story of SODOM (*J. v.*), said nothing as to where the town to which the tower belonged lay.

4. Origin of Babylon. When, however, through some devastating storm, one of the chief temple-towers of Babylon (see BABYLONIA, § 27) fell in remote days into disrepair, wandering Aramaean tribes may have marked it, and, connecting it with the 'babel' of foreign tongues in Babylon, may have localised the myth at the ruined temple-tower.² *Babel*, they would have exclaimed:³ it was here that God confounded men's speech, and the proofs of it are the ruined tower and the name of Babel.

It is remarkable that the polytheistic element in the old myth should have been so imperfectly removed.

5. Character of myth. Even the writer who adopted and retold the story was still far off from the later transcendental monotheism. The changes which he introduced consisted in omissions rather than in insertions. Yahvé still has to come down to inquire; he still has to communicate the result to the inferior divine beings, and bring them with him to execute judgment; but, though he needs society, as ruler Yahvé stands alone: there is no triad of great gods, as in Babylon. It is also worth mentioning that the narrator's idea of civilisation is essentially a worthy one. No city can be built, according to these early men, without a religious sanction. Enos, as another myth appears to have said, is at once the beginner of forms of worship

and the father of Cain the city-builder (see CAIN, § 1).

On the other hand, the idea that God grudges man the strength which comes from union, and fears human ambition, is obviously one of the 'beggarly elements' of ethnic religion from which Jewish religion had yet to disengage itself.

We have seen that there was not improbably an old N. Semitic myth of the interrupted building of a tower to account for the dispersion of the nations. Should such a myth one day

6. OT form not Babylonian. be discovered in Babylonia,⁴ it will certainly disappoint many persons by not mentioning the 'confusion of languages,' nor giving Babylon as the scene of the events, (1) because the Ass. *bullulu* means 'fundere,' not 'confundere,' and (2) because the city of Babylon was regarded as of divine origin, and its name *Bibili* was explained as *Bab-ili*, 'the gate of God,' or 'of the gods' (cp BABYLON, § 1). The latter reason is decisive also against the theory⁵ that the Sibilynian story of the Tower of Babel and the cognate one of Abydnus⁶ rest on Babylonian authority. That two of the reports of the story give the polytheistic of *theoi* proves nothing, for the plural was sufficiently suggested by the Hebrew narrative (*vs. 7*). The non-biblical features of their version, though in one point (the object ascribed to the builders) probably an accurate reconstruction of the earliest myth, are of no authority, being clearly derived from the imaginative Jewish Haggada,⁷ which is responsible also for the part assigned by later writers to Nimrod (*Jos. Ant. i. 42*; cp Dante, *Inf. 31: 76-81*).

Where was the tower referred to in the Hebrew narrative? Few scholars have declared this problem insoluble; but almost all have

7. Site of tower. missed what seems the most natural answer.

Benjamin of Tudela, who travelled about A.D. 1160, supposed it to be the mound called by the Arabs Hirs Nimrud, which, he says, is made of bricks called *al-ijur*.⁸ This agrees with the Midrash (*Ber. rabba*, par. xxxviii), and is probably implied in the strange gloss of *Q* in *Is. 10: 9*. In the sixteenth century Balbi and Ralph Fitch, and in the seventeenth John Cartwright, give descriptions of the 'Tower of Babel' which are plainly suggested by the huge mass of brickswork, 6 or 7 m. W. of Baghdad, known as Tell Nimrud or 'Akarkuf' (see *Del. Trav.* 28; Peters, *Nippur*, i. 188 f.). Pietro della Valle in the eighteenth century preferred the great mound near Hillah called *Babil*, which, however, as Rassam has shown, represents the famous hanging gardens (see BABYLON, §§ 4, 8). In the nineteenth, C. J. Rich and Ker Porter revived the Hirs Nimrud theory, and most scholars have followed them, largely influenced by Nebuchadrezzar's Borsippa inscription. No one has put this view so plausibly as J. P. Peters, in an article which appeared since this article was written (*JBL*, 1896, p. 105). The statements of the king are no doubt well adapted to illustrate the disrepair into which (see § 4) the tower originally intended must have fallen, even though they do not, as Oppert once thought, describe the 'confusion of tongues. Let us pause upon them for a moment. They tell us that the temple-tower (*zikkurrat*) of Borsippa had 'fallen into decay since remote days,' and indeed that it had never been quite completed by its original builder. 'Rain and storm had thrown down its wall; the kiln-bricks of its covering had split; the bricks of its chamber were in heaps of rubbish.' 'To restore it,' says Nebuchadrezzar, 'the great Lord Marduk impelled my mind.'⁹

Borsippa, however, is not the place we should naturally go to for the tower. Babylon, and Babylon alone (which was always distinguished from Borsippa) must cover the site. The late Jewish tradition is of no value whatever: it grew up, probably, during the Exile, when Nebuchadrezzar's restoration of the 'temple of the

¹ See *EBD*, art. BABEL, TOWER OF (Sayce), and cp Loken, *The Foundation-myths*, 21-22.

² In a Babylonian hymn we find the god Bel identified with 'the great mountain whose top reaches to heaven' (Jensen, *Königst.* 113).

³ In the original myth there was no hyperbole. In the localised myth, however, the description 'whose top reacheth unto heaven' seems parallel to a phrase in *Dt. 1: 28*, and to similar descriptions of Egyptian obelisks (see Brugsch, *Égypte under the Pharaohs*, 310) and Assyrian and Babylonian temple-towers (so Tiglath-pileser; 'its temple-towers I raised to heaven,' *Del. Ass. HWB* 162; and Hammurabi, 'the temple whose top is high as heaven he built,' *KB* iii. a, 129).

⁴ A popular etymology would connect *Babel* with Aram. *babel* much more easily than with Heb. *bālal* (see Olshausen, *Lehrb.* § 189 a), as Bu. supposed in 1883 (*Uresch.* 387). Onkelos on *Gen. 11: 9* gives בבל for the בבל of MT.

and the father of Cain the city-builder (see CAIN, § 1). On the other hand, the idea that God grudges man the strength which comes from union, and fears human ambition, is obviously one of the 'beggarly elements' of ethnic religion from which Jewish religion had yet to disengage itself.

We have seen that there was not improbably an old N. Semitic myth of the interrupted building of a tower to account for the dispersion of the nations. Should such a myth one day

seven lights of heaven and earth' was recent. In the *sikkurat* of the great temple E-sagila (see BABYLON, §§ 4, 5), represented, according to Hommel, by Tell 'Amrân, we have the true tower of Babel. Nebuchadrezzar himself speaks of this tower in the Borsippa inscription. 'E-temen-an-ki, he says, 'the *sikkurat* of Babylon, I restored and finished.' An account of this building has been given from a Babylonian tablet by the late George Smith. He tells us that 'the whole height of this tower above its foundation was 15 *gar*, or 300 feet, exactly equal to the breadth of the base; and, as the foundation was most probably raised above the level of the ground, it would give a height of over 300 feet above the plain for this grandest of Babylonian temples.¹ What vicissitudes this *sikkurat*, or its predecessor, passed through in early times, who shall say?

T. K. C.

BABI (BAB) [A], 1 Esd. 8: 17 = Ezra 8: 17, BABAL, I.

BABYLON. The word בָּבֶל (BĀBYLŌN). Babel, designating the city which, in course of time, became the capital of the country known as Babylonia, is the Hebrew form of the native Bāb-ili ('gate of God,' or 'Gate of the gods'). The Accadian or Sumerian name, Ka-dingira, is a translation of the Semitic Babylonian. Of the other names of the city, Tim-ir, 'Seat of life,' and E or E-ki (translated 'house' or 'hollow') are among the best known. The existence of these various names is probably due to the incorporation, as the city grew, of outlying villages and districts. Among the places which seem to have been regarded, in later times, as a part of the city, may be mentioned Su-anna (a name sometimes apparently interchanged with that of Babylon itself); Te, which, though it had, like Babylon, a *piḫatu*, or district of its own, is nevertheless described as being 'within Babylon'; and Sappatum and Litamu, apparently names of plantations ultimately included in the city.

The date of the foundation of Babylon is still uncertain. Its association in Gen. 10:10 with Erech, Akkad, and Calneh implies that according to Hebrew tradition it was at least as old as those cities, and confirmation of this is to be found in the bilingual Creation-story (see CREATION, § 16 *it*), where it is mentioned as coeval with Erech and Nippur, two primeval cities, the latter of which has been proved by the excavations to date back to prehistoric times.

No detailed history of the rise of the city has yet come to light. Agum or Agu-kak-rime (about 1550 B.C.)

2. History. speaks of the glorious shrines of Marduk and Zirpanitum, in the temple E-sagila, which he restored with great splendour. About 892 B.C., Tukulti-Ninip, king of Assyria, took the city, slaying the inhabitants, and carrying a vast amount of spoil (including the property and dues of the great temple E-sagila) back with him to Assyria. Sennacherib, however, went farther than his predecessor. He says that, after having spoiled the city at least once, he devoted it to utter destruction. The temples, palaces, and city-walls were overthrown. The debris having been cast into the canal Arahtu, that waterway was still further dammed up, and a flood in consequence ravaged the country. Esarhaddon, when he came to the throne, began the rebuilding of the city, restoring the temples with much splendour; and the work of beautifying them was continued by Samsā-šum-ukin and Ašur-bāni-pal, his sons, the former as king of Babylon, and the latter as his suzerain. Later, Nabopolassar continued the work; but it was left for his son Nebuchadrezzar to bring the city to the very height of its glory. Later still, Cyrus held his court at Babylon (Su-anna), where vassal kings brought him tribute and paid him homage. The siege of the place and the destruction of its walls by

Darius Hystaspis were the beginning of its decay. Xerxes is said (Herod. 1:83) to have plundered the temple of Bēlus of the golden statue that Darius had not dared to remove, and Arrian (3:36) states that he destroyed the temple itself on his return from Greece. He relates also that Alexander wished to restore this celebrated fane,² but renounced the idea, as it would have taken ten thousand men more than two months to remove the rubbish alone. Be this as it may, Antiochus Soter, in an inscription found at Birs-Nimrūd, mentions having restored the temple E-sagila (the temple of Bēlus), showing that some attempt was made, notwithstanding Alexander's abandonment of the task in despair, to bring order into the chaotic mass of ruin to which it had apparently been reduced. The people of the great city had, in all probability, by this time almost entirely migrated to Seleucia, on the Tigris; but the temple services were continued as late as the third decade B.C., and probably even into the Christian era. The temple was still standing in 127 B.C. (reign of the Kharcenian king Hystaspines), and had a congregation, who worshipped the god Marduk in combination with Anu, this twofold godhead being, apparently, called Anna-Bēl. A small tablet, dated '219th year, Arsaces, king of kings,' records the borrowing by two priests of E-sa-bad (the temple of the goddess Gula at Babylon) of a certain sum of silver from the treasury of the temple of Bēl. This date, which is regarded as Arsacidean, shows that certain temples, including the tower of Bēlus, remained, with their priesthood and services, as late as the year 29 B.C. (*Bab. Or. Record*, 4 133).

Rather more than 50 miles south of Bagdād, on the east bank of the Euphrates, lie the ruins still identified

3. Ruins. by tradition as those of Babylon. These remains consist of a series of extensive, irregularly-shaped mounds covering, from north to south, a distance of about 5 miles. Bābil, the northmost ruin, has, according to Ainsworth, a square superficies of 120,000 ft., and a height of 64 ft. The next in order is the Mujlilbeh, of about the same superficies and a height of 28 ft. After this come two mounds close together, the Kasr or 'palace,' and that called 'Amrān-ibn-'Alī to the south of it. These two together have a superficies of 104,000 ft., and a height of 67 ft., or with the *bris*, or stone monument, 115 ft. Most of these two mounds is 'enclosed within an irregular triangle formed by two lines of ramparts and the river, the area being about 8 miles' (Loftus). Other remains, including two parallel lines of rampart, are scattered about, and there are the remains of an embankment on the river side. On the W. bank are the ruins of a palace said to be that of Neriglissar.

According to Herodotus (1:178-187), the city formed a vast square, 480 stades (55½ miles) in circumference. Around the city was a large ditch of running water, and beyond that a great rampart 200 cubits high and 50 broad,

4. Greek descriptions. there being on it room enough for a four-horse chariot to pass, and even to turn, in addition to space sufficient for 'chambers facing each other.' The top, therefore, would seem to have resembled a kind of street. The wall was pierced by a hundred gateways closed with brazen gates. On reaching the Euphrates, which (Herodotus says) divided the city, it was met by walls which lined the banks of the stream. The streets were arranged at right angles. Where those which ran down to the Euphrates met the river-wall, there were gateways allowing access to the river. On each bank of the Euphrates

¹ A confirmation of this occurs in the tablet *Bu. 93 5-12*, 61a, which is dated in 6th year of Aššurbanipal (Assurbanipal), and refers to the mass of silver as tribute paid *from across the river* at E-sagila (so to be read, according to the Aramaic docket), 'for the clearing away of the dust (rubbish) of E-sagila (E-sagila)' (Oppert in the *Comptes Rendus de l'Acad. des Inscriptions et belles Lettres*, 1898, pp. 414-5).

² See Sayce, *Hibb. Lect.*, App. ii.; but cp Jensen, *Kosmol.* 492 ff.

THE SITE OF BABYLON

Compiled mainly from surveys by Jones, Selby, Bewsher, and Collingwood, 1845-65, with corrections to 1885 (published by the India Office). Small additions, etc., from Kiepert's 'Ruinenfelder der Umgegend von Babylon' in *Ztschr. d. Gesellsch. f. Erskundn. zu Berlin*.

were certain fortified buildings, the royal palace being on one side, and the temple of Bélus on the other. The latter was a tower in stages, with an exterior winding ascent leading from stage to stage, and about half-way up a resting-place for the visitor. The top was surmounted by a spacious chapel, containing a richly covered bed and a golden table. None passed the night there, according to the priests, except a woman of the country whom the god had specially chosen. Lower down was another chapel containing a seated statue of Zeus (Bél-Marduk) and a large table, both of solid gold. Outside were two altars, one of them of gold; and it was here that the golden statue that was carried away by Xerxes formerly stood. Herodotus speaks also of the large reservoir, constructed, he says, by Queen Nitôeris, and of the embankments and the bridge that she made, the last being a series of piers of stone built in the river, connected by wooden drawbridges which were withdrawn at night. Nitôeris caused to be erected over the most frequented gate of the city, the tomb which she afterwards occupied; but this, he says, was removed by Darius, who thought that it was a pity that the gate should remain unused, and coveted the treasure that she was supposed to have placed there, which he failed to find. The houses of the city, according to Herodotus, were three and four stories high. He does not mention the hanging gardens.

Ctésias (ap. Diod. Siculus, 2, 7, 2) makes the circuit of the city only 360 stades (41 m. 600 yds.). It lay on both sides of the Euphrates, which was crossed by a bridge at its narrowest point. The bridge was similar to that described by Herodotus, and measured 5 stades (3032 ft.) in length and 30 ft. in breadth. At each end was a royal palace, that on the E. being the more splendid. There was a part called the twofold royal city, which was surrounded by three walls, the outmost having a circuit of 7 m. The height of the middle wall, which was circular, was 300 ft.; that of its towers, 420 ft. The inmost wall, however, was even higher. The walls of the second enclosure and those of the third were faced with coloured bricks, enamelled with various designs. Among them were representations of Semiramis and Ninus slaying the leopard and the lion. The two palaces were joined by a tunnel under the river as well as by a bridge. Diodorus mentions the square lake, and describes the temple of Bélus, which, he says, had a statue of Zeus (Bél-Marduk) 40 ft. high, and statues of Hera and Rhea (probably Ziranpanium [see SUCCÔTHI-BENOTH] and the goddess Damkina). He describes the famous hanging gardens, which were square, and measured 400 ft. each way, rising in terraces, and provided with earth enough to accommodate trees of great size. (For other Greek accounts, see (1) Arrian, *Anab.* 7, 251, and Plut. *Alex.* 74; (2) Diod. Sic. 2, 7-10, Curt. Ruf. 5, 1, 24-35; (3) Strab. 16, 15; (4) Diod. Sic. 2, 7, 251, and Plut. *Demetr.* 7; (5) Philistr. *Vit. Apoll.* 125; to which may be added (6) *Prosp.* in Jos. *Ant.* x. 11, C. *Ap.* 119 f., and Eus. *Præp. Ev.* 9, 97 & a.)

The best native account of the glories of Babylon is probably that of the well-known king Nebuchadrezzar (*Kîb Nûk* = *Nûk*) = ruler to whom the city owed much—who, indeed, may be said to have practically rebuilt it. The most important edifice to him was the temple of Bélus (Ē-sagila, later called Ē-saggil or Ē-sangil), and with this he begins, speaking first of the shrine of Marduk, the wall of which he covered with massive gold, lapis-lazuli, and white limestone. He refers to the two gates of the temple, and the place of the assembly, where the oracles were declared, and gives details of the work done upon them. It was apparently a part of this temple that he calls Ē-temen-ana-ki, 'the temple of the foundation of heaven and earth,' and describes as the 'tower of Babylon' (*sikkurat Babilî*), stating that he 'raised its head' in burnt brick and lapis-lazuli

(cp BABEL, TOWER OF, § 7). After referring to various other shrines and temples, he speaks of Imgur-Bél and Nimitti-Bél, the two great ramparts of the city, built, or rather, rebuilt, by his father Nabopolassar, who, however, had not been able to finish them. Nebuchadrezzar goes on to describe what he and his father had done on these defences—the digging and bricking of the moat, the bricking of the banks of the Euphrates, the improvement of the roadway called *Aa-ibur-Sabû*, the elevation of which Nebuchadrezzar raised 'from the shining gate to (the roadway called) *Istar-saikipat-têbi-Sa*,' and so on. In consequence of the raising of this street, the great city gates of the walls Imgur-Bél and Nimitti-Bél had to be made higher. They were at the same time decorated with lapis-lazuli and figures of bulls and serpents, provided with doors of cedar covered with bronze. Then, to strengthen the city still further, Nebuchadrezzar built, 4000 cubits beyond Imgur-Bél, another wall (with doors of cedar covered with bronze), surrounded with a ditch. To make the approach of an enemy to the city still more difficult, he surrounded the district with 'great waters' like unto the sea. After this he turned his attention to the royal palace, a structure which reached from the great wall Imgur-Bél to the canal of the rising sun, called Libilhegalla, and from the bank of the Euphrates to the street *Aa-ibur-Sabû*. It had been constructed, he says, by his father Nabopolassar; but its foundations had been weakened by a flood and by the raising of the street. This edifice Nebuchadrezzar placed in good repair, and adorned with gold, silver, precious stones, and every token of magnificence, after rearing it high 'as the wooded hills.' Other constructions that he made were a wall 490 cubits long (apparently intended to serve as an additional defence to a part of the outer wall) called Nimitti-Bél, and, between the two walls, a structure of brick, surmounted with a great edifice, destined for his royal seat. This palace, which joined that of his father, was erected in fifteen days. After adorning it with gold, silver, costly woods, and lapis lazuli, he built two great walls around it, one of them being constructed of stone.

There is a substantial agreement between this description and the description of the Greek writers. Ē-sagila, 'the high-headed temple,' is the temple of Bélus; the palace constructed in fifteen days is that referred to by Josephus as having been built in the same short period (*Ant.* x. 11). Nebuchadrezzar does not refer to the reservoir mentioned by the Greeks; but we may recognise it in the 'great waters, like the mass of the seas,' which he carried round the district, and designed for the same purpose—namely, defence against hostile attack. The walls, Nimitti-Bél and Imgur-Bél, are the outer and inner walls respectively, and the latter may be that which, according to Herodotus (above, § 4), ran along the banks of the river. The hanging gardens are not referred to by Nebuchadrezzar, and it is therefore very doubtful, notwithstanding the statement of Ctésias, whether this king built them. Such erections were not uncommon in Assyria, and it is even possible that they were due to the initiative of a king of that country. In the palace of *Asûr-hâni-pal* at Kunyujik, which was discovered and excavated by Rassam, was a room the bas-reliefs of which were devoted to scenes illustrating that king's Babylonian war, one of which shows a garden laid out on a slope, and continued above on a structure of vaulted brickwork, an arrangement fairly in accord with the description of the Babylonian hanging gardens given by Diodorus and Pliny; and it is noteworthy that the latter attributes them to a Syrian (Assyrian) king who reigned at Babylon, and built them to gratify a wife whom he loved greatly. This bas-relief was regarded by Sir Henry Rawlinson and George Smith as representing the hanging gardens at Babylon, and a neighbouring sculpture, which shows a series of fortified walls,

three or more, as well as a palace, probably represents the walls of the city as they were in the time of Ašur-bāni-pal and his brother Šamaš-šum-ukin, with whom he waged war. The palace has columns supported on the backs of lions.

A few additional details concerning the city are given by some of the many contract-tablets found on the spot. The city gates, some of the canals, and the streets and roadways seem to have been named after the gods. We read of the gates of Zagaga, Ninip, and Šamaš, and of the canal Nār Banitum.

7. Details from the contract-tablets.

Others of the canals received the names of the cities to which they flowed (e.g., the Borsippa canal, and the old Cuthah canal). The tablets confirm the statement of Q. Curtius that the houses of the city did not fill all the space enclosed by the walls, the greater part of the ground being apparently fields, gardens, and plantations of date-palms and other trees, sufficient to furnish all the provisions that the city needed in event of siege. There is no mention, in the native records, of a bridge across the Euphrates, such as is described by the Greeks; but a contract-tablet of the time of Darius seems to refer to a bridge of boats. There is no confirmation of the statement that there was a tunnel under the river.

There have been various conjectures as to the identification of the different ruins on the site of Babylon. Rich thought that the hanging-gardens were represented by the mound known as Bābil, and this is the opinion of Rassam, who found there 'four exquisitely-built wells of red granite in the S. portion of the mound.' They are supplied with water from the Euphrates, which flows about a mile away, and their depth is about 140 ft. Originally, he thinks, they were

about 50 or 60 ft. higher. Rassam regards Mujellibeh as representing the palace begun by Nabopolassar and finished by Nebuchadrezzar in fifteen days. Remains of enamelled tiles of various colours and designs are found, he says, only on that spot. The Kasr he takes to be the remains of the Temple of Belus, though he frankly admits that there are many difficulties in the way of this identification. As the latest opinions, carefully formed by one who has frequently been on the spot, they will probably be considered to possess a special value.

The two queens, Semiramis and Nitôcris, to whom so many of the wonders of ancient Babylon are attributed, are not mentioned on the native monuments of the Babylonians, as far as we are at present acquainted with them.¹ In all probability, the explanation of this difficulty is that they suggested the erection of the works in question, and the reigning ruler (probably their husbands) carried them out. Only careful exploration of the sites can decide satisfactorily the real nature of each ruin—by whom it was built, or rebuilt, or restored—and the changes that it underwent in the course of ages. The discovery of the wells at Bābil seems to place the nature of that ruin beyond doubt, though Oppert (*Comptes Rendus*, 1898, p. 420) thinks that its distance from the other remains is too great, in view of the fact that Alexander, when suffering from a mortal illness, was carried from the castle to the baths and the hanging gardens (Plut. *Alex.* ch. 76; Arrian, *Exp. AL* 725). Much more may be expected from the German explorations.

There is a thorough article on the history and the topography of the city of Babylon in Pauly-Wissowa's *Realenc. der class. Alterthumswiss.* ii. ('96). On the Babylon of the NT see PETER, EPISTLES OF, § 7, and cp. ROME.

The country of Babylonia, called by classical writers ΒΑΒΥΛΩΝΙΑ, takes its name from that of its principal city BABYLON (§ 1). In the OT

1. Names. The city and the country are not sharply distinguished; both are frequently included under the Hebrew בָּבֶל. In other passages the country is termed שִׁנְאֵר, Shinar (see SHINAR), while in post-exilic times the whole nation are referred to as כְּשִׂיטָיִם, 'Chaldeans,' and the country as אֶרֶץ כְּשִׂיטָיִם, 'the land of the Chaldeans' (see CHALDEA). Among the Babylonians themselves there was no single name for the whole country until the third Babylonian dynasty (eighteenth to twelfth century B.C.), when the Kassite designation of a portion of the country as Karduniash was extended and adopted in the royal inscriptions as a general name for the country,—a use of the term that was retained throughout the whole period of the nation's history. The whole of Babylonia could also be expressed by the double title Šumēr and Akkad, which the Babylonians adopted from the previous non-Semitic inhabitants of the land, Akkad designating the northern half of the country and Šumēr the southern half. The use of the former name was extended in the Neo-Babylonian period, and the word in such phrases as 'the king of Akkad' and 'the army of Akkad' was employed to designate the whole country. The terms *kibrat arbi'im*, 'the four quarters,' and *kislatu*, 'the world,' which occur in the royal titles *šar kibrat arbi'im*, 'king

of the four quarters,' and *šar kislati*, 'king of the world,' were employed to express extensions of the Babylonian empire beyond the natural limits of the country (cp. MESOPOTAMIA).

The natural features that bound the country of Babylonia are the Persian Gulf on the S., the Arabian desert on the W., and the Tigris on the E., while the limit from Assyria on the N.

2. Description. may be placed roughly at the line where the slightly elevated plain to the N. changes to the alluvial level. At the present day Babylonia in the S. differs considerably in size and conformation from the ancient aspect of the country. The soil carried down by the Tigris and the Euphrates is considerable, and the alluvium so formed at the head of the Persian Gulf increases to-day at the rate of about a mile in seventy years; moreover, it is thought by some that the rate of formation was considerably more rapid in ancient times. Thus in the early period of Babylonian history the Persian Gulf extended some 120 to 130 miles farther north than it extends at present, the Tigris and the Euphrates each entering the sea at a separate mouth. The country was thus protected on the S. by the sea, and on the W. by the desert which, rising a few feet above the plain of Babylonia, approached within thirty

¹ On Semiramis the wife of Ramman-ninari (or Adad-ninari) III., see ASSURUS, § 22. Apparently the only queen who reigned in her own right was Agadé-bat or Baucellit, in whose reign (c. 825) similar to those belonging to the time of Sargon of Agadé and his son were composed. She belongs to a very early period.

of the writing, however, there is no trace of the wedge:

the characters consist of straight lines.
8. Origin. This is due to the fact that cuneiform was merely a descendant of a system of picture-writing.

In the case of many of the characters which occur in the most ancient inscriptions it is still possible to recognise the original pictures which underlie them. For example the sign for 'heaven,' 'god,' 'high,' is a star with eight points, or possibly a circle intersected by four diameters; the sign for 'sun' is a rough circle representing the sun's disk; the sign for 'ox' is the head of an ox with horns; the sign for 'rain' is an ear of corn.

All the characters, however, did not descend from pictures. Some were formed artificially by combination. Thus the sign for 'water' when placed within that for 'mouth' gave a new sign with the meaning 'to drink'; the sign for food placed within the sign for 'mouth' gave a sign with the meaning 'to eat'; the sign for 'wild-ox' was formed by placing the sign for 'mountain' within that for 'ox'; while other signs were formed by writing a character twice or three times. Moreover, it is possible that the artificial formation of characters was customary to a considerable extent. According to a theory recently put forward by Delitzsch, certain strokes and combinations of strokes to be traced in the oldest forms of many of the characters had a meaning inherent in the names, and formed the material on the basis of which the signs maintaining them were developed. This question, however, is one on which it is impossible to form a conclusion until more of the inscriptions of the earliest period, recently discovered, have been published.

In the later forms which the characters assumed the original lines gave way to wedges from the fact that the scribes employed extensively soft clay instead of a material on which it was easy to write. A line formed by a single pressure of the style naturally assumed the form of a wedge, while the increased clearness and uniformity which resulted secured for the wedge its final adoption. In addition to the changes which occurred in the forms of the characters, there was a development in their signification. Originally representing complete words or ideas, they were gradually employed to express the sounds of the words they represented apart from their meaning; and thus were developed their syllabic values.

The Babylonians adopted this method of writing from

9. Principles. the non-Semitic race (see below, §§ 43, 71, *et*.) whom they found in possession of the country, and they adapted the system to their own idiom.

To characters or groups of characters representing Sumerian words they assigned the same words which were equivalent to them in meaning; they also employed the signs phonetically, the syllables they represented consisting of a vowel and a consonant (simple syllables)—*e.g.*, *ba, id, su*—or of a vowel between two consonants (compound syllables)—*e.g.*, *mat, kit, lul*. The system was further complicated by the fact that the majority of signs were polyphonous: that is to say, they had more than one syllabic value and could be used as ideograms for more than one word. A sign, therefore, might be used in one of three ways: as a syllable in a word written phonetically, or as an ideogram for a complete word, or as one sign in a group of two or more signs which together formed an ideogram for a complete word.

That this mixed method of ideographic and phonetic writing was often found ambiguous is attested by the methods which the Babylonians took to simplify it. (1) One of these methods consisted in adding to a word what has been termed its *determinative*, a sign attached to a word to indicate the class of thing to which it refers. Thus a special sign was placed before male proper names, another before female proper names; the sign for 'god' was placed before the names of deities; the sign for 'country' regularly preceded the names of countries; similar determinatives were used before the names of cities, mountains, rivers, tribes, professions, woods, plants, stones, garments, vessels, certain animals, the names of the months, stars, etc., while in a few cases the determinative is placed after the word, as in the case of places, birds, fish, etc. A determinative was never pronounced: it was designed only as a guide to the reader, indicating the character of the compound. (2) Another method used to the reader consisted in adding to an ideogram what has been termed its *phonetic complement*—that is to say, the final syllable of the word for which it is intended. By this means the reader is not only assisted in assigning the correct word to the ideogram, but also, in the case of verbs, is enabled to detect with greater ease the stem and tense intended by the writer. Even with this assistance, the writing, with its list of more than five hundred characters, was necessarily complicated. The use of ideograms was never entirely given up, and, although in the Neo-Babylonian period simple syllables were employed in preference to compound syllables, the Assyrians and Babylonians never attained the further development of an alphabet.

The decipherment of the Assyrian and Babylonian inscriptions resulted from the labours of scholars who had previously devoted themselves to the interpretation of the cuneiform inscriptions in old Persian.

From the sixth to the fourth century B.C. the Persians made

use for their inscriptions of a character which they had borrowed originally from the Babylonians. Other nations of W. Asia also, such as the Sussians and the people dwelling around Lake Van, borrowed from Babylon the idea of cuneiform writing, in some cases making use of the Babylonian characters, in others modifying them to a greater or less extent. The changes introduced by the Persians when they borrowed the idea of writing by means of wedges were considerable, for, instead of employing a sign-list of several hundred characters representing syllables and complete words, they confined themselves to thirty-nine, each of which represented a single alphabetic value. Of the various systems of cuneiform writing, therefore, the Persian was by far the simplest. The Achaemenian kings who ruled in Persia at this period numbered among their subjects the peoples of Susia and Babylonia, these countries having by conquest been added to their empire. When, therefore, they set up an inscription recording their campaigns or building operations, they added, by the side of the Persian text, Susian and Babylonian translations inscribed in the cuneiform characters employed by these two nations. There are thus engraved on the palaces and rocks of Persia trilingual inscriptions in the old Persian, Susian, and Babylonian characters, and it will be obvious that as soon as one of these three characters could be read the way would be opened to the decipherment of the other two. Of the three the Persian, with its comparatively small number of signs, is (as we have said) the simplest, and it was therefore natural that it was the first to attract the serious attention of scholars.

Grotefend, in a paper published in 1802, supplied the key to a correct method of decipherment. Taking two short inscriptions in the old Persian character which Nicholas Vassier had copied at Persepolis, he submitted them to an analysis. The inscriptions, he found, coincided throughout, with the exception of certain groups of characters, which, he conjectured, might represent proper names. On this assumption each inscription contained two proper names, the name of the king who set it up, and, it might be supposed, that of his father. But the name which occurred in one inscription was the name which stood second in the other—that is to say, the three different groups of characters must represent the names of three monarchs following one another in direct succession. From the fact that the inscriptions were found in the ruins of Persepolis it might be concluded that their writers were Persian kings; and when he applied, by way of experiment, the three names Hystaspes, Darius, and Xerxes, he found that they fitted the characters admirably. On his further deciphering the name of Cyrus he obtained correct values for more than a quarter of the alphabet.

Of the forty Persian signs, of which one is merely a diagonal stroke employed for dividing the words from one another, Grotefend's first alphabet included thirty. He subsequently suggested values for thirty-five characters, but he was not able to fix *r, s*, and *z*; his values *kh, dj*, and *ct* were practically correct; and his *v* was not far off the correct value *b*. About 1822 St. Martin took up the investigation, working at the decipherment for the next ten years, but without much result; he identified *t* and *v*, however, and for the vowel *i*, which had been read as *o* by Grotefend, he gave the improved reading *e*. The characters for *m* and *n* were identified by Rask in 1826, and Burnouf in his memoir, published ten years later, identified *k, b*, and *s*, while his readings *q* and *gh* for two other characters were great improvements on the suggestions of Grotefend and St. Martin. In the same year Lassen produced his first alphabet, improvements on which he published in 1839 and 1844, in a few cases making use of the suggestions of Jacquet and Beer which had been published soon after the appearance of his first alphabet. He suggested correct readings for at least ten characters, and improved readings of some others. This final alphabet did not contain many incorrect identifications. The scholar who did most, however, for the decipherment of the cuneiform inscriptions was the late Sir Henry Rawlinson. He first turned his attention to them in 1812, when he was stationed at Nimanshah, on the western frontier of Persia. At that time he had only heard of Grotefend's discovery; he had not seen a copy of his alphabet, and did not even know on what inscriptions it had been based. Thus he began the work of decipherment from the beginning. For his first analysis he took two short inscriptions, similar to those used for the purpose by Grotefend, which yielded him the names of Hystaspes, Darius, and Xerxes. During the next year he had increased his list of names by the correct identification of Arsames, Ariamenes, Teispes, Achaemenes, and Persia. It was not until the autumn of 1836 that he first had an opportunity of seeing the works of Grotefend and St. Martin. Then he perceived that his own alphabet, based as it was on longer inscriptions, was far in advance of the results obtained by them. In 1837 he copied the greater part of the long inscription at Behistun, containing the annals of Darius, and forwarded a translation of the first two paragraphs to the Royal Asiatic Society; but next summer, while at Teheran, he heard that Burnouf's publication had meanwhile anticipated many of his improvements. In the autumn of 1838 he obtained the published copies of the Persepolitan inscriptions, and with the help of the allied languages of Sanscrit and Zend, analysed every word in the inscriptions that had up to that time been copied. He then found that Lassen's alphabet confirmed many of his own conclusions; but he obtained assistance from it in the case of only one character.

¹ Die Entstehung des ältesten Schriftsystems (Leipzig, 1897).

It will thus be seen that Rawlinson worked out the characters of the Persian alphabet for himself independently of his predecessors and contemporaries; but it was not on this achievement that he himself based his title to originality. He justly claims that, whereas his predecessors had succeeded only in reading a few proper names and royal titles, he had been the first to present to the world a correct grammatical translation of over two hundred lines of cuneiform writing. This translation was in the hands of the Royal Asiatic Society, and was being prepared for publication in 1839, when his duties in Afghanistan put an end to his studies for some years. It was not until 1845 that he found leisure to complete the work, in which year he published his memoir containing a complete translation of the whole Persian text of the Behistun inscription.¹

Now that he had completed the decipherment of the old Persian cuneiform inscriptions, Rawlinson turned his attention to the Babylonian cuneiform.

13. Babylonian. A comparison of the third column of the Behistun inscription with the now known Persian text occurring in the first column was the starting-point of his studies, and in 1851 he published the text and translation of the Babylonian part of this inscription, at the same time demonstrating the fact that the Babylonian characters were polyphonous. The historical inscriptions on cylinders, slabs, and stelai that had been found in Assyria and Babylonia meanwhile afforded ample material for study, and other workers lent their aid in the decipherment. In the years 1849-1852 Hincks contributed papers to the Royal Irish Academy. His most important discovery was the determination of the syllabic nature of Babylonian writing. Subsequently Rawlinson, Hincks, Norris, and Oppert, while devoting themselves to the further interpretation of the historical inscriptions, classified the principal grammatical rules of the language, and so brought the work of decipherment to an end.

The earliest explorers of Babylonia did not undertake systematic excavation. They devoted themselves to

14. Excavations. surveying and describing the ruins that were still visible upon the surface. The

most valuable memoirs on the subject are those on the site of Babylon compiled by Rich, who from 1808 till 1821 was the Hon. East India Company's resident at Bagdad. Systematic excavations were first undertaken in Babylonia during the years 1849-55, under the direction of Sir Henry Rawlinson assisted by Loftus and Taylor.

In 1854 Rawlinson excavated at Birs Nimrud near the Euphrates a few miles S.W. of Hillah, a mound that marks the site of a great zikkurrat erected by Nebuchadrezzar II. within the boundaries of the ancient city of Borsippa. Here, in addition to tracing the plan of the building, he found fine cylinders recording Nebuchadrezzar's building operations. He also successfully excavated the mounds Kasr and Hâbil, to the N. of Hillah, within the site of ancient Babylon; and during the same period excavations were conducted at the mound of Niffer to the S.E. of Hillah, marking the site of the ancient city of Nippur, and in S. Babylonia at the mounds of Warka, the site of Erech, Senkerah the site of Larsa, and Mukayyar the site of Ur. While Rawlinson was carrying on these extensive excavations, the French furnished an expedition which was placed under the direction of Fresnel and Oppert, and during the years 1854-5 did valuable service, especially in surveying and describing the site of the ancient city of Babylon. In 1879 the Trustees of the British Museum again undertook systematic excavations, which were continued down to the year 1883 under the direction of their agent H. Rassam. Excavations were undertaken in the neighbourhood of Hillah, at Tell-Ibrahim, the site of the ancient city of Cuthah, and at Abu-Habbah, the site of Sippar, where exceedingly rich finds of tablets and cylinders were made. The various expeditions of George Smith and E. A. Wallis Budge resulted in the recovery of many Babylonian inscriptions. The French have obtained rich finds of sculptures and inscriptions of the early period at Telloh, in consequence of the exertions of de Sarcz, who, since his appointment as French vice-consul at Bassora (*Bassra*) in 1877, has devoted himself to the thorough excavation of the mounds that mark the site of the ancient city of Širpuria. The most recent excavations are those of the Americans at Niffer, which were begun in 1888; they were ably conducted by Haynes, and have only recently been discontinued.

With the exception of those at Telloh, the mounds of Babylonia, unlike those of ASSYRIA (*q. v.*, § 10), do not yield many sculptures or reliefs; but the excavations have enabled us to trace the history of the brick-built

¹ See *JRAS* 10.

palaces and temples, while the "finds" comprise vases, tablets of stone and inscribed alabaster vases, building-inscriptions upon cylinders, and thousands of inscribed clay tablets, many of which are of great literary, historical, and scientific interest.

As the soil of Babylonia is alluvial, it is entirely without metals, and even without stone, both of which had to be imported from other countries.

15. Building. This scarcity of stone had a considerable influence on the character of Babylonian architecture.

The difficulties of transport prohibited its adoption as a building material except to a very small extent, and as excellent clay was obtainable throughout the whole of Babylonia, all the temples and palaces as well as private dwellings were composed throughout of brick. The bricks were of two kinds, baked and unbaked. The former, though merely dried in the sun, formed a serviceable building-material, and in some cases entire buildings are composed of them. The usual practice, however, was to build the greater part of the structure of sun-dried bricks and then to face it with bricks dried in the kiln, the thin layer of harder material on the surface protecting the whole structure from rain and flood and change of temperature. Buildings of unbaked brick were often strengthened by thick layers of matting composed of reeds, while the interior structure of faced walls was in some cases strengthened at intervals by courses of baked brick. The bricks themselves vary considerably in size. Many of them were stamped with the name of the king for whose use they were made, which lends considerable aid in settling the date and history of many structures. For binding the bricks together two kinds of cement were employed, the one consisting of bitumen, the other of plain clay or mud, in some cases intermixed with chopped straw. The latter was used the more extensively, bitumen being employed only where there was special need of strength, as at the base of a building where injury from rain was to be feared (see BITUMEN). Conduits of baked bricks were employed for carrying off the water from the larger buildings (see also BRICK, § 4).

The principal building with the Babylonians was the *zikkurratu* or temple, consisting of a lofty structure

16. Temples. rising in huge stages one above the other, composed for the most part of solid brick and ascended by a staircase on the outside; the image of the god to whom it was dedicated was placed in the shrine at the top. The remains of these temple-towers at the present day are covered by huge mounds of earth and debris, and thus it is difficult to trace their plan and estimate their original dimensions. The larger ones, however, have been examined at different times. That at Warka, which at the present day rises more than a hundred feet above the plain, measures some two hundred feet square at its base, and consisted of at least two stories. The temple at Mukayyar is built on a platform raised about twenty feet above the plain; it is in the form of a parallelogram, the sides measuring 198 ft. and 133 ft., and the angles pointing to the cardinal points. Only two stories are at present traceable, of which the lower one is strengthened by buttresses. The upper story does not rise from the centre of the lower, but is built rather at one end.

There are said to have been traces on it, at the beginning of the century, of the chamber or shrine which may have originally contained the image of the god. The zikkurrat at Nippur is of a somewhat similar construction. It is built in the form of a parallelogram, on the N.W. edge of a large platform, the four corners also pointing to the four cardinal points. In this temple three stages have been traced, and it is not probable that there were more. In the later Babylonian period the number of stages was increased, as in the temple of Bêl or Marduk at Babylonia, and that of Nabû at Borsippa, both of which were finally rebuilt with great magnificence by Nebuchadrezzar II. (see BABYLON, NEBUCHAD-

REZZAR). Rising on their platforms high above the houses of the city and the surrounding plain, these ancient temples must have been impressive, though in the early period they were entirely without ornament or colour.

The remains of but few Babylonian palaces have been unearthed, that at Telloh being the one belonging

to the early period that has been most systematically excavated, while the finest example of the later period is the palace of Nebuchadrezzar at Babylon with its hanging gardens (see BABYLON, § 5 f.). Of the domestic architecture of the Babylonians not many remains have been recovered.

The site from which the finest examples of early Babylonian art have been obtained is Telloh, where

excavations have afforded evidence of an art so highly developed that its origin must be set back at least 2000 years before the consolidation of the Semitic kingdom of Babylonia (see below, § 54). Large seated statues, in diorite, of Ur-Bau and Gudea, carved in the round, stone slabs and plates sculptured in relief, small figures and carvings in marble, stone, ivory, and bronze, bronze and silver vessels, cylinder-seals, and ornaments of various kinds attest the skill of these early Sumerian artists, who were the teachers of the Semites by whom they were eventually displaced.

At a later period the Babylonians ornamented the interior of their palaces and houses by covering the brickwork with plaster, on which they painted; or they coated the walls with enamelled bricks. The development of sculpture, however, unlike that of Assyria, was hampered by the lack of material in which to work, and it is not surprising that the carvings that have come down to us never approach the level attained by the reliefs of the later Assyrian kings.

Of the many thousands of Babylonian and Assyrian inscriptions that have been recovered only a small

proportion can be classified as literature in the strict sense of the term. Perhaps the largest section of the inscriptions consists of the contract tablets, which throw an interesting light on the social and commercial life of the people, but in no single instance can be regarded as of literary value.¹ Similarly the many texts of a magical and astrological nature (see below, § 33 f.), tablets containing forecasts and omens, tablets prescribing offerings and ceremonies to be performed before the gods (§ 30), can hardly take rank as literature, though their classification and study is leading to a more accurate knowledge of Babylonian religion and belief; while the great body of letters and despatches dealing with both public and private affairs, written as most of them are in a terse, abbreviated style, are worthy of study from a philological rather than a literary standpoint.²

When all these deductions have been made, however, there remains a considerable number of texts on the basis of which the Babylonians and Assyrians may justly lay claim to the possession of a literature consisting of both

poetry and prose. The principal examples of Babylonian poetry are presented by the legends,³ the majority of which are written throughout in metre, by mythological and religious compositions and penitential psalms, many of which are composed in Sumerian with interlinear Assyrian translations, and by the many prayers, hymns, incantations, and litanies

¹ See Oppert and Menant, *Documents juridiques* (Paris, 1877); Strassmaier, *Bab. Texte* (Leipzig, 1880, etc.); Meissner, *Beitr. zum Altbab. Privatrecht* (Leipzig, 1880); also *A. P. 2*.

Assyrl.* 2; Jeremias, *Isidore Nimrod* (Leipzig, 1881); Jensen, *Königliche Sarginschriften*; Zimmermann in Gunkel's *Schöpf.* (Gött., 1895); and Del. *Abh. d. Königl. Sächs. Gesells. d. Wiss.*, Bd. 17, n. 2 (1906).

which occur on tablets by themselves, or are preserved in the ritual texts interspersed with directions for the performance of ceremonies.¹ It has long been recognised that Babylonian poetical compositions, like those of the Hebrews, are written in a rough metre consisting of verse and half-verse, the Babylonian scribes frequently emphasising the central division of the verse in the compositions they copied by writing its two halves in separate columns. More recently it has been pointed out² that in many compositions, in addition to this central division, each verse is divided by a definite number of accented syllables or rhythmic beats.

The feet or divisions so formed do not contain a fixed number of syllables, but consist of a single word or of not more than two or three short words closely connected with each other, such as prepositions and the substantives to which they are attached, words joined by the construct state, etc., the metre in some tablets being indicated by blank spaces left by the scribe. The commonest metre is that consisting of four divisions, in which the two halves of the verse are each subdivided; but this, in many texts, especially in some of the prayers, is interrupted at irregular intervals by a line of only three feet.

In many of the legends, moreover, the single verses are combined both by sense and by rhythm into strophes consisting of four or two lines each.

The best examples of Assyrian and Babylonian prose are the longer historical inscriptions belonging to the

later periods. This class of inscription demands a more detailed treatment. Apart from its literary value, it is the principal source of our knowledge of the history of the Babylonians and Assyrians themselves, and supplements and supports in many particulars the biblical narrative of the relations of Israel and Judah to their more powerful neighbours.

Unlike all other classes of inscriptions, which were written with a style on tablets made of clay, the historical inscriptions assume a variety of forms. The shortest form consists merely of a king's name and titles, which are stamped or inscribed on bricks built into the structure of a temple or palace which he had erected or restored. In some cases the actual stamps that were used for this purpose have been recovered. Similar short inscriptions were engraved during the old Babylonian period on door-sockets of stone. Another class of short inscription records the dedication of temples on their erection or when they have been rebuilt; these are frequently written on clay cones fashioned in the form of pegs or nails, which may very possibly have had a phallic significance. The cones of Gudea and Ur-Bau are those most frequently met with, while clay cones of different shapes were engraved by Mul-Babbar, patesi of Islan, Sin-gäsid, Kudur-Mabug and other early Babylonian kings; cones of bronze, ornamented with the figure of a god clasping the thicker end, have also been found at Telloh. Dedicatory inscriptions were also written on circular stones, perforated through the centre; when these are small they are usually described as 'mace-heads'; but the use to which the larger ones were put has not been ascertained. The 'mace-heads' of Sargon I, Mani-tusu, and Nanmaghiani are good examples of the former class. Small square tablets of diorite, but more commonly larger oblong tablets of limestone inscribed on both sides, were employed for votive inscriptions; those of Rim-Aku and of his wife, of Hamnu-rabi and of Samsu-iluna, are particularly fine examples of this class of inscription. In the later Babylonian period, when such a votive inscription of an early Babylonian king was found in the ruins or ancient archives of a temple, a pious Babylonian would frequently have an accurate copy of it made in clay,

which he placed as an offering in one of the temples in Babylon. Several archaic inscriptions have thus been preserved in Neo-Babylonian copies. The famous stone-tablet recording the endowment of the temple of the Sun-god at Sippar by Nabû-pal-iddina, which was found in a clay coffer with the sculptured portion protected by clay shields provided for it by Nabopolassar nearly three hundred years after it was engraved, is unique.

Clay vases and bowls were employed by some of the Assyrian kings for recording their building operations, the inscriptions running in parallel lines round the outside, while vases of alabaster which were presented to the temples frequently bore the name and titles of the king who dedicated them. Inscriptions on statues are not frequently met with in the later periods of Babylonian and Assyrian history, the short inscriptions on the statues of Āšur-nāsir-pal, the longer inscription on the seated figure of Šhalmāneser II., and those on the two large figures of the god Nebo, being the principal examples; at Telloh, however, long inscriptions of the non-Semitic kings Gudea and Ur-Bau are found engraved on their statues of diorite. Slabs of stone, marble, and alabaster were employed for longer historical inscriptions. These were sometimes treated as tablets and engraved on both sides, as in the memorial tablets of Rammān-nirari I.; but more frequently they were intended as monuments, and set up in the palaces of the kings who made them; parts of many are decorated with sculpture, and in some instances with portraits in relief of the king whose deeds they record. The later Assyrian kings also engraved their records on the colossal winged bulls and lions that flanked the entrances to their palaces, and by the side of, and even upon, the bas-reliefs which lined their walls. In some places on the borders of Assyria, as in the district of Lelanan and at the source of the Tigris, inscriptions to record the farthest point reached by some military expedition were engraved in the living rock.

Clay, however, was the material most extensively employed, and for the longer historical inscriptions some form of prism or cylinder was found to offer the greatest amount of surface in the most compact form;

the two earliest prisms that have been discovered are those of Gudea, each of which contains about two thousand lines of writing.

The annals of several of the Assyrian kings also were inscribed on clay prisms, good examples of which are the four eight-sided prisms¹ of Tiglath-pileser I. (see ASSYRIA, § 26), the famous six-sided 'Taylor' prism² of Sennacherib, which contains an account of his siege of Jerusalem (see SENNACHERIB), the six-sided prism³ of ESARHADDON (q.v.), and the fine ten-sided prism⁴ of Āšur-bāni-pāl.

Small barrel-cylinders were employed by some of the Assyrian kings, including Sargon, Esarhaddon, Āšur-bāni-pāl, and Šin-šar-iškun, and larger ones, containing accounts of his first three campaigns, by Sennacherib. Barrel-cylinders, however, are principally associated with the later Babylonian kings. Most of them contain accounts of the building operations of NEBU-CHADREZZAR II. (q.v.) and Nabonidus. The two latest barrel-cylinders that have been recovered are those of Cyrus (see below, § 66), describing his taking of Babylon (538 B.C.), and of Antiochus-Soter (280-260 B.C.), recording his rebuilding of the temple of E-zida in Borsippa.

Large clay tablets with one, two, or three columns of writing on each side were employed for long historical inscriptions. Among the best examples are the tablets of Tiglath-pileser III., which were found in the SE. palace at Nimrid; the tablet of Esarhaddon inscribed with his genealogy and an account of his building operations, the tablet giving an account of Āšur-bāni-pāl's accession to the throne of Assyria, and of the installation of his brother as viceroy of Babylon, and those recording Āšur-bāni-pāl's conquests in Arabia and Elam, his campaigns in Egypt, and the embassy of Gyges, king of Lydia.

The Assyrians and Babylonians themselves were ardent students of their own literature, compiling catalogues of their principal literary compositions, and writing explanatory tablets and commentaries on many of the more difficult texts. Their language itself and their method of writing

were studied in detail, archaic forms of characters being collected into lists and traced back to the pictures from which they originally sprang. Syllabaries giving the values of the characters in Sumerian, and their Assyrian names and meanings, were compiled. Collections of grammatical paradigms for every class of tablet were made for the use of beginners; examples of verbal formations were collected and classified; and explanatory lists of ideographs were made, arranged in some instances according to the forms of the characters with which they began or ended, in others according to the meanings or roots of their Assyrian equivalents. Perhaps the most interesting of the grammatical tablets are the lists of synonymous words, which served the purpose of a modern dictionary.

The most notable scientific achievements of the Babylonians were their knowledge of astronomy and their method of reckoning time.

24. Astronomy. These two achievements are to a great extent connected with each other, for it was owing to their astronomical knowledge that the Babylonians were enabled to form a calendar. From the earliest times, in fact, the Babylonians divided the year into months, partly of thirty and partly of twenty-nine days, and by means of intercalary months they brought their lunar and their solar year into harmony with each other. Their achievements in astronomy are the more remarkable as their knowledge of mathematics was not extraordinary: though we possess tablets containing correct calculations of square and cube roots, most of their calculations, even in the later astronomical tablets, are based principally on addition and subtraction.

Herodotus and other ancient writers concur in tracing to Babylonia the origin of the science of astronomy, as known to the ancient nations of Europe and W. Asia. In more recent times some scholars have asserted, with less probability, that Indian and Chinese astronomers also obtained their knowledge, in the first instance, from Babylon. That the Babylonians themselves took astronomical observations from the earliest periods of their history is attested by general tradition; and, though the forms this tradition assumed sometimes exhibit extraordinary exaggeration,—as in the calculations referred to by Pliny, according to one of which the Babylonians possessed records of astronomical calculations for 490,000 years, and according to another for 720,000 years,—there is not sufficient reason for rejecting the tradition as having no substratum of truth, and it is not improbable that the Babylonians, even before the era of Sargon I., were watching the stars and laying the foundations of the science. The first observations naturally belonged rather to the practice of astrology and can hardly be reckoned as scientific, and it is not until the later periods of Assyrian and Babylonian history that we meet with tablets containing astronomical as opposed to astrological observations.

The Assyrians made their observations from specially constructed observatories, which were not improbably connected with the temples; the observatory was termed a *bit tamarti*, or 'house of observation'; and we possess the reports of the astronomers sent from these observatories to the king recording successful and unsuccessful observations of the moon, the unsuccessful observation of an expected eclipse, the date of the vernal equinox, etc. The astronomers, as a rule, sign their names in the reports, and from this source we know that there were important astronomical schools at Āšur, Nineveh, and Arbēla in the seventh and eighth centuries B.C.; the many fragments of tablets containing lists of stars, observations, and calendars, which date from the same period, are, however, of an astrological rather than a scientific character.

Although we first meet with astronomical inscriptions on Assyrian tablets, it is probable that the Assyrians derived their knowledge originally from Babylonia, and we may see an indication of this origin in a fragment of

¹ Translation in *KTB* 1 14-48.

² Translation in *KTB* 2 80-113.

³ Translation in *KTB* 2 124-140.

⁴ Translation in *KTB* 2 152-236.

an Assyrian commentary referring to an astronomical inscription which had been brought to Assyria from the ancient city of Agadé. At a later period there were important schools of astronomy in Babylonia, at Sippar, Borsippa, and Orchoe; but it is from inscriptions obtained from the site of the first of these three cities alone that our knowledge of Babylonian astronomy is principally derived. Excavations undertaken at Abū-Habbah, the site of Sippar, resulted in the discovery of many fragments of astronomical tablets (belonging principally to the Seleucid and Arsacid eras) written in the later cursive Babylonian; and these, though in but few instances unbroken, have sufficed to vindicate the scientific character of Babylonian astronomy. Though the Babylonians may have had no correct conception of the solar system, they had, at least in the later period of their history, arrived at the conclusion that the movements of the heavenly bodies were governed by laws and were amenable to calculation; and from the tablets we gather that they both observed and calculated the time of the appearance of the new moon, and the periodical occurrence of lunar and solar eclipses, that they noted the courses of the planets, and that they included in their observations certain of the principal constellations and fixed stars.

As in all primitive religions, the gods of Babylonia were in their origin personifications of the forces of

25. Religion: nature. The various phenomena of
its general the world were not regarded as the
character. result of natural laws. They were explained as due to the arbitrary action

of mysterious beings of more than human power. The tempest with its thunder and lightning was mysterious — it must therefore be the work of a god; the light of the sun is the gift of the god, to whose unwearying exertion its movements in heaven are due; heaven itself is a realm as solid as the earth on which men walk; and each must be controlled by its own peculiar deity. In fact, Babylonian religion was a worship of nature in all its parts, each part the province of a deity, friendly or hostile to man, subject to human passions, and, like man, endowed with the powers of thought and speech. Many of the gods resembled mankind in having human bodies; some resembled animals; and others were monsters, partly man and partly beast. They differed from man in the possession of superhuman powers; but no one deity was all-powerful. The authority, even of the greater gods, was specialised, and beneath them were a host of demons endowed with various qualities, but of more narrowly limited influence.

Such is the general character of the Babylonian pantheon regarded as a whole; but it was not in the mass that the Babylonians themselves worshipped their gods, and this fact serves to explain the varying theology presented by the Babylonian religious texts. Every city, for example, had its own special god (cp § 68), who was not only the god of that city but also, for its inhabitants, the greatest of the gods; so too in the temple of any god a worshipper could address him in terms of the highest praise, and ascribe to him the loftiest attributes, without in any way violating the canons of his creed, and with no danger of raising the jealousy or wrath of other deities. In fact, in the Babylonian system, there was no accurately determined hierarchy, and the rank and order of the various deities was not strictly defined, but varied at different periods and in the different cities throughout the land. The tolerant nature of the Babylonian deities and the elasticity of their character explain the ease with which foreign deities were adopted and assimilated by the pantheon, while the origin of this elasticity may be traced back to the mixture of races from which the Babylonian nation sprang.

In spite of the varying nature of the Babylonian pantheon, it is still possible to sketch the general character and attributes of the principal Babylonian

deities. At the head of the pantheon, from the earliest period, stood a powerful triad consisting of Anu, the god

26. The gods. of heaven, Bēl, the god of the earth, and Ea, the god of the abyss and of hidden knowledge. Next in order comes a second triad, comprising the two chief light-gods and the god of the atmosphere: *i.e.*, Sin, the Moon-god, Šamaš, the Sun-god, and Rammān, the god of storm, thunder and lightning, clouds and rain. All of these gods had their own cities, which were especially devoted to their worship. Thus the worship of Anu was centred at Erech, that of Bēl at Nippur, and that of Ea at Eridu; the oldest seat of the worship of Sin was Ur, though in Harrān also there was an important temple of the Moon-god; and the cities of Larsa and Sippar were the principal centres of the Sun-god's worship. The city-god of Babylon was Marduk, whose importance in the pantheon increased as that city became the capital of the country, until in process of time he came to be identified with Bēl, 'the lord' *par excellence*. The nearness of Borsippa to the capital explains the close connection of Nabū, its city-god, with Marduk, whose attendant and minister he is represented to have been. The god Ninib, whose name is read by some as Adar, was of solar origin; the fire-god, who plays an important part in the magical beliefs and ceremonies of the Babylonians, was Nusku; and the god of battle was Nergal, the centre of whose worship was at Cuthah.

The Babylonian goddesses were in most cases of minor importance; they were overshadowed by the male deities with whom they were connected, and the principal function of each was to become the mother of other gods. In some cases their very names betray their secondary importance, as in that of Anatu, the spouse of Anu, and that of Bēlit, the spouse of Bēl. The spouse of Ea was Damkina; Ningal was the lady of the Moon-god, Ai of Šamaš, Sala of Rammān, Tašmētu of Nabū, Gula of Ninib, and Laz of Nergal.

The relationships of the gods to one another are not accurately determined, in some cases contradictory traditions having been handed down; Sin, Šamaš, and Ninib, however, were regarded as the children of Bēl, though Šamaš also passed as the son of Sin and Ningal, Marduk was the son of Ea, and Nabū the son of Marduk.

On a different plane from the other goddesses stands Ištar, one of the most powerful deities in the pantheon. She appears in two distinct characters, under which she assumes different titles, and is credited with different genealogies. As the goddess of battle she was hailed as Anunitu, the daughter of Sin and Ningal, and was worshipped at Agadé and at Sippar of Anunitu; as the goddess of love she was termed Bēlit-ilāni, the daughter of Anu and Anatu, and the chief seat of her worship was the temple of E-ana at Erech; it was here that the unchaste rites, referred to by Herodotus as having been paid to the goddess Mylitta, with whom Ištar is to be identified, were performed. Her name was connected in legend with Dumuzi or Tammūz, her youthful lover, on whose death, it is related, she descended to the lower world to recover him.

The conception of the Babylonian deities as actual personalities endowed with the bodies and swayed by the passions of mankind, and related to one another by human bonds of kindred, was not inconsistent with the other and more abstract side of their character which underlay and was to a great extent the origin of the human attributes with which they were credited. Thus, the return of Tammūz and Ištar to earth was the mythological conception of the yearly return of spring. Moreover, as each force in nature varies in its action at different seasons, so each of its manifestations may be connected with a separate deity. The attributes of several gods can thus be traced to a solar origin. Whilst Šamaš represented the sun in general, special manifestations of his power were connected with other deities; Nergal, the god of war, for example, represents

the sun's destructive heat in summer and at noon-day, Ninib the sun on the horizon at sunrise and sunset, and Marduk, the special friend of man, its temperate heat in the morning and in spring. The aspect of the heavens at night also plays a considerable part in the origin of the gods of Babylonia. Thus each of the planets was connected with one of the greater gods: the fixed stars represented lesser deities, and Bel and Ea, though ruling the earth and the abyss, also had astrological characters, in virtue of which they divided with Anu the control of the sky.

The worship of their deities by the Babylonians was attended by a complicated system of ritual and ceremony.

27. Temples. It formed one of the most important aspects of the national life, and, as their temples were the largest of their buildings, so the priests were the most powerful class in the community. In each city the largest and most important temple was that devoted to the city-god. Thus the chief temple at Babylon was E-sagila, the centre of the worship of Marduk; the great temple at Borsippa was E-zida, the temple of Nabu; the principal temple at Nippur was E-kur, the centre of Bel's worship; and E-hul-hul the temple of the Moon god at Harrān, E-barra the temple of Šamaš both at Sippar and at Larsa, and E-ana the temple of Istar at Erech, were the principal temples in each of these cities. Situated on a lofty platform and rising stage upon stage, these zigurats or temple-towers dominated the surrounding houses, and were more imposing than the royal palaces themselves. At the summit of each the image of the god reposed in his shrine, and around its base clustered the temple offices and the dwellings of the priests. To each temple was attached a trained and organised priesthood, devoted exclusively to the worship of its god, and preserving its own ritual and body of tradition. The temples were under the direct patronage of the kings, who prided themselves on the rebuilding and restoration of their fabrics as much as on the successful issue of their campaigns, while the priesthoods were supported by regular and appointed offerings in addition to the revenues they drew from the lands and property with which the temples were endowed. The

28. Priests. The influence of the priests upon the people was exerted from many sides, for not only were they the god's representatives, whose services were required for any act of worship or intercession, but they also regulated and controlled all departments of civil life. They represented the learned section of the nation, and in all probability the scribes belonged entirely to the priestly class. They composed and preserved the national records, and although some of the later Assyrian kings collected libraries in their palaces, this was probably accomplished only with the co-operation of the priesthood and by drawing on the collections of tablets preserved in the great temples throughout the country.

A still more powerful influence was exerted by the priests on the common people in connection with their social life and commercial transactions, inasmuch as the administration of the law was in their hands.

The religious functions discharged by the priesthood were twofold. On the one hand, they carried out the regular sacrifices and services of the temple to which they were attached; on the other, they were always at the service of any one who wished to present an offering or make intercession in his own behalf. In their former capacity they celebrated regular feasts in every month as well as the great festivals of the year, such as the New Year; in the latter their ministrations were more personal, and consisted in introducing the individual suppliant into the presence of the deity and performing for him the necessary rites.

29. Claims of religion. Every Babylonian had his own god and goddess, to whose worship he dedicated himself. They, in return, were his patrons and protectors. When any misfortune happened to

him it was a sure sign that his god and goddess were angry and had removed from him their countenance and protection, and in such a predicament he would have recourse to the temple of one of the greater gods, whose influence he would invoke for his restoration to the favour of his patron deities. The protection of his god and goddess were necessary to preserve a man from the spiritual dangers that surrounded him, for he believed that on every side were evil gods, spirits, demons, and spectres, who were waiting for any opportunity he might give them to injure him. Any sickness or misfortune, in fact, he regarded as due to a spell cast upon him which had its origin in one of several causes. It might be the result of an act of sin or impurity committed by him with or without his own knowledge; or it was the work of an evil spirit or demon; or, finally, it was due to the machinations of a sorcerer or sorceress. Whatever its cause, his only hope of recovery lay in recourse to the priests, through whom he could approach one of the gods.

From the carvings on Babylonian cylinder-seals we know the attitude that the suppliant must assume when led into the presence of the god. He is represented as standing with both hands raised before him, or, with one hand raised, he is being led forward by the priest, who grasps the other. The penitential psalms and incantations preserved on tablets from the library of

30 Religious observances. Ašur-bāni-pal indicate the general character of the petitions he must make, consisting of invocations of the deity addressed, confessions of sin, and prayers for assistance, recited partly by the priest and partly by the suppliant himself. Many tablets record the offerings that must be made before the gods, comprising oxen, sheep, lambs, birds, fish, bread, dates, butter, honey, oil, date-wine, sesame wine, pieces of precious woods, gold, jewels, and precious stones, plants, herbs, and flowers. Many magical rites and ceremonies were performed by the priests, such as the knotting and unknitting of coloured threads, the burning of small images made of a variety of substances, including bronze, clay, bitumen, plaster, wood, and honey, to the accompaniment of incantations; the throwing into a bright fire of certain substances, such as a fleece, a goat-skin, a piece of wool, certain seeds or a pod of garlic, a special form of words being recited by the priest as he performed the rite; the dropping of certain substances into oil and the pouring out of libations. Such ceremonies and rites were not regarded as symbolical, but were supposed to be sufficient in themselves to secure the suppliant's release from the spell or ban to which his sufferings or misfortunes were due.

The prediction of future events also plays an important part in the religion of the Babylonians and Assyrians.

31. Augury. So far from being carried on in secret and by a few isolated soothsayers, augury was practised as a science by a large and organised body of the priesthood under the direct control and patronage of the king. This being the case, it is not surprising that a considerable portion of the native literature deals with the subject of omens and forecasts. Almost every event of common life was regarded by the pious Babylonian as perhaps a favourable or unfavourable sign requiring the interpretation of an expert, and necessitating a journey to the temple. Those whose duty it was to furnish the interpretation of such an event did not necessarily pretend to second sight or rely on a vision or any divine communication; their answer was based on their own knowledge, acquired by special training and study. In the course of time all events and the consequences said to result from them had been written down; the tablets on which they were inscribed had been divided into classes according to the subjects of their contents; and many were collected into series. Thus an important temple would contain a small library dealing with the subject, requiring to be mastered by

the novice and always at hand for the consultation of the augurs themselves. Many of these tablets have been preserved, and it is to them that we owe our knowledge of this important department of Babylonian religion.

The text of an omen-tablet consists of short sentences, each of which generally occupies one line of the tablet.

32. Omen-tablets. The construction of the sentence is invariably the same and may be rendered by the following formula: 'when (or if) so and so is the case, such and such an event will happen.' There are, therefore, two ways in which we may classify an omen—either by its protasis or its apodosis.

Regarded from the latter point of view, all omens may be roughly divided into those that relate to public affairs and those that relate to the fortunes of an individual. Thus certain occurrences may be looked upon as foretelling the death of the king or the future condition of the country, whether there will be a plentiful harvest or a famine, whether there will be war or peace, and, if war, in what quarter it may be expected. Those which relate to private affairs, on the other hand, concern themselves with the health, sickness, or death of a man or of his wife or child, or foretell the stability or destruction of his house. Some few tablets indeed relate to special classes, such as those which foretell accidents that may happen to women during pregnancy; but in the majority of omen-texts the apodosis is couched in general terms and the same phrases regularly recur. In fact, the events foretold are not very many, and may generally be classed under the headings of death and life, sickness and health, famine and plenty, war and peace; the predictions are cast in a vague form, and details, such as the place or manner of a man's death, are but rarely specified. In the protasis, on the other hand, we find an almost bewildering variety of subjects, which admit, however, of a rough classification. What is perhaps the largest section centres round the phenomena of human birth, the predictions being based on the manner of delivery and on the appearance of the child; and not only were miscarriages and the births of monstrosities regarded as of peculiar import, but variations in the appearance of normal offspring also formed the basis of prediction.

Important parts of the body of a newly-born child are dealt with independently, and to have grouped correctly the significance of every part must have required a long course of training and study of the tablets. The state of the eyes or the hair, the position and size of the ears, mouth, hands and feet, the resemblance of the face to that of certain animals, were all carefully considered. The parturition of animals also was made a special study, the appearance of the offspring of lions, oxen, horses, and other animals, the colour of their hair and the number and position of their limbs, being regarded as significant. Omens were drawn from the appearance of the various parts of the body of an adult, male or female, especially in sickness, such as the state and colour of the eyes, the ears, and the hair, the state of the heart, the lungs, the buttocks, and other members of the body, the resemblance of the head to that of a bird or beast, the condition of the urine, etc.; and with a view to predictions, studies were also made of the actions of a man, such as that of eating, and certain other of his natural functions. Another large class of omens were drawn from the appearance of animals, such as the colour of the horns of oxen and the direction in which they curve, while the actions of certain animals (pigs, horses, etc.) were likewise studied. If a man is walking and wishes to know the future he must note the direction in which an animal moves round him, and he must note if a lion, or a hyena, or a bird crosses his path. If he sees a snake at the entrance of a gate or at the doors of a temple, or dogs and calves as he is going out of a door, he must visit the augur for an interpretation. The appearance of animals, snakes, or scorpions in a man's house, or in a palace or a temple, was of significance, while the sting of a scorpion was a warning of dire events, different results following from stings on different toes. The appearance and flight of birds were exhaustively treated, and a man was wise if he did not disregard the flappings of a bird's wing and did not fail to observe the direction in which it flew should it flutter round his head. Another class of omens laid stress on the locality of certain events; those occurring in cities and streets received a treatment different from that of occurrences in the fields and open country. Predictions were made from the state of a house, its walls, etc., and even from the state of the furniture which it contained. The time of the events or observations was in some instances considered important, and in these cases the month and day were specially noted.

As omens were taken from so many common objects and occurrences, it was natural that dreams and visions

33. Dreams should be regarded as indications of future prosperity or misfortune, and that the objects or animals a man might behold in a dream had each a different signification. Thus, if he beheld in his dream certain people, or seemed to be fighting with a relation, such as his father or grandfather, the visions had a special meaning, while the fact that the person he fought with was alive or dead at the time was also of importance; apparitions of spectres and demons in a house were indicative of the future. In the majority of omens the conditions on which they were based were chance occurrences and events; it was, however, possible to obtain information as to the future by artificial means, such as by observing the entrails of victims, by kindling fire on an altar and noting the direction in which the smoke rose, or by observing the flickering of the flame of a lamp.

With omens it is difficult to say how far the facts on which the predictions were based were merely signs of

34. Astrology. prosperity or misfortune which would come in any case, and how far they were regarded as in themselves the actual cause of such prosperity or misfortune. In the case of astrological forecasts, however, which are closely connected with the omens, it seems probable that the latter conception preponderated. The astrological phenomena that are mentioned were not merely passive indications of the future, but active forces influencing the lives and fortunes of the individual and the state. The practice of astrology was based principally on observations of the sun and moon and stars, their relative positions at different times, and the various combinations presented by them. Another large body of forecasts was based on eclipses of the sun and moon, the results varying with the time of the eclipse, the appearance of the sun and moon during the eclipse, and the direction in which the shadow travels. Forecasts were based also on the appearance of meteors and shooting stars, on observations of lightning, clouds, and rain, on the direction of the wind, on the various directions in which a cloud may travel, and on the colour and shape of clouds and their resemblance to animals, fishes, ships, etc. As in the case of the omen tablets, the Babylonians possessed a great body of astrological literature; observations and forecasts in course of time were collected, grouped, and classified; and large works upon the subject were copied out on consecutive tablets for the training and use of the astrologers. Many tablets belonging to these larger works have come down to us; there are also preserved in the British Museum small oblong tablets containing the answers of astrologers who had been consulted as to the future, as well as their reports on recent astrological observations and the interpretation to be set on them.

Around the figures of their gods the Babylonians wove tales and legends, which, originating in remote antiquity,

35. Mythology. were handed down through countless generations, being added to and modified by the hands through which they passed. They were collected and arranged during the later periods of Assyrian and Babylonian history, and it is in these comparatively recent forms that they are preserved in the literature that has come down to us. It is true that the tablets containing the legends of Adapa and of the goddess Eriskigal were found at Tell el-Amarna and date from the fifteenth century B.C.; but not one of the tablets containing the other legends is earlier than the seventh century B.C. The antiquity of the legends themselves, however, is amply attested by the divergent forms which in some cases the same legend assumes, as related on different tablets belonging to the later Assyrian and Babylonian periods, or referred to in the works of classical writers. An additional interest attaches to two sections of the legendary literature of Babylon from their close resemblance to the narrative of the early part of

Genesis, relating to the creation and the deluge. Whether we are to trace the ultimate origin of both the Babylonian and the Hebrew versions of these legends to the previous non-Semitic inhabitants of Babylonia need not concern us here. The contents of these legends and their relation to the Hebrew narratives will also be more conveniently treated elsewhere (see CREATION, DELUGE, CAVEITES, ENCHIL, NOAH). The legends of the creation and the epic of Gilgamesh are certainly the most famous portions of Babylonian mythology; but they form only a part of the legends and beliefs that were current in the various cities of Babylonia. Even those which have come down to us on the tablets present a great variety of subject and treatment.

Ištar's descent into Hades is one of the best preserved of these legends. It contains a description of the lower world, and records how at each of the gates that lead thereto the goddess is stripped of a portion of her apparel until she enters naked into the realm of Allatu, and how she is detained there but is eventually brought back to earth to put an end to the troubles of men and animals that had followed the departure of the goddess of love. The Plague-god was a prominent figure in Babylonian mythology, the legends describing in detail the ravages he caused among the cities of the land. Two other legends may be mentioned briefly: that of the Zū's theft of the destiny-tablets, and the legend of Adapa and the South-wind. In the former, Zū is recorded to have fled with the tablets to his mountain, and, although the other gods would not venture against him, he was eventually captured by Samaš the Sun-god in his net. The legend of Adapa relates how Adapa, the son of Ea, was fishing one day in the sea for his father's household when the South-wind blew and ducked him under; how in anger he caught the South-wind, and broke her wings; and how he came to heaven into the presence of Anu, who summoned him thither on noticing that the South-wind had ceased to blow. In

36. Legends. many of the legends animals and birds endowed with thought and speech are introduced: as in the legend of Etana's flight to heaven with the eagle, the legend of the Eagle, the Serpent and the Sun-god, the legend of the Fox, the legend of the Horse and the Ox, and the legend of the Calf. Not only do gods, heroes, and animals figure in the mythology of Babylonia, but also ancient kings, whose actual existence is attested by the remains of their buildings and inscriptions, were raised to the level of heroes or demi-gods in the popular imagination, and their names became centres round which in the course of ages legends have clustered. The most famous of these is the legend¹ of the birth of Sargon of Agadé, who is said to have been of lowly origin; his father he knew not, and his mother set him floating on the Euphrates in a chest of reeds smeared with bitumen; but Akki the irrigator rescued him, and while he was serving as gardener to his benefactor, the goddess Ištar loved him. Eventually she invested him with the rule of the kingdom. Narām-Sin the son of Sargon, Dungi king of Ur, Nebuchadrezzar I., and other ancient kings, figure in the legendary literature.

The data available for the settlement of Babylonian chronology vary for each of the three periods (see below, § 40) into which the history of the country may be divided. In the first period a single date has been fixed for us by a reference in one of the cylinders of Nabonidus, from which we infer that Sargon I. lived about 3750 B.C. When Nabonidus states² that 3200 years have elapsed since Sargon laid down an inscription which he himself found, he is naturally giving only an approximate estimate of the period during which it had lain buried. There is no reason, however, for doubting the general accuracy of the statement; for the Babylonians were careful compilers of their records, and Nabonidus

¹ See *KB* 3a. 100 ff.

² *KB* 3b. 104.

had access to sources of information which have not come down to us. This one date, therefore, gives us a fixed point in the early history of the country.

In settling the chronology before and after this point we do not gain much assistance from the list of dynasties preserved from the history of Hērōssus, who places in the earliest period ten kings who ruled before the flood. Similarly a tablet from Kuyunjik containing the names of certain kings, who, it states, ruled after the deluge, is not of assistance, especially as the names it does contain are arranged not chronologically but on a linguistic basis.

In settling the chronology of this period, we have, in fact, to fall back upon the internal and external evidence of date afforded by the archaic inscriptions themselves. (1) The internal evidence consists principally of the royal genealogies contained by the inscriptions, from which the relative dates of the kings so mentioned can be ascertained. Good examples of the use of such evidence are afforded by some of the inscriptions of the kings and patens of Sirjurla: as, for example, by the inscriptions of E-din-gira-naḡin, in which he calls himself the son of Akurgal, and of Akurgal, who styles himself the son of Ur-Ninā; or that of Entena, in which he is called the son of En-anna-tuma and the descendant of Ur-Ninā, or the gate-socket of En-anna-tuma II. from which we learn that Entena was his father; or the circular stone plate containing an inscription of the wife of Nammaghani, in which she is referred to as the daughter of Ur-Bau, proving that Nammaghani succeeded Ur-Bau through his wife's title to the throne. (2) The external evidence afforded by an inscription is obtained partly by a study of the general style of the writing, the forms of the characters, etc.; partly by accurately noting its relative position with regard to other inscriptions near which it may happen to be found, the different depths at which inscriptions are unearthed in some cases giving a rough idea of their comparative ages. It must be admitted, however, that the evidence to be obtained both from palaeography and from systematic excavation is in its nature extremely uncertain and liable to various interpretations. Such evidence is of service when lending its weight to that obtained from other and independent sources; but when it is without such support it cannot be regarded as indicating more than a general probability.

For the chronology of the second period we have the genealogies to be obtained from the historical inscriptions, as well as the chronological notices which occur in some of them. From the latter source, for example, we gather that Burna-Buriaš lived some 700 years after Hammurabi,¹ that Šagašalti-Buriaš lived about 800 years before Nabonidus,² and that Marduk-nādin-aḡē defeated Tiglath-pileser I. 418 years before Sennacherib conquered Babylon³ (cp ASSYRIA, § 20). Our principal source of information, however, lies in the chronological documents of the Babylonians themselves.

(1) One of the most important of these is the 'List of Kings,' a list of the names of the kings of Babylon from about 2400 to 625 B.C., in which the kings are divided into dynasties, the length of each reign and the total length of each dynasty being added;⁴ a smaller list of kings contains the names of the kings of the first two dynasties.⁵ (2) From the document known as the 'Babylonian Chronicle'⁶ we obtain a record of events in Babylonia and Assyria from the early part of Nabonassar's reign (about 745 B.C.) to 669 B.C., the first year of the reign of Šamaš-šum-ukin, and this information is supplemented by (3) the 'Ptolemaic Canon' (see CHRONOLOGY, § 24 ff.), which also begins with the reign of Nabonassar. The fragment of a second Babylonian chronicle refers to kings of the first, fifth, sixth, and seventh dynasties, while part of a third chronicle supplements the narrative

¹ *KB* 3b. 90 ff.

³ Babylonian inscription.

⁴ *KB* 2. 286 ff., or *RP* 2^o 115 ff.

⁵ *KB* 2. 288 ff., or *RP* 3^o 113 ff.

⁶ *KB* 2. 274 ff., or *RP* 3^o 122 ff.

of the 'Synchronous History' for certain portions of the third dynasty. Finally, (4) the 'Synchronous History'¹ (see ASSYRIA, § 21, beg.) itself connects the history of Babylonia with that of Assyria, with certain breaks, from about 1480 to 810 B.C.

For the third period of the history the succession of the kings is known from the Ptolemaic Canon, which, in addition to the names of the kings, gives the lengths of their respective reigns; and the information so obtained is controlled by the many Babylonian contract tablets which have been found dated according to their regnal years.

The history of Babylonia falls naturally into three main periods. The first period comprises the history of the country from the earliest times down to the consolidation of its various elements into a single empire ruled by Semitic kings with their capital at Babylon. The second period begins with the first dynasty of Babylon, to whose greatest king, Hammurabi, was principally due the consolidation of the Babylonian empire, and extends to the fall of the power of Assyria, whose later kings included Babylonia in their dominions. The third period comprises the history of the Neo-Babylonian empire.

The length of the first period can only be approximately determined, for it reaches back into remote antiquity; the second period deals with the history of some seventeen hundred years, extending from about 2300 to 625 B.C.; the third period is by far the shortest of the three, for it contains the history of an empire which lasted for less than a hundred years, from Nabopolassar's accession to the throne of Babylon in 625 B.C. to the capture of the city by Cyrus, king of Persia, in 538 B.C.

During the first period the name of Babylon is not known. The country is under the successive domination of the more ancient cities of the land until the Semitic element eventually predominates. During the second period Babylon holds her place as the centre of the country in spite of the influx of Kassite and Chaldean tribes and the opposition of Assyria. In the third period the magnificence of Babylon became one of the wonders of the ancient world.

In treating the earliest period of the history of the country we are, to a great extent, groping in the dark. Our principal sources of information are the archaic inscriptions found on many of the sites of the old Babylonian cities, and these have been considerably increased by recent excavations. In order, then, to understand clearly the problems they present, it will be necessary to proceed gradually from the points that may be regarded as definitely fixed into the regions where conjecture still holds her own. As the earliest date that can be regarded as settled is that of Sargon I., it necessarily forms the basis or starting-point from which to reconstruct the history of the period.

Nabonidus, the last king of Babylon, on a clay cylinder found at Abu-Habbah records the fact that while restoring the temple of the Sun-god in that city he came upon the foundation-stone of Narâm-Sin, the son of Sargon, which for 3200 years no king that went before him had seen. As the cylinder of Nabonidus was inscribed about the year 550 B.C., we conclude that Narâm-Sin lived about 3750 B.C., and Sargon his father about 3800 B.C.

During the French expedition to Mesopotamia (1851-1854) Oppert found in Babylon an alabaster vase inscribed in archaic characters with the name of Narâm-Sin, to which was added the title 'king of the four quarters.' The vase, which was lost in the waters of the Tigris on 23rd May 1855, formed the only remains of this king that were recovered until the American expedition in 1888.

¹ *KB* 1 194 ff.

Of Sargon, however, two inscriptions were known; the one on the cylinder in the possession of M. de Clerq, the other on a mace-head in the British Museum. Some doubt was thrown on the identification of this king with the Sargon of Nabonidus; for, whilst the name of the latter was written Sargina, that of the former was Sargani-sar-ali. Such an abbreviation, however, was not unusual in the names of many of the early kings, and the identity of the two names is now put beyond a doubt by the discovery at Nippur of inscriptions of Sargani-sar-ali in the same stratum which held bricks stamped with the name of Narâm-Sin.

That the empire over which Sargon ruled was extensive is attested by the legends that at a later period gathered round his name (see above, § 36). His name and that of Narâm-Sin occur in an astrological tablet,¹ in which expeditions against Phœnicia, Elam, etc., made by these two kings during certain lunar phases and astrological conditions, are recounted; and, although it would be rash to regard such statements as historical on the authority of this tablet alone, they at least bear witness to the permanent hold which the name of Sargon had attained in the popular imagination. In a cylinder² of Nabonidus found at Mukayyar (Ur) the title 'king of Babylon' is ascribed to both Sargon and Narâm-Sin; but it is probable that the city of Agadê, not Babylon, formed the centre of their empire, as 'king of Agadê' is the title by which Sargon invariably describes himself. The site of this city has not been identified; but it is probably to be sought in Northern Babylonia.

Both Sargon and Narâm-Sin were Semites, and the extent of their empire shows the progress which the Semitic invaders were making towards the final subjugation of the country.

The name of another king who was probably of Semitic origin is Uru-ur-uš, possibly to be read as Alušaršid, and from the fact that his inscriptions were found at Nippur near those of Sargon, which they closely resemble in character, it may be assumed that he belonged to about the same period. His name has been found on alabaster vases which he dedicated and placed in the great temple of Bel at Nippur; the vases, he states, formed part of the spoil captured on a successful expedition against Elam and Barasê to the E. of Babylonia. Moreover, Maništusu, whose name occurs on a mace-head preserved in the British Museum, must also be assigned to about the same period.

In addition to the empire established by Sargon, there is not lacking evidence of the existence at this time of other Semitic kings and principalities. The inhabitants of Lulubi spoke a Semitic dialect, as is evinced by the inscription engraved on the face of the rock at Ser-i-pul, a place on the frontier between Kurdistan and Turkey. The inscription accompanies and explains a relief representing the goddess Nini granting victory over his foes to Anu-bânini, king of Lulubi, and from the archaic forms of the characters the work must be assigned to a period not later than that of Sargon. It is also probable that the inhabitants of Guti, a district to the NE. of Babylonia, were Semites; for an archaic inscription of a king of Guti, which was found at Sippar, is written in Semitic Babylonian. This, we may assume, was carried to Sippar as spoil from the land of Guti, though it is also possible that the stone containing the inscription was a gift of the king of Guti to the temple at Sippar, the inscription being composed, not in the king's own language, but in the Semitic dialect of Sippar.

Still, whilst a few of the inscriptions of this early period are undoubtedly Semitic and may be adduced as evidence of the first settlements of the Semites in Babylonia, the majority of the inscriptions that have come down to us are written in a non-Semitic tongue (to which the late Sir H. Rawlinson gave the name Accadian), now generally known as Sumerian.³ These inscriptions

¹ *KB* 3 a 102 ff.

² *KB* 3 b 34 j.

³ For many years a controversy has raged around the character, and even the existence, of this language. The theory put forward by Halévy that Sumerian was not a

have been found in the mounds which mark the sites of the ancient cities of the land, and were the work of the previous inhabitants of the country whom the invading Semites eventually displaced. One of the most important of their ancient cities is to-day represented by the mounds known as Telloh, situated to the N. of Mukayyar and E. of Warka, on the E. bank of the Satt-el-Hai. These mounds mark the site of a city called by the kings and governors who ruled there Sirpurla, but known at a later time as Lagash. The excavations that were begun on this site by De Sarzec in 1877 have resulted in a rich harvest of inscriptions on statues, cylinders, cones, tablets, bricks, etc., from which it is possible to trace the history of the city throughout a long period. Its earlier rulers called themselves 'kings,' the later ones bearing the title of *patesi*, which is equivalent to the Assyrian *išakku*. The word *patesi*, whilst implying that the ruler is the representative of the national god, indicates the possession of a power less supreme than that attaching to the word *lugal* (Sem. *šarru*), 'king,' and it has been ingeniously suggested that the change in title was in consequence of an actual change in the fortunes of the city, the rule of the *patesis* being held to mark the subjection of their city to another power. The manner in which the succession of the various kings and *patesis* was determined has been already referred to (see above, § 37); the following is a brief description of their history based on those results.

The oldest king of Sirpurla known to us is in all probability Urukagina. After an interval, the length of which is unknown, we find Ur-Ninā on the throne; and, as he gives no mention to his father nor grandfather, the title of king, it is not unreasonable to conclude that he was the originator of a new dynasty, a dynasty that we can trace through several generations. Ur-Ninā was succeeded by his son Akurgal, who bore both the titles, king and *patesi*, and it was not until the reign of E-dingira-nagin, Akurgal's son and successor, that the title *patesi* appears to have ousted that of king permanently. It is during the reign of E-dingira-nagin, however, that we find the first record of any extensive military operations undertaken by the inhabitants of Sirpurla. To his reign belongs the famous stele of vultures, carved to commemorate his victory over the city the name of which is provisionally read as Isban. E-dingira-nagin was succeeded by his brother En-anna-tuma I., whose son Entena and grandson En-anna-tuma II. continued the succession. After a second interval comes Ur-Iau, from whom the throne passes through his daughter to his son-in-law Nammaghani. After a third but shorter interval there followed Gudea, who conducted a successful campaign against Elam, but, like his predecessors, devoted most of his energies to building operations. He was succeeded by his son Ur-Ningirsu; and finally there must be placed a second Akurgal, and either before or after him Lūkani, whose son Ghalalama may possibly have succeeded him on the throne.

The monumental inscriptions of these old kings and *patesis* of Sirpurla are, with the exception of one of Ur-Iau and several of Gudea, comparatively short, and are generally concerned with the erection of buildings and temples in the city, an object to which both kings and *patesis* without exception devoted themselves.

The thousands of clay tablets, however, which have been discovered dating from this period, the high point of development attained in their sculpture and carving in relief, the elaborate but solid construction of their temples and palaces, are all evidence of a highly developed civilisation; and the question at once arises as to what date must be assigned for the rise of the kingdom of Sirpurla. Additional interest is lent to the way in which this question may be answered by the fact that even the earliest inscriptions and carvings that language but merely a cabalistic method of writing invented by the Semitic Babylonians themselves was for years stoutly defended by its adherents; it has now, however, given way before the results of recent excavations. The thousands of archaic tablets found at Telloh and elsewhere are written entirely in Sumerian by a people who both in their inscriptions and in their art exhibit no traces of Semitic origin. The existence of Sumerian as the language of these early inhabitants of Babylonia is now generally admitted. See also below, § 71 (teml).

46. Their date. as to what date must be assigned for the rise of the kingdom of Sirpurla. Additional interest is lent to the way in which this question may be answered by the fact that even the earliest inscriptions and carvings that language but merely a cabalistic method of writing invented by the Semitic Babylonians themselves was for years stoutly defended by its adherents; it has now, however, given way before the results of recent excavations. The thousands of archaic tablets found at Telloh and elsewhere are written entirely in Sumerian by a people who both in their inscriptions and in their art exhibit no traces of Semitic origin. The existence of Sumerian as the language of these early inhabitants of Babylonia is now generally admitted. See also below, § 71 (teml).

have been discovered cannot have been the work of a barbarous race, but demand the assumption that at least one thousand years, during which they gradually attained their high level of civilisation and culture, had passed.

It will be obvious that, as the date of Sargon I. is already fixed, the simplest way of answering the question and of assigning a date to the earlier kings of Sirpurla is to determine the relation in which they stood to Sargon I. Until recently it was impossible to come to any definite conclusion, though it was generally held that the archaic forms of characters on the inscriptions of the kings of Sirpurla favoured the theory which assigned to them an early date. The excavations at Nippur, however, have now yielded sufficient data to justify a more conclusive answer.

In the same stratum as the inscriptions of Sargon and Aluārsid, and not far from them, was found a fragment of a vase inscribed with the name of Entena, *patesi* of Sirpurla, who is said to have presented the vase to En-lilla or Bel, the god of Nippur. It would be rash to conclude from this fact alone that Entena was the contemporary of Sargon I., though it may be held to indicate that approximately the same date may be assigned to Sargon and the earlier *patesis* of Sirpurla. Excavations, however, were subsequently extended below the level at which the records of Sargon had been found, and traces of a still more ancient civilisation were disclosed. An altar with a small enclosure or curb around it, two immense vases of clay standing at short intervals from each other, probably on an inclined plane leading up to the altar, and a massive building with an ancient arch, were the principal architectural remains discovered. However, there were also found inscriptions which, though occurring at a higher level and mixed with the inscriptions of Sargon, are probably to be assigned to a pre-Sargonic period. As the majority of these are broken into small fragments, it is not unlikely that they were intentionally broken and scattered by some subsequent invader of the country. Gate-sockets and blocks of diorite, however, were not broken, and so were made use of by subsequent kings. Thus both Sargon I. and Bur-Sin II. used for their own inscriptions the blocks which already bore the rough inscription of Lugal-kigub-nidudu, one of the kings of this early period. The characters in these early inscriptions, especially on the vases of Lugal-zaggisi, the most powerful of these early kings, bear a striking resemblance to those employed in the inscriptions of the earliest kings of Sirpurla (Urukagina, Ur-Ninā, and E-dingira-nagin), sharing with them certain peculiarities of form which are not met with elsewhere. The conclusion that they date from about the same period is, therefore, not unwarranted; and, as this period must be placed before Sargon I., we are justified in assigning to Urukagina a date not later than 4000 B.C.

To trace in detail the history of the predecessors of Sargon I., whose existence was not suspected until the lowest strata beneath the temple of Ekur at Nippur had been sifted, is a task that requires some ingenuity. Our only source of information is afforded by the fragmentary inscriptions themselves; but, as many of these are duplicates, it is possible to reconstruct their original text. The earliest rulers of Babylonia, such as En-sag-sagana, are found in conflict with the city of Kiš, and spoil from Kiš was from time to time placed as an offering in the temple at Nippur. Sometimes Kiš was victorious, and then the king of Kiš, as in the case of Ur-Sulpaudu, made a presentation to the temple at Nippur in his own behalf. The ultimate superiority of Kiš, however, was assured by its alliance with the powerful city of Isban; for Lugal-zaggisi, son of Ukuš, *patesi* of Isban, on coming to the throne, extended his sway over the whole of Babylonia. He has left us a record of his achievements in a long inscription carved

47. Before Sargon.

requires some ingenuity. Our only source of information is afforded by the fragmentary inscriptions themselves; but, as many of these are duplicates, it is possible to reconstruct their original text. The earliest rulers of Babylonia, such as En-sag-sagana, are found in conflict with the city of Kiš, and spoil from Kiš was from time to time placed as an offering in the temple at Nippur. Sometimes Kiš was victorious, and then the king of Kiš, as in the case of Ur-Sulpaudu, made a presentation to the temple at Nippur in his own behalf. The ultimate superiority of Kiš, however, was assured by its alliance with the powerful city of Isban; for Lugal-zaggisi, son of Ukuš, *patesi* of Isban, on coming to the throne, extended his sway over the whole of Babylonia. He has left us a record of his achievements in a long inscription carved

on more than a hundred vases, which he deposited in Nippur. Though he especially favoured his own city of Isban, Erech was probably his capital, while Ur, Larsa, and Nippur were important centres. Lugal-zaggisi's empire did not long survive him, and the lead in Babylonian politics passed to the city of Širpurla. E-dingira-nagin's conquest of Isban, however, was not followed up by his successors on the throne; and the hegemony passed once more to the north, this time to Sargon of Agadé, who laid all Babylonia under his sway, the rulers of Širpurla exchanging the title of king for that of patesi in consequence of their subjection to him. Such may be taken as a general sketch of the course of Babylonian history up to the time of Sargon I.

It is impossible to say to what race or nationality Lugal-zaggisi and the earlier kings belonged, though we may mention the theory of Hilprecht, who sees in their successes against the cities of Babylonia the earliest Semitic invasions of the country; regarding Kiš as their first military outpost, and Isban, which he is probably wrong in identifying with Harrān, as their military base. Another patesi of Isban who may be placed in this early period is Mul-Babbar (in Semitic, Amel-Samaš), whose inscription on three clay cones is preserved in the British Museum.

After the fall of Sargon's empire, the first city that appears to have gained a considerable supremacy throughout Babylonia is Ur. Under Lugal-

48. Ur. *circa 2400.* Ur had already risen to some importance; but the city had been included in Sargon's kingdom, and it was not until nearly a thousand years after his death that it again recovered its position. Only two of her kings at this later period are known to us, Ur-gur and Dungi. In addition to their title 'king of Ur,' both style themselves kings of Sumer and Akkad, a title implying that many cities throughout both southern and northern Babylonia had tendered their submission and acknowledged allegiance to them. The monuments themselves bear witness that this title was no empty boast, but had its foundation in a real supremacy.

A seal cylinder in the British Museum bears a dedication to Ur-gur, 'the mighty hero, king of Ur,' by a patesi of the city of Iškun-Sin, 'his servant,' while there is evidence that the later patesi of Širpurla were subject to Ur, the Louvre possessing a fragment of a statue dedicated to the goddess Bau by Ghala-lama, 'son of Lukani, patesi of Širpurla,' for the life of Dungi, 'the mighty king, king of Ur, king of Sumer and Akkad'; an inscription with a similar purpose of the time of Ur-Ningirsu, Gudea's son and successor, is preserved in the British Museum. That Ur-gur was a great builder is attested by the many short inscriptions on bricks recovered from the ruins of the buildings which he either founded or restored. From these we gather that he built the great temple of the Moon-god in Ur, while in Erech he erected a temple to Nini, the goddess Ištar. On a brick from a tomb discovered by Loftus at Senkereh, the ancient Larsa, is recorded the fact that Ur-gur built a temple to the Sun-god there, and bricks found at Nippur record his rebuilding of the great temple of E-kur in that city. Excavations at the latter place show that this temple was larger than any of its predecessors; buildings that had been standing since the time of Narām-Sin he raised on the ground in order to erect his huge platform of sun-dried bricks in the NW. corner of which he built a huge zikkurratu (temple tower) of at least three stories. Ur-gur thus appears to have erected or rebuilt temples in most of the principal cities of Babylonia; in his zeal for religion, however, he did not neglect to strengthen his own capital, for we have evidence that he erected, or at any rate rebuilt, the city-wall of Ur. His son and successor Dungi, king of Ur, king of Sumer and Akkad, king of the four quarters, carried on the work of temple-building to which his father had devoted himself, and restored the temple of Ištar in Erech. An interesting clay tablet in the British Museum contains a copy of an old inscription that once stood in a temple at Cuthah. The copy was made in the later Babylonian period by a scribe named Bel-uballit, and the archaic inscription, which his care had rescued from oblivion, records the erection by Dungi of a temple to the god Nergal in the city of Cuthah.

With Dungi our knowledge of the city of Ur and its supremacy comes to an end for a time. Whether **49. Isin.** Dungi's successors retained for long their hold over the rest of Babylonia, or speedily sank into dependence to some other city, we have no means of telling. When we once more

come across inscriptions we see that the lead in Sumer and Akkad has passed into the hands of the kings of Isin.

At present we possess inscriptions of four kings of Isin: Ur-Ninib, Libit-Ištar, Bur-Sin I., and Išme-Dagan. In the case of each of them, before their chief title 'king of *circa 2500.* Isin' is given special mention is made of Nippur, Ur, Erida, and Erech as being under their sway. The order in which these cities are mentioned is significant. The fact that Nippur heads the list proves that Ur sank greatly in importance after the days when she held the lead in Sumer and Akkad. A fifth king of Isin, named Išbirigra, is known to us; the only evidence of his existence, however, is the occurrence of his name and title on a fragment of a clay tablet in the British Museum. The rule in Babylonia now passes once more to the city of Ur, which regains its old supremacy. Išme-Dagan was the last king of Isin who retained the title of 'king of Sumer and Akkad,' and held together the confederation of Babylonian cities which that name implies; we find his son erecting a temple for the life of Gungunu, king of Ur, *circa 2400.*

50. 2nd Dyn. of Ur. *circa 2400.* Under Gungunu began the second dynasty of Ur, to which the kings Bur-Sin II., Ine-Sin, and Gāmil-Sin belong. The many inscriptions on clay tablets that have been recovered, dated in the reigns of these three kings, testify to the great commercial prosperity of Babylonia at this time. The rise of the city of Larsa followed

51. Larsa. the second dynasty of Ur. The kings of the former city held Ur in dependency, and appear to have extended their rule still farther afield, for they assume also the title 'king of Sumer and Akkad.' The two principal kings of Larsa were Nūr-Rammān and his son Sin-iddina. *circa 2300.* Both erected temples in Ur, and the latter founded a temple to the Sun-god in his capital. Sin-iddina also, after meeting with success in the field, turned his attention to the internal improvement of his territory. He rebuilt on a larger scale the wall of Larsa, and by cutting a canal obtained for that city a constant supply of water.

Sin-iddina does not mention the name of the enemy his victory over whom he records. It has been sug-

52. Elam. gested, however, with great probability, that it was Elam whom he repulsed. This

must have been the period of the Elamite invasion to which Ašur-bāni-pal refers. On taking the city of Susa, about 650 B.C., Ašur-bāni-pal relates that he recovered the image of the goddess Nānā, which the Elamite Kudur-Nānūndi had carried off from Erech 1635 years before—i.e., about 2285 B.C. Though Sin-iddina repulsed the Elamites, he did not check them for long. A few years later we find them under the leadership of Kudur-Mabug, son of Simti-šilhak, again invading Babylonia. This time they met with more success and obtained a permanent footing in the south. Kudur-Mabug was not king of Elam. He styles himself 'prince of the Western land': that is to say, he was ruler of the tract of land lying on the W. frontier of Elam. From this position he invaded the country, and, having established himself as king of S. Babylonia, he erected a temple in Ur to the Moon-god in gratitude for his success. His son, Rim-aku, succeeded him and attempted to consolidate his kingdom, restoring and rebuilding Ur and extending his influence over Erech, Larsa, and other cities; his usual titles were 'exalter of Ur, king of Larsa, king of Sumer and Akkad.' It is a period of much interest for the biblical student (see CHEBORIAOMER).

During the second dynasty of Ur the city of Babylon had enjoyed a position of independence, with her own

53. Babylon. kings and system of government; but her influence does not appear to have extended beyond the limits of the city. It was not until the reign of Hammu-rabi, the contemporary of Sin-iddina and Rim-Aku, that she attained the position of importance in Babylonia which she held without interruption for nearly two thousand years. The dynasty to which Hammu-rabi belongs was called by the native historians the 'Dynasty of Babylon,' and, as far as we at present know, forms the limit to which *circa 2400.* they traced back the existence, or at any rate the independence, of their city.

The dynasty was founded about 2400 B.C. by Sumu-abi, who was succeeded by Sumula-ilu and Zabum his son. It is possible that Zabum had a usurper, Imnura, attempted to ascend the throne; but his rule cannot have been for long, as scribes of contract tablets do not give him the title of king, and his name is omitted from the list of kings of Dynasty I., Zabum's

Babylonia by marrying his daughter Muballitat-šerria to a king of Babylonia, who bore the name of Kara-indāš; and when his grandson, Kara-hardāš, the son of Kara-indāš, succeeded to the throne of Babylon, the relations between the two countries were still more cordial. The Kassite troops, however, possibly jealous of Assyrian influence, slew Kara-hardāš and set

the usurper Nazi-bugaš on the throne. The death *circa* 1400. of Kara-hardāš led to the invasion of Babylonia by Āšur-uballit, who avenged his grandson by slaying Nazi-bugaš, and putting Kurigalzu II., a son of Burna-Buriāš, the former king of Babylon, in his place. Kurigalzu II. was ambitious to extend the boundaries of his kingdom, and with this view he undertook a campaign against Elam, the capital of which he conquered and sacked, as we learn from an inscription on an agate tablet which was found at Nippur. On undertaking hostilities against Assyria, however, he was defeated by Bēl-nirari, and was forced to accept the terms offered

circa 1380. by the latter with regard to the boundary between the two kingdoms. The next defeat by the Assyrians which the Babylonians sustained was in the reign of Nazi-maruttāš, the son of Kurigalzu II., when Rammān-nirari inflicted a signal defeat on the Babylonian forces and extended the Assyrian boundary still farther southward. Kadašman-Turgu, whose name was also written Kadašman-Bēl, the son of Nazi-maruttāš, succeeded his father on the throne, and was in turn succeeded by his son, whose name, occurring in a broken inscription from Nippur, may probably be restored [Kadašman]-Buriāš. The Babylonian List of Kings furnishes the names of the last kings of the dynasty. Of Is-am-me- . . .

-ti we know nothing, and of Saġašali-Suriāš only the fact that he dedicated an object to Bēl and placed it in the temple at Nippur. Saġašali-Suriāš was succeeded by his son Bīlē, and the names of the next three occupants of the throne are Bēl-šum-iddina, Kadašman-Harbe, and Rammān-šum-iddina. We do not know the relations between Babylonia and Assyria during the early part of this period; but it is probable that the last three kings acknowledged their suzerainty to Tukulti-Ninib, king of Assyria, to whom Rammān-nirari III. ascribed the title 'king of Sumer and Akkad,' invaded Babylonia, captured Babylon, and for seven years maintained his hold upon the country. On the death of Rammān-šum-iddina, however, the Babylonian nobles placed his son Rammān-šum-usur on the throne, and, proclaiming him king, threw off the Assyrian yoke.

Subsequently, during the reign of Rammān-šum-usur, the Assyrians suffered a crushing defeat; *circa* 1210. their king, Bēl-kudur-usur, was slain in the battle; and although Rammān-šum-usur, on following up his victory by an invasion of Assyria, was repulsed by Ninib-pal-Ēšara, he recovered a considerable portion of Babylonian territory. During the reigns of Meli-šihu, and of his son, Marduk-pal-iddina, the Assyrians made no attempt to wipe out the reverse they had sustained. On the accession of Zamama-šum-iddina, however, *circa* 1155. Āšur-dān crossed the frontier and recaptured several Babylonian cities. Zamama-šum-iddina reigned only one year, and was succeeded by Bēl-šum-iddina II., the last king of the Kassite dynasty. Under this king the country suffered attacks from Elam, and the discontent and misery which followed the defeats sustained by the Babylonians brought about the fall of the dynasty.

The fourth dynasty is called the dynasty of Pašē; who its founder was we do not know, though an early **58. 4th Dyn.** place in it must be assigned to Nebuchad-
(Pašē). rezza I. In one of the two monuments that we possess of this king he styles himself 'the Sun of his land, who makes his people prosperous, the protector of boundaries'; and it is certain that to a great extent he restored the fallen fortunes of the kingdom. He successfully prosecuted campaigns against Elam on the east, he conquered the Lulubi on the north, and even marched victoriously *circa* 1130. into Syria. Against Assyria, however, he did not meet with similar success.

On Nebuchadrezzar's crossing the frontier, Āšur-rēš-iši, king of Assyria, marched against him, and Nebuchadrezzar, who was not then prepared to meet an army of the Assyrians, burnt what engines of war he had with him, in order to facilitate his retreat. He soon returned with reinforcements; but Āšur-rēš-iši, who had also strengthened his army, defeated him, plundered his camp, and carried off forty of his chariots. A king who reigned early in the dynasty and may possibly have succeeded Nebuchadrezzar is Bēl-nadin-aplu, whose name is known from a 'boundary stone' dated in the fourth year of his reign. Under Marduk-nadin-āpē Assyria and Babylonia were again in conflict. It is probable that this king enjoyed a temporary success against Tiglath-pileser I., during which he carried off from the city of *circa* 1110. Ekallati the images of the gods Rammān and Sala which are mentioned by Sennacherib in his inscription on the rock at Bavian. This campaign is not mentioned in the 'Synchronic History,' though in the beginning of the account of the campaign this mentioned, which ended disastrously for Babylonia, the two kings, it is said, set their chariots in battle array 'a second time' (see ASSYRIA, § 25). This second cam-

paign consisted of a series of successes for Tiglath-pileser, who, after defeating Marduk-nadin-āpē in Akkad, captured Babylon itself and other important cities in the northern half of the kingdom. Āšur-bēl-kala, Tiglath-pileser's successor on the throne of Assyria, changed his father's policy and formed treaties with the Babylonian king Marduk-šāpik-zēr-mīti.¹ On this king's death Rammān-aplu-iddina, a man of obscure origin, was raised to the throne of Babylon, and Āšur-bēl-kala, in pursuance of his policy, allied himself to the new king by a marriage with his daughter. Only the beginnings of the names borne by the last three kings of the dynasty are preserved in the List of Kings.

The fifth dynasty was called the dynasty of the 'Sea-land,' and was a short one, consisting of only three kings, Simmaš-šihu, Ea-mukin-zēr, and Kassu-nadin-āhi. It is not improbable

59. 5th Dyn.
(Sea). that the Chaldean tribes, who are not actually mentioned in the inscriptions be-
circa 1050. fore the time of Āšur-nāsir-pal and Shalmaneser II., were even at this early period making their influence felt, overrunning southern Babylonia and spreading themselves throughout the country; and the fact that at a later time we find them especially connected with the district termed the 'Sea-land' in S. Babylonia lends colour to the suggestion that the dynasty of the Sea-land was of Chaldean origin.

Of the three kings of the dynasty Ea-mukin-zēr reigned but a few months; the other two kings, who occupied the throne for longer periods, are mentioned by Nabū-aplu-iddina in connection with the fortunes of the temple of the Sun-god at Sippar. At the time of Simmaš-šihu this temple was in ruins in consequence of the troubles and disturbances in Akkad, the powerful tribes of the Sutu having previously invaded the country, laying the temple in ruins and breaking up the sculptures. Simmaš-šihu partially restored the structure of the temple, and placed it in charge of a priest for whose regular office he appointed regular offerings. In the violent death of Simmaš-šihu, of which we learn from the fragment of a Babylonian Chronicle, and in the shortness of the reign of Ea-mukin-zēr, we may probably see additional indications of the disturbed state of the country at this time. Under Kaššu-nadin-āhi the general distress was increased by a famine, in consequence of which the regular offerings for the temple of Samaš at Sippar were suspended.

The first king of the sixth dynasty was E-ulbar-šākin-šum, and on his accession to the throne E-kur-šum-ušābi, the priest whom Simmaš-šihu had placed in charge of the temple at Sippar, complained to the king that the offerings had ceased. On hearing the state of the temple's resources E-ulbar-šākin-šum increased the regular offerings and endowed the temple with certain property situated in Babylon. The sixth dynasty consisted of only three kings, E-ulbar-šākin-šum being succeeded by Ninib-kudurri-usur and Silānim-šukamuna; it was termed the dynasty of the House of Bazi, and each of the three kings on a fragment of a chronicle is termed a 'son of Bazi.'

From this point onwards for nearly a hundred years there is a gap in our knowledge of Babylonian history.

After the dynasty of the House of Bazi an **61. Gap.** Elamite occupied the throne for six years; *circa* 1005. but his name is not known, nor are the circumstances that attended his accession. He did not perpetuate his hold upon the country; for on his death the rule again passed to native Babylonians, the kings of the eighth dynasty, which was the second to bear the title 'the dynasty of Babylon.'

The names of the early kings of the dynasty are not preserved, though Sibir, a Babylonian king whom Āšur-nāsir-pal mentions as having destroyed a city which he himself rebuilt, is probably to be placed in this period. The first king of this dynasty of whose reign details are known is Šamaš-mudammik, who suffered a serious defeat at the hands of Rammān-nirari II., king of Assyria. Against Nabū-šum-iškun, his successor on the throne, Rammān-nirari scored another victory, several Babylonian cities falling into his hands, though we subsequently find him on good terms with Assyria and allying himself to Nabū-šum-iškun, or possibly his successor, each monarch marrying the other's daughter.

62. 8th Dyn.
(Babylon). *circa* 900. Nabū-aplu-iddina is the next king who is known to have ruled in Babylon, and, though he aided the people of Suhi against Āšur-nāsir-pal, his relations with Shalmaneser II. were of a friendly nature. He is the king who restored and endowed so richly the temple of Samaš at Sippar, digging the ruins of former times. He will be found the ancient image of the god. He restored and redecored the shrine, and with much ceremony established the ritual and offerings for the god, placing them under the direction of Nabū-nadin-šum, the

circa 880. ¹ The name has also been read Marduk-šāpik-kullat.

son of the former priest E-kur-šum-ušabši. Marduk-šum-iddina succeeded his father on the throne; but his brother *circa* 850. Marduk-bēl-ušai headed a revolt against him, and compelled him to call in the aid of Shalmaneser of Assyria, who defeated the rebels and restored the land to order. Shalmaneser's son and successor, Šamsi-Ramman II., was not on the same terms of friendship with Babylonia. He directed an expedition against that country and plundered many cities before meeting with serious opposition. Marduk-balaṭu-šibi, the Babylonian king, had meanwhile collected his forces, which included bands from Elam, Chaldea, and other districts; and the two armies met near the city of Dūr-Papsukal. Marduk-balaṭu-šibi was totally defeated: 5000 of his troops were slain; 2000 more were captured; and rich booty, including 100 chariots of war, fell into the hands of the Assyrians. Rammān-nirari III., the successor of Šamsi-Rammān, also subjugated a considerable portion of Babylonia, carrying away to Assyria Bau-ah-iddina, the Babylonian king, together with the treasures of his palace.

Here the record of the "Synchronic History" ceases, and there follows another gap, of about fifty years, in our knowledge of the history of the country.

The next king of Babylon whose name is known is Nabū-šum-iškun—the first name which occurs after the break in the List of Kings. His successor was Nabu-nassar, the Nabonassar of the Ptolemaic Canon; and with this

63. Nabonassar.

king our knowledge of the Babylonian succession becomes fuller, as, in addition to the evidence afforded by the List of Kings, the information contained in the Babylonian Chronicle and the Ptolemaic Canon becomes available. In the third year of Nabonassar's reign, Tiglath-pileser III. ascended the throne of Assyria; and one of his first acts was an invasion of Babylonia, during which he overran the northern districts and captured several cities, carrying away many of their inhabitants. The distress in the country due to the inroads of the Assyrians was aggravated during this reign by internal dissension: Sippar repudiated Nabonassar's authority, and the revolt was subdued only after a siege of the city.

The Babylonian Chronicle tells us that after a reign of fourteen years Nabonassar died in his palace at Babylon, and was succeeded by his son Nadinu, in

733. Nadios of the Ptolemaic Canon, who is to be identified with Nabū-nādin-zēr of the list of kings. The eighth dynasty ended with the country in confusion. Nabū-nādin-zēr, after a reign of only two years, was slain in a revolt by his son Nabū-šum-ukin or Sum-ukin,

731. who had hitherto held the position of governor of a province. After his accession the dynasty soon came to an end. He had not enjoyed his position for more than a month when the kingdom again changed hands and Ukin-zēr ascended the throne.

From the fall of the eighth dynasty until the rise of the Neo-Babylonian empire Babylonia was overshadowed

64. Assyrian suzerainty.

by the power of Assyria, the kings of the latter country frequently ruling both at Nineveh and at Babylon. Ukin-zēr had reigned only three years when Tiglath-pileser again invaded Babylonia, took him captive, and ascended the throne of Babylon, where he ruled under the name of

Pulu (see TIGLATH-PILESER). On his death, 729. which occurred two years later, he was succeeded in Assyria by Shalmaneser IV., who, according to the Babylonian Chronicle, also succeeded him on the throne of Babylon, though in the List of Kings Pulu is succeeded

by Ululai. The two accounts can be reconciled by the supposition that Ululai was the name assumed by Shalmaneser as king of Babylon (see SHALMANESER). Shalmaneser died after a reign of

five years, and, while Sargon held the throne, Merodach-baladan, a Chaldean from southern Babylonia, freed Babylonia for a time from Assyrian control. He

sided with Ummanigāš, king of Elam, in his struggle with Assyria; but ten years later was himself captured by Sargon after being besieged in the city of Ikbi-Bēl (see MERODACH-BALADAN, SARGON).

Sargon then ascended the throne of Babylonia, which he held until his death in 705.

According to the Ptolemaic Canon, the next two years were a period of interregnum, though the List of Kings assigns the throne to Sennacherib. However this may be, we know that in 703 Marduk-zākīr-šum proclaimed himself king; but he had reigned for only one month when he was murdered by Merodach-baladan,

703. who had escaped from Assyria. Merodach-baladan thus once more found himself king in Babylon; but Sennacherib marched against him, defeated him, and caused him to seek safety by hiding himself in the Babylonian swamps. After plundering Babylon and the neighbouring cities, Sennacherib returned to

Assyria, leaving the kingdom in the charge of Bēl-ibni, a young native Babylonian who had been brought up at the Assyrian court. On the death of Merodach-baladan, shortly afterwards, a rising

headed by Suzub, another Chaldean, brought Sennacherib again into the country. Bēl-ibni also must have displeased the king; for, after defeating Suzub, Sennacherib carried Bēl-ibni and his nobles to Assyria,

leaving his own son Ašur-nādin-šum upon the throne. Sennacherib next planned an expedition

against the Chaldeans whom Merodach-baladan had settled at Nagitu, on the Elamite shore of the Persian Gulf, whence they were able in safety to foment insurrections and plan revolt. Sennacherib, determined to stamp out this disaffection, transported his troops in ships across the Persian Gulf. Disembarking at the mouth of the Euleus, they routed the Chaldeans and their allies, and returned with much booty and many captives to the Babylonian coast. Meanwhile Suzub, who had previously escaped Sennacherib's pursuit, collected his forces and with the help of Elam captured Babylon and placed himself upon the throne.

He is to be identified with the Nergal-ušēzib of the Babylonian Chronicle and the List of Kings. He, however, ruled for only one year. Sennacherib, on his return from the Persian Gulf, defeated his army and sent him in chains to Nineveh. Turning his forces against Elam, he plundered a considerable

portion of the country, and was stopped in his advance into the interior only by the setting in of winter. In his absence a rebel bearing the name of Suzub—the Mušēzib-Marduk of the Chronicle

and the List of Kings—seized the throne of Babylon. Allying his forces with those of Elam, he attempted to oppose Sennacherib in the field; but the combined armies were defeated at Halule. Next year Sennacherib returned to Babylonia, captured the city of Babylon, and deported Mušēzib-Marduk and his

family to Assyria. According to the Babylonian Chronicle and the Ptolemaic Canon, there now

occurred a second interregnum, though the List of Kings credits Sennacherib with the control of Babylonia. On Sennacherib's murder in 681 his son Esarhaddon

was proclaimed king of Assyria. He succeeded to the rule of Babylonia also, though a son of

Merodach-baladan made an attempt to gain the throne. He came to Babylon and personally superintended the

restoration of the city, rebuilding the temples and the walls, and placing new images in the shrines of the gods. During his reign Babylon enjoyed a season of

unusual prosperity, and was free from the internal feuds and dissensions from which she had been suffering.

On Esarhaddon's death the throne of Babylon passed to his son Šamaš-šum-ukin, his elder son, Ašur-

bāni-pal, having already been installed on the Assyrian throne during his father's lifetime. For some

years the two brothers were on friendly terms, and when Urtaku and the Elamites, with the aid of some discontented Babylonian chiefs, invaded the country, Ašur-

bāni-pal assisted his brother in repelling their attack. During all this time Šamaš-šum-ukin acknowledged the supremacy of Assyria and acquiesced in his brother's

active control of the internal affairs of both kingdoms.

At length, however, he wearied of this state of dependence, and seizing an opportunity, organised a general rising against Assyria among the neighbouring tribes and nations who had hitherto owned her supremacy. He bought the support of Ummanigâs, king of Elam, contracted an alliance with Arabia, and at the same time enlisted the services of smaller chiefs. Though one half of the Arabian army was defeated by the Assyrians, the other half effected a junction with the Elamites. This powerful combination, however, was neutralised by the revolt of Tammariu, the son of Ummanigâs, the king of Elam. In fact, the dissensions in the Elamite camp proved of great service to Ašur-bāni-pal, who completely crushed the confederation that Sanaš-šum-ukin had brought against him (see AŠUR-BANI-PAL, § 7). Sanaš-šum-ukin himself was besieged in Babylon, and, on the capture of the city, he set fire to his palace and perished in the flames. According to the List of Kings, he was succeeded by Kandalanu, the

647. Kineladanos of the Ptolemaic Canon; but this king is probably to be identified with Ašur-bāni-pal himself, who, on this supposition, like Tiglath-pileser III. and Sbalmaneser IV., ruled Assyria and Babylonia under different names. The last years of his reign are wrapped in obscurity; but on his death the throne was secured by Nabopolassar, who was destined to raise the fortunes of his country and to found an empire, which, though it lasted for less than one hundred years, eclipsed by its magnificence any previous period in the varied history of the nation. Nabopolassar, in fact, was the founder of the Neo-Babylonian empire.

During the early part of Nabopolassar's reign Ašur-bāni-pal's successors on the throne of Assyria did not relinquish their hold upon the southern kingdom. They retained their authority for some time over a great part of the country (see ASSYRIA, § 33*f.*). Though we do not possess historical documents relating to this period, we may conclude that Nabopolassar during all these years was strengthening his kingdom and seeking any opportunity of freeing at least a part of it from the Assyrian yoke, and it is not improbable that conflicts between the Assyrian and Babylonian forces were constantly occurring. Towards the end of his reign he found the opportunity for which he was waiting in the invasion of Assyria by the Medes. He allied himself with the invaders by marrying Nebuchadrezzar, his eldest son, to the daughter of Cyaxares, and on the fall of Nineveh had a share in the partition of the kingdom. While N. Assyria and her subject provinces on the N. and NW. fell to the Medes, S. Assyria and the remaining provinces of the empire were added to the territory of Babylon.

Before Nabopolassar could regard these acquisitions of territory as secure, he had first to reckon with the power of Egypt. Necho II., the son and successor of Psammetichus I., soon after his accession to the throne had set himself to accomplish the conquest of Syria. In 608, therefore, he had crossed the frontier of Egypt and begun his march northwards along the Mediterranean coast. Vainly opposed by JOSIAH (*q.v.*), he pressed forward and subdued the whole tract of country between the Mediterranean and the Euphrates. For three years he retained his hold on Syria, and it was only after the fall of Nineveh that Nabopolassar successfully disputed his possession of the country. Nabopolassar did not himself head the expedition against the Egyptians, for he was now old; but he placed the troops under the command of Nebuchadrezzar his son. The two armies met at Carchemish, where a decisive battle took place. Necho was utterly defeated; thousands of his troops were slain; and Nebuchadrezzar pressed after his flying army up to the very borders of Egypt.

While Nebuchadrezzar was still absent on this expedition Nabopolassar died. His son, therefore, returned to Babylon and was duly installed as king in his

stead. It is probable that during the early part of his reign Nebuchadrezzar consolidated his rule in Syria and on the Mediterranean coast by yearly expeditions in those regions.

66. **Nebuchadrezzar.** After a few years, however, the country showed signs of repudiating Babylonian control. Nebuchadrezzar returned to the coast to suppress the rising. For some years things remained quiet; but soon after the accession of Apries (see EGYPT, § 69) to the throne of Egypt the ferment revived. After a siege of a year and a half Jerusalem fell (see JERUSALEM).

Tyre, the siege of which also Nebuchadrezzar undertook, held out for thirteen years, 585-572 (see PHœNICIA). Built on an island, it was practically impregnable from the land, while the blockade instituted by the Babylonians did not prevent the entry of supplies by water. More successful were Nebuchadrezzar's campaigns against Egypt. We do not possess his own account of them; but an Egyptian inscription records that on one of them (undertaken against Apries) he forced his way through the country as far as Syênê, the modern Aswân, on the borders of Ethiopia; and it is not improbable that the country was subject to Babylonia during the first few years of the reign of Amasis II., who succeeded Apries on the Egyptian throne (see EGYPT, § 69). Nebuchadrezzar's hold upon Egypt cannot, however, have been permanent; a fragment of one of his own inscriptions mentions his sending an expedition to Egypt in his thirty-seventh year.

During his reign the relations between Babylonia and Media were of a friendly nature, as was not unnatural from the close alliance that had been established between the two kingdoms before the fall of Nineveh. In a war between Media and Lydia, some twenty years later, the Babylonians did not take part; but, when an eclipse of the sun on the 25th of May in the year 585 put an end to a battle between the Lydians and Medes, Nebuchadrezzar, in conjunction with the king of Cilicia, used his influence to reconcile the combatants and bring the war to a close.

While constantly engaged in extending and solidifying his empire, Nebuchadrezzar did not neglect the internal improvement of his kingdom. He rebuilt the cities and temples throughout the country, and in particular devoted himself to the enlargement of Babylon, completing its walls and rebuilding its temples with such magnificence that the city became famous throughout the world (see NEBUCHADREZZAR, BABYLON). Nebuchadrezzar died after reigning forty-three years, and was succeeded by his son Amel-Marduk,

mentioned as *EMEL-MERODACH* (2:23) in 2 K. 25:27 *ff.* Of this king we possess no inscription, though contracts dated in his reign have been found.

67. **His successors.** He was assassinated after a reign of two years in a revolt led by Nerigissar, his brother-in-law, who succeeded him upon the throne (see NERGAL-SHAREZER).

559. His inscriptions that have been recovered are concerned merely with his building operations. He was succeeded by his son Labaši-Marduk, who, after reigning nine months, was murdered by his nobles. Nabu-na'id or Nabonidus, the son of Nabu-balatsu-ikbi, was placed upon the throne.

Nabonidus was a ruler more energetic than his immediate predecessors on the throne. He devoted himself to rebuilding the ancient temples

68. **Nabonidus.** throughout the kingdom, and dug in their foundations until he found the ancient inscriptions of the kings who had first founded or subsequently restored them. In his own inscriptions recording his building operations he recounts his finding of several such inscriptions, and, as he mentions the number of years that had passed since they had been buried by their writers, his evidence with regard to the settlement of Babylonian chronology is invaluable.

Nabonidus, however, in spite of his zeal for rebuilding the temples of the gods, incurred the hatred of the priesthood by his attempt to centralise Babylonian religion. Although the rise of Babylon to the position of the principal city of the land had been reflected in the importance of Marduk in the Babylonian pantheon, the religion of the country had never radically changed its character. It had always remained a body of local worship, each deity retaining his own separate centre of ritual. Nabonidus set himself to centralise all these worships in Babylon. He removed the images of the gods from their shrines in the various cities throughout the country and transported them to the capital. By this act he brought down upon himself the resentment of the priests, who formed the most powerful section of the community, and they, by the support they gave to Cyrus on his capture of Babylon, considerably aided the Persian conquest of the country.

Cyrus, who had previously conquered the Medes, imprisoning Astyages and sacking Ecbatana, next turned his attention to the conquest of Babylonia.

69. Cyrus. The Babylonian army was commanded by Bēl-šar-usur (Belshazzar), the son of Nabonidus; but it did not offer an effective opposition to the Persian forces. After

538 suffering a defeat at Opis on the Tigris, it was broken. Cyrus marched on and entered Sippar without further fighting, and Nabonidus fled. Babylon itself was taken two days later, and Nabonidus fell into the hands of the conqueror (cp CYRUS, § 2).

In restoring order to the country, Cyrus adopted the wise policy of conciliating the conquered. He restored to their shrines the images of the gods which Nabonidus had removed. The popularity he acquired by this act is reflected in the inscription on his cylinder recording his taking of the city, which was probably composed at his orders by the official scribes of Babylon. Although naturally couched in flattering terms, it bears ample witness to the pacific policy of Cyrus, who therein allows himself to be represented as the vindictor and champion of Marduk, the principal deity of his conquered foe:

'He (i.e. Marduk) sought out a righteous prince after his own heart, whom he made ruler by the hand of Cyrus king of Anšan, he called by his name, for empire over the whole world he proclaimed his title. The land of Kūtū, the whole of the tribal horde, he forced into submission at his feet; as for the men whom he had delivered into his hands, with justice and righteousness did he care for them. Marduk the great lord, the protector of his people, beheld his upright deeds and his righteous heart with joy. To his city of Babylon he commanded him to go, he made him take the road to Babylon; like a friend and helper he went by his side. His wide-spreading host, the number of which, like the waters of a river, cannot be numbered, girt with their weapons advanced at his side. Without contest and battle he made him enter into Babylon his city; Babylon he spared from tribulation. Nabonidus, the king that did not fear him, he delivered into his hand. All the people of Babylon, the whole of Sumer and Akkad, princes and governors beneath him bowed down, they kissed his feet, they rejoiced in his kingdom, bright was their countenance. To the lord, who through his strength raises the dead to life and from destruction and misery hath spared all, joyfully they paid homage, they revered his name.'

Other passages in the cylinder refer to the zeal displayed by Cyrus for Marduk and the other Babylonian gods.—'When into Babylon I entered favourably, with exultation and shouts of joy in the palace of the princes I took up a lordly dwelling, Marduk the great lord (inclined) the great heart of the sons of Babylon to me and daily do I care for his worship. . . . And the gods of Sumer and Akkad, which Nabonidus had cast away, the gods I brought into Babylon, at the word of Marduk the great lord one and all in their own shrines did I cause to take up the habitation of their heart's delight. May all the gods whom I have brought into their own cities pray daily before Bēl and Nabū for the lengthening of my days, let them speak the word for my good fortune, and unto Marduk, my lord let them say: "May Cyrus the king that feareth thee and Cambyses his son [have prosperity]."

With the capture of Babylon by Cyrus the history of the Babylonians as an independent nation comes to

70. End. an end. The country never regained her independence, but remained a province subject to the powers which succeeded one another in the rule of W. Asia. Under Cambyses, indeed, and still more under Darius Hystaspis, discontent be-

came very prevalent in Babylonia. Soon after the accession of Darius a certain Nadintu-Hēl put himself at the head of a revolt, declaring himself to be Nebuchadrezzar, the son of Nabonidus, the last king of Babylon. Darius stamped out the rebellion and executed Nadintu-Hēl. A few years later he quelled a second rebellion headed by Arahū, who was captured and crucified, and during the reign of Xerxes a similar rising proved equally unsuccessful. These rebellions were the last struggles of the national spirit to reassert itself. They met with no response among the general body of the people, who were content to serve their foreign masters. Babylonia, in fact, remained subject to the Persians until the conquests of Alexander brought her under Greek control, which she exchanged only for the Parthian supremacy.

(a) For the history of Babylonia, see the works by Tiele, Hommel, Deutsch, and Winckler cited under ASSYRIA. For the early period these histories may be supplemented

71. Bibliography. by reference to the inscriptions which are being published in *L. de Sarrasin, Les découvertes en Chaldée* (1903), in *The Bab. Exped. and the Univ. of Pennsylvania* (1903, 1904), in *Hopwood, and the Museum Texts from Babylonian Tablets, etc. in the British Museum* (1896, etc.), and in English histories, reference may be made to George Smith's *Babylonia* (S.P.K., 1877) and G. Rawlinson's *Five Great Monarchies of the Eastern World*, vols. i. and ii. (1871). In Schr.'s *K.B.*, vol. iii., translations of many of the historical inscriptions of Babylonia are given, while the same author's *COT* describes the principal points in the O.T. which are illustrated by the monuments. For other works dealing with the inscriptions of Babylonia the bibliographies mentioned in the article ASSYRIA (§ 34) may be consulted.

(b) [On the religion of the Babylonians we have as yet only one student's handbook, *Jastrow's Religion of the Ancient and Medieval Ages* (revised by D. G. Lyon, New World, March, 1909). Sayce's *Hilbert Lectures* (for 1887) on the same subject are less systematic. On the cosmology of Babylonia, Jensen's *Kosmologie der Babylonier* is still the most complete authority; but editions of religious texts must be consulted by the advanced student.]

(c) With regard to books for the study of the language, the first dictionary to appear was Norris's *Assyrian Dictionary* (1860-72), which he did not live to complete. In his *Alphabetisches Verzeichnis der Assyrischen Akkadischen Wörter* (1870), Strassmaier published an immense collection of material, which has been used in subsequent dictionaries, and these may be mentioned. Delitzsch's *Assyrisches Wörterbuch* (1882, etc., unfinished), the same author's *Assyrisches Handwörterbuch* (96), Muss-Arnolt's *Concise Dictionary of the Assyrian Language* (1904, etc., in progress), and Meissner's *Synonymicon Assyr. und Akkad.* (1905) (transl. Brinnow's *Assyrian List of Cuneiform Ideographs*, his *RV* (Indices, 1897), contains a full list of ideographs with their values. The best Assyrian grammar is Delitzsch's *Assyr. Gramm.* (1889, transl. by Kennedy).

(d) The existence of the Sumerian language, which for long was disputed, is now generally acknowledged; but a grammar of the language has yet to be written; it should be noted that the views on Sumerian which Delitzsch expressed in his *Assyr. Gramm.* have since completely changed. A list of the Sumerian values of the cuneiform signs is given by Brinnow in his *Classified List*, while Weissbach's *Die sumerische Frage* (98) may be consulted for the history of the controversy.

L. W. K.

BABYLONIANS (בְּבִי בָבֶל; γῆσι Βαβυλωνίῳ [BAQ]), Ez. 23.15 [BA. ON. BAB.], 17. [ON. Q.], 8. s., in Aram. בְּבִי בָבֶל, Βαβυλωνίῳ [BAL.], Ltr. 404, in every case the land, not the city, is referred to: cp especially Ez. 23.15, 'the Babylonians, the land of whose nativity is Chaldea.'

BABYLONISH GARMENT, RV Babylonish Mantle

(מַנְתֵּי שִׁנָּר, lit. 'mantle of Shinar,' so RV^{msc.}), Josh. 7.21. SEE MANTLE.

BACA. VALLEY OF (עֵקֶן הַבְּקָא § 103), or Valley

of Weeping (RV. ΕΝ ΤΗ ΚΟΙΛΑΔΙ ΤΟΥ ΚΑΛΥΨ ΜΛΩΝΟC [BA*RV], ΕΙC ΤΗΝ ΚΟΙΛΑΑ Τ. Κ. [BA*AT], cp Aq. Vg. Pesh.), mentioned only in Ps. 84.6 [7]. For the meaning given above cp the Wady of Weeping (עֵקֶן וָדֵי) found by Burckhardt near Sinai. The name is frequently explained 'balsam vale' (so RV^{msc.}); but cp Cheyne, who reads בְּקָא (cp ע here and at Judg. 25), and supposes a play on the name Bek'im. The pl. בְּקָא occurs in a Sam. 5.22 f. (= 1 Ch. 14.14 f.), apparently

as the name of a spot (see REPHAIM, VALLEY OF) where there were Baca-trees. David took his stand there to wait for Yahwè's signal to attack the Philistines.¹ **Ⓞ** (2 S. 5:24) speaks of it as a 'grove,' meaning an Asherah; there is no mention of trees in **Ⓞ**. On the meaning of Baca trees see MULBERRY.

BACCHIDES (ΒΑΚΧΙΔΗΣ, also ΒΑΙΥΧΙΔΗΣ; ΒΑΡΑΚΥ, [1 Macc. 7:8, A], KAKY, [ib. v. 12, A], ΒΑΚΥΧ, [ib. 9:1, N* A]), the chief general of DEMETRIUS I. [v. v. 1], who was sent to Judaea to enforce the claims of Alcimus to the priesthood (1 Macc. 7:8 ff.). Almost immediately after the death of NICANOR, he was sent again with Alcimus, and inflicted a severe defeat on the Maccabean party at Elasa,² who lost their leader Judas (chap. 9, 161 B.C.). Judasa suffered heavily at the hands of Bacchides; nor did any real advantage accrue when Jonathan took up the leadership (9:32 ff.). The capital and other important strongholds remained in the hands of Bacchides, who was engaged in fortifying them until the death of Alcimus (159 B.C.), when he returned to Demetrius (9:57). At the end of two years the opponents of the Maccabean party (whose hands had become strengthened) agreed to betray Jonathan and his followers to Bacchides. This piece of treachery was discovered and avenged (9:58 ff.). Bacchides set out against Judaea (158 B.C.) and besieged Beth-basi, but met with ill success everywhere, until at last he was only too glad to accept Jonathan's overtures of peace (9:68). The Jewish captives of the former wars were restored, and the Maccabees had rest for four or five years.

BACCHURUS (ΒΑΚΧΟΥΡΟΣ [BA], ΒΑΚΧΟΥΡ [L], ZACCURUS), singer in list of those with foreign wives (see EZRA, I, § 5, end), 1 Esd. 9:24; but not in || Ezra 10:24 [MT EV Ⓞ^{BA}], though Ⓞ^B adds ΒΑΚΧΟΥΡ.

BACCHUS (*Liber*), the equivalent of the Greek Dionysus (50 RV^{MG}, ΔΙΟΝΥΣΟΣ [AV]), is mentioned in 2 Macc. 67, where it is said that on the occasion of the birthday of Antiochus Epiphanes (175-164) the unhappy Jews were compelled to attend the feast of Bacchus (ΔΙΟΝΥΣΙΑ; RV^{MG}, 'feast of Dionysia') wearing the ivy-wreath (*κισσός*), the peculiar emblem of the god. A few years later Nicanor (the general of Demetrius) threatened to pull down the temple and supplant it by one dedicated to Bacchus unless Judas was handed over to him (ib. 14:33, Διωνυσος [A]). The worship of Bacchus seems to have been introduced first by the Ptolemies, of which family he was the patron-god, and according to 3 Macc. 2:29 several years previously the Jews in Alexandria had been branded by Ptolemy Philopator (222-204) with the sign of the ivy; the object of this obviously being forcibly to identify the unwilling Jews with the detested worship of Bacchus. See CUTTINGS OF THE FLESH, § 6. His worship would be specially abhorrent to pious Jews, since one of the greatest of the Dionysian festivals fell in the month Elaphebolion (March-April), thus synchronising closely with the passover. In course of time the Hellenising Jews and Greek residents were more attracted by the cult, and when Jerusalem became a Roman colony (Ælia Capitolina) we find Dionysus with his thyrsus and panther figuring upon the coins as one of the patron gods.³

The worship of Dionysus flourished at Cæsarea, at Damascus, and in the Haurân. He was the special patron of Scythopolis, and from him the town Dionysia (Soada) received its name. Dionysus, however, soon became identified with the Nabatean deity Dusares (the Baal, the god of heaven, and of wine). The

Dionysiac character which the latter presents is not native; it is directly due to the northern influence.¹ The priest of Dionysia (see above) calls himself the priest of Dusares, and on the coins of Bostra the latter appears with the Dionysian emblem of the wine-press. Figures of the vine and wine-cup are still found upon the lintels in many of the villages in the Haurân. Although the worship of Yahwè had little in common with that of Bacchus (*nequaquam congruentibus institutis*, Tacit. Hist. 5:5), classical writers, observing the musical and joyful nature of their ceremonial rites, now and then fell into the error of making Bacchus a Jewish god that had been worshipped by the earliest patriarchs (cp. e.g. Plut. Sympos. 146).

For the various mythological forms of Bacchus, see *Ency. Brit.* (3) s.v. 'Dionysus'; and Roscher, s.v.

BACENOR occurs in an uncertain passage, 2 Macc. 12:35, Διοσθεος δε τις των του βακναρος [VA]. It is doubtful whether it is the name of a captain or the cognomen of a company or division in the army of Judas. See DOSITHEUS.

BACHRITES, THE (בַּחְרִי, Nu. 26:35, Ⓞ^{BA} [v. 39] om. l. See BECHER.

BADGER, ROCK (בִּשְׁמֵן), Lev. 11:5 RV^{MG}; 1 V CONEY.

BADGERS' SKINS, RV SEALSKINS (עֹרֵת תְּחִשִּׁים, עֹרֵת תְּחִשִּׁים, ΔΕΡΜΑΤΑ ΥΑΚΙΝΘΙΝΑ [IAOΘIΝA, Aq., Sym., Ezek. 16:16] [BAL]; Ex. 25:5 26:14 35:7:23 36:19 [BAL om.] 39:34 Nu. 4:68 [δερματιω υακινθινω] 10:12 14:25 Ez. 16:10f), are mentioned as the fourth or outermost covering of the tabernacle (next above the 'rams' skins dyed red'), and as outer wrappings for the ark and different vessels of the tabernacle during journeys. In Ezekiel's figurative description of Yahwè's adorning of Israel as a beautiful maiden, shoes of this material are included. As to the meaning of *tahās* there have been many opinions: five chief views may be indicated.

(1) The ancient versions with one consent understood a colour: Ⓞ Syr. Chald. Vg. render 'blue' or 'violet,' Ar. Samar. 'black' or 'dark.' This view, which has been strongly maintained by Bochart, rests, however, on no philological ground, and is refuted by the syntax of the Hebrew words.² Apart from the versions, all Hebrew tradition is in favour of the view that *tahās* is an animal.

(2) In the discussion on this animal in the Talmud (*Shabb. c. 2*, fol. 28) the opinion prevails that it is a species of *תַּלַּא אֵילִין* (prob. = 'ferret'), a description which would roughly suit the badger; and the claim of this animal has been supported (by Ges. and others) by comparison with late Lat. *Taxus* or *taxo* (Ital. *tasso*, Fr. *taison*) and Germ. *Dachs*.³ The common badger, *Meles taxus*, found throughout Europe and Northern Asia, reaches its southernmost limits in Palestine, where it is common in the hilly and woody parts of the country. It is, however, improbable that the reference is to the skins of these animals. They would be difficult to procure either in Egypt or in the desert, and there is no evidence of their being used in those regions for such a purpose.⁴

¹ For the god Dusares (Δουσαρης, on Nab. inscr. 17:17A; see ZDMG 14:465, 41:711, Baethg. Beitr. 92 ff., WRS, *Kins.* 292 ff., and We. Heid. (2) 48 ff. The name means 'possessor (du) of Sarah.' The latter is often taken to be equivalent to 'Sarah,' in which case Dusares is equivalent to Abraham—a hazardous theory.

² תְּחִשִּׁים is obviously gen. after עֹרֵת—i.e., equivalent to עֹרֵת הַתְּחִשִּׁים, not to תְּחִשִּׁים, in the phrase for 'rams' skins dyed red.'

³ Philological explanations involving roots common to the Aryan and Semitic languages are, however, notoriously precarious.

⁴ How little value attaches to the opinion of the Rabbis may be gathered from another view, strongly supported in the Talmud, that the תְּחִשִּׁים was a kind of unicorn which specially appeared to Moses for this purpose, and immediately afterwards disappeared (Bochart, i. 330).

¹ In v. 24 emend וְעָרַת כִּסְיָהּ (συσσεισσος [L] for συσσεισσος [BA]), 'when thou hearest the sound of a stormy wind in the tops of the Baca trees.' It is in the tempest that Yahwè goes out against the Philistines.

² Doubtless an error for ΑΒΑΣΑ.

³ See Madden, *Coins of the Jews*, 1881, p. 252 f.

(3) A more scientific etymology is that which compares the Ar. *tahās* or *dūhās*, 'a dolphin.' This would indicate a marine animal,—probably (a) the seal (RV text), or (b) the porpoise (RV^{msc}), or (c) the dugong or sea-cow.

(a) has in its favour the adaptability of sealskins to the purposes referred to, the statement of Artemidorus (in Strab. 16.776) that seals abounded in the Red Sea, one island there being called *νήσος φλοκῶν*, and the actual use of a sealskin covering in antiquity to protect buildings, because it was supposed that lightning never struck this material (e.g., Pliny, *HN* 255, Suet. *Oct.* 90). One species of seal, *Monachus albiventer*, undoubtedly occurs in the Mediterranean, and some authorities are of opinion that the same is true of the common seal, *Phoca vitulina*.

(b) The porpoise, like the seal, is as a rule a denizen of the colder waters of the globe; but *Phocaena communis*, the common porpoise of the British coasts, occasionally enters the Mediterranean, whilst the Indian porpoise, *Ph. phocaenoides*, inhabits the shores of the Indian Ocean from the Cape of Good Hope to Japan, and may have been captured in the Red Sea.

(c) The Dugong, being more like the dolphin, has the etymology in its favour. According to Knobel (Comm. on Ex. 255) this animal (*Halicore tabernaculi*) 'is found in the Red Sea, attaining a length of 8 to 10 or more feet, is hunted like the whale, and has a skin well adapted for sandals or coverings.' Friedr. Del. sought to strengthen the case for this identification (Prol. to Baer's *Ezek.* p. xvi. f.) by comparison with Ass. *tahšu*, an animal whose skin, according to various Ass. inscriptions, was used to cover the beams of ships in the manner described by Herodotus (1.194). He has since (*Prol.* 77-79 [86]), however, abandoned the view that *tahšu* was the dugong, and supposes it to mean *whaler*.¹ The dugong of the Indian Ocean, with the Manatee of the Atlantic, composes the class Sirenia. They are usually found in the estuaries of large rivers browsing on sea-weed, and they are still actively sought off the coast of Queensland for the sake of their blubber and hide.

(4) Much less probable is the opinion of Böttcher (*Neue Aehrenl.* 32 ff.) that *תַּהֲשׁוּ* is a form of *תַּיִשׁ* (he-goat) with the middle radical hardened; he supposes that goat-skin was manufactured into a kind of morocco leather. It is natural that 'rams' and 'he-goats' should come together as in Gen. 32.15 [14] 2 Ch. 17.11; but apart from this the explanation has little to recommend it.

(5) The latest and perhaps most probable view is that put forward by Bondi (*Aegyptiaca*, 1 ff.), who makes *תַּהֲשׁוּ* a loan-word from Egyptian *thš*, 'Egyptian leather,' and gives a thorough discussion of views. This meaning is especially suitable to Ez. 16.10, but is also appropriate in the other passages.

Of all the explanations those by Ar. *dūhās* or *tahās*, by Ass. *tahšu*, and by Eg. *thš*, most deserve attention.

N. M.—A. E. S.

BAEAN (ΒΑΙΑΝ [ANV]), 1 Macc. 5.4 f. RV; AV BEAN.

BAG. Several of the Hebrew words are much more general in signification than the English 'bag.'—(1) *בֶּקַעַיִם* (Dt. 25.13 Pr. 16.11 Mi. 6.11 Is. 46.6) for holding money, or the weights employed by merchants. In Pr. 11.14 (βαλλάντιον), EV renders PURSE. (2) *תַּבְּשִׁיטִים* (*hārīt*) (cp Ar. *haritatum*, bag of skin, etc., and see Fränk. 296) in 2 K. 5.23 (θύλακος) of Naaman's bag which contained a talent of silver. In Is. 3.22 it is mentioned in the list of women's adornments, and signifies probably a satchel (so RV; AV 'crisping pin'). (3) *קֵלִי* (*kēli*), a word of very general meaning (see VESSEL), 'used of a sack for containing corn (Gen. 42.25 ἀγρῶν) or

¹ Cp Shalmaneser, Monolith inser. ii. 16, *ina elipne ha matāk tahši*, 'on boats of skins of wethers'; so Wi. for good reasons; but see references in Muss-Arnolt, *Ass. Dict.* s.v. 'tab-shu-ai'.

of the instruments carried by a shepherd (Zech. 11.15). It is rendered 'bag' only in 1 S. 17.40.49 (AV^{msc} 'vessel'); see SLING. (4) *בִּזְרֵךְ* (*ḥāḥ*, 'bind, cp verb) in 2 K. 12.11 [11], *בִּזְרֵךְ*, 'and they put in bags', Job 14.17 (βαλλάντιον), Pr. 7.30, 27.3, 'a bag with holes' (11.32. 16). It is rendered 'bundle' in 1 S. 25.20 Gen 42.35 (of money) and Cant. 1.13 (of myrrh, RV^{msc} 'bag'). (5) *βαλλάντιον*, Lk. 12.33, RV 'purse'; and (6) *γλωσσόκομος* (Jn. 12.6.18.29, RV^{msc} 'box'). See BOX, 3.

BAGO (ΒΑΓΟ [Λ]), 1 Esd. 8.40 = Ezra 8.14, BIGVAI, 3.

BAGOAS (from Pers. *bagā*, 'God'; see Ed. Meyer, *Ent.* 157; cp Bigvai, Bigtha, Abagtha, a eunuch in the household of Holofernes; Judith 12.11 ff. (Βαγωαδ [BAΓ]); in 1.3.3 Βαγωαδ [AV]).

BAGOI (ΒΑΓΟΙ [Λ]), 1 Esd. 5.14 = Ezra 2.2, BIGVAI, 2.

BAGPIPE (RV^{msc} of *בַּנְיֹנִי* Dan. 3.5.10 [10], *בַּנְיֹנִי*, Kr. 'בַּנְיֹנִי', Gr. *κύμαφώνια*, EV 'dulcimeter'). The Aramaic word is from *ḥanūphā*, a late Gr. word, used, curiously enough, by Ptolemy in his account of the festivities in which Antiochus Epiphanes (who is so frequently alluded to in Daniel) indulged (xxvi. 105 xxxi. 4); see DANIEL, § 71. For the form of the Aramaic *בַּנְיֹנִי*, *בַּנְיֹנִי*, *בַּנְיֹנִי*, in the Fiscal Inscription from Palmyra, 137 A. D. *nos. 3, II.* 14.43). See MUSIC, § 40.

BAHARUMITE, THE (בַּהַרְמִי, 1 Ch. 11.33; 0 ΒΕΡΒΑΡΜΙ [B. N.], 0 ΒΕΡΒΕΙΝ [B. N.], 0 ΒΑΡΒΑΜΑΙ [Λ], 0 ΒΑΡΒΑΜΑΙ [L]), evidently a scribe's error for the Bahurimite"—i.e., 'the man of BAHURIM (בַּהַרְמִי)'. The same reading should be restored in 2 S. 23.31. See BAHURIMITE.

BAHURIM (בַּהַרְמִי, בַּהַרְמִי; Βαυρημ [A], 2 S. 3.10 Βαυρημ [B], - [L]; 16.5 Βαυρημ [B], χερρα [L]; 17.1 Βαυρημ [B], Βαυρημ [L]; 19.16 Βαυρημ [B], χερρα [L]; 1 K. 2.36 Βαυρημ [B], Βαυρημ [A], Βαυρημ [L], *בַּהַרְמִי*, vii. 9.7), a place in Benjamin (2 S. 19.16 [17]), not included in the list of Benjaminite towns, which appears prominently in two very interesting narratives—that of the return of MICHAEL to David, and that of the flight of David from Absalom. Michael had been given by David's angry father-in-law to Palti (q.v.) or Paltiel of Gallim, and David in his returning prosperity demanded her back. Followed by her weeping husband, Michael went from Gallim¹ to Bahurim. There Abner commanded Paltiel to return. It may naturally be asked, Why was Bahurim selected as the scene of this leave-taking? The answer is furnished by the story of David's flight. It is clear from 2 S. 16.5 (cp 17.24) that Bahurim lay near the road from Jerusalem to the Jordan valley. Abner would have to take this road on his return to Mahanaim, and would naturally wait at Bahurim until he knew for certain that a visit to Hebron would be acceptable to the king. Meantime the envoys of David conducted Michael to Hebron. Later it was David's turn to pass by Bahurim, when he sought the Jordan valley as a fugitive (2 S. 15.28). At Bahurim he would apparently have made his first halt had not the insults of SHIMEI compelled him to go farther² (2 S. 16.5-14). It was at Bahurim also that Jonathan and Ahimaz lay hid in a well, when pursued by the servants of Absalom (2 S. 17.18). The spot which best answers the topographical conditions is (as Barclay was the first to see) SE. of the village of *el-'Isāwīyeh* (see LAISHAH). Here, to the S. of the old Roman road, van Kasteren found in the upper *Wādī er-Rawābī* a ruin without a name, which he believes to be on the site of Bahurim (ZDPV 13.101 ff.). For a less probable view, fully discussed by van Kasteren, see Marti, ZDPV 38 ff.

T. K. C.

¹ Sir G. Grove (Smith's *DB*) thinks this may be doubtful. The rendering of *בַּהַרְמִי*, however, in 2 S. 3.15 (וַיִּשְׁלַח אֶת־מִיכָאֵל) suggests that the verse originally closed with *בַּהַרְמִי*, 'from Gallim.' That Palti was Iahbosheth at Mahanaim seems very improbable.

² The name of the village where he 'refreshed himself' (2 S. 16.14) seems to have dropped out. See AVEPHIM.

BAITERUS

BAITERUS (ΒΑΙΤΗΡΟΣ [BA]), 1 Esd. 5:17 RV, AV METEPIRUS; see GIBBAR.

BAJITH, RV BAVITH (בַּיִתְיָהּ, 'the temple'; text of 6 differs), is taken in EV of Is. 15:2 as the name of a place, the article being neglected (cp AIN, 2). It is perhaps more defensible to render the stichus containing the word thus: 'They go up to the temple, Dibon (goes up) to the high places to weep' (so Ges. and formerly Che.). The temple referred to might be the Beth-bamoth of the inscription of Mesha (l. 26; cp BAMOTH-BAAL). In בַּיִתְיָהּ, however, are so easily confounded (see, e.g., Is. 10:32 Kt.) that it is still better to read בַּת־דִּבּוֹן, 'the daughter (= people) of Dibon is gone up,' with Dahm and Cheyne (SBOT).

BAKBAKKAR (בַּקְבָּקָר) form strange, probably corrupt; BAKAP [B], BAKB. [AL]; Pesh. has בַּקְבָּרִי, which in 2v. 8:12, etc. = Heb. בַּקְבָּרִי, Jeroham), a Levite in list of inhabitants of Jerusalem (see EZRA, ii. § 5 [d], § 15 [1 a], 1 Ch. 9:15; not in || Neh. 11:16, but perhaps transposed to v. 17 (where MT and G¹ read BAKBAKKAR [7.7.], though G² omits. 6¹ βουκκακας).

BAKBUK (בַּקְבֻּק), §§ 38, 71, 'pitcher'; but see below; BAKBOYK [AL]. The b'ne Bakkūk, a family of Nethinim in the great post-exilic list (see EZRA, ii. § 6, 1 Esd. 2:31, 3:20, 4:11, 5:11, 7:21; Neh. 7:53, 8:14; EV, ACUB). The name can hardly be Hebrew. It may be corrupted from Assy. Ḥabbaḳka, a plant name (see HABAKKUK). T. K. C.

BAKBUKIAH (בַּקְבֻּקִיָּהּ) § 38, 'pitcher of Yahwè'? [or else = Bakkuk, 7, being probably a simple affirmative HEBREW; JHL 13:127]. cp BAKBUK; BAKBAKIAK [8.6.10. sup. L], BN²A om.), one of the Nethinim; a singer in list of Levite inhabitants of Jerusalem (see EZRA, ii. § 5 [d], § 15 [1 a], and cp Herzel, 105), Neh. 11:17 (BOKYEIAC [L]; omitted in || Ch. 9:16 before Obadiah = Abda of Neh.); and porter in Zerubbabel's band (see EZRA, ii. § 6 b, § 11, and Herzel, 110), Neh. 12:25. In Neh. 11:17, of the three persons named, Mattaniah is a 'son' of Asaph, and Abda is a 'son' of Jehuthan. It is plausible, therefore, to take Bakkukiah to be the same name as בַּקְבֻּק (cp 6¹) and identify with BUKKIAH [7.7.], one of the sons of Heman. The three great guilds of temple-singers will then be represented.

BAKEMEATS. In his dream Pharaoh's chief baker carried on his head 'three baskets of white bread'

1. Baking. (כֵּלֵי חֵיִן), Gen. 40:16—so RV and most modern scholars; AV 'three white baskets'), in the uppermost of which were 'all manner of bakemeats for Pharaoh,' literally, as we read in the margin of AV, 'meat [food] of Pharaoh, the work of a baker' (40:17). The best commentary on these verses is the representation of the royal bakery on the tomb of Ramses III. at Thebes, which has been reproduced by Wilkinson (*Anc. Eg.*, 1878, 1:176), and more recently by Erman (*Anc. Eg.*, 1911). The process of making the ordinary household supply is described under BREAD; here it is proposed to bring together the scattered notices in Scripture regarding other products of the baker's skill. In this connection, it is interesting to note the remarkable variety of shapes assumed by the bread and pastry in the representation referred to. Additional varieties are collected by Erman from other sources and represented on the same page. How far the Hebrew court bakers (1 S. 8:13) were able to imitate those of Egypt we do not know.

There is certainly no lack of names for different species of bakemeats in the OT; but it is now impossible to

2. Cakes. identify them (cp BREAD). Thus we can only conjecture, although with a fair amount of certainty, that the cake named *kikkār* (כִּקָּר, AV 1 Cp AKKAR, 2. It is possible, however, that BA omits the name (L has βακκα), since ακουφ, etc. may be a duplicate of ΗΑΚΥΡΗ (7.2).

BAKEMEATS

'morsel,' RV 'loaf'), 1 S. 2:36, must have been round, like a Scottish 'bannock'; which, from the context, must hold good also of the barley-cake (צֶלֶת) of Gideon's dream (Judg. 7:13). The *nikkādīm* (נִקְדִּים, possibly from נָקַד, to prick) may have been thin cakes pricked over like a modern biscuit, or dotted over with the seeds of some condiment (see below). They were part of the present which the wife of Jeroboam I. took to the prophet Ahijah (1 K. 14:3), and are rendered by EV cracknels, for which the American revisers prefer to read 'cakes.'¹ Still, judging from etymology, we may consider the *hallā* (חֲלָה), the cake which so frequently occurs in the sacrificial ritual, as having been perforated (חָלַהּ, to pierce) like a modern Passover cake. It was made of the finest flour (חֲלָה), Mention is made of another kind of sacrificial cakes, apparently of foreign origin, which the women of Jerusalem kneaded and baked in connection with the idolatrous worship of the 'QUEEN OF HEAVEN' (7.7.1; Jer. 7:18 44:10). 6¹ merely transliterates the Heb. word (חֲלָה, χαλωνας [8.2.10]; χαλωνας [N²], χαλωνας [Q²] in Jer. 44:10), and the exegetical tradition varies. That these *kaḥōnīm* were some kind of bakemeats is clear from the kneading of the dough in their preparation (7:18). It is generally thought that they may have resembled the *selēnai* (σεληναί), cakes shaped like the full moon, which were offered in Athens to Artemis, the moon-goddess, at the time of full moon (see especially Kue's essay 'De melcheth des hemels,' translated in Bu.'s edition of his *Gesammelte Abh.* 208, and the comm. of Graf and Giesebrecht *in loc.*). A similar custom is said to have prevailed in the worship of the Arabic goddess Al-'Uzza (We. *Ar. Heid.*⁽¹⁾ 38 f., 2nd ed. 41 f.).

With regard to what may be called the pastry of the Hebrews, all that can be said with any degree of certainty is that a more delicate relish was imparted to 3. Pastry. the preparation of certain kinds of bakemeats in three ways. (1) The dough was baked in olive oil. Thus the taste of the manna is said in one passage (Nu. 11:8 [E]) to be like the taste of 'cakes baked with oil' (RV^{mg.}, חֲפֵי חֲמֵץ), generally understood of some dainty cooked in oil (but EV 'like the taste of fresh oil'). (2) The dough was prepared by being mixed with oil and then fired. This mode of preparation was extensively used in the ritual of P: see, for example, Lev. 24 ff., where a distinction is made between cakes 'mingled' (בְּחֵיִן—see below in BDB *Lex.*) with oil' and cakes merely 'anointed (מְשֻׁמֵּם) with oil.' (3) In the passage parallel to that quoted above (1), viz., Ex. 16:31 [P], the taste of the manna is likened to 'wafers (כִּבְכָק, for which see BREAD) made with honey.' From this passage, from the prohibition of honey in the ritual (Lev. 2:11), and from the post-biblical use of the verbal stem כִּבַּח (DB³), we learn that honey (*d'bas*)—no doubt both the product of the bee and the artificial grape-syrup (the modern *dibs*; see HONEY)—was used in the preparation of certain kinds of bakemeats. 6¹ in both the passages discussed (Nu. 11:8 Ex. 16:31) renders by *εγκυπλι*, according to Athenæus (in Di. on Ex. 16:31) denoted 'a bakemeat made with oil and honey.' Saadia's word here is *kaṭṣ'ipā* (*pastilli dulciarii*), a species of confection still made in Syria. Landberg (*Proverbes et Dictons*, 125) defines it as 'a flaky paste (*pâtisserie feuilletée*) made with walnut and sugar and, in spring, with cream.'² Some sort of dainty confection is evidently intended by the obscure *ḥibibōth* (חִבְבוֹת; 2 S. 13:6 8:10; EV 'cakes') which Tamar baked for Amnon.³ If the etymology

1 For Josh. 9:5, the only other passage where נִקְדִּים occurs (EV 'mouldy'), see Di. *in loc.*

2 The curious in these matters are referred to Landberg's book for a detailed list of modern Arab confections, 123-128; cp Wetz. *ZDMG* 11:57 f.

3 On the reading in v. 9 see COOKING UTENSILS, § 5 (i.)

from בָּרֵךְ (heart) were more secure, we might conclude that the tit-bit in question was heart-shaped.

In Ex. 27:17 we find among the trade-products of Tyre a substance called *pannag* (פַּנָּאָג) which, according to the Targum, was a 'kind of confection'; so RV^{mg.} The meaning is quite uncertain, and probably the text is corrupt (Co. would read וַחַרְוֹ , wax; see PANNAG). For the frequently mentioned פֶּתִיחַ or grape-cake, see FRUIT, § 5; and for the use of condiments in baking, see FOOD and SPICES.

A. R. S. K.

BAKING. See BREAD, § 2; OVEN.

BAKING PAN (כִּיּוּן־בָּרֵךְ), Lev. 25:79. See COOKING UTENSILS, § 7.

BALAAM (בְּלַעַם ; etymology uncertain; Winckler's Bel-am [*GZ*] seems improbable; cp perhaps Bal-lum-e (CAB. Tab.) and see BILEAM, BELLA, NIGOLAITANS; BALAAAM [H.M.]; Joseph. ΒΑΛΑΑΜΟΣ), b. Beor; a soothsayer or prophet

whom BALAK, king of Moab, made anxious by Israel's victory over the Amorites, summoned to curse his enemies. Instead of doing so, Balaam bore himself as the prophetic mouthpiece of Yahwē, whom he acknowledged as his God (Nu. 22:18), and by the spirit of Elohim (24:2) foretold the future glory of Israel. No wonder that a prophet of Judah, writing probably in the dark and idolatrous days of Manasseh, recalled the history of Balaam, when he would remind his ungrateful countrymen of Yahwē's 'beneficent deeds' (Mic. 6:5). Balaam's character has long been regarded as an enigma, and from Bishop Butler's time onwards many subtle solutions have been offered. The enigma, however, is mainly produced by the combination of two traditions belonging to different periods, and it is the duty of the critic to distinguish, as far as possible, the two traditions which, though one in spirit, present a palpable difference in details.

According to J, Balak, king of Moab, dismayed by the number of his new and unwelcome neighbours, called Balaam from the land of the b'nē Ammon² to curse Israel. Balaam protested that he could not, for all the royal treasure, go beyond Yahwē's word; but he saddled his ass and set out.³ On the road, the angel of Yahwē, invisible to Balaam, but visible to the beast he rode, stopped his way with a drawn sword. Yahwē endowed the ass with speech, and at last opened the prophet's eyes to the apparition, and, had it not been for the fear which held the animal back, Balaam would have paid for his rashness with his life. Still, he received permission to go, and was only warned to report Yahwē's oracle faithfully. The Elohist has no occasion for these marvels. In his account, Balaam, who is an Aramaean of PETHOR (*q.v.*) on the Euphrates (or perhaps rather a N. Arabian of Rehoboth by the river of Musri), did not yield to Balak's repeated solicitations till God (Elohim) appeared in a dream and told him to go with the Moabite ambassadors.

From this point it is not possible to separate the E and J documents with full confidence. In what follows we have four great prophecies concerning Israel's future, besides three short oracles on the destruction of the Amalekites, the Kenites, and the Assyrians. Probably the first two of the four great prophecies come to us in their present form from the hand of the Elohist,⁴

¹ The word 'confection' here used in the RV^{mg.} refers everywhere else in E^v to perfumes or spices (Ex. 30:35, RV 'perfume'; 1 Ch. 9:20, AV 'ointment', RV 'confection'; Eccles. 38:8); cp the 'confectionaries' or perfume-compounders of r. S. 8:13.

² 22:26; read בְּנֵי־אֲמֹן with Di. after Sam. Pesh. Vg., and some Heb. MSS. For a third view, however, see PETHOR.

³ Nu. 22:19-22 belongs to E. The reason why Balaam went is not told in the extant portions of J.

⁴ The Elohist account of the prophecies must, however, have made some reference to Moab, and must, therefore, have contained more than is now given in chap. 23.

while the last two are derived from the narrative of the Yahwist.

Balaam prepares for his work rather after the fashion of a sorcerer than in accordance with the spiritual ideas of Hebrew prophecy. In order to influ-

2. Oracles
1 and 2 [E] ence Elohim, he directs Balak to offer sacrifices of special solemnity¹ (seven altars, seven oxen, seven rams; cp BEER-SHEBA). Bamoth-baal, the scene of the sacrifices, was no ordinary 'high place,' but (probably) one of those high hills where huge dolmens still suggest primeval communing with God, and, as we learn, it commanded a view of at least 'the utmost part' of the Israelitish encampment. This was important, for a curse must be uttered in sight of those upon whom it is to fall (cp 23:13 a). When Balaam returns to Balak and his princes after meeting God, he can but break forth into jubilant praise of Israel. Curse it he cannot. The people has a destiny of its own which parts it from the surrounding nations. The Israelite hosts N. of Arnon are the token of a mightier multitude unborn. All individual desire loses itself in the sense of Israel's greatness. Happy is he who dies in Jeshurun, and, dying, knows that his people is immortal! In vain Balak changes the seer's place of outlook. As Balaam beholds all Israel from the top of PISGAH,² he receives a divine oracle which confirms and transcends the former blessing. God, says Balaam, is not a man; he does not change his mind. Nor can trouble touch Israel, for Yahwē himself reigns in their midst; and the people (if we may trust the reading³) greet this divine king with exultant shout. With the strength of a wild-ox, they fling their foes to the ground. No magical arts avail in Israel's case: even now all has been decided, and one can but cry 'What has God done!' Like a lion, Israel rises up to devour the prey.

Again sacrificial rites are performed, and again Balaam has to disappoint the king (see PETHOR). The third

3. Oracles
3 and 4 [J] prophecy (J), together with some striking parallels to the second⁴ has characteristics of its own. The poet still dwells on the numbers and prowess of Israel, but adds a panegyric of its well-watered and fruitful land, and surprises us by a definite mention of the kingly power as distinct from the reign of Yahwē. The king of Israel is described as raised even above AGAG (*q.v.*). Still more definite is the fourth prophecy. The seer beholds in spirit the rise of David, and chaunts the victories which are to crush Moab and subdue Edom.

The basis of the story of Balaam is evidently a patriotic legend, which, as we now have it, presupposes a comparatively advanced historical period.

4. Origin
of story. It is true, the story of the ass, which comes to us from the angel invisible to man, and speaks (Nu. 22:22-34; cp 2 Pe. 2:16), has a highly primitive flavour.⁵ Still, this story, though welded with some psychological skill into the surrounding narrative, is a decoration derived from folklore, and the narrative as a whole is designed to accentuate the uselessness of jealous and rebellious feelings in the Ammonitish and Edomitish neighbours of Israel. Ammon and Edom

¹ It is Balak, not Balaam, who sacrifices; 'Balak and Balaam' in Nu. 23:22 evidently be omitted (as in B.M.B.).

² This is certainly E's meaning in Nu. 23:12. The second part of v. 13, which limits Balaam's range of vision to 'the utmost part of the people,' must be due to a redactor. Its object is to harmonise v. 13a [E] with 24:2 [J], which tells us that Balaam is now taking his first complete view of the people of Israel. In reality, however, v. 13b destroys the progress which E intended from 22:4 to 23:13. Since a limited view of Israel had not resulted in the utterance of a curse, Balak deemed it necessary to try the effect of the wider outlook from Pisgah.

³ Cheyne, however, reads וַיִּשְׂמְחוּ , and 'the glory of the king is among them.'

⁴ It is doubtful, however, whether Nu. 23:22-23 is not a Yahwistic fragment (see Bacon, *Triple Tradition*, 228, and cp Di.'s note). According to Cheyne, וַיִּשְׂמְחוּ occurs both in vs. 21 d and in v. 22 b.

⁵ Cp the Babylonian beast-stories, the speaking horse in Hom. *Il.* 19:404, and the speaking serpent in Genesis.

were older as nations; but Israel alone had secured permanent foothold W. of Jordan, and for a time reduced the oldest nationalities to vassalage. The story of Balaam points out that Yahwé had ordained these privileges of Israel long before. The Moabitish king and the Ammonitish, Arabian,¹ or Aramaean soothsayer had striven to turn aside the irreversible decree, and Yahwé had turned the very means they took into the instrument by which he announced the triumphs and the unique destiny of his people.

It is much harder to fix the date and origin of the poems. We can scarcely attribute them without reserve to J and E, for the points of contact

5. Origin of poems. between the prophecies (cp especially 23²² and 24⁸) suggest that an ancient poem has been expanded and changed in diverse ways. The kernel of the poem may go back to the early days of the kingdom,—even, it may be, to those of Solomon. The national fortune is painted in glowing colours, and the historical references stop short at David, who was the only king to conquer both Moab and Edom. On the other hand, the clear sense of Israel's separateness from the nations (23⁹) had not arisen, so far as is known, before the time of the literary prophets, and the phraseology does not permit us to place the poems, as we now have them, earlier.

The appendix (24²⁰⁻²⁴), at any rate, is generally admitted to be comparatively modern (note the exaggeration respecting the Amalekites).

6. The appendix. The structure shows that the oracles are from one hand (cp 24²⁸, end, with *v.* 24, end).

The writer was quite familiar with the Assyrian power, and speaks of the deportation of the Kenites by the Assyrians. He speaks of the Kenites, rather than more famous peoples, because he considers them to be (like the Amalekites; cp 1 S. 156) within Balaam's horizon. He also (if the text of 24²⁴ be correct) predicts that Assyria in its turn will be destroyed by ships from CHITTIM (*g. r.*). Was he thinking of the Persian empire (Assyria = Persia, Ezra 6²²), and its overthrow by Alexander the Great (cp 1 Mac. 11)? The theory has been widely accepted, and much controversy as to the limits of prophecy has grown out of it. It seems bolder than the evidence as a whole warrants (see Di.), and it has lately been pointed out that 'they shall afflict' (*v.* 24) is a misreading which has arisen out of the loss of an ethnic name in *v.* 23. Analogy requires that the last of the three little oracles in 27¹, 22-24 should begin thus:

And he saw . . . and began his oracle, and said,
Alas who will live (survive) of . . .

And the discoveries of the Tell of Zenjirli enable us to restore the missing name, which was, not 'Samuel' (שמואל, as many MSS and some editions), but 'Sham'al.' Then in *v.* 24 we may continue:

And there shall be ships from the direction of Cyprus,
And Assyria shall afflict him (*v.* 24), and Eber shall afflict him,
And he too (shall come) to destruction.²

The kingdom of Sham'al in NW. Syria was not so very far from Balaam's native place Pethor. (The *poet.*, at any rate, placed Pethor in Aram.) That it was destroyed by Assyrians and peoples from the other side of the Euphrates (=Eber), and plundered by shipmen from Cyprus, was probably within the recollection of the author, who is, therefore, not to be regarded as post-

¹ See above, § 1, second paragraph. Cp Gen. 30³², and see BELA (*z.*) MELBAIM.

² The importance of this correction will appear if we compare the alternative explanation of Hommel (*AHT* 245^{f.}), which produces the following most unnatural and unworthy distich:

'Jackals (שׂוֹמְרֵי) shall come from the north

And wild cats (שׂוֹמְרֵי) from the coast of Kittim,'

where 'jackals' and 'wild cats' are figurative expressions for wild invaders, and Kittim is, Hommel says, 'the familiar term for the Hitites (var. chittim).' See ASSHURIM, EBER.

exilic. Assyria may have been no longer at the height of its prosperity, but was still a conquering power.¹

We have passing notices of Balaam in Josh. 24⁹ (E) and in Dt. 23^{4 f.}, cp Neh. 13^{1 f.} (see AMMONITES, § 3).

7. Allusions to Balaam. In Dt. *l.c.*, as in E, he is an Aramaean from Mesopotamia, hired to curse Israel; but Yahwé turned his curse into a blessing.

The Priestly Writer represents Balaam in a much more unfavourable light, Nu. 31^{8 16} Josh. 13²² (cp Nu. 25⁶⁻¹⁸). He is a sorcerer, at whose instigation the Midianite women seduced the Israelites into sensual idolatry; and he died in the battle between the Israelites and the Midianites. Jos. (*Ant.* iv. 66) dwells at great length on the corrupting advice of Balaam, given in the first instance (cp Rev. 2¹⁴) to Balak, and in Rabbinical literature Balaam is the type of false teachers (*Aboth*, 5¹⁹; cp Rev. *l.c.*) and sorcerers. Cp also 2 Pet. 2¹⁵ Jude 11. For Arabic parallels to the efficacy of Balaam's oracles, see Goldziher, *Abhandl. zur arab. Philologie*, 26 ff.

³ Cp Phoen. בַּעֲלֵס, 'B. hath weighed out.'

⁴ Cp the deprecation of unfair weights (שִׁבְרֵי אֲבָנִים, lit. 'stones') in Lev. 19³⁵ Prov. 11¹ Mic. 6¹¹.

cross beams turning upon a pin. An arm on either side ended in a hook to which the article to be weighed was attached in bags (cp Wilk. *Anc. Eg.* 2246, fig. 415, 5 d, see BAG, 1). Small ones of a particularly ingenious nature, as well as hand-scales, are found (Wilk. 1285 fig. 95). Above the pole is sometimes placed the figure of a baboon representing 'Thoth the regulator of measures. The steelyard (in Egypt) does not seem to have been known until the Roman period.

BALASAMUS (ΒΑΛΑCΑΜΟC [BA]). 1 Esd. 9:40; Neh. 8:4. MAASELAG, 15.

BALD LOCUST (בַּלְדָּן; ΔΤΤΑΚΗC [BAFL]). The *sol'am* is apparently a species of edible locust, or a locust in a particular stage of growth. See further LOCUST, 2.

BALDNESS. See CUTTINGS, § 1; HAIR.

BALM (בָּרָךְ or בָּרִיף; ΡΗΤΙΝΗ [PIT. AEF] ΡΙΤΙΝΗ [E one]; cp Ezek. 27:17 AV¹⁹⁰⁸ 'rosin'; Vg. *rosina* Gen. 37:25 43:11, Jer. 8:22 46:11 51:3, Ezek. 27:17), a valuable product of Palestine,

the identification of which has given much trouble. EV's rendering, 'balm,' is an unfortunate inheritance from Coverdale's Bible (see *New Eng. Dict.* s.v.). Let us look first at the Hebrew name בָּרָךְ (*šōri*). The Arabic *šarw* or *širw*¹ is identical with it, and since the root means to 'drip' or 'bleed,' the product referred to must be *resinous*, but it need not be *aromatic*. From the OT notices we learn that *šōri* (EV 'balm') was found abundantly in Gilead, that it was in early times exported thence to Egypt (Gen. 37:25), was sufficiently prized to form an appropriate gift to a lord of that country (Gen. 43:11), was applied as a remedy for violent pain (Jer. II. cc.), and was among the chief products of Palestine that were brought into the Tyrian market (Ez. 27:17).

Next, we must point out that the modern commercial name 'balm of Gilead' has, like the botanical specific name *Gileadense*, no foundation but the hypothesis that the substance so designated is the OT 'šōri of Gilead'; and that from the earliest times resins and turpentine have been used in medicine, as stimulants and as antiseptics for wounds, and as counter-irritants for pain. The *šōri* (EV 'balm') of Jer. 8:22 46:11 is clearly a local product in Gilead; its association with *mōr* (EV 'myrrh') in Gen. 37:25 43:11 proves that it was a valuable article of commerce.

It has been shown elsewhere (BALSAM) that the so-called 'balsam of Mecca,' produced by the *Balsamodendron Opobalsamum*, is most probably

2. Probably not the 'šōri of Gilead' but the Hebrew *mōr*, which EV mistakenly renders 'myrrh' (see BALSAM, MYRRH). *Šōri* (EV balm), then, must be something else.

(1) Arabic usage is in favour of the rendering of RV¹⁹⁰⁸ Gen. 37:25 etc., MASTIC—i.e., the resin yielded by the mastic tree, *Pistacia Lentiscus*.

This tree 'is a native of the Mediterranean shores, and is found in Portugal, Morocco, and the Canaries' (Flickiger and Hanbury's *Pharmacog.*, 161). According to Tristram (*NHB* 356), it is extremely common in all the Mediterranean countries, especially on the African coasts and in the Greek islands, where it overruns whole districts for many miles. Tristram states, also, that it is indigenous in all parts of Palestine, though, according to Post (Hastings, *BD* 236 a), it is not now to be found E. of the Jordan. The mastic of commerce is mainly derived from the Isle of Scio. Down to the seventeenth century mastic was an ingredient of many medicines. Unlike most resins, it readily softens with moderate heat, even that of the mouth.

As the Arabic word *šarw* (or *širw*) is used mainly of this tree and its products, we are not rash in concluding that a substance of this kind is intended in the biblical passages, though it seems unnecessary to limit *šōri* to the resin of *P. Lentiscus*; it may include the resins of the *terebinth* (*P. Terebinthus*) and *Aleppo pine* (*Pinus halepensis*; see ASH). The former yields 'Chian

¹ The Syriac *šarwā* must be a loan-word from Arabic (Iag. *Mith.* 1 234).

turpentine,' which has recently been brought into notice as an alleged remedy for cancer. According to Tristram (*op. cit.* 400), the terebinth is not now tapped for turpentine in Palestine, 'where the inhabitants seem to be ignorant of its commercial value.' There is abundant evidence of the medicinal use of these resins in antiquity (see Movers, *Phön. Alt.* iii. 1223).

(2) *Balanites aegyptiaca*, called *zakkām* by the Arabs (Tristram, *op. cit.* 336), yields an oil 'prepared by the Arabs of Jericho and sold in large quantities to the pilgrims as balm of Gilead.' This, however, was the *περσεία* of Greek writers, and clearly, therefore, distinguished by them from *βάλσαμον* or *βρίσιον*. It is merely a modern substitute.

(3) Lastly must be mentioned Lagarde's view that Gr. *στύραξ* = בָּרָךְ (*šōri*). There is great probability in this identification of the words, for *στ-* is employed in several instances to transliterate *š* (*š*); but evidence is wanting to connect בָּרָךְ with the substance *στύραξ*, which seems to have been called in Hebrew לְבָנֶה (libneh). See further STORAX.

W. T. T.-D.—N. M.

BALNUUS (ΒΑΝΥΟΥC [B]. ΒΑΛΝΟΥC [A]). 1 Esd. 9:31 = Ezra 10:39. BINNU, 4.

BALSAM appears in RV¹⁹⁰⁸, once for בָּשֵׂמֶן *bāsim* (Cant. 5:1, ἈΡΩΜΑΤΑ), and twice in rendering the 1. Heb. *bāsim*, בָּשֵׂם בְּרִיחַת *bāsim bēriḥat*. 2. Heb. *bāsim*, *bāsim*, 'bed of balsam' (Cant. 5:13 6:2, ΦΙΛΛΑΙ ΤΟΥ ἈΡΩΜΑΤΟC). RV text and AV have 'spice,' 'bed of spices.' The verb (in Aram. *bāsim*) signifies to 'have pleasure,' 'be attracted by desire,'¹ and in Heb. the nominal forms² denote enjoyment connected with one particular sense—that of smell. From one or other of the Semitic forms comes Gr. *βάλσαμον*. Although *bāsim* and *bōsim* in the above passages may have the general sense of spice or perfume,³ it is more probable that, like *bāsim* and *βάλσαμον*, they denote the balsam tree or plant *par excellence*. We now know that the proper source of Mecca balsam is *Balsamodendron Opobalsamum* (see § 4); and a tree of this kind seems to be intended in the passages from ancient writers which are here summarised.

(a) Theophrastus (*Hist. Plant.* 96) has a long passage about the production of balsam. It is produced, he says, 'in the hollow about Syria (ἐν τῷ αἰθῶρι τῆς περὶ

2. Ancient *Σύρια*). This phrase Stackhouse explains References. from Strabo as meaning *Κοίλε-Συρία*; but circa 322 B.C. at the present day *Balsamodendron Opobalsamum* does not grow farther N. than Suākim; it is essentially a tropical plant. Theophrastus, who is so minutely accurate in all his other details (note his happy expression *φθλοῦν* δὲ . . . *βασιν* *παράγω*, 'with leaves like rue'), cannot have meant what Stackhouse supposes. It is certain, however, that the term *ΚΟΙΛΗ-ΣΥΡΙΑ* [q.v.] in the Greek period had a wider application, and Vespingius (*Opobalsami Indiciæ*, 243) rightly remarks, 'Vallem hic intelligendam esse Hierichuntis . . . persuademus.' The fruit, Theophrastus continues, resembles the terminth (turpentine) in size, shape, and colour. The 'tear' is gathered from an excision made with iron at the season when the stems and the upper parts are tenses (*σύντηξ*). The odour is very strong; the twigs also are very sweet-smelling. No wild balsam is met with anywhere. The unmixed juice is sold for twice its weight in silver; even the mixed, which is often met with in Greece, is singularly fragrant.

(b) Strabo (763) is somewhat less full; but there can be no doubt that it is the Mecca balsam plant which he describes as grown in a *παράσιτος* at Jericho. He says that it is 24 B.C. shrub-like (*θαμνώδης*), resembling cypress and terminth, and sweet-smelling. The juice is obtained by means of incisions in the bark; it is very much like a viscous milk (*γλισχροῦ γαλακτός*) and solidifies when stored in little shells (*κοχλῶν*). He praises its medicinal use, and says that it is produced nowhere else. Diodorus Siculus (2:48) mentions 'a certain hollow' in the neighbourhood of the Dead Sea as the habitat of the balsam, 8 B.C. and adds that great revenue is derived from this plant, because it is met with nowhere else in the world, and is of great value to physicians. Pliny too (*H.N.* 12:25) affirms that the balsam plant is confined

¹ Curiously enough, Ar. *bāsimā* has the contrary sense of *loathing* (see Lag. *Covers.* 143); but *bāsim* denotes the balsam tree.

² Heb. does not possess the verb.

³ See *Spice*. *Bāsim* is the word used in 1 K. 10:2 10:25 (Queen of Sheba's visit to Solomon).

to Judaea. 'In former times it was cultivated only in two regions, both of them royal; one of them was to be more than twenty iugera extent, and the other less. The emperors Vespasian and Titus had this shrub exhibited at Rome; . . . it bears a much stronger resemblance to the vine [*etc.*], in the stems; here Phry seems to borrow from Icosus (Pompeius) than to the myrtle. The leaf bears a very close resemblance to that of [ruie] and it is an evergreen. . . . At the present day it is cultivated by the fiscal authorities, and the plants were never less than more numerous. They never exceed a couple of cubits in height.'

Josephus makes several references to the balsam. He says (*Ant.* viii. 6) that the first roots of balsam (ὀροβάλασμου) were brought to Palestine by the queen of Sheba. To give an idea of the sites of Pompey's camp (at Jericho), he says it is here that balsam (ὀροβάλασμου) which is of all unguents (ἀρώμα) the chief grows, and describes how the juice (σῆμα) is obtained (*Ant.* xiv. 41). Again, when speaking of the districts around Jericho assigned to Cleopatra, he speaks of the pleasantness of this plant, which grows there alone (*Ant.* xv. 42). Lastly, in a second reference to Pompey, he says that the region of Jericho bears the balsam tree (βάλασμου), whose stems (σῆμα) were cut with sharp stones, upon which the juice 'drops down like tears' (*Ant.* xiv. 41). Pliny, in a passage quoted by Justin (36 3), also places the opobalsamum grove; and the name of the 1st cent. A. D. place is Jericho (Hierichus). 'In that valley is a wood, notable alike for its fertility and its pleasantness, being adorned with a palm grove and opobalsamum. The opobalsamum trees have a form like pine trees (*πίνε*), except that they are less tall (*μειγρὰ*), and are cultivated after the manner of vineyards. These at a certain time of the year sweat balsam.'

It is remarkable that the Greek and the Roman writers dwell so constantly on the uniqueness of the balsam-tree

3. Balsam in Palestine. Some of them, at any rate

Arabia. (e.g., Strabo, Pausanias, Diodorus), were not unaware that the plant grew on the coasts of Arabia; and Josephus, in his legendary style, actually attributes to importation from Arabia its presence in Palestine (*Ant.* viii. 66). No doubt this is substantially correct. Prosper Alpinus (*De Balsamo*, 1592) and Veslingius (*Opobalsami Vindiciae*, 1643) long ago investigated the subject. In the time of the former, balsam plants were brought to Cairo from Arabia; Alpinus himself (*op. cit.* 64) apparently possessed a living specimen. The Arabic writer 'Abdallatif (*d.* 1231) also speaks of the balsam tree as in Egypt at 'Ain Shems ('Fountain of the Sun')—i.e., in the gardens of Matariya, close to Heliopolis. It was about a cubit high, and had two barks; the outer red and fine, the inner green and thick. When the latter was macerated in the mouth, it left an oily taste, and an aromatic odour. Incisions were made in the barks, and the amount of balsam oil obtained formed a tenth part of all the liquid collected.² The last balsam tree cultivated in Egypt died in 1615; but two were alive in 1612. This was the only place in Egypt where the balsam tree would grow. We can well understand, therefore, that the neighbourhood of Jericho was the only habitat of the tree in Palestine.

It would, however, be unreasonable to suppose that the needs of the luxurious class in Palestine in pre-Roman times were altogether supplied

4. Probably = OT *môr* EV myrrh.

The precious unguent derived from the balsam tree, not less than the costly frankincense, was doubtless always one of the chief articles brought by Arabian caravans. The tree that produces the so-called 'balsam of Mecca' is the *Balsamolendron Opobalsamum*. This tree, as Schweinfurth reports,³ averages above 15 ft. in height, possesses a yellow papery exfoliating bark, and produces thin, grayish black twigs, from the ends of which a small quantity of balsam exudes. 'It is widely distributed over the coast territory of Arabia, the adjacent islands, and S. Nubia'; but 'the balsam is collected only in the valleys near Mecca.' It is thus described by Dymock (*Pharmacogr. Ind.* 1 317): 'Balsam of Mecca, when freshly imported into Bombay, is a greenish turbid

¹ *Rute* in old editions; but Mayhoff prefers *tuberi* (*tuberi*).
² See 'Abdallatif, *ed.* De Saady, 88 (Hugie, *The Nile*, 181).
³ We quote from a *résumé* of his researches in *Pharm. Journ.* April 1894, p. 897.

fluid of syrupy consistence, having a very grateful odour, something like oil of rosemary.' Jewish tradition seems to have held that Mecca balsam is what the OT writers call *šôri*—whence the rendering 'balm' of AV and RV (text); but the tradition was impugned long ago by Bochart (*Hiæc.* i. 251), and does not agree with the use of the Arabic cognate word *darîv* (mastic; see BALM, 1). Schweinfurth holds that the OT name for Mecca balsam is not *šôri* (EV balm, perhaps really mastic; see BALM, 1), nor *bösem* (see above, § 1), but *môr* (see MYRRH). Certainly *môr* was (like Mecca balsam) strongly aromatic and also a liquid substance (Ex. 30 23 Cant. 5 5 13), whilst the OT references do not necessarily imply that *šôri* was aromatic. It is not unlikely that both *bösem* (§ 1) and *môr* mean Mecca balsam. (Cp *New Bulletin* for Mar.-Apr. 1896, p. 862.) See MYRRH. N. M. W. T. 7: D. 1. K. C.

BALSAM TREES (בָּלְשָׁם); RV¹⁹⁰⁹: 2 S. 5: 1 (Ch. 14 14 Ps. 84 6). See MULBERRY.

BALTHASAR, RV Balthasar (ΒΑΛΤΑΣΑΡ [BAQT]). Bar. 1 1 r f. See BELSHAZZAR.

BAMAH (בָּמָה, Ez. 20 29). See HIGH PLACES, § 5.

BAMOTH (בָּמוֹת; ΒΑΜΩΘ [BAFL]), a station of the Israelites between NAHALIEL (*q. v.*) and 'the glen (גַּל בְּאֵן) which is in the field [plateau] of Moab, [by] the summit of [the] Pisgah, etc.' (Nu. 21 19). Eus. (*OS* 101 22) describes it as 'on the Arnon' (like Nahaliel), which must be wrong. See BAMOTH-BAAL.

BAMOTH-BAAL (בְּמוֹת בַּעַל)—i.e., 'the high places of Baal' lay in the Moabite territory (see Nu. 22 41, RV; ΣΤΗΛΗ ΤΟΥ ΒΑΑΛ [BAFL]), to the north of the Arnon, and was assigned to Reuben (Josh. 13 17: ΒΑΜΩΘ ΒΑΑΛ [B. BAΜΩΘ B. [A.]). The order of enumeration in Nu. 21 19 f., where it is called simply BAMOTH, leads to the supposition (so Di.) that it must have lain somewhere on or near the Jebel 'Attârûs, on the south side of the Wady Zerka Ma'in (cp Is. 15 2: 'the high places'). Conder (*Heth and Moab*, 144) and G. A. Smith (*HG* 562), however, find the Bamoth in the dolmens immediately north of el-Maslûbiyeh, near the Wady Jideid. The Beth Bamoth of the Moabite stone is perhaps the same place (cp BAJITH); but this whole region is thickly strewn with the remains of ancient altars and other religious monuments (Conder, *op. cit.* 140 21 f.). The name Bamoth-baal is suggested also by Nu. 21 28, where the בְּמוֹת בַּעַל (EV 'lords of the high places of Arnon'—but see Ⓞ) are mentioned in parallelism with Ar of Moab.

G. A. S

BAN, RV¹⁹⁰⁹: BAENAN (ΒΑΝ [A], ΒΑΕΝΑΝ [B]), 1 Esd. 5 37 = Ezra 260, TOBIJAH, 2

BAN (בָּן), to Ban (בָּנָה).

Ⓞ renders by ἀνάθημα, ἀνάθημα, ἀναθεματισμένον, and in a few instances ἀπωλεία and other words denoting destruction; ἀναθεματίσειν and more rarely ἀναθεματίσειν.

1. Terms.—*ban*, 1 Esd. 9 4, ἀνερωσει, ἐξολοθρευσει, and in 11 it destroys'. Vg. has *anathema, consecratio*, etc.; *accidit, consumit, consero*, etc. AV translates *curse, utterly destroy, accursed thing*, etc.; RV, *devote, utterly destroy, devoted thing*.

The root *HRM* in Hebrew denotes devoting anything to Yahvé by destroying it; *hêrem* is any person or thing thus devoted. The root is found in a similar sense in all the Semitic languages, of sacred things which men are partly or wholly forbidden to use. It is especially common in Arabic: e.g., the sacred territory of Mecca and Medina is *haram*, and the *harem* (harem) is ground forbidden to all men other than the master and his eunuchs. It may be noted that the exclusive use of the root in the strong sense of devoting by destroying is characteristic of Hebrew (and of the dialect spoken by the Moabites; see §§ 3 f.), and that in other languages *harm* bears a meaning more nearly approaching *unclean* (בָּטָל), *profaned* (קִדְּשׁ).

(a) Idols are *hërem* in themselves. In Dt. 7:25 the Israelites are ordered to burn all heathen idols and not to bring them into their houses. The idols

2. Law of Hërem. (b) Public *hërem*. The Israelites or their rulers are ordered to treat as *hërem* in certain circumstances, guilty citizens or obnoxious enemies. In Ex. 22:19 [20] (Book of the Covenant, E) any one sacrificing to any deity other than Yahwë is to be made *hërem*. So in substance Dt. 13:6-11, though the term *hërem* does not occur till v. 16. In Dt. 13:13-19 [12-18] any idolatrous Israelite city is to be made *hërem*: all living things are to be killed and 'all its spoil' is to be burnt. So far, in (a) as in (b), the *hërem* is something abominable in itself and distasteful to God. Its destruction is a religious duty, and an acceptable service to Yahwë. Similarly, in Dt. 20:16-18 all Canaanite cities are to be made *hërem*, that they may not seduce Israel to idolatry. In Dt. 20:10-14, if any distant city refuses to surrender when summoned, all the males are to be slain, and all other persons and things may be taken as spoil. The term '*hërem*' is not used in that paragraph, and is perhaps not applicable to it. (c) We gather from certain passages that individuals might devote some possession to destruction as a kind of service to Yahwë, and that also is called *hërem* (see Vow). In a section of P concerning vows, Lev. 27, two verses (28 f.) deal with this individual *hërem*. Other vows may be redeemed; but individual (like public) *hërem* must be destroyed—it may not be sold or redeemed: it is most holy (*qodesh kôlôshîm*) unto Yahwë. Among the objects which an individual may make *hërem*, men are specially mentioned: they must be put to death. It is startling to find such a provision in one of the latest strata of the Pentateuch. Possibly only criminals could be made *hërem*; or the text may be fragmentary. Cp Dillmann and Kalisch on Lev. 27:28-29.

In Josh. 6:24 we have a provision that metal *hërem* (obviously because indestructible) is to be put into the treasury of the sanctuary. By an extension of this principle, Nu. 18:14 (P) and Ez. 44:29 ordain that *hërem* shall be the property of the priests.

Hërem is met with in Hebrew literature in all periods. The sweeping statements that all Canaanite cities E. and W. of the Jordan were made *hërem* (see Nu. 21:2 (JE) and Judg. 1:7 (J)), though otherwise discrepant, agree that the city on whose site Hormah was built was made *hërem*. Other instances of *hërem* are Jabesh-gilead (Judg. 21:10 f.), Jericho (rebuilt) forbidden under supernatural penalty, Josh. 6:26 f.), the Amalekites (1 S. 15), and the children of Ham at Gedor (1 Ch. 4:41). Similar cases—in regard to which, however, the term *hërem* is not used—are Gibeah and Benjamin (Judg. 20) and Saul's attempt to execute Jonathan (1 S. 14:24-46). On the Moabite stone (*l. 16 f.*) Mesha' says that he made the whole Israelite populace of Nebo *hërem* to Ashtarchemosh. The prophets speak of Israel or Yahwë making *hërem* of enemies (Is. 34:2 etc.) or of enemies' property (Mic. 4:13), or, conversely, of the heathen (Jer. 25:9), or Yahwë (Is. 43:28), making *hërem* of Israel. In the later literature the root *hërem* often only means exterminate (2 Ch. 20:23). The old meaning, however, was not quite forgotten, and in Ezra 10:8, if any Jew failed to obey Ezra's summons to Jerusalem, his property was to be made *hërem* and he himself excommunicated. In post-biblical Hebrew *hërem* came to mean excommunication as well as property set apart for the priests and the temple (Levy and Jarostw's Dictionaries, s.v.; S. Mandl, *Der Bann*, 1908, pp. 24-51). See, further, EXCOMMUNICATED.

The character of *hërem*, the diffusion of the root in a similar sense throughout Semitic languages, and its use in the Hebrew sense by the Moabites, show that it was an ancient Semitic institution belonging to Israel in common with its kinsmen. Stade (*Gesch.* 1:490) holds

that a Semitic people besieging a city vowed to make it

4. Origin and parallels.

hërem to their god in order to secure his aid. Moreover, the idea of *hërem*—as the use of the root in allied languages shows—was kindred to that of sanctity and uncleanness. Like these, it was contagious (cp CLEAN, §§ 2, 14): the possessor of *hërem* became *hërem* (Dt. 7:26 Josh. 6:18; Achan). OT legislation, as we have seen, converts the bribe to a venal deity into a legitimate penalty. The various degrees of severity are not important in relation to the principle.

Hërem has something in common with taboos, especially in its fatal effect on its possessor—e.g., in New Zealand taboos food is fatal to any one who eats it (Frazer, *Golden Bough*, vol. ii. 'Taboos');—but it is not so closely allied to taboos as the idea of uncleanness (see WRS, *Rel. Sem.* (2) 450 ff.). The Arab *harim* often assimilates to *hërem*: e.g., clothes used at the circuit of the Ka'aba are *harim*, and may not be worn or sold. Cp also the Roman ceremony of *devotio*, by which an enemy was devoted to destruction as an offering to the infernal gods (Preller, *Röm. Myth.* 124, 466). The instance of Kirra and the Amphitryonic council, in which the cultivation of land laid under a curse was made the pretext for a holy war, may also be compared with the case of Jericho. W. H. B.

BANAIAS (ΒΑΝΑΙΑC [BA]), 1 Esd. 9:25 = Ezra 10:4, BENAIAH, 10.

BAND. 1. In the sense of a troop or company of men, soldiers, etc. (see ARMY, § 3).

The rendering of *band* בָּנָיִם (prop. wings, cp *Bab. agrippa*, Ez. 12:4, etc.; *gawād*, 777, 1 K. 11:24 AV 1 K. 11:24, etc.; *bayil*, 577 (prop. furore), 1 S. 10:9 AV 1 Sam. 10:9; *mar' asb*, 777, Gen. 42; [H AV (prop. camps, see *Movses*); *band*, 577, 1 Ch. 12:33 AV Job 1:17; 'by bands', Pt. 30:27, represents a participle בָּנָיִם, *banding* (10000?)). In this sense the common Gr. word is *στρατή* (cp Mt. 27:27 Mk. 15:19, etc.), 'cohort' (so RVmg, Acts 19:4).

2. In the sense of a ribbon.

So *heKebh*, בָּנָיִם, Ex. 28:8, RV 'cunningly woven band'; AV 'curious girdle.'

3. Finally, to denote anything that connects or encloses, the following words (also rendered 'bands,' etc.) are employed.

Esar, עָסַר, Judg. 15:14, cp Aram. עָסַר, Dan. 4:13 [10 100]; *bandah*, בָּנָה, Ps. 119:61 (RV Connects, 70:4 and esp. Zech. 11:12), where 'Bands' (mg. 'binders' or 'union') is the name of one of the prophet's staves; *bandah*, בָּנָה, Is. 28:6 and Is. 37:4 (RVmg. 'pangs,' doubtful); *mo'ash*, מוֹאֵשׁ, Lev. 26:13 Ez. 34:27, RV 'bars' (AGRICULTURE, § 4); *mo'ar*, מוֹאֵר, Job 39:5 Ps. 2:3, *mo'ar'kôth*, מוֹאֵרֶת, Job 38:31, of the 'bands' of Orion; see SCARUS, § 3; *mo'ash*, מוֹאֵשׁ, Job 39:10, elsewhere (in plura) rendered 'cords,' 'ropes,' etc.

BANI (בָּנִי §§ 5, 52; cp Palm and Nali, 22; probably shortened from BENAIAH, 'Yah hath built up'; cp Gen. 30:3 Dt. 25:9 Ruth 4:11, and see Haupt, *Proc. Am. Or. Soc.* Ap. 22 [92]; BAN[É] [BANAL], -AI [L], -AIA [BL], -AIA[É] [NAL], BANAI-É [L], [BANAI] is a frequently occurring name (chiefly post-exilic), and in some cases it is difficult to separate the persons bearing it; there is often confusion between it, the parallel names BUNNI and BINNU [44 v.], and the noun B'ne (בְּנֵי). See Mey, *Entsteh.* 142.

1. A Gadite, one of David's 'thirty'; 2 S. 23:32 (1000 700 אֲבִירֵי [B], vi. γαδῖ [A], vi. αγγαῖ [L]) 1 Ch. 11:38, in which see HAVRI. Cp DAVI, § 11 G1.

2. A family of P'ne Bani occurs in the great post-exilic list (see EZRA, II. §§ 9-11), Ezra 2:36 (Baniou [B], vii [A]) = Neh. 7:13 (Baniou [BNA], -aiou [L]) AV BINNI (2:26) = Esd. 5:12; and various members of it are enumerated in Ezra 10:20 (Baniou [BNA] = Esd. 9:20 (Baniou [BNA]) EV BANI; and among those who had married foreign wives (see EZRA, I. § 5) in Ezra 10:34-42; RV, in v. 34 (Ave [BN], Baniou [BNA] = Esd. 9:23 AV MAANI, RV BAANI, and in v. 38 (cf. viot [Baniou] [BNA], Baniou, kai viot

BANNEI (L) = MT בַּנֵּי בַנִּי, EV BANI and BINNI = 1 Esd. 9:34 (EV BANNUS, FELIPI; BANNUS, ΕΒΛΑΝΕ [B], β., ΕΒΛΑΝΕ [A], BANNUS, και οινο BANNUS [L]). It is plausible, however, to correct Bani into BINNET or perhaps Bignai (cp. 1 Esd. 34 (cp. 2:14)). The family is also referred to on important occasions in Neh. 8:17 and 10:15 (BANNUS [L]) and as in Ezra's catalogue (see EZRA, I, § 2, ii, § 15 (12)), 1 Esd. 8:35, AV BANNA, RV BANNAS (BANNUS [B], BANNUS [L], or AN [A]). EZRA 8:10 (10:19) [BANNUS, B], etc. [BANNUS, L], BANNUS (ΕΒΛΑΝΗΘ, ε, εβλκ) where Bani should be restored in MT (see *Be. ind. loc.*).

3. One of the exponents of the Law (Neh. 8:7; see EZRA, II, § 13:1; cp. I, § 8, ii, § 19 [15] 1.) who officiated at the constitution of the 'congregation' (9:4); see EZRA, II, § 12, § 13 [7]. In 9:4 (Bani Kadmiel; ΕΒΡΗΥ ΝΙΝΑ ΚΑΔΜΙΕΛ) the name is repeated, probably by an error (cp. Ryssel); Grätz, after Pesh., reads Binnui for the second Bani. In 9:5 ΕΒΡΑ has simply ΚΑΔΜΙΕΛ. Cp. also Ezra 2:40 and Kadmiel of the children of Hodaviah (Neh. 7:43 with 1 Esd. 5:26 (ΚΑΔΜΙΕΛΟΥ ΚΑΙ ΒΑΝΟΥ [A]). In Neh. 11:22, Uzzi (5) b. Bani (BANI [B], BANNUS [L]) is called overseer of the Levites at Jerusalem.

4. Signatory to the covenant (see EZRA, I, § 7), Neh. 10:14 [15] (BANNUS [L]; ονο Βαν Βαν); cp. BINNET, I.

5. A Merarite; 1 Ch. 6:31 [45].

6. A Judahite; 1 Ch. 9:4 Kr. (ΕΒΑΛ. ον).

BANID, RV Banias (ΒΑΝΕΙΑC [B], γ. β., BANI [9:75 2] [10:1]).

BANISHMENT. On various forms of temporary or permanent exclusion from the community as a consequence of crime or ceremonial disqualification, see BAN, § 3; CLEAN AND UNCLEAN, § 15 f.; SYNAGOGUE; EXCOMMUNICATION.

In 2 S. 14:14 allusion is made to Absalom in the word בָּנִי (EV 'banished', elsewhere usually rendered 'outcast' ('outcasts' or 'dispersed of Israel'); see DISPERSION, § 1. The nature of the punishment threatened in Ezra 7:26f (עָרַב) RVaug. 'rooting out' (παύσει [B]), παύσει (L) was already obscure to the editor of 1 Esd. (8:24; τιμωρία [B], ἀπώμια [L]). Ezra 10:8 ('separated' [בָּנִי] from the congregation of the captivity) may give an explanation of the phrase.

BANK. For *šābāh*, בַּנְכָּן, in 2 S. 20:15 2 K. 19:32 Is. 57:33 AV (elsewhere EV always MOUNT) and χάρμαξ in 1 K. 19:41 (AV TRENCH, RVaug. PALISADE) see FORTIFICATION.

BANK (ΒΡΑΠΕΖΑ, 1 K. 19:43 EV), **BANKER** (ΒΡΑΠΕΖΙΤΗΣ, Mt. 25:27 RV). See TRADE AND COMMERCE.

BANNAIA (ΒΑΝΝΑΙΟΥC [A]), 1 Esd. 9:33 AV = Ezra 10:33, ZABAD, 5.

BANNAS (ΒΑΝΝΟΥC [B]), 1 Esd. 5:26 RV = Ezra 2:40, BANI, 3.

BANNEAS (ΒΑΝΝΑΙΑC [B]), 1 Esd. 9:26 RV = Ezra 10:25, BENAIAS, 7.

BANNER (דג, לָבַד, לָב). See ENSIGNS, § 1, a, b, c.

BANNUC (ΒΑΝΝΟΥC [B]), 1 Esd. 9:34 = Ezra 10:38, BANI, 2.

BANQUET, Banqueting House. See MEALS.

BANUAS (ΒΑΝΝΟΥC [B]), 1 Esd. 5:26, apparently a misprint for Bannas (so RV). See BANI (3).

BAPTISM (ΒΑΠΤΙCΜΑ, ΒΑΠΤΙΖΕΙΝ). Among the permanent witnesses to the birth of Christianity out of Judaism is the primary institution of the Christian Church, the rite of baptism.

1. **Origin**. With the Jews the bathing of the whole body in pure cold water—if possible, in a running stream—was a recognised means of restoration from a state of ceremonial uncleanness. Passages like Num. 19:11 f., 31:19, also Is. 1:16 Zech. 13:1, and especially Ezek. 36:24 f., may be compared. The pouring of water on the hands—a symbolic representation, perhaps, of baptism in a running stream—was a Pharisaic precaution insisted on before every meal (cp. Mk. 7:3 Lk. 11:38). The Gentile, whose whole life had been ceremonially unclean, was required to submit to baptism among other conditions of his reception as a Jewish proselyte (Schürer, *Gesch.* 2:569 ff.; 3rd ed. 3:129). See PROSELYTE, § 5. The connection between Jewish and Christian baptism

is strikingly illustrated by the regulations prescribed for the latter in the *Didaché*, to be noticed presently; but, the ceremonial baptisms of Judaism, though they lie behind Christian baptism and exert an influence on its history, are not its immediate antecedent. The Jewish baptisms were the outcome of the Jewish distinction between clean and unclean—a distinction which was done away by Christianity (cp. WASHINGS). Christian baptism is a purification, not from ceremonial, but from moral impurity. The historical link is found in the baptism of John in the river Jordan. John adapted the familiar ceremony of baptism to a moral purpose: his was 'a baptism of repentance for the remission of sins,' a purification of the nation from that moral uncleanness which ceremonial uncleanness was properly typical. It was by means of this development of its true significance that baptism was rescued from mere formalism, and prepared to become the initiatory rite of the new Christian society.

As Jesus' work took up John's, and as he himself had chosen to be baptized by John, it was natural that his first preaching of repentance should be coupled, like John's, with a baptism. It is significant, however, that he did not perform the rite himself; only his disciples did so (Jn. 4:1 f.). Christian baptism was not yet instituted; and when it came it was to add a spiritual element which John's baptism lacked. Meanwhile Jesus was indicating by his own action, and by his defence of the action of his disciples, that the frequent Pharisaic baptisms—the ceremonial washing of the hands, and the 'baptisms' of vessels and dishes (Mk. 7:4)—had no permanent claim on the conscience; and certain of his words are directly explained by one of the Evangelists as repealing altogether the ceremonial distinction of clean and unclean, and as 'cleansing all meats' (Mk. 7:19). Only when the whole purport of Jewish baptism was annulled was the way clear for the institution of the Christian rite, one of the essential principles of which was that it should be performed once for all, with no possibility of repetition.

On the day of Pentecost Peter answers the inquiries of the multitude in words which, whilst they recall the baptism of John, indicate the fuller significance of Christian baptism: 'Repent ye, and be baptized, each one of you, in the name of Jesus Christ for the remission of your sins, and ye shall receive the gift of the Holy Spirit' (Acts 2:38). About three thousand were thereupon added by baptism to the original band of believers. It is expressly stated that at Samaria, as the result of Philip's preaching, both men and women were baptized 'in the name of the Lord Jesus'; but the gift of the Holy Spirit did not follow until the arrival of Peter and John from Jerusalem (8:12-17). The eunuch after Philip's instructions asks for baptism; and 'they go down both together into the water' (8:36-38). Saul is baptized by Ananias at Damascus (9:18). When Peter preached to Cornelius and his friends 'the Holy Spirit fell on all that heard the word'; whereupon the apostle 'commanded them to be baptized in the name of Jesus Christ' (10:44 ff.). Special stress is laid on this incident as the first occasion of the baptism of Gentiles as such (10:45 11:18). It was justified by the apostle on the ground of the previous gift of the Holy Spirit, which was the baptism promised by Christ in contradistinction to John's baptism (11:16 ff.).

Baptism was thus recognised as the door of admission into the Christian Church for Jews and Gentiles alike; and certain disciples of the Baptist whom Paul found at Ephesus were baptized afresh 'in the name of the Lord Jesus' (19:5). Of Lydia, the purple seller of Thyatira, found by Paul at Philippi, we read that she 'was baptized, and her household' (16:15); and of the Philippian gaoler, that he was baptized, 'he and all his straightway,'—i.e., in the middle of the night (16:33). At Corinth a few of the earliest converts were baptized by Paul himself—Crispus, Gaius, and the household of

Stephanas;—but the apostle's language shows that this was quite exceptional (1 Cor. 1:14-17). In 1 Cor. 15:29 Paul mentions a custom, apparently prevailing in Corinth, of vicarious baptism in behalf of the dead. He neither commends nor rebukes it, and it would seem to have soon died out.¹

The earliest notice of the method of baptism is perhaps that which is found in the *Didaché*, and, as we

have already said, it illustrates the recognition of a connection between the Jewish and the Christian baptisms. The *Didaché*, here as elsewhere, is strongly anti-Judaic in its tone, and at the same time shows the influence of Jewish practices upon the community which it represents. The Mishna draws six distinctions in the kinds of water available for various purificatory purposes (*Mikwa'oth* 1:1-8, quoted by Schürer, 2:403 ff.), and in certain cases it insists upon the full stream of running water, in which the whole body can be immersed. The *Didaché* (chap. 7) recognises 'living water'—*i.e.*, the running stream—'other water,' 'cold,' and 'warm'; and finally allows a triple pouring, where a sufficiency of any water for immersion cannot be had; but, though it indicates a preference in the order here given, it admits the validity of baptism under any of these conditions.

It is sometimes urged that, because βαπτίζειν means 'to dip,' Christian baptism must originally have been by immersion. In the NT, however, as in classical writers, the usual word for 'to dip' is βάπτω (Lk. 16:4, Jn. 13:6). βαπτίζειν had a wider usage, and could be used even of a mere ceremonial handwashing, as we see from Lk. 11:38, 'he marvelled that he had not first washed (ἐβαπτισθη) before dinner.' Already the partial ablution would seem to have been regarded as symbolical of the whole. It is difficult to suppose that the 3000 converts on the day of Pentecost could all have been baptized by immersion. Such a method is indeed presupposed as the ideal, at any rate, in Paul's words about death, burial, and resurrection in baptism (Rom. 6:3 f.); but pouring water on the head was in any case symbolical of immersion, and tantamount to it for ritual purposes.

(a) In the name, not 'into the name.' Although εἰς is the preposition most frequently used, we find ἐν in

3. **Formula.** Acts 2:38 10:48; and the interchangeability of the two prepositions in late Greek may be plentifully illustrated from the NT. Moreover, the expression is a Hebraism; ἐν ἐνοματι κυρίου Mt. 21:9 (= Ps. 118:26 עֲנֵן); so in the baptismal formula of Mt. 28:19 the Syr. version has ܩܕܝܫܐ (Lat. *in nomine*).

(b) In the name of Jesus Christ, or of the Lord Jesus. The former expression is used in Acts 2:38 10:48; the latter in Acts 8:16 19:5; cp also Acts 22:16, 'Arise and be baptized and wash away thy sins, calling on his name.' From these passages, and from Paul's words in 1 Cor. 1:13 ('Was Paul crucified for you, or were ye baptized in the name of Paul?'), it is natural to conclude that baptism was administered in the earliest times 'in the name of Jesus Christ,' or in that 'of the Lord Jesus.' This view is confirmed by the fact that the earliest forms of the baptismal confession appear to have been single—not triple, as was the later creed. When Philip's baptism of the eunuch appeared to have been abruptly narrated, the confession was inserted in the simple form, 'I believe that Jesus Christ is the Son of God' (Acts

8:37); and the formula 'Jesus is Lord' appears soon to have become a stereotyped confession of Christian faith (cp Ro. 10:9 1 Cor. 12:3 Phil. 2:11); moreover the 'question and answer' (ἐπερώτημα) connected with baptism in 1 Pet. 3:21 would appear to represent only the central section of the later creed.

On the other hand, we have in Mt. 28:19 the full formula, 'in the name of the Father and of the Son and of the Holy Ghost.' We have no synoptic parallel at this point; and thus, from a documentary point of view, we must regard this evidence as posterior to that of Paul's Epistles and of Acts.

The apparent contradiction was felt by Cyprian, who suggested (*Ep.* 73 17 f.) that in baptizing Jews the apostles may have been contented with the one name of the Lord Jesus Christ, as they already believed in the Father; whilst in baptizing Gentiles they used the full formula, which was given (as he points out) with the command to 'make disciples of all the nations' or 'Gentiles.' This explanation, however, breaks down in face of Acts 10:45-48, the opening of the door to the Gentiles.

Three explanations deserve consideration: (1) that in Acts we have merely a compendious statement—*i.e.*, that as a matter of fact all the persons there spoken of were baptized in the threefold name, though for brevity's sake they are simply said to have been baptized in the single name; (2) that Matthew does indeed report exactly the words uttered by Jesus, but that those words were not regarded as prescribing an actual formula to be used on every occasion, and that the spirit of them was fulfilled by baptism in the name of the Lord Jesus; (3) that Matthew does not here report the *ipsissima verba* of Jesus, but transfers to him the familiar language of the Church of the evangelist's own time and locality.

The first of these explanations cannot be regarded as satisfactory in the absence of any historical evidence of the employment of the threefold formula in the earliest times. A decision between the second and the third would involve an inquiry into the usage of the evangelist in other parts of his Gospel, and belongs to the discussion of the synoptic problem; but in favour of the third it may be stated that the language of the First Gospel, where it does not exactly reproduce an earlier document, shows traces of modifications of a later kind.

It has been argued that when Paul (Acts 19:2 f.), in answer to the statement of the Ephesian disciples of the Baptist, 'We have not so much as heard if there be a Holy Spirit' (*εἰ πνεῦμα ἁγίων ἔσται*), said, 'Unto what, then, were ye baptized?' he presupposed the use of the longer formula which expressly named the Holy Spirit. The statement can hardly mean, however, that they had never even heard of a Holy Spirit, for disciples of the Baptist could scarcely so speak (Mk. 18); it must refer to the special gift of the Holy Spirit which Christians were to receive. Accordingly, Paul's question simply implies that Christian baptism could scarcely have been given without some instruction as to this gift which was to follow it. In any case, it would be exceedingly strange that at this point Lk. should not have referred to the threefold formula, had it been in use, instead of simply saying, 'When they heard it, they were baptized in the name of the Lord Jesus' (Acts 19:5).

The threefold formula is attested by the *Didaché* (chap. 7), both in express words and by the mention of the alternative practice of triple effusion; but, as the *Didaché* shows elsewhere its dependence on Matthew, this is not independent evidence.

Justin Martyr (chap. 153), in describing baptism to heathen readers, gives the full formula in a paraphrastic form (*Apol.* 161), 'in the name of God, Father of the Universe and Ruler, and of our Saviour Jesus Christ, and of the Holy Spirit.' Such a paraphrase was necessary to make the meaning clear to those for whom he wrote.

We find the full formula again in Tertullian some

¹ Tertullian (*Res.* 48 c. *Mare.* 5:10) assumes that the custom was current in Paul's time, but is wrongly cited as attesting it for his own day. Chrysostom (*ad loc.*) says that Marcionites practised it; and Epiphanius (*Haer.* 28:6) had heard of a tradition that the Corinthians had done the same. This is very weak evidence for a second-century custom, and it is most probable that if the practice was found it was due to the passage in Paul's Epistle, and cannot be regarded as independent testimony to the existence of the custom among primitive Christians.

² The difficulties in which Commentators who reject the obvious meaning of the words find themselves involved may be seen at length in Stanley's *Corinthians* (*ad loc.*).

forty years later (*De Bapt.* 13, *Adv. Prax.* 26); and when the First Gospel was widely known it was certain to prevail. Exceptions are found which perhaps point to an old practice dying out. Cyprian (*Ep.* 73) and the Apostolic Canons (n. 50) combat the shorter formula, thereby attesting its use in certain quarters. The ordinance of *Can. Apost.* 50 runs—'If any bishop or presbyter fulfil not three baptisms of one initiation (ἑνὴν βαπτίσματα μᾶς μόνως), but one baptism which is given (ἅς) into the death of the Lord, let him be deposited.' This was the formula of the followers of Eumonius (*Socr.* 524), 'for they baptize not into the Trinity, but into the death of Christ' (for other references see Usener, *Relig. Untersuch.*, 1889, 1184); they, accordingly, used single immersion only.

No statement is found in the NT as to the age at which baptism might be administered. Circumcision, which Paul regards as fulfilled in Christian baptism (see below, § 5), enrolled the Jewish boy in the covenant of his fathers on the eighth day after birth, so that there could be no doubt that young children were truly members of the holy people. Thus, if children had been excluded from baptism when whole families were won to Christianity, we should almost certainly have had some record of the protest which would have been raised against what must have seemed so inconsistent a limitation to the membership of the new 'Israel of God.' It seems reasonable to suppose, therefore, that where 'households' are spoken of as being baptized (*Acts* 16:15 31-33 1 *Cor.* 1:16), there may have been, at least in some cases, instances of the baptism of infants. That Paul could speak of the children of a believing husband, or of a believing wife, as 'holy' is an indication in the same direction.

Paul, as we might expect, sees in baptism the means by which the individual is admitted to his place in the one body, of which he thus becomes a member; 'For as the body is one and hath many members, but all the members, many though they be, are one body, so also is the Christ; for indeed by one Spirit (ἐν ἑνὴ πνεύματι) we all were baptized into one body—whether Jews or Gentiles, whether bondmen or free' (1 *Cor.* 12:12 f.). Baptism was thus the fundamental witness of Christian unity (*Eph.* 4:5, 'one baptism'); and in both the passages here referred to it is emphasised as such in view of the variety of spiritual gifts. A parable of Christian baptism might be found in the cloud and the sea through which all the Israelites had alike passed; 'they were all baptized into Moses in the cloud and in the sea' (1 *Cor.* 10:2).

In *Rom.* 6:1 ff. Paul regards baptism as effecting a union with the death of Christ: 'we were baptized into his death.' It was a kind of burial of the former self, with a view to a resurrection and a new life. The same conception recurs in *Col.* 2:11 f., where it is immediately preceded by the thought that it corresponds in a certain way to the circumcision of the old covenant. It is 'the putting off'—totally, not merely partially and symbolically—of the whole 'body of the flesh'; and so it is the fulfilment of the old rite: it is 'the circumcision of the Christ.'

In *Gal.* 3:26 ff. Paul further speaks of baptism as involving a kind of identification with the person of Christ, so that the divine sonship becomes ours in him; 'For ye are all sons of God, through faith (or 'the faith') in Christ Jesus; for as many of you as were baptized into Christ put on (or 'clothed yourselves with') Christ.' The old distinctions, he again reminds us, thus disappeared—Jew and Greek, bond-man and free, male and female—'for ye all are one [man] in Christ Jesus' (*εἰς ἓστέ ἐν Χρ.* '1).

Eph. 5:26 speaks of Christ as cleansing the Church by the 'washing' (λουτρόν = 'washing,' probably not 'laver.' [In Ἐ 7:23 is always λουτρό; λουτρόν is 2777 *Cant.* 4:2 6:5 *Ecclus.* 34:25; so Aquila renders 771 in

Ps. 60:10 108:10) of water with the word' (ἐν ῥήματι). This last expression finds its interpretation in the ῥήμα, or formula of faith, to which we have already referred—which, whether as the confession in the mouth of the baptized or as the baptismal formula on the lips of the baptizer, transformed the process of ablution into the rite of Christian baptism. With this passage we may compare *Tit.* 3:5, 'He saved us through the washing of regeneration and renewal of the Holy Spirit' (ἰδὲ λουτροῦ πνεύματος ἁγίου καὶ ἀνακαίνωσις πν. ἁγίου).

This last passage reminds us of the teaching of *Jn.* 3. The relation of that chapter to the sacrament of baptism is exactly parallel to that of chap 6 to the sacrament of the eucharist (see EUCHARIST). We are secure in saying that the evangelist's interpretation of the significance of baptism must have followed the line of Jesus' conversation with Nicodemus as there related. That a Gentile, or even a Jew who had been neglectful of the Rabbinical discipline of ablutions, should need to begin entirely anew in the religious life, to be 'born again of water and the Spirit,' as a condition of entry into 'the kingdom of God,' would seem natural. The marvel and the stumbling-block was that this should be required of those who, like this 'teacher of Israel,' had been strictest in their ceremonial purity; 'Marvel not that I said unto thee: ye must be born again.'

Jn., then, recognises, with Paul, the universal character of the initial rite; whilst at the same time the narrative teaches the radical nature of the change in the individual soul.

J. A. R.

BAPTISMS (ΒΑΠΤΙΣΜΟΙ). *Mk.* 7:4, etc., *RV*¹⁹⁰⁸. *EV* WASHINGS (*q.v.*).

BARABBAS (ΒΑΡΑΒΒΑΣ [*Ti.* WH], § 48), the name of the prisoner whom, in accordance with a Passover custom, Pilate released at the demand of the Jews while condemning Jesus to death (so *Mt.* 27:15-26 *Mk.* 15:6-15 *Lk.* 23:17-25 *Jn.* 18:40 f.).

More precisely than *Mt.*, who simply calls him a 'notable' (ἐπίσημον) prisoner, and *Jn.*, who calls him a robber, *Mk.* describes him as lying

1. *Story.* 'bound with them that had made insurrection (μετὰ τῶν στασιαστῶν δεδεμένους), men who in the insurrection had committed murder.' As *Mk.* has not previously referred to these insurgents, it seems all the more probable that he is borrowing verbatim from another source, although about this particular insurrection we are in as complete ignorance as about the Galileans mentioned in *Lk.* 13:1. *Lk.* (23:16), who follows *Mk.*, adds that the insurrection had occurred in Jerusalem, but says nothing about any fellow-prisoners with Barabbas, and thus leaves the impression that Barabbas personally had committed murder. *Mk.* is entitled to the preference, not only on this point but also when he represents the Jews as having demanded the release of a prisoner on their own initiative, as against the less probable view that Pilate offered them this of his own accord.

Reference is sometimes made to the analogy of the Roman *testistermia*; but of these all that *Livy* (v. 126) says—and that only with reference to their first celebration—is that during those days such also as were bound (*vinciti*) were relieved of their chains (*vincula*), and such was the religious awe inspired by the proceedings that no one dared afterwards to rebind (*vincitū*) the recipients of this divine favour. Thus he says nothing about release from prison; and his contemporary *Dion. Halic.* (129 [=10]), on the authority of the *Annals* of a certain *Piso*, who himself had been censor, while he does indeed speak of such release, limits it to the case of slaves who had been laid under arrest by their masters (ἀναγκάσαντες μὲν τῶν θεραπέυτων, ὡς αὐτοὺς πρῶτον ἐν τοῖς ὄσασσι εἶχον οἱ ὀνοπέται).

Those who find some difficulty in accepting the narrative as it stands may perhaps find themselves better able to explain its origin on the lines indicated by *W. Brandt*, by whom every detail has been discussed with great care (*Evangelische Geschichte*, 1893, pp. 94-105). *Brandt* takes the kernel of the story to be that a certain prisoner who had been arrested in connection with some insurrection, but against whom no

crime or at least no grave crime could be proved, was released on the application of the people, who intervened in his behalf because he was the son of a Rabbin (see below, § 2). The incident, even although it was not simultaneous with the condemnation of Jesus, gave occasion in Christian circles for the drawing of this contrast: the son of the rabbin was interceded for and released, Jesus was condemned. In the course of transmission by oral tradition the statement of this contrast might gradually, without any conscious departure from historical truth, have led to the assumption that the two things occurred at the same time and on the same occasion. Finally, the liberation of a seditious prisoner—in any case a somewhat surprising occurrence—seemed explicable only on the assumption of some standing custom to account for it; this assumption must presumably have arisen elsewhere than in Palestine.

The above theory presupposes that *Barababbas* stands for *בַּר אֲבָא*, 'son of the father'—i.e., here, of the

2. Name. rabbinical 'master.' (It was not till afterwards that *Abba* began to come into use as a proper name [of rabbins], explained by Dalman [*Jesus*, I, 2] as an abbreviation, like *אֲבָא* in the time of Jesus it was a title of honour [Mt. 236].)

Jerome, *in* his commentary on Mt. 27:16-18 says that in the Gospel in the Hebrews *בַּר אֲבָא* (*Barabbas*) *Barabbas* is explained as 'son of their teacher' (*בְּרֵיבֵי מְרַבְבֵי עוֹרָא*), where *עוֹרָא* apparently implies an etymology similar to that found for a solution of a Venetian MS in WH App. *Index*, viz. that *Barabbas* (only another form for *Barabbas*; see *Winer, Gram.* § 5, 1, 70) means 'son of our teacher.' In that case we must (with Syr. hr.) write *Barabbasbar*, taking the second element as being 'teacher,' and assume that *בַּר אֲבָא* was explained as *בַּר אֲבָא*, 'our teacher,' or *בְּרֵיבֵי*, 'their teacher.' The meaning, however, is not essentially changed by this, as *בַּר* (as also *בְּרֵיבֵי*), is like *אֲבָא*, a title of honour for a great teacher.

The most remarkable fact in connection with the name of Barabbas is that Origen knew MSS. and did not absolutely reject them, in which Mt. 27:16 f. read 'Jesus' (*Ἰησοῦς*) before 'Barabbas'—a reading still extant in some cursives, as well as in the Armen. vers., in Syr. sin., and partly also in Syr. hr. Whether the Gospel of the Hebrews, referred to by Jerome, also had this reading is uncertain (see WH). In this reading 'Barabbas' would be only an addition made for the sake of distinction, as in Simon Bar-jona, but not yet with the full force of a proper name.

Some support for it might perhaps be found in the fact that the first mention of the name in Mk. is preceded by *ὁ λεγόμενος*. The meaning would then be 'He who, for distinction's sake (though it was not his proper name), was called Barabbas.' Only, in that case, in Mt. the *λεγόμενος* (here without the article), since it is followed, on the reading at present in question, by *Ἰησοῦς Barabbasbar*, would simply mean 'whose name was Jesus Barabbas', and it may be so in Mk. also. In any case it is remarkable that in all the MSS in question Barabbas should have the name *Ἰησοῦς* exclusively in Mt. and there only in two verses, while *Ἰη.* 20 and 21 simply *εἶπε* *τοῦ* *Barabbasbar*, *τοῦ* *ὄνομα* *αὐτοῦ* as an antithesis. Thus we may be tolerably certain that the name Jesus as given to Barabbas has arisen merely from mistake.

A fairly obvious explanation would be the conjecture of Tregelles, that a very early transcriber had 'per incuriam' repeated the last two letters of *ἡμῶν* and that these were at a later date taken for the familiar abbreviation of the name of Jesus. If this theory be adopted we must assume further that a later copyist inserted also in v. 16 the name *Ἰησοῦς*, which he had found in v. 17; but it is specially interesting to observe that in the Latin translation of Origen the word Jesus stands in v. 17 but not in v. 16 also. Cp Zahn, *Gesch. des NT Kanons*, 2:697-700. P. W. S.

BARACHEL (בְּרַכְיָאֵל, 'God blesses,' § 28; ΒΑΡΑΧΙΛΑ [BNA]), the father of Job's friend Elihu (Job 32:6).

BARACHIAH (בְּרַכְיָהוּ, בְּרַכְיָהוּ), Zech. 1:7. the reading of AV ed. 1611, and some other old editions. See BERICHIAM [4].

BARACHIAS, RV **Barachiah** (ΒΑΡΑΧΙΑΣ [Ti. WH]), Mt. 23:35. See ZACHARIAS.

BARAK (בָּרַק, 'lightning,' § 66. cp *Sol.* בָּרַק Palm. ברק, Pun. *Barcas* [the surname of Hamilcar], and the Ass. divine names *Kammam-birku* and *Gibil-birku* [Del. *Ass. HWB* 187]). B. Abinoam (Judg. 4:6-5:14; ΒΑΡΑΚ [B.], ΒΑΡΑΚ [A]). See DEBIBAL.

BARBARIAN (Βαρβαρος), primarily, one who speaks in an unintelligible manner: ¹ hence a foreigner (cp *Il.* 2:667), in which sense it is employed by Paul in 1 Cor. 14:11 Acts 28:2. This usage was not restricted to the Greeks alone: it is met with among the Romans (cp Ovid, *Irist.* v. 10:37), and (according to Herod. 2:158) among the Egyptians. In agreement with this, the people of Melita, who perhaps spoke some Phœnician dialect, are called 'barbarians' (Acts 28:2), and *ἔ* uses *βάρβαρος* to render the *קַלִּי* of Ps. 114:1—a people 'of strange tongue' (Targ. ברבאי).² The not uncommon *Ἑλληνες καὶ βάρβαροι*, accordingly, includes the whole world: cp Rom. 1:14 (also Jos. *Ant.* xi. 7:1) and the similar 'Barbarian, Scythian,' Col. 3:11; see HELLENISM, § 2.

The use of *βάρβαρος* is sometimes so extensive that the term has been used actually in referring to the speaker's or writer's own people: cp Philo, *Fl. Mos.* § 5, and Jos. (*B.*), pref., § 1, who applies the designation 'upper barbarians' to his countrymen beyond the Euphrates.³ At a later date the word gets the meaning 'cruel,' 'savage,' etc. (cp Cic. *Fontei.* 10:21, 'immanis ac barbara consuetudo'), in which sense it occurs in 2 Macc. 2:21 4:35 13:4 and in the *ἔ* of Ex. 21:11:13 (the MT בְּרִיבֵי, 'brutish').

BARBER (בָּרְבַּר, Ph. ברב, Ass. *gallabu*), Ez. 5:1-4 See BEARD.

BARCHUS (Βαρχυς [A], 1 Esd. 5:32 RV = Ezra 2:53, BARKUS).

BARHUMITE, THE (הַבְּרֻמִּי, 2 S. 23:31; ο ΒΑΡΔΙΑΜΕΙΤΗΣ [B], ο ΒΑΡΔΙΑΜ, [Mai], ο ΒΑΡΩΜ, [A], ο ΑΒΕΝΝΙ [L]). See BAHARDI-MITE.

BARIAH (בְּרִיָּהוּ, ΜΑΡΕΙ [B], ΒΕΡΙΑ [AL]), a descendant of Zerubbabel (1 Ch. 3:20).

BARJESUS, the Jewish sorcerer and false prophet in the train of the proconsul Sergius Paulus at Paphos, in Cyprus, who (Acts 13:6-12) withstood the preaching of Paul, and was punished with temporary blindness.

At the outset, the names present great difficulties. In 13:6 his name (*θρομα*) is expressly said to have been

1. Names. Barjesus (*Βαρjesούς*), and such a compound (son of a father named Jesus) can quite easily have been a proper name (cp Barabbas, Barnabas, Bartholomew). In v. 8, however, he is abruptly called 'Elymas the sorcerer, for so is his name by interpretation' (*Ἐλύμας ὁ μάγος, ὁ ὄνομα γὰρ ἐπισημαίνεται τὸ θρομα αὐτοῦ*). A translation has relevance only when it is a translation into the language of the readers: in any other case it would be incumbent on the author to state what foreign language he is translating into.

(a) This being assumed, we must take it that 'the sorcerer' (*ὁ μάγος*) is the translation. Elymas (*Ἐλύμας*), in that case, would be the word translated. Accordingly, the name has been identified with the Arabic '*alim*, which occurs in the Koran (7:106 [109] 26:33 and 36 [34 and 37]) as an adjective following the noun *sāhir* which denotes a sorcerer, and has thus been taken to mean 'wise,' 'able.' Less appropriate is the derivation from Aram. אַלִּים or אַלִּים, meaning 'strong.' Equate *μάγος*, however, etymologically, with *Ἐλύμας* as we

¹ Del. (*Ass. HWB*) explains Ass. *barbaru* = 'jabal.'
² akin to this are the expressions of *קַלִּי* (1 Cor. 5:12 f.) and *רַב* *תּוֹרָה* (like the Heb. בְּרִיָּהוּ, see GENIUSES, § 1) to denote those outside the Christian world. Cp the Talm. use of *בְּרַבְיָאֵל*.

³ Similarly, the Jews frequently employed אֲרַמָּאִין, Syr. *armāyā*—i.e., 'Aramean,' in the sense of 'barbarian,'—and so the Syr. translations of the NT, under their influence, retain the term to translate *Ἑλληνες, ἑθνογενῆς*. In passages of this it was felt that a word which was used in the NT to designate 'heathen' could hardly be borne by a Christian people, and the old name was modified into *arāmāyā*; cp. No. *ZDMG* 28:13, Wright, *Comp. Gram.* 15.

may, it still has to be explained how Barjesus came suddenly to be called by the other name, Elymas. The only way in which a plausible explanation could be reached would be if Elymas (in the sense indicated) could be taken as a title or cognomen assumed by Barjesus—a foreign tongue being used to heighten still further the prestige which he sought to acquire by it. It is not as a title, however, that the author employs it. On the contrary, he gives the word without the definite article, and expressly adds that the word which he is translating was the actual name (*ὄνομα*) of the bearer.

(b) It was quite sound method, therefore, to take Barjesus for the name translated, and Elymas for the translation.

Even Pesch, in 7, § 7, for *Εὐμαῖος ὁ μάγος* arbitrarily has 'this sorcerer Barshuma' (so Pesch, reads for *Βαρῖσου* in 7: 6; see below, (c)), whose name, when interpreted, means Elymas. Klostermann (*Γραμματικὴ ἀποστολῆς*, 1882, pp. 21-3), however, is able to support this view only on three assumptions, each one of which is holdier than the other. We must read, he holds, not *Εὐμαῖος*, but *Ἐτρούμος*; secondly, we must read, not *Βαρῖσου*, but *Βαρῖσουαν*, or, to be exact, the Latin *Barjesubian*; and, in the third place, the *ἰσο* so transcribed (whether we derive it etymologically from the root *ἰσο*, or, with more probability, from the root *ἰσο* which underlies *ἴσ*, *parastat*) means 'son of preparedness' or 'son of fitness,' and thus, by the same Hebrewism as we find in the name Barnabas (*γ. v.*, *βαρναβᾶς*, *εὐνοίας*).

a. As to the first of these assumptions, it has to be noted that the reading *Ἐτρούμος* is met with only in Lucifer of Calaris (ob. 371), and even there not as *Heteromus* but as *Etemomus*; D has *Ετρούμος*, which, indeed, we cannot explain, but which, from its ending, is clearly intended to be taken as a proper name; *paratus* is found only in Lucifer, one Vg. MS, and two Latin MSS, in which in many places is found the markedly divergent text of Acts which Blass takes to be Luke's earliest draft (see ACTS, § 17).

β. Next, as regards the second assumption, *Βαρῖσουαν* is found only in D; *Barjesubian*, only in the Latin translation of D; *Barjesubian* or rather, according to the one MS known to us, *Barjesubian*, only in Lucifer. The corrector of D has restored *Βαρῖσουαν*, which, as accusative, fits his reading *ὄνοματι καλοῦμενον* for *ῶ ὄνομα*, but, in spite of *ῶ ὄνομα*, is found also in A.H.L.P. and the Greek margin of the Philoxenian; *Β*, Vg., Copt., Armen., and the Philoxenian version as well as 'nonnulli' known to Jerome, read *Βαρῖσου*—that is to say, the simple Hebrew form without a Greek termination. On this Jerome (on the Hebrew names in Acts; *Opera*, ed. Vallarsi, 309) remarks, 'nonnulli Barjesu corrupte legunt,' himself declaring the right reading to be Barieu or Berieu, for which, by very daring etymologising from the Hebrew, he obtains the meanings *maleficium*, or *maleficus*, or *in malo*. Perhaps, however, even Jerome's aversion to *Βαρῖσου* rests upon the very obvious dogmatic consideration put forward by Beda in the eighth century, 'non conventi hominem flagitiosum et magum filium Jesu, id est, salvatoris, appellari quem e contrario Paulus (7: 20) filium diaboli nuncipat.' The form Barjesu in Jerome can readily be accounted for as merely a clerical error for Barjesu, or as arising out of the Greek abbreviation IHY which is met with in the oldest MSS along with the more frequently occurring IY for 'Ihsou'. The explanation in the case of the readings preferred by Klostermann is much less easy. On this account, in spite of their weak attestation, one might be inclined to regard them as the true ones; but all the authorities for the reading *paratus* have the word, not in 7: 8 instead of *Εὐμαῖος*, but as an interpolation after *Βαρῖσου* in 7: 6, 'quod interpretatur paratus.' This addition is met with elsewhere only in E, in the form *ὁ μεθερμηνεύεται Εὐμαῖος*—rendered in the Latin of this MS: *quod interpretatur Elymas*. It is evident that in neither case have we more than a single authority; and how can he explain Luke's having, after all, introduced the word into his second transcript, leaving out those in 7: 6 instead? Are we really to believe that with his own hands Luke changed his good and thoroughly intelligible first text into a positively misleading after-text? Cp ACTS, § 17 (f). If, however, the addition 'quod interpretatur paratus' at the end of 7: 6 is to be regarded as a late interpolation, Lucifer also, who has it, lies open to suspicion: his form *Etemomus* in 7: 8 may be not taken from a non-Hebraistic source, but a mere conjectural adaptation to allow of the word's being rendered *paratus* and itself regarded as a rendering of *Βαρῖσου*. What etymology he was following when he preferred (or perhaps conjecturally introduced) the form *Barjesubian* is a matter of indifference. In ancient times, as the *Onomastica Sacra* abundantly show, people made out Hebrew etymologies in a most reckless way.

γ. Klostermann's proposed etymology, *paratus*, rests upon a very weak foundation, as no such word as *par* (Yâwân) can be shown to exist (the proper name *par*, ISHVAH, in Gen. 40: 7 has no importance in this connection), and the root *par* or *par* which is used in Syriac frequently for *ἀξιος*, *ἴσος*, *ὁμοῦλος*, as also for *συν-*, *ὄμο-*, *ἀξιο-*, in compounds, is never used for *ἐτρούμος*. Besides, as we have said, the codex has not *Barjesubian* but *Barjesubian*. Above all, however, Klostermann's hypothesis remains untenable as long as one is unprepared to accept the further assumption that *ὁ μάγος* after *Εὐμαῖος* (or *Ἐτρούμος*) in 7: 8 is a mere gloss to be deleted; for *ὁ μάγος* necessarily leads to the assumption dealt with under (a). This had no doubt already been perceived by the scribe of H, who wrote *ὁ μάγος* (the great) for *ὁ μάγος*, and so also by Lucifer, if the *editio princeps* (of Tilius) is right in attributing the reading *magus* to him (the only MS of Lucifer at present known has *magus*). If Lucifer really wrote *magus*, this increases the suspicion that the other variants in Lucifer are in like manner arbitrary and unauthorised alterations of the text.

(c) In order to make out Elymas to be a translation of the name of the sorcerer, stress has been laid on the remarkable Peshitta rendering Barshuma for *Βαρῖσου*.

Already, in the seventeenth century, we find Castell (*Lec. Heptagl.* s. v. *ישו*) and Lightfoot (*Hor. Hebr.* ad loc.) interpreting *Βαρῖσου* as *filius vulneris*, and deriving Elymas from the Arabic *'alima*=*doluit* (*دلم*). Over and above the reasons to the contrary that have already been urged under (b), however, it has to be observed (see above) that a translation into Arabic would explain nothing to the readers; it would itself require to be explained. A somewhat different turn is given to the matter by Payne Smith (*Theas. Syr.* 598). Barshuma was in the first instance given in 7: 8 as a rendering of Elymas, and only later introduced by copyists also into 7: 6 in substitution for Barjesus in the erroneous belief that it was the man's proper name. But the Peshitta in its arbitrary change of text in 7: 6 (cf. *ad init.*) says precisely the opposite,—that Barshuma was the proper name, and Elymas the translation. It must, therefore, from the outset have held Barshuma to be a reproduction of the proper name Barjesus. Thus Barshuma probably means merely 'son of the name'; and 'the name' is most easily to be accounted for as a substitute for 'Jesus' from the feeling of reverence which we have already heard expressing itself in Beda (see above (b) β), a reverence similar to that shown by the Jews when they said 'the name' instead of 'Yahweh'.

(d) Van Manen, contrariwise (*Paulus* 1, Leyden, 1890, pp. 98 f. 147), holds Elymas to be the proper name, and interprets Barjesus in the Hebrew sense as meaning 'son of Jesus'—i.e., 'follower of Jesus'.

In this he assumes that the primary document here made use of by the author of Acts did not refer to the man as a Jew, or as a sorcerer, or as a false prophet; that it simply contained the information that at Paphos Paul came into opposition with one of the older and very conservative disciples of Jesus, and got the better of him with Sergius Paulus. This hypothesis admittedly departs so widely from the text of Acts that it is impossible to control it thereby.

(e) Dalman (*Gramm.* 129, n. 1 [94]) proposes a purely Greek explanation.

'Εὐμαῖος (so accented) he regards as contracted from *Εὐμαῖος* (on these contractions see NAMES, § 26 *ad fin.*). In *Ε* (except the Apocrypha) and NT, indeed, the Flamines are always *Ἐαυα*, *Ἐαυαῖται*; but with the Greeks the forms are as invariably *Ἐαυαῖος*, *Ἐαυαῖται*; so in *Tobit* 2 to Judith 14; 1 Macc. 6: 18 *Ἐαυαῖα*.

Philologically this derivation is the simplest of all; but it contributes nothing towards the solution of the riddle.

The failure of all the attempts enumerated above renders inevitable the suggestion that here the author of Acts has amalgamated two sources, one of which called the man Barjesus while sources? the other called him Elymas. Even

Klostermann, in order to explain the peculiar distribution of the names in 7: 6, seeks the aid of this hypothesis in addition to the hypotheses already referred to [above (b), beg.]. The addition, *ὄνομα γὰρ μεθερμηνεύεται ὁ ὄνομα αὐτοῦ* (for so is his name translated), however, would in any case be a very unskillful way of amalgamating the two sources unless *ὁ μάγος* (sorcerer), as suggested above, be deleted as a gloss. Still, if once it is agreed to assume two sources, a further and larger question arises: the question, namely, whether the addition itself be substantially right—that is to say, whether the one name be really a translation of the other. Nay, more: it is even conceivable that the two names do not denote the same person; that accounts relating to

1 So Nestle, in private letter to the present writer.

two different persons have been transferred to a single person. This inference is suggested also by the epithets applied; for, though it is not altogether inconceivable that a 'sorcerer' (μάγος) should be a 'false prophet' (ψευδοπροφήτης), the two ideas are widely different.

Of the critics mentioned in ACTS, § 11, who discuss our present passage with reference to the distinction of sources, only Spitta and B. Weiss regard 13-24 as all of one piece; Clemen and Hilgenfeld are convinced of the opposite, but make no definite suggestions as to separation of the portions; Sora and Jüngst derive 25-6/7 from a written source, nos. 1-12 from the pen of the redactor or from oral tradition. J. next further attributes to the redactor the word μάγος in 7. 6. Yet not even so are all the difficulties cleared up.

How far the narrative as a whole is to be accepted as historical becomes a serious question as soon as it has

3. Credibility of Narrative.

been traced to more than one source; but its credibility has been doubted even by Spitta, B. Weiss, and others, who defend its unity. As regards the miracle in particular, one is not only surprised by its suddenness, but is also at a loss to see its moral justification. On the other hand, a misunderstanding would account for it readily enough. A sorcerer, a false prophet—nay, any Jew (Acts 28:27)—is, in the judgment of the Christian, spiritually blind, and this is what Paul and Barnabas proved of Barjesus in their disputation with him. In being handed down by tradition this thought could easily undergo such a change as would lead to the representation that physical blindness had been brought on as a punishment by the words of Paul. On the other hand, one would expect the blindness, if it is to be regarded as merited, to be permanent, or, at least, would expect to be told of some reason for its subsequent removal, as, for example, that the sorcerer had ceased to withstand Paul and Barnabas, or even had become a convert to Christianity. It is very noticeable that the narrator shows but little interest in the subsequent history of the man. The conversion of the proconsul (not his existence; see ACTS, § 13 *ad fin.*) also is doubtful to many.

All the more does it now become incumbent to enquire whether the narrative reveals in any measure the tendencies discerned elsewhere in Acts.

4. Tendency.

(a) In the first place, and generally, it is clear that it has a place in the parallelism between Peter and Paul (ACTS, § 4), in respect alike of the miracle of chastisement, the confutation of a sorcerer, and the conversion of a high Roman officer (cp ACTS 5:1-10 8:18-24 10:1-48). It is also in harmony with that other tendency of Acts, to represent the Roman authority as friendly, and the Jews as hostile to Christianity (ACTS, § 5 (1); § 4 *ad init.*; compare very specially the Jewish exorcists in close relation to sorcery, ACTS 19:13-16).

(b) A conjecture of wider scope¹ connects itself with what is said of Simon Magus (see SIMON MAGUS). If Paul was the person originally intended in the story of Simon, then in Acts 8:9-24 we find attributed to him the one deed which used to be flung in his teeth by his Judaistic adversaries—that, by his great collections made in Macedonia and Achaia, he had sought to purchase at the hands of the original apostles that recognition of his equality with them which they had so persistently withheld. The romance of Simon Magus, however, of which we still possess large portions (see SIMON MAGUS), had for its main contents something different, viz., that the sorcerer had spread his false doctrines everywhere and supported them by miracles, but in one city after another was vanquished in dispute and excelled in miracle by Peter. Thus, apart from the repetition of the occurrence in many cities, we are

told of Barjesus in Acts 13:6-12 exactly what is told in the romance about Simon (that is, Paul), and of Paul exactly what is told in the romance about Peter. Hence the belief that in 13:6-12 we can discover the same purpose on the part of the author as we discover in 8:18-24. He was acquainted with the unfriendly allegation about Paul, did not believe it, and wished to set forth another view. In the two passages, however, the method is not the same. In 8:18-24 it is shown that Paul could not possibly have been the infamous sorcerer, inasmuch as Simon the sorcerer was a Samaritan and was quelled by Peter indeed, but before the conversion of Paul. In 13:6-12, on the other hand, it is shown that it was Paul himself who victoriously met a sorcerer of this kind. One of the reasons for this divergence is seen in the desire, already noted, to establish a close parallelism between Paul and Peter. It is believed possible also to explain on the same lines why in Acts 13:6-12 the scene is laid in Cyprus, with a Jew in the *entourage* of a high Roman officer as one of the *dramatis personae*. To Cyprus, according to Josephus (*Ant.* xx. 7.2, §§ 141-143), belonged the Jewish sorcerer Simon, who, at the instance of Felix of Judaea, procurator (*i.e.*, highest Roman officer), had induced Drusilla to quit her husband, King Azizus of Emesa, and marry Felix. The purpose of the narrator would have been sufficiently served had he been able to say that the sorcerer in question—Simon, to wit—under whose name the Judaisers imputed to Paul so much that was shameful, had been met and vanquished by Paul himself. That, however, was impossible; the tale had already been related of Peter. Accordingly (so it is supposed) the narrator found it necessary to give another name to the sorcerer worsted by Paul.

(c) His choice of the names Barjesus and Elymas is still unaccounted for. There is, therefore, a motive for our attributing a historical character to a certain other sorcerer, Barjesus (or Elymas), as well as to a Samaritan sorcerer named Simon. Although it is not easy to believe that Peter met the Samaritan Simon, there is no reason for assuming that Paul did not meet Barjesus. Indeed, it can easily be conceded that in Acts 13:6-12, just as in Acts 8:9-24, the author was not consciously giving a false complexion to what he had heard. He believed himself able to offer a material correction. He assumed, that is to say, that what the Judaisers were in the habit of relating of Simon the sorcerer, while really intending Paul and his opposition to the 'true' Gospel, rested in actual fact upon a mistaken identification with this Barjesus (or Elymas), and that the latter was vanquished not by Peter but by Paul. It is less easy to suppose that Cyprus was given by tradition as the scene of the occurrence. Even without any tradition, the name could be suggested by Josephus's mention of the native place of the Jewish sorcerer, and the name of Paphos would naturally present itself from the fact that the Roman proconsul had his residence there.

(d) The hypothesis has received developments to a point where we have to depend on less clear indications. If the accusations in Acts against Simon and Barjesus had originally been brought against Paul, what is said of the intimate relations of Barjesus with Sergius Paulus would belong to the same class. Now, in Acts 24:26, it is said that Felix often sent for Paul and communed with him. It is assumed that the Judaisers had gone so far as to allege that Paul had purchased the friendliness of Felix with money, or even, perhaps, to insinuate that he had been negotiator between Drusilla and Felix. It is to meet those accusations (so it is assumed) that the writer of Acts alludes to bribery by Paul as merely a hope on the part of Felix, and informs us that Paul had stirred Felix's conscience by a solemn 'reasoning' with him about his sinful marriage (24:25 *f.*).

(e) There are two more explicit indications that what we now read about Barjesus was originally told of Paul. Ἐχθρός, 'enemy,' the epithet applied by Paul to Bar-

¹ See for example, Hilgenfeld, *ZHT*, 1868, pp. 365-67; De Witte-Oberbeck on Acts 13:6-12; Lipsius, *Quellen der römischen Pseudepigraphen*, 1879, pp. 28, 32, also *PT*, 1876, p. 573; Holtzmann, *ZHT*, 1885, p. 431; and very specially Krenkel, *Josephus u. Lukas* 180-190 (194). Lipsius afterwards withdrew his earlier view; see *Apokryph. Ap.-gesch.* ii. 1 (87), p. 52; cp. 51, n. 2.

jesus (13 ro), is, with or without the substantive *ἀνθρώπος*, the standing designation for Simon (that is, Paul) in the pseudo-Clementine Homilies and Recognitions. The name, 'enemy of righteousness,' fits Paul and his doctrine of the abrogation of the Mosaic law through Christ (Rom. 10.4) all the more because his Judaistic opponents in Corinth came forward as 'servants of righteousness,' that is, men of strict observance of the law (2 Cor. 11.15). In that case, the temporary blinding of Barjesus will represent what befel Paul at his conversion; even the expressions *μὴ βλέπων* (without sight) and *χειραγωγούμενος* (leading by the hand) in 9.8 f. have their parallels in 13.11. Here, then, unless the whole hypothesis under consideration be rejected, we may say, with reasonable probability, that the blindness of Paul at his conversion (whether historical or not is immaterial) was originally represented by the Judaisers as a divine visitation for his hostility to the 'true' (that is, the legal) gospel, and that it was simply passed on by the author of Acts to Barjesus the Jew.

Whatever else be the result of what has been said in the present section, one thing at least is clear: it is impossible to reach a definite conclusion unless the tendency of the author is taken into account.

According to the *πρεβόδοι Βαρνάβα*—a legendary work composed by a Cyprian about 488—Barjesus opposed the work of Barnabas when, along with Mark

6. Later legends. (Acts 15.39), Barnabas visited Cyprus for a second time. He withstood him in various ways at his entrance into the cities where he desired to preach, and at last stirred up the Jews to burn him at the stake at Salamis. (Cp Lipsius, *Apokr. Ap.-gesch.* ii. 2, pp. 283-286 278 297.) P. W. S.

BAR-JONA. RV Bar-Jonah, the patronymic of Simon Peter (Mt. 16.17† *Βαρ Ἰωνᾶ* [Ti. WH]). See PETER.

Bar is a Gr. contraction of *βασιλεως* (cp Jn. 1.42 *Σίμων ὁ υἱὸς βασιλεως* [Ti.], 2.9 w. *βασιλεως* [WH]; 21.16 *Σ. βασιλεως* [Ti.], 2. *βασιλεως* [WH]; Elzev. etc. present *ἰωνᾶ*; see Var. Ebb.), which corresponds to an Aram. *ܒܪ ܝܘܢܐ*; cp B. Talm. *Hull.* 133 a, *Jalim. Berachot. Aram.* 142 n. 9, and see JOANNA.

BARKOS (בִּרְקֹס, § 82, *Βερκος* [L]). The B'ne Barkos, a family of NETHINIM in the great post-exilic list (see EZRA, ii. § 9), Ezra 2.53 (*ΒΑΡΚΟΥΣ* [B], -ΚΟC [A]) = *נְבִי* 7.55 (*ΒΑΡΚΟΥΕ* [BNA]), 1. om. = 1 Esd. 5.32, CHARCUS, RV BARCHUS (*ΒΑΧΟΥC* [B], *ΒΑΡΧΟΥΕ* [A]). The NETHINIM (*q. v.*) were mainly of foreign origin, and the name Barkos seems to be Aramaic and to signify 'son of the God Κος or Κaus.' The name of this god occurs in many theophorous proper names among the Northern Semites; we have Kaus-malak as king of Edom on an Assyrian inscription (Schr. *KAT* 150), Kosnathan (קוסנתן) in Euting's *Nabat. Inscr.* n. 12 l. 1, and a variety of Semitic names on Greek inscriptions from Egypt containing the same element (*Rev.-Archol.*, Feb. 1870, p. 109 ff.). Cp also the Edomite Kostobaros [Jos. *Ant.* xv. 79]. Names designating the worshipper as son of his god are common in Aramaic—e.g., the biblical BENHADAD [probably], the Palmyrene *ܒܪܒܘ*, 'son of Nebo' (cp BARNABAS, § 1) וְבִי בַרְשֵׁשׁ, 'sons of the son of the Sun-god,' the Syrian Bar-ba'smin, 'son of the lord of heaven,' Barlāhā, 'son of God,' etc. W. R. S.

BARLEY (בָּרֵיךְ, פִּטְעֵרִים, קריסה, קריסאי [BAL], Ex. 9.31 Lev. 27.16 Dt. 8.8 Judg. 7.13, etc.) was in biblical times one of the most characteristic products of Palestine (Dt. 8.8), regarded as one of the necessities of life (Joel 1.11). It comes second in the series of grains

1. Common use.

[*κοστωβαρος* may perhaps be a scribal error for *κοστωβαρος*—i.e., קוסטר, which finds a striking parallel in the name KAUS-gahri, an Edomite king mentioned on an inscription of Esarhaddon (cp Schr. *loc.*)]

The less common singular form is used for the growing crop. The name, which Hebrew has in common with Aramaic, but not with Arabic, is derived from a root meaning 'to be rough' or 'bristling.'

mentioned in Ez. (46) as ingredients to be used in bread-making—wheat, barley, beans, lentils, millet, and spelt (cp BREAD). It may be inferred from a variety of passages, such as Ru. 2.17 Jn. 6.9,13, that barley was, even during the times when it was cultivated along with wheat, the staple food of the poorer class (cp FOOD). Such a reference as that in 1 K. 4.28 (58) shows us how largely it was used to feed horses and cattle.¹ It may also be gathered from the part played by the barley-cake in the dream of the Medianite, overheard by Gideon (Judg. 7.13), where it stands as a type of the Israelite peasant army, that as in other countries, so in Palestine, the cultivation of barley preceded that of wheat, and was the earliest stage in the transition from a nomadic to an agricultural life.² (Cp Pl. *HN* xviii. 72, 'antiquissimum in cibus hordeum.') This, on the whole, more probable than the view of Jos. (*Ant.* v. 6.4), which has been very generally accepted, that barley-cake represented the *feebleness* of Gideon's three hundred, and we are entitled to conclude that there was a time when barley was the staple food of all classes among the Israelites. The fact referred to in Ex. 9.31 f., that in Egypt barley ripens some time earlier than wheat, is supported by the testimony of Pliny (*HN* xviii. 106) as well as of modern writers (see references in Di. *ad loc.*).

In the single case in which the use of barley is prescribed in an offering under the ritual law (see JEALOUSY,

2. Ritual. ORDEAL OF, § 2), it is somewhat difficult to determine the reason. Some (e.g., Bahr, *Symbolik*, 2.445) have regarded it as expressive of the sordid nature of the alleged offence and the humiliation of the accused³ (a wife suspected of adultery). A reason which has recently found more acceptance is that in the case of a simple appeal to God for a judicial decision a less valuable offering was sufficient than was requisite when a suppliant besought God for the bestowal or continuance of his divine grace⁴ (Di. on Nu. 5.11, etc.). The prohibition to mingle oil or frankincense with the offering will, of course, receive a similar explanation.

Two-rowed barley (*Hordeum distichon*), which may be presumed to be the feral form, is a native of W. Asia. It may have been cultivated by

3. Variety. Semic races; but it is not represented on Egyptian monuments. The kind most frequently cultivated in antiquity was six-rowed barley (*Hordeum hexastichon*). This occurs on the most ancient Egyptian monuments and on the coins of Metapontum six centuries B.C. It was no doubt derived by cultivation from the two-rowed kind (cp De Candolle, *Orig.* (2) 294-297, and authorities quoted there).

The word 'gerah' (Ex. 30.13) is defined by Rabbinical writers as equal to sixteen barley-corns⁵; but see WEIGHTS AND MEASURES. N. M.—W. T. T.-D.

BARN (בִּרְנֵיךְ), Hag. 2.9; see AGRICULTURE, § 10. Also for Job 39.12 (בִּרְנֵי) and (AV BARNFLOOR) 2 K. 6.27, RV correctly 'threshing floor.'

BARNABAS (ΒΑΡΝΑΒΑΣ [Ti. WH]; § 48), otherwise JOSEPH (or JOSES).

According to the author of Acts (4.36), the name Barnabas (= υἱὸς παρακλησεως) is derived from the Aram. *ܒܪ ܢܒܐ* (son) and the same root as the Heb. *בָּרַךְ*, *פְּרֹפְרֵת*—the

1. Name. duty of *παρακλησις* ('address, exhortation'), according to 1 Cor. 14.3, and also according to Acts 15.31 f., being one of the duties of the *προφήτης*. When more

¹ So in the *Physiologus* (Land, *Anecd. Syr.* 4.24 f., cited by Lew. 277) barley is called the food of cattle as opposed to wheat the food of man.

² Cp, especially, the parallel cited by Budde (*ZDPV* 18.93) from Radloff's *Aus Sibirien*, 1.329. Cp also Moore on the passage.

³ It is noteworthy that barley formed part of the price paid by Hosea to redeem his adulterous wife (Hos. 3.2); but this may be a mere coincidence.

⁴ See, especially, the full discussion by Nowack (*Arch.* 2.249 ff.), who agrees with Dillmann's view, and points out that the offering in question is neither a sin-offering nor a guilt-offering in the ritualistic sense.

closely examined, however, this etymology is not without its difficulties. It combines words from two different languages, and its assumption fails to account for the form $\beta\alpha\rho\nu\beta\alpha\sigma$. Klotzmann (*Ursprung des Apostelnamens*, 1882, pp. 8-14) seeks to derive the meaning $\beta\alpha\rho\nu\beta\alpha\sigma$ from the Aramaic $\beta\alpha\rho\nu\beta\alpha$, *Baris quietus*, but finds in it no further reference than to the satisfaction which Barnabas caused to the apostles by becoming a convert to Christianity. Dalman's etymology (*Gram. d. jüd.-paläst. Aramaisch.*, 1894, p. 149), which makes $\beta\alpha\rho\nu\beta\alpha\sigma$ a rendering of $\beta\alpha\rho\nu\beta$, this last being an abbreviation (not elsewhere met with) of a proper name $\beta\alpha\rho\nu\beta$ or $\beta\alpha\rho\nu\beta$, takes us very far from the form to be explained. Deissmann comes nearer the sound when (*Bibelstudien*, 179-181 [1881]; *Neue Bibelstudien*, 15-17 [1891]) he compares the Barnebo ($\beta\alpha\rho\nu\beta$) of a Palmyrene inscription of the year 114 A.D. (see De Vogüé, *La Syrie Centrale*, tom. 7), and the Semitic $\beta\alpha\rho\nu\beta\alpha\sigma$ (son of Nebo) on a North Syrian inscription of the third or fourth century A.D. (In Is. 46:1, as also in $\beta\alpha\rho\nu\beta\alpha\sigma$, $\beta\alpha\rho\nu\beta\alpha\sigma$, $\beta\alpha\rho\nu\beta\alpha\sigma$, Nebo is translated into Greek with α instead of ϵ , and the termination $\alpha\epsilon$ may possibly have been substituted for $\epsilon\omega\varsigma$ with the view of disguising the name of the heathen divinity. (For examples of such a custom, see Winer, *Gramm. d. N. Testaments Sprachlehre*, § 13 274.) On this theory, the rendering $\beta\alpha\rho\nu\beta\alpha\sigma$ is merely a piece of popular etymology. Nestle (*Ursprung des N.*, 1896, p. 19 f.) is inclined to take the Syr. $\beta\alpha\rho\nu\beta$, which signifies $\beta\alpha\rho\nu\beta\alpha\sigma$, as the starting-point of the etymological interpretation; but he refrains from explaining more minutely the structure of the form.

If Joseph really did first receive the surname of Barnabas from the apostles, this seems to have been on account of his distinction as a speaker. In this respect, however, the author of Acts (13:15, 16, 14:19) invariably subordinates him at least to Paul. Many Jews, with a view to their dealings with Greeks and Romans, assumed in addition to their Jewish name a Greek (or Latin) or at least Greek-sounding surname (e.g., Acts 13:12-25, 13:19, Col. 4:11, and $\beta\alpha\rho\nu\beta\alpha\sigma$); and it may at least be asked whether this cannot perhaps have been the case with Barnabas also (see NAMES, §§ 48, 84).

According to the Epistle to the Galatians (our primary source), Barnabas was a companion of Paul in his missionary journeys for at least some time before the council of Jerusalem. In the council he joined Paul in supporting the immunity of Gentile Christians from the Mosaic Law (Gal. 2:19), which makes it all the more surprising that he afterwards retreated from the position he had taken long before, that a Jewish Christian was at liberty to eat at the same table with a brother Gentile freed from the law (Gal. 2:13). As in the case of Peter, so also in that of Barnabas, the reproach of hypocrisy hurled at both by Paul on this account may safely be toned down into one of inconsistency (see COUNCIL OF JERUSALEM, § 3). In point of fact, Barnabas had shaken off the Mosaic law; but he had never thought out all the bearings of the step so fully as to be able to vindicate it when the venerable and sacred duty of observing the whole law was so authoritatively pressed upon him. From this date it was, of course, no longer possible for him to work along with Paul on the same lines; and thus the dispute at Antioch more than sufficiently explains why the two separated. The mention of Barnabas in 1 Cor. 9:6 only proves that at that time also he was a prominent missionary, and that he held to the Pauline principle of supporting himself by his own labour; it is no evidence that he was personally known to the Corinthians, or that he had again become one of the companions of Paul.

In the Acts of the Apostles the separation of Barnabas from Paul is explained as due not to a difference on a matter of principle, but to a personal

3. In Acts. question; Barnabas wished to take John Mark—a near relation of his, according to Col. 4:10—as companion on a second journey planned by Paul and himself; but Paul objected, because on a previous occasion (Acts 13:13) Mark had left them in the lurch

(Acts 15:36-39). Even if this be accepted as a historical explanation (and we have no means of controlling it), it cannot be said to have been the chief one (see above, § 2); as to which Acts (see ACTS, §§ 4, 6) is scrupulously silent. In virtue of the intermediate position,—as between Pauline and Jewish Christianity,—which was held, as we have seen, by Barnabas, he is admirably fitted for a mediating rôle in Acts. Although a native of Cyprus, he is regarded as a member of the church of Jerusalem (13:5f.; on the sale of his estate, see COMMUNITY OF GOODS, §§ 1, 5); it is he who negotiates Paul's admission to that church (9:27); it is on that church's commission that he inspects the church which had been founded by dispersed Christians at Antioch in Syria (11:22-24); it is he who fetches Paul to Antioch from Tarsus and introduces him to his field of work (11:25f.), and he also is the apostle's travelling companion when the collection for the poor Christians there is being brought to Jerusalem (11:30, 12:25); as in this case, so also in the so-called first missionary journey, undertaken along with Paul through Cyprus and the south of Asia Minor, his name is placed first, at least till 13:7, and then again in 14:14 and even 15:22-25. All this is not easy to reconcile with Paul's well-known independence as shown in his letters; but the journey in Acts 11:30, 12:25 must also on other grounds be pronounced unhistorical (see COUNCIL OF JERUSALEM, § 1), and the rest of what is related in Acts 11 is inconsistent with the order $\tau\omega\varsigma$ $\beta\alpha\rho\nu\beta\alpha\sigma$ $\kappa\alpha\iota$ $\tau\omega\varsigma$ $\beta\alpha\rho\nu\beta\alpha\sigma$ in Gal. 1:21, as is the rest of what we read in Acts 9 with Gal. 1:15-20 (cp ACTS, § 4, and, for the doubtfulness of the contents of Acts 13 f., and the probability of a Barnabas source there, §§ 13 and 10). But, although the object of the narrative in Acts is inconsistent with history in as far as it seeks to suggest that the missionary activity of Paul among the Gentiles was no departure from the views of the primitive church,—that on the contrary it was authorised and even set on foot by it,—we may without hesitation accept as historical (see ACTS, § 4) not only the co-operation of Barnabas with Paul shortly before and at the Council at Jerusalem, which is vouched for by the Epistle to the Galatians, but also the part which he took in the first missionary journey (Acts 13 f.), and even perhaps in Paul's introduction to Jerusalem (of course according to Gal. 1:18 f.) at his first visit to that city three years after his conversion. We may also accept in all probability the second journey of Barnabas to Cyprus in company with Mark (Acts 15:39). From this point his name disappears from the NT.

Our later notices of him are of little value. According to Clem. Al. (*Strom.* ii. 20, § 116; cp Eus. *HE*

ii. 14), he was one of the Seventy of Lk. 10:1; **4. Later notices.** in the frankly anti-Pauline *Clem. Homilies* (i. 9-16), which date from the end of the second or the beginning of the third century—or rather, in the sources from which these Homilies were drawn—he was a personal disciple of Jesus, Palestinian by origin, but Alexandrian by residence, a strict adherent of the law; according to *Hom.* i. 8, ii. 4, Clement meets him in Alexandria, but in *Clem. Recog.* (17) the meeting was in Rome. According to this presumably earlier (but none the less unhistorical) representation, he proclaimed the gospel in Rome even during the lifetime of Jesus, and therefore before Peter. In *Hom.* 1:7 this statement is made only of some person who is left unnamed, and later means were found for the complete suppression or any such tradition, so full of danger to the authority of Peter and his alleged successors. From the fifth century onwards its place was taken by the statement that Barnabas was founder and bishop of the Church of Milan—a statement, however, accompanied by the clause, 'after he had been the first to preach the gospel in Rome.' It was upon this allegation that the archbishops of Milan afterwards based their claims to metropolitan authority over the

1 In *Die Worte J.*, 32 (98), Dalman comes over to Deissmann's view, which is also ably defended by G. B. Gray, *Exp. Times*, Feb. 1890, p. 252 f. Cp also Arnold Meyer, *Jesus Muttersprache*, 47 f. (96).

whole of Northern and part of Central Italy. In the interests of Roman supremacy (which had originally been helped by it), the allegation was violently disputed by Roman theologians of the eighteenth century.

In complete independence of the Roman and Milanese tradition, there arose, after 431 A.D., the legend that Barnabas had been the missionary to his native island of Cyprus, and had suffered martyrdom at Salamis, where he was buried. On this plea the Cyprian church, between 485 and 488 A.D., obtained from the Emperor Zeno its independence of the Patriarchate of Antioch. The implied assumption is that Barnabas was an apostle in the full sense of the word.

Ecclesiastical writers often substitute him for Barsabbas (Acts 1:23; cp BARSABAS, § 2), perhaps on account of the name Joseph, common to both (the Sahidic and Philonenic versions have, on the other hand, *Joses* in both cases, and there are isolated authorities for Barnabas alone), but perhaps in order to bring him nearer the apostolic circle. This object is effected in a more pronounced way by *Clem. Recog.* (1:66), which identifies him with Matthias (Acts 1:26). There is an isolated notice in the (Gnostic) *Actus Petri Vercellenses* to the effect that Barnabas was sent along with Timothy to Macedonia before Paul's journey to Spain. Cp. Lipsius, *Apokr. Ap.-gesch.* ii. 2, pp. 270-320 (especially 310), 260, 373.

Tertullian's claim of the authorship of the Epistle to the Hebrews for Barnabas is quite inadmissible. It is difficult to attribute to a born Levite (Acts 4:36) such grave errors about the temple (or tabernacle) as occur in Heb. 9:3 f. 7:27; or to any member of the primitive church of Jerusalem any such declaration as that in Heb. 2:3, that he had first received the gospel at second hand through hearers of Jesus. Nor is such an origin consistent with the thoroughly Alexandrian character of the Epistle. Even, however, if we must refrain from basing any argument on the statements about Barnabas in Acts 4:36, we are still confronted by a decisive fact: the man who at a critical moment was so much subject to the Mosaic law (Gal. 2:13), could not have spoken of its abolition and even of its carnal character, as the writer of the Epistle to the Hebrews speaks in 7:12:18:16. Doubtless the Epistle to the Hebrews was attributed to Barnabas because it was supposed that the λόγος τῆς παρακλήσεως of Heb. 13:22 could only have come from the υἱὸς παρακλήσεως of Acts 4:36.

That Barnabas should have written the anonymous epistle which since the time of Clement of Alexandria has borne his name, and on that account has been included among the writings of the 'apostolic fathers,' is still more inconceivable than his authorship of the Epistle to the Hebrews. It goes far beyond Paul in its assertion of freedom from the law. As to its date, see under ACTS (§ 16). P. W. S.

BARODIS (ΒΑΡΩΔΙΣ [BA]), a group of children of Solomon's servants (see NETHIIM) in the great post-exilic list (EZRA, ii. §§ 9 8 c. 15 a), one of the eight inserted in 1 Esd. 5:34 (om. 6^b) after Pochereth-hazzebaim of Ezra 2:57 = Neh. 7:59.

BARREL (בַּר יָדְרִיָּא [BAL]; 1 K. 17:12:14:16:18:33). See COOKING UTENSILS, § 2; POTTERY.

BARRICADE (בְּרִיָּקָה), 1 S. 17:20 RV^{mg}. See CAMP, § 1.

BARSABAS or **BARSABBAS** (§§ 48, 72). The etymology is doubtful. *Βαρσαβας* has been derived

from בָּר ('son') and אֲבָהּ or אָבָה ('Sheba,' 1. Name. —which, however, as far as we know, is always the name of a country, never of a person), from בַּר and צַבָּה (= 'warrior'; cp Nu. 31:53), or from בָּר and אָבָה ('old man's son'). *Βαρσαββας* ([Ti. WH] the better attested form of the name) suggests 'child of the

Sabbath.' Dalman (*Gram. d. jüd.-paläst. Aramäisch*, 1894, p. 143) instances analogies to show that אָבָהּ or אֲבָהּ could by contraction become אָבָהּ, though אֲבָהּ בָּר is what we should more naturally expect in such a case.

1. Joseph Barsabbas, surnamed Justus (Ἰούστος [Ti. WH]), was nominated, though not chosen, for the 2. Joseph. vacancy in the apostolate caused by the death of Judas. The account of the election in Acts 1:15-26 could not be held to be historical if we regarded the number twelve for the original apostolate as having been fixed, and invested with special dignity, only after the controversy as to Paul's equality in privilege with the apostles of Jerusalem. But even were we to set aside the reference to the δώδεκα in 1 Cor. 15:5, as being unparalleled elsewhere in the Pauline writings, we should still be at a loss to explain why Paul never vigorously protested against an innovation—if innovation it was—so arbitrary and so derogatory to his own position. Occasion enough for doing so presented itself in Gal. 2 and 2 Cor. 10-13. We must, accordingly, ascribe to Jesus himself the choice of twelve of his disciples who stood in peculiarly close relations to their Master. But in that case it was very natural that these should seek to keep up their number—that of the twelve tribes of Israel.

Whether the election was in Jerusalem is more open to question. On the arrest of Jesus all the disciples, according to Mk. 14:50 Mt. 26:56, had taken to flight, and that they should have returned to Jerusalem so soon is not likely. The view of Lk. and Jn., according to which they are present in Jerusalem on the day of the resurrection of Jesus (and remain there), cannot be reconciled with what we are told by Mk. and Mt.; the explanation is that the third and fourth evangelists found the statement of the first and second incredible. According to this last, Jesus, in Jerusalem, through the women, sends the disciples, who are also in Jerusalem, to Galilee, in order that he may there show himself to them. The kernel of historical fact, however, is not as Lk. and Jn. have it, but the reverse: namely, that the apostles were not in Jerusalem at all, but in Galilee, and thus in Galilee received the manifestations of their risen Lord. It may even be questioned whether they were again in Jerusalem and able to come forward publicly and unopposed so early as at the following Pentecost (see GIFTS, SPIRITUAL).

In a still higher degree must the discourse of Peter in Acts 1:16-22 be regarded as entirely the work of the author (see ACTS, § 14).

Instead of Ἰωσήφ in Acts 1:23, there is some (though inferior) authority for Ἰωσῆς, a reading due perhaps to a conjecture that the 'brethren of Jesus' named in Mk. 6:3 were of the number of the Twelve; the same conjecture, if in Acts 1:23 the reading Ἰωσήφ be retained, appears to find support in the fact that in Mt. 13:55 the brother of Jesus in question is called, not as in Mk. 6:3 Ἰωσῆς, but according to the best MSS Ἰωσήφ. The assumption, however, is quite inadmissible (see CLOPAS, §§ 4, 5).

According to Papias (Eus. HE iii. 39 9), Justus Barsabbas drank deadly poison with impunity. From the fifth century onwards he is named as one of the seventy of Lk. 10:1; in the list of these preserved in *Chron. Pasch.* (Bonn ed. i. 400) he is identified with Thaddæus = Lebbaeus; in that of Pseudo-Dorotheus (ib. ii. 128), with Jesus Justus (Col. 4:11), to whom the see of Eleutheropolis is assigned. In the *Passio Pauli* (attributed to Linus, but really dating from the 5th or 6th cent.) 'Barsabbas et Justus,' in another redaction 'Barzbas Justus,' and in a third ὁ Βαρσαββας Ἰούστος, are enumerated among servants of Nero who, converted by Paul, are cast into prison and condemned to death by the emperor, but afterwards released after an appearance of the risen Paul to the latter. The identification of this Justus with the biblical Barsabbas seems to have

by the Jewish exiles to Jerusalem (114), which they cite at full length in the following section (115-38), is or is not identical with 'the book' written by Baruch. Moreover, the historical situation described in the narrative (13-13) does not agree very well with the subsequent portion, since the narrative assumes the continued existence of the temple, whereas 226 implies its destruction. Finally, the discourse which occupies all the latter half of the book begins quite abruptly and stands in no definite relation to what precedes: it presupposes, indeed, the dispersion of Israel; but to Baruch and to the special circumstances of the *Babylonian* captivity there is no allusion.

To these general considerations may be added several difficulties of detail. The date given in 12 is so obscurely worded that several modern commentators (*e.g.*, Ewald and Kneucker) have felt obliged to emend the text. Even if the omission of the month be explained, we still have to decide whether 'the fifth year' means the fifth year of Jeconiah's captivity or the fifth year after the burning of Jerusalem; and to both views there are serious objections. Chap. 18 disturbs the sense, and if it be genuine must originally have stood in some other place.

Though the Book of Baruch never formed part of the Hebrew Canon (for which reason Jerome excluded it from his Latin translation of the Bible), it

3. Origin. was regarded as authentic by many of the Christian fathers, from the second century onwards. Sometimes, owing to the place which it occupies in the LXX, it is cited as a part of Jeremiah. Even in quite recent times, it has been maintained by Roman Catholic theologians that the book is a translation of a genuine work of the well-known Baruch, the friend and secretary of the prophet Jeremiah. All competent critics, however, have long ago concluded that it dates from a very much later period, and belongs to the large class of Jewish books which were put forth under false names. Its origin and history remain, however, in some respects obscure. That 115-38 and 39-59 are by different authors is generally acknowledged: both in substance and in style there is a marked contrast, the language of the former section being simple and full of Hebraisms, while that of the latter is highly rhetorical. The dates of the various parts, however, and the question whether the whole or any part was originally written in Hebrew are matters about which critics differ.

Ewald ascribed the first half (11-38) to a Jew living in Babylonia or Persia under one of the latter Achaemenian kings, and regarded the rest of the book as having been written soon after the capture of Jerusalem by Ptolemy Soter (320 B.C.); 432 Ewald explained as a reference to the deportation of Jews to Alexandria. Very few critics, however, are now in favour of so early a date. Kneucker thinks that the work, in its original form, was composed in the reign of Domitian, and consisted of only the heading (*i.e.*, 112 in part, 3), and the discourse contained in 39-59; the confession of sin (115-38) was, according to Kneucker, probably written a little earlier (in any case after the year 73 of our era) as an independent work, and was subsequently inserted into the Book of Baruch by a scribe, who himself composed 14-14. Schürer, on the contrary, whilst admitting that the middle of chap. 1 does not harmonise very well with what precedes and follows, thinks it on the whole probable that all the first half of the book (11-38) is by the same author, whom he places soon after the destruction of Jerusalem (70 A.D.), the second half being by a different hand but of about the same period. With regard to the original language, Ewald, Kneucker, and others believe the whole to be a translation from the Hebrew, whilst Berthold, Hävernick, and Nöldeke regard the Greek as the primitive text. Fritzsche, Hilgenfeld, Reuss, and Schürer maintain the theory of a primitive Hebrew text in the case of the first half only. In favour of this hypothesis, it may be mentioned that on the margin of

the Syro-Hexaplar text of Baruch there are three notes by a scribe stating that certain words in 117 and 23 are 'not found in the Hebrew' (cp APOCRYPHA, § 6 (3)).

As to the question of historical credibility, it is obvious that if, with the majority of critics, we ascribe the book

4. Historical value. to the Roman period, its value as a record

of facts is reduced to nothing. Whether, for example, the statements about Baruch's residence in Babylon, the river *Σοδδ*, and the priest Jehoiakim are based upon any really ancient tradition it is impossible for us to decide. The author of the first half borrows largely from Jeremiah and from Daniel; in the second half we find many reminiscences of Job and of the latter part of Isaiah; and it may be that sources now lost also were employed. It is particularly important to observe that the closing passage (436-59) bears a striking resemblance to one of the pieces in the so-called 'Psalms of Solomon' (Ps. 11—see the edition of Ryle and James, pp. lxxii-lxxiv.), which probably date from about the middle of the first century B.C. Since there is every reason to believe that the Psalms of Solomon were originally composed in Hebrew (cp APOCALYPTIC, § 83), the close verbal agreement seems to indicate that the author of this part of Baruch used the Psalms of Solomon in their present Greek form.

The most important of the MSS containing the Greek text of Baruch are A, and the Marcianus (D). In B the book is missing. Fritzsche's edition of the Apocrypha

5. Text and comm. (*Librorum apocryphorum testamento*, 1872) does not accurately represent the B text, but

Baruch; but trustworthy information about this MS may be obtained from Swete's *Apocrypha*, B, in the preparation of which the photographic reproduction of B was used.

The ancient versions are—(1) the old Latin, contained in the editions of the Vg.; (2) another Latin version, first published at Rome in 1688 by Joseph Maria a Carlo Tommasi; (3) the Old Syriac, ed. by Paul de Lagarde in his *7. tome des livres apocryphes*, 1892; (4) the Syro-Hexaplar, as the Syriac translation of Origen's Hexaplar text (contained in the *Coexa* Ambrosiana), which was reproduced in photo-lithography by Ceriani in 1871; (5) the Ethiopic version, taken from the text—ed. by Dillmann (Berlin 1874) in the 5th vol. of his *Vertrag*; (6) the Armenian, as in the Armenian version of the text which is contained in the Armenian Bible published at Venice in 1825; (7) the Coptic, edited by Brugsch in *Z. A. S.*, xii.

Of modern commentaries the most valuable are those of Fritzsche (in *Kurzgef. Handb.*, 1851), Reusch (*Erklärung des Buchs Baruch*, 1883), Ewald (*Propheten des alten Testaments*, iii, 1867-68), Kneucker (*Das Buch Baruch*, 1879), and Gifford (in Wace's *Apocrypha*, 1888). The best general account of the book will be found in Schürer (*Gal.*, 1886-90, ii, pp. 723-726, ET). The reader may consult also Berthold (*Einführung*, 1812-19, pt. iv), Hävernick (*De libro Baruch commentatio critica*, 1843), Hitzig (in *ZWT* 3 262-272), Hilgenfeld (*ibid.*, 5 199-203, 22437-454, 2412-422), Nöldeke (*ATLische Lit.*, 1868, p. 214 B.), Reuss (*Gesch. d. biblischen Schriften*, 1853, 1860), and the article on this book in Smith's *DB*, (2) 1893—an article valuable chiefly on account of the additions made by Prof. Ryle.

In many MSS and printed editions the apocryphal *Epistle of Jeremiah* is appended to Baruch, and it is reckoned in the Vg. as the sixth chapter of the book. The Book

6. Appendices. of Baruch is not to be confounded with the *Apocrypha of Baruch* (see APOCALYPTIC LITERATURE, § 5 ff.). The work known as 'The Rest of the words of Baruch,' extant in Greek, Ethiopic, and Armenian, seems to be a Christian imitation of the Apocalypse of Baruch.

We possess, moreover, a third apocalypse of Baruch extant in Greek and in Slavonic, and a fourth extant only in Ethiopic. The Greek text of the former has been published by James in his *Apocrypha of the ancient sacred scriptures* (1871) (*Texts and studies*, vol. 5, no. 1), where some information will be found also about the Ethiopic apocalypse (lii). A. A. B.

BARZILLAI (בַּרְזַי: ΒΕΡΖΕΛΛΑΙ[Ε]) [B̄N̄A]L̄. The meaning can scarcely be 'iron,' for such a name would be without a parallel. According to Nestle (*ZDPV* 1555; cp Kampfmeyer, *ib.* 9), the name is Aramaic ('son of —?'); but the latter part of it is still obscure.

1. A wealthy Gileadite of Rōgglim, who befriended David in his flight from Absalom at Mahanaim (2 S. 17:27). He refused David's offer to live at the court at Jerusalem, but entrusted to him his son CHIMHAM

(*q.v.*; 2 S. 19.32ff.). David on his death recommended the sons of Barzillai to Solomon (1 K. 2).

2. A Gileadite (see (3)), Ezra 2 61 (Ἐφραθάι[ε] [B], -λααί [A]) = Neh. 7 61b (-λααί [A]) = Est. 5 38 b (ΒΑΣΙΛΕΥΣ, RV ΖΩΡΑΒΕΛΕΥΣ, RV 96b ΠΡΩΤΟΖΕΛΕΥΣ; φασῆδατοι; φασῆδατοι [A], φασῆδατοι [A]).

3. A man who married one of the daughters of (2) and changed his name to Barzillai.¹ In post-exilic times the b'ne Barzillai were among those deposed from the priesthood because they were unable to prove their pedigree. In 1 Esd. 5 38 the original name of the founder of the family is said to have been JADDUS, AV ADDUS (ἀδδους [B], ἰδδ[.], [A])—i.e., Jaddua (cp Jos. Ant. xi. 8.4; ἰδδους);—but in the parallel passages he is simply called Barzillai; Ezra 2 61a (φασῆδατοι [B], φασῆδατοι [A]) = Neh. 7 61a (φασῆδατοι [A]), and so 1. in 1 Esd. 5 38 (φασῆδατοι). The same passage gives ΑΒΕΛΙΑ as the name of his wife.

4. A man of Abel-meholah (not far, therefore, from Gilead), whose son ADRIEL (*q.v.*) also has been thought to bear an Aramaic name (2 S. 21 9).

BASALOTH (Βαδαλωθ [A]), 1 Esd. 5 31 = Ezra 2 52, BAZLU'ITH, *q.v.*

BASCAMA (Βασκάμα [ANV]; Βασκά, Jos. Ant. xiii. 6), an unknown place, in Gilead, where Jonathan the Maccabee was put to death by Trypho (1 Macc. 13 23). Furrer's identification (ZDPV 12 151) with *Tell-Bitauk* on the W. Goramāyā (to the E. of the extreme N. of Lake Tiberias) is precarious (see Buhl, *Pal.* 241). Equally unsubstantiated is the identification with BEZEK, i.

BASE. For בִּסְנָה, בִּסְנָה, *m'k'hōnāh*, the word employed to denote the structure upon which each of Solomon's towers rested (1 K. 7 27 f., 29 29, 31 7 f., 32 f.; 2 K. 16 17 21 17 = Ch. 411, μεγάρων [sing. and pl.], Jer. 27 13 14 15 om. BR, μεγάρων [Theol.]; Jer. 52 17 Βασε [BNQT]), see LAVER; also for 77. *hōn*, Ex. 31 6 etc., RV [AV 'hōn]. For 77. *hōn*, Ex. 27 21 27 17 RV [AV 'haft'], see CASHIERICK, § 2, n. 3; and for 22. *gōb*, Ezek. 43 13, see ALTAH, § 11.

BASEMATH (בִּסְמַת), Gen. 36 3 RV; AV BASHE-MATH.

BASEMENT (הַבַּיִת), Ez. 41 3 RV. See GARBATHA, PAVEMENT.

BASHAN (בָּשָׁן), always in prose [except 1 Ch. 5 23], and sometimes also in poetry, with the art. בָּשָׁן: the

1. **Name**. appellative sense of the word, to judge from the Arab. *buthainat*^m, was probably 'fertile, rich and stoneless soil': see Wetzstein, in Del. *Hib.* 2^o [App.], 550 f.; ὄμβρ. βασαν or ἡ βασανείρις, the name of the broad and fertile tract of country on the E. of Jordan, bounded (somewhat roughly) on the S. by the Yarmūk and a line passing through Edre' and Salchah (mentioned as border cities in Dt. 3 10), on the E. by the imposing range of extinct volcanoes called the Jebel Haurān, on the W. by Geshur and Ma'acah (see Josh. 12 5), and on the N. stretching out towards Hermon (cp Dt. 33 22: see further, on the limits of Bashan, Guthe, *ZDPV*, 1890, pp. 231-4). The name (in its Gk. form *Baravaia*,² and its Arabic form *Bathaniyeh*³) was, however, afterwards restricted to the southern portion of the area thus defined, other parts of the ancient 'Bashan' being distinguished as TRACHONITIS (*q.v.*)—i.e., the remarkable pear-shaped volcanic formation in the NE. now called the Lejā—Auranitis (probably the Jebel Haurān and its environs in the SE.), and Gaulanitis (which, however, may have included parts of Geshur and Ma'acah, beyond the limits of Bashan proper) in the West. The principal part of the Bashan of the OT must have been the broad rolling prairie now called by the Bedawīn *en-Nukra*, a word properly denoting the 'hollow hearth' dug by the Bedawī in the middle of his tent, and applied to this great plain because, though it is

some 1800-2000 ft. above the level of the sea, it forms a depression between the hilly Jaulān (across the Nahr er-Rukḡād) on the W., the Zumleh range on the S., and the Jebel Haurān and the Lejā on the E.:¹ the S. and SE. part of *en-Nukra* also bears the special name of HAUKAN (*q.v.*).

Bashan, as defined above, is distinguished geologically from the country S. of it. The Yarmūk forms a natural

2. **Character**. dividing line, on the S. of which the limestone comes to the surface, while on the N. it is covered by volcanic deposits. Jebel Haurān, on the SE., is simply a range of extinct volcanoes; volcanic peaks extend from N. to S. in Jaulān, along the edge of the Jordan valley, on the W.;² and there are isolated volcanic hills in other parts of the country. The Lejā, that strange 'petrified ocean' NW. of the Jebel Haurān, which measures some 25 m. from N. to S. by 19 m. from E. to W. (see TRACHONITIS), owes its origin entirely to streams of basaltic lava emitted from the Garārāt el-Kibilyūh, a now extinct volcano at the NW. corner of the Jebel Haurān. The soil both of the slopes of the Jebel Haurān and of the Nukra is a rich red loam,³ formed by the lava scoria, which has become disintegrated under atmospheric action. The soil thus constituted is celebrated for its fertility: the best corn grows upon it, and in summer time the plain is covered far and wide with waving crops. The country is, however, in general almost entirely destitute of trees: only on the slopes of Jebel Haurān, especially in its central and southern parts, are there abundant forests of evergreen oak⁴ (cp the allusions to the 'oaks of Bashan' in the OT: Is. 2 13 Zech. 11 2 Ez. 27 6, also Is. 33 9 (ἄ ἡ Γα[ε]λάα), Nah. 1 4). In ancient times, also, it must have supplied rich pastures: the strong and well-nourished herds of Bashan are mentioned in Ps. 22 14 [c.] (ἄ ὀμις) Am. 4 1 Ez. 39 18 (ἄ ὀμις) Dt. 32 14 (ἄ ταιῶν); cp also Mic. 7 14 Jer. 50 10 (ἄ ὀμις). The lofty conical summits of the volcanoes forming the Haurān range (cp Porter, 183, 186, 190, 227, 250) are no doubt the 'mountains with peaks,' which the poet of Ps. 63 16 f. [15 f.] pictures as looking enviously at the comparatively unimposing mountain of Zion.

The principal towns of Bashan mentioned in the OT are the two royal cities of 'Og (Dt. 14 Josh. 12 4 βασι

3. **Towns**. [B]), 'ASHTAROTH, now probably either Tell 'Ashtērā or Tell 'Ashari, in the middle of *en-Nukra*, and EDIR'ē, now Der'at, on its S. border, GO'AN (Dt. 4 43), somewhere in the W., and SALCHAH (Dt. 3 10), now Salchad, a frontier-fortress in a commanding position overlooking the desert in the SE. corner of Bashan, S. of Jebel Haurān. Bosra, between Edre' and Salchah, though not mentioned till 1 Macc. 5 26 ff. (βασορ [ANV*]; but see BOSOR), was, no doubt, an important place: the site is still marked by extensive remains belonging to the Roman age. 'Threescore fenced cities, with high walls, gates and bars,' forming the kingdom of 'Og, are likewise mentioned in Dt. 3 4 (cp 1 K. 4 13) as situate in the 'region of Argob,' in Bashan. The position of Argob, and, consequently, the positions of those cities as well, are uncertain (see ARGOB, 1); but there are remains of many ancient towns and villages in these parts, especially in the Lejā, and on the sloping sides of the Jebel Haurān; according to Wetzstein, for example (*Hauran*, 42), there are 300 such ancient sites in the E. and S. slopes of the Jebel Haurān alone.

The dwellings in these deserted localities are of a remarkable character. Some are the habitations of Troglodytes, being caverns hollowed out in the mountain-side, and so arranged as

¹ The adoption of the family name of the wife suggests that she was an heiress.

² See Schürer, *OT* 1 353.

³ Wetzstein, *Hauran*, 83-88, and in the app. to Del. *Hib.* 2^o 553-558, where it is shown also that the modern 'ard el-Bathaniyeh,' or 'Land of Bathaniyeh,' is the name of a comparatively small district N. of the Jebel Haurān and E. of the Lejā, which can never (as was supposed by Porter and others) have formed part of either Bashan or the province of Baravaia.

¹ Wetzstein, *Hauran*, 87 n., *Hib.* 352; GASM, *HC* 536 f. See the excellent map of this district published in the *ZDPV*, 1890, Heft 4, chiefly on the basis of Südehl's survey.

³ Wetzstein, *Hauran*, 40 f. Cp the map at the end of the volume.

⁴ Porter, *Five Years in Damascus*, 2^o 186, 190, 260, 262, etc.; GASM, *Geog.* 613 f. The mountainous region of Jaulān, W. of the Rukḡād, is also well wooded.

clerks' (see SCRIBE). For bastardy, in its religious connection, cp COUNCIL OF JERUSALEM, § 10.

BAT (בַּתּוֹבָה, lit. 'night-flier'?) ΝΥΚΤΕΡΙC: *vespertilio*.¹ Lev. 11 19 Df. 14 18 Is. 2 20; also Bar. 6 21). The bats form a well-defined and very numerous order of mammalia, termed by naturalists the *Cheiroptera*. The position of the name at the end of the list of unclean birds, and immediately before the list of reptiles, accords with the universal opinion of antiquity that the bat, in Aristotle's words, 'belonged both to birds and to beasts, and shared the nature of both and of neither';² nor is it in any way surprising to find them included, apparently, amongst birds, for bats alone amongst mammals have developed the faculty of true flight, and have become so modified by their aerial habits that their power of progressing on the ground is markedly inferior to that of most birds and insects. They show, in fact, a strong aversion to being on the ground, and, as a rule, at once try to leave it, by crawling up some wall or tree from which they can take their flight.

The nature of their food (either insects or fruit) makes it necessary for those bats which inhabit temperate climates either to migrate at the approach of winter or to spend the cold months in a long winter sleep, for which purpose they often collect in large colonies in caves, ruins, or disused buildings. As a rule the bats of the Old World choose the latter alternative, and this seems to be the case with many of those found in Palestine. When food again becomes abundant, they as a rule sleep during the day suspended head downwards by their feet, and leave their homes only to search for food at the approach of twilight. The majority of the bats of Palestine (and they are very numerous) inhabit caves, caverns, tombs, ruins, and disused buildings of all kinds, where they can avoid the light, a fact referred to in Is. 2 20 f.

As many as seventeen distinct species of bats, belonging to four different families and eleven different genera, have been described by Canon Tristram. Two or three of these may be mentioned by name. The only representative of the fruit-eating bats (*Megachiroptera*) is *Acanthopteryx (Cynomops) agassiziana*, a species which is elsewhere arboreal in its habits, but in Palestine is found living in large colonies in caves and tombs. A further peculiarity of this species is that individual specimens from different localities vary markedly in size, those from Kurn in the plain of Acre being much smaller than those from the hills near Tyre, which resemble in size the variety found in Cyprus and Egypt. This species is very commonly found inside the Pyramids of Egypt and is believed to be the one so often figured in Egyptian frescoes.

The horse-shoe bat *Rhinolophus ferrum-equinum* is the commonest bat in Palestine, swarming in immense numbers in the caverns along the Jordan and the Red Sea. It has a wide distribution, extending from England to Japan and all over Africa. It collects in large colonies (180 have been found together) in caves and ruins for its winter sleep, and these colonies are peculiar as they are composed of one sex. Another British bat very common in the hill country about Bethlehem, Jerusalem, and the Sea of Galilee, is the long-eared bat, *Plecotus auritus*, usually found in caverns. It is always very late in leaving its resting-place, not appearing till twilight has changed to night; but it continues to hunt for the insects on which it feeds the whole night through. N. M.—A. E. S.

¹ According to Schultens, *Clar. Dial.* 322, from the root which appears in Ar. as *afala* 'to be dark' (of night), and *qay* 'to fly'. It must, however, be said that compounds are very rare in Hebrew; and the modification of form involved in this case is improbable. It might be thought, from the absence of the word in the cognate languages (in the language of the Targums it is simply borrowed from Hebrew), that it is a loan-word which came in from a non-Semitic source; but there is much to be said for the view that it is connected with Aram. *artel*, 'naked' (from the character of a bat's wings), as suggested by Law (see Ges. HWB¹), or with the root *qay*, which in Hebrew has the sense of being covered or darkened.

² The *Heshtia* has the same meaning in Leviticus and Deuteronomy the curious rendering 'peacock', but in Is. 2 20 Bar. 6 21 employs the proper Syriac word for 'bat'; the Arabic version has 'bat' in Leviticus and Deuteronomy, but like the Targum goes astray in a mistaken paraphrase of Is. 2 20.

³ *De Part. Animal.* 413. For other references see Bochart, *Hierozoicon*.

BATH (בַּת), deriv. uncertain; cp BDB. s.v., Is. 5 10. See WEIGHTS AND MEASURES.

BATH-RABBIM (בַּת־רַבִּימַי, 'daughter of multitudes.' [BDB]; ΟΥΡΥΔΡΟC ΠΟΛΛΑCΙC [BDB]; *filia multitudinis*; Cant. 7 4 [5]f.). The eyes of the bride are likened to the 'pools in Heshbon by the gate of Bath-rabbim.' With true insight, Grätz in 1871 recognised the impossibility of the reading Bath-rabbim; he suggested Rabbath-Ammon. Certainly this is possible; and NW. of Heshbon, in a lateral valley of the Wady Heshlan, old reservoirs have been found. We cannot, however, suppose that these reservoirs were so famous as to be celebrated in a popular song beside Carmel and the Tower of Lebanon. 'Heshbon' as well as 'Bath-rabbim' must be wrong. Winckler's suggestion 'Helbon' (*IGF* 1 293 f.) fits in with the mention of Lebanon, but has no other recommendation. Considering that there is deep-seated corruption in the next verse (see HAIR, GALLERY, 2), we are justified in making an emendation which might otherwise seem too bold. The most famous pools in Palestine, outside of Jerusalem, were no doubt those known as the Pools of Solomon (see CONDUITS, § 3). In the long green vale of 'Ar'ūs, unusually green among the rocky knolls of Judaea, Solomon, according to post-exilic belief, 'planted him vineyards, and made him gardens and paradises . . . and made him pools of water, to water therefrom the forest where trees were reared' (Eccles. 2 4-6). Probably it is this scenery that has suggested several descriptive passages in Canticles (Stanley; Del.); it was worthy to be mentioned beside Carmel and Lebanon. Read בַּת־רַבִּימַי, and (with Wl.) עַיִן for עֵינַי, and render

Thine eyes are like Solomon's pools
By the wood of Beth-ceren.

Beth-ceren, 'place of a vineyard,' was probably the name of some part of the garden-land referred to in Eccles. 2 4-6. See *JQR*, April 1880, cp BETH-HACEREM.

BATHSHEBA (בַּת־שֵׁבַע, 'daughter of the oath' (?), § 48; in 1 Ch. 3 5 בַּת־שֵׁבַע, where the pointing should be corrected to בַּת־שֵׁבַע, in $\text{S}^{\text{B}}\text{AL}$, by a strange confusion, ΒΗΡCΑΒΕΕ = Beersheba), wife of Uriah the Hittite, afterwards wife of David and mother of Solomon 2 S. 11 2-12 24 (BETHSABEE [A] 1 K. 1 7 (BETHSABEE in 1 11 15). Some think that she was a granddaughter of ABILHONIM 1 2 2-3.

When David first saw Bathsheba, Joab was engaged in the siege of Rabbath Ammon. The king himself was reposing, after his years of hardship, at Jerusalem. The story (which is omitted in Chronicles) is that, walking one evening on the flat roof of his palace, David saw a beautiful woman bathing in the court of a neighbouring house. He asked who she was, and, learning that her husband Uriah was away with the army, 'sent messengers and took her' (2 S. 11 4). To avert the shock which an open act of adultery would have caused to the ancient Israelitish sense of right, he devised the woful expedient related in 2 S. 11 6-25. First he had Uriah sent to him, ostensibly with a message from the camp. He dismissed him to his house with a portion from the royal table; but Uriah remained with the guard of the palace: he scrupled, if Robertson Smith may be followed (*Rel. Sem.* 455, 484), to violate the taboo on sexual intercourse applied to warriors in ancient Israel. The next night the king plied him with wine; but still Uriah was obstinate. Driven desperate, his master sent the brave soldier back to Joab, bearing a letter ordering his own destruction. Uriah was to be set in the place of danger and then abandoned to the foe. The cruel and treacherous plan was carried out, and when Bathsheba's mourning for her husband was over, David made her his wife.

The story of the rebuke of Nathan, of the revival of the king's better self, and of the sickness and death of

BATHSHUA

the child of Bathsheba, is well known. It is a question, however (see Schwally, *ZATW* 12 153 ff.; Bu. *SBOT* 89), whether, in the original form of the narrative, 2 S. 12:15 did not follow on 11:27, which means treating the most edifying part of the story as a later amplification (see DAVID, § 11). Considering what we know of the gradual idealisation of the life of David (which culminates in Chronicles and the titles of the Psalms), this appears far from impossible. The story gains in clearness by the omission. At any rate, Wellhausen is right in regarding 12:10-12 as an interpolation in the narrative of the colloquy between David and Nathan. It was suggested by an intelligent reading of the subsequent history. David's evil example was imitated in exaggerated form by Amnon; and Amnon's sin was fruitful in troubles, which culminated in Absalom's rebellion, and darkened all David's remaining years.

We meet Bathsheba for the last time, just as David's end was at hand, in the full glory of a queen-mother. Solomon rises to meet her, bows down before her, and sets her on a seat at his right hand. She gained her object, and it is interesting (if Nathan really took the part assigned to him in 2 S. 12:1-15) to notice that Nathan was one of her chief supporters.

W. E. A.

BATHSHUA (בַּת־שֵׁוּא) § 48. 1. See BATHSHEBA. 2. The words בַּת־שֵׁוּא rendered 'daughter of Shua' in Gen. 38:2-12 (*שוא*, omitting בַּת) [ADEL.] are treated in RV of 1 Ch. 2:3 (*r. θυγ. σάως* [13^a]; *r. θ. αυας* [B¹]; *σους* [L]) as a proper name, Bathshua. See *SHTA*.

BATHZACHARIAS (ΒΕΘΖΑΧΑΡΙΑ [A]). 1 Macc. 6:32 f. See BETHZACHARIAS.

BATTERING RAM (כִּרְוִים [plur.]), Ez. 4:2 21 22 [27] f. See WAR.

BATTLE AXE. The rendering is now very happy, as well at once be seen.

1. מַרְבֵּץ *marbēz* Jer. 5:20 (διασκορπίζεις σὺ [BNAQF]); or מַרְבֵּץ (Prov. 25:18 *ρόπαλον* [PINA-A] - *παλον* [N¹]). EV's rendering 'maul' introduces an arbitrary distinction. Better, 'battle hammer,' or 'club' (cp. מַרְבֵּץ). In Ezek. 9:2 מַרְבֵּץ (מַרְבֵּץ) should possibly be corrected into סַחַתוֹ *ṣaḥto*, 'his destroying weapon' 1 (Che.); 'battle axe' (RVmg.), 'slaughter weapon' (EV), 'a weapon of his breaking in pieces' (AVmg.) are all difficult to justify.

2. כִּנֵּר *kiner* Ps. 35:3 RVmg. The usual rendering (Del., Bā., etc.), accepting MT's vocalisation [כִּנֵּר] and vers. (is 'stop the way' (סִוֵּךְ *siwēk*). This involves a double ellipsis—'shut up [the way], [going] against my pursuers'. It is improbable, however, that כִּנֵּר means 'battle axe'; *ἀσπίς* may mean the battle axe used in upper Asia; but this does not justify the inference of critics (Drus., Grot., Kenn., Ew., Dri., We., etc.). The text needs emendation (see JAVELIN, 7).

BATTLEMENT. For מַעֲקֵה, *ma'eqeh*, Dt. 22:8 EV, see HOUSE, § 4. For מַעֲקֵה, *ma'eqeh*, 2 Ch. 26:15 Zeph. 1:16 36 RV; and מַעֲקֵה, *ma'eqeh* (plur.), Is. 54:12 *SBOT*, RV pinnacles; (cp. *מַעֲקֵה* Ps. 81:2 [B¹], etc.) see FORTIFICES, § 5. מַעֲקֵה, *ma'eqeh*, in Dan. 9:27 RVmg. is rendered 'battlement.' It is better to read *ḥanne* (see *Hevan, ad loc.*).

BATUS (ΒΑΤΟΣ). I. k. 166 AVmg.; RVmg. BATH. See WEIGHTS AND MEASURES.

BAVAL (בָּוַל). Neh. 3:48, RV *Bavval*. See BINNUI (3).

BAY (בַּי), Zech. 6:37. See COLOURS, § 17.

BAYITH (בַּיִת), Is. 15:2 RV; AV *BAJITH*.

BAY TREE (אֲרֵזָה) 2 Ps. 37:35, or, more plausibly, as

1 מַשְׁחָה, 'destruction,' we know; but מַשְׁחָה, 'breaking in pieces,' is unattested elsewhere. Co. recognises that the closing words of Ezek. 9:1 are no part of the true text, but represent a variant to the equivalent words in v. 2.

2 [Ⓞ] has no rendering of אֲרֵזָה in this passage, since for אֲרֵזָה it reads לִבְנֵי לִבְנֵי (ὡς τὰ κέδρους τοῦ Λιβάνου [BART]). Aq., Symm., and Editio Sexta all render in the sense of 'indigenous tree'; and neither Pesh. nor Targ. supports the rendering of AV or that of RV.

BDELLIUM

RV, 'a tree in its native soil.' The word בְּדֵלְיָן, 'native born,' however (from the root בָּדַן, 'to arise,' 'spring forth' [Barth, 152 c.]), should be applied to a tree, whence Celsius (*Hierob.* i. 194 ff.) supposed the phrase to mean ἀνήρ ἐπιχώριος.

As Hi., Gr., Che., Bā., We., Dr. agree, the right reading is אֲרֵז 'cedar.' On the (probably) corrupt words בְּדֵלְיָן (Dr. 'putting forth his strength') and אֲרֵז (Dr. 'spreading'), see Che. *Psalms* 61.

BAZLUTHI (בְּזֻלְתִּי, 'stripping'?; ΒΑΖΑΛΩΘ [NA]). The b'ne BAZLUTHI, a family of NETHINIM in the great post-exilic list (see EZRA, ii § 9) Ezra 2:52 (*βασαδωε* [B], *βαδωνωθ* [L]) = Neh. 7:54 *Bazlith* (*βασαωθ* [B], *βαζουαθ* [I.]) = 1 Esd. 5:31 BASALOTH (*βασαλεμ* [B], *βααλωθ* [A], *βαλονωθ* [L]).

BDELLIUM (בְּדֵלְיָן; Gen. 2:12 ἀνθραξ [AEL]; Nu. 11:7 κρυσταλλοο^c [BAFL]), appears in Gen. 2:12

1. *Bēdhōlah* along with gold and onyx or beryl (see = βδέλλιον. ONYX) as a characteristic product of the 'appearance' (so RV, lit. 'eye,' not COLOUR [g.v., § 3], as AV) is likened to that of manna—a comparison the appropriateness of which is obvious if, as is in all probability the case, the OT *bēdhōlah* is the resinous substance known to the Greeks as βδέλλιον, μάδελκον, βολχόν² (Dioscor. 1:80) or βδέλλα (*Peripl. Mar. Erythr.*, §§ 37 39 48 f.).

Peiser identifies בְּדֵלְיָן with Bab. *bidlā*, a spice obtained in Babylonia, and often mentioned in contract-tablets (*ZATW* 17 347 f.); this is important in connection with the Edens story (see PARADISE). As Glaser has shown (*Sitzber.* 2 264 ff.), bdeillum was distinct from storax (against Hommel, *GBA* 6:1 n. 1). Bochart, identifying Havilah with the Arabian coast opposite Bahrain, in the Persian Gulf, naturally explained בְּדֵלְיָן as meaning pearl (*Hieros.* ii. 55). This view, however, lacks the support of any ancient version, and, though upheld by several Jewish authorities (cp. Lag. *Or.* 2:44), has no solid foundation. The renderings of *ἄνθραξ* and *κρυσταλλοο* point to some kind of precious stone; but, as Di. remarks, ἄνθραξ, 'stone,' is prefixed to בְּדֵלְיָן, the word following, and not to בְּדֵלְיָן. The Pesh. *bēdhūllā* (in both places) seems to be due to a mere scribe's error: *r* for *d*. It cannot be supposed to be a genuine Aramaic word.

Bdeillum is described by Dioscorides (*I.c.*) as δάκρυον δένδρον ἀραβικοῦ³; the best sort being 'bitter in taste,

transparent, gelatinous (γαρροκολλῶδες, 2. Descriptions lit. 'like bull's hide glue'), oily throughout (βδέλλιον. out and easily softened, unmixed with chips or dirt, fragrant when burnt as incense, resembling onyx⁴;

4 he speaks also of a black sort found in large lumps, which is exported from India, and of a third kind, brought from Petra. Pliny (*NH* 12:9) gives some further details: the best sort grows in Bactriana (N. Afghanistan), on a 'black' tree 'of the size of an olive, with a leaf like the oak and fruit like the wild fig'; it also grows in Arabia, India, Media, and Babylon, that of India being softer and more gummy, while that brought through Media is more brittle, crusted, and bitter. The author of the *Peripl. mar. Erythr.* speaks of it as growing largely in Gedrosia (Beluchistan) and Barygaza (Gujerat), and as exported westwards from the mouth of the Indus. In the older classical literature bdeillum appears to be mentioned only in Plautus (*Curc.* 101),⁵ in a list of perfumes.

Two of the kinds of bdeillum described by Dioscorides are generally identified by the authorities 3. Various with the two substances described as follows, kinds. which are still met with in commerce:—

1 In both places of *λοιωτό*, i.e., Aq., Symm., and Th., have βδέλλιον, so Vg. *bdeillum*. Cp. Jos. *Ant.* iii. 16.

2 The exact form of these two words is uncertain. Pliny (12:9) has *maddacon, brochon*. On the connection of this group of names with *bēdhōlah*, see Del. *Par.* 16 f., 101. Pott in *WZKM* 7:98 ff.

3 The reading of this word is uncertain.

4 Perhaps a 'mail' or 'hoof.'

5 Tu mihi stacte, tu cinnamon, tu rosa, Tu crocinum et casia⁵, tu bdeillum.

1. *Ordinary Bellidium* (African).—'The drug is exported from the whole Somali coast to Mokha, Jidda, Aden, Makulla, the Persian Gulf, India, and even China' (Flückiger and Hanbury, *Pharmacog.* (2) 145). Hanbury says he had it sent him for sale in London from China; but in matters of this kind the immediate port of origin is often substituted for the ultimate source.

Dymock (*Pharmacog. Ind.* 1310) says: 'From Berbera also comes *Bellidium*. Further on he explains that 'to a certain extent' it 'resembles myrrh,' but that it is darker . . . less oily . . . strongly bitter and has hardly any aroma' (*l.c.* 310). According to Mohammedan writers (*l.c.* 312), 'Good bellidium should be clean, bright, sticky, soft, sweet-smelling, yellowish, and bitter.' Its botanical source is *Balsamodendron acrotaum* (see *Kew Bull.* 1868, p. 91 f.).

2. *Indian Bellidium*.—Dymock (*l.c.* 310) describes this as somewhat resembling the African drug; 'but the colour is lighter, often greenish.' Dioscorides, therefore, must have had a very dirty sample—a not infrequent experience still. Its source is *Balsamodendron Mukul*, a plant the botanical distribution of which—NW. India, Beluchistan, and possibly Arabia—exactly agrees with the statements of the old authors. The only difficulty is the description of Pliny, which it does not fit very well, as it is a small tree; but Pliny's statements cannot be pressed from the botanical point of view: Lemaire (*Flora de Virgile*, 125) calls Dioscorides 'bien préférable à Plin.'

As to the third kind of bellidium spoken of by Dioscorides, Dymock (310) conjectures that it was 'probably a kind of myrrh.' N. M.—W. T. T.-D.

BEACON (בֵּיתֵי, perhaps for בֵּיתֵי from בֵּית, see ASH; ΙCΤΟΣ [ΒΝ:ΑΟQΓ]), or rather, as in EV⁹⁸, MAST (cp Is. 33:2 Ez. 27:5), employed in Is. 30:17 as a simile of nakedness and desolation. The reference is to the poles, etc., erected in prominent places for signalling purposes; cp ENSIGNS (§ 2).

BEALIAH (בְּיָהוּ, § 35, 'Yahwé is Lord'), a Benjamite, one of David's warriors, 1 Ch. 12:5 (בְּאֲלִיאִה [BN]; ΒΑΔΑΙΑ [A], ΒΑΛΑΙΑC [L]). See DAVID, § 11 a iii.

BEALOTH (בְּיָהוּ, § 35). See BAALATH-BEER.

BEAN, or rather **Bēan** (RV), **The children of** (ΥΙΟΙ ΒΑΙΑΝ [ANV]; *BEAN* [VG]; *حلل*; ΒΑΑΝΟΥ. Jos. Ant. xii. 81), an otherwise unknown tribe or community, who in the pre-Maccabean period were a 'snare and offence' to the Jews 'in that they lay in wait for them in the ways.' Their robber castles or 'towers' lay, apparently, somewhere between Idumæan and Ammonite territory. This would suit the Bean of Nu. 32:3 (see BAAL MEON). In one of his warlike expeditions against the unfriendly surrounding peoples after the reconsecration of the temple, Judas the Maccabee utterly destroyed the children of Bean and burnt their towers (1 Macc. 5:4 f.; cp 2 Macc. 10:13 ff.).

BEANS (βῆλε, κγᾰμος [BAL] 2 S. 17:28 Ez. 4:6) are twice mentioned as material for food, along with wheat, barley, and lentils; in the second passage Ezekiel is instructed to make bread of a mixture of wheat, barley, beans, lentils, millet, and spelt. The Hebrew name is found also in post-biblical Hebrew, Jewish Aramaic, Arabic, and Ethiopic. Beans are the seeds of *Vicia faba* (Linn.), the cultivated plant—not certainly known in the wild state, but in all probability a domesticated form of *Vicia narbonensis*²—which is a native of the whole Mediterranean region and extends eastward to N. India. It was the *κῆσμος* of the Greeks, which is mentioned as far back as the Illud (*κῆσμος μελανόχρομος*, 13 376). Virechow found the seeds in the excavations at Troy, and the plant was cultivated in Switzerland and Italy in the age of bronze. Beans are, without doubt, one of the earliest articles of vegetable food among the European races of mankind. (p FOOD, § 4. COOKING, § 7. N. M.—W. T. T.-D.)

¹ Flückiger and Hanbury say (*l.c.* 146) that it is regarded both in London and in India 'as a very inferior dark sort of myrrh.'

² On this point see Sir Joseph Hooker in the *Botanical Magazine*, 7220.

BEAR. 1. (בַּר). The name, common to Heli., Aram., Ar., and Eth., is from a root signifying to move slowly and softly,¹ and thus befits the bear, which has a stealthy tread.

The Heb. word is generally masc., even when the she-bear is intended; thus 'a bear robbed of her whelps' is always בַּרְיָהּ; on the other hand, the pl. בָּרִים takes a fem. verb in 2 K. 2:24, and the sing. is apparently fem. in Is. 11:7. ² renders ἀρκος [BAV], but in Prov. 17莫名其妙ly μερμερα [BVA] (connecting probably with בָּרַח, 'to be anxious'; Eth. has ἀρκος. In Prov. 28:15 ἔσται ἡ ἀρκος [BMA twice], easily explained when we remember that the Aram. form of בָּר, wolf, is *abb*).

The animal is frequently mentioned in OT (in the Apoc. in Wisd. 11:17 Ecclus. 25:17 [ANV]; but ἀρκος in 14:15 and 17:3) and once (Rev. 13:2).

2. **Allusions**.—In NT. No difficulty arises in connection with any of the OT passages; the attacks of the lion and the bear on David's flock (1 S. 17:34, 36), and of the she-bears³ on the children who mocked Elisha (2 K. 2:24), accord with the ravenous habits of the animal; 'a bear robbed of her whelps' (2 S. 17:8 Prov. 17:12 Hos. 13:8) or 'a ranging bear' (Prov. 28:15) is naturally regarded as the most dangerous possible object to encounter; one of the signs of profound peace in the Messiah's kingdom is that the cow feeds side by side with the bear, its natural enemy (Is. 11:7). The *roaring*, or rather *moaning*, of the bear is well expressed by the verb בָּרַח (Is. 59:11. ἔσθραQ στενάζω), which is applied also to the howling of a dog, the cooing of a turtle-dove, the sighing of a man, and the moaning of the sea. The stealthiness of a bear's attack is mentioned in Lam. 3:10. By the likening of the second (probably the Median) kingdom in Dan. 7:5 to a bear—which 'was raised up on one side, and three ribs were in his mouth between his teeth; and they said thus unto it, Arise, devour much flesh,'—the extreme destructiveness of the Median conquests is probably indicated (see further Bevan's *Danid*, in loc.). In Am. 5:19 'as if a man did flee from a lion, and a bear met him,' we have, as Bochart remarks, a Hebrew equivalent to the classical

'Incidit in Scyllam cupiens vitare Charybdin.'³

In the combination of the 'feet of a bear' with the body of a leopard and the mouth of a lion in Rev. 13:2, we have an instance of the characteristic re-combination of elements borrowed from OT apocalyptic. The hyperbolic treatment of old history in later Jewish literature is illustrated by the mention in Wisd. 11:17 of wild beasts, such as lions and bears, among the plagues sent upon the Egyptians, and by the statement about David in Ecclus. 47:3 that 'he played (Heb. . . . לַיְשׁוּם שָׂחַ, 'he mocked at . . .') among lions as among kids, and among bears as among lambs of the flock.'

Finally, we notice the interesting reading of ἔσθρα in Ecclus. 25:17:

A woman's wickedness altereth her visage
And darkeneth her face as doth a bear (ὡς ἀρκος).

If this reading be correct, the verse will allude to the *tristitia* or moroseness often attributed to the bear, which several ancient writers speak of as expressed in its countenance. On the whole, however, it is more probable that ἔσ³ (supported by the Syr. and Ar. versions) is right in reading

And maketh her face dark like sackcloth (ὡς σάκκος).

The Syrian bear, sometimes called *Ursus syriacus*, is not specifically distinct from the brown bear, *Ursus*

3. **Natural history**.—*Ursus*, although somewhat lighter in colour and smaller than the typical varieties. It has a wide distribution,

¹ The other meaning of the Ar. verb, 'to have a bristly skin,' is probably, as Ges. thinks, secondary, and derived from the noun *dubb*.

² It was a common opinion in antiquity that she-bears were fiercer than the males; thus Pliny (11:49), 'Mares in omni genere fortiores præterquam pantheris et ursis.'

³ Cp also Is. 24:18 Jer. 48:44.

have shown their perplexity in the former passage by giving three alternative renderings.

Of pillows we hear nothing in 'OT. In Mk. 4:38 we have *προσκεφάλαιον* (cp Ezekiel 1:18) **Ⓢ**. AV 'pillow'; but it was an extemporised pillow; RV better, 'cushion.'

AV—even sometimes RV—does indeed assume the use of pillows. Thus (a) **Ⓢ** *רִמְנוֹתַי* (with suffix) is rendered 'bolster' by AV in 1 S. 19:13, 16, 27:11, 16, and by RV in 1 K. 19:26; and 'pillow' by AV in Gen. 28:11, 18. The word, however, denotes properly 'the parts about one's head,' and is thus rendered by RV everywhere (e.g., 1 S. 19:13, 'at the head thereof'), and once even by AV in 1 K. 19:26. The Heb. word finds its exact parallel in the *רִמְנוֹתַי* (with suffix), 'the parts about (one's) feet' (Ruth 3:14). (b) For *רִמְנוֹתַי* in 1 S. 19:13, 16, EV has 'pillow,' while RVmg. offers 'quilt' or 'network' (so Ew., cp *רִמְנוֹתַי*, a sieve); but see § 3. (c) The 'pillows' of the prophetesses (so *Ⓢ* *προσκεφάλαιον*; cp Vg., Pesh., Targ.) in Ez. 13:18, 20 are purely imaginary. *רִמְנוֹתַי* appears to mean some kind of magical amulet carried by the prophetesses; cp Ass. *kasit*, 'to bind,' *kasitu* (Del. in Baer, *Ezek.* xii. f.).

It is impossible to separate the subject of beds from that of couches or divans. Amos, as a dweller in the

6. Divans. country, directs his scorn against the luxury of the rich grandees 'that sit in Samaria in the corner of a couch, and on the silken cushions of a bed' (Am. 3:12 b, RV). The rendering of RV is indefensible; Damascus and damask have no connection (see DAMASCUS, § 6 n.). The passage has been cleared up with an approach to certainty by critical conjecture: it should run thus, 'that sit in Samaria on the carpet (*רִמְנוֹתַי*) of a couch, and on the cushion (*רִמְנוֹתַי*) of a divan.'¹ From another passage, which also can be restored very nearly to its original clearness (see DAVID, § 12 n.), we learn that the couches of the great were richly adorned. The selfish grandees are described as those 'that lie upon couches (or beds, *רִמְנוֹתַי*, of ivory,' Am. 6:4). Such couches were sent as tribute by Hezekiah to Nineveh (*KB* 2:97, l. 36), and the Amarna Tablets (5:20; cp 27:2028) speak of 'beds' (*iršu*) of ivory, gold, and wood sent to the king of Egypt. So too in Esther (1:6; cp 1 Esd. 3:6) we read of couches adorned with gold and silver, and covered with rich tapestry and deckings from Egypt (cp Prov. 7:16). Some of these couches would of course be used as beds. Such, at any rate, was the gorgeous bed (*κλῆθρον*) in the tent of Holofernes. The description of it contains the first mention of a 'canopy' (*καὼσάτωρ*, Judith 10:21, 13:9, 16:19, originally a fly-net)—one of the results of Greek influence; HELLENISM, § 15.

BEDAD (**בִּדַד**; **βαρδδ** [BADEL]), the father of Hadad I., king of Edom, Gen. 36:35 1 Ch. 1:46 (**βαδραμ** [L]). The name is seemingly a corruption of Bir-dadda—*i.e.*, probably, Bir is Dadda (two names of the storm-god best known as Rammān): cp with this Bir-zur, Panammu inscr. from Zenjirli, 1, 3). Waiti, the 'king of Arabia' conquered by Āšur-bāni-pāl, had for his father Bir-dadda (*KB* 2:222 f.), a name which answers to the Assyrian name Bir-rammān (the eponym for 848 B.C.). Hommel (*Beitr. z. Ass.*, 1897, p. 270) derives from Be-(Had)dad—*i.e.*, by Hadad;—cp BAANA, BE-ESHTERAH. T. K. C.

BEDAN (**בִּדָן**; **BADAN**, or [Cod. Am.] **BENEDAN**).

1. In an address ascribed to Samuel we find Bedan mentioned between Jerubbaal and Jephthah as one of the chief deliverers of Israel (1 S. 12:11 MT). No such name occurs in the Book of Judges, however, and the form of the name is suspicious.

Ew. supposed that the initial letter had been dropped, and that we should read Abdon (**בִּדְוֹן**, Judg. 12:13). Abdon, however, is one of the six 'minor Judges' introduced into the

¹ Cp Amos, § 5 n.; Che. *Expositor*, vi. 6: 366, *JQR* 10:572, and on *רִמְנוֹתַי*, 'mat., rug.' 'carpet' see *Int. Is.* 126n. For *רִמְנוֹתַי* Grätz and Nowack give *רִמְנוֹתַי*, 'on the covering of.' But *רִ* is non-existent; in Judg. 4:18 it is corrupt (see above).

historical scheme of Judges at a later time. The Targ. fancifully understands the name as ben-Dan—*i.e.*, Samson.

The mention of Sisera in v. 9 entitles us to expect Barak, whose name is actually read by **Ⓢ** (**בָּרַק**, H. P. Smith), Pesh. 'So We., Dr., Klo., Bu., Moore, H. B. Smith. 2. A Manassite, 1 Ch. 7:17 (**בַּדָּאן** [B], *ḥaw* [AL]); perhaps a corruption of Abdon (**בִּדְוֹן**). See MACHIR.

BEDEIAH (**בִּדְיָה**), more probably a textual corruption for **בִּדְיָה**, 1 Ch. 8:21 f. [so Gray, *HPV* 285, n. 11, who cites **Ⓢ**¹ and Pesh.], than an abbreviation for **בִּדְיָה** [so Olsh. 277 b, 4, followed by BDB], a Levitical name in the list of those with foreign wives (EZRA, l. § 5 end) **Ⓢ** *בִּדְיָה* (**בַּרְדִּיָּה** [B], **בַּדְדִּיָּה** [AL]), **Ⓢ** [N]; *Ⓢ* *Ⓢ* = 1 Esd. 9:34 **ΠΕΔΙΑΣ**, RV **ΠΕΔΙΑΣ** (**ΠΕΔΙΑΣ** [B], **ΠΑΔΕΙΑΣ** [A], **ΒΑΔΔΙΑ** [L]). By reading **ΒΕΡΑΙΑ** (7, 7.) as above, we gain a second name in which creation (**בְּרִיאָה**) is referred to by the distinctive exilic and post-exilic term. See CREATION, § 30.

BEE (**בִּיָּה**); **ΜΕΛΙΣΣΑ**; Dt. 1:44 Judg. 14:8 Ps. 118:12 Pr. 6:8 **Ⓢ** Is. 7:18 Eccles. 5:7 [**Ⓢ**²] 11:3 4:10 **Ⓢ** 14:19¹ has for its Hebrew name a word derived from a root meaning to lead (or to be led) in order. Thus it means properly a member of a swarm (cp *examen* from *ex-ago*). Besides the familiar incident of Samson finding a swarm of bees in the lion's carcase (recalling Vergil's story of Aristæus and other classical allusions, see below), we have in the OT two references to the angry assaults of bees on those who meddle with their hives (Dt. 1:44 Ps. 118:12 [MT];² cp 4:10 **Ⓢ** Eccl. 14:19), and a likening of the Assyrian power to a bee summoned by the sound of a hiss to settle on the land of Israel³ (Is. 7:18). In Prov. 6, at the close of the exhortation to the sluggard to learn from the ant and her ways, **Ⓢ** has the following addition to the Hebrew text:—

Or go thou to the bee
And learn how diligent she is,
And how noble (*σπουδή*) is the work that she doeth;
Whose labours kings and private men use for health,
And she is desired and honourable in the eyes of all:
Though she be weak in strength,
By honouring wisdom she is advanced.

We may compare the words of the son of Sirach (11:3).

The bee is little among such as fly,
But her fruit is the chief of sweet things.

The common bee of Palestine is *Apis fasciata*, Latr.; some authorities regard it as a distinct species, others as a sub-species of the cosmopolitan honey-bee *Apis mellifica*. In favour of the latter view it is stated that when crossed with races of the same species it breeds freely; but, on the other hand, it differs in size and colour from the English bee, being smaller and lighter, and beautifully striped. The colonies are large and very many, Palestine being a country well adapted for the needs of insects which flourish in the sun and feed on flowers.

Bees are found wild, making their hives in crevices of the rocks and hollow trees, etc.; and, even at the present day, many of the Arabs make a living by collecting wild honey and bringing it into the towns for sale. Bee-keeping is much practised in the East (where honey is largely used in cooking), the hives, according to Canon Tristram, being tubular structures 3 or 4 ft. long, and some 8 in. in diameter, roughly made of sun-dried mud. The ends of the tube are closed with a tile perforated with a hole for the access of the bees. Many of the hives are piled up together and covered with boughs for the sake of shade. When the combs

¹ This *Ⓢ* word is a *nomen unitatis*; the collective appears in Arab. as *dīb* or *dāb*, a swarm of bees, also probably in emended text of 1 S. 14:26, *בִּדְוֹן*, its bees (for *בִּדְוֹן*); so **Ⓢ**, We., Dr., Bu., H. P. Smith.

² **Ⓢ** has 'as bees about wax,' which Bā., Che.(b) adopt; but *Ⓢ* comes from *בִּדְוֹן* and *בִּדְוֹן*, a rival reading to *בִּדְוֹן* in cod. **Ⓢ** Eccles. 5:7 a corrector has added *ὡς μελισσῶν ἐκτρέφοντες*.
³ The ancients believed that it was possible to summon bees by sounds, such as the beating of metal; see Verg. *Georg.* 4:65, and the other passages cited by Bochart (*Hieroz.* 4:20).

but this particular one is improbable.¹ 'Lord of flies' (could we assume that this was the original meaning) was itself, as a title, bad enough; nor would the people, who feared the demons so much, have ventured to speak too disrespectfully of the archdemon (cp Ashmedai or Asmodeus, which to a Hebrew ear meant the 'destroyer'—not a disrespectful title); lastly, on Lightfoot's theory the name ought to be Beel-zebel: it is shown elsewhere that a late editor detected the new Hebrew word *zebel*, 'dung,' in the name I-zebel (JEZEBEL). Lightfoot's theory, then, must be abandoned, as Baudissin holds. But Baudissin's own theory (adopted from Hitzig) is not really more satisfactory. He thinks that Baal-zebul is simply a euphonic modification of Baal-zebul, the consonant which closed the first syllable being repeated at the close of the second part of the word.²

This, however, leaves Baal-zebul unexplained, for Baudissin's theory of the name is scarcely admissible.

See Selden, *De Dis Syris*, 26; Lightfoot, *Horæ Hebraicæ*, on Mt. 12.24 Lk. 11.15; Movers, *Die Phönizier* ('41), 1.260 f.; Richm's article in *HWB*⁽²⁾. The latter revives an old theory of Storr and Döderlein that *bē'el d'habāi* in Aramaic might mean either 'lord of flies' or 'an enemy.' ἐχθρὸς ἀνθρώπου (Mt. 13.28) = διάβολος. This is doubtless plausible. We must at least admit that the common people cannot without instruction have attached a meaning to *-zebul*. But how has Beelzebul (half Hebrew, half Aramaic) fixed itself in the Gospel tradition? Pesh. too retains Beelzebul. Baudissin's article in Herzog, *PRE*⁽³⁾ (learned and thorough) adopts the ordinary view, as far as Baal-zebul is concerned.

T. K. C.

BEER (בַּעַר, 'well', § 101). 1. (τὸ φρέαρ [BAFL]).

A station of the Israelites, apparently between Heshbon and the Arnon (Nu. 21.16 [JE]). See NAHALIEL; WANDERING, § 8; and cp, below, BEER-ELIM. The interest of Beer is not geographical but literary. The discovery of the well was commemorated (the narrator gives us to understand) by a song. The song with its context runs thus, according to MT,—

And from there to Beer: that is the well whereof Yahweh said unto Moses: Assemble the people, and I will give them water. Then sang Israel this song;

Spring up, O well; greet ye it with a song.

Well, that the princes have dug,

The nobles of the people have bored,

With the sceptre—with their staves.

And from Midbar (EV the wilderness) to Mattanah; and from Mattanah to Nahaliel; and from Nahaliel to Bamoth.

The historical character of this statement has generally been assumed. Ewald, however, is on the road to a very different theory when he remarks that such a well-spring would become a source of joy to the labourers who thenceforward used it (*Hist.* 2.204). He sees, in fact, that it is essentially a popular song. Robertson Smith, too, finely speaks of 'the exquisite song in which the Hebrew women as they stand round the fountain, waiting their turn to draw, coo forth the water which wells up all too slowly for their impatience.'³ We should not expect the origin of such a song to be remembered; nor is there anything in the words to suggest the occasion ascribed to it in JE. More probably it arose in the dry country of the south of Judah, where springs were the most valued possession (cp Judg. 1.15 Josh. 15.19 Gen. 26.19 ff.). The 'princes,' 'nobles,' and 'captains' (for בַּמְּסָקִים we read מְסָקִים; cp Judg. 5.9-14) referred to are the sheikhs of the clan. When

¹ בַּעַר, the present writer thinks, has no connection with זֶבֶל, 'dung.' It is pointed in imitation of עֲבָרִים, 'abominations,' and should really be read עֲבָרִים, 'heaps of stones,' i.e., altars of stone. Cp, however, *Idol.*, § 2 (B).

² Hitzig (*Kl. Proph.*, by Steiner, 207) compares בַּעַר to Αἰβάριον (Habakkuk); Baudissin adds Bāb el-mandel for Bāb el-Mandeb. ³ 'The Poetry of the OT,' *Brit. Quart. Rev.* Jan. 1877; cp *PRE* 135. The expression 'coo forth' was suggested by Herder. The fountain is credited by primitive races with personality.

a fresh well has been found, the sheikhs go through the symbolic form of digging for it with staves, and the poets of the clan greet the well with a song.

Does MT give us the whole of the song? Can Midbar be used as a proper name? Surely not. And, when we examine the MSS of G, we find some justification for the hypothesis of Budde, that the text of the itinerary originally ran, 'And from there to Beer; and from Beer to Nahaliel and from Nahaliel to Bamoth,' and that an editor who knew the song of the well, and desired to do it honour, inserted it between the first and the second items in the list, with the additional line, 'Out of the wilderness a gift' (see MATTANAH). See Budde, *New World*, March 1895; *Preuss. Jahrb.*, 1895, p. 491 ff.; Franz Del. *ZK* II, 1882, p. 449 ff.

2. A place to which JOTHAM [I] fled from his brother Abimelech, Judg. 9.21 (בְּעָרָה [B], בְּעָרָה [A], בְּעָרָה [L]). In OS (238.73; 106.20) it is identified with a village called Bera, 8 m. N. of Eleutheropolis. The context, however, gives us no data for determining the site of the 'well' in question.

BEETHO (בְּעֵתוֹ) and even Beersheba have been suggested. Kh. el-Bireh, W. of 'Ain Shems, is considerably more than 8 m. N. of Beit Jibrin.

T. K. C.

BEERA (בְּעֵרָה, 'well'; בְּעֵרָה [i]. בְּעֵרָה [A], om. L.), b. Zophah, in genealogy of ASHER (1 Ch. 7.37).

BEERAH (בְּעָרָה, 'well'), a Reubenite prince, son of Baal, carried off by Tighath-pileser, 1 Ch. 5.6 (בְּעָרָה [B], חָרָה [A], בָּרָה [L]). He is identified by the rabbins with Beeri, the father of the prophet Hosea.

BEER-ELIM (בְּעֵרִים בְּנֵי אֵילִים [Bā. Gi.], 'well of terebinths' (?) or 'of sacred trees'; φρέαρ τοῦ αἰλ[ε]ῖου [11:ΝΑΙΟΥ]), a place apparently on the northern border of Moab, answering to EGLAIM on the south (Is. 15.8). It is generally identified with the BEER of Nu. 21.16. Some identify it also with the Alema of 1 Macc. 5.26; but see ALEMA.

BEERI (בְּעֵרִי, 'belonging to the well' or 'BEER,' § 76; cp above).

1. A Hittite, the father of JUDITH (i. i.), Esau's wife, Gen. 26.34 (Beer [AD], Βαυρ[EL], Βαυρ[LI]). It is impossible to reconcile this description with that of Adah in the genealogy in Gen. 30.2, for which see BASHMETH, 1.

2. The father of HOSEA, Hos. 1.1 (6 Beeri[EL], [BAQ]).

BEER-LAHAI-ROI (בְּעֵרִי לְחַיִּי רֹאִי), a well in the Negeb, famous in Hebrew tradition as the scene of Hagar's theophany (Gen. 16.14), and no doubt connected with a sanctuary (St. *ZATUV* 1.349 [81]). Beside this sacred well was the abode of Isaac (Gen. 24.62 25.11).

1. Name. The name is mentioned only by J; E, who gives nearly the same account of the theophany (21.8-21), speaks simply of 'a well.' According to RV, Beer-lahai-roi means 'well of the living one who sees me.'

2. The Versions (16.14): ὄψαρον ἐν ἐπιπέδῳ [16:10] [AD], 26.25.11: φ. 278 ὄψαρος [ADL1]; Pesh. in all three בְּעֵרִי לְחַיִּי רֹאִי (בְּעֵרִי לְחַיִּי רֹאִי). This rendering, however, is inconsistent with that given of El Roi in 16.13, 'A God that seeth'; we should expect, not רֹאִי, but רֹאֵי 'I', and, even apart from this, 'I' cannot be equivalent to רֹאֵי, 'God' (the phrase רֹאֵי 'I' is late). Probably, therefore, we should render with We. (*Prot.* 4.330; ET 265), 'living is he who sees me,' and explain this by the light of Hagar's words in v. 13, which, as they stand, are unintelligible, but may, by the correction of רֹאֵי into רֹאֵי, and the insertion of רֹאֵי between רֹאֵי and רֹאֵי (the resemblance of these three words accounts for the omission of one), be interpreted thus: 'Have I seen God and remained alive after my vision (of God)?' El Roi (lit. 'God of vision') will then mean 'the God who is seen' (cp Gen. 22.14).

These explanations of El-Rōi and Beer-lahai-roi are too plainly not original. According to analogy, לְחַיִּי (wrongly vocalised *lahai*) ought to be a noun in the construct state. Instead of *lahai* we should doubtless

1 Cp לְחַיִּי in MT of 1 S. 8.13: read לְחַיִּי אֱלֹהִים with B^{AL}.

vocalise *lāhī*, 'jaw-bone'; *roi* (?) is some animal's name, not known in the later Hebrew, and perhaps of Arabic origin. The name misread Lahai-roi should, therefore, be rendered 'Antelope's (?) jaw-bone.'

Another explanation is proposed by Hommel (*AHT* 200). Adhering to the point as regards the syllable *haz*, he compares the S. Ar. name *Luhā'atāh*. He does not account for *roi*? Should *roi* be *lūri* (see REU)? Samson's Lehi, however, supplies a more obvious clue.

Lāhī, 'jaw-bone,' was a name given to any prominent crag, from a fancied resemblance to a jaw-bone. See *Lāhī*; and cf. *Omegathos* (ὄρον γαθός), a promontory on the coast of Laconia, and 'Camel's jaw-bone' (an Arabic name, Yāḳūt, iv. 353.9 ff.; cp We. *Vakidi*, 298, n. 2).¹

According to E, the well was in the wilderness of Beersheba (Gen. 21.14); J, more precisely, states that it

2. Site. Kadesh and Bered' (v. 14). Jerome knew of a 'well of Hagar' (*OS* 10.13); does he mean the traditional well in the *Hādī el-Muwēlīh*? This strangely formed wady is at the foot of mountains of the same name, and Palmer thinks that there was once a large city here ('perhaps one of the "cities of the south"'). One of the wells has special sanctity, and is connected by the Bedouin with Hagar. Two caves appear to be ancient. The smaller, at the upper end of the wady, on the right hand, was apparently a Christian chapel; the other, on the opposite side, seems to have served as the hermitage (Palmer, *Desert of the Exodus*, 2 354). As to the 'jaw-bone' rock no positive statement can be ventured. On the geographical statement in 7. 14, see BERED, i. To the suggestions there made it may be added that the 'way to SHUR' (7. 7.) would be one of the regions called by the Assyrians Musri. According to the original tradition Hagar seems to have fled, not to Egypt, but to a N. Arabian district called by a name which was confounded with Mizraim (Egypt). This, and not Egypt, was really her native country; this too was the country from which, according to E, she took a wife for her son Ishmael (*21. 14*). See We. *147*, 307. See HAGAR, § 1; ISMAEL, § 2; MIZRAIM, § 2; MORIATH. T. K. C.

BEEROTH (בְּרֹתַי); **Βηρωθ** [BNAI], a city of Benjamin.

In Josh. 18. 25, *βηρωθ* [B], *βηρωθ* [B], 2 S. 4. 2 [A omits]; gentilic **Beerothite** (βηρωθίτης; *βηρωθίτης* [BAL], 2 Sam. 4. 2 5. 9; *βηρωθ*, [BA], *βηρωθ*, [L], 2 Sam. 23. 7; 7. 27, 1 V. *βηρωθίτης*, 1 Ch. 11. 19; 2 *βηρωθ*, [L], 2 *βηρωθ*, [B], 2 *βηρωθ*, [L]).

According to Josh. 9. 17 (*βηρωθ* [B], *βηρωθ* [B² om.]), it belonged originally to the Gibeonite confederation; and, according to 2 S. 4. 3, there was at one time a migration of its inhabitants to Gittaim (see ISHBAAL, 1). Men of Beeroth are mentioned in the great post-exilic list (see EGZA, ii. § 6, § 6. 1; EGZA 2. 2; Neh. 7. 29 (*βηρωθ* [B], *βηρωθ*, [L]) = 1 Esd. 5. 19 (*βηρωθ* [B], *βηρωθ* [L])). It is named by Eus. (cp Reland, 618-19), and is now represented by the modern *El Bireh* (which still owes its name to its abundant supply of water), a village of about 800 inhabitants, in a poor district, about 9 m. N. from Jerusalem, on the Shechem road. Tradition assigns it as the place where Joseph and Mary missed Jesus from the company of returning pilgrims (Lk. 2. 43-45).

BEEROTH OF THE CHILDREN OF JAAKAN, RV **Beeroth Bene-Jaakan** (בְּרֹתַי בְּנֵי יַאכָּאן), 'wells of the b'ne Ja'ākān', a halting-place in the desert, Dt. 10. 6 (*βηρωθ υἱων Ἰακωβ* [BAL]), where it is mentioned before MOSEROTH.² This notice is *pre-Deuteronomistic*, and belongs to a fragment of E's list of stations

¹ So first We. *Prol.* l.c.; cp Moore, *Judges*, 347. It seems a natural inference that *El-roi* originally referred to an antelope (cp *Bali*, *Gnomus*, 2 *BHT* 7).

² The Samar. text has for this verse: 'And the children of Israel journeyed from Moseroth and encamped among the b'ne Ja'ākān.'

which has been inserted by the editor (Bacon, *Tripl. Trad.* 207 f.; cp Meyer, *ZATW* 1. 143; Dr. *Isaac*, 120). In Nu. 83. 31 f. the same name occurs (shortened into *BENE JAAKAN*; 77: 12; *βαναα* [B]; *βανα* [L]) - (-)ακαβ [F]; *banū*, [L]) after Moseroth; but the list of stations in Nu. 33. is of late editorial origin (cp Kue. *Hex.* 98, 102). The spot probably lay somewhere on the edge of the Arabah. Cp *JAKAN*, and *WANDEKINGS*, § 8.

BEERSHEBA (בְּרֵשֶׁבַע בְּרֵי יְצַבְּ, § 107 - i. e., 'well of seven,' rather than 'seven wells' - see below, § 3; *Βηρσαβέ*

1. References. [BAL]: in Josh. 15. 6 *βηρσαβέ* [L]; in Gen. 21. 14 *φραρ ορκισμω* [ADL], 26. 33 *φ. ορκω* [ADL], it is taken as meaning 'well of the oath'.¹ One of the Simeonite towns in the southern territory of Judah (Josh. 19. 2), on the border of the cultivated land, came to be regarded, for the greater part of history, as the remotest point of Canaan in that direction; whence the phrase 'from Dan to Beersheba' (2 S. 17. 11), which, after the fall of the N. kingdom, became from 'Geba to Beersheba' (2 K. 23. 8), or 'from Beersheba to Mt. Ephraim' (2 Ch. 19. 4 *βηρσαβέ* [B]), and in the post-exilic period 'from Beersheba to the valley of Hinnom' (Neh. 11. 7 *βηρσαβέ* [B], *βερ.* [A]) = *βηρσαβέ*, [L], *βερ.* [A]). Yet Beersheba, though the practical, was not the ideal, border of the Holy Land. This ran along the 'river of Egypt,' the present Wādī el-'Arīsh, nearly 60 m. SE. of Beersheba.

An account of the origin of the name and the planting of the sacred tamarisk of Beersheba is given in the story of Abraham (Gen. 21. 22 ff. E); but another story belonging to another document (J) assigns the origin of the well and its name to Isaac (Gen. 26. 26-33). It was the scene of more than one theophany in patriarchal times. It was an important sanctuary frequented even by N. Israel in the time of Amos (5. 5 *φραρ τῶν ὀρκων* [BAU]), who refers with disapproval to those who swear by the life of the divine patron² of Beersheba (8. 14). It was in Beersheba that the two sons of Samuel are said to have exercised their judgeship (1 S. 8. 2), and a day's journey thence into the wilderness is placed the incident of the 'juniper' tree in the life of Elijah (1 K. 19. 3 *βερσαβέ* [A]). Beersheba was the birthplace of the mother of King Joash (2 K. 12. 1 [2] 2 Ch. 24. 1). In post-exilic times it was inhabited by men of Judah.

The ruins at Beersheba belong apparently to early Christian times. The *βηρσαβέ* mentioned in a Roman garrison (103. 22 23. 100). In the time of Jerome the place was of some importance; later, it became unimportant; but by the fourteenth century it had become deserted and ruined.

It is represented by the modern *Bir es-Sabā'*, on the W. es-Seba', 28 m. SW. from Helron (Rob. *BR* 1. 300

2. Identifi- cation. virtually comes to an end with Beersheba, and the country to the south of it is usually barren, there are, for nearly 30 m. S. of Beersheba, ruins of old villages gathered round wells; they evidently date from Roman times.

On Josh. 19. 2, 'Beersheba and Sheba,' see SHEMA (i.). [WRS (*Rel. Sem.* 181) remarks 'The sanctuary of Beersheba properly consisted of the "Seven Wells" which gave the place its name.' Among the Arabs a place called 'Seven Wells' is mentioned by Strabo (16. 4. 24). Robertson Smith has also given abundant evidence of the sanctity attaching to the groups of seven wells among the Semites. Even today seven wells or cisterns seem to have the power of undoing witchcraft (*ZDP* 7. 106). This view is due to Stade (*Gesch.* i. 127), who thinks that the postposition of the numeral was Canaanitish; but, as in the case of Kirjath-arba (see HEBRON, i.), the theory is doubtful. 'Well of Seven' is not inexplicable; 'Well of (the) Seven

1 The Hebrew verb 'to swear' means literally 'to come under the influence of seven things.' See WRS, *Rel. Sem.* 181 ff.

2 Mt gives 'way' (*cutus*); see *ANAN.* § 20.

gods' is intrinsically a probable meaning. Few persons, it is to be hoped, go to Beersheba looking for seven wells. Gautier affirms that there are now only three, though there may once have been more (*Souvenirs de Terre Sainte*,¹ 147; but cp his letter in *Exp. Times*, 10328 (Apr. '99). Trumbull (*Exp. Times*, 889 [Nov. '96]) also states that he saw three wells, but adds that at some distance he saw the remains of a fourth and a fifth. He admits that there may once have been more than five. Cp also Dr. *Exp. Times*, 7507 f. (Sep. '96). For descriptions of Beersheba as it is to-day, see Kolb, *BR 1* 204; Gœnir, *Judée*, 227 228; S. Gourné, *Rev. biblique*, 1895, p. 265.]

BE-ESHTERAH (בְּעֵשְׁתֵּרָה) in Josh. 21:27 (ΒΟCΘΑΡΑ [B]). Cp. [1.], ΒΕΘΑΡΑ [A]), perhaps an abbreviation for בְּיַת עֵשְׁתֵּרָה, 'house of Astarte' (cp Ges., Nestle, *Fig.* 114, etc.). Hommel, however (*Beitr. f. Ass.*, 1897, p. 268), explains 'by Ashtar'; cp the S. Ar. אַשְׁתָּר, 'by Ahtar (i.e., Ashtar)'. Gray (*HPV* 127) also is against the supposed abbreviation of *bēth* into *be-*. See ASH-TAROTH.

BEEBLE, KV CRICKET (בְּרֵכָה; ΟΦΙΟΜΑΧΗΣ¹ [BAPL]; Lev. 11:22f.). By the word so rendered is almost certainly intended a species of locust or grasshopper; the name is one of four used in the verse to denote 'winged creeping things that go upon all fours, which have legs above their feet, to leap withal upon the earth.' The Hebrew name has passed into Aramaic, post-biblical Hebrew, and Armenian; in Arabic *harjalia* means 'a troop of horses' or 'a troop of locusts' (cp Joel 2:4), and the connected verb means 'to proceed in a long train,' as do locusts. 'Beetle' is at all events a wrong rendering; for the *Coloptera* have, as a rule, legs ill adapted for 'leaping upon the earth,' and are seldom or never eaten; whereas certain kinds of crickets, as of locusts, are fried and eaten by Eastern nations. It is impossible, however, to identify the species (if any) referred to. Cp also LOCUST, § 2.

BEGGAR, BEGGING. See ALMS, § 4.

BEHEADING. See LAW AND JUSTICE, § 12.

BEHEMOTH and LEVIATHAN. Two real or supposed animals grouped together in Job 40:15-41, but nowhere else in the canonical books (see however below).² *Bēhēmōth* (בְּהֵמוֹת) 1. Mention of Behemoth.

is no doubt an intensive plural form, and means 'a colossal beast.' It occurs (a) in Job 40:15-24, probably (b) in Is. 30:6, but hardly (c) in Ps. 73:22.³

In (a) the animal so called is described at length. This description is followed by a sketch of Leviathan, and most critics have thought, specially on the ground of the 'hyperbolic' expressions, that the two pictures are later insertions in the speeches of Yahwē (see JOH). Whether the expressions are truly called 'hyperbolic,' we shall see presently. Almost all modern critics, whether they separate Job 40:15-41 from the main body of the speeches of Yahwē or not, have thought that *Bēhēmōth* is a Hebraised form of an Egyptian word for the hippopotamus (*he-che-mū*, 'water-ox'), but there is no philological basis for this opinion.⁴ In (b) Is. 30:6 בְּהֵמוֹת אֲשֶׁר אֵין עִלָּיהֶן אֵין מִתְּחִילָה is probably to be rendered 'Oracle of the monster (*bēhēmōth*)

of the south land.'⁵ This is the heading of a short fragmentary passage of prophecy, and refers to the description of Egypt at the end of 5:7 as 'Kushah the quelled one' (see KAHAR, II, § 8). 'The south-land' (Negeb) is here, as in Dan. 8:11, 5*f*., a designation of the second of the two empires which endangered Palestine, —i.e., Egypt,—the other being *Shaphan*, 'the northland' (Jer. 10:15 Zech. 2:6 [10])—i.e., in a large sense, Babylonia. So Del. The heading in v. 6 may be very late.

Delitzsch finds *Bēhēmōth* also in (c) Ps. 73:22, 'As for me, I was senseless and ignorant, I was a *Bēhēmōth* toward thee' (Del., Nowack). This rendering is correct, if the text is sound, and if the speaker is an individual. If, however, the speaker is to be understood collectively, we may perhaps render, 'I was (like) the beasts toward thee.' So Bā; but the absence of the particle of comparison is a difficulty. If we compare 49:10 [11] 92:6 [7] it becomes plausible to read, with Grätz, מְבֵרָתִי, 'I was devoid of understanding toward thee.'

Leviathan (לִוְיָתָן, *liwythān*), 'wreathed'—i.e., 'gathering itself in folds'; or perhaps of Bab. origin) is a designation of a mythic serpent in

2. Of Leviathan. all the passages in which it occurs, unless Job 41:1 be an exception.² See also LEVIATHAN. It is found (a) in Job 41:1 (40:25), 'Canst thou draw up³ Leviathan with a hook, (and) press down his tongue with a cord?'; (b) Job 38, 'Let those who lay a ban upon the sea⁴ curse it, (those) who are appointed to rouse up Leviathan'; (c) Is. 27:1, 'In that day shall Yahwē punish Leviathan the fugitive serpent, and Leviathan the coiled serpent, and he shall slay the dragon in the sea'; (d) Ps. 74:14, 'Thou didst slatter the heads of Leviathan, and gavest his [carcase] to be food for the jackals'; (e) (b) Ps. 104:26, 'There do the dragons move along, (there is) Leviathan whom thou didst form to be its ruler.' To these references, two supplied by apocryphal writers may be added: (f) En. 60:7-9, cp 24 f.; (g) 4 Esd. 9:49-52; cp Apoc. Bar. 29:4.

In the present article we shall desert the zoological explanation of *Bēhēmōth* and *Leviathan*, leaving the field open to another writer to represent the

3. Both more generally received opinion (see HIPPOPOTAMUS, CROCODILE). Strong reason **mythical monsters** will have to be shown for not interpreting these strange forms with some regard to mythology. No one would assert that the author of Job had an altogether distinct mythological conception; but modern commentators who disregard the mythic basis of the descriptions make a serious mistake.

It was natural in 1887 to look for illustrations of the Job passages, (d) and (e), to Egypt,⁷ though reference should have been made, not to the fantastic griffins on certain wall-paintings, but to the idealisation of the ordinary monsters of the Nile in the mythic narratives of Rē' and Osiris. 'There are supernatural as well as natural hippopotamuses and crocodiles, and it is a specimen of these which the poet has given us. The descriptions are hyperbolic and unpleasing, if referred to the real monsters of the Nile; they are not so if explained of the "children of defeat," with the dragon Apopi at their head,⁸ which the poet, by a fusion

¹ The alternative explanation, 'Oracle of the beasts of the south'—i.e., of the desert which adjoins the south of Judah—is less natural. Why 'the south' instead of 'the desert'? And why are serpents called בְּהֵמוֹת, 'beasts' ? מִתְּחִילָה would have been more in place. Cp *S. 707* on Is. 30:6.

² B renders Leviathan as follows:—in (f) δράκοντα (Aq. Sym. *Aspidochelone*), in (c) τὸν μέγα δράκοντα *Aspidochelone*, Th. *Aspidochelone*, in (f) τὸν δράκοντα (Aq. Sym., Th. *Aspidochelone*) [twice], in (g) τὸν δράκοντα (Aq. *Aspidochelone*), in (h) δράκοντα.

³ צִוְיָתָן for MT לִוְיָתָן. The final letter of v. 24 (now מִמֶּנּוּ, 'his snout') and the first letter of v. 25 became effaced. Ewald (*Lehrb. d. Hebr. Spr.* 791) makes an elaborate attempt to account for the absence of the interrogative particle (ה) in MT, based on the theory that the Arabic word for crocodile (*timāh*) existed in the Hebrew vocabulary of Job. Similarly Budde; Duhn leaves the point undecided. Against this, see Che. *Exp.positor*, July 1897.

⁴ Read פֶּתַח לַיָּם, with Gunkel, to restore parallelism; cp Ps. 74:13 f. 104:25 f. 18 27 f.

⁵ Reading מְבֵרָתִי מִכֹּל מִשְׁכָּל מְבֵרָתִי, Cp Fox.

⁶ Reading מְבֵרָתִי for the scarcely possible מְבֵרָתִי, 'ships'; and correcting מִן מְבֵרָתִי into מְבֵרָתִי, Cp Che. *Ps.* 73.

⁷ Che. *Job* and *Sol.* 56, where the first recent critical protest was made against the dominant theory. Cp the fantastic forms described in Maspero, *Struggle of the Nations*, 84.

⁸ See Maspero, *op. cit.* 159.

¹ Ἀσπίς according to the order in ΘΙΑΡΑ; ἄρακίς is mentioned in hexapla MSS as a rendering by ἄρακίς.

² It will be seen that on one strongly supported theory there are parallels to this combination.

³ The versions render *Bēhēmōth* as follows:—in (a) θηρία [LXX f. κτηνῶν [Aq. Thoma]], in (b) τῶν τετραπόδων [LXX], κτηνῶν [Aq. Sym. Th.], in (c) κτηνῶν [LXX, Sym.].

⁴ So independently WMH (Egyp., § 9). The objections are as follows:—(1) The final *th* in *Bēhēmōth* is unaccounted for (Lepsius). (2) The Egyptians had several names for the hippopotamus (e.g., *rer*, 'a beast that rolls itself in the mud'); but the texts nowhere mention *he-che-mū*. (3) The form, if it existed, would be *mū-che* (F. C. Cook). It is strange that Jablonski, who died in 1757, and could know only Coptic, and that imperfectly, should be consulted in preference to Birch, who, after supposing himself to have found the old Egyptian original of *Bēhēmōth* in *bekhama*, discovered afterwards that the name was really *kheb* (Renouf, *Exp.positor*, July 1897). Cp REMPHAN. On an analogous attempt to justify the interpretation of *Leviathan* as a crocodile, see col. 520, n. 3.

historically most justifiable,¹ identifies with the monsters of Babylonian origin called elsewhere Rahab and his helpers (Job 9:13). And even in the uncorrected but still more in the corrected text there are expressions and statements which are hardly explicable except on the mythological theory.² How, for example, can the hippopotamus and the crocodile be said to be, not merely dangerous to approach, but beyond the range of hunters? There is evidence that even in early times the Egyptians were skilled in attacking and killing them. How, too, can the ordinary hippopotamus be called 'the firstling of the ways of God' (Job 40:19), and the ordinary crocodile be said to be feared by all that is lofty, and to be king over all the sons of pride³ (Job 41:34 [26])?

The Babylonian elements in Behemoth and Leviathan, however, are more important than the Egyptian. They have been pointed out, though with some exaggeration, by Gunkel, who also noticed how much the text of the accounts of Behemoth and Leviathan has suffered in transmission. It may be hoped that by the light of the mythological interpretation the corruptions may be partly removed. For example, Job 41:9-11 [1-3] may be plausibly emended thus (see *JQR*, April, 1897):—

Surely thy self-confidence proves itself vain;
From divine beings thy power all families know.
An angel shudders when he would arouse him;
Who then taunted the gods would dare to meet him as a foe?
Who ever contemplated him and came out safer?
Under the whole heaven, not one!

The un-emended form of this passage, it is true, does not favour a mythological interpretation; but it is very difficult to give it any plausible meaning, whereas the emended text is in perfect harmony with all that we hear of Leviathan elsewhere. One more proof of the helpfulness of the new theory may be given. No passage has puzzled interpreters more than Job 40:19 *b*. The RV renders thus, 'He (only) that made him can make his sword to approach (unto him)'. הרבו, however, should be רבצו (Giesebrecht). The real meaning is, 'that was made to be ruler of his fellows' ('הרבו עניו')—i.e., Behemoth is the king of all land animals. Take this in connection with Job 41:25 [33]⁴ and Ps. 104:26, and it would seem that Leviathan was regarded as lord of the ocean, and Behemoth of the dry land. The former notion was borrowed from the Babylonians; the latter perhaps from the Egyptians.⁵

Thus the Behemoth and Leviathan passages in Job represent a fusion, from every point of view most natural, of Babylonian and Egyptian elements. The dragon is primarily Babylonian: it is Tiamat (= תהום; see CREATION, § 2 *f*). Behemoth may be ultimately identified with Tiamat's consort Kingu. Being ignorant of the mythic monsters in question, the poet naturally filled up the gaps in his knowledge from two monsters of the Nile which the Egyptians regarded as representatives of the evil god Sit.⁶

Coming now to (*f*), Is. 27, we note that the writing belongs to a prophetic passage which has a strong apocalyptic tinge, and stands at the head of the period which produced the apocalypse of Daniel.⁷ Nowhere perhaps in the OT is the phraseology more distinctly

mythical. 'Leviathan the fleeing serpent' finds its explanation in the carving on a seal representing Marduk with a dagger pursuing the dragon which flees before him in the shape of a serpent, and 'Leviathan the coiled serpent' is the mythic phrase for the ocean which surrounds the earth.⁸

In (*g*), Ps. 74:14, a psalmist gives a somewhat different view of Leviathan. To him the destruction of Leviathan is past. This is, of course, the original view represented in the Babylonian Creation-story (see CREATION, § 2). The passage should most probably be read thus:—

Thou didst shatter the head of Leviathan,
And gavest up his [carcase] as food for the jackals.

There is no reference to the unburied corpses of the Egyptians (Ex. 14:30); 'the people inhaling the wilderness' is an impossible rendering of a corrupt text (see FOX). We have here simply an amplification of a mythic detail in the story of Tiamat (see the Babylonian Creation-tablet iv. l. 104; the same detail which explains a fine passage in the latter part of Isaiah (Is. 51)).

Taken by itself (*h*), Ps. 104:26, it must be admitted, gives no confirmation to our mythological interpretations. Leviathan appears as one of the monsters of the sea, and we are told that Yahweh himself 'formed' him as its ruler. The writer may know nothing of mythology. He has heard this said, and repeats it.

We now turn to (*i*) and (*j*), the apocryphal passages. The former (Enoch 60:7-9) runs in Charles's translation from the Ethiopic version (155):—'And in that day will two monsters be parted, a female monster named Leviathan, to dwell in the depths of the ocean over the fountains of the waters. But the male is called Behemoth, who occupies with his breast (?) a waste wilderness named Dendäin, on the east of the garden. . . . And I besought that other angel that he should show me the might of these monsters, how they were parted on one day, and the one was placed in the depths of the sea and the other in the mainland of the wilderness.'

The latter (4 Esd. 6:49-52) is as follows:—'Et tunc conseruasti duo animala, nomen unius uocasti Behemoth, et nomen secundi uocasti Leviathan. Et separasti ea ab alterutro, non enim poterat septima pars ubi erat aqua congregata capere ea. Et dedisti Behemoth unam partem que siccata est tertio die, ut inhabitet in ea, ubi sunt montes mille; Leviathan autem dedisti septimam partem humidam; et seruasti ea ut fiant in deuoracionem quibus uis et quando uis.' (Behemoth becomes uehemoth in cod. M and Enoch in codd. SA [so AV].)

It is needless to pause long on the purely Jewish elements in these descriptions.⁹ That Behemoth was created on the fifth day was an inference from Gen. 1:21; the reference to the 'thousand mountains' comes from a faulty reading in Ps. 50:10 (where ארץ should be אל) combined with an absurd interpretation of ארצות in the same passage. The chief points to notice are these: Behemoth and Leviathan are not two great water-monsters, but have their habitation, the one on the dry land, the other in the deep;³ the Dendäin of Enoch may possibly be the Babylonian *danninu*, which is a synonym of *irsitiu*, 'the earth,' and is literally 'the firm.'⁴ According to Gunkel, the female monster Leviathan is Tiamat, and the male monster Behemoth is Kingu, Tiamat's husband (on whom see Creation-tablet iv. ll. 119-122). In the Babylonian story these monsters met their fate at creation; in Enoch the assignment of their respective dwellings is an incident of the judgment at Noah's flood; in 4 Ezra again it is a detail of creation. It is not safe, however, to dogmatise too freely on the sources of the apocryphal writers. Their notions were probably a strange compound, in which there were exegetical inferences side by side with corrupted statements of Oriental tradition. One of these statements appears to have related to the habitation of Behemoth—at least, if we may accept Zimmern's explanation of Dendäin, which Dillmann and Charles

¹ Hommel (*Der bab. Urspr. der Apok. Kultur*, 1892, p. 40) connects Apopi or Aepw with Bab. *abûn*, 'storm-flood.' Apopi is the Tiamat of heaven. His head is split by the conquering Re' into two parts; Tiamat's body is so treated by Marsik.

² Reading ארץ לניבא, with Budde (improving slightly on Gunkel). The 'sons of pride' (if ארץ is correct) may be a phrase equivalent to 'Rahab's helpers.' If so, mythic monsters are referred to.

³ לביית is probably a corruption of לביית (Che.). Leviathan was made to be lord of living creatures (i.e., those of the ocean-depth, tēhôm, just mentioned).

⁴ Che. *Expositor*, July 1897.

⁵ Cp Maspero's *Struggle of the Nations*. Pinnaich (*De Is. et Ostr.* 56) well knew the connection of the two Nile-monsters with Typhon or Sit.

unconvincingly connect with בָּקָהּ (comparing Dudaël, Enoch 104, which is certainly not a mere fiction of the author). The view here taken is, of course, quite consistent with Charles's theory (*Bar.* 53) that the writers of 4 Esd. 6:30-7:25 and Bar. 27-30 both used the text of an earlier work which contained the story of the six days of Creation. This lost hexahemeron, just as much as 4 Esd. 6:38-64, represents not a homogeneous tradition, but a medley of notions derived from different sources, Jewish and Oriental.

On the subject of this article consult Gunkel, *Schöpfung*, 47-69; Di's, Bu's, and Du's commentaries on Job; Che. 'The Book of Job,' etc., *Expositor*, July, 1897, and 'The Text of Job,' *JQR*, April 1897. See also DRAGON, § 47, RAHAB, i. and cp HIPPOPOTAMUS, CROCODILE. On the oscillation of mythic and semi-mythic statements between the dragon and the crocodile as the enemy of the Sun-god, cp Clermont-Ganneau, *Horus et Saint Georges* (extrait de la rev. archéol.), 1877, pp. 8, 25.

T. K. C.

BEKAH, RV Beka (בִּיקָהּ), Ex. 38:26. See WEIGHTS AND MEASURES.

BEL (בֵּל; 𐤁𐤋𐤏 BHAL[OC], 𐤁𐤋), Ass. *bīlu*, like 𐤁𐤋 (Baal), is a simple appellative meaning 'lord' quite as often as it is a proper name (see PHœNICIA). In the Assyrio-Babylonian pantheon it is borne by two deities (see BABYLONIA, § 26), the younger of whom, identified with Marduk (see MERODACH), finds mention in writings of the Babylonian and Persian periods (Is. 46:1 Jer. 50:2 [77:2], 51:44 (S omits)).

The extent of the cultus of this god in later times appears from the many proper names compounded with Bel in Phœnician, and more especially in Palmyrene inscriptions.² Jacob of Serug states that he was the god of Edessa (*ZDGG* 29 131).

BEL AND THE DRAGON. See DANIEL, ii. § 21, and cp §§ 19, 19.

BELA (בֵּלָה; that which is swallowed up?': cp Jer. 51:44; ΒΑΛΛΑΚ [ADL], -ΑΛΛΑ [E in Gen. 14:2]), one of the five royal cities in the vale of Siddim at the time of the invasion of CHEDORLAOMER (*q.v.*, § 2), Gen. 14:28, where the name receives the geographical explanation, 'that is Zoar.' In fact, in Gen. 19:20-23 we hear of a small city near Sodom, the name of which was called ZOAR (*q.v.*), to commemorate the escape of Lot from the catastrophe of Sodom and the other 'cities of the plain.' The writer of the explanation in Gen. 14:28 evidently means us to suppose that the original name of Zoar was Bela. The author of Gen. 19 (J), however, does not appear to have known this. In 13:10 the same writer speaks of Zoar as bearing that name before the catastrophe of Sodom, and a comparison of the phraseology of 25:30 makes it probable that the etymological myth in 19:20-22 does not really presuppose a change of name. It is probable that, had the name of Bela been known in the comparatively early period when Gen. 19 was written, an etymological myth would have grown up to account for it.—Therefore that region is called Bela, because the ground opened her mouth and swallowed it up' (cp Nu. 16:30).

Such a myth did, as a fact, spring up, but long afterwards, and not as a fruit of the popular imagination. In the Targum of Jonathan the phrase 'the king of Bela' (Gen. 14:2) is paraphrased as 'the king of the city which consumed its inhabitants.' The same interpretation was given by R. Meir and his contemporary Joshua b. Karcha (Bacher, *Die Agado der Tannaiten*, 38), and is repeatedly given on the authority of 'the Hebrews' by Jer. (*Quart.* in Gen. 14:2 19:20; *Comm.* in Jer. 15:5); it has also naturally enough found a place in the Midrash (*Ber. rabba*, par. 42). Hommel (*AHT* 195-198) boldly identifies Bela with the ancient city of Malkā, which he surmises to have been in the trans-Jordanic region; but his authority for giving

this situation to Malkā is a tablet which refers not to Malkā but to Melkart (Johns, *Expos.*, Aug. 1898, p. 160).

It is remarkable that no name is given to the king of Bela. When we consider the (probable) corruptness of other names in the passage, it is reasonable to suppose that the name, being uncouth, early dropped out of the text. To supply 'Bela,' with Bishop Hervey (Smith's *DB*³), is unnatural. T. K. C.

BELA (בֵּלָה). 1. (ΒΑΛΛΑΚ [ADEL], -ΛΕΚ [E in Gen. 36:33]). The first Edomite king, son of Beor (or perhaps Achbor; see BAAL-HANAN [1]), of the city of Dinhabah (Gen. 36:32 f. = 1 Ch. 1:43 f.). It is singular that a diviner famous in legend was called 'Bil'am (Balaam) son of Beor.' With Nöldeke (*Untersuch.* 87) and Hommel (*AHT* 153) we may venture to identify Bela' and Bil'am, and all the more confidently if Bil'am belonged to a region adjoining Edom (see PETHOR). Obviously the temptation which the name presented to an imaginative narrator must have been irresistible. Targ. Jon. and Targ. 1 Ch. 1:44 had already suggested the identification. The list which contains the name Bela ben-Beor is regarded by Sayce as a piece of an Edomite chronicle. It comes before us, however, as a thoroughly Hebrew document, and is correlated with the history of the b'ne Israel (Gen. 36:31-39; probably JE). Certainly it is no sport of the idealistic imagination; a true interest in the fortunes of a kindred people prompted its preservation. It may be incomplete, or it may have had some lacunae filled up ignorantly, not to speak of the undeniable corruptions of the text. Let us take the list as it stands, and see what we can gather from it.

The list contains eight names (or rather seven, for Baal-hanan has come in through a scribe's error). Four kings have their fathers' names given;¹ six are distinguished by the name of their city, and one is described as of a certain region (HUSHAM). The names both of the cities and of the persons (or apparent persons) are not all correct. DINHABAH, MATRED, and MEZEHAB are corrupt, and the corruptions efface the important fact that Bela (whose city was not Dinhabah but Rehoboth; cp *v.* 37) and Mehetabel came from the N. Arabian land of Musri or Musur (see MIZRAIM, § 2 b). It will be noted that one of the names occurs twice (in *v.* 39, 'Hadar' is certainly a wrong reading): it is properly the name of a god—of the Aramæan god Hadad. From this name, and from two other items—'Bela the son of Beor' and 'Saul of Rehoboth by the river'—Bishop A. C. Hervey inferred (Smith's *DB*,³ *v.* 5, 'Bela') that there had been an Aramæan conquest of Edom. The references to Bela and Saul, however, are not really in point (cp BALAAM, § 3), and all that the doubly attested HADAD, 3 [i. 2]—together with BEDAD—can be held to suggest is that Aramæan influence was early felt as far south as Edom.

More important is the historical notice connected with the name of Hadad, son of Bedad (see also HUSHAM). It tells us of the early occupation of what afterwards became the land of Moab by the Midianites, whom the Edomites under Hadad defeated. We can understand this notice in the light of Gideon's defeat of the same plundering hordes, described in Judg. 7. To make the two events contemporary, with Kautzsch in Riehm's *HWB*³ (art. 'Midian'), seems needless and hazardous.

Of most interesting as well as most certain result, however, is the antiquity of regal government among the Edomites; and, from the fact that there is no trace of dynasties, and from the continual references to the cities of the respective kings, we may probably infer, with Winckler, that the kings were of the type of Abimelech, or at the most of Saul, and that their rule, except in time of war, was little felt save by their own tribe. It is true that this will not apply to Saul of Rehoboth of the River, for this place seems to have

¹ The evidence of some proper names, however, may seem to show that Bel was not unknown in Canaan at an earlier date (see ASHBEI, BILDAD, EBAL, and cp, doubtfully, Balaam and Reuben).

² Whether the Palm. בֵּל is a bye-form of בֵּל = בַּל, as Hoffmann supposes (*Auszüge aus d. Syr. Act. Pers. Mänt.*, 1880, p. 21, n. 159), is uncertain.

³ BAAL-HANAN (*q.v.*) was perhaps really the father of Hadad II.; ben Achbor is a variant to ben Beor which has attached itself to the wrong name.

a primitive element in Babylonian mythology (see CAINITES, § 6).

Hommel, while accepting this identification, proposes a modification of the theory. He thinks that the Assyriobabylonian phrase quoted above was simply translated לְבַשְׂתִּים by the Canaanites, from whom the name was borrowed again by the Babylonians as Belili (*Exp. Times*, 8 472). This is plausible; but we should like to know how far this theory would lead us.
