UNIVERSITY CATALOG

2024–2025

Tulane University

TABLE OF CONTENTS

2024-2025 UNIVERSITY CATALOG

This version of the catalog was published in May 2024 and takes precedence over any previously printed or online catalog. The University Catalog is not intended to nor does it contain all regulations that relate to students. Students are held individually responsible for meeting all requirements as determined by Tulane University. Failure to read and comply with policies, regulations, and procedures will not exempt a student from being governed by and accountable to them.

The catalog of the University is the document of authority for all students. Any academic unit may issue additional or more specific information (e.g. student handbooks or program manuals) that is consistent with approved policy. These publications provide detailed and useful information; however, the information in the catalog supersedes that issued by any other unit if there is a conflict between the two. The University reserves the right to change the requirements given in the catalog at any time. Changes will become effective whenever the proper authorities so determine and will apply to both prospective students and those already enrolled.

Academic Calendars (https://registrar.tulane.edu/Academic_Calendar/) Financial Aid (https://financialaid.tulane.edu/) Newcomb-Tulane College (https://college.tulane.edu/) Office of Institutional Equity (https://equity.tulane.edu/about-oie/) FERPA Annual Notice (p. 12) Gibson Online (https://gibson.tulane.edu/) Office of Graduate and Postdoctoral Studies (https://ogps.tulane.edu/) Office of the University Registrar (https://registrar.tulane.edu/)

Catalog Production Information

The 2024-2025 Tulane University Catalog was produced by the Office of the University Registrar in conjunction with the Office of Academic Affairs and Provost.

FERPA Annual Notice

May 1, 2024

Dear Tulane University Students:

I want to take this opportunity to make you aware of Tulane University's policy regarding student educational rights under the Family Educational Rights and Privacy Act (FERPA), the federal law that governs release of and access to student educational records. These rights include:

1. The right to inspect and review the student's education record within 45 days of the day Tulane University receives a request for access.

2. The right to request an amendment to the education record that the student believes is inaccurate, misleading or otherwise in violation of the student's privacy rights under FERPA.

3. The right to provide written consent before Tulane University discloses personally identifiable information from the student's education record, except to that extent that FERPA authorizes disclosure without consent.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Tulane University to comply with the requirements of FERPA.

Directory Information

Under FERPA, directory information may be disclosed, upon request, without prior consent of the student. Directory information is information contained in an education record of a student that would not generally be considered harmful or an invasion of privacy if disclosed.

Tulane has designated the following as directory information:

- Student name (Legal name and Preferred Name)
- Permanent, Local, & Campus Addresses
- Telephone Numbers
- Email Address
- Dates of Attendance
- Classification
- Major
- Awards/Honors
- Degrees Conferred
- School
- Enrollment status (e.g., freshman, sophomore, junior or senior; first-year, second year, or third year)
- Full/part time status
- Past/Present participation in University sanctioned sports/activities
- Physical factors (height, weight, etc. for athletes)
- Date/Place of birth

According to FERPA, a student can request, while still enrolled, that the institution not release any directory information about the student. Institutions must comply with this request. At Tulane, students who wish to restrict the release of directory information about themselves can do so by updating the "Confidentiality Flag" under Records on Gibson Online.

Please consider your decision to restrict directory information carefully, as ANY and ALL requests for directory information will be refused. When Tulane faculty, staff, and students attempt to send you an email via Tulane's email network, your email address will not auto populate in the address bar.

Learn more about your records and privacy (https://registrar.tulane.edu/student-data/records-privacy/)
Questions concerning FERPA may be referred through email to the Office of the Registrar at registrar@tulane.edu.

Thank you,

Colette Raphel

University Registrar

THE UNIVERSITY

Mission Statement

Tulane's purpose is to create, communicate and conserve knowledge in order to enrich the capacity of individuals, organizations, and communities to think, to learn, and to act and lead with integrity and wisdom.

Tulane pursues this mission by cultivating an environment that focuses on learning and the generation of new knowledge; by expecting and rewarding teaching and research of extraordinarily high quality and impact; and by fostering community-building initiatives as well as scientific, cultural and social understanding that integrate with and strengthen learning and research. This mission is pursued in the context of the unique qualities of our location in New Orleans and our continual aspiration to be a truly distinctive international university.

History

Tulane University, one of the foremost independent national research universities in the country, is ranked among the top quartile of the nation's most highly selective universities. With ten schools and colleges that range from the liberal arts and sciences through a full spectrum of professional schools, Tulane gives its students a breadth of choice equaled by few other independent universities in the country. Tulane University's ten academic divisions enroll approximately 8,000 undergraduates and about 5,000 graduate and professional students. The schools of Architecture, Business, Liberal Arts, Public Health and Tropical Medicine, and Science and Engineering offer both undergraduate and graduate programs. Other divisions include the schools of Law, Medicine, Social Work and Professional Advancement.

Tulane traces it origins back to the founding of the Medical College of Louisiana, the Deep South's first medical school, in 1834. Classes started the next year when 11 students and seven faculty members met in a rented hall; students paid for instruction by the lecture. Born of the desperate need for competent medical care in this region and of the founders' dedication to study and treat "the peculiar diseases which prevail in this part of the Union," the college quickly earned recognition. Soon the medical college merged with the public University of Louisiana in New Orleans, adding a law department and a "collegiate" department that became Tulane College. The university continued building a national reputation. J.L. Riddell, professor of chemistry, built the first successful binocular microscope in 1852. The medical department faculty fought for improved public health and sanitation, and, in 1857, Christian Roselius, an early graduate of the collegiate and law departments, was appointed chief justice of the Louisiana Supreme Court.

The Civil War forced the university to close. After the war, the university reopened in financial trouble. Total assets, excluding buildings, totaled $4,570.39 in 1866. In the early 1880s, merchant and philanthropist Paul Tulane provided a permanent solution by donating more than $1 million "for the promotion and encouragement of intellectual, moral, and industrial education." Tulane had made his fortune in New Orleans before returning to his native Princeton, New Jersey; his gift expressed his appreciation to the city.

The 17-member board authorized to administer the Tulane Educational Fund decided to revitalize the struggling University of Louisiana instead of founding a new institution. Paul Tulane concurred, and in 1884, the Louisiana Legislature gave the University of Louisiana to the Administrators of the Tulane Educational Fund. Tulane University of Louisiana, a private, non-sectarian institution, was born. As a result of its new strength, the university was able to create the Department of Philosophy and Science, which later became the Graduate School, and initiate courses in architecture and engineering.

In 1886, Josephine Louise Newcomb founded Newcomb College as a memorial to her daughter, Harriott Sophie. Newcomb College was the first degree-granting women's college in the nation to be established as a coordinate division of a men's university. It became the model for other coordinate women's colleges, including Barnard and Radcliffe. Newcomb's founding is linked with the World's Industrial and Cotton Exposition, which opened in Audubon Park in 1884. Several artisans who came to the New Orleans Exposition to exhibit their own work and see the works of others stayed to establish the arts program, which was at the heart of Newcomb's early curriculum. By the early 1900s, Newcomb pottery had won a bronze medal at the Paris Exposition, its fame had spread across the nation and young women were engaged in the unusual task of earning an independent living.

In 1894, Tulane moved to its present campus on St. Charles Avenue, five miles by streetcar from its former site in downtown New Orleans. At about the same time, the Richardson Memorial Building was built on Canal Street to house the medical school. Some medical classes were moved to the uptown campus, but clinical teaching remained downtown. The medical school was split between campuses until a major reorganization in the 1960s. For a quarter of a century, Newcomb College was located on Washington Avenue in the Garden District. In 1918 it, too, moved uptown to join other divisions of the university. Around the turn of the century, Tulane's curriculum grew as several new professional schools were established, including the Deep South's first schools of architecture, business, and social work. City officials frequently consulted the College of Technology, which became the School of Engineering, on construction techniques and soil conditions. Engineering alumnus A. Baldwin Wood designed the famous Wood screw pump that helps drain New Orleans in times of torrential rains and flooding. The first student yearbook, *Jambalaya*, and the first *Tulanian*, the alumni magazine, were published. The Alumni Association was founded with 800 members, and significant contributions to the university financed new buildings, library holdings and research facilities. The Middle American Research Institute, founded in 1924, became a pioneer in Central American archaeology and anthropology, excavating and restoring the Mayan village of Dzibilchaltun in the Yucatan.

Since then, research in many disciplines has flowered through the establishment of research centers including the Murphy Institute of Political Economy, Newcomb Research Center, the Roger Thayer Stone Center for Latin American Studies, the Center for Bioenvironmental Research, the Brain Institute, the Tulane Museum of Natural History, and the Amistad Research Center— curator of one of the largest collections in the world of primary source material on American ethnic groups, especially African-Americans.

As early as the 1890s, Tulane offered free lectures and classes to the New Orleans community. This commitment to community service was reaffirmed in 1942 with the founding of University College, now

the School of Professional Advancement, which offers educational opportunities for working adults.

After World War II, Tulane's Graduate School and the professional programs continued to grow. The university was elected to the Association of American Universities, a select group of over 60 universities with "pre-eminent programs of graduate and professional education and scholarly research."

In the fall of 2005, following the devastation of Hurricane Katrina, Tulane University was confronted with unprecedented and existential challenges. The administration and the Board of Tulane University were faced with redefining and renewing the university for the future. President Scott Cowen called the resulting plan "the most significant reinvention of a university in the United States in over a century."

The plan had at its center:

- a focus on an exceptional undergraduate program that is campus- and student-centric and a dedication to the holistic development of students.
- a core that is surrounded and strengthened by superb graduate, professional, and research programs that build on the university's historical strengths and distinctive characteristics.

In July 2014, Michael Fitts became the 15th president of Tulane, bringing with him a strong emphasis on heightening cross-disciplinary education and research.

Under President Fitts' leadership, Tulane's national ranking and reputation have improved dramatically; each year's incoming classes have broken records in terms of their academic achievements and diversity; the university's annual operating cash deficit of $15-20 million has been eliminated and the university has enjoyed record fundraising years.

President Fitts believes students and higher education institutions can set themselves apart in a fast-changing world and ever-shifting economy through the combining of different fields and skills. In his first year at Tulane, he launched task forces to lead the university in deepening its unique strengths for interdisciplinary collaboration. He sees powerful advantages in the university's manageable size, its wide selection of professional schools, the unified undergraduate college, and multiple cross-disciplinary projects already in place. He aims to create the most engaged undergraduate experience in the country through this rethinking of academic options, residential living, extracurricular activities, and more. In graduate education and research, he will foster intellectual cross-pollination that can produce solutions to some of the world's most fundamental problems.

This focus also extends to Tulane's physical campuses. President Fitts has initiated a campus master planning process with a 21st century vision of spaces redesigned to promote connections. That includes drawing people together from different parts of campus and linking different functions of the university, such as residence halls with dining hubs and academic venues.

The many major building projects under Fitts include the more than $35 million Goldring/Woldenberg Business Complex; the transformation of Mussafer Hall into the central location for services dedicated to student success; the building of new residence halls; and construction of The Commons, a three-story, $55 million, 77,000-square-foot marvel that houses a new dining hall, multipurpose meeting spaces and a permanent home for the Newcomb College Institute.

Another avenue for making connections is public service, an area where Tulane is a leader in higher education. President Fitts lauds the pursuit of community work for its power to show students how theory connects with practice. It gives them real-world experience with the concepts they study in class. His vision for the university includes enhancing the ties between public service and academics.

Accreditation

Tulane University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, doctorate, and professional degrees. Questions about the accreditation of Tulane University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (www.sacscoc.org).

University Administration

Michael A. Fitts
President of the University
J.D., Yale University

Robin Forman
Sr. Vice President for Academic Affairs and Provost
Ph.D., Harvard University

Patrick Norton
Sr. Vice President and Chief Operating Officer
M.A., Columbia University

Academic Affairs

Michael Cunningham
Associate Provost, Graduate and Postdoctoral Studies
Ph.D., Emory University

Laila Hlass
Associate Provost for International Affairs
J.D., Columbia Law School

M.A. Krousel-Wood
Associate Provost, Health Sciences
M.D., Louisiana State University

Mimi Schippers
Associate Provost for Faculty Affairs
Ph.D., University of Wisconsin-Madison

Anneliese Singh
Associate Provost, Faculty Development and Diversity/Chief Diversity Officer
Ph.D., Georgia State University

Newcomb-Tulane College

Mollye Demosthenidy
Dean
J.D., Tulane University

Kelly Grant
Senior Associate Dean, Retention & Strategic Initiatives
M.A., University of New Orleans

School of Architecture

Iñaki Alday
Dean
M.Arch., Polytechnic University of Catalonia, Barcelona

Scott Bernhard
Associate Dean, Academics
M.Arch., Rice University

Richard Campanella
Associate Dean, Research
M.S., Louisiana State University

A.B. Freeman School of Business

Paulo Goes
Dean
Ph.D., University of Rochester

Xianjun Geng
Senior Associate Dean, Academic Programs
Ph.D., University of Texas at Austin

Sheri Tice
Senior Associate Dean for Faculty and Research
Ph.D., Michigan State University

School of Law

Marcilynn Burke
Dean

- Name Changes
- Overlap Policies
- Posthumous Degrees
- Registration Policies and Procedures
- Religious Observation
- Residency
- Transfer Credit Acceptance After Matriculation

Address Changes

It is the responsibility of the student to keep the university notified of changes in local or permanent address. Many important notices are sent to students and parents via US mail and it is therefore import to maintain accurate mailing addresses. These notices may include: communications from individual schools within the university or Information Technology, bills (if requested via mail), and notices concerning academic action. It is therefore essential that any change in address be updated using the "Update Addresses and Phones" option found under Student Services on Gibson Online.

Behavior Norms

Listed below are generally accepted guidelines for student behavior in classrooms, laboratories, and studios. Instructors and schools may impose other expectations.

- Computers are to be used for class-related purposes only; instructors will specify when computers may not be used.
- Students and instructors will turn off all cell phones and electronic devices at the beginning of each class; these items will remain off for the duration of the class.
- Students and instructors are required to observe copyright laws.
- Students are responsible for checking their Tulane e-mail accounts daily when classes are in session.
- Instructors expect students to be punctual when arriving for classes and presentations; they also expect uninterrupted attendance for the duration of the class.
- Students submitting work late can expect, at the instructor's discretion, to have the work refused or to receive a grade penalty.
- Videotaping or recording a class requires the instructor's approval in advance.

Code of Student Conduct

All students are bound by the Code of Student Conduct that is administered by the Office of Student Affairs. The full text is available here (https://conduct.tulane.edu/resources/code-student-conduct/).

Course Retake

Courses Repeatable for Credit

Some Tulane University courses (e.g., special topics or variable-credit directed study courses) are explicitly designated as "repeatable for credit" in the University Catalog; they can be taken more than once for credit toward graduation. Depending on the course or the student's academic program, there may be limits on the allowable number of repeats and/or total credits applicable to degree completion.

Courses Not Designated as "Repeatable for Credit"

Most Tulane University courses are not designated as "repeatable for credit." The following policy applies to all such courses that are nonetheless repeated for any reason:

1. Repeated courses receive credit toward the degree only once. For example, a student who takes the same 3-credit course twice receives 3, not 6, credits toward the total required for completion of his/her degree program.
2. Courses deemed to be "equivalent" in the University Catalog (those courses whose content have been determined by the academic departments to be substantially similar), may earn credit towards degree only once, regardless of the subject prefix and/or course number.
3. It is the responsibility of the individual student to avoid duplication in whole or in part of the content of any course counting toward the degree. Such duplication may result in the withdrawal of credit. Student should always consult an advisor before registering to repeat a course.

Grades for Courses Not Repeatable for Credit

Students may repeat courses in which they have earned a grade of D+ or lower. No more than one course may be repeated in any semester. For each repeated course, only the second grade, whether higher or lower than the initial grade, will be used to calculate the student's GPA. The initial grade will not count as credit hours attempted or earned, and therefore is not calculated in the GPA, but it will remain visible on the student's transcript.

Exceptions to Repeat Course Policy

Exceptions to the above policies may be authorized by the Deans of the College and Schools on an individual basis. Furthermore, the College and Schools are authorized to enact additional repeat policies considered to be more restrictive than the above University policy. Such additional policies must be published in the "Academic Policies" section of the University Catalog for the College or School.

Credit-Hour

Program Integrity Rules issued by the U.S. Department of Education require institutions to establish a definition of "credit hour." This applies to all degree programs (including credit for full and part-time undergraduate, graduate, professional, post-baccalaureate, and online programs):

1. The assignment of credit-hours to a course occurs through a formal review process conducted at the appropriate levels of faculty governance.
2. For courses in lecture format, one credit-hour represents the subject content that can be delivered in one academic hour (50 min) of contact time each week for the full duration of one academic semester, typically fifteen weeks long. For undergraduate courses, one credit-hour also includes associated work that can be completed by a typical student in 1-2 hours of effort outside the classroom. For graduate and professional courses taught in lecture format, 2-3 hours of outside work is expected for each academic hour of contact time as well.
3. For courses taught in other than lecture format (e.g., seminars, laboratories, independent study, clinical work, research, online courses, etc.), one credit-hour represents an amount of content and/or student effort that in aggregate is no less than that described in (2) above.

While Tulane's standard definition of a credit hour applies across the University, in some cases the definition may vary to meet specific accrediting body requirements.

Curriculum Effective Date

New programs and changes to curriculum (majors, minors, or degree requirements) must be effective in fall terms and be published in that academic year's university catalog. This policy includes changes to CIP codes, which do not appear in the university catalog, but should also only be changed effective in a Fall term. Changes approved after the catalog for that academic year is published, cannot be effective until the following academic year. The academic year is defined as the fall, spring, and summer term in that order. Students must be allowed to complete the program using any set of requirements as published in the catalog in effect at the time of their matriculation into

that program. The dean of the student's degree granting school or the dean that oversees a second major/minor can settle student disputes around the use of old vs. new requirements. The ultimate authority on any exceptions or exemptions for a given major, minor, or degree requirement is the dean responsible for said major, minor, or degree.

Degree Revocation

The University reserves the right to revoke any degrees granted. A degree awarded may be revoked by the Provost if the University becomes aware that the degree should not have been granted. Examples of such findings may include a degree that was obtained by violating the Code of Student Conduct or by deception, misrepresentation, falsification of records, academic misconduct, research misconduct, or if the work submitted in fulfillment of -- and indispensable to -- the requirements for such degree is determined to fail to meet the academic standards that were in effect at the time the degree was awarded. In the event of a revocation of a degree, the degree will be removed from the student's transcript, and the student will be asked to return the diploma. The Provost receives all recommendations for revocation of degrees and after consideration and review, will effectuate through the University Registrar's Office those they determine to be warranted.

Discipline

For all academic activities and disruptive behavior, the authority for control and discipline rests with the dean of Newcomb-Tulane College and the deans of the undergraduate schools. In all other areas, the vice president of student affairs is responsible for formulating appropriate procedures and regulations concerning student behavior and for the judicial consideration of violations. Students should refer to the Code of Student Conduct (https://conduct.tulane.edu/resources/code-student-conduct/) for a full description.

Dual Enrollment

Tulane may award up to fifteen credits for dual enrollment high school courses (those courses appearing on both the high school transcript and the transcript of the college/university) as long as the course(s) meets all other requirements for pre-matriculation:

- The courses were offered by a regionally accredited college or university;
- The courses were listed in the official catalog of the college or university from which the credit was earned;
- Course was composed primarily of degree-seeking college students;
- The courses were taught by college or university faculty;
- A grade of C or better was earned in each course.

  Please note that some credits may be denied for applicability to a professional school's major/minor degree requirements due to accreditation standards.

In order to process transfer credit approval requests for all college courses taken prior to enrolling in Tulane University:

- A Transfer Credit Approval Form from his or her Newcomb-Tulane College advisor. The advisor will verify the student's eligibility to earn transfer credit and the accreditation of the school at which the student wishes to study.
- An official transcript issued to Tulane University (not a grade report or transcript issued to the student)
- Course descriptions from the college catalogs or brochures that correspond to the courses on the transcript, and other documentation (syllabi, etc.) that the academic department requires for review.
- Following submission of these items to Newcomb-Tulane College's academic advisor, the courses will be evaluated, and if found to be equivalent to Tulane University coursework, the student's Tulane transcript will be adjusted to reflect the academic credit awarded in transfer. Individual course equivalency for dual high school/associate degree courses will be determined by Tulane departments and programs. Courses evaluated for transfer must be evaluated based on course content and suitability for the discipline. All courses are subject to approval, and in some cases, courses may not be approved for credit. Grades are not transferred with the credits.

Expected Behavior at Tulane University

Tulane University expects and requires behavior compatible with its high standards of scholarship. By accepting admission to the university, a student accepts its regulations (i.e., Tulane University: Code of Student Conduct (https://conduct.tulane.edu/resources/code-student-conduct/), (https://college.tulane.edu/academics/academic-integrity/code-of-academic-conduct/) Newcomb-Tulane College Students: Code of Academic Conduct (https://college.tulane.edu/academic-integrity/), Graduate Students: Unified Code of Graduate Student Academic Conduct (p. 80)) and acknowledges the right of the university to take disciplinary action, including suspension or expulsion, for conduct judged unsatisfactory or disruptive.

The integrity of Tulane University is based on the absolute honesty of the entire community in all academic endeavors. As part of the community, students have certain responsibilities regarding all independent work that forms the basis for the evaluation of their academic achievement. Students are expected to be familiar with these responsibilities at all times.

The scholarly community of the university depends on the willingness of both instructors and students to uphold the Code of Academic Conduct (https://college.tulane.edu/academic-integrity/). When a violation of the Code of Academic Conduct is suspected, it is the duty of every member of the academic community who has evidence to take action following the procedures outlined in the appropriate Code of Academic Conduct. Students should under no circumstances tolerate any form of academic dishonesty.

General Policies

Tulane University is an Affirmative Action/Equal Employment Opportunity institution. Consequently, its policy of nondiscrimination includes recruitment, employment, admission, retention, and promotion of the most qualified students, faculty, and staff regardless of an individual's race, sex, color, religion, marital/ethnic origin, citizenship, marital status, sexual orientation, handicap, or veteran status. Tulane University does not discriminate in its provision of services and benefits or in its treatment of students, patients, and employees.

Inquiries regarding this policy may be referred to the Office of Human Resources & Institutional Equity (https://equity.tulane.edu/).

Tulane University is committed to a policy of compliance with Federal laws and regulations concerning nondiscrimination on the basis of race, sex, color, national/ethnic origin, religion, age, handicap, or veteran status in educational or institutional programs and activities. Title VI and Title VII of the Civil Rights Act of 1964, Title IX of the Educational Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the other similar legislation prohibit such discrimination.

Tulane University has implemented grievance procedures for faculty, staff, and students concerning cases of alleged discrimination, including those of alleged sexual harassment. It is the policy of the University that harassment on the basis of sex among employees constitutes an impermissible employment practice, which is subject to disciplinary action and shall not be tolerated. Complaints or confidential inquiries may be referred to the Office of Human Resources & Institutional Equity (https://cm.maxient.com/reportingform.php?TulaneUniv&layout_id=0).

Sexual harassment involving students and university personnel or among students is equally impermissible and shall not be tolerated. The University is committed to providing an environment to study free of discrimination and sexual harassment.

Reporting the Complaint: It is not necessary to first confront the harasser prior to instituting a complaint under this policy. However, it is appropriate to promptly report a complaint so that a full and complete investigation is possible. Any person designated to receive complaints from students, employees, or faculty must notify the Office of Human Resources & Institutional Equity within twenty-four (24) hours of receiving a harassment complaint.

Complaints by students: A student who believes she or he has been harassed or is being harassed may report the alleged harassing behavior to any of the following individuals or agencies:

- Dean of the Newcomb-Tulane College, Dean of the school, or Dean of Students (or person designated by same) with which complaining student is affiliated.
- Vice President for Student Affairs (or person designated by same), 504-314-2188
- Associate Dean for Admissions and Student Affairs, Tulane University School of Medicine, 504-988-3710
- Office of Human Resources & Institutional Equity, 504-865-6727 or 504-247-1760
- Tulane University Department of Public Safety, 504-865-5381
- Tulane University Health Sciences Center Security Services, 504-988-5531
- Contact the Office of Human Resources & Institutional Equity for additional information about Tulane University's Equal Opportunity and Harassment Policies. 1555 Poydras St., Suite 964; 504-865-6727.

Tulane University complies with the provision of the Family Education Rights and Privacy Act of 1974 (FERPA), which was enacted to protect the privacy of education records, to establish the right of students to inspect and review their education records, and to provide guidelines for the correction of inaccurate or misleading data. Students have the right to file complaints with the U.S. Department of Education Family Policy Compliance Office (ferpa.complaints@ed.gov) concerning alleged failures by the institution to comply with the Act. Information concerning the rights and protection under the Act, the types and locations of education records maintained, and the procedure to be used by the institution for compliance with the provisions of the Act can be obtained from the following offices: Vice President for Student Affairs/Dean of Student Services (https://studentaffairs.tulane.edu/contact-us/) and Registrar's Office (https://registrar.tulane.edu/contact-us/). Tulane University's FERPA policy may be found here (https://registrar.tulane.edu/privacy-policies-forms/). Grievances or confidential inquiries concerning the Act may be referred to the Office of Human Resources & Institutional Equity (https://equity.tulane.edu/).

It is the policy and practice of Tulane University to comply with the Americans with Disabilities Act and all state and local requirements regarding individuals with disabilities. Under these laws, no qualified individual with a disability shall be denied access to, or participation in, services, programs, and activities of Tulane University. Accommodations are provided to those with documented disabilities through the Goldman Center for Student Accessibility (https://accessibility.tulane.edu/). This office can be reached at (504) 862-8433.

Grade Change

A student who believes that a final grade was assigned incorrectly may request a final grade change. Final grades can be changed only in exceptional circumstances and only with the approval of the instructor, the chair of the department, and the dean or dean's designee of the college/school who offered the course. Grade changes are not allowed once a degree to which that grade applies, has been awarded.

Military Benefits

Veterans and Family Members

Tulane University is fully approved to offer instruction to students attending college under the provisions of the United States Code, Title 38, and Chapter 30, 31, 32, 33, 35, 1606, and 1607.

The University contacts for students planning to use Veterans Administration (VA) benefits should contact their respective Veterans' Certifying Officials in the following locations:

Newcomb-Tulane College - Undergraduate & Graduate, SoPA - Undergraduate/Graduate, Law, School of Social Work, School of Medicine (non-MD), and School of Business
Office of the University Registrar
110 Gibson Hall
6823 St. Charles Avenue
New Orleans, LA 70118
(504) 865-5231
veterans@tulane.edu

School of Medicine (MD Only)
Office of Admissions and Student Affairs
131 S. Robertson St., Suite 1550
New Orleans, LA 70112

School of Public Health and Tropical Medicine (Grad Only)
Office of Student Affairs and Admissions
1440 Canal St., Suite 2460-8329
New Orleans, LA 70115

An individual planning to attend Tulane University using VA benefits must complete the following procedures:

1. Complete all requirements for admission to the University as a degree-seeking student or as a visiting student with an approved formal degree plan from another university.
2. Have an evaluation of service schools/experiences completed by the respective Office of Admission to determine any awarding of military credit.
3. In coordination with an assigned academic advisor, register for only courses that are required for completion of your selected degree.
4. Maintain satisfactory academic progress.

In compliance with the Veterans Benefits and Transition Act of 2018, section 3679(e) of Title 38, United States Code, Tulane University will permit any **covered individual** to attend or participate in the course of education during the period beginning on the date on which the individual provides to the University a certificate of eligibility for entitlement to educational assistance under Chapter 31 or Chapter 33 (a "certificate of eligibility" can also include a "Statement of Benefits" obtained from the Department of Veterans Affairs' (VA) website - eBenefits, or a VAF 28-1905 form for Chapter 31 authorization purposes) and ending on the earlier of the following dates:

1. The date on which payment from VA is made to the University.
2. 90 days after the date the University certified tuition and fees following the receipt of the certificate of eligibility.

Tulane University will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a **covered individual** borrow additional funds, on any covered individual because of the individual's inability to meet his or her financial obligations to the University due to the delayed disbursement funding from VA under Chapter 31 or 33.

As allowed under the Veterans Benefits and Transition Act of 2018, section 3679(e) of Title 38, United States Code, the **covered individual** will be required to:

1. Submit a certificate of eligibility for entitlement to educational assistance no later than the first day of a course of education.
2. Submit a request (https://registrar.tulane.edu/veterans-enrollment-form/) for certification each semester.
3. Provide additional information necessary for the proper certification of enrollment by the University (for example, official transcripts from all previously attended institutions).
4. Pay any difference between the amount of the student's financial obligation and the amount of the VA education benefit disbursement.

Note: A Covered Individual is any individual who is entitled to educational assistance under Chapter 31, Vocational Rehabilitation and Employment, or Chapter 33, Post-9/11 GI Bill benefits.

Tuition Assistance

Tulane University is approved through the Memorandum of Understanding (MOU) enforced by the Department of Defense (DOD) to facilitate Tuition Assistance (TA) benefits for Service members.

To receive Tuition Assistance benefits:

1. Complete all requirements for admission to the University as a degree-seeking student or as a visiting student with an approved formal degree plan from another university.
2. Complete admission requirements through the Go Army Ed Portal.
3. Have an evaluation of service schools/experiences completed by the respective Office of Admission to determine any awarding of military credit.
4. Register for classes through the Go Army Ed Portal to secure available Tuition Assistance benefit.
5. Send a copy of the Tuition Assistance Voucher to the appropriate Veteran School Certifying Official to forward to Accounts Receivable.
6. Maintain Satisfactory Academic Progress.

Yellow Ribbon Program

The Yellow Ribbon Program is a provision of the Post 9/11 Veterans Educational Assistance Act of 2008.

To be eligible for the Yellow Ribbon Program:

1. Complete all requirements for admission to the University as a degree-seeking student or as a visiting student with an approved formal degree plan from another university.
2. Eligibility for Chapter 33 Post 9/11 veteran benefits at the 100% rate (as determined by the Department of Veterans Affairs). Chapter 33 Post 9/11 100% rate eligibility must be verified by the DD-214 Member-4 and Certificate of Eligibility (provided by the Department of Veteran Affairs).

Note: According to VA, Active Duty Service members and their spouses are not eligible to participate in the Yellow Ribbon Program.

This program allows Tulane University to voluntarily enter into an agreement with VA to fund tuition expenses that exceed the annual cap for private institutions. The institution can contribute up to 50% of those expenses and VA will match the same amount as the institution.

Conditions are as follows:

1. The Yellow Ribbon Grant is applied as a credit to the student's account, and no cash and/or check payments will be awarded to the student.
2. The Yellow Ribbon Grant is used exclusively towards prior or current program charges.
3. The Yellow Ribbon Grant is awarded for each period in the program that the student is determined eligible and where the grant is needed.

Name Changes

Students who wish to change their legal name must supply supporting legal documentation and complete the request for name change form with the Office of the Registrar (https://registrar.tulane.edu/). Staff or faculty members who have a student record must change their legal name with the Office of the Registrar prior to making a name change request with Human Resources.

Overlap Policies

If a student earns more than one degree at Tulane, (simultaneously or sequentially), and the same course(s) is required by both degrees, the student cannot count more than 25% of the total credit hours required for the smaller degree, not to exceed 12 credit hours. This rule also applies to courses across majors and minors. Students may not count the same course(s) toward a minor and a certificate.

Posthumous Degrees

On rare occasions, a student meets an untimely death before their degree is conferred. In such cases, normally within one semester of degree completion, it may be appropriate for this student to be recognized for their work by means of conferring a degree posthumously. In all cases, the awarding of a posthumous degree requires Provost approval.

With the support of the academic unit and the family of the student, a request is initiated by the student's dean. Students who are in good academic standing and are within a semester of completing their degree requirements may be recommended for a posthumous degree. The college dean will provide a recommendation along with a verification of the student's academic standing and degree progress. Petitions shall be forwarded to the student's dean for review and recommendation, then to the Provost for approval. If approved, the Provost will notify the appropriate dean to certify this student's degree for degree conferral. The student's dean will inform the Registrar's Office of the posthumous degree certification award, and the Registrar's Office will be responsible for the posting of the degree to the student's record.

Registration Policies and Procedures

All students must register by the last day to add classes each semester. Students register online by accessing Gibson Online (https://gibson.tulane.edu/), which can be found via the University Registrar's website at www.registrar.tulane.edu (http://www.registrar.tulane.edu). Gibson Online is a gateway to online services such as registration, grades, degree audit, Canvas, and the Schedule of Classes (https://classschedule.tulane.edu/Search.aspx). Registration can also be accessed by logging directly into the Schedule of Classes (https://classschedule.tulane.edu/Search.aspx). Summer and Fall semester course offerings are typically available for review in March, and Spring semester courses are typically available in October. The Schedule of Classes (https://classschedule.tulane.edu/Search.aspx) contains live data and reflects course availability at that moment in time. The convenience of registration online coupled with the delivery of tuition bills via email greatly reduces the time each student must spend on campus dealing with administrative details. By registering for classes students assume full financial responsibility and assume the responsibility of informing the university of any changes in address via Gibson Online (https://gibson.tulane.edu/) so that bills may be delivered promptly.

Students are required to confirm their attendance at the beginning of each semester. Each term, enrolled students will be notified via email when confirmation is made available on Gibson Online. In addition, they must consult the official Academic Calendar (https://registrar.tulane.edu/Academic_Calendar/) on the University Registrar's webpage for important registration and refund deadlines. Failure to heed the dates set forth in the official academic calendar could result in academic or financial penalty.

Religious Observation

Both Tulane's policy of non-discrimination on the basis of religion and our core values of diversity and inclusion require instructors to make reasonable accommodations to help students avoid negative academic consequences when their religious obligations conflict with academic requirements. Every reasonable effort should be made to allow members of the university community to observe their religious holidays without jeopardizing the fulfillment of their academic obligations. It is never acceptable for an instructor to compel a student to choose between religious observance and academic work. Absence from classes or examinations for religious reasons does not relieve students from responsibility for any part of the course work required during the period of absence. It is the obligation of the student to provide faculty within the first two weeks of each semester their intent to observe the holiday so that alternative arrangements convenient to both students and faculty can be made at the earliest opportunity. Students who make such arrangements will not be required to attend classes or take examinations on the designated days, and faculty must provide reasonable opportunities for such students to make up missed work and examinations. Exceptions to the requirement of a make-up examination must be approved in advance by the dean of the school in which the course is offered.

Residency

At least half of the credits required for each degree must be completed at Tulane University.

Transfer Credit Acceptance After Matriculation

- Transfer credit must be from an institution accredited by one of the following institutional accrediting agencies*: Southern Association of Colleges and Schools Commission on Colleges (SACSCOC), Higher Learning Commission (HLC), Middle States Commission on Higher Education (MSCHE); New England Commission on Higher Education (NECHE), Northwest Commission on Colleges and Universities (NWCCU), or the Western Association of Schools and Colleges (WASC).
- Courses evaluated for transfer must be evaluated based on course content and suitability for the discipline.
- Once accepted for transfer, articulations are valid for three years, regardless of when or how often Tulane offers a course.

**Referred to as "regional accreditors" prior to 2020.*

Introduction

Newcomb-Tulane College (NTC) is the home of the undergraduate academic experience. As the undergraduate degree-granting body of Tulane University, NTC is focused on providing a top tier education to students through the core curriculum and choice of major - or interdisciplinary combination of majors. The College educates its multifaceted student body through its commitment to academic breadth and depth, and engaged scholarship and research. The various departments within the College guide students along their individual path to academic success and personal growth, providing both a foundation of support and a multitude of ways to elevate their experience. We invite you to explore the College's website (https://college.tulane.edu/) to learn more about how NTC supports and empowers students throughout their undergraduate careers.

Mission

NTC fosters intellectual curiosity, a sense of belonging, commitment to equity, and diversity of thought and experience that transcends the disciplines in order to shape undergraduates into multifaceted, ethical leaders who have a meaningful impact in the world and in their communities.

Vision

Newcomb-Tulane College is the foundation of the Tulane undergraduate academic journey. Grounded in an equity mindset, the College inspires our dynamic campus community to collaborate across fields and disciplines and empowers students' intellectual exploration and growth through our innovative infrastructure of programs, resources and opportunities.

Auditing Courses

A student registered for a full-time course load (at least 12 credits) may audit one course per semester in addition to his or her full-time course load without credit after completing formal registration and obtaining approval of the instructor for the course. Although credit is not granted for audited courses, such courses are considered part of the student's semester course load and are recorded on the student's permanent record. An audit enrollment that results in an overload is not permitted unless the student is qualified for such an overload. Students who decide to audit a course after initially attending the course as a grade-seeking student must submit the appropriate grade type change form to the Registrar following the approval of the Newcomb-Tulane College academic advisor.

Changes to Academic Records

No changes to course enrollment status, grades or grade types will be made more than three years after the close of the semester in which the course was offered. This rule places a three-year time limit on the retroactive adding or dropping of courses or requesting grade changes.

Class Attendance

Students are expected to attend all classes unless they are ill or prevented from attending by exceptional circumstances. Instructors may establish policies for attendance and making up missed work in their classes, which are announced at the beginning of the semester and included on their syllabi. Students who find it necessary to miss class are responsible for obtaining notes on material covered in lectures or other class sessions.

Students are expected to negotiate any adjustments in academic requirements due to illness directly with their professors. Students are responsible for notifying instructors about absences that result from serious illnesses, injuries, or critical personal problems. If an illness or injury is serious enough to cause a student to miss more than two weeks of class, they are strongly advised to consider a medical leave.

Instructors are authorized to lower the grades of students who are absent excessively without a satisfactory excuse or do not make up work missed because of absences. With the approval of the Senior Associate Dean (contact: advising@tulane.edu), an instructor may have a student who has excessive absences involuntarily dropped from a course with a WF grade after written warning at any time during the semester.

Student-Athletes participating in an officially sanctioned, scheduled university athletic activity that requires out of town travel should be given the opportunity to make up class assignments or other graded assignments missed as a result of their participation and associated travel. Further student-athletes' attendance grades shall not be penalized for missed course meetings resulting from such events.

It is the responsibility of the student to make arrangements with the instructor for making up the work prior to any missed scheduled examination or other missed assignment. In the process, student-athletes should be afforded the same substantive opportunity to make up missed work and examinations, and the faculty member will have discretion on the content, process, and timeline of such missed work.

Class Status

Class status is determined by the total number of earned credit hours; credit hours for currently enrolled courses are not included. Credit for coursework taken at another institution is included only after the transfer credit approval process and credit posting are complete.

Classification	Earned Credits
First-Year	0-24 earned credit hours
Sophomores	25-56 earned credit hours
Juniors	57-86 earned credit hours
Seniors	87 or more earned credit hours

Code of Academic Conduct

This Code applies to all undergraduate students, full-time, and part-time, in Tulane University. The full text and additional information is available at the following website: https://college.tulane.edu/academics/academic-integrity (https://college.tulane.edu/academics/academic-integrity/).

Commencement Policies and Procedures

A student expecting to receive a degree in May must apply for graduation with their Newcomb-Tulane College's academic advisor by October 1 of the previous year. Students expecting to complete their degree requirements at any other time should consult their academic advisor for appropriate information. The commencement ceremony is held only in May. Students completing degree requirements in August or December may, however, participate in the ceremony held the following May. All graduates who will not attend the commencement ceremony should request with their Newcomb-Tulane academic advisor that their degree be awarded in absentia. All financial obligations to the University must be cleared before the Registrar will release a diploma or a transcript.

Course Loads

The normal academic course load for all students is 15 credits to 19 credits per semester. The student who completes 15 credits each semester can meet degree requirements in four years for most but not all degrees. The minimum course load is 12 academic credits per semester. Students must have registered for a minimum of 12 credits by the last day to add classes. An exception to this regulation is made for seniors who, in their final semester, need fewer than 12 credits to graduate.

In any given semester, when registration opens for the next semester, students may register for as many as 17 credits during the priority registration period and up to 19 credits thereafter. After the close of a semester, students who have earned a grade-point average of 3.000 or better on 15 letter-graded credits or more during that semester may register for as many as 22 credits in the following semester. After the close of a semester, students who have earned a cumulative grade-point average of 3.500 may register for as many as 25 credits. Any student interested in an overload must submit that request to their academic advisor.

Full-time students with a course load of fewer than 14 credits should realize that they risk falling behind their class level.

Course Repeatability

Courses Repeatable for Credit

Some Tulane University courses (e.g., special topics or variable-credit directed study courses) are explicitly designated as "repeatable for credit" in the University Catalog; they can be taken more than once for credit toward graduation. Depending on the course or the student's academic program, there may be limits on the allowable number of repeats and/or total credits applicable to degree completion.

Courses Not Designated as "Repeatable for Credit"

Most Tulane University courses are not designated as "repeatable for credit." The following policy applies to all such courses that are nonetheless repeated for any reason:

1. Repeated courses receive credit toward the degree only once. For example, a student who takes the same 3-credit course twice receives 3, not 6, credits toward the total required for completion of his/her degree program.

2. Courses deemed to be "equivalent" in the University Catalog (those courses whose content have been determined by the academic departments to be substantially similar), may earn credit towards degree only once, regardless of the subject prefix and/or course number.

3. It is the responsibility of the individual student to avoid duplication in whole or in part of the content of any course counting toward the degree. Such duplication may result in the withdrawal of credit. Student should always consult an advisor before registering to repeat a course.

Grades for Repeated Courses

Students may repeat courses in which they have earned a grade of D+ or lower. No more than one course may be repeated in any semester. Except as provided below, for each repeated course, only the second grade, whether higher or lower than the initial grade, will be used to calculate the student's GPA. The initial grade will not count as credit hours attempted or earned, and therefore is not calculated in the GPA, but it will remain visible on the student's transcript.

Students who are found responsible for academic misconduct are not eligible to have that original grade expunged. In this case, both the initial grade and the second grade will be counted in their GPA.

Exceptions to Repeat Course Policy

Exceptions to the above policies may be authorized by the Deans of the College and Schools on an individual basis. Furthermore, the College and Schools are authorized to enact additional repeat policies considered to be more restrictive than the above University policy. Such additional policies must be published in the "Academic Policies" section of the University Catalog for the College or School.

Course Sequencing

Course at Tulane offerings increase in sophistication and specialty with increasing course number, and usually follow the following conventions:

Course number	Description
1000-level	Introductory-level undergraduate courses
2000-level and 3000-level	Intermediate-level undergraduate courses; may require 1000-level prerequisites.
4000-level	Advanced-level undergraduate courses; may require multiple level prerequisites.
5000-level	undergraduate courses: honors thesis courses, courses taken abroad, or courses transcripted via our School of Record relationship with the Council on International Educational Exchange (CIEE).
6000-level	Introductory-level graduate or advanced-level undergraduate courses; often open to both undergraduate and graduate students; sometimes cross-listed with 3000 or 4000-level courses.
7000-level	Intermediate-level graduate courses; not open to undergraduates.
8000-level and 9000-level	Advanced graduate-level courses; often independent graduate study or dissertation research.

Credit Expiration

At the time of readmission, any credit earned at Tulane more than ten years previously would not apply toward the degree. While the credits may be more than ten years old by the time the student completes the Tulane degree, they would still count toward the degree so long as the student had remained continuously enrolled at Tulane. Departments and schools may apply more restrictive rules in evaluating credits to be applied toward a major or professional degree.

Cross-Registration

Students enrolled in Newcomb-Tulane College during the fall or spring terms may register for courses at Loyola University, Dillard University and Xavier University, provided that the same course has not been offered at Tulane University within the past year. Students must be registered for at least nine credits of coursework at Tulane in the semester of Loyola, Dillard or Xavier registration and may not use the Loyola, Dillard or Xavier credits to satisfy core curriculum requirements or school-specific core requirements. Cross-registration is not applicable during the summer term. Additional restrictions may apply; interested students should contact their Newcomb-Tulane College academic advisor.

Dean's List

Students who have earned a distinguished record in all of their subjects throughout the semester may be recognized on the Dean's List of Newcomb-Tulane College (NTC).

The Dean's List is issued at the end of the fall and spring semesters based on all final course grades and recognizes superior academic achievement. It includes all full-time, degree-seeking students in Newcomb-Tulane College who have a semester grade point average of 3.700 or better and who have earned no grade below a "C" during the same semester (excluding courses taken on a satisfactory/unsatisfactory basis). Students are notified via email of their inclusion on the Dean's List.

Degree Audits

Degree audit reports are available to currently enrolled students through the Gibson portal on demand. The degree audit matches the courses a student has taken against the College's and schools' general degree requirements as well as the major requirements and indicates which of the requirements are left to be taken. While advisors are available to discuss degree audits with students, it remains the student's responsibility to know the exact requirements for the desired degree as stated in this document and to enroll in the appropriate courses to satisfy those requirements.

Dual Enrollment

Tulane may award up to fifteen credits for dual enrollment high school courses (those courses appearing on both the high school transcript and the transcript of the college/university) as long as the course(s) meets all other requirements for pre- matriculation:

- The courses were offered by an institutionally accredited college or university;
- The courses were listed in the official catalog of the college or university from which the credit was earned;
- A grade of C or better was earned in each course.

  Please note that some credits may be denied for applicability to a professional school's major/minor degree requirements due to accreditation standards.

In order to process transfer credit approval requests for all college courses taken prior to enrolling in Tulane University:

- A Transfer Credit Approval Form from the student's Newcomb-Tulane College advisor. The advisor will verify the student's eligibility to earn transfer credit and the accreditation of the school at which the student wishes to study.
- An official transcript issued to Tulane University (not a grade report or transcript issued to the student)
- Course descriptions from the college catalogs or brochures that correspond to the courses on the transcript, and other documentation (syllabi, etc.) that the academic department requires for review.
- Following submission of these items to Newcomb-Tulane College's academic advisor, the courses will be evaluated, and if found to be equivalent to Tulane University coursework, the student's Tulane transcript will be adjusted to reflect the academic credit awarded in transfer. Individual course equivalency for dual high

school/associate degree courses will be determined by Tulane departments and programs. Courses evaluated for transfer must be evaluated based on course content and suitability for the discipline. All courses are subject to approval, and in some cases, courses may not be approved for credit. Grades are not transferred with the credits.

Examinations

Tulane University administers final examinations according to a published schedule available on the registrar's website at the beginning of each semester. The university expects students and instructors to follow this schedule. Instructors must give final examinations within the hours set aside in the examination schedule; the instructor determines the length and time of the examination within the schedule.

Misreading or ignorance of the schedule is not sufficient reason for a student's absence or tardiness to a final examination. Students are advised to check the schedule before making travel arrangements; such arrangements are not grounds for excusing a student from a final examination.

Students may be excused from final examinations by the Newcomb-Tulane College dean and the course instructor when there is a serious, incapacitating medical problem or when there is a death in the immediate family. Students who must be absent from the final examination for one of these reasons must contact the Newcomb-Tulane dean's office before or within 24 hours after the examination for approval. A student with an excused absence will receive a grade of I and a make-up examination; a student with an unexcused absence will earn a grade of F in the course. (See school sections for further information.)" https://catalog.tulane.edu/newcomb-tulane/#academicpoliciestext

Final examinations or projects are required in all courses, except where the chair of the department or dean of the school waives this requirement. The course instructor is in charge of each examination and is expected to see that it is proctored. Take-home examinations may not be due before the date of the scheduled examination. Students registered for evening courses will be expected to take their examination as scheduled, even if this necessitates taking three examinations in one day.

Any change in the schedule affecting an entire class must be approved by the Newcomb-Tulane College Dean's Office, and notification must be given to every student registered for the course. Course instructors must arrange for a room in which to give the rescheduled exam. Students who cannot or who choose not to take the exam at the new time must be given the exam at the original time and date. Exams that are rescheduled must be given during the nine-day examination period.

Grade Complaints and Grievance Procedure

Students who believe a grade to be incorrect should first consult with their instructor to address any discrepancies. If questions remain or the situation is unresolved, students seeking redress should follow the official grade grievance procedure (https://advising.tulane.edu/sites/default/files/GRIEVANCE%20PROCEDURE.pdf).

Grades/Grading

Federal law prohibits the release of grades or other confidential information to third parties, including parents and guardians, unless the student provides the Newcomb-Tulane College dean's office with written authorization for release of such information. Such a request may be made by the student at any time.

A student's progress toward graduation is measured not only by credits earned but also by the grade-point average. The grade-point average is determined by dividing the student's total number of quality points by the total number of quality hours. Graduation requires a 2.000 grade-point average, equivalent to an average grade of C, in all courses as well as in the major.

Quality	Grade	Quality Points
Passing	A	4.000
	A-	3.667
	B+	3.333
	B	3.000
	B-	2.667
	C+	2.333
	C	2.000
	C-	1.667
	S	Satisfactory; not counted in grade-point average but is counted in earned hours
	D+	1.333
	D	1.000
	D-	0.667
failing	F	0.000
	U	Unsatisfactory; not counted in grade-point average and is not counted in earned hours
	UW	Unofficial withdrawal; counts in grade-point average as a failing grade and earns no quality points
	WF	Withdrawn failing; counts in grade-point average as a failing grade and earns no quality points
Other	I	Incomplete; not counted in grade-point average
	IP	In progress; not counted in grade-point average
	W	Withdrawn; not counted in grade-point average

	AU	Audit, not counted in grade-point average, attempted or Earned Hours

In-Progress (IP) Grades

An in-progress grade, IP, is used to show progress during the first semester of a year-long honors or capstone course. When the final semester's grade for the course is awarded, the IP is changed to reflect that grade and grade points are awarded accordingly.

Incomplete (I) Grades

An incomplete grade, I, is given at the discretion of instructors when, in their view, special circumstances prevent a student from completing work assigned during the semester and with the understanding that the remaining work can be completed within 30 days. Incomplete grades also are given when a student's absence from a final examination has been excused by the Newcomb-Tulane College dean prior to or within one day following the final examination. Incomplete grades must be resolved within 30 days of the end of the semester or they are changed to Fs. The I will remain on the student's transcript, accompanied by the final course grade only when the final grade earned in the course is an F. Extensions of the 30-day deadline must be requested in writing by the student and must be approved by the instructor and an Assistant Dean in Academic Advising. Students should contact their academic advisor with any questions.

Extensions are approved only when a student has made an attempt to complete the missing work within the original 30-day period but, in the view of the instructor and Newcomb-Tulane College, has been prevented from completing the work by some special circumstance beyond the student's control. Extensions must be approved before the 30-day deadline expires; extensions are not approved retroactively.

Withdrawn (W/WF/UW) Grades

Grades of WF are assigned by administrators and are computed in the grade-point average as if they were Fs.

In cases where students are suspended or expelled during the semester, W or WF grades may be assigned at the discretion of Newcomb-Tulane College. A grade of WF may be assigned for excessive absence from a course and may be assigned for disciplinary penalties in connection with an honor code or conduct code violation. A student who ceases to attend a class but has not withdrawn officially will receive a UW. After the last day to drop without record and before the last day to withdraw from a course with record, students who drop courses voluntarily will have W noted on their transcripts for each course dropped.

Grade Reports

Tulane University attempts to keep its students well-informed of their academic progress throughout their attendance. All official grades as well as temporary midterm grades are available on-line in the Gibson Portal. Instructions for obtaining grades are outlined in the Schedule of Classes at www.registrar.tulane.edu (http://www.registrar.tulane.edu).

Temporary grades are assigned by faculty to students at midterm. For classifications above the first-year level, instructors are encouraged to report unsatisfactory grades (D, F, and U) to both student and the Newcomb-Tulane College academic advisor.

Final grades are assigned in all subjects for all students and become a part of the student's permanent academic record. Final grades are based on the complete body of a student's work throughout the semester including the final examination.

Honors Thesis

The Honors Thesis is a valuable year-long experience for students who want to complete an independent research project, mentored by faculty in the student's major. Students who complete the Honors Thesis graduate with Departmental Honors in the major or majors in which the thesis is written.

To be eligible to write an Honors Thesis, students are generally expected to have an overall GPA of 3.4, and a GPA of 3.5 in the major for which the student is writing for honors. Departments may make exceptions to the GPA threshold on a case-by-case basis where warranted. For more information about the Senior Honors Thesis, connect with the Office of Academic Enrichment (https://enrichment.tulane.edu/senior-honors-thesis/).

Latin Honors

All Latin honors at Tulane are awarded on the basis of GPA alone. Students achieving a GPA in the top 25% of the class will receive Latin honors according to the following:

Summa cum laude = top 5% of the class
Magna cum laude = next 8% of the class
Cum laude = next 12% of the class

Thresholds are calculated once each year based on the GPAs of May graduates and are posted no later than July 1 for the upcoming year.

Leave of Absence

Students who voluntarily leave any school of the university and return to that school within one calendar year will be allowed to continue study under the degree requirements in effect for them at the time they left. Any student returning to the university after more than one calendar year will be required to complete the degree requirements in effect at the time of readmission. Students taking a leave of absence who wish to receive registration materials and to preregister for classes during the priority period may formally file for a leave of absence for up to one year. Students who are allowed a one-year leave of absence are not required to complete a readmission application; however, they should submit a letter-of-intent to resume study at least eight weeks prior to the semester in which they wish to return. Students who leave a school without formal approval for a leave of absence must file an application for readmission with an advisor and will not receive registration materials until after the readmission has been processed. The deadline for applying for a leave of absence is the last day to register or to add courses in the semester after the last regular semester of a student's enrollment. Students who do not return to Tulane University for a particular term and do not request a leave of absence by the deadline for doing so are not eligible to return without applying for readmission.

Before registering at other institutions, students must consult the Newcomb-Tulane College's policy on transfer of credit and follow the

established procedures. Following such study elsewhere, students must submit a transcript from the other institution showing all courses attempted. Students must have satisfactorily completed their academic programs and must obtain statements of continued good standing from the other institution before being allowed to return. Students who take a leave for health reasons may be required to obtain clearance from the Student Health Center before they are allowed to resume study.

Policy Changes

The University reserves the right to change any of its rules, courses, regulations, and charges without notice and to make such changes applicable to students already registered as well as to new students. Students should review material provided for them, including their on-line degree audit, and seek aid and direction from academic advisers, faculty advisers, and deans and. However, each student must accept full responsibility for knowledge of and compliance with the policies of Tulane University and its schools and for the fulfillment of requirements for the course of study selected.

Quality-of-Work Requirements

Students are responsible for knowing their academic standing at all times.

Full-time Newcomb-Tulane College (NTC) students are expected to have made satisfactory progress toward their degree at the end of each semester. The minimum standards are based on the cumulative grade point average in earned hours at Tulane. The grade point average is computed only on work attempted in undergraduate coursework at Tulane University and excludes both non-credit and satisfactory/unsatisfactory courses.

Full-time undergraduate students enrolled in NTC are degree-seeking students. Those students who are not making satisfactory progress toward a degree are not permitted to remain enrolled at the university.

Continuation Requirements

Students who earn at least 12 credits per full-time semester at Tulane and achieve at least the minimum cumulative grade-point average (GPA) for good standing are considered to be making satisfactory progress toward the baccalaureate degree and are in academic good standing. Policies that apply to students who do not meet these academic standards are described below. Students experiencing academic difficulty should pay particular attention to the appropriate paragraphs of the explanation of the quality-of-work rules summarized in the table below. Students should note that the standards apply to cumulative GPA in earned hours at Tulane.

Options to Restore Academic Good Standing

At the end of each semester students are reviewed for academic progress. Students who are deficient in cumulative GPA based on credits earned at Tulane are placed on academic probation. They have the following options to restore academic good standing:

1. Students may return to academic good standing through successful completion of Tulane Summer School courses.
2. Students may return in the fall on academic probation with an approved academic success plan.
3. Students may attend another accredited institution while on academic dismissal in order to show improvement for re-admittance to Tulane. Pending approved readmittance to Tulane from the NTC Dean, this could result in transfer credits if approved by the appropriate academic department(s) in coordination with NTC academic advising. We strongly recommend that students go through the preapproval process for transfer credit.
4. Students on academic probation will have their grades reviewed at the close of each semester*. Should the cumulative GPA for academic good standing be reached within one semester, the student will return to good standing.

*Students may only spend two consecutive semesters on academic probation (excluding summer). Failure to return to good standing within that timeframe will result in academic dismissal from Tulane for at least one semester.

Cumulative Grade Point Average (GPA) Requirements

Minimum cumulative GPA requirements are based on the total number of earned hours (EHRS) that a student has accumulated at Tulane.

The minimum cumulative GPA for academic good standing is 1.600 in 0-24 EHRS, 1.800 in 24-48 EHRS, and 2.000 in 49 or more EHRS.

Total Earned Hours at Tulane	Minimum Cumulative GPA for Good Standing
0 to 24	1.600
25 to 48	1.800
49 or more	2.000

Other Considerations for Continuation

The NTC Dean in consultation with the Committee on Academic Requirements may, at any time, dismiss or place on probation any student who has given evidence of academic irresponsibility. Academic irresponsibility includes but is not limited to actions such as non-compliance with academic probation, failure to attend class regularly, failure to complete papers, examinations, or other work on time, failure to earn a minimum of 12 credit hours in any semester unless the student has been granted part-time status, or failure to maintain a minimum GPA (see Quality of Work Rules).

Should a student's poor academic performance be attributed to circumstances over which the student clearly had no control (serious injury or illness), the student may, after consultation with an academic advisor or appropriate campus resource, petition the Committee on Academic Requirements for further consideration of their status.

Students are responsible for knowing their academic standing at all times.

Summer School Attendance

Students may attend Tulane Summer School for the purpose of enriching their academic programs or accelerating their graduation. Students on academic dismissal at the close of spring semester may attend Tulane Summer School and remedy their deficiencies.

Full credit is given, without special approvals, for Tulane Summer School courses offered by the full-time undergraduate schools at Tulane. Other Tulane Summer School courses may be taken within the nine-credit limit for courses outside the College. Students should

consult with their academic advisors regarding the proposed Tulane Summer School program during the registration period in the fall.

Students in academic good standing may attend the summer school of any institutionally accredited institution. To ensure that credits earned at another institution will transfer to Tulane, students should consult the "Transferring credit to Tulane University" section of this catalog. Students must obtain prior approval of their choice of institution and proposed summer program no later than the end of the final-examination period in spring semester. Grades earned at other institutions are not computed in the student's grade-point average; therefore, a student cannot make up a grade-point deficiency at Tulane by attendance at another institution. Students may apply up to six credits of approved coursework from another institution toward the senior residency requirement.

Registration

In any given semester, when registration opens for the next semester, students may register for as many as 17 credits during the priority registration period and up to 19 credits thereafter. After the close of a semester, students who have earned a grade-point average of 3.000 or better on 15 letter-graded credits or more during that semester may register for as many as 22 credits in the following semester. After the close of a semester, students who have earned a cumulative grade-point average of 3.500 may register for as many as 25 credits. Any student interested in an overload must submit that request to their academic advisor.

Retake Course

Beginning in Spring 2021 a revised retake policy was adopted. Students may repeat courses in which they have earned a grade of D+ or lower. In order to repeat a course, the student must be enrolled in a full-time course load (a minimum of 12 new hours) in addition to the repeated course. No more than one course may be repeated in any semester. For each repeated course, only the second grade, whether higher or lower than the initial grade, will be used to calculate the student's GPA. The initial grade will not count as credit hours attempted or earned, and therefore is not calculated in the GPA, but it will remain visible on the student's transcript. The grade penalty for a WF is never removed from the GPA.

Students who are found responsible for academic misconduct are not eligible to have that original grade expunged. In this case, both the initial grade and the second grade will be counted in their GPA.

Retention of Academic Records

Student records (in electronic storage in Academic Advising) will be retained for eight years from the time of first fall enrollment of that student cohort. For most students, this will mean that their records will be kept for 4 years after graduation (3 years for Architecture students). This restriction does not apply to academic records kept by the Registrar's Office; those records are retained permanently.

Satisfactory/Unsatisfactory Option

Where individual schools permit, students in good standing may elect to take one course on a satisfactory/ unsatisfactory (S/U) basis per semester. They may count no more than ten credits from such courses toward degree requirements. The S/U option may not be used to satisfy the writing, foreign language, quantitative or formal reasoning, and laboratory components of the core curriculum, or major or minor requirements. The last date for designating or revoking the S/U option is the deadline for dropping courses. Schools may impose additional limitations on courses that can be taken S/U; please refer to the appropriate school section for more information.

A student electing this option gets academic credit for the course without affecting the grade-point average as long as the work is at the C- level or better. A grade of U is not counted in the grade-point average and carries no credit for the course. Students are cautioned that because a grade of S is not counted in the grade-point average, it will not count toward the Dean's List honors or towards the 2.000 grade-point average required for graduation.

Scholarly Honors

Students may graduate with departmental honors by completing an Honors Thesis, Honors Case Study, or Senior Honors Project in the Fine Arts. For more information regarding the rules, process, and deadlines for these opportunities, please visit the Senior Honors Thesis website (https://enrichment.tulane.edu/senior-honors-thesis/).

Study Abroad Policies

Overview

Study Abroad (OSA) maintains a portfolio of high-quality semester and yearlong study abroad programs that have been approved by the Newcomb-Tulane Study Abroad Committee. These programs are open to all qualified undergraduate students pursuing degrees in the Schools of Liberal Arts, Science & Engineering, Architecture, Public Health & Tropical Medicine, and Business.

Tulane University partners with top overseas universities and international institutions to make the highest quality overseas educational experiences available to its students. The range of subject matter reflects the particular opportunities and scholastic strengths available in each location. Language instruction is an integral part of the programs in non-English-speaking countries.

Approved Semester and Yearlong Options

The OSA administers over 148 study abroad programs for undergraduates in Europe, Latin America, Africa, Asia, and Australia. More details are available from the Office of Study Abroad web site (https://studyabroadprograms.tulane.edu/).

These programs are open to all qualified students in the Newcomb-Tulane College who meet specific eligibility requirements.

Independent Scholar Option (ISO)

Students may choose to design their own study abroad experience for a semester or year abroad through the Independent Scholar Option. The ISO offers exceptional juniors and seniors the opportunity to propose a semester or year abroad pursuing a course of study for which there is no equivalent on an existing approved program. Students considering the ISO are required to have a meeting with a Study Abroad Advisor to discuss the proposed course of study abroad and the application process.

ISO applicants should demonstrate a high degree of maturity, independence, and preparation.

Credits and Grades

Unless specifically noted in the program description, grades earned abroad in approved Newcomb-Tulane College Study Abroad Programs in the Fall semester of 2015 and thereafter will appear on the official transcript but will not be calculated into the cumulative GPA. This policy will not apply to Tulane faculty-led summer programs, or to courses completed in study abroad programs offered through the Freeman School of Business.

Advising for Study Abroad

Newcomb-Tulane undergraduates are encouraged to begin their academic preparation for study abroad as early as their first semester at Tulane. Students may select a program independently or in close consultation with the OSA study abroad advisor, as well as the academic and major advisors. The OSA hosts informational meetings, advising sessions, discussion groups, and panel talks to inform students of their options for studying abroad. In addition, the OSA organizes an annual fall study abroad fair to promote education abroad opportunities. A complete guide to study abroad is available on the OSA web site.

Eligibility and Selection Criteria

At the time of application, all students must present persuasive evidence of the necessary academic and intellectual strength, linguistic skills, and special preparation in the area of the proposed course of study. A compelling argument that the proposed program and destination are appropriate in terms of academic, cultural and personal goals should be clearly articulated in the application essay.

Students must also demonstrate the individual initiative and strong sense of personal responsibility required to complete the program abroad. Students must familiarize themselves with the program-specific GPA and course prerequisites when planning for study abroad. Due to high demand, competition may occur within the various programs because some have a limited number of spaces.

The student's academic and major advisors must support the application and indicate that the proposed overseas study will advance and not impede progress toward the degree. Applicants are also asked to indicate how they expect to complete graduation requirements. Qualified students may study abroad as early as the freshman year.

Academic Integrity and Code of Student Conduct

Students who have been found responsible for a violation of the Code of Academic Conduct within the past year may not study abroad. If the violation was earlier than the past year, the student may apply to study abroad and the violation will be reviewed as part of the student's record. Students may not study abroad while on disciplinary probation

Tuition and Fees

For each semester abroad, participants pay Tulane tuition and the academic support service fee. Airfare, housing, meals, vacation travel, and personal expenses are extra and vary by location.

Financial Aid and Scholarships

For eligible students, all federal financial aid (Pell Grants, Supplemental Educational Opportunity Grants, Perkins Loans, Stafford Loans, and Parent Plus Loans) except for work-study awards can be applied to all Tulane study abroad programs. All Tulane University institutional aid (Dean's Honor Scholarship, Distinguished Scholars Award, Founders Scholarship, and Tulane Need-Based Scholarship), except for the housing stipends, can be used for participation in Tulane study abroad programs as well. Students must meet with their financial aid advisor to confirm their financial aid status.

There are several scholarships available for study abroad depending on location. Student should visit the OSA web site for a complete list of awards available through the College as well as those available from partner institutions.

Tulane Summer Programs

Undergraduate students can take advantage of a variety of faculty-led summer study abroad programs focused on special topics.

Costs and application procedures vary by program; visit the OSA web site (https://cge.tulane.edu/summer/) for a list of available summer programs.

Leave of Absence (LOA) Study Abroad

Students seeking transfer credit approval for a semester study abroad program must complete the Leave of Absence Semester Program petition available on the Office of Study Abroad website and should also consult with a study abroad advisor. This petition must be approved in order for students to transfer credit earned on a Leave of Absence Semester Program back to Tulane.

Tulane University will assess an academic support fee for students studying abroad in Fall or Spring through the “Leave of Absence Semester” option. This fee will be assessed at the beginning of the semester you are abroad. For more information, please visit the OSA website (https://cge.tulane.edu/resources/policies/leave-of-absence/).

Non-Tulane Summer Programs

Students seeking transfer credit approval for a summer program may complete the Non-Tulane program application available on the OSA website and work to transfer credits back to Tulane with their academic advisor. No fee is charged during the summer non-Tulane process. For more information, please visit the OSA website (https://cge.tulane.edu/summer/).

Transcripts

Students may order electronic and/or mailed transcripts through the "Order A Transcript" link in the student section of Gibson Online. Alternatively an official transcript of a student's record may be sent to any person or institution upon the student's written instruction. Requests for official transcripts must be sent to the University Registrar. Instructions on the information to include with the request are available on the Registrar's Office website: www.registrar.tulane.edu (http://www.registrar.tulane.edu). Transcripts may be withheld for unpaid financial accounts with the university.

Transferring Credit to Tulane University

Transferring Credit Earned Prior to Matriculating at Tulane University.

Incoming first-year students planning to enroll in courses elsewhere during the summer prior to arriving at Tulane must consult with an academic advisor for approval. In order to be considered for approval,

college courses taken prior to enrolling in Tulane University, Newcomb-Tulane College requires:

- The courses were offered by a institution accredited by one of the following institutional accrediting agencies*: Southern Association of Colleges and Schools Commission on Colleges (SACSCOC), Higher Learning Commission (HLC), Middle States Commission on Higher Education (MSCHE); New England Commission on Higher Education (NECHE), Northwest Commission on Colleges and Universities (NWCCU), or the Western Association of Schools and Colleges (WASC).
- The courses were listed in the official catalog of the college or university from which the credit was earned;
- Course was composed primarily of degree-seeking college students;
- The courses were taught by college or university faculty;
- A grade of C or better was earned in each course.

These agencies were referred to as "regional accreditors" prior to 2020.

Dual Enrollment

Tulane may award up to fifteen credits for dual enrollment high school courses (those courses appearing on both the high school transcript and the transcript of the college/university) as long as the course(s) meets all other requirements for pre- matriculation:

- The courses were offered by a institution accredited by one of the following institutional accrediting agencies*: Southern Association of Colleges and Schools Commission on Colleges (SACSCOC), Higher Learning Commission (HLC), Middle States Commission on Higher Education (MSCHE); New England Commission on Higher Education (NECHE), Northwest Commission on Colleges and Universities (NWCCU), or the Western Association of Schools and Colleges (WASC).
- The courses were listed in the official catalog of the college or university from which the credit was earned;
- A grade of C or better was earned in each course.

These agencies were referred to as "regional accreditors" prior to 2020.

Please note that some credits may be denied for applicability to a professional school's major/minor degree requirements due to accreditation standards.

In order to process transfer credit approval requests for all college courses taken prior to enrolling in Tulane University:

- A Transfer Credit Approval Form from his or her Newcomb-Tulane College advisor. The advisor will verify the student's eligibility to earn transfer credit and the accreditation of the school at which the student wishes to study.
- An official transcript issued to Tulane University (not a grade report or transcript issued to the student)
- Course descriptions from the college catalogs or brochures that correspond to the courses on the transcript, and other documentation (syllabi, etc.) that the academic department requires for review.

Following submission of these items to Newcomb-Tulane College's academic advisor, the courses will be evaluated, and if found to be equivalent to Tulane University coursework, the student's Tulane transcript will be adjusted to reflect the academic credit awarded in transfer. Individual course equivalency for dual high school/associate degree courses will be determined by Tulane departments and programs. All courses are subject to approval, and in some cases courses may not be approved for credit. Grades are not transferred with the credits.

Transferring Credit Earned after Matriculation at Tulane University

Continuing or returning students in academic good standing are eligible to apply for transfer credit from an institution within the United States accredited by one of the following institutional accrediting agencies*: Southern Association of Colleges and Schools Commission on Colleges (SACSCOC), Higher Learning Commission (HLC), Middle States Commission on Higher Education (MSCHE); New England Commission on Higher Education (NECHE), Northwest Commission on Colleges and Universities (NWCCU), or the Western Association of Schools and Colleges (WASC). Prior approval is necessary in order for currently enrolled students to take course(s) for transfer credit to Tulane University. To be eligible for transfer credit from study-abroad programs, students must have at least a 2.700 cumulative grade-point average at Tulane and obtain approval for the program abroad from the Center for International Studies.

These agencies were referred to as "regional accreditors" prior to 2020.

The transfer credit policy for the university is as follows.

The currently enrolled student must obtain the catalog description for each course the student wishes to take at another institution accredited by one of the following institutional accrediting agencies*: Southern Association of Colleges and Schools Commission on Colleges (SACSCOC), Higher Learning Commission (HLC), Middle States Commission on Higher Education (MSCHE); New England Commission on Higher Education (NECHE), Northwest Commission on Colleges and Universities (NWCCU), or the Western Association of Schools and Colleges (WASC). *These agencies were referred to as "regional accreditors" prior to 2020.*

The Freeman School of Business and some additional academic departments and programs requires that students also provide a syllabus for each course.

Please note that some transfer credits may be denied for applicability to the professional school's major/minor degree requirements due to professional accreditation standards. The student begins this process with his or her academic advisor. Each course is evaluated by the appropriate school or department at Tulane to determine whether or not it can be applied to a Tulane degree. The institution and program through which the courses were offered must be comparable to the department or program at Tulane awarding the transfer credit.

In order to process transfer credit for these courses, the Newcomb-Tulane College requires:

- A grade of C or better in each course, and
- An official transcript issued to Tulane University (not a grade report or transcript issued to the student). Transcripts should be sent to the Academic Advising Center.

Credit for acceptable work is transferred in the amount recorded on the official transcript of the other institution. Credits earned on a pass/fail or satisfactory/unsatisfactory basis do not transfer unless the transcript states that P or S is equivalent to a grade of C or better. Grades are not transferred with the credits; therefore, a student cannot remedy a grade-point deficiency at Tulane by attendance at another institution.

Transfer Credit and Majors

No more than half of the credits required for each major may be transfer credits.

Transfer Credit Expiration

No credit earned at another college or university more than ten years previously may be applied to an undergraduate degree at Tulane. This rule would apply to the date when the credit is evaluated. While the credits may be more than ten years old by the time the student completes the Tulane degree, they would still count toward the degree so long as the student had remained continuously enrolled at Tulane.

Graduation with University Honors

To be eligible for university honors, a student must have completed a minimum of 60 credits (75 for dual degree candidates) while enrolled at Tulane University; this may include enrollment in Tulane's year-long and semester programs abroad and Washington Semester. Only Tulane credits are computed in the cumulative grade-point average for honors candidates. A student completing two degrees may be awarded university honors for both degrees. Eligibility for honors for each degree will be determined by grades earned in all course work counting toward the respective degree.

Withdrawal

Voluntary

A student who has registered for a semester and plans to withdraw from the university must inform their academic advisor. After appropriate action has been completed with Academic Advising, confirmation of withdrawal will be sent to the student. The official date of the withdrawal must be approved by an assistant dean of advising or associate dean of the college and usually is the date of formal notification. The withdrawal date is important for determining possible refunds. Students who officially have withdrawn from the university cannot reside on campus.

Medical

A petition for a complete withdrawal from all courses for medical reasons and/or a request for a medical leave of absence will be reviewed by a clinician at the Health Center for Student Care. A recommendation will be made by the clinician to the NTC Dean's office and the referral source. Any student who wishes to request a complete medical withdrawal from classes or leave of absence from the University should begin by reaching out to their Academic Advisor or the Assistant Dean of Students-Division of Student Affairs. Grades of W are assigned when a student withdraws from one or more courses for medical reasons after the last day to drop without record.

A partial medical withdrawal from some but not all courses may be permitted upon the recommendation of the Medical Withdrawal Committee. Students requesting a partial medical withdrawal must confer with their Academic Advisor or the Assistant Dean of Students-Division of Student Affairs. Withdrawals from individual courses for medical reasons after the published deadline for dropping a course, will require supporting justification.#The deadline for medical withdrawals from all courses is the last day of classes each term. After this date, they are considered retroactive.

Any student who wishes to return from a medical leave will submit a petition to return as well as submit a treatment provider form showing the student has been medically cleared to return to their studies. This packet will be reviewed by a clinician at the Health Center for Student Care. A recommendation will be made by the clinician to the NTC Dean's office and the referral source.

Required

A student may be required to withdraw from any course or from the university, temporarily or permanently, for any of the following reasons: possibility of danger to the health of the student or to that of other students if enrollment is continued; refusal to obey regulations; violation of the Honor Code or other serious misconduct; unsatisfactory class attendance; or work below the required scholastic standards.

Refunds

The deadlines for the refund of full, three-quarter, one-half, or one-quarter tuition in any semester are listed in the academic calendar. Refunds are recommended by the Newcomb-Tulane College dean in strict accord with the calendar deadlines and only when withdrawals are official. No refunds will be granted after the one-quarter refund deadline.

The established deadlines are applicable under all conditions for withdrawal. University fees, including the student activity fee, are refundable only through the last day to register or add classes.

Core Curriculum

Newcomb-Tulane College General Education Curriculum

The Newcomb-Tulane College Core Curriculum allows students to explore a wide-range of disciplines and embodies the mission and values of the College by allowing students to have flexibility in their core curriculum courses while exploring a full-range of courses.

The core curriculum—which is composed of a minimum of 30 credits—is divided into three parts: proficiency requirements, distribution of knowledge requirements, and additional requirements. To ensure that students experience the breadth of knowledge at the collegiate level, AP, IB, and Cambridge A-Level courses can be used to satisfy proficiency requirements only in Formal Reasoning and Foreign Language.

Courses will be designated as satisfying the distribution requirements according to the content and methodology rather than the departmental affiliation of the course.

The new core curriculum general education requirements went into effect with the entering class of 2018.

Courses proposed to satisfy core requirements will be ratified by the Newcomb-Tulane Curriculum Committee.

Proficiency Requirements

Writing Skills (2 courses and 6 credits)

- Tier 1: Freshman writing (ENGL 1010 Writing or ENGL 1011 Writing for Academic Purposes) unless the student is exempt because of their score on the A.P/I.B./Cambridge-A level exams.
- Students receiving exemption from ENGL 1010 Writing/ENGL 1011 Writing for Academic Purposes are required to take an approved writing class during their freshman year. Approved courses will have at least 1/3rd of the grade based upon writing (excluding in class exams), but no revision is required.
- Tier 2: One additional writing course at the 2000 level or above taken from an approved list. Approved courses will have at least 1/3rd of the grade based upon writing (excluding in class exams), to include revision and re-evaluation by the instructor.
- Students are encouraged to take the Tier-1 writing course prior to taking the Tier-2 writing course; however, students are not prohibited from taking the Tier-1 and Tier-2 courses simultaneously.

Note: creative writing courses cannot be used to satisfy the writing proficiency requirement.

Formal Reasoning (1 course and 3 credits)

- One course in mathematics or symbolic logic from an approved list.

Foreign Language (0-3 courses)

The foreign language proficiency requirement is achieved in any of the following ways:

- A passing grade in a course at the 2030 level (3rd semester of Tulane 4-credit hour Foreign Language or ASLS coursework) or higher in accordance with assigned placement level.
- A passing grade on a Tulane-administered proficiency exam for students with assigned placements above the 2030 level. Students who do not successfully pass the proficiency exam will be automatically placed and must successfully complete a course at the 2030 level.
- A passing grade in a course at the level of placement above 2030.
- Advanced Placement score of 4 or 5 **in a foreign language test as noted in the AP/IB chart**
- Higher-Level IB score of 5 or higher **in a foreign language test as noted in the AP/IB chart**
- Cambridge A-Level score decided by the appropriate language department.
- SAT II achievement test of 640 or higher **in a foreign language.**

Note: This requirement is waived for students in B.S.E. programs.

Distribution Requirements

(A course can satisfy only one of the distribution areas.)

Mathematics and the Natural Sciences (2 courses including 1 lab science course and 7 credits)

(Those completing the B.F.A. degree need only complete 1 course with lab)

Social and Behavioral Sciences (2 courses and 6 credits)

Textual and Historical Perspectives (2 courses and 6 credits)

Aesthetics and the Creative Arts (3 credits), which can be fulfilled in 1-3 courses.

Additional Core Requirements

The First Year Seminar (p. 77) (1 course, 1-3 credits)

This requirement can be satisfied by a Tulane Interdisciplinary Seminar (TIDES) course or Colloquium course (COLQ 1010 Freshmen Colloquium Seminar (1-3 c.h.) or COLQ 1020 Freshman Colloquium (1-3 c.h.))

Public Service (2 courses)

Students develop their commitment to civic engagement through the completion of service learning courses experiences. All students will complete their public service through service-learning courses, an approved public service internship, or an approved public service research experience. These courses can also be used to satisfy other areas of general education.

- To meet this requirement for graduation, all students must complete two semesters of service. One of these semesters must be at the 2000 level or above. The first experience should be completed by the 2nd semester of the sophomore year.
- Service Learning courses require a minimum of 20 hours of service per semester. Those service-learning courses designated as requiring a minimum of 40 hours of service carry one additional credit hour. No course may carry more than 4 credits.

Race and Inclusion (1 course, 3 credits)

One course and 3 credits. Courses that fulfill this requirement will focus on the intersections of race with power, privilege, equity, justice, and/or inclusion and will focus at least 60% their content on these issues in the United States. These courses may also be used to satisfy proficiency or distribution core curriculum requirements.

Global Perspectives (1 course, 3 credits)

One course and 3 credits. Courses that fulfill this requirement will focus at least 60% content with stated objectives to develop historical, cultural, and societal knowledge of an area beyond the United States. These courses may also be used to satisfy proficiency or distribution core curriculum requirements.

For more information please visit the Core Curriculum website (https://college.tulane.edu/core-curriculum/).

Degrees, Programs, and Requirements

Degrees, Programs, and Requirements

Degrees

Degrees offered in Newcomb-Tulane College expose students to a wide range of thought, fact, and human experience. Such a liberal education broadens students' knowledge and awareness of each of the major areas of human understanding into which the disciplines are divided and prepares students for a constructive role in society and for continued learning that contributes to a productive career and a rewarding personal life.

- Bachelor of Architecture (B.Arch.)
- Bachelor of Arts (B.A.)
- Bachelor of Fine Arts (B.F.A.)
- Bachelor of Science (B.S.)
- Bachelor of Science in Architecture (B.S.A.)
- Bachelor of Science in Engineering (B.S.E.)
- Bachelor of Science in Management (B.S.M.)
- Bachelor of Science in Public Health (B.S.P.H.)

The degree awarded to the student is dependent on the primary major program(s) completed. Candidates completing a primary major program in the humanities or the social sciences receive the B.A. degree; those completing a primary major program in the fine arts receive either the B.A. or the B.F.A. degree. The B.S. degree is awarded to candidates completing a primary major program in the sciences or architecture. Candidates completing primary major programs in anthropology, economics and linguistics receive either the B.A. or B.S. degree.

Degree Requirements

The credits presented for an undergraduate degree must satisfy the core curriculum, school specific core curriculum and major requirements described within the appropriate program of study. Each candidate for degree is required to have completed at least 120 credits of academic work and to have achieved a 2.000 cumulative grade-point average at the university and in the major. At least 60 of the 120 credits must be earned in courses above the 1000 level. Academic credit is awarded on the credit-hour system (p. 1361).

Students who have not completed the first-year writing core proficiency requirement by the end of the second semester of enrollment may not early register for the following semester and may not return to the College until this requirement has been fulfilled.

The College's foreign language requirement is proficiency at the third semester or 2030 level. All students must receive formal placement in any foreign language they plan to take while at Tulane.

These policies apply to all students, including those who contemplate leaving for any reason prior to graduation.

The recommended semester program consists of 15 credits to 19 credits. All degree candidates must have completed the last 30 credits of coursework in residence in the college and a minimum of 60 credits at Tulane University. Students who participate in a Tulane study abroad program or other Tulane-sponsored program in the senior year are earning Tulane grades and credits and, therefore, are considered to be meeting the senior residency requirement.

Subject to approval, students may count up to six credits of summer work from other institutionally accredited institutions, as part of their last 30 credits that must be completed in residence. Other school- or program-specific restrictions may apply. Students are encouraged to consult with their advisers.

Credits outside of Newcomb-Tulane College

A maximum of nine credits from courses offered by schools that are not within Newcomb-Tulane College (in the Schools of Professional Advancement, Undergraduate Law, and Undergraduate Social Work) may count toward graduation requirements. Individual schools within NTC may further restrict non-NTC coursework and students should refer to individual school sections of the Catalog for more information.

Newcomb-Tulane College students who choose to declare a major or minor that includes approved coursework from the School of Social Work or the School of Professional Advancement (SoPA) are permitted to use all of the coursework from that approved program toward their

undergraduate degree. Newcomb-Tulane College may pursue up to one major and one minor in SOPA. Should students abandon the above-mentioned major or minor before completion, students will be only be permitted to apply a maximum of nine credits of coursework toward graduation requirements. Students pursuing a major in SOPA and a major in NTC must declare the NTC major as their primary major except in the cases of coordinate majors.

Residency

All degree candidates must have completed a minimum of 60 credits at Tulane University (excluding Tulane study abroad and Washington Semester programs).

Students must complete the last 30 credits of coursework in residence in the College. Students who participate in a Tulane study abroad program or in the Washington Semester program in the senior year are considered to be meeting the senior residency requirement but these credits will not apply toward the 60 credit university residency requirement. Students participating in dual degree physics and engineering programs (Tulane and approved partner universities) are exempted from the senior residency requirement but not the Tulane residency requirement.

At least half of the credits required for each major must be completed at Tulane University.

ROTC Credits

A maximum of 15 credits from ROTC courses (AERO, MILS, NAVS) may be applied to a Tulane degree.

Dual Degrees

Tulane University offers the option of obtaining two undergraduate degrees. Newcomb-Tulane College students should refer to the school-specific sections for more information on pursuing dual degrees within the same school and consult with their advisors early in their academic careers.

To qualify for two baccalaureate degrees (dual degree) from any of the schools, a student must complete a minimum of 150 credits (75 credits completed at Tulane University) at least 82 of which must be above the 1000-level and satisfy all requirements for each degree and each major. A candidate also must file a degree application for each degree at least two semesters prior to the anticipated date of graduation.

Academic Programs

Newcomb-Tulane College students may pursue academic programs across the undergraduate division.

- NTC Majors (p.)
- NTC Minors (p.)
- NTC Certificates (p.)

Academic Programs Outside of Newcomb-Tulane College

The following majors and minors, housed in schools outside of Newcomb-Tulane College (NTC), are available to Newcomb-Tulane College students as full programs. NTC students pursuing the majors listed below as their primary majors must complete the degree and core requirements of Newcomb-Tulane College. NTC Students pursuing a Bachelor of Science in Exercise Science must additionally complete MATH 1210 Calculus I (4 c.h.) or equivalent plus MATH 1230 Statistics For Scientists (4 c.h.) and NTC students pursuing a Bachelor of Science in Information Technology must additionally complete the B.S. mathematics requirement which includes MATH 1210 Calculus I (4 c.h.) or equivalent plus one additional mathematics course above Calculus I. Individual school restrictions within NTC may limit their students from pursuing these majors or using the credits from these majors toward their degree programs. Students should refer to the individual school sections for more information.

Newcomb-Tulane College students who choose to declare a non-NTC major or minor that includes approved coursework from outside NTC are permitted to use all of the coursework from that approved program toward their undergraduate degree. Newcomb-Tulane College students may pursue up to one major and one minor in SOPA. Should students abandon the above-mentioned major or minor before completion, students will only be permitted to apply a maximum of nine credits of coursework toward graduation requirements. Students pursuing a non-NTC major and a major in NTC must declare the NTC major as their primary major except in the cases of coordinate majors.

Majors Outside of Newcomb-Tulane College available to NTC Students

- Exercise Science, B.S. (p. 464)
- Health and Wellness, B.A. (p. 464)
- Homeland Security, B.A. (p. 449)
- Information Technology, B.S. (p. 455)
- Secondary Education (Grades 6-12) Coordinate Major (p. 445)
- Social Policy and Practice Coordinate Major (p. 323)

Minors Outside of Newcomb-Tulane College available to NTC Students

- Exercise Science Minor (p. 464)
- Health and Wellness Minor (p. 464)
- Homeland Security Studies Minor (p. 449)
- Information Technology Minor (p. 457)
- Social Work Minor (p. 642)
- Teaching English Learners, Minor (p. 447)
- Teaching, Learning, and Training Minor (p. 447)

Major Component

A major field of study provides each student the opportunity to explore a single area of inquiry in depth and to gain the self-confidence derived from mastery of a subject. The major must be selected no later than the beginning of a student's fourth semester of college study. The selection of a major program also determines the school with which the student will be affiliated. Students may change their majors at any point in their academic careers; students choosing to change their majors should be aware that:

- this action may necessitate a change in school,
- not all previously completed coursework may apply to the newly selected school or major, and
- additional coursework may be necessary to meet the new major requirements

Students who elect to complete more than one major must complete all courses for each major. Students declaring a second major must

officially declare their second major and return the declaration form to the advising office for approval. At least half of the coursework required for each major must be completed at Tulane University. Newcomb-Tulane College students should be aware that obtaining a second major in professional degree programs requires obtaining the professional degree, i.e. B.S.E., B.S.M., B.S.P.H., M.Arch. Professional degree programs must serve as a primary major. Newcomb-Tulane College students are permitted to pursue the following majors within the School of Professional Advancement: Exercise Science, Health & Wellness, Homeland Security, Information Technology, and the Secondary Education Coordinate Major.

Self-Designed Majors

A student with a 3.50 GPA may construct a unique self-designed coordinate major program of study by grouping courses from different academic departments and programs primarily in Liberal Arts. While interdisciplinary in nature, a self-designed major should be focused in the School of Liberal Arts. Self-designed major proposals require a petition to the Committee on Undergraduate Academic Requirements, which may grant approval after a review of the proposal, rationale, and proposed list of courses. Detailed instructions for preparing the proposal can be found here (https://tulane.instructure.com/enroll/M4XMDG/).

Double Majors

Newcomb-Tulane College students must have a primary major in the Schools of Architecture, Business, Liberal Arts, Public Health and Tropical Medicine, or Science and Engineering except for students pursuing a primary major in one of the approved School of Professional Advancement programs for Newcomb-Tulane College students . Any student may also pursue a second major. If the second major is not housed in the primary school, the student does not have to complete the school-specific requirements of the secondary school. Subject to approval by their advisors, students may also pursue a second major in a professional degree program; however, this option requires completing all degree requirements for the second major and obtaining the professional degree, i.e., B.S.E., B.S.M., B.S.P.H, M.Arch. (See Dual Degrees.)

Full-time students may pursue second majors or minors in the School of Professional Advancement not listed above only as a voluntary overload when permitted by the program. The second majors available are Public Relations, General Legal Studies, Digital Design, Humanities, and Social Science; the second minors available are Health and Wellness and Homeland Security.

Minor Component

Undergraduate students may complete one or more minors. The minor is optional and is designed to provide structure to the study of a secondary field of interest chosen by the student. Students who elect to complete the requirements for a minor must earn a grade-point average of at least 2.000 in courses counting toward that minor. No courses counting toward the student's first minor will count toward the student's second minor. Individual schools or departments may specify the number of credits allowed for major-minor overlap and how many minors are permitted in the degree. Students should consult departmental listings for additional information. Newcomb-Tulane College students are permitted to pursue the following School of Professional Advancement minors: Exercise Science, Information Technology, and the minor in Teaching, Learning, and Training.

Undergraduate Certificates

Students may complete an undergraduate certificate concurrently with their degree. The certificate is optional and must be selected and officially declared no later than the beginning of a student's final year of study and prior to applying for graduation. Students may not count the same course(s) toward a minor and a certificate. Additional restrictions on overlap between a certificate and majors are governed by the academic programs in the schools. Students should consult with their advisors for more information.

Advanced Placement (AP)/ International Baccalaureate (IB) Credits/Cambridge A-Levels

Advanced placement or college credit is awarded to students who receive the required scores on AP, IB, and Cambridge A-Level exams as established by Tulane University academic departments. It is the student's responsibility to ensure that an official report of the test scores is sent to Tulane University.

When planning their fall schedules, first-year students should not enroll in courses for which AP, IB, or Cambridge A-Level credit is expected. AP, IB, or Cambridge A-Level credit does NOT count toward the minimum or maximum course load or toward the minimum number of earned credits required to remain in academic good standing. No more than four credits of English and no more than four credits of a single modern foreign language will be awarded to any student, even if the student has high scores on the language and literature tests.

Tulane University also awards credit for scores of 5 or better on higher-level International Baccalaureate exams. For more information about IB credit, please contact an academic advisor.

Beginning in Fall 2020, Tulane University will accept Cambridge A-Level for advanced standing, placement, and elective credit.

AP, IB, A-Level Equivalency Chart

An equivalency chart can be found **here (p. 73).** A complete listing of AP credit and placement for individual subject areas is also located at https://advising.tulane.edu/resources/equivalencies (https://advising.tulane.edu/resources/equivalencies/). Questions regarding advanced placement credit should be directed to Newcomb-Tulane College Academic Advising.

CLEP

Full-time undergraduate students enrolled in Newcomb-Tulane College may not earn credit toward a degree through the College Level Examination Program (CLEP).

Advanced Standing and Exemption

Although the university awards placement or credit to students who have earned sufficiently high scores on AP, IB, and Cambridge A-Level exams, students not in these programs also may have special expertise in a foreign language. Students, who prove proficient in a foreign language through a sufficiently high score on the College Board Achievement Test or on a departmentally administered proficiency exam, are exempted from the proficiency portion of the foreign

language requirement only, with no credit awarded; all students must take at least one foreign language course in that language at Tulane University. Exemption may be given in other departments on an individual basis.

Core Curriculum

The Newcomb-Tulane College Core Curriculum (p. 32)- which is composed of a minimum of 30 credits- is divided into two parts: proficiency requirements and a distribution of knowledge. To ensure that students experience the breadth of knowledge at the collegiate level, AP, IB, and Cambridge A-Level course credit can be used to satisfy proficiency requirements only in Formal Reasoning and Foreign Language. Courses are designed as satisfying the distribution requirements according to the content and methodology rather than the departmental affiliation of the course.

English Placement Requirements for International Students

English for Academic and Professional Purposes

In the first year, Newcomb-Tulane College students should complete one of the following courses: ENGL 1010 Writing (4 c.h.) or ENGL 1011 Writing for Academic Purposes (4 c.h.). If an AP score of 4 or 5 on the English Advanced Placement (AP) examination or a 6 or higher on the English International Baccalaureate (IB) examination is earned, the student will earn credit for ENGL 1010. Students who earn AP or IB credit for ENGL 1010, should enroll in a Tier-1 Writing Course in the first year.

The typical pattern for international students is to take the online placement program in the summer, EAPP 1000 Composition and Reading (3 c.h.) and EAPP 1050 Multicultural Speech (3 c.h.) in the Fall, and ENGL 1011 Writing for Academic Purposes (4 c.h.) in the Spring. However, excellent performance in the placement program can waive some of those courses at the discretion of the English for Academic and Professional Purposes Program. Completing this series allows students to meet two core requirements while satisfying their Tier-1 Writing Course.

International students are required to participate in an online placement program, “American Academic English” in the summer before arrival. The online program can be completed from home and requires participants to spend approximately two hours to complete the writing requirements. The program is designed to place international students into the writing, public speaking, and English classes, which will give them the best chance of success at Tulane while also giving them an advanced support system.

Requirements

International students are required to participate in an online placement program, “American Academic English” in the summer before arrival. The online program can be completed from home and requires participants to spend approximately four hours to complete the writing requirements. The program is designed to place international students into the writing, public speaking, and English classes, which will give them the best chance of success at Tulane while also giving them an advanced support system.

International students take Composition and Reading in a Global Context (EAPP 1000 Composition and Reading (3 c.h.)) and Multicultural Speech (EAPP 1050 Multicultural Speech (3 c.h.)) their first semester to maximize their academic success. EAPP 1000 fulfills the Global Discourse core requirement, and EAPP 1050 fulfills the Race and Inclusion core requirement. Writing (ENGL 1010) and Writing for Academic Purposes (ENGL 1011) fulfill the Tier-1 Writing Requirement, and students are placed into one based on which is predicted to benefit them most. Most take ENGL 1011 in the Spring. ENGL 1011, “Writing for Academic Purposes,” is focused on the unique skills and particular needs shared by many international students. Any international student who brings in Advanced Placement or International Baccalaureate credit for ENGL 1010 must take a Tier-1 Writing Course.

Students in the Tulane Advantage program must take EAPP 1000 and 1050 in the Fall, followed by ENGL 1011 in the Spring. Students can contact the English for Academic and Professional Purposes program for more information at LangEx@tulane.edu (langex@tulane.edu).

Course ID	Title	Credits
Tulane Advantage		
EAPP 1000	Composition and Reading	3
EAPP 1050	Multicultural Speech	3
ENGL 1011	Writing for Academic Purposes	4
General Requirements		
EAPP 1000	Composition and Reading [1]	3
EAPP 1050	Multicultural Speech	3

[1] This requirement may be fulfilled over the summer.

Graduate Work

Students in Newcomb-Tulane College with a grade-point average of at least 3.33 in their major program may register, normally in their senior year, for up to six credits of graduate-level courses, for credit toward a baccalaureate degree. Approvals from the course instructor, department chair, and Academic Advising Center Dean or Advisor are required.

Provisional Graduate Credit

A senior who completes all baccalaureate requirements before the end of the senior year and intends to enter a Tulane University graduate program may apply for provisional graduate credit in up to, but not more than, 12 credits of graduate 6000- and 7000- level courses. These courses must be approved by the applicable department beyond the credits needed for the baccalaureate. Graduate credit for such work, if passed with a grade of B or better, will be awarded when the student is admitted to full graduate status in the applicable school, upon recommendation of the department chair and approval of the dean. These provisions do not apply to transfer of credits to or from other graduate institutions.

4+1 Programs

Tulane University has developed "4+1" programs in which students can obtain a master's degree within one year of completing the bachelor's degree. Students who pursue this option take courses in the fifth year at a substantially reduced tuition rate.

School of Liberal Arts

- Anthropology, MA (p. 223)
- Art History, MA (p. 227)

- Computational Linguistics, MA (p. 305)
- English, MA (p. 243)
- French/Francophone Studies, MA (p. 246)
- History, MA (p. 255)
- Linguistics, MA (p. 311)
- Philosophy, MA (p. 264)
- Policy Economics, MA (p. 241)
- Political Economy with Data Analytics, MA (p. 322)
- Spanish and Portuguese, MA (p. 273)
- Spanish, MA (p. 275)

School of Science and Engineering

- Applied Mathematics, MS (p. 571)
- Behavioral Health, MS (p. 594)
- Biomedical Engineering, MS (p. 546)

- Neuroscience, MS (p. 605)
- Physics, MS (p. 592)
- Psychology, MS (p. 596)
- Statistics, MS (p. 576)

Interested students should contact their academic advisors and the 4+1 Program for more information.

Joint-Degree Programs

Tulane University offers joint-degree programs (undergraduate and graduate) in Business, Law, and Public Health & Tropical Medicine. The undergraduate schools allow qualified students who have completed three years of undergraduate work to begin graduate studies in one of the professional programs. A student who completes the junior year in residence in any of the schools (not on a Tulane year-long study abroad program) and then begins study in one of these professional programs may receive a bachelor's degree from the respective school after satisfactorily completing one year of full-time professional study.

To enter one of these programs, students are required to be accepted by the professional program and to obtain approval from the Newcomb-Tulane College dean by the end of the sixth semester of study. Joint-degree candidates are required to complete 90 credits in Newcomb-Tulane College during three years of study before starting work in the professional program. Credits earned in divisions outside Newcomb-Tulane College (in Schools of Law, Medicine, Social Work or School of Professional Advancement) may not be applied to the 90 credits. Candidates must meet all core curriculum and major requirements for the bachelor's degree in the undergraduate school. Students in joint-degree programs must complete 120 credits by the close of their fourth year of study in order to receive a degree from the undergraduate school. Students who fail to do so will be required to attend Tulane Summer School to make up their credit deficiency before beginning their second year in the professional school. Transfer students must complete two years of undergraduate work at Tulane to be eligible for a joint-degree program.

All students must file an application for degree at least two semesters prior to the anticipated date of graduation. Every course taken during the first year in the professional program must be passed, and the student's performance in the first year's work in the professional program must be of sufficient quality for advancement to the second year. A student who fails to meet this requirement may become a candidate for a degree in the undergraduate school after satisfactorily completing an additional year of study in the undergraduate school. If a student in a joint-degree program is a candidate for honors, the grade-point average used to determine the eligibility includes the applicable work done in the professional program.

Independent Studies

Many departments and programs offer to a limited number of students with superior scholastic standing creative opportunities for independent study normally under the direction of full-time faculty members. The work may take the form of directed readings, laboratory or library research, or original composition. Instead of traditional class attendance, the student substitutes conferences, as needed, with the director. An independent study is a stand-alone course that may not be added to another course and may not replicate existing courses.

Internships for Academic Credit

Consult the individual schools' sections of this catalog for information on internships for academic credit within a major or degree program and for policies regarding limitations on internship credit.

A one-credit internship, INTR 1990 Liberal Arts Internship (1 c.h.), is available to students in the College who are seeking opportunities with organizations that require interns to receive credit for their experience. INTR 1990 credit applies toward the degree but does not apply to any specific degree requirements. This course is offered only on a satisfactory/unsatisfactory basis and counts within the credit limit for S/U courses. It may be taken more than once but will count as credit toward the degree only once. Before registering, students must apply for this internship course with the Newcomb-Tulane College Dean's office.

Co-Operative Education

A co-operative education program is offered for seniors in Chemical Engineering. Consult the School of Science and Engineering for details.

Prelaw Program

There is no standard prelaw curriculum that must be followed to qualify for admission into law school. A well-rounded education is the best preparation for the study of law, because such an education ensures exposure to a wide variety of ideas and leads to an understanding of the various social, political, economic, and cultural forces that have shaped laws and the societies they govern. Students should develop analytical reasoning and communication skills. Proficiency in writing is essential. Students considering law school are encouraged to begin consulting with the prelaw adviser early in their undergraduate career.

Prelaw Early Acceptance Program

Particularly well-motivated and well-qualified juniors may apply to the Tulane University Law School through the Prelaw Early Acceptance

Program. Prelaw Early Acceptance Program candidates complete all requirements of the normal baccalaureate program, but are guaranteed admission to the Law School upon graduation. Students are expected to follow an academically rigorous program while maintaining a high level of academic performance throughout their college careers. Only students who complete all four years of college at Tulane (with the exception of the Tulane study abroad program) are eligible. (This program should not be confused with the 3+3 program, in which Tulane students are accepted to the Law School during the junior year and permitted to enroll at the Law School during what would otherwise be the student's senior year, receiving the baccalaureate degree after the first year of law school and the law degree after two additional years of law school.)

To be considered for the program, students must provide a Tulane transcript showing normal progress (at least 30 credits per year) for at least five regular, full-time semesters of Tulane coursework, and evidence of in-depth study in at least one area. Students must present a cumulative grade-point average of at least 3.400 and a score on the Law School Admission Test (LSAT) of at least 161. Applications should be submitted between October 1 of the junior year and February 1 of the senior year. The LSAT may be taken anytime between June after the sophomore year and December of the senior year. The earliest point at which the Law School will offer admission occurs after the fall semester of the junior year.

Premedical and Pre-Professional Health Programs

While undergraduate students are completing the regular baccalaureate curriculum of their choice, they may work concurrently to complete the courses required to enter programs in the health professions, including dentistry, medicine, optometry, osteopathy, podiatry, and veterinary medicine. Preparation for such programs normally includes two semesters each of biology (with laboratory), general chemistry (with laboratory), organic chemistry (with laboratory), and physics (with laboratory). Many schools have additional entrance requirements including mathematics and upper-level science courses. Due to the variations in course requirements imposed by these professions, students should request specific information from schools in their fields of interest or from the health professions adviser.

Students interested in one of these professions may pursue a baccalaureate degree in any discipline. In the first three years, however, they should plan a course of study to meet the basic requirements of the professional school. Students considering a career in medically related fields should begin consulting the health professions adviser early in their undergraduate career to discuss available options in their choice of and preparation for a future profession.

Creative Premedical Scholars Program

The Creative Premedical Scholars Program seeks students who want to major in the liberal arts at Tulane and pursue a career in medicine after graduation. Successful applicants receive guaranteed admission to Tulane's School of Medicine and are not required to take the MCAT. Relieved of the pressures that often accompany preparation for the MCAT and applying to medical school, Creative Premedical Scholars are free to invest in a course of study within the humanities, arts, and social sciences

To be eligible for consideration, applicants must have a 3.6 GPA, complete a minimum of 60 credits of undergraduate coursework, and earn a B- or higher in all of the premedical science course requirements by the end of their sophomore year. The requirements are: one year each of general biology, general chemistry, organic chemistry, and physics, all with laboratories.

Courses may be taken during the summer at Tulane or at another institution that has been approved by the respective departments for transfer credit. Students accepted into the program are expected to earn a BA or BFA degree in the School of Liberal Arts. Majors in the Business School, School of Science and Engineering, School of Continuing Studies, or School of Public Health are not acceptable, though a student may pursue any minor. Students who have completed more than two years of undergraduate work or have transferred to Tulane from another university are not eligible.

Applications are due in early April of the sophomore year. Applications will be reviewed by the Creative Scholars Nominating Committee and top-ranked students will be invited to interview with the committee at the end of April. The Committee will notify applicants regarding their decision by mid-June. Creative Medical Scholars are expected to carry at least 15 credits per semester. They must also write an Honors thesis (Scholars not in the Honors program will write a thesis in their major department).

For further information please contact a Pre-Health Advisor. https://advising.tulane.edu/planning/pre-health (https://advising.tulane.edu/planning/pre-health/)

Tulane Pathways to Medicine

The Tulane Pathways to Medicine (TPM) is a 4+4 program that provides students, upon matriculation to Tulane University as undergrad students, admissions to Tulane University School of Medicine (TUSOM). This program is best suited for high-achieving students who are committed to pursuing a degree in medicine at Tulane after they complete their four years of undergraduate education.

TPM is an invitation-only program. Select high-achieving students will be invited to apply for TPM after they apply for undergraduate admission. Students selected to apply typically have an ACT score of 35+ and a high school GPA of 3.8+. The Office of Undergraduate Admissions will invite candidates to interview on campus during Honors Weekend. Soon after the interview process, the applicants will be notified if they are accepted in the program.

Matriculation into TUSOM is contingent upon successful completion of the undergraduate curriculum requirements. Students in the TPM program are not required to major in a particular major but will be required to maintain a 3.5 overall GPA as well as a 3.5 in their core science classes. Students will also be required to take the MCAT exam prior to entering medical school but scores will not be used for admissions purposes.

Students' undergraduate education in the TPM program will be partially financed by the merit scholarship they receive as honor students, along with any additional financial aid they may receive. There will be no guaranteed financial assistance for their medical education, but all accepted students will be eligible and considered for merit-based financial assistance upon entering TUSOM.

For more information about the TPM program, please contact Henry Marrion at hmarrion@tulane.edu.

Newcomb-Tulane College Courses

Career Development (CRDV)

CRDV 1060 Exploring Majors and Careers (1)
Students will engage in self-assessment and exploration surrounding their major and career goals to concretely identify avenues to achieve career-related goals such as major declaration, securing internships, and exploring different career paths. The course may only be taken once for credit.

CRDV 1070 Preparing for Jobs, Internships, and Graduate School (1)
Students will learn the importance of developing their personal brand, establishing a professional network, and applying current career knowledge to achieve career-related goals such as applying for graduate school, securing a job after graduation, and preparing for a successful post-graduation transition.

CRDV 1090 Majors, Internships & Jobs (1)
Using four phases of career development, students will explore the importance of developing a professional identity and concretely identify avenues to achieve career related goals such as major declaration, securing internships, and preparing for a successful transition from college post-graduation. Course may be repeated 2 times for credit.

Course Limit: 2

First-Year Seminar Courses (TIDE, TIDR, COLQ)

TIDE 1000 NOLA Cities of The Dead (1)
Students will be introduced to the history and cultural folkways of New Orleans through the study of historic figures, cemetery architecture, monument construction and funerary symbolism reflected in stone and iron. Why are above-ground tombs more prevalent in New Orleans? What are the different tomb types and their architectural styles? Why do families in Louisiana visit cemeteries on All Saints Day? What symbolism does funerary art in stone and iron reveal? This TIDES course will provide several informative field sessions to local cemeteries combined with class lectures.

TIDE 1003 Happiness & Human Flourishing (1)
What can scientific research tell us about practices and perspectives that lead to a happier life? What can psychology do to help ordinary people to thrive and flourish? Which practices lead to greater fulfillment and life satisfaction? Positive psychology engages such questions by utilizing scientific research methods to identify practices which lead to greater happiness and human flourishing -- a life rich in purpose, relationships, and enjoyment. Positive psychologists maintain that (1) flourishing requires more than curing pathology; (2) flourishing requires tapping human strengths and positive capacities; and (3) scientific research methods can help us to identify and refine strategies for flourishing. This course will provide a theoretical and practical introduction to applied positive psychology. Topics will include positive emotions, hedonic misprediction and adaptation, character strengths (and their application in academia), purpose, gratitude, kindness, meditation, nurturing social relationships, and more. Students will learn about the foundational theories and research of positive psychology and will also engage in experiential homework in which they will apply strategies for enhancing their own health and happiness and for positively impacting their relationships and communities. This course will also expose students to local wellness resources at Tulane and New Orleans and will offer opportunities to explore a variety of life enhancing practices through homework assignments and a few group activities such as attending a yoga class (exercise), a meditation class (mindfulness), and a field trip to the French Quarter exploring New Orleans architecture and history on a walking tour (engagement) and enjoying some local cuisine (savoring).

TIDE 1005 Mardi Gras: Greatest Free Show (1)

TIDE 1010 Ldrshp, Pol, Powr,Change (1)
Are leaders born or bred? How do leaders and their leadership styles impact change? How does one develop the courage and wisdom to lead and promote change effectively? This TIDES class provides an opportunity to examine the nature of leadership, its impact on the change process, and the underlying dynamics of power, politics, and conflict. Over the course of the academic year, this course focuses on developing an interdisciplinary understanding of the theories and practices of organizational and community leadership. As a TIDES member, you will actively study the theories that emerge from a variety of fields and reflect on their practical, political, and ethical assumptions as well as on their implications in a variety of settings. Through readings, classroom discussions, interviews with local leaders, and a group initiative, you will gain a greater appreciation for the issues that affect leaders and the components of successful leadership.

TIDE 1011 Exploring Russia (1)
The war with Ukraine has brought Russia's relationship with its former imperial realm (as well as its own internal minorities) into sharp focus, prompting the scholarly community to examine our prior biases and prejudices. Russia's aggression has intensified calls for a decolonization of our thinking, writing, and teaching about the former Soviet space. Scholars of Ukraine, the Baltics, the Caucasus, and Central Asia, among many others, have called to reappraise prior historiography's Russo-centrism and the often-neglected implications of Soviet nationality policies; the lingering Russian/Soviet imperial legacy. This course will introduce students to the multiplicity of perspectives and experiences of the ex-Soviet nationalities and Russia's ethnic minority groups. A variety of readings, film screenings, musical videos, and guest lectures will be part of the class. No knowledge of Russian is needed or required.

TIDE 1013 The Architecture of Place (1)
How can architecture define a place? How do buildings support social constructs and cultural patterns? How do spatial relationships, proportions, and forms shape how we move through and experience places? How do the lines, curves, textures, and colors of walls, roofs, railings and other built elements impact our senses, emotions, and memories? All of these questions will be explored as students learn about the particular built environment that makes New Orleans so unmistakably New Orleans. Students will be encouraged to think critically about built environment and to communicate their ideas effectively through writing, visuals, and speech.

TIDE 1014 Cultivate Resiliency Self Care (1)
Health in college is so much more than avoiding pizza every night and occasionally going to the gym. Health is multifaceted and is pivotal to your ability to thrive during the next four years. This course will examine the most relevant health topics for college students from a public health perspective, integrating theories and practices relevant to your life. In addition, this course seeks to cultivate leadership skills as an element of being healthy and successful in college.

TIDE 1015 Cultivate Inner Changemaker (1)
Cultivate your Inner Changemaker is devoted to exploring the skills, strategies, and ideas of effective social change advocates in the 21st century. Students will be learning about some of the essential skills of effective changemakers, including leadership, optimism, resilience, risk-taking, luck, relationship building, conflict resolution, creativity, and innovation. Throughout the course, students will practice these skills, both in class and through assignments.

TIDE 1016 Tolkien as Translator (1)
While many have enjoyed J.R.R. Tolkien's The Lord of the Rings as an epic novel, few readers are aware of the fundamentally linguistic and anthropological nature of Tolkien's writing. As Oxford Professor of Anglo-Saxon, Tolkien was intimately familiar with the Germanic languages, their history, and their epic literatures. Because of his background, he went far beyond the invention of a few strange-sounding names for the characters and places of his world, instead developing a detailed proto-language (Common Eldarin) and following its development into two distinct but related Elvish tongues, Quenya and Sindarin. He also invented Khuzdul (Dwarvish), the Black Speech, Adûnaic (Númenórean) and Sôval Phârë (The Common Speech). Importantly, he assumed a role of translator of The Lord of the Rings, employing English archaisms and dialects to reflect the varying speech styles of his characters, their relative social status, and their complex interrelationships. Old English, Old Norse, and Gothic were all employed to accurately reflect the degree of kinship characters, places and languages had to the 'Common Speech'. In this course, we study the role of language in The Lord of the Rings, applying concepts and perspectives from linguistic anthropology to shed light on Tolkien's methods and purpose as the 'translator' of Middle-earth. Students are introduced to Tolkien's invented languages (and their real-world inspirations) and two of his invented alphabets. An appreciation of the linguistic foundations of Middle-earth greatly increases one's understanding of Tolkien's achievement, and provides insights into one linguist's view of the intricate and interdependent relationships of language, culture, and society.

TIDE 1017 Changemakers in NOLA Education (1)
This one-credit course is designed for those interested in social innovation and social entrepreneurship. In addition to exploring design thinking, social and emotional learning, and health and wellness, students will explore the innovative initiatives currently shaping the landscape of education in New Orleans.

TIDE 1018 Case Studies in Leadership (1)
This 1-credit course will utilize a variety of cases which highlight a real-life example of a challenge in leadership. Fields covered will include business, politics, non-profit work, and social movements - all highlighting decision making in New Orleans following Hurricane Katrina. In most class periods, you will be asked to "inhabit" the case and take up the dilemma of its protagonist. I may assign class members roles to prepare and play in the class discussion spontaneously or in advance. None of the cases have right answers, although we may have an epilogue that tells what actually happened (the historical outcome). You are asked to wrestle with the problem as if it were your own and bring your experience and classroom learning from Tulane University and elsewhere to bear on the questions. The Harvard Business School originated and developed the phenomenon of the teaching case to simulate business experience in novices, to create a concrete vehicle for applying abstract theories to real-world situations, and to engender engaged classroom discussion while fostering critical thinking skills as students were forced to wrestle with actual business dilemmas that had no easy answer. It is no accident that professional schools were drawn to case teaching—Law, for obvious reasons—but also schools of public affairs and public health whose missions are to utilize the best thinking of the disciplines to prepare students for careers as practitioners. Cases marry learning about real world policy and organizational problems with critical thinking, abstract reasoning, and theorizing valued in all academic disciplines. In particular, this course will offer you a chance to get to know New Orleans as a resilient city with monumental challenges left to tackle.

TIDE 1019 Crime and Criminal Justice of New Orleans (1)
This course is an exploration of crime and the criminal justice system in New Orleans. With New Orleans as its case, this course will examine why people commit and the conditions that foster crime, policing, the courts, jail/prison, and local movements and organizations seeking to create different criminal justice institutions and practices. It will examine the criminal justice system critically, considering questions of race, class and power as these structure how the CJ system operates as a whole. It will examine the New Orleans police department, the District Attorney and Orleans Public Defenders, the Sheriff and city jail, and advocacy groups such as the Orleans Prison Reform Movement. It will involve field trips to some of these locations, or representatives from the New Orleans CJ system visiting class or for online discussion should physical meetings be hindered.

TIDE 1020 Cities & Urban Environmt (1)
Focusing on selections from the seminal work “The Death and Life of Great American Cities” by Jane Jacobs, we will explore and discuss its relevance to the city of New Orleans. We will also look directly at what is currently happening in the city of New Orleans via field studies, guest presentations and movies. Selected neighborhoods of New Orleans will be explored as vehicles for looking at the social, political, and economic life of cities. By focusing on particular and local examples we will, in effect, also address urban issues that are both more general and global. You will be invited to learn ‘how to see’ (observe) the many aspects of the city, be introduced to tools for the analysis of city form and city behavior, and be asked to draw conclusions from what you read for this class as well as your experiences.

TIDE 1023 Reproductive Politics in NOLA (1)
From sex education for middle and high schoolers to nutrition assistance for impoverished new parents, the phrase “reproductive politics” encompasses far more than debates over abortion and contraception. This one-credit first-year course explores American studies scholar Laura Briggs’ claim that “all politics [are] reproductive politics,” with a particular focus on the political and legal realities of reproductive life in the city of New Orleans.

TIDE 1026 Superheroes: Race, Gender, and Orientation (1)
This course examines the construction of race, gender, and orientation in several popular cultural ideological mediums. We will examine the construction and representation of race and gender in the superhero genre. We will discuss the intersection between the ideas of gaze and perspective. We will examine the representation of race and gender in the superhero cinematic genre. We will examine the intersections and relationships between race, gender, and economic class. We will theorize the economic impact of race and gender in the superhero film genre. We will consider the construction of the idea of the exceptional as it relates to the representation of race and gender in the superhero film genre. We will also include consideration of race, gender and orientation in a larger and more broad television audience.

TIDE 1027 Social Media Cuts Both Ways (1)
Over the several years, widespread concern about the effects of social media on democracy has led to an explosion in research from different disciplines and corners of academia. In the class, students will look at issues like information and disinformation, online hate speech and free speech, political advertising and messaging, and personal privacy rights and assess both sides of the topic for good or bad engagement.

TIDE 1028 Masculinities, Femininities & Sexualities on Campus & Beyond (1)
This course will introduce students to social science academic studies and critically engaged scholarship that explore how men's and women's shifting social roles around sex, gender, and sexuality binaries intimately shape young people's sense of self in emerging adulthood. College, particularly a residential college experience, can be very destabilizing as gendered constructions of young adulthood, typically rooted in the media and popular culture, shape how young men and women explore their identities and sexualities within the context of campus cultures. These cultures are not inevitable or natural,but their impacts are very real and reverberate through young people's lives. Some examples include:the pressure to fit into normative binary identities and organizations, strict gendered appearance standards, hooking up, drinking, partying, and having fun, picking a college major and a career path, starting and ending friendships and romantic relationships, and learning what it means to belong the social category "man" or "woman" in our contemporary world. By exposing the often-invisible web of culture, hegemony, and power that shape our feelings, our identities, our opportunities, and our constraints,we can better locate ourselves within their impacts and to forge more conscientious and engaged relationships with ourselves, with our environment,and with others.

TIDE 1030 Music & Culture of Nola (1)
The Music and Culture of New Orleans introduces the newcomer to New Orleans to the diversity of culture in the city and region. The 11-week course explores the music, literature, art, dance, architecture, and food that are unique to Southern Louisiana so that during your student years here you can fully enjoy them. This TIDES course includes general lectures by experts in the various aspects of the culture of New Orleans. Interspersed and alternating are small sections where these experts converse directly with the freshmen, helping each individual explore the city. Students are directed to the most important music venues in the city, as well as to the best Creole and Cajun restaurants. In addition to the class meetings, each student is expected to join in at least two field trips to witness the culture first hand.

TIDE 1031 Ideology&Belief Everday Life (1)
The course looks at the main beliefs and ideologies prevalent in our culture. Ideas like the entrepreneurial self, celebrity, pleasure-seeking, economic man, techno-optimism,God, nation, race, and family. These ideas are constantly hammered into us by the media,our friends, family and institutions, motivational speakers, business gurus, films, but also in the actions we take in our everyday lives and even more deeply in the experience of who we are.We will look at the origin of these ideas, their often-adverse societal effects and why they sometimes make us feel dis-empowered,anxious, and depressed. The course thus attempts to do two things at the same time.First teach students to critically think about their society and culture, and second help them achieve more personal freedom and well-being.

TIDE 1032 Jazz and New Orleans (1)
Jazz is often called "America's Classical Music." It is the only global art form invented by Americans, as created and developed by African-Americans in New Orleans. Jazz began life as "emancipation music," according to clarinetist Sidney Bechet. This class will draw a straight line from the New Orleans jazz of Bechet and Louis Armstrong to the contemporary brass-band funk of Rebirth,Trombone Shorty, and the Soul Rebels.

TIDE 1033 Taylor Your Tulane (1)
Taylor Your Tulane is a 1-credit TIDES course that applies human-centered design (design thinking) mindsets and tools to support first-year students in designing a fulfilling college experience. Students in this course will build an understanding of how they can be designers in their own lives and prototype different "investments" in the college experience by building a diversified college portfolio that includes their education, and relationships and experiences on campus and in New Orleans. Topics include the purpose of college, major selection, educational way finding, and interest exploration outside of the classroom, all applied through an introduction to Design Thinking (the course is offered through the Taylor Center for Social Innovation and Design Thinking). This seminar class incorporates small group discussion, in-class activities, field exercises, personal reflection, and individual coaching.

TIDE 1034 NoLa - The Lay of the Land (1)
This course explores the geography of New Orleans and coastal Louisiana, with a focus on forces that created and threaten the river delta on which the city sits. The course examines the levee system, climate change, sea level rise, industrial impacts to coastal wetlands, along with measures to promote a resilient city in the face of environmental and other threats. The course will also explore these issues in the context of social equity and environmental justice. Students will hear from a coastal specialist, learn about the city's resiliency efforts, visit areas of the city that experienced the most devastation following hurricane Katrina, and tour a levee adjacent to a cypress swamp.

TIDE 1035 Introduction to Yoga (1)
Yoga is a practice that offers many tools for living skillfully. This class will arm first year students with tools to help ground, calm, and focus them. The best part is that these lessons come from sweating, moving, going upside down, chanting, breathing, talking, listening, and having fun. The Sanskrit work Kula means a community, and we will create a Kula in our class, as well as connect with the New Orleans yoga community. This course is for anyone who loves yoga, or is just interested in learning more about it.

TIDE 1036 Sexuality, Knowledge Production, and Education (1)
The goal of this course is to introduce students to the various ways that the pursuit of knowledge is carried out within and across scholarly disciplines. Grounded in an interdisciplinary exploration of sexuality, knowledge production, and education, students will learn about the purpose and processes of academic research; examine various forms of academic research to appreciate the similarities and differences in questions and methods of scholarship; and study the organization of knowledge and the role of the scholarly communities. In so doing, students will analyze research across disciplines relating to human sexuality, as well as the effects and implications of research on policy and practice related sexuality education. This course meets once a week through the entire semester.

TIDE 1038 Beyond Orgo:Becoming a Good Dr (1)
Gen Chem, Bio, Orgo, Physics, the MCAT:every premed student knows the prerequisites for medical school. But becoming a good doctor takes much more than lab time and formulas. It requires critical thinking,teamwork, communication skills, resilience,adaptability, emotional intelligence, cultural competence, a capacity for improvement, a desire to serve others, and a strong moral compass. In this course, you will examine the human-centered skills necessary to become the good doctors our world needs. Through readings, guest lectures, reflections, and collaborative projects, you will evaluate your personal strengths and weaknesses, identify helpful role models and resources, and discover the ways you can develop these essential skills at Tulane and beyond.

TIDE 1039 Design for Pollinators (1)
In this course, students will learn the basic principles of beekeeping and work in groups to design and construct beehives for honeybees and other pollinators. These designs will be released as open access designs for anyone to use. Course discussions will cover the basics of pollination and ecological hive management, hive designs around the world according to community needs and local plenty vs material scarcity, hive designs tailored to specific pollinators, and principles of open access and inclusive design. We will work in Tulane's MakerSpace.

TIDE 1040 Religion Media Politics & Food (1)
From the influence of the religious right to the impact of gay marriage on the social fabric, religion is moving front and center in our culture. But so is food. Religion and food are often thought as distinct, separate. But in fact religion, cuisine, sexual orientation, the media, and way of life issues strongly impact politics. In this class we will discuss the relationships of these factors on present-day consciousness. This will be a student-centered class, so come ready to share your thoughts.

TIDE 1043 LGBTQ+ New Orleans (1)
This seminar explores LGBTQ+ life in New Orleans from an interdisciplinary perspective. It focuses on the LGBTQ+ history of the city, narratives of personal experiences, cultural representations and expressions, and current research on discrimination and on social and health programs.

TIDE 1044 Gender & Sports Through an Intersectional Lens (1)
The US sports industry is a highly gendered social institution with a long history of reproducing gender inequality. This course invites students to reconsider sports and the idea of athleticism through the lens of intersectional feminism. Over twelve weeks, we will look at sports from several different angles: as proof that gender is a social construct, and that men and women are more alike than different; as an important site where cultural understandings of masculinity and femininity are constantly being redefined; as a source of case studies for examining social problems like sexual violence and the wage gap; and as a medium for exploring our campus, our health and well-being, and the city of New Orleans.

TIDE 1046 Think Like Leonardo da Vinci (1)
This course introduces you to college study and research through emulation of the Renaissance genius Leonardo da Vinci (1452-1519). To coincide with the 500th anniversary of his death, you will be invited to keep notebooks just like he did. We will examine Leonardo's artworks as a way to investigate Renaissance ideas of nature, its transformative potential, and the natural and built environment. Each week you will you be tasked with a theme to explore that relates to one of his fields of interest. After viewing his drawings and writings (in English!), you too will investigate subjects that interested Leonardo and his peers—such as botany, anatomy, machine design, and flight—and learn to articulate in your notebooks your own insights and approaches to studying these topics. You'll have ample opportunity to get to know New Orleans through prompts that invite you to study in New Orleans like Leonardo might have done: you'll be invited to visit the New Orleans Museum of Art, the Pharmacy Museum, and Audubon Park. Weekly discussions will discuss the artist's approaches and your own. For your notebooks, you will not be assessed on artistic merit, but rather for the depth of your engagement with the assignment.

TIDE 1047 Exploring Creole New Orleans: Three Centuries of Creole Culture in the Crescent City (1)
New Orleans is a city celebrated for its vibrant and diverse cultural heritage, and inextricably intertwined with its 300-year history is the concept of "Creole." This course offers an interdisciplinary journey into the multilayered world of Creole politics, culture, and artistic expression in the Crescent City, exploring the complexities of Creole identity, its rich culinary traditions, distinctive architecture, aspects of Creole languages, and the importance of Creole music. Readings, discussions, guest speakers, and field trips will encourage students to gain a deeper appreciation of the city's Creole heritage and foster critical thinking about historical events and their impacts on the city's different social and ethnic groups.

TIDE 1048 AI Unleashed: Mastering ChatGPT for Success (1)
This course empowers students to ethically harness ChatGPT, an AI-driven conversational agent, to supercharge their skills in research, creativity, writing, time management, critical thinking, and career exploration. By blending human ingenuity with AI-sourced information and efficiency, students will become early adopters of AI technology and responsible AI citizens.

TIDE 1049 Challenging American Cultural Myths (1)
This seminar is meant to develop students' critical thinking skills by revisiting and challenging commonly accepted American cultural myths, such as the myths of justice, of education and empowerment, of progress on the tech frontier, of individual opportunity, of gender, and of race. Students will acquire the methods to read written texts, analyze visual documents, and write critically through discussions around thought-provoking issues.

TIDE 1051 German Heritage in the Crescent City (1)
This seminar will introduce students to various aspects of German culture in New Orleans. We will explore how German immigrants helped shape the cultural, social, and political structure of the Crescent City.Today, New Orleans is primarily known for its French and Spanish influence, but in the years before the American Civil War, the German population of New Orleans made up the largest German colony south of the Mason-Dixon line.German settlers dominated the local beer industry, supplied New Orleans with food harvested in the outlying parishes, and were an integral part of the local cultural scene. With the advent of World War I, Anti-German sentiment in Louisiana grew, and by the end of the war all expression of German culture was prohibited by law. Gradually, the German language disappeared,and German traditions were forgotten. However, if we dig a little deeper, we will find ample evidence of a once vibrant German culture, remnants of which survive to the present day.Students will have the opportunity to enjoy traditional German food, go on field trips to German sites,and meet with people from the German community.A variety of readings (excerpts from books and short articles), documentaries, as well as guest lectures will be part of the class. Knowledge of German is not required.

TIDE 1052 Climate Changes Solutions (1)
The course is a global examination of human adaptations, resilience, technologies, and indigenous/traditional culture responses to climate change challenges. We will learn about climate science, climate change challenges, and societal and community responses to these challenges.

TIDE 1053 Horrific Monsters (1)
This course will engage in a critical and historical exploration and analysis of the horror genre in film. In due course we will discuss the origins of horror as a film genre; the definitive characteristics of horror, both formally and narratively; horror's intersections with major critical and social themes and issues; the monster as the definitive characteristic of horror films; and the various ways in which the monster is imagined.

TIDE 1054 Navigating American College Culture (1)
This seminar explores American college culture from an intercultural perspective. Students will acquire the tools to cope not only with the specificities of American college culture and expectations, but also with issues related to interpersonal relations and the diversity of identities and cultures in the US.

TIDE 1056 Ancient Magic, Modern Witchcraft (1)
For the inhabitants of the ancient world, magic and witchcraft were part of everyday life. In modern-era New Orleans, magical practitioners have also found a home and a place in the local culture. This course will explore magical literature, rituals, and beliefs in two ways: first as they existed in ancient Near Eastern civilizations (such as Mesopotamia and biblical Israel), and how these beliefs continue into modern America (especially locally in NOLA). Students will learn the skills necessary to succeed at a rigorous university (such as close reading, academic writing, and class participation) while exploring topics such as demonology, illness, prayer, exorcism,and witchcraft.

TIDE 1057 Ancient Greece in New Orleans (1)
This course will take you through a journey that explores how the culture of Ancient Greece has been incorporated and displayed in New Orleans. Working as a group, we will discover how Ancient Greek culture has permeated the fabric of the city, from architectural choices to Mardi Gras krewes. Through this unusual and engaging journey, we will build a new appreciation for the composite world that is New Orleans, where ancient and modern blends, and where different cultures, including ancient ones, become a distinctive identity. All the while learning the skills necessary for a successful college experience.

TIDE 1058 Comedy! (Or 19 Ways to Analyze a Joke Until It Isn't Funny Anymore) (1)
This 1-credit course fulfills the First-Year Seminar requirement as a Tulane Interdisciplinary Experience Seminar (TIDES). In this course we will discuss how to deconstruct standard comic format, read and discuss five different comic theories, look at 19(+) different comic structures to create a final project.

TIDE 1059 Fundamentals of Traditional Martial Arts Training (1)
This dynamic course offers students a comprehensive introduction to the world of Traditional Martial Arts with a focus on Taekwondo, Krav Maga, Boxing, and general fitness. Designed to accommodate all levels of experience, from beginners to seasoned practitioners, the course provides an in-depth exploration of each discipline's historical roots, philosophical underpinnings, and cultural significance. Students will learn the foundational movements of traditional martial arts. Instruction will emphasize the artistry of martial forms, the tactics of sportive engagement, and the practicalities of self-defense, all while improving overall physical fitness. Classes are conducted in a safe, non-contact setting to ensure a learning environment that is both challenging and supportive. Through collaborative assignments, students will engage in group activities that encourage peer learning and teamwork, fostering an environment of mutual respect and camaraderie. The curriculum is designed to challenge students' perceptions and encourage growth in both martial arts proficiency and personal development. Through written and oral assignments, students will reflect on their experiences and articulate their understanding of the material covered. As an added value to this course, students who fulfill the requirements will have the opportunity to be awarded international rank recognition by a global traditional martial arts association. This distinction not only celebrates the skills acquired but also connects students to the larger martial arts community worldwide.

TIDE 1060 NOLA Global at the Local (1)
Open only to Altman Scholars, this TIDES experience plays an important role in the 4-year curriculum of the Altman Program in International Studies and Business. The students that make up each Altman "cohort" will take one class together each semester that they are on campus during their studies. Altman TIDES will kick off these courses during the Fall of their Freshman year. With an eye towards producing exceptional global citizens, Altman TIDES introduces students to the rich cultural fabric of New Orleans by examining past and present contributions made by peoples of different ethnicity and race. The cultures of French, Spanish, Italian, Creole, African, Latino, Jewish and Vietnamese residents, both past and present, have shaped New Orleans into the vibrant city that it is today. Specifically, we will discuss each group's impact on New Orleans' history, culture, economy and business and the challenges each faced in the process of social and cultural integration. Along the way, students will be exposed to some of the finest food representative of each group that makes New Orleans one of the greatest cities in the world – and an interesting place to directly study international influences at a local level. For Altman Scholars Only.

TIDE 1061 Learning Through Discovery (1)
Welcome! As a member of the Tulane community, you are part of a diverse and developed scientific community. In this course we'll work on developing ways of learning and basic scientific skills that will aid you if you are interested in getting research experience and help you in succeeding in your coursework. This course is designed to teach you new thinking and learning skills, and to apply those skills to develop and run an iterative hypothesis-driven experiment. You will experience the collaborative nature of science by working in groups and receiving feedback on your work from your peers.

TIDE 1062 Calm the Wave: Being in NOLA (1)
The transition to university life can present challenges, as you juggle less structure, more demands, new roles, and increased pressures. The purpose of this TIDES course is to help you develop social and emotional skills; benefitting you in academic and work contexts, interpersonal relationships, and overall well-being. Explore the tranquil side of New Orleans and discover your best self through mindfulness and self awareness activities.This course is designed to help students develop strengths and assets that promote their social and emotional well-being as they transition to a higher education setting in New Orleans. Such settings typically present students with less structure, more demands, new roles, and increased pressures which may contribute to struggles with stress and adjustment difficulties. The purpose of this course is to help students develop social and emotional skills; benefiting them in academic and work contexts, interpersonal relationships, and overall well-being. Students will explore tranquil locations throughout the city of New Orleans. Along the way, they will be introduced to social and emotional competencies that can help promote their personal and interpersonal awareness and competence which will help students navigate new and challenging academic, social, and emotional terrain. These competencies include: self-awareness; self-management; social awareness; relationship skills; and responsible decision making.

TIDE 1063 Tell Me More About It: Paths to Improving Mental Health (1)
Using readings, discussions, interactive group interviews and field trips, students will learn about different career pathways to engaging others in improving mental health. Students will meet different professionals in the city, hear about their paths, learn about their theoretical orientation, and reflect on the experiences they will pursue while at Tulane relevant to this career choice.

TIDE 1064 What is a Book? (1)
This 1-credit Tides course introduces you to research through a historical and experiential engagement with the myriad forms and aspects of one of the oldest and most ubiquitous communication and information technologies: the book. Rather than consume books for their content (text), in this course, our concern will be with the whole book (from cover to binding, to page design and marks left on margins) as a material object. From scroll to codex, to e-book, and from manuscript tradition to print, we will learn the books' anatomy and how to read and interpret those physical features as evidence. In the process, students will gain a deeper appreciation for the book as an object as they explore the book form alongside its text. Each week we will explore the history of book making processes including letterpress printing, book binding, papermaking, and various 20th c printing and duplicating technologies. We will learn about appreciating books as objects through lectures, discussions, and hands on experiments with bookmaking. The class will culminate with each student creating their own book object. In addition, we will enjoy visits with local printers and book makers and virtual visits from book artists and book historians. The course is ideal for students considering majors in art history, art, English, history, archeology, media studies, science, or any subject that requires reading or using books.

TIDE 1066 Media and Narrative in Modern U.S. Presidential Campaigns (1)
This course explores the development of the modern United States presidential campaign, with an emphasis on mass media. Considering the development of new communications technologies, how has the presidential campaign changed over the last six decades? How has it remained the same? The class will consider the creation of narrative across radio, television and social media outlets.Various forms of mass communication, including radio, television, and social media networks, will be considered as channels for political campaign development. The development of emerging technologies and media landscapes will be contextualized.

TIDE 1067 Nazism Fascism & the Alt-Right (1)
This course is inspired by current events, including the rise of alt-right, populist, and authoritarian parties and governments across the globe. Its aim is to use the tools of media analysis and social and literary theory in order to deepen our understanding of where and how these movements arose, how neo-fascism appeals to voters in different places and contexts, and, crucially, how leaders have harnessed popular sentiments to their own end. Readings and discussions are based on contemporary media as well as classical historical sources.Important themes in the course will include roots and causes of fascism, fascism as imperialism and racism, fascist attitudes toward gender and class, theories of totalitarianism, the psychology of fascism.

TIDE 1068 The Pluto & Charon System (1)
This TIDES course explores the Pluto-Charon system, the public's perception of Pluto, its history, and its science. Students will learn about the search for 'Planet 9', the discovery of Pluto and objects beyond, as well as the recent exploration of the Pluto-Charon system and Ultima Thule by the NASA New Horizon's mission. In addition, students will explore and discuss the elusive questions: What is a planet? Is Pluto a planet? The course will include one field trip to Gretna Observatory one evening during the semester. This course is 1 credit hour.

TIDE 1070 Nola Musuems & Communiti (1)
Get to know New Orleans through an exploration of its museums, from art museums to contemporary galleries to house museums and beyond. Students will seek to understand how museums in New Orleans serve diverse communities in the city. To understand museum practice more generally, we will also explore past and current methods in museum curation and education, ethical issues museums face, and how museums respond in times of war and natural disasters. Ideal for students considering majors in art history or history.

TIDE 1071 Running and Imagination (1)
This course explores running as an activity of the embodied imagination--through reading, discussion, and running. When we run, our minds work with and against the body's limitations. Those limitations can be viewed as obstacles to be overcome, but also as constructive forms of resistance that give meaning to our activities. To run a certain distance at a certain pace gives shape to the activity just like paragraphs shape prose or form and meter shapes poetry. Running can also be a way of exploring difference and resisting social constraints; it can also be used an expression of those constraints. Class meetings will alternate between discussions of texts—fiction and non-fiction—that explore the relationship between the physical activity of running and human imagination and identity, and clinics and practice sessions on various aspects of running as a physical activity for health and competition. We will occasionally run together, at whatever pace suits the members of the class. Students in this class should be interested in running and willing to run. But being a fast or accomplished runner is not a requirement!

TIDE 1072 Object(ive) Data: Collections, Databases and Museums (1)
Museums and galleries can inspire awe with the objects and materials they put on display. From the histories of their making, through their preservation over time, objects in museum collections tell stories and reflect larger legacies of movements and change. It is the role of museum staff to extrapolate themes and concepts from their collections, collating information and different interpretations which are recorded in museum databases. Databases allows museums to document objects, but what more can their data do? Can data help museums reevaluate the significance of their objects and collections as a whole? Does the data alone tell a story? And does it come with its own limitations and biases? In this TIDES course, students will have the opportunity to investigate the benefits, challenges, and constraints of managing museum's collection data. Following a brief grounding in the history of museum collections from both an art historical and a collections management perspective, students will progress through weekly conversations and site visits that illuminate the practicalities, perks, and pitfalls that can emerge at the intersections of historical materials and data analysis. Alongside these components, students in this course will gain "hands on" access to a selection of objects from the Newcomb Art Museum (NAM) as they work to research and draft thematic object checklists as a capstone to our course that can potentially be published as a resource for others on campus.

TIDE 1073 Artists Respond: NOLA Through Visual Culture (1)
Art is a conversation that takes place over time and space. It is a response to events past and present, and an invitation to discuss how we shape our future. Art creates community, but it also reflects the communities it is created out of. This course will provide an understanding of New Orleans through the lens of Visual and Performing Arts. The course will introduce students to the rich cultural heritage of New Orleans while gaining insight to how history, environment, politics, socioeconomic conditions, and diversity has shaped life in the city, and how the art of the city responds to help define its culture. Through numerous artists, artworks, cultural traditions, and temporary exhibitions, students will learn how art can provide a reflection on where we've been, alternatives to where we are, and opportunities for ways forward as a city or a community.

TIDE 1074 Foodways in Asian American New Orleans (1)
You already know that New Orleans is famous for its food, but how much do you know about its Asian American foodways? The seminar employs food and foodways as an analytical framework to explore issues of identity, migration, imperialism, race, gender, and sexuality. Through a diverse range of texts including short stories, films, documentaries, menus, cookbooks, and blogs, we will consider what food reveals about cultures, relations, and identity in Asian diasporas with a focus on locales and traditions in New Orleans. Along the way, you will have the opportunity to reflect on your own relationship to food as a first-year student at Tulane University.

TIDE 1076 Visualizing Justice: Urban Environments, Climate Challenges, and Just Sustainable Futures (1)
This course combines practical skill building, active learning, and engagement activities to support local communities around issues of environmental and urban justice, climate challenges, and sustainable futures for New Orleans and the surrounding Gulf Coast. While examining the fields of data literacy and interpretation, artificial intelligence (AI) and algorithmic bias, and the ethical considerations about how data is collected, interpreted, and used for policy decision making and community engagement (data justice fields). The substantive emphasis of the course will be on the use of data for advocacy and support of communities involving urban justice (e.g., inequality, policing, carceral rights, poverty, housing, etc.), environmental justice, (e.g., polluted neighborhoods, indoor and outdoor air pollution, water and soil pollution, etc.), all in an effort to move New Orleans and surrounding communities from their climate challenges to just sustainable futures. The course will also explore community empowerment through the instruction of techniques of data advocacy, citizen science, political activism, etc.

TIDE 1077 When Empire Does Not Atone: The Case of Russia (1)
The seminar will introduce students to the imperial legacy context of Russia's aggression against its neighbors that culminated in an all-out invasion of Ukraine attempted in February 2022 and now transformed into the largest-scale war on Europe since WWII. -The mainstream media discourse about the motives for the ongoing atrocities evolves between the (Kremlin's) narrative about NATO's expansion, ethnic rights for self-determination, and the war as a tool to perpetuate the usurpation of power by Putin's "elite" in Russia and its neighbors. This discourse overlooks the role of failure to fully admit and qualify the crimes that the Soviet Union (and the Russian Empire before it) committed against the people that inhabited the lands it captured and controlled during its reign. There were several attempts to rectify the imperial legacy and to atone for them. Yet all of them eventually failed. One manifestation of the latest failure is the obstruction of access to swaths of state archives even at peaks of the brief democratization of Russia during the 1990s. The implications of that failure are profound. They yield fertile grounds for distorted beliefs about "historical justice" across the world and facilitate the effectiveness of a fascist-style propaganda in nowadays Russia.

TIDE 1078 Donald Trump's America (1)
This seminar will introduce students to the state of American politics and society surrounding the presidency of Donald Trump. It is not designed to be solely a look at his election in 2016 and his administration; instead, it is a broad exploration of the factors that lead to his election and the resulting "state of the union." Through readings and discussion of current events, we will explore the history of our current state of public opinion, issues regarding polarization, race relations, and gender dynamics, and the prospects for forming a "united" country in the midst of a divisive era.

TIDE 1079 Haiti and New Orleans (1)
Haiti is inexorably tied to New Orleans through historic and contemporary through lines beginning with the only successful rebellion by enslaved people in the Americans that eventually led to independence of Haiti and to this small island nation becoming the first free Black country in the entire world in 1804. As a result of the defeat of the French army in St. Domingue, Napoleon yielded the French territory to the U.S. government in the form of the Louisiana Purchase. Throughout the late 1700's and early 1800's, the revolution's impact was felt throughout the U.S. South and by 1809, 10,000 Haitians arrived in New Orleans, doubling the population. There are parallels between New Orleans and Haiti in the areas of architecture, cuisine, cultural celebrations, and music that emerge to even the casual observer. Even though a majority of Haitian settlers from the early 20th century in the New Orleans Ninth Ward area were displaced by events surrounding Hurricane Katrina, immigrant communities of Haitians, particularly on the West Bank of New Orleans have grown due to the contemporary political and natural disasters within the island country. This first-year seminar course will examine the fascinating history and contemporary landscape of the connective tissue between Haiti and New Orleans through a range of readings, reflections, class discussions, as well as through experiential elements including field trips.

TIDE 1081 The History and Rituals of Voodoo in New Orleans (1)
This 1-credit course fulfills the First-Year Seminar requirement as a Tulane Interdisciplinary Experience Seminar (TIDES). In this course we will discuss the history, culture, misconceptions, pop allure, rituals and rites of Voodoo (Vodou) in New Orleans.

TIDE 1082 Crescent City Conundrum – How do we build a healthy New Orleans? (1)
Health is influenced by factors beyond one's genetics. The social determinants of health - where we are born, raised, work, and play - contribute to our overall health. Inequities in these determinants lead to inequities in health. In this TIDES course we will look at New Orleans through the lens of social determinants of health and the health care institutions that have served the people in this community. We will explore the history of New Orleans to understand the social, economic, and racial disparities that impact our residents' health and wellbeing today. Finally, we will look to the future and see what's on the agenda for improving the health of New Orleanians.

TIDE 1083 Cultural Heritage, Social Change: The Activist Archivist (1)
Activist Archivst, noun. Meaning 1: An archivist who strives to document the underdocumented aspects of society and to support political and social causes through that work. Meaning 2: An archivist who seeks to move the archives profession, archives workplaces, and society in general toward social justice Howard Zinn coined the term "activist archivist" in his seminal 1970 address to the Society of American Archivists, in which he challenged cultural heritage professionals to disrupt the status quo and confront social injustices through their work. This class introduces students to the fundamentals of archives and cultural heritage information management, with special attention to the role record-keeping plays in both reifying and dismantling systems of power and how activism can take the form of memory work. Students will develop knowledge of major theories and practices of cultural heritage information management by interacting with primary source materials during visits to the various and eclectic archives of Tulane University and New Orleans. They will apply a critical, investigative lens with consideration for how collective and individual memory is produced and preserved, and whose stories get told. Students will also engage with alternative, activist forms of memory-keeping, including zines, oral histories, craftwork, tarot and oracle decks, and other art forms, through class visits with local memory workers and field trips to explore New Orleans memory work that blurs the lines of art/archives/activism. The class will culminate with a group project: the creation of a zine, a scrapbook, or a documentary product of your group's own design, as a tangible record of your semester experience. This class is ideal for students interested in anthropology, history, studio art, or those considering future work in Public History or the GLAM (galleries, libraries, archives, museums) sector.

TIDE 1084 New Orleans in Film and Literature (1)

TIDE 1086 Engineering New Orleans (1)
In this course, students will explore engineering projects local to the New Orleans area. From the St. Louis Cathedral to the Superdome, the Crescent City Connection to the Causeway, the Lapeyre Shrimp Peeler to Mardi Gras Megafloats, Oil & Gas to Wind & Solar Energy, NASA Rockets to Nerves-On-A-Chip, New Orleans has a wide array of engineering interests. These projects, advancements, and industries will be introduced and put into perspective with discussions of their technology, histories, economic impacts, and cultural influence. The topics will be brought to life by local guest speakers and trips to one or more of the following: NASA Michoud, Mardi Gras World, the Superdome, and the French Quarter.

TIDE 1087 Science,Technology, and Society (1)
Those interested in and pursuing STEM fields have often felt like they were exempt from the conversation on society. They have often been excluded from discussions regarding the ethical implications of the progress that they pay a key role in. In this class, we will use various lenses to view the technical advancements in big data, science and engineering, including those that you may be working on in the coming four years. We will examine the global, societal, economic, and environmental implications of subjects such as ethics of big data, AI, social media, digital media, large scale engineering projects, scientific research , medicine and big pharma, and more, focusing on examples found in the NOLA area. The topics will be brought to life by local guest speakers from local organizations such as Glass Half Full or Green Light NOLA as well as trips to one or more of the following: NASA Michoud, Mardi Gras World, the Superdome, and a Flood Abatement Pumping Station.

TIDE 1088 The Artful Leader (1)
The course will focus on exploring questions on leadership from non-theoretical lens by emphasizing manifestations of leadership in different forms of art (poetry, fiction, painting, sculpture, film, etc.). Using the medium of art, the students will be able to access and distill their own observations about leadership throughout time, which we will then compare to contemporary theories from the fields of organizational psychology and leadership studies.

TIDE 1089 New Orleans Through a Paranormal Lens (1)
New Orleans is a city rich in history, culture, and spirits. Some of that history and culture has been responsible for events associated with hauntings and other paranormal/supernatural occurrences (and vice versa). Using the haunted history of the city as a touchstone or lens, we will explore the non-paranormal history and cultural make-up of New Orleans from before its founding to modern times.

TIDE 1090 Who Dat, Fan Up & Geaux (1)
Founded in 1718, the city of New Orleans has a long and rich history with sports. From the rise of social class-driven sports such as rowing and billiards to the New Orleans Saints' heroic revival of the city post-Hurricane Katrina, sports has been as integral to the area as food, music, and Mardi Gras. Sports have made an enduring impact on the social world in which we all live. It is a taken for granted aspect of our everyday lives – whether that entails watching "Sportscenter" or noticing that every single major newspaper contains a "Sports" section that is as long if not longer than any other section. Yet there is more to sport than just what we see on a daily basis. In this course, we will explore general sports-related topics and examine actual case studies related to New Orleans' sports scene. More than simply 'talking sports,' students will study issues from political, economic and social viewpoints and also gain an understanding of the rich sports heritage found here in New Orleans. Readings and discussions, field trips, and guest speakers will aid students to understand both historical accounts and modern-day subjects associated with sports such as governmental involvement, public financing, and community development. Students will participate in a mandatory service learning component with TBD. Their after-school programs promote development in boys and girls through activities that build character, cultivate new skills, and create a sense of belonging – in this case a place where kids can express themselves, play together and get fit. By participating in activities with NFL Youth Education Town students will deepen their understanding of the political, economic, and social ramifications of sports on a local level by making correlations to sports and its impacts on the city's youth, infrastructure, civic pride, crime reduction efforts, poverty eradication, and other areas, and gain an awareness of their role as a citizen in the city of New Orleans.

TIDE 1091 Representing Minorities in Spanish Cinema (1)
"-Borja, where are you from? -I am Spanish -Oh great, which country?" (question that your professor has been asked many a time). What is being Spanish? There is a misconception in the US about what this word means. Spanish refers to a person born and raised in Spain, so, what is Spain? Spain is a predominantly white country situated in the south of Europe who has enjoyed an ethnic, racial, gender, and religious diversity since very early in history. Therefore, the aim of this course is to study the representation of ethnic, racial, gender, and religious minorities through Spanish cinema in the late 20th century and the early 21st century. Despite advances in integration in the last twenty years, the underlying racism, xenophobia, homophobia, and transphobia from certain sectors of society is still palpable in different areas of this society. We will address questions of diversity, inclusion, discrimination and (lack of) opportunity. In the last section of this class, we will also examine the representation of Spanish people in US American cinema, sometimes taking them as exotic or even having white Spanish actors playing roles from people in Latin America. By the end of the course, students will have a space to compare the situation in Spain with their own country and seeing the parallels in diversity and discrimination between the two countries, probably, reaching the conclusion, that the situation is not that different. Similarly, we will also delve into the idea that a Spanish person automatically becomes a minority in the US imaginary due to their Hispanic origins and the fact they speak Spanish.

TIDE 1092 Latinx in Hollywood (1)
For over a hundred years, cinema has played a key role in shaping your social imaginaries and in creating types and stereotypes. Different national cinemas have their own lists of typical characters that speak eloquently of the economic, political, and cultural structures of their societies. Mainstream American cinema, arguably, exceeds the constraints of a national cinema and has become your conscience of the global subject, but it still formulates ideas and builds subjectivities that are deeply ingrained in your American imagination. Among these constructions is the portrayal of 'Latin America' and, more specifically, 'Latin Americans.' In this course, you will explore, analyze, and question the constructions devised by mainstream Hollywood films around Latin America and its characters. From studio recreations of South American cities in classic films (Gilda, Charles Vidor, 1946) or the US-Mexico border (Touch of Evil, Orson Welles, 1958) to solemn reflections on colonial history (The Mission, Roland Joffé, 1986) to enchanted versions of Mexican traditions (Coco, Disney-Pixar, 2017), American cinema has consistently imagined Latin America. In discussing six films and key critical readings, you will identify, describe, and critique this process. You will also reflect on its connections to current debates in the US.

TIDE 1093 Afro-Brazilian Resistance:Contesting Racism and Discrimination through Popular Culture (1)
This course examines the racial history of Brazil and how it compares and contrasts with other regions in the Americas. Students will engage in weekly discussions about topics in Afro-Brazilian popular culture and will analyze the political resistance inherent in so many of these art forms. In addition to readings and films depicting the Afro-Brazilian experience, students will be collaborating with a local organization as part of their tier one service commitment. Our partner - Capoeira New Orleans - creates educational programming for New Orleans residents to practice and learn more about the Afro-Brazilian martial art capoeira.

TIDE 1094 Leading w/ Empathy: Cultivating Relationships, Building Community, and Navigating Conflict at Tulane (1)
This course offers an introduction to the foundations of empathy and the role it plays in relationships and addressing conflict. Topics covered will include the primacy of empathy in addressing conflict, community building, active listening, and techniques to hold conversations among people in conflict or that disagree with each other. Students will gain an understanding of the role that inclusion and equity play in developing empathy and will learn, through personal reflection, guest lecture, and in-person experience, the skills and techniques necessary to manifest empathy in their own lives, relationships, and conflicts as well as various resources within the Tulane and Greater New Orleans community available for support when they run into problems within these areas.

TIDE 1096 Latin American Dance Cultures (1)
This course examines issues of Latin American race, class, gender, nationality and global belonging through dance cultures. Students will learn how chosen dances, songs and rhythms are conveyors of cultural tenets, regional variations, and national trends.Since culture is made visible to us through its representations, students will learn to read and analyze Latin America through ethnographic texts about performance. Over the semester, students will learn through both theory and practice the techniques and philosophies of dance in selected Latin American performance circles. We will analyze Latin American festivals, stage/commercial performance and everyday cultural performance. As part of student training in ethnographic participant observation, students will also learn the basic steps of these studied dances and contextualize their work within the cultures of Latin American dance communities in New Orleans. In doing so, students will learn to think critically about the relation between text, ethnography and the body by paying attention to the demands that performance places on us as participants, spectators, scholars and commentators where we may be/act, see/hear, feel/sense, and think/evaluate within a world different from our own and understand its implications in governance, policy, and practice.No dance experience required!!!

TIDE 1097 Drugs in Music and Literature: Morocco, Spain, and New Orleans (1)
"Drugs in Music and Literature: Morocco, Spain, and New Orleans" explores the historical and contemporary significance of cannabis as a countercultural and political resistance symbol, particularly within the realm of music, across diverse regions. Students analyze the cultural, social, and political contexts surrounding cannabis use, considering race, religious practices, and the influence of Islam and Sufi rituals. The seminar delves into the evolution and transculturation of musical genres such as Flamenco, Rock & Roll, Sufi- Trance Rock, and Jazz, examining how these genres have been shaped by the intersection of cannabis culture, race, hippie values, and religious traditions. Assessment is based on class participation, written assignments, and a final presentation or creative project, fostering critical thinking and interdisciplinary perspectives. This seminar aligns with the TIDES' goals of promoting active learning, intellectual challenges, and social co-curricular activities, providing students with a transformative interdisciplinary learning experience.

TIDE 1098 "We Didn't Start the Fire" - Examining how Memory, History, and our Current Experiences Interact (1)
In a global connected world where what happens on the other side of the planet is live streamed in real time, the experience of being a person living today can feel overwhelming. It can be argued that this is the worst time in human history. Is the world worse today than at any other time? What does our knowledge of memory and perception contribute to the understanding of the contemporary global context? In Billy Joel's song, "We Didn't Start the Fire" over 100 cultural, social, political, and economic events which took place between 1948 and 1989 are highlighted. A recent remake by Fall Out Boy updates Joel's song using events since 1989. The suggestion in these songs is that human history has been plagued with catastrophes and heralded with triumphs. In this course, students will identify the historical references in both songs comparing them to our current context. Students will study the scientific literature on memory and how memories impact people's current view of the state of our world. The course will culminate in students creating a survey to learn more about how people perceive the historical and current world contexts, and how these ideas interact with each other. Survey results will be analyzed to share findings and develop conclusions. Throughout the course, students will have the opportunity to shape their own learning experience and development of critical thinking skills by contributing to each class session content, course materials, questions to discuss, and practicing research skills. This co-creation of the course between the professor and students is uniquely suited to the TIDES program and supports its objectives and outcomes.

TIDE 1101 Environmental & Climate Diplomacy (1)
Diplomacy is defined as "the profession, activity, or skill of managing international relations, typically by a country's representatives abroad." This course will consider our role as members of a global society, and as guardians of a complex solid Earth-oceans-atmospheres system, and introduce concepts of circular economy, nature-based solutions, climate mitigation and adaptation, as well as the alphabet soup of global organizations, and U.S. diplomacy.

TIDE 1102 Talking New Orleans (1)
Do you know how to pronounce New Orleans the right way? Do you make groceries or wrench your dishes in the zink? You'll learn to talk like an insider in this class that looks at the history, development, and current diversity of New Orleans English! We'll start by taking an overview of the New Orleans (and by extension Louisiana's) linguistic history, starting with the indigenous people who occupied the place called Bulbancha at the time of European arrival. We'll then examine the arrival of Europeans and Africans: the languages they brought with them and the new one(s) they created here. You'll get hands-on experience collecting and analyzing linguistic data as you explore modern New Orleans, talking to locals, attending festivals and participating in the exciting culture this city has to offer. By the end of the semester, you'll be able to say what it really means to sound New Orleans!

TIDE 1103 The Art of Management (1)
Management is the coordination and administration of tasks to achieve a goal. The functions of management are planning, organizing, leading, and controlling. In the Art of Management, we will review and discuss these four functions using text, case studies, and simulations. We will explore companies that are run well and those who messed up along the way. Learning from the mess ups has the best growth opportunities.

TIDE 1105 Cultural Nutrition & Wellness (1)
Welcome! As a member of the Tulane community, you are also now a part of the larger New Orleans community. In a city with such rich history, there is a vast divide of health and wellness options among the diverse cultural groups. Whether we are talking about access to nutritionally complete foods or more esoteric resources, such as mindfulness training, there is a long-standing disparity in our community. This course is designed to introduce students to overall health and wellness needs and availability among various communities in and around New Orleans.

TIDE 1113 Mindfulness: Self & Emotion (1)
This class introduces different mindfulness techniques, application of mindfulness practices in understanding destructive emotions and cultivating positive emotions. Mindfulness techniques cover intentional cultivation of non-judgmental, non-reactive, present-moment awareness, bare attention and concentration. Concentration and mindfulness exercises will be practically studied and evaluated. Students will enhance their experience of awareness, clarity, and empathy. Students will also learn coping skills for emotional regulation, distress tolerance, depression, anxiety, stress, and insomnia. Students will be required to participate in daily mindfulness practices: self-awareness, identification of destructive emotions, logical and mindful responses, and compassionate living. The course will critically analyze mindfulness-based research articles and introduce to how to integrate different mindfulness techniques in research applications. Information will be based on recent scientific research and ancient Tibetan contemplative practices.

TIDE 1117 N. O. Performance Culture (1)
There will be two primary goals in this course. The first will involve introducing students to New Orleans's history, culture, and literature. The second will entail an interdisciplinary introduction to a wide array of influences with the effort of showing how New Orleans's turbulent history of changing possession, immigration, and migration have contributed to a "performance" of various versions of "New Orleansness." The course will focus specifically on the presence of French, Spanish, African, and a brief overview of the various immigrant communities in the city's history and the various ways in which these groups have performed their own version of New Orleans for the city itself, the United States, and the world. In addition, the students will use the maps found in Unfathomable City: A New Orleans Atlas to look at how maps are constructions of authenticity.

TIDE 1125 New Orleans as a D&D Campaign (1)
The central conceit of this course is that all participants build characters for, and participate in, a Dungeons and Dragons (styled) adventure that is based around collaborative storytelling, problem solving, the building and development of critical analytic skills, and the discovery of identity. This course will employ the city of New Orleans – and the Tulane Campus – as the "world" in which these new adventures discover themselves. The students will begin this course by building "character sheets" based on who and what they are (Identity location markers) and what they bring to the adventure. This part of the class will encourage students to articulate their own strengths and – areas of themselves upon which they are working. We will partner with The Office of Multicultural Affairs to engage these students in a discussion of identification (self-identification and how we identify others). The students will be sent on an adventure during which they will have to learn to use the resources available to them in the Tulane University Library System. The students will be asked to go through Audubon Park (and Audubon Zoo) to find creatures and treasures. The students will be asked to go to the French Quarter and have specific foods that are specific to New Orleans Culture and listen to music that was created here in New Orleans. The students will be asked to take pictures and sample sounds as "proof" that they have completed their quests. The students will be asked to "scribe" and reflect upon their adventures. The students are going to be asked to consider the relationship between "game" and "real-life" when we talk to local New Orleans Health and wellness programs (CrescentCare). This course will be rooted in the concepts of discovery, and gaming, and responsibility for choosing one's own adventure. We will also read at least on "fantasy" novel and discuss the nature of the narrative itself. We will discuss how the idea of women and female characters function in the book. We'll talk about how the book depicts the idea of the protagonists, as well as, the "traditional" trope of male as default in much of fantasy fiction – and what that means. We will discuss how the novel utilizes and incorporates the concept of "race."

TIDE 1145 Committed to Cultural Diversit (1)
In 2016, Tulane University President Mike Fitts established the Race Commission composed of students, staff, faculty, and board members to address issues related to campus diversity. Join this TIDES course as an early step in becoming a student leader committed to this and other diversity initiatives at Tulane. You will learn about the array of programs offered by the Office of Multicultural Affairs. Activities will include academic and social events that bring together TIDES students and members of various student organizations involved in promoting intercultural exchange and understanding. We invite you to become a part of this group of change-makers.

TIDE 1165 Blurring Lines Tulane & NOLA (1)
Congratulations - you're officially a Tulane student! As part of the Green Wave, you'll be living both on the St. Charles campus and in a city whose future is as exciting and complicated as its past. In, "In" or "Of" New Orleans, students will have multiple opportunities to blur the lines between Tulane University and New Orleans, Louisiana while considering their own social identities as a member of these two communities. Through readings, guest speakers, as well as explorations of current events, festivals, and cuisine, this course will make clear what it means to be "in" AND "of" New Orleans.

TIDE 1185 Innov in Chemical Engineering (1)
This course will introduce students to the modern approaches chemical engineers employ to solve real-world problems. Topics will emphasize engineering design and innovation. Students will learn through relevant readings, discussions, and guest lectures from leaders in the field. Fieldtrips to the NASA Michoud, Assembly Facility, Aquarium of the Americans, a local brewery, and the Tulane Maker Space will expose students to real-world applications.

TIDE 1190 Introduction to Yoga (1)

TIDE 1210 Art Meets Physics (1)
Art (in its broadest sense, including visual arts, literature, and various types of performance) is meeting science all around us. These interactions go well beyond the use of science as raw material by artists. The advancements in science lead to dramatic changes in our perception of the world clearly reflected in artists' creations. Just as religious and mythological sources had influenced art before and during the Renaissance, artists are now being moved by the need to capture the complexities and mysteries of the physical universe. In many ways, science and art are profoundly similar. The best of each rises up from the depths of human creativity, in both the arts and science there's the need for inspiration and hard work, the willingness to experiment and be brave, and the conviction that you are searching for or creating work that says something meaningful about the world or nature. In this course, we will discuss the mutual influence of arts and science (particularly physics) using examples from different art forms and historic periods. The course includes trips to New Orleans Museum of Arts and Laser Interferometer Gravitational Wave Observatory (LIGO-Livingston).

TIDE 1224 The Art of the Modern Archive: From Making Memories to Self-Fashioning (1)
What is an archive, and how do we make them?From the selfies we take or the ticket stubs we treasure to the cultural institutions we visit, we are surrounded by different means of documenting our past and present for the future. This TIDES course investigates the concept of the archive through a wide array of archival networks available from personal, local, and even global perspectives. Following a brief grounding in the history of collecting artifacts/art as a means to fashion the self or formulate an identity, we will focus on how subsequent archival spaces are created –from the intimate to the expansive, from the tangible to the ephemeral/digital –and the issues at stake when developing the narrative that an archive relays. We will question the voices both resonant and silent in archival practice through guided reading and discussion as well as through visiting speakers and corresponding visits to local institutions to make connections across campus and across the city of New Orleans. Students will be encouraged to consider their own voice in this documentary process as they develop their own personal archive in a capstone project woven through the course.

TIDE 1225 Women in STEM (1)
This course covers the challenges facing women pursuing degrees and careers in STEM. Many of these challenges are institutionalized barriers that still exist, creating a system in which it is harder for women to thrive in comparison with their male peers. Other minority groups in STEM face many of the same challenges as women, and the additional and different barriers for other underrepresented groups will also be discussed. The course will cover strategies for success in STEM and becoming an ally and advocate for other traditionally marginalized groups in STEM. One credit hour.

TIDE 1230 Latin American Infusion (1)

TIDE 1235 Memory and Public Space (1)
In this course, we will come to a better understanding of the articulation of public space in its relationship to history and memory. We will first discuss a number of paradigmatic cases in the battle for the public expression of national, regional, or group trauma in the form of monuments, memorials, or sites of commemoration: the Holocaust memorial in Berlin, the Vietnam memorial in DC, the “Parque de la memoria” in Buenos Aires, and the alternative ways of remembering the totalitarian period in Indonesia. Next, we will focus on these negotiations in the recent history of New Orleans: the marks of Katrina in the city today, the ways New Orleans chooses to remember it, and the controversy about the removal of confederate monuments in the city.

TIDE 1240 Sex/Drugs/Rock'nRoll & Disease (1)
Over the course of the next year students will develop an understanding of why young adults engage in high-risk health behaviors. During the first semester attention will focus on the social processes thought to underlie young adults' uptake of behavior patterns which expose them to unnecessary health risks. Among the wide range of high risk behaviors to be covered over the course of the year will be drinking, drugging, smoking, eating, speeding, unsafe sex, and other risky choices. Participants will develop an understanding of how one's family, friends and peers come to shape high-risk health behavior patterns. New Orleans provides an excellent vantage point from which to scientifically explore a culture in which exhibiting high risk health behavior patterns is almost normative. Students will work up epidemiological comparisons between their hometowns and New Orleans based on a wide range of available Internet databases. Students do no direct observations or participation in any high-risk behavior patterns as part of the course.

TIDE 1245 Sports Med: The Team Approach (1)
The TIDES course Sports Medicine, The Team Approach is a one credit course. This course will explore current topics of sports medicine and how the topics influence practice within the field. Through the guidance of a team physician, students will gain perspective on how sports medicine professionals care for athletes of all ages, with an additional emphasis on collegiate athletes. Students will learn through relevant readings, discussions, and guest lectures fromleaders in the field. Fieldtrips to the Professional Athlete Care Team Clinic, Tulane Institute of Sports Medicine, Tulane Athletic Facilities, and an inside look into a sports game will expose students to the interactions of healthcare professionals involved in the continuum of care for athletes.

TIDE 1250 Visual Arts New Orleans (1)
This TIDES class was put together by a team of university art professionals with the intention of introducing students to the breadth of the visual arts scene in contemporary New Orleans. The course includes field trips to and visits from artists, curators, critics, collectors, private gallery owners, and public museum professionals, offering a behind-the-scenes look at the vibrant cultural life of the city. Ideally students will come away from the class with an appreciation of the richness of the visual arts in New Orleans, the ability to discuss and write about the visual arts, and some insights into the nuts-and-bolts activities of the individuals and institutions the define the visual arts in New Orleans.

TIDE 1251 Medieval Women Writers and Subversive Literature: Radical Women Past and Present (1)
This course explores the connections between gender and literary expression with a focus on medieval women writers from late antiquity to the fifteenth century. We will examine the social, cultural, and literary patterns linking the lives of medieval women writers with their works. Medieval women writers tend to express different attitudes and concerns than those associated with medieval European literature and culture, nevertheless, their attitudes and concerns parallel ideologies expressed by modern women writers. The course aims to introduce medieval women writers by juxtaposing their medieval texts with modern texts written by contemporary women that express similar themes in a more contemporary setting. Some of these themes are art and freedom, importance of community building miracles, prophecies, and body politics. We will discuss the ways these themes have changed from medieval times to the present and the ways in which women continue to face similar struggles. The medieval women writers include:Marie de France, Hildegard of Bingen, and Catherine of Siena; the modern women include the visionary girls in Garabandal and Ana Castillo. Ana Castillo, in particular uses the stories of medieval women writers and rewrites them for a contemporary US Latina audience.

TIDE 1255 Creative Writing and New Orleans Literature (1)
Explore New Orleans through sampling its literature while developing your creative writing skills. We will read selections from various genres of New Orleans literature as well as works about the craft of writing, and spend time inside and outside of class on our own creative writing pursuits. We’ll discuss where writers lived and wrote in the French Quarter, attend readings together, and learn about the craft of writing from New Orleans authors. These activities, along with hearing each other’s pieces read aloud, will help us discover how literature can illuminate a city. Discover the literary imagination of New Orleans, and begin to experience your time at Tulane as “a little piece of eternity dropped into your hands” (Tennessee Williams).

TIDE 1265 Indian Tribes on the Bayou (1)
Want to explore the wilds of Louisiana outside of New Orleans? Try some alligator meat, shrimp caught fresh from the sea or, in general, explore another side of Louisiana's rich cultural heritage- then this class is for you! The far-reaching impact of Native American Tribes of the lower Mississippi Valley on shaping Louisiana history is among the least explored subjects among the otherwise well-documented rich history of Louisiana. Recent and ongoing research shows that without the "Petit Nations"", as some of the Tribes were called, the history of this region would have been quite different. This course offers students the rare opportunity to participate in on-going, important research that entails working directly with Tribal members. In addition, students will have the opportunity to take a trip conducted by Tribal members down the bayous as they give a tour of their ancestral lands as well as explore other areas of Louisiana outside of New Orleans while also tasting some of the food native to Louisiana. An experience not to be missed!

TIDE 1275 Hullabaloo Excell at Tulane (1)
"A Helluva Hullabaloo: Learning How to #BeExcellent at Tulane" introduces students to developing life skills that will be useful not only in college, but also will help prepare them for the "real-world." The broad-reaching goal of this TIDES course is to offer students the opportunity to gain valuable skills and lessons that can be used to succeed during their career at Tulane.

TIDE 1285 Crafting & Comm in New Orleans (1)
Ever wondered about the distinction between arts and crafts, why crafting is popular, or how many beads are in a Mardi Gras Indian costume? Whether you do crafts, buy them, use needle and thread, hammer and nails, or scissors and glue, you are involved in crafting. We'll learn about crafting as a hobby and a profession and look at local craft culture in New Orleans. We'll explore assorted craft practices and communities, through creative workshops, guest speakers, and fieldtrips to local craft centers or markets. No experience necessary – but if you've ever wanted to learn a craft, this is your opportunity!

TIDE 1295 Inside the Ivory Tower (1)

TIDE 1305 Different Pictures-New Orleans (1)
This TIDES course we will address the question, "What constitutes the heart and soul of New Orleans?" The most common answers are, great restaurants, Mardi Gras, Jazz Fest, French Quarter Festival, Voodoo, Ghosts, the Blue Dog, and of course, the Saints. Throughout the semester, we will study and discuss the city's cultural fabric from a folkloric, historical, artistic, literary, and cinematographic point of view. Students will assess the different facets and components that build our great city and contribute to its unique culture through the analysis of assigned text and film material, the participation in class discussions, team presentations, and field trips, as well as in the format of a reflective final paper.

TIDE 1315 Making New Orleans (1)

TIDE 1317 Sports as a Leadership Model (1)
This course uses a sports lens to introduce Tulane students to what character traits have made sports figures, coaches, teams, and organizations successful as well as aided in turning sports from recreational fun to a multi-billion-dollar global industry juggernaut. This class will introduce students to several different valuable life skills and lessons to aid them in them in their academic endeavors and professional journey. The goal of this class is to see what transferable skills those in the world of sports use in their respective venues to help them become success stories and pass those qualities along to you to aid you in achieving success in life during and after Tulane.

TIDE 1325 Organizing Society (1)
This course will explore how various societies, past and present, have been organized. From small tribal societies that practice communism to large industrial societies that foment capitalism, the mechanisms by which society is organized are intentional and deliberate. Anthropological, sociological, political, economic, and historical perspectives will be considered throughout the course. Special attention will be given to how inequality manifests itself within societies. This course will require students to select the societies we will study and to actively participate in researching these societies. The course will culminate in student groups designing a society according to goals and outcomes they set by applying the knowledge they have gained over the course of the semester.

TIDE 1335 Art On and From the Margins: Questions of Race, Class, and Gender (1)
This course investigates practices in New Orleans art that interrogate dominant systems of representation. It examines how artists in New Orleans rely on and devise strategies that confront, appropriate, subvert, and queer the meanings, aims, and experiences of conventional art practices. These may include shifts in the content of a work and its audience to methods by which it is produces, its formal properties, and its reception. The focus of the class will include analyses of practices of documentation, re-appropriation, abstraction, mining the archive, and camp (among others). Directly connected to questions of marginalization of certain artistic voice and art practices are—of course—inquiries into whether attempts to dislodge and reconfigure dominant systems results merely in the consumption of those works and their integration into larger system or whether they have the potential to destabilize those systems. The class will include a number of talks by New Orleans artists, visits to New Orleans museums and other art spaces.

TIDE 1345 Politics of the Past: Monuments and Social Conflict from the Ancient World to Modern New Orleans (1)
This course addresses the impact of monuments, historical and archaeological sites, and cultural heritage management on local communities and the ethical and political dimensions of ongoing conservation, museum, and research projects. Recent protests over cultural heritage sites in places like Mexico, Turkey, and Jerusalem, the dramatic destruction of monuments at the hands of ISIS in Syria, and our own domestic debates about the Confederate monuments that dot many American cities have shown the potential for monuments to be at the center of complex political, ethnic, and religious controversies or to even become a sites of conflict and violence. The course will explore the use and abuse of material culture as a means of underpinning modern claims of nation and statehood and cultural superiority. At the same time, debates over monuments and historical sites provide a unique opportunity to give a voice to groups that fall outside of traditional historical sources, and it can provide a powerful means of opening dialogue about the past. Throughout the course, we will discuss the roles and responsibilities of governments, international organizations, museums, auction houses and galleries, private collectors, and tourism in the exploitation, preservation, and presentation of monuments and material culture. Students will put the historical perspectives of the course into practice by a series of field trips to public and private museums and historical sites in and around New Orleans, and they will address how our own contemporary debates might be informed by wider attention to historical and global issues of cultural heritage management.

TIDE 1355 Art, Place, and Community in New Orleans (1)
This 1-credit TIDES course introduces students to college study, discussion, and research through the topic of art, public space, and community in New Orleans. We will look at histories of placemaking, the role of monuments in public space, and art that has emerged out of engagement with local communities. In the course Art, Place, & Community in New Orleans, students will learn about historical and contemporary New Orleans through its art in public spaces, historical monuments and community-based art. We will think about the history of art in public spaces of New Orleans, grapple with debates about the legacy of historical monuments; and ask how art plays a role in the history and future of New Orleans, as a geographical place and as a constellation of communities. This TIDES Course is ideal for students considering majors or minors in art history, history, or urban studies.

TIDE 1365 @InstaNola: Curating Your Digital Self (1)
@InstaNola: Curating Your Digital Self is a one credit TIDES course that looks at our relationship to social media, both real and projected, set to a New Orleans backdrop. The term "curation" has migrated from the physical world of art to the digital domain as we increasingly apply it in the context of our online activities. The images, songs, stories, locations, and people we interact with online shape the way we want the world to view us. But what happens if our digital self and physical self don't align? We will look at our own relationships to social media, hear from local social media influencers, and visit some of New Orleans' most 'grammed spots all towards the question: How do we see the world, and how do we want others to see us?

TIDE 1375 Gateway to the Americas: The Roots & Routes of Latinx New Orleans (1)
For much of the twentieth century an enormous, iron sign spanned Canal Street celebrating New Orleans as the "Gateway to the Americas." In recent years politicians have labored to swing this gate shut, imploring America to build a wall instead. Yet this open gate has made New Orleans the unique culture it is today. This TIDE approaches current immigration debates from a local perspective, examining New Orleans and Tulane University as vibrant sites of intercultural intellectual, economic and social collaboration and exchange with Latin America and more specifically, Central America. Readings and activities will complicate the rhetoric of "invasion"—which reduces immigration to one-way street—by acknowledging the multidirectional movement of people, goods, ideas and cultures to and from New Orleans and Tulane across the twentieth and twenty-first centuries. Toward this, we will examing policy, literature, art, film and food as they are affected by and effect the formation of culture and identity. You, as a student, are part of this and we will engage your American origins as well, toward developing an empathetic understanding of the immigrant experience and the responsibilities of citizenship. Finally, we will explore how students can be more involved in struggles for social justice and human rights at Tulane and beyond: A) Discussing the skills and experience needed for careers in advocacy, activism, social work, education, immigration law, public health and other professions related to the Latinx community that your education here can provide; and B) Examining opportunities for volunteer work, service learning and internships with organizations that serve New Orleans' Latinx and immigrant communities while you are here. Toward these objectives, we will engages many voices across the New Orleans and Tulane communities, inviting activists, artists, and professionals into the classroom and venturing out of the classroom to experience people, places and life in New Orleans beyond our campus.

TIDE 1385 Cultivating Connection (1)
This one-credit course synthesizes theatre acting techniques and yoga to help students cultivate more presence and connection in their daily lives. The focus will be on calming the nervous system, developing adaptability, and learning to accurately read behavior and emotions in oneself and others.

TIDE 1390 Silver Screen Shakespeare (1)

TIDE 1405 New Orleans on Stage and Screen (1)
We will explore how the legend of New Orleans was created and reinforced by popular representation in theatre and film works from the 19th century through today. Students will investigate various signifiers of New Orleans through time, watching their rise (and sometimes fall) through performance pieces. We will explore home-grown myth-making as well as visions provided by outsiders, and also get out into the city itself, seeing what truth might lie within the narrative reductions of New Orleans that occupied audiences for the last two centuries.

TIDE 1415 FEMtech: Gender and Technology Design (1)
Since the industrial era, analog, digital, and medical products have been produced with the claim that certain technologies make women's lives easier. This course examines the role that FEMtech plays in women's lives and the role that product design plays in shaping discourse around women's relationship with technology. Students will also explore the recent rise of the FEMtech app technology, a projected $120 billion-dollar industry. Students will have the opportunity to learn about the technology and start-up industries from technology leaders in New Orleans. Students will use feminist technology design strategies to design and pitch a FEMtech product.

TIDE 1425 The Archaeology of Mardi Gras (1)
From Indiana Jones to Lara Croft to the guy in the "Ancient Aliens" meme, archaeologists are standard in pop-culture. But what do they actually do? In this course, we will explore the practice of archaeology through the lens of the "greatest free show on earth:" Mardi Gras in New Orleans. Archaeology is the study of humans through our material culture, the stuff we leave behind, and Mardi Gras brings plenty of stuff for us to examine. Working together each week, the class will complete readings, field trips, and hands-on projects, learning how to investigate Mardi Gras as an archaeological phenomenon. By the end of the semester, you will know more about New Orleans and its central tradition, and I promise, you will never look at a strand of beads the same way again.

TIDE 1430 Writing In New Orleans (1)
A student adopts and inhabits a new city, becoming native. Keep a journal of New Orleans. Write it down! Take moments, ideas to reflect the experience among peers living in the Crescent City. Write letters, poems, and lyrics, discussed during workshops in class and on excursions in the city. Become thoughtful...listen, read, write, converse through language. A journal may recollect moments in tranquility (Wordsworth) or may take the form of day-to-day experience (Bosworth). During particular classes the student will be asked to write while on a streetcar, in Audubon Park, and on the levee by the Mississippi river. Students will keep a journal, participate in a writer's workshop, give a class presentation, and write a research paper. Participation is a must. There are no examinations.

TIDE 1435 Ecology, Equality and Migration an Interdisciplinary Perspective Contemporary European Politics (1)
The interdisciplinary course will examine three main political problems in Europe today; the environmental crisis, social inequality and migration from the Middle East. Prof. Ofengenden will begin with examining the ways of life and accepted thinking that these three problems undermine and challenge including consumerism, individualism, traditionalism, economic rationality, developmentalism, growth, globalization and nationalism. Prof. Ofengenden will survey the history of early challenges to accepted thinking including the challenges to exploitation and privatization of land argued by the thinkers of the Enlightenment (e.g. Rousseau) as well as early critics of industrialism. Prof. Ofengenden will use both literature and thought to show illuminate these critics. Prof. Ofengenden will then move to 20th and 21th European contributions to environmental thought and economic inequality as well as political movement and artistic expressions of both of these trends. These will include Martin Heidegger, Theodore Adorno, Arne Naess, Serge Moscovici, Bruno Latour, Thomas Piketty, Jacques Rancière, David Harvey. Finally this part of the course will look at two contemporary political protest movements the Yellow Vests in France and Extinction rebellion in the UK. It will look into how these movement were formed and the way they have transformed in the discourse around income inequality and environmental crisis in France and the UK. The second part of the course lead Prof. Nicosia by will look at the issue of immigration to Europe. After a first survey on the immigration phenomenon starting from the year 2010 through, course will pass to analyze social and political tensions caused by anxiety and phobias towards the Other, and the way it reshapes geographical spaces and cultural patterns of the hosting countries, with particular attention to the notions of borders (in the cities and the neighborhoods), citizenry (what and how to define a citizen at the margin), new ethics' parameters (e.g. religion, welfare etc...), and ultimately the ideas of nation, nationality and nationalism. The second part of the course will be dedicated on the voices of the migrants and their representation through the new artistic phenomena related to migration in the Mediterranean countries (Italy, Greece), with particular attention to literature, video, (photography, video installations), cinema, as well as music creations.

TIDE 1445 Arts Around New Orleans (This Ain't Your Momma's Art) (1)
This course is designed for those interested in exploring the immensely diverse arts scene in New Orleans. The purpose of the course is to introduce students to a variety of art forms. The course includes amazing field trips as well as guest artists in the classroom. Through readings, classroom discussions, meetings with local artists, reflective writing, and creating your own art project, you will gain a great appreciation for the arts scene in the great city of New Orleans! How does one give voice to creativity? Join us to find out!

TIDE 1455 Sports and Culture in Spain: A Sociological Approach (1)
The syllabus of this course has been programmed from a sociological approach to sport, so that the students can gain an overall view of Spanish culture, of the Spanish way of life, throughout the analysis of geographical, historical, cultural and literary factors in the make-up of the nation in the present-day, and in its diverse manifestations. Additionally, it will examine various aspects of the relationship between sport and Spanish society. The importance of sports goes beyond its obvious political significance. Indeed, sociologists and anthropologists have recently studied the interaction between sports and social and cultural dimensions. Nowadays, there is no doubt about the integrative and unifying strength which sports exhibit. It is a phenomenon that carries out an enormous social impact, interests the majority of the population and is practiced by a large part of the population. The course begins with a consideration of general theoretical questions on the idiosyncrasy of every culture by comparing U.S. and Spanish cultural trends and stereotypes. After that, it will examine the different cultures within Spain: Castilian, Catalan, Basque and Galician; focusing mainly on language, nationality, and political implications. Following the midterm, we will focus on the analysis of specific sports such as soccer, traditional sports of Spain, basque pelota, the controversial bullfighting and all their different social and political implications.

TIDE 1465 Crafting Your Story (1)
Compelling storytelling lies at the heart of success across fields. From a business person pitching a new product to a research scientist vying for a competitive grant, the ability to tell a captivating story gives you an advantage. Storytelling skills serve you when interviewing for internships or jobs, networking, or even just making new friends in college. Whether your ultimate goal is a TED Talk with a million views or just a kickass toast at your best friend's wedding one day, this class will give you concrete tools to improve your public speaking and storytelling skills. In this experiential class, we will create a supportive environment where you will discover your personal communication style and how to leverage your strengths to gain more confidence in your ability to tell a great story.

TIDE 1475 For the Love of New Orleans: Entering Community Through Service (1)
Many students have been drawn to Tulane for its heavily touted commitment to community, but what does this mean and look like in actuality and from the perspective of the New Orleans community? This course introduces students to concepts around community engagement at an individual level and at Tulane, the components of ethical service, the dynamics of entering a community that may be new to you, and an introduction to a specific community within New Orleans via service with a partner organization that will engage with the course throughout the semester.

TIDE 1485 Surveillance, Data, & Society (1)
This seminar examines the historical and contemporary relationships between race, gender, class, and sexuality and modern surveillance practices. Students will be introduced to the interdisciplinary theories of surveillance and data studies such as discipline, control, capitalism, privacy, and counter-surveillance. Students will examine and discuss materials related to enslavement, policing and prisons, reality television, workplace surveillance, domestic violence, reproductive rights, (social) media, travel, big data, and machine learning. Seminar discussions will include cases where patriarchal power and racialized systems were used to promote perceptions of security, fear, exposure, and control. As praxis, students will design and produce a data project that uses strategies such as data collection, management, analysis, and/or visualization. All data skills will be taught in this course and all technical skill-levels are welcome.

TIDE 1500 Irish In New Orleans (1)
This course introduces students to an unfamiliar part of New Orleans' history that is as defining to the city's character as her more familiar Spanish and French past: Irish New Orleans. For many different reasons, Irish immigrants were drawn to Antebellum New Orleans, and they came to this city by the tens of thousands. Contrary to still prevailing prejudice, the newly arriving Irish immediately set about creating their own communities,several of which we will explore in this course.Strong familial ties denoted these neighborhoods as did their Catholic faith and the extraordinarily beautiful churches these immigrants built to serve their spiritual needs.Life was not easy in New Orleans: frequent epidemics killed people by the tens of thousands. However, the Irish immigrants successfully carved out lives for themselves that gave the city a permanent Irish flavor which, to this day, is still defined by Irish customs and traditions and inseparable from the colorful, multi-faceted spirit of New Orleans.

TIDE 1515 Voices of the future: Student & Youth Activism (1)
This course explores youth activism from the "angry decades" (60s &70s) to "age of rage" (present) and emphasizes South Louisiana as a hub for youth activism. From Ruby Bridges' and the "McDonough Three's" roles in the integration of New Orleans schools in 1960 to Louisiana youth playing critical roles in the current push for climate justice, youth activists illuminate themselves as political actors who seek to create an equitable world. Beyond discussions of Louisiana youth, this course invites students to learn about the ways student activists from colleges all over the United States emerged as change agents and shifted the state of higher education. With the influx of youth activists and social movements comes the development of distinct fields of inquiry through which scholars analyze youth activists' experiences and motivations. As the course centers youth voices, we will analyze speeches and written work (e.g., statements, petitions, credos) of activists and place their ideas in conversation with youth and movement studies scholarship, popular texts, and media about the ways youth insert themselves in social justice efforts. While investigating the ways students participate in and construct movements, we will also examine how they influence policy change. As we learn, we will consider our roles in resistance work on local, national, and global levels and how putting our knowledge into practice can help create the world(s) we imagine.

TIDE 1525 Kindness in Action: Emotionally Intelligent Leadership (1)
Over the course of the academic semester, this course focuses on developing an interdisciplinary understanding of the theories and practices of emotional intelligence as it applies to your transition and success as a first-year student at Tulane. As a TIDES member, you will actively study the theories that emerge from a variety of fields and reflect on their practical, social, and ethical assumptions as well as on their implications in a variety of settings. Through readings, classroom discussions, and episodes of Apple TV's Ted Lasso, you will gain a greater appreciation for the issues that affect all of us as human beings in relationship with each other. This course is designed around the three central themes of emotionally intelligent leadership: self, others, context. Each theme will be addressed individually but the course will also examine the interdependence between the three. Course sessions will be dynamic and include a variety of experiential learning, group participation, guest speakers, and activities designed to stimulate thinking and build our capacity and efficacy for affecting change in our own lives and within our community.

TIDE 1535 Delta Clay - Environment & Art (1)
New Orleans sits at the edge of the continent on layers of alluvial clays and sand, on a delta barely 5000 years old. The low elevation and shifting nature of the ground has influenced the growth and construction of the city, and provided a resource of clay for building and ceramic art. This class will explore the ground under our feet, examining the makeup of the geology of our city, the river that formed it and some of the ways geography and geology has influenced the growth and character of its neighborhoods. As climate change magnifies the forces that shaped the delta, the natural processes of flooding, erosion and subsidence are accelerating with serious consequences for the New Orleans and South Louisiana. Our environmental exploration will take us out to find and dig local clay, prospecting at the Studio in the Woods and the Carrolton river bank at the "Fly", experiencing the land in a direct way. The clay we dig will be refined in the ceramics studio and used it to make vessels and other botanical forms inspired by the historic enterprise of Newcomb Pottery. Founded within the Newcomb Art Department in 1896, the Newcomb Pottery enterprise utilized local clays and employed talented women graduates from the Art department, developing unique and beautifully crafted forms that emphasized designs drawn from indigenous plants. Special tours of the Newcomb Art Museum's collection of the historic pottery will provide models for our own works, made from the clays we dig and fired in the modern kilns of the Newcomb Art Department.

TIDE 1545 Law & Order (1)
In Henry VI, Shakespeare wrote, "The first thing we do, let's kill all the lawyers;" however, "all the lawyers" have avoided being killed since that line was written. Why? From the largest corporate mergers to simple adoptions, and from public policy to the enactment of criminal laws, the need for lawyers is increasing because the law is a central part of our daily lives and the bedrock of a free society. Although the press might occasionally indicate otherwise, lawyers are members of a profession and they get respect, but is being a lawyer really like the popular portrayals on television shows such as Law and Order or in a John Grisham novel? This class will help you explore how one becomes a lawyer and what it is like to be a lawyer.

TIDE 1615 Positive Psychology and Successful Leadership (1)
This course will introduce students to research, theories, and practices central to the field of applied positive psychology and the emerging subfield of positive leadership for the purposes of (a) increasing personal and interpersonal well-being and (b) developing positive leadership skills which can be applied within university, business, organizational, civic, and government spheres. Positive psychology is a relatively new field which asks questions such as: What can scientific research tell us about practices and perspectives that lead to a happier life? What can psychology do to help ordinary people to thrive and flourish? Which practices lead to greater well-being, fulfillment, and life satisfaction? Positive psychology engages such questions by utilizing scientific research methods to identify practices which lead to greater well-being (including positive emotions, engagement, relationships, meaning, and accomplishment). Positive psychologists maintain that (1) flourishing requires more than curing pathology; (2) flourishing requires tapping human strengths and positive capacities; and (3) scientific research methods can help us to identify and refine strategies for flourishing. Topics in positive psychology include positive emotions, hedonic misprediction and adaptation, character strengths, purpose, gratitude, kindness, meditation, nurturing social relationships, exercise, and more. Positive leadership studies focus on evidence-based approaches to successful leadership and draw on research at the intersection of positive psychology, leadership studies and organizational studies. Topics in positive leadership studies include approaches to well-being, strengths, leadership styles, problem solving (appreciative inquiry vs. pathologizing inquiry), meaning, intrinsic vs. extrinsic value, effective communication, and cultivating and maintaining positive relationships. This course will provide students with a theoretical and practical introduction to applied positive psychology with a focus on positive leadership. Students will engage in experiential homework in which they will apply strategies for enhancing their own well-being -- and for positively impacting their own leadership initiatives. This course will also expose students to local wellness resources at Tulane and will include a walking tour of the French Quarter exploring New Orleans architecture, history, culture, and cuisine.

TIDE 1680 Hot Topics in Sports Law (1)
This course will explore the authority of commissioners as well as the rights and responsibilities of athletes and others in professional sports leagues and college sports. Students will explore disciplinary measures relating to on and off-field misconduct, performance enhancing and recreational drug use, and speech, as well as the impact of sports gambling, discrimination, and other issues with an emphasis on current events. Students will learn about the source and scope of a commissioner's power, player rights when faced with disciplinary action, league collective bargaining agreement rules, and the types of punishments available. Students will be asked to think critically about the scope of a commissioner's power in specific cases, to consider desired outcomes from multiple perspectives, and to discuss the propriety of various rules governing player, coach, owner, and fan conduct. Students will gain a basic understanding of the application of law to professional and college sports industries. Students will also learn the essential tenets of negotiation applied in a sports setting and engage in a mock negotiation.

TIDE 1700 Myth&Real Nola Food/Drnk (1)
As the concept of local foodways becomes entrenched in the growing "foodie" culture of the United States, local food and local dishes become an ever more important marker of place. Whether justified or not, Creole and Cajun food and, of course, the ubiquitous Cocktail, are perceived by many as synonymous with New Orleans. In this course, we will explore the myths and realities of these three key concepts as they apply to food and drink in New Orleans.

TIDE 1713 Storytelling with Data – How Healthy Are We? (1)
Storytelling through data visualization can dramatically enhance our ability to think about the meaning within data. The connection between vision and cognition is powerful. In this course we will explore the fundamentals of discovering and presenting the story that lies within the data that we wish to tell. We will do this in the context of health care and public health in the United States. Along the way we will explore some common data sets about health care and public health, and we will learn to recognize the strengths and shortcomings of current data visualizations we see in academic settings and the mainstream and social media.

TIDE 1742 Shakespeare in New Orleans (1)

TIDE 1810 Non-Profits & Katrina (1)

TIDE 1880 Martial Arts For Perform (1)

TIDE 1890 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDE 1891 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDE 1892 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDE 1893 Service learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDE 1894 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDE 1895 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDE 1896 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDE 1897 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDE 1898 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDE 1899 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDE 1911 Ocean Health/Human Health (1)
The United Nations designated this decade (2021-2030) as the Decade of Ocean Science for Sustainable Development to highlight the needs and mechanisms to reverse the decline in ocean health. This course will focus on the most pressing issues that intersect ocean health, human health, and local/global economics. We will explore, discuss, and debate the science and policies behind what led us to our current situation and what can possibly be done as the international community moves forward.

TIDE 1915 Sicilian Jazz:Ital Cult NOLA (1)
The Italian Culture in New Orleans" will focus on different facets and components of the Italians in the Crescent city. Special consideration will be given to the discussion of the following topics: New Orleans and the culture of the Italian emigrants, traditions, cuisine, music, fiction and movie rendering of the Italian emigration.

TIDE 1925 Natural History of Louisiana (1)

TIDE 1950 Salsa! (1)

TIDE 1970 Songwriting For Audience (1)

TIDE 1975 Visual Pleasure & Photography in NOLA (1)
The class is about visual pleasure and aesthetic beauty. What makes a picture or painting beautiful? We will examine this question through several disciplines including philosophy, art history and experiential artistic practice. We will consult short readings of the classics answer to this question (e.g. Plato, Kant, Schiller, Delacroix, Hegel, Marx, Heidegger, Freud, Vygotsky, Foucault, Gombrich, Susanne Langer, John Berger, Elaine Scarry, Boris Groys, Clement Greenberg, Laura Malvie) At the same time we will also look at several distinct periods and ask what was beauty at these specific times. I have chosen four such times. The first period is the Northern Renaissance (e.g. Van Eyck, Bosch, Du#rer, Bruegel) the second the Baroque (e.g. Velázquez, Rembrandt), the third the impressionists (e.g. Manet, Degas, Cassatt, Monet, Renoir, Toulouse-Lautrec) the expressionists (Franz Marc, Ernst Ludwig Kirchner) and fourth 20th century art photography. We will examine various concerns that we have with the beautiful. For example, the concern that the love of beauty is at best an evasion from the problems of social reality, at worst a way of legitimizing the status of the rich and powerful. That it is merely a marker of social class (e.g. Bourdieu). That beauty is frivolous, decadent, distracting, and unserious. That there is nothing to describe or to share or give account to this most subjective experience. We will attempt to answer this question by looking to both the experience as well as production of beauty as a kind of temporary emancipation from a life-world experience, a lifeworld that is limited by material conditions and social factors. We will also look at beauty as a transformative decentering of the self. We will examine deeply Kant's idea that true beauty is the free play of imagination and understanding in the mind of the audience and therefore can include any theme of topic.

TIDE 1981 Frames Films & Femmes Fatales (1)
This course is a critical survey of cinematic works by and about women, with examples drawn from different modes of cinematic expression (mainstream fiction films as well as alternative film and video [including documentaries, experimental, & narrative]) and from different historical periods (from the 1930s to the present). The course deploys feminist approaches to film criticism and applies these approaches to cinematic representations of women. Films illustrating particular genres, as well as feminist and "women's" films, are discussed and critiqued. We will consider the role of film in our understandings of sex, gender, and sexuality, as well as race, class, and disability. Through discussions and writing, we will work to discern relevant social, political, ideological, and aesthetic concepts in the media we examine. We will look at contemporary Hollywood and independent cinema, US and some international films by both established and emerging filmmakers. Corequisite(s): TIDE 1898.

TIDE 1982 Contemporary Women Writers (1)

TIDE 1983 Us vs. Them (1)
Black vs. White. Citizen vs. Immigrant. Transgender vs. Cisgender. Christian vs. Muslim. Gay vs. Straight. The list goes on. In recent years, the United States has become increasingly polarized. The most interesting and exciting aspects of human diversity are set against one another, in rigid opposing binaries. Through interactive workshops, cultural trips, discussions of texts and films, writing reflections, and guest speakers, this seminar will serve as an incubator for students from diverse backgrounds to develop their understanding of the complexities of cultures, identities, and power dynamics. We will simultaneously explore everyday practices for world building beyond "Us. Vs. Them."

TIDE 1984 Identity, Power & Comm Engage (1)

TIDE 1985 Women Leading New Orleans (1)
From non-profit organizations to government, from social movements to Mardi Gras, from restaurants to boardrooms, women have led New Orleans. Using an intersectional feminist lens, this course will explore how the personal, the organizational, and the institutional intersect to shape how women practice leadership. Students will be introduced to theories and research that address gender and leadership while focusing on historical and contemporary examples of women practicing leadership in New Orleans. The course will begin with a brief introduction to a sociological perspective on gender and intersectionality - foundational concepts of the course - and move into discussions of how and why women lead, as well as barriers they encounter to leadership. Guest speakers, field trips, and writing assignments will ask students to think broadly, but also analytically, about what leadership means, as well as about how identities and institutions shape the experience of leadership.

TIDR 1014 Cultivate Residence Self Care (1)
Health in college is so much more than avoiding pizza every night and occasionally going to the gym. Health is multifaceted and is pivotal to your ability to thrive during the next four years. This course will examine the most relevant health topics for college students from a public health perspective, integrating theories and practices relevant to your life. In addition, this course seeks to cultivate leadership skills as an element of being healthy and successful in college.

TIDR 1015 Cultivate Inner Changemaker (1)
Cultivate your Inner Changemaker is devoted to exploring the skills, strategies, and ideas of effective social change advocates in the 21st century. Students will be learning about some of the essential skills of effective changemakers, including leadership, optimism, resilience, risk-taking, luck, relationship building, conflict resolution, creativity, and innovation. Throughout the course, students will practice these skills, both in class and through assignments.

Corequisite(s): TIDR 1890.

TIDR 1016 Crossroads of Culture: New Orleans' Global Identity in Local Context (1)
In this course we will delve into the rich tapestry of New Orleans' cultural geography and its profound multicultural existence. Students will explore the historical roots and global influences that have shaped the city's unique identity. Through engaging lectures, seminar discussions, and experiential learning, students will develop a nuanced understanding of the city's multicultural history and its ongoing impact on contemporary society. Students will gain an appreciation for the global influences in New Orleans' music, cuisine, environment, and traditions while addressing social justice issues rooted in the city's unique history. The course aims to foster cultural competence, inclusivity, global awareness, civic engagement, and leadership skills, providing students with the tools to navigate an increasingly interconnected world.

TIDR 1018 Case Studies in Leadership (1)
This 1-credit course will utilize a variety of cases which highlight a real-life example of a challenge in leadership. Fields covered will include business, politics, non-profit work, and social movements - all highlighting decision making in New Orleans following Hurricane Katrina. In most class periods, you will be asked to "inhabit" the case and take up the dilemma of its protagonist. I may assign class members roles to prepare and play in the class discussion spontaneously or in advance. None of the cases have right answers, although we may have an epilogue that tells what actually happened (the historical outcome). You are asked to wrestle with the problem as if it were your own and bring your experience and classroom learning from Tulane University and elsewhere to bear on the questions. The Harvard Business School originated and developed the phenomenon of the teaching case to simulate business experience in novices, to create a concrete vehicle for applying abstract theories to real-world situations, and to engender engaged classroom discussion while fostering critical thinking skills as students were forced to wrestle with actual business dilemmas that had no easy answer. It is no accident that professional schools were drawn to case teaching—Law, for obvious reasons—but also schools of public affairs and public health whose missions are to utilize the best thinking of the disciplines to prepare students for careers as practitioners. Cases marry learning about real world policy and organizational problems with critical thinking, abstract reasoning, and theorizing valued in all academic disciplines. In particular, this course will offer you a chance to get to know New Orleans as a resilient city with monumental challenges left to tackle.

TIDR 1090 Who Dat, Fan Up & Geaux (1)
Founded in 1718, the city of New Orleans has a long and rich history with sports. From the rise of social class-driven sports such as rowing and billiards to the New Orleans Saints' heroic revival of the city post-Hurricane Katrina, sports has been as integral to the area as food, music, and Mardi Gras. Sports have made an enduring impact on the social world in which we all live. It is a taken for granted aspect of our everyday lives – whether that entails watching "Sportscenter" or noticing that every single major newspaper contains a "Sports" section that is as long if not longer than any other section. Yet there is more to sport than just what we see on a daily basis. In this course, we will explore general sports-related topics and examine actual case studies related to New Orleans' sports scene. More than simply 'talking sports,' students will study issues from political, economic and social viewpoints and also gain an understanding of the rich sports heritage found here in New Orleans. Readings and discussions, field trips, and guest speakers will aid students to understand both historical accounts and modern-day subjects associated with sports such as governmental involvement, public financing, and community development. Students will participate in a mandatory service learning component with TBD. Their after-school programs promote development in boys and girls through activities that build character, cultivate new skills, and create a sense of belonging – in this case a place where kids can express themselves, play together and get fit. By participating in activities with NFL Youth Education Town students will deepen their understanding of the political, economic, and social ramifications of sports on a local level by making correlations to sports and its impacts on the city's youth, infrastructure, civic pride, crime reduction efforts, poverty eradication, and other areas, and gain an awareness of their role as a citizen in the city of New Orleans.

TIDR 1117 N. O. Performance Culture (1)
There will be two primary goals in this course. The first will involve introducing students to New Orleans's history, culture, and literature. The second will entail an interdisciplinary introduction to a wide array of influences with the effort of showing how New Orleans's turbulent history of changing possession, immigration, and migration have contributed to a "performance" of various versions of "New Orleansness." The course will focus specifically on the presence of French, Spanish, African, and a brief overview of the various immigrant communities in the city's history and the various ways in which these groups have performed their own version of New Orleans for the city itself, the United States, and the world. In addition, the students will use the maps found in Unfathomable City: A New Orleans Atlas to look at how maps are constructions of authenticity.

TIDR 1185 Innovation in Chemical Engineering (1)
This course will introduce students to the modern approaches chemical engineers employ to solve real world problems. Topics will emphasize engineering design and innovation. Students will learn through relevant readings, discussions, and guest lectures from leaders in the field. We will also take two field trips to introduce students to the roles of engineering in New Orleans.

TIDR 1225 Women in STEM (1)
This course covers the challenges facing women pursuing degrees and careers in STEM. Many of these challenges are institutionalized barriers that still exist, creating a system in which it is harder for women to thrive in comparison with their male peers. Other minority groups in STEM face many of the same challenges as women, and the additional and different barriers for other underrepresented groups will also be discussed. The course will cover strategies for success in STEM and becoming an ally and advocate for other traditionally marginalized groups in STEM.

TIDR 1265 Indian Tribes on the Bayou (1)
Want to explore the wilds of Louisiana outside of New Orleans? Try some alligator meat, shrimp caught fresh from the sea or, in general, explore another side of Louisiana's rich cultural heritage- then this class is for you! The far-reaching impact of Native American Tribes of the lower Mississippi Valley on shaping Louisiana history is among the least explored subjects among the otherwise well-documented rich history of Louisiana. Recent and ongoing research shows that without the "Petit Nations"", as some of the Tribes were called, the history of this region would have been quite different. This course offers students the rare opportunity to participate in on-going, important research that entails working directly with Tribal members. In addition, students will have the opportunity to take a trip conducted by Tribal members down the bayous as they give a tour of their ancestral lands as well as explore other areas of Louisiana outside of New Orleans while also tasting some of the food native to Louisiana. An experience not to be missed!

TIDR 1317 Sports as a Leadership Model (1)
This course uses a sports lens to introduce Tulane students to what character traits have made sports figures, coaches, teams, and organizations successful as well as aided in turning sports from recreational fun to a multi-billion-dollar global industry juggernaut. This class will introduce students to several different valuable life skills and lessons to aid them in them in their academic endeavors and professional journey. The goal of this class is to see what transferable skills those in the world of sports use in their respective venues to help them become success stories and pass those qualities along to you to aid you in achieving success in life during and after Tulane.

TIDR 1415 FEMtech: Gender and Technology (1)
Since the industrial era, analog, digital, and medical products have been produced with the claim that certain technologies make women's lives easier. This course examines the role that FEMtech plays in women's lives and the role that product design plays in shaping discourse around women's relationship with technology. Students will also explore the recent rise of the FEMtech app technology, a projected $120 billion-dollar industry. Students will have the opportunity to learn about the technology and start-up industries from technology leaders in New Orleans. Students will use feminist technology design strategies to design and pitch a FEMtech product.

TIDR 1500 The Entrepreneurial Landscape of New Orleans and How the City's Diverse Culture Influences It (1)
In this course, students will be given a behind the scenes look at the entrepreneurial ecosystem in New Orleans –the lessons learned from Hurricane Katrina recovery efforts and what needs to happen to have a vibrant startup community that is equitable, accessible, and collaborative.From local entrepreneurs to community partners to support organizations to investors and more, this course will bring together some of the most important stakeholders in the New Orleans entrepreneurial ecosystem. We will also leverage our data from the Greater New Orleans Startup Report, hearing from our very own Lepage Center to present an in-depth overview of the current state of the early stage business economy in New Orleans.

TIDR 1725 Black Culture, Power, Politics, and Leadership (1)
This one-credit course complements the experience of students living in the 1963 Collective Residential Learning Community (RLC) by providing them with an equity oriented interpretative framework grounded in Black thought, experience, and history. The modular survey course was designed for first-year students interested in exploring Black history, culture, and knowledge across the African diaspora. Through this first year seminar, students will develop an appreciation and understanding of the contributions of Black people in a globalized context.

TIDR 1890 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDR 1898 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

TIDR 1925 Natural History of Louisiana (1)
This course examines the origin and evolution of Louisiana's ecosystems. Students will learn about living and prehistoric plants and animals and their physical surroundings while exploring Louisiana's coastal marshes, bottomland hardwood forests, longleaf pine savannahs, and tallgrass prairies. Course includes multiple field trips.

TIDR 1981 Frames Films & Femmes Fatales (1)
This course is a critical survey of cinematic works by and about women, with examples drawn from different modes of cinematic expression (mainstream fiction films as well as alternative film and video [including documentaries, experimental, & narrative]) and from different historical periods (from the 1930s to the present). The course deploys feminist approaches to film criticism and applies these approaches to cinematic representations of women. Films illustrating particular genres, as well as feminist and "women's" films, are discussed and critiqued. We will consider the role of film in our understandings of sex, gender, and sexuality, as well as race, class, and disability. Through discussions and writing, we will work to discern relevant social, political, ideological, and aesthetic concepts in the media we examine. We will look at contemporary Hollywood and independent cinema, US and some international films by both established and emerging filmmakers.

TIDR 1983 Us vs. Them (1)
Black vs. White. Citizen vs. Immigrant. Transgender vs. Cisgender. Christian vs. Muslim. Gay vs. Straight. The list goes on. In recent years, the United States has become increasingly polarized. The most interesting and exciting aspects of human diversity are set against one another, in rigid opposing binaries. Through interactive workshops, cultural trips, discussions of texts and films, writing reflections, and guest speakers, this seminar will serve as an incubator for students from diverse backgrounds to develop their understanding of the complexities of cultures, identities, and power dynamics. We will simultaneously explore everyday practices for world building beyond "Us. Vs. Them."

TIDR 1985 Women Leading New Orleans (1)
From non-profit organizations to government, from social movements to Mardi Gras, from restaurants to boardrooms, women have led New Orleans. Using an intersectional feminist lens, this course will explore how the personal, the organizational, and the institutional intersect to shape how women practice leadership. Students will be introduced to theories and research that address gender and leadership while focusing on historical and contemporary examples of women practicing leadership in New Orleans. The course will begin with a brief introduction to a sociological perspective on gender and intersectionality - foundational concepts of the course - and move into discussions of how and why women lead, as well as barriers they encounter to leadership. Guest speakers, field trips, and writing assignments will ask students to think broadly, but also analytically, about what leadership means, as well as about how identities and institutions shape the experience of leadership.

COLQ 1010 Freshmen Colloquium Seminar (1-3)
First-year Seminar Colloquium course.

COLQ 1020 Freshman Colloquium (1-3)
First-year seminar course; topics vary by instructor.

Data Hub (DATA)

DATA 1010 Introduction to Data (3)
DATA 1010 aims to provide students with an overview to what data is, how it is used correctly and incorrectly, how it is found, stored, and managed, and how it can be used as a basis for decision making and analysis. The overall goal of this course is to increase data literacy, such that students are more confidently able to work with the increasing amounts of data in their lives, jobs, and academic careers. This course is aimed towards students in all schools and fields and has no prerequisites.

DATA 1940 Transfer Course Work (0-4)
Transfer Coursework

Maximum Hours: 99

DATA 2020 Data Analysis (3)
This course provides an overview of the statistical tools most commonly used to analyze quantitative data. Topics include describing data, statistical inference, statistical significance, hypothesis testing, and regression analyses. The course focuses on understanding how to use appropriate analytical techniques and interpret the results of statistical analyses for variables with different levels of measurement. For each topic area, the methodology, including the underlying theory, assumptions, and mechanics of how each analytical tool works, is discussed, along with the appropriate interpretation of results. Concepts are presented in the context of real-world examples using publicly available data sets. The course will also introduce students to statistical software. Students of all skill levels are welcome, including those with limited or no statistical, mathematical, or programming backgrounds. All data analysis skills will be taught in class.

DATA 2030 Data Visualization (3)
Students will examine different creative and analytical theories and techniques for understanding and developing data visualizations, including maps, graphs, charts, and interactive tools such as dashboards. Students will access and clean data for visualizing potential, analyze data visualizations for bias and persuasive intent, and create data visualizations to communicate findings and tell engaging stories for diverse audiences. Students will also consider the societal role that data visualizations play in validating knowledge while exploring ethical concerns and critiques around communicating arguments visually. As practice, students will storyboard, create, peer review, and justify design choices when using a variety of open-source data visualizations. Students of all skill levels are welcome, and all data visualization skills will be taught in class.

DATA 2040 Text and Qualitative Data Analysis (3)
This course provides an overview of the tools most commonly used to analyze data from textual or qualitative sources such as written or digital text, interviews, focus groups, and opened-ended survey questions. Both manual (i.e., by hand) and software analytic approaches will be explored. For each type of analysis, the underlying theory, assumptions, and mechanics of how each analytical tool works, are discussed, along with appropriate interpretation of results. The course is designed for students from any major with real-world examples drawn from the humanities, social and behavioral sciences, business, and government. Students of all skill levels are welcome, including those with limited or no statistical, mathematical, or programming backgrounds. All analysis skills will be taught in class.

DATA 2150 Applied Generative Artificial Intelligence (3)
The introduction of widely available and accessible generative Artificial Intelligence tools, such as ChatGPT, democratizes expertise, unlocks knowledge, and bestows impressive abilities. This hands-on course provides students with practical experience employing generative AI to perform real-world tasks. By the end of the course, students will be able to effectively collect accurate historical and real-time information, generate high-quality text and media, transform content between formats, analyze data to derive insights and deploy generative AI to tackle private and professional challenges.

DATA 2810 Special Topics (3)
Special Topics in Data Literacy. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

DATA 2940 Transfer Coursework (0-20)
Transfer Coursework

Maximum Hours: 99

DATA 3010 Introduction to Data Collection and Wrangling (3)
This course provides an intensive introduction to data collection, wrangling, and summarization using the R programming language. Students will learn the fundamental skills required to collect, re-shape, transform, manipulate, analytically explore, summarize, and visualize data. Students will learn how data must be organized and formatted in order to perform effective data analysis or be inputted into a machine learning algorithm. Further, students will learn how to produce data-driven dynamic web applications. The time students allocate to learn these data-related skills will allow them to create data sets that promote more efficient, reproducible, and understandable data science products. The course is designed for students from any major with real-world examples drawn from a variety of domains. Students of all skill levels are welcome, including those with limited or no statistical, mathematical, or programming backgrounds. All necessary skills will be taught in class.

DATA 3030 Data Science Research and Communication (3)
This course will examine how knowledge production processes relate to designing and communicating data and science research across various digital mediums. Students will develop their expertise in epistemology theories and practices relating to data research. This course will also cover ethical considerations when developing and promoting research using data. They will also examine how political and social issues such as race, gender, sexuality, and disability often affect how data stories are told and interpreted and the treatment of researchers online. This interdisciplinary course will engage a variety of fields, including data science, technology studies, and digital scholarship. Students will learn to use digital tools to convey science communication products. All technical skills will be taught in the course.

DATA 3530 GIS and Mapping Global Issues (3)
Geographic information systems (GIS) involve creating, storing, retrieving, analyzing, and visualizing spatial data. This course examines the global impact on social, political, economic, and environmental dynamics when using geographic information systems (GIS), global positioning systems (GPS), and other geospatial technologies in daily life. Readings and discussions will focus on global affairs, such as critical cartography, GIS integration with social theories, implications for crime, urban planning, scientific research, health, environmental justice, feminist perspectives, and the intersection of economic development with environmental shifts. This course will also introduce students to foundational concepts and skills in working with spatial data, including finding and creating data, spatial analysis, and GIS-based map production. Specific global affairs topics will be analyzed using ESRIs ArcGIS. Students will gather GIS data, analyze global affairs topics using GIS, and produce their own data projects.

DATA 3810 Special Topics (3)
Special Topics in Data Literacy. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

DATA 3940 Transfer Course Work (0-4)
Transfer Coursework

Maximum Hours: 99

DATA 4030 Data Ethics, Privacy, and Governance (3)
This seminar uses social frameworks to examine historical and contemporary questions around ethics, privacy, and governance. Students will be introduced to concepts relating to critical data studies, such as algorithm bias, machine learning, data colonialism, and critical code studies. Students will examine data in the context of medicine, privacy, capitalism, violence, moral responsibility, biometrics, governance, and labor practices. Readings and seminar discussions will involve identifying data problems and discussing solutions for creating responsible and beneficial data practices for their society. Students will storyboard, write, revise, and present a data ethics paper where they apply ethical reasoning to data issues. All technical skills will be taught in this course.

DATA 4040 Network Data Science (3)
This course provides an overview of the tools most commonly used to collect, analyze, and visualize network data. For each type of analysis, the underlying theory, assumptions, and mechanics of how each analytical tool works, are discussed, along with appropriate interpretation and visualization of the results. The course is designed for students from any major with real-world examples drawn from the social and behavioral sciences, economics and finance, biology, history, anthropology, social media, public health, and government. Students of all skill levels are welcome, including those with limited or no statistical, mathematical, or programming backgrounds. All analysis skills will be taught in class. However, it is highly recommended, but not required, that students complete DATA 2020 or an equivalent course in statistics and/or data analysis, preferably one that utilized the statistical computing programs R and RStudio, prior to enrollment.

English for Academic and Professional Purposes (EAPP)

EAPP 1000 Composition and Reading (3)
This course prepares students to subsequently master their college writing requirements. In addition to developing an advanced understanding of English syntax, morphology, and semantics, students explore the process of composing, revising, and editing in English and the expectations of academic writing to different audience expectations in Global Perspectives.

EAPP 1050 Multicultural Speech (3)
This course prepares students to master public speaking and interpersonal dynamics with a focus on Race and Inclusion in the USA. In addition to developing an advanced understanding of English phonology, semantics, and pragmatics, students focus on the communication strategies hat make presentations and interpersonal interactions memorable and smooth.

EAPP 1940 Transfer Coursework (0-20)
Transfer Coursework at the 1000 level.

Maximum Hours: 99

EAPP 3010 Academic and Professional Rhetoric (1)
In this six-week course, students will develop an advanced understanding of English syntax, semantics and mechanics. They will engage with both spoken and written academic documents that engage expert knowledge in a scholarly manner. Additionally, students will understand the rhetoric necessary for intellectual inquiry and independent research in both academic and professional environments, and they will incorporate these skills into their current university courses. The course includes an optional service-learning component. The service learning will enhance students understanding and development of citizenship skills within the context of their local, national, and global communities.

Prerequisite(s): EAPP 1000*, 1050* or ENGL 1011*.
* May be taken concurrently.

EAPP 3510 Teaching and Working Abroad (3)
This course is designed to develop students with little teaching and working experience with the academic and practical skills needed to teach and work abroad, especially English in a foreign language environment. Students are encouraged but not required to also enroll in EAPP 3520: Living and Working Abroad in order to complete the two-course series.

EAPP 3520 Living and Working Abroad (3)
This 3-credit course is designed to give students a practical working knowledge of the linguistics of English and intercultural skills needed to live and work abroad, especially when teaching English as a foreign language. Students are encouraged but not required to also enroll in EAPP 3510: Teaching and Working Abroad in order to complete the two-course series.

EAPP 3530 Global English in Business (3)
'Global English in Business' focusses on enhancing communicative and cultural competency skills as they apply to the use of World Englishes in business contexts. It is designed to explore one of the World Englishes' variations used in Business as a profession and social practice. The course seeks to analyze the interdiscursive texts of professionals in the business world to understand how language builds new relationships that are unique within their own spaces. Precisely, we examine varied samples of global business literature and theories written in World Englishes to critically evaluate how English as a professional communicative language vary in different business cultures around the world. Lastly, learners in this course are tasked with interrogating the role of World Englishes and how it generally applies to multiple business cultures around the globe. Language skills addressed in this course include business communicative competency, writing and speaking fluency in World Englishes, and business vocabulary development skills. This course is open to students who are interested in studying, working or interning in a business-related environment abroad. The course has a service-learning component that fulfills both tier I and II Tulane service-learning requirement. The course is open to all undergraduate students.

Interdisciplinary Newcomb-Tulane College Courses (INTU)

INTU 1000 Hist &Phil of Higher Education (3)
This course examines the social and political history of higher education with special emphasis on the transformation of women and the college landscape from the early 20th century to present day. Using historical and literary frameworks to generate and address and answer questions about college women today, this course will provide Newcomb Scholars with the opportunity to examine the social and political culture of various decades and its influence on college culture, women's colleges, women in college, and narratives about college life.

INTU 1010 Special Topics (0-4)

Maximum Hours: 99

INTU 1011 Special Topics (0-4)

Maximum Hours: 99

INTU 1890 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Corequisite(s): INTU 1000.

Maximum Hours: 99

INTU 2000 Women Leading Change (4)
The Harvard Business School originated and developed the phenomenon of the teaching case to simulate business experience in novices, to create a concrete vehicle for applying abstract theories to real world situations, and to engender engaged classroom discussion while fostering critical thinking skills as students were forced to wrestle with actual business dilemmas that had no easy answer. Cases marry learning about real world policy and organizational problems with critical thinking, abstract reasoning, and theorizing valued in all academic disciplines. The objective of this course is to engage students in drawing leadership lessons from the real-world dilemmas of women leading organizations to bring about social change. The course will also teach how to write and evaluate the usefulness of cases; each student will write a case linked to her field of study which engages the concepts of gender and leadership. The course teaches critical thinking and problem solving through immersion in the stories of women leaders. The course outcomes are an enhanced appreciation of the dilemmas that are encountered by women leading change; the ability to evaluate and compose case studies at the intersection of leadership and gender; and the demonstration of strategic thinking and problem-solving skill.

Prerequisite(s): INTU 1000.

INTU 2020 Wellness & Resilience for College & Beyond (1)
College is an exciting and stressful time for everyone. The increased freedom and independence are both exciting and daunting, leading many students to struggle in new ways or with emotions that seem to have increased in intensity. Conversely, research has shown that individuals who develop and use resilience strategies and emotion regulation skills (such as opposite action, relaxation strategies, mindfulness, and practicing gratitude) as well as build positive routines (for example, good eating and sleep habits, daily exercising, scheduling fun activities) are more likely to be effective in their job roles, involved in strong relationships, physically and mentally healthy, and satisfied with their lives overall.

INTU 2500 Digital Scholarship (1)
This course examines practices for designing research communications across a variety of digital mediums. It also examines how gender, often intersecting with race, class, and sexuality, affects the interpretation of research in digital forums and the treatment of researchers online. This interdisciplinary course will engage in a variety of fields including data visualization, digital media practices, technology studies, gender studies, and digital scholarship. Seminar discussions will include examining creative methods for developing digital research projects, ethical considerations when promoting research through digital mediums, and critically analyzing computational methods in research that supports social justice and gender/racial equity. As praxis, students will design, storyboard, create, peer review, revise and present digital research products that include visual, audio, and narrative components. All technical skill-levels are welcome.

Prerequisite(s): INTU 1000.

INTU 3000 Feminist Epistemologies and Research Design (3)
In this course, students will read and discuss key texts that outline philosophies and methods of feminist knowledge production. Students will engage with foundational feminist epistemologies, such as standpoint theory, situated knowledges, and intersectionality, to understand the complex relationships between gender, race, class, and other categories that shape the distribution of power both within and outside the academy. They will explore research methods across fields while examining important debates about a researcher's role and responsibilities to her/his/their subjects and the public. Research ethics regarding data collection, interpretation, and dissemination will be discussed through the lens of feminist and antiracist commitments. Applying these interdisciplinary theories of knowledge production, students will develop a research proposal. During weekly writing workshops, students will draft, peer-review, and revise portions of a research proposal that address the question, methods, literature review, and significance of that project.

Prerequisite(s): INTU 2000.
Course Limit: 1

INTU 3010 Global Culture Awareness (1)
Course Limit: 99

INTU 3020 Cross Cultural Engagement (1)
Prerequisite(s): INTU 3010.
Course Limit: 99

INTU 3030 Post Study Abroad Re-Entry (1)
Prerequisite(s): INTU 3020.
Course Limit: 99

INTU 3040 Community Engaged Conservation Research Design (3)
This 3 credit course builds student capacity to conceptualize, design and articulate community engaged research projects. Along with research design, the course trains students to think and communicate across disciplines via readings, assignments and workshops. Over the course of the semester, students will develop research questions and methodological approaches to produce an ethical, independent research proposal to investigate a problem or question related to rainforest conservation. In addition, students will learn to provide feedback and constructive criticism to the work of their peers and engage with critical perspectives on issues that arise in community engaged conservation. The expectation is that students will go on to implement the research projects that they develop in the context of this course. This course fulfills the Newcomb-Tulane College intensive writing requirement and provides an optional service-learning component.

Prerequisite(s): EBIO 3780.

INTU 3050 Grant-Funded Research (1)
This course is designed for students participating in a faculty-mentored research project who have received a grant through NTC and/or other campus entities. The goal of this course is to offer opportunities for students to present the outcomes of their research in a structured forum at the Tulane Idea and Research Symposium.

Course Limit: 3

INTU 3060 Grant-funded Internship Course (1)
This course is designed for students participating in a summer internship who have received a grant through NTC and other campus entities. The goal of this course is to offer students opportunities to present the outcomes of their internship in a structured forum at the Tulane Idea and Research Symposium.

Course Limit: 3

INTU 3890 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Corequisite(s): INTU 3030.

Maximum Hours: 99

INTU 3891 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

INTU 3910 Special Topics (0-4)

Maximum Hours: 99

INTU 3920 Special Topics (0-3)

Maximum Hours: 99

INTU 4000 Newcomb Research Seminar (1)
This course is designed to provide support and resources from the professor for students in the Newcomb Scholars Program to complete their independent research project. In this course, Newcomb Scholars will incorporate what they have researched and written in the previous seminars, finalize their research question, determine the appropriate research methods, and begin to answer that question in a comprehensive and systematic way that would be recognized by the relevant scholarly community as constituting original and important research. Each Scholar is expected to understand the work that has previously been done in her field and find a place for her research in that body of knowledge. Students will use their skills of analysis, criticism, and synthesis to address or respond to any relevant issues in their fields of study. Each student will present their research project at a campus conference in the Spring semester.

Prerequisite(s): INTU 3000.

INTU 4310 LSAT Review (1)

INTU 4340 MCAT Review (1)

INTU 4560 Study Abroad Internship (1-4)
Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

INTU 5380 Junior Year Abroad (1-6)
Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

INTU 6850 Reproductive Rights, Law, and Policy (1)
This course will focus on the Louisiana Legislative Session as a means of understanding the legislative process, civic engagement with that process, and policy and legal concerns that proposed legislation can raise – all within the context of understanding the legal framework surrounding abortion access and reproductive rights. The course will include legal and policy analysis of the most significant U.S. Supreme Court cases involving abortion rights, as well as an overview of the statutory and regulatory landscape applicable to abortion in Louisiana. With that backdrop, the course will then take a hands-on approach to the Louisiana Legislative Session, focusing on proposed bills that will impact reproductive justice. Guest speakers will help students to understand the policy implications – both intended and unintended – related to the proposed bills, as well as other legislation proposed or passed during recent legislative sessions.

INTU 7000 Year of Service Fall (0-12)

Maximum Hours: 99

INTU 7010 Year of Service Spring (0-12)

ROTC Courses (Air Force- AERO, Military Science- MILS, Navy Science- NAVS)

AERO 1010 Heritage and Values of the USAF I (1)
"Heritage and Values," is a survey course designed to introduce students to the United States Air and Space Forces and provides an overview of the basic characteristics, missions, and organization of the Air and Space Forces. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with Leadership experiences.

AERO 1011 Heritage and Values of the USAF I LAB (0)
This lab is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Department of the Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and Operations Flight Commander.

AERO 1020 Heritage and Values of the USAF II (1)
This is a survey course designed to introduce students to the United States Air and Space Forces and provides an overview of the basic characteristics, missions, and organization of the Air and Space Forces. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with Leadership experiences.

Corequisite(s): AERO 1021.

AERO 1021 Heritage and Values of the USAF II LAB (0)
This lab is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Department of the Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and Operations Flight Commander.

Corequisite(s): AERO 1020.

AERO 1210 Evol Usaf Air&Space Pow (1)

AERO 1220 Air Power History II (1)

AERO 1290 Semester Abroad (1-20)
Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

AERO 1940 Transfer Coursework (0-20)
Transfer Coursework at the 1000 level. Departmental approval may be required.

Maximum Hours: 99

AERO 2010 Team and Leadership Fundamentals I (1)
"Team and Leadership Fundamentals" provides a fundamental understanding of both leadership and team building. The lessons and course flow are designed to prepare students for field training and leadership positions in the detachment. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with Leadership experiences.

AERO 2011 Team and Leadership Fundamentals I LAB (0)
This lab is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Department of the Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and Operations Flight Commander.

AERO 2020 Team and Leadership Fundamentals II (1)
This course provides a fundamental understanding of both leadership and team building. The lessons and course flow are designed to prepare students for field training and leadership positions in the detachment. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with Leadership experiences.

Corequisite(s): AERO 2021.

AERO 2021 Team and Leadership Fundamentals II LAB (0)
This lab is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Department of the Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and Operations Flight Commander.

Corequisite(s): AERO 2020.

AERO 2390 Semester Abroad (1-20)
Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

AERO 2940 Transfer Coursework (0-20)
Transfer Coursework at the 2000 level. Department approval may be required.

Maximum Hours: 99

AERO 3010 Leading People and Effective Communication I (3)
This course utilizes student's field training experience to take a more in-depth look at leadership. Special emphasis is placed on enhancing communication skills, and why that is important as a leader. Students have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with Leadership experiences.

AERO 3011 Leading People and Effective Communication I LAB (0)
This lab is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Department of the Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and Operations Flight Commander.

AERO 3020 Leading People and Effective Communication II (3)

Corequisite(s): AERO 4021.

AERO 4021 National Security/Commissioning Preparation II LAB (0)
This lab is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Department of the Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and Operations Flight Commander.

Corequisite(s): AERO 4020.

AERO 5190 Semester Abroad (1-20)
Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

AERO 5380 Junior Year Abroad (1-20)
Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

AERO 5390 Junior Year Abroad (1-20)
Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

AERO 5940 Transfer Coursework (0-20)
Transfer coursework at the 5000 level. Departmental approval required.

Maximum Hours: 99

MILS 1010 Intro Army & Critical Thinking (1)
MILS 1010 introduces you to the personal challenges and competencies that are critical for effective leadership and communication. You will learn how the personal development of life skills such as cultural understanding, goal setting, time management, mental/physical resiliency, and stress management relate to leadership, Officership, and the Army profession. As you become further acquainted with MILS 1010, you will learn the structure of the ROTC Basic Course program consisting of MILS 1010, 1020, 2010, 2020, Fall and Spring Leadership Labs, and Base Camp. The focus is on developing basic knowledge and comprehension of Army leadership dimensions, attributes and core leader competencies while gaining an understanding of the ROTC program, its purpose in the Army, and its advantages for the student.

Corequisite(s): MILS 1011.

MILS 1011 Intro Army & Critical Thinking (0)
Corequisite(s): MILS 1010.

MILS 1020 Intro Profession of Arms (2)
MILS 1020 overviews leadership fundamentals such as setting direction, problem-solving, listening, presenting briefs, providing feedback, and using effective writing skills. You will explore dimensions of leadership attributes and core leader competencies in the context of practical, hands-on, and interactive exercises. As you become further acquainted with MILS 1020, you will learn the structure of the ROTC Basic Course program consisting of MILS 1010, 1020, 2010, 2020, Fall and Spring Leadership Labs, and Basic Camp. The key objective this semester is to explore (in more detail) the Army's leadership philosophy and learn fundamental military concepts. Emphasis on Army leadership will provide the learner a better understanding of the ROTC program, its purpose in the Army, and its advantages for the student.

Corequisite(s): MILS 1021.

MILS 1021 Intro Profession of Arms (0)
Lab. Corequisite(s): MILS 1020.

Corequisite(s): MILS 1020.

MILS 1940 Transfer Coursework (0-20)
Transfer Coursework at the 1000 level. Department approval may be required.

Maximum Hours: 99

MILS 2010 Leadership & Decision Making (2)
MILS 2010 explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the Army leadership framework. Aspects of personal motivation and team building are practiced planning, executing and assessing team exercises. While participation in the leadership labs is not mandatory during the MILS II year, significant experience can be gained in a multitude of areas and participation in the labs is highly encouraged. The focus continues to build on developing knowledge of the leadership attributes and core leader competencies through the understanding of Army rank, structure, and duties as well as broadening knowledge of land navigation and squad tactics. Case studies will provide a tangible context for learning the Soldier's Creed and Warrior Ethos.

Corequisite(s): MILS 2011.

MILS 2011 Leadership & Decision Making (0)
Corequisite(s): MILS 2010.

MILS 2020 Army Doctrine & Team Deve (2)
MILS 2020 examines the challenges of leading teams in the complex operational environment. The course highlights dimensions of terrain analysis, patrolling, and operation orders. Further study of the theoretical basis of the Army Leadership Requirements Model explores the dynamics of adaptive leadership in the context of military operations. MILS 2020 prepares Cadets for MILS 3010. Cadets develop greater self-awareness as they assess their own leadership styles and practice communication and team building skills. Case studies give insight into the importance and practice of teamwork and tactics in real-world scenarios.

Corequisite(s): MILS 2021.

MILS 2021 Army Doctrine & Team Deve (0)
Corequisite(s): MILS 2020.

Corequisite(s): MILS 2020.

MILS 2530 Military History (3)

MILS 2940 Transfer Coursework (0-20)
Transfer Coursework at the 2000 level. Department approval may be required.

Maximum Hours: 99

MILS 3010 Tring Mgmt & Warfighting Func (3)
This course is designed to provide opportunities, apply learned skills, and evaluate progress in preparation for successful completion of LDAC. This course is physically and intellectually demanding. Ultimately, each MILS III Cadet is trained in skills such as map reading, land navigation, combat water survival training, basic rifle marksmanship, troop leading procedures, operations order process, briefing skills, problem solving and small-unit tactics/techniques. Active leadership and leadership application techniques is stressed and evaluated during the course.

Prerequisite(s): MILS 1010, 1020, 2010 and 2020.
Corequisite(s): MILS 3011.

MILS 3011 Tring Mgmt & Warfig Func Lab (0)
Corequisite(s): MILS 3010.

MILS 3020 Applied Leadership-Small Unit Ops (2)
This is an academically challenging course where you will study, practice, and apply the fundamentals of Army Leadership, Officership, Army Values and ethics, personal development, and small unit tactics at the team and squad level. At the conclusion of this course, you will be capable of planning, coordinating, navigating, motivating and leading a team or squad in the execution of a tactical mission during a classroom PE, a Leadership Lab, or during a Situational Training Exercise (STX) in a field environment. Successful completion of this course will help prepare you for success at the ROTC Advanced Camp in which you will attend next summer at Ft. Knox, KY. This course includes reading assignments, homework assignments, small group assignments, briefings, case studies, and practical exercises, a mid-term exam, and a final exam. You will receive systematic and specific feedback on your leader attributes values and core leader competencies from your instructor and other ROTC cadre and MILS IV Cadets who will evaluate you using the ROTC Leader Development Program (LDP) model.

Corequisite(s): MILS 3021.

MILS 3021 Appld Ldership-Sm Unit Ops Lab (0)
Corequisite(s): MILS 3020.

Corequisite(s): MILS 3020.

MILS 4010 The Army Officer (3)
MILS 4010 transitions the focus of student learning from being trained, mentored and evaluated as an MILS III Cadet to learning how to train, mentor and evaluate underclass Cadets. MILS IV Cadets learn the duties and responsibilities of an Army staff officer and apply the Military Decision Making Process, Army Writing Style, and the Army's Training Management and METL Development processes during weekly Training Meetings to plan, execute and assess battalion training events. Cadets learn to safely conduct training by understanding and employing the Composite Risk Management Process. Cadets learn how to use the Comprehensive Soldier Fitness (CSF) program to reduce and manage stress.

Prerequisite(s): MILS 3010.
Corequisite(s): MILS 4011.

MILS 4011 The Army Officer Lab (0)
Corequisite(s): MILS 4010.

MILS 4020 Company Grade Leadership (2)
MILS 4020 explores the dynamics of leading in the complex situations of current military operations in the full spectrum operations (FSO). You will examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. You also explore aspects of interacting with non-government organizations, civilians on the battlefield, and host nation support. The course places significant emphasis on preparing you for BOLC B, and your first unit of assignment. It uses case studies, scenarios, and What Now, Lieutenant? exercises to prepare you to face the complex ethical and practical demands of leading as a commissioned officer in the United States Army. This semester, you will explore Military Professional Ethics and ethical decision making facing an Officer, gain practical experience in Cadet battalion leadership roles, demonstrate personal skills in operations and communications, evaluate and develop MILS III small unit leaders, and examine issues of force protection in Full Spectrum Operations & prepare for the transition to a career as an Army Officer.

Prerequisite(s): MILS 4010.
Corequisite(s): MILS 4021.

MILS 4021 Company Grade Leadership Lab (0)
Corequisite(s): MILS 4020.

Corequisite(s): MILS 4020.

MILS 4910 Independent Study (1-3)

MILS 4920 Independent Study (1-3)

MILS 5190 Semester Abroad (1-20)
Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

MILS 5940 Transfer Coursework (0-20)
Transfer coursework at the 5000 level. Departmental approval required.

Maximum Hours: 99

NAVS 1010 Intro To Naval Science (3)
Freshman/Fall. A general introduction to the naval profession and to concepts of sea power. The mission, organization, and warfare components of the U.S. Navy and Marine Corps. Overview of officer and enlisted ranks and rates, training and education, and career patterns. Naval courtesy and customs, military justice, leadership, and nomenclature. Professional competencies required to become a naval officer.

Corequisite(s): NAVS 1011.

NAVS 1011 Naval Science Lab (0)
The laboratory time is used to conduct close-order drill and professional education/training. Topics cover general Navy/Marine Corps mission and policies, force protection, operational security, watch standing, physical fitness, nutrition, stress management, and other professional development subjects not normally included in the curriculum of the Naval Science courses. Laboratory periods may also be used on an occasional basis to supplement the Naval Science courses and provide additional time for projects, such as navigation chart work. The Naval Science Laboratory

Course Limit: 99

NAVS 1020 Sea Power & Maritime Affairs (3)
This course is a study of the U.S. Navy and the influence of sea power on history that incorporates both a historical and political science process to explore the major events, attitudes, personalities, and circumstances that have imbued the U.S. Navy with its proud history and rich tradition. It deals with issues of national imperatives in peacetime, as well as war, varying maritime philosophies that were interpreted into Naval strategies/doctrines, budgetary concerns which shaped force realities, and the pursuit of American diplomatic objectives. It concludes with a discussion of the Navy's strategic and structural changes at the end of the Cold War and its new focus, mission, and strategy in the post-September 11, 2001 world.

NAVS 1021 Sea Power & Maritime Affrs Lab (0)
The laboratory time is used to conduct close-order drill and professional education/training. Topics cover general Navy/Marine Corps mission and policies, force protection, operational security, watch standing, physical fitness, nutrition, stress management, and other professional development subjects not normally included in the curriculum of the Naval Science courses. Laboratory periods may also be used on an occasional basis to supplement the Naval Science courses and provide additional time for projects, such as navigation chart work. The Naval Science Laboratory curriculum guide lists the topics for the laboratory periods.

Corequisite(s): NAVS 1020.

NAVS 1060 Leadership Lab (0)
The laboratory time is used to conduct close-order drill and professional education/training. Topics cover general Navy/Marine Corps mission and policies, force protection, operational security, watch standing, physical fitness, nutrition, stress management, and other professional development subjects not normally included in the curriculum of the Naval Science courses. Laboratory periods may also be used on an occasional basis to supplement the Naval Science courses and provide additional time for projects, such as navigation chart work. The Naval Science Laboratory curriculum guide lists the topics for the laboratory periods.

NAVS 1290 Semester Abroad (1-20)
Freshman study abroad credit. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

NAVS 1940 Transfer Coursework (0-20)
Transfer Coursework at the 1000 level. Department approval may be required.

Maximum Hours: 99

NAVS 2000 Leadership & Management I (3)
The course introduces the student to many of the fundamental concepts of leading Sailors and Marines, which shall be expanded upon during the continuum of leadership development throughout NROTC. It develops the elements of leadership vital to the effectiveness of Navy/Marine Corps officers by reviewing the theories and parameters of leadership and management within and outside of the Naval Service and progressing through values development, interpersonal skills, management skills, and application theory. Practical applications are explored through the use of experiential exercises, readings, case studies, and laboratory discussions. Course may be repeated up to unlimited credit hours.

Corequisite(s): NAVS 1011.

Maximum Hours: 99

NAVS 2001 Leadership & Management I Lab (0)
The laboratory time is used to conduct close-order drill and professional education/training. Topics cover general Navy/Marine Corps mission and policies, force protection, operational security, watch standing, physical fitness, nutrition, stress management, and other professional development subjects not normally included in the curriculum of the Naval Science courses. Laboratory periods may also be used on an occasional basis to supplement the Naval Science courses and provide additional time for projects, such as navigation chart work. The Naval Science Laboratory curriculum guide lists the topics for the laboratory periods.

NAVS 2010 Naval Ship Systems I (3)
In this course, students learn detailed ship design, hydrodynamic forces, stability, propulsion, electrical theory and distribution, hydraulic theory and ship control, and damage control. The course includes basic concepts of theory/design of steam, gas turbine, diesel, and nuclear propulsion. Case studies on leadership/ethical issues in the engineering arena are also covered.

Corequisite(s): NAVS 1011.

NAVS 2011 Naval Ship Systems I Lab (0)
The laboratory time is used to conduct close-order drill and professional education/training. Topics cover general Navy/Marine Corps mission and policies, force protection, operational security, watch standing, physical fitness, nutrition, stress management, and other professional development subjects not normally included in the curriculum of the Naval Science courses. Laboratory periods may also be used on an occasional basis to supplement the Naval Science courses and provide additional time for projects, such as navigation chart work. The Naval Science Laboratory curriculum guide lists the topics for the laboratory periods.

NAVS 2390 Semester Abroad (1-20)
Sophomore study abroad credit. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

NAVS 2940 Transfer Coursework (0)

Maximum Hours: 99

NAVS 3010 Navigation I (3)
This course is an in-depth study of the theory, principles, procedures, and application of plotting, piloting, and electronic navigation, as well as an introduction to maneuvering boards. Students learn piloting techniques, the use of charts, the use of visual and electronic aids, and the theory of operation of both magnetic and gyrocompasses. Students develop practical skills in plotting and electronic navigation. Other topics include tides, currents, effects of wind/weather, voyage planning, and an application and introduction to the international/inland rules of navigation. The course is supplemented with a review/analysis of case studies involving moral/ethical/leadership issues pertaining to the concepts listed above.

NAVS 3011 Navigation I Lab (0)
The laboratory time is used to conduct close-order drill and professional education/training. Topics cover general Navy/Marine Corps mission and policies, force protection, operational security, watch standing, physical fitness, nutrition, stress management, and other professional development subjects not normally included in the curriculum of the Naval Science courses. Laboratory periods may also be used on an occasional basis to supplement the Naval Science courses and provide additional time for projects, such as navigation chart work. The Naval Science Laboratory curriculum guide lists the topics for the laboratory periods.

Corequisite(s): NAVS 3010.

NAVS 3020 Naval Ops Analysis (3)
This course is a continued study of relative motion, formation tactics, and ship employment. It includes introductions to Naval operations and operations analysis, ship behavior and characteristics in maneuvering, applied aspects of ship handling, afloat communications, Naval command and control, Naval warfare areas, and joint warfare. The course is supplemented with a review/analysis of case studies involving moral/ethical/leadership issues pertaining to the concepts listed above.

Corequisite(s): NAVS 1011.

NAVS 3021 Naval Ops Analysis Lab (0)
The laboratory time is used to conduct close-order drill and professional education/training. Topics cover general Navy/Marine Corps mission and policies, force protection, operational security, watch standing, physical fitness, nutrition, stress management, and other professional development subjects not normally included in the curriculum of the Naval Science courses. Laboratory periods may also be used on an occasional basis to supplement the Naval Science courses and provide additional time for projects, such as navigation chart work. The Naval Science Laboratory curriculum guide lists the topics for the laboratory periods.

NAVS 3030 Evolution of Warfare (3)
In this course, students trace the development of warfare to the present day. It is designed to cover the causes of continuity and change in the means and methods of warfare. It addresses the influence of political, economic, and societal factors on the conduct of war, with significant attention focused on the role of technological innovation in changing the battlefield. Students will explore the contribution of preeminent military theorists and battlefield commanders to our modern understanding of the art and science of war.

Corequisite(s): NAVS 1011.

NAVS 3031 Evolution of Warfare Lab (0)
The laboratory time is used to conduct close-order drill and professional education/training. Topics cover general Navy/Marine Corps mission and policies, force protection, operational security, watch standing, physical fitness, nutrition, stress management, and other professional development subjects not normally included in the curriculum of the Naval Science courses. Laboratory periods may also be used on an occasional basis to supplement the Naval Science courses and provide additional time for projects, such as navigation chart work. The Naval Science Laboratory curriculum guide lists the topics for the laboratory periods.

NAVS 3050 Fund of Maneuver Warfare (3)
Corequisite(s): NAVS 3051.

NAVS 3051 Fund of Maneuver Warfare (0)
Corequisite(s): NAVS 3050.

NAVS 3940 Transfer Coursework (0-20)
Transfer Coursework at the 3000 level. Department approval may be required.

Maximum Hours: 99

NAVS 4010 Naval Ship Systems II (3)
Junior/Spring. Theory and employment of weapons systems, including the processes of detection, evaluation, threat analysis, weapon selection, delivery, guidance, and explosives. Fire control systems and major weapons types, including capabilities and limitations. Physical aspects of radar and underwater sound. Facets of command, control, and communications as means of weapons system integration.

NAVS 4011 Naval Ship Systems II Lab (0)
Corequisite(s): NAVS 4010.

Corequisite(s): NAVS 4010.

NAVS 4020 Leadership and Ethics (3)
Senior/Spring. The interaction of leadership, organizational behavior, and human resource management. Subordinate interviewing and counseling, performance appraisal, military and civilian law, and managerial ethics and values. This capstone course integrates professional competencies to develop understanding of the issues faced by leaders, managers, and naval officers.

NAVS 4021 Leadership & Ethics Lab (0)
Corequisite(s): NAVS 4020.

Corequisite(s): NAVS 4020.

NAVS 4030 Fundamentals Maneuver Warfare (3)
A historical survey of the development of amphibious doctrine and the conduct of amphibious operations. The evolution of amphibious warfare in the 20th century, especially during World War II. Present-day potential and limitations on amphibious operations, including the concept of rapid deployment force.

Corequisite(s): NAVS 4031.

NAVS 4031 Fundamentals Maneuver Warfare (0)
Corequisite(s): NAVS 4030.

Corequisite(s): NAVS 4030.

NAVS 4890 Service Learning (0-1)
Students complete a service activity in the community in conjunction with the content of a three-credit co-requisite course. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

NAVS 4910 Independent Study (3)
Independent study.

NAVS 4940 Transfer Coursework (0-20)
Transfer coursework at the 4000 level. Departmental approval required.

Maximum Hours: 99

NAVS 5190 Semester Abroad (1-20)
Semester abroad. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

NAVS 5380 Junior Year Abroad (1-20)
Junior year abroad. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

NAVS 5390 Junior Year Abroad (1-20)
Junior year abroad. Course may be repeated up to unlimited credit hours.

Maximum Hours: 99

NAVS 5940 Transfer Coursework (0-20)
Transfer coursework at the 5000 level. Departmental approval required.

Maximum Hours: 99

Credit By Exam

Undergraduate students may earn credit by exam, with department approval, through qualifying scores on the following examinations:

- College Board Advanced Placement (AP) (p. 73)
- International Baccalaureate (IB) (p. 74)
- Cambridge International A Level (p. 75)

The Office of University Registrar may award credit upon receipt of official results directly from the testing service.

Advanced Placement Credit(AP)

Exam Name	Tulane Class	Minimum Passing Score
Art History	ARHS 1010 (3 c.h.)	4 or 5
Art Studio: Drawing	ARST 1101 (3 c.h.) Students may consult with Art Department to be considered for ARST 2101 credit.	4 or 5

Altman Program in International Studies & Business

Overview

The Altman Program in International Studies & Business is a special four-year undergraduate program that integrates liberal arts and business disciplines, extensive language instruction, and two study abroad experiences. Altman Scholars earn two degrees - a B.A. from the

School of Liberal Arts and a B.S.M. from the A. B. Freeman School of Business.

The Altman Program provides students with an Altman-specific course each semester, a cohort summer study abroad trip between freshman and sophomore years, and financial support for junior year abroad and internships. The program admits a cohort of up to 20 students who are selected before their matriculation at Tulane as freshmen.

Requirements

The Altman Program combines the curricula of two undergraduate degree programs in the School of Liberal Arts and the A. B. Freeman School of Business. Students may major in finance, management, marketing, or legal studies at the Freeman School and in approved social science, area studies or language disciplines within the School of Liberal Arts. The link between the two majors in the schools is the interdisciplinary "Altman Core", a cohort-specific academic course every semester.

Specific courses open only to students in this program include a TIDES seminar; ISIB 3010 Introduction to Globalization (3 c.h.); ISIB 1910 Study Abroad Pre-Dep (1 c.h.); ISIB 2030 Perspectives on Global Citizenship (3 c.h.); ISIB 6010 Approaches to Global Dilemmas (3 c.h.); and ISIB 6020 Altman Senior Seminar (1 c.h.).

In addition, students study a non-English language (i.e. Spanish, Portuguese, French, German, Italian, or Japanese, Mandarin Chinese) during their first two years in the program, and spend two full semesters abroad in countries where their target language is spoken.

Center for Global Education

Mailing Address

6901 Willow Street
New Orleans, LA 70118
Telephone: (504) 865-5208
Web: https://cge.tulane.edu/

The Center for Global Education (CGE) is the hub for global learning and engagement for undergraduate students. It advances equitable and robust opportunities for students to enhance their global awareness and intercultural learning. CGE provides logistical and academic support for undergraduate international students and support for the hundreds of NTC students who study abroad every year. We prepare students for the life changing experience of study abroad and seek to enhance the integration of academic inquiry and personal reflection with intercultural experiences.

Center for Public Service

Overview

Mailing Address

Alcee Fortier Hall
6823 St. Charles Avenue
New Orleans, LA 70118

Telephone Numbers

Phone: 504-862-8060
Fax: 504-862-8061

Mission, Vision and Core Values

The Center supports a University curriculum and research agenda by uniting academics and action, classroom and communities through which students, faculty, and community partners dedicate themselves to the transformation of civic life.

Vision

To promote community, equality and justice.

Mission

The Center for Public Service is committed to collaborative partnerships and programs that promote empowerment, understanding, civility and justice in our communities.

Core Values

In line with the University's Core Values, we uphold the following as the foundation and guiding principles for community-engagement at Tulane.

- *Diversity:* Treating others with dignity and respect, encouraging expression, and developing understanding of and appreciation for differences and commonalities
- *Openness:* Exchanging ideas and information openly and candidly to improve relationships and achieve mutual goals
- *Integrity:* Acting ethically, responsibly and courageously to hold ourselves accountable to commitments and to doing what is right
- *Excellence:* Performing at our very best and engaging issues as opportunities to learn, grow, and succeed
- *Community:* Developing authentic, trusting relationships and participating in civic life

CPS Equity Statement

The Center for Public Service actively promotes and recognizes principles of inclusion, equity, and social justice in relation to, and across, intersections of race, age, color, disability, faith, religion, ancestry, national origin, citizenship, sex, sexual orientation, social class, economic class, ethnicity, gender identity, gender expression, and all other identities represented on Tulane's campus and in New Orleans. The CPS Staff works towards this goal by challenging ourselves to:

- Incorporate social justice and intercultural frameworks into all our programs
- Develop a sense of self-agency and social responsibility that includes all in the community and the larger global context
- Seek to work with all groups in meeting their needs through equitable processes and distribution of resources
- Raise social consciousness, and work to repair past and current harms on campus communities
- Foster a sense of belonging and full participation of all groups to thrive, realize their capabilities, engage meaningfully in campus and community life, and contribute to the growth of one another

Statement of Support for Undocumented and DACA students

The Center for Public Service supports all students, regardless of citizenship status, including undocumented and DACA status applicants. Citizenship status does not affect eligibility for CPS funding. For more information for resources for undocumented students and students with Deferred Action For Childhood Arrivals (DACA), visit tulane.edu/undocumented (http://tulane.edu/undocumented/).

Requirements

The undergraduate Public Service graduation requirement is grounded in a sustained sequence of learning articulated by the Center's mission. Instituting a cumulative and reflective graduation requirement makes explicit the ideal that education uniting public service and scholarship can be a transformative experience.

To complete the Public Service graduation requirements students must:

- Successfully complete one service learning course (at the 1000 – 3000 level) no later than the fifth semester of full-time enrollment at Tulane.

- Satisfy the second-tier public service graduation requirement after the first-tier service learning course is completed, and once the student has attained sophomore standing. Students must participate in one of the following Center for Public Service approved programs at the 3000 level or above:
  - Service learning course (https://cps.tulane.edu/academics/service-learning-course/)
  - Academic service learning internship (https://cps.tulane.edu/node/3311/)
  - Faculty-sponsored public service research independent study (https://cps.tulane.edu/academics/petitioning-for-credit/)
  - Public service honors thesis project (https://cps.tulane.edu/academics/petitioning-for-credit/)
  - Public service-based international study abroad program (https://cps.tulane.edu/academics/international-program/)

First-Year Seminar Courses

Every student should have the opportunity to thrive during their first year on campus. The First-Year Seminar champions this by equipping first-year students with the resources needed to excel.

First-Year Seminar Courses feature:

- Distinguished faculty to convey the importance of life-long learning.
- A small seminar environment to illustrate expectations for college-level intellectual discourse.
- Dedicated peer mentors to introduce the many opportunities for academic and social engagement.
- Experiential learning to connect course content to community through field trips and class speakers.

The First-Year Seminar strives to supply first-year students with the foundation necessary for development and success from orientation through graduation and beyond. **All students register for a First-Year Seminar during their first semester at Tulane.**

There are two options for First-Year Seminar courses: TIDES and Colloquia (COLQ).

- The Tulane Interdisciplinary Experience Seminar (TIDES) is an opportunity to make meaningful connections with faculty and peers in a small group environment. By definition, TIDES is an interdisciplinary experience, driven by intellectual curiosity, active learning, and experiential education.

- The Honors Colloquium (COLQ) serves as the foundation of the academic honors experience. First-Year Honors Scholars are required to register for an Honors Colloquium.

Please note, TIDES courses are 1 credit, COLQ courses are 1.5 credits.

Whether engaging in class discussion or exploring New Orleans, the classroom environment is unique, promoting interdisciplinary scholarship, relationship building, and the transition to campus. Committed faculty and upperclass peer mentors work to help every student thrive at Tulane, both academically and socially.

Newcomb Institute

Newcomb Scholars Program

The Newcomb Scholars Program selects twenty intellectually curious and motivated undergraduates each year to participate in an academically rigorous interdisciplinary learning experience about feminist leadership. Together, the Scholars create a community of diverse thinkers, leaders, and activists, which challenges and empowers them to be innovative and compassionate feminist leaders in the 21st century.

Courses include:

INTU 1000 Hist &Phil of Higher Education (3 c.h.) with optional service-learning INTU 1890. Fulfills Textual and Historical Perspectives requirement

INTU 2000 Women Leading Change (4 c.h.) / POLC 3003 Women Leading Change (4 c.h.) Fulfills NTC and SLA writing requirement.

INTU 2500 Digital Scholarship (1 c.h.)

INTU 3000 Feminist Epistemologies and Research Design (3 c.h.) Fulfills Race and Inclusion requirement

INTU 4000 Newcomb Research Seminar (1 c.h.)

ROTC

Tulane University recognizes the need for military officers with a quality education in a variety of academic specialties and highly recommends the Reserve Officer Training Corps programs as one method of meeting this need. The university maintains Air Force, Army, and Naval ROTC units. Their programs are open equally to men and women in all schools. Each of the programs provides an opportunity to develop leadership and management abilities, as well as to perform a valuable service to the nation. The programs also offer opportunities

for scholarships for students in their first or second year. Individuals who wish to earn a commission and to serve a brief period of active duty, as well as those who are interested in a career of military service, are encouraged to participate.

A maximum of 15 credits from ROTC courses may be applied to a Tulane degree.

Air Force Reserve Officer Training Corps (AFROTC)

Uptown Square Suite 130
200 Broadway
Phone: 504.865.5390
afrotc@tulane.edu

Air Force Reserve Officer Training Corps (AFROTC) offers three and four year programs through which students can earn a commission as a Second Lieutenant in the United States Air Force upon graduation. AFROTC is a comprehensive academic and hands-on training program. Students have the unique opportunity to enhance their interpersonal communications, teamwork, leadership, and management skills.

The curriculum is divided into two parts: the General Military Course (GMC) for freshman and sophomores, and the Professional Officer Course (POC) for juniors, seniors, and graduate law or nursing students. GMC students attend a 1-hour class and a 2-hour laboratory each week. POC students attend a 3-hour class and a 2-hour laboratory each week. Both GMC and POC students attend physical training sessions at least twice a week. Cadets compete for and must be selected to attend field training (a two-week session) between their sophomore and junior years.

Students may enroll in the GMC without incurring any military obligation. Entry into the POC is competitive and requires a commitment to the Air Force. Additional summer programs are available to cadets on a voluntary basis. These professional development opportunities include parachuting, internships, language immersion, base visits and more. Textbooks and uniforms are issued to cadets without cost. Scholarship cadets qualify for a yearly book allowance and a subsistence allowance per month during the academic year.

The Air Force offers excellent scholarship opportunities in a wide variety of academic majors. For additional information or to check scholarship eligibility, contact AFROTC Detachment 320, Tulane University, at (504) 865-5394, afrotc@tulane.edu, https://afrotc.tulane.edu or visit www.afrotc.com (https://www.afrotc.com/).

Army Reserve Officer Training Corps (AROTC)

Uptown Square, Suite 132
200 Broadway
Phone: 504.865.5594
ywade@tulane.edu

Army Reserve Officer Training Corps (AROTC) is a comprehensive program of studies through which students qualify to be commissioned as an Officer in the United States Army, Army National Guard, or United States Army Reserve. Students learn leadership and management skills applicable to any profession. The Army ROTC program offers courses in Basic and Advance Military Science. The basic courses, offered only during the freshmen and sophomore years teach principles and techniques of leadership and develop each student's understanding of the Army's role in the Armed Forces. The advanced courses, offered during the junior and senior years, educate students on officer training, both theoretical and practical which will qualify them to perform their duties as a commissioned officer in the United States Army. Non-scholarship students participating in the first two years of AROTC do not incur any obligation to the U.S. Army. Army ROTC offers two-, three-, and four-year scholarships. Army scholarships provide 100% tuition assistance, a flat rate for textbooks, and a monthly subsistence allowance (up to 10 months per year). Students may elect to use scholarships for room and board (up to $12,000 annually) in lieu of tuition and fees. Admission to the AROTC Advanced Course is conditional on meeting academic, physical, and age requirements and approval of the Professor of Military Science. Physical training is an integral part of the AROTC program.

To become a commissioned as an officer, a student must complete the regular four-year program (qualified high school students accepted to any four-year college/university with an ROTC program), a three-year program (whereby the Basic Course is compressed into one year), or a two-year program (requires completion of a summer AROTC basic camp giving the student credit for the Basic Course). Advanced placement for AROTC training may be given to veterans and students with previous ROTC experience. In addition to these requirements, a student must complete at least one course each in the areas of written communication, human behavior, military history, computer literacy and math reasoning. Uniforms and military science textbooks are issued without cost to all students. Advanced Course and scholarship students receive a subsistence allowance. They are also paid for the summer advanced leadership camp they must attend prior to completing the Advanced Course. AROTC also accepts graduate and professional students. For further information contact the Army ROTC office at 504-862-3243 or 504-865-5594.

Naval Reserve Officer Training Corps (NROTC)

Located in the NAVY Building (https://admission.tulane.edu/map/?id=1015#!m/187048).
Phone: 504.865.5104

Since 1938, the NROTC program at Tulane University has offered students the opportunity to earn a commission as an officer in the United States Navy or the United States Marine Corps.

NROTC Scholarships Process

NROTC scholarships provide students with full tuition, university fees, uniforms, a textbook stipend, and a subsistence stipend. Tulane students who choose to reside on campus are also provided free room and board through the university. Students on scholarship also participate in paid summer training activities at military installations across the country. Students who have not yet been awarded an NROTC scholarship may participate in the NROTC College Program and compete nationally for 3, 2, or 1-year scholarships or a commission guarantee. The NROTC scholarship selection board begins accepting applications from April 1st through December 31st for the following academic year. Students desiring a commission in the United

States Navy are encouraged to pursue a STEM-related degree, but all majors are accepted.

NROTC Requirements

Members of the NROTC program are expected to maintain a minimum GPA of 2.5, be physically fit, and be of sound character. Students participating in the program are required to enroll in Naval Science classes every semester, participate in weekly leadership development laboratory periods, and physical training. Students desiring to join the Navy are required to take 2 semesters of Calculus and 2 semesters of Physics by the end of their junior year.

There is a minimum five-year active duty obligation upon commissioning.

If you would like to schedule a visit to the unit or have any questions, please call the NROTC recruiting officer at (504) 247-1605, email Navy@tulane.edu (navy@tulane.edu) or visit https://nrotc.tulane.edu/content/schedule-visit-0 (https://nrotc.tulane.edu/content/schedule-visit-0/). Additional information may be found at https://nrotc.tulane.edu/ and https://www.netc.navy.mil/NSTC/NROTC/

GRADUATE DEGREES AND PROFESSIONAL PROGRAMS

Admission to graduate programs at Tulane University is managed by their respective schools. Each program embraces our core values of learning, innovation, and creativity. At Tulane, we are dedicated to recruiting the best and brightest local, national, and international students for each area of study. Each school or degree program has its own requirements and standards for admission, but all graduate students receive the full Tulane experience.

Office of Graduate and Postdoctoral Studies

Overview

The Office of Graduate and Postdoctoral Studies (OGPS) serves as an umbrella office to ensure consistency in graduate education policies and effectiveness. OGPS develops and reviews policies that apply to graduate students and postdoctoral fellows. Professional programs are under the oversight of the professional schools. OGPS also coordinates with the Graduate Council and the Office of Academic Affairs to supervise and provide guidance to graduate education programs and professional programs undergoing major changes. The office provides programming and advising for research-based master's students, PhD students, and postdoctoral fellows to support them during their academic career at Tulane University and as they prepare for careers after their studies.

Typically, graduate students in each school will report to their department or Dean's Office, especially in regard to signing up for classes, applying for graduation, or handing in their theses.

Academic Policies

Code of Student Conduct

The University requires of all of its students' behavior to be compatible with its high standards of scholarship and conduct. By accepting admission to Tulane University, a student accepts its regulations, including the Code of Student Conduct, and acknowledges the right of the University to take action, including suspension or expulsion, for conduct judged unsatisfactory or disruptive. The Vice President for Student Affairs is responsible for formulating appropriate procedures and regulations concerning student behavior as set forth in the Code of Student Conduct (https://conduct.tulane.edu/resources/code-student-conduct/), and for the resolution of conduct cases.

Except as noted below, information regarding tuition and fees, residence halls and meals, financial obligations, financial aid, academic management services, short-term charitable remainder trust, and veteran's benefits is the same as for undergraduate students.

Childbirth and Planned Educational Leave Policies

Graduate students may be eligible for childbirth or planned educational leave. This policy refers to PhD and research-based graduate students who are receiving a stipend from Tulane University. Professional students should direct questions regarding childbirth and family leave options to their school's dean and Student Affairs/Case Management and Victim Support Services. Please see the policies below for further information.

Graduate/Professional Student Childbirth & Family Leave Policy

Tulane University recognizes the importance of balancing the family and educational needs of new parents and those expecting a baby or the adoption of a child. We are committed to supporting all of our

graduate and professional students during their academic careers and to finding ways to accommodate these life events.

This Policy establishes minimum standards for accommodating the demands placed on a pregnant person by pre-term labor (as specified by a healthcare provider), late-stage pregnancy, childbirth, and post-natal recuperation. It also extends to parents who adopt a child up to the age of five years. It is expected that advisors, academic staff, and departmental leaders will work with care, consideration, and creativity to provide more than this minimum, according to the particular circumstances of the student.

For their part, new parents or students "stopping the clock" of their education for childbirth or family leave should keep the lines of communication with their departments open. Once they fully return to their graduate work, the student should be careful to demonstrate to their advisors that they are academically engaged and making progress on coursework and research. It is important for pregnant students to review the details of this entire Policy, as well as the University's Planned Educational Leave Policy, and to discuss their options with their department.

International students should discuss with the staff at the Office of International Students and Scholars the impact of this decision on their visa status and related requirements.

Childbirth Leave

Any student who anticipates giving birth during the academic semester or during the period covered by financial support (e.g., stipends, grants, etc.) are eligible for a Childbirth Leave. A Childbirth Leave maintains active graduate/professional student status throughout the leave period, so that housing, insurance, and other rights and privileges of enrolled students remain ongoing.

A Childbirth Leave covers pre-term labor (as specified by a healthcare provider), late-stage pregnancy, childbirth, and post-natal recuperation. A Leave lasts eight weeks from the qualifying event and extends academic milestones, including candidacy requirements (including qualifying exams, dissertation, thesis, and coursework), by one academic semester. It also assures that, if the person giving birth is receiving financial support, that support will be maintained through the period of the modification(s).

Students who are planning to take this Leave should initiate discussions with Student Affairs/Case Management and Victim Support Services more than four months before the anticipated birth. After doing so, they will then inform their advisor(s) and director of graduate study at least four months prior to the anticipated birth in order to make preparations for identifying and arranging the childbirth modification period. This will provide the time necessary to rearrange teaching duties for those students supported by teaching assistantships or to adjust laboratory or other research schedules.

Family Leave (Paternity, Co-parenting, Fostering and Adoption)

Graduate/professional students at Tulane may take a paid family leave of absence for eight weeks for anticipating or recently experiencing the birth or adoption or fostering of a child or for childcare.

Accommodations Applying to Those Taking Both Childbirth and Family Leaves

Maintaining Full-Time Status

One of the purposes of the Policy is to make it possible for students who take childbirth and/or family leave to maintain their full-time student status so that they continue accumulating credits toward the degree and to avoid triggering any interruptions in their education programs and activities, including on-campus housing, insurance coverage, eligibility for student loan repayment, and deferment of student loan repayment. By remaining full-time students, the visa status of international students is not affected.

While it is usually better for students to remain enrolled full-time, in some cases, depending on the coursework appropriate to the stage of the academic program, part-time enrollment may be more appropriate. This will require careful consultation, in advance, with graduate advisors, the department or program's director of graduate studies, and school graduate admissions officer to ensure that the implications for academic progress, visa status, loan eligibility and deferment, etc., have been thoroughly investigated.

University Stipends and Funding

Student-parents on full-time status who receive stipends from their school or other University funds are entitled to draw support while on leave for eight weeks during the academic year. If the student-parent is a teaching assistant, their department will fund a replacement teacher for the affected period. During the eight-week period, students supported by teaching assistantships may choose to continue in some limited capacity (e.g., grading, preparing course materials, or other non-intensive duties), in order to finish out an academic quarter, but cannot be required to do so. With advance planning, most research assistantship assignments can similarly be adjusted to accommodate childbirth. Students in master's and doctoral programs will need to coordinate the fulfillment of requirements with their advisors, department chairs, or directors of graduate study. If the student anticipates needing more than eight weeks of paid leave, they may find that arranging an unpaid leave of absence for a semester is the best solution; please see Planned Educational Leave Policy for more information on these leaves.

External Funding

Some student-parents receive external grants or fellowships. Most granting agencies provide for a short period of reduced activity due to health or personal issues. Students who are supported by grants or fellowships external to Tulane must adhere to the rules of the granting agency with respect to absences from academic and research work. If the granting agency requires suspension of fellowship benefits during the eight-week period, students will be eligible for substitute payment from their department.

Childbirth and Family Leave Policy FAQs

This policy refers to PhD and research-based graduate students who are receiving a stipend from Tulane University. Professional students should direct questions regarding childbirth and family leave options to your school's dean and Student Affairs/Case Management and Victim Support Services.

Disclaimer: We have attempted to address all issues within the Childbirth and Family Leave Policy and the FAQs. However, we are aware that we cannot cover every situation in these documents. Please stay in contact with Case Management and Victim Support Services

throughout the course of your pregnancy and leave so that we can attempt to accommodate any special circumstances that may arise.

Q: I recently found out that I am pregnant and my due date is during the academic semester. Do I have to drop out or take some kind of leave of absence?
A: No, you do not have to drop out. You may choose to stay enrolled as a full-time student during the semester that you give birth. You are entitled to eight weeks of leave during that semester. If you are enrolled in coursework, arrangements will need to be made individually.

Q: Do I need to become a part-time student?
A: Probably not. One of the main purposes of the Childbirth and Family Leave Policy is to make it possible for a parent to maintain their full-time student status.

Q: I am also working as an RA (or TA) as part of my PhD program. What happens with that funding during my leave?
A: During your leave, you will continue to receive the same pay that you were receiving prior to your leave, regardless of the specific source of that funding. If there are questions about this, your department – probably the director of graduate studies and/or department chair -- will work with the Office of Academic Affairs on the mechanisms of the financial details.

Q. Will my leave impact my progress toward the completion of my degree?
A: It is possible that your leave might impact your progress towards the completion of your courses and/or your degree, and this depends on the specifics of your situation. Academic milestones such as progress to candidacy can be extended by one academic semester. These details need to be discussed with your advisor/PI and Case Management and Victim Support Services (see below).

Q. What happens if I'm due to give birth in the summer?
A: Typically, this policy only guarantees funding during the period of your stipend from Tulane (roughly nine months running from mid-August to mid-May for most graduate students receiving stipends). Summer employment is not guaranteed for most students. However, the eight-week period will begin whenever you give birth, so it is possible that some part of the end of the spring or beginning of the fall would be covered by the Childbirth and Family Leave. For example, if you had a baby on August 1 and your stipend were scheduled to begin August 15, you would be eligible to receive six weeks of leave, as well as six weeks of your stipend.

Q. What happens if my funding comes from a non-Tulane source?
A: For students who are funded from sources outside the university (e.g. Ford, NSF, etc.), that agency's policies apply to you. If there is no policy, then this Tulane policy applies to you.

Q: Who at the university should I talk to first about my pregnancy?
A: Your first stop should be with Student Affairs/Case Management and Victim Support Services, where you can review the details of leave policies, learn about your options, and ask questions. You can also discuss any short-term accommodations you may need during your pregnancy. Case Management and Victim Support Services will then contact your department to provide information and guidance about the period of your leave.

Q: When I meet with someone in Case Management and Victim Support Services, is my confidentiality maintained?
A: Yes, but only up to a point. Your confidentiality is maintained until the case manager establishes communication with your department to discuss arrangements for your leave. At that time, in order to formulate a plan for your leave, they will need to disclose your identity to your department. However, even then, information will only be shared on a "need to know" basis.

Q: What information will I need to share with Case Management and Victim Support Services?
A: You will need to share information about your due date, as well as whether there are any medical issues and/or modifications that might need to be addressed. In addition, you should provide information to them about your funding – e.g. your stipend's source and amount. Once the case manager contacts your department/program, they will confirm and, if necessary, clarify any details about your funding.

Q: I know that I need to tell my PI/advisor that I'm pregnant. When should I do this?
A: If at all possible, you will need to inform your PI or advisor about your pregnancy at least four months before your due date. Many details surrounding taking a Childbirth and Family Leave can take some time to arrange and will involve multiple offices on campus. We want to settle the details of your leave early enough so that everyone has adequate time to make decisions and preparations. You should also know that your health and medical issues are private matters and that this privacy is protected by federal law (HIPPA and FERPA). You are welcome to tell your PI or advisor whatever you would like to, but other than the information about the timing and details of your pregnancy and childbirth-related leave, you are not required to disclose any details about your pregnancy.

Q: I'm worried about having this conversation -- how do I talk with my PI or advisor about my pregnancy?
A: One of the best things to do is to be clear with yourself and with your PI or advisor about what your respective needs are, and to directly address those needs. Specifics about dates, responsibilities, and expectations on both of your parts will be very helpful. You can seek out confidential guidance and support from staff in Student Affairs, Student Accessibility, the Office of Graduate and Postdoctoral Studies, and/or the Counseling Center. Lastly, you may want to talk to other graduate student-parents, both at Tulane and/or at other institutions.

Q: Does this mean I can keep my student health insurance while on leave?
A: Yes. Whatever your current arrangements are with your program for covering your health insurance will continue for the eight weeks.

Q: What if I have complications during my pregnancy, or I go into pre-term labor?
A: The Childbirth and Family Leave Policy covers last-stage pregnancy, childbirth, and the care of a newborn. Therefore, your leave period might need to start earlier than expected. Also, you should talk to Case Management and Victim Support Services and your healthcare provider about possible eligibility for short-term accommodations.

Q: What happens if I am not ready to come back to school after eight weeks?
A: You should let your PI or advisor know this as early as possible so that other arrangements can be made and so that you can discuss possible impacts on your academic progress. If you are also employed

as part of your graduate program, your leave after eight weeks would be unpaid.

Q: I'm pretty sure that I will need to take off more than eight weeks. Can I do that?
A: Yes, you can, but the terms of your leave will be very different. You will want to look into the details of the Planned Educational Leave Program (PELP), where you opt to take one or two semesters off and then return to your graduate program. This option is intended for when you plan ahead of time to take a long leave, and it must be put in writing and approved by people in your department and in the university.

Q: If I use the Planned Educational Leave, am I no longer a graduate student at Tulane?
A: You do retain your student status during a Planned Educational Leave. However, there are many restrictions while on this kind of leave -- for example, financial aid and grants are suspended, you are not eligible to receive fellowship funds, and you would have to pay out-of-pocket if you wanted to keep your student health insurance.

Q: How are the details of this policy affected if I'm an international student?
A: It is the same, but you will also need to talk with the Office of International Students and Scholars to discuss the specifics of your situation. It is very likely that only the Childbirth Leave (rather than the semester- or year-long Planned Educational Leave) is a good option for you if your student visa requires that you maintain full-time enrolled status.

Q: All of this applies to the person giving birth. What kind of leave applies when it is my partner who is giving birth?
A: Regardless of your gender, as an expectant parent, all of the terms of this policy apply. You should observe the same timeline for contacting Case Management and Victim Support Services so that we can work out the details of what a leave will entail in your particular situation.

Q: What if both my partner and I are graduate students? Are we both eligible?
A: Yes, you are both eligible to take the Childbirth and Family Leave. In addition, the Planned Educational Leave is available if either or both of you want to consider a semester or year off to care for your child.

Q: Do these leave policies apply to me if I am fostering and/or adopting a child?
A: Yes, they do.

Q. If I or my partner is having a baby (or fostering or adopting), am I required to take the Childbirth and Family Leave?
A: No, you do not have to take leave. However, Tulane University seeks to be supportive of graduate student-parents and, as such, we encourage you to utilize these policies.

Planned Educational Leave Program

The Tulane University Graduate Student Planned Educational Leave Program (PELP) is defined as a voluntary, temporary, planned interruption or pause in your regular, full-time education. The purpose is to enhance the prospect of successful completion of your academic program by providing you with time to resolve personal, financial or medical problems. PELP makes it possible for you to suspend your academic work for one or two semesters and resume your studies with minimal procedural difficulties.

Eligibility

PELP is a temporary, short-term leave from your academic studies at Tulane University. Approval of the PELP request depends, in part, upon the expectation that you will return to a registered and enrolled status to continue your education.

Registered graduate students at Tulane University are eligible to enroll in the Planned Educational Leave Program for up to two semesters, with the approval of the departmental or program Director of Graduate Studies, and the Graduate Studies Associate Dean for Students within their school, and the Associate Provost for Graduate Studies and Research. New graduate students are not eligible for a PELP during their first term of enrollment. Incoming students may be considered for deferred admission –contact the Graduate Program Staff Coordinator in your Graduate Program prior to the first day of class.

Students may not hold student employment (Teaching Assistant [TA], Graduate Student Research Assistant [GSRA], etc.) while on PELP.

International students must obtain prior approval for PELP status from the Office of International Students and Scholars (OISS). OISS will guide international students through any necessary steps that may be required as a result of their visa status.

Restrictions While On PELP

- Students on PELP may not be employed in a student academic appointment.
- Financial aid and grants will be discontinued or suspended for the duration of your leave, and you may need to repay any financial aid funds already received for the semester. Please contact the Financial Aid Office for additional information.
- Students on PELP are not eligible to receive fellowship funds.
- Students on PELP may continue to participate in the university's student health insurance plan for one or two semesters. However, students would bear the cost of maintaining this coverage. If students are out of the area, they may purchase an optional health insurance plan to provide coverage. If students intend to continue their on-campus student health benefits, they must notify Student Health Services before the first day of the semester in which their PELP status begins. For more information, students should contact Student Health Services.
- PELP status is a leave from your education and not intended for students to take course work or continue their research. While on PELP, students are not eligible to enroll in concurrent courses or earn any academic credit at Tulane or any other university. Students who have advanced to candidacy may request a clock stoppage associated with the requested PELP leave.
- Students on PELP may not apply for graduation. They must first return to a registered and enrolled status for at least one semester before filing for graduation.

Availability of University Services

A student on leave is only eligible for university services in the following areas:

- Career/Academic Advising,
- Enrolled CAPS and Student Health Center Services
- Student Health Insurance.

Application Process

Graduate students apply for PELP status using the PELP request form.

International students must also notify OISS of their intention to apply for PELP status.

The PELP request form must include the following information:

- Student's full name
- Student ID number
- Major
- Semester/Year leave is to begin
- Semester/Year student will return
- Name of student's departmental/program graduate adviser and his/her e-mail address
- Please answer yes/no to the following questions:
  - Have you registered for courses?
  - Have you paid registration fees?
  - Have you attended classes?
  - Are you an international student?
- A brief statement why student is taking this leave.

The completed e-mail PELP advising form must be forwarded to Assistant Vice President, Student Resources and Support Services, in the Office of Student Affairs. Student Affairs will work with the DGS or program staff, the Associate Dean of Graduate Studies and the Associate Provost of Graduate Studies and Research to arrange PELP approval. Approval signatures are done via e-mail and must reflect the Graduate Adviser's approval using their Tulane University e-mail address. For international students, Student Affairs will contact OISS to confirm eligibility for PELP status.

The completed PELP request form must be submitted to the Office of Graduate and Postdoctoral Studies for approval prior to the first day of the term in which the PELP is to take effect.

Students who intend to apply for PELP status should not enroll for courses the semester the PELP status is to begin. If you submit the PELP request after the first day of the semester, you may owe fees. The Office of the University Registrar fee refund policy applies; please see the academic calendar for deadlines.

PELP Extension Requests

PELP extension requests are made using the Time Extension Request form. Contact Office of Graduate and Postdoctoral Studies for additional information.

Financial Assistance

Tulane's graduate programs award their own scholarships, fellowships, and assistantships. Contact a particular graduate program for information on the availability of funds and how to apply. Tulane's Financial Aid Office calculates a student's eligibility for federal aid to supplement awards made by a graduate program.

Financial Obligation to the University

No diploma or certificate of credit is given to a student who is in default of any payment due to a division of the University.

General Policies, Guidelines, and Schedules

Guidelines and Policies for Graduate Assistants

Education and research are at the core of the academic enterprise of the research university. Graduate teaching assistants (TAs) are important and essential links between the creation and dissemination of new knowledge and the learning environment that meets the needs and stretches the potential of undergraduate students. Whether they serve as graders, laboratory assistants, group discussion leaders, or have complete responsibility for a course, this group of additional teaching personnel enhances Tulane's ability to offer a broad range of courses to its students. Graduate research assistants (RAs) are at the forefront of the university's scholarly activities and provide a vital service to the university on the way to earning their graduate degree. The purpose of this document is to describe policies and procedures related specifically to the assignment and execution of teaching and research assistantships. Issues related to graduate student academic performance and violations (honor code), sexual harassment, fraud in research, and non-assistantship-related grievances are covered by other university policies.

ARTICLE 1: DEFINITIONS

"Graduate Student" means all persons enrolled at Tulane University pursuing post-baccalaureate studies on either a "for credit" or on an "audit" basis, and on either a full-time or part-time basis, including Research Dissertation and Masters. This includes, but is not limited to, students pursing the eM.B.A., M.B.A., M.A., M.ARCHII, M.ACCT., M.F.A., M.FIN., M.L.A., M.P.S., M.S., M.S.W., and Ph.D. degrees.

"Graduate Students" also includes persons who are not officially enrolled for a particular term but who have a continuing relationship with Tulane, or who have been notified of their acceptance for admission and have registered for classes.

"Research Assistant (RA)" means a graduate student who is paid a stipend to perform research duties.

"Teaching Assistant (TA)" means a graduate student who is paid a stipend to perform instructional duties.

"Graduate Assistant (GA)" means a graduate student who is paid a stipend to perform other duties as specified in their job description, typically of an administrative nature.

"Tutoring Session" means assistance given by appointment to a single student or small group of students, often for pay, by someone who, at the time that they are rendering their services, is not in any way involved with the teaching of any section of the course in which the student or group of students is seeking help. Students receiving tuition waivers may have additional restrictions on offering paid tutoring sessions and should consult their department or program for guidance.

"Review Session" means an extra session provided within the context of a specific course, normally given by someone who is directly involved with the teaching of the course at that time. Review sessions should be open to all students in the course or section, and no student should be required, or even asked, to pay a fee for such help.

"Athletic Tutoring" means assistance to student-athletes paid for by the Athletic Department, which may hire graduate students so long as

they are not directly involved with any section of the course in which the student-athlete is receiving help.

ARTICLE II: SELECTION AND APPOINTMENT

1. General

Teaching and research assistants are appointed each year or semester by the student's school, hereafter referred to as the "School." To be eligible for appointment as a teaching or research assistant, a nominee must be admitted to a graduate program without qualification. For reappointment, a nominee must be in good academic standing and making satisfactory progress toward an advanced degree.

2. Reappointment

A TA or RA may be considered for reappointment if:

•They meet the scholastic requirements for eligibility set by the department and School and are certified as being in good academic standing and making satisfactory progress toward the degree.

•They have, in the opinion of the department or School, provided satisfactory service.

3. Selection and Appointment of Teaching Assistants

Only graduate students who present satisfactory evidence of competence in English to read, write, speak, and understand it when spoken are eligible for appointment as a teaching assistant. When proficiency in English is unproven or insufficient, international students will be required to successfully complete a class offered by the Tulane English for Academic and Professional Purposes program that is designed to focus on improving speaking and listening skills in English.

Only graduate students who have earned at least 18 credit hours of graduate course work may be given complete instructional responsibility as the instructor of record for a course offered by Tulane University. Graduate students with fewer than 18 credit hours of graduate course work may be given positions as teaching assistants to support another instructor with leading discussion sections, labs, grading coursework, or other duties as assigned.

Teaching assistants are governed by the same standards of conduct in the performance of their academic duties as are members of the faculty and shall respect the rights and opinions of students and uphold the academic standards of the University.

ARTICLE III: TA TRAINING

The Office of Graduate and Postdoctoral Studies offers an intensive workshop on teaching-related issues at the beginning and end of each academic year. The workshop covers issues such as effective lecturing, facilitating discussions, testing/grading, academic integrity, using technology in teaching, teaching as a performance art, and collaborative learning. Additional resources for teaching can be found year-round through the Center for Engaged Learning and Teaching.

In addition, departments or programs have developed their own workshops to prepare their graduate students for their roles in undergraduate instruction. These programs are usually tailored to the special requirements of the discipline. This training may include, but is not limited to, a discipline-specific introduction to issues of course design and planning, instructional methods, effective assignment sequencing, and issues of evaluation and grading.

ARTICLE IV: TA RESPONSIBILITIES

Graduate teaching assistants perform a variety of roles related to teaching that represent different levels of independence and direct contact with undergraduate students. The level of responsibilities assigned to TAs is determined by the department in consultation with the appropriate dean(s). To the extent possible, departments are encouraged to make assignments that contribute to the intellectual and professional development of graduate students.

Whether graduate TAs serve primarily as assistants to a faculty instructor, graders, laboratory assistants, discussion group facilitators, or as instructors of their own sections, they are governed by the same standards of conduct in the performance of their academic duties as are members of the faculty. They are expected to maintain the highest levels of professional and ethical standards.

ARTICLE V: RA RESPONSIBILITIES

Graduate research assistants perform a variety of roles related to research with different levels of independence and supervision of less experienced research assistants. The level of responsibilities assigned to RAs is determined by the department in consultation with the appropriate dean(s). To the extent possible, departments are encouraged to make assignments that contribute to the intellectual and professional development of graduate students. Graduate RAs serve primarily as assistants to a faculty researcher and are governed by the same standards of conduct in the performance of their research duties as are members of the faculty. They are expected to maintain the highest levels of professional and ethical standards.

ARTICLE VI: FINANCIAL PAYMENTS

It is the responsibility of the School to determine how TAs and RAs are paid, whether on an hourly basis or on a set stipend. In both cases, graduate assistants are paid a fixed rate for their services on a bi-weekly basis for the semester or academic year of their service. In some cases, research assistantships may be offered for a calendar year.

Minimum stipend rates for TAs are set by the School in consultation with the Office of Academic Affairs. Although the professional development of graduate students as teachers is considered an important part of doctoral training, Tulane University is committed to ensuring that the students have sufficient time for other, equally important components of their doctoral education. No TA is expected to perform instructional duties that would take more than 20 hours per week.

Minimum stipend rates for RAs are set by the individual departments and programs. RAs may blend training and work responsibilities, but work responsibilities may not exceed 20 hours per week. If there is any question about work duties versus training, graduate RAs and their faculty supervisors should consult the RA's job description.

ARTICLE VII: TERMINATION OF APPOINTMENT

Termination of a teaching or research assistant before the expiration date of the stated period of appointment will be only for good cause shown. Pursuant to the provision of Article XII of the Statement

on Academic Freedom, Tenure, and Responsibility approved by the University Senate on March 1, 1971, and by the Administrators of the Tulane Educational Fund on March 2, 1971, the School hereby institutes the following regulations and procedures relative to the protection of the academic freedom of its graduate, teaching, or research assistants:

1. In all cases where a graduate student is dismissed from their program of study, their appointment as a TA or an RA will be automatically terminated.

2. In no case will graduate teaching or research assistants be dismissed from their assistantship before the end of the period of appointment without having been provided with a statement of reasons and an opportunity to be heard by a duly constituted committee of the School. The department in question shall provide in writing the statement of reasons along with the statement of intent to dismiss.

3. In any case, when an individual in one of the above-named categories is not reappointed, the student will, upon their request, be provided with a statement of reasons. If the formal terms of their first appointment have given reasonable expectation of reappointment, and if they believe that a consideration violative of their academic freedom significantly contributed to their non-reappointment and if they can establish in writing a case for their belief to the satisfaction of a duly constituted committee of the School, they will be given an opportunity to be heard by that committee.

4. In all cases involving teaching assistants, it must be recognized that because a School maintains the policy that supervised teaching be made, wherever possible, a part of the graduate student's degree program, the teaching assistant is, in effect, a student-teacher, and it is the intent, therefore, of the foregoing paragraphs to safeguard the academic freedom of individuals in their role as teacher while preserving all necessary and reasonable limitation inherent in the faculty-student relationship.

5. In all cases, the graduate training/grievance committee in each department referred to in paragraphs (1) and (2) shall be a standing committee consisting of a representative of the Dean as Chair, three faculty members of the School, and three graduate students to be appointment by the Dean. The Chair shall vote only in case of a tie vote.

6. In all cases, the committee will report its findings and recommendations to the Dean for appropriate action.

ARTICLE VIII: TUTORING

1. Graduate students are allowed to supplement their stipends by tutoring undergraduate students in courses in which they have no direct responsibility at the time. Students with tuition waivers and stipends are subject to permission from their department chair or program director.

2. A graduate student who is teaching a class or lab of a multi-section course that uses a common syllabus and common exams may not tutor any student in any section of that course.

3. A graduate student may use their office for tutoring or may ask departmental permission to use a classroom or other appropriate university facility.

4. The graduate advisor or department chair may require a graduate student to limit their tutoring activity if, in the view of the department, such activity is impeding the graduate student's academic progress or keeping them from fulfilling responsibilities within the department.

5. Graduate students, like any other member of the teaching faculty, may offer review sessions for their students to which they may invite students from other sections of the same course. The graduate student arranging such a session may not, under any circumstances, take money from the students in attendance.

6. A graduate student receiving a tuition waiver must have prior approval from the chair or advisor to work outside the department or program, because such activities might impede progress toward degree

Theses and Dissertations Digital Repository Policy

All students who prepare a thesis in partial fulfillment for a graduate degree (PhD, MS, MA, MFA, MLA, MProS) must submit a digital copy of their approved thesis or dissertation, complete with committee signatures, to the Howard Tilton Memorial Library Theses and Dissertations Archive (https://digitallibrary.tulane.edu/theses_and_dissertations/), in addition to the current hard copy requirement. Failure to do so by the official date of certification for degree (as established by the Registrar's Office) may result in delay of degree conferral.

This policy does not preclude submission of the thesis or dissertation to other digital repositories such as ProQuest, nor does it prevent schools or programs from imposing additional thesis or dissertation archiving requirements. Care should be exercised, however, to ensure that all copies are identical, as the version deposited with Howard Tilton Memorial Library, will be considered the official version for the degree.

Further details regarding format, personal information, and embargo periods are provided on the archives website.

Graduate Student Health Insurance Subsidy

Graduate students are required by University policy to have adequate health insurance coverage while registered as full-time students [http://pandora.tcs.tulane.edu/acctrec/healthinsurance.asp]. They must either be covered by the University student health care plan or provide proof of coverage from some other source (e.g., their parents' policy or a policy purchased on the open market).

In those instances where a graduate student is on stipend* (e.g., a teaching assistantship, research assistantship, internal fellowship, or external fellowship supporting health insurance fees). A subsidy for health care costs is considered an eligible benefit, similar to a tuition waiver.

All graduate students on an eligible university stipend will receive a subsidy equivalent to 50% of the annual cost of the University's minimum individual health care plan coverage†. This subsidy is distributed equally between the fall and spring terms. Coverage will continue during the summer months, provided the student continues in good standing and pays his or her share of the insurance costs. The university's subsidy cost is to be borne by the student's school, department or program, or advisor's grant account, as determined by the appropriate school dean.

In the event that a student shows proof of coverage other than the University's student health care plan, no subsidy will be provided. The subsidy will cease on the date the degree is conferred.

Example

The University student health plan for the 2013-14 academic year is provided by United Healthcare Student Resources at the following rates:

BASIC

- Student $2,507
- Spouse $4,253
- All Children $3,443

CONTINUATION**

- Student $4,097
- Spouse $6,978
- All Children $5,642

An eligible student would have the following payment made to the policy on his or her behalf each term (Fall and Spring):

- Fall 2013: $627
- Spring 2014: $627

* At a minimum, students on stipend are those in WFMO job codes 933000, 990000 and 936000. There may be tax implications to students who receive this subsidy.
** The monthly rates for Continuation Coverage apply to students who are graduating and wish to extend coverage for up to 90 days.
† Subsidies of greater than 50% are allowed and encouraged.

Graduate Council

The Graduate Council establishes and maintains university-wide procedures, rules and standards for the Master of Arts (M.A.), Master of Fine Arts (M.F.A.), Master of Liberal Arts (M.L.A.), Master of Science (M.S.), Master of Professional Studies (M.P.S.), and Doctor of Philosophy (Ph.D.) degree programs. The council approves new degree programs and major curriculum changes in existing programs, performs periodic program reviews, and advises the Senior Vice President for Academic Affairs and Provost on graduate education issues. The voting membership of Graduate Council consists of the Provost, who serves as its chair, and elected faculty members — each elected by a vote of the graduate faculty of their respective schools. More details on the council's membership and functions are available at: h (http://tulane.edu/ogps/graduate-council.cfm)ttps://ogps.tulane.edu/graduate-council (https://ogps.tulane.edu/graduate-council/).

Graduate Student Grading Policy

The Tulane University Graduate Student Grading Policy is intended to clarify and set minimum standards for the grades which will count for credit in graduate degree programs. Schools and programs/departments within the university may set stricter standards for minimum grades and grade point averages, but this policy will serve as the minimum standard for the students and programs listed below.

This policy applies to all graduate students. Students in professional programs, including but not limited to the JD and the MBA programs, should consult with their respective school and handbook for the relevant grade and grade appeal policies. Students who are unclear as to whether they fall under this policy should also consult the University Catalog and their school to determine if this policy is applicable.

GRADES

Grades for graduate students are reported as follows:

A: 4.000
A-: 3.667
B+: 3.333
B: 3.000
B-: 2.667
C+: 2.333
C: 2.000
C-: 1.667
D+: 1.333
D: 1.000
D-: 0.667
F: Fail
P: Pass
I: Incomplete
IP: In Progress
W: Withdraw/No Penalty
WF: Withdraw/Failing Grade
R: Research

Clarification on certain grades that a graduate student could receive:

I: Incomplete – This grade will become a grade of F if the work is not made up according to the schedule set out by the Incomplete Grade Policy. After the work is made up and a grade is posted, the Incomplete grade, will be removed from the academic record except in the case of an F, in which case it will remain on the academic record after the letter grade. For example, if an A- is assigned by the faculty member for a course that was initially graded with an incomplete, the grade on the transcript will appear as A-. If an F is assigned by the faculty member for a course, the grade on the transcript will appear as F/I. The letter grade earned is calculated in the GPA as per the normal GPA calculation.

R: Research – In those cases where research cannot be completed within the semester, this grade will be given to indicate the circumstance. It is most commonly used for PhD students in dissertation. This grade carries a different meaning from that of IP.

IP: In Progress – Satisfactory progress at the end of the first semester of a yearlong course; grades are assigned to both courses upon completion of the yearlong course, and the IP will be replaced with the letter grade earned once the final grade is posted to the record.

W: Withdrawal – Courses may be dropped without record within six weeks of the first day of classes; refer to the Academic Calendar for the exact dates each semester. Withdrawals with the grade of W after these dates may only be accomplished if the instructor notifies the dean that the student is passing and recommends permission to withdraw. WF (Withdraw/Failing Grade) will be assigned if the student's work in a course is unsatisfactory at the time of withdrawal.

ACADEMIC PERFORMANCE STANDARDS

Graduate students are expected to maintain a cumulative grade point average (GPA) of at least 3.0. Courses in which a student earns a grade of C+ or lower cannot be counted towards a professional degree, a master's degree or a PhD. If a student receives two B- grades, or one grade below B-, the student is placed on probation and considered for dismissal by the school in consultation with the department at the conclusion of the semester in which the non-passing grade or the second B- occurred. Ordinarily, the department will recommend that a student with two grades of B- or lower be dropped from the graduate program. Minimum academic performance and/or unsatisfactory performance may also lead to the withdrawal of financial support.

If a student receives a grade below B-, that course will not count towards the total credit hours required to complete the degree unless an exemption is approved by the dean or dean's designee. For instance, if a degree requires 30 credit hours to complete and a student received a grade of below B- in one 3-credit hour course, that student will need to take at least three additional credit hours beyond the minimum to have 30 eligible credit hours. Staff or faculty members who certify students for their degrees must verify that the student received a B- or better in all courses for the degree at the point of degree certification.

GRADE CHANGE POLICY

A student who believes that a final grade was assigned incorrectly may request a final grade change. Final grades can be changed only in exceptional circumstances and only with the approval of the instructor, the chair of the department, and the dean or dean's designee of the college/school which offered the course. Grade changes are not allowed once a degree to which that grade applies has been awarded.

THE APPEAL PROCESS

If a student wishes to appeal their grade, they must follow the steps outlined by their school. Appeals are intended for students who believe their grade was not determined in a fair and appropriate manner.

Graduate Studies Student Association

The Graduate Studies Student Association (GSSA) (http://www.tulane.edu/%7Egssa/) is responsible for addressing issues which affect graduate students in the School of Liberal Arts and the School of Science and Engineering, as well as allocating funds for graduate studies activities. GSSA's parent body is GAPSA (Graduate and Professional Student Association). (http://www.tulane.edu/%7Egapsa/)

Incomplete Grades

An incomplete grade, I, is given at the discretion of instructors when, in their view, special circumstances prevent a student from completing work assigned during the semester and with the understanding that the remaining work can be completed within an agreed upon time of up to 12 months following the course. Incomplete grades also are given when a student's absence from a final examination has been excused by their school's dean or dean's designee prior to or within one day following the final examination.

If a student will require a grade of I, the student and instructor should have a clearly articulated, written agreement including a timeline of what constitutes a successful resolution of the Incomplete Grade.

Incomplete grades must be resolved within the agreed upon timeframe of not more than the next 12 months or they are automatically changed to a grade of F/I.

The I will be removed from the student's transcript after the incomplete grade is resolved, except in the case of an F, which will appear on the transcript as F/I. Extensions of the 12-month deadline must be requested in writing by the student and must be approved by the instructor and their school's dean or dean's designee. The faculty member must then contact the Registrar's Office to request that the timeline for the I be extended for up to 12 more months. Extensions are approved only when a student has made an attempt to complete the missing work within the original 12-month period but, in the view of the instructor and the dean or dean's designee, has been prevented from completing the work by some special circumstance beyond the student's control. Grades may still be changed by the faculty member after the 12-month period expires, but before the student graduates.

Professional Codes of Academic Conduct and Professionalism

In addition to the Unified Code of Graduate Student Academic Conduct, some professional schools have additional, specific codes of conduct related to academics, research, and professional conduct.

- Law School (p. 162)
- School of Medicine (p. 327)
- School of Social Work (p. 609)

Rules and Regulations

Upon admission, students are held responsible for compliance with the regulations Tulane University has set forth in this catalog and in relevant school and/or program handbooks and catalogs. They should familiarize themselves with these regulations.

The University reserves the right to change any of its courses and charges without advance notice and to make such changes applicable to students already registered as well as to new students.

Tuition and Fees

Tuition and fees rate schedules are established at the university level; however, some fees, such as dissertation fees, are established by the individual schools or programs. Students who have assistantships are often granted tuition waivers, but fees are the responsibility of the student. Consult the graduate adviser of the appropriate school for more information on tuition and fees.

Unified Code of Graduate Student Academic Conduct

Tulane University expects students to conduct their academic endeavors with honesty and integrity. As part of the University community, graduate students have certain responsibilities regarding work that forms the basis for the evaluation of their academic achievement. Any student behavior that has the effect of interfering with the education, pursuit of knowledge, and/or a fair evaluation of the student's performance is considered a violation of the proscribed academic conduct, as set forth in the Unified Code of Graduate Student Academic Conduct (https://ogps.tulane.edu/sites/default/files/Unified%20Code%20of%20Graduate%20Student%20Academic%20Conduct

%20-%202024%20Final%20(1).pdf). The Code also outlines procedures to be followed if there is a suspected violation. Students are expected to be familiar with the Code. Principles and activities not covered by the Code may fall under the purview of University or departmental research and/or ethics committees. Programs and schools may have additional codes of conduct related to ethics or professional conduct with which students should familiarize themselves. Questions concerning jurisdiction should be addressed to the dean of the respective school.

Unified Code of Graduate Student Academic Conduct (https://ogps.tulane.edu/sites/default/files/Unified%20Code%20of%20Graduate%20Student%20Academic%20Conduct%20-%202024%20Final%20(1).pdf)

Master's Programs Requirements

The general characteristics of the graduate programs of study are outlined below; but as with admissions, specific requirements for all graduate degrees, including concurrent and dual or joint degrees, may be obtained from the schools in which the programs are to be carried out. These characteristics are specific to the MS, MA, MFA, MLA, and MPros degree programs.

- 4+1 Master's Programs
- Additional Requirements
- Admission to Degree Programs
- Conferring of Degrees
- Change of Courses
- Change of Departmental Program
- Dual Degree Programs
- Grades
- Master's Degree Minimum Degree Requirements
  - Minimum Credit Hour Requirements (p. 91)
  - Continuous Registration Requirements (p. 91)
  - Full-Time Status (p. 91)
  - Part-Time Status (p. 91)
  - Transfer Credit (p. 91)
  - Tenure for Degree Students (p. 91)
  - Dual Degree Programs (p. 91)
- Medical Excuses
- Registration Policies and Procedures
- Required Withdrawal and Denial of Enrollment
- Thesis Requirements
  - Thesis Committees (p. 92)
  - Thesis Guidelines (p. 92)

4+1 Master's Programs

In some programs, undergraduate students have the option of obtaining a master's degree with one additional year of study beyond the bachelor's degree (4+1). Program requirements vary with graded thesis/comprehensive requirements. In programs without a six-credit graded thesis/comprehensive exam requirement, 30 credit hours of additional coursework beyond the bachelor's level are required. Those programs that offer a six-credit graded thesis-/comprehensive-based 4+1 option require 24 credit hours of coursework beyond the bachelor's level. In some cases, a modified undergraduate curriculum is required to complete the 4+1 program; e.g., enrollment during the senior year in 6000-level courses that can be applied to both the bachelor's and master's degrees. Because this may be the case, interested students are advised to consult with their program's graduate advisor prior to their junior year to obtain specific instructions for participation in the 4+1 program. Tuition for the fifth year of the 4+1 program is set by the appropriate school or program.

This policy is intended to clarify and regularize which credit hours may be counted for both degrees and which may be counted for only one degree. Individual schools and departments must still have any 4+1 program approved by their relevant school and the Graduate Council.

GRADUATE COURSES TAKEN BEFORE THE BACCALAUREATE DEGREE IS CONFERRED

Advanced undergraduate students may be permitted to enroll in 6000-level or 7000-level courses, provided they meet the requirements of the course and instructor. Those credit hours may be used in fulfilment of undergraduate degree requirements, such as a certain number of advanced courses within the major field of study or to count towards the overall credit hours required for the undergraduate degree.

If a student is pursuing a 4+1 program, they may complete up to twelve (12) credit hours of graduate-level work before the undergraduate degree is conferred and apply these towards the requirements of their master's degree. Six (6) of those credit hours may also fulfill requirements of their undergraduate degree such as overall hours or specific requirements of their major. The remaining six (6) of those credit hours must be in excess of the requirements of their undergraduate degree and not fulfill any undergraduate requirement, whether for their major or for general university requirements.

It is not required by this policy that undergraduates pursuing a 4+1 program must complete a certain number of credits before the baccalaureate degree is conferred. That may be required or recommended by specific 4+1 programs. The department or school must specify which credits will count for undergraduate requirements before the undergraduate degree is conferred.

Additional Requirements

Schools and graduate programs may have additional requirements for completion of the master's degree. Students are advised to consult

with the appropriate departmental graduate adviser or dean for this information.

Admission to Degree Programs

Admission to all graduate studies programs at Tulane is on the basis of academic accomplishments and potential, regardless of race, sex, color, religion, national/ethnic origin, citizenship, marital status, sexual orientation, disability, or veteran status.

Specific admission standards are set by the individual schools or programs, but in general, only applicants who have earned an undergraduate degree from a recognized institution may be admitted if their academic records and personal attributes indicate the ability to pursue advanced study successfully. Applicants must present evidence, to the satisfaction of the department or the program committee concerned, of adequate preparation for the subjects in which they seek to specialize. All students must hold the undergraduate degree before enrolling. Only students with undergraduate averages of B or better, or with undergraduate study of otherwise certifiable equivalent quality, ordinarily are admitted.

A master's degree is not prerequisite to the beginning of study for the Doctor of Philosophy degree, but a student may be required to qualify for the master's degree while working toward the doctorate.

Prospective students should consult the graduate admissions offices of their program of interest for additional admission requirements, application deadlines, and degree requirements.

Conferring of Degrees

All degrees are conferred by Tulane University. Degrees earned at the graduate level are awarded three times a year in December, May, and August. There is one commencement program each year in May. Candidates for degrees are required to complete an application for degree form on or before deadline dates, as stipulated by each school.

Change of Courses

Students wishing to add or drop courses should consult the Schedule of Classes for instructions, as well as the official Academic Calendar (https://registrar.tulane.edu/Academic_Calendar/). Failure to make schedule adjustments promptly and accurately may result in financial or academic penalties.

Change of Departmental Program

A student who has been admitted to a degree program in one department and wishes to transfer to a program in another department must obtain the approval of the chair of both departments concerned and the approval of the dean of the school before the change is official. The necessary form for such changes is available in the dean's office. A student who wishes to transfer to a program in a different school must apply to and be admitted by the other school.

Dual Degree Programs

Tulane University offers a number of dual or joint degrees that are pursued as single coherent program of study. Up to 12 credit hours may be shared between the two degrees to meet master's degree requirements and up to 24 credit hours may be shared to meet Ph.D. requirements. For joint Ph.D. programs, the requirements of the Ph.D. must be maintained and satisfied in order to receive the Ph.D. degree.

Grades

Grades are reported as follows:

Grade	Description
A	
A-	
B+	
B	
B-	
C+	A course in which a grade of C+ or less is earned cannot be counted toward a graduate degree.
C	
C-	
D+	
D	
D-	
F	
I	Incomplete - This grade will automatically become F unless the work is made up within 30 days after the beginning of the following semester, excluding Summer School. This grade is not to be used as an automatic extension but only for unavoidable delays caused by illness or other emergencies.
R	Research - In those cases where research or experimentation, or both, cannot be completed within the 30-day limit following the end of the semester, this grade will be given to indicate this circumstance. This grade carries a different meaning from that of IP which is given at the end of the first semester of a two-semester course.
IP	In Progress - Satisfactory progress at the end of the first semester of a year-long course; grades are assigned upon completion of the course.

W	Courses may be dropped without record within six weeks of the first day of classes. Refer to Academic Calendar for exact dates each semester. Withdrawals with the grade of W after these dates may be accomplished only if the instructor notifies the dean that the student is passing and recommends permission to withdraw. WF (withdrawn failing) will be assigned if the student's work in a course is unsatisfactory at the time of withdrawal.

In some departments grades for certain courses are reported as follows:

Grade	Description
S	Satisfactory
U	Unsatisfactory

In some departments, grades for certain other designated courses may also be reported simply as S or U at the student's option, provided that the option is declared by the student no later than the end of the second week of class.

Master's Degree Minimum Degree Requirements

Minimum Credit Hour Requirements

The minimum credit hour requirement for a non-professional master's degree is 30 credit hours; however, some programs may require additional hours of coursework. Those programs that require 24 credit hours of coursework and award 6 credit hours for a thesis for the master's degree are in compliance with this policy. See Thesis Requirements below for additional information.

Continuous Registration Requirements

A student admitted in a degree program must be continuously registered in a degree-granting division of the university during the academic year (exclusive of summer session) in either full-time or part-time status from the date of first registration until the awarding of the degree, unless the registration is terminated by resignation or by dismissal for academic or disciplinary reasons.

A student who has not completed the minimum coursework requirements for the degree must enroll for a minimum of three hours per semester (exclusive of Summer Session). Some schools may require registration for a higher number of credit hours or may charge a continuous registration fee.

Failure to be continuously registered is de facto withdrawal and the school reserves the right not to readmit. A student who is readmitted is obligated to pay any applicable fee required to maintain continuous registration. Under exceptional circumstances a student may be granted leave by the dean of the appropriate school, and during such a period of leave will be considered in continuous registration without any payment of fee.

Full-Time Status

Full-time status consists of registration for at least nine hours of graduate credit per semester, or a combination of coursework and equivalent academic activities such as teaching or research. To hold a Tulane-sponsored fellowship, scholarship, or assistantship, a student must be in full-time status. Off-campus employment may disqualify a student from receiving a Tulane-sponsored fellowship, scholarship, or assistantship.

Part-Time Status

Part-time status consists of registration for less than nine hours of graduate credit per semester. In such cases, the department or the program committee can provide no certification that the student is engaged in a full-time academic program.

Transfer Credit

Acceptance of graduate credit for work done at other graduate institutions or in another division of Tulane must be approved by the department or program concerned, or by the dean of the appropriate school. In general, no more than 50% of all credits for a graduate degree may be transferred from another university or program. Some programs may allow fewer transfer credits and/or limit the applicability of transfer credits to degree programs. Please see the Graduate Credit Transfer Policy (https://ogps.tulane.edu/sites/default/files/Graduate%20Credit%20Transfer%20Policy_0.pdf) for more details.

Tenure for Degree Students

Tenure is the maximum period of time normally permitted for the completion of all requirements for a degree, and it is determined on the basis of consecutive academic years from the date of registration for graduate study at Tulane or at another institution. Tenure for a one-year master's degree is three (3) years. Tenure for a two-year master's degree is four (4) years. Tenure for a three-year master's degree is five (5) years. Tenure is not affected by residence status. Under certain circumstances, upon the recommendation of the chairperson of a student's department or program committee, the dean may extend tenure, but a student whose period of graduate study is unduly prolonged or interrupted may be required to perform additional work. Tenure regulations are applicable to all degree students, regardless of date of first registration.

Dual Degree Programs

Tulane offers a number of dual degree programs with the master's degree. In all instances, the student must fulfill the requirements for each degree in order for the dual degrees to be conferred.

Medical Excuses

Students are expected to attend all classes unless they are ill or prevented from attending by exceptional circumstances. Instructors may establish policies for attendance of their classes, which are announced at the beginning of the semester. Students who find it necessary to miss class must assume responsibility for making up the work covered during that session, including quizzes, examinations, and other exercises; they also are responsible for obtaining notes on material covered in lectures or other class sessions.

Students are responsible for notifying professors about absences that result from serious illnesses, injuries, or critical personal problems. However, medical excuses are not issued by the University Health

Service except in instances of illnesses or injuries that involve hospitalization.

Registration Policies and Procedures

Registration information for graduate students is the same as that for undergraduate students.

Required Withdrawal and Denial of Enrollment

A student may be required to withdraw from any course or from the university, temporarily or permanently, for any of the following reasons:

- Work below the standard specified by the college in which the student is enrolled.
- Violation of the honor system or other misconduct.
- Possibility of danger to the health of the student or to other students if enrollment is continued.

The university reserves the right to forbid any student's continued enrollment without assignment of reason. The school, however, will provide a student with a statement of reason in writing from the department. An appellate procedure has been established in cases involving academic performance or possible infringement of academic freedom. Schools also have appellate procedures in cases involving non-reappointment of fellowships or scholarships when the formal terms of the first award have given reasonable expectation of renewal. Such procedures may also apply to cases in which a graduate, teaching, or research assistant, is relieved of a position before the end of the term of the appointment or is not reappointed when the formal terms of the first appointment have given reasonable expectation of reappointment. Copies of these procedures are available in the dean's office.

The Graduate Student Dismissal Policy, (https://ogps.tulane.edu/sites/default/files/Academic%20Code%20of%20Conduct%20approved%20change.pdf) outlines the standards and review process for probation and dismissal on the basis of academic or research performance. It is distinct from policies concerning academic misconduct or student conduct-based dismissals.

Resignation from a graduate program must be made in writing to the dean. The student who finds it necessary to withdraw or to resign should report to the dean's office to complete a withdrawal or resignation form.

Thesis Requirements

If a thesis is required for the master's degree, the subject of the thesis must be in the field of major study and must have the approval of the professor by whom the thesis is to be directed. The finished thesis must have the approval of the thesis committee.

Students are required to submit their completed theses to the University's Theses and Dissertations Archive (https://digitallibrary.tulane.edu/theses_and_dissertations (https://digitallibrary.tulane.edu/theses_and_dissertations/)). Schools may require students to submit a paper copy of their thesis.

Thesis Committees

Master's thesis committees must consist of at least three faculty members, the majority of whom are Tulane faculty. Exceptions to this stipulation may be made by the appropriate school's dean.

Thesis Guidelines

This policy applies to all students pursuing a Master of Science, Master of Arts, or Master of Fine Arts degree.

Master's degree students must complete at least 30 hours of coursework, for which they receive a grade, in order to receive the master's degree. If the student fulfills that requirement entirely with coursework, no further action is needed. The student may still complete a thesis at their discretion and following the guidelines of their department or program. Departments may still require a thesis to complete the master's degree, even if the student has 30 hours, provided the requirement is documented in the university course catalog.

If a student intends to take only 24 hours of coursework and complete a thesis to fulfill the requirements of their degree, the thesis must be graded. The student must enroll in 6 hours of graded thesis credit. The student may be graded on a Satisfactory/Unsatisfactory scale.

Ph.D. Program Requirements

The general characteristics of the graduate programs of study are outlined below; but as with admissions, specific requirements for all graduate degrees, including concurrent and dual or joint degrees, may be obtained from the schools in which the programs are to be carried out. For maximum periods of time to complete requirements for these degrees, see Tenure for Degree Students.

Degree of Doctor of Philosophy

Students undertaking work for the degree of Doctor of Philosophy (Ph.D.) should understand that this degree is awarded not for an accumulation of course credits only, but for superior independent research and scholarship in the chosen field, as evidenced in the dissertation.

- Admission to Degree Programs
- PhD Minimum Degree Requirements
- Minimum Credit Hour Requirements
- Continuous Registration Requirement

Admission to Degree Programs

Admission to all graduate studies programs at Tulane is on the basis of academic accomplishments and potential, regardless of race, sex, color, religion, national/ethnic origin, citizenship, marital status, sexual orientation, disability, or veteran status.

Specific admission standards are set by the individual schools or programs, but in general, only applicants who have earned an undergraduate degree from a recognized institution may be admitted if their academic records and personal attributes indicate the ability to pursue advanced study successfully. Applicants must present evidence, to the satisfaction of the department or the program committee concerned, of adequate preparation for the subjects in which they seek to specialize. All students must hold the undergraduate degree before enrolling. Only students with undergraduate averages of B or better, or with undergraduate study of otherwise certifiable equivalent quality, ordinarily are admitted.

A master's degree is not prerequisite to the beginning of study for the Doctor of Philosophy degree, but a student may be required to qualify for the master's degree while working toward the doctorate.

Prospective students should consult the graduate admissions offices of their program of interest for additional admission requirements, application deadlines, and degree requirements.

Ph.D. Minimum Degree Requirements

The Ph.D. is awarded not for an accumulation of course credits only, but for superior independent research and scholarship in the chosen field, as evidenced in the dissertation.

Minimum Credit Hour Requirements

The minimum credit hour requirements for the Ph.D. are 48 credit hours; however, some programs may require additional hours of coursework.

Continuous Registration Requirement

A student admitted in a degree program must be continuously registered in a degree-granting division of the university during the academic year (exclusive of summer session) in either full-time or part-time status from the date of first registration until the awarding of the degree, unless the registration is terminated by resignation or by dismissal for academic or disciplinary reasons.

A student who has not completed the minimum coursework requirements for the degree must either enroll for a minimum of three hours per semester (exclusive of Summer Session) or register for Dissertation Research in order to maintain continuous registration. A student who has completed the minimum hours of coursework required for the degree must register for Dissertation Research (no credit hours) in order to maintain continuous registration. Some schools may require registration for a higher number of credit hours or may charge a continuous registration fee.

Failure to be continuously registered is *de facto* withdrawal and the school reserves the right not to readmit. A student who is readmitted is obligated to pay any applicable fee required to maintain continuous registration. Under exceptional circumstances a student may be granted leave by the dean of the appropriate school, and during such period of leave, a student will be considered in continuous registration without payment of fee.

Residency

A student must be in residence at Tulane for at least two semesters.

Full-Time Registration Status

Full-time status consists of registration for at least nine hours of graduate credit per semester, or a combination of coursework and equivalent academic activities such as teaching or research. Ph.D. students must be in full-time status for at least one academic year (exclusive of summer session), though some schools and programs may require full-time status for a longer period. To hold a Tulane-sponsored fellowship, scholarship, or assistantship, a student must be in full-time status. Off-campus employment may disqualify a student from receiving a Tulane-sponsored fellowship, scholarship, or assistantship.

A student who has completed the minimum hours of coursework and is registered for Dissertation Research (no credit hours) can be classified as a full-time student with full student privileges. Schools, however, may require the department or program committee to certify that the student is engaged in academic activities equivalent to a full-time commitment.

Part-Time Registration Status

Part-time status consists of registration for less than nine hours of graduate credit without certification by the department or the program committee that the student is engaged in a full-time academic program.

Transfer Credit

Tulane University's graduate departments may accept transfer credit at their discretion. This policy is intended to clarify minimum standards and provide guidance on university-wide policies and best practices.

GENERAL TRANSFER CREDIT GUIDELINES

Graduate students may transfer credit from graduate courses taken at other accredited institutions. Students must provide a sealed official transcript from the other institution, a course description from the course catalog, and may be required to provide a syllabus and/or samples of coursework. Transfers are made on the recommendation of the student's departmental/program advisor and/or Director of Graduate Studies, in conjunction with the faculty member who teaches the most closely equivalent course. If the course does not have a direct equivalent, it may be transferred as a "special topics" course. Only courses in which the student achieved a grade of B or higher, and which are no more than seven years old, will be considered for transfer. Grades earned on transferred credit do not affect the student's Tulane grade point average.

A minimum of 50% of all credits for a graduate degree must be completed at Tulane University.

TRANSFER CREDITS FROM QUARTER-BASED SYSTEMS

Credits completed at an institution that uses a quarter credit system rather than a semester credit system will be accepted at two-thirds ($^2/_3$) the number of hours on the transcript. For instance, a three-credit hour course from an institution that uses quarter credits will transfer to Tulane University as two hours of credit, if the course is accepted.

GRADUATE CREDIT EARNED BEFORE THE BACHELOR'S DEGREE IS CONFERRED

Generally, no credit is given for graduate courses taken before a student has completed a bachelor's degree from an accredited institution. The exception to this policy is for students who have been accepted into a 4+1 accelerated master's degree program or dual bachelor's and master's degree program. Students from collaborating universities participating in certain +1 accelerated master's programs are also exempt from this policy. For those groups of students, course credits for graduate-level courses taken before the bachelor's degree was awarded may be used towards the master's degree, per the specific program requirements and/or the Memorandum of Understanding between the universities. The courses may also ultimately fulfill requirements for other graduate degrees, with the approval of the director of graduate studies of the department or program.

Tenure for Degree Students

Tenure is the maximum period of time normally permitted for the completion of all requirements for a degree, and it is determined on the basis of consecutive academic years from the date of registration for graduate study at Tulane. Tenure for the Ph.D. degree is seven years. Tenure is not affected by registration status. Under certain circumstances, upon the recommendation of the chairperson of a student's department or program committee, the dean of the school may extend tenure, but a student whose period of graduate study is unduly prolonged or interrupted may be required to perform additional work. Tenure regulations are applicable to all degree students, regardless of date of first registration. A registration block will be imposed by the school dean for those students who are beyond their time of tenure. The registration block can only be removed with permission from the school's dean.

Dual Degree Programs

Tulane offers a number of dual degree programs with the Ph.D. In all instances, the requirements for the Ph.D. degree must be maintained and satisfied in order to receive the Ph.D. degree.

Dual and Joint Degree Programs and Credit Sharing Requirements

Tulane University offers a number of dual or joint degrees that are pursued as single coherent program of study. Up to 12 credit hours may be shared between the two degrees to meet master's degree requirements and up to 24 credit hours may be shared to meet Ph.D. requirements. For joint Ph.D. programs, the requirements of the Ph.D. must be maintained and satisfied in order to receive the Ph.D. degree.

Dissertation Committees

Ph.D. dissertation committees must consist of at least three faculty members, the majority of whom are Tulane faculty. Exceptions to this stipulation may be made by the school dean.

Admission to Candidacy

Admission to a Ph.D. program does not constitute admission to candidacy for the Ph.D. To be admitted to candidacy, a student must complete certain degree requirements, as specified by each school or graduate program. See the department or program director of graduate studies for specific information.

The Prospectus

A student must write a prospectus in order to graduate. See the department or program director of graduate studies for specific requirements related to when and how a prospectus should be completed.

The Dissertation

The dissertation is the culmination of the PhD degree. It is the necessary demonstration that the candidate is worthy of taking a place among research scholars in the discipline. It must demonstrate not only mastery of the literature of the subject, but also the ability to carry on independent research that results in a genuine contribution to knowledge or an original interpretation of existing knowledge, and it must do so in a literate and lucid fashion. The dissertation committee shall pass on the acceptability of the dissertation before it is submitted in final form. Acceptability, however, is not final approval. The candidate must defend the dissertation successfully before the degree is awarded. Consult the dean of the appropriate school or program for regulations regarding formatting of the dissertation and submission deadlines.

Students are required to submit their completed dissertation to the University's Theses and Dissertation Archives (https://

digitallibrary.tulane.edu/theses_and_dissertations (https://digitallibrary.tulane.edu/theses_and_dissertations/)). Schools may require students to submit a paper copy of their dissertation.

Additional Requirements

Schools and graduate programs may have additional requirements for completion of the Ph.D. degree. Students are advised to consult with the appropriate departmental graduate adviser or dean for this information.

Registration Policies and Procedures

Registration information for graduate students is the same as that for undergraduate students.

Change of Courses

Students wishing to add or drop courses should consult the Schedule of Classes for instructions, as well as the official Academic Calendar (https://registrar.tulane.edu/Academic_Calendar/) for relevant deadlines. Failure to make schedule adjustments promptly and accurately may result in financial or academic penalties.

Change of Departmental Program

A student who has been admitted to a degree program in one department and wishes to transfer to a program in another department must obtain the approval of the chair of both departments concerned and the approval of the dean of the school before the change is official. The necessary form for such changes is available in the dean's office of the appropriate school. A student who wishes to transfer to a program in a different school must apply to and be admitted by the other school.

Grades

Grades are reported as follows:

Grade	Description
A	
A-	
B+	
B	
B-	
C+	A course in which a grade of C+ or less is earned cannot be counted toward a graduate degree.
C	
C-	
D+	
D	
D-	
F	
I	Incomplete - This grade will automatically become F unless the work is made up within 30 days after the beginning of the following semester, excluding Summer School. This grade is not to be used as an automatic extension but only for unavoidable delays caused by illness or other emergencies.
R	Research - In those cases where research or experimentation, or both, cannot be completed within the 30-day limit following the end of the semester, this grade will be given to indicate this circumstance. This grade carries a different meaning from that of IP which is given at the end of the first semester of a two-semester course.
IP	In Progress - Satisfactory progress at the end of the first semester of a year-long course; grades are assigned upon completion of the course.
W	Courses may be dropped without record within six weeks of the first day of classes. Refer to Academic Calendar for exact dates each semester. Withdrawals with the grade of W after these dates may be accomplished only if the instructor notifies the dean that the student is passing and recommends permission to withdraw. WF (withdrawn failing) will be assigned if the student's work in a course is unsatisfactory at the time of withdrawal.

In some departments grades for certain courses are reported as follows:

Grade	Description
S	Satisfactory
U	Unsatisfactory

In some departments, grades for certain other designated courses may also be reported simply as S or U at the student's option, provided that the option is declared by the student no later than the end of the second week of class.

Medical Excuses

Students are expected to attend all classes unless they are ill or prevented from attending by exceptional circumstances. Instructors may establish policies for attendance of their classes, which are announced at the beginning of the semester. Students who find it

necessary to miss class must assume responsibility for making up the work covered during that session, including quizzes, examinations, and other exercises; they also are responsible for obtaining notes on material covered in lectures or other class sessions.

Students are responsible for notifying professors about absences that result from serious illnesses, injuries, or critical personal problems. However, medical excuses are not issued by the University Health Service except in instances of illnesses or injuries that involve hospitalization.

Required Withdrawal and Denial of Enrollment

A student may be required to withdraw from any course or from the university, temporarily or permanently, for any of the following reasons:

- Work below the standard specified by the college in which the student is enrolled.
- Violation of the honor system or other misconduct.
- Possibility of danger to the health of the student or to other students if enrollment is continued.

The university reserves the right to forbid any student's continued enrollment without assignment of reason. The school, however, will provide a student with a statement of reason in writing from the department. An appellate procedure has been established in cases involving academic performance or possible infringement of academic freedom. Schools also have appellate procedures in cases involving non-reappointment of fellowships or scholarships when the formal terms of the first award have given reasonable expectation of renewal. Such procedures may also apply to cases in which a graduate, teaching, or research assistant, is relieved of a position before the end of the term of the appointment or is not reappointed when the formal terms of the first appointment have given reasonable expectation of reappointment. Copies of these procedures are available in the dean's office of the appropriate school.

The Graduate Student Dismissal Policy, (https://ogps.tulane.edu/sites/default/files/Academic%20Code%20of%20Conduct%20approved%20change.pdf) outlines the standards and review process for probation and dismissal on the basis of academic or research performance. It is distinct from policies concerning academic misconduct or student conduct-based dismissals.

Resignation from a graduate program must be made in writing to the dean. The student who finds it necessary to withdraw or to resign should report to the dean's office to complete a withdrawal or resignation form.

Conferring of Degrees

All degrees are conferred by Tulane University. Degrees earned at the graduate level are awarded three times a year in December, May, and August. There is one commencement program each year in May. Candidates for degrees are required to complete an application for degree form on or before deadline dates, as stipulated by each school.

Graduate Programs

Tulane offers research-oriented graduate programs leading to PhD, MA, MFA, and MS degrees through the Schools of Architecture, Business, Law, Liberal Arts, Medicine, Professional Advancement, Public Health & Tropical Medicine, Science & Engineering, and Social Work. Professional degrees are available at both the master's and doctoral levels in the Schools of Architecture, Business, Law, Medicine, Public Health & Tropical Medicine, and Social Work. The School of Professional Advancement, the university's continuing education division, sponsors a Master of Liberal Arts, a Master of Professional Studies, and a Master of Public Administration. Joint degrees are available in several fields.

Ph.D., M.A., M.S., Professional Degree

- School of Architecture (p. 101)
- A. B. Freeman School of Business (p. 120)
- School of Law (p. 162)
- School of Medicine (p. 327)
- School of Public Health & Tropical Medicine (p. 471)
- School of Social Work (p. 608)

Ph.D., M.A., M.F.A., M.S. only

- School of Liberal Arts (p. 203)
- School of Science & Engineering (p. 534)

M.S., Master of Liberal Arts, Master of Professional Studies, Master of Public Administration

- School of Professional Advancement (p. 406)

Architecture

Architecture

Tulane School of Architecture
Richardson Memorial

Mission, Vision, & Values

Mission

The Tulane School of Architecture generates and applies knowledge that addresses urgent challenges of humankind. We do this by educating committed professionals to creatively manage complexity and transform the world through the practices of architecture, urbanism, and preservation.

Vision

We aim to provide global leadership in New Orleans and around the world through excellence in design, research, and practice in the built environment. Our faculty and students will develop socially conscious and environmentally just models to inhabit the planet.

Values

1: We believe that architecture is a broad field that requires visionary skills to impact buildings and the spaces in between, new and historic buildings and sites, cities and rural communities, and sustainable development strategies.

2: We believe architecture should focus on pressing social, environmental, and economic issues.

3: We believe in the continuous examination of the role architecture plays in society.

4: We believe that architecture, planning, and design foster community empowerment.

5: We combine intellectual development and hands-on practice to educate professionals with the highest standards of excellence and ethics.

6: We address global issues through local activism.

7: We collaborate and learn with a multi-disciplinary perspective in the humanities, sciences, and social sciences, including engineering, law, business, and public health.

8: We use advanced technology at the service of contemporary needs.

9: We equip our students with the agency to approach the design process with confidence and urgency.

10: We are committed to finding design solutions for the most vulnerable areas of the planet threatened by climate change, especially rivers and deltas.

11: We are committed to confronting historical inequities of the built environment and preserving architectural and cultural heritage.

Undergraduate Policies

Newcomb-Tulane College Policies

A full description of academic policies for all students in Newcomb-Tulane College (https://catalog.tulane.edu/newcomb-tulane/#academicpoliciestext) can be found in the college's section of this catalog. Students should review these policies thoroughly.

School of Architecture Undergraduate Policies

The School of Architecture's undergraduate programs follow the policies maintained by NTC where applicable. Exceptions and additions to these policies are listed below. Further details on these policies, along with forms, procedures, and other student guidelines, are detailed on the School of Architecture's Student Handbook. Please note that in some instances, the School of Architecture's policies may require revision after publication of the Tulane University Catalog. Please refer to the School of Architecture's website (https://architecture.tulane.edu/student-life/materials-policies/) for the most current information.

Studio Reviews

Studio reviews are a critical part of the architectural design studio curriculum and evaluation process.Attendance at these reviews is mandatory. Policies for mid-term and final studio reviews are equivalent to those for examinations in other courses.

Desktop Requirement for Architecture Students

TuSA requires desktop computers for all students in Architectural Studios. The 1st-year and Design studios are equipped with school owned computers. Second year students in the 5-Year Bachelor of Architecture and 4-year Bachelor of Science in Architecture are required to purchase their own desktops. The cost of the desktop is charged via a computer fee attached to the first term studio course, ARCH 2021 Architecture Studio (6 c.h.).These desktops are the property of the students, which they will take with them after graduation. Additional details about the desktop requirement can be found in the Computer Standardization and Procurement Policy on the TuSA website. The design software is provided by TuSA at no additional cost.

Commendation

Commendation is an honor given to TuSA students in any of the Thesis options who receive an A grade (4.0) in their final project and whose final projects are designated as exceptional by the thesis directors. A student who has received a commendation for their final project will receive a letter of commendation from the Dean and thesis directors upon graduation, as well as be recognized at the TuSA diploma ceremony.

Commencement

A student expecting to receive a degree in May must apply for graduation with their Newcomb-Tulane College (NTC) academic advisor by October 1 of the previous year. Students expecting to complete their degree requirements at any other time should consult their NTC academic advisor for appropriate information. The commencement ceremony is held only in May. Students completing degree requirements in August or December may, however, participate in the ceremony held the following May. All graduates who will not attend the commencement ceremony should request with their NTC academic advisor that their degree be awarded in absentia. All financial obligations to the University must be cleared before the Registrar will release a diploma or a transcript.

Graduate Policies

Graduate School Policies

A full description of academic policies for all students in Graduate Programs (p. 80) can be found in the Office of Graduate and Postdoctoral Studies section of this catalog. Students should review these policies thoroughly.

School of Architecture Graduate Policies

The School of Architecture's graduate programs follow the policies maintained by the Office of Graduate and Postdoctoral Studies. Exceptions and additions to these policies are listed below. Further details on these policies, along with forms, procedures, and other student guidelines, are detailed on the School of Architecture's Student Handbook. Please note that in some instances, the School of Architecture's policies may require revision after publication of the Tulane University Catalog. Please refer to the School of Architecture's website (https://architecture.tulane.edu/student-life/materials-policies/) for the most current information.

Course Loads

For the School of Architecture, the normal course load for graduate students varies from 15 to 18 credits per semester. Students who complete the required courses and elective courses as outlined in their program of study will meet the graduation requirements in the customary timeframe. The Graduate Program Director must approve non-full-time status. Typically, 12 credit hours is considered the minimum for full-time status, and anything below that number may create issues for and jeopardize scholarships and other financial aid arrangements.

With the permission of the Graduate Program Director, students may register for additional credits.

Desktop Requirement for Architecture Students

TuSA publishes minimum standards for computers used for Architectural Studio work. Students in the 3.5-Year Master of Architecture program are required to purchase a desktop configured to these specifications. The cost of the desktop is charged via a computer fee attached to the first fall term studio course, ARCH 6021 Architecture Studio (6 c.h.). These desktops are the property of the students, which they will take with them after graduation. Students with advanced standing in the Master of Architecture program are encouraged to buy the same desktop or to consult with the Director of Fabrication to make sure their current computers meet the published standards. The design software is provided by TuSA at no additional cost. Additional details about the desktop requirement can be found in the Computer Standardization and Procurement Policy on the TuSA website.

Auditing Courses

Any full-time graduate student may audit one course per semester without credit in any school of the University, after completing formal registration and obtaining approval of the instructor for the course. Although credit is not granted for audited courses, such courses are considered part of the student's semester course load and are recorded on the student's permanent record. An audit enrollment that results in an overload is not permitted unless the student is qualified for such an overload. An auditor who is absent excessively will be dropped without record. Students who decide to audit a course after initially attending the course as a grade-seeking student must submit the appropriate

change form to the Registrar following the approval of the Graduate Program Director.

Studio Reviews
Studio reviews are a critical part of the architectural design studio curriculum and evaluation process. Attendance at these reviews is mandatory. Policies for mid-term and final studio reviews are equivalent to those for examinations in other courses.

Partial Medical Withdrawal
To withdraw from a course for medical reasons after the last day to drop a class, or if the reduction in course load will result in part-time status; the student must petition the Graduate Program Director. Submission of this petition may result in referral to Case Management and Victim Support Services. If referral is recommended, approval of withdrawal will be pending of medical recommendation.

Quality of Work Requirement
The School of Architecture is not obligated to give individual warnings to graduate students in danger of probation or exclusion. Each student is responsible for their academic performance and its consequences.

Promotion
School of Architecture students are expected to follow the appropriate curriculum outlined in Programs of Study. A student may be excluded from the School of Architecture for lack of sufficient academic progress toward fulfilling degree requirements. Failure to meet stated degree requirements within a reasonable period of time may result in exclusion. Sufficient academic progress is also measured by minimum credit and grade point requirements. Graduate students in Architecture must maintain the academic standards of the School to meet their degree requirements.

Graduate students who meet the minimum semester requirement of 12 passed credits, maintain at least a 3.0 cumulative GPA, and also earn the required number of credits to advance from one semester to the next are considered to be making progress toward their architectural degree. To qualify for admission into the next year of the program, a full-time graduate student must therefore pass a minimum of 30 credits of B average work in the previous calendar year (August to August, including a summer session, if necessary)

Probation and Exclusion
At the end of the academic year a graduate student must have a minimum of 12 hours of B average work. Students who do not meet these minimum requirements will be placed on probation, which will be communicated by the Graduate Program Director. B average work is defined as courses whose quality point average is at least 3.0. More information on this policy can be found here (https://catalog.tulane.edu/graduate-degrees-professional-programs/graduate-postdoctoral-studies/policies/#graduate-student-grading-policy).

Student Work
Any work performed for credit by students may be retained by the School for record or other uses. Students may, as an alternative, provide suitable reproductions.

Thesis students are required to provide complete documentation of the thesis to the School for the Architecture Library. Although some student work may be retained for a period of time in order to document it, the School is not responsible for any student work (or equipment) left in School of Architecture facilities after the end of the term in which it is executed.

The instructor may retain all examinations and assigned written work for academic and record keeping purposes.

Commencement
A candidate for graduation must complete the total number of credits and all courses required for their program of study, must have a cumulative grade point average in all academic courses of at least 3.0 and must receive certification for graduation. A graduate student expecting to receive a degree in May must apply to graduate by October 1 of the previous year.

Undergraduate

Newcomb-Tulane College Requirements

Newcomb-Tulane College General Education Curriculum

The Newcomb-Tulane College Core Curriculum allows students to explore a wide-range of disciplines and embodies the mission and values of the College by allowing students to have flexibility in their core curriculum courses while exploring a full-range of courses.

The core curriculum—which is composed of a minimum of 30 credits—is divided into three parts: proficiency requirements, distribution of knowledge requirements, and additional requirements. To ensure that students experience the breadth of knowledge at the collegiate level, AP, IB, and Cambridge A-Level courses can be used to satisfy proficiency requirements only in Formal Reasoning and Foreign Language.

Courses will be designated as satisfying the distribution requirements according to the content and methodology rather than the departmental affiliation of the course.

The new core curriculum general education requirements went into effect with the entering class of 2018.

Courses proposed to satisfy core requirements will be ratified by the Newcomb-Tulane Curriculum Committee.

Proficiency Requirements

Writing Skills (2 courses and 6 credits)

- Tier 1: Freshman writing (ENGL 1010 Writing or ENGL 1011 Writing for Academic Purposes) unless the student is exempt because of their score on the A.P/I.B./Cambridge-A level exams.
- Students receiving exemption from ENGL 1010 Writing/ENGL 1011 Writing for Academic Purposes are required to take an approved writing class during their freshman year. Approved courses will have at least 1/3rd of the grade based upon writing (excluding in class exams), but no revision is required.
- Tier 2: One additional writing course at the 2000 level or above taken from an approved list. Approved courses will have at least 1/3rd of the grade based upon writing (excluding in class exams), to include revision and re-evaluation by the instructor.
- Students are encouraged to take the Tier-1 writing course prior to taking the Tier-2 writing course; however, students are not prohibited from taking the Tier-1 and Tier-2 courses simultaneously.

Note: creative writing courses cannot be used to satisfy the writing proficiency requirement.

Formal Reasoning (1 course and 3 credits)

- One course in mathematics or symbolic logic from an approved list.

Foreign Language (0-3 courses)

The foreign language proficiency requirement is achieved in any of the following ways:

- A passing grade in a course at the 2030 level (3rd semester of Tulane 4-credit hour Foreign Language or ASLS coursework) or higher in accordance with assigned placement level.
- A passing grade on a Tulane-administered proficiency exam for students with assigned placements above the 2030 level. Students who do not successfully pass the proficiency exam will be automatically placed and must successfully complete a course at the 2030 level.
- A passing grade in a course at the level of placement above 2030.
- Advanced Placement score of 4 or 5 **in a foreign language test as noted in the AP/IB chart**
- Higher-Level IB score of 5 or higher **in a foreign language test as noted in the AP/IB chart**
- Cambridge A-Level score decided by the appropriate language department.
- SAT II achievement test of 640 or higher **in a foreign language.**

Note: This requirement is waived for students in B.S.E. programs.

Distribution Requirements

(A course can satisfy only one of the distribution areas.)

Mathematics and the Natural Sciences (2 courses including 1 lab science course and 7 credits)

(Those completing the B.F.A. degree need only complete 1 course with lab)

Social and Behavioral Sciences (2 courses and 6 credits)

Textual and Historical Perspectives (2 courses and 6 credits)

Aesthetics and the Creative Arts (3 credits), which can be fulfilled in 1-3 courses.

Additional Core Requirements

The First Year Seminar (p. 77) (1 course, 1-3 credits)

> This requirement can be satisfied by a Tulane Interdisciplinary Seminar (TIDES) course or Colloquium course (COLQ 1010 Freshmen Colloquium Seminar (1-3 c.h.) or COLQ 1020 Freshman Colloquium (1-3 c.h.))

Public Service (2 courses)

Students develop their commitment to civic engagement through the completion of service learning courses experiences. All students will complete their public service through service-learning courses, an approved public service internship, or an approved public service research experience. These courses can also be used to satisfy other areas of general education.

- To meet this requirement for graduation, all students must complete two semesters of service. One of these semesters

must be at the 2000 level or above. The first experience should be completed by the 2nd semester of the sophomore year.

- Service Learning courses require a minimum of 20 hours of service per semester. Those service-learning courses designated as requiring a minimum of 40 hours of service carry one additional credit hour. No course may carry more than 4 credits.

Race and Inclusion (1 course, 3 credits)

One course and 3 credits. Courses that fulfill this requirement will focus on the intersections of race with power, privilege, equity, justice, and/or inclusion and will focus at least 60% their content on these issues in the United States. These courses may also be used to satisfy proficiency or distribution core curriculum requirements.

Global Perspectives (1 course, 3 credits)

One course and 3 credits. Courses that fulfill this requirement will focus at least 60% content with stated objectives to develop historical, cultural, and societal knowledge of an area beyond the United States. These courses may also be used to satisfy proficiency or distribution core curriculum requirements.

For more information please visit the Core Curriculum website (https://college.tulane.edu/core-curriculum/).

Bachelor of Architecture, B.Arch

The five-year Bachelor of Architecture (p. 108) program is a professional degree structured with required courses and electives that provide thorough professional preparation as well as opportunities for study in the liberal arts and advanced study in architecture. The Tulane School of Architecture is committed to design excellence and social responsibility and the B.Arch curriculum developed by the faculty provides a strong core foundation in design, history/theory, and building technologies with opportunities for research and travel in the upper years. This degree is accredited by the National Architectural Accrediting Board.

Bachelor of Science in Architecture, BSA

The Bachelor of Science in Architecture (p. 109) degree is a 4-year-long undergraduate course of study. This program offers an integrated curriculum in the liberal arts and architecture designed to promote an understanding of design as a cultural expression while providing a strong preparation for graduate professional study in architecture or an array of other potential career paths.

Bachelor of Science in Real Estate, BS

The Bachelor of Science in Real Estate (BS) (p. 116) degree is a 4-year-long undergraduate course of study. It is a comprehensive program that teaches the traditional core concepts of real estate including real estate finance and project management, while integrating unique offerings including design and related environmental concerns.

Bachelor of Arts in Design, BA

The Bachelor of Arts in Design (p. 112) undergraduate major explores design as mechanism for positive change. Design students learn to integrate multiple aspects of a problem and respond with interdisciplinary solutions to address challenges of an evolving world. Our program centers design as a state of mind for building empathy, humility, and self-awareness — the first steps toward collaborating with other disciplines when solving complex problems. Rather than focusing on one specific aspect of design, our curriculum touches upon all facets within the design discipline (e.g. graphic, fashion, industrial, interior) building relationships between design innovation and engagement with society, culture, and the built environment.

Graduate

General Graduate School Requirements

A full description of Master's Degree requirements (p. 89) for all students can be found in the Office of Graduate and Postdoctoral Studies section of this catalog. Students should review these policies thoroughly.

Master of Architecture, M.Arch

The professional Master of Architecture (p. 110) degree program is accredited by the National Architectural Accrediting Board (NAAB) and is open to students with a baccalaureate degree in any field from an accredited college or university.

Master of Science in Architectural Research and Design, M.S.Arc

Our post-professional Master of Science in Architectural Research and Design (p. 107) degree is a one-year program intended for individuals with an accredited professional architecture degree interested in teaching and research as a career in the field of architecture.

Master of Science in Historic Preservation, MS

A comprehensive four-semester program providing students with the knowledge and skills to succeed in this dynamic and interdisciplinary field, the Master of Science in Historic Preservation (p. 114)exposes students to the breadth of historic preservation in the US and International contexts.

Master of Sustainable Real Estate Development, MSR

The Master of Sustainable Real Estate Development (p. 117) degree is an interdisciplinary one-year graduate program that prepares students from diverse backgrounds to become effective and influential participants in the fields of real estate finance, design, and development.

Joint Degree in Public Administration / Sustainable Real Estate Development, MPA/MSR

The School of Professional Advancement (SoPA) and the School of School of Architecture (TuSA) offer a 64 credit MPA / MSRED dual degree (https://catalog.tulane.edu/professional-advancement/public-administration/public-administration-mpa-msred/). Joint MPA / MSR degree candidates complete a minimum of 30 credit hours from the MPA and 34 credit hours from the MSRED. Through this joint program, a student would be able to pursue both the MPA and MSR simultaneously and earn both degrees with a lower overall credit requirement than if enrolled in each program separately. Upon completion of joint degree requirements, students will be awarded two separate degrees: an MPA degree awarded by SoPA and an MSR degree awarded by the TuSA. The dual degree option eliminates up to 12 credit hours / 5 classes required to complete each degree separately.

Outreach Initiatives

Research and Learning Through Engagement

The Tulane School of Architecture has a long history of leadership in the built environment. As architects, preservationists, real estate developers, and designers educated to lead complex teams to deal with complex issues, our work is fundamentally interdisciplinary and innovative.

Research and innovation at the Tulane School of Architecture is focused in two main areas: 1) Empowerment of communities through the built environment and 2) River and Delta Urbanism, which are accomplished through professional design excellence and leadership in design education.

The school's Albert and Tina Small Center for Collaborative Design and URBANbuild are two nationally and internationally recognized programs that provide students and faculty the opportunity to work on local community-based projects through internships, studio and class projects, and design-build opportunities. The Yamuna River Project is an interdisciplinary research program whose objective is to revitalize the ecology of the Yamuna River in New Delhi, thus reconnecting India's capital city back to the water.

Albert and Tina Small Center for Collaborative Design

The Albert and Tina Small Center for Collaborative Design is the community design center of the Tulane School of Architecture. Small Center works with community-based organizations to provide design services for constituencies who are underserved by the architecture and design professions. Staff, students, and faculty collaborate with the leadership and constituents of partnering nonprofit organizations throughout New Orleans. Partner organizations bring their project ideas to Small Center, and Small Center brings its design expertise to bear in collaboration, supporting New Orleans residents in imagining and pursuing projects that strengthen neighborhoods and contribute to a city shaped by its citizens.

The center's design work, whether a visual narrative or a built structure, is often a small, but critical contribution to advancing the ongoing efforts of partner organizations. Small Center develops projects in collaboration with faculty designers and professional consultants to create designs that strive for beauty, social justice and true sustainability, while working with other experts to build capacity in partner organizations. This work focuses on equitable process, meaningful outcomes, design excellence, and inclusion as critical parts of the design process.

Follow Small Center's projects, events, and news on our website: small.tulane.edu (http://small.tulane.edu)

URBANbuild

URBANbuild is a design/build program in which teams of students take on the design and construction of prototypical homes for New Orleans' neighborhoods. URBANbuild's partners in the development of these homes have been a number of non-profit community partners such as Neighborhood Housing Services of New Orleans (NHS), the Make It Right Organization of New Orleans (MIR), and Harmony Neighborhood development. Work with these organizations has exposed the School to the needs of the city's underprivileged families as well as to what is required for the revitalization of New Orleans' urban fabric and neighborhoods.

The program is an educational collaboration of individuals, organizations, and businesses committed to revitalizing New Orleans' rich cultural and architectural heritage. Neighborhoods are strengthened by the rebuilding of homes; allied professionals and educators come together for a common cause, and students develop as designers with a deep understanding and commitment to the urban environment.

More information about the design-build program can be found at www.URBANbuild.tulane.edu (http://www.urbanbuild.tulane.edu).

Travel Fellowship

The Tulane School of Architecture annually offers over $50,000 to support student travel and research. This research travel typically takes place during the summer break and allows students to expand their education by funding location-based independent research projects. Recent fellowship recipients have traveled around the world to cities such as Sao Paulo, Amsterdam, Havana, Jerusalem, Paris, and more. They have studied topics such as the use of vernacular building

materials and methodologies in communities in Rwanda, the influence of *wabi-sabi* in architecture and urban design across Japan, and the interaction of architecture and music in Vienna. Although most of the fellowships are not constrained to specific topics, some do have specific requirements.

TuSA Lecture Series

It is highly recommended that all architecture students attend all lectures in the TuSA series. Lecture response assignments may be coordinated per lecture in studio courses. Please note that scheduling conflicts due to evening classes or employment must be brought to the attention of your studio professor in advance. The robust lecture series is considered an integral part of architecture education as well as a forum for the prescient issues of current architectural thought.

Career Explorations (Pre-College)

Career Explorations offers high school students a short, intensive and engaging introduction to architecture and design in two, two-week sessions held during the summer. As high schoolers consider careers, they may not yet have been exposed to the unique blend of visual orientation, creative process, academic investigation, and professional training that forms an design education. Students can participate in one or both sessions exploring the ideas, methods, and issues of architecture and design with Tulane professors and local practicing professionals. Lectures, studio time, digital workshops, field trips, discussions, and critiques will be supplemented by regular design exercises to be completed outside class time.

More information about the Career Explorations summer program can be found here (https://summer.tulane.edu/explorations-architecture-design/).

Architecture

Overview

The Tulane School of Architecture applies knowledge to address urgent challenges of humankind. We do this by educating committed professionals to creatively manage complexity and transform the world through the practices of architecture, urbanism, and preservation. Our vision is to provide global leadership in New Orleans and around the world through excellence in design, research, and practice in the built environment. Our faculty and students will develop socially conscious and environmentally just models to inhabit the planet.

The Tulane School of Architecture offers both undergraduate and graduate degrees in architecture. For more information, please contact the corresponding Program Director.

For more information, including questions regarding admissions, or to contact the Program Directors please visit the Architecture pages (https://architecture.tulane.edu/academics/architecture/) on the School of Architecture's website.

Programs

Undergraduate

Major

- Architecture, B.Arch (p. 108)
- Architecture, BSA (p. 109)

Minors

- Architecture Minor (p. 108)

Graduate

- Architectural Research and Design, M.S.Arc (p. 107)
- Architecture, M.Arch (p. 110)

Architectural Research and Design, M.S.Arc

The post-professional **Master of Science in Architectural Research and Design** is the most advanced degree at the Tulane School of Architecture. Design research builds on the expertise of our faculty and the university as a whole. It is intended for individuals with an accredited professional architecture degree interested in teaching and research as a career in the field of architecture.

The program offers six concentrations.

- Advanced Fabrication and Design
- Building Technologies
- Design/Build
- Design and Social Engagement
- Representation Theory
- River and Coastal Urbanism (Climate Change Adaptation)

The program provides opportunities to form a course of study around students' interests and to develop appropriate strategies within the Research and Design Thesis framework.

Requirements

Fall		Credit Hours
ARCH 6051	Advanced Studio Elective / Research	6
ARCH 6130	Architectural Research Methods	3
ARCH 6980	Thesis Research	3
Architecture Elective 1		3
	Credit Hours	**15**
Year 1		
Spring		
ARCH 6990	Thesis Studio	6
ARCH 6925	Independent Thesis Research	3

Architecture Elective 3		3
	Credit Hours	**15**
	Total Credit Hours	**30**

Architecture Minor

The purpose of the minor in Architecture is to provide an opportunity for Tulane undergraduate students who choose to study architecture beyond the introductory level but who do not wish to pursue a major or a professional degree in the field. The requirements are designed to allow students as much flexibility as possible in pursuing their individual interests while also providing a basic overview of the discipline. Students wishing to minor in architecture should meet with the Tulane School of Architecture Academic Advisor (https://architecture.tulane.edu/about/staff/) to establish a curriculum.

Requirements

The following charts summarize two ways to fulfill the requirement for the Architecture Minor.

Studio Option

Course ID	Title	Credits
ARCH 1110	Intro to Architecture	3
ARCH 1011	Architecture Studio	6
Electives (3 courses)		9
Total Credit Hours		**18**

Non-Studio Option

Course ID	Title	Credits
ARCH 1110	Intro to Architecture	3
Elective (4 courses)		12
Total Credit Hours		**15**

To complete the minor students must have a minimum of 12 unique Architecture credits, (ARCH) courses applied to the minor and no other Major or Minor. Further, in accordance with the Newcomb-Tulane Policy, no courses counting toward the student's first minor will count toward the student's second minor. Learn more here (p.).

At least 9 credits applied to the minor must be completed in Residency at Tulane. Transfer credit or Study Abroad courses approved to satisfy the Architecture minor courses are not considered “in Residency” for the Architecture Minor.

Electives can be chosen from any Architecture (ARCH) course. Students should contact the Tulane School of Architecture Academic Advisor (https://architecture.tulane.edu/about/staff/) for the School of Architecture to plan their minor and get permission to register for any course with school or program restrictions.

Architecture, B.Arch

The five-year Bachelor of Architecture (B.Arch) program is structured with required courses and electives that provide thorough professional preparation and opportunities for study in the liberal arts and advanced study in architecture. This degree is accredited by the National Architectural Accrediting Board (NAAB). (https://architecture.tulane.edu/about/naab-accreditation/)

First Year

First-year courses include required study in design, visual and digital media, architectural history and theory, technological systems, writing, and other electives in cultural knowledge and scientific inquiry. The emphasis in first-year design focuses on developing a fundamental understanding of formal, spatial and material principles in architecture, while obtaining a strong skill base in freehand drawing, descriptive geometry, material techniques, and visual and digital media. First-year electives allow students to supplement their background in physics or calculus, begin or advance foreign language study, broaden their skills in the arts, or choose any other subject area from among dozens offered by the university’s undergraduate divisions. In their first semester, students may also participate in one of the many TIDES (Tulane InterDisciplinary Experience) courses offered by the university to engage other students and faculty in an intimate, interactive environment.

Second and Third Years

Second and third-year courses cover the majority of the program requirements. Intensive studio work in architectural design is complemented by study in architectural history and theory, structures, technological systems, digital media and urban studies. In second-year, students are fully immersed in digital design techniques while learning to incorporate knowledge from historic, environmental, social, programmatic and technological studies into the design studio. This is followed by third-year, where, in the second semester, coordinated coursework allows students a truly synthetic experience in the integrated design of a complex architectural project.

Fourth Year

The fourth-year curriculum involves advanced architectural design in research studio courses as well as upper-level seminars in architectural theory, technology, professional concerns, urban studies, and digital media. In the fourth year of study, emphasis is placed on the relationship of architecture to the urban environment, both locally and globally. Students may spend one semester studying in one of the school's many programs ranging from urban design, to housing, to design/build. In the fourth-year, students will also have the opportunity for international study through various programs and research studios. Upper level study is intended to be diverse and includes many electives intended to provide significant opportunities for study within architecture as well as in the liberal arts and sciences.

Fifth Year

In the fifth year of study, students will develop an advanced thesis through research, analysis and design in one of four topical areas. In the fifth year of study, students will develop an advanced thesis through research, analysis and design in one of four curricular streams.

Requirements Undergraduate Professional Degree Program

Course ID	Title	Credits
History/Theory Sequence

ARCH 2021	Architecture Studio	6
ARCH 2022	Architecture Studio (and ARCH 2892) [3]	6
ARCH 3031	Architecture Studio	6
ARCH 3032	Architecture Studio	6
ARCH 4041	Advanced Studio Elective / Research	6
ARCH 4042	Advanced Studio Elective / Research	6
ARCH 5051	Advanced Studio Elective / Research	6
Digital Media Sequence		
ARCH 2311	Digital Media	3
ARCH 3312	Advanced Digital Media	3
Math and Physics Requirement [4]		
MATH 1150	Long Calculus I	3
or MATH 1210	Calculus I	
or MATH 1310	Consolidated Calculus	
PHYS 1050	Physics for Architects	3
or PHYS 1210	Introductory Physics I	
or PHYS 1310	General Physics I	
Technology Sequence		
ARCH 2211	Site Strategies	3
ARCH 2212	Materials and Methods	3
ARCH 2213	Building, Climate, Comfort	4
ARCH 3214	Structural Systems	4
ARCH 3215	Integrated Building Systems	4
Professional Concerns Sequence		
ARCH 3511	Professional Concerns I	3
ARCH 4512	Professional Concerns II	3
Thesis Sequence		
ARCH 5980	Thesis Preparation	3
ARCH 5990	Thesis Studio	6
Architecture Electives [5]		
General Architecture Electives (3)		9
History/Theory Architecture Elective (1)		3
Non-Architecture Courses (credit counts are approximate and vary by student) [6]		
Additional Newcomb-Tulane core courses		34
General University Electives (as needed to reach total credit count)		
Total Credit Hours		**157**

1 ARCH 1110 Intro to Architecture (3 c.h.) satisfies the Aesthetic and Creative Arts core requirement.

2 ARCH 1111 Topics in Architecture History/Theory (1.5 c.h.) must be taken concurrently with ARCH 1112 Topics in Architecture History/Theory (1.5 c.h.) and ARCH 2113 Topics in Architecture History/Theory (1.5 c.h.) must be taken concurrently with ARCH 2114 Topics in Architecture History/Theory (1.5 c.h.)

3 ARCH 2892 Service Learning satisfies the Tier I Service Learning core requirement.

4 These are Architecture specific requirements for fulfilling the Formal Reasoning, and Math and Natural Sciences Core Curriculum requirements.

5 A minimum of 12 architecture elective credit hours, 3 history/theory credits and 9 general architecture credits, are required. These are usually earned with five courses, but may require additional electives if any of the courses carry fewer than 3 credit-hours.

6 Usually, in addition to the courses used to fulfill the Newcomb-Tulane Core Curriculum requirements, at least two or three 3-credit-hour unrestricted university electives are needed to reach the NAAB required minimum of 40 hours of non-architecture work. However, the total number of university electives may vary for students with advanced placement credit, transfer credit, or when students chose to take courses with higher or lower credit counts.

Notes on School of Architecture Curriculum

- NAAB requires 40 hours be taken in courses without architectural content.
- The B.Arch degree requires a minimum of **157** credit hours. Given the composition of the Newcomb-Tulane and Architecture School requirements, the typical student transcript will consist of a total of **117 architecture credits**, and **40 non-architecture credits**.
- Students are strongly encouraged to reinforce and expand their skills and knowledge through professional internship experiences, recognized in the form of academic credits. Undergraduate students may earn up to a total of six credit hours for internship over the course of their degree.

Notes on Newcomb Tulane College Core Curriculum

- Questions regarding these requirements should be directed to your NTC Academic Advisor.
- University Core and elective courses, with the exception of TIDES and English Composition, may be completed at any time during the student's curriculum.
- To satisfy the Tier 2 Writing Intensive NTC Core Requirement students must take at least one Tier 2 designated course prior to beginning the of fifth year of study.
- Architecture specific requirements within the core curriculum are described in the footnotes to the course requirements (listed above).

Architecture, BSA

The Bachelor of Science in Architecture (BSA) degree is a 4-year-long undergraduate course of study. This program offers an integrated curriculum in the liberal arts and architecture designed to promote an understanding of design as a cultural expression while providing a strong preparation for graduate professional study in architecture or an array of other potential career paths.

The BSA is a pre-professional degree in architecture that allows flexibility in the potential for double majoring and opportunities to join the architecture program after the freshman year. Graduates of this program are prepared to work in architectural or related offices and those who wish to become licensed architects would typically pursue a 2-year course of graduate study to attain an accredited professional degree in architecture. Many graduates of this program will choose

work or graduate education in a wide variety of areas including law, business, real estate, preservation, planning, and landscape architecture. For BSA students interested in pursuing a graduate degree in Architecture we recommend taking more than the minimum required studios.

Requirements

Course ID	Title	Credits
History Theory Sequence		
ARCH 1110	Intro to Architecture [1]	3
ARCH 1111	Topics in Architecture History/Theory [2]	1.5
ARCH 1112	Topics in Architecture History/Theory [2]	1.5

ARCH 2114	Topics in Architecture History/Theory [2]	1.5
Math and Physics Requirements [3]		
MATH 1150	Long Calculus I	3
or MATH 1210	Calculus I	
or MATH 1310	Consolidated Calculus	
PHYS 1050	Physics for Architects	3
or PHYS 1210	Introductory Physics I	
or PHYS 1310	General Physics I	
Studio Sequence		
ARCH 1011	Architecture Studio	6
ARCH 1012	Architecture Studio	6
ARCH 2021	Architecture Studio	6
ARCH 2022	Architecture Studio (& ARCH 2892) [4]	6
ARCH 3031	Architecture Studio	6
or ARCH 4041	Advanced Studio Elective / Research	
or ARCH 4042	Advanced Studio Elective / Research	
Digital Media Requirement		
ARCH 2311	Digital Media	3
Technology Sequence (courses listed below) [5]		**10**
General Architecture Electives (at least 3 courses)		**9**
General NTC Core Curriculum courses and unrestricted electives [6]		**38**
Optional Concentration Electives [7]		**15**
Total Credit Hours		**120**

Course ID	Title	Credits
Technology Sequence (chose 3 out of the 4)		
ARCH 2211	Site Strategies	3
ARCH 2212	Materials and Methods	3
ARCH 2213	Building, Climate, Comfort	4
ARCH 3214	Structural Systems	4

1 ARCH 1110 Intro to Architecture (3 c.h.) satisfies the Aesthetic and Creative Arts core requirement.

2 ARCH 1111 Topics in Architecture History/Theory (1.5 c.h.) must be taken concurrently with ARCH 1112 Topics in Architecture History/Theory (1.5 c.h.) and ARCH 2113 Topics in Architecture History/Theory (1.5 c.h.) must be taken concurrently with ARCH 2114 Topics in Architecture History/Theory (1.5 c.h.).

3 These are Architecture specific requirements for fulfilling the Formal Reasoning, and Math and Natural Sciences Core Curriculum requirements.

4 Satisfies Tier I Service Learning core requirement.

5 The credit count for the technology sequence courses is approximate. The total will be 10 or 11 credits depending on the student's choices.

6 This is an approximation. All students must complete a total of **120** credits to graduate. But the total number of courses or credits dedicated to NTC core requirements and general electives will vary by student.

7 Students are encouraged to choose an area of concentration for their remaining elective courses beyond the NTC and major requirements. The concentration may be used for further study in Architecture (see sample below) or in any other area of study.

Sample concentration in Architecture

Course ID	Title	Credits
ARCH 4041	Advanced Studio Elective / Research [1]	6
or ARCH 4042	Advanced Studio Elective / Research	
Architecture Concentration Electives (at least 5 courses) [2]		15

1 Research studio related to the student's preferred area of concentration. This can be the 5th required studio (instead of ARCH 3031), or an additional 6th studio.

2 These electives would be chosen from a particular subject area such as technology, history/theory, urban studies, or other topic.

Notes on School of Architecture Curriculum:

Students are strongly encouraged to reinforce and expand their skills and knowledge through professional internship experiences. These experiences are recognized in the form of academic credits. Undergraduate students may earn up to a total of six credit hours for internship over the course of their degree. See Internship for Academic Credit (http://architecture.tulane.edu/courses/arch-45606560/) for details.

Notes on Newcomb Tulane College Core Curriculum:

- University core & elective courses, with the exception of TIDES and English Composition, may be completed at any time during the student's curriculum.
- To satisfy the Tier 2 Writing Intensive NTC Core Requirement students must take at least one Tier 2 designated course prior to beginning the of fourth year of study.
- Questions regarding these requirements sould be directed to your NTC Academic Advisor.

Architecture, M.Arch

The professional Master of Architecture degree program (M.Arch) is accredited by the National Architectural Accrediting Board (NAAB) and is open to students with a baccalaureate degree in any field from an accredited college or university. The M.Arch program fulfills the

professional degree requirements leading to architectural licensure and registration. The 3.5 year curriculum and the option for advanced standing accommodate students' diverse undergraduate backgrounds. Please see https://architecture.tulane.edu/academics/architecture/m-arch (https://architecture.tulane.edu/academics/architecture/m-arch/) for a more detailed overview.

3.5-year curriculum

The 3.5-year curriculum is structured for students with an accredited baccalaureate degree in any field. The seven-semester curriculum begins with a summer semester, followed by six semesters that include core instruction to fulfill NAAB requirements in addition to elective studios and seminars.

Advanced standing option

AttheTulane University School of Architecture, we understand thateachstudent'spathto pursuing a Master of Architectureprofessional degree(M.Arch) is unique.We thereforeoffer an Advanced Standing Portfolio Assessmentoptionfor applicants who have had previous education or experience in architecture. TheAdvanced Standing portfolio Assessment will constitute an opportunity to acceleratea student'sprogress toward theM.Archdegree. Applicantswith pre-professional degrees, priorlearning experiences, and demonstrable architecture skills, can be evaluated and potentiallyreduce required courses inM.Archdegreepathat Tulane.

Upon application to the M.Arch program, students may request an advanced standing evaluation of their portfolio, academic records, and previous course syllabi for admission with Advanced Standing. Qualified previous learning experiences may satisfy corresponding degree requirements in the M.Arch program. Such evaluations are conducted by a qualified faculty admissions committee, who carefully assess each instance of previous experience and correlate their findings to our degree requirements. If the committee determines that a student has indeed met these requirements, they will be granted advanced standing toward specific courses.

Advanced standing credit is recorded in each student's degree audit from their very first day in the program. This means that students can effectively shorten their required course load, allowing them to focus more deeply on areas where they seek further development, and/or shortening the total time needed to achieve the degree.

It is important to note that a minimum of 50% of the required degree credits must be taken in residence at Tulane to comply with the university's residency requirement policy. This equates to completing 56 credits of the M.Arch's 111 required credit hours in residence, ensuring that while students can benefit from their prior experiences, they still engage meaningfully with the curriculum of the M.Arch program.

The possible courses for which advanced standing may be granted include, but are not limited to:

- ARCH 6011 Architecture Studio (6 c.h.)
- ARCH 6012 Architecture Studio (6 c.h.)
- ARCH 6021 Architecture Studio (6 c.h.)
- ARCH 6022 Architecture Studio (6 c.h.)
- ARCH 6110 Intro to Architecture (3 c.h.)
- ARCH 6111 Topics in Architecture History/Theory (1.5 c.h.)
- ARCH 6112 Topics in Architecture History/Theory (1.5 c.h.)
- ARCH 6113 Topics in Architecture History/Theory (1.5 c.h.)
- ARCH 6114 Topics in Architecture History/Theory (1.5 c.h.)
- ARCH 6211 Site Strategies (3 c.h.)
- ARCH 6212 Materials and Methods (3 c.h.)
- ARCH 6213 Building, Climate, Comfort (4 c.h.)
- ARCH 6214 Structural Systems (4 c.h.)
- ARCH 6311 Digital Media (3 c.h.)
- ARCH 6512 Professional Concerns II (3 c.h.)
- ARCH electives in M.Arch program

Dual degree options

Graduate students may pursue a Master of Architecture degree in conjunction with a Masters of Science in Historic Preservation or Masters of Sustainable Real Estate degree, typically with one additional summer semester of course work. Learn more on the Dual Degree (http://architecture.tulane.edu/programs/dual-degree/) page on the School of Architecture's website, or by the contacting Program Directors of Architecture (https://architecture.tulane.edu/academics/architecture/), Historic Preservation (https://architecture.tulane.edu/academics/preservation/) or Real Estate Development (https://architecture.tulane.edu/academics/real-estate/).

* Students may be granted advanced standing credit based on portfolio assessment and previous coursework.

[1] ARCH 6111 concurrently with ARCH 6112 and ARCH 6113 must be taken concurrently with ARCH 6114

[2] Advanced standing students must take ARCH 6130 Architectural Research Methods in the fall of their first year.

[3] Students who have been awarded advanced standing typically receive credit for three out of the five available technology courses. If a student qualifies for advance standing on four, they must take an additional elective course. Advanced standing is not available for ARCH 6215 Integrated Building Systems.

[4] The Architecture program offers unique electives each semester. Please consult the Schedule of Classes for current Architecture Electives. All 3-credit-hour ARCH 6000-level courses not included in the program requirements above are recognized as Electives. Additionally, select 3-credit-hour courses in Sustainable Real Estate Development (SRED) and Historic Preservation (PRES) are recognized as electives. Contact graduate advisor for information on current and upcoming offerings of recognized Architecture electives in SRED and PRES.

Design

Overview

The Design Program within the Tulane School of Architecture introduces students to the discipline of design as a visual language and a mechanism for positive change. Students learn vital skills of creative problem-solving through a rigorous curriculum that combines tactile and digital experimentation.

The Design Program offers a major and a minor, both intended to provide students with an interdisciplinary approach to design thinking and making. Rather than offering a single design focus, our program touches upon multiple design disciplines including graphic, textiles, industrial, interior—encouraging the building of relationships between design innovation and engagement with society, culture, and the built environment. The program cultivates values of curiosity, creativity, and empathy as future-oriented skills that prepare students for challenges of an evolving world.

For questions the program, please visit the Design Program pages (https://architecture.tulane.edu/academics/design/) on the School of Architecture's website.

Design, BA

Overview

The Bachelor of Arts in Design undergraduate major explores design as mechanism for positive change. Design students learn to integrate multiple aspects of a problem and respond with interdisciplinary solutions to address challenges of an evolving world. Our program centers design as a state of mind for building empathy, humility, and self-awareness — the first steps toward collaborating with other disciplines when solving complex problems. Rather than focusing on one specific aspect of design, our curriculum touches upon all facets within the design discipline (e.g. graphic, fashion, industrial, interior) building relationships between design innovation and engagement with society, culture, and the built environment.

Located within the School of Architecture, this program emphasizes design practice across disciplines, including and beyond architecture. Students will learn methods of creative problem-solving, visual communication, and spatial composition through a series of lecture-based and project-based studio courses. The Bachelor of Arts in Design program educates students to apply design thinking across diverse fields in humanities, business, and sciences and invites change-minded students to learn principles of design and methods of creative process to be effective in a range of applications. The major is intended for students interested in an interdisciplinary path through innovative approaches and collaborative projects.

Requirements

Course ID	Title	Credits
Pre-Requisites		
DESG 1105	Intro Design/Creative Thinking	3

DESG 1110	Introduction to Design History	3
DESG 1005	Fundamentals of Design & Making	4
Core Requirements		
DESG 2005	Design Studio I	4
DESG 2305	Visual Comm & Advocacy	4
DESG 3005	Design Studio II	4
DESG 2705	Design & Society	3
DESG 3010	Prototyping Solutions	3
DESG 4005	Design Studio III	4
Electives & Capstone		
Three Design Electives from the approved list [1]		9
DESG 4950	Senior Capstone	3
Total Credit Hours		**44**

Design Majors must complete a minimum of 30 unique design credits (courses beginning with "DESG" in the course catalog.) Course equivalencies, transfer credits, and/or study abroad credits applied toward the Design Major must not exceed a total of 14-credits.

[1] The Design program offers unique electives each semester. Please consult the Schedule of Classes for current Design Electives. All courses beginning with ARCH, ARST, DESG, and SISE are recognized as Design Electives. Meet with Major Advisor to request approval for alternative design related courses.

Notes on Newcomb Tulane College Core Curriculum:

- All students must complete a total of **120 credits to graduate**. The total number of courses or credits dedicated to NTC core requirements and general electives will vary by student.
- NTC core curriculum requirements are not listed. Questions regarding these requirements should be directed to your NTC Academic Advisor.
- The following courses in the Design Program satisfy distribution areas requirement within the NTC core curriculum as noted below:
  - DESG 1005 Fundamentals of Design & Making (4 c.h.) – Aesthetics and Creative Arts
  - DESG 1105 Intro Design/Creative Thinking (3 c.h.) – Aesthetics and Creative Arts
  - DESG 1110 Introduction to Design History (3 c.h.) – Aesthetics and Creative Arts & Global Perspectives
- **Design cannot be chosen as a second major for students pursuing BARCH or BSA Architecture majors due to overlapping curricula.**

Design Minor

Overview

The Minor in Design provides an opportunity for Tulane undergraduate students to study design principles beyond the introductory level. Students pursuing majors with other schools utilize the dynamic and catalytic methods of design process and critical thinking as strategies within other areas of study. The requirements of the minor are designed to allow students flexibility to pursue individual interests while gaining an overview of the discipline.

Requirements

Course ID	Title	Credits
DESG 1105	Intro Design/Creative Thinking	3
DESG 1005	Fundamentals of Design & Making	4
DESG 2305	Visual Comm & Advocacy	4
DESG 2705	Design & Society	3
or DESG 1110	Introduction to Design History	
Approved Elective [1]		3
Total Credit Hours		**17**

Design Minors must complete a minimum of 14 unique design credits (courses beginning with "DESG" in the course catalog.) Course equivalencies, transfer credits, and/or study abroad credits applied toward the Design Minor must not exceed a total of 3-credits.

[1] The Design program offers unique electives each semester. Please consult the Schedule of Classes for current Design Electives. All courses beginning with ARCH, ARST, and SISE are recognized as Design Electives. Meet with Major Advisor to request approval for alternative design related courses above the 2000-level.

Historic Preservation

Overview

The Historic Preservation program at Tulane School of Architecture offers an interdisciplinary opportunity to learn about preservation in one of America's most historic cities. Students learn critical skills involving investigation and documentation of the built environment, architectural history and conservation, advocacy, economics, and technology.

For questions regarding admissions, or to contact the Program Director, please visit the Historic Preservation pages (https://architecture.tulane.edu/academics/preservation/) on the School of Architecture's website.

Graduate

- Historic Preservation, MS (p. 114)

Certificates

- Historic Preservation, Certificate (Graduate) (p. 114)

Historic Preservation Minor

Overview

Students in the undergraduate Minor in Historic Preservation master fundamentals of historic preservation practice through courses in theory and practice, architectural conservation, and architectural

history. Historic Preservation students meet experts in the field and often work with organizations engaged in historic preservation projects and advocacy. Courses require fieldwork that may include regional site visits.

Requirements

Course ID	Title	Credits
PRES 2100	Intro to Historic Preservation [1]	3
PRES 2220	Conservation Techology	3
PRES 2120	History of American Architecture I	3
PRES 4105	Architecture, Heritage, and Culture	3
PRES 4110	Heritage Documentation	3
PRES 4120	History of American Architecture II	3
Total Credit Hours		**18**

[1] PRES 2100 must be completed before any other PRES courses can be taken.

Students attaining grades above a 3.0 in two or more PRES courses may receive advanced standing in the graduate-level Master of Science in Historic Preservation program upon separate application and acceptance to the Masters program. Interested students should contact the director of the Historic Preservation program for more information.

Historic Preservation, Certificate (Graduate)

Overview

Certificate in Historic Preservation from Tulane's School of Architecture is a valuable addition to a master degree in Architecture (M.Arch) (p. 110) or Sustainable Real Estate Development (MSRED) (p. 115). In addition to a studio track, best suited for M.Arch students, a non-studio track is available for graduate students in other fields such as history, anthropology, geography, and planning who wish to gain general knowledge, understanding, and ability in this specialized field.

The certificate program is also available as a standalone program for graduate level students not wishing to pursue any concurrent master or doctorate program. Working professionals enrolled only in the certificate program have the flexibility of completing courses at their own pace and even attending online.

Requirements

Course ID	Title	Credits
Studio Track		
PRES 6100	Introduction to Historic Preservation	3
PRES 6220	Conservation Technology	3
PRES 6041	Preservation Studio I	6
or PRES 6042	Preservation Studio II	
PRES 6120	History American Architecture [1]	3
or PRES 6151	New Orleans Architecture	
Total Credit Hours		**15**

Course ID	Title	Credits
Non-Studio Track		
PRES 6100	Introduction to Historic Preservation	3
PRES 6220	Conservation Technology	3
PRES 6120	History American Architecture [1]	3
or PRES 6151	New Orleans Architecture	
2 6000-level PRES electives		6
Total Credit Hours		**15**

[1] The history course option may be substituted for a different Historical Preservation elective course with approval from the Program Director.

General Notes

- The required courses and approved electives may be taken in any order, although it is highly recommended that the Introduction and, if applicable, Studio courses be the first ones taken.
- M.Arch students are encouraged to include a component of preservation in their ARCH 6990 Thesis Design Studio.

Historic Preservation, MS

Overview

The Masters of Science in Historic Preservation trains students to become leaders in the field of historic preservation and its allied disciplines. A comprehensive four-semester program provides students with the knowledge and skills to succeed in this dynamic and interdisciplinary field. The first two semesters provide training in the foundational elements of preservation practice in the 21st century, including coursework in the history and theory of the discipline, regional and national architecture, architectural conservation, archival studies, and historic building investigation and documentation. Year two provides students with further education in architectural conservation and an introduction to preservation law. It also provides an opportunity to specialize in various areas of historic preservation including: digital technology, heritage resilience and sustainability, and architectural conservation. The program culminates in a thesis or practicum. Ultimately the program exposes students to the breadth of historic preservation in the United States and International contexts. Using New Orleans as a laboratory, one that is linked to the wider Gulf Coast and Caribbean region, students are trained in an incomparable context for challenges that cross-cut historic preservation from issue in climate change, heritage justice, and housing affordability. In addition to the MS in Historic Preservation, students may apply to and concurrently complete master degrees in either Architecture (M.Arch) or Sustainable Real Estate Development (MSRED). Students can also specialize through the certificate program in Sustainable Real Estate Development (SRED).

Requirements

Course ID	Title	Credits
PRES 6100	Introduction to Historic Preservation	3
PRES 6120	History American Architecture	3
PRES 6130	Archival and Historical Research Methods	3
PRES 6041	Preservation Studio I	6

PRES 6980	Preservation Research Seminar	3
PRES 6985	Preservation Practicum	6
or PRES 6990	Preservation Thesis	
Four 6000-level PRES Electives [2]		12
Total Credit Hours		**60**

[1] PRES 6560 Historic Preservation Internship can be completed over the summer between years 1 and 2. Credit will be applied in the 2nd year fall term.

[2] Selected ARCH (Architecture), SRED (Sustainable Real Estate Development), or SISE (Social Innovation/Social Entrepreneurship) courses may count as electives. Consult with the program director for approval.

Curricular paths

Detailed, term-specific curricular paths for the MS in Historic Preservation as well as for the dual degree options – "MArch +MS in Historic Preservation", or "MArch (Adv Standing) + MS in Historic Preservation" – can be found on the School of Architecture's website. (https://architecture.tulane.edu/academics/dual-degree-programs/)

Real Estate Development

Overview

The Sustainable Real Estate Development Program offers opportunities for both undergraduates and graduates to gain core skills and practical experience in the real estate industry.

At the undergraduate level, students can choose between a Bachelor of Science in Real Estate or a Minor in Real Estate. In addition to being offered during the regular school year, all courses required for the minor are also offered during the summer. Students can take advantage of the summer course offerings individually, or they can choose to pursue the full minor curriculum during a single summer for a flat rate by registering for the Real Estate Summer Minor. Undergraduate students are encouraged to consider Real Estate as a first or second major in a double major path.

At the graduate level, students may pursue a Master of Sustainable Real Estate Development (MSRED), which is a practice-based, three-semester graduate program that prepares students with classes in real estate finance and economics, design, planning and legal issues in development.

For questions regarding admissions, or to contact the Program Directors, please visit the Sustainable Real Estate Development pages (https://architecture.tulane.edu/academics/real-estate/) on the School of Architecture's website.

Real Estate Minor

A Minor in Real Estate is offered through the Tulane School of Architecture and is open to all Tulane undergraduate students. The program is designed to provide students with the essential knowledge and skillsets needed for entry-level positions and careers in the real estate industry. The program provides a strong foundation in Real Estate as a business, specifically focused on careers as an investor, owner, developer, financial analyst, project manager, and consultant.

To earn a Minor in Real Estate students must complete five (5) courses, including four (4) core courses and one (1) approved elective course.

The minor may be completed over a single summer for a flat tuition rate -- one course during the "May Mester", and two courses during each of the the Early Summer and Late Summer terms. Or students can choose to take courses at their own pace, during any of the fall, spring, or summer terms prior to graduation. Visit the Real Estate Summer Minor webpage (https://architecture.tulane.edu/academics/real-estate/summer-minor/) for more details including tuition fees, dates, etc.

All courses in the minor also count towards the major requirements should a student later decide to instead pursue the BS in Real Estate.

Requirements

Course ID	Title	Credits
SRED 2010	Introduction to Real Estate	3
SRED 2020	Real Estate Transactions	3
SRED 2030	Real Estate Finance	3
SRED 2040	Fundamentals of Real Estate Development	3

Real Estate, BS

Overview

The Bachelor of Science in Real Estate is a comprehensive program that teaches the traditional core concepts of real estate including real estate finance and project management, while integrating unique offerings including design and related environmental concerns. Traditional career paths include real estate investment and financial analysis, project design and development, asset and portfolio management, and urban planning and policy.

The BSRE curriculum is intended for all undergraduate students seeking to pursue careers in real estate, including double majors in architecture, business, environmental studies, and other liberal arts degrees.

- Faculty of Industry Professionals: Learn from current practitioners who bring real-world experience and a commitment to teaching
- Entrepreneurial Opportunities: The unique Design + Development Studio involves practical skill-building while working on real-world real estate proposals
- Research & Analysis: Students and faculty engage in industry research to advance the field
- Global Relevance: Coursework focuses on local examples of key national and global issues, such as river and water management, historic and cultural preservation, community health and engagement, and transportation and regional growth

Notes on Newcomb-Tulane College Core Curriculum:

- The following courses in the Real Estate Program satisfy the **Aesthetic and Creative Arts** requirements within the core curriculum:
  - ARCH 1110 Intro to Architecture (3 c.h.)
  - DESG 1105 Intro Design/Creative Thinking (3 c.h.)
- The following courses in the Real Estate Program satisfy the **Social and Behavioral Science** requirement within the core curriculum:
  - ECON 1010 Introduction to Microeconomics (3 c.h.)
  - ECON 1020 Introduction to Macroeconomics (3 c.h.)
- The following courses in the Real Estate Program satisfy the **Global Perspectives** requirement within the core curriculum:
  - ARCH 1110 Intro to Architecture (3 c.h.)

Sustainable Real Estate Development Certificate (Graduate)

The SRED Certificate program gives students the basic tools and knowledge to navigate the demands of being part of a development team and contribute with solutions that provide a lasting, positive impact on the project, its users and surrounding community. This certificate can supplement both our Master of Architecture degrees, and our Master of Preservation Studies degree. Architects are at the forefront of design decisions in projects. They must be integrated with the development team at large. Essential knowledge of finance tools, as well as understanding the environmental and social impact of development projects are crucial to successfully participating in today's projects small and large. Preservationists must also be able to engage the development team on their own terms, articulating the value of integrating long-term sustainable solutions into projects.

Today, over 54% of the world's population lives in cities and this number is expected to grow to 66% in the next few decades. As urban life becomes more complex, the need for providing sustainable solutions for the built environment is more imperative than ever. We define sustainability as development that addresses immediate needs while reducing long-term stresses.

Students who earn the SRED Certificate will be able to:

- Understand basic concepts of real estate finance needed for determining a project's viability.
- Understand sustainable design and construction principles.
- Identify real estate finance products that can be applied to a project.
- Understand the urban environment and its relationship to the political, economic, environmental and cultural context.

Applications

Applications must be submitted by the second semester of the student's second year. Contact the MSRED Program Director for additional information.

Sustainable Real Estate Development, MSR

The Master of Sustainable Real Estate Development (MSRED) degree is an interdisciplinary one-year graduate program that

prepares students from diverse backgrounds to become effective and influential participants in the fields of real estate finance, design and development. We equip our graduates with a blended education in business, economics, sustainable design, urbanism, and legal issues. The MSRED degree is practice-oriented and emphasizes opportunities for students to gain experience and build a professional network in innovative for-profit, nonprofit and public settings.

- **Faculty of Industry Professionals:** Learn from current practitioners who bring real-world experience and a commitment to teaching.
- **Experiential Learning:** Get direct field experience through structured internships, client-based research projects, and field study trips to learn the challenges and successes in other cities nationally.
- **Alumni Success:** MSRED alumni are making an impact in high-level leadership positions across the industry.
- **Connections with Local and National Organizations:** Build a professional network through interaction with industry professionals at the local, state and national levels.

Social Innovation & Social Entrepreneurship

Overview

The Social Innovation and Social Entrepreneurship (SISE) program at Tulane School of Architecture aims to provide students with skills to create a more just and equitable society. Grounded in principles of equity, diversity, and inclusion, the program introduces students to concepts of social innovation, mindsets of human-centered design, and frameworks for social impact leadership. The SISE program offers an undergraduate SISE Minor and a Graduate Certificate in Public Interest Design.

The SISE Minor is an interdisciplinary minor for undergraduate students from across the campus. The minor's core competencies revolve around four areas: social innovation, social value creation, systems thinking, and design-thinking/human-centered design. Students in the minor develop an understanding of complex problems while developing a toolkit to create positive social and environmental change.

The SISE program also offers a Graduate Certificate in Public Interest Design, in collaboration with the Architecture and Historic Preservation programs in the School of Architecture. The certificate is designed to advance Public Interest Design, or the practice of design for the benefit of the broader public, especially for those in disadvantaged and historically marginalized communities.

SISE also offers Taylor Your Life, a career development lab that teaches students how to approach their future with the mindset and toolkit of a designer.

The SISE Minor and "Taylor Your Life" courses have been developed in partnership with the Phyllis M. Taylor Center for Social Innovation and Design Thinking (https://taylor.tulane.edu/). Students are encouraged to utilize opportunities and resources provided through the Taylor Center.

Students intending to take the minor should submit a minor declaration form to the Social Innovation and Social Entrepreneurship (SISE) program director. For other questions please contact the Program Director and visit the Social Innovation/Social Entrepreneurship pages (https://architecture.tulane.edu/academics/social-innovation/) on the School of Architecture's website.

- Public Interest Design Certificate (Graduate) (p. 119)

Public Interest Design Certificate (Graduate)

Overview

The Certificate in Public Interest Design (PID) at the School of Architecture at Tulane University is an 18-credit graduate-level certificate focusing on training and preparing future practitioners of Public Interest Design in the field of architecture, planning, historic preservation, and design. The certificate is designed to advance Public Interest Design, or the practice of design for the benefit of the broader public, especially for those in disadvantaged and historically marginalized communities. The program is envisioned to provide students with a framework of theories and hands-on experience on how architecture, design, and the built environment can and should engage with communities toward creating a more just, equitable, inclusive, and sustainable society and world.

Students enrolled in the Master of Architecture (https://catalog.tulane.edu/architecture/architecture/architecture-march/) and Master of Science in Historic Preservation (https://catalog.tulane.edu/architecture/preservation/historic-preservation-ms/)in the School of Architecture can add the Certificate in Public Interest Design in conjunction with their graduate degree programs. The certificate requires the completion of 18 credits composed of three core courses, one design studio, and one elective course.

Students intending to take the certificate should submit a declaration form to the Social Innovation and Social Entrepreneurship (SISE) program director. For other questions please contact the Program Director and visit the Social Innovation/Social Entrepreneurship pages (https://architecture.tulane.edu/academics/social-innovation/) on the School of Architecture's website.

Social Innovation & Social Entrepreneurship Minor

The Social Innovation and Social Entrepreneurship (SISE) minor is a 15-credit interdisciplinary minor for undergraduate students from across the campus. The SISE minor provides students with skills to create a more just and equitable society. Grounded in principles of equity, diversity, and inclusion, the minor's core competencies revolve around four areas: social innovation, social value creation, systems thinking, and design-thinking/human-centered design. Students in the minor develop an understanding of complex problems while developing a toolkit to create positive social and environmental change.

The SISE Minor and "Taylor Your Life" courses have been developed in partnership with the Phyllis M. Taylor Center for Social Innovation and Design Thinking (https://taylor.tulane.edu/). Students are encouraged to utilize opportunities and resources provided through the Taylor Center.

A. B. FREEMAN SCHOOL OF BUSINESS

A. B. Freeman School of Business

Goldring/Woldenberg Business Complex
7 McAlister Place
New Orleans, LA 70118
https://freeman.tulane.edu/

The A. B. Freeman School of Business offers the Bachelor of Science in Management degree at the undergraduate level. In addition, the Freeman School offers a variety of graduate degrees: Master of Accounting, Master of Business Administration, Master of Business Analytics, Master of Finance, Master of Global Management, Master of Management, Master of Management in Energy and Doctor of Philosophy in Business Administration.

Mission

We contribute to building a sustainable future by creating and disseminating high-impact business knowledge and by developing adaptable, transformative business leaders.

Core Values

- Integrity as a compass
- Knowledge for good
- Unconventional innovation
- Inclusive community
- Collaborative engagement
- Inspiring excellence

History

Tulane University's College of Commerce and Business Administration was founded in September 1914, supported by business leaders who envisioned a school that would strengthen the New Orleans economy and capitalize on its international ties. Under the leadership of Dean Morton A. Aldrich, the college joined 16 leading business schools in founding the Association to Advance Collegiate Schools of Business (AACSB International) and thus set the standards for business education in the United States. The school has maintained continuous accreditation since 1916.

In 1984, the A. B. Freeman School of Business was named in honor of Alfred Bird Freeman, chairman of the Louisiana Coca-Cola Bottling Co. A renowned business innovator and civic leader, Freeman advocated foreign trade zones and further development of the port of New Orleans.

Today, the Freeman School continues to meet the needs of the business community - locally, nationally, and internationally - by educating the leaders of today and tomorrow.

Policy Revisions

The Freeman School reserves the right to modify any of its policies or procedures during the academic year.

In the event of a conflict between the policies or procedures stated in this catalog and in other publications of the Freeman School, this document, as revised and on file in the Office of Undergraduate Education and the Office of Graduate Programs, takes precedence. The University reserves the right to amend or change any of its established regulations, courses, or charges at any time, and to make such changes applicable to current students and to new students.

Undergraduate Policies

Newcomb-Tulane College Policies

A full description of academic policies for all students in Newcomb-Tulane College (p. 22) can be found in the college's section of this catalog. Students should review these policies thoroughly.

In cases where NTC students require the approval of the NTC Dean, such as excused absences for final exams in business school courses, BSM students require the approval of Freeman's Associate Dean for Undergraduate Education.

School of Business Undergraduate Policies

The undergraduate programs of the Freeman School of Business follow the policies maintained by NTC where applicable. Exceptions and additions to these policies are listed below. Further details on these policies, along with forms, procedures, and other student guidelines, are available on the BSM Current Student page on Canvas or from the Office of Undergraduate Education (GWBC 204).

Enrollment Requirements

Current Tulane University students with a minimum 2.000 cumulative GPA may be eligible to enroll in the Freeman School. Interested students should obtain a major/minor declaration form from the Office of Undergraduate Education in suite 204 of the GWBC or from the Academic Advising Center in Mussafer Hall.

The Associate Dean for Undergraduate Education may dismiss a BSM student from the Freeman School if the student has a cumulative GPA of 1.999 or lower for two consecutive semesters, and if the student has taken at least five courses required for the BSM degree, including required non-business courses. Dismissal permanently bars the student from taking additional business courses and from earning either a BSM degree or a business minor.

Auditing Courses

The Freeman School does not allow students to audit business courses. A student interested in auditing courses at the other undergraduate schools at Tulane should consult that school and the Newcomb-Tulane College Dean's Office.

Cross-Registration and Exclusions

Students may fulfill non-business electives at the Schools of Architecture, Liberal Arts, Public Health and Tropical Medicine, or Science and Engineering. Students can use ROTC courses to satisfy up to 12 credits. Students may fulfill up to nine credits at the Schools of Professional Advancement (SoPA) and/or Social Work (SOWK), subject to the restrictions listed below.

Excluded Courses: The following courses do NOT satisfy BSM degree requirements; Freeman considers these courses as extra coursework, over and above the credits required for the BSM degree:

- **Business Courses from School of Professional Advancement:**

  Business courses offered by the School of Professional Advancement (SoPA) do NOT satisfy BSM degree requirements. These courses typically have the following prefixes, but others may apply. Students should always check with their Freeman Academic Counselor before enrolling in courses outside the Freeman School to determine their use towards the BSM degree.

  BSAC - all Accounting courses
  BSBL - all Business Law courses
  BSFN - all Finance courses
  BSLS- all Business Leadership courses
  BSMK - all Marketing courses
  BSMT - all Management courses
  CPST - all Information Systems courses
  CSEC - all Economics courses
  GLSP - all Legal Studies courses
  HRDV - all Human Resources courses
  REAL - all Real Estate courses
  Disney College Business courses

- **Other Excluded Courses:**

  Undergraduate Law (LAWU) courses
  Majors, Internships and Jobs (CRDV) courses

- **Loyola University and the University of New Orleans:**

  BSM students may not cross-register for business courses at Loyola University or the University of New Orleans. Freeman treats courses taken at either university as transfer work.

Double Majors

Freeman limits BSM students to either two business majors or one business major and one business minor. If a student chooses to pursue a double major within Freeman, or a major and a minor, the student cannot double count courses and must select how the courses will apply to each major/minor. Students must meet with their designated business school academic counselors each semester to plan their courses of study. Each student is responsible for individual course selection and for meeting the requirements for graduation.

A BSM student wishing to pursue a second major outside of Freeman should consult with the Academic Advising Center and review the Newcomb-Tulane College policy for information regarding a second major.

Freeman GPA

Freeman offers courses in the following areas of study: Accounting (ACCN), Energy (ENRG), Finance (FINE), International Business (INBS), Information Management (INFO), Legal Studies in Business (LGST), Management Communication (MCOM), Management (MGMT), Management Science (MGSC), Marketing (MKTG), Taxation (TAXN), Career Management (CDMA) and where

applicable, General Business (BUSG). Students should work with their BSM Academic Counselor to determine which courses will count towards their declared BSM programming.

To graduate, BSM students need 124 credits **of academic work and a 2.0 cumulative grade point average overall, with a minimum cumulative grade point average of 2.0 in their business and major/minor/certificate courses.** BSM students use Freeman electives to satisfy major requirements. Students may fulfill other electives at other schools on campus. Students should discuss all course selections with their advisors and regularly check progress toward graduation on the Degree Works Audit, accessible through Gibson.

The Freeman GPA is calculated using all courses attempted from the School of Business and the following non-business required courses: ECON 1010 Introduction to Microeconomics (3 c.h.); ECON 1020 Introduction to Macroeconomics (3 c.h.); MATH 1150 Long Calculus I (3 c.h.) and MATH 1160 Long Calculus II (3 c.h.) or MATH 1210 Calculus I (4 c.h.); MATH 1230 Statistics For Scientists (4 c.h.); and PSYC 1000 Introductory Psych (3 c.h.).

Grading System

Federal law prohibits the University from releasing grades or other confidential information to third parties, including parents and guardians, unless the student provides the Newcomb-Tulane College Dean's Office with written authorization for release of such information. Students may make this request at any time.

The University measures a student's progress toward graduation not only by credits earned, but also by the grade-point average. The grade-point average is determined by dividing the student's total number of quality points by the total number of quality hours. Graduation requires a 2.000 grade-point average, equivalent to an average grade of C, in all courses, as well as in the major.

Grade	Description
A	4.00
A-	3.667
B+	3.333
B	3.000
B-	2.667
C+	2.333
C	2.000
C-	1.667
D+	1.333
D	1.000
D-	0.667
F	0.000
U	Unsatisfactory; not counted in grade-point average and is not counted in earned hours
UW	Unofficial withdrawal; counts in grade-point average as a failing grade and earns no quality points
WF	Withdrawn failing; counts in grade-point average as a failing grade and earns no quality points
I	Incomplete; not counted in grade-point average
IP	In progress; not counted in grade-point average
W	Withdrawn; not counted in grade-point average

NON-STANDARD GRADES

The following information pertains to all schools:

Grade	Description
S	Satisfactory; not counted in grade-point average, but is counted in earned hours
U	Unsatisfactory; not counted in grade-point average and is not counted in earned hours
UW	Unofficial withdrawal; counts in grade-point average as a failing grade and earns no quality points
WF	Withdrawn failing; counts in grade-point average as a failing grade and earns no quality points

Grading Guidelines

The Freeman School faculty approved the following recommended grading policy for the class GPA for each section of BSM courses:

- Core BSM courses are expected to have a maximum class GPA in the range of 2.700 to 3.000.
- Elective BSM courses are expected to have a maximum class GPA in the range of 3.000 to 3.333.
- The Freeman School has no minimum class GPA guidelines.

Faculty members who are teaching more than one section of the same BSM course may pool the students in the different sections and compute one class GPA.

Students receive credit for grades of D- or better; however, they must offset low grades with grades high enough to maintain the 2.000 Tulane GPA, the 2.000 Freeman School GPA, and the 2.000 major GPA necessary to meet continuation and graduation requirements.

Grade Complaints and Grievance Procedure

University policy lays out the following grade complaint and grievance procedure: (https://advising.tulane.edu/sites/default/files/GRIEVANCE%20PROCEDURE.pd (https://advising.tulane.edu/sites/default/files/GRIEVANCE%20PROCEDURE.pdf)f). Because the Freeman School does not have the department chairs that are mentioned in the university document, any grievances that a student cannot resolve at the faculty level must be brought to the Associate Dean for Undergraduate Education by way of the student's BSM Academic Counselor. The Associate Dean will work with the Area Coordinator of the academic

area in which the faculty member who taught the class with the grade grievance resides. A grade grievance committee within Freeman will hear any student complaints and grievances that cannot be resolved in prior steps.

Graduate Courses

BSM or other undergraduate students may not take Freeman School graduate courses (i.e., 6000- and 7000-level courses), with the exception of students who have applied for and been admitted to the BSM/MACCT program. BSM/MACCT students may enroll only in approved graduate courses that fulfill MACCT requirements; they may petition to count a graduate level course towards their BSM degrees only if that course is not necessary for their MACCT requirements. However, the course may not count towards both the MACCT and BSM program requirements.

Independent Study

A student with superior scholastic standing may be able to work one-on-one with a professor through an Independent Study. An Independent Study course counts as a business elective, but it cannot substitute for an elective that counts towards the student's major, and it may not replicate existing courses. Students who have senior standing and a minimum overall GPA of 3.333 are eligible. The Independent Study student, along with the faculty member overseeing the Independent Study, must submit a syllabus, (including learning objectives, meeting schedules, assignments, final exam/paper, and the grading policy), to the area coordinator and the BSM office. Independent Study courses require the approval of the Associate Dean and the full-time faculty member(s) who will be teaching the courses.

In a tutorial, in a one-to-one or small group setting, a faculty member teaches an existing course that the school is not currently offering. The syllabus and the text for the tutorial are the same as in the regular course. All tutorials are at the faculty member's discretion. Tutorials require the approval of the Associate Dean and the full-time faculty member(s) who will be teaching the courses. Interested students should consult with their business school academic counselors for details.

Internships

Qualified business majors may apply to receive credit for completing an unpaid internship. Students will earn one credit that will be shown as a 4000-level course on their transcripts. Please note: This credit does not apply towards the 124 minimum hours required for the BSM degree. The student is responsible for locating the position and making all arrangements.

Students must meet a number of specific requirements to receive credit for an internship. Students must speak with the Career Management Center to confirm eligibility and complete an online application at least seven days before their intended internship start date.

Prerequisites/Corequisites/Course Restrictions

- Course Prerequisites – A prerequisite is a course that is required prior to a student taking a more advanced course. Students have the responsibility to be aware of course prerequisites because the registration system does not always prevent a student's registration if the student lacks the prerequisites. At any time during the semester, the Office of Undergraduate Education, at the Associate Dean's discretion, may drop students who have enrolled in courses for which they do not have the prerequisites. A prerequisite cannot be turned into a corequisite (defined next).
- Course Corequisites – A corequisite is a course that is required to be taken simultaneously with another course. Students have the responsibility to be aware of course corequisites because the registration system does not always prevent a student's registration if the student lacks the corequisites. At any time during the semester, the Office of Undergraduate Education, at the Associate Dean's discretion, may drop students who have enrolled in courses for which they do not have the corequisites. Students should be mindful of this when dropping a course mid-semester.
- Credit Hours/Class Standing – Some courses require that the student complete a certain number of credit hours or have a particular class standing prior to enrolling. The registration system will block registration for a course if a student has not met the minimum credit hours to register for that course.
- Departmental Approval – Some courses are open only to students who have declared a particular major, minor or certificate. This restriction may be permanent or temporary, allowing the Office of Undergraduate Education to make available courses to students who need them to complete their major/minor/certificate.
- Application Only – A variety of courses within the Freeman School are by invitation-only, based upon a student application or other criteria. Students should contact their Freeman Academic Counselor for information about such courses and the timeline for applying.

Residency Requirement

Full-time undergraduate students enrolled at Tulane who are earning the BSM degree must complete a minimum of 60 credit hours at the University and a minimum of 30 credit hours at the Freeman School, excluding credits earned in Tulane Study Abroad Programs and in the Washington Semester Program. The University considers credits earned in these programs to meet the senior residency requirements. Transfer students must earn a minimum of 60 hours of credit from Tulane and 30 hours of credit from the Freeman School.

Satisfactory/Unsatisfactory Grading Option

Coursework in the A.B. Freeman School of Business cannot be taken S/U with the possible exception of service-learning courses.

S/U grading may not be used for any BSM degree, major, minor, or certificate requirement including non-BSM coursework.

Transfer Credit

For Students Transferring to Tulane

Newcomb-Tulane College Rules: Students who wish to receive transfer credit for college courses taken prior to enrolling in Tulane University are subject to the transfer credit rules for Newcomb-Tulane College, explained in the University Catalog. The additional

requirements listed below apply to students wanting to receive transfer credit for business courses.

Freeman School Rules: Students who attempt to transfer in any business courses for college credits that the students earned prior to admittance to Tulane must adhere to the Tulane-Newcomb College rules. The University will review these business credits according to the following limitations:

- To qualify for transfer credit, the student must take business courses at an AACSB-accredited university. In general, the course content should match that of courses offered at Freeman. Occasionally, the University will deem creditworthy a course that contains business content not covered in our existing courses.
- Students can transfer up to five business courses into Freeman. Certain courses are ineligible for transfer: core classes with a writing requirement, courses required for the major and the Capstone.
- Incoming students will not receive credit for core business courses taken at institutions other than Tulane during the summer preceding admission to the Freeman School.
- Students will not receive credit for courses with a grade of less than C (2.0).
- Grades do not transfer; consequently, the University does not consider these grades when calculating GPA or grade point averages for Dean's List or Honors eligibility.
- Transfer credit is subject to approval by the Area Coordinator where the class is housed.

Transcript Adjustment for Business Classes
Following a student's submission of transcripts and course descriptions to the Office of Undergraduate Admission, the Area Coordinator where the class is housed will evaluate the courses. If the courses are equivalent to Freeman School coursework, the University will adjust the student's Tulane transcript to reflect the academic credit awarded in transfer. The University does not transfer grades with the credits. Please note that the Freeman School may deny transfer credits for applicability to the business major/minor because of AACSB professional accreditation standards.

For Incoming, First-Year Students

All incoming first year students are subject to the transfer credit rules for incoming, first year students of Newcomb-Tulane College. Business courses taken elsewhere are subject to the same transfer credit rules that apply to current BSM students.

For Current BSM Students and non-BSM minor-seeking students

Current BSM students are subject to the transfer credit rules for Newcomb-Tulane College, explained in the University Catalog. In addition, the requirements listed below apply to current BSM students wanting to receive transfer credit for business courses:

1. Students must receive prior written approval for transfer credit

In order to transfer credit for business courses to Tulane, currently enrolled BSM students must obtain prior approval from their BSM Academic Counselor and the Area Coordinator where the class is housed. Students must submit the course syllabus to the Office of Undergraduate Education for the Area Coordinator where the class is housed to review to determine equivalency to a Freeman School course. Please consult the preceding policy on transfer credit for business electives.

2. The institution must have AACSB accreditation

Transferred business courses must be from AACSB-accredited schools. Non-business courses must comply with the requirements of Newcomb-Tulane College and receive approval from the appropriate school.

3. Students may not transfer Freeman core requirements

BSM students are required to take all business core courses at the Freeman School: ACCN 2010, ACCN 3010, FINE 3010, LGST 3010, MCOM 3200 (previously 3010), MGMT 3010, MGSC 3010, MKTG 3010, MGMT 4010, MGMT 4920 (previously 4900) and CDMA 2201 (previously 1201).

4. Students may not transfer major coursework, nor any courses that count towards a minor or certificate

BSM students are required to take all their major coursework at the Freeman School. As well, all courses that count towards a minor or certificate must be taken at the Freeman School.

5. Students may receive transfer credit for a maximum of two business electives (6 credits)
The Undergraduate Curriculum Committee will establish a "potential transfer credit course list" that identifies the Freeman courses that will be considered for transfer credit. A student can transfer up to two courses from a "potential transfer credit course list" from a host institution, subject to faculty area coordinator approval. This list does NOT include any required major courses or BSM core courses.

6. Transfer credit should equal Tulane work
Courses taken in a classroom environment should carry at least three semester hours of credit, or the equivalent in quarter hours. Any credit granted by Tulane should equal the semester hours (or their equivalents) earned for the transferred course.

Assurance of learning must be evident in the course syllabus.

7. Students must earn a C or better, but grades do not transfer

Students must earn a grade of C or better in transferred business courses, but only the credit hours, not the grade, are recorded on the transcript. Therefore, the University does not use grades earned for transferred courses to calculate grade point averages for Dean's List or Honors eligibility.

8. Students must submit official transcripts

Transfer credit cannot be granted until the student's academic advisor receives an official transcript. Arranging delivery of the transcript is the student's responsibility. Students must have transcripts mailed to the attention of their Newcomb-Tulane College academic adviser at the Academic Advising Center.

For Tulane Students Who Attend a Freeman-Approved Study Abroad Program

For coursework completed on a Freeman-approved program (including pre-approved NTC Office of Study [OSA] programs), the Tulane transcript will automatically show all courses, grades and credits. Grades earned abroad will appear on the official transcript, but will not be calculated into the cumulative GPA. An official grade from a student's time studying abroad cannot be "removed" from the Tulane transcript for any reason.

Courses taken abroad require pre-approval from a student's Study Abroad advisor and BSM academic counselor. The counselors will use a preapproved list of courses that the Undergraduate Studies Committee has approved. Approved business courses taken in a student's major will count as major elective credit. Approved business courses taken outside the major will count as business elective credit. All classes taken abroad will come back with 5380/5390 course numbers. For example, International Finance taken abroad will transfer back to Tulane as FINE 5380 International Finance and will count as major elective credit for a finance major or as a generic business credit for a non-finance major.

To receive Tulane credit for coursework abroad, students must submit a Learning Agreement prior to departure, complete the study abroad program, submit all materials and assignments to their instructors by the end of the last day of class and take scheduled examinations. The University strongly encourages students to retain personal copies of course syllabi and all work submitted abroad until all grades and courses have been posted to the official Tulane transcript. Students may not transfer in core or major required courses regardless of major.

For current BSM students who attend a study abroad program that is not Freeman-approved, and/or BSM students who take a leave of absence from Tulane to pursue studies abroad, regardless of program, the general Transfer Credit policy for Current BSM Students applies.

For Tulane Students in Approved Joint Degree Programs

The University may make an exception to the five business course rule for transfer students if the courses are from an approved joint degree program. However, these students will be subject to the following residency rule: Full-time undergraduate students enrolled at Tulane University who are earning the BSM degree must complete a minimum of 60 credit hours at the University and a minimum of 30 credit hours at the Freeman School, excluding credits earned in Tulane Study Abroad Programs and in the Washington Semester Program. Credits earned in Tulane Study Abroad Programs and in the Washington Semester Program will satisfy the senior residency requirement that requires the student to earn the last 30 credit hours at Tulane.

Graduate Policies

Graduate School Policies

A full description of academic policies for all students in Graduate Programs (p. 80) can be found in the Office of Graduate and Postdoctoral Studies section of this catalog. Students should review these policies thoroughly.

School of Business Graduate Policies

Approved Course Loads

Freeman School graduate students may register for up to 18 credit hours without special permission. Students with a cumulative grade point average (GPA) of at least 3.50 or above may take an overload of three credit hours per semester with the approval of their academic adviser. In all other cases, petitions for course overloads are submitted to the adviser for consideration by the senior associate dean.

Auditing Courses

The Freeman School discourages auditing courses. In exceptional circumstances, however, students may be allowed to audit a course with the permission of their program adviser. Once a course is audited, it may only be taken for credit at a later date with the approval of the instructor and the program adviser.

Class Attendance/Medical Withdrawals

Students are expected to attend all classes unless they are ill or prevented from attending by exceptional circumstances. Instructors should establish policies for attendance in their classes that are announced at the beginning of the semester. Students who find it necessary to miss class are responsible for obtaining notes on material covered in lectures or other class sessions. It is up to the instructor to determine whether or not to allow the student to make up missed quizzes, examinations or other exercises. Students are responsible for notifying professors about absences that result from serious illnesses, injuries or critical personal problems. Check with the Student Health Center on the current policies for medical excuses.

Continuation Requirements

Each graduate degree program has its own continuation requirements. These standards are applied to all work attempted and completed in the degree program at Freeman, including

earned grades of F, WF and UW. If a course is repeated, only the latest grade contributes to the grade point average. Please refer to the appropriate handbook on the Freeman website for specifics on continuation requirements for each program.

Courses in Other Divisions of Tulane

A student may petition the senior associate dean for permission to take up to six credit hours of graduate coursework in other divisions of Tulane University. The petition must be approved prior to registration if the course is to be included as a part of the graduate degree requirements.

The petition should be submitted to the senior associate dean through the academic adviser. The petition should include a statement describing the course's contribution to the student's professional career goals. If there are special circumstances relating to the request, they should be summarized in the petition. Appended to the petition should be a course description and a current course syllabus, if available. If the syllabus is not available, a syllabus from the most recent offering should be included.

Such courses must be at the graduate level and carry the equivalent of a 7000-level designation. Undergraduate courses, courses that include substantial undergraduate enrollment, or School of Professional Advancement courses are not accepted.

The hours earned for these courses will be counted toward the hours required for the MBA degree. Grades earned in these courses will not be included in the grade point average, since they were assigned using a policy different from that of the Freeman School, nor will they be used for determining graduation, continuation, awards, honors, or fellowships. Minimum passing grades are determined by the school offering the course. Students must receive a passing grade in the course to have it count for degree purposes. Since these grades will not be counted in grade point averages, students must meet all grade point average requirements for their degrees using only Freeman School courses.

Course Withdrawals or Additions

Students can drop and add courses according to the dates set each semester by the Office of Graduate Programs. These dates are available on the Freeman School website or in the Office of Graduate Programs. It is important that students be aware of these dates in order to avoid unnecessary financial obligations. Drop/add forms are available on the Freeman website and in the Office of Graduate Programs. They must be completed and signed by the student and then signed and processed by the program adviser. Students should discuss implications of course withdrawals or additions with their program adviser if they have questions.

Dismissal

Students who fail to meet the terms of probation will be dismissed from the program. In addition, students who remain on probation for two consecutive semesters or whose cumulative GPAs are below 2.00 will be dismissed from the program.

Grading System

Grade Symbols:

All graduate programs in the Freeman School use a letter grade system with the following quality point equivalents:

Grade	Description
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
D-	0.67
F	0.00
I	Incomplete - This grade will automatically become F unless the work is made up within 30 days after the beginning of the following semester, excluding Summer School. This grade is not to be used as an automatic extension but only for unavoidable delays caused by illness or other emergencies.

The quality point total for each course is computed by multiplying the numerical value of the grade received by the course credit hours.

Graduate credit is awarded for grades of D- or better; however, lower grades must be offset with higher grades to meet continuation and graduation requirements. The grades of W (withdrawal), WF (withdrawal failing), and UW (unofficial withdrawal) may be assigned by the instructor when the student withdraws from a course before its completion. A grade of W does not affect the grade point average. Grades of WF or UW are computed in the grade point average as an F. A grade of P (pass) is not counted in the grade point average but is counted in earned hours. A grade of F (fail) is not counted in earned hours but is counted in the grade point average.

Grading Guidelines:

The Freeman School faculty approved the following recommended grading guidelines for the class GPA for each type of graduate course:

6000-level courses are expected to have a mean class GPA in the range of 3.00 to 3.33.
7000-level courses are expected to have a mean class GPA in the range of 3.33 to 3.67.

Faculty members teaching more than one section of the same course may pool the students in the different sections and compute one class GPA.

Graduation Requirement

To graduate with any Freeman master's degree, the student must satisfy the following requirements:

Application: The student must submit an "Application for Degree" at the beginning of the semester in which he or she intends to graduate. This online form is made available through Gibson by the student's academic adviser. The completed form must be submitted by the stated deadline in order to appear in the commencement program.

Minimum GPA: Students must earn a cumulative GPA of at least 3.00 on all graduate-level course work counting toward the degree at the Freeman School. In some cases, satisfying this requirement may necessitate additional course work. If a course is repeated, only the latest grade contributes to the GPA. However, if a student receives a grade of WF due to a determined infringement of the unified code of graduate student academic conduct, the failing grade will remain in the GPA calculation, even if the course is repeated for credit.

Financial and non-academic: Students must meet all financial and other non-academic requirements set by Tulane University and by the Freeman School.

Leave of Absence

A student in good academic standing may choose not to register for coursework in a given semester and still remain in the program. The student must notify the program adviser of his or her intention and proposed return date. Should a student not take courses for three consecutive semesters (including the summer), he or she must apply for reactivation in the program. Letters requesting reactivation should be submitted to the program adviser. Any student who breaks the continuity of his or her program for more than three consecutive semesters (including summer semesters) must reapply for admission to the program through the Office of Graduate Admissions. Readmitted or reactivated students must meet the degree requirements and abide by the academic policies in place at the time of their return to the program. The senior associate dean will review the student's record and indicate which courses taken in the past will meet the new degree requirements and which will not. No course more than seven years old may be used to meet the degree requirements without the written approval of the senior associate dean.

Probation

A student who fails to meet continuation requirements is placed on academic probation. The terms of such probation will vary depending on the particular circumstances. These terms ordinarily will include a requirement that the student raise his or her GPA to the level required and may include a requirement to take specific courses and achieve specified levels of performance in those courses. Probation conditions may include restrictions on non-academic activities and on maximum or minimum course loads. Students may not receive the grade of I (incomplete) while on probation.

Repeating Courses

Graduate credit is awarded on all Freeman courses in which a grade of D- or higher is earned. Courses for which a student has received credit can be repeated. A student must repeat any required course in which a failing grade is earned. However, both grades remain on the transcript. When a course is repeated, only the latest grade contributes to the grade point average. Elective courses do not need to be repeated, but the credit hour and grade point average requirements for graduation must be met. If a student receives a grade of WF due to a determined infringement of the unified code of graduate student academic conduct, the failing grade will remain in the GPA calculation, even if the course is repeated for credit.

Right of Appeal

A student who receives a letter of dismissal has the right to appeal to the senior associate dean. A petition stating the reasons for the appeal should be submitted in writing to the program adviser, who will forward it to the senior associate dean. The student may request, or be requested, to appear in person if further information is needed. Favorable action on the appeal will depend on the student's ability to demonstrate that his or her academic performance to date is not representative of future performance. The senior associate dean will attempt to determine if the student in future semesters can achieve the required performance and rectify any deficiencies. The burden of argument in the appeal process rests with the student. A student who is reinstated following a successful appeal of dismissal is placed on probation.

Shared Courses

If a student earns a second graduate degree at Tulane and there is crossover in course requirements between the two degrees, the student can double count up to 25% of the total credit hours required for the smaller degree, not to exceed 12 credits.

Undergraduate Degree Requirements

Newcomb-Tulane College Requirements

Newcomb-Tulane College General Education Curriculum

The Newcomb-Tulane College Core Curriculum allows students to explore a wide-range of disciplines and embodies the mission and values of the College by allowing students to have flexibility in their core curriculum courses while exploring a full-range of courses.

The core curriculum—which is composed of a minimum of 30 credits—is divided into three parts: proficiency requirements, distribution of knowledge requirements, and additional requirements. To ensure that students experience the breadth of knowledge at the collegiate level, AP, IB, and Cambridge A-Level courses can be used to satisfy proficiency requirements only in Formal Reasoning and Foreign Language.

Courses will be designated as satisfying the distribution requirements according to the content and methodology rather than the departmental affiliation of the course.

The new core curriculum general education requirements went into effect with the entering class of 2018.

Courses proposed to satisfy core requirements will be ratified by the Newcomb-Tulane Curriculum Committee.

Proficiency Requirements

Writing Skills (2 courses and 6 credits)

- Tier 1: Freshman writing (ENGL 1010 Writing or ENGL 1011 Writing for Academic Purposes) unless the student is exempt because of their score on the A.P/I.B./Cambridge-A level exams.
- Students receiving exemption from ENGL 1010 Writing/ENGL 1011 Writing for Academic Purposes are required to take an approved writing class during their freshman year. Approved courses will have at least 1/3rd of the grade based upon writing (excluding in class exams), but no revision is required.
- Tier 2: One additional writing course at the 2000 level or above taken from an approved list. Approved courses will have at least 1/3rd of the grade based upon writing (excluding in class exams), to include revision and re-evaluation by the instructor.
- Students are encouraged to take the Tier-1 writing course prior to taking the Tier-2 writing course; however, students are not prohibited from taking the Tier-1 and Tier-2 courses simultaneously.

Note: creative writing courses cannot be used to satisfy the writing proficiency requirement.

Formal Reasoning (1 course and 3 credits)

- One course in mathematics or symbolic logic from an approved list.

Foreign Language (0-3 courses)

The foreign language proficiency requirement is achieved in any of the following ways:

- A passing grade in a course at the 2030 level (3rd semester of Tulane 4-credit hour Foreign Language or ASLS coursework) or higher in accordance with assigned placement level.
- A passing grade on a Tulane-administered proficiency exam for students with assigned placements above the 2030 level. Students who do not successfully pass the proficiency exam will be automatically placed and must successfully complete a course at the 2030 level.
- A passing grade in a course at the level of placement above 2030.
- Advanced Placement score of 4 or 5 **in a foreign language test as noted in the AP/IB chart**
- Higher-Level IB score of 5 or higher **in a foreign language test as noted in the AP/IB chart**
- Cambridge A-Level score decided by the appropriate language department.
- SAT II achievement test of 640 or higher **in a foreign language.**

Note: This requirement is waived for students in B.S.E. programs.

Distribution Requirements

(A course can satisfy only one of the distribution areas.)

Mathematics and the Natural Sciences (2 courses including 1 lab science course and 7 credits)

(Those completing the B.F.A. degree need only complete 1 course with lab)

Social and Behavioral Sciences (2 courses and 6 credits)

Textual and Historical Perspectives (2 courses and 6 credits)

Aesthetics and the Creative Arts (3 credits), which can be fulfilled in 1-3 courses.

Additional Core Requirements

The First Year Seminar (p. 77) (1 course, 1-3 credits)

This requirement can be satisfied by a Tulane Interdisciplinary Seminar (TIDES) course or Colloquium course (COLQ 1010 Freshmen Colloquium Seminar (1-3 c.h.) or COLQ 1020 Freshman Colloquium (1-3 c.h.))

Public Service (2 courses)

Students develop their commitment to civic engagement through the completion of service learning courses experiences. All students will complete their public service through service-learning courses, an approved public service internship, or an approved public service research experience. These courses can also be used to satisfy other areas of general education.

- To meet this requirement for graduation, all students must complete two semesters of service. One of these semesters must be at the 2000 level or above. The first experience should be completed by the 2nd semester of the sophomore year.
- Service Learning courses require a minimum of 20 hours of service per semester. Those service-learning courses designated as requiring a minimum of 40 hours of service carry one additional credit hour. No course may carry more than 4 credits.

Race and Inclusion (1 course, 3 credits)

One course and 3 credits. Courses that fulfill this requirement will focus on the intersections of race with power, privilege, equity, justice, and/or inclusion and will focus at least 60% their content on these issues in the United States. These courses may also be used to satisfy proficiency or distribution core curriculum requirements.

Global Perspectives (1 course, 3 credits)

One course and 3 credits. Courses that fulfill this requirement will focus at least 60% content with stated objectives to develop historical, cultural, and societal knowledge of an area beyond the United States. These courses may also be used to satisfy proficiency or distribution core curriculum requirements.

For more information please visit the Core Curriculum website (https://college.tulane.edu/core-curriculum/).

A. B. Freeman School of Business - Undergraduate Requirements

Bachelor of Science in Management

The BSM program mission is to educate socially responsible business leaders with the intellectual capital necessary to succeed in a technologically sophisticated and dynamic global business environment. We accomplish this goal by building a creative and rigorous business curriculum on the foundation of a broad liberal arts education. The faculty designed the curriculum to stimulate students' intellectual curiosity and to emphasize the skills and values necessary for them to continuously learn, adapt and ultimately advance to positions of leadership.

Freeman offers various majors, minors and specializations within the Bachelor of Science in Management program. From finance to marketing, the BSM curriculum for each major includes a focus on international business, preparing students to compete and lead in the complex global marketplace.

Candidates for the Bachelor of Science in Management degree are required to complete a minimum of 124 credit hours with a minimum cumulative grade point average of 2.0 in their business courses and a 2.0 cumulative grade point average overall.

In addition to meeting the requirements of Newcomb-Tulane College, students seeking the BSM must fulfill the following requirements:

- Required Non-Business Courses*
- Business Core Courses (33.5 hours)
- Major-Specific Business Courses (hours vary by major)
- Major-Specific Business Electives (hours vary by major)
- Additional Business Electives (12 hours)

**These courses may count toward Newcomb-Tulane College requirements; students should consult with their NTC academic advisor.*
Detailed information about requirements for individual majors is available in the university catalog. Students are required to meet with their designated business school academic counselors each semester to plan a course of study. In addition, students must consult with their designated academic advisors in the Newcomb-Tulane Academic Advising Center regarding the Newcomb-Tulane core curriculum requirements.

Each student is responsible for individual course selection and for meeting the requirements for graduation. Students should discuss all course selections with their advisors and regularly check progress toward graduation on the Degree Works Audit, accessible through Gibson.

Bachelor of Science in Management/Master of Accounting Program

Freeman offers a BSM/MACCT program that students usually complete in five years. The program allows students to enter the accounting profession upon graduation. To earn a Master of Accounting degree, a student must complete 30 hours of graduate

courses over and above the BSM requirements of 124 hours. Each student works with a faculty adviser to develop a plan to meet the educational requirements of the state(s) in which the student plans to work. Students in the BSM/MACCT program will take both graduate and undergraduate courses concurrently. The combined curriculum complies with the terms of Tulane's merit-based undergraduate scholarships so that students retain scholarship support as long as they do not fulfill all BSM degree requirements until their last semester at the University.

Special Programs

BSM students have the option to complete a specialization in either energy or entrepreneurship. Students must complete 9 semester credit hours selected from specified courses in the chosen field of study and receive approval from faculty in the designated program.

Graduate Degree Requirements

General Graduate School Requirements

A full description of Master's (p. 89) and PhD Degree (p. 92) requirements for all students can be found in the Office of Graduate and Postdoctoral Studies section of this catalog. Students should review these policies thoroughly.

Master of Accounting

The Tulane Master of Accounting (MACCT) program prepares college graduates for successful careers in public accounting firms and major corporations. Through the comprehensive, 30 credit-hour program, students will work closely with a faculty adviser to design an individualized curriculum based on their career aspirations. The program can be completed in two semesters or extended to three semesters to allow for a summer internship. Freeman undergraduates may apply for admission to the MACCT program in the junior year and earn both the BSM and MACCT degrees concurrently.

Master of Business Administration

Freeman's MBA students develop the financial and analytical skills essential for leadership in an increasingly interconnected world. Students may earn the Master of Business Administration (MBA) in one of four formats: Executive MBA, Full-Time MBA , Online MBA, or Professional MBA.

Executive MBA

The Freeman School's Executive MBA (EMBA) program requires a minimum of 48 credit hours over 17 months, with two intensive weeks and classes on alternate weekends.

In the months immediately before the EMBA curriculum begins, prep courses in accounting and quantitative skills help to align student skills with the requirements of the early courses in the curriculum. The subsequent orientation and team building sessions will familiarize new students with policies and procedures and introduce faculty, classmates and study teams.

The EMBA program starts in January with a week-long session, Intensive Week I. Students complete two courses, including exams, in this 8-day intensive. Here students are reintroduced to academic life and begin to practice time management, balancing work, home and school responsibilities.

After Intensive Week I, classes then move to an alternate weekend structure, where students attend classes on Fridays and Saturdays of alternate weekends. Each set of two courses is typically completed in 7 weeks.

In the second half of the curriculum, elective courses are introduced. Students can earn a concentration in finance or management by selecting the elective course tracks in those areas.

A multi-cultural intensive week is held on the New Orleans campus in January of the second year. During this Intensive Week II, students form new global study teams, collaborating and sharing a classroom with their EMBA counterparts from Tulane's partner universities in Asia, Europe, and Latin America.

Full-Time MBA

Completed over four semesters, the full-time MBA program requires 61 credit hours. The curriculum encompasses knowledge core courses (20 credit hours), a data course sequence (10 credit hours), two intensive immersion courses (4 credit hours), a consulting practicum (3 credit hours), an impact capstone course (3 credit hours), and elective courses (21 credit hours).

The knowledge core courses, taken throughout the first two semesters, are taught in seven-week sessions. They provide a foundation in all functional disciplines of business. The program provides an opportunity to understand the interrelationships among these disciplines and how they are integrated in the management of successful organizations.

ESG issues are woven throughout the knowledge core.

The data course sequence develops the ability to understand and apply insights from big data, to appreciate the shortcomings of data, and to collect small, focused data sets to precisely and rapidly answer critical questions. The sequence includes statistics and analytics courses, an advanced data interpretation course, and two area-specific data core courses.

The intensive immersion courses, focused on negotiations and successful leadership, take place just prior to the start of the spring semester in the first year and the start of the fall semester in the second year.

Through the consulting practicum, a semester-long course in the spring of the first year, students work in teams on cross-disciplinary projects. Core course faculty from different business disciplines oversee and advise student teams.

The impact capstone semester-long course, taken in the fall of the second year, draws on students' problem-solving skills from different business disciplines to help a local or regional company. Guided by core course faculty, these company projects focus on making a societal impact in the areas of sustainability, social inequities, or climate change.

Finally, students complete elective courses in their second year through which they may earn concentrations or specializations in business analytics, finance, strategy and marketing, and/or sustainability.

Online MBA

The Freeman School' s Online Master of Business Administration (OMBA) program is designed to meet the needs of professionals from a wide range of academic and professional backgrounds. The 46-hour curriculum is taught in a primarily asynchronous yet highly engaged format with weekly virtual synchronous sessions.

The program consists of a series of fourteen, 2-credit 7.5 week core classes and at least six semester-long 3-credit elective classes. A unique feature of the curriculum is the emphasis on individualized career development and management from the day a student enrolls in the program. This program will facilitate, among other things, interactions with a career coach who can elaborate on ways to manage a career, effective self-advocacy, and tips and strategies for job searches and interviews. The Freeman School organizes frequent career seminars to which students will have online access.

The program offers a mix of conceptual rigor, deep thinking exercises, and real-world examples to advance learners' business skills and careers. The courses are taught by Freeman faculty who bring their expertise to the classroom, sharing proven research and the latest developments in a wide range of fields. Optional concentrations are offered in business analytics, finance, and marketing.

Professional MBA

Offering an interdisciplinary approach to the education of future managers, the Professional MBA (PMBA) program reflects the school's philosophy of a comprehensive general management curriculum. Delivering the high-quality Freeman MBA in an evening format allows students to complete an MBA from one of the country's finest business schools without interrupting their careers. Typically, the program spans two and a half years and requires 48 credit hours of graduate coursework. The curriculum encompasses knowledge core and elective courses.

The knowledge core courses (30 credit hours) provide a foundation in all functional disciplines of business. The program provides an opportunity to understand the interrelationship among these disciplines and how they are integrated in the management of successful organizations. This sequence of required core courses assumes no prior academic background in business; however, all entering students are expected to have the quantitative, verbal, communication and computer skills necessary for the rigorous PMBA curriculum.

Finally, students complete elective courses (18 credit hours) through which they may earn concentrations or specializations in analytics, energy, entrepreneurship, finance, and/or strategic management and innovation.

Master of Business Analytics

Tulane's Master of Business Analytics (MANA) program provides recent college graduates with rigorous, quantitative training which allows graduates

to translate vast amounts of complex data into manageable intelligence in order to guide business decisions. This distinctive degree, which requires 36 credit hours, can be completed in two semesters or extended to three semesters to allow for a summer internship.

Master of Finance

The Master of Finance (MFIN) program is designed for recent college graduates who desire in-depth knowledge of finance without the broad-based managerial curriculum typical of MBA studies. Freeman's 36 credit-hour program starts in the summer and can be completed the following May or the following December to allow for a summer internship.

Master of Global Management

The Master Global of Management (MGM) program offers qualified MBAs and graduates from Xiamen University access to a unique global strategy curriculum and experience. The program consists of coursework in management, strategy, finance, and a global business project. Students must complete 37 credit hours, 19 credit hours taught by Tulane faculty, and 18 credit hours of foundation courses taught by Xiamen University faculty. Courses are offered in an intensive, week-long executive format, which is convenient and accessible for current students and working professionals.

Master of Management

The Master of Management (MMG) is a dual degree program designed for executives recruited by partner institutions in Latin America. Participants pursue the MMG from Tulane University and the MBA from Universidad Francisco Marroquin. This program is offered at two locations: Panama City, Panama, and Guatemala City, Guatemala. This program enables students to expand cross-cultural leadership, develop teamwork skills, and understand the dynamics of global markets, while having the opportunity to study in other countries.

The 36-hour curriculum includes 17 credit hours of foundation courses taught by partner institutions and 19 credit hours of coursework delivered by Tulane faculty in Panama and Guatemala. Students attend an on-campus business module in New Orleans as part of their curriculum.

Master of Management in Energy

The Master of Management in Energy (MME) program is designed for students with quantitative backgrounds who are seeking specialized industry knowledge in preparation for fast-track careers in energy. The MME program consists of course work in data analysis, economics, finance, modeling, risk management and trading. The program requires 36 credit hours and begins in the summer. It can be completed the following May or in the following December to allow time for a summer internship.

Doctor of Philosophy

The Doctor of Philosophy (PhD) program in business administration, which focuses on finance and financial accounting, is a full-time, research-intensive program. The PhD program is designed for students who want in-depth coverage in preparation for teaching at the college level. It is a four-year, 48 credit-hour program. Students must have earned an undergraduate degree prior to beginning the PhD program.

Special Undergraduate Programs
Special Undergraduate Programs

- Altman Program in International Studies & Business
- Business Minor for Non-Freeman School Students
- Internships
- Joint BSM/JD
- Scholarly Honors
- Summer Study Abroad
- Semester Study Abroad

Altman Program in International Studies & Business

The Altman Program in International Studies & Business is a special four-year undergraduate program that integrates liberal arts and business disciplines, extensive language instruction, and two study abroad experiences. Altman Scholars earn two degrees - a B.A. from the School of Liberal Arts and a B.S.M. from the A. B. Freeman School of Business.

The Altman Program provides students with an Altman-specific course each semester, a cohort summer study abroad trip between freshman and sophomore years, and financial support for junior year abroad and internships. The program admits a cohort of up to 20 students who are selected before their matriculation at Tulane as freshmen.

Requirements
The Altman Program combines the curricula of two undergraduate degree programs in the School of Liberal Arts and the A. B. Freeman School of Business. Students may major in finance, management, marketing, or legal studies at the Freeman School and in approved social science, area studies or language disciplines within the School of Liberal Arts. The link between the two majors in the schools is the interdisciplinary "Altman Core", a cohort-specific academic course every semester.

Specific courses open only to students in this program include a TIDES seminar; ISIB 3010 Introduction to Globalization (3 c.h.); ISIB 1910 Study Abroad Pre-Dep (1 c.h.); ISIB 2030 Perspectives on Global Citizenship (3 c.h.); ISIB 6010 Approaches to Global Dilemmas (3 c.h.); and ISIB 6020 Altman Senior Seminar (1 c.h.).

In addition, students study a non-English language (i.e. Spanish, Portuguese, French, German, Italian, or Japanese, Mandarin Chinese) during their first two years in the program, and spend two full semesters abroad in countries where their target language is spoken.

Business Minor for Non-Freeman School Students

The Business Summer Minor Institute (BSMI) allows any Tulane student to earn a minor in business during the summer term. Please contact the Office of Undergraduate Education at (504) 862-8377, businessminor@tulane.edu, or visit https://freeman.tulane.edu/bmsi (https://freeman.tulane.edu/bmsi/).

Internships

Qualified business majors may apply to receive credit for completing unpaid internships. Students will earn one credit that will be shown as a 4000-level course on their transcripts. Please note: This credit does not apply towards the 124 minimum hours required for the BSM degree. The student is responsible for locating the internship position and making all arrangements.

Students must meet a number of specific requirements to receive credit for an internship. Students must speak with the Career Management Center to confirm eligibility and complete an online application at least seven days before their intended internship start date.

Joint BSM/JD

With the permission of the Dean of Newcomb-Tulane College and the Associate Dean for Undergraduate Education in the A. B. Freeman School of Business, undergraduate students pursuing the BSM degree may apply for admission to Tulane Law School during the junior year. The 3-3 program does require planning. The student must work closely with a Freeman School Business Academic Counselor and a Newcomb-Tulane Academic Advisor to ensure that the student has completed a minimum of 93 credit hours towards the BSM degree by the end of the junior year, comprising all Newcomb-Tulane core curriculum, all required non-Business courses, all Business core requirements, all major requirements, and other electives necessary to meet the 93 credit hour minimum. The student must also work with a designated representative of the law school to ensure that the student meets the admission and other requirements of the Tulane Law School.

The Freeman School will waive 29 credit hours of BSM coursework as follows: First, from a student's free electives and second, with the approval of the Associate Dean, from a student's required Business electives. If admitted to the Tulane Law School, students enroll as full-time law students during what would otherwise be their senior year at Freeman. When the student successfully completes the first year of law school, the Freeman School will accept the 29 credits earned towards the JD degree as credit towards the BSM degree, and the student will earn a BSM degree. This program enables students to receive the BSM degree and the JD in six years. Students wishing to apply to Tulane Law School under the 3-3 Program should take the LSAT during the summer between the sophomore and junior years or during the fall semester of the junior year. Generally, students should apply to Tulane Law School between October 1 and January 1 of their junior year. Students should also speak with a representative from the Law School Admissions Office to gain a clear understanding of the admission and program requirements of the Law School.

Scholarly Honors

The Honors Thesis remains Tulane's principal way of recognizing achievement in undergraduate research and scholarship. Students who complete Honors Theses receive Scholarly Honors in their major or majors, in addition to any Latin Honors. To be eligible for Scholarly Honors, A BSM student must have an overall grade-point average of at least 3.400 and a Freeman GPA of 3.500, and they must complete a Business Honors Thesis during the senior year. The Honors Thesis or project is a full-year endeavor. Criteria for completing the thesis, a schedule of relevant dates, (including deadlines for a progress report and completion of the first chapter) and the necessary forms are available online from the Honors Program website (https://catalog.tulane.edu/newcomb-tulane/ntc-academic-programs/honors-program/), or in the Honors Program office.

A student's Honors Thesis committee consists of three faculty members: a first reader/director, a second reader and a third reader. The first and second readers should come from the student's major area. The third reader must come from outside the major area. Readers for Honors Theses must normally be full-time faculty rather than adjuncts or visitors, although exceptions may be made by the director of the Honors Program in particular circumstances. Students must initiate the thesis process and find their faculty readers/directors on their own. Students doing Honors Theses must still complete the business capstone experience (MGMT 4010 & MGMT 4900). Students can satisfy the Business Honors Thesis in two ways:

1. Business Case Study: Students will write an original business case, along with teaching notes and a comprehensive literature review. To follow this option, students should enroll in MGMT 4990 in the fall semester of their senior year. In this course, they will begin to explore the process of writing a business case. In MGMT 5000, students complete their Honors Theses during the spring semester of their senior year. MGMT 4990 and 5000 are three credits each. (For the Case Study, two committee members are expected.)
   Note: *Students in the joint BSM/MACCT program can take MGMT 4990 and MGMT 5000 during their fourth or fifth year at Tulane, whichever year the Busy Season Internship is NOT being done.*
2. Traditional Honors Thesis: Students can choose to do the traditional Honors Thesis if they wish, and must consult with the University's Honors Program Office, located in 105 Hebert Hall, for details.

Honors Thesis Boot Camp: A Workshop to Develop your Honors Thesis Prospectus (COLQ 4013) is offered to juniors every spring semester. This workshop helps Honors students prepare for the theses they will write during their senior year and shows them how to take best advantage of the resources available at Tulane. The Honors Thesis is an opportunity for a student to do original research on a topic of the student's choosing and to write an outstanding thesis that fully displays the student's skills in investigation, critical thinking and communication.

For further information about being a member of the Honors Program, please contact the Honors Program at honors@tulane.edu or (504) 865-5517, or visit the Honors Program Office in 105 Hebert Hall.

Summer Study Abroad

Freeman's Study Abroad programs enable students to live and learn in other cultures. During intensive summer study abroad programs, students earn elective credits toward completion of their Freeman business degrees. In these immersive settings, students develop international management skills by focusing on cultural understanding and global strategies that create competitive advantages in international business. All courses are taught by Freeman-affiliated international faculty. At the host institutions abroad, Freeman students study with business students from around the world. The program itineraries typically include classes, seminars, company visits and cultural activities. Courses completed during summer study abroad count as Freeman major electives or business electives. The Freeman School offers summer programs in more than 20 locations worldwide. For a full list of programs, visit https://freemanabroad.tulane.edu/. Study Abroad staff members (https://freemanabroad.tulane.edu/?FuseAction=StaffMain.Home) are available for student advising appointments to assist students with selecting a program.

Semester Study Abroad

Qualified students may study abroad for one or two semesters through a direct exchange with one of our 40 partner institutions in more than 20 countries. Students may select the semester when they wish to go abroad, and the curriculum can be tailored to the students' interest. Semester study abroad participants are directly enrolled at the partner institutions and fully experience campus life in the host countries. Business courses are most often taught in English by Freeman-affiliated international faculty and include both local and international students. If students are proficient in the host country's language, they can also take courses taught in that language. Study abroad offers students a broad range of academic offerings, as well as cultural immersion and the freedom to engage in extracurricular activities at their host universities. This program is governed by the BSM Curriculum Committee and is managed by the staff of Study Abroad & Exchange.

To go abroad, a student must meet these requirements:

- Have successfully completed all lower division business core classes
- Have a cumulative Freeman GPA of 2.5 or above.
- Maintain good academic, financial and disciplinary standing

Program specific requirements and advisory statement:

- Students must familiarize themselves with the program-specific GPA and course prerequisites when planning for study abroad.
- Due to high demand, competition may occur within the various programs because some have a limited number of spaces.

A full list of semester abroad programs is available online at https://freemanabroad.tulane.edu/. Study Abroad staff members (https://freemanabroad.tulane.edu/?FuseAction=StaffMain.Home) are available for student advising appointments to assist students with selecting a program.

Tulane University

Joint & Dual Graduate Programs
MBA Joint & Dual-Degree Options

These programs allow students to earn two degrees in less time and at less expense than pursuing the degrees separately.

Candidates must receive admission to both programs to pursue these options.

The Freeman School offers these joint and dual-degree options:

- MBA/Juris Doctor (p. 189)
- MBA/Medical Doctor (p. 396)
- MBA/Master of Sustainable Real Estate Development
- MBA/Master of Management in Energy
- MBA/Master of Health Administration (p. 527)
- MBA/Bachelor of Arts or Bachelor of Science - early admit program for Tulane non-business undergraduates only.

Accounting

At the undergraduate level, the Freeman School offers an accounting minor for students in the Bachelor of Science in Management (BSM) program.

At the graduate level, the Master of Accounting (MACCT) program prepares college graduates for successful careers in public accounting firms and major corporations. Through the comprehensive 30 credit-hour program, students will work closely with a faculty adviser to design an individualized curriculum based on their career aspirations. Freeman undergraduates may apply for admission to the MACCT program in the junior year and earn both the BSM and MACCT degrees concurrently.

Accounting Minor for BSMs

Accounting Minor for BSM students majoring in Legal Studies, Management, or Marketing

At the undergraduate level, the Freeman School offers an accounting minor for students who are enrolled as business majors. Students must complete 9 credit hours including one required class (3 credit hours) and an additional 6 credit hours chosen from approved electives.

For additional information about academic minors, see Academic Requirements (p. 120).

Accounting Minor for Finance majors

Students who major in finance and pursue the accounting minor must complete 9 credit credit hours chosen from approved electives.

Accounting, MACCT

The Master of Accounting (MACCT) degree, a STEM-designated program, prepares college graduates for successful careers in a variety of industries including public accounting, finance, and major corporations. Through a comprehensive, industry-endorsed 30 credit hour curriculum, students develop technical and analytical skills to acquire the professional expertise for a professional accounting career.

Freeman also offers a joint Bachelor of Science in Management/ Master of Accounting (BSM/MACCT) program. This course of study is designed to give students the knowledge, skills and preparation to immediately enter the accounting profession following graduation. Most joint students complete an internship for degree credit during the program. Typically completed in five years, students graduate with two degrees and the confidence and expertise to become an accounting professional. In addition, students may meet the eligibility requirements for the CPA exam in the jurisdictions of their choice.

Requirements
Curriculum

Prerequisites

To be admitted to the MACCT program, a student must have an appropriate undergraduate background in accounting or business and have satisfactorily completed the following prerequisite courses:

- **Financial Accounting Principles** [ACCN 2010 Financial Accounting (3 c.h.) or equivalent] - Concepts, techniques, and conventions for measuring and communicating the results of operations and the financial position of a business enterprise are introduced. Emphasis is placed on the development and use of publicly-reported financial information.
- **Managerial/Cost Accounting Principles** [ACCN 3010 Managerial Accounting (3 c.h.) or equivalent] - The role of accounting information in management decision-making for profit-seeking organizations is emphasized. The importance of information to decision-relevance is developed through study of traditional cost accounting, managerial economics, operations research, and the behavioral sciences.
- **Intermediate Accounting I and II** [ACCN 3100 Intermediate Accounting I (3 c.h.) and ACCN 4110 Intermediate Accounting II (3 c.h.) or equivalent] - These conceptually-oriented courses introduce intensive examination of financial reporting issues, financial statement categories, and the institutional environment of financial accounting. Students may complete the prerequisite courses in their undergraduate programs or prior to MACCT matriculation at a school accredited by The Association to Advance Collegiate Schools of Business (AACSB).

Degree Requirements

Students entering the MACCT program must complete the following 18 credit hours of required courses, plus a non-credit career development and management course. If a required course was completed at the undergraduate level, students must substitute an approved elective to meet the 30 credit hour requirement.

Course ID	Title	Credits
ACCN 7110	Auditing	3
ACCN 7120	Advanced Financial Accounting	3
ACCN 7140	Advanced Managerial Accounting	3
ACCN 7150	Accounting Information Systems	3

TAXN 7100	Principles of Entity Taxation	3
Plus 12 credit hours of approved electives [2]		12
Total Credit Hours		**30**

[1] Waived for joint BSM/MACCT students.

[2] Financial Communications (MCOM 6130 Financial Communications (3 c.h.)) is required for students who have not completed a similar course taught in English.

Note: *Students are not required to meet the educational requirements to sit for the Certified Public Accountant (CPA) exam in any state or territory. However, they may elect to become eligible if they wish. In this case, they would work closely with their MACCT faculty adviser to develop an appropriate program plan. The final determination of whether a CPA exam applicant meets the educational qualifications necessary to sit for the exam in any given U.S. state or territory resides solely with the Board of Accountancy in that state or territory. All State Boards of Accountancy require evaluation and approval of a candidate's academic credentials prior to sitting for the exam. See the National Association of State Boards of Accountancy (NASBA) website at https://nasba.org/ for more details including links to the state/territory jurisdictions as well as services that provide academic evaluations of coursework and credentials. Students who do not have an undergraduate business degree may need to take additional courses to qualify to sit for the CPA exam.*

Specializations

While all MACCT students earn a graduate degree in accounting, it is possible for students to pursue a variety of specializations. Requirements for all specializations within the MACCT program follow. Students may not count the same course for multiple specializations. However, if a course is required for two specializations, students may substitute the required course with another approved course for the second specialization. No more than two specializations may appear on the final transcript.

Business Analytics

The mission of the Master of Business Analytics (MANA) program is to prepare its graduates for careers that allow them to manage and make data-driven decisions. Through dedication to rigorous intellectual and ethical standards and the fostering of close, dynamic interaction among faculty and students, the MANA program aims to develop the specialized expertise necessary to negotiate the subtleties and interdependencies of various markets and organizations in both research and decision-making capacities. Graduates of the program must not only be confident of making significant contributions in analysis, problem solving, risk management, trading, and strategic analysis and planning, but they should be firmly committed to impeccable academic and professional conduct.

BSM Industry Certificate Program

Overview

To better prepare undergraduate students with industry-specific knowledge and skills, the A. B. Freeman School of Business offers certificate programs that provide specialized instruction in high-demand fields such as Energy, Hospitality, Real Estate Finance and Investment, and Sports Management.

Each certificate program comprises 12 credit hours constituting a coherent body of study within one of the four industry contexts. The programs are designed to integrate principles from finance, marketing, legal studies, and management, and each includes courses dedicated to foundational knowledge, advanced topics, and experiential learning.

Programs

Certificates

Hospitality Certificate

Overview

A Certificate in Hospitality will provide students with a well-rounded education in hospitality entrepreneurship, equipping them with the necessary knowledge, skills, and competencies to thrive in various roles in the hospitality industry.

Requirements

The Certificate in Hospitality will be awarded to those undergraduate students within the Freeman School who successfully complete twelve (12) credit hours in the following four courses:

Course ID	Title	Credits
MGMT 4050	Entrepreneurial Hospitality	3
MGMT 4190	Managing Hospitality Organizations	3
LGST 4170	Employment Law	3
MGMT 4310	Cases in Hospitality	3
Total Credit Hours		**12**

The certificate must be earned concurrently with the undergraduate degree. No more than one course from the certificate may overlap with a student's B.S.M. degree requirements.

Energy Certificate

Overview

The certificate is designed to leverage explicit knowledge gained from the core BSM curriculum, including such areas as finance, analytics, economics, risk management, strategy, and operations. With a strong emphasis on skill development, experiential learning, and industry exposure, students will gain both a solid foundation within the fundamental principles of Energy as well as a path towards a future career in the industry.

The Certificate in Energy prepares undergraduate students for entry-level positions and careers in the energy industry or with companies or firms that serve the industry, including related banking/financial organizations, trading organizations, consulting firms, utilities, technology, and government agencies.

Requirements

The Certificate in Energy requires four courses and 12 credit hours and is available to BSM students in the A.B. Freeman School of Business. The certificate must be earned concurrently with the BSM degree. No more than one course of the Certificate in Energy may count toward a student's BSM degree and major.

Course ID	Title	Credits
First Semester		
ENRG 4100	Energy Markets, Economics, and Policy	3
Second Semester, one or more of below		
ENRG 4110	Energy Financial Modeling	3
ENRG 4200	Energy Fundamentals and Trading	3
Third and Fourth Semester, one or more of below		
ENRG 4410	Special Topics (industry projects)	1-3

ENRG 4610	Energy Trends: Electric Power Markets (trading)	3
ENRG 4730	Energy Investment Banking	3
FINE 4160	Equity Analysis/Burkenroad Reports (energy company coverage)	3
FINE 4610	Darwin Fenner Student Managed Fund Honors Seminar (energy sector focused)	3

Real Estate Finance and Investment Certificate

Overview

This certificate will be available to BSM and ARCH students in Fall 2024 when the first course(s) of the certificate will be offered.

The certificate is designed to leverage explicit knowledge gained from the core BSM curriculum, integrating courses in several business disciplines, including, finance, management science, legal studies, and taxation. With a strong emphasis on skill development, experiential learning, and industry exposure, students will graduate with both a solid foundation in the fundamental principles of real estate finance & investment as well as a path towards a future career in the industry.

The Certificate in Real Estate Finance & Investment is applicable to a wide range of future professionals across real estate, banking, finance/investment, and insurance industries. Specifically, the certificate may be of interest to aspiring financial analysts and investment professionals, fund managers, investment portfolio managers, financial advisors, investment bankers, fixed-income security analysts, and financial risk managers.

Requirements

The Certificate in Real Estate Finance & Investment will be awarded to those undergraduate students within the Freeman School of Business as well as those students in the Tulane School of Architecture who successfully **complete twelve (12) credit hours** in the following four courses:

- FINE 4010 Financial Modeling for Real Estate (3 c.h.)
- FINE 4210 Real Estate Planning and Development (3 c.h.)
- LGST 4150 Real Estate Law (3 c.h.)
- BUSG 4500 Real Estate Private Equity (3 c.h.) or SRED 4525 Comm RE Analysis with ARGUS (3 c.h.)

The certificate must be earned concurrently with the undergraduate degree. No more than one course from the certificate may overlap with a student's B.S.M. degree requirements.

Sports Management Certificate

Overview

The A.B. Freeman School of Business is well-positioned to equip its students with the requisite tools, knowledge, and networks required to take a leadership role in this vibrant and growing industry. The Certificate in Sports Management program also serves to align with and augment Tulane's Center for Sport, a cross-disciplinary campus organization with existing extracurricular programming and a significant network of industry and community partners.

Requirements

The Certificate in Sports Management will be awarded to those undergraduate students pursuing B.S.M. degrees in the A.B. Freeman School of Business who successfully complete twelve (12) credit hours in the following four courses:

Course ID	Title	Credits
BUSG 4180	The Business of Sports	3
MKTG 4280	Sports Marketing	3
LGST 4180	Sports & Entertnmt Law	3
BUSG 4600	Cases in Sports Management	3
Total Credit Hours		**12**

The certificate must be earned concurrently with the undergraduate degree. No more than one course from the certificate may overlap with a student's B.S.M. degree requirements.

Energy

The Tulane Energy Institute (TEI) provides educational opportunities that improve understanding of the integration of energy markets, policies, technology and the environment. These initiatives include programming in accounting, analytics, economics, finance, risk management, strategy and trading, as well as applied and basic research in business, engineering and sciences.

Through a certificate at the undergraduate level and the Master of Management in Energy (MME) program at the graduate level, TEI is focused on developing a highly skilled pool of employee talent to work successfully in the energy industry and related banking, consulting, financial, technology and trading firms.

Master of Management in Energy, MME

Overview

The Master of Management in Energy (MME) program is designed for college graduates with quantitative backgrounds who are seeking specialized industry knowledge in preparation for fast-track careers in energy. The program is STEM-designated.

In this 36 credit-hour program, students acquire the knowledge and skills needed to hit the ground running at traditional and renewable

energy companies, utilities, banks, financial services and consulting firms, trading organizations, ISOs and regulatory agencies.

The MME program begins in the summer and can be completed the following May or December, depending on your prior academic background and your desire to complete a summer internship. The program provides an introduction to the energy industry and focuses on sharpening computing and financial modeling skills. It strengthens core quantitative skills while broadening your perspective on the energy industry. Advanced energy courses emphasize practical experience and job-ready skills.

Requirements

Curriculum

The specialized curriculum in the Master of Management in Energy program was crafted by a team of faculty members with input from employers about the skills they want students to possess. Students gain a complete understanding of both traditional and renewable energy sources. Courses provide marketable, technical expertise in everything from structure and valuation to financial modeling and risk management, ensuring that students stand out in the job market.

Master of Management in Energy with UCASS

The International Master of Management in Energy (MME) program is a degree curriculum designed for students recruited by the University of Chinese Academy of Social Sciences (UCASS) in China. The program is designed for participants with quantitative backgrounds who are seeking careers in energy finance and trading. The participants will receive the MME degree from Tulane University.

The 18-month, 37-hour curriculum includes 18 credit hours of foundation courses taught by UCASS and 19 credit hours of course work delivered by Tulane faculty in Beijing, China. Students attend two courses in New Orleans as part of their program curriculum.

Requirements

Students in the MME program must complete the 37-credit hour curriculum with a minimum of a 3.0 overall GPA. Students take 19 credit hours of courses offered by Tulane University and 18 credit hours of electives offered at their home institution.

Entrepreneurship

When studying within the entrepreneurial business minor, students will choose from courses in entrepreneurial finance, management and other related areas while having the opportunity to connect with successful entrepreneurs through Tulane's respected Albert Lepage Center for Entrepreneurship and Innovation. With a minor in entrepreneurial business, students will acquire a unique skillset that will help them stand out from the crowd when they embark upon their career. This program has a track for both BSM majors and non-BSM majors.

Programs

Undergraduate

Minor

- Minor in Entrepreneurial Business (available to BSM's and non-BSM's) (p. 142)

Minor in Entrepreneurial Business (available to BSM's and non-BSM's)

Overview

Training in entrepreneurship is now viewed as an integral component of a contemporary undergraduate business curriculum and critical for the professional development of undergraduate students within and beyond the walls of business schools. To further develop the entrepreneurial mindset and skillset of undergraduates, Tulane University offers a new minor in "Entrepreneurial Business" housed in the A.B. Freeman School of Business. All NTC students are eligible to pursue this minor. There is a "BSM-track" and a "Non-BSM track."

Requirements

The courses for the minor are designed and intended to be taken in sequential order. In other words, students would ideally first take the courses in the core requirements section, followed by the three elective courses, followed by the experiential learning component.

Finance

At the undergraduate level, Freeman offers a finance major in the Bachelor of Science in Management (BSM) program. A finance minor option for business students also exists.

At the graduate level, students may pursue the Master of Finance (MFIN) program. For those interested in teaching or research, the Doctor of Philosophy (PhD) program concentrates on finance and financial accounting.

Programs

Undergraduate

Major

- Finance Major, BSM (p. 145)

- Master of Finance with Universidad Francisco Marroquin and UCASS, MFN (p. 148)

Business, PhD

The Freeman School's PhD program leads to a Doctor of Philosophy in Business Administration degree with a concentration in finance and financial accounting.

Program Goal

The curriculum prepares students for a career as a finance or financial accounting faculty member at peer and aspirant schools. A Freeman School doctorate prepares students to conduct influential empirical research in the areas of finance and financial accounting.

Unique Features of the Program

The doctoral program has the following features:

- Niche in Freeman's Areas of Excellence: The program is focused on training students to publish research and to teach in the areas of corporate finance, investments and financial accounting. These are areas of research strength for Freeman faculty.
- Focus on Empirical Research: The finance, financial accounting and economics faculty have a research strength in empirical research. The classes students take are designed to build on this strength.
- Competitive Student Support: Freeman offers very competitive financial support which is designed to attract high-quality students and to enhance their success.
- Teaching Experience: PhD students will teach classes independently as part of the program. This provides the opportunity to show teaching effectiveness to potential employers and to facilitate an easier transition to a faculty job.
-

Requirements

Curriculum

General Requirements

Students earning the finance and financial accounting concentration of the Freeman School's Doctor of Philosophy in Business Administration degree are required to take a minimum of 48 credits. These credits include required coursework in the first two years of the program, a third-year paper, some elective choices and some independent research credits in subsequent years.

Econometrics Comprehensive Exam

In the summer after the first year, students will be required to take and pass the comprehensive exam in econometrics (to be administered and graded by the Department of Economics, with the passing grade determined by the tenure system Finance/Financial Accounting faculty).

First-Year Paper

In the summer after the first year, students will also be required to complete a replication of an empirical paper in finance or financial accounting. The paper assignment will be the principal requirement of a for-credit course and should be completed by the end of the summer term. Alternatively, students may work as a co-author with a tenure system faculty member, who along with a second tenure-track faculty member will certify that the student has met the requirements for the first-year paper in the joint work. Co-authoring arrangements will be based on voluntary agreements between students and faculty members, without any a priori guarantee or compulsion.

Major Area Comprehensive Exam

In the summer after the second year, students will be required to take and pass the comprehensive exam in finance.

Third-Year Paper

Starting in the summer after the second year (or earlier), students will be required to work on an independent research project in finance or financial accounting. This project should result in a paper and is to be completed under the supervision of an appropriate faculty committee approved by the program director. The student must complete and successfully present the paper to the finance and financial accounting faculty for advancement in the program. The final paper should be completed and presented by the end of the spring semester of the third year. The presentation will be considered an oral examination. Students successfully passing this examination will be admitted into candidacy.

Dissertation Proposal and Defense

After entering candidacy, students will be expected to actively pursue dissertation research.

Finance Seminars/Workshops

Students are required to attend finance/financial accounting workshops and seminars unless they have a class conflict or an emergency. They are also encouraged to attend seminars in the economics department.

Scholarships, Assistantships and Teaching Requirements

Students will be granted assistantships and scholarships for up to six years. The scholarship will be half of the financial assistance per year provided the student is making satisfactory progress. The assistantship will be an additional half of the financial assistance per year provided the student is making satisfactory progress and performing well in his or her assistantship duties.

Students will be assigned to either a research assistantship or a teaching assistantship for each semester during the first 2 1/2 years in the program. They will rotate across the two types of assistantships, which will provide mentoring experiences for students on the teaching dimension and the research dimension. Each semester-long assistantship will entail 15 hours per week as a research or teaching assistant under the supervision of a faculty member. In the third year, students are expected to serve as a research or teaching assistant for one semester and to teach one course for the other semester. During the fourth and fifth year (and the sixth year if a student is still in the program), students will teach two courses per year for their assistantship.

Note: *Students must successfully complete one teaching assistantship and attend the CELT class for graduate teaching assistants before they teach a class independently.*

[1] Required if an equivalent course has not been taken previously.

Elective Details

Students who want to pursue a career in financial accounting but who lack a financial accounting background must take at least two graduate-level accounting courses, to be determined by the PhD faculty director. Students are encouraged to take these classes early in the program if possible.

Students who want to pursue a career in finance but who lack a finance background must take at least two graduate-level finance courses, to be determined by the PhD faculty director. Students are encouraged to take these classes early in the program if possible.

Doctoral electives are available in the economics department. For example, Advanced Price Theory III which covers general equilibrium models is offered in the fall semester every other year (even years).

Additional doctoral electives in business may be offered depending on staffing availability and support.

Finance Major, BSM

A major in finance introduces students to financial markets, investments and financial analysis. Students gain a comprehensive foundation in finance through core classes on valuation, accounting, investments and fixed income analysis. Special experiential learning opportunities include producing an analyst's report in Burkenroad Reports, investing real funds in the Darwin Fenner Student Managed Fund (by invitation only), or exploring alternative investments including hedge funds and distressed debt in the Aaron Selber Courses.

Electives allow students to tailor their education to their career goals through optional tracks in corporate finance and investments, or they may earn a specialization in energy or entrepreneurship.

FINE 4150	International Finance	
FINE 4160	Equity Analysis/Burkenroad Reports	
FINE 4610	Darwin Fenner Student Managed Fund Honors Seminar	
LGST 4140	Insurance & Risk Management	

Finance Minor for BSMs

At the undergraduate level, the Freeman School offers a finance minor for students who are enrolled as business majors. A finance minor can give the student a general understanding of how finance works in all areas of business. To earn the finance minor, students must complete 12 credit hours including one required accounting class (3 credit hours) and three required finance classes (9 credit hours).

For additional information about academic minors, see Academic Requirements (p. 120).

Finance, MFN

Developed in conjunction with industry professionals, the Tulane Master of Finance (MFN) program prepares graduates for successful careers in finance. A curriculum designed around specific career tracks provides students with a solid foundation in the fundamentals of finance, the use of financial analysis tools, and strong communication skills. Students are taught by internationally recognized faculty known for high-impact research published in the top academic journals. The rigorous and specialized MFN curriculum requires 36 credit hours of academic work and can be completed in 10 or 17 months.

The STEM-designated MFN program is a member of the University Affiliation Program of the CFA Institute (https://www.cfainstitute.org/about/universities/). The Freeman School is an AACSB-accredited institution.

Requirements
Curriculum

The Master of Finance (MFN) curriculum was designed by a team of faculty members who teach in the program, and it reflects input from industry professionals about the types of skills they want potential employees to possess. The program focuses on developing strong fundamental analysis skills and uses practical applications to reinforce the technical expertise developed in the classroom. Students experience real-world finance through analyzing cases, completing projects and building financial models. Rigorous experiential learning classes enable students to write professional analyst reports, develop an investment pitch, make investment decisions for the school's endowment, and interact with industry professionals. Communication skills are enhanced through a financial communications class, written projects, and presentations of student financial analysis. Career management is deeply integrated into the curriculum.

* This is a course scheduling recommendation. Students in the MFIN program have the flexibility to choose how many electives are taken in a particular term.

Career Tracks

The Freeman School offers five specialized tracks for Master of Finance students: Corporate Treasury, Investment Banking, Asset Management, Financial Data Analytics, and Sustainable Finance. While earning a track is not required in the MFN program, the option allows students to create a program of study that meets more specific academic and career goals.

Tracks are earned by selecting a minimum of four elective courses within a chosen track for a total of 12 credit hours. Each track has Tier 1 and Tier 2 electives. Tier 1 electives are those highly relevant to a focused career path, and a minimum of two Tier 1 electives is required to earn a track. Tier 2 electives are relevant but not required for all careers within the track. Students should choose Tier 2 electives based on personal interests and career goals.

This leaves a fifth elective course that students may choose freely, regardless of their intended track. A total of 15 elective credit hours is required in the MFN degree.

Corporate Treasury Track

Master of Finance with Universidad Francisco Marroquin and UCASS, MFN

The International Master of Finance (MFIN) program is a curriculum designed for students recruited by partner institutions in Latin America and China who wish to pursue the Tulane MFIN degree. Tulane offers this program in cooperation with Universidad Francisco Marroquin (UFM) in Guatemala and Panama and UCASS (University of Chinese Academy of Social Sciences) in China.

UFM students enroll in a 35-hour curriculum, which includes 17 credit hours of foundation courses taught by Universidad Francisco Marroquin faculty and 18 credit hours of course work delivered by Tulane faculty in Panama City and Guatemala City.

UCASS students enroll in a 36-hour curriculum, which includes 18 credit hours of foundation courses taught by UCASS faculty and 18 credit hours of course work delivered by Tulane faculty in Beijing, Shanghai and Shenzhen, China.

Both UFM and UCASS students participate in an on-campus business module in New Orleans as part of their program curriculum.

Requirements

Students in the International MFIN program at UFM must complete a minimum of 35 credit hours with 17 credit hours at UFM and 18 credit hours from among the following Tulane courses as part of the double degree curriculum. Students at UCASS must complete 18 credit hours of foundation courses taught by UCASS faculty and 18 credit hours from among the following Tulane courses as part of the double degree curriculum.

Global Management

Overview

The Master of Global Management (MGM) program offers qualified MBA and graduates from Xiamen University access to a unique global strategy curriculum and experience. Courses are offered in an intensive, week-long executive format, which is convenient and accessible for current students and working professionals.

Master of Global Management with Xiamen, MGM

Overview

The Master of Global Management program is a joint degree curriculum designed for MBA and EMBA executive students and recent graduates of Xiamen University access to a unique global strategy curriculum. The participants are those who wish to pursue the MGM degree from Tulane University and the MBA degree from Xiamen University.

The 37-hour curriculum includes a minimum of 18 credit hours of foundation courses taught by Xiamen faculty and 19 credit hours of coursework delivered by Tulane faculty in Xiamen, New Orleans, and Mexico.

Requirements

Students in the Master of Global Management with Xiamen (XMU) must complete the 37-hour curriculum with a minimum of 3.0 overall GPA. Students take 19 credit hours, including a global consulting project, and a minimum of 18 credits in MBA core coursework from their home institution.

Legal Studies in Business

A major in Legal Studies in Business introduces students to the principles of the law, social values and moral concerns as they relate to business and commerce. Students gain a comprehensive foundation through business core classes on finance and accounting, as well as business law and legal writing and research. The major provides an array of special experiential learning opportunities and service-learning options such as participating in Court Watch NOLA. Electives allow students to tailor their education to their interests through courses in sports and entertainment law, international business law, taxation and mock trial

The legal studies major helps students develop essential reasoning skills that leaders face in making complicated choices under circumstances of empirical and moral uncertainty – a common theme in rapidly changing markets. Legal Studies majors develop many analytic skills, including the ability to identify legal and moral issues concealed within complicated and multifaceted fact patterns; the ability to use legal and moral principles to form ethical and legal conclusions; the ability to reason by analogy between like cases and circumstances; and the ability to argue from legal and moral rules and precedents to form logically consistent recommendations for action.

The Legal Studies major satisfies the need for a primary major but also complements other more quantitative majors or minors in such areas as finance, accounting, marketing and management. A Legal Studies minor also exists for students pursuing a different major within the BSM degree.

Legal Studies in Business Minor for BSMs

At the undergraduate level, Freeman offers a Legal Studies minor for students who are enrolled as business majors. The Legal Studies minor gives a student a broad understanding of legal issues present in managerial decisions. To earn the Legal Studies minor, a student must complete one required course (3 credits) and two electives chosen from a list of approved courses (6 credits).

For additional information about academic minors, see Academic Requirements (p. 120).

Management Major, BSM

A major in management prepares students to make strategic decisions, manage people and bring new technologies and innovations to market.

Students gain a comprehensive foundation in business through core classes before tackling their major course of study. Students can tailor their education to their career goals by following an optional track in entrepreneurship, Human Resources & Consulting, or Strategy & Consulting. Electives on topics including human resources, ethics and negotiations allow further pursuit of personal interests.

Master of Management with Universidad Francisco Marroquin, MMG

The International Master of Management program is a dual degree curriculum designed for executives recruited by partner institutions in Latin America. The participants are those who wish to pursue the MMG from Tulane University and the MBA from Universidad Francisco Marroquin. This program is offered at two locations: Panama City, Panama, and Guatemala City, Guatemala. The International MMG program enables students to expand cross-cultural leadership, develop teamwork skills and understand the dynamics of global markets, while having the opportunity to study in other countries.

The 36-hour curriculum includes 17 credit hours of foundation courses taught by partner institutions and 19 credit hours of course work delivered by Tulane faculty in Panama and Guatemala. Students attend an on-campus business module in New Orleans as part of their program curriculum.

Requirements

Students in the International Master of Management with Universidad Francisco Marroquin (UFM) must complete the 36-hour curriculum with a minimum of a 3.0 overall GPA. Students take 17 credit hours at UFM and 19 credit hours from the following Tulane courses as part of the double degree curriculum.

Business Administration

The mission of the Freeman School MBA program is to provide the leading-edge knowledge, skills and leadership ability necessary for the progression of its graduates toward general management responsibilities. The linchpin of this educational experience is the well-honed ability of an individual to work across and to lead diverse organizational functions. The program will prepare future managers to be at ease in managing and leading in a world of growing technological, political and economic interdependence among nations.

Each graduate must be competent to make and confident of making significant contributions immediately upon job placement. The curriculum therefore provides opportunities for functional area specialization, while emphasizing and requiring the breadth necessary to ensure success in managing across functions.

General management responsibilities require an intellectual foundation that stands the test of time for creative management and innovative leadership in complex, ambiguous, changing and diverse organizational environments. This foundation is provided at the Freeman School through an interdisciplinary effort that parallels the requirements of managing across business functions.

Beyond preparation for success in general management, the program creates and maintains a challenging learning environment where teachers and students interactively seek enhancement in business productivity, personal growth and awareness of ethical, social and cultural issues in managerial contexts.

At Tulane, students may earn the MBA through one of four options: Executive MBA, Full-Time MBA, Online MBA, or Professional MBA.

International EMBA with University of Chile, Centrum, & ICESI

The International Executive MBA program is a dual degree curriculum designed for executives recruited by partner institutions in Latin America who wish to pursue an EMBA degree from Tulane University and their home institution. Programs are offered at University of Chile in Santiago, CENTRUM in Lima, Peru, and ICESI in Cali, Colombia. The International EMBA program enables students to expand cross-cultural leadership, develop teamwork skills and understand the dynamics of global markets, all while having the opportunity to study in other countries.

The 49-hour curriculum includes a minimum of 24 credit hours of foundation courses taught by partner institutions and 25 credit hours of course work delivered by Tulane faculty in host countries. Students attend an on-campus business module in New Orleans as part of their program curriculum.

Requirements

Students in the International MBA programs with University of Chile, Centrum, and ICESI must complete the 49-hour curriculum with a minimum of a 3.0 overall GPA. Students take a minimum of 24 credit hours at the partner institution and 25 credit hours from among the following Tulane courses as part of the dual degree curriculum.

[1] Taken in New Orleans by students from U. of Chile and ICESI as part of the EMBA International Intensive Week.

Business Administration, Executive MBA

The Tulane Executive MBA (EMBA) is an accelerated alternate-weekend MBA program designed for experienced professionals to earn an

MBA in 17 months. The 48-credit-hour, lockstep curriculum offers the advanced business knowledge and management skills managers need to rise to higher challenges, improve career opportunities and drive corporate growth. All students earn a concentration in global strategy, and students may earn a second concentration in finance or management by choosing electives in those areas.

Requirements

Curriculum

Pre-Program

In the months immediately before the EMBA curriculum begins, prep courses in accounting and quantitative skills help to align student skills with the requirements of the early courses in the curriculum. Orientation and team building sessions will familiarize new students with policies and procedures, and introduce faculty, classmates, and study teams.

Intensive Weeks

The EMBA program begins in January with a week-long academic session, Intensive Week I. Students complete two courses, including exams, in this seven-day intensive. Here students are reintroduced to academic life and begin to practice time management, balancing work, home, and school responsibilities.

A global management intensive seminar is held on the New Orleans campus in January of the second year. During this Intensive Week II, students form new global study teams, collaborating and sharing a classroom with their EMBA counterparts from partner universities in Europe and Latin America.

Alternate Weekends

Most EMBA classes, apart from the intensive weeks and the international seminar, follow an alternate weekend structure wherein students attend classes on Friday and Saturday every two weeks. Each set of two courses, a module, is typically completed in seven weeks.

Electives

In the second half of the curriculum, elective courses are introduced. Students can earn finance or management concentrations, in addition to the global strategy concentration, by selecting the elective course tracks in those areas.

International Seminar

The Executive MBA curriculum culminates in an international seminar abroad during the final course of the program, Managing the Global Enterprise. This capstone course gives students firsthand knowledge of global business and management practices and focuses on the strategic and operational issues of doing business abroad. Today's markets and their economic interdependence demand that managers understand global strategic imperatives. This essential management knowledge makes the international business experience a critical and required component of the EMBA curriculum.

During the international seminar, students:

- Explore the economic, technological, and political environments that influence global business initiatives and discover global business opportunities specific to the host country.
- Develop a keen understanding of global business challenges and management strategies for meeting those challenges.
- Gain firsthand knowledge of foreign business cultures and practice face-to-face interaction with international business leaders.
- Learn the specific challenges individual companies face and the strategies employed to meet these challenges.
- Work directly with foreign organizations to solve real business problems in a consulting assignment and final presentation.

For the seminar, we handle all academic and logistical planning, including airfare, ground transportation, logistics, accommodations, group meals and company visits. These seminar costs are included in the total program cost.

The seminar destination is usually determined eight to twelve months in advance. In past years, seminars have been held in Paris and many other destinations around the world, each presenting students a distinct and culturally unique business environment.

Business Administration, Full-Time MBA

Three key pillars highlight the Freeman School's new full-time MBA curriculum:

1. **Data-driven real-world decision making** – through a five-course data sequence, students learn to understand and apply insights from big data, to understand and appreciate the shortcomings of data, and to collect small focused data sets to precisely and rapidly answer critical questions.

2. **Cross-functional experiential learning** – guided by interdisciplinary faculty, students work in cross-functional teams to solve high-impact community and business problems.

3. **Preparing managers for the business world of the future** – students develop their skills as agile managers who can anticipate and manage crises and who understand the centrality of environmental, social, and governance (ESG) in business.

Completed over four semesters, the full-time MBA program requires 61 credit hours. The curriculum encompasses knowledge core courses (20 credit hours), a data course sequence (10 credit hours), two intensive immersion courses (4 credit hours), a consulting practicum (3 credit hours), an impact capstone course (3 credit hours), and elective courses (21 credit hours).

The knowledge core courses, taken throughout the first two semesters, are taught in seven-week sessions. They provide a foundation in all functional disciplines of business. The program provides an opportunity to understand the interrelationships among these disciplines and how they are integrated in the management of successful organizations. ESG issues are woven throughout the knowledge core.

The data course sequence develops the ability to understand and apply insights from big data, to appreciate the shortcomings of data, and to collect small focused data sets to precisely and rapidly answer critical questions. The sequence includes statistics and analytics courses, an advanced data interpretation course, and two area-specific data core courses.

The intensive immersion courses, focused on negotiations and successful leadership, take place just prior to the start of the spring semester of the first year and the start of the fall semester in the second year.

Through the consulting practicum, a semester-long course in the spring of the first year, students work in teams on cross-disciplinary projects. Core course faculty from different business disciplines oversee and advise student teams.

The impact capstone semester-long course, taken in the fall of the second year, draws on students' problem-solving skills from different business disciplines to help a local or regional company. Guided by core course faculty, these company projects focus on making a societal impact in the areas of sustainability, social inequities, or climate change.

Finally, students complete elective courses in their second year through which they may earn concentrations or specializations in business analytics, finance, strategy and marketing, and/or sustainability. The elective set includes approximately 45 course options from the following fields of study:

- Accounting and Taxation (ACCN, TAXN)
- Business and Law (LGST, MCOM)
- Energy (ENRG)
- Finance and Economics (FINE, ECAN)
- Management (MGMT)
- Management Science (MGSC)
- Marketing (MKTG)

In addition, two required career development courses help students identify appropriate career goals, conduct an effective job search and enhance their careers after graduation. The explicit consideration of career issues early in the program will be helpful in the selection of elective courses. A grade of pass in both non-credit career development courses is a requirement for graduation.

Requirements

Curriculum

An outline of the Freeman School's full-time MBA program, completed in two years over four semesters, follows:

Course ID	Title	Credits
Year 1		
Fall Semester		
First Seven Weeks		
ACCN 6000	Financial Accounting	2
FINE 6010	Economics for Managers	2
MCOM 6000	Corporate Communications	2
MGSC 6010	Introduction to Business Statistics	2
Second Seven Weeks		
FINE 6030	Managerial Finance	2
MGMT 6000	Strategy	2
MGMT 6010	Managing People	2
MGSC 6030	Analytics for Managers	2
Full Semester		
CDMA 6010	Career Development I	0
Spring Semester		
Intensive Immersion		
MGMT 6020	Business Negotiations	2
First Seven Weeks

Concentrations & Specializations

The Freeman School offers a variety of concentrations and specializations for full-time MBA students. While no concentration or specialization is required, this option allows students to create a program of study that meets more specific academic and career goals. Students may declare up to two concentrations and/or specializations while earning their MBA.

Students must complete 12 credit hours to earn a concentration in a particular area and 9 credit hours to earn a specialization. Where applicable, it is possible for one course to count toward two concentrations and/or specializations.

Business Analytics Concentration

Course ID	Title	Credits
MGSC 7320	Advanced Spreadsheet Modeling	3
Select a minimum of one elective and a maximum of two electives from the following:		3-6
MGSC 7100	SQL Database Fundamentals and Business Intelligence	
MGSC 7340	Web Analytics	
Select electives to complete a total of four courses:		3-6
ACCN 7290	Accounting Analytics	
FINE 7510	Econometrics and Forecasting	
MGMT 7030	Environmental, Social, and Governance (ESG) in a Dynamic Global World	
MKTG 7250	Social Media and Online Marketing	
MKTG 7280	Data and Analysis for Marketing Decisions	

Business Analytics Specialization

Course ID	Title	Credits
MGSC 7320	Advanced Spreadsheet Modeling	3
Select a minimum of one elective and a maximum of two electives from the following:		3-6
MGSC 7100	SQL Database Fundamentals and Business Intelligence	
MGSC 7340	Web Analytics	
Select electives to complete a total of three courses:		0-3
ACCN 7290	Accounting Analytics	
FINE 7510	Econometrics and Forecasting	
MGMT 7030	Environmental, Social, and Governance (ESG) in a Dynamic Global World	
MKTG 7250	Social Media and Online Marketing	
MKTG 7280	Data and Analysis for Marketing Decisions	

Finance Concentration

Course ID	Title	Credits
FINE 7110	Investments	3
FINE 7130	Advanced Financial Management	3
Select two electives from the following:		6
ACCN 7130	Financial Statement Analysis	
ENRG 7500	Energy Risk Management [1]	
FINE 7140	Venture Capital & Private Equity	
FINE 7340	Aaron Selber Jr Course on Distressed Debt [2]	
FINE 7350	Aaron Selber Jr on Hedge Funds [2]	
FINE 7380	Climate Change, ESG, and Financial Markets	
FINE 7510	Econometrics and Forecasting	
FINE 7530	Burkenroad Reports for Financial Analysts	
FINE 7610	Darwin Fenner Student Managed Investment Fund [2]	
FINE 7640	Valuation	
FINE 7660	Financial Risk Management [1]	
MGMT 7030	Environmental, Social, and Governance (ESG) in a Dynamic Global World	

[1] May only choose one of these two courses.
[2] Students must apply for enrollment in this course.

Finance Specialization

Course ID	Title	Credits
FINE 7110	Investments	3
FINE 7130	Advanced Financial Management	3
Select one elective from the following:		3
ACCN 7130	Financial Statement Analysis	
ENRG 7500	Energy Risk Management [1]	
FINE 7140	Venture Capital & Private Equity	
FINE 7340	Aaron Selber Jr Course on Distressed Debt [2]	
FINE 7350	Aaron Selber Jr on Hedge Funds [2]	
FINE 7380	Climate Change, ESG, and Financial Markets	
FINE 7510	Econometrics and Forecasting	
FINE 7530	Burkenroad Reports for Financial Analysts	
FINE 7610	Darwin Fenner Student Managed Investment Fund [2]	
FINE 7640	Valuation	
FINE 7660	Financial Risk Management [1]	

MGMT 7030	Environmental, Social, and Governance (ESG) in a Dynamic Global World

[1] May only choose one of these two courses.
[2] Students must apply for enrollment in this course.

Strategy and Marketing Concentration

Course ID	Title	Credits
Select four electives from the following, with at least one from MGMT and one from MKTG:		12
MGMT 7030	Environmental, Social, and Governance (ESG) in a Dynamic Global World	
MGMT 7100	Strategic Mergers and Acquisitions	
MGMT 7180	Innovation and Technology Commercialization	
MGMT 7210	Management of Technology and Innovation	
MGMT 7250	Strategic Human Resources Management	
MKTG 7140	New Product Development	
MKTG 7250	Social Media and Online Marketing	
MKTG 7280	Data and Analysis for Marketing Decisions	
MKTG 7290	Strategic Brand Management	

Strategy and Marketing Specialization

Course ID	Title	Credits
Select three electives from the following, with at least one from MGMT and one from MKTG:		9
MGMT 7030	Environmental, Social, and Governance (ESG) in a Dynamic Global World	
MGMT 7100	Strategic Mergers and Acquisitions	
MGMT 7180	Innovation and Technology Commercialization	
MGMT 7210	Management of Technology and Innovation	
MGMT 7250	Strategic Human Resources Management	
MKTG 7140	New Product Development	
MKTG 7250	Social Media and Online Marketing	
MKTG 7280	Data and Analysis for Marketing Decisions	
MKTG 7290	Strategic Brand Management	

Sustainability Concentration

Course ID	Title	Credits
ACCN 7000	Environmental, Social, and Governance (ESG) Reports	3
FINE 7380	Climate Change, ESG, and Financial Markets	3
MGMT 7030	Environmental, Social, and Governance (ESG) in a Dynamic Global World	3
Select one elective from the following:		3
ENRG 7130	Energy & Environmental Economics	
ENRG 7850	Renewable & Electric Power Markets	
ENRG 7860	Renewable Energy Project Development & Finance	

Sustainability Specialization

Course ID	Title	Credits
Select a minimum of two electives and a maximum of three electives from the following:		6-9
ACCN 7000	Environmental, Social, and Governance (ESG) Reports	
FINE 7380	Climate Change, ESG, and Financial Markets	
MGMT 7030	Environmental, Social, and Governance (ESG) in a Dynamic Global World	
If two electives are chosen above, choose one elective from the following:		0-3
ENRG 7130	Energy & Environmental Economics	
ENRG 7850	Renewable & Electric Power Markets	
ENRG 7860	Renewable Energy Project Development & Finance	

Business Administration, Online MBA

The **Online Master of Business Administration (OMBA)** from the A. B. Freeman School of Business is designed to meet the needs of professionals from a wide range of academic and professional backgrounds. The 46-hour curriculum is taught in a primarily asynchronous yet highly engaged format with weekly virtual synchronous sessions. The program offers a mix of conceptual rigor, deep thinking exercises, and real-world examples to advance learners' business skills and careers. The courses are taught by Freeman faculty who bring their expertise to the classroom, sharing proven research and the latest developments in a wide range of fields. Optional concentrations are offered in Business Analytics, Finance, and Marketing.

Requirements

Curriculum

To obtain the online MBA degree, a student will have to earn 46 credits. These credits are divided into a series of fourteen 2-credit half semester knowledge and skills core classes and at least six semester-long 3-credit elective classes.

Core Curriculum

Course ID	Title	Credits
ACCN 6000	Financial Accounting	2
ACCN 6010	Managerial Accounting	2
FINE 6010	Economics for Managers	2
FINE 6030	Managerial Finance	2
FINE 6070	Advanced Managerial Finance	2
LGST 6000	Essentials of Business Law	2
MCOM 6000	Corporate Communications	2
MGMT 6000	Strategy	2
MGMT 6010	Managing People	2
MGMT 6250	Business Model Development	2
MGSC 6010	Introduction to Business Statistics	2
MGSC 6030	Analytics for Managers	2

MGSC 6040	Supply Chain and Operations Management	2
MKTG 6010	Marketing Management	2

Electives

Students must complete 6 courses totaling 18 credit hours from the listed electives below.

Course ID	Title	Credits
ACCN 7130	Financial Statement Analysis	3
ACCN 7280	Operational Risk Management	3
FINE 6080	Financial Policy & Valuation	3
FINE 7110	Investments	3
MGMT 7050	Managing for Success	3
MGMT 7110	Negotiations	3
MGMT 7210	Management of Technology and Innovation	3
MGSC 7100	SQL Database Fundamentals and Business Intelligence	3
MGSC 7320	Advanced Spreadsheet Modeling	3
MGSC 7340	Web Analytics	3
MKTG 7250	Social Media and Online Marketing	3
MKTG 7290	Strategic Brand Management	3

Concentrations

While no concentration is required, students may choose up to two concentrations. No more than one course (3 credits) can count towards multiple concentrations. Students who overlap one course between two concentrations must complete a minimum of 18 credit hours in total. Students must complete 9 credit hours from the listed electives to earn a concentration in a particular area.

Business Analytics Concentration: Students must choose 3 of the following 4 electives.

Course ID	Title	Credits
MGSC 7100	SQL Database Fundamentals and Business Intelligence	3
MGSC 7320	Advanced Spreadsheet Modeling	3
MGSC 7340	Web Analytics	3
MKTG 7250	Social Media and Online Marketing	3

Finance Concentration:

Course ID	Title	Credits
ACCN 7130	Financial Statement Analysis	3
FINE 6080	Financial Policy & Valuation	3
FINE 7110	Investments	3

Marketing Concentration:

Course ID	Title	Credits
MKTG 7250	Social Media and Online Marketing	3
MKTG 7290	Strategic Brand Management	3
MGMT 7210	Management of Technology and Innovation	3
or MGSC 7340	Web Analytics	

Business Administration, Professional MBA

The Tulane Professional MBA (PMBA) program is for rising professionals with at least two years of work experience who are seeking to increase their effectiveness and fast-track their careers in a flexible format.

This three-year, part-time MBA program, comprised of 48 credit hours, is taught by faculty members from Freeman's prestigious full-time MBA program. In small classes, MBA students acquire expertise through experience – how to analyze problems critically, how to set smart goals, and how to be both a team player and an effective manager.

Concentrations & Specializations

In addition to developing a common body of knowledge in practical business matters, students in the PMBA program are able to complete a concentration or specialization in select fields. While no concentration or specialization is required, these options provide students the opportunity to create a program that meets more specific academic and career goals. Students may declare up to two concentrations and/or specializations while earning their MBA.

Students must complete 12 credit hours from the listed electives to earn a concentration in a particular area. To earn a specialization, students must complete 9 credit hours from the listed electives in a particular area.

Analytics

[1] If you choose MGMT 7050 in lieu of MGMT 6040 for the core requirement, it may not count toward this concentration.

Minors for Non-Business Students

Non-BSM students can engage in rigorous business studies through two programs:

The Business Minor Summer Institute is a 23.5 credit hour intensive summer program in which a select cohort of students works together to build a foundation in the core tenants of business, including marketing, management, finance, communication, accounting, spread sheeting, career development and law. With an eye towards complementing their non-business major, the student will embark upon a 10-week journey to allow them to speak the language of business and enhance their existing studies at Tulane. This program is only offered each summer from May to July. Students must apply for the program through the Office of Undergraduate Education within the Freeman School (business@tulane.edu).

The Entrepreneurial Business Minor is an 18 credit experience that allows non-BSM students to join their BSM counterparts to work together to bring nascent ideas to fruition through coursework in finance, accounting, management, marketing, product development and a deep dive into the best practices within the world of entrepreneurship. Students will conclude their minor studies with an experiential-learning course that allows students to transcend the classroom and bring ideas to life.

Programs

- Minor in Entrepreneurial Business (available to BSM's and non-BSM's) (p. 142)
- Summer Business Minor Institute for non-BSMs (p. 161)

Summer Business Minor Institute for non-BSMs

Overview

The Business Minor Summer Institute is an accelerated program that provides non-business students with the fundamental business skills needed to shine in the corporate world or simply to complement their non-business major studies.

In just one summer, students earn up to 23.5 credits and acquire a business minor. In the process, students gain a wide variety of business knowledge, professionalism, connections and confidence to pursue a variety of post-graduate endeavors. Students who pair the business minor with their majors in other Schools within Tulane are able to approach complex nuanced problems from a variety of academic perspectives.

Requirements

The Business Minor Summer Program consists of two sessions, both of which must be completed in the same summer.

Year 1

Summer Session 1		**Credit Hours**
ACCN 2010	Financial Accounting	3

SCHOOL OF LAW

Overview

Mailing Address

Weinmann Hall
6329 Freret Street
New Orleans, LA 70118

Administrative Office

Dean: Marcilynn Burke
Vice Dean: Stacy E. Seicshnaydre
Phone: (504) 865-5961
Web Site: https://law.tulane.edu/

Tulane Law School is the nation's 12th oldest law school. From its founding in 1847, Tulane has always prided itself as a place of intense creativity and innovation in the study of law.

Its location in Louisiana, the country's sole civil-law jurisdiction, gives Tulane a distinctive understanding of the interaction of different legal systems and is the foundation for Tulane's world-renowned strength in international and comparative law. The unique exposure our students gain to both the common law of the Anglo-American tradition and the civil-law systems that dominate the rest of the globe is an increasingly powerful advantage in a world in which business, governance, and law practice are increasingly transnational.

The distinctively global perspective of Tulane Law is enlivened by a student body drawn from approximately 25 countries, by Tulane-led academic programs in a half-dozen countries abroad, and by an international faculty whose scholarly distinction ranges from advising on constitutional design in Iraq, Egypt, and Tunisia, and legal barriers to Russian gas pipelines to Europe, to intercultural negotiation of legal and political conflicts.

Yet, Tulane Law pairs that global perspective with a deep commitment to its own community and to equipping students with the practical skills and judgment they need to make a difference in their careers. The first law school in the nation to require pro bono service of all students, Tulane is a leader in preparing students for practice through service to others.

An early leader in clinical legal education, Tulane Law continues to offer eight live-client clinics and now offers students a growing array of creative experiential-learning opportunities – including an intensive, one-week simulation of law practice through a Lawyering Skills Boot Camp, a Business Literacy Boot Camp for 1L students, and externships across the globe.

This distinctive approach to legal education, both global in outlook and grounded through professional skills training in service to our own community, prepares Tulane Law alumni for leadership in their careers wherever their passions take them.

Academic Policies

Graduate School Policies

A full description of academic policies for all students in Graduate Programs (p. 80) can be found in the Office of Graduate and Postdoctoral Studies section of this catalog. Students should review these policies thoroughly.

School of Law Policies (p. 163)

School of Law Policies

Academic Standards

Basis for Dismissal Because of an Unsatisfactory Academic Record

The following rules establish the standards for dismissal of a JD student because of an unsatisfactory academic record at the Law School:

1. No student may remain in school who has a cumulative grade point average of less than 2.0 at the end of the first year or at the end of any subsequent semester.

2. No student may remain in school who has received more than three grades below C– during the student's first year.
3. No student may remain in school who has received more than six grades below C– during his or her first two years in residence.
4. No student may remain in school who has failed more than 10 semester hours in any school year.
5. No student may remain in school who has failed more than 15 semester hours at any time.
6. No student may graduate with a cumulative grade point average of less than 2.0.

The following rules establish the standards for dismissal of a graduate student because of an unsatisfactory academic record:

1. A graduate student will be dismissed from the graduate studies program if his or her grade point average at the end of any semester is less than 2.00.
2. A graduate student must have a cumulative grade point average of no less than 2.00 to graduate.

In addition, graduate students in specialty LLM programs (Environmental and Energy, International and Comparative, and Admiralty) also must receive passing grades in all courses listed in program materials as required for the degree.

Determination of Credit Hours Awarded for Coursework

A "credit-hour" is an amount of work that reasonably approximates not less than 750 minutes of classroom or direct faculty instruction and 30 hours of out-of-class student work. The 750 minutes of classroom or direct faculty instruction may include up to 50 minutes per credit hour of time scheduled for a final examination.

For other academic activities, including simulation, field placement, clinical, co-curricular, and other academic work leading to the award of credit hours, a "credit-hour" is an amount of work that reasonably approximates at least an equivalent amount of work as required by the preceding paragraph.

Students seeking academic credit for participation in journals, moot court and other co- curricular activities shall ensure that a record of the work required to earn the number of credits sought is submitted in accordance with the approved policy of the co-curricular activity to the Office of Academic Services no later than the close of business on the last day of classes for the semester in which credit is sought. Upon request, students shall submit any additional evidence of such work required to justify the number of credit hours sought.

Students enrolled in clinics and field placements shall maintain a log of hours worked and submit time keeping records in accordance with clinic and externship policies administered by the Office of Experiential Learning and Public Interest Programs.

Double Credit

No student shall receive academic credit for any paper, comment, note or other written work which is the same or substantially the same as a paper, comment, note or other written work for which the student has previously received academic credit or will in the future receive academic credit in the law school.

Eligibility for Degrees
Academic Honors

JD candidates are eligible to graduate with honors under the following conditions:

1. Students whose class ranks place them within the top 10% of the graduating class may be elected by the faculty to the Order of the Coif.
2. Students who graduate in the top 33% of their class may graduate cum laude. The top 33% is determined by the number of May JD graduates each year. Cum laude is not determined by graduation rank.
3. Students who graduate in the top 12% of their class may graduate magna cum laude. The top 12% is determined by the number of May JD graduates each year.
4. Students who graduate in the top 2% of their class may graduate summa cum laude. The top 2% is determined by the number of May JD graduates each year.

LLM candidates may be eligible to receive the degree "with distinction" if they have maintained a cumulative grade point average of 3.5 or higher.

Degree Requirements for the SJD Program

In order to obtain the SJD degree, a student must fulfill the following requirements, depending on the student's particular circumstances upon admission to the program:

1. Coursework:
   a. Students admitted to the SJD program with a Tulane Law School Master's degree awarded five or fewer years prior to admission to the SJD program are exempt from any further coursework requirement.
   b. Students admitted to the SJD program with a Tulane Master's degree awarded more than five years prior to admission to the SJD program must complete an additional 10 hours of coursework with a grade of B or better in each course.

c. Students admitted to the SJD program with a Master's degree from a law school in the United States (other than Tulane) or from an approved foreign law school in all cases must complete an additional 12 hours of coursework at Tulane.

2. All SJD students, including those exempt from some or all further coursework requirements, must be in residence for at least one year but are only required to pay full-time tuition and fees for at least one semester, typically the first semester of enrollment in the program. Students wishing to enroll in courses outside that one semester may do so on the understanding that they must pay tuition for each additional course they take.
3. Every SJD candidate must write and defend successfully a dissertation which makes an original and significant contribution to legal scholarship. Unless specifically exempted from this requirement for very exceptional circumstances by the Graduate Programs Committee, the dissertation must be complete and the defense must take place within four years from the initial enrollment in the SJD program.
4. Dissertation Committee: The committee will consist of three members one of whom is the supervisor who acts as the chair of the committee. The chair of the committee shall be a tenured member of the faculty. At least one of the other two members of the committee shall be a tenured or tenure-track member of Tulane Law School. Under normal circumstances, all members of the committee will be Tulane Law School faculty members, but there may be cases where it becomes necessary to ask a faculty member from another department of the University or a faculty member at another institution, foreign or domestic, to join the committee. The outside member must, however, be a tenured member of the faculty at his or her home institution. The selection of the dissertation committee will be decided by the student in consultation with the chair of the committee. The committee shall be empaneled at the earliest time after the candidate has taken residence but no later than the end of the first semester of residence. As soon as the committee has been established, the chair of the committee shall notify the Graduate Affairs Committee of the names of the members of the committee. The Graduate Affairs Committee shall transmit the information to the Assistant Dean for Academic Services for record keeping.
5. Lengths of dissertations vary depending on the subject matter and the writing style of the authors, but as a general matter the length of a dissertation ranges between 200-300 pages, including appendix and bibliography. After the dissertation committee has approved the dissertation, the supervisor shall set up a meeting at which the candidate shall present an oral defense of the doctoral thesis. The dissertation committee will conduct the oral examination. The meeting for the oral defense is open to members of the Law School faculty.
6. Clinical programs, the Trial Advocacy course and externships are not open to SJD students.

*The reasons for inviting an outside member to join the committee may vary. One reason may be that there may not be the required expertise on the faculty. Alternatively, the invited member may be such a distinguished scholar in the area of the student's research that the chair and the other member of the committee may decide that inviting him or her to join the committee will considerably strengthen the committee and improve the prospect of a first rate product.

* There may be exceptional circumstances where the chair of the committee and the second member believe that there are no suitable academics to help in the specialized area and that there was an outstanding practitioner who is an expert in the particular field of research. In those circumstances, the chair of the committee and the second member of the committee may invite the practitioner to join the committee.

Experiential Learning Requirement

Professional skills are necessary for effective and responsible participation in the legal profession. Therefore, starting with students matriculating in Fall 2016, JD candidates must successfully complete (pass) courses providing a minimum of six experiential learning credits. In order to qualify for experiential credits, an

approved course must be designated as an "experiential course" as provided in Section V.H of the Student Handbook. The courses that fulfill this requirement are designated and separately listed in the registration materials.

General Degree Requirements for the JD Program

To be eligible for graduation, a JD student must have maintained a satisfactory record as defined at Section V.A., above, have completed 88 semester hours of acceptable work and have spent 6 full-time semesters in academic residence. Transfer students must earn at least 59 of the 88 semester hours at Tulane and must have spent at least 4 full-time semesters in academic residence at Tulane to receive the JD degree. The credit-hour and residency requirements for students enrolled in approved joint degree programs are set forth in Section II.B. A full-time semester is one in which a student has registered for a minimum of 10 law credits and satisfactorily completed 9 credits. Attendance and accumulation of credits at a summer school in law will not reduce the number of full-time semesters for which a student must be in academic residence.

A student who has earned 88 credits toward the JD degree may not enroll in any more courses that will appear on the student's transcript or average into the student's GPA. Thus, a student may not register for any courses after 88 credits have been earned for the purpose of increasing his/her GPA. A student who has not yet earned 88 credits toward the JD degree may register in a semester or summer school session for up to the maximum number of credits allowed during that semester or session. In such case, all of the courses taken during that semester or session will be reflected on the student's transcript and the grades earned in all of the courses averaged into the student's GPA.

To receive any degree from the Law School, a student must receive the approval of the faculty and must have satisfied all financial obligations to the University. Students must also have completed all course requirements (i.e., paper, exam) in courses for which they have received an Incomplete as any "I" converts to "F" upon application for graduation.

To graduate, all JD students must successfully complete (pass) all of the courses in Tulane's first year curriculum and the Legal Profession course. The Professional Responsibility Seminar does not substitute for Legal Profession. Transfer students who completed their first year at another law school must take and successfully complete (pass) any Tulane first year course for which they did not take and complete a comparable course in their first year. These required first year courses and the Legal Profession course must be taken for a letter grade and may not be taken on a Pass/D/Fail basis. If, however, a student transfers from an ABA-Accredited law school that requires a two-hour rather than three-hour Legal Profession course, successful completion of the two-hour course at the student's home institution will satisfy the Legal

Profession requirement under this Section. Further, all students must successfully complete one rigorous writing project after the first year of law school, the experiential learning requirement and the pro bono service requirement. See V.D.2-4.

General Degree Requirements for the Master's Program

Candidates for all Master's degrees must satisfy the following requirements in addition to any special course requirements:

1. Satisfactory completion of 24 hours of coursework, at least 21 of which must be at the Law School, and up to three of which may be earned in a summer term. "Satisfactory completion" is defined under Academic Standards. No transfer credit can be granted. A student who has earned 24 credits towards the Master's degree may not enroll in any more courses that will appear on the student's transcript or average into the student's GPA.
2. Full-time students must complete between 10 and 12 hours of coursework in each of two consecutive fall and spring semesters, except with special permission. Part-time students must complete between 4 and 7 hours of coursework each semester and complete the degree in four consecutive semesters, with the option of attending one summer session for up to 3 hours of coursework.
3. Students must satisfy the specific requirements of the degree program in which they are enrolled (e.g., General, Admiralty, Energy & Environment, or International & Comparative Law).
4. Students are required to write papers for at least three, but not more than nine, hours of coursework, in courses requiring or permitting completion of a paper in lieu of an exam. Directed research credit falls in this category and may be used to satisfy up to three hours of the writing requirement. Students may not receive credit for

Directed Research beyond the nine-hour writing credit maximum. The course Legal Research and Writing for International Graduate Students may not be counted toward the writing requirement.1

5. All master's degree candidates who have received the first law degree from a school outside the United States must successfully complete Introduction to American Law (2 credits) and Legal Research & Writing for International Graduate Students (1 or 2 credits), in addition to any specific degree requirements.
6. Clinical programs, Trial Advocacy course and externships are not open to graduate students subject to the following exception. Students who received a JD from a U.S. law school and who are candidates for a Tulane Law School Master's degree may apply to participate in the Environmental Law Clinic for a maximum of one semester. This is the only clinic open to graduate students, and the limitation of one semester participation is not subject to modification.
7. Students in the full-time graduate studies programs must be enrolled as full-time students at the Law School for one academic year (i.e., two full-time semesters). A full-time semester is defined as enrollment in ten more hours of coursework. Students may not pursue degrees in absentia.
8. Students must meet all financial obligations to the University.
9. Each student must, after fulfilling all other degree requirements, be recommended for the degree by the law faculty.

*Certain state bars will not award credit to international graduate students for non-classroom courses. Graduate students are advised to consult with the bar to which they plan to apply for additional guidance before registering for a Directed Research or other non-classroom credit course.

Academic Standards for Graduate Students

Graduate students are not permitted to take any course on a Pass/D/Fail basis. The work of graduate students is graded on a letter-grade scale, with quality points assigned as follows:

Grade	Description
A+	4.00
A	4.00
A-	3.667
B+	3.333
B	3.000
B-	2.667
C+	2.333
C	2.000
C-	1.667
D	1.000
F	0.000

"Satisfactory completion" requires a cumulative grade point average at Tulane of C (2.00) or higher. This grade point average must be maintained as of the end of each semester of enrollment.

Pro Bono Requirement

In addition to the academic requirements set forth above, in order to be eligible for the JD degree, each student must complete a total of 50 hours of *approved uncompensated, supervised, law-related public interest service*. It is recommended that the required 50 hours be performed at a single placement during one semester or during the summer when feasible. Students are also encouraged to do more than one pro bono placement once their first assigned placement is satisfactorily completed.

Summary: For students to receive credit towards the Pro Bono requirement, the student cannot receive remuneration or academic credit. Students may choose to contribute any number of hours in excess of the minimum required and should report all pro bono hours via the electronic time reporting mechanism provided by the Office of Experiential Learning and Public Interest Programs. All pro bono hours will be reflected on the student's transcript. In order to earn credit towards the Pro Bono requirement, time records and the Supervisory Form must be received by the Office of Experiential Learning and Public Interest Programs on or before the relevant deadlines, which typically occur at the end of each semester in which pro bono work was completed. Students who contribute exemplary pro bono service are recognized annually at the Pro Bono Luncheon. Additionally, each Spring, qualifying 3Ls are eligible for induction into the Pro Bono Krewe, an honorary community/society of distinguished pro bono volunteers.

Qualifying Pro Bono Service: Because the Tulane pro bono requirement is designed to instill in each student a sense of responsibility to the community when each becomes a member of the bar, a student's work should address the needs of underserved individuals or the community-at-

large. Qualifying pro bono service covers a wide spectrum of activities and locales:

1. Students may work under the supervision of private practitioners or firms where the work is performed at no cost on behalf of persons of limited means or otherwise underrepresented groups.
2. The work may be performed in the public sector on behalf of a local, state or federal government entity (*e.g.*, the district attorney's office, the indigent defender program, the Department of Justice, the courts, EPA).
3. Work may be performed on behalf of public-interest non-profit organizations (excluding trade organizations) qualifying under IRS sections 501c (3) and (4), which endeavor to protect rights of underrepresented persons and groups.
4. Students may contribute to a qualifying student-led organization serving public interest goals, such as VITA (tax assistance for low-income individuals through Tulane Law School), or a community legal education program benefitting low-income individuals.

Qualifying pro bono work must be law-related. Qualifying tasks include client interviewing, document drafting and review, case planning and preparation, legal research and writing, drafting of legislation or regulations, formulation of legal policy, and participation in legal education programs in the public schools. Training time (up to 5 hours in a 50-hour placement) and limited administrative tasks, pertinent to the legal assignment, are viewed as law-related work counting toward the fulfillment of the requirement.

Students may opt for one of many placements advertised and coordinated through the Office of Experiential Learning and Public Interest Programs. Placements during the academic year are generally located in the New Orleans metro area. In addition to pre-approved placements scheduled through the Office of Experiential Learning, students may also submit an Independent Placement proposal for pro bono credit before beginning proposed volunteer work. Once determined to satisfy the law school requirement, the work may be performed in any location around the globe.

Registration holds: Third year students who have not completed their 50-hour requirement by October of the year in which they intend to graduate must be registered for a placement and submit a schedule for completing their pro bono hours before they will be permitted to register for spring classes.

Submission requirements for graduation: To be eligible to graduate, all JD students must complete the requisite number of pro bono hours on or before April 15 of the third year of law school. Completion of this requirement shall be demonstrated by appropriate submission of electronic time records reflecting the requisite minimum hours (or more) and the "services performed" in an approved placement. The Time Sheet is to be certified by the electronic signature of the student's supervising attorney. The Office must also receive the completed Pro Bono Supervisory Report form submitted by the supervising attorney and the Pro Bono Student Survey form. All forms are subject to the approval of the Associate Dean for Experiential Learning and Public Interest Programs.

Third-year students failing to complete the Pro Bono requirement by the April 15 deadline are subject to an administrative assessment of $75.00. In addition to payment of the fee, the late student must then complete the Pro Bono requirement by April 25 to be eligible for graduation at the end of the spring semester. As there is ample opportunity to complete the Pro Bono requirement any time between matriculation and April 15 of the third year, there will be **no extension of this deadline**, absent truly extraordinary circumstances approved by the Assistant Dean of Students. Students not completing the requirement within that period will have the opportunity to complete it thereafter and then be eligible to graduate at the end of a subsequent term (provided all other graduation requirements are also met).

Upper-Class Writing Requirement

In order to promote the further development of effective legal writing skills, emphasize the intellectual rigor required for complex legal analysis, reasoning, and argumentation, and expose students to advanced legal scholarship, each JD student must, as a requirement for graduation, successfully complete one rigorous writing project after his or her first year of law school. Successful completion is defined as earning a grade of "C" or better in a course graded on the normal grading scale or earning a "Pass" in a course that is graded Pass/D/Fail. If a grade of "C" or better is not earned in a course graded on the normal grading scale, the project does not satisfy the upper class writing requirement, even if the student has exercised the Pass/D/Fail option in the course.

The upper class writing requirement may be satisfied by successfully completing an approved seminar, course, or a directed research project approved and supervised by a faculty member. Students may also fulfill the writing requirement through production under faculty supervision of a publishable Case Note or Comment in any of the law school's journals.

In all cases, to satisfy this requirement, the student must do all of the following:

1. develop a topic, individualized research plan, and written proposal in consultation with the supervising faculty member;
2. present at least one draft of the paper to the supervising faculty member for the faculty member's critique;
3. complete at least one revision of the paper taking into account the comments and critique provided by the supervising faculty member.

The final paper must consist of no fewer than 25 double-spaced pages. The supervising faculty member must certify at the end of the project that it has been completed successfully. A copy of the final draft and certification shall be submitted to the Academic Services Office. For papers completed as a Directed Research, a copy of the written proposal and plan of research must be submitted with the final draft and certification.

Experiential Courses

All clinical courses, externship field placements, practicums and labs under the administration of the Associate Dean of Experiential Learning and Public Interest Programs are designated as "experiential courses."

A simulation course may be designated an "experiential course" by the Associate Dean for Experiential Learning and the Vice Dean if the course:

1. is primarily experiential in nature;
2. provides a substantial experience not involving an actual client that is reasonably similar to the experience of a lawyer advising or representing a client or engaging in other lawyering tasks in a set of facts and circumstances devised or adopted by a faculty member;
3. integrates doctrine, theory, skills, and legal ethics, and engages students in performance of one or more of the professional skills identified in paragraph (c);
4. develops the concepts underlying the professional skills being taught;
5. provides multiple opportunities for performance;
6. provides opportunities for self-evaluation;
7. includes a classroom instructional component; and
8. provides direct supervision of the student's performance and opportunities for feedback by the faculty member.

The professional skills that may be developed in a simulation course include, without limitation, interviewing, counseling, negotiation, fact development and analysis, trial and

appellate practice, document and legislative drafting, conflict resolution, organization and management of legal work, collaboration, cultural competency, and self-evaluation.

Limitation on Non-Classroom Credits

No more than 18 credits of non-classroom work may be offered in satisfaction of the 88 hour requirement for graduation or the credit requirement for any joint degree student (see Section II.B). The following produce non-classroom credits:

1. Law Review
2. Moot Court
3. Maritime Law Journal
4. Environmental Law Journal
5. Journal of Law and Sexuality
6. Journal of International and Comparative Law
7. Tulane Journal of Technology and Intellectual Property
8. Sports Lawyers Journal
9. Senior Fellow
10. Externships (3-credit fieldwork course)
11. Directed Research
12. In 3-credit seminars, 1 credit hour is allocated to non-classroom credit.

Note—Trial Advocacy, Negotiation and Mediation Advocacy, Intersession classes and Clinic credits are not considered non-classroom hours.

Readmission

Students who have been dismissed because of an unsatisfactory academic record, as defined in Sec. V.A. may petition for readmission. Petitions from JD students will be considered by the Readmission Committee, and petitions from graduate students will be considered by the Graduate Affairs Committee. To the extent practicable, the Graduate Affairs Committee will follow the procedures listed below.

Although there is no specific format for the petition, the student should provide the committee with a detailed written account of his or her academic performance and the factors which may have contributed to it. Students who request that the Committee consider physical illness or

personal or family situations that affected their ability to concentrate on academics must submit appropriate documentation, either with their petitions or at their

readmission hearings. Letters of recommendation from law professors or other persons who may have direct knowledge of the student's legal ability may be helpful but are not required. Finally, the student should relate to the Committee specific details which he or she believes will lead to the improvement of his or her academic record if readmitted.

In addition to filing a written petition, the student has the right to appear before the Readmission Committee in person so that the appeal can be discussed in greater depth. The student may raise in the hearing only those issues discussed by the student in his or her petition. No student will be denied readmission without having the opportunity to present personally his or her petition before the Committee.

While the Committee may consider grades in summer school courses recorded subsequent to the student's academic dismissal, the fact that such grades raise a student's cumulative average to 2.0 or above does not require the Committee to readmit the student.

The faculty has adopted the following guidelines for students who have been dismissed for academic deficiencies. With respect to first year students, these guidelines are applicable to dismissals that occur at the end of the first year.

1. In reviewing petitions for readmission, serious consideration for readmission will be given to those with an average between 1.8 and 2.0.
2. Below 1.8, only extraordinary circumstances would justify consideration for readmission.
3. Below 1.6, only the most extraordinary circumstances would justify consideration for readmission.

If, after consideration of a petition, the student's request for readmission is granted, the Readmission Committee may impose on the student certain academic conditions that must be met in order for the student to regain and remain in good standing. If these conditions are not met, the student is again subject to dismissal. If a student readmitted for the third time is again dismissed, he or she cannot petition for readmission.

If a petition is denied by the committee, the petitioner may appeal to the Dean by submitting a written appeal within ten business days of the Committee's decision, provided the decision has been communicated by telephone or certified mail at the address provided by the student. Review by the Dean shall be limited to matters raised in the petition or that are part of the hearing record. The Dean has the authority to affirm the denial or to refer the matter to the faculty as a whole. If a student desires a personal conference with the Dean, a written appeal must be submitted prior to scheduling a conference.

If a petition is denied by the Committee or the Committee's decision is affirmed by the Dean, the student may again petition for readmission in a subsequent semester, provided the student can show that his or her graduation can occur within the five calendar year limit specified in Section II.A.

Notation of a student's dismissal from the Law School is printed on the student's transcript and is maintained as a permanent part of the record even if the student is readmitted.

Classes and Registration

Adding and Dropping Courses

Subject to the general rules regarding registration, upper-class students may add or drop a course without permission during the first two weeks of the fall and spring semesters (one week in the summer). During the third and fourth weeks of the fall and spring semesters, students must obtain permission from the Assistant Dean of Students to drop a course. After that, students will be permitted to drop only in exceptional and compelling circumstances, in which case they will receive a "W" on their transcript indicating that they withdrew. The compelling circumstances exception does not apply to classes taken in the first year. First year students cannot drop any courses while classes are in session and remain in school. Students must drop mini-courses before the 4th class meeting. A course that is dropped in the first two weeks of classes, or before the 4th class meeting for mini-courses, will be removed from the student's transcript.

Students in simulation courses (Negotiation and Dispute Resolution, etc.), seminars, and Trial Advocacy may only drop those courses after the first two weeks of the semester if extraordinary circumstances exist.

Students who accept a clinic, externship, lab, practicum, or senior fellow position cannot drop those courses after acceptance.

Students who accept clinic (with the exception of the Environmental Law Clinic) or senior fellow positions or year-long externships must complete the entire year to earn any credit.

Courses may be added after the initial two week add period only in extraordinary circumstances and with the permission of the professor who is teaching the course.

Rules and procedures regarding adding and dropping courses will be enforced strictly. The deadlines for making changes may vary slightly from year to year, but the exact dates always will be published in the registration materials and in the Student Handbook (see Appendix B: Academic Calendar).

Certificate of Concentration Programs

There are currently six areas in which Tulane JD students can earn a certificate of concentration upon graduation if they complete a prescribed curriculum of upperclass courses. These areas are Civil Law, Environmental Law, European Legal Studies, International & Comparative Law, Maritime Law, and Sports Law. To avoid having students overspecialize in their JD studies, no student will be awarded more than one certificate of concentration. Students may register for a certificate program by

submitting the JD Certificate Selection Form before their last semester (the form is located under the Forms link of the Academic Services page on the TLS Intranet, or may be picked up from the Academic Services Office). The specific requirements for each certificate are listed in the registration materials.

Class Size Limitations

All courses are limited in the number of students who may enroll. In most courses, this limit is determined by the seating capacity of the classroom. In seminars, experiential courses, or other courses where a small class size is appropriate, the limit will be determined administratively. Registration through the GIBSON system is on a first-come first-served basis for most classes subject only to the relevant limit. In some courses with administratively imposed limits, the professor will select the students allowed to enroll from among those who have applied for a place in the class. Students generally apply for a seminar or Directed Research by submitting a statement of interest to the Academic Services Office by a date specified in the registration materials. Students generally apply for clinics, externships, labs, and practicums by participating in the ONEAPP process during the prior spring semester.

Course Books and Photocopied Class Materials

All textbooks and course packet materials are sold through the University Bookstore located in the Lavin-Bernick Center. In addition, a faculty member may arrange to have handouts copied and distributed prior to a class meeting. Shorter handouts distributed in class are free of charge; lengthier materials will be sold to students through the University Bookstore.

Course Conflicts

In making course selections, students should consider, among other things, the times at which a course regularly meets and the scheduling of its final examination. Students are permitted to enroll in courses that have their exams scheduled on the same day. However, students are not allowed to register for courses whose meeting times overlap in any way.

Course Load and Enrollment Status

The JD program at Tulane is offered only on a full-time basis. Although students generally register for 15 credits per semester, they can take a minimum of 10 and a maximum of 17 credits. Ten hours is the minimum required to reach full-time status, and 17 credits is the absolute maximum allowable per semester. The 17 credit maximum includes course work in other departments of the University, if any. Intersession courses are included in the spring transcript, but credits received for completing an Intersession course are not included for purposes of the 17-credit maximum.

Except as provided in Part II.B, a JD student must spend 6 full-time, non-summer semesters in residence at the law school in order to receive a degree from Tulane Law School (4 semesters for transfer students). A full-time semester is defined as a semester in which a student registers for at least 10 law credits and satisfactorily completes at least 9 credits. (See also V. D and VII.) Except as provided in Part II.B, a JD student must earn 88 credit hours to graduate; transfer students must earn at least 59 of their credit hours at Tulane. An LLM student must earn 24 credits to graduate.

JD candidates must earn all of the credits they apply toward their degree within a five calendar year period (including summer sessions contained during that period). For joint degree students, the period is extended to six calendar years. For example, a JD student enrolling in the fall of 2016 must receive the degree no later than the end of the summer session in 2021.

A student cannot receive any academic credit toward the JD or a graduate degree for courses taken at Tulane Law School or elsewhere until he or she has become a matriculating full-time law student at Tulane or at another law school.

Most graduate students pursue their graduate degrees on a full-time basis. However, local practicing attorneys may be admitted to certain graduate programs on a part-time basis. Part-time graduate students are expected to enroll each semester for between 4 and 7 credits and must complete their degree requirements in two years.

Course Work in Other Departments Not Associated With Joint Degree Program Requirements

Full-time law students may register in other schools or colleges of the University for one course per semester (summers excluded) without paying additional tuition. The Law School tuition payment will not cover any courses in any department outside of the law school that are audited, rather than taken for a regular letter grade. If a student withdraws from a course, the cost of which would normally be covered by the Law School tuition, the student will be obligated to reimburse the Law School for any tuition the Law School is charged by the other school or college. All courses taken in any school or college of the University and the grades received will appear on the student's official transcript but neither the courses nor the grades will be counted in the student's law school GPA or toward law school graduation requirements unless the courses fulfill requirements of the student's approved joint-degree program.

Courses taken in another school or college of the University as requirements of a joint-degree program count toward law school graduation but are not averaged into the student's law school GPA.

Credit hours of courses taken in other departments of the University are included in and apply toward the 17 credit maximum per semester rule. See II.A. herein.

Directed Research

Students wishing to do independent research may sign up for "Directed Research." Directed Research is intended for students who have a strong research interest in a topic and wish to write an original research paper under the guidance and supervision of a faculty member.

A student may not earn additional credit for directed research in connection with any paper, comment, note

or other written work submitted for academic credit (See Section V.D.: Double Credit).

The standards are as follows. Please note that the following rules apply whether the Directed Research is completed during a regular term or for a summer internship as described in Section VII.D:

1. The student must locate a full-time faculty member who will agree to supervise the research. Directed research papers may be supervised by a member of the tenured or tenured-track faculty, a professor of clinical law, a faculty member visiting for at least one semester, or (after consultation with the Vice Dean) a Professor of the Practice. Legal research and writing instructors, clinical instructors, and adjunct faculty members are not eligible to supervise directed research, except in exceptional circumstances and with the approval of the Vice Dean.
2. A maximum of 3 credits will be granted for Directed Research. Students may do more than one research project (e.g., 3 one-credit projects; 1 one-credit and 1 two-credit project) but the maximum credit available for the entire law program is 3.
3. Directed Research credit may be awarded and received only for production of a written substantive research paper. Although the scope and length of the paper will be determined by the supervising professor, the following are minimum requirements to receive credit for Directed Research:
    a. A student must submit a written proposal and a plan of research that provides sufficient justification for the number of credits to be awarded under Section V.G of the Handbook;
    b. A student must submit at least one draft of the paper to the supervising professor for the professor's critique. The final paper must take into account the comments and critique provided by the professor on the earlier draft; and
    c. 1-credit projects should consist of no fewer than 15 double-spaced pages; 2-credit projects should consist of no fewer than 25 double-spaced pages; and 3-credit projects should consist of no fewer than 35 double-spaced pages.
4. The Directed Research must be completed in the term for which it is registered. However, an extension may be granted for one additional semester by the supervising professor.
5. A copy of the written proposal, plan of research, and final draft shall be submitted to the Academic Services Office.

Students wishing to register for Directed Research should pick up the application form in the Academic Services Office. The form must be completed by the student, and returned to the Academic Services Office. The application will be reviewed by the professor who will notify Academic Services of those students approved for Directed Research. Those selected for Directed Research will be registered by Academic Services. Students cannot use GIBSON to register for Directed Research. Students must complete the application by the deadline as indicated in the registration materials.

Employment While a Full-time Law Student

A full-time law student may not be employed during the academic year for more than twenty

(20) hours per week. Students who work in the Law School as research assistants or in other capacities are limited to twenty (20) hours per week during the academic year. The Law School will not offer paid employment to first-year law students and strongly discourages first-year law students from seeking outside paid employment during the academic year in light of the rigorous challenge of the first-year curriculum.

Before a student may begin to work in the Law School on a per hour basis, the student must go to the Administrative Services Office to be added to the payroll, have time reporting procedures explained, and satisfy immigration law requirements (including presentation of original I-9 documents in person and, for international students, completion of tax forms). The student must also be registered for classes to be eligible for student employment.

Students are not permitted to work, and will not be paid for hours worked, before the University completes the hiring process. Students should allow a couple of days for the hiring process to be completed before billing hours.

Joint Degree Programs

The Law School participates in joint degree programs with Tulane's Freeman School of Business (MBA and MACCT); School of Social Work (MSW); Center for Latin American Studies (MA in Latin American Studies); and Department of Global Health Systems and Development of the School of Public Health & Tropical Medicine (MHA). Other joint degree programs may be proposed by students and considered by the Law School on an ad hoc basis. Joint degree programs enable students to complete two degrees in less time than it would take to complete them sequentially, because each school accepts some work completed at the other toward degree requirements.

Students must apply to and be admitted to each program separately, and must inform each program of the application to the other. Once admitted to both programs, students must petition the Joint Degree Programs Committee of the Law School, through the Assistant Dean for Admission, in order to be admitted to the joint degree program. Only after the joint program petition has been approved are students considered to be enrolled in a joint degree program. Transfer students are not eligible to participate in joint degree programs.

A JD candidate enrolled in an approved joint degree program must spend 5 full-time, non-summer semesters primarily in residence at the law school (4 semesters for students in the accelerated joint JD/MBA program). A JD student enrolled in an approved joint degree program must earn between 76 and 82 hours at the Law School in order to graduate, depending upon the program. In the case of all joint degree programs other than the JD/MACCT and the accelerated JD/MBA, the Law School agrees to count 9 semester hours of courses from the core curriculum of the other degree-granting division towards its requirements. In the case of the JD/MACCT, the Law School counts 6 hours of accounting curriculum towards the law degree. In the case of the accelerated JD/MBA, the Law School counts up to 12 additional hours of electives from the business school toward the law degree.

Information about specific credit-hour and sequence requirements can be obtained from the Assistant Dean for Admission.

Leave of Absence/Withdrawal

Any student considering a leave of absence from the Law School for one semester or longer should submit a written petition to the Assistant Dean of Students. Generally a student who leaves the school in good standing without any conditions placed on the student's return to school is likely to be granted automatic readmission within a period of one year. To reenter, the student should notify the Assistant Dean of Students at least one month prior to the start of the semester in which the student wishes to return of the intent to re-enroll and should complete an informational form. After one year but before the expiration of two years, a student seeking to return to school will be required to go through a readmission process through the Assistant Dean of Students' Office. Students returning from a leave of absence should be mindful that all of the coursework for a JD degree must be earned within five consecutive years of the student's initial enrollment.

Students wishing to withdraw from school after the start of a semester must notify the Assistant Dean of Students and complete the necessary withdrawal and/or drop forms at the Academic Services Office. Tuition will be refunded only in accordance with the refund schedule listed in the academic calendar. If a student withdraws from school for medical reasons or otherwise immediately before or during the exam period, the student must remain on leave for one semester (summer or regular) before returning to school. Students withdrawing for medical reasons at any point during the semester may also be subject to Tulane University's Medical Withdrawal Policy.

Students who take a leave of absence after completion of the fall semester and before the completion of the spring semester of their first year will be required to return in a spring semester. They may be allowed to complete the second half of the Legal Research & Writing course in the spring semester in which they return, depending on the circumstances of their particular situation.

Students will not be granted credit for courses taken during a period of leave unless they satisfy the requirements set forth in Section VII (Credits Accumulated Away from Tulane).

Multiple Sections of Courses

All first year courses are taught in multiple sections. First year students are assigned to their sections by the Assistant Dean of Academic Services, and they are not allowed to change to a different section of any course for any reason. Likewise, some upperclass courses may have more than one section. Upperclass students are generally allowed to select which section of a sectioned course they will take. Also, if and only if two sections of the same course are taught at exactly the same time, students may be assigned to one or the other section to balance the enrollments.

Non-law Students Taking Law School Courses

Undergraduate students at Tulane or any other university are not allowed to enroll in law school courses. Graduate students in other divisions of the university may be allowed to enroll in a law school course if the student's division of matriculation certifies that the credits will be accepted by that division and the Professor determines that the student has an adequate background to take the course(s) desired.

Prerequisites

Some upperclass courses have prerequisites, which must be met before students are eligible to enroll. The prerequisite list in the Law School registration materials prepared each semester states which courses have prerequisites. The advanced admiralty courses illustrate this registration restriction: JD students are not allowed to enroll in any advanced admiralty courses until they have completed both Admiralty I and Admiralty II.

Conversely, a small number of courses are limited to students who have not completed certain courses. These courses generally involve the survey of a discipline other than law and students who have been previously exposed to that area of study are ineligible. For example, the course in Accounting and Auditing is open only to students who do not have a substantial background in accounting.

Additionally, a very few upper-class courses have significant overlap such that a student may be precluded from taking both. For example, students who have taken Civil Litigation: Strategy & Practical Skills cannot take the Civil Litigation Intersession and vice versa. All of these restrictions are listed in the registration materials.

Records and Transcripts

All official records of registration and grades are kept by the University Registrar's Office located at 110 Gibson Hall. Each student is responsible for ensuring that he or she is properly registered and for complying with deadlines for adding and dropping courses. A student will receive credit only for courses for which he or she is officially registered. Conversely, a grade of "F" will be assigned to any student who has not officially dropped a course, even though the student has not attended class and has not taken the exam. In general, most registration matters can be handled

through the Law School Academic Services Office. However, all transcript requests must be directed to the University Registrar. For information on transcript requests, see the website https://registrar.tulane.edu/transcript (https://registrar.tulane.edu/transcript/).

Registration

Currently enrolled law students can register for the next academic semester or the New Orleans summer session at a designated time during the immediately preceding semester if their financial obligations to the University have been met. Third year students registering for their final spring semester also must have completed and submitted electronic time records for mandatory pro bono service. Except for application-based courses, all registration by upperclass students (and first year students registering for courses in summer or second year fall) is done by the student through GIBSON (web system). Instructions for using GIBSON are enclosed with the registration materials each semester. Students use their assigned Tulane username and password to access GIBSON. First year students are registered for both first year semesters by the Assistant Dean of Academic Services.

If a student attempts to register and is blocked, the student is responsible for correcting the cause of the block. If it is a financial block, the student should contact the Accounts Receivable Office to resolve the difficulty and have the block removed. If it is a pro bono block, the student should contact the Office of Experiential Learning and Public Interest Programs to complete the steps necessary to have the block removed. If it is a Health Center block, the student must provide the proper immunization records to The Health Center to have the blockremoved. If it is a Student Affairs' block, the student should contact the Assistant Dean of Students.

Services for Students with Disabilities

Tulane University is committed to providing equal access to all members of the Tulane community. Students with questions about the accommodations process at Tulane Law School may consult with the Law School's Assistant Dean of Students or the Goldman Office for (https://accessibility.tulane.edu/) Student Accessibility. (https://accessibility.tulane.edu/) See also Examinations, Procedures herein at III.A.2.

Summer School and Summer Externships

JD students may apply only a maximum of 12 credits earned during summer schools and summer externships toward their JD degree, of which a maximum of 6 credits may be earned in non-Tulane ABA-approved summer school programs or externships. A maximum of 9 credits may be earned in a single summer semester, including courses offered in New Orleans, abroad or elsewhere. Any credits earned in summer externships count towards the non-classroom credit hour limit (see Section V.F.). Credit for courses taken in a non-Tulane summer school will be noted on the student's transcript if the student earns a grade of "C" or higher (a "C–" does not qualify), but the grades earned in a non-Tulane summer school will not be listed on the student's transcript, and those grades will not be averaged into the student's GPA. The titles of all courses taken in any Tulane summer school program and being applied toward the JD degree, as well as the grades earned in those courses, will be listed on the student's transcript, and those grades will be averaged into the student's GPA.

A student who enrolls in any summer school program or externship having already earned 12 summer credits: (a) will not be allowed to apply credit from any of the courses or externships taken in that program toward his/her JD degree; and (b) the grades earned (even in a Tulane program) will not be averaged into the student's GPA. A student who enrolls in any Tulane summer school program or externship session at a time when he/she has not yet earned 12 summer credits may enroll in up to the maximum number of courses allowed for that session, even if the credits for the courses would result in the student having taken a total of more than 12 summer program credits; in such case, the student still may not apply more than 12 summer credits toward the JD degree, but the titles of all of the courses taken during that session will be listed on the student's transcript and the grades from all of the courses taken during that session will be averaged into the student's GPA.

Credits earned in summer externships count toward satisfaction of the experiential learning requirement (see Section V.D.3, infra).

Some courses taught in Tulane or non-Tulane summer school programs abroad may overlap in content with courses taught in the regular curriculum or in other summer programs abroad. In such cases, students may not receive full credit for both courses. Students wishing to enroll in foreign summer school courses with titles and/or descriptions similar to another course they have taken or intend to take, particularly courses in the general areas of Admiralty, European Union law or International Business Transactions, should consult with the Assistant Dean of Students before enrolling to ascertain what credits they will receive and whether these courses overlap with Tulane Law School courses.

Students considering enrollment in summer school programs that do not overlap in content with courses taught in the regular curriculum must consult the Assistant Dean of Students before enrolling to ascertain what credits they will receive.

Student Evaluations of Faculty

Each course at the Law School is evaluated by students at the end of the semester (at the end of the year for year-long courses) through the distribution of a form to their email accounts. Faculty may set aside class time for students to complete their evaluations. Student evaluations are anonymous. Course evaluations from previous terms are available through the link for Course Evaluations via Gibson online.

Use of Personal Electronic Resources in Classrooms

The use of personal computers, tablets, cellular phones, smart watches, and similar personal electronic resources in classrooms should be limited to activity directly related

to course content and note-taking as directed or permitted by the professor. Use of electronic resources for other purposes (e.g., browsing the Internet, playing games, using e-mail services, watching or listening to DVDs, etc.) is inappropriate to the classroom and may provide a significant and unwanted distraction to those near the student using these devices. Individual faculty members also may adopt policies limiting access to electronic resources. If violation of the policy carries a penalty, such policy must be approved by the Vice Dean. If a faculty member plans to have a policy, students must be notified in writing by the first day of classes, and, in any event, no later than the first two weeks of class. If a student's grade is to be affected by the policy, the student must be notified in writing with a copy to the Office of Academic Services. Students who receive accommodations allowing the use of personal electronic resources in the classroom should consult with Dean Gaunt to discuss the implementation of this accommodation in classes with policies limiting electronic resources.

If a student wishes to record classes, he or she must ask permission of the professor first unless the student has received an accommodation for a disability from the Goldman Center for Student Accessibility allowing for the recording of classes. Students who have received such an accommodation should consult with the Assistant Dean of Students or the Goldman Center for Student Accessibility regarding the implementation of this accommodation.

Credits Accumulated Away From Tulane

Coursework

During the normal academic year, a student may take one course over the period of his/her law school career at another institution's law school for academic credit, provided that: (1) the course does not count toward the 10 credits needed to be a full time in resident student at Tulane; (2) the student pays all tuition and fees at the other institution without any diminishment in the amount of tuition paid to Tulane; and (3) the content of the course is not largely duplicated by any course offered at Tulane for which the student could register. Students must receive permission before completing any coursework away from Tulane and should consult with the Assistant Dean of Students. (See also II. A and VII. E).

Externships

The Law School offers a variety of externship programs, each of which has been specifically approved as a course offering by the faculty and is supervised by Law School Faculty members. Students earn academic credit upon successful completion.

1. During the summer, rising 2L and 3L students may enroll in the Summer Externship. In this externship, students earn 3 units of academic credit in judicial, government, non- profit, and corporate counsel settings both in the local area and in sites around the globe, upon pre-approval and timely application to the Office of Experiential Learning and Public Interest Programs during the spring term preceding the proposed externship.
2. During the academic year, rising 2L and 3L students are eligible to apply for the yearlong Judicial Externship, the yearlong Public Service Externship, or the Spring Public Interest Externship. Students generally apply for academic year externships by participating in the ONEAPP process during the prior spring semester. Students are placed in pre-approved judicial chambers and public service sites within the New Orleans area, such as Federal District Court, state courts, Federal Public Defenders, the U.S. Attorney's office, the National Labor Relations Board (NLRB), the Equal Employment Opportunity Commission (EEOC), the Advocacy Center, the Fair Housing Action Center (GNOFHAC), Orleans Public Defender, and Southeast Louisiana Legal Services (SLLS). Students generally may not enroll in the year-long externship while enrolled in a year-long clinic. However, simultaneous enrollment may be permitted in certain semester-long clinics with prior permission.
3. During either the fall or spring semesters, rising 2L and 3L students are eligible to apply for the Corporate Counsel Externship. Students generally apply for academic year externships by participating in the ONEAPP process during the prior spring semester. This externship permits students to earn credit for work performed in the legal departments of certain pre-approved and pre-screened in-house counsel offices of non-profit or for–profit businesses. Students will experience how law is practiced in a corporate legal department when functioning as a lawyer for a business client and as part of a business. Students will develop skills and learn substantive legal issues encountered in an in-house legal department and the ethical responsibilities of general counsel.

Generally

Graduate law students (LLM/SJD) are prohibited from earning credits at another school for the Tulane graduate degree.

In all instances in which JD students accumulate credits away from Tulane, students must receive a grade of "C" or higher for the credits to be accepted at Tulane Law School. Only the credits will be recorded on the transcript, not the grades received. A student cannot receive any academic credit toward the JD degree for courses taken at Tulane Law School or elsewhere until he or she has become a matriculating full-time law student at Tulane or at another law school.

Semester Abroad Programs

A limited number of well-qualified students may be given permission by the Vice Dean, upon the recommendation of the Executive Director of International Programs, to spend up to one semester in the law (or related) department of a

foreign university, and transfer up to 14 credits earned there to the Tulane law degree. In considering any particular case, the Executive Director and the Vice-Dean shall take into account the following:

1. Whether the program at the foreign university in which the student wishes to participate has been approved by the faculty or by the ABA, and if not, whether the Executive Director of International Programs is prepared to vouch for its content and its supervisory arrangements;
2. Whether satisfactory supervisory arrangements can be made at Tulane;
3. The extent to which the student is qualified to undertake the proposed program, as indicated by such factors as his or her academic performance, past and prospective course choices at Tulane, linguistic capabilities, and reasons for wishing to study abroad; and
4. The number of applications to study abroad. (See also VII. A.)

Students Visiting Away

Students who present compelling personal circumstances may, in rare instances, be permitted to spend one or both semesters of their third year visiting at another law school and transfer the credit to the Tulane law degree. Second year students are permitted to visit away only in critical situations. Examples of compelling personal circumstances that would justify visiting away are the necessity of caring for a critically ill parent when the student is the only caregiver, a spouse's unanticipated employment in another city, or a student's ill health requires medical treatment that can be obtained only in another city. The desire to be closer to a boyfriend or girlfriend, to pay less tuition, or to be in or closer to a location where the student wishes to work and settle after law school are not compelling personal circumstances. Students should consult the Assistant Dean of Students about visiting at another law school. (See also VII. A.).

Students who visit at another law school are required to consult the Assistant Dean of Students or the Vice Dean of Tulane Law School to gain approval of the courses that they wish to take at the visiting law school. This approval must be given prior to the courses being taken.

Summer Unpaid Internships: Directed Research or Pro bono

As set forth below, students may seek academic credit for directed research and writing arising out of work initially undertaken at an unpaid internship.

OPTION I – DIRECTED RESEARCH

Students may complete a Directed Research paper (for which they can receive 1 – 3 units of academic credit) if they obtain the consent of a full-time faculty member to supervise the research before beginning summer work and select a suitable topic related to the summer work. (A form is available in the Academic Services office.) Please refer to requirements for Directed Research in Section II.M. The research paper can be completed during the summer or, by permission, during the fall term. A letter can be sent to the summer employer/supervisor, explaining that the student has obtained approval for Directed Research in conjunction with the summer internship; normally, this is sufficient for those positions requiring that the student receive credit in order to pursue the opportunity.

OPTION II – PRO BONO CREDIT

If the work is uncompensated and satisfies the Law School definition for pro bono service (see Section V.D.4), the student may seek pro bono credit by submitting an Independent Placement request electronically to the Office of Experiential Learning and Public Interest Programs before beginning the summer internship. The student will need to record the hours using the method indicated by the Office of Experiential Learning. If approved for pro bono credit in advance, all pro bono hours earned and verified will be reflected on the transcript. Time records must be submitted by the deadline for summer pro bono, which falls on Friday of the first week of the following fall term.

Examinations

Procedures

Absences from Examinations; Excuses; Rescheduling

Law students must take final examinations in all courses for which they are registered at the time the exams are scheduled. Absence from an examination without a satisfactory excuse, as determined by the Assistant Dean of Students based upon independent investigation, will automatically result in a grade of "F" for the course involved.

Normally a student who cannot be present at an exam should submit his or her request for an excuse to the Assistant Dean of Students before the time the exam is scheduled to begin, unless physical disability or sudden emergency precludes such early submission. In no event should the instructor for the involved course entertain such a request, and in no event should the student discuss such a request with the instructor.

Any student who believes he or she needs to be excused from an examination because of illness should speak to the Assistant Dean of Students as soon as possible before the examination, explain the nature of the illness and its effect on the ability of the student to take the exam, and indicate what medical treatment the student has sought or will seek and from whom. The student must go to the Health Center for Student Care or see another physician on or before the scheduled exam date and provide documentation of that medical visit to the Assistant Dean of Students. Based on the information provided, the Assistant Dean of Students shall make an independent judgment as to whether the excuse given is satisfactory. Any student excused from an exam who is believed to have

requested an excuse improperly will be referred to the Honor Board.

A student who is overcome by illness in the course of an examination and is unable to complete the examination should inform the Assistant Dean of Students and the Law School Academic Services Office immediately and then promptly (on the same day) go to the University's Health Center or to a physician of the student's choice. In no event shall the student breach the anonymity of the grading process by contacting the instructor prior to the announcement of grades or indicating to the instructor that the student did not take or complete the examination. The student may elect to receive a "W" in the course in lieu of submitting a partially completed exam. Under no circumstances will the student be allowed to resume the exam on a later date.

If a student's request for an excuse is based upon a non-medical emergency, such as a death in the immediate family or an automobile accident on the day of the exam, the student shall submit his or her request for a non-medical excuse to the Assistant Dean of Students at least 24 hours prior to the precise time scheduled for the exam, unless the suddenness of the emergency precludes it. The student shall submit to the Assistant Dean of Students, along with the request for an excuse, appropriate supportive documentation—e.g., a copy of the death certificate, the police accident report. The Assistant Dean of Students shall assess the non-medical excuse and the supportive documentation and make an independent judgment as to whether the excuse is satisfactory. If a student proceeds to take an exam(s) despite the presence of a satisfactory medical or non-medical excuse, then the grade(s) received shall remain final. The Assistant Dean of Students shall not consider excuses presented by a student after the taking of an examination.

A student who is excused from taking an examination at the scheduled time because of illness or non-medical emergency must take the exam on the earliest possible day he or she is able to do so, but in no event later than one day after the last day of the exam period. The exact day that the student will make up the exam will be determined by the Assistant Dean of Students. A student who cannot make up an exam during this period shall receive a "W" in the course.

A professor has the right to write a new examination for a rescheduled examination but is not required to do so.

A student who arrives late for an examination will normally be required to hand in his or her paper at the same time as the rest of the class; however, the Assistant Dean of Students may allow a student additional time if the Assistant Dean of Students finds that the student's lateness is justified by extraordinary circumstances. Faculty members may not grant additional time. Neither faculty nor staff is obligated to discover the whereabouts of an absent or tardy student or to summon the student to the examination.

If a student forgets that he/she has an exam on a certain day or oversleeps and misses the exam but becomes aware of the missed exam within one day, the student is allowed to take the exam, but the student's grade is lowered by one full letter.

Anonymity

All examinations shall be given and graded anonymously. Every student and faculty member has a duty to ensure that the anonymity of the examination grading process is not breached. Faculty members are not allowed to see student exam numbers until after they have submitted their final grades to Gibson online. Students with exam scheduling problems must discuss them with the Assistant Dean of Students, not with their professors. Prior to the posting of grades, no student shall disclose to any instructor information about himself or herself or about any other student which might compromise anonymity.

Exam Numbers

Each semester, Academic Services shall compile for each student an exam number for the term. To access the exam number students will select the Blind Grading ID option under the Law School Services heading on GIBSON, then choose the appropriate semester when prompted for the term. Students will have only one anonymous number to use for all exams. This number will change each semester. The student must retain this number in order to enter the appropriate exam number for each course on the cover of the bluebook and on the instructor's printed exam. **Students should keep their exam number after the exam period in order to check grades that are posted at the Law School or to review their graded exam papers**. The registry of exam numbers will be maintained by Academic Services. The instructors will not have access to it until after their grades have been submitted to the Assistant Dean of Academic Services.

Exam Practices for International Graduate and International Exchange Students Only

International graduate and international exchange students are issued exam numbers and are graded anonymously.

International graduate and international exchange students who have not previously received a degree from a U.S. institution and whose native language is not English are allowed extra time to complete their examinations because of the language difficulty. Generally an extra hour will be granted in a three hour exam. In examinations of shorter or longer duration, international graduate students should consult Academic Services before the test begins to verify the

exact amount of extra time to be given. This rule does not apply to JD students.

International graduate and international exchange students whose native language is not English may use a paperback or an electronic English language translation dictionary in exams. The rule permits **only** single-purpose, self-contained, paperback or electronic English language translation dictionaries (i.e. electronic devices that perform only the same limited function as a hard copy English language translation dictionary (e.g. English to Spanish; Spanish to English)). Permission does **not** extend to computer programs, cell phones, personal digital assistants, etc. Similarly, permission does **not** extend to electronic devices that translate legal terms or phrases or that provide legal or other definitions (e.g. a regular language dictionary or a Black's Law dictionary). This rule does not apply to JD students. JD students are not allowed to use a dictionary.

Exam Protocol

Prior to the start of the exam period, schedules are posted listing the room assignments for all exams. Students report to the exam room where they are furnished a copy of the examination and, when applicable, bluebook(s). Students are not allowed to take their examination in a place other than the designated exam room. Students who receive exam accommodations pursuant to the American With Disabilities Act report for exams as instructed by the Assistant Dean of Students and/or the Sr. Administrative Program Coordinator for Academic Affairs.

Students taking examinations on laptops must begin their exam electronically using the designated exam software at the time designated by the proctor. The exam software will conclude the examination when the time allotted for the examination has expired, which will coincide with an instruction from the proctor that the examination has concluded.

When the time allotted for the examination has expired, all students must turn in the instructor's printed exam at the completion of the exam. Students taking their examinations by bluebook must turn in the bluebook(s) containing their answers with the instructor's printed exam. As students turn in their tests, they are asked their names which are then marked off the official class roster. If students finish the exam early it is their responsibility to turn in their test to only the designated test collector. This check-in process acknowledges the receipt of each student's exam.

Failure to turn in an examination on time, if detected immediately by the test collector, will result in a penalty in the course involved determined by the professor, up to and including a grade of "F" for the course. The failure to turn an examination in on time not immediately detected by the test collector will constitute an Honor Code violation and be processed in accordance with the Honor Code. (See Appendix A: Honor Code).

All electronic devices and equipment, including but not limited to cell phones, smart watches, beepers, radios, iPads, tablets, and e-readers, are strictly prohibited in exam rooms unless specifically permitted by the rules governing exams taken on computers, permitted by the professor giving the exam, or granted as a reasonable accommodation as determined by the Goldman Center for Student Accessibility.

Rescheduling Exam Times

Exams for all regular semester courses are scheduled Monday through Saturday during the two-week exam period and are given on the day and at the time scheduled. Deviations from the schedule are allowed only under extraordinary circumstances and then only with the approval of the Vice Dean. In the absence of such approval, no instructor is authorized to give an examination at a different time, even though all the students in the class consent to the change.

If a 24-hour take-home exam is given in an upperclass course, the exam must be available for pick-up by students at 9:00 a.m. on the day preceding the scheduled exam day and returned by students no later than 9:00 a.m. on the scheduled exam date. Therefore, an exam conflict would be considered for the day in which the take-home exam is distributed.

Students may have exams rescheduled for these reasons only:

1. Two exams scheduled on the same day.
2. Four exams scheduled on five consecutive calendar days.
3. Five exams scheduled on six consecutive calendar days.

If these conditions exist, the conflicting exam can be rescheduled (within the exam period) to the first or second available date within a six-day period following the date of the original exam. Students must contact the Academic Services Office (room 204) before the examination period begins to have the exam rescheduled.

Students who have received permission to reschedule an exam should report to the Academic Services Office on the rescheduled exam day approximately 15 minutes prior to the arranged starting time of the test (i.e., for a 9:30 a.m. exam, students should report at 9:15 a.m.). At the Academic Services Office, students will be asked to sign a statement that they have not seen or heard any information relating to the test. They then will be given the appropriate examination and told where to take the test. Rescheduled exams are bound by the same time constraints, instructions and allowable materials as the original exam. Students must return their bluebooks and test questions to

the Academic Services Office when the examination time has expired. The completed exam will then be delivered to the appropriate instructor without revealing any particulars about the student or the reason for the rescheduling of the test.

Services for Students with Disabilities

Tulane recognizes that a growing number of individuals with disabilities are joining the University community as students, faculty, and staff. The University welcomes these individuals and seeks to support their needs, advocate for their rights, and ensure that they have an equal opportunity to participate in all academic and co-curricular programming. To accomplish these objectives, the University makes available reasonable accommodations in accordance with Section 504 of the federal Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) of 1990, as amended.

The Goldman Center for Student Accessibility serves as the central campus resource for Tulane students with documented disabilities or with disability-related concerns. Students who believe that they require reasonable course or examination accommodations should connect with the Goldman Center for Student Accessibility as early as possible, as the review process can take 2-3 weeks to complete. During the disability registration process, Goldman Center staff members can help students articulate their support needs, engage with students in an interactive discussion about possible accommodations, and assist students in communicating any approved accommodations to the appropriate administrators at the Law School - Dean Abigail Gaunt, Assistant Dean of Students, and/or Christina Roux, Sr. Administrative Program Coordinator for Academic Affairs. Faculty will not be informed that a student receives accommodations by the Goldman Center or Tulane Law School staff unless the nature of the accommodation requires the faculty member to receive notice for its implementation; in such cases, the student will be consulted before the faculty member is notified by these offices. Accommodations approved within 14 days of the final exam period may not be implemented until the next semester. Accommodations do not apply retroactively.

Students with specific questions about the Goldman Center for Student Accessibility policies and procedures may contact the Center by telephone at (504) 862-8433, or request to schedule an appointment with a staff member. Additional information can be found at the Goldman Center website: https://accessibility.tulane.edu/.

Grades

Appeal of Grades

Once a faculty member has turned in his or her grades, whether they are based on an anonymous system of grading or not, the faculty member may not change any of them on representations or complaints of students unless the original grade was the result of a mechanical error—e.g. a mathematical error in computation or an error in transcription. If that is the case, the faculty member will certify the fact to the Vice Dean, who will then authorize the change.

Any student who wishes to appeal an assigned grade must first discuss the grade with the faculty member concerned. However, except for correcting a mathematical or transcription error in grading, as noted above, the faculty member is not authorized to change the grade assigned. Thereafter, the student may appeal his or her grade by written petition to the Vice Dean. An appeal of a Spring or Summer semester grade must be filed no later than the Friday of the tenth (10^{th}) week of the following Fall semester. An appeal of a Fall semester grade must be filed no later than the Friday of the tenth week of the following Spring semester. This date is to coincide with the last day for students to elect to take a course P/D/F.

The petition must recite with particularity the specific grounds for the appeal. Grade appeals can be based only on actions by the faculty member in the grading process. Events that happen during the teaching of the course and administration of exams cannot constitute grounds for a grade appeal. In a course that was not graded solely on the basis of an anonymous examination, an appeal will lie from a grade that is affected by prejudice or discrimination on the part of the faculty member against the appealing student or for actions on the part of the faculty member that were arbitrary and capricious. In a course graded solely on the basis of an anonymous examination, an appeal will lie for actions on the part of the faculty member that were arbitrary and capricious. The burden of establishing the grounds alleged is on the appealing student. In the absence of substantial independent evidence of discrimination, review on appeal shall be limited to the examination or paper of the appealing student and the grade assigned to it, without consideration of any other examination or paper.

The Vice Dean may dismiss any appeal which, after consideration of the petition, is determined to be unfounded. If the Vice Dean finds that the petition states a ground for appeal, the Vice Dean shall first discuss the matter with the faculty member involved. Thereafter, the Vice Dean may refer the appeal to a faculty committee of the Vice Dean's choosing, refer the appeal to the faculty as a whole, or take whatever other action the Vice Dean deems appropriate. The Vice Dean shall consult with the faculty member involved after considering the petition and

prior to rendering a final decision. The Vice Dean shall also notify the faculty member involved, as well as the appealing student, of the final decision in writing. If a student remains dissatisfied with the outcome after having followed the procedures set forth here, he or she may file a written appeal with the Senate Committee on Academic Freedom and Responsibility of Students within five days of receiving the

decision of the Vice Dean, faculty committee, or faculty, whichever is the ultimate decision maker.

Based on the petition, the Senate Committee will decide whether or not to hear the appeal. In deciding the appeal, the committee should follow the Law School's grade appeal standards set forth above. If the committee decides that there are not sufficient grounds for review, the Chair of the committee will notify the student by letter, with copies to the principals involved in the case and to the Provost. If the committee decides that there are sufficient grounds for review, it will interview both the student and the teacher. A quorum of three committee members, at least one of whom must be a representative of the administration, one of whom must be a faculty member, and one of whom must be a student, is necessary for all committee hearings.

If the committee interviews both the student and the teacher (or other principals involved) at a hearing, then the Chairman will send the results of the committee's findings in the form of a letter of recommendation to the President of the University, with copies to the student and other principals involved and to the Provost.

If, in accordance with faculty rights as specified in the Faculty Handbook and in the Constitution and Bylaws of the University Senate and the various divisions, the teacher believes that his or her academic freedom or academic responsibilities have been affected by any administrative ruling, the teacher may appeal to the appropriate committee of peers at the divisional level (the Law School). The teacher's appeal must be made within ten days of the action provoking the appeal. If the teacher is dissatisfied with the committee of peers' decision regarding his or her academic freedom or responsibilities, the teacher may appeal to the Senate Committee on Faculty Tenure, Freedom, and Responsibility. That appeal also must be made within ten days of the action provoking it. No grade may be changed until the teacher's appeal process has been completed.

If the student is dissatisfied with any decision made in the appellate process initiated by the teacher, the student may appeal to the Senate Committee on Academic Freedom and Responsibility of Students.

In cases of conflict regarding the decisions of the divisional peer committee and the Senate Committee on Academic Freedom and Responsibility of Students, the matter shall be referred to the Senate Committee on Faculty Tenure, Freedom and Responsibility. In cases of conflict regarding the decisions of the Senate Committee on Faculty Tenure, Freedom, and Responsibility and either of the other committees involved in teacher initiated appeals, the committees at odds shall meet jointly to discuss the issue. The ultimate findings of the two committees shall be forwarded to the President of the University within ten days.

Basis of Grades

Grades for all courses in the Law School shall be based solely upon an anonymous in-class examination written by each student individually unless the faculty member has requested and the faculty or the Vice Dean has approved, for a particular course in a particular year, some other basis of grading. The Vice Dean has the authority to approve any departure from the standard grading system that has in the past been approved by the faculty (e.g., a paper in lieu of an exam) or that is substantially similar to any departure previously approved by the faculty without referring it to the faculty for approval, except as provided in Section D.1. If a requested departure does not meet these criteria, or a first-year course is in question, or if the request is denied by the Vice Dean for any other reason, the Vice Dean shall refer it to the faculty for approval.

In all classes subject to the curve, every JD student shall be graded using the same mode of evaluation. For example, a faculty member may not give individual JD students the option of writing a paper in lieu of sitting for an exam.

Class Participation Policies

For courses in which an anonymous examination would not otherwise be the sole or predominant basis for the grade, the faculty member may propose a mode of evaluation that takes into account class participation in determining each student's final grade. A faculty member may, for example, propose to count an anonymous examination grade for 50% of the final grade, count a grade from a paper, not done anonymously, for 25% of the grade, and count class participation for the balance of the final grade. Any such mode of evaluation must be approved by the faculty or the Vice Dean, as described above.

For courses (other than first-year courses) in which an anonymous examination would otherwise be the sole or predominant basis for the grade, a faculty member has discretion to

adopt a reasonable policy that takes into account classroom participation in adjusting upward a student's final grade by not more than one step (e.g., from a B to a B+). Faculty who intend to adopt such a policy must clear the reasonableness of the policy with the Vice Dean before its adoption. It is not expected that more than a handful of grades in each class will be adjusted. The faculty member shall ensure that the average of the final grades, after factoring in all components of the grade, falls within the GPA range set forth in Part B of this section.

Procedures for Notifying Students When Grades Will Be Based upon Work Other than an Anonymous Examination

Within the first two weeks of class, each faculty member shall announce to his or her class and shall indicate on the Intranet and in the written course policies or syllabus provided to students whether, and to what extent, the final grade will be based on some work other than an anonymous in-class examination. The oral and written notice shall explain how the final grade is calculated and describe how any additional

work is graded (including how and to what extent class participation will be considered). After the first two weeks of class, a faculty member may not change the grading system.

Procedure for Modifying Grades in a Course in Which an Anonymous Examination Is Not the Sole Basis for the Grade

For courses in which an anonymous examination is administered but is not the sole basis for the grade, a faculty member shall submit preliminary grades based on the anonymously graded examination to the Assistant Dean of Academic Services before factoring in any non- anonymous component of the grade. After receiving a list of the preliminary grades by student name, the faculty member shall factor in the non-anonymous component of the grade into each student's preliminary grade in order to produce a final grade. The faculty member shall ensure that the average of the final grades, after factoring in all components of the grade, falls within the GPA range set forth in Part B of this section.

C, D and/or F grades: Incomplete Grades

In all courses subject to the required mean GPA, two grades of D or below in a class of more than 50 JD students and one grade of D or below in a class of 50 or fewer JD students may be given without these grades counting toward the class GPA required mean. For example, in a class of 60 JD students, there could be a total of two grades of D or F given which would not be used in the calculation. In that case, if two such grades are given, the mean GPA of between

3.2 and 3.3 would be calculated based on 58 JD students rather than 60. Nothing in this provision is intended to limit the number of grades of D or F given. However, any additional grades of D or below beyond the number excluded above will be part of the calculation to determine if the course has met the required mean of between 3.20 and 3.30.

A grade of "Incomplete" ("I") may be given in a course in which an anonymous examination would not otherwise be the sole or predominant basis for a grade when, in the faculty member's view, special circumstances prevent a student from completing work assigned during a semester. A grade of "I" shall be resolved before the last date on which grades may be submitted for the following semester, but in no event after the grading deadline for a graduating student, as any "I" automatically converts to an "F" upon graduation. The notation of "I" will remain on the student's transcript, accompanied by the final course grade.

Class Rank

Following the completion of the first year and every fall and spring semester thereafter, class rankings are calculated for JD students. The following ranks are recorded on the transcript:

1. Term Rank—determined on the current semester's grade point average, each semester after the first year except for the spring semester of the third year.
2. Cumulative Rank—determined on the cumulative grade point average, each semester after the first year.
3. Year Rank—determined on the grade point average that combines the grades received in the fall and spring semester in the student's second or third year (after the first year, the 1L year rank is the same as the cumulative rank).
4. Graduation Rank—determined each May and includes the JD students who graduate during the academic year (fall graduates are included in the May graduation rank).

Note these exceptions to the ranking process:

1. First year students who have a W grade in any first year course are excluded.
2. Advanced standing and transfer students are excluded from the term and cumulative rankings during their first year at Tulane but are included in the year rank process. The first time a transfer student or advanced standing student is considered in a cumulative rank is after the fall semester of his or her third year.
3. LLM, SJD, and visiting or exchange students are not ranked.
4. Only the graduation rank and year rank are posted for the spring term of the 3L year.

Deadlines for Submitting Grades

Each semester Academic Services publishes a schedule listing the deadlines for the submission of grades for each course. Whenever an instructor anticipates failure to turn in grades within the time required, he or she shall so inform the Vice Dean and provide a statement of the reasons for inability to comply. The Vice Dean shall consider the reasons and determine whether the delay is justified. Absent a finding by the Vice Dean that the delay is justified, an instructor who fails to turn in grades for a course on time will be subject to sanctions.

Effect of Grade of "F"; Retaking Course

No credit is granted for courses in which a grade of "F" is received; however, the grade is averaged into the student's grade point average. In order to graduate, a JD student must take for a grade and successfully complete (pass) all the required courses in Tulane's first year curriculum and the 3 hour Legal Profession course. If a grade of "F" is received in any of those courses, the student must retake and pass the course. The student is permitted, but not required, to retake any other course in which they receive an F, with the exception of experiential clinics and externships, which cannot be retaken if a student receives a failing grade. The grade earned the second time does not erase the "F". Both grades are retained on the transcript in the semesters they are taken and both are averaged into the student's grade point average. Only courses in which a grade of "F" has been received may be retaken for credit.

Students who receive failing grades should check with the state bar where they intend to practice law to ascertain whether the state bar requires successful completion of particular courses, or merely enrollment (i.e., a minimum grade). The National Council of Bar Examiners' Comprehensive Guide to Bar Admission Requirements (https://www.ncbex.org/publications/bar-admissions-guide/) lists the requirements for each state and may be found online. Students are advised to consult the website of the state's bar association office in addition to the National Council of Bar Examiners' Guide and website (http://www.ncbex.org/).

Grading Scales

The normal grading scale and quality point system is as follows:

Grade	Description
A+	4.00
A	4.00
A-	3.667
B+	3.333
B	3.000
B-	2.667
C+	2.333
C	2.000
C-	1.667
D	1.000
F	0.000

International graduate students follow the normal grading scale and quality point system.

Grades in First Year Legal Research and Writing

The basis for the final grade in Legal Research and Writing is one or more assignments, as specified in the course syllabus. Assignments that count toward a student's final grade are graded on the normal law school grading scale. Assignments that do not count toward the final grade must be completed to pass the course. There is no set distribution of grades for any legal writing section.

An instructor may assess a penalty against a grade given on a writing assignment for failure to comply with the rules of the course as stated in the syllabus.

Journal Credit

Journal credit is based on a two-year commitment.

Journal Writing Requirement

Second or third-year students may receive credit, as set forth in this rule, for writing on the following journals:

- Tulane Law Review - 2 credit hours
- Maritime Law Journal - 1 credit hour
- Environmental Law Journal - 1 credit hour
- Journal of International and Comparative Law - 1 credit hour
- Tulane Journal of Law and Sexuality - 1 credit hour
- Tulane Journal of Technology and Intellectual Property - 1 credit hour
- Sports Lawyers Journal - 1 credit hour

To receive such credit the student must satisfy the writing requirements of the applicable journal to the satisfaction of the editorial board and be certified by the journal's faculty advisor.

Students must comply with the requirements set forth in Section V.D.2 to satisfy the Upper- Class Writing Requirement for written work submitted for journal credit.

Editorial or Managerial Work

Third year students only who have already earned their journal's writing credit may, upon certification by the journal's faculty advisor, receive additional credit for editorial and managerial work on the above journals as follows:

Tulane Law Review

- Editor-in-Chief 2 credit hours
- Senior Managing Editor 2 credit hours
- Senior Articles Editor 2 credit hours
- Senior Members 1 credit hour

Maritime Law Journal

- Editor-in Chief 2 credit hours
- Senior Members 1 credit hour

Environmental Law Journal

- Editor-in-Chief 2 credit hours
- Senior Members 1 credit hour

Journal of International and Comparative Law

- Editor-in-Chief 2 credit hours
- Senior Members 1 credit hour

Tulane Journal of Technology and Intellectual Property

- Editor-in-Chief 2 credit hours
- Senior Members 1 credit hour

Tulane Journal of Law and Sexuality

- Editor-in-Chief 2 credit hours
- Senior Members 1 credit hour

Sports Lawyers Journal

- Editor-in-Chief 2 credit hours
- Senior Members 1 credit hour

Members of the European and Civil Law Forum receive no credit per se for journal work. However, a member who writes a publishable quality case note or comment through a faculty- approved Directed Research can obtain credit for that writing.

Students may not receive credit for work done on more than one journal in any given academic year.

Graduate students may receive credit for journal work but may not satisfy their writing requirement by work done on a journal.

Students seeking academic credit for participation in journals shall ensure that a record of the work required to earn the number of credits sought is submitted as provided in Section V.G below.

Notification of Grades; Transcripts

Each semester professors submit final grades for law courses by exam number via Gibson online. Within 24 hours of the grade posting, students are able to view their grades via the Gibson website at https://registrar.tulane.edu (http://www.registrar.tulane.edu/).

When all grades for a semester have been recorded on the computer system, class rankings are determined and posted to each student's record.

If an official, certified transcript is needed, students may order electronic and/or mailed transcripts through the "Order a Transcript" link in Gibson online.

Pass/D/Fail Grading Option

A JD student who has completed the first year of law study may elect to take on a Pass/D/Fail basis one course prior to graduation. When making this election, a student may indicate a

target grade for the course. A student earning the targeted grade or above will receive the earned grade rather than a "pass" for the course. Regardless of whether a student receives a grade or a "pass," the student may not take another normally graded course on a Pass/D/Fail basis. The election must be made in writing at the Academic Services Office (Room 204). The election must be made by the date listed in the academic calendar. Once the selection is made (when form is completed and turned in to Academic Services Office), the election and the selection of a target grade are irrevocable. Any course that is graded on a Pass/D/Fail (or Pass/C/Fail) basis for all students or in which a student was involuntarily required to take the grade on a Pass/D/Fail (or Pass/C/Fail) basis shall not be considered as the student's one-time Pass/D/Fail election.

An upperclass student who is required to take a first year course because he or she has not previously successfully taken it or a comparable course at another law school may not take that course on a Pass/D/Fail basis. Further, neither the required Legal Profession course nor a clinic can be taken on a Pass/D/Fail basis.

A "Pass," for purposes of this program, is a grade of "C −" or better. A grade of "Pass" will not be averaged into a student's grade point average; however, a grade of "D+" or lower will be averaged into a student's grade point average. (A "D+" may occur when a professor invokes a penalty for failure to be prepared or for failure to attend class. See Section IV. E.3.)

If an instructor in a course chooses to invoke a penalty, it will be applied in the normal fashion. Thus, a student's grade will be reduced using the normal grade scale. If the application of a penalty causes a student's grade to fall below a "C−" (C in a Pass/C/Fail course), the student will not receive a grade of Pass, but the grade obtained (D+, D, D−, or F). (See Section IV. E. 3.)

A faculty member will not be informed of a student's Pass/D/ Fail election. The conversion of a grade of "C−" or better to a "Pass" will be performed administratively by the Assistant Dean of Academic Services.

Penalties Relating to Papers

All papers shall be turned in on the date fixed by the faculty member. The faculty member has the discretion to reduce the grade assigned to a paper which is turned in late; in an extreme case of lateness, the faculty member may refuse to accept the paper and may assign it a failing grade.

If all or a portion of a grade is based on a research paper and the faculty member discovers, after the grade is turned in to the Law School Academic Services Office and before the student graduates, that a portion of the paper represents the unattributed work of another, the faculty member may seek to lower the student's grade down to and including an "F." In making the grade reduction decision, the faculty member shall not take into account the student's intent. The faculty member must present the evidence of the use of unattributed work of another and the justification for the level of grade reduction to the Vice Dean. The Vice Dean shall approve the grade reduction, after notice to the student and after giving the student an opportunity to be heard, unless the Vice Dean believes the faculty member has acted arbitrarily or capriciously. If the faculty member believes that the student may have acted intentionally, the faculty member shall report the student's actions to the Honor Board. A finding by the Honor Board that the Honor Code has not been violated shall not affect the grade reduction for lack of original work.

Penalties for Lack of Class Attendance or Preparation
Preamble

The faculty believes that learning requires the active engagement of our students. Thus, the faculty expects students to attend class regularly and to be prepared to participate in the class discussion when called upon to do so. Although the faculty recognizes that a majority of students are highly motivated and would prepare for and would attend class without any requirement to do so, a small but significant number of students do not attend class with sufficient consistency and preparedness. That failure is detrimental to their education and is inconsistent with the professionalism that aspiring lawyers should exhibit. In addition, a student's failure to prepare for class often adversely affects the class discussion and thus is also detrimental to the education of his or her fellow students.

This statement of policy by the faculty is consistent with the position of the American Bar Association. As an ABA-accredited institution, Tulane Law School must require that its students attend class regularly, as well as adopt and enforce policies relating to class attendance.

The General Rule

Tulane Law School requires regular attendance and preparation by law students in all law school classes.

Announced Policies Penalizing Inadequate Attendance or Preparation

A faculty member has discretion to adopt any reasonable policy penalizing a student for inadequate attendance and preparation for her or his class. Examples of such policies include, but are not limited to, reasonable policies that provide for grade reductions, a failing grade, or involuntary withdrawal from a course in cases where the instructor deems a student's absence or lack of preparation to be excessive. The grades of D+ (1.33 quality points) and D– (0.67 quality points), although not part of the normal grading scale, may be used by faculty to assess grade-step reductions as a penalty pursuant to an announced attendance and preparation policy.

Faculty who intend to adopt a policy on class attendance and preparation must clear the reasonableness of the policy with the Vice Dean before its adoption. Once the Vice Dean approves the reasonableness of a policy, the faculty member need not seek clearance of that policy in the future.

To enforce any announced policy penalizing a student for inadequate attendance and preparation, an instructor must:

1. hand out or announce the terms of that policy to the class,
2. post the policy on the Intranet within the first two weeks of class, and
3. maintain a record of attendance and/or performance in class.

The relevant faculty member shall notify in writing or by an electronic record any student affected by enforcement of a policy adopted under this section. A copy of the notice shall be sent to the Office of Academic Services.

Unannounced Attendance and Preparation Policies

Whether or not an instructor has adopted a policy on class attendance, he or she may penalize a student who fails to attend class in accordance with the terms of this subsection.

If an instructor has supporting documentation, she or he may penalize a student who has missed at least 30% of the regularly scheduled class meetings for that course. In such a case, the available penalty is to withdraw the student from the course with the grade of "W" and a transcript notation that the student was "required to withdraw because of excessive absences." Before the final examination and before taking this action, the instructor must notify the student.

Whether or not an instructor has supporting documentation, he or she may refuse to allow a student who has rarely or never attended

class to take the final examination. As soon as the problem is discovered, the instructor must notify the student in jeopardy to give the student the opportunity to improve his or her attendance sufficiently to avoid the penalty. However, if the student's attendance does not improve sufficiently, as defined reasonably by the instructor, the instructor may exercise one of the following options:

1. Assign a grade of "F" for the course; or
2. Allow the student to withdraw from the course with a grade of "W" and a transcript notation that the student was "required to withdraw because of excessive absences."

If the problem is discovered so late in the semester that the student has no opportunity to improve his or her attendance sufficiently to avoid a penalty, the instructor may still refuse to permit the student to take the examination, but may only exercise Option (2), above. After imposition of either penalty, the student may retake the course for a new grade, but the original grade and/or notation remains on the transcript.

Good Faith Requirement

Instructors shall exercise good faith in applying penalties under this section.

Retention and Student Access to Examination Answers

For one year after an examination, an instructor is obligated to make available a student's written examination upon request by the student. Students may not, however, photocopy their examination answers, nor may they remove their examination answers from the room in which they are stored without the instructor's approval. The instructor has an obligation to make available to students in the course a copy of a model answer or several copies of "good answers" written by other students in the course. Students may not make photocopies of such model answers or "good answers" unless these items are on reserve in the Tulane Law Library or the instructor approves.

Grievance Procedures for Alleged Discrimination

All members of the Tulane Law School are subject to Tulane University's Equal (https://equity.tulane.edu/sites/equity.tulane.edu/files/EO%20Policy.%20July%202017.pdf) Opportunity/Anti-Discrimination Policy, (https://equity.tulane.edu/sites/equity.tulane.edu/files/EO%20Policy.%20July%202017.pdf) which includes Tulane's Anti-Harassment Policy. This policy provides that

> Tulane University prohibits discrimination in its employment practices or educational programs/activities on the basis of race, color, sex, religion, national origin, age, disability, genetic information, sexual orientation, gender identity, gender expression, pregnancy, marital status, military status, veteran status, or any other status or classification protected by federal, state or local law. Tulane University complies with applicable federal and state laws addressing discrimination, harassment and retaliation. Discrimination or harassment on the basis of any protected classification will not be tolerated.

Any member of the Tulane Law School community who believes he or she has experienced discrimination or harassment on any of these grounds by any member of the Tulane community is encouraged to report this conduct to the Vice Dean, the Assistant Dean of Students, or any of the individuals listed in the Equal Opportunity/Anti-Discrimination Policy. For additional information, please see the attached Equal Opportunity/Anti-Discrimination Policy.

A student who seeks to appeal a grade must comply with the procedures articulated in Section IV.I.

Degree Requirements

Degree Requirements

- General Graduate School Requirements
- Doctor of Juridical Science
- Juris Doctor
- Master of Jurisprudence
- Master of Laws
  - General LLM Degree Requirements
  - LLM in Admiralty Degree Requirements
  - LLM in American Law Degree Requirements
  - LLM in Energy & Environment Degree Requirements
  - LLM in International & Comparative Law Degree Requirements

General Graduate School Requirements

A full description of Master's (p. 89) and PhD Degree (p. 92) requirements for all students can be found in the Office of Graduate and Postdoctoral Studies section of this catalog. Students should review these policies thoroughly.

Doctor of Juridical Science

Tulane Law School also offers the Doctor of Juridical Science (SJD) to a small number of candidates who already hold the LLM as well as the first law degree (JD or LLB or equivalent). The SJD is a research-oriented degree requiring completion of a dissertation which makes an original and significant contribution to legal scholarship.

Each SJD student is assigned a faculty advisor upon admission. During the first semester of enrollment, SJD students take between 10 and

12 credits of coursework. Thereafter, most SJD students work full-time on the dissertation until it is completed. Tulane's expectation is that the final SJD dissertation will be submitted within four years following initial enrollment in the program. The dissertation is to make an original and significant contribution to legal scholarship. Each candidate defends his or her dissertation in an oral examination before a committee of the Tulane Law School faculty, supplemented with other University faculty where appropriate.

Degree Requirements for the SJD Program:

1. In order to obtain the SJD degree, a student must fulfill the following requirements, depending on the student's particular circumstances upon admission to the program:
   a. Students admitted to the SJD program with a Tulane Law School Master's degree awarded five or fewer years prior to admission to the SJD program are exempt from any further coursework requirement.
   b. Students admitted to the SJD program with a Tulane Master's degree awarded more than five years prior to admission to the SJD program must complete an additional 10 hours of coursework with a grade of B or better in each course.
   c. Students admitted to the SJD program with a Master's degree from a law school in the United States (other than Tulane) or from an approved foreign law school in all cases must complete an additional 12 hours of coursework at Tulane.
2. All SJD students, including those exempt from some or all further coursework requirements, must be in residence for at least one year but are only required to pay full-time tuition and fees for at least one semester, typically the first semester of enrollment in the program. Students wishing to enroll in courses outside that one semester may do so on the understanding that they must pay tuition for each additional course they take.
3. Every SJD candidate must write and defend successfully a dissertation which makes an original and significant contribution to legal scholarship. Unless specifically exempted from this requirement for very exceptional circumstances by the Graduate Programs Committee, the dissertation must be complete and the defense must take place within four years from the initial enrollment in the SJD program.
4. Dissertation Committee: The committee will consist of three members one of whom is the supervisor who acts as the chair of the committee. The chair of the committee shall be a tenured member of the faculty. At least one of the other two members of the committee shall be a tenured or tenure-track member of Tulane Law School. Under normal circumstances, all members of the committee will be Tulane Law School faculty members, but there may be cases where it becomes necessary to ask a faculty member from another department of the University or a faculty member at another institution, foreign or domestic, to join the committee. The outside member must, however, be a tenured member of the faculty at his or her home institution. The selection of the dissertation committee will be decided by the student in consultation with the chair of the committee. The committee shall be empaneled at the earliest time after the candidate has taken residence but no later than the end of the first semester of residence. As soon as the committee has been established, the chair of the committee shall notify the Graduate Affairs Committee of the names of the members of the committee. The Graduate Affairs Committee shall transmit the information to the Assistant Dean for Academic Services for record keeping.
5. Lengths of dissertations vary depending on the subject matter and the writing style of the authors, but as a general matter the length of a dissertation ranges between 200-300 pages, including appendix and bibliography. After the dissertation committee has approved the dissertation, the supervisor shall set up a meeting at which the candidate shall present an oral defense of the doctoral thesis. The dissertation committee will conduct the oral examination. The meeting for the oral defense is open to members of the Law School faculty.
6. Clinical programs, the Trial Advocacy course and externships are not open to SJD students.

Juris Doctor

Candidates for the Juris Doctor degree must spend six full-time semesters in academic residence and complete 88 semester hours at the Law School with at least a 2.0 or C average. All candidates must successfully complete (i) the first-year curriculum, (ii) the Legal Profession course, (iii) the upper-class writing requirement, (iv) six credits of experiential learning, and (v) the 50-hour pro bono requirement.

First-Year Curriculum

Tulane's first-year curriculum emphasizes developing core analytic and legal writing skills.

Required Courses

All students are required to take the following courses:

Course ID	Title	Credits
1LAW 1080	Constitutional Law 1	4
1LAW 1110	Contracts I	3
1LAW 1210	Criminal Law	3
1LAW 1310	Civil Procedure	4
1LAW 1510	Torts	4

Tulane offers its students the unique opportunity to take courses in the civil law system: during the Spring semester of their first year, JD students elect to complete the first-year curriculum by taking civil law courses (Civil Law Property and Obligations I) or common law courses (Common Law Property and Contracts II). All students have the option to take foundational and advanced courses in both systems as electives.

Course ID	Title	Credits
1LAW 1160	Contracts II	3
1LAW 1340	Civil Law Property	4
1LAW 1360	Common Law Property	4
1LAW 1410	Legal Research & Writing	0-4
1LAW 1420	Becoming Lawyers	0
1LAW 1440	Obligations I	3

Legal Research & Writing

The first-year legal research and writing program is designed to teach the fundamentals of legal writing and to acquaint the student with various research techniques utilizing the resources of the law library and computerized legal databases. Over the course of two semesters, students will learn the techniques of legal problem-solving, and learn

to research and draft legal memoranda and briefs through a series of progressively more complex writing assignments. The course culminates with the drafting of an appellate brief and an oral argument before an appellate moot court.

Upper-Class Curriculum

After their first year, J.D. students are free to design their own curriculum from an array of electives, or to concentrate their studies in an area of curricular strength advanced courses in conjunction with our certificate programs. Optional summer programs and externship opportunities are offered in New Orleans and in a variety of locations throughout the world.

Upper-Level Writing Requirement

JD students must successfully complete one rigorous writing project after their first year of law school. The upper class writing requirement may be satisfied through an approved seminar or course, a directed research project supervised by a faculty member, or production under faculty supervision of a publishable case note or comment in any of our student-edited journals.

Experiential Learning

J.D. candidates must successfully complete courses providing a minimum of six experiential learning credits. Experiential credits may be earned through participation in our traditional live-client clinics, as well as through simulation courses and externship field placements.

Journals and Co-curricular Activities

Some students choose to hone their writing and editing abilities by joining one of our law journals. Others compete in trial and appellate teams in our Moot Court Program to train in oral and written advocacy.

Pro Bono Service

In addition to the academic requirements set forth above, each JD candidate must complete a total of 50 hours of approved uncompensated, law-related pro bono service.

Master of Jurisprudence

The Master of Jurisprudence program requires the completion of 30 credit hours, and typically takes two years to complete. This online, non-residential program was designed for human resource professionals and those seeking to transition into HR. Students will obtain additional expertise and familiarity with the extensive and complex body of federal and state regulations that govern most aspects of recruitment, hiring and retention of employees. The MJ-LEL program includes a one-time on-campus Education Immersion Weekend, in addition to its online course curriculum.

Education Immersion Weekend is held every summer, so students can plan to attend during either their first or second year in the program, but the experience of prior students indicates that the session is most beneficial to those who attend in their first year. It is both an academic and networking opportunity for students to meet their classmates, professors, and other professionals working in the area of labor and employment law. The occasion will include a keynote speaker, lectures and workshops from industry experts, and a variety of social activities.

Course ID	Title	Credits
Semester 1		
EMPL 6400	Legal Analysis I	
EMPL 6910	Intro to Employment Discrimination	
Semester 2		
EMPL 6401	Legal Analysis II	
EMPL 5710	Intro to Labor Law Principles	
Semester 3		
EMPL 6460	Employment Law	
EMPL 5410	IP Issues in the Workplace	
Semester 4		
EMPL 6050	Sex & Gender Issues in Work	
Plus one 2-credit elective		
Semester 5		
EMPL 6000	Social Media Issues in Wkplace	
Plus one 2-credit elective		
Semester 6		
EMPL 6990	Capstone Course	
Plus one 2-credit elective		
ELECTIVE COURSES:		
EMPL 5000	Developing & Manage Workforce	
EMPL 5800	Negotiating Skills	
EMPL 6100	Investigat Employee Complaints	
EMPL 6500	Employee Medical Leaves	
EMPL 6600	Privacy in the Workplace	

Master of Laws

Candidates for the Master of Laws degree must complete 24 semester hours of coursework. Full-time students are expected to complete the LLM in two semesters (one academic year). LLM students must also write at least one paper in connection with a seminar in their field of interest or in connection with a directed research project.

LLM Students who received a JD or LLB (or equivalent) from a school located outside of the United States must enroll in a three-week summer orientation course, Introduction to US Law. International students must also complete and pass a legal research and writing course.

Candidates for all Master's degrees must satisfy the following requirements:

Satisfactory completion of 24 credits of coursework at the Law School. "Satisfactory completion" is defined under Academic Standards in the Student Handbook. All 24 credits of coursework must be completed at Tulane Law School, but up to 3 credits may be completed in a Tulane Law School summer abroad program. No transfer credit for work completed at other law schools can be granted toward the LLM degrees at Tulane Law School.

Full-time students must complete between 10 and 12 credits of coursework in each of two consecutive fall and spring semesters, except with special permission. Part-time students must complete between 4 and 7 credits of coursework each semester, completing all degree requirements in four semesters, with the option of attending one Tulane Law School summer session in New Orleans for up to 3 credits of coursework.

Students are required to write papers for at least three but not more than nine credits of coursework, in courses requiring or permitting completion of a paper in lieu of an exam. Directed research credit falls in this category and may be substituted for up to three credits of the writing requirement. Students may not receive credit for directed research beyond the nine-credit writing credit maximum. The course Legal Research & Writing for International Graduate Students may not be counted toward the writing requirement.

All master's degree candidates who have received the first law degree from a school outside the 50 United States must enroll in Introduction to 4LAW 5600 Intro to Law of the US (1,2 c.h.) and 4LAW 5910 Legal Reasoning, Research & Writing for LLM Students (2-3 c.h.), in addition to any specific degree requirements. Because the Introduction to American Law course is offered only in the summer immediately preceding the start of the fall semester, all LLM candidates whose first law degrees are from schools outside the 50 United States must arrive at Tulane by late July.

Clinical programs and the Trial Advocacy course are not open to graduate students.

Students in the full-time graduate studies programs must be enrolled as full-time students at the Law School for one academic year (i.e., two full-time semesters). A full-time semester is defined as enrollment in 10 or more credits of coursework. Students may not pursue degrees in absentia.

General LLM Degree Requirements

The General LLM program allows the student to design his or her own course of study. There are no specific course requirements (beyond the three to four hours of courses required for all international students and the writing requirement). Each student in the General LLM program may plan an individual course program.

Students must meet all financial obligations to the University.

Each student must, after fulfilling all other degree requirements, be recommended for the degree by the law faculty.

LLM in Admiralty Degree Requirements

Candidates for the LLM in Admiralty must fulfill the General Degree Requirements and must also complete at least 13 of the 24 credits required for the degree in admiralty courses.

Typically, the following admiralty courses are offered:

- Admiralty I
- Admiralty II
- Carriage of Goods by Sea
- Charter Parties
- Collision Law & Limitation of Liability
- Law of the Sea
- Marine Insurance I
- Marine Insurance II
- Personal Injury & Death
- Marine Pollution
- Regulation of Shipping & Commerce
- Admiralty Seminar
- Tugs & Towage
- Vessel Documentation & Finance

Additional admiralty courses, including month-long mini courses, are offered each year by visiting professors from throughout the world. In recent years, these courses have included Comparative Carriage of Goods, International Jurisdiction in Maritime Cases, Maritime Liens, Law of the Sea, and International Conventions.

LLM in American Law Degree Requirements

Candidates for the LLM in American Law must fulfill the General Degree Requirements and must also take at least 14 hours of coursework in the following subjects:

- Constitutional Law
- Contracts
- Criminal Law
- Corporations
- Business Enterprises
- Evidence
- Intellectual Property
- Federal Civil Procedure
- Taxation
- Uniform Commercial Code
- Torts, or (if planning to take the Louisiana bar exam) Louisiana Civil Procedure or Louisiana Obligations Law.

Students seeking this degree are also required to take either Common Law Property or Civil Law Property.

Remaining hours of coursework for the degree may be selected from any other courses open to graduate students at Tulane Law School.

LLM in Energy & Environment Degree Requirements

The LLM in Energy & Environment requires, in addition to the general degree requirements for LLM candidates, completion of 15 credit hours of coursework in energy and environmental law courses. Students must enroll in the **Graduate Seminar in Energy & Environment (https://law.tulane.edu/courses/energy-environment-llm-seminar/)** as well as two of the following three courses: **Natural Resources (https://law.tulane.edu/courses/environmental-law-natural-resources/)**, **Pollution Control (https://law.tulane.edu/courses/environmental-law-pollution-control/)** and **Energy Law, Regulation and Policy (https://law.tulane.edu/courses/energy-law-regulation-and-policy/)**. A list of additional energy and environmental law electives from the current and past two academic years may be found **here (https://law.tulane.edu/course-descriptions/?field_academic_area_value=9)**. Not all of these courses are offered every year. In appropriate circumstances and with the concurrence of the faculty, other courses may be substituted.

In addition to fulfilling the General Degree Requirements for all LLM programs, students must complete 15 hours in specified environmental or energy law courses.

- Successful completion of two foundation courses, chosen from Pollution Control Law, Natural Resources Law, and Energy Law. (Each of these courses carries 3 credits.)
- Successful completion of Graduate Seminar in Energy & Environment (1 credit).
- Successful completion of three additional courses, chosen from:
  - Administrative Law
  - Oil & Gas Law (basic or advanced)
  - Coastal & Wetlands Law
  - Environmental Enforcement
  - Comparative Environmental Law
  - Hazardous & Solid Waste Regulation
  - Historic Preservation Law
  - International Environmental Law
  - Land Use Planning
  - Marine Pollution Law
  - Regulation of Toxic Substances
  - Toxic Tort Litigation
  - Water Law
  - Wildlife & Endangered Species Law

Not all of these courses are offered every year. In appropriate circumstances and with the concurrence of the faculty, other courses may be substituted for the courses listed.

LLM in International & Comparative Law Degree Requirements

Each student's course of study is at least somewhat dependent upon the background and previous legal education of the individual student and on the student's objectives. For example, US students interested in European legal studies would need exposure to European legal sources and European Community Law. A student from Germany, however, might focus her studies somewhat differently, seeking exposure to common law subjects and to other areas which she would be unlikely to have studied previously. Each student designs his or her course of study with the assistance of a faculty advisor.

In addition to fulfilling the General Degree Requirements, all candidates for the LLM in International & Comparative Law are required to enroll in a total of 13 semester hours of international and comparative law courses. All students who have not already taken a public international law course are required to take Public International Law, with the remaining 10 hours of specialized coursework chosen from the following offerings:

- Civil Law Seminar
- Comparative Law: European Legal Systems
- European Union Law
- European Law of Obligations: French or German
- European Legal History
- Foreign Affairs and National Security
- Human Rights Discourse
- Immigration Law
- International Sale of Goods
- Transnational Litigation
- International Business Transactions
- International Commercial Arbitration
- International Criminal Law
- International Environmental Law
- International Human Rights
- International Income Tax
- International Intellectual Property
- International Trade, Finance and Banking
- Law of the Sea
- Maritime and National Security Law
- Products Liability & Mass Torts in Comparative Perspective
- Any one-credit mini-courses in international and comparative law

Programs

Programs

- Doctor of Juridical Science (p. 201)
- Juris Doctor (p. 191)
  - JD Certificates (p. 192)
    - Civil Law Certificate (p. 192)
    - Environmental Law Certificate (p. 193)
    - International and Comparative Law Certificate (p. 193)
    - Maritime Law Certificate (p. 194)
    - Sports Law Certificate (p. 194)
- Master of Jurisprudence (p. 198)
  - Energy Law, MJ (p. 198)
  - Environmental Law, MJL (p. 199)
  - Labor and Employment, MJ (p. 200)
- Master of Laws (p. 194)
  - Admiralty, LMA (p. 196)
  - American Law, AML (p. 196)
  - Energy & Environment, MEL (p. 197)
  - General Law, LLM (p. 197)
  - International and Comparative Law, LMI (p. 198)

Joint Degrees

The curriculum of the law school and the university offer Juris Doctor (JD) candidates a variety of opportunities to pursue interdisciplinary studies.

Tulane law students may pursue one of several joint degree programs established with the School of Social Work, the School of Public Health and Tropical Medicine, the A.B. Freeman School of Business, and the Stone Center for Latin American Studies. Students may petition the Law School and another division of Tulane University to permit other joint degree programs. Possibilities include the JD in combination with MA degrees offered by several of the School of Liberal Arts or the School of Science and Engineering.

Students interested in pursuing these possibilities should confer with the Vice Dean of the Law School and then with the appropriate administrator or faculty member in the other department or division of Tulane University.

Joint Degrees

- JD/Master of Business Administration (MBA)
- JD/Master of Health Administration (MHA)
- JD/Master of Social Work (MSW)
- JD/MA in Latin American Studies

JD/Master of Business Administration (MBA)

Joint degree candidates complete a minimum of 50 semester hours of coursework at the Freeman School of Business, in addition to coursework for the JD. Requirements are detailed below.

Course ID	Title	Credits
Year 1		
Fall Semester		
First Seven Weeks		
ACCN 6000	Financial Accounting	2
FINE 6010	Economics for Managers	2
MCOM 6000	Corporate Communications	2
MGSC 6010	Introduction to Business Statistics	2
Second Seven Weeks		
FINE 6030	Managerial Finance	2
MGMT 6000	Strategy	2
MGMT 6010	Managing People	2
MGSC 6030	Analytics for Managers	2
Full Semester		
CDMA 6010	Career Development I	0
Spring Semester		
Intensive Immersion		
MGMT 6020	Business Negotiations	2
First Seven Weeks		
ACCN 6010	Managerial Accounting	2
MGSC 6040	Supply Chain and Operations Management	2
MKTG 6000	When Data Lie	2
MKTG 6010	Marketing Management	2
Second Seven Weeks		
FINE 6040	Financial Models for Business Decisions	2
LGST 6000	Essentials of Business Law	2
MGMT 6090	Data-Driven Strategic Management	2
Full Semester		
MGMT 6050	Consulting Practicum	3
CDMA 6020	Career Development II	0
Remaining Requirements		
Electives		**15**
Total Credit Hours		**50**

Questions about the MBA program should be directed to the A.B. Freeman School of Business (https://freeman.tulane.edu/).

JD/Master of Health Administration (MHA)

Tulane Law students may combine their studies with the MHA degree for health administration. The MHA degrees requires a total of 60 credits and a 960 hour administrative residency. Students accepted as joint degree students may apply up to 10 credits of specific law school courses related to health care toward the MHA degree. Joint degree student complete all of the requirements for the MHA degree

Tulane Law students may also do a joint degree with the MPH in Health Systems Management. The MPH is 45 credits and joint degree student may apply up to 10 credits of specific law school credits to the MPH. Joint degree students complete the same MPH in Health Systems Management requirements.

Candidates must also take at least three credit hours of health law/ health regulation coursework at the Law School as part of the Law School's required 79 semester hours of credit.

Students must also complete the MHA culminating experience and administrative residency requirements. JD/MHA students complete both degrees in four years.

Questions about the MHA program should be directed to the Department of Global Health Management and Policy at the School of Public Health & Tropical Medicine (http://sph.tulane.edu/) at ghsd@tulane.edu.

JD/Master of Social Work (MSW)

Students who wish to pursue the JD and Master of Social Work (MSW) degrees jointly must do so by beginning the joint program at the School of Social Work. The School of Social Work, which normally requires 60 credit hours, grants 6 hours for work completed at the Law School, thereby reducing its own requirements to 54 credit hours. The Law School reduces its requirements from 88 to 79 hours. Completion of both degrees takes four years.

The social work curriculum has foundation and advanced components in nine areas: social work values and ethics; diversity; promotion of social and economic justice; populations at risk; human behavior and the social environment; social work practice; social policy practice; research; and field practicum. During the first year of the MSW program, students enroll in the following courses:

- Professional Foundations of Social Work
- Tools for Learning and Practice: Evidence-Based Social Work Practice
- Theories of Human Behavior in the Social Environment
- Relationship-Centered Methods for Social Work Practice

Students take advanced courses in crisis intervention and brief treatment; spirituality and social work; cultural competence; clinical work with children and adolescents; psychotherapy practice with couples and family; violence in the family; human sexuality; death and dying; gerontology; and a variety of other treatment-oriented subjects.

Questions about the MSW program should be directed to the School of Social Work (https://tssw.tulane.edu/).

JD/MA in Latin American Studies

Tulane's Latin American Studies program is considered to be among the top programs in the United States. Some 80 faculty members from throughout the university teach and advise students who are pursuing

degrees in Latin American Studies. The program houses one of only three separate and distinct Latin American Studies libraries in the United States.

Students pursuing the joint JD/MA in Latin American Studies must complete 24 semester hours of coursework in graduate courses approved by the Stone Center for Latin American Studies. At least one of these courses must be an interdisciplinary, integrating seminar offered by the Stone Center for Latin American Studies. An interdisciplinary thesis option is offered in lieu of one three-credit course. Typically, a staff member of the Center for Latin American Studies serves as program advisor for joint JD/MA candidates.

Questions about the MA in Latin American Studies can be directed to the Stone Center for Latin American Studies (https://stonecenter.tulane.edu/).

Juris Doctor

Our Curriculum

Tulane's first-year program emphasizes developing core analytic and legal writing skills. Faculty teach required first-year courses in classes of approximately 75 students to encourage close participation in the give-and-take of Socratic discussion. Using the case method, students dissect judicial decisions, respond to professors' and classmates' questions and carefully consider competing arguments. First-year legal research and writing professors also teach small-section courses, in which students develop the writing strategies and skills to succeed in practice.

After the first year, students are free to design their own curriculum from an array of electives. Tulane offers specialized courses in conjunction with our certificate programs, which approximately one-third of students complete. Many students also earn academic credit through in-depth training opportunities outside the classroom. Some choose to hone their writing and editing techniques by joining one of our eight legal journals. Others compete in trial and appellate moot court teams to train in oral and written advocacy. Students acquire real-world experience in our law clinics and labs. Our clinics, Trial Advocacy course and boot camp skills-training program teach the students key skills to succeed in their future practice.

Areas of Study

Tulane is proud to offer six distinctive programs in which students may earn a certificate of concentration: Civil Law, International and Comparative Law, Maritime Law, Environmental Law and Sports Law.

Beyond the certificate programs, Tulane holds core courses in alternative dispute resolution; constitutional law; consumer law; corporate and commercial law; civil law and procedure; criminal law and procedure; energy law; legal ethics and professionalism; family law; health law; labor and employment law; property and real estate law; administrative and regulatory law; state and local government procedure; tax law; and advanced legal writing. Faculty in both specialty and traditional areas of study are nationally and internationally recognized for their contributions to their fields. Upper-level students have the freedom to choose from our broad range of course offerings and can select any combination of classes.

Civil Law Program

Tulane Law's capacity to teach the world's two preeminent legal systems is one of its greatest strengths. Students who intend to practice in common law jurisdictions will find the same extensive course offerings at Tulane as at other national law schools. However, Tulane offers students who plan to practice internationally or in civil law jurisdictions an assortment of civil law classes not offered at most law schools. Students may take either common or civil law courses, and many take a mix of both to expand their legal knowledge and practice potential.

Requirements

Candidates for the Juris Doctor degree must spend six full-time semesters in academic residence and complete 88 semester hours at the Law School with at least a 2.0 or C average. All candidates must successfully complete (i) the first-year curriculum, (ii) the Legal Profession course, (iii) the upper-class writing requirement, (iv) six credits of experiential learning, and (v) the 50-hour pro bono requirement.

First-Year Curriculum

Tulane's first-year curriculum emphasizes developing core analytic and legal writing skills.

Required Courses

All students are required to take the following courses:

Course ID	Title	Credits
1LAW 1080	Constitutional Law 1	4
1LAW 1110	Contracts I	3
1LAW 1210	Criminal Law	3
1LAW 1310	Civil Procedure	4
1LAW 1510	Torts	4

Tulane offers its students the unique opportunity to take courses in the civil law system: during the Spring semester of their first year, JD students elect to complete the first-year curriculum by taking civil law courses (Civil Law Property and Obligations I) or common law courses (Common Law Property and Contracts II). All students have the option to take foundational and advanced courses in both systems as electives.

Course ID	Title	Credits
1LAW 1160	Contracts II	3
1LAW 1340	Civil Law Property	4
1LAW 1360	Common Law Property	4
1LAW 1410	Legal Research & Writing	0-4
1LAW 1420	Becoming Lawyers	0
1LAW 1440	Obligations I	3

Legal Research & Writing

The first-year legal research and writing program is designed to teach the fundamentals of legal writing and to acquaint the student with various research techniques utilizing the resources of the law library and computerized legal databases. Over the course of two semesters, students will learn the techniques of legal problem-solving, and learn to research and draft legal memoranda and briefs through a series of progressively more complex writing assignments. The course

culminates with the drafting of an appellate brief and an oral argument before an appellate moot court.

Upper-Class Curriculum

After their first year, J.D. students are free to design their own curriculum from an array of electives, or to concentrate their studies in an area of curricular strength advanced courses in conjunction with our certificate programs. Optional summer programs and externship opportunities are offered in New Orleans and in a variety of locations throughout the world.

Upper-Level Writing Requirement

JD students must successfully complete one rigorous writing project after their first year of law school. The upper class writing requirement may be satisfied through an approved seminar or course, a directed research project supervised by a faculty member, or production under faculty supervision of a publishable case note or comment in any of our student-edited journals.

Experiential Learning

J.D. candidates must successfully complete courses providing a minimum of six experiential learning credits. Experiential credits may be earned through participation in our traditional live-client clinics, as well as through simulation courses and externship field placements.

Journals and Co-curricular Activities

Some students choose to hone their writing and editing abilities by joining one of our law journals. Others compete in trial and appellate teams in our Moot Court Program to train in oral and written advocacy.

Pro Bono Service

In addition to the academic requirements set forth above, each JD candidate must complete a total of 50 hours of approved uncompensated, law-related pro bono service.

JD Certificates

Tulane Law is proud to offer Juris Doctor (JD) candidates the opportunity to pursue a certificate of concentration in areas that draw upon our curricular strengths and the expertise of our faculty.

Students may elect to pursue a concentration in one of six certificate programs:

- Civil Law Certificate (p. 192)
- Environmental Law Certificate (p. 193)
- International and Comparative Law Certificate (p. 193)
- Maritime Law Certificate (p. 194)
- Sports Law Certificate (p. 194)

Requirements

There are currently five areas in which Tulane J.D. students can earn a certificate of concentration upon graduation if they complete a prescribed curriculum of upper-class courses. These areas are Civil Law, Environmental Law, International & Comparative Law, Maritime Law, and Sports Law. To avoid having students overspecialize in their J.D. studies, no student will be awarded more than one certificate of concentration. Students will register for a certificate program by submitting the JD Certificate Selection Form before their last semester (the form is located under the Forms link of the Academic Services page on the TLS P (https://intranet.law.tulane.edu/default.aspx)ortal (https://portal.law.tulane.edu/index.php/forms/), or may be picked up from the Law School Academic Services Office). The specific requirements for each certificate are listed in the registration materials.

Civil Law Certificate

Professor Ronald J. Scalise, Jr., Director

Tulane has taught both common and civil law courses for more than 160 years and takes pride in fostering exceptional civil law scholarship both in Louisiana and across the globe. For students who plan to practice internationally or in civil law jurisdictions, Tulane offers an assortment of civil and comparative law courses unavailable at most law schools.

Students must complete and pass a total of 18 credit hours. Of these, at least 15 credit hours must be taken from among the courses designated in the registration materials as “Basic Courses,” with at least one course drawn from each of the three groups. The 3 additional credit hours may be taken from either the Basic Courses or the courses designated “Enrichment Courses.”

Requirements

Basic Courses

Students must select one course from each group, and may take any additional basic courses to make up the total of 15 credit hours:

Group I: Fundamental Principles, Obligations and Special Contracts

- Obligations I
- Obligations II
- Commercial Law: Civil Law Security Rights
- Civil Law Torts

Group II: Persons and Family Property

- Family Law: Civil and Common
- Community Property
- Successions, Donations and Trusts

Group III: Property and Procedure

- Civil Law Property I
- Civil Law Property II
- Louisiana Civil Procedure

Enrichment Courses

Students may take their final three credit hours from the basic courses or the following enrichment courses:

- Civil Law Seminar
- Civil Law Persons
- Mixed Jurisdictions Seminar
- Comparative Law: European Legal Systems
- Comparative Private Law
- Real Estate Transactions & Finance: Common & Civil Law
- Roman Law
- Directed Research in Civil Law

- Clinical experience with civil law content, upon approval by the certificate Director.
- Visitor, summer school abroad and mini-courses identified as appropriate by the Civil Law Faculty.

Environmental Law Certificate

Professor Mark Davis, Director

As a leader in environmental legal education, Tulane has offered JD students the option to pursue a certificate in Environmental Law since 1979. The certificate program is designed to prepare students for the legal problems they will confront in practice, whether on behalf of government agencies, industrial clients, private litigants, or public interest groups.

Requirements

Students must complete and pass the following requirements totaling 15 credit hours:

Basic Courses

Students must take two of the following three courses:

- Administrative Law
- Pollution Control
- Natural Resources Law

Enrichment Courses

Students must take additional environmental law or related courses from the following list totaling nine credit hours (or six credit hours if all three foundation courses are taken):

- Climate Change
- Coastal and Wetland Law
- Comparative Environmental Law
- Hazardous Waste Law
- Toxic Torts
- International Environmental Law
- Environmental Enforcement
- Environmental Law Clinic (only 3 credits count toward the certificate)
- EU: Energy & Environmental Law & Policy
- Marine Pollution
- Oil and Gas Law
- Historic Preservation Law
- Endangered Species and Biodiversity Law
- Sustainable Energy Law & Policy
- Law, Sustainability & Development
- Law of the Sea
- Water Resources Law and Policy

Note: Other courses in this area may be available in some years and may be counted toward the certificate with the approval of the faculty.

International and Comparative Law Certificate

Professor Adeno Addis, Director

Tulane's capacity to teach the world's two preeminent legal systems is one of our greatest strengths: The intermingling of legal systems in Tulane's curriculum sparked the development of our International and Comparative Law Program, which prepares students to tackle complex legal issues at home and across the globe.

Requirements

Students must complete and pass the following requirements totaling 15 credit hours:

Basic Courses

Students must complete two of the following four courses (summer abroad courses excluded):

- Comparative Constitutional Law
- Comparative Private Law
- International Human Rights
- Public International Law
- Transnational Litigation

Enrichment Courses

Students must complete additional international and comparative law courses taken from the following list or from the list of foundation courses totaling nine credit hours (up to three of which may be completed in an approved summer abroad course):

- Any course or seminar with "Comparative" in the title
- Any seminar with "International" in the title
- Conflict of Laws
- Election Law
- Environmental Law: International
- European Union: Constitutional Law
- European Union: Business Law
- Foreign Affairs & National Security
- International Anti-Corruption & Other Global Compliance Issues
- International Business Transactions
- International Commercial Arbitration
- International Criminal Law
- International Sale of Goods
- International Trade, Finance & Banking
- Law of the Sea
- Modern European Legal History
- Socio-Economic Rights
- Transatlantic Trade
- Transnational Law
- Tax: International Tax
- World Trade Organization Seminar

- Any international and comparative mini-course approved by the relevant faculty

Maritime Law Certificate

Professor Martin Davies, Director

Tulane's Admiralty Law Program offers more admiralty and maritime law courses than any other law school in the United States. The courses are taught by members of the full time faculty, distinguished visiting professors and judges from around the world, and experienced practitioners from the local admiralty bar.

Requirements

Students must complete and pass the following requirements totaling 12 credit hours:

Basic Courses

Students must take the following two courses:

- Admiralty I
- Admiralty II

Enrichment Courses

Students must take three additional courses (excluding summer abroad courses) totaling a minimum of six credit hours from among the following courses:

- Any course with the prefix "Admiralty"
- Any mini-course with the prefix "Admiralty"
- Law of the Sea
- Marine Pollution
- Maritime & National Security
- Introduction to Chinese Maritime Law

Sports Law Certificate

Professor Gabe Feldman, Director

Tulane's Sports Law Program enables students to understand and deal with the challenging legal and business problems regularly confronting people in the sports industry.

The Sports Law Program at Tulane Law School extends far beyond the classroom. The program has many different components, each designed to give students the opportunity to learn, experience, discuss and debate the application of law to the sports industry and to pursue a career in sports law. The combination of academic studies, networking and practical training in legal writing helps students hone the skills necessary to succeed during internships and professional opportunities in the sports industry.

Requirements

Basic Courses

Students must complete and pass the following requirements totaling 15 credit hours:

- Antitrust
- Intellectual Property
- Labor Law
- Sports Law: Antitrust and Labor Law
- Sports Law: International and Intellectual Property

Recommended Courses

These courses are highly recommended:

- Business Enterprises
- Income Tax

One of these courses is also highly recommended:

- Negotiation & Mediation Advocacy
- The Berlin summer program
- Any other course(s) in the areas of dispute resolution or negotiation approved by the Director

Master of Laws

For more than 75 years, Tulane Law's Master of Laws (LLM) program has offered students from across the globe a unique and valuable opportunity to pursue advanced legal education.

Candidates for the Master of Laws degree must complete 24 semester hours of coursework. Full-time students are expected to complete the LLM in two semesters (one academic year). LLM students must also write at least one paper in connection with a seminar in their field of interest or in connection with a directed research project.

LLM Students who received a JD or LLB (or equivalent) from a school located outside of the United States must enroll in a three-week summer orientation course, Introduction to US Law. International students must also complete and pass a legal research and writing course.

Candidates for all Master's degrees must satisfy the following requirements:

Satisfactory completion of 24 credits of coursework at the Law School. "Satisfactory completion" is defined under Academic Standards in the Student Handbook. All 24 credits of coursework must be completed at Tulane Law School, but up to 3 credits may be completed in a Tulane Law School summer abroad program. No transfer credit for work completed at other law schools can be granted toward the LLM degrees at Tulane Law School.

Full-time students must complete between 10 and 12 credits of coursework in each of two consecutive fall and spring semesters, except with special permission. Part-time students must complete between 4 and 7 credits of coursework each semester, completing all degree requirements in four semesters, with the option of attending one Tulane Law School summer session in New Orleans for up to 3 credits of coursework.

Students are required to write papers for at least three but not more than nine credits of coursework, in courses requiring or permitting completion of a paper in lieu of an

exam. Directed research credit falls in this category and may be substituted for up to three credits of the writing requirement. Students may not receive credit for directed research beyond the nine-credit writing credit maximum. The course Legal Research & Writing for International Graduate Students may not be counted toward the writing requirement.

All master's degree candidates who have received the first law degree from a school outside the 50 United States must enroll in Introduction to 4LAW 5600 Intro to Law of the US (1,2 c.h.) and 4LAW 5910 Legal Reasoning, Research & Writing for LLM Students (2-3 c.h.), in addition to any specific degree requirements. Because the Introduction to American Law course is offered only in the summer immediately preceding the start of the fall semester, all LLM candidates whose first law degrees are from schools outside the 50 United States must arrive at Tulane by late July.

Clinical programs and the Trial Advocacy course are not open to graduate students.

Students in the full-time graduate studies programs must be enrolled as full-time students at the Law School for one academic year (i.e., two full-time semesters). A full-time semester is defined as enrollment in 10 or more credits of coursework. Students may not pursue degrees in absentia.

LLM candidates may pursue one of the following degree programs:

- Admiralty, LMA (p. 196)
- American Law, AML (p. 196)
- Energy & Environment, MEL (p. 197)
- General Law, LLM (p. 197)
- International and Comparative Law, LMI (p. 198)

Requirements

Coursework

Candidates for the Master of Laws degree must complete 24 semester hours of coursework. Full-time students are expected to complete the LLM in two semesters (one academic year). LLM students must also write at least one paper in connection with a seminar in their field of interest or in connection with a directed research project.

LLM Students who received a JD or LLB (or equivalent) from a school located outside of the United States must enroll in a three-week summer orientation course, Introduction to US Law. International students must also complete and pass a legal research and writing course.

Candidates for all Master's degrees must satisfy the following requirements:

Satisfactory completion of 24 credits of coursework at the Law School. "Satisfactory completion" is defined under Academic Standards in the Student Handbook. All 24 credits of coursework must be completed at Tulane Law School, but up to 3 credits may be completed in a Tulane Law School summer abroad program. No transfer credit for work completed at other law schools can be granted toward the LLM degrees at Tulane Law School.

Full-time students must complete between 10 and 12 credits of coursework in each of two consecutive fall and spring semesters, except with special permission. Part-time students must complete between 4 and 7 credits of coursework each semester, completing all degree requirements in four semesters, with the option of attending one Tulane Law School summer session in New Orleans for up to 3 credits of coursework.

Students are required to write papers for at least three but not more than nine credits of coursework, in courses requiring or permitting completion of a paper in lieu of an exam. Directed research credit falls in this category and may be substituted for up to three credits of the writing requirement. Students may not receive credit for directed research beyond the nine-credit writing credit maximum. The course Legal Research & Writing for International Graduate Students may not be counted toward the writing requirement.

All master's degree candidates who have received the first law degree from a school outside the 50 United States must enroll in Introduction to 4LAW 5600 Intro to Law of the US (1,2 c.h.) and 4LAW 5910 Legal Reasoning, Research & Writing for LLM Students (2-3 c.h.), in addition to any specific degree requirements. Because the Introduction to American Law course is offered only in the summer immediately preceding the start of the fall semester, all LLM candidates whose first law degrees are from schools outside the 50 United States must arrive at Tulane by late July.

Clinical programs and the Trial Advocacy course are not open to graduate students.

Students in the full-time graduate studies programs must be enrolled as full-time students at the Law School for one academic year (i.e., two full-time semesters). A full-time semester is defined as enrollment in 10 or more credits of coursework. Students may not pursue degrees in absentia.

Length of Study

All LLM programs are offered on a full-time and part-time basis. Full-time students are expected to complete the LLM in two semesters, or one academic year. Due to student visa requirements, many international students are required to enroll on a full-time basis. Attorneys in full-time practice in the New Orleans area have an exclusive option to enroll in the part-time program toward the LLM in Admiralty. All part-time LLM students must complete the program in four consecutive (non-summer) semesters.

Residency Requirements

All international LLM students begin the Introduction to US Law course in mid-July and proceed directly into the fall semester, which begins in late August and concludes at the beginning of December; fall-semester exams take place in December before the winter break. The spring semester begins in mid-January and concludes in late April, followed by

spring-semester exams. Commencement ceremonies and conferral of degrees take place in May.

Summer Abroad Option

Tulane LLM students admitted to any of our full-time programs may begin the LLM program in the summer by attending one of Tulane's summer abroad programs. Up to 3 of the 24 credits required for the LLM program may be completed in a Summer Abroad Program. Tuition is included in the academic year costs, leaving students who proceed immediately into the LLM program responsible only for their living expenses during the summer abroad program. International students must arrive in New Orleans by the start of the Introduction to US Law course in mid-July.

Programs

Admiralty, LMA

Tulane Law School is known internationally for its admiralty and maritime law program. The city of New Orleans, located near the mouth of the Mississippi River and the Gulf of Mexico, is a significant maritime center, and the lower Mississippi River is one of the largest ports in the world. New Orleans itself has the second largest admiralty bar in the United States. As a result of the natural focus on maritime issues in New Orleans, Tulane Law School has become an important center for the study of admiralty and maritime law.

To qualify for the degree of LLM in Admiralty, the student must complete at least 13 of the 24 hours required for the degree in admiralty courses. A list of admiralty courses from the current and past two academic years may be found **here (https://catalog.tulane.edu/law/#coursestext).** Additional admiralty courses, including mini courses, are offered each year by visiting professors from throughout the world.

Students may enroll in this program on a full-time basis, completing it over one year. Attorneys practicing full-time in the New Orleans area may enroll on a part-time basis, completing the program over four consecutive semesters.

Requirements

Candidates for the LLM in Admiralty must fulfill the General Degree Requirements and must also complete at least 13 of the 24 credits required for the degree in admiralty courses.

Typically, the following admiralty courses are offered:

- Admiralty I
- Admiralty II
- Carriage of Goods by Sea
- Charter Parties
- Collision Law & Limitation of Liability
- Law of the Sea
- Marine Insurance I
- Marine Insurance II
- Personal Injury & Death
- Marine Pollution
- Regulation of Shipping & Commerce
- Admiralty Seminar
- Tugs & Towage
- Vessel Documentation & Finance

Additional admiralty courses, including month-long mini courses, are offered each year by visiting professors from throughout the world. In recent years, these courses have included Comparative Carriage of Goods, International Jurisdiction in Maritime Cases, Maritime Liens, Law of the Sea, and International Conventions.

American Law, AML

This degree is intended primarily for international students who hold a first degree in law (JD or LLB or equivalent) from a non-U.S. law school and who wish to establish eligibility to take a state bar examination in the United States, where permitted by state bar authorities. The degree will give students from foreign jurisdictions a thorough understanding of the fundamental principles of U.S. law and the American legal system, as well as an appreciation for law practice in the United States.

The academic program is designed to enable students who earn the degree to satisfy the American law school course requirements of the Bar Admissions Committees of Louisiana and New York. These two U.S. states are among those whose rules permit foreign lawyers to sit for their bar exam subject to, inter alia, completion of certain coursework in American Law. Students seeking to take the bar examinations in these two states, or any other state, must still meet all other eligibility requirements of the state in which they seek to take the bar examination, and are therefore urged to review those requirements at the earliest possible time.

The American LLM requires, in addition to the general degree requirements, completion of at least 14 hours of coursework in the following subjects: Constitutional Law, Contracts, Criminal Law, Corporations or Business Enterprises, Evidence, Intellectual Property, Federal Civil Procedure, Taxation, Uniform Commercial Code, Torts, or (if planning to take the Louisiana bar exam) Louisiana Civil Procedure or Louisiana Obligations Law. Students seeking this degree are also required to take either Common Law Property or Civil Law Property. Remaining hours of coursework for the degree may be selected from any other courses open to graduate students at Tulane Law School.

Requirements

Candidates for the LLM in American Law must fulfill the General Degree Requirements and must also take at least 14 hours of coursework in the following subjects:

- Constitutional Law
- Contracts
- Criminal Law
- Corporations
- Business Enterprises
- Evidence
- Intellectual Property

- Federal Civil Procedure
- Taxation
- Uniform Commercial Code
- Torts, or (if planning to take the Louisiana bar exam) Louisiana Civil Procedure or Louisiana Obligations Law.

Students seeking this degree are also required to take either Common Law Property or Civil Law Property.

Remaining hours of coursework for the degree may be selected from any other courses open to graduate students at Tulane Law School.

Energy & Environment, MEL

Since 1979, Tulane Law School has taken a lead role in the advancement of environmental legal education and the training of well-prepared environmental lawyers. The LLM in Energy & Environment program was initiated in 1984 and has evolved over time from a program concentrating primarily on oil, gas, and energy issues, to one in which both energy and the environment hold center stage. Tulane seeks to graduate students who understand not only the theory, but also the practice and advocacy of environmental issues.

Tulane is an ideal location for the study of both environmental and energy law. Located in an area of the United States in which these two areas come into frequent conflict, students have the opportunity for exposure to areas of great natural beauty as well as to industrial complexes. Among the resources the **Center for Environmental Law (https://law.tulane.edu/centers/environment/)** and the **Center for Energy Law (https://law.tulane.edu/centers/energy/)** offer students are an outstanding and dedicated faculty, a student-run journal devoted to environmental issues, active and engaged student organizations, and an Institute for Water Resources Law & Policy.

Students in the LLM in Energy & Environment program include recent law graduates, experienced lawyers practicing in local law firms, government agencies and corporations, and attorneys from foreign countries with emerging environmental law systems. Recent years have seen LLM candidates from more than a dozen US states and from at least two dozen countries including Australia, Belgium, Bulgaria, Canada, China, Colombia, Costa Rica, Croatia, Germany, India, Kenya, Liberia, Mexico, New Zealand, Nigeria, Sudan, Taiwan, Thailand, and Turkey.

Requirements

The LLM in Energy & Environment requires, in addition to the general degree requirements for LLM candidates, completion of 15 credit hours of coursework in energy and environmental law courses. Students must enroll in the **Graduate Seminar in Energy & Environment (https://law.tulane.edu/courses/energy-environment-llm-seminar/)** as well as two of the following three courses: **Natural Resources (https://law.tulane.edu/courses/environmental-law-natural-resources/)**, **Pollution Control (https://law.tulane.edu/courses/environmental-law-pollution-control/)** and **Energy Law, Regulation and Policy (https://law.tulane.edu/courses/energy-law-regulation-and-policy/)**. A list of additional energy and environmental law electives from the current and past two academic years may be found **here (https://law.tulane.edu/course-descriptions/?field_academic_area_value=9)**. Not all of these courses are offered every year. In appropriate circumstances and with the concurrence of the faculty, other courses may be substituted.

In addition to fulfilling the General Degree Requirements for all LLM programs, students must complete 15 hours in specified environmental or energy law courses.

- Successful completion of two foundation courses, chosen from Pollution Control Law, Natural Resources Law, and Energy Law. (Each of these courses carries 3 credits.)
- Successful completion of Graduate Seminar in Energy & Environment (1 credit).
- Successful completion of three additional courses, chosen from:
  - Administrative Law
  - Oil & Gas Law (basic or advanced)
  - Coastal & Wetlands Law
  - Environmental Enforcement
  - Comparative Environmental Law
  - Hazardous & Solid Waste Regulation
  - Historic Preservation Law
  - International Environmental Law
  - Land Use Planning
  - Marine Pollution Law
  - Regulation of Toxic Substances
  - Toxic Tort Litigation
  - Water Law
  - Wildlife & Endangered Species Law

Not all of these courses are offered every year. In appropriate circumstances and with the concurrence of the faculty, other courses may be substituted for the courses listed.

General Law, LLM

The General LLM program allows students to design their own courses of study. General LLM students may enroll in virtually any course, with the general exception of clinical programs and Trial Advocacy. Some students pursue a broad range of courses, and others focus their choices more narrowly.

Many international students use the General LLM program as a way to gain exposure to a variety of areas of US law. They may choose to enroll in a combination of introductory and more advanced courses in a variety of areas. Because the typical first-year courses are open to our graduate students, some choose to take such courses as Torts, Contracts, Criminal Law, Constitutional Law, and Property.

Requirements

Students find that the General LLM program lends itself to the development of ad hoc concentrations. For example:

- Students interested in intellectual property might take Intellectual Property, Copyright & Trademarks, Patent Law, one or more specialized courses in the area, a Directed Research project supervised by a faculty member who is an expert in the area, and even one or two unrelated courses.
- Students interested in international trade might take such courses as: International Trade, Finance & Banking; Financial Institutions;

International Tax; International Business Transactions; and a variety of related courses.

Students may even find it possible to concentrate in two areas through the General LLM program. Because the General LLM program has no distribution requirements, students are free to make independent choices about the courses in which they enroll.

International and Comparative Law, LMI

The breadth and depth of the international and comparative law curriculum at Tulane Law School provide unparalleled opportunities for both US and foreign lawyers to receive a basic foundation in international legal practice. Tulane's program offers courses in public international law, private international law including international business transactions, and comparative law. Tulane's unique perspective in a historically mixed common law-civil law jurisdiction results in an unusually rich experience for students.

Tulane offers its students a strong faculty with significant international experience and training, an outstanding library, and the resources of the Eason-Weinmann Center for Comparative Law, which brings together outstanding legal scholars from various countries and legal systems for seminars and lectures.

Requirements

Each student's course of study is at least somewhat dependent upon the background and previous legal education of the individual student and on the student's objectives. For example, US students interested in European legal studies would need exposure to European legal sources and European Community Law. A student from Germany, however, might focus her studies somewhat differently, seeking exposure to common law subjects and to other areas which she would be unlikely to have studied previously. Each student designs his or her course of study with the assistance of a faculty advisor.

In addition to fulfilling the General Degree Requirements, all candidates for the LLM in International & Comparative Law are required to enroll in a total of 13 semester hours of international and comparative law courses. All students who have not already taken a public international law course are required to take Public International Law, with the remaining 10 hours of specialized coursework chosen from the following offerings:

- Civil Law Seminar
- Comparative Law: European Legal Systems
- European Union Law
- European Law of Obligations: French or German
- European Legal History
- Foreign Affairs and National Security
- Human Rights Discourse
- Immigration Law
- International Sale of Goods
- Transnational Litigation
- International Business Transactions
- International Commercial Arbitration
- International Criminal Law
- International Environmental Law
- International Human Rights
- International Income Tax
- International Intellectual Property
- International Trade, Finance and Banking
- Law of the Sea
- Maritime and National Security Law
- Products Liability & Mass Torts in Comparative Perspective
- Any one-credit mini-courses in international and comparative law

Master of Jurisprudence

The Master of Jurisprudence (M.J.) is a post-baccalaureate degree that allows non-legal professionals to enhance career related skills through the study of the laws, governmental policy, and the legal system. This degree is designed to infuse career based knowledge with legal education.

The program requires the completion of 30 credit hours, and typically takes two years to complete.

Programs

- Energy Law, MJ (p. 198)
- Environmental Law, MJL (p. 199)
- Labor and Employment, MJ (p. 200)

Energy Law, MJ

Overview

The Master of Jurisprudence, in Energy Law is a nonresidential, thirty credit hour program to be offered online with synchronous and asynchronous elements. There will be asynchronous delivery of reading and assessment material online, synchronous live lectures that will be archived for subsequent streaming, and online chat options for student-to-student and student-to-instructor interaction. In addition, each student will be required to attend a two day live program of lectures and other activities at Tulane Law School during the summer.

The energy industry is highly regulated, and this program is designed to offer training in legal content that is an essential component of the knowledge base of both the regulated and the regulators. Enrolled students will be provided with the opportunity to upgrade and expand their knowledge and skill levels in their chosen profession. It will do this by providing not only live and online asynchronous instruction in the legal regime, but also extensive practical advice on how to deal with many of the issues facing both energy-related industries and the regulatory agencies such as the development and regulation of fossil fuel, electricity, nuclear and renewable energy sources, climate change, and alternative dispute resolution mechanisms.

Requirements

Curriculum

Term 1

- Energy Law, Regulation and Policy Survey (3 credits)
- Introduction to Legal Study, Research and Legal Writing I (2 credits)

Term 2

- Environmental Law, Regulation and Policy Survey (3 credits)
- Introduction to Legal Study, Research and Legal Writing II (2 credits)

Term 3

- Alternative Energy Sources: Regulation and Development (3 credits)
- Pollution Control (2 credits)

Term 4

- Administrative Law (3 credits)
- Dispute Resolution (2 credits)

Term 5

- Two courses from the following list of electives:
  - Fossil Fuel: Regulation and Development (3 credits)
  - Nuclear Energy: Regulation and Development (2 credits)
  - Electricity Industry: Regulation and Development (2 credits)
  - Renewable Energy Sources: Regulation and Development (2 credits)
  - Natural Resources Law (3 credits)
  - Hazardous Waste Law (3 credits)
  - Clean Air Law (2 credits)
  - Clean Water Law (2 credits)
  - Law & Climate Change (2 credits)

Term 6

- Capstone course (3 credits)
- One elective from the list of electives (2 or 3 credits)

On-Site Education Immersion Weekend (EIW)

All students enrolled in the online MJ program must attend one EIW to be eligible to receive the Masters degree. Students are welcome to attend more than the one EIW session. Each session is composed of two days of academic and other programming at the Law School during the summer. The EIW is designed to (a) supplement the online curriculum by involving students and faculty in discussion of new developments and unique other issues not addressed in the online curriculum; (2) provide students with networking opportunities by meeting their peers; (3) provide students and faculty opportunities to meet face-to-face; and (4) provide a tangible link between the students and the law school to promote their continued relationship to the school. The course is not offered for credit but attendance is required for
program completion.

Environmental Law, MJL

Overview

Master of Jurisprudence in Environmental Law is a thirty hour program to be offered online with synchronous and asynchronous elements. There will be asynchronous delivery of reading and assessment material online, synchronous live lectures that will be archived for subsequent streaming, and online chat options for student-to-student and student-to-instructor interaction. In addition, each student will be required to attend a two day live program of lectures and other activities at Tulane Law School during the summer.

Participants on all sides of environmental issues -- businesses, industries, individuals, and other entities whose activities and conduct affect the environment, governmental regulators, environmental groups and other public interest and advocacy groups -- need training in the legal framework that is an essential to understanding this complex field from the perspective of all stakeholder. This online, nonresidential program is designed to offer these target audiences the opportunity to upgrade and expand their knowledge and skill levels in their chosen profession.

Requirements

Curriculum

Term 1

- Environmental Law, Regulation and Policy Survey (3 credits)
- Introduction to Legal Study, Research and Legal Writing I (2 credits)

Term 2

- Energy Law, Regulation and Policy Survey (3 credits)
- Introduction to Legal Study, Research and Legal Writing II (2 credits)

Term 3

- Alternative Energy Sources: Regulation and Development (3 credits)
- Pollution Control (2 credits)

Term 4

- Administrative Law (3 credits)
- Dispute Resolution (2 credits)

Term 5

- Two courses from the following list of electives:
  - Toxic Tort Law (3)
  - Land Use Law (2)
  - Ocean and Coastal Law (3)
  - Natural Resources Law (3 credits)
  - Hazardous Waste Law (3 credits)
  - Clean Air Law (2 credits)
  - Clean Water Law (2 credits)
  - Law & Climate Change (2 credits)

Tulane University

Term 6

- Capstone course (3 credits)
- One elective from the list of electives (2 or 3 credits)

On-Site Education Immersion Weekend (EIW)

All students enrolled in the online MJ program must attend one EIW to be eligible to receive this Masters degree. Students are welcome to attend more than the one EIW session. Each session is composed of two days of academic and other programming at the Law School during the summer. The EIW is designed to (a) supplement the online curriculum by involving students and faculty in discussion of new developments and unique other issues not addressed in the online curriculum; (2) provide
students with networking opportunities by meeting their peers; (3) provide students and faculty opportunities to meet face-to-face; and (4) provide a tangible link between the students and the law school to promote their continued relationship to the school. The course is not offered for credit but attendance is required for program completion.

Labor and Employment, MJ

Overview

The Master of Jurisprudence (M.J.) is a post-baccalaureate degree that allows non-legal professionals to enhance career related skills through the study of the laws, governmental policy, and the legal system. This degree is designed to infuse career based knowledge with legal education. MJ-LEL students are chosen from among this nation's incumbent and aspiring human resource professionals, as well as those in management and leadership roles who have personnel responsibilities. The Labor and Employment Law MJ program from Tulane is delivered in a hybrid format through which students complete most of their coursework online and only come to campus once for a multi-day Education Immersion Weekend. The program is ideally suited for accomplished, busy working professionals from companies across the nation.

Human resource professionals — whether they carry formal HR titles or are business managers with personnel responsibilities — serve as the crucial link between an organization's management and its employees. A formal, academic credential in Labor and Employment Law offers the knowledge needed to comply with the myriad regulations established by state and federal law and and teaches the skills required to successfully navigate everything from creating personnel manuals, to engaging in collective bargaining, to administering benefits, to handling sensitive employee relations issues.

The program requires the completion of 30 credit hours, and typically takes two years to complete. This online, non-residential program was designed for human resource professionals and those seeking to transition into HR. Students will obtain additional expertise and familiarity with the extensive and complex body of federal and state regulations that govern most aspects of recruitment, hiring and retention of employees. The MJ-LEL program includes a one-time on-campus Education Immersion Weekend, in addition to its online course curriculum.

Requirements

Curriculum

Semester 1

Students must take both of these required courses:

- Legal Analysis I (2 credits)
- Introduction to Employment Discrimination Law Principles and Strategies (3 credits)

Semester 2

Students must take both of these required courses:

- Legal Analysis II (2 credits)
- Introduction to Labor Law Principles and Strategies (3 credits)

Semester 3

Students must take both of these required courses:

- Employment Law (2 credits)
- IP Issues in the Employment Context (3 credits)

Semester 4

Students must take this required course, plus one 2-credit elective:

- Sex and Gender Issues in the Workplace (3 credits)

Semester 5

Students must take this required course, plus one 2-credit elective:

- Social Media Issues in the Workplace (3 credits)

Semester 6

Students must take this required course, plus one 2-credit elective:

- Capstone (3 credits)

Elective Courses

- Negotiating Skills (2 credits)
- Employee Medical Leaves of Absence (2 credits)
- Developing and Managing the Workforce: Recruitment, Retention, Termination, Retirement and Turnover (2 credits)
- Privacy in the Workplace (2 credits)
- Investigating, Mediating and Arbitrating Employee Complaints (2 credits)

On-Site Education Immersion Weekend (EIW)

All students enrolled in the online MJ program must attend one EIW to be eligible to receive the Masters degree. Students are welcome to attend more than the one EIW session. Each session is composed of two days of academic and other programming at the Law School during the summer. The EIW is designed to (a) supplement the online curriculum by involving students and faculty in discussion of new developments and unique other issues not addressed in the online curriculum; (2) provide students with networking opportunities by meeting their peers; (3) provide students and faculty opportunities to

meet face-to-face; and (4) provide a tangible link between the students and the law school to promote their continued relationship to the school. The course is not offered for credit but attendance is required for program completion.

Doctor of Juridical Science

The Doctor of Juridical Science (SJD) program is a small and selective program for students who wish to make an original, significant contribution to legal scholarship.

Eligibility
An applicant for the SJD program must hold an LL.M. degree or its equivalent either from Tulane University or other accredited American universities or foreign universities that the Law School Graduate Affairs Committee (the faculty admissions committee) has ascertained have good standing among the higher education community in the home country.

Admission
Admission to the SJD candidacy requires the endorsement of the Law School Graduate Affairs Committee. The Committee will examine, along with the student's performance at the LL.M. or the equivalent qualifying degree level, the strength of the candidate's proposal to determine whether the individual has the capacity for advanced legal research and for outstanding scholarship. Strong interest in and support of the proposal and the candidacy of the applicant by a Tulane Law School faculty member who is willing to serve as a supervisor will be an important factor in the Committee's decision. Applicants are strongly encouraged to make every effort to find a supervisor, but they are discouraged from circulating mass letters to the faculty of the Law School.

Course of Study
Each SJD student is assigned a faculty advisor upon admission. During the first semester of enrollment, SJD students take between 10 and 12 credits of coursework. Thereafter, most SJD students work full-time on the dissertation until it is completed. Tulane's expectation is that the final SJD dissertation will be submitted within four years following initial enrollment in the program. The dissertation is to make an original and significant contribution to legal scholarship. Each candidate defends his or her dissertation in an oral examination before a committee of the Tulane Law School faculty, supplemented with other University faculty where appropriate.

Requirements

Tulane Law School also offers the Doctor of Juridical Science (SJD) to a small number of candidates who already hold the LLM as well as the first law degree (JD or LLB or equivalent). The SJD is a research-oriented degree requiring completion of a dissertation which makes an original and significant contribution to legal scholarship.

Each SJD student is assigned a faculty advisor upon admission. During the first semester of enrollment, SJD students take between 10 and 12 credits of coursework. Thereafter, most SJD students work full-time on the dissertation until it is completed. Tulane's expectation is that the final SJD dissertation will be submitted within four years following initial enrollment in the program. The dissertation is to make an original and significant contribution to legal scholarship. Each candidate defends his or her dissertation in an oral examination before a committee of the Tulane Law School faculty, supplemented with other University faculty where appropriate.

Degree Requirements for the SJD Program:

1. In order to obtain the SJD degree, a student must fulfill the following requirements, depending on the student's particular circumstances upon admission to the program:
   a. Students admitted to the SJD program with a Tulane Law School Master's degree awarded five or fewer years prior to admission to the SJD program are exempt from any further coursework requirement.
   b. Students admitted to the SJD program with a Tulane Master's degree awarded more than five years prior to admission to the SJD program must complete an additional 10 hours of coursework with a grade of B or better in each course.
   c. Students admitted to the SJD program with a Master's degree from a law school in the United States (other than Tulane) or from an approved foreign law school in all cases must complete an additional 12 hours of coursework at Tulane.
2. All SJD students, including those exempt from some or all further coursework requirements, must be in residence for at least one year but are only required to pay full-time tuition and fees for at least one semester, typically the first semester of enrollment in the program. Students wishing to enroll in courses outside that one semester may do so on the understanding that they must pay tuition for each additional course they take.
3. Every SJD candidate must write and defend successfully a dissertation which makes an original and significant contribution to legal scholarship. Unless specifically exempted from this requirement for very exceptional circumstances by the Graduate Programs Committee, the dissertation must be complete and the defense must take place within four years from the initial enrollment in the SJD program.
4. Dissertation Committee: The committee will consist of three members one of whom is the supervisor who acts as the chair of the committee. The chair of the committee shall be a tenured member of the faculty. At least one of the other two members of the committee shall be a tenured or tenure-track member of Tulane Law School. Under normal circumstances, all members of the committee will be Tulane Law School faculty members, but there may be cases where it becomes necessary to ask a faculty member from another department of the University or a faculty member at another institution, foreign or domestic, to join the committee. The outside member must, however, be a tenured member of the faculty at his or her home institution. The selection of the dissertation committee will be decided by the student in consultation with the chair of the committee. The committee shall be empaneled at the earliest time after the candidate has taken residence but no later than the end of the first semester of residence. As soon as the committee has been established, the chair of the committee shall notify the Graduate Affairs Committee of the names of the members of the committee. The Graduate Affairs Committee shall transmit the information to the Assistant Dean for Academic Services for record keeping.
5. Lengths of dissertations vary depending on the subject matter and the writing style of the authors, but as a general matter the length of a dissertation ranges between 200-300 pages, including appendix and bibliography. After the dissertation committee has approved the dissertation, the supervisor shall set up a meeting

at which the candidate shall present an oral defense of the doctoral thesis. The dissertation committee will conduct the oral examination. The meeting for the oral defense is open to members of the Law School faculty.

6. Clinical programs, the Trial Advocacy course and externships are not open to SJD students.

SCHOOL OF LIBERAL ARTS

Brian T. Edwards
Ph.D., Yale University
Dean

The School of Liberal Arts at Tulane encompasses the arts, humanities, and social sciences through sixteen departments and nineteen interdisciplinary programs as well as the Carroll Gallery, Shakespeare Festival, Summer Lyric Theatre, and the Middle American Research Institute. Our small classes allow students to be active learners directly engaged with their courses. With a broad array of majors, minors, Master's and Ph.D. programs, students can choose to specialize in a wide number of fields, developing long-standing interests or discovering new passions. Engaged in the liberal arts, students not only learn key skills of writing, analysis, and communication but come to understand better both themselves and the world beyond.

Newcomb-Tulane College Policies

A full description of academic policies for all students in Newcomb-Tulane College (https://catalog.tulane.edu/newcomb-tulane/#academicpoliciestext) can be found in the college's section of this catalog. Students should review these policies thoroughly.

Graduate

Graduate School Policies

A full description of academic policies for all students in Graduate Programs (p. 80) can be found in the Office of Graduate and Postdoctoral Studies section of this catalog. Students should review these policies thoroughly.

School of Liberal Arts Graduate Policies and Information

Upon admission to the School of Liberal Arts, students are held responsible for compliance with the regulations of the School of Liberal Arts and of Tulane University as set forth on the University website and in other current or subsequent official statements. They should familiarize themselves with these regulations.

The University reserves the right to change any of its courses and charges without advance notice and to make such changes applicable to students already registered as well as to new students.

Code of Student Conduct

The university requires of all of its students behavior compatible with its high standards of scholarship and conduct. The Vice President for Student Affairs is responsible for formulating appropriate procedures and regulations concerning student behavior and for the judicial consideration of violations.

Conferring of Degrees

Degrees earned in the School of Liberal Arts are awarded three times a year—in December, May, and August. There is only one commencement program and that is held in May. Candidates for degrees are required to complete an online application for degree form on or before deadline dates.

Continuous Registration Requirements

A student admitted to the School of Liberal Arts in a degree program must be in continuous registration in a degree-granting division of the university until the awarding of the degree. Any student who is not registered for course work in a degree-granting division of the university must be registered in Master's Research or Dissertation Research in order to remain in continuous registration. The student need not maintain registration during the summer.

The continuous registration requirement applies both to resident and non-resident students. Resident students who have not completed minimum course work requirements for their degrees must either enroll for a minimum of three hours per semester (exclusive of Summer Session) or register for Master's Research (9980) or Dissertation Research (9990). Resident or non-resident students who have completed their course work requirements are required to register for Master's Research (9980) (no credit hours) or Dissertation Research (9990) (no credit hours) and pay the 9980/9990 registration fee in order to maintain continuous registration. This entitles students to full student privileges and maintains the student as enrolled in the graduate program. Failure to be so registered is de facto withdrawal and the School of Liberal Arts reserves the right not to readmit. A student who is readmitted is obligated to pay the applicable fee required to maintain continuous registration.

Courses

Courses numbered from 6000 to 6999 are for graduates and advanced undergraduates. Courses numbered 7000 and above are exclusively for graduates. Graduate credit is not given for courses numbered lower than 6000. The credit for each course is indicated in semester hours by a numeral in parentheses. Course offerings and schedules of classes are available on the Office of Registrar's website.

General Requirements

A student admitted to the School of Liberal Arts in a degree program must be continuously registered in a degree-granting division of the university during the academic year (exclusive of Summer Session) in one of the two registration statuses indicated below from the date of first registration until the awarding of the degree, unless the registration is terminated by resignation or by dismissal for academic or disciplinary reasons.

Under exceptional circumstances a student may be granted leave by the dean for up to one year. During such period of leave, a student will be considered in continuous registration without registration or payment of fee.

Full-time Residence Status

To hold a fellowship or scholarship or any of the various kinds of assistantships, a student must be registered in full-time residence status. To determine student privileges and assess tuition and fees, a student in full-time residence status must be registered for at least nine hours of graduate credit per semester, or a combination of course work and equivalent academic activities such as teaching or research.

After the student has completed the minimum hours of course work required for the degree, the student can be classified as a full-time student entitled to full student privileges if the student is registered for master's or dissertation research and the department or program committee certifies that the student is engaged in academic activities equivalent to full-time residence commitment.

Graduate students receiving a teaching assistantship (TA), research assistantship (RA) and/or fellowship from the School of Liberal Arts may have other employment for remuneration during the academic year, provided that this employment does not interfere with their satisfactory academic advancement, as determined by their department and provided that the source of support does not prohibit outside employment. All School of Liberal Arts stipend funded graduate students must receive departmental approval each academic year before engaging in other employment for remuneration during that academic year and generally this other employment may not exceed 10 hours per week.

Part-time Residence Status

For the purposes of determination of student privileges and for the assessment of tuition and fees, a student in part-time residence status is any student who is registered for less than nine hours of graduate credit and who is not certified by the department or the program committee as taking a total academic program.

Grades

Grades in the School of Liberal Arts are reported as follows:

Grade	Description
A	
A-	
B+	
B	

B-	A grade of B- will count as graduate credit but it is considered a weak grade at the graduate level and may be cause for departmental action such as probation of dismissal from the program.
C+	A course in which a grade of C+ or lower is earned cannot be counted for credit toward a degree program in the School of Liberal Arts. Any grade of C+ or lower may be cause for probation or dismissal from the program.
C	
C-	
D+	
D-	
F	
I	Incomplete – The incomplete grade is not to be used as an automatic extension but only for unavoidable delays caused by illness or other emergencies. Incomplete grades must be resolved within the agreed upon timeframe of not more than the next 12 months. The "I" will become a grade of F if the work is not made up according to the schedule set out by the Incomplete Grade Policy https://nextcatalog.tulane.edu/graduate-degrees-professional-programs/graduate-postdoctoral-studies/policies (https://nextcatalog.tulane.edu/graduate-degrees-professional-programs/graduate-postdoctoral-studies/policies/)/. After the work is made up and a grade is posted, the "I", will be removed from the academic record except in the case of an F, in which case it will remain on the academic record after the letter grade "F/I". The letter grade earned is calculated in the GPA as per the normal GPA calculation.
R	Research – In those cases where research or experimentation, or both, cannot be completed within the 30-day limit following the end of the semester, this grade will be given to indicate this circumstance. This grade carries a different meaning from that of IP which is given at the end of the first semester of a two-semester course.
IP	In Progress – Satisfactory progress at the end of the first semester of a year-long course; grades are assigned upon completion of the course.
W	Courses may be dropped without record within six weeks of the first day of classes. Refer to the Academic Calendar for the exact dates each semester. Withdrawals with the grade of W after these dates may be accomplished only if the instructor notifies the dean that the student is passing and recommends permission to withdraw. WF (withdrawn failing) will be assigned if the student's work in a course is unsatisfactory at the time of withdrawal.
S	Satisfactory - In some departments, grades for certain other designated courses may also be reported simply as S or U at the student's option, provided that the option is declared by the student no later than the end of the second week of class.
U	Unsatisfactory - In some departments, grades for certain other designated courses may also be reported simply as S or U at the student's option, provided that the option is declared by the student no later than the end of the second week of class.

Financial Assistance

Financial support for graduate students is awarded by the Dean of the School of Liberal Arts primarily on the basis of academic merit. All PhD and MFA programs and select MA programs provide merit based financial support in the form of tuition scholarships, fellowships and/or part-time teaching or research assistantship and are automatically considered for this support upon submission of the completed application. No additional application for merit based aid is necessary. Candidates for aid must ordinarily present a total, combined GRE score of at least 300 (if GRE scores are required by the department for application) and an undergraduate GPA of 3.2 or better. Ordinarily,

the dean will not award financial aid for the pursuit of a second Tulane degree at the same level, e.g., a second master's degree from Tulane.

To hold a fellowship or scholarship or any of the various kinds of assistantships, a student not only must be registered in full-time residence status but also must maintain an academic level of performance satisfactory to both the department and to the dean. Graduate students receiving a teaching assistantship (TA), research assistantship (RA) and/or fellowship from the School of Liberal Arts may have other employment for remuneration during the academic year, provided that this employment does not interfere with their satisfactory academic advancement, as determined by their department and provided that the source of support does not prohibit outside employment. All School of Liberal Arts stipend funded graduate students must receive departmental approval each academic year before engaging in other employment for remuneration during that academic year and this other employment generally may not exceed 10 hours per week.

The completed application materials must be received by the department deadline. (Applicants are advised to check with department website and the main School of Liberal Arts application website for the relevant deadline.) The general application deadline for the School of Liberal Arts is February 1 but deadlines can vary by department and many have deadlines in January. Notice of awards will be sent out with admission decisions which is generally 6-8 weeks after the close of applications. Award decisions cannot be made on incomplete applications.

Loan Funds (need based)

The university offers need-based financial assistance to qualified students who are U.S. citizens or permanent residents through Federal loan programs. The Office of Financial Aid has information and forms you may need to apply for loans, grants, and other funds that might be available to graduate students. If you are interested in applying for a loan, it is important that you visit the Office of Financial Aid website.

Veterans' Benefits

The Office of the University Registrar fulfills the university's obligations to students receiving benefits from the Veterans Administration. To apply for benefits, students should contact the Veterans Administration Office in their hometowns for a Certificate of Eligibility, preferably before registering in a college or university. The Veterans Administration sends Certificates of Eligibility directly to students who must then bring them to the Office of the University Registrar. Students transferring from other colleges or universities should submit Change of Program or Place of Training applications at their hometown Veterans Administration Office. Student enrollments will be certified to the Veterans Administration after registration for the semester.

Dependents may qualify for assistance under the Dependents Educational Assistance (DEA) program if either parent has died as a result of active wartime service in the armed forces. Eligible students should apply to their hometown Veterans Administration Office. Certification procedures are similar to the process for veterans. The performance standards to continue to receive VA benefits may be different from the academic standards described elsewhere in the catalog. Students should direct specific questions to the Office of the University Registrar.

Foreign Exchange Program

The Tulane University School of Liberal Arts participates in an exchange program with the Free University of Berlin, Germany for two graduate students each year. this program offers the exchange student a stipend plus tuition for one academic year. Transportation to and from Europe is the responsibility of the student. Applicants interested in this program can obtain additional information from the School of Liberal Arts Dean's office.

Medical Excuses

Students are expected to attend all classes unless they are ill or prevented from attending by exceptional circumstances. Instructors may establish policies for class attendance, which are announced at the beginning of the semester. Students who find it necessary to miss class must assume responsibility for making up the work covered during that session, including quizzes, examinations, and other exercises; they also are responsible for obtaining notes on material covered in lectures or other class sessions.

Students are responsible for notifying professors about absences that result from serious illnesses, injuries, or critical personal problems. However, medical excuses are not issued by the University Health Service, except in instances of illnesses or injuries that involve hospitalization. In cases of a serious injury, illness or critical personal problem, students might wish to consider taking a leave of absence for the semester and should discuss this option with their advisor and the Office of Student Affairs.

Programs of Study

For master's degree programs, the minimum requirement is 30 credit hours of coursework. For master's programs with a thesis requirement, a minimum of 24 credit hours of coursework is required and the remaining hours to total 30 hours are fulfilled via thesis credit hours. For M.A. and M.S. programs, one academic year must be in full-time residence status or its equivalent part-time study in this School of Liberal Arts.

For M.F.A. programs, the resident study requirement is the same, except that upon the recommendation of the student's department or program chair and approval of the dean, work taken in Tulane Summer Session may be considered resident study. The minimum credit hours for MFA degrees vary by discipline and students should refer to the individual department websites and consult department advisor for details.

For Ph.D. programs, the minimum requirement is 48 semester hours and a dissertation. At least one academic year must be in full-time residence status but some PhD programs required a longer in-residence status.

For maximum periods of time to complete requirements for any of these degrees, see Tenure for Degree Students.

The graduate student's entire program of study will often be within a single department. In some cases, however, a student may take some of the work outside the major department with the approval of the chair of both the major department and the other department or departments concerned. Occasionally, the needs of individual students may require

a special interdisciplinary Ph.D. program. For further information see Special Interdisciplinary Programs.

Quality of Work Requirements

A minimum average quality-point ratio of 3.0 (B) must be maintained by a student in the School of Liberal Arts. In reviewing records, a unit of B- is compensated by a unit of B+, the two being considered the equivalent of two units of B.

If a student receives one B- grade, the student is immediately considered for probation by the dean in consultation with the appropriate department. If a student receives two grades of B-, or one grade less than B-, during his/her tenure in the School of Liberal Arts, the student is placed on probation and considered for dismissal by the dean in consultation with the appropriate department. The terms of the probation are to be worked out by the department in consultation with the dean. It is the department's responsibility to report to the dean's office any student not making reasonable progress towards the degree.

The above guidelines are to be applied to either master's or doctoral degree candidates. It is also understood that these are minimum standards; some departments may impose more strenuous standards. University procedures for grade and other academic complaints are available on the School of Liberal Arts/Graduate Programs website. The student must first discuss the complaint with the professor, then, if dissatisfied, submit a written complaint to the department chair following the procedure for academic complaints.

Registration for Undergraduate Credit and Provisional Graduate Credit

An undergraduate at Tulane University with a grade point average of at least 3.3 in his major program may register, normally in the senior year, for up to six credits of 6000 or 7000 level courses, for credit toward a baccalaureate degree. Written recommendation of the course instructor, advisor, chair of the major department, the Dean of Newcomb-Tulane College, and approval of the Dean of the School of Liberal Arts are required.

Graduate credit for these 6 credit hours of 6000 or 7000 level classes taken for credit toward an undergraduate degree, if passed with B or better on the School of Liberal Arts graduate grading scale, may be awarded, when the student is admitted to a graduate program in the Tulane School of Liberal Arts. The student must obtain a recommendation from the chair of the graduate department and approval of the School of Liberal Arts dean for these credit hours to apply to the graduate program via a Transfer of Credit form.

In addition to the 6 credits described above which are allowed to count toward both the undergraduate and graduate degree, a senior who completes all baccalaureate requirements before the end of the senior year and intends to enter the School of Liberal Arts at Tulane as a graduate student may apply for provisional graduate credit in up to, but not more than, 6 additional credits of 6000 and 7000 level courses beyond the credits needed for the baccalaureate. These credits may not be counted as credit toward the undergraduate degree and must be designated as such prior to certification of the undergraduate degree. Graduate credit for such work, if passed with B or better, will be awarded when the student is admitted to full graduate status in the School of Liberal Arts, upon recommendation of the graduate department chair and approval of the dean. These provisions do not apply to transfer of credits to or from other graduate institutions.

Registration Policies and Procedures

Students register with GIBSON ON-LINE. Gibson online is a gateway to online services such as registration, grades, degree audit, My Tulane, accounts receivable, etc. A schedule of classes, course listings, academic calendars, grade access, and other registration information can be found on the Office of the Registrar's website: http://registrar.tulane.edu/ .

All admitted students are eligible to register with Gibson Online. New incoming students will receive an e-mail message from technology services once they are accepted and confirm. The email message will contain a Tulane identification number and a Tulane email address with instructions on how the student can to set up a password for access to Tulane e-mail and Gibson. All students must confirm their registration before the end of the first week of class. Bills for tuition and fees are sent electronically . Students assume financial obligations for their courses upon registration.

Students who are not registering for course work must maintain continuous residence or non-residence registration during fall and spring semesters and should register for either Master's Research (9980) or Dissertation Research (9990) via Gibson Online. After registration has closed for the semester on Gibson Online, students must add a course using a Drop/Add form located on the Registrar's Office website.

Change of Courses

Students wishing to add or drop courses should consult the academic calendar on the Registrar's Office website for deadlines. Failure to make schedule adjustments promptly and accurately may result in financial or academic penalties.

Change of Departmental Program

A student who has been admitted to a degree program in one department and wishes to transfer to a program in another department must obtain the approval of the chair of both departments concerned and the approval of the Dean of the School of Liberal Arts before the change is official. Students wishing to transfer to another department initiate the process by submitting an Interdivisional Transfer Form which is available on the Registrar's Office website form library.

Required Withdrawal and Denial of Enrollment

A student may be required to withdraw from any course or from the university, temporarily or permanently, for any of the following reasons:

1. Work below the standard specified by the School of Liberal Arts.
2. Violation of the honor system or other misconduct.
3. Possibility of danger to the health of the student or to other students if enrollment is continued.

The university reserves the right to forbid any student's continued enrollment without assignment of reason. The School of Liberal Arts, however, will provide a student with a statement of reason in writing from the department. An appellate procedure has been established in cases involving academic performance or possible infringement of academic freedom. The School of Liberal Arts also has appellate procedures in cases involving non-reappointment of fellowships or scholarships when the formal terms of the first award have given reasonable expectation of renewal. Such procedures may also apply to

cases in which a graduate, teaching, or research assistant is relieved of a position before the end of the term of the appointment or is not reappointed when the formal terms of the first appointment have given reasonable expectation of reappointment.

Resignation from the School of Liberal Arts must be made in writing to the Dean of the School of Liberal Arts. The student who finds it necessary to withdraw or to resign should report to the Graduate Programs office in the School of Liberal Arts to complete a withdrawal or resignation form.

Special Interdisciplinary Programs

In addition to the regular disciplinary programs leading to the Ph.D. degree, the School of Liberal Arts recognizes that individual student needs may require interdisciplinary programs. Frequently, these can be arranged by a candidate's major department simply by incorporating courses or fields from other departments in the candidate's program. The School of Liberal Arts also recognizes that a special interdisciplinary Ph.D. program may occasionally become desirable to meet the educational and career needs of an individual student using university resources not reflected in any single department.

The following provisions are made for the development, approval, and supervision of special programs leading to the Ph.D. degree:

A Special Interdisciplinary Program is a formal ad hoc interdepartmental program leading toward the Ph.D. It will consist of work taken in two or more departments within the School of Liberal Arts. Although the specific requirements for each ad hoc program will differ, the formal requirements for the Ph.D. are: a minimum of one-year residence, a minimum of 48 semester hours of course work, a general examination, the dissertation, and the final examination. The maximum number of credits that may transfer to an interdisciplinary Ph.D. program is 24 semester hours.

For such a program to be feasible at least one of the disciplines included in the interdisciplinary PhD proposal must be a department that offers a PhD degree and there must be at least one member of the faculty who is a specialist in the interdisciplinary area of the student's interest and a sufficient number of faculty in at least two departments who are prepared to supervise work in it. To determine feasibility, an eligible student should consult with the appropriate faculty before making a formal application proposal.

To be eligible for such a program, a student must be admitted to an existing PhD program, have completed at least one semester of full-time graduate work in one of the related disciplines and be in good standing in a Tulane School of Liberal Arts graduate program. A student currently enrolled in a master's program in the School of Liberal Arts must complete the master's program before acceptance to the Interdisciplinary PhD program will be considered. A student currently in residence in the Tulane School of Liberal Arts initiates the process by petition to a qualified member of the faculty citing the student's own interest in and qualifications for the Interdisciplinary PhD program. If the professor considers the student qualified for work in the area of interest, the professor shall become the major advisor-pro tem and shall give formal notification to the student, the appropriate department chairs, and the Dean of the School of Liberal Arts or Dean's designee.

Upon notification, the dean appoints a committee consisting of at least three members of the faculty of Liberal Arts recommended to the dean by the major advisor in consultation with the student and the faculty of those departments concerned. Note: If the committee requires graduate faculty that are not members of the School of Liberal Arts faculty, the committee must consist of a minimum of 3 members of the School of Liberal Arts faculty plus the additional members.

Normally, the major advisor acts as chair of this committee. The student in collaboration with the special committee draws up a study plan/proposal indicating research facilities and setting forth requirements including fields, courses, teaching and/or research requirements and examinations; probable dissertation topic; and the proposed title of the degree (e.g., Comparative Literature, or Linguistics). The chair of the special committee forwards the study plan/ proposal, explanation of why the proposed course of study could not be accomplished solely through the candidate's major department and a statement of the student's qualifications to the chairs of those departments concerned for comment and approval and then to the Dean of the School of Liberal Arts.

The Dean of the School of Liberal Arts then presents the proposal and any views of departments concerned to the Graduate Studies Committee for its consideration. At least 12 hours of course work must be taken after the special interdisciplinary Ph.D. proposal is approved by the Graduate Studies Committee. Approval by the Graduate Studies Committee authorizes the student to follow the special interdepartmental program.

The special committee constitutes the student's qualifying examination committee, his/her dissertation committee, and performs all the functions normally carried out by departmental faculty in a regular Ph.D. program. The special committee chair serves as the chief sponsor of the candidate's Ph.D. dissertation and performs functions normally carried out by a department chair (supervision of financial assistance in cooperation with the Dean of the School of Liberal Arts and the chairs of those departments concerned, coordination of faculty, supervision of the student's academic work, overseeing qualifying examinations, and recommendation for formal admission to candidacy for the Ph.D.).

Tenure for Degree Students

Tenure is the maximum period of time normally permitted for the completion of all requirements for a degree, and it is determined on the basis of consecutive academic years from the date of registration for graduate study at Tulane or at another institution. Tenure is not affected by residence status. An official, approved leave of absence/ planned education leave will not count in the calculation of years to degree. Under certain circumstances, upon written request by the student and the recommendation/justification of the chairperson of a student's department or program committee, the dean may extend tenure, but a student whose period of graduate study is unduly prolonged or interrupted may be required to perform additional work. Tenure regulations are applicable to all degree students, regardless of date of first registration.

Master's Degrees

Maximum tenure is five years for a terminal master's degree, although most departments stipulate much earlier completion of all requirements for the degree in their master's programs.

Ph.D. Degree

Tenure is seven years for completion of the PhD degree. The maximum time limit within which a student, under normal circumstances, is required to take the qualifying examination and to be admitted to candidacy is four years. The dissertation must be completed within three years after a student has been admitted to candidacy for the degree. Under certain circumstances, upon submission of a written justification for extension from the department chairperson or dissertation committee director, the dean may extend tenure beyond seven years. A student whose period of graduate study is unduly prolonged or interrupted may be required to perform additional work.

Beyond the seven-year period of tenure, a student who has neither completed the requirements for the degree nor received an extension from the dean will no longer be considered a degree candidate. Tenure regulations are applicable to all degree students, regardless of date of first registration.

Transfer Credit

Acceptance of graduate credit for work done at other graduate institutions or in another division of Tulane University must be approved by the department concerned and by the dean. In general, up to 12 semester hours of transfer credit may be accepted toward a master's degree, and up to 24 semester hours of transfer credit may be accepted toward the Ph.D. degree.

To be considered for transfer credit, graduate work done at another institution or in another division of Tulane University must carry a grade of B or better and must have been completed no more than four years from the date of first registration for graduate work if applied toward a master's degree and no more than six years from the date of first registration for graduate work if applied toward a Ph.D. degree. Only in unusual cases, upon the recommendation of the chair of the student's department, may the dean approve for transfer credit courses taken earlier.

The decision concerning the acceptance of all transfer of credit to the record of a graduate student will not be reached until after the student has completed at least one semester of successful study in the School of Liberal Arts. After a semester (nine hours) of study at Tulane, the student should petition the department to recommend the transfer of credit to the School of Liberal Arts.

Tuition and Fees

Tuition and fees are due at the time of registration. Changes in charges for tuition, fees, housing, and meals will probably continue to occur, depending upon the costs incurred by the university to provide quality education. The university will make every effort to keep increases at a minimum and provide as much advance notice as possible. It should be noted that tuition never has covered more than a portion of the cost of education. The difference is made up from endowment and gifts to the university.

Refunds

The deadlines for the refund of 100, 75, 50, or 25 percent of tuition in any semester are given in the academic calendar. Refunds are made only when withdrawals are official. Additionally, full tuition is refunded only if the dean recommends the refund. University fees, including the student activity fee, are not refundable.

Financial Obligation to the University

No diploma or certificate of credit is given to a student who is in default of any payment due to a division of the university.

Unified Code of Graduate Student Academic Conduct

The School of Liberal Arts expects students to conduct their academic endeavors with honesty and integrity. Activities covered by the Unified Code of Graduate Student Academic Conduct (https://ogps.tulane.edu/sites/default/files/Unified%20Code%20of%20Graduate%20Student%20Academic%20Conduct%20-%202024%20Final_0.pdf) include course work, examinations, and research. This code outlines individual responsibilities as well as procedures to be followed if there is a question concerning a student's academic honesty or integrity. These values are held in common by all departments and enforced by the sanctions of the Dean of the School of Liberal Arts. All students enrolled in the School of Liberal Arts are subject to these regulations and should be familiar with this code. Principles and activities not covered by this code may fall under the purview of university or departmental research and/or ethics committees. Questions concerning jurisdiction should be addressed to the Dean of the School of Liberal Arts.

Undergraduate

Newcomb-Tulane College Requirements

Newcomb-Tulane College General Education Curriculum

The Newcomb-Tulane College Core Curriculum allows students to explore a wide-range of disciplines and embodies the mission and values of the College by allowing students to have flexibility in their core curriculum courses while exploring a full-range of courses.

The core curriculum—which is composed of a minimum of 30 credits—is divided into three parts: proficiency requirements, distribution of knowledge requirements, and additional requirements. To ensure that students experience the breadth of knowledge at the collegiate level, AP, IB, and Cambridge A-Level courses can be used to satisfy proficiency requirements only in Formal Reasoning and Foreign Language.

Courses will be designated as satisfying the distribution requirements according to the content and methodology rather than the departmental affiliation of the course.

The new core curriculum general education requirements went into effect with the entering class of 2018.

Courses proposed to satisfy core requirements will be ratified by the Newcomb-Tulane Curriculum Committee.

Proficiency Requirements

Writing Skills (2 courses and 6 credits)

- Tier 1: Freshman writing (ENGL 1010 Writing or ENGL 1011 Writing for Academic Purposes) unless the student is exempt because of their score on the A.P/I.B./Cambridge-A level exams.
- Students receiving exemption from ENGL 1010 Writing/ENGL 1011 Writing for Academic Purposes are required to take an approved writing class during their freshman year. Approved courses will have at least 1/3rd of the grade based upon writing (excluding in class exams), but no revision is required.
- Tier 2: One additional writing course at the 2000 level or above taken from an approved list. Approved courses will have at least 1/3rd of the grade based upon writing (excluding in class exams), to include revision and re-evaluation by the instructor.
- Students are encouraged to take the Tier-1 writing course prior to taking the Tier-2 writing course; however, students are not prohibited from taking the Tier-1 and Tier-2 courses simultaneously.

Note: creative writing courses cannot be used to satisfy the writing proficiency requirement.

Formal Reasoning (1 course and 3 credits)

- One course in mathematics or symbolic logic from an approved list.

Foreign Language (0-3 courses)

The foreign language proficiency requirement is achieved in any of the following ways:

- A passing grade in a course at the 2030 level (3rd semester of Tulane 4-credit hour Foreign Language or ASLS coursework) or higher in accordance with assigned placement level.
- A passing grade on a Tulane-administered proficiency exam for students with assigned placements above the 2030 level. Students who do not successfully pass the proficiency exam will be automatically placed and must successfully complete a course at the 2030 level.
- A passing grade in a course at the level of placement above 2030.
- Advanced Placement score of 4 or 5 **in a foreign language test as noted in the AP/IB chart**
- Higher-Level IB score of 5 or higher **in a foreign language test as noted in the AP/IB chart**
- Cambridge A-Level score decided by the appropriate language department.
- SAT II achievement test of 640 or higher **in a foreign language.**

Note: This requirement is waived for students in B.S.E. programs.

Distribution Requirements

(A course can satisfy only one of the distribution areas.)

Mathematics and the Natural Sciences (2 courses including 1 lab science course and 7 credits)

(Those completing the B.F.A. degree need only complete 1 course with lab)

Social and Behavioral Sciences (2 courses and 6 credits)

Textual and Historical Perspectives (2 courses and 6 credits)

Aesthetics and the Creative Arts (3 credits), which can be fulfilled in 1-3 courses.

Additional Core Requirements

The First Year Seminar (p. 77) (1 course, 1-3 credits)

This requirement can be satisfied by a Tulane Interdisciplinary Seminar (TIDES) course or Colloquium course (COLQ 1010 Freshmen Colloquium Seminar (1-3 c.h.) or COLQ 1020 Freshman Colloquium (1-3 c.h.))

Public Service (2 courses)

Students develop their commitment to civic engagement through the completion of service learning courses experiences. All students will complete their public service through service-learning courses, an approved public service internship, or an approved public service research experience. These courses can also be used to satisfy other areas of general education.

- To meet this requirement for graduation, all students must complete two semesters of service. One of these semesters must be at the 2000 level or above. The first experience should be completed by the 2nd semester of the sophomore year.
- Service Learning courses require a minimum of 20 hours of service per semester. Those service-learning courses designated as requiring a minimum of 40 hours of service carry one additional credit hour. No course may carry more than 4 credits.

Race and Inclusion (1 course, 3 credits)

One course and 3 credits. Courses that fulfill this requirement will focus on the intersections of race with power, privilege, equity, justice, and/or inclusion and will focus at least 60% their content on these issues in the United States. These courses may also be used to satisfy proficiency or distribution core curriculum requirements.

Global Perspectives (1 course, 3 credits)

One course and 3 credits. Courses that fulfill this requirement will focus at least 60% content with stated objectives to develop historical, cultural, and societal knowledge of an area beyond the United States. These courses may also be used to satisfy proficiency or distribution core curriculum requirements.

For more information please visit the Core Curriculum website (https://college.tulane.edu/core-curriculum/).

School of Liberal Arts Undergraduate Requirements

A liberal arts education helps students develop and improve necessary skills of critical thought and analysis, while learning to express complex analytical arguments clearly, concisely, and coherently in written prose and oral presentations. The essence of a liberal arts education is that it combines both breadth and depth. Breadth assures that students have a basic exposure to the diverse subjects of the humanities, social sciences, and sciences, with their distinctive ways of defining issues, thinking about problems, assessing evidence and reaching conclusions. Breadth also ensures that students have some understanding of the fine arts and how such works might be understood. Depth requires students to gain a deeper understanding of a discipline and its modes of thought, with all the subtleties and complexities that this entails, while learning how difficult it is to attain anything approaching true mastery.

Students completing a BA or BFA degree in the School of Liberal Arts must complete a minimum of 120 credits, 66 of which are above the 1000-level with a cumulative grade point average of at least 2.000 and a major GPA of at least 2.000. Students completing majors in Anthropology, Economics, or Linguistics may elect to complete a BS or BA degree. For information on the BS requirements, consult the relevant departmental section of this catalog.

School of Liberal Arts Writing Intensive Requirement

Writing is the most important skill that a student masters in a liberal arts education. In order to assure that all of its students have achieved a high level of writing proficiency by the time they graduate, the School of Liberal Arts requires them to complete the Tier II writing requirement of the general core curriculum via a writing-intensive course within the School. Students may satisfy this requirement by taking a course that is designated “writing-intensive” in the course schedule. If a course is to satisfy the writing-intensive requirement, it must require

1. That writing equals at least 50% of the total assessment or 3500 words (15 pages) of expository, analytical writing, whether distributed among a number of short assignments or fewer, longer papers. Creative and technical writing assignments do not qualify for inclusion. Only School of Liberal Arts courses may be used to fulfill this requirement.
2. Sole authorship by an individual student.
3. That students will revise and resubmit their writing after instructor feedback.

Students are encouraged, but not required, to satisfy the writing-intensive requirement with a course in their major. Students may satisfy this requirement with a capstone course in the major, as long as the writing requirements of the course achieve the defined minimum for a writing-intensive course, or with a senior honors thesis. The S/U option may not be used to satisfy the writing requirement.

Majors

A major field of study gives each student the opportunity to explore a single area of inquiry in depth and to gain the self-confidence derived from mastery of a subject. Majors must be selected no later than the beginning of a student's fourth semester of college study. Students may elect to complete more than one major. They must complete all courses for each major. Three courses can overlap with additional majors. At least half of the course work required for majors must be completed at Tulane University.

Coordinate Majors

Some coordinate major programs also are available. These coordinate majors require a primary undergraduate major. Some coordinate majors restrict the choice of primary major. Students must complete all courses for each major. Three courses can overlap in the two majors.

Self-Designed Majors

A student with a 3.5 cumulative grade-point average may construct a major program by grouping courses from different academic departments. Such self-designed majors must include at least 10 courses, more than half of which must be at the 3000-level or above; no more than two courses below the 3000-level may be taken in any one department. A self-designed major cannot be a student's primary major. A student wishing approval of a self-designed major must prepare a proposal including the title of the major, proposed list of courses, rationale, and appropriate departmental approval. This proposal must be submitted for review to the school's Committee on Undergraduate Academic Requirements before the end of the student's sixth semester. As these proposals often require revision and resubmission, they should be submitted earlier than this deadline.

Minors

The School of Liberal Arts allows students to complete one or two minors. The minor is optional and designed to give structure to the study of a secondary field of interest chosen by the student. Students who elect to complete the requirements for a minor must earn a grade point average of at least 2.000 in courses counting toward that minor. No courses counting toward the student's first minor will count toward the student's second minor. Individual departments may have additional restrictions on major-minor overlap. Students should consult the department listings for additional information.

Internships

Some departments offer internships for academic credit as part of the major. An internship combines a relevant academic component with experiential learning. The academic component may, for example, consist of a term paper, a number of short papers, or discussions of a number of books. Internships ordinarily are open only to those students completing a major in the department that will award the credit. Students participating in internships register for Internship Studies (course numbers 4560, 4570) within the appropriate department after having made initial arrangements with a professor who will sponsor the internship. Registration is completed in the academic department sponsoring the internship. A student may not take a salaried position outside the university while earning credit for an internship, except where such an arrangement is required by the cooperating organization for insurance purposes. If a student must take a salaried position for this reason, a letter to this effect from the cooperating organization must be filed with the chair of the sponsoring department prior to the end of the add period.

Only one internship may be completed each semester. Students may earn a maximum of six credits toward the degree from internships. The sponsoring professor will assign a grade for the internship at the close of the semester after evaluating its academic and experiential aspects. Internships offered through departments in the School of Liberal Arts are open only to juniors and seniors in good standing.

An alternative internship experience is offered to students through the office of the Dean of Newcomb-Tulane College. This internship was created to accommodate students seeking internships with organizations requiring that interns earn credit for their experience. INTR 1990 carries one credit, which will apply toward the degree but will not apply toward any proficiency, distribution, major, or minor requirement. Only one credit of INTR 1990 may be applied toward the degree. INTR 1990 must be taken on a satisfactory/unsatisfactory (S/U) basis and will count as one of the ten allowable (S/U) credits. Students who have completed fewer than 30 credits may not register for this course. Students desiring to register for INTR 1990 must receive approval from the associate dean of Newcomb-Tulane College.

Graduate

General Graduate School Requirements

A full description of Master's (https://catalog.tulane.edu/graduate-degrees-professional-programs/graduate-postdoctoral-studies/masters-programs-requirements/) and PhD Degree (https://catalog.tulane.edu/graduate-degrees-professional-programs/graduate-postdoctoral-studies/phd-program-requirements/) requirements for all students can be found in the Office of Graduate and Postdoctoral Studies section of this catalog. Students should review these policies thoroughly.

School of Liberal Arts Graduate Requirements

Master's Degree Requirements

Degree of Master of Arts

For the Master of Arts degree with thesis, the minimum course requirement is 24

semester hours plus thesis research. For the Master of Arts without thesis, the minimum course requirement is 30 semester hours. (Certain departments require a minimum of 36 hours). A reading knowledge of one modern foreign language pertinent to research in the discipline may be required by the department.

Degree of Master of Science
The requirements for this degree are generally the same as those stated for the Master of Arts degree, but some programs have variations. The Master of Science is only awarded in the School of Liberal Arts to students in the Economics PhD program who have completed the MS requirements but have not yet completed the dissertation and other requirements for PhD degree. See Courses of Instruction for specific information

Degree of Master of Fine Arts
The Master of Fine Arts degree is given through the Departments of Art, Music, and Theatre and Dance. The Department of Music requires a minimum of 30 semester hours; the Department of Art requires a minimum of 48 semester hours; and the Department of Theatre and Dance requires a minimum of 48 semester hours. A reading knowledge of a foreign language is not required. It is expected that most students will spend a minimum of two years of graduate study in fulfilling the requirements for the Master of Fine Arts degree but maybe longer for some programs. For variations in departmental requirements see the individual department website.

Thesis Requirements for Master's Degrees
The subject of the thesis for all master's degrees must be in the field of major study and must have the approval of the professor by whom the thesis is to be directed. The finished thesis must have the approval of a committee, normally consisting of a minimum of three faculty members in the department. The director of the thesis will serve as chair of the thesis committee. At the request of the director, a member of some other department may be added to the committee.

The original typescript of the thesis must be deposited with the Dean of the School of Liberal Arts. The thesis must be on thesis quality paper (100% cotton, acid-free). The title page must contain the subject of the thesis, the date on which it was submitted, the department, and the signature of the candidate, under which should be typed the candidate's full legal name. Signatures of each of the examining committee members, with the member's full legal name typed underneath, should also be listed in the lower right-hand corner. A full list of authorities and books consulted and a short biographical sketch must be appended.

The thesis must also be submitted electronically to ProQuest/UMI and to the Tulane Digital Repository for publishing and cataloguing in the Library of Congress.

The decision to copyright the thesis must be made at the time the student submits the dissertation to ProQuest / UMI. Copyright may be obtained through ProQuest/UMI and fees for the copyright can be paid at the time of on-line submission.

A basic style sheet for use in preparing theses is available on the School of Liberal Arts Graduate Programs website and on the Howard Tilton Library website under graduate resources. More detailed instructions for the preparation of the theses may be obtained from A Manual of Style, University of Chicago Press; the M.L.A. Style Sheet; or A Manual for Writers of Term Papers, Theses and Dissertations by Kate L. Turabian, available at the Tulane University Bookstore. The department chair will advise which guide is preferred.

Graduate students who are nearing the completion of their degree requirements should check the School of Liberal Arts website for deadline dates that apply for graduation and for the final submission date of theses for graduation.

Doctor of Philosophy Degree Requirements

Course Credit, Exams, Prospectus and Dissertation
Students undertaking work for the degree of Doctor of Philosophy should understand that this degree is awarded not for an accumulation of course credits only, but for superior attainment and accomplishment. Ordinarily the student is expected to finish the course requirements in two full years of graduate study. The student must demonstrate in independent study and research, as evidenced in the dissertation, the ability to carry out an original investigation in the chosen field. A minimum of one year full-time study in residence at Tulane University is required.

Admission to Candidacy
Admission to the School of Liberal Arts in a Ph.D. program does not constitute official admission to candidacy for

the Ph.D. To be admitted officially to candidacy for the Ph.D., a student must have completed course requirements, satisfied foreign language and research requirements, passed general examinations, and submitted a prospectus of the dissertation approved by the student's dissertation committee and the dean. The recommendation for admission to candidacy is made by the department and must bear the signatures of both the chair of the student's dissertation committee and the chair of the department. The recommendation for admission to candidacy must be submitted to the School of Liberal Arts no later than September 15 for those expecting to receive the degree in December of that year, or December 15 for those expecting to receive the degree in May of the following semester, or March 15 for those expecting to receive the degree in August. The admission to candidacy form is located on the School of Liberal Arts website.

Course Requirements
The minimum course requirements for the PhD are usually 48 semester hours; however, students should refer to the specific departmental requirements. Some departments/programs will require additional hours of course work.

Students ordinarily must complete the requirements for the Ph.D. degree within seven years from the date of matriculation in the School of Liberal Arts. Only in unusual cases, with the approval of the department chair and Dean of the School of Liberal Arts, will credit be approved for courses taken more than six years before first registration for graduate work.

Dissertation
The dissertation not only is an essential part of the candidate's degree work but is the appropriate culmination of the Ph.D. degree. The dissertation is the necessary demonstration that the candidate is worthy of taking a place among research scholars in the discipline. It must demonstrate not only mastery of the literature of the subject, but also the ability to carry on independent research that results in a genuine contribution to knowledge or an original interpretation of existing knowledge, and it must do so in a literate and lucid fashion. The dissertation committee shall determine the acceptability of the dissertation before it is submitted to the School of Liberal Arts in final form. (For deadline dates for the appropriate award of degrees, see Graduation Deadlines.) Acceptability, however, is not final approval. The candidate must defend the dissertation successfully before the degree is awarded. For details, see Final Examination.

The dissertation should be printed on 100 % cotton, acid-free paper. The title page of both the abstract and the dissertation must contain the subject of the dissertation, the date on which it was submitted, the department and the signature of the candidate, with the candidate's full legal name typed underneath. Signatures of the examining committee members should be listed in the lower right-hand corner; the full name of the committee chair and each member must be typed under the signature. A full list of authorities and books consulted and a short biographical sketch must be appended. A basic style sheet for use in preparing theses and dissertations is available on the School of Liberal Arts website and on the Howard Tilton Library website under graduate student resources. More detailed instructions for the preparation of the dissertation may be obtained from A Manual of Style, University of Chicago Press; the M.L.A. Style Sheet; or A Manual for Writers of Term Papers, Theses and Dissertations, by Kate L. Turabian. The department chair will advise which guide is preferred.

On or before the deadline date for dissertation submission, the student must hand into the School of Liberal Arts office the final, original copy of the dissertation (unbound), and one abstract of the dissertation (not more than 350 words), electronically submit the dissertation to ProQuest/UMI and to the Tulane Digital Repository for publishing and cataloguing in the Library of Congress and complete the on-line Survey of Earned Doctorates. More details and links to the appropriate websites for submission and survey completion are on the School of Liberal Arts graduation requirements web page.

The decision to copyright the dissertation must be made at the time the student submits the dissertation to ProQuest / UMI. Copyright may be obtained through ProQuest/UMI and fees for the copyright can be paid at the time of on-line submission.

Final Examination
All candidates must take a final examination for the Ph.D. degree. Normally this examination consists primarily of an oral defense of the dissertation, but it may be extended to include course material or any other relevant material at the discretion of the examining committee.

This examination should be scheduled after the dissertation is in its final form and reviewed and approved by the committee but before it is printed on the quality paper. The examination must be held before the deadline for submission of the dissertation to the School of Liberal Arts. The requirement for final examination will not be waived, unless the candidate and the department can establish a case of hardship in extremis, subject to review and approval of the dean and the Graduate Studies Committee.

The final examination committee is appointed by the department chair and approved by the dean; it must include the members of the dissertation committee but may include any other members of the Graduate Faculty, including members of other departments or other universities. Upon successful defense of the dissertation and passing of Final exam, the dissertation committee must send a defense of dissertation/recommendation for degree to the School of Liberal Arts Dean's Office.

General Examination
Upon meeting the foreign language requirement or requirements (and no earlier than the semester in which the normal course requirements for the Ph.D. are to be completed), the student shall undertake the general (preliminary) examination. Normally this examination is taken by the end of the second year of graduate study or at the beginning of the third year. A student who fails to take the test within a reasonable length of time will be advised by the department not to continue graduate study.

The test is a comprehensive examination over the student's field of study. It covers the student's subjects and courses and is a rigorous test of scholarly competence and knowledge. The examination also tests acquaintance with the scholarship in the field. Finally, the examination affords the examiners the basis for constructive recommendations on any subsequent program of studies to be undertaken by the student. It should be noted that in some departments cumulative examinations are used in lieu of the general or preliminary examination.

Language Requirements
Language requirements are set by the department or the program faculty. Most PhD programs require documented proficiency in at least one foreign language but some require two languages.

Prospectus
Until a student's prospectus has been approved by the prospectus committee and the dean, dissertation work has no official status. Normally, a student will not submit a prospectus until the student has completed course requirements, satisfied the foreign language and research requirements, and passed the general examination. Upon the recommendation of the department, however, the student may submit a prospectus any time after completion of one year of full-time residence. The student should check with the department and his/her prospectus committee regarding the content and format of his/her prospectus. After the prospectus has been approved by the department and the prospectus committee, a 3-5 page abstract of the prospectus should be submitted to the dean. The recommendation for approval of the prospectus form serves as the cover sheet and should accompany the abstract of the prospectus. The form is located on the School of Liberal Arts website. The abstract should be approximately three to five doubled-spaced typewritten pages. The introduction of the prospectus should contain a summary of earlier work on the problem. The body should include an orderly description of the plan for the investigation. The conclusion should clearly state the anticipated nature of the investigation results. Major sources of information should be indicated and a selective bibliography attached.

Prospectus and Dissertation Committee
A student should choose a dissertation topic or project in consultation with a tenured/tenure-track faculty member at Tulane University who will agree to direct the dissertation. With a topic or project agreed upon, a committee of at least three tenured/tenure-track faculty members at Tulane University, with the director as chair, will serve as a prospectus committee. If the

prospectus is approved by the prospectus committee and/or the home department or program, and approved by the dean's office, the prospectus committee will become the dissertation committee. The student's prospectus-dissertation committee must consist of a minimum of three tenured/tenure-track Tulane University faculty members, with at least two of these being members of the major department or program within the School of Liberal Arts. With the approval of the major department or program, the committee chair may appoint additional members from another department or school at Tulane University or from other institutions.

The responsibilities of the dissertation committee are specified below under Dissertation and Final Examination.

Academic Awards

The Ann Royal Arthur Memorial Award in German was established in 1987 in memory of Professor Ann Arthur of the Department of Germanic and Slavic Languages. It is awarded to a student who has demonstrated a commitment to the study of German.

The Sidney Beyer Prize for Excellence in American History was established in 1976 by Joel Beyer in memory of his father and is awarded to a superior student of American History.

The Purvis E. Boyette Memorial Freshman Essay Award was established in 1988 in memory of Professor Purvis E. Boyette of the Department of English.

The Brazilian-American Cultural Institute Award for Excellence in Portuguese is given by the Portuguese government, on recommendation of the faculty, to a student who has excelled in the study of Portuguese.

The Victoria R. Bricker Award for Excellence in Linguistics

The Almir Bruneti Award for Excellence in Luso-Brazillian Studies

The Glendy Burke Medal was established in 1848 by Glendy Burke. This awarded for excellence in the field of speech.

The Louis Bush Medal

The Classical Studies Prize awarded for excellence in Latin, Greek, or the study of ancient history, culture or archaeology.

The Premio Clavileno is awarded for excellence in Spanish.

The Alice Raymond Scudder Coates Scholarship in Art is awarded to either a student in any area of concentration in art.

The Rusty Collier Memorial Award in Studio Art is awarded to an art major.

The Charles Till Davis Prize for Excellence in European History.

The Charles E. Dunbar, Jr. Fellowships in Political Science are awarded each year to two political science majors who have demonstrated academic excellence and an interest in public affairs.

The France-Amerique Award is given for exceptional achievement in the study of the French language.

The French Government Prize is given by the French government, on recommendation of the faculty, to a student who has excelled in the study of French.

The Juanita Gonzalez Prize in Ceramics is awarded to the outstanding undergraduate ceramist in the Department of Art.

The Bodo Gotzkowsky Award for Research and Travel in Germany.

The Shirley Weil Greengus Memorial Award for Achievement in Political Science is awarded to the senior majoring in political science who has the highest scholastic average in the major.

The Henry Award recognizes outstanding achievement in the study of French.

The Jose Hernandez Award in Spanish-American Literature, established in 1985, is awarded to a graduating senior for excellence in Hispanic studies. The student must have excelled in at least one advanced course in Spanish-American literature.

The Anne Butler Hess Award, established in 1964 by Mrs. Robert D. Hess in memory of her daughter, is awarded to the graduating senior who has shown the greatest proficiency in philosophy.

The Italian Government Prize is given by the Italian government, on recommendation of the faculty, to a student who has excelled in the study of Italian.

The Japan-Tulane Friendship Award was established in 1987 by Jack Aron and Japan Air Lines for the best dissertation, thesis, or research paper on Japanese affairs.

The Arden King Award for Excellence in Anthropology.

The Elizabeth H. and Frederick "Fritz" Krauss Award is awarded to the outstanding undergraduate student majoring in Jewish Studies

The T. Krumpelmann Award for Achievement in German.

The Jonathon Lorino Memorial Award

The Ephraim Lisitzky Memorial Award, established in 1989, is granted to a student of exceptional achievement in the study of Hebrew language and Jewish history, culture, and religion.

The Dan W. Mullin Memorial Award, established in 1970 by Mr. Albert Salzer, is awarded for excellence in technical theater production.

The Charles H. Murphy Prize in Political Economy was established by the Murphy Institute to recognize an outstanding student majoring in political economy.

The Ashton Phelps Award in Communication Studies is given on recommendation of the faculty for excellence in communication studies.

The Pi Sigma Alpha Award, established in 1963 by the Tulane chapter of Pi Sigma Alpha, is awarded annually to the senior who has done most to stimulate scholarship and intelligent interest in the subject of government.

The Russian Book Prize is presented by the Department of Germanic and Slavic Languages for excellence in Russian.

The Henry Stern Prize in Art History is awarded to the student who produces the best paper in the field of art history.

The Elizabeth Watts Award for Excellence in Physical Anthropology.

The Robert Wauchope Award for Excellence in Anthropology.

Anthropology Minor

Overview

Anthropology - the study of humanity in its broadest sense - is, according to Eric Wolf "the most humanistic of the sciences and the most scientific of the humanities." At Tulane, anthropology is divided into four subdisciplines: anthropological archaeology, biological anthropology, linguistic anthropology, and sociocultural anthropology. These subdisciplines or fields are interconnected. The minor is designed to be flexible in terms of each student's interests, but students must achieve a breadth of courses across at least two of the subdisciplines. Per Newcomb-Tulane College rules, no more than one course can count for both this minor and another major.

The anthropology minor requires five 3- to 4-credit hour ANTH classes, of which:

- at least 4 are at the 2000-level or above
- at least two anthropological subdisciplines are represented at the 2000+ level

Requirements

A minor in anthropology consists of at least five 3- to 4-credit hour ANTH classes.

The only curricular requirement is that of these five classes, only one can be at the 1000-level, and at least one 2000-level (or higher) class must come from a second anthropological subdiscipline (i.e., not all of a student's upper level classes can be drawn from a single anthropological subdiscipline). The anthropological subdisciplines at Tulane are anthropological archaeology, biological anthropology, sociocultural anthropology, and linguistic anthropology.

Anthropology, BA

Anthropology - the study of humanity in its broadest sense - is, according to the late cultural anthropologist Eric Wolf, "the most humanistic of the sciences and the most scientific of the humanities." At Tulane, anthropology is divided into four subdisciplines: anthropological archaeology, biological anthropology, anthropological linguistics, and socio-cultural or cultural anthropology. These subdisciplines or fields are interconnected. Anthropologists at Tulane often straddle the boundaries of the subdisciplines, and they collaborate with scholars from other departments and schools of the University. Anthropology is perhaps the world's oldest transdisciplinary field of study. At Tulane, anthropologists study topics as seemingly disparate as two million year-old fossil hominins in Africa, capuchin monkeys in Costa Rica, the impact of Islam in West Africa, Mayan hieroglyphic texts, political movements in Mexico, indigenous use of the environment in the Amazon, variations in spoken New Orleans English - and much more!

The roots of Tulane's Department of Anthropology date from 1924, when the Department of Middle American Research (now the Middle American Research Institute [MARI]) was founded on the Uptown Campus. Anthropology courses were first offered at Tulane during the 1938-1939 academic year, and by 1947, anthropologists were employed in a Department of Sociology and Anthropology. A separate four-field Department of Anthropology was established in 1968. In 2010, the Department and MARI moved into newly-renovated space in Dinwiddie Hall. The Department of Anthropology has since 1990 more than doubled in size and diversity of the faculty, and course offerings today reflect that growth.

Tulane's Department of Anthropology has long been known for its focus in the areas of archaeology, cultural anthropology, and linguistics of Mesoamerica (the region from Central Mexico to El Salvador), and the department retains that area of emphasis. In addition, today the geographical teaching and research interests of our faculty include, in addition to Mesoamerica, North America (especially the southeastern United States and the Gulf South); South America (especially the Andes and the Amazon); lower Central America and the Caribbean; West Africa; the South Asian subcontinent; Southeast Asia; and Europe.

Requirements

- At least one course above the 1000 level in each of the four major subdivisions of anthropology: anthropological archaeology, biological anthropology, linguistic anthropology, and socio-cultural anthropology.
- Students may take no more than two 1000-level courses (six credit hours) as electives to be counted towards the 30 credit hours required for degrees in anthropology.
- Five or six elective courses in anthropology.
- Newcomb-Tulane College requires all undergraduates to take a writing-intensive course to fulfill its undergraduate writing requirement. Some anthropology courses may have writing-intensive sections, but the additional credit hours earned through writing-intensive courses are not counted towards the 30 hours necessary for degrees in anthropology.

Four Major Subdivisions

Archaeology

Course ID	Title	Credits
ANTH 2340	Introduction to Archaeology	3
ANTH 2350	Architecture and Power in the Ancient World	3
ANTH 2360	Ancient Trade and Commerce	3
ANTH 3320	Archaeology of Gender	3

ANTH 3430	Archaeology of Cultural Landscapes	3
ANTH 3560	Environmental Archaeology	3
ANTH 4130	North American Prehistory	3
ANTH 4150	African Prehistory	3
ANTH 4410	Olmec and Maya Civilization	3
ANTH 4610	Ceramic Analysis	3
ANTH 4620	Lithic Analysis	3

Additional Information

Given the diversity of topics of interest to anthropologists, anthropology majors are encouraged to take a variety of courses in the different anthropological subfields and in related disciplines, and they are encouraged to integrate anthropology coursework within pre-professional programs of study. Upon consultation with anthropology faculty advisors, students may count up to six credits (two courses) as electives towards the anthropology major from approved courses in other departments.

The subject matter of anthropology is such that most of the curriculum is not an explicitly ordered sequence. Few anthropology courses

at Tulane have specific prerequisites (exceptions, mostly linguistic courses, are noted in the catalog), and anthropology majors are expected to choose their courses from among all those with numbers less than 7000. The 6000-level courses are specifically designed for undergraduate as well as graduate students, and all junior and senior majors should choose freely from among these offerings.

Anthropology majors are eligible to apply for the 4+1 program in anthropology, based on consultation with advisors and other mentors. Students in the 4+1 program can earn B.A. or B.S. degrees in anthropology within four years, and M.A. degrees in anthropology based on an additional year of graduate coursework in anthropology taken during their fourth and fifth years. Requirements for this program are outlined on the departmental web site and in the anthropology majors handbook.

The anthropology department administers the Kenneth J. Opat Fund in Anthropology, reserved for the support of undergraduate research in anthropology. Students majoring in anthropology are encouraged to seek further information from their anthropology advisors about the use of this research fund.

Anthropology, BS

Anthropology - the study of humanity in its broadest sense - is, according to Eric Wolf "the most humanistic of the sciences and the most scientific of the humanities." At Tulane, anthropology is divided into four subdisciplines: archaeology, biological anthropology, linguistics, and socio-cultural anthropology. These subdisciplines or fields are interconnected. Anthropologists at Tulane often straddle the boundaries of the subdisciplines, and they collaborate with scholars from other departments and schools of the University. Anthropology is perhaps the world's oldest cross-disciplinary discipline, and at Tulane, anthropologists study topics as seemingly disparate as two million year-old fossil hominins, capuchin monkeys in Costa Rica, the impact of Islam in West Africa, Mayan hieroglyphic texts, political movements in Mexico, indigenous use of the environment in the Amazon, variations in spoken New Orleans English - and much more!

The roots of Tulane's Department of Anthropology date from 1924, when the Department of Middle American Research (now the Middle American Research Institute [MARI]) was founded on the Uptown Campus. Anthropology courses were first offered at Tulane during the 1938-1939 academic year, and by 1947, anthropologists were employed in the Department of Sociology and Anthropology. A separate four-field Department of Anthropology was established in 1968. In the last thirty years or so (1990-2020), the Anthropology Department more than doubled in size and diversity, and course offerings reflect that growth. In 2010, the Department and MARI moved into newly-renovated space in Dinwiddie Hall.

Tulane's Department of Anthropology has long been known for its focus in the areas of the archaeology, cultural anthropology, and linguistics of Mesoamerica (the region from Central Mexico to El Salvador). Today the teaching and research interests of our faculty have expanded, and in addition to Mesoamerica, they work in North America (especially the southeastern United States and the Gulf South); South America (especially the Andes, and the Amazon); lower Central America and the Caribbean; West Africa; the South Asian subcontinent; Southeast Asia; and Europe.

Requirements

Requirements

Thirty credit hours of approved coursework are required for a major in anthropology. Typically, this requirement can be satisfied by ten anthropology courses. Within the 30 credit hours required for a major in anthropology, students must fulfill the following requirements for a degree in anthropology:

- At least one course above the 1000 level in each of the four major subdivisions of anthropology: archaeology, biological anthropology, linguistics, and socio-cultural anthropology.
- Students may take no more than two 1000-level courses (six credit hours) as electives to be counted towards the 30 credit hours required for degrees in anthropology.
- Five or six elective courses in anthropology.
- Student who choose to receive the B.S. degree must have credit for two mathematics courses.
  - One calculus course, MATH 1210 Calculus I (4 c.h.) or equivalent; and
  - One statistics course MATH 1230 Statistics For Scientists (4 c.h.), or a higher level class in statistics, such as ANTH 6010 Quantitative Methods in ANTH (3 c.h.).
- Newcomb-Tulane College requires all undergraduates to take a writing practicum or a writing-intensive course to fulfill its undergraduate writing requirement. Some anthropology courses may have writing-intensive sections, but the additional credit hours earned through writing-intensive courses are not counted towards the 30 hours necessary for degrees in anthropology.

Anthropology, MA

Anthropology--the study of humanity in its broadest sense--is, according to Eric Wolf "the most humanistic of the sciences and the most scientific of the humanities." At Tulane, anthropology is divided into four subdisciplines: anthropological archaeology, biological anthropology, linguistic anthropology, and sociocultural anthropology. These subdisciplines or fields are interconnected. Anthropologists at Tulane often straddle the boundaries of the subdisciplines, and they collaborate with scholars from other departments and schools of the university. Anthropology is perhaps the world's oldest cross-disciplinary discipline, and at Tulane, anthropologists study topics as seemingly disparate as two million year-old fossil hominins, capuchin monkeys in Costa Rica, the impact of Islam in West Africa, Mayan hieroglyphic texts, political movements in Mexico, indigenous use of the environment in the Amazon, and variations in spoken New Orleans English--and much more!

The roots of Tulane's Department of Anthropology date from 1924, when the Department of Middle American Research (now the Middle American Research Institute [MARI]) was founded on the uptown campus. Anthropology courses were first offered at Tulane during the 1938-1939 academic year, and by 1947, anthropologists were employed in the Department of Sociology and Anthropology. A separate four-field Department of Anthropology was established in 1968. In the last thirty years or so (1990-2020), the anthropology department has more than doubled in size and diversity, and course offerings reflect that growth. In 2010, the Department and MARI moved into newly-renovated space in Dinwiddie Hall.

Tulane's Department of Anthropology has long been known for the archaeology, cultural anthropology, and linguistics of Mesoamerica (the region from Central Mexico to El Salvador). Today the teaching and research interests of our faculty have expanded, and in addition to Mesoamerica, they work in North America (especially the southeastern United States and the Gulf South); South America (especially the Andes and the Amazon); lower Central America and the Caribbean; West Africa; the South Asian subcontinent; Southeast Asia; and Europe.

We offer an M.A. degree to our current Tulane undergraduate students who by taking two 6000-level anthropology classes (six hours) while earning their B.A./B.S. degrees, are able to apply these six hours toward an M.A. degree. They then spend a fifth year taking 24 hours of anthropology classes to earn their M.A. degrees (30 hours total).

We also offer an M.A. degree to our Ph.D. students midway through their training for the doctorate.

Requirements

MA Degree for PhD Students

General Requirements for MA Degrees

1. Completion items 1-5 of the PhD program (https://catalog.tulane.edu/liberal-arts/anthropology/anthropology-phd/#requirementstext) requirements.
2. Students wishing to receive the MA degree must submit the appropriate application for graduate degree form to the Graduate Programs Office of the School of Liberal arts by deadlines specified for the semester of the award.

4 + 1 MA Program Degree requirements

1. Completion of the normal requirements for the BA (https://catalog.tulane.edu/liberal-arts/anthropology/anthropology-ba/) or BS (https://catalog.tulane.edu/liberal-arts/anthropology/anthropology-bs/) in Anthropology.
2. Completion of two Anthropology courses at the 6000 level or above. (Students must complete 126 credit hours at the undergraduate level, including 2 graduate-level anthropology courses beyond those required for the major.)
3. Completion of 24 additional credit hours of graduate level courses.
4. Language Competence Certification (as in item 2 in the PhD requirements (https://catalog.tulane.edu/liberal-arts/anthropology/anthropology-phd/#requirementstext))
5. Completion of one methods course.

Anthropology, PhD

Anthropology--the study of humanity in its broadest sense--is, according to Eric Wolf "the most humanistic of the sciences and the most scientific of the humanities." At Tulane, anthropology is divided into four subdisciplines: anthropological archaeology, biological anthropology, linguistic anthropology, and sociocultural anthropology. These subdisciplines or fields are interconnected. Anthropologists at Tulane often straddle the boundaries of the subdisciplines, and they collaborate with scholars from other departments and schools of the university. Anthropology is perhaps the world's oldest cross-disciplinary discipline, and at Tulane, anthropologists study topics as seemingly disparate as two million year-old fossil hominins, capuchin monkeys in Costa Rica, the impact of Islam in West Africa, Mayan hieroglyphic texts, political movements in Mexico, indigenous use of the environment in the Amazon, and variations in spoken New Orleans English--and much more!

The roots of Tulane's Department of Anthropology date from 1924, when the Department of Middle American Research (now the Middle American Research Institute [MARI]) was founded on the uptown campus. Anthropology courses were first offered at Tulane during the 1938-1939 academic year, and by 1947, anthropologists were employed in the Department of Sociology and Anthropology. A separate four-field Department of Anthropology was established in 1968. In the last thirty years or so (1990-2020), the anthropology department has more than doubled in size and diversity, and course offerings reflect that growth. In 2010, the Department and MARI moved into newly-renovated space in Dinwiddie Hall.

Tulane's Department of Anthropology has long been known for the archaeology, cultural anthropology, and linguistics of Mesoamerica (the region from Central Mexico to El Salvador). Today the teaching and research interests of our faculty have expanded, and in addition to Mesoamerica, they work in North America (especially the southeastern United States and the Gulf South); South America (especially the Andes and the Amazon); lower Central America and the Caribbean; West Africa; the South Asian subcontinent; Southeast Asia; and Europe.

The Ph.D. program at Tulane is competitive; all students admitted to the program receive a stipend and a tuition waiver for five years. If you

are interested in applying to the program, please contact the faculty member(s) with whom you are interested in working.

Requirements

Requirements for Graduate Degrees

All graduate studies in the Department of Anthropology are governed by the School of Liberal Arts: https://liberalarts.tulane.edu/academics/graduate-studies/resources (https://liberalarts.tulane.edu/academics/graduate-studies/resources/)

Requirements for the PhD in Anthropology

1. **Completion of a one-credit, team-taught introductory four-field course in anthropology (**Introduction to Anthropology ANTH 6001).
2. **Language competence certification.** This requirement may be fulfilled by:
   a. **Coursework**. Two options are possible 1) the student presents evidence of attaining an average of B or better grades in a one-year foreign language course taken at the junior or equivalent level (i.e., 5th and 6th undergraduate semesters) within three years of the date of first registration in the anthropology graduate program or 2) the student earns a B or better in a graduate summer language course sponsored by one of the corresponding units on campus (such as Center for Global Education, Stone Center for Latin American Studies, or Office of Study Abroad).
   b. **Examination**. The anthropology department administers language examinations once each semester. The examination date will be announced via e-mail. Students wishing to be examined respond to the announcement by specifying their subdiscipline of study (anthropological archaeology, biological anthropology, linguistic anthropology, or sociocultural anthropology) and the language in which they wish to be examined. Only languages in which Tulane faculty have expertise may be certified through this process.
   c. **Native fluency.** Native speakers of languages other than English may petition the Department of Anthropology to count either English or their native language as satisfying a foreign language requirement.
   d. **Petition.** Those with accredited language study elsewhere may petition the department.
3. **Completion of two methods courses.**
   a. Preferred options by subdiscipline. Other courses may be acceptable if approved by the faculty.
      i. Archaeology. ANTH 6010 Quantitative Methods in ANTH (3 c.h.), ANTH 7610 Ceramic Analysis (3 c.h.), ANTH 7560 Environmental Archaeology (3 c.h.), and ANTH 7100 Quantitative Methods Arc (3 c.h.)
      ii. Biological anthropology. ANTH 6010 Quantitative Methods in ANTH (3 c.h.), ANTH 7450 Methods of Observation in Behavioral Research (3 c.h.), ANTH 7750 Human Paleopathology (3 c.h.), ANTH 7510 Fossil Hominin Taxonomy and Systematics (3 c.h.). One of these courses must be in statistics. Other courses and courses in other departments may be taken if approved by the student's adviser.
      iii. Linguistic anthropology. ANTH 6010 Quantitative Methods in ANTH (3 c.h.), ANTH 6420 Linguistic Field Methods (3 c.h.), ANTH 6520 Ethnographic Methods (3 c.h.), ANTH 6580 The Politics of Fieldwork (3 c.h.)
      iv. Sociocultural anthropology. ANTH 6520 Ethnographic Methods (3 c.h.), ANTH 6580 The Politics of Fieldwork (3 c.h.), ANTH 6010 Quantitative Methods in ANTH (3 c.h.), ANTH 6420 Linguistic Field Methods (3 c.h.).
4. **Completion of training in grant, proposal or prospectus writing.** This may be fulfilled by satisfactory completion of:
   a. ANTH 7230 Research Design and Grant Writing (3 c.h.)
   b. Grant writing workshop or course taught elsewhere at Tulane University.
5. **Completion of coursework.** The department requires a minimum of 49 hours of coursework beyond the BA/BS degree, at least 15 hours of which must be taken at the 7000 level. The following coursework requirements pertain to archaeology and biological anthropology:
   a. Biological anthropology students specializing in skeletal biology or human paleontology must take a course in human gross anatomy.
   b. Biological anthropology students specializing in primatology must take three courses in a related field outside of the anthropology department, as determined in consultation with their adviser.
6. **Completion of academic service/professional training.**
   a. During the first two years of residency the student will receive professional training through a combination of research and teaching assistantships.
   b. At least one semester must be a teaching assistantship. Assignments for a given semester will be determined through consultation with one's adviser and the department chair.
   c. Once the student has completed coursework, they will be expected to teach one course as instructor of record in the Department of Anthropology as part of the stipend requirement. Assignments for a given semester will be determined through consultation with one's adviser and the department chair.
   d. Students are expected to complete six semesters of professional training, including one semester as instructor of record.
7. **Passing comprehensive examinations.** Bioanthropology, sociocultural anthropology and linguistics students will take an 8-hour written comprehensive examination administered over two consecutive days. Archaeology students will take a 9-hour examination over three consecutive days. These exams should be completed before the conclusion of the 6th semester of residency.
8. **Oral examination** (students in Archaeology, Linguistics and Sociocultural Anthropology ONLY).
   a. **Archaeology**: the oral exam will cover regional topics, methodologies, and theories, and answers on written comprehensive exams.
   b. **Linguistics**: the oral exam will cover the student's area of specialization.
   c. **Sociocultural**: the oral exam will cover the relevant ethnographic area(s), methodologies and theories.
9. **Submission, defense and approval of a prospectus outlining the proposed dissertation.** The student must petition the department chair for the formation of a dissertation prospectus committee. The student must distribute a copy of the prospectus to every

faculty member of the department three business days before the defense date.

10. **Completion of approximately one year of approved anthropological fieldwork.**
11. **Submission, defense and approval of a doctoral dissertation.** Students who intend to defend a dissertation must inform the department chair, in writing, of that intention during the first two weeks of the semester in which they wish the defense to be scheduled. Students must have a complete copy of their dissertation in the hands of their committee members one month before the scheduled defense date.

Transfer Credit Approval

Students may request transfer credit for graduate coursework done at other institutions, as indicated in the School of Liberal Arts Graduate Programs Handbook (https://liberalarts.tulane.edu/academics/graduate-studies/resources/).

Africana Studies and Art History, MA

A unique dual-discipline master's program, *Crossroads Cohort: Africana Studies at the Intersection of Art History and Practice* allows students to pursue an MA in art history and Africana Studies. In addition to being part of the general cohort of art history graduate students, Crossroads students comprise their own subfield cohort, taking dedicated courses together and collaborating to develop—with support of departmental funding—a capstone project such as a small exhibition, symposium, or public engagement program in their final year. Alongside their academic training, Crossroads Cohorts students will acquire professional skills and experience and expand their academic and professional networks through paid summer internships and meaningful activities such as cohort trips to see exhibitions or visit other universities and attending conferences. All Crossroads Cohort students will receive an annual tuition waiver, living stipend, and access to research and travel funding. The program accepts a minimum of three and a maximum of five students every other year.

Art History Major, BA

The major in art history is designed to impart an understanding of the historical development and context of art. Majors are required to take 33 credits in art history, which must include two 1000-level survey courses and a minimum of nine advanced classes or 27 credits distributed among three broad areas. At least two courses should be in two of the following fields and at least one course in the other.

1. Ancient, Ancient American, Asian (before 1300), Medieval;
2. Renaissance, Baroque, Colonial Latin American, and Asian (early modern period);
3. American, African Diaspora, and Modern/Contemporary art.

At least three other courses must be seminars at the 6000-level. Internships in local museums, galleries and auction houses are available for academic credit. A one-credit writing practicum that satisfies the college intensive writing requirement is available with art history courses at the 6000-level.

Requirements

Art History Major Coursework Requirements

Art History Minor

A minor in the History of Art consists of at least 21 credit hours of art history courses.

Requirements

Course ID	Title	Credits
Any Two 1000-level Art History Courses		**6**
ARHS 1010	Art Survey I: Prehistory through the Middle Ages	
ARHS 1020	Art Survey II: Renaissance to the Present	
ARHS 1030	Introduction to Asian Art	
ARHS 1040	Introduction to Ancient American Art: Self and Sacrifice	
ARHS 1050	Introduction to African Art	
Any 1000-level ARHS Special Topics Course May Also Count Toward This Requirement		
Five ARHS courses at the 2000-level or above		**15**
Total Credit Hours		**21**

Art History, MA

Since 1960, the MA program in the history of art at Tulane has prepared outstanding students for careers in research, teaching, and museum work. About a third of our graduates have continued toward their doctoral degrees either at Tulane or elsewhere. The program welcomes students who have majored in fields other than art history. The MA stipend is about $19,000 a year.

Requirements

Course ID	Title	Credits
Eight 6000 or 7000 level courses		24
Three of which should be with the student's faculty advisor or in the student's thesis area		
ARHS 6910	Independent Study (Fall and Spring of 2nd year)	6

Curriculum:

The MA requires 30 credit hours (8 courses), including 24 credits (8 courses) at the 6000 and 7000 levels, plus 6 credits of Independent Study for thesis research.

Distribution requirements call for art history MA students to take at least one class in each of the following three areas: 1) art of Ancient and Medieval Europe and Asia, the Ancient Americas; 2) art of Renaissance, Baroque, and 18th-c. Europe, Early Modern Asia, the Colonial Americas; 3) modern art of Europe, Asia, and the Americas, especially the U.S., Caribbean, Latin America, and the African diaspora. Students are also expected to take three classes with the regular faculty teaching in the area that most closely relates to their own research, and who will most likely be on their thesis committee.

The 7000-level courses are for graduate students only and are sometimes taught in tandem with 3000-level courses for undergraduates. The 6000-level courses are taken by juniors and seniors as well as graduate students. Both include seminars on special

topics. With the permission of their graduate advisor, students may take two courses outside the art history program.

Language Requirement:

Reading proficiency in at least one foreign language relevant to the student's work is required. French, German, Italian, Latin, and Spanish are especially useful for research in art history. The requirement is satisfied by passing a reading exam. Because reading knowledge of foreign languages is necessary for research in most art-historical fields, students are urged to take their language exam early.

Thesis:

An important step in the MA program is the writing of a thesis and its subsequent oral defense. The thesis may be the outgrowth of a seminar paper, or it may focus on a special interest of the student insofar as it falls within the area of competency of the faculty. Students work with their graduate advisors in selecting the appropriate topic, establishing the three-member thesis committee, and preparing the thesis prospectus by the end of the first year. One member of the thesis committee may be from another department or school in the university. While moderate in length and considerably more limited in scope than a doctoral dissertation, the MA thesis should demonstrate the student's ability to do research of publishable quality. The defense usually takes place a month before the end of the last semester.

Art Studio, MFA

Through the School of Liberal Arts, the Newcomb Art Department offers the MFA degree in an intensive, two-year residency program that emphasizes close interaction with faculty and peers, with concentrations in Ceramics, Digital Art, Glass, Painting, Photography, Printmaking, and Sculpture. Degree requirements focus on studio work but include two graduate level courses in the history of art, and four MFA seminar courses that rotate in theme between Creation & Context and Professionalism & Pedagogy.

Requirements

Sample Schedule, Master of Fine Arts, Studio Art

The Master of Fine Arts requires sixty-three (63) hours of graduate level courses. Two courses in Art History (6 hours) at the graduate level are required, as is attendance in the MFA seminar courses (12 hours) that are held each semester and rotate in theme between Creation & Context and Professionalism & Pedagogy. Of the remaining courses (45 hours) 30 hours must be in studio disciplines and are designed to meet individual needs and interests. These are mainly of a "workshop" or "atelier" nature. During the second year, all students are required to present a thesis exhibition in the Carroll Gallery and complete a written thesis contextualizing the exhibition. In addition, an oral examination is conducted by a faculty thesis committee.

Sample Schedule

Year 1		
Fall		**Credit Hours**
ARST 7010	Graduate Art Studio (Studio work)	3
ARST 7020	Graduate Art Studio (Studio work)	3

Frequently Asked Questions (https://liberalarts.tulane.edu/departments/art/academics/graduate/studio-art/faqs/) about applying to the MFA Program.

Joint Degree in Studio Art and Africana Studies, MFA/MA

Overview

A unique dual-discipline master's program, *Crossroads Cohort: Africana Studies at the Intersection of Art History and Practice* allows students to pursue an MFA in any studio discipline alongside graduate work in Africana Studies—earning an MA in Africana Studies at the same time as their Studio Art MFA. In addition to being part of the general cohort of MFA students in Studio Art, Crossroads students comprise their own subfield cohort consisting of practicing artists and art historians, taking dedicated courses together and collaborating to develop—with support of departmental funding—a capstone project such as a small exhibition, symposium, or public engagement program in their final year. Alongside their academic training, Crossroads Cohorts students will acquire professional skills and experience and expand their academic and professional networks through paid summer internships

and meaningful activities such as cohort trips to see exhibitions or visit other universities and attending conferences. All Crossroads Cohort students will receive an annual tuition waiver, living stipend, and access to research and travel funding. One to two Studio Artists (pursuing either an MA in Africana Studies or a concentration in Africana Studies) will be admitted every other year.

Requirements

In addition to all regular MFA coursework (for which the elective seminar must be AFRS/ARHS), students must complete:

Course ID	Title	Credits
ARHS 7960	Crossroads Cohort: Black Studies Bootcamp	3
Internship		3
Capstone 1		3
Capstone 2		3
One (1) course that counts toward Africana Studies		3
Three (3) courses at the 6000-level or above:		9
Two (2) seminars which are co-ops between AFRS and ARHS		
Sample courses:		
ARHS 6874	Race and the Art of Empire	
ARHS 6875	Race and National Mythologies in American Art and Visual Culture	
ARHS 6876	Interracial Themes in Western Art and Visual Culture	
ARHS 6877	Contested Vision Civil War I	
ARHS 6878	Contested Vision Civil War II	
One (1) additional Africana Studies course outside of art history		
Sample courses:		
AFRS 6050	Black Feminism and Social Movement in the United States	
AFRS 7450	Black Diasporic Culture	
Two (2) independent studies attached to Studio coursework supervised by AFRS faculty		6
Total Credit Hours		**30**

Studio Art Minor

A minor in Studio Art allows for the pursuit of artistic making and thinking in a way that compliments and informs the student's primary fields of study, consisting of five courses in total. Students choose two courses from the following four options: any 1000-level course in a 2D area (digital art, drawing, painting, photography, printmaking), any 1000-level course in a 3D area (ceramics, digital fabrication, glass, sculpture), ARST 1050 Drawing I (4 c.h.), and ARST 2101 Sequence and Series (4 c.h.). The other two studio courses can be any ARST course *above* the 1000-level. One Art History course is also required; students can choose from any of the Art Department's diverse offerings in the history and study of art.

Note: No more than half of the required courses can be transferred into the program.

Requirements

A minor in studio art consists of eight courses:

Course ID	Title	Credits
Studio Art Foundations (Select any two of the following options) [1]		**8**

ARST 1050	Drawing I
ARST 2101	Sequence and Series
One 1000-level 2D ARST course or one 1000-level 3D ARST course	
AND	
Select one ARST course beyond the 1000-level	4
Select one ARST course beyond the 1000-level	4
Select one ARHS art history course	3
Total Credit Hours	**19**

[1] Take any 2 of the 4 courses listed (ARST 1050 Drawing I (4 c.h.); ARST 2101 Sequence and Series (4 c.h.); 1000-level 2D area; 1000-level 3D area).

Studio Art with a concentration in Africana Studies, MFA

Overview

A unique graduate program in Studio Art, *Crossroads Cohort: Africana Studies at the Intersection of Art History and Practice* allows students to pursue an MFA in any studio discipline alongside graduate work in Africana Studies—earning a graduate concentration in Africana Studies as part of their MFA in Studio Art. In addition to being part of the general cohort of MFA students, Crossroads students comprise their own subfield cohort, taking dedicated courses together and collaborating to develop—with support of departmental funding—a capstone project such as a small exhibition, symposium, or public engagement program in their final year. Alongside their academic training, Crossroads Cohorts students will acquire professional skills and experience and expand their academic and professional networks through paid summer internships and meaningful activities such as cohort trips to see exhibitions or visit other universities and attending conferences. All Crossroads Cohort students will receive an annual tuition waiver, living stipend, and access to research and travel funding. The program accepts one every other year. One to two Studio Artists (pursuing either an MA in Africana Studies or a concentration in Africana Studies) will be admitted every other year.

Requirements

In addition to regular MFA requirements (for which the elective seminar must be AFRS/ARHS), students must complete:

Studio Art, BA

The Bachelor of Arts (BA) in Studio Art provides a comprehensive education in artistic production that trains creative individuals to be resilient problem solvers and critical thinkers, as well as preparing them for a career in the arts. Balancing academic rigor with experimental play in a program designed to allow for additional majors, the BA in Studio Art empowers students to approach their artistic practice with a deep understanding of its interconnectedness with society and the environment. Our undergraduate experience is characterized by small

class sizes, a commitment to individual mentorship, and support for distinctive expression across diverse forms and techniques. Students are encouraged to take courses in any medium or field of study relevant to their evolving practice utilizing state-of-the-art facilities in ceramics, digital art, glass, painting & drawing, photography, printmaking, and sculpture. Through creative project development, interdisciplinary research, and exposure to a wide range of artistic traditions, students emerge equipped with the skills to produce art that that shapes and reflects the world around us.

*During the senior year, Studio Art majors are required to take a 4-credit studio art course above the 2000-level each semester-- one in conjunction with ARST 5010 Studio Research (3 c.h.) in the fall and one in conjunction with ARST 5020 Senior Capstone Studio (3 c.h.) in the spring.

Studio Art, BFA

The Bachelor of Fine Arts (BFA) in Studio Art provides a unique and tailored education that trains creative individuals to be resilient problem solvers and critical thinkers, as well as preparing them for a career in the arts. Balancing academic rigor with experimental play, the program empowers students to approach their artistic practice with a deep understanding of its interconnectedness with society and the environment. Our undergraduate experience is characterized by small class sizes, a commitment to individual mentorship, and support for distinctive expression across diverse forms and techniques. Students are encouraged to take courses in any medium or field of study relevant to their evolving practice utilizing state-of-the-art facilities in ceramics, digital art, glass, painting & drawing, photography, printmaking, and sculpture. Through creative project development, interdisciplinary research, and exposure to a wide range of artistic traditions, students emerge equipped with the skills to produce art that shapes and reflects the world around us.

Note: For the BFA in Studio Art, students must fulfill all general requirements as described in the Liberal Arts curriculum including those of the Newcomb-Tulane College core with the following exception: one science with laboratory course is required in the Math and Natural Science distribution requirement of the core curriculum for B.F.A. degree-seeking students instead of one science with laboratory course plus an additional Math and Natural Science course.

Classical Studies Major, BA

The Department of Classical Studies combines literary and cultural studies, history, archaeology, art history, law, ancient political thought, philosophy, and the reception of classical antiquity to offer a program of study that is fundamentally interdisciplinary in character. Through investigation of the diverse cultures of the Greek, Roman, and ancient Mediterranean worlds, our students gain an understanding not only of various aspects of the ancient world but also of how the methodologies of different disciplines can work separately and together to widen and deepen our comprehension of human cultures in all periods. Moreover, our faculty are committed to engaging students in developing lifelong skills, including critical reading, evidence-based research, and effective writing.

Faculty in the department have expertise in Roman law, economy, and social history, Greek and Latin literature, Aegean Bronze Age archaeology, history and archaeology of the Hellenistic world, Roman art and archaeology, and ancient philosophy and science. The department offers general courses on Greek and Roman literature, culture, history, and archaeology, along with more in-depth courses on topics such as Knossos, Roman law, the archaeology of ancient Israel, race from antiquity to the US, early Christianity, ancient science, Etruscans and early Rome, ancient leadership, and Graeco-Roman Utopias and the Colonial Americas.

We invite you to explore our full course offerings and information about our major and minor programs. (https://liberalarts.tulane.edu/classical-studies/)

Requirements

Classical Studies (CLAS): 30* credits (10* courses) in CLAS, GREK, and/or LATN

- Three of these 3-credit-hour courses must be at the 4000 level.

Double majors: Only 27 credits (9 courses) are required for students with more than one major.

Language Requirement: Greek or Latin courses may be used to satisfy the Newcomb-Tulane College foreign language requirement. However, any courses used to satisfy the language requirement cannot also be counted toward the major or minor.

Please note: LATN 2030 Intro to Latin Literature (4 c.h.) is only offered in the Fall semesters.

Tulane's Language Learning Center (https://liberalarts.tulane.edu/language-learning-center/) has language-specific instructions for

placement testing, information about and registration for proficiency testing, links to presentation recordings, and more.

Students interested in teaching can earn certification in Latin through the Education (p. 442) program's offerings.

Students interested in pursuing graduate study in Classics should consult with their departmental adviser about the undergraduate preparation needed for graduate school.

Classical Studies Minor

The Department of Classical Studies combines literary and cultural studies, history, archaeology, art history, law, ancient political thought, philosophy, and the reception of classical antiquity to offer a program of study that is fundamentally interdisciplinary in character. Through investigation of the diverse cultures of the Greek, Roman, and ancient Mediterranean worlds, our students gain an understanding not only of various aspects of the ancient world but also of how the methodologies of different disciplines can work separately and together to widen and deepen our comprehension of human cultures in all periods. Moreover, our faculty are committed to engaging students in developing lifelong skills, including critical reading, evidence-based research, and effective writing.

Faculty in the department have expertise in Roman law, economy, and social history, Greek and Latin literature, Aegean Bronze Age archaeology, history and archaeology of the Hellenistic world, Roman art and archaeology, and ancient philosophy and science. The department offers general courses on Greek and Roman literature, culture, history, and archaeology, along with more in-depth courses on topics such as Knossos, Roman law, the archaeology of ancient Israel, race from antiquity to the US, early Christianity, ancient science, Etruscans and early Rome, ancient leadership, and Graeco-Roman Utopias and the Colonial Americas.

We invite you to explore our full course offerings and information about our major and minor programs. (https://liberalarts.tulane.edu/classical-studies/)

Requirements

Classical Studies (CLAS): 15 credits (5 courses) in CLAS, GREK, and/or LATN

- One of these 3-credit-hour courses must be at the 4000 level.

Language Requirement: Greek or Latin courses may be used to satisfy the Newcomb-Tulane College foreign language requirement. However, any courses used to satisfy the language requirement cannot also be counted toward the major or minor.

Please note: LATN-2030 is only offered in the Fall semesters.

Tulane's Language Learning Center (https://liberalarts.tulane.edu/language-learning-center/) has language-specific instructions for placement testing, information about and registration for proficiency testing, links to presentation recordings, and more.

Students interested in teaching can earn certification in Latin through the Education program's offerings.

Students interested in pursuing graduate study in Classics should consult with their departmental adviser about the undergraduate preparation needed for graduate school.

Classical Studies, MA

Classical Studies focuses on understanding the world of the ancient Mediterranean—including Greece, Rome, and surrounding cultures—by studying its languages, history, art, and archaeology. Our program focuses on developing skills in critical thinking, reading, and writing, and our students find that exploring the past invites new perspectives on the modern world while opening doors to the future.

Tulane's M.A. program in Classical Studies prepares students for further academic work in Ph.D. programs, for teaching in secondary schools, and for other types of careers. We emphasize building our graduate students' skills in Latin and Greek, while encouraging them to explore the ancient world through archaeology and ancient history. Our small, selective, and highly personalized program makes Tulane an excellent choice for those who are ready to engage deeply with the ancient Mediterranean in all its complexity.

For more information about the Department of Classical Studies (https://liberalarts.tulane.edu/departments/classical-studies/) please visit our website.

Requirements

M.A. Program

Our M.A. program emphasizes preparation in Latin and Greek and can include coursework in ancient history, archaeology, philosophy, and ancient religion. The program typically requires two years for completion. In the first year, most students take three courses within the department per semester. In the second year, students might either take two courses per semester and work on the M.A. thesis or take three courses while substantially revising two earlier seminar papers into M.A. qualifying papers.

We offer our best qualified applicants a full tuition fellowship and annual stipend.

The requirements for the M.A. degree are:

- A minimum of 30 semester hours of graduate-level credit (typically 10 courses) completed with a minimum grade of B. Typically, students complete 12 – 16 courses during the two-year program.
- Two qualifying papers or an M.A. thesis, either of which must be defended before a committee of three faculty members.

- Satisfactory completion of a reading exam in a modern language (German, French, or Italian). We expect students without preparation in a modern language (excluding English) to enroll in undergraduate language courses as part of their M.A. coursework.

Traditionally, for each semester during their first year, students will take one Latin course, one Greek course, one classics course, and if required one modern language course. In their second year for each semester, students will take one Latin course, one Greek course, one classics course or thesis research, and if required one modern language course.

We encourage our students to travel abroad between the first and second years, either to academic programs like those led by the American School of Classical Studies at Athens or the American Academy in Rome, or to archaeological field projects. Funding is available for such travel to all graduate students in good standing.

How to Apply to the Masters Program:

Undergraduate majors in Classics, History, Art History, Archaeology, and related fields are invited to apply. We particularly welcome applications from students with backgrounds historically underrepresented in Classical Studies. If you have questions about expectations and/or your preparation, please contact the Director of Graduate studies.

- All applicants must complete the graduate studies application form and submit the application fee. The application form is available at the School of Liberal Arts website.
- Applicants must submit:
  - a statement of purpose (c. 500 words)
  - three (3) letters of recommendation
  - a writing sample of no more than 20 pages

Full consideration will be given to applications completed by February 1.

Greek Major, BA

The acquisition of ancient Greek provides first-hand access to the literature of the ancient Mediterranean world and the early medieval period. In addition, the study of this ancient language provides excellent training in logical analysis and a superior understanding of how languages function to convey meaning. Reading Greek literature in the original language enables students to engage deeply with the intellectual world of ancient cultures and so to reflect on our own in a more informed fashion.

For more information about the Department of Classical Studies (https://liberalarts.tulane.edu/departments/classical-studies/) please visit our website.

Requirements

Greek (GREK): 30* credits (10* courses) in CLAS, GREK, and/or LATN

- including at least 5 GREK courses (total)
- of which 2 GREK courses must be at the 4000-level

***Double majors**: Only 27 credits (9 courses) are required for students with more than one major.

Language Requirement: Greek or Latin courses may be used to satisfy the Newcomb-Tulane College foreign language requirement. However, any courses used to satisfy the language requirement cannot also be counted toward the major or minor.

Please note: LATN-2030 is only offered in the Fall semesters.

Tulane's Language Learning Center (https://liberalarts.tulane.edu/language-learning-center/) has language-specific instructions for placement testing, information about and registration for proficiency testing, links to presentation recordings, and more.

Students interested in teaching can earn certification in Latin through the Education program's offerings.

Students interested in pursuing graduate study in Classics should consult with their departmental adviser about the undergraduate preparation needed for graduate school.

Greek Minor

The acquisition of ancient Greek provides first-hand access to the texts of the ancient Mediterranean world and the early medieval period. In addition, the study of this ancient language provides excellent training in logical analysis and a superior understanding of how languages function to convey meaning.

For more information about the Department of Classical Studies (https://liberalarts.tulane.edu/departments/classical-studies/) please visit our website.

Requirements

Greek (GREK): 15 credits (5 courses) in GREK, LATN, and/or CLAS

- including at least 3 GREK courses at or above the 3000 level
- of which 1 GREK course must be at the 4000 level

Language Requirement: Greek or Latin courses may be used to satisfy the Newcomb-Tulane College foreign language requirement. However, any courses used to satisfy the language requirement cannot also be counted toward the major or minor.

Please note: LATN-2030 is only offered in the Fall semesters.

Tulane's Language Learning Center (https://liberalarts.tulane.edu/language-learning-center/) has language-specific instructions for placement testing, information about and registration for proficiency testing, links to presentation recordings, and more.

Students interested in teaching can earn certification in Latin through the Education program's offerings.

Students interested in pursuing graduate study in Classics should consult with their departmental adviser about the undergraduate preparation needed for graduate school.

Latin Major

The acquisition of ancient Latin provides first-hand access to the literature of the ancient Mediterranean world and the early medieval period. In addition, the study of this ancient language provides excellent training in logical analysis and a superior understanding of how languages function to convey meaning. Reading Latin literature in the original language enables students to engage deeply with the intellectual world of ancient cultures and so to reflect on our own in a more informed fashion.

For more information about the Department of Classical Studies (https://liberalarts.tulane.edu/departments/classical-studies/) please visit our website.

Requirements

Latin (LATN): 30* credits (10* courses) in CLAS, GREK, and/or LATN

- including at least 5 LATN courses (total)
- of which 2 LATN courses must be at the 4000-level

***Double majors**: Only 27 credits (9 courses) are required for students with more than one major.

Language Requirement: Greek or Latin courses may be used to satisfy the Newcomb-Tulane College foreign language requirement. However, any courses used to satisfy the language requirement cannot also be counted toward the major or minor.

Please note: LATN-2030 is only offered in the Fall semesters.

Tulane's Language Learning Center (https://liberalarts.tulane.edu/language-learning-center/) has language-specific instructions for placement testing, information about and registration for proficiency testing, links to presentation recordings, and more.

Students interested in teaching can earn certification in Latin through the Education program's offerings.

Students interested in pursuing graduate study in Classics should consult with their departmental adviser about the undergraduate preparation needed for graduate school.

Latin Minor

The acquisition of ancient Latin provides first-hand access to the texts of the ancient Mediterranean world and the early medieval period. In addition, the study of this ancient language provides excellent training in logical analysis and a superior understanding of how languages function to convey meaning.

Department of Communication

Programs

Undergraduate

Majors

- Cinema Studies Major (p. 236)
- Communication Major (p. 237)

Minor

- Cinema Studies Minor (p. 236)

Cinema Studies Major

Overview

The development of cinema over the course of the last centuries has consolidated audiovisual and institutional practices that continue to be the foundation for today's emergent moving image practices. The cinema studies faculty are committed to the multidisciplinary study of cinema in its global dimensions. Our teaching and research emphasize theoretical and historical approaches to cinema; the formal analysis of films; cinema's ties to new technologies from the nineteenth through the twenty-first centuries; and cinema's sociopolitical, economic, and environmental implications. In keeping with a liberal arts approach, cinema studies students will develop critical reading and writing skills and intellectual flexibility. Most centrally, students will acquire an ability to critically understand and analyze audiovisual material, a training that is essential to media literacy and being an active citizen in today's media-dominated world.

Requirements

A major in Cinema Studies involves the successful completion of ten Cinema Studies courses, seven of which should be at the 3000 level or above. All students working toward the major are required to take COMM 3150 Film Analysis (4 c.h.) followed by COMM 4860 Film Theory (4 c.h.) and one upper-level capstone seminar course. Capstone courses may be selected from regularly taught and special topics elective courses that include a capstone option. (This designation will be noted in the Schedule of Classes.) For capstone credit attached to this course, students should also enroll in CINE 5110 Capstone (0 c.h.). In addition to the required courses, students may select from the list of elective courses below. In the case of special topics courses, only cinema topics will count toward the CINE major or minor and approval of the Cinema Studies Coordinator is required. Cinema courses that are not listed below may be included with the prior approval of the Coordinator.

Course ID	Title	Credits
Required Courses		
COMM 3150	Film Analysis	4
COMM 4860	Film Theory	4
CINE 5110	Capstone (in conjunction with capstone option course)	0

Communication Major

The Department of Communication offers a major which seeks to produce theoretically informed graduates with the necessary practical and analytical skills for successful professional careers, including the ability to: think critically and express ideas clearly and creatively; perform close textual analysis of various forms of communication (written, visual, nonverbal); analyze historical and contemporary forces behind cultural identities and relationships; and, finally, analyze the structures and institutions that inform the relationship between media, technology and society. The major consists of ten courses with a minimum of 30 credits.

Requirements

The major consists of ten courses with a minimum of 30 credits.

Course ID	Title	Credits
Introductory Courses		
One introductory course at the 1000 level		3

COMM 1150 Introduction to Cinema		
COMM 1250 Introduction to Television		
COMM 1350 Introduction to Cultural Studies		
COMM 1450 Introduction to Global Media		
COMM 1550 Introduction to New Media and Internet Studies		
COMM 1650 Introduction to Media Studies		
Required Core Courses [1]		
Identities and Relationships:		
COMM 3140	Cross-Cultural Analysis	3
Texts and Representation:		
Select one of the following:		3-4
COMM 3150	Film Analysis	
COMM 3250	Rhetorical Criticism	
COMM 3350	New Media Analysis	
Structures and Institutions:		
COMM 3160	Technology Analysis	3
or COMM 3260	Media Industry Analysis	
Additional Courses		
Select six elective courses in consultation with the Communication advisor [2]		18
Other Elective Options		
ASTA 3770	Chinese Cinema	
DMPC 3750	Media for Community Health and Well Being	
SLAM 2600	Introduction to Creative Industries	
SLAM 3060	Philanthropy and Social Change	
SLAM 3100	Digital Entrepreneurship	
Total Credit Hours		**30-31**

[1] Majors must complete three core courses, one in each area of the curriculum, preferably by the end of junior year.

[2] At least two of these courses must be 3000-level or above, and two must be 4000-level or above. In general, 1000- and 2000-level courses are introductory courses. 3000-level courses encourage applications of communication theory through research methods and service learning. Most 4000-level classes are courses that stress writing, creative production, or service learning. Students wishing to graduate with honors in Communication must take either the graduate seminar (COMM 6210 Seminar In Comm Studies (3 c.h.) or COMM 6220 Seminar In Comm Studies (3 c.h.)) or another 4000-level honors course and complete an honors project. Majors planning to study abroad should seek departmental advice as early as possible.

Department of Economics

Programs

Undergraduate

Majors

- Economics, BA (p. 238)
- Economics, BS (p. 239)

Minor

- Economics Minor (p. 238)

Graduate

- Economics, PhD (p. 239)
- Policy Economics, MA (p. 241)

Economics Minor

A minor in economics is to consist of a **minimum** of five economics classes. Students who complete ECON 1010 and ECON 1020 to fulfill a requirement in their major must take five additional economics courses to be eligible for a minor in economics, for a total of seven courses — i.e., 1010 and 1020, plus any five economics courses of their choice.

Those students whose major does **not** specifically require ECON 1010 and ECON 1020 must take a total of five economics courses: 1010 and 1020, plus any three courses offered in the department **except** ECON 3010, 3020, and 3230. The completion of ECON 3010 is strongly recommended even though it does not count toward the minor. In both cases certain other courses may count toward the minor; check with the department.

Requirements

A minor in economics consists of a minimum of five economics classes as follows:

Students who complete ECON 1010 Introduction to Microeconomics (3 c.h.) and ECON 1020 Introduction to Macroeconomics (3 c.h.) to fulfill a requirement in their major must take five additional economics courses to be eligible for a minor in economics, for a total of seven courses - i.e., ECON 1010 and ECON 1020, plus any five economics courses of their choice.

Those students whose major does not specifically require ECON 1010 Introduction to Microeconomics (3 c.h.) and ECON 1020 Introduction to Macroeconomics (3 c.h.) must take a total of five courses:

Course ID	Title	Credits
ECON 1010	Introduction to Microeconomics	3
ECON 1020	Introduction to Macroeconomics	3
Select any three courses offered in the department [1]		9
Total Credit Hours		**15**

[1] Except ECON 3010 Intermediate Microeconomics (3 c.h.), ECON 3020 Intermediate Macroeconomics (3 c.h.), and ECON 3230 Econometrics (3 c.h.). The completion of ECON 3010 is strongly recommended even though it does not count toward the minor for these students.

Economics, BA

The B.A. in economics combines economic science with broad liberal arts training, providing an excellent background for postgraduate work in business, public policy, or law, and also for the student who will enter the labor force upon graduation.

Requirements

Students pursuing one of the economic majors are strongly encouraged to complete ECON 1010 Introduction to Microeconomics (3 c.h.) and ECON 1020 Introduction to Macroeconomics (3 c.h.) in their freshman year. They are also encouraged to complete ECON 3010 Intermediate Microeconomics (3 c.h.) and ECON 3020 Intermediate Macroeconomics (3 c.h.) by the end of their second year. Finally students are encouraged to complete an introductory course in statistics offered by the Department of Mathematics.

Course Work for the B.A. Degree

Course ID	Title	Credits
ECON 1010	Introduction to Microeconomics	3
ECON 1020	Introduction to Macroeconomics	3
ECON 3010	Intermediate Microeconomics (passed with a grade no lower than C-)	3
ECON 3020	Intermediate Macroeconomics (passed with a grade no lower than C-)	3
ECON 3230	Econometrics	3
Select five additional Economics Courses at the 3000 level or above [1]		15
Total Credit Hours		**30**

[1] Of these, at least two must be at the 4000 level or above. ECON 3890 Service Learning (1 c.h.), ECON 4570 Internship (1 to 3 c.h.), and ECON 5000 Honors Thesis (4 c.h.)* **do not count** toward this requirement.

Economics, BS

The B.S. in economics provides a rigorous quantitative background for advanced study in economics or for outstanding postgraduate programs in business. Those students enrolled in the School of Business wishing to emphasize economics should consult their economic advisers.

Requirements

Students pursuing one of the economic majors are strongly encouraged to complete ECON 1010 Introduction to Microeconomics (3 c.h.) and ECON 1020 Introduction to Macroeconomics (3 c.h.) in their freshman year. They are also encouraged to complete ECON 3010 Intermediate Microeconomics (3 c.h.) and ECON 3020 Intermediate Macroeconomics (3 c.h.) by the end of their second year. Finally students are encouraged to complete an introductory course in statistics offered by the Department of Mathematics.

Course Work for the B.S. Degree

Course ID	Title	Credits
ECON 1010	Introduction to Microeconomics	3
ECON 1020	Introduction to Macroeconomics	3
ECON 3010	Intermediate Microeconomics (passed with a grade no lower than C-)	3
ECON 3020	Intermediate Macroeconomics (passed with a grade no lower than C-)	3
ECON 3230	Econometrics	3
ECON 4410 or ECON 4610	Topics-Mathematical Econ Game Theory	3
Select four additional Economics Courses at the 3000 level or above [1]		12
MATH 1210	Calculus I	4
MATH 1220	Calculus II	4
Total Credit Hours		**38**

[1] Of these, at least one must be at the 4000 level or above. , ECON 3890 Service Learning (1 c.h.), ECON 4570 Internship (1 to 3 c.h.), and ECON 5000 Honors Thesis (4 c.h.)* **do not count** toward this requirement.

Note(s):

We recommend that students who wish to pursue graduate studies in economics take additional courses in mathematics, including MATH 2210 Calculus III (4 c.h.) , MATH 3070 Intro To Probability (3 c.h.), and MATH 3090 Linear Algebra (4 c.h.).

Economics, PhD

Tulane University's Economics Department offers a Ph.D. program in Economics. This Ph.D. program gives students distinctive training designed to make them attractive candidates for employment in universities, government, multilateral organizations, the private sector, and the non-profit sector. Our program is distinguished by three features:

Applied focus. The program is designed for students who are interested in using economic analysis to investigate real world problems. Students receive extensive training in the tools of economic analysis. These tools are an essential job skill for those who seek to evaluate public policies.

Interdisciplinary approach. The program breaks down the barriers to interdisciplinary graduate education by incorporating field coursework and research experiences with our prestigious cross campus partners. Our cross campus partners include the Freeman School of Business, the Stone Center for Latin American Studies, the School of Public Health and Tropical Medicine, the Cowen Institute for Public Education Initiatives, the Department of Political Science, and the Murphy Institute of Political Economy. Students will acquire the practical interdisciplinary knowledge necessary for innovative research and careful policy analysis.

Small, highly selective program with a high faculty-to-student ratio. This facilitates closer interaction between students and faculty, who are dedicated to research at the frontiers of their fields. Importantly, students have the opportunity to undertake joint research projects with faculty, as part of the training. Generous fellowships are available and are awarded on the basis of academic merit and potential for scholarship. Accepted students receive funding for five years, conditional on satisfactory progress through the program.

Requirements

Curriculum

The degree of Ph.D. in economics requires 48 credit hours, passage of preliminary examinations within the first two years of study, a

dissertation prospectus, a dissertation proposal, and a final dissertation defense.

The course of study in the first year includes:

- microeconomics (two semesters)
- econometrics (two semesters)
- macroeconomics (one semester)
- applied econometric methods for policy analysis (one semester)

In their second and third years, students will complete field courses in economics and in partner schools. Interdisciplinary fields of study have been designed so that students can draw from the expertise of faculty in Economics as well as our partner schools. The fields of concentration are:

- Health, education, and human capital
- Public economics and public policy
- Development, inequality, and poverty.

While student research may ultimately focus on a single field of concentration, students will take classes spanning multiple concentrations and will be encouraged to explore synergies between multiple areas.

Student Milestones, Required Examinations, and Monitoring of Progress to Degree

There are six program milestones: (1) Preliminary Examination, (2) Field Paper, (3) Choosing a Dissertation Advisor and Committee, (4) the Dissertation Prospectus Defense (Admission to Candidacy), (5) the Dissertation Proposal Defense, and (6) the final Dissertation Defense itself. Satisfactory performance in the Ph.D. program is defined as maintaining at least a B average, obtaining no grade lower than a B-, and meeting these six milestones on time.

1. **The Preliminary Examination**: is taken during the summer of the first program year. Failing the micro theory and/or econometrics portion(s) of the exam entitles a student to retake the failed portion in January of year II. Failing a second time is cause for dismissal. Students who fail a second time and are otherwise in good standing are typically allowed to continue in the program through the fourth semester. Satisfactory performance in 36 credit hours of approved graduate courses allows them to earn the degree of M.S. in Economics.
2. **Field Paper**: In year II, students should choose a **Field Paper Chair** and, together with this Chair, form a Field Paper Committee. The Committee must have at least three faculty members on it, including the Chair. The Chair and at least one other Committee member must be tenured or tenure-track professors of Tulane University's Department of Economics. The third Committee member must be a tenured or tenure-track faculty member of Tulane University, from Economics or another discipline. Additional members from Tulane or other academic institutions may be added at the Chair's discretion. The student is to have a Field Paper proposal approved by the Committee by May 15 of program year II. The Field Paper is then written during the second summer. A full draft of the paper is to be handed in to the Chair by August 15, and a final version of the paper is due to the full Committee for approval by September 15.
3. **Dissertation Committee**: The Field Paper Chair and Committee structure often evolve naturally into Dissertation Advisor and Dissertation Committee. However, this two-step structure also provides a natural opportunity to modify or entirely change the supervision of a student. It is expected that the Dissertation Committee will be formally constituted by December 15 of program year III. While there is no formal paperwork concerning this step, it is expected that the student will notify the Director of Graduate Studies via email, with copies to his Dissertation Committee members and to the Chair of the Department of Economics.
4. **3rd Year Prospectus Defense**: With the Field Paper approved, the remainder of the Fall III semester is spent coming up with dissertation topics and choosing a Dissertation Committee. In order to aid the process of research topic development, third-year students are required to take ECON-7980, "Research Methods," a class in which ideas are developed and presented on a weekly basis. Spring III is spent refining a dissertation prospectus under consultation with the Dissertation Committee, with the goal of a formal **3rd Year Dissertation Prospectus Defense** by May 15 of year III. Successful 3rd Year Prospectus defense and satisfactory completion of the requisite coursework advances the student to Ph.D. Candidate status. It is the student's responsibility to (i) schedule the defense with her/his Committee, (ii) obtain signatures for and submit to the Dean the "Approval of Dissertation Prospectus" and "Admission to Candidacy" forms, and (iii) give one copy to the Director of Graduate Studies and one copy to the Office Manager. A link to the required forms appears below.
5. **4th Year Dissertation Proposal Defense**: Economics dissertations typically consist of three research papers. Years IV and V are entirely devoted to writing the dissertation. Students will be going on the job market in the fall of year V and job applications typically require submitting at least one fully polished dissertation paper to prospective employers by mid-October. With this objective in mind, the **4th Year Dissertation Proposal Defense** should take place no later than May 15 of program year IV. The 4th Year Proposal must consist of at least one fully developed paper and well-developed drafts of the rest of the dissertation. A successful 4th Year Dissertation Proposal Defense implies certification by the Dissertation Committee that (a) a fully polished paper will be ready by the October job market deadline and (b) that it is feasible to complete the entire dissertation within the remaining Program year.
6. **Oral Defense:** It is expected that the PhD in Economics will be earned in five years. Once the dissertation has been completed, the School of Liberal Arts requires an Oral Defense of the dissertation. In order for the degree of PhD in Economics to be completed the student must organize an oral defense of her/his dissertation, have the Dissertation Committee members sign the Oral Defense Approval Form, turn in a copy of the completed Form to the Economics Department Director of Graduate Studies, and submit the original signed form to the SLA Graduate Programs office immediately following the Defense. Students are responsible for knowing the SLA deadlines for degree application and also knowing the requirements for digital submission of their dissertation. These guidelines can be found under the heading "Directions for Completion of Graduation Requirements and Submission of Doctoral Dissertation" at this website: https://liberalarts.tulane.edu/academics/graduate-studies/graduating-students (https://liberalarts.tulane.edu/academics/graduate-studies/graduating-students/).

***A NOTE ON RESIDENCE REQUIREMENTS**: Students should expect to complete the PhD program in five years and yet they will typically finish taking classes in the first half of that time. The dissertation-writing phase thus accounts for at least half of the program. This is a very important, formative time when students mature as professional economists. They interact with the faculty, learn to teach and perform research by working with faculty members as RA's or TA's, present their own work in workshops and seminars, travel to conferences, participate in departmental seminars, and meet with visiting speakers. Students who choose to leave during this period typically never complete the PhD degree. It is therefore expected that all PhD students will remain in residence in New Orleans during this very important and formative period. Leaving New Orleans without obtaining explicit written approval from the student's dissertation advisor and from the Director of Graduate Studies will constitute grounds for terminating financial support permanently. Any such written approval must be obtained by the end of the first month of the semester before the intended absence.*

Policy Economics, MA

The Master of Arts in Policy Economics at Tulane University integrates economic analysis and quantitative methods in a program of study designed for practitioners. Successful students will be prepared to enter the job market with a set of analytical skills designed for economic policy analysis. Whereas a Ph.D. in economics is a research degree, the M.A. in Policy Economics provides a curriculum of applied analysis and quantitative techniques better suited for the practitioner of economics.

This program provides students with a deep and broad exposure to the analytical methods of modern economics that can be applied to policy settings, without requiring the advanced mathematics training that is only essential to academic researchers. The program builds on the strengths of the bachelor's degrees in Economics at Tulane by increasing the required number of economics courses and expanding their rigor and depth. In courses offered jointly with the undergraduates, M.A. students are held to higher academic standards and are generally assigned supplementary research work. Successful students can expect to complete at least seven applied projects in the course of earning the M.A. degree.

Requirements

Masters Program Sample Course Schedule

Internal Applicants (4 + 1)

Internal applicants (4 + 1) must must satisfy all remaining bachelor's degree requirements in their senior year in the undergraduate program. In satisfying these requirements, they may take at most 4 6000-level courses in economics (12 credit hours) that will also count towards the degree of M.A. in Policy Economics. The remaining 24 credit hours must be taken after graduation from their undergraduate program. ONLY 6 credit hours can count towards BOTH undergraduate and graduate degree. In addition, up to 6 additional credit hours taken while an undergraduate that do NOT count toward the undergraduate degree/ are taken in excess of hours required for undergraduate degree can be applied for credit toward the graduate.

Year 1		**Credit Hours**
ECON 6230	Econometrics	3
Select three Masters Electives [1]		9
	Credit Hours	**12**
Year 2		
Select eight Masters Electives [2]		24
	Credit Hours	**24**
	Total Credit Hours	**36**

[1] Masters Electives are 6000-level economics courses.
[2] With the approval of the Director of Graduate Studies, courses in other departments may also serve as Masters Electives.

External Applicants

M.A. students not in the B.A./M.A. or B.S./M.A. track can complete the program in either 3 or 4 semesters. In the first year they should enroll in ECON 6230 Econometrics (3 c.h.). In addition, they will take 11 Masters Electives during their course of study.

Undergraduate

Major

- English Major (p. 241)

Minor

- English Minor (p. 243)

Graduate

- English, MA (p. 243)

English Major

The English Major at Tulane University offers a rich curriculum in which students learn to read, write, and think creatively and critically. In addition to coursework in diverse literatures, the English Department's curriculum offers classes in such areas as film, television, graphic novels, hip hop, standup comedy, new media, environmental studies, queer studies, cultural studies, gender studies, critical race studies, postcolonialism, digital humanities, archival research, philosophy, creative writing, and theory.

Our majors receive extensive training in writing, speaking, and critical thinking throughout the curriculum and become adept at close reading, argumentation, complex and inventive thinking, interpretation, analysis, and research. The courses we offer also invite students to approach their world with a sense of empathy, civic engagement, inclusion, and justice, both through reading literature and through service-learning experiences that allow students to collaborate with local community members, such as those in schools and prisons.

The course of study for the Major provides our students with experience in textual analysis, substantial instruction in writing, an understanding of literature and literary history in relation to systems

of power, and the freedom to tailor coursework according to individual interests. As an English major, you can aim for breadth of study, taking courses in a variety of fields, or you can aim for depth of study, taking a number of courses within a particular field. Students may also opt for a Creative Writing Concentration by taking at least 4 creative writing courses among their electives.

Requirements

The course of study for the English Major provides students with training in literary analysis and critical thinking, substantial instruction in writing, an understanding of literature and literary history in relation to systems of power, and the freedom to tailor coursework according to individual interests.

Majors complete a minimum of 10 courses, which must include:

THE GATEWAY COURSE (ENLS 2000 Literary Investigations): This course introduces majors to the discipline of literary studies, with an emphasis on close reading and analysis, theoretical approaches, research, and writing.

1 SURVEY COURSE (ENLS 2010 Intro To British Literature I, ENLS 2020 Intro To British Literature II, ENLS 2030 Intro To American Literature, or ENLS 2040 Intro To Anglophone Literature): Our survey courses provide our majors with some understanding of literary and cultural history. By covering hundreds of years of literature, the courses make larger movements and shifts visible and provide a crucial context for understanding content in 4000- and 5000-level courses.

1 CAPSTONE ENLS 5010 Capstone Seminars (4 c.h.) or ENLS 4990 Senior Honors Thesis (3 c.h.) and ENLS 5000 Senior Honors Thesis (4 c.h.).

(ENLS 5010 Capstone Seminars): Usually taken during the senior year, capstones are seminar-style courses (small class size; discussion-driven) that focus on a specialized field of study and culminate in a substantial research paper.

ENLS 4990 Senior Honors Thesis (3 c.h.) and ENLS 5000 Senior Honors Thesis (4 c.h.): Completed during the senior year over the course of two semesters, the English Honors Thesis is written under the direction of a faculty member.

Students who complete an English honors thesis do not need to take the Capstone, though they are welcome to do so for elective credit toward the Major. The Capstone also satisfies the SLA/Newcomb-Tulane Writing Intensive requirement.

7 ELECTIVES: In consultation with their major advisors, majors use electives to design their own course of study. Some majors opt for breadth, taking a variety of courses; others aim for depth, focusing on writing or a particular field of literature. There are some guidelines—see below for information about course level and distribution requirements. Students may also use electives to earn a Creative Writing Concentration (https://liberalarts.tulane.edu/departments/english/creative-writing-concentration/).

- 3 of these electives must be courses at or above the 4000 level
- 1 elective may be at the 2000 level
- Students may take more than one Capstone Seminar, in which case the additional Capstone would count as one of the 3 required courses at or above the 4000 level
- Students may complete an Internship (approved by the Department) for elective credit. (An internship does not substitute for one of the 3 courses at or above the 4000 level.)

DISTRIBUTION REQUIREMENTS: Majors must take at least one course in each of the following three areas that are central to literary study. Because these three areas have some fundamental inseparability, one course may satisfy up to two distribution requirements. These distribution requirements may be satisfied by a survey, an elective, or a capstone.

- Literature before 1800
- American or Anglophone literature (i.e., not British)
- Non-dominant perspectives / non-canonical literature with an emphasis on race (including intersectional approaches to gender, sexuality, class, or disability) and on the analysis and critique of unequal systems of power (look here (https://liberalarts.tulane.edu/departments/english/english-major/) for information about approved courses)

Requirements

English Minor

The English Minor is a flexible minor available to all Tulane undergraduates who are keen to develop their writing, reading, and critical thinking skills and to explore literature and its historical and cultural contexts. The English Minor is excellent preparation for the many careers that require effective writing, nimble communication, and critical and inventive thinking.

Requirements

Minors complete a minimum of 5 courses, which must include:

THE GATEWAY COURSE (ENLS 2000 Literary Investigations): This course introduces majors and minors to the discipline of literary studies, with an emphasis on close reading and analysis, theoretical approaches, research, and writing.

4 ELECTIVES: English Minors use 4 electives to design their own course of study.

- 3 of these electives must be upper division courses (any ENLS course at the 3000, 4000, or 5000 level)
- 1 elective may be at the 2000 level
- Students may complete Internships (approved by the Department) for elective credit
- At least 1 elective must be in literature before 1800

English, MA

M.A. Programs

Introduction

The Department of English offers two Master's degree programs: a one-year, two-semester 4+1 M.A. program for Tulane undergraduate English majors, and a three-semester external M.A. program for English or Literature majors with B.A. degrees from Tulane or from other institutions. Each has its own admission requirements and its own timetable to completion.

Students who have earned M.A. degrees in our programs have gone on to doctoral programs and law schools. They have embarked on careers as journalists as well as editors at magazines and publishing houses. Several of our graduates now teach in public and private secondary schools. We have graduates who work on staff as museum curators and in rare book libraries. But some of our graduates go on to careers not directly related to the degree. They chose to pursue the M.A. in order to challenge themselves, to continue the study of literature they enjoy, and to acquire a credential that adds value to their employment profile.

4+1 M.A. Program

The 4+1 M.A. program in English serves Tulane English majors who are interested in pursuing careers or further education in literary studies, museum studies, library science, secondary teaching, and publishing, to name a few of the areas to which our students gravitate. The program begins in the student's senior year and continues for one additional year (the "+1" year) towards completion of the M.A. degree.

During the "+1" year, tuition is approximately one-third the cost of regular undergraduate tuition, not including fees. Regular tuition applies to the senior year. More information on "+1" year tuition is available on the School of Liberal Arts' Applying to an SLA Graduate Program (https://liberalarts.tulane.edu/academics/graduate-studies/prospective-students/) page.

Undergraduate scholarships do not transfer to the "+1" year.

How to Apply to the 4+1 Program

Applications are made online at https://applygrad.tulane.edu/apply (https://applygrad.tulane.edu/apply/). Consult the English Department website's graduate program pages for the application deadline.

Application check list:

1. Completed online application form and a $30 application fee, payable online
2. Application cover letter
3. Writing samples totaling 10-20 pages on topics in literary or cultural studies
4. Unofficial transcript from Tulane University
5. Names and electronic contact information of two English Department faculty members (preferably not Creative Writing instructors) who will electronically submit letters of recommendation on your behalf

External M.A. Program

We accept highly qualified students with B.A. degrees in English or Literary Studies from excellent undergraduate institutions. The external M.A. Program has the same curricular requirements and opportunities as the 4+1 program.

We accept up to two courses of graduate work completed at other universities for transfer credit toward the M.A. degree. Although the program is designed to be completed in three semesters, students are permitted to complete it in four semesters.

The tuition for the program is approximately one-third of undergraduate tuition, not including fees. More information on tuition is available on the School of Liberal Arts' Applying to an SLA Graduate Program (https://liberalarts.tulane.edu/academics/graduate-studies/prospective-students/) page.

How to Apply to the External M.A. Program

Applications are submitted online through Tulane's School of Liberal Arts (https://liberalarts.tulane.edu/academics/graduate-studies/prospective-students/) at its Graduate Admissions Application Portal page. Consult the English Department website's graduate program pages for the application deadline.

Via the portal, please submit the following materials:

1. Completed online application form and a $30 application fee, payable online

2. Statement of purpose
3. Names and electronic contact information of three persons (preferably academic instructors) who will electronically submit letters of recommendation on your behalf
4. An unofficial transcript from each university attended
5. Writing samples totaling 10-20 pages on topics in literary or cultural studies

Applicants will be notified of the department's decision on their application by the Office of Graduate Programs in Tulane's School of Liberal Arts.

Professor Melissa Bailes, Director of Graduate Studies
Department of English
Phone: (504) 865-5160
E-mail: mbailes@tulane.edu

Requirements

The 4+1 M.A. Course of Study

The program is designed so that students can complete the program in one year by taking two required graduate courses in their undergraduate senior year: ENLS 7050 Bibliography & Research Method in the fall term, and ENLS 7890 Fundamentals: Literary Theory (3 c.h.) in the spring term.

These two senior-year courses each count as an upper-level elective course in the student's undergraduate English major, and they count as well toward the student's credit hour total for undergraduate graduation. (Both courses concurrently count toward the student's M. A. degree.)

In the second, "+1" year, students are expected to take four courses in each semester.

A typical course of study for an entering student in the 4+1 program would be:

Year 1		
Fall		**Credit Hours**
ENLS 7050	Bibliography & Research Method	3
	Credit Hours	**3**
Spring		
ENLS 7890	Fundamentals: Literary Theory	3
	Credit Hours	**3**
Year 2		
Fall		
Select four seminars/proseminars		12
	Credit Hours	**12**
Spring		
Select four seminars/proseminars		12
	Credit Hours	**12**
	Total Credit Hours	**30**

Students may take up to two graduate courses in other Tulane departments for transfer credit towards the English M.A. degree. Student must petition the English Department's Director of Graduate Studies to have an extra-departmental course approved for M.A. credit. No graduate courses are offered during the summer term.

The External M.A. Course of Study

The external M.A. program requires 10 courses. No M.A. thesis is required. Students typically take three or four courses per term. There are two required methodology courses, which students usually complete in their first year: ENLS 7050 Bibliography & Research Method (3 c.h.) (usually offered in fall) and ENLS 7890 Fundamentals: Literary Theory (3 c.h.) (usually offered in spring).

A typical course of study for an entering student in the external M.A. program would be:

Year 1		
Fall		**Credit Hours**
ENLS 7050	Bibliography & Research Method	3
Select two graduate seminars/proseminars		6
	Credit Hours	**9**
Spring		
ENLS 7890	Fundamentals: Literary Theory	3
Select two graduate seminars/proseminars		6
	Credit Hours	**9**
Year 2		
Fall		
Select four graduate seminars/proseminars		12
	Credit Hours	**12**
	Total Credit Hours	**30**

Department of French and Italian

Programs

Undergraduate

Majors

- French Major (p. 244)
- Italian Major (p. 249)

Minors

- French Minor (p. 245)
- Italian Minor (p. 250)

Graduate

- French/Francophone Studies, MA (p. 246)
- French/Francophone Studies, PhD (p. 247)

French Major

The major in French is designed to provide students with the necessary skills to communicate effectively in French both orally and in writing. The French program further seeks to familiarize students with the most influential literary, philosophical, critical, and cinematographic works in French, properly understood within their cultural and historical context; to introduce them to the major social and political developments that

have shaped the Francophone world, including North Africa, Sub-Saharan Africa, Asia, and the Caribbean; and to provide them with an understanding of the structure of the French language, attitudes towards its use, and the variation it displays across time, geographical space, and social groups.

Students may also explore Louisiana Creole and Louisiana French in linguistics classes and fieldwork. The junior year and semester abroad programs are integral to the majors in French and are also encouraged for non-majors.

Placement

To simplify the registration process for French language classes, students do not need to take a placement test and can simply place themselves based on the guidelines provided on the Language Learning Center website.

Requirements

A total of 10 or 11 courses, 32-35 credit hours, are required.

Course ID	Title	Credits
Five required courses:		
FREN 2030	Intermediate French [1]	4
FREN 2040	Advanced French [1]	3
FREN 3210	Topics in French and Francophone Literature	3
FREN 4010	French Short Story (Writing Intensive)	4
FREN 5950	Special Topics in French (capstone course requiring a final paper/ Spring only) [2]	3
Select two of the following:		**6**
FREN 3060	Business French	
FREN 3140	French Phonetics	
FREN 3170	French Pop Culture	
FREN 3180	French for World Affairs	
FREN 3250	Topics in French Society & Institutions	
FREN 3350	The Secrets of French Grammar	
FREN 3710	Revitalizing French in Louisiana	
FREN 4400	Sustainable Development in the Francophone World	
Electives		**9-12**
Four electives at the 4000 or 6000 level (12 credit hours) are required for single majors		
Three electives at the 4000 or 6000 level (9 credit hours) are required for double majors		
Total Credit Hours		**32-35**

[1] Students who completed FREN 3150 prior to Spring 2024 are permitted to substitute FREN 3150 for FREN 2040.

[2] The Senior Seminar is offered in the spring semester only. It is required of all French majors, even those who are double majors. In other words, the Capstone experience is a requirement of the major.

Electives

- Two of the advanced electives must be literature courses.
- For one of the advanced electives, students may substitute a 3000-level course taught in English by the Department (e.g. FREN 3110 French Cinema (3 c.h.)) OR an advanced course in a related field (e.g. a course in French Art, French History, French Politics).
- A senior thesis written for Honors in French can count as one of these electives.
- 5000-level courses taken abroad that have been approved as counting toward the FREN major are generally included among the Group III electives.

Nota Bene

- FREN 4560 Internship (1-3 c.h.) and FREN 4570 Internship (1-6 c.h.) (Internship Studies) do not count toward the major. The typical Internship involves 60 hours of work, carries 1 credit hour and is graded on an S/U basis.
- In order to complete the major, the student must have taken at least five French courses taught on this campus.

French Minor

The minor in French is designed to provide students with the necessary skills to communicate effectively in French both orally and in writing. The French program further seeks to familiarize students with the most influential literary, philosophical, critical, and cinematographic works in French, properly understood within their cultural and historical context; to introduce them to the major social and political developments that have shaped the Francophone world, including North Africa, Sub-Saharan Africa, Asia, and the Caribbean; and to provide them with an understanding of the structure of the French language, attitudes towards its use, and the variation it displays across time, geographical space, and social groups.

Students may also explore Louisiana Creole and Louisiana French in linguistics classes and fieldwork. The junior year and semester abroad programs are integral to the majors in French and are also encouraged for non-majors.

Placement

To simplify the registration process for French language classes, students do not need to take a placement test and can simply place themselves based on the guidelines provided on the Language Learning Center website.

Requirements

A total of 6 courses and 20 credits, is required.

Course ID	Title	Credits
Four required courses:		
FREN 2030	Intermediate French [1]	4
FREN 2040	Advanced French [2]	3
FREN 3210	Topics in French and Francophone Literature	3
FREN 4010	French Short Story (Writing Intensive)	4
Select one of the following:		**3**

FREN 3060	Business French	
FREN 3140	French Phonetics	
FREN 3170	French Pop Culture	
FREN 3250	Topics in French Society & Institutions	
FREN 3350	The Secrets of French Grammar	
FREN 3710	Revitalizing French in Louisiana	
FREN 3180	French for World Affairs	
FREN 4400	Sustainable Development in the Francophone World	
Select one elective of the following:		**3**
One French course at the 4000/6000-level		
French literature in translation course		
French cinema in translation course at the 3000-level course		
Total Credit Hours		**20**

[1] Students who place higher than FREN 2030 will be required to replace this requirement with a 3000-level or higher elective course.

[2] Students who completed FREN 3150 prior to Spring 2024 are permitted to substitute FREN 3150 for FREN 2040.

French/Francophone Studies, MA

In New Orleans and Louisiana, French is a living language. In no other state in the Union – in no other city – is French culture so integrally built into the social fabric and its heritage still so vitally in play. The strong appeal of our program both nationally and internationally demonstrates that place matters: students who choose Tulane understand the compelling logic of pursuing their passion in a city so thoroughly steeped in its Francophone past. Located in what is often referred to as "the northernmost city of the Caribbean," Tulane is at the crossroads of the two Americas and the larger Atlantic world, and in proximity to Haiti and the French Antilles. With the cultural history of French in our city and region, a living tradition of *Francophonie*, and the presence and activities of the French Consul General, our city is an ideal place for French study.

The Department of French and Italian offers a 4+1 M.A. in French and Francophone studies for Tulane undergraduate students. As a student in Tulane's 4+1 M.A. in French and Francophone studies, you will be part of the recovery and rediscovery of New Orleans's French-speaking world. You will be contributing to the preservation of the cultural memory of French colonization and immigration from France, Canada, and the Caribbean, and of the city's historic linguistic and ethnic diversity.

The 4+1 M.A. in French and Francophone studies is designed to establish a comprehensive knowledge of French and Francophone literature as well as an acquaintance with linguistics, literary theory, and the techniques of literary scholarship.

Only current Tulane undergraduate students may apply to the 4+1 M.A. in French and Francophone studies. The Department does not offer a terminal M.A. in French and Francophone studies for non-Tulane undergraduates.

The 4+1 M.A. in French and Francophone studies may also be combined with a DIPLÔME DE FRANÇAIS PROFESSIONNEL awarded by the Paris Chamber of Commerce in the following fields:

- AFFAIRES (https://liberalarts.tulane.edu/departments/french-italian/academics/certificate-in-business/)
- RELATIONS INTERNATIONALES (https://liberalarts.tulane.edu/departments/french-italian/academics/certificate-in-international-relations/)
- TOURISME – HÔTELLERIE – RESTAURATION (https://liberalarts.tulane.edu/departments/french-italian/academics/certificate-in-tourism-hotel-industry/)

Requirements

Undergraduate Tulane Students who major in French are eligible to apply for the 4+1 M.A. in French and Francophone studies, a 5-year combined B.A. and M.A. program in French, if they maintain a grade point average of at least 3.0. The 4+1 M.A. in French and Francophone studies may be combined with a **DIPLÔME DE FRANÇAIS PROFESSIONNEL** awarded by the Paris Chamber of Commerce in the following fields:

- AFFAIRES (https://liberalarts.tulane.edu/departments/french-italian/academics/certificate-in-business/)
- RELATIONS INTERNATIONALES (https://liberalarts.tulane.edu/departments/french-italian/academics/certificate-in-international-relations/)
- TOURISME – HÔTELLERIE – RESTAURATION (https://liberalarts.tulane.edu/departments/french-italian/academics/certificate-in-tourism-hotel-industry/)

Students may apply to enter this program beginning in the Fall semester of their junior year, and applications will be accepted through the Fall semester of their senior year.

Coursework

Students in the 4+1 M.A. program will complete the normal undergraduate French major comprising 33 hours (15 hours of core courses and 18 hours of advanced courses). In their senior year (4th year), students will take 6 credits in French at the 6000 or 7000 level. These 6 credits will then also be counted towards the 33 hours required for the 4+1 M.A. in French and Francophone studies.

BA Degree with Major in French

33 hours of course work

- 15 hours of core courses
- 18 hours of advanced courses, of which 6 will be taken during the senior year. (In exceptional cases, and depending on the rotation of course offerings, one or more courses taken in the junior year may be counted among these 6 hours.)

Note: French majors doing the regular B.A. are not required to take 6000-level courses. 4+1 candidates will take 2 courses at the 6000 or 7000 level in their 4th year.

4+1 MA in French and Francophone studies
In their fifth year, students will take 4 courses in the Fall semester and 3 courses in the Spring semester. All course work should be taken within the Department of French and Italian.

The M.A. Paper

Students will write and defend an original research paper worth 6 credits, written under supervision of a faculty member and a second reader. It may be an expanded version of a course paper, and in its final form should be between 20 and 30 pages in length. At least one member of the M.A. committee must be a tenure-line faculty member. In the event that neither of the first two readers is a tenure-line faculty member, a third, tenure-line faculty member will be added to the committee. In all cases the first reader will be a faculty member whose institutional appointment includes the expectation of research. The revised paper is to be submitted to the first reader by March 1st. The defense must take place no later than the first week of April. The supervising professor and a second faculty reader will participate with the student in an oral defense of the paper. The defense will be open to the departmental faculty.

Language Requirement

Before the end of the Spring semester of their fifth year, all students in the 4+1 M.A. program will be expected to demonstrate reading competence in one of the following languages: Arabic, Creole (both taught within the department), Spanish, Italian, Latin, German, or medieval Occitan. The department will consider students' petitions to have other languages accepted, but acceptance will depend upon the student making a case for the usefulness of this language to his or her research.

Diplômes de Français Professionnel

If a 4+1 MA in French and Francophone studies will open the door to increased career prospects, a *Diplôme de français professionnel* will give you the accreditation necessary to make these prospects a reality.

Recognized by companies and organizations worldwide and adapted to the modern business and cultural world, a *Diplôme de français professionnel* will enable you to demonstrate the level of competency required by your future employers. They will also allow you to connect with international and French-speaking professionals and will help you on your path to becoming a successful global citizen.

Designed and offered by the Paris Ile-de-France Chamber of Commerce and Industry, the *Diplômes de français professionnel* are calibrated to coincide with the different levels of the Common European Framework of Reference for Languages (CEFR) developed by the Council of Europe, with diplomas ranging from level elementary (A2) to proficient (C2).

Candidates obtain a diploma upon completion of an exam, which is conceived based on real-life professional situations and is adapted to today's economy. To prepare for the exam, students will be offered, depending on interest expressed, study skill workshops or individual sessions. They will also be given practice exams to take.

In order for the department to gauge student interest in each particular *diplôme*, please declare your interest early during the semester by sending an email to Professor Sojic: asojic@tulane.edu (cmignot@tulane.edu).

Filing for the Degree

Students must inform the School of Liberal Arts of their desire to participate in graduate ceremonies. The Graduate Director will be asked to confirm, by audit, that candidates have completed their degree requirements. Students must also complete a departmental form available from the Graduate Director, called the 4+1 M.A. Checklist (see Graduate Handbook appendix).

To apply, please go to: https://applygrad.tulane.edu/apply/

French/Francophone Studies, PhD

From Old French to Louisiana Creole, from codex to hypertext, graduate study at Tulane fosters a comprehensive and integrative approach to French and Francophone Studies. With an international faculty covering a broad range of research and teaching interests, our program allows students to choose from a rich array of courses and encourages them to approach the study of language, literature and civilization through transhistorical and cross-cultural perspectives. This kind of comparative engagement provides students with intellectual depth and interdisciplinary dynamism.

Students at Tulane have unique opportunities for exploring the French, Creole, and Cajun cultures of Louisiana. Our location affords us a privileged vantage point from which to observe other situations of localized or marginalized languages and cultures in their relationship to broader, often hegemonic forces: France's regional languages (Occitan, Breton, Alsatian, etc.) in conflict with the official language revered as an inviolable symbol of national unity; immigrant cultural practices (such as the wearing of the veil) in conflict with French cultural norms; creole languages stigmatized as corrupt forms of the standard, etc. In our various fields of research, a focus on the local provides both a revealing lens through which to view the global and a healthy check on universalizing theories of culture and language.

The program's areas of strength include Francophone, Afro-Caribbean, and Mediterranean studies, medieval and early modern studies, cultural studies and cultural history, critical theory, political theory, gender studies, film theory, creole linguistics, European and African philosophy, performance studies and poetics.

Financial support includes full tuition remission and a stipend for up to five years of Ph.D. study (four years for students entering with the M.A. degree). The stipend is approximately $26,000.

To apply, please go to: https://applygrad.tulane.edu/apply/

Requirements

The Ph.D. builds on a solid core of course work in French and Francophone Studies and includes as well a concentration in an interdisciplinary subfield that may be fulfilled entirely or in part through courses taken in other departments or programs. The degree is interdisciplinary and integrative, drawing on diverse fields for a broad methodological base.

Course Work

Students must complete a minimum of 54 credit hours, including transfer work and work already presented for the M.A. degree. For students entering with a B.A., it is expected that course work will be completed by the beginning of the third year of study. Students

will graduate with a Ph.D. in French and Francophone Studies and a concentration in one of five integrated areas:

- Visual cultures and technologies – Courses in film, urbanism, new media, performance
- European studies – Courses in human rights; political, cultural and institutional histories; Islam in Europe; medical anthropology; and ethno-psychiatry
- Francophone colonial and post-colonial studies – Courses in Atlantic, Caribbean and African area studies; Creole(s) and creolization; Arabic and Islamic studies
- Language and identity – Courses in theory, philosophy, ethics and law, minority languages and identities, world languages and literatures
- Linguistics – Courses to include Survey of French Linguistics (FREN 6070), History of the French Language (FREN 6210), Field Research on French in Louisiana (FREN 6110), Special Problems in French Linguistics (FREN 6910), Translation Theory and Practice (FREN 6160), and courses in the Linguistics program (any course with an LING prefix).

Students entering the program with the M.A. should declare their concentration at the end of their second semester on campus. B.A. students who will be continuing on to the Ph.D. should inform the Graduate Director of their choice of concentration when completing the M.A degree.

Concentration in one of the four subfields will be constituted by successful completion of two graduate courses on topics related to the subfield. Students are also expected to demonstrate knowledge of their chosen field of concentration in the Ph.D. qualifying exams. One or both of the required courses may be taken in correlate departments or programs. Each semester, students at the Ph.D. level are allowed to take at most one course outside the Department of French and Italian.

French 6050 ("Teaching French") and French 6150 ("Critical Theory") are required of all students and must be taken in the first semester that they are offered after the student enters the program.

Beyond the 3 credits of 7000-level courses required for the M.A., doctoral candidates who begin the program with a B.A. must complete two additional 7000-level courses (that is, 6 credits of seminar-level courses). Students entering the program with an M.A. from another institution must complete two 7000-level courses in the Tulane program.

During the course of their graduate study, Ph.D. students cannot take more than 3 hours (1 course) in independent study. Independent studies courses are approved only in exceptional cases; students are encouraged to fulfill their course requirements through regularly scheduled courses.

Ph.D. Qualifying Exams

For students entering the program with a B.A., two of three written Ph.D. preliminary exams will be taken in the Spring semester of the student's third year, no later than two weeks before the end of classes. The specific date will be determined on an annual basis by the Graduate Advisor. The third, self-designed, exam will be taken in the second full week of classes of the Fall semester of the student's fourth year.

Students entering the program with an M.A. will take their first two exams in the Spring semester of their second year, no later than two weeks before the end of classes. The specific date will be determined on an annual basis by the Graduate Advisor. These students will take the third, self-designed, exam in the second full week of classes of the Fall semester of their third year.

In the first week of the Fall semester prior to the semester in which the student plans to take the first two exams, they must notify the Director of Graduate Studies. The Director of Graduate Studies will then contact the student's prospective dissertation advisor, who will serve as head of the examining committee and will select two additional readers.

Students will sit for three written examinations and an oral examination. The oral examination will normally take place in the week following the first two written exams. All three written exams are take-home and open-book. The questions for the written exams normally will be made available to the student on a Friday morning at 9:00 a.m., and the answers must be submitted electronically to the examining committee by 5:00 p.m. of the following Monday. It is expected that the answers be both synthetic and analytical, and that they demonstrate familiarity with the primary and secondary texts on the reading list independently of recourse to lengthy quotation and paraphrase. All sources consulted must be duly cited.

For each written exam, the student will answer either one or two questions. Students will normally write from 3500 to 4200 words (i.e., 10 to 12 pages in 12-point Times New Roman font with one-inch page margins) for each exam. If an exam consists of two separate questions, the 10 to 12 pages should be divided more or less evenly between them.

The first written examination will cover a particular century. The second written examination will cover either a century or one of the four sub-fields listed above. The third, self-designed, written examination will be based on a reading list composed by the student in close consultation with their prospective dissertation director. The reading list for the self-designed exam should not significantly overlap with the reading list for either of the other two written exams and should be considered a blueprint for the dissertation bibliography.

The oral examination will last for approximately one hour, the first twenty minutes of which will consist of the student's analysis of a literary text. The analysis should not be read but presented extemporaneously from a copy of the primary text along with an outline or notes prepared ahead of time by the student. The remainder of the oral exam will cover the same material that was initially tested on the two written exams.

The passage for textual analysis is chosen by the committee head in a conversation with the student in the semester prior to the examination semester. The student will not know ahead of time the precise work from which the text for analysis will be drawn, but will be provided with the text immediately upon his or her completion of the written exams.

For all preliminary exams, the language of examination will be alternately French and English. The first exam will be written in one of those two languages and the second exam will be written in the other. The self-designed exam is to be written in the same language as the dissertation. The opening portion of the oral exam (the textual analysis and subsequent questions or comments pertaining to the analysis) will be presented in French. The remaining portion of the

oral exam will be conducted primarily in French, but examiners may also ask questions in English, particularly when the reading material being tested is in English. When students announce their intention to sit for the Ph.D. exams, they should remember to inform the Director of Graduate Studies of their choice of language for each of the written exams.

All examinations will be evaluated on a Pass/Fail basis, and a failed exam may be re-taken only once, normally within two to three weeks of the original exam. Students must pass all four exams, written and oral, in order to be admitted to candidacy. They will be informed of the result of the oral examination immediately following that exam, and they will learn of the committee's decision regarding the first two written exams, including any need for re-takes, only after all sections of the exam (both oral and written) have been completed. Once the student has passed the self-designed exam, s/he will meet with the members of the examining committee to discuss the answer(s) to the exam and obtain guidance for writing the prospectus.

Defense of the dissertation prospectus

The dissertation prospectus should be defended by December 15 of the semester in which the student sits for the self-designed exam. The prospectus is approximately 10 to 15 pages in length, including a supporting bibliography that convincingly lays the ground for subsequent dissertation research. The student should be familiar with the works listed in the bibliography and be able to explain their relevance to the research project. After summarizing the prospectus, the student will answer questions from the faculty. The prospectus is to be approved by the dissertation director (first reader) and by two other professors serving as second and third readers. All committee members and all full-time faculty of the Department of French and Italian are invited to attend the prospectus defense, which is to be held during the academic year, but not during semester finals or between semesters. The prospectus must be submitted to readers no less than two weeks before the date of the defense, with a copy left in the conference room for other faculty to read.

Upon successful defense of the prospectus, the student should ask readers to sign the form provided by the School of Liberal Arts (https://liberalarts.tulane.edu/academics/graduate-studies/resources (https://liberalarts.tulane.edu/academics/graduate-studies/resources/)).

Reading knowledge examinations

Students must demonstrate by examination reading competence in a second foreign language (beyond the language presented for the Master's) that is pertinent to their field of study. Students normally choose from among Arabic, Creole, Spanish, Italian, Latin, German, and medieval Occitan, but they may petition to have another language accepted if they can clearly demonstrate that it will be of significant use in their research.

Language competence may be demonstrated by passing an examination administered by the department at Tulane in which the language is taught by standardized (ETS) examination, by official record of competence demonstrated elsewhere at the graduate level, or by satisfactory performance in a 6000- or 7000-level course taught in the language.

In the summer, the Graduate School may offer reading-competence courses in languages for which there is adequate demand. Satisfactory performance on an exam given at the end of the course fulfills the reading-competence requirement for the degree. However, students may, if they wish, opt to take one of the external exams (as listed in the paragraph above) rather than sit for the in-course examination.

As an alternative to demonstrating competence in this second foreign language (actually a fourth language, beyond French, English, and a third language for the M.A.), students may elect to do advanced coursework in the same language in which they demonstrated competence for the M.A. Successful completion of a graduate course requiring reading, speaking, writing, and lectures in that language will be accepted by the department in lieu of an examination in an additional language.

Students who wish to conduct research in the early periods, as well as those who wish to pursue topics in other fields requiring special linguistic competence, are strongly urged to consult with faculty members in the relevant fields so that they may plan which languages to study.

Defense of the dissertation

The oral defense of the dissertation, held after the dissertation has been approved by all three committee members (or, if necessary, by two out of the three), will be open to all members of the committee and to all full- time faculty of the Department of French and Italian.

Italian Major

A major in Italian consists of nine courses beyond ITAL 2030 Intermediate Italian (4 c.h.)/ITAL 2040 Intermed Ital Romnc Lang (4 c.h.) and introduces students to Italian literature, culture and thought.

Requirements

The student is required to take the following courses:

Course ID	Title	Credits
ITAL 3130	Advanced Conversation and Composition	3
ITAL 3250	Italian Language through History and Culture	3
Select four courses devoted to literature or related field at the 4000- or 6000-level (may include one course taught in English upon consultation with the Italian Undergraduate Advisor)		12
Select three electives *		9
Total Credit Hours		**27**

Additional Information

In order to take a 4000-level course taught in Italian a student must have successfully completed a 3000-level course taught in Italian or have received a 4000-level placement.

The junior year and semester abroad programs are integral to the major in Italian and are also encouraged for non-majors.The student can count courses taken abroad towards the major only with prior approval by the Italian Undergraduate Advisor.

At least five of the courses counting towards the Italian major must be completed in residence. At least one of the courses completed in

residence towards the major must be an Italian 4000- or 6000-level course.

* Electives
  - May include internships.
  - May include one course taught in English upon consultation with the Italian Undergraduate Advisor.

Italian Minor

A minor in Italian consists of SIX courses or 18 credits above ITAL 2030 Intermediate Italian (4 c.h.).

Requirements

A minor in Italian consists of SIX courses or 18 credits above ITAL 2030 Intermediate Italian (4 c.h.).The student is required to take the following courses including:

Course ID	Title	Credits
ITAL 3130	Advanced Conversation and Composition	3
ITAL 3250	Italian Language through History and Culture	3
Four electives in literature or related field *		12
Total Credit Hours		**18**

Additional Information

- In order to take a 4000-level course taught in Italian a student must have successfully completed a 3000-level course taught in Italian or have received a 4000-level placement.
- Students are encouraged to participate in a study abroad program approved by the department. The student can count courses taken abroad towards the minor only with prior approval by the Italian Undergraduate Advisor.
- At least three of the courses counting towards the Italian minor must be completed in residence.

* Electives
  - May include internships.
  - May include one course taught in English upon consultation with the Italian Undergraduate Advisor.

Majors

- German Studies Major (p. 250)
- Russian Major (p. 251)

Minors

- German Studies Minor (p. 251)
- Russian Minor (p. 251)

German Studies Major

German Studies provides students with a wide range of opportunities to explore culture, literature, and language of the German-speaking countries. Such studies may fulfill the language requirement, serve as part of the general education, or lead to an in-depth course of study as a German Studies major, double major, or minor. The study of German prepares students for academic careers in fields such as history, art history, religion, philosophy, political science, literature, and music as well as for professional careers that emphasize the international aspects of business, law, economics, finance, government, science, engineering, and education.

Requirements

The major in German Studies consists of a total of 30 credits or ten courses beyond GERM 2030 Intermediate German (4 c.h.), with 4 Foundational courses (12 credits) and 6 Advanced courses (18 credits).

All German studies majors complete three advanced courses, one 4000/6000-level course, one Advanced Undergraduate Seminar and one Senior Seminar. The three advanced courses may include up to two courses taught in English at the 3000-level (providing there is a significant reading and writing requirement in German) and/or up to two electives at the advanced level in a related field outside the department, e.g., courses in German art, history, music, philosophy, and politics.

A student entering Tulane without any prior German knowledge could take beginning language classes his/her first three semesters, and then take an average of two courses for the next five semesters.

Course ID	Title	Credits
Group I. Foundational Courses		
GERM 3050	Advanced Grammar & Composition	3
Select three courses of the following:		9
GERM 3160	Readings In German Literature	
GERM 3250	German Lang & Culture I	
GERM 3260	German Lang & Culture II	
GERM 3270	German Literature & Culture 1871-present	
Group II. Advanced Courses		
GERM 4800	Advanced Undergrad Sem	3
GERM 6800	Advanced Undergraduate Seminar	3
Select one other 4000-level or 6000-level course		3
Select three courses of the following:		9
Up to two GERM 3000-level courses taught in English [1]		
Up to two electives at the advanced level in a related field outside the department [2]		
Any other 4000-level or 6000-level course [3]		
Total Credit Hours		**30**

[1] Providing there is a significant reading and writing requirement in German. (e.g. GERM 3440 Representing Holocaust (3 c.h.), GERM 3510 Ger Cult & Civilization (3 c.h.), GERM 3530 Rehearsing Revolution (3 c.h.), GERM 3540 Marx, Nietzsche, & Freud (3 c.h.),

GERM 3550 Germ Lit In Translation (3 c.h.), GERM 3660 Love, Death & Sexuality (3 c.h.), GERM 3670 Grimm: Devel German Fairy Tale (3 c.h.), GERM 3710 Intro To German Film (3 c.h.), GERM 3720 Weimar Cinema (3 c.h.)).

[2] e.g. courses in German art, history, music, philosophy, and politics

[3] e.g. , GERM 4410 The German Novelle (3 c.h.), GERM 4430 German Drama (3 c.h.), GERM 4710 Special Topics (3,4 c.h.), GERM 4720 Special Topics (3 c.h.), GERM 6030 Survey of German Lit I (3 c.h.), GERM 6040 Survey of German Lit II (3 c.h.), GERM 6150 Studies In 19th Cen Lit. (3 c.h.), GERM 6180 Age of Goethe & Schiller (3 c.h.), GERM 6910 Independent Study (3 c.h.),).

German Studies Minor

German Studies provides students with a wide range of opportunities to explore culture, literature, and language of the German-speaking countries. Such studies may fulfill the language requirement, serve as part of the general education, or lead to an in-depth course of study as a German Studies major, double major, or minor. The study of German prepares students for academic careers in fields such as history, art history, religion, philosophy, political science, literature, and music as well as for professional careers that emphasize the international aspects of business, law, economics, finance, government, science, engineering, and education.

Requirements

The minor in German Studies consists of five courses above GERM 2030 Intermediate German (4 c.h.).

Course ID	Title	Credits
GERM 3050	Advanced Grammar & Composition	3
Select one 4000-level course		3
Select the remaining three courses from advanced language, literature, or culture courses in consultation with the designated departmental advisor		9
Total Credit Hours		**15**

One course taught in the department in English at the 3000-level is allowed (providing there is a significant reading and writing requirement in German).

Russian Major

Russian Studies Major

The Russian Major is housed in our Department and is designed to provide students with the necessary skills to communicate effectively in Russian both orally and in writing. The Russian program also seeks to familiarize students with influential literary, critical, and cinematographic works in Russian, studied within their cultural and historical context. Furthermore, the program introduces students to various ethnicities, their histories and roles in shaping today's Russia. Finally, it provides them with an understanding of key social and political trends and challenges defining the Soviet and the post-Soviet era.

Requirements

The Russian major requires 27 credits (nine courses) beyond Russian 2030. Courses taught in English, such as Tolstoy and Dostoevsky or courses on Russian art, count toward the major. Students may also petition for permission to use two courses outside the department (e.g. in Russian history or Russian politics) toward the major. The department generally accepts transfer credit toward the major from summer and semester study at accredited U.S. and Russian universities. No more than four courses can be counted toward major if the student spends an entire year abroad, and no more than 3 courses for one semester abroad.

Programs

Undergraduate

Major

- History Major (p. 252)

Minor

- History Minor (p. 255)

Graduate

- History, MA (p. 255)
- History, PhD (p. 255)

History Major

The history major requires all students to take a minimum of 30 credits or ten courses (excluding one-credit courses). The major aims to assure that all students have taken at least one course in four areas of the world (United States, Europe, Latin America, Middle East, Asia and Africa). It also aims to assure some exposure by all students to history prior to 1800, when there is much less evidence for making historical judgments than in the modern era, as well as requiring at least one course from the modern era. Apart from these distribution requirements, students are free to pursue their interests in one or more areas of history in as much depth as they choose.

All history majors are required to take three seminars. The aim of these seminars is to train students how to understand the contingency of historical interpretation to frame historical questions, to learn to use primary sources to find the evidence necessary to develop historical analysis, and to write papers in clear and coherent prose. All history majors must take two of the department's 6000-level Advanced Seminars. At least one of these Advanced Seminars must be taken during a student's Junior or Senior year. All 6000-level seminars have, as one of their central requirements, a major research paper that incorporates analytical, research and writing skills. Finally, students must take a third seminar at either the 3000 or the 6000 level. The department suggests, but does not require, that students take a 3000 level seminar before taking an Advanced Seminar.

Requirements

The History major consists of ten courses totaling at least 30 credits, excluding one-credit courses.

- All majors must take at least three seminars, including two Advanced Seminars at the 6000 level (**students who declared their majors prior to 2021 AND have completed a Methods Seminar need only take one Advanced Seminar**). The third seminar may be at the 3000 or 6000 level. Seminars must be taken at Tulane.
- At least one Advanced Seminar must be taken during a student's junior or senior year.
- Students must take at least one pre-1800 course and at least one post-1800 course.
- Students must take at least one course in four of the following seven areas: Africa (HISB), Asia (HISC), Europe (HISA and HISE),

Latin America (HISL), Middle East (HISM), History (HIST) and United States (HISU).

- No more than three (3) 1000 level courses may count toward the major.
- Courses that do not have a letter grade cannot count toward the major.
- A maximum of two courses from other departments can count towards the major.

Advanced Seminars

Advanced seminars - numbered 6000 to 6999 - are open to sophomores, juniors and seniors, and also to graduate students. Sophomores may require permission from the course instructor to enroll in a 6000-level seminar.

Pre-1800 Course Options

Ancient and Medieval History (HISA)

- All HISA courses are included under Ancient and Medieval History with the exception of HISA 3230 Great Capts Alexander-Patton (3 c.h.)
- The following courses in Classical Studies can be counted toward the history major, as European history courses prior to 1800:

Course ID	Title	Credits
CLAS 1010	The Rise of Rome	3
CLAS 2320	Ancient Greek Religion	3
CLAS 3090	Law & Society In Ancient Rome	3
CLAS 4080	Sem Anc Society & Econ	3

African History (HISB)

History Minor

In order to receive a history minor, students must complete six courses, including two seminars. Students working toward a history minor are encouraged to take a range of courses but are free to pursue their own academic interests. It is expected that by taking six history courses students will develop both research and writing skills, including working with primary and secondary sources.

Requirements

The History Minor consists of six courses distributed as follows:

- No more than one course at the 1000-level.
- At least one 3000-level seminar.
- At least one Advanced Seminar numbered 6000-6999.
- Courses that do not have a letter grade cannot count toward the major or minor.

History, MA

Please note that we do not offer a terminal M.A. degree outside of the 4+1 program and the Tulane Employee M.A.

The 4+1 Program in History

The 4+1 in History offers current Tulane students and recent grads the opportunity to earn an M.A. degree through our accelerated M.A. program. The program is designed for History majors or those who have taken at least 6 credits of 6000- or 7000-level History courses.

Applicants must meet the following eligibility requirements:

- Have taken at least 6 credits (2 courses) at the 6000 or 7000 level
- Have a minimum GPA of 3.33 in their History courses
- Provide a letter of recommendation from a current Tulane History Department faculty member who will agree to work with the student through completion of the M.A.

Please note that applicants do not need to take the GRE, nor is there a language requirement. Tulane graduates can apply up to two years after completing their undergraduate degree.

Applications are accepted on a rolling basis, but priority evaluations is given to students who submit all required materials by April 1.

Requirements

The M.A. degree is earned with a minimum of 30 credits of coursework. Six credits (2 courses) of applicable 6000- or 7000-level History courses taken as an undergraduate will count toward the degree. Students must then earn a further 24 credits (8 courses), including HIST 7001 - Seminar in Historical Practice, during the M.A. year. Students may choose to pursue a thesis or non-thesis option to complete the program; the non-thesis option requires a comprehensive exam administered by two faculty members. Students must maintain a GPA of 3.33 to remain in good standing in the program.

History, PhD

The Ph.D. in History is a highly selective program. It is both small enough to ensure plenty of faculty-student engagement and large enough to allow students to pursue research within broad chronological, geographic and thematic fields. We encourage students to develop the widest possible range of methodological skills in dealing with historical sources. The faculty in the Department of History have broad teaching and research interests, with particularly strong major fields in United States history (especially the U.S. South), Latin American history; Modern Europe; and Europe from the medieval era to the Renaissance. In addition, minor fields are offered in a variety of geographic, transnational and thematic fields.

Requirements

To obtain a Ph.D. degree, students must complete a minimum of forty-eight credits of course work and other requirements as specified below. Students earn their M.A. degree while working towards the Ph.D. degree.

- Complete required historiography and methodology courses:
  HIST 7001 Seminar in Historical Practice (3 c.h.) - taken in the fall of Year 1
  HIST 7003 Historiography & Methods I (3 c.h.) - normally taken as an independent study summer of Year 1
  HIST 7005 Historiography & Methods II (3 c.h.) - normally taken as an independent study summer of Year 2
- Complete required writing courses:
  HIST 7006 Intermediate Historical Writing (3 c.h.) - normally taken as an independent study summer of Year 1
  HIST 7007 Advanced Hist. Writing (3 c.h.) - normally taken as an independent study summer of Year 2

- Complete a further 30 credits (10 courses) of coursework, including at least three 7000-level seminars in addition to the required seminar HIST 7001 Seminar in Historical Practice (3 c.h.). *Independent studies do not count as seminars*. Courses taken outside of the department of history require approval of the advisor.
- Demonstrate proficiency in two languages (one language for students whose first field is United States or Britain from 1500).
- Complete six semesters of TA and/or RA service.
- Develop and teach a one-semester undergraduate course.
- Complete HIST 7008 Prof. Deve. and Documentation (3 c.h.), leading to the successful compilation and defense of the portfolio.
- Write an acceptable dissertation, and defend this in an oral examination.

Department of Jewish Studies

Programs

Undergraduate

Major

- Jewish Studies Major (p. 256)

Minor

- Jewish Studies Minor (p. 256)

Jewish Studies Major

The major consists of at least 30 credits in Jewish studies courses, Hebrew courses, or courses in related fields. The major must include JWST 1010 and JWST 1020 as well as courses in each of the following periods:

•Pre-modern: At least two courses required from JWST 2100, 3140, 3150, 3500, 3520, 3530, 3540, 3590, 3600, 4110, 4250, 4350.

• Modern: At least two courses required from JWST 3100, 3210, 3220, 3330, 3340, 3440, 3750, 4150, 4210, 4300, 4420, 4670.

Additional JWST courses (and those in other departments) also fulfill the requirements for Pre-Modern and Modern courses.

At least one course must be at the 4000 level or above. Courses taken to fulfill Tulane's foreign language proficiency requirement may not count toward the major.

Additional courses require departmental approval for substitution (ex: CLAS and RLST).

Requirements

The major consists of at least 30 credits in Jewish Studies courses, Hebrew courses, or courses in related fields. The major must include JWST 1010 and JWST 1020 as well as courses in each of the periods below.

Course ID	Title	Credits
JWST 1010	Introduction to Jewish Civilization: Foundations	3
JWST 1020	Intro to Jewish Civ:Modern Era	3
Pre-modern (at least 2 courses):		
JWST 2100	Intro To Hebrew Bible	3
JWST 3140	Selected Readings Hebrew Bible	3
JWST 3150	Second Temple Judaisms	3
JWST 3500	Goldn Age Spansh Jewry I	3,4
JWST 3520	Goldn Age Span Jewry II	3
JWST 3530	Jewish Middle Ages	3
JWST 3540	Jewish Renaissance to Age Reas	3
JWST 3590	Greek Philo & Jewish Tht	3
JWST 3600	Women In Hebrew Bible	3
JWST 4110	Rabbinic Judaism	3
JWST 4250	Dead Sea Scrolls	3
JWST 4350	Rashi, Halevi, Maimonide	3
Modern (at least 2 courses):		
JWST 2700	Jews and American Pop Culture	3
JWST 3100	Select Topics	1-3
JWST 3130	Jewish Comics and Graphic Novels	3
JWST 3210	American Jewish History	3
JWST 3220	Arab/Israeli Conflict	3
JWST 3330	Jewish Music	3
JWST 3340	Early Amer. Jewish Hist.	3
JWST 3440	Holocaust In Film & Lit	3
JWST 3750	Jewish ID in Modern Literature	3
JWST 4120	Sexuality in Jewish Culture	3,4
JWST 4150	Women,Judiasm,Jewish Cul	3
JWST 4210	American Jewish Movements	3
JWST 4300	Conflict In Cult & Lit	3
JWST 4420	Topics Jewish Lit/Histor	3
JWST 4500	The History of Zionism	3
JWST 4670	Israeli Jewish & Arab Israeli	3
ENLS 4324	The Jewish People: From Racial Other to White Americans	3

Additional JWST courses (and those in other departments) also fulfill the requirements for Pre-Modern and Modern courses. At least one course must be at the 4000 level or above. Courses taken to fulfill Tulane's foreign language proficiency requirement may not count toward the major. Additional courses require departmental approval for substitution (ex: CLAS and RLST).

Jewish Studies Minor

A minor in Jewish Studies consists of 15 credit hours in 5 courses.

Requirements

A minor in Jewish Studies consists of 15 credit hours in 5 courses.

Requirements include:

- Only two 1000 level courses may count towards the minor; however, students are not required to take a 1000 level course for the minor. NOTE: Department approval may be given allowing multiple 1000 level courses to apply to the minor.
- Up to two HBRW courses past the 2030 level may count toward the minor. No courses used to satisfy the University's language

requirement may be used as credits toward the minor. Hebrew courses are not required to complete the minor.

- At least one course should be at the 4000 level or above (CLAS 3140 accepted substitute).
- All 3000 or 4000 level coursework for the minor must be taken in residency at Tulane; courses taken abroad do not count toward this requirement.
- Additional courses require departmental approval for substitution (ex: CLAS and RLST).

Music Minor

The Minor in Music is a flexible program that gives students grounding in performance, theory, and musicology while allowing them to cater to their particular music study interests. By choosing from a variety of core courses and electives, students can design their own pathway in Performance, Composition, Musicology, Ethnomusicology, Black American Music, Musical Theatre, or other areas.

Requirements

Course ID	Title	Credits
Core		
MUSC 2030	Comparative Music History: Listening and Music in Cross Cultural Perspective	3
MUSC 2040	Music, Culture, and Society	3
Theory		**7-8**
Depending on music theory placement during the first week of classes, students will take either:		
MUSC 1000	Fundamentals of Theory	
MUSC 1510 & APMS 1090	Music Theory I and Musicianship Lab I	
OR		
MUSC 1510 & APMS 1090	Music Theory I and Musicianship Lab I	
MUSC 1520 & APMS 1100	Music Theory II and Musicianship Lab II	
Electives		**4**
4 credits in APMS or MUSC electives		
Total Credit Hours		**17-18**

Music Science and Technology Minor

Tulane's Music Science and Technology Minor Curriculum allows students to explore intersections between music, engineering, production, and computer programming, with a focus on the creative applications of technology in the creation of music. The program encourages creativity in technical research and in composition for various media and performance. Area objectives include developing innovative approaches to the scientific and artistic study of music composition, performance, and media, undertaking multidisciplinary research relevant to the creation and perception of music, and fostering an interdisciplinary culture between members of the fine arts, engineering, and science communities on campus.

Our students undertake projects in music signal processing, sound synthesis and analysis, computer/electro-acoustic music composition, intermedia, music performance systems design, electronic music history, and music perception. Our expanding computer music composition facilities include a dedicated teaching laboratory with eight student computer workstations. The music department maintains an up-to-date composition studio featuring professional level microphones, monitors, and controllers with 8.1 channel surround sound capabilities.

Requirements

4 credits in APMS ensemble credit Choose from courses numbered APMS 2171 to APMS 2187		
Total Credit Hours		**19-22**

Music, BA

The Bachelor of Arts (BA) in Music provides a unique general education that trains creative individuals to work in areas such as general performance or compositional techniques, musicology, ethnomusicology and music theory, becoming proficient in academic musical critique and general musical creativity. Courses in musicology and ethnomusicology provide the cultural and historical context needed for proper musical interpretation and creation and are also core courses for developing critical musical skills. Courses in music theory provide a core understanding of the basic principles of musical structures and musicianship that set the stage for musical experimentation and innovation as well as provide the tools for solid analytical skills for musical critique. Our undergraduate experience is characterized by small class sizes, personalized mentorship, and a menu of choices for one's artistic production.

Requirements

Students pursuing the B.A. in Music must either take or test out of MUSC 1000 Fundamentals of Theory (3 c.h.) in their first semester of the program.

Music, BFA

The Bachelor of Fine Arts (BFA) in Music provides a unique and tailored education that trains creative individuals to excel in performing a musical instrument of their choice, in voice performance, or in other specialized areas of performance, including: music and technology, performance, composition, musical theater, and Black American Music. Courses in musicology and ethnomusicology provide the cultural and historical context needed for proper musical interpretation and creation. Courses in music theory provide a core understanding of the basic principles of musical structures and musicianship that set the stage for musical experimentation and innovation. Our undergraduate experience is characterized by small class sizes, personalized mentorship, and a menu of choices for one's artistic production. Pathways towards a specialization are suggested on the department website and should be guided by a department advisor.

Note: For the BFA in Music, students must fulfill all general requirements as described in the Liberal Arts curriculum including those of the Newcomb-Tulane College core with the following exception: one science with laboratory course is required in the Math and Natural Science distribution requirement of the core curriculum for B.F.A. degree-seeking students instead of one science with laboratory course plus an additional Math and Natural Science course.

Requirements

Course ID	Title	Credits
Music Studies (3 courses)		
MUSC 2030	Comparative Music History: Listening and Music in Cross Cultural Perspective	3

APMS 2181	Percussion Ensemble	1
APMS 2182	Concert Band	1
APMS 2183	Marching Band	1
APMS 2184	Big Jazz Band	1
APMS 2185	Jazz Combo	1
APMS 2186	Orchestra	1
APMS 2187	Musical Theatre Workshop	1

Music, MA

The Department of Music offers the **Master of Arts** degree in **Musicology and Composition.**

M.A. in Musicology with a concentration on New Orleans Music

The M.A. program allows students to take advantage of the unique musical culture of New Orleans while pursuing a rigorous curriculum in musicology. Study is focused on music and culture of the American South, the Caribbean, Latin America, Africa, and Europe and especially their interrelation in New Orleans. Methods of historical musicology, ethnomusicology, and musical theory are utilized in the interpretation and analysis of jazz, ragtime, classical, blues, funk, hip-hop, and other forms, while emphasizing the geographic and social context in which the music has been produced. Resources include the Hogan Archive of New Orleans Jazz, the Maxwell Music Library, the Louisiana Collection, the Amistad Research Center, the Stone Center for Latin American Studies, and the seemingly limitless possibilities of interacting with local musicians and institutions.

M.A. in Composition

Music composition is about creativity, imagination, communication and collaboration. It requires highly developed multilinear critical analytical skills, excellent organizational skills and a great deal of attention to detail. Music brings people from different backgrounds and communities together, enhances creativity, develops imaginations and helps you to make emotional connections with people. Several of our Music Composition program alumni have had highly successful and diverse careers as composers of abstract music and as faculty members and administrators at major institutions. Many others have successfully aligned their creative endeavors with interdisciplinary pursuits in areas such as multimedia, music for film, music therapy, music business, music and management, or entertainment law. Over the years, the Music Composition program has also graduated many alumni who have had highly successful careers in other diverse disciplines: from the sciences, to medicine, to finance, mathematics, and management.

If you have any questions about the following material please contact Prof. Sakakeeny (mattsak@tulane.edu) about Musicology or Prof. Dulaney (edulaney@tulane.edu) for questions on Composition or graduate studies.

Requirements

Musicology Candidates for the M.A. degree must complete 30 credit hours of at least 24 semester hours of course work (including MUSC 7030 Intro To Graduate Study (3,4 c.h.)), pass a reading knowledge examination in one modern foreign language (French, Spanish or other with approval) by the end of the first semester, write an acceptable thesis, and defend this thesis in an oral examination for an additional 6 semester hours. Candidates for the M.A. degree in musicology with a specialization in New Orleans music must take the following:

Course ID	Title	Credits
MUSC 6310	History/Music In The US	3
MUSC 6340	Seminar In Jazz	3
MUSC 7030	Intro To Graduate Study	3
MUSC 7060	Musical Cultures - New Orleans	3
MUSC 7930	Independent Study	3
Select the other musicology requirements		9
Thesis		6
Total Credit Hours		**30**

This program accepts students every other year, and the next admission period is for Fall 2021. In addition to the requirements on the official application, applicants must submit a writing sample for consideration. The sample may be brief, and undergraduate papers are acceptable, as long as the sample demonstrates fundamental research and writing skills. Questions may be directed to Prof. Sakakeeny (mattsak@tulane.edu) or Prof. Dulaney (edulaney@tulane.edu).

Candidates for the M.A. degree in Composition must complete 30 credit hours of at least 24 semester hours of course work (including MUSC 7010 Advanced Composition (3 c.h.), MUSC 7020 Advanced Composition (3 c.h.), MUSC 7040 Seminar Musical Analysis (3 c.h.)) and must present a recital of original works including a major, extended work (consult with Head of Composition for details) for an additional 6 semester hours.

Music, MFA

The Department of Music offers the **Master of Fine Arts** degree in **Performance** and **Musical Theatre**.

The Department of Music offers an MFA in Performance for graduate students receiving training from music professors who are professional artists and scholars. Performers have the advantage of training in an intense academic environment while sharpening music techniques and performance skills. This occurs through participation in large and small ensembles, as well as through varied solo performance opportunities. Our goal is for students to become well-rounded performers with essential instrumental or vocal technique who are able to make historically informed performance choices.

If you have any questions about the following material please contact Prof. Dulaney (edulaney@tulane.edu).

Requirements

Piano, Voice, Guitar, Other Instruments Candidates for the M.F.A. degree in performance must take 30 hours of course work:

Course ID	Title	Credits
Select 18 hours in music literature, theory, history, performance, or other appropriate areas		18
Select 12 semester hours of lessons in voice or in the specialized instrument		12
Total Credit Hours		**30**

In place of a thesis the candidate must perform a full-length recital of 90 minutes.

Candidates for the M.F.A. degree in Musical Theater must take **36 hours** of course work and must either perform a recital or choreograph or direct a major musical theater production. Performers must submit a headshot and resume to Michael McKelvey (mmckelve@tulane.edu), head of the Musical Theatre Program. The performers will be expected to audition live or with a video. The audition will include two songs and a monologue. Dance is optional.

Department of Philosophy

Programs

Undergraduate

Major

- Philosophy Major (p. 262)
- Philosophy Major with Concentration in Language, Mind, and Knowledge (p. 262)
- Philosophy Major with Concentration in Law, Morality, and Society (p. 263)

Minor

- Philosophy Minor (p. 264)

Tulane University

Graduate

- Philosophy, MA (p. 264)
- Philosophy, PhD (p. 264)

Philosophy Major

The Philosophy major provides a traditional course of study in philosophy.

Requirements

All students majoring in philosophy and not writing an honors thesis must complete a total of nine courses (27 credits) in philosophy. All students majoring in philosophy and writing an honors thesis must complete ten courses (31 credits). In this case, honors thesis work in PHIL 4990 Honors Reading (3 c.h.) and PHIL 5000 Honors Thesis (4 c.h.) counts for two courses and seven credits. (One of these seven credits is a writing requirement credit.) In addition to the standard major, the department offers two more specialized tracks within the major: Law, Morality, and Society; and Language, Mind, and Knowledge.

Honors Thesis

- PHIL 4990 Honors Reading (3 c.h.)
- PHIL 5000 Honors Thesis (4 c.h.)

Standard Major

For the standard major in philosophy the specific course requirements are:

Course ID	Title	Credits
History of Philosophy		**6**
PHIL 2010	History of Ancient Phil	
PHIL 2020	History of Modern Phil	
Logic		
Select one of the following:		3
PHIL 1060	Critical Thinking	
PHIL 1210	Elementary Symbolic Logic	
PHIL 3040	Mathematical Logic	
Ethics		
Select one of the following:		3
PHIL 1030	Ethics	
PHIL 2600	Ethics In Business	
PHIL 3050	Moral Philosophy	
PHIL 3510	History of Ethics	
PHIL 3550	Medical Ethics	
PHIL 3560	Social & Polit Ethics	
PHIL 3570	Ethics of Abortion	
PHIL 3580	Ethical Theory	
PHIL 3650	Crime and Punishment	
PHIL 6050	Moral Philosophy	
PHIL 6130	Moral Psychology & Meta-Ethics	
PHIL 6250	Locke's Moral & Political Phil	
PHIL 6520	Environmental Ethics	
PHIL 6760	Mill's Util Liberalism	
Metaphysics/Mind/Epistemology		
Select one of the following:		3
PHIL 1020	Philosophies of The Self	
PHIL 1040	Beginning With Minds	
PHIL 2030	Minds, Machines & Experiences	
PHIL 2200	Matter and Consciousness	
PHIL 3120	Analytic Philosophy	
PHIL 3410	Theory of Knowledge	
PHIL 3150	Logical Empiricism	
PHIL 3420	Metaphysics	
PHIL 3740	Consciousness	
PHIL 3760	Interpreting Minds	
PHIL 3765	Imagination	
PHIL 3800	Language and Thought	
PHIL 6100	Skepticism	
PHIL 6010	Metaphysics of Mind	
PHIL 6105	Philosophy of Neuroscience	
PHIL 6120	Metaphysics	
PHIL 6150	Freedom & The Self	
PHIL 6170	Philosophy of Perception	
PHIL 6180	Mental Representation	
PHIL 6190	Philosophy of Mind	
Additional Requirements		
Four more courses beyond the above, for a total of 27 courses in the complete major. Two courses must be at the 6000 level. No more than three courses may be at the 1000 level.		12
PHIL 3640	Philosophy of Law	3
PHIL 3660	Anarchy	3
PHIL 6510	Theories of Economic Justice	3,4
PHIL 3750	Philosophy of Cognitive Science	3,4
Total Credit Hours		**39-41**

Additional Information

No more than three of the required nine courses can be at the 1000-level.

Philosophy Major with Concentration in Language, Mind, and Knowledge

Language, Mind & Knowledge (track)

The Philosophy Language, Mind & Knowledge (track) is designed for students primarily interested in the part of philosophy that lies on one of the most exciting of today's interdisciplinary interfaces, cognitive science. The Department is also associated with the Cognitive Studies Coordinate Major.

Requirements

All students majoring in philosophy and not writing an honors thesis must complete a total of nine courses (27 credits) in philosophy. All students majoring in philosophy and writing an honors thesis must complete ten courses (31 credits). In this case, honors thesis work in

PHIL 4990 Honors Reading (3 c.h.) and PHIL 5000 Honors Thesis (4 c.h.) counts for two courses and seven credits. (One of these seven credits is a writing requirement credit.) In addition to the standard major, the department offers two more specialized tracks within the major: Law, Morality, and Society; and Language, Mind, and Knowledge.

Honors Thesis

- PHIL 4990 Honors Reading (3 c.h.)
- PHIL 5000 Honors Thesis (4 c.h.)

Concentration in Language, Mind, and Knowledge

Course ID	Title	Credits
History of Philosophy		
PHIL 2010	History of Ancient Phil	3
PHIL 2020	History of Modern Phil	3
Logic		
PHIL 1210	Elementary Symbolic Logic	3
Philosophy of Language, Mind, or Knowledge		
Select four of the following:		12
PHIL 1020	Philosophies of The Self	
PHIL 1040	Beginning With Minds	
PHIL 2030	Minds, Machines & Experiences	
PHIL 2200	Matter and Consciousness	
PHIL 3120	Analytic Philosophy	
PHIL 3150	Logical Empiricism	
PHIL 3410	Theory of Knowledge	
PHIL 3420	Metaphysics	
PHIL 3740	Consciousness	
PHIL 3750	Philosophy of Cognitive Science	
PHIL 3760	Interpreting Minds	
PHIL 3765	Imagination	
PHIL 3800	Language and Thought

PHIL 6150	Freedom & The Self	
PHIL 6170	Philosophy of Perception	
PHIL 6180	Mental Representation	
PHIL 6190	Philosophy of Mind	
PHIL 6620	Philosophical Logic	
Additional Requirements		
Select one additional course at the 3000 level or above. At least two of these courses must be at the 6000 level.		6
Total Credit Hours		**27**

Additional Information

At least two of these courses must be at the 6000-level.

Philosophy Major with Concentration in Law, Morality, and Society

The Philosophy Law, Morality & Society (track) is designed to cater to students with a specific career interest in law, public policy or politics.

Requirements

All students majoring in philosophy and not writing an honors thesis must complete a total of nine courses (27 credits) in philosophy. All students majoring in philosophy and writing an honors thesis must complete ten courses (31 credits). In this case, honors thesis work in PHIL 4990 Honors Reading (3 c.h.) and PHIL 5000 Honors Thesis (4 c.h.) counts for two courses and seven credits. (One of these seven credits is a writing requirement credit.) In addition to the standard major, the department offers two more specialized tracks within the major: Law, Morality, and Society; and Language, Mind, and Knowledge.

Honors Thesis

- PHIL 4990 Honors Reading (3 c.h.)
- PHIL 5000 Honors Thesis (4 c.h.)

Concentration in Law, Morality, and Society

Course ID	Title	Credits
Political Philosophy		
PHIL 2110	Classics Ancnt Poli Phil	3
PHIL 2120	Classics Modrn Poli Phil	3
Critical Thinking or Logic Course		
Choose one of the following:		3
PHIL 1060	Critical Thinking	
PHIL 1210	Elementary Symbolic Logic	
PHIL 3040	Mathematical Logic	
Ethics, Political Philosophy or the Philosophy of Law		
Select 4 of the following:		12
PHIL 1030	Ethics	
PHIL 2600	Ethics In Business	
PHIL 3050	Moral Philosophy	
PHIL 3340	Humanity's Place in Nature	
PHIL 3510	History of Ethics	
PHIL 3550	Medical Ethics	
PHIL 3560	Social & Polit Ethics	
PHIL 3580	Ethical Theory	
PHIL 3640	Philosophy of Law	
PHIL 3650	Crime and Punishment	
PHIL 3660	Anarchy

PHIL 6520	Environmental Ethics	
PHIL 6740	Contemporary Polit Phil	
PHIL 6750	Utilitarianism	
PHIL 6760	Mill's Util Liberalism	
Additional Requirements		
Select 1 additional course at the 3000 level or above. At least two courses must be at the 6000 level.		6
Total Credit Hours		**27**

Additional Information

At least two courses must be at the 6000-level.

Philosophy Minor

A minor in Philosophy consists of five Philosophy courses, three of which must be above the 1000 level.

Requirements

A minor in Philosophy consists of five philosophy courses, three of which must be above the 1000-level.

Philosophy, MA

Tulane offers a terminal MA degree in Philosophy. The program is intended for students who are eager to continue their study of philosophy, but do not feel ready to enter a PhD program. The MA program can help students develop a deeper and more comprehensive understanding of both contemporary issues in philosophy as well as the history of philosophy, and to prepare to seek admission into a competitive PhD program. It is also useful for students who have a strong interest in philosophy, but are unsure about whether they would like to commit to pursuing a PhD.

The philosophy department at Tulane offers a wide variety of courses, and is especially attractive for students wishing to pursue research in ethics, political philosophy, the history of philosophy, and philosophy of mind. For information about our faculty members, please see our faculty page (https://liberalarts.tulane.edu/departments/philosophy/people/fulltime-faculty/).

An undergraduate major in philosophy is desirable for graduate study in philosophy, but it is not essential. However, students admitted with insufficient background in ethics or logic or the history of philosophy may be required to take courses in these areas without graduate credit.

Transfer course credit for previous graduate work in philosophy is possible.

The terminal MA program is independent of the PhD program at Tulane. Subsequent admission to the PhD program at Tulane requires application through the normal channels. The program is intended to be completed within two years.

For information about the terminal MA program at Tulane, please contact the Director of Graduate Studies, Prof. Caroline Arruda.

The 4+1 Masters Degree Program

The Department also offers a program of study that allows Tulane undergraduates who graduate with a major in philosophy to receive an MA in Philosophy after one additional year. The program is intended primarily for students who are eager to continue their study of philosophy, yet either do not feel ready to apply for admission into a PhD program, or have no interest in doing so. The 4+1 program MA program helps students develop a deeper and more comprehensive understanding of both contemporary issues in philosophy as well as the history of philosophy, and to prepare to seek admission into a competitive PhD program. It is also useful for students who have a strong interest in philosophy, but are unsure about whether they would like to commit to pursuing a PhD. The philosophy department at Tulane offers a wide. A variety of courses, and is especially attractive for students wishing to pursue research in ethics, political philosophy, the history of philosophy, and philosophy of mind. For information about our faculty members, please see our faculty page. The 4 + 1 MA program is independent of the PhD program. Subsequent admission to the PhD program requires application through the normal channels.

Requirements

The terminal MA Degree may be earned in one of two ways.

- 30 Credit hours total which includes satisfactory completion of 24 hours of coursework (8 courses) and submission and defense of a thesis (6 credits). This route is not intended for candidates for the PhD.
- Satisfactory completion of 30 hours of coursework (10 courses) and passing one qualifying paper.

The 4+1 M.A. degree will be awarded to students who obtain either of the following:

Passing grades in 30 credit hours of graduate level courses (i.e., 6000-level and 7000-level). Passing grades in 24 credit hours of graduate level courses and a Master's thesis (6 credits). The first option will be encouraged in most cases. In order to satisfy either of these options, it will be necessary to carry over a number of courses from the undergraduate degree. The requirements for the Philosophy Major in the B.A. degree include two courses at the 6000-level. ONE AND ONLY ONE of those courses can count toward the 4+1 M.A. requirements. Up to 6 graduate-level credit hours taken while an undergraduate can count toward both the UG and GR degrees. In addition, up to 6 additional graduate hours taken while an undergrad but that do not count for credit toward the undergrad degree may be applied to the 4+1 MA. In other words, those are overload credits for the undergraduate degree.

Further details and information about the application process may be obtained from the Director of Graduate Studies, Prof. Caroline Arruda.

Philosophy, PhD

An undergraduate major in Philosophy is desirable for graduate study in philosophy, but it is not essential. However, students admitted with insufficient background in ethics or logic or the history of philosophy will be required to take courses in these areas without graduate credit.

Transfer course credit for previous graduate work in philosophy is possible.

There are two tracks in the Ph.D. Program, the standard track and the specialty track in Moral Philosophy.

The two tracks differ in the coursework requirements for them. Students may either take the standard Ph.D. track or the specialty Ph.D. track in moral philosophy, and may opt into or out of the specialty track at any time.

Requirements

The Ph.D. Degree (Standard track and Moral Philosophy track) has three components:

- Satisfactory completion of 48 hours (16 courses) of coursework in accordance with departmental distribution requirements (see below).
- Submission of one satisfactory Qualifying Paper. Students are subject to dismissal should the qualifying paper be deemed unacceptable.
- Presentation and defense of a Doctoral Thesis.

Students in the PhD program must submit all materials for any incomplete class grades by September 1 of the following year. For example, materials for any incomplete from courses during the 2019-2020 academic year would have to be submitted by September 1, 2020.

Students in the PhD program are subject to an annual review, described below.

Deadlines for the Qualifying Paper and Dissertation Progress are described below. No student may miss a deadline without a strong excuse presented to the Director of Graduate Studies (such as a documented medical or family emergency). A failure to meet one of these deadlines is cause to bring the issue of the student's performance before the department as a whole.

Distribution Requirement for Coursework (Standard Track)

The distribution requirement for coursework in the Standard track is as follows. Students must take at least one course in three of the following areas:

- Metaphysics
- Epistemology
- Philosophy of Mind
- Philosophy of Language
- Philosophy of Science

In addition, students are required to take three courses in the history of philosophy (at least one in Ancient as well as one in Modern), one course in Moral/Political/Legal Philosophy and one in Logic.

The distribution requirement in Logic may be waived if a student demonstrates graduate-level competence by passing an examination in this subject after joining the program.

Of the remaining eight courses, two may be taken in another department, with approval of the Philosophy Department Graduate Studies Committee.

Distribution Requirement for Coursework (Moral Philosophy Track)

The distribution requirement for coursework in the specialty track in Moral Philosophy is as follows. Students must take at least one course in three of the following areas:

- Metaphysics
- Epistemology
- Philosophy of Mind
- Philosophy of Language
- Philosophy of Science

In addition, students are required to take three courses in the history of philosophy (at least one being the History of Ethics or the History of Political Philosophy), and one in Formal Methods (which may include logic, game theory, rational choice theory, or another course in the methodological tools relevant to the student's philosophical work). The distribution requirement in Formal Methods may be waived if a student demonstrates graduate-level competence by passing an examination in this subject after joining the program. Of the remaining nine courses, six must be in moral and political philosophy, with at least one course each from four of the following subdisciplines:

- Political Philosophy
- Philosophy of Law
- Moral Psychology
- Agency and Responsibility
- Metaethics
- Normative Ethics
- Applied Ethics
- Feminist Ethics

Two of these courses may be taken in another department, with approval of the Philosophy Department Graduate Studies Committee. Students in this track are also expected to attend and participate regularly in Murphy Institute seminars and lectures in moral philosophy.

The Qualifying Paper

Purpose of the Qualifying Paper

The purpose of the project is to evaluate the student's ability to produce a "professional" quality paper. The paper may be the result of reworking a term paper from a course.Students are encouraged but not required to write the qualifying paper on the topic of their dissertation. The paper must represent new work written by the student. It is not allowed, for instance, simply to submit a previous MA thesis. Any old work must be substantially revised.

Quality

Students are subject to dismissal should the Qualifying Paper be deemed unacceptable. It is therefore important to approach the task of writing this paper with a sense of the quality of work that is expected and how this may be achieved. The qualifying paper should provide strong evidence that the student is willing and able to produce

publishable work. An acceptable paper will demonstrate ability to engage your own philosophical thinking in relation to the relevant literature and competence with that literature.

This might be achieved by:

- Presenting an argument dialectically among several writers and entering the discussion with your own view.
- Providing an illuminating account of a philosopher's argument(s) or contention(s)
- Interpreting a philosophic text in order to bring to light its argument or teaching
- Tracing the historical development of an idea that you analyze and evaluate

It is *not* acceptable to:

- Simply review several books or articles on a given topic
- Present different philosopher's claims or arguments and merely opt for one of them.

The Committee

The Qualifying Paper is evaluated by a committee consisting of three faculty members. The Director will be a faculty member agreed upon by the student, the Director of Graduate Studies (DGS), and the faculty member. The Second and Third Reader on the Committee will be assigned by the DGS in consultation with the Director.

The student is advised to make arrangements with the director of the paper about how the interchange between them shall work out as the composition of the paper progresses. Different professors may wish to do this in different ways. A general understanding between director and student should be reached before the summer vacation that precedes the year in which semester in which the paper is due. With the approval of the director, topics may be modified or changed.

Deadlines

The day two weeks before the last day of Spring semester classes is the target date for submitting a proposal for the Qualifying Paper to the DGS. For example, if the Qualifying Paper is due on October 1, 2019, the student should submit a proposal two weeks before the end of the Spring 2020 semester. The proposal should include a brief description of the project (at least several lines) and the name of the faculty member who has agreed to serve as director.

The Qualifying Paper must be submitted by October 1 during the student's third year (or second year if the student entered with a transferable MA degree).

It is expected that one or more drafts of the paper would have been submitted before the deadline and the final version would reflect responses to comments from members of the committee.

Evaluation

The members of the committee will evaluate the paper and independently submit to the DGS a judgment on it, with comments and justification for the judgment. Faculty must report grades for the Qualifying paper by November 15.

The original submission will be evaluated as "Pass," "Fail," or "Revise and Resubmit." Two "Fail" votes on the original submission results in a failed paper. Only one "Revise and Resubmit" or "Fail" vote is needed to force revisions, and in that case, the revised paper will be due on February 1. After that date a majority vote will decide whether the paper passes or fails. The final grade for the Qualifying Paper must be submitted by the faculty members by March 1.

A failed paper will result in dismissal from the doctoral program, subject to a review by the whole department.

The faculty committee members may not inform the student of his/her evaluation until the Director of Graduate Studies or the Philosophy Department faculty releases the information.

The Dissertation

Students should complete an "Admission to Candidacy" form to the DGS after completing all requirements but the dissertation.

Students should seek a dissertation supervisor and in consultation with that professor form a committee with two other faculty members.

Students must submit to the DGS the dissertation prospectus, along with a “Dissertation Prospectus Approval” form by October 1 of the 4th year (3rd year if the student entered with a transferable MA degree).

Students must submit to the DGS a dissertation chapter that shows significant progress beyond the Qualifying Paper by February 1 of the 4th year (3rd year if the student entered with a transferable MA degree).

Students must submit to the DGS an additional dissertation chapter that is different from the first one by February 1 of the 5th year (4th year if the student entered with a transferable MA degree).

For more information about graduation requirements see the Dissertation Guidelines at the Tulane Graduate Studies (https://liberalarts.tulane.edu/academics/graduate-studies/) website.

Annual Review

The Department will conduct an annual review at which faculty members review the progress of graduate students. The meeting will be held during the spring semester, typically around March 1, and at the meeting a warning might be issued to a student to either

1. end funding or
2. terminate a student from the program.

A student will be automatically dismissed from the program, subject to a review by the whole department, if

1. he or she failed the qualifying paper,
2. has a preponderance of B grades (or lower),
3. has two B- grades (or lower), or
4. a C+ grade (or lower) in their classes.

In addition, the department can vote to warn the student that

1. funding will be terminated or
2. the student will be dismissed from the program if – among other possible reasons –
   a. the student has three or more B grades (or lower),
   b. misses one of the deadlines stated above,

c. has a weak qualifying paper, or
d. shows insufficient progress in his or her dissertation.

The department has to state the cause for concern in the warning letter, and after being warned, students would have a semester to markedly improve their performance as well as present any evidence that might put their performance in a different light. Without this, the initial department vote would take effect after the semester is over, and either

1. the funding would be terminated, or
2. the student would be dismissed from the program.

Progress Requirements for Students Receiving External Fellowships

Students on a fellowship or leave for a year must show substantial evidence of work they have completed. This would typically be two chapters of the dissertation, or one chapter along with papers for publication or presentation, which should be submitted to the dissertation Director and Graduate Director. Further support in the program, such as continuation of the graduate stipend or adjunct teaching, will depend on meeting this requirement.

Summary of Deadlines

Coursework

September 1: all materials for any "Incomplete" grade from a course during the previous academic year are due

Qualifying Paper

- Two weeks before the last day of the Spring semester of the 2nd year (1st year if the student entered with a transferable MA): proposal for the Qualifying Paper due to the Director of Graduate Studies
- October 1 of the 3rd year (2nd year if the student entered with a transferable MA): Qualifying Paper due
- November 15: Faculty must report grades on the Qualifying Paper
- February 1 of the 3rd year (2nd year if the student entered with a transferable MA): revised Qualifying Paper due (if the original submission must be revised due to receiving one "Fail" grade or one or more "Revise and Resubmit" grades)
- March 1: Faculty must submit the final grade for the Qualifying Paper to the Director of Graduate Studies

Dissertation

- "Admission to Candidacy" form due to the Director of Graduate Studies upon the completion of all requirements for the Ph.D. except the Dissertation
- October 1 of the 4th year (3rd year if the student entered with a transferable MA): the Dissertation Prospectus, and a "Dissertation Prospectus Approval" form, due to the Director of Graduate Studies
- February 1 of the 4th year (3rd year if the student entered with a transferable MA): a Dissertation chapter that shows significant progress beyond the Qualifying Paper due to the Director of Graduate Studies
- February 1 of the 5th year (4th year if the student entered with a transferable MA): Additional Dissertation chapter due to the Director of Graduate Studies

Annual Review

- March 1: Annual Review of graduate students conducted by the faculty

Political Science Major

Students majoring in political science are challenged to think creatively and analytically about historically and currently relevant topics. Through participation in lectures, seminars, internships, and independent studies, our students develop critical reasoning, communication, data analysis, and reflectional skills.

Many graduates go on to obtain advanced degrees in law, business, public policy, political science, and public administration. Others apply their degree to relevant career employment, pursuing work in political campaigns, lobbies, non-profit foundations, think tanks, corporations, public relations firms, news organizations, government, and international organizations.

Requirements

TO DECLARE A POLS, PSIR OR PSDV MAJOR and for information about undergraduate advising in Political Science, please go to: https://liberalarts.tulane.edu/departments/political-science/undergraduate-advising (https://liberalarts.tulane.edu/departments/political-science/undergraduate-advising/)

Please note, you cannot declare two political science majors. You must choose either POLS, PSIR or PSDV.

Course ID	Title	Credits
Required Courses		
POLS 2010	Scope/Methods Poli Sci	3
or PSDV 2010	Research Design and Methods for International Development	
Select at least three of the following:		9

POLA 2100	American Government (or a 4 or 5 on the A.P. American Government Exam)	
POLC 2300	Comparative Politics (or a 4 or 5 on the A.P. Comparative Politics Exam)	
POLI 2500	International Relations	
POLT 2700	Pol Thought In The West	
Statistics or Foreign Language Component		
Select one of the following:		3
MATH 1110	Probability & Statistics I (or other equivalent course) [1]	
Select one additional course (3 credits) beyond the SLA foreign-language requirements		
Electives		
Select at least six electives in political science [2]		18

[1] Political Science (POLS) majors who are double majors in Sociology or Psychology may satisfy this requirement through the successful completion of SOCI 3030 Intro To Research Design (3 c.h.), PSYC 3090 Univariate I & Lab (4 c.h.). Equivalent courses from other departments or schools may also satisfy this requirement for any student majoring in Political Science, as determined by the Department Chair or Undergraduate Studies Director.

[2] No more than four of these courses can be in any single subfield (POLA, POLC, POLI, POLT, or PSDV).

Pre-requisites

For all major tracks (POLS, POLI, & PSDV), students must have successfully completed POLS 2010 Scope/Methods Poli Sci (3 c.h.) **or** PSDV 2010 Research Design and Methods for International Development (3 c.h.) and the correlating introductory course in order to enroll in any course above the 3000-level. For example, students must complete POLA 2100 American Government (3 c.h.) in order to enroll in POLA 4000 or 6000-level courses. Faculty may choose to add other pre-requisites to any course and are encouraged to do so in any case in which they feel that doing so would improve student preparation for and performance in their own courses. Non-major juniors and seniors may enroll in courses at the 4000-level or above with the consent of the instructor. The Political Science department enforces all pre-requisites. Students must have successfully completed a pre-requisite the semester before registering for any class. The department reserves the right to drop students who are missing the pre-requisite from the course without notice.

Level of Coursework

- Students must successfully complete at least three courses at the 4000 or 6000 level.
  - An Honor's thesis in Political Science will count as one 4000-level elective
  - One Political Science independent study may count as a 4000-level elective but only if it is taken for 3 credits
- Students may count one Political Science internship course (POLS 4560 Internship (1,3 c.h.) Internship) toward the major requirements, however it will not count toward the three required 4000- or 6000-level electives.

Political Science Minor

Students minoring in political science are challenged to think creatively and analytically about historically and currently relevant topics. Through participation in lectures, seminars, internships, and independent studies, our students develop critical reasoning, communication, data analysis, and reflectional skills.

Many graduates go on to obtain advanced degrees in law, business, public policy, political science, and public administration. Others apply their degree to relevant career employment, pursuing work in political campaigns, lobbies, non-profit foundations, think tanks, corporations, public relations firms, news organizations, government, and international organizations.

Requirements

A minor in political science consists of six courses in political science, in at least two different subfields, with at least three courses at the 3000-level or above.

Political Science/ International Development Major

PSDV is the most inter-disciplinary Political Science major track. It focuses on the analysis of unequal political, social, and economic development around the world and what might be done to improve the livelihoods of people in the Global South as well as underprivileged communities in the United States. This track offers students an education firmly rooted in a social science framework that allows them to explore multiple meanings of international development. Coursework within the department introduces students to the history, theories, and methods of the field, allows them to deepen their knowledge of at least one world area (Latin America, Africa, Middle East, or Asia), and offers in-depth study of policy areas including poverty, migration, human rights, transitional justice, gender, foreign aid, food and agriculture, health, and environmental sustainability.

Majors are required to complete one level beyond minimum proficiency in a language other than English, as well as introductory macroeconomics and international political economy courses. In recognition of the interdisciplinary nature of international development, majors and minors must complete electives in other departments. Choices include courses in Anthropology, Architecture, Asian Studies, Communication, Evolutionary Biology, Earth Science, Economics, History, Philosophy, Public Health, Sociology, Social Work, and Theatre. The Department of Political Science strongly recommends that PSDV students take advantage of at least one study abroad opportunity while at Tulane. We also encourage students to seek relevant internship opportunities inside and outside of the United States.
This major prepares students to compete for Fulbright grants, study for professional and graduate degrees, and work for the U.S. government, international organizations, NGOs, foundations, and private firms.

Requirements

TO DECLARE A POLS, PSIR OR PSDV MAJOR and for information about undergraduate advising in Political Science, please go to: https://liberalarts.tulane.edu/departments/political-science/undergraduate-

advising (https://liberalarts.tulane.edu/departments/political-science/undergraduate-advising/)

Please note, you cannot declare two political science majors. You must choose either POLS, PSIR or PSDV.

Course ID	Title	Credits
Required Courses		
PSDV 2400	Intro to Internatl Development	3
One out of the following two:		
PSDV 2010	Research Design and Methods for International Development	3

Foreign Language Component		
Students must complete one additional three-credit course beyond the SLA foreign-language requirements. Course must be taught in the target language.		3
Electives		
FIVE courses, at least TWO must be PSDV classes and at least TWO must come from outside of Political Science (see the approved list of classes in the checklist).		15

Pre-requisites

For all major tracks (POLS, POLI, & PSDV),students must have successfully completed POLS 2010 Scope/Methods Poli Sci (3 c.h.) and the correlating introductory course in order to enroll in any course above the 3000-level. For example, students must complete POLA 2100 American Government (3 c.h.) in order to enroll in POLA 4000 or 6000-level courses. Faculty may choose to add other pre-requisites to any course and are encouraged to do so in any case in which they feel that doing so would improve student preparation for and performance in their own courses. Non-major juniors and seniors may enroll in courses at the 4000-level or above with the consent of the instructor. The Political Science department enforces all pre-requisites. Students must have successfully completed a pre-requisite the semester before registering for any class. The department reserves the right to drop students who are missing the pre-requisite from the course without notice.

Level of Course Work

- Students must successfully complete at least three courses at the 4000 or 6000 level.
  - An Honor's thesis in Political Science will count as one 4000-level elective
  - One Political Science independent study may count as a 4000-level elective but only if it is taken for 3 credits
- Students may count one Political Science internship course (POLS 4560 Internship (1,3 c.h.) Internship) toward the major requirements, however it will not count toward the three required 4000- or 6000-level electives.

Political Science/ International Development Minor

Overview

PSDV is the most inter-disciplinary Political Science track. It focuses on the analysis of unequal political, social, and economic development around the world and what might be done to improve the livelihoods of people in the Global South as well as underprivileged communities in the United States. This track offers students an education firmly rooted in a social science framework that allows them to explore multiple meanings of international development. Coursework within the department introduces students to the history, theories, and methods of the field, allows them to deepen their knowledge of at least one world area (Latin America, Africa, Middle East, or Asia), and offers in-depth study of policy areas including poverty, migration, human rights, transitional justice, gender, foreign aid, food and agriculture, health, and environmental sustainability.

Requirements

A minor in political science with a concentration in international development (PSDV) consists of six courses, including PSDV 2400 Intro to Internatl Development (3 c.h.) and either ECON 1020 Introduction to Macroeconomics (3 c.h.) OR POLI 3450 Global War on Terrorism (3 c.h.), and four electives.

Course ID	Title	Credits
PSDV 2400	Intro to Internatl Development	3
ECON 1020	Introduction to Macroeconomics	3
or POLI 3540	Internationl Political Economy	
Select four electives *		12
Total Credit Hours		**18**

* **Rules for electives:**

- All of the electives must be 3000-level or above
- At least one must be PSDV
- At least one must be from another field of Political Science (POLA, PSIR, POLC, POLT)
- At least one must be from outside the department (contact department for approved list of electives)

Political Science/ International Relations Major

Students majoring in the political science major with the international relations concentration (PSIR) are challenged to think creatively and

analytically about historically and currently relevant topics. Through participation in lectures, seminars, internships, and independent studies, our students develop critical reasoning, communication, data analysis, and reflectional skills.

Many graduates go on to obtain advanced degrees in law, business, public policy, political science, and public administration. Others apply their degree to relevant career employment, pursuing work in political campaigns, lobbies, non-profit foundations, think tanks, corporations, public relations firms, news organizations, government, and international organizations.

Requirements

TO DECLARE A POLS, PSIR OR PSDV MAJOR and for information about undergraduate advising in Political Science, please go to: https://liberalarts.tulane.edu/departments/political-science/undergraduate-advising (https://liberalarts.tulane.edu/departments/political-science/undergraduate-advising/)

Please note, you cannot declare two political science majors. You must choose either POLS, PSIR or PSDV.

Course ID	Title	Credits
Required Course:		
POLS 2010	Scope/Methods Poli Sci	3
or PSDV 2010	Research Design and Methods for International Development	
Three Courses from the following:		**9**
POLA 2100	American Government (or a 4 or 5 on the A.P. American Government Exam)	
POLC 2300	Comparative Politics (or a 4 or 5 on the A.P. Comparative Politics Exam)	
POLI 2500	International Relations	
PSDV 2400	Intro to Internatl Development	
POLT 2700	Pol Thought In The West	
Economics Component [1]		
PSIR majors must successfully complete ONE of the following courses:		3
ECON 1020	Introduction to Macroeconomics	
POLI 3540	Internationl Political Economy	
ECON 3370	World Economy	
POLC 6110	Comparatv Political Econ	
Foreign Language Component		
Students must complete one additional three-credit course beyond the core profiency foreign-language requirement.		3
Electives [2]		
SIX courses, at least THREE of which must be in either International Relations (POLI) and/or Comparative Politics (POLC). Not more than FOUR of the electives may be in any single subfield (POLA, POLC, POLI, or POLT).		18
Total Credit Hours		**36**

1. A course in the political economy department (such as PECN 3040 Comp & Intl Pol Econ (3 c.h.)) that is approved by the political science department's director of undergraduate studies may also be considered. POLI 3540 Internationl Political Economy (3,4 c.h.) and POLC 6110 Comparatv Political Econ (4 c.h.) can count for either the Economics Component or an Elective but not both.
2. Not more than FOUR of the electives may be in any single subfield (POLA, POLC, POLI, PSDV or POLT).

Pre-requisites

For all major tracks (POLS, PSIR, & PSDV),students must have successfully completed POLS 2010 Scope/Methods Poli Sci (3 c.h.) or PSDV 2010 Research Design and Methods for International Development (3 c.h.) and the correlating introductory course in order to enroll in any course above the 3000-level. For example, students must complete POLA 2100 American Government (3 c.h.) in order to enroll in POLA 4000 or 6000-level courses. Faculty may choose to add other pre-requisites to any course and are encouraged to do so in any case in which they feel that doing so would improve student preparation for and performance in their own courses. Non-major juniors and seniors may enroll in courses at the 4000-level or above with the consent of the instructor. The Political Science department enforces all pre-requisites. Students must have successfully completed a pre-requisite the semester before registering for any class. The department reserves the right to drop students who are missing the pre-requisite from the course without notice.

Level of Course Work

- Students must successfully complete at least three courses at the 4000 or 6000 level.
  - An Honor's thesis in Political Science will count as one 4000-level elective
  - One Political Science independent study may count as a 4000-level elective but only if it is taken for 3 credits
- Students may count one Political Science internship course (POLS 4560 Internship (1,3 c.h.) Internship) toward the major requirements, however it will not count toward the three required 4000- or 6000-level electives.

Political Science, MA

***The MA in Political Science is not available for external admission. Only students admitted to the PhD program in Political Science may pursue the MA in Political Science.**

Political science has a rich history at Tulane, which is where the American Political Science Association was founded in 1903. Today, our MA program prepares students to ask innovative questions, conduct independent research, and become effective teachers. In training students, we emphasize the importance of mastering methodology and research design and using those tools to analyze how political phenomena develop around the world. Our faculty has broad expertise – the department consists of scholars who study domestic and international politics, in relation to the United States and the countries of Latin America, Africa, Europe, and Asia.

The substantive concerns that motivate the research of our faculty and students consist of the politics of inclusion and exclusion; the consequences of inequality; obstacles to sustainable development; international trade, cooperation, and conflict; the protection of human rights; and the foundations of durable authoritarianism. Those thematic research foci intersect in multiple ways and jointly contribute to informing our understanding of some of the most pressing global

concerns of our times. The department is methodologically diverse and inclusive of different approaches to the study of politics.

Requirements

The MA requirements include 30 credits of coursework (taken over two years), which are to be distributed as follows:

Course ID	Title	Credits
Five Courses in Scope and Methods/Research Skills		**15**
POLS 7111	Scope & Methods for Poli Sci	
POLS 7112	Quantitative Methods I	
POLS 7113	Qualitative Methods II	
POLS 7114	Qualitative Methods	
POLS 7116	Dissertation Prospectus Seminar	
One Course in American Politics or Theory		**3**
Field Seminars		**6**
POLS 7752	Special Topics	
POLS 7910	Research	
Two Electives in the Department		**6**
Mandatory Political Science Seminar Attendance (One Year)		**0**
Thesis Research		
POLS 9980	Masters Research	0
Total Credit Hours		**30**

Political Science, PhD

Political science has a rich history at Tulane, which is where the American Political Science Association was founded in 1903. Today, our PhD program prepares students to ask innovative questions, conduct independent research, and become effective teachers. In training students, we emphasize the importance of mastering methodology and research design and using those tools to analyze how political phenomena develop around the world. Our faculty has broad expertise – the department consists of scholars who study domestic and international politics, in relation to the United States and the countries of Latin America, Africa, Europe, and Asia.

The substantive concerns that motivate the research of our faculty and students consist of the politics of inclusion and exclusion; the consequences of inequality; obstacles to sustainable development; international trade, cooperation, and conflict; the protection of human rights; and the foundations of durable authoritarianism. Those thematic research foci intersect in multiple ways and jointly contribute to informing our understanding of some of the most pressing global concerns of our times. The department is methodologically diverse and inclusive of different approaches to the study of politics.

Requirements

The PhD requirements include 48 credits of coursework; passing comprehensive exams; developing a dissertation prospectus; and defending a dissertation. The 48 credits of required coursework are to be distributed as follows:

Course ID	Title	Credits
Required POLS Courses		**15**
POLS 7111	Scope & Methods for Poli Sci	
POLS 7112	Quantitative Methods I	
POLS 7113	Qualitative Methods II	
POLS 7114	Qualitative Methods	
POLS 7116	Dissertation Prospectus Seminar	
One Course in American Politics or Theory		**3**
Field Seminars		**6**
POLS 7752	Special Topics	
POLS 7910	Research	
Five 6000 or 7000 Level POLS Electives		**15**
At Least Two Courses in Field 1 (Comparative or IR)		
Two Courses in Field 2 (Comparative or IR)		
No More Than Three Electives Outside POLS [1]		**9**
Attendance at POLS Seminar for One Year		**0**
Dissertation Research		
POLS 9990	Dissertation Research	
Total Credit Hours		**48**

[1] Language courses may be taken only with the approval of the Director of Graduate Studies.

Exams

During their fifth semester, students will take qualifying exams in the two areas of substantive concentration, one in their first field and another in their second field or in Methods. The first field can be either Comparative Politics (with International Relations being the second field) or International Relations (with Comparative Politics being the second field). Exams will be written and by the end of the sixth semester both exams must be passed.

Teaching

During their graduate training, students may be required to teach for at least two semesters, at least one of which will be an introductory course in Comparative Politics, International Relations, or Scope and Methods.

Dissertation

Dissertation committees will include three or, at most, four professors, with a chairperson from Political Science. With the approval of the committee chair, student may add one member outside of the Political Science Department (or outside Tulane). Students are required to take the Professional Skills Seminar and to begin dissertation prospectus preparation during their fifth semester; and, by the end of their third year, students will present a written prospectus for dissertation research and conduct an oral defense before their committee. On defending their prospectus, students will advance to candidacy, and will have three years in which to complete their dissertation.

Department of Sociology

Programs

Undergraduate

Major

- Sociology Major (p. 272)

Minor

- Sociology Minor (p. 272)

Sociology Major

Welcome to the Department of Sociology at Tulane University. Sociology is the study of social life, social change, and the social causes and consequences of human behavior.

Tulane Sociologists use a variety of theoretical approaches and research methods to investigate the structure and processes of groups, organizations, and societies, and how people interact within these various contexts.

Tulane Sociologists are committed to excellence in teaching, research, and service. We provide undergraduate and graduate students with exceptional opportunities to learn valuable, life-long transferable skills in critical thinking, data collection, data analysis, and communicating research to a public audience.

Requirements

To major in sociology a student must complete a minimum of 27 credits (nine three-credit courses) taken from courses offered by the department.

Course ID	Title	Credits
Select one 1000- level course		3
SOCI 2010	Foundations of Sociology	3
SOCI 3030	Intro To Research Design	3
SOCI 3040	Social Statistics	3
SOCI 3220	Social Theory	3
Select three 6000- level courses		9
Select one course at the 1000-2990 or 4000-6990 level		3
Total Credit Hours		**27**

Additional courses from other departments in the social sciences group are to be selected in consultation with the major adviser.

Sociology Minor

Welcome to the Department of Sociology at Tulane University. Sociology is the study of social life, social change, and the social causes and consequences of human behavior.

Tulane Sociologists use a variety of theoretical approaches and research methods to investigate the structure and processes of groups, organizations, and societies, and how people interact within these various contexts.

Tulane Sociologists are committed to excellence in teaching, research, and service. We provide undergraduate and graduate students with exceptional opportunities to learn valuable, life-long transferable skills in critical thinking, data collection, data analysis, and communicating research to a public audience.

Requirements

A minor in sociology consists of at least five three-credit courses (15 credits).

Course ID	Title	Credits
Select one 1000-level course		3
SOCI 2010	Foundations of Sociology	3
SOCI 3030	Intro To Research Design	3
SOCI 3220	Social Theory	3

Portuguese Coordinate Major

Overview

The Department of Spanish and Portuguese is dedicated to the study of languages, literatures, and cultures of Latin America and the Iberian Peninsula. Our department offers a wide variety of undergraduate classes, from basic language instruction in Spanish and Portuguese to upper-level courses in literature, culture, and film. Undergraduates may pursue majors and minors in Spanish and Portuguese, or a Joint Major in Spanish and Portuguese.

Requirements

Students majoring in Portuguese must complete ten courses (30 credits) beyond the 2000 level. All majors must take at least three 6000-level courses except for Junior Year Abroad students, who are required to take two 6000-level courses in the department. The Portuguese Major is classified as a coordinate major, meaning that it must be paired with a separate primary major (for example, Latin American Studies, Public Health, etc) and cannot be taken as a student's sole major. Students complete their writing intensive requirement and service learning requirement through the primary major.

Portuguese Minor

The Department of Spanish and Portuguese is dedicated to the study of languages, literatures, and cultures of Latin America and the Iberian Peninsula. Our department offers a wide variety of undergraduate classes, from basic language instruction in Spanish and Portuguese to upper-level courses in literature, culture, and film. Undergraduates may pursue majors and minors in Spanish and Portuguese, or a Joint Major in Spanish and Portuguese.

Requirements

A minor in Portuguese consists of 15 credits above the 2000 level, at least one of which must be at the 6000 level. The courses should be selected in consultation with the major adviser and according to the interest of the student, whether in language, literature and culture, or a combination.

Spanish and Portuguese Major

The Department of Spanish and Portuguese is dedicated to the study of languages, literatures, and cultures of Latin America and the Iberian Peninsula. Our department offers a wide variety of undergraduate classes, from basic language instruction in Spanish and Portuguese to upper-level courses in literature, culture, and film. Undergraduates may pursue majors and minors in Spanish and Portuguese, or a Joint Major in Spanish and Portuguese.

Requirements

Students pursuing the joint major in Spanish and Portuguese must complete 34 credits (eleven courses) to be distributed as follows:

Course ID	Title	Credits
3000-Level		
Select any two 3000-level courses in Spanish		6
Select any two 3000-level courses in Portuguese		6
4000-Level		
SPAN 4060	Hispanic Literary Foundations	3
Select any other 4000-level course in Spanish		3
Select any two 4000-level courses in Portuguese		6
6000-Level		
Select any 6000-level course in Spanish		3
Select any 6000-level course in Portuguese		3
SPAN 6850	Senior Seminar	4
Total Credit Hours		**34**

All courses in the major must be taken in sequence, although two sequential classes may be taken simultaneously. Students may not receive credit for courses taken out of sequence.

DOUBLE MAJORS

Double majors must complete 31 credits (ten courses + writing intensive) in the Spanish and Portuguese joint major, with a reduction of one 6000-level course. Double majors may receive credit for one course taught in English, not to be counted above the 4000 level.

Spanish and Portuguese, MA

We do not offer a stand-alone M.A. degree in Spanish or Spanish and Portuguese. Only undergraduate majors at Tulane may apply to the 4+1 M.A. Degree Program which allows them to earn the M.A. degree in Spanish or the joint M.A. degree in Spanish and Portuguese in one year. This program is ideally suited to students interested in deepening their knowledge of Hispanic or Luso-Brazilian literature and cultural studies before attending professional school or going on to pursue any of the many careers today for which expertise in Spanish and Portuguese cultures and languages is an asset. Many students enrolled in this program also pursue a teaching certificate through Tulane's Education Program (https://teacher.tulane.edu/).

Applying

Interested students must complete an online application form available through the Office of Graduate Programs of Tulane's School of Liberal Arts (https://liberalarts.tulane.edu/academics/graduate-studies/prospective-students/). They must also submit a statement of purpose and two letters of recommendation, at least one of which should be from a professor in the Department of Spanish and Portuguese. The annual application deadline is January 10.

Requirements

Undergraduate Component

By the end of the junior year, candidates should have completed all Newcomb-Tulane distribution requirements for the B.A. degree, and all "core" requirements for the Spanish or joint Spanish and Portuguese major. In addition, candidates are required to have a minimum cumulative GPA of 3.25 in the major by the close of the junior year. By the end of the senior year, candidates will have completed all requirements for the B.A. degree in Spanish or Spanish and Portuguese. This includes 10 semester hours of graduate (6000 level) courses (3 courses + 1 writing intensive credit).

Fifth (Graduate) Year

In the fifth year, 21 semester hours of graduate (6000 or 7000 level) courses will be completed in the Department of Spanish and Portuguese, for a combined total of 31 semester hours of graduate courses. Subject to departmental approval, three semester hours (one course) toward the graduate degree can be taken in another graduate department or school (e.g. English, French, Women Studies, ADST, Communications). There is no thesis requirement or comprehensive exam.

Spanish and Portuguese, PhD

Tulane University is home to one of the country's leading Ph.D. programs in Spanish and Portuguese. Our faculty consists of nationally and internationally recognized scholars and teachers in the literatures and cultures of Spain, Portugal, Northern Africa, Spanish America, Brazil, and Lusophone Africa, in addition to linguistics. Tulane's Howard-Tilton Library contains extensive holdings that support our respective fields, including the Latin American Library (http://lal.tulane.edu/), one of the largest collections of its kind in the United States. Tulane is also home to the Stone Center for Latin American Studies (http://stonecenter.tulane.edu/), a renowned center of comparative and interdisciplinary study on Latin America, which has also been a generous source of research support for Tulane graduate students.

The goal of the Ph.D. program is to prepare students to become scholars and teachers of the highest quality. Alongside their coursework (see our recent course offerings page (https://liberalarts.tulane.edu/spanish-portuguese/academics/courses/)), graduate students participate in an extensive teaching and pedagogy development, which entails taking a course in modern language pedagogy and teaching at most one course per semester in the department's basic language and literature curriculum. Additionally, the department offers a yearly course on grant writing, the academic job market, and other key topics of professional development. Our Ph.D.'s (https://liberalarts.tulane.edu/departments/spanish-portuguese/recent-graduate-alumni/) have consistently obtained tenure-track appointments at leading colleges and universities in the United States and abroad.

All students in the graduate program are admitted to the combined M.A./Ph.D. track and receive a tuition waiver and five years of stipend support. After year one, students teach one course per semester. All students admitted take the M.A. exam, normally in the spring semesters of year two. Those who enter the program with an outside M.A. in Spanish and/or Portuguese literature have the option of taking the M.A. exam in the spring semester of year one and beginning the Ph.D. phase of the program in year two. All students are eligible for a full dissertation writing fellowship in the final fifth year of study. If funding is needed beyond year five, the School of Liberal Arts offers a limited number of Dissertation Completion Fellowships on a competitive basis to qualified students nominated by their department.

Applying

Applications are made online through the Office of Graduate Programs of Tulane's School of Liberal Arts (https://liberalarts.tulane.edu/academics/graduate-studies/prospective-students/). The annual application deadline is January 10. The following are required: complete application form, TOEFL scores for foreign students, academic transcripts, statement of purpose, and three letters of recommendation (in English, Spanish, or Portuguese). In addition to the materials required by the School of Liberal Arts, applicants must submit a sample of academic writing in Spanish or Portuguese.

In addition, see the Department's page on Frequently Asked Questions (https://liberalarts.tulane.edu/) about graduate admission. Further questions may be directed to the Department of Spanish and Portuguese (spanportgrad@tulane.edu).

We look forward to your application!

Requirements

- Course work: 17 courses in total (51 credits), including SPAN 6010 Method Tchg Span & Port (3 c.h.) and 4 7000-level seminars, including SPAN 7960 Ph.D Prep & Professional Dev (3 c.h.). A select number of courses may be taken outside the department, with permission of the faculty.
- M.A. comprehensive exam: based on reading lists in four areas (https://liberalarts.tulane.edu/departments/spanish-portuguese/academics/graduate/graduate-ma-reading-lists/) in Spanish (Medieval and Early Modern Iberian; Modern Spanish Peninsular; Colonial and 19th-Century Latin American; Contemporary Latin American) and/or Portuguese (Luso-Brazilian Literature to 1822; Luso-Brazilian Literature 1822-1922; Luso-Brazilian Literature 1922-1968; Luso-Afro-Brazilian Literature 1968-present)
- Reading proficiency in two foreign languages in addition to the language of specialization
- Ph.D. qualifying exam: Based on customized reading lists in one major area of specialization and two minor areas
- Dissertation prospectus
- Dissertation and final defense

For further information on the expectations of the program, see the Spanish and Portuguese Graduate Student Handbook (https://liberalarts.tulane.edu/academics/graduate-studies/resources/).

Spanish Major

The Department of Spanish and Portuguese is dedicated to the study of languages, literatures, and cultures of Latin America and the Iberian Peninsula. Our department offers a wide variety of undergraduate classes, from basic language instruction in Spanish and Portuguese to upper-level courses in literature, culture, and film. Undergraduates may pursue majors and minors in Spanish and Portuguese, or a Joint Major in Spanish and Portuguese.

Requirements

The major in Spanish consists of 34 credits (11 courses + writing intensive) to be distributed in the following manner:

Course ID	Title	Credits
3000-Level (3 courses, 9 credits)		
Select one of the following four courses:		3
SPAN 3040	Spanish Grammar and Writing [1]	
SPAN 3050	Spanish Grammar & Writing Business	
SPAN 3060	Spanish Grammar & Writing Medical Profession	
SPAN 3080	Spanish Grammar and Writing for the Legal Professions	
Select one of the following three courses:		3
SPAN 3130	Introduction to Latin American Cultures	
SPAN 3240	Intro to Spanish Culture	
SPAN 3350	Intro Topics Hispanic Cultures	
Select one of the following two courses:		3
SPAN 3270	Span & Lat Amer Lit & Cultures	

SPAN 3280	Spanish & Lat Amer Lit & Film	
4000-Level (5 courses, 15 credits)		
SPAN 4060	Hispanic Literary Foundations [2]	3
Select any 4 courses at the 4000-level [3]		12
6000-Level (3 courses + writing intensive, 10 credits)		
Select any 2 courses at the 6000-level		6
SPAN 6850	Senior Seminar	4
Total Credit Hours		**34**

1. SPAN 3040 Spanish Grammar and Writing (3 c.h.) is a prerequisite for all other 3000 level courses; it may be taken in the same semester as other 3000 level courses.
2. SPAN 4060 Hispanic Literary Foundations (3 c.h.) is a prerequisite for all other courses at the 4000-level and above. This course may be taken simultaneously with the last 3000-level course or any other 4000-level course.
3. Pending approval, relevant internships may count as a one credit elective but do not count towards the major or minor.

Sequence of Courses

All courses in the major must be taken in sequence, although two sequential classes may be taken simultaneously (except 3040 or 3050 or 3060 which are prerequisites for other courses at 3000 level).

Students may not receive credit for courses taken out of sequence.

Double Majors

Double majors must complete 31 credits (10 courses + writing intensive) in the Spanish major, with a reduction of one 6000-level course. Majors may receive credit for one course taught in English.

Native and Heritage Speakers

Native speakers of Spanish begin the major with SPAN 4060. Additionally, they complete any seven courses at the 4000 level, as well as the three requirements at the 6000 level.

Native speakers complete the *minor* with SPAN 4060, plus five additional 4000-level courses.

Native speakers may not enroll in courses at the 3000 level.

Heritage speakers of Spanish must meet with the Director of Undergraduate Studies to determine their placement in the program.

Spanish Minor

The Department of Spanish and Portuguese is dedicated to the study of languages, literatures, and cultures of Latin America and the Iberian Peninsula. Our department offers a wide variety of undergraduate classes, from basic language instruction in Spanish and Portuguese to upper-level courses in literature, culture, and film. Undergraduates may pursue majors and minors in Spanish and Portuguese, or a Joint Major in Spanish and Portuguese.

Requirements

The Spanish minor consists of 18 credits (six courses), which are constituted by the 3 sections below, plus any other three 4000-level courses. Students are encouraged, but not required, to take SPAN 4060. Minors may not receive credit for courses taught in English.

Course ID	Title	Credits
Select one of the following three courses:		3
SPAN 3040	Spanish Grammar and Writing	
SPAN 3050	Spanish Grammar & Writing Business	
SPAN 3060	Spanish Grammar & Writing Medical Profession	
Select one of the following three courses		3
SPAN 3130	Introduction to Latin American Cultures	
SPAN 3240	Intro to Spanish Culture	
SPAN 3350	Intro Topics Hispanic Cultures	
Select one of the following two courses		3
SPAN 3270	Span & Lat Amer Lit & Cultures	
SPAN 3280	Spanish & Lat Amer Lit & Film	
Elective		
Select any three courses of 4000 level [1]		9
Total Credit Hours		**18**

1. Pending approval, relevant internships may count as a one credit elective but do not count towards the major or minor.

Spanish, MA

We do not offer a stand-alone M.A. degree in Spanish or Spanish and Portuguese. Only undergraduate majors at Tulane may apply to the 4+1 M.A. Degree Program which allows them to earn the M.A. degree in Spanish or the joint M.A. degree in Spanish and Portuguese in one year. Dance Technique

Students must achieve level IV in either ballet or modern dance technique and level III in the other in order to graduate and will be evaluated at the end of each academic year. Students who demonstrate proficiency at the technique level III in modern dance or ballet (DANC 3830 Intensive Contemporary Dance III (3 c.h.), DANC 3840 Intensive Ballet III (3 c.h.)) will be place at level IV (DANC 4830 Intensive Contemporary Dance IV (3 c.h.), DANC 4840 Intensive Ballet IV (3 c.h.)). Each of these courses may be repeated for credit. Dance majors must continue to be enrolled for credit in ballet and modern dance through graduation. BFA candidates are required to enroll in both Intensive Modern Dance (4-day) and Intensive Ballet (4-day) each semester at their proper level III or IV. For the BFA candidate, the maximum number of dance technique credits that may be counted toward the 120 credit hours for graduation is 30 credits.

Interdisciplinary Dance Performance, MFA

Through the lens of movement and performance making, the Interdisciplinary Dance Performance (IDP) MFA program is envisioned to provide graduate opportunities for scholarly investigation in diverse disciplines that directly link to creative practice and performance making. The program is designed to create performance practitioners who understand the intellectual ramifications of their work and scholars who understand the practical applications of their theories. That is , the research in any given discipline will be source material for the creative work and creative work will illuminate and integrate research.

Requirements

Course ID	Title	Credits
DANC 6010	Creative Projects and Movement Practice (taken 5 times)	3
DANC 6210	Sem I: Text & Movement Studies	3
DANC 6220	Seminar II: Dance and Performance Topics	3

Interdisciplinary: 6 or 7 (3-credit) courses from non-dance department		18
Total Credit Hours:		57 minimum (63 maximum)

Curriculum Timetable, Interdisciplinary Dance Performance (IDP) MFA, 3 years

Summary:

- DANC 6010, Creative Projects and Movement Practice (3 credits per semester) to be taken 5-6 semesters = 15-18 credits
- Dance Specific Courses = 24 credits
- 6-7 interdisciplinary 3-credit classes (18-21 credits)
  Total credits: 57 minimum
- First Year: Creative Projects and Movement Practice, Seminar I, Laban Movement Studies, Choreography and Media, Interdisciplinary Courses, Work/Study in design shops, choreography for undergraduates, or dance program assistance each semester.
- Second Year: Creative Projects and Movement Practice, Seminar II, Management /Portfolio in spring, Interdisciplinary Course(s),

Work/Study teaching undergraduates, or choreography for undergraduates, or dance program assistance, and thesis proposal in the spring semester.

- Third Year: Creative Projects and Movement Practice, Interdisciplinary Course(s), Work/Study teaching undergraduates or dance program assistance, Thesis Project I – Production: preparation and production in fall semester, including undergraduate students as performers. Thesis Project II-Analysis: Written thesis, thesis defense, and graduation in spring.

Total – 57 minimum credits. (Including interdisciplinary courses)

Interdisciplinary courses to be coordinated with respective departments by MFA student and/or DGS of IDP MFA. Summary of Interdisciplinary courses is due to DGS of IDP MFA at end of each semester for dance faculty, outlining courses completed and relationship to IDP MFA.

Theatre Design and Production, MFA

The Master of Fine Arts degree in Design at Tulane University offers an in-depth study of theatrical design areas with an emphasis on preparing the student for a career in the professional theatre or as a teacher of a specialized field at the university level. Applicants to the program must have completed an undergraduate degree in theatre or have had equivalent training and experience.

The Master of Fine Arts degree in Design places concentration and emphasis on design as a collaborative process with equal emphasis on technical and creative skills as learned both through classwork and practical production.

The program is a three-year program. Two and a half years are spent in residence and one semester of the third year in an internship with a professional theatre. Students with an MA in design or production may, at the discretion of the faculty, complete their degree sooner. Normally, 48 hours of course work are required for completion of the degree. In addition, twelve hours are earned with the internship assignment and a thesis production.

It is the philosophy of the design faculty that the design process is best taught through the realization of designs in actual production situations. Each year, the Department of Theatre and Dance provides a number of opportunities for such realized design projects. The department produces three to four mainstage productions and one dance concert each year directed by faculty or guest directors. Students in design and technical direction are assigned to these projects as their skills develop. The Third Year Thesis Project becomes the culmination of a number of realized projects. The selection of this production is intended to provide a showcase of each student's talents and skill. Each student's work is reviewed by the faculty on a semester-to-semester basis.

Admission

Admission to the MFA Design program is highly selective and only a small number of candidates are selected every other year. This ensures each student considerable production experience as well as continual one-on-one contact with Theatre Design faculty. Prospective applicants are referred to the Graduate Program in the School of Liberal Arts for application materials and a catalog outlining further requirements and deadlines.

Please note that while the university states a February 1 application deadline, the department extends its deadline past that date as we traditionally recruit at USITT in March. Admission to the program is based primarily on consideration of the candidate's academic ability as evidenced by his/her undergraduate GPA, previous theatre experience, and portfolio. The GRE is no longer required.

Ideally, the design faculty would like the opportunity to look at the applicant's portfolio during an interview. However, if an interview is not possible, the department will request that the applicant send a portfolio of representative work for review. Please do not send your portfolio with your application; wait until it is requested by the department.

Areas of Specialization

Tulane University Theatre Department offers Scene Design, Costume Design, Lighting Design, and Technical Direction as areas of specialization within the framework of the Master of Fine Arts Degree.

An MFA in Design candidate must select one of these areas of concentration and is urged to select a secondary area of specialization as well.

An MFA student is required to take all courses stipulated as core courses for a major in design. In addition, a sequence in the area of specialization (listed below under electives) is required. If a secondary area of specialization is also elected, six units in that area, from the elective list, are required.

Whenever possible, the design faculty utilizes class time as an opportunity to supervise closely the work of a student who is holding a design assignment in a given semester. For instance, if a student is enrolled in Costume Design and is also designing costumes for a production in the same semester, the design assignment will be substituted for one or more design projects.

Reviews

At the end of each semester, design students are required to attend the design gallery and an individual MFA review with the faculty. In the gallery, the student presents a record of his or her most representative work in the program and should be prepared to answer questions regarding that work. These reviews provide the all of faculty with the chance to see the work of individual students and exchange ideas and commentary on the student's progress. During their reviews, in additon to reviewing their work, students have an opportunity to voice their needs for further development within the program.

The end of the semester review is intended as a positive meeting for evaluation and discussion of a student's work. If, however, a student's work (or attitude) is evaluated as undesirable or sub-standard, the student may be placed on probationary status the following semester. If the quality of the student's work has not improved by the end of the probationary semester, the student will be asked to leave the program. In some cases where either a student's work, attitude, or grades are deemed so unsatisfactory that their continuation in the program would

be of no benefit to either them or the department, dismissal may be considered, in consultation with the Dean of the School of Liberal Arts. The student will be notified of his or her status in written form following their review each semester.

Production Assistantships/Stipends

Tulane University requires that each graduate student commit 15-20 hours a week of service to the department in which the student is involved. This is required of a student regardless of acceptance or non-acceptance of a stipend. Any student offered an assistantship will be granted a full tuition waiver. Currently, all of our graduate students receive a stipend and a full tuition waiver.

Professional Internships

The program recommends that all MFA candidates in Design or Technical Production spend one semester of their third year as an intern in a professional theatre. This gives the student an opportunity to apply, in a purely production environment, the educational experiences of the first two years of graduate training. Further, it provides employment contacts which should be invaluable upon completion of the MFA.

During the internship, the University continues to provide the graduate stipend. While the choice of theatre and arrangements for the position are primarily the responsibility of the student, the student's faculty advisor makes every effort to aid in finding a satisfactory position.

Design Options

In addition to the departmental productions, there are a number of other opportunities for design open to graduate students that the design faculty encourages its students to explore.

Operated in conjunction with the Department of Theatre and Dance at Tulane University, The New Orleans Shakespeare Festival at Tulane is a professional resident theater company with a summer repertory. Students in the graduate programs of Design and Technical Production are encouraged to spend at least one summer on staff, and are given some consideration in the technical and design positions available. There are other opportunities both on and off campus.

Requirements

The required credits for a Design Major is 60 hours.

Theatre, BA

The Department of Theatre and Dance offers diverse classes for undergraduate students, designed to give students learning opportunities in performance, acting, directing, design, history, voice, and theory and criticism. Our faculty work locally, nationally, and internationally, employing various methodologies and aesthetics.

The department offers a Bachelor of Arts with concentrations in Performance: Acting or Directing, Design, or Theatre Generalist. Audition is required to pursue the BA in Performance. Audition opportunities are available fall and spring semesters.

Students interested in the BFA in Design should submit a letter of application to the Head of the Design Program, requesting admission into the track.

Students interested in being theatre majors are strongly encouraged to seek departmental advisement to create a curriculum plan, especially if considering either a semester or year abroad.

Requirements

Auditions will be held each year for those interested in the performance track.

Core Requirements for All Emphases:

Course ID	Title	Credits
Core Courses		
THEA 2010	Performance I	3
THEA 2110	Acting I	3
THEA 3311	Scene Shop Practicum [1]	1
THEA 3312	Costume Shop Practicum [1]	1
THEA 3313	Running Crew Practicum [1]	1
THEA 3340	Production & Design I [1]	3
THEA 3350	Production & Design II [1]	3
Select 3 theatre studies courses, one from each category:		
1 Foundations Course:		3,4
THEA 2810	Global Theatre & Performance	
or THEA 4710	Foundations of Theatre History	
1 modern & contemporary non-US course:		3,4
THEA 4720	Modern and Contemporary Non-US Theatre	
1 US theatre course:		3,4
THEA 4730	U S Theatre History	
or THEA 4750	African American Theatre Histo	
Total Credit Hours		**24-27**

[1] THEA 3311 Scene Shop Practicum (1 c.h.) and THEA 3312 Costume Shop Practicum (1 c.h.) must be taken with THEA 3340 Production & Design I (3 c.h.)/THEA 3350 Production & Design II (3 c.h.) (in any order), one section of THEA 3313 Running Crew Practicum (1 c.h.), and one free option from 3311-3314, which included Box Office.

NOTE: THEA 3315 Acting Practicum (1 c.h.) does not count toward the major. (Repeatable 4 times)

Emphases

General Emphasis

Core courses (24 credit hours) plus the following courses (6 credit hours):

Course ID	Title	Credits
Select two additional THEA/DANC courses or approved out of dept. courses.		6
Total Credit Hours		**6**

Possible Courses Outside Department*

THEA 6860	Advanced Costume Construction	
THEA 6410	Design Fundamentals I	
THEA 6900	Portfolio Techniques	
Total Credit Hours		**9**

Performance Emphasis: Acting or Directing

Core courses (24 credit hours) plus the following courses (12 credit hours):

Course ID	Title	Credits
Required courses for both Acting and Directing Techniques: [1,2]		
THEA 1090	Voice I	2
THEA 3030	Suzuki Method of Acting	2
THEA 3110	Text Analysis for Actors and Directors	2
Please select one of the following groups:		**6**
Acting Technique:		
THEA 2090 & THEA 3010 & THEA 4010	Voice II and Acting II and Acting III	
Directing Technique:		
THEA 3210 & THEA 3220 & THEA 3250	Directing I: The Foundation and Directing II: Staging the Imagination and Directing III: Directing Psycho-Physical Theatre	
Total Credit Hours		**12**

[1] Performance track students must continue to be enrolled in technique classes through graduation. Consult with theatre advisor.

[2] Performance track students may select courses across THEA/DANC disciplines after completion of requirements in either Acting or Directing. Consult with theatre advisor. Additional credits beyond 36 would apply.

Theatre, BFA

The Bachelor of Fine Arts degree with an emphasis in design is intended for students who want professional training in theatre production. For admission to the program, students must apply during their sophomore year to the Head of the Design Program.

Requirements

An early decision to major in theatre is highly encouraged. Majors should finish the core curriculum as early as possible, as they are prerequisites for all other departmental courses.

Course ID	Title	Credits
Core Theater Courses (24-27 credits) plus these courses:		**24-27**
Design/Production Emphasis [2]		
THEA 6410	Design Fundamentals I	3
THEA 6420	Design Fundamentals II	3
THEA 6530	Period Style Designers I	3
THEA 6540	Period Styles Design II [3]	3
THEA 6900	Portfolio Techniques	3

THEA 6990	BFA Thesis Production	3
Select six three-credit electives that must be at the 3000-level or above		18
Total Credit Hours		**60-63**

1 THEA 3311 Scene Shop Practicum (1 c.h.) and THEA 3312 Costume Shop Practicum (1 c.h.) must be taken with THEA 3340 Production & Design I (3 c.h.)/THEA 3350 Production & Design II (3 c.h.) (in any order), plus one section of THEA 3313 Running Crew Practicum (1 c.h.), and one free option from 3311-3314, which included Box Office. THEA 3315 Acting Practicum (1 c.h.). Only counts toward the BA in Performance.

2 Entry into the B.F.A. Design/Production Track is by application to the Head of the Design Program. The major consists of the same core curriculum as the B.A. track.

3 B.F.A. Stage Management candidates may substitute either DANC 4710 Dance Hist:Prim To 19 C. (3 c.h.) or DANC 4720 Dance Hist:20th C. & Beyond (3,4 c.h.) for THEA 6540 Period Styles Design II (3,4 c.h.)

Africana Studies Major

Africana Studies offers a broad course of interdisciplinary study relating to Africa, people of African descent, and the many different contexts of the African Diaspora around the world. Drawing on diverse methodologies and academic disciplines, Africana Studies teaches students to think analytically and critically about global Black experiences across space and time. Africana Studies also trains students to make intellectual connections among global, national, and local contexts. Building on the university's strengths in the social sciences, behavioral sciences, and humanities, Africana Studies provides an intellectual center for teaching, research, and community engagement that prepares students to function effectively in a multicultural society and diverse international environments.

Students graduating with a degree in Africana Studies are well prepared with the cultural resources and tools needed to pursue most professional careers. Recent graduates have enrolled in graduate school, launched for-profit and not-for-profit businesses, and conducted relief work in various African countries. Others have pursued professional careers in medicine, social work, and law.

Students should note that more than half of the courses which count toward the Africana Studies Major are based in other Departments, Programs and Schools across the University. Students may take a wide range of electives in departments such as Art History, Communication, French, Music, Political Science or Psychology for example in order to complete the Africana Studies Major.

Requirements

Ten courses (minimum of 30 credits) are required for the major. The major consists of the following:

Course ID	Title	Credits
Introductory Course		
AFRS 2000	Introduction to Africana Studies [1]	3
Elective Courses [2,3]		
Geographic Distribution:		
Select at least two courses in African Studies		6
Select at least two courses in African Diaspora Studies		6
Africana Studies Program Electives:		
Select at least one elective course which is based in the Africana Studies Program with the AFRS course designation. Usually this course will be taken at the 3000 level. However, an upper level AFRS 4000 level class may also fill this requirement.		3
Upper Level Courses:		
Select at least four Upper Level courses at the 4000 level or higher. These courses may be 4000-level courses based in the Africana Studies Program OR 4000 and 6000 level courses based in other Departments and Programs, so long as those upper level courses have been approved for credit in the Africana Studies Major. [4]		12
Total Credit Hours		**30**

1 This course is offered every semester.
Note: Students are strongly encouraged to take this course during the Freshmen or Sophomore year however it may be taken by any student including Juniors and Seniors.

2 **Limits:** A maximum of six credits in Dance courses may count toward the major.

3 **Language Courses:** Language classes at any level in Arabic, Haitian Creole, Swahili, Twi, Xhosa, Yoruba and Zulu may all be counted for elective credit in the Africana Studies Major.

4 A maximum of three electives (nine credits) at the 1000 or 2000 levels may be counted toward major.

Students must ensure that at least four of the electives (twelve credits) are at the 4000-level or higher and no more than three electives (nine credits) are at the 1000- or 2000-levels. Students must fulfill the distribution component of at least two courses (six credits) in African studies and two courses (six credits) in African Diaspora studies. Students should try to choose elective courses from both the humanities as well as the social or behavioral sciences. A maximum of six dance credits may count toward the major.

Other Electives

The following courses do not meet the GEOGRAPHIC DISTRIBUTION requirements for African or African Diaspora credits. But all of these courses may be taken as general electives to fulfill the requirements of the major. (Most of these courses include coverage of both the African continent and the African diaspora around the world. This is the reason they do not fulfill Geographic Distribution Requirements.)

Students may also petition to count any course related to African Studies or African Diaspora Studies, whether offered at Tulane or taken at another university, as a part of their major curriculum. Such petitions will be considered by the Program Director in consultation with Africana Studies Program faculty.

Africana Studies Minor

Africana Studies offers a broad course of interdisciplinary study relating to Africa, people of African descent, and the many different contexts of the African Diaspora around the world. Drawing on diverse methodologies and academic disciplines, Africana Studies teaches students to think analytically and critically about global Black experiences across space and time. Africana Studies also trains students to make intellectual connections among global, national, and local contexts. Building on the university's strengths in the social sciences, behavioral sciences, and humanities, Africana Studies provides an intellectual center for teaching, research, and community engagement that prepares students to function effectively in a multicultural society and diverse international environments.

Students graduating with a Major or Minor in Africana Studies are well prepared with the cultural resources and tools needed to pursue most professional careers. Recent graduates have enrolled in graduate school, launched for-profit and not-for-profit businesses, and conducted relief work in various African countries. Others have pursued professional careers in medicine, social work, and law.

Students should note that more than half of the courses which count toward the Africana Studies Minor are based in other Departments, Programs and Schools across the University. Students may take a wide range of electives in departments such as Art History, Communication, French, Music, Political Science or Psychology for example in order to complete the Africana Studies Minor.

Requirements

Six courses (minimum of 18 credits) are required for the minor which includes:

Course ID	Title	Credits
Introductory Course		
AFRS 2000	Introduction to Africana Studies [1]	3
Elective Courses [2,3]		
Select at least one course in African Studies to fulfill Geographic Distribution		
Select at least one course in African Diaspora Studies to fulfill Geographic Distribution		3
Select at least three Upper Level courses at the 3000 level or higher		12
Total Credit Hours		**18**

1. Offered every semester
2. **Limits:** A maximum of four credits in Dance courses may count toward the minor.
3. **Language Courses:** Language classes in Arabic, Haitian Creole, Swahili, Twi, Xhosa, Yoruba and Zulu may all be counted for elective credit in the Africana Studies Minor.

Additional Information

Students must ensure that at least three of the electives (nine credits) are at the 3000-level or above. Furthermore, students must choose elective courses from both the humanities as well as the social and behavioral sciences and must fulfill a distribution component of at least one course (three credits) in African Studies and one course (three credits) in African Diaspora Studies.

Other Electives

The following courses do not meet the GEOGRAPHIC DISTRIBUTION requirements for African or African Diaspora credits. But all of these courses may be taken as general electives to fulfill the minor requirements. (Most of these courses include coverage of both the African continent and the African diaspora around the world. This is the reason they do not fulfill Geographic Distribution Requirements.)

Students may also petition to count any course related to African Studies or African Diaspora Studies, whether offered at Tulane or taken at another university, as a part of their minor curriculum. Such petitions will be considered by the Program Director in consultation with Africana Studies Program faculty.

Altman Program in International Studies & Business

The Altman Program in International Studies & Business is a special four-year undergraduate program that integrates liberal arts and business disciplines, extensive language instruction, and two study abroad experiences. Altman Scholars earn two degrees - a B.A. from the School of Liberal Arts and a B.S.M. from the A. B. Freeman School of Business.

The Altman Program provides students with an Altman-specific course each semester, a cohort summer study abroad trip between freshman and sophomore years, and financial support for junior year abroad and internships. The program admits a cohort of up to 20 students who are selected before their matriculation at Tulane as freshmen.

Requirements

The Altman Program combines the curricula of two undergraduate degree programs in the School of Liberal Arts and the A. B. Freeman School of Business. Students may major in finance, management, marketing, or legal studies at the Freeman School and in approved social science, area studies or language disciplines within the School of Liberal Arts. The link between the two majors in the schools is the interdisciplinary "Altman Core", a cohort-specific academic course every semester.

Specific courses open only to students in this program include a TIDES seminar; ISIB 3010 Introduction to Globalization (3 c.h.); ISIB 1910 Study Abroad Pre-Dep (1 c.h.); ISIB 2030 Perspectives on Global Citizenship (3 c.h.); ISIB 6010 Approaches to Global Dilemmas (3 c.h.); and ISIB 6020 Altman Senior Seminar (1 c.h.).

In addition, students study a non-English language (i.e. Spanish, Portuguese, French, German, Italian, or Japanese, Mandarin Chinese) during their first two years in the program, and spend two full semesters abroad in countries where their target language is spoken.

Major

- Asian Studies Major (p. 288)

Minors

- Asian Studies Minor (p. 289)
- Chinese Language Minor (p. 290)
- Japanese Language Minor (p. 291)

Asian Studies Major

Asian Studies draws from a broad range of courses in the liberal arts, including anthropology, art history, communication, English, film, history, philosophy, political science, and sociology.

Ten courses (minimum of 30 credits) are required for the major. Students should demonstrate elementary proficiency or the equivalent of the first year of instruction in Chinese (Mandarin), Japanese, or another Asian language in consultation with the Director of the Program. They are also expected to demonstrate an ability to locate, evaluate, and use research materials relevant to Asian Studies as evidenced by an upper level seminar.

Finally, students should demonstrate breadth by taking at least one elective course concerning the East Asian region (i.e. China, Korea, or Japan), and at least one elective course outside of that region – for example, a class on Vietnam or Malaysia.

Please consult the online schedule of classes for courses approved for credit in Asian Studies in a given semester. Students can also contact the Director of the Program for more information.

Requirements

Ten courses (minimum of 30 credits) are required for the major.

Major Requirements

Course ID	Title	Credits
Introductory Course [1]		
ASTA 1800	Intro to Asian Studies	3
Language Courses [2]		
Select two language courses at any level in Chinese, Japanese, or another Asian language as approved by the Program Director.		6-8
Electives		
Select from among the courses offered in the Asian Studies Program and in other Departments and Programs approved for credit in the Asian Studies major. Within these courses, the following requirements apply:		19-21
Geographic Distribution		
Select at least one elective course concerning the East Asian region (i.e. China, Korea, or Japan), and at least one course outside of that region (e.g., Vietnam, Malaysia).		
Upper Level Courses [3]		
Select at least one Upper Level elective course at the 4000 level or higher.		
Total Credit Hours (Minimum):		**30**

[1] ASTA 1800 is only offered in the spring semester. Students are strongly encouraged to take this course during their Freshman or Sophomore year, although it may be taken by any student including Juniors and Seniors.

[2] A maximum of four language courses may count toward the major, replacing 6-8 credits of elective courses. Language classes used to fulfill the NTC language requirement cannot also be counted towards the Asian Studies major.

[3] Upper Level courses may also count towards the geographic distribution requirement, and vice versa.

China Studies within the Asian Studies Program

Students selecting to pursue the China track within the Asian Studies major must complete five Chinese-related classes as part of the overall requirements for the major. At least two ASTC courses at the 3000-level or above must be included within the five required track courses, and no more than five ASTC courses can be applied to the major. In addition, at least half of the required credits must be taken on the Tulane campus or through a Tulane approved off-campus program. Specific measurable learning outcomes of students graduating with a coordinate major in Asian Studies with a concentration in the China track include:

- Demonstrate at least an advanced proficiency in Chinese as demonstrated by completing two ASTC courses at the 3000-level or above.
- Possess at least a basic understanding of the historical, social, and cultural background of China.
- Locate, evaluate and utilize research materials germane to Chinese studies.

Japan Studies within the Asian Studies Program

Students selecting to pursue the Japan track within the Asian Studies coordinate major must complete five Japanese-related classes as part of the overall requirements for the major. At least two ASTJ courses at or above the 3000-level must be included within the five required track courses, and no more than five ASTJ courses may be applied to the major. In addition, at least half of the required credits must be taken on the Tulane campus or through a Tulane approved off-campus program. Specific measurable learning outcomes of students graduating with a coordinate major in Asian Studies with a concentration in the Japan track include:

- Demonstrate at least advanced proficiency in Japanese by having passed two ASTJ courses at the 3000-level and above.
- Possess at least a basic understanding of the historical, social, and cultural background of Japan.
- Locate, evaluate and utilize research materials germane to Japanese studies.

Asian Studies Minor

Asian Studies draws from a broad range of courses in the liberal arts, including anthropology, art history, communication, English, film, history, philosophy, political science, and sociology.

Students selecting a minor in Asian Studies must complete six classes (minimum 18 credit hours) from the approved Asian Studies course options. Students should demonstrate breadth by taking at least one elective course concerning the East Asian region (i.e. China, Korea, or Japan), and at least one elective course outside of that region – for example, a class on Vietnam or Malaysia.

Up to two Asian language courses may count towards the minor.

Please consult the online schedule of classes for courses approved for credit in Asian Studies in a given semester. Students can also contact the Director of the Program for more information.

Requirements

Six courses (minimum of 18 credits) are required for the minor.

City, Culture, and Community, PhD

CCC Ph.D. Program awards degrees in three disciplines:

- Ph.D. in Social Work–City, Culture, and Community
- Ph.D. in Sociology–City, Culture, and Community
- Ph.D. in Urban Studies-City, Culture, and Community

The City, Culture, and Community (CCC) doctoral program is a broad-based and integrative graduate education-research program that addresses relationships among the physical environment, the built environment, and social, economic, and political institutions and processes that shape cities and metropolitan regions. The intellectual focus of the CCC program is unique in bringing together interdisciplinary approaches in the social sciences, social work, architecture, law, and humanities and applying them to understand a range of issues pertaining to cities, cultures, and communities. CCC's breadth of interdisciplinary study allows students considerable flexibility to tailor their training to individual research interests while providing some depth of disciplinary training in the tracks that individual students follow: sociology, social work, and urban studies. Students must complete 53 hours of course work comprised of 24 hours of elective credits and 29 hours of required credits. For more information about the program, please consult the CCC Graduate Student Handbook. (https://ccc.tulane.edu/)

The CCC curriculum and research training give students an interdisciplinary conceptual and practical basis to study the dynamics of urban, cultural, and community change in international and comparative terms and frameworks. By interconnecting interdisciplinary and disciplinary education and training, CCC faculty members encourage graduate students to select dissertation topics that offer the potential for a cross-disciplinary approach with the Ph.D. degree awarded in “Sociology – CCC,” “Social Work – CCC,” or “Urban Studies - CCC.” The program is designed to prepare students for professional careers in academic and non-academic settings. CCC's three principle goals are (1) to produce highly educated researchers with advanced theoretical and methodological skills and flexibility to compete in the academic, governmental, non-profit, private, and public sectors, or some combination; (2) to develop partnerships between faculty and students to extend scholarship in important areas of research, creativity, and practice to benefit the New Orleans community and society-at-large; and (3) to create new methods, theories, and innovative approaches to address the world's most challenging urban, environmental, and sustainability problems.

Cognitive Studies Coordinate Major

The coordinate major in cognitive studies combines a regular major with a curriculum in three tracks: formal disciplines, philosophical foundations and psychology. The program is designed to provide basic knowledge of current research on mind, cognition, and language.

Requirements

The Cognitive Studies major consists of ten courses of which six are required and four elective. At least one elective must be in each of the three component tracks, and at least one must be at the 6000-level. With the director's consent, work in a different but relevant discipline may be substituted for, at most, one elective course. It is suggested that students interested in philosophy take an introductory course, preferably PHIL 1040 Beginning With Minds (3 c.h.).

Course ID	Title	Credits
Required Courses		
Formal Disciplines Track		
Select two of the following:		6
ANTH 3290	The Nature of Language	
ANTH 3590	Introduction To Syntax	
CMPS 1100	Foundations of Programming	
or CMPS 1500	Intro to Computer Science I	
PHIL 1210	Elementary Symbolic Logic	
Philosophical Foundations Track		
Select two of the following:		6
PHIL 3740	Consciousness	
PHIL 3750	Philosophy of Cognitive Science	
PHIL 3765	Imagination	
PHIL 3800	Language and Thought	
PHIL 3710	Altered Experience	
Psychology Track		
PSYC 1000	Introductory Psych	3
and one of the following:		
PSYC 3300	Brain and Behavior	
PSYC 3430	Intro To Social Psychology	
PSYC 3770	Sensation & Perception	
Electives		
Select four of the following, a minimum of one in each track, and at least one at 6000 level:		12
Formal Disciplines Track		
ANTH 3420	Semantics: Linguistic Approaches to Meaning	3
LING 4110	Brain and Language	
or NSCI 4110	Brain and Language	
PHIL 6120	Metaphysics	
or PHIL 6010	Metaphysics of Mind	
PHIL 3720	Philosophy of Science	
Philosophical Foundations Track:		
PHIL 3870	Mind In Evolution	
PHIL 6105	Philosophy of Neuroscience	
PHIL 6130	Moral Psychology & Meta-Ethics	
PHIL 6170	Philosophy of Perception	
PHIL 6180	Mental Representation	
Psychology Track:		
PSYC 3210	Child Psychology	
PSYC 3680	Comp Animal Behavior	
PSYC 3700	Evolution & Psychology	
PSYC 4330	Neurobiology Learn & Memory	
PSYC 4510	Biological Psychology	
Total Credit Hours		**30**

Creative Industries Certificate (Graduate)

Overview

The Creative Industries Graduate Certificate promotes, supports, and expands the creative economy of places by enabling creative professionals and aspirant entrepreneurs. The certificate builds upon knowledge of music, theater, dance, film/TV, publishing, culinary arts, museums, visual/digital arts, and preservation/heritage with the practical tools needed to build one's career.

Requirements

To receive a graduate certificate in creative industries, students would complete 16 credits of study by taking the four courses listed below:

Course ID	Title	Credits
SLAM 7010	Leadership Strategies for Creative Industries	4
SLAM 7020	Branding and Storytelling for Creative Industries	4
SLAM 7030	Data Driven Strategies	4
SLAM 7040	Legal Strategies for Creative Industries	4
Total Credit Hours		**16**

Creative Industries Undergraduate Certificate

Overview

The Creative Industries certificate promotes, supports, and expands the creative economy of places by enabling current professionals and aspirant entrepreneurs. The certificate builds upon knowledge of music, theater, dance, film/TV, publishing, culinary arts, museums, visual/

digital arts, and preservation/heritage with the practical tools needs to build one's career.

Requirements

To receive a certificate in creative industries, students would complete 12 credits of study completed either by taking all four courses (SLAM 4010-4040) listed below; or by taking 3 of 4 courses with an optional 1-credit internship to each class (SLAM 4560 Internship (1 to 4 c.h.) or SLAM 4570 Public Service Internship (1-3 c.h.)). Internships should be selected under the guidance of an advisor and are designed to allow students to apply and reflect upon content course knowledge. These courses are numbered as SLAM electives to be taught by faculty affiliated in the Program.

Course ID	Title	Credits
SLAM 4010	Leadership Strategies for Creative Industries	3
SLAM 4020	Branding and Storytelling for Creative Industries	3
SLAM 4030	Data Driven Strategies	3
SLAM 4040	Legal Strategies for Businesses and Creatives	3
Optional Internship to be taken with 3 of 4 above courses:		
SLAM 4560	Internship	
Total Credit Hours		**12**

Digital Media Practices Coordinate Major

Tulane's Digital Media Practices Program offers a coordinate major focused on the art and practice of digital storytelling. Courses in the program offer hands-on experience in Narrative and Documentary Filmmaking, Interactive Media, Game Studies, Emergent Journalism, Podcasting, and Digital Sound. After completing introductory coursework, students choose an area of specialization leading to a 2-semester Capstone Project. Many students choose to write, produce, and direct their own short films. However, our program also encourages our students to think creatively about their capstone projects, whether these projects are documentary short films, full-length screenplays, multi-episode podcasts, radio dramas, interactive media exhibitions, experimental video games, web-based projects, or a combination of all these elements. The Digital Media Practices Program gives students the opportunity to work closely with experienced and supportive faculty interested in allowing students' passion and vision to help to define their goals.

The Coordinate Major in Digital Media Practices first requires students to declare a major in another discipline before declaring the DMPC coordinate major. The program is an interdisciplinary, 10-course program that can include classes from Digital Media Practices, Cinema Studies and Communication, Music, Theatre and Dance, Art, or English.

Requirements

The coordinate major in Digital Media Practices is an interdisciplinary, 30-credit program that can include courses in Digital Media Practices, Cinema Studies, Music, Theatre and Dance, Communication, Art, or English.

Course ID	Title	Credits
Gateway Courses		**3**
Select 1 of the following:		
DMPC 1000	Digital Media Practices	
DMPC 1110	Introduction to Film Production Cultures	
COMM 1150	Introduction to Cinema	
COMM 1250	Introduction to Television	
COMM 1550	Intro to New Media & Internet	
COMM 1650	Introduction to Media Studies	
Digital Media Practice Foundations		**9**
Select 3 of the following; 2 must be DMPC Courses		
DMPC 2001	Introduction to Digital Filmmaking	
DMPC 2002	Narrative Filmmaking	
DMPC 2003	Documentary Filmmaking	
DMPC 2510	Game Studio 1: Experimental Game Design	
DMPC 2600	Personal Data Visualization	
DMPC 2700	Introduction to Podcasting and Social Justice	
DMPC 2710	Podcasting Production I	
ARST 1330	Photo I: Digital	
ARST 1350	Photo I: Analog and Digital	
ARST 1550	Digital Arts I	
CMPS 1500	Intro to Computer Science I	
CMPS 1600	Intro to Computer Science II	
MUSC 2300	Computer Apps In Music	
THEA 1010	Plays and Playwrights	
THEA 2110	Acting I	
Context and Analysis **Additionally, DMPC will accept any course listed in the Cinema Studies catalog for "Context and Analysis"**		**6**
Select 2 of the following:		
DMPC 2500	Game Studies	
AFRS 3350	Black Music & Performance in New Orleans	
AFRS 4180	African Cinema	
COMM 2450	Topics Gender/Race/Class/Media	
COMM 2500	Film and Society	
COMM 2700	Visual Communication	
COMM 2823	Special Topics	
COMM 3150	Film Analysis *Communication core course. Must take pre-requisite.	
COMM 3310	Comm for Feminism Activitism	
COMM 3510	Environmental Comm	
COMM 3560	History of Animation	
COMM 3600	Documentary Film	
COMM 3650	Feminist Doc & New Media	
COMM 4170	U.S. Film History	
COMM 4350	Gender and The Cinema	
COMM 4750	New Media Theory	
COMM 4850	Cinema Technology Modernity	
ENLS 4100	Literature and Film	
ENLS 4445	Black Literature, Film, and Media	

ENLS 4750	New Media Theory
HIST 3210	Visual History & Filmmaking
MUSC 2310	Electronic Music History
Advanced Practice Electives	**6**
Select 2 of the following; additional courses from Context & Analysis can count as Electives	
DMPC 3000	Screenwriting
DMPC 3010	Development: From Pitch to Picture
DMPC 3020	Directing Actors for Screen
DMPC 3030	TV & Film Sound Design
DMPC 3040	Lighting & Cinematography
DMPC 3080	Color Correction and Grading for Television and Film
DMPC 3500	Game Studio 2: Narrative and VR
DMPC 3710	Podcast Production 2
DMPC 3750	Media for Community Health and Well Being
DMPC 3990	Producing Media for Social Change
ARST 2350	Photography II: Expansive Practice
ARST 2550	Digital Arts II: Creative Computing
ARST 3300	Decolonizing the Camera
ARST 3350	Advanced Photography: Skills and Concepts
ARST 3360	Advanced Photography: Individual Projects
ARST 3550	Time-Based Media
COMM 3610	Alternative Journalism
ENLS 3610	Creative Writing
ENLS 4660	Topics in Adv Creative Writing
APMS 2230	Composition for Electronic Media I
APMS 3230	Composition for Electronic Media II
APMS 3330	Music For Film
APMS 3340	The Creative Soundscape
MUSC 4400	Music & Dsp
MUSC 4410	Music Performance System
MUSC 4420	Algorithmic & Comp Music
SLAM 2020	Financial Analysis and and Budgets
SLAM 2600	Introduction to Creative Industries
SLAM 3030	Marketing Strategies for Business and Creatives
SLAM 3050	Public Relations
THEA 3110	Text Analysis for Actors and Directors (*Must enroll in 3-credit DMP option)
THEA 3210	Directing I: The Foundation
THEA 3340	Production & Design I
THEA 6110	Acting For Other Media
Capstone Courses	**6**
Select 2 of the following:	
DMPC 5510 & DMPC 5520	Advanced Digital Media Production I and Advanced Digital Media Production II
DMPC 5550 & DMPC 5560	Advanced Digital Filmmaking I and Adv Digital Filmmaking II
DMPC 5570	Advanced Screenwriting (Feature Films) (*DMPC 3000 substitutes for DMPC 5550 in this case)
Total Credit Hours	**30**

Environmental Studies Major

The Environmental Studies (EVST) major enables undergraduate students to pursue an interdisciplinary Bachelor of Arts degree focused on understanding the relationships between humans and the environment. Through coursework offered by several of Tulane's most prestigious Schools and Colleges, internships, and opportunities for independent study and honors theses, our majors develop a sophisticated understanding of the interplay between humans and the environment and rigorous knowledge of key environmental and humanistic concerns. This background prepares students to engage productively with the world around them: knowledgeable about people and the environment, and armed with skills in critical thinking and analysis that prepare them for careers in environmental education, advocacy, policy, research, and a wide range of other fields.

Requirements

The major in environmental studies has both core course requirements and a credit requirement. The major requires students to take at least 30 credits of approved course work and a minimum of ten courses in environmental studies (EVST) or courses with a strong EVST component in associated fields listed below. A maximum of three courses or nine credits from 1000-level courses can be counted toward the fulfillment of the major, and a maximum of one study abroad course can count towards the degree. In addition, a minimum of three courses above the 3000-level are required for the major. The major requires students to take three core EVST courses, EVST 1010 Intro To Enviromentl Stu (3 c.h.), EVST 3310 Approaches to Environ Studies (3 c.h.), and EVST 4410 Senior Seminar in Environmental Studies (3 or 4 c.h.), one methods course and six electives, three of which must come from the School of Liberal Arts (SLA). Only one internship EVST 4560 Enviro Stud Internship (4 c.h.) may be counted towards the major requirements.

Course ID	Title	Credits
EVST Core Courses		
EVST 1010	Intro To Enviromentl Stu (should be taken in Freshman or Sophomore year)	3
EVST 3310	Approaches to Environ Studies (should be taken in Sophomore or Junior year)	3
EVST 4410	Senior Seminar in Environmental Studies (should be taken in Senior year)	3
Methods Courses		
Select at least one of the following:		3
ANTH 6010	Quantitative Methods in ANTH	
ANTH 6870	Kaqchikel Maya Culture	
ARCH 3731	Urban Geography and New Orleans as a Case Study	
ARCH 3764	NOLA Geography for Architects	
COMM 3510	Environmental Comm	
EBIO 2020	Theory and Methods in Ecology and Evolutionary Biology	

EBIO 2600	Natural Resource Conservation	
EBIO 4080/6080	Biostatistics and Experimental Design	
EBIO 4460	Biodiversity and Environmental Informatics	
EENS/EBIO 3150/ EENS 6150	Intro to GIS (and Lab)	
EENS 4030	Advanced GIS	
EENS 4380	Remote Sensing for Environmental Analysis	
EENS 6260	Paleoclimatology	
EVST 3933	Urban Gardening	
EVST 3959	Measuring Sustainability	
EVST 4210	Environmental and Social Justice in New Orleans	
EVST 4560	Enviro Stud Internship	
HISL/HISU 3000	Historical Methods	
POLS 2010	Scope/Methods Poli Sci	
SLAM 3020	Strategic Leadership in Practice	
SOCI 3030	Intro To Research Design	
SOCI 3040	Social Statistics	
SOCI 4210	Urban Ethnography and Social Justice	
EVST Electives		**18**
Select six courses from the Electives lists [1]		
Total Credit Hours		**30**

[1] A minimum of 3 must come from School of Liberal Arts

Environmental Electives in the School of Liberal Arts

Environmental Studies Minor

Overview

The impacts of climate change and their local impacts on the region and its peoples stress the need for an Environmental Studies minor.

This minor will utilize university faculty and community partners with a focus on impacts on local communities and environmental justice.

Requirements

The EVST minor is comprised of one introductory course, three designated electives, and one capstone course, for a total of 16 credits. Students focus their study on key environmental issues facing local communities through the tier-2 writing intensive capstone or tier-2 service learning capstone.

Course ID	Title	Credits
Required Courses:		
EVST 1010	Intro To Enviromentl Stu	3
EVST 4210	Environmental and Social Justice in New Orleans (Taken either with a Tier-2 Service Learning component or a SLA Tier-2 Writing Intensive component) [1]	4
Three Electives from approved EVST major electives lists		9
Total Credit Hours		**16**

[1] **EVST 4210 Environmental and Social Justice** requires either a mandatory tier 2 writing intensive component or tier 2 service learning component. In the service learning class, students will work with a community partner to implement a project that will address issues of environmental and social justice in a community context. Credit Hours: 4

Gender Based Violence Certificate

Students pursuing a gender-based violence certificate may find it valuable for pursuing careers as victim advocates, policy analysts, Title IX coordinators, university investigators, or shelter workers. It may also inspire and position students competitively for future graduate work. Those in human resources, law, counseling, medicine (nurses, doctors, physical therapists, dentists) all engage with victim/survivors and could benefit from a certificate in gender-based violence.

Requirements

To receive a certificate in gender-based violence, students must complete 12 credits of work from an established list of eligible courses. Students may petition the Program Director to request a course not listed below be counted as an elective course towards the certificate.

Course ID	Title	Credits
Required Courses		**6-7**
GESS 1900	Sex, Power and Culture	
or SOCI 1010	Sexualities and Society	
SPHU 3500	Public Health Approach to Sexual Violence	
or POLC 4200	The Politics of Rape	
or HISU 6350	History of Gender Based Violence in the United States	
Electives (two of the following) [1]		**6**
AFRS 3200	Issues in African Studies (When taught with following title: "Sexual Politics in South Africa")	
COMM 3310	Comm for Feminism Activitism	
HISU 2400	Women & Gender US Hist to 1865	
HISU 2410	Women & Gender Since 1861	
HISU 2500	Legal Hist US Gender Sex	
HISU 6260	New Directions in Womens Hist	
HISU 6350	History of Gender Based Violence in the United States	
MUSC 2164	Women Die in Opera	
POLC 4200	The Politics of Rape (If not used for Tier-2)	
POLI 4510	Women and War	
PSDV 3010	Special Projects (When taught with following title: "Gender and Development")	
PSDV 4300	Identity and Development (Women and Development in Africa)	
PSDV 4330	Post-Conflict Development	
SOWK 1000	Trauma! A Survey Course [2]	
SOWK 2100	Family Trauma-A Survey Course [2]	
SOWK 2510	Making Meaning of Trauma [2]	
SPHU 3500	Public Health Approach to Sexual Violence (If not used for Tier 2)	
THEA 4420	Theatre as a Preventative Tool to Address Toxicity and Promote Social Change on Campus	
Total Credit Hours		**12-13**

[1] Additional Special Topics courses that will apply to the minor will be published on the department website each semester.

[2] Newcomb-Tulane College students may only apply a total of 9 credit hours from schools outside Newcomb-Tulane College to their degree program.

Gender and Sexuality Studies Major

The Gender and Sexuality Studies (GESS) Program at Tulane University is committed to the multidisciplinary and interdisciplinary preservation, expansion, and transmission of knowledge to undergraduate students and to other individuals in both the university and the larger community about women, gender, and sexuality. The Gender and Sexuality Studies Program is committed to intellectual excellence and to stimulating

continued intellectual growth for faculty and students. As a community of scholars/teachers/learners we are devoted to the study of gender and sexuality as they take shape and affect our lives in a diverse, multicultural, and international world. We are committed to facilitating critical undergraduate and graduate education and practice for social justice by engaging students in the discovery, production, and critique of knowledge that emerges from critical perspectives on culture and society.

Requirements

A major in Gender and Sexuality Studies consists of a minimum of 33 credits.

Course ID	Title	Credits
Core Courses		
GESS 1900	Sex, Power and Culture [1]	3
or GESS 2900	Intro to Gender & Sex Studies	
GESS 3500	Critical Inquiry and Praxis	3
GESS 4940	Gender & Sexuality Theory I: Feminist Theory	3 or 4
GESS 4950	Gender & Sexuality Theory II	4
Seven Electives [2]		
The remaining (7) elective courses must be selected from among those approved by the Gender and Sexuality Studies Program with the following distribution requirements: a minimum of two different disciplines or departments must be represented in the elective coursework.		
One Elective any level		3
Six Electives at the 3000-level or above		18
Total Credit Hours		**34-35**

[1] Students may only earn credit for one of the following introductory courses, but not for both: GESS 1900, GESS 2900.

[2] **Double Counting & Overlap:** For students double majoring in Gender and Sexuality Studies and another major: no more than two courses can be counted toward both majors. Moreover, if a course is being counted toward a minor in another department or program, it may not be counted toward the GESS major.

Gender and Sexuality Studies Minor

The Gender and Sexuality Studies Program at Tulane University is committed to the multidisciplinary and interdisciplinary preservation, expansion, and transmission of knowledge to undergraduate students and to other individuals in both the university and the larger community about women, gender, and sexuality. The Gender and Sexuality Studies Program is committed to intellectual excellence and to stimulating continued intellectual growth for faculty and students. As a community of scholars/teachers/learners we are devoted to the study of gender and sexuality as they take shape and affect our lives in a diverse, multicultural, and international world. We are committed to facilitating critical undergraduate and graduate education and practice for social justice by engaging students in the discovery, production, and critique of knowledge that emerges from critical perspectives on culture and society.

Requirements

A minor in Gender and Sexuality Studies consists of a minimum of 18 credits.

Required Courses

Course ID	Title	Credits
GESS 1900	Sex, Power and Culture	3
or GESS 2900	Intro to Gender & Sex Studies	
GESS 3500	Critical Inquiry and Praxis	3
Electives (Choose four)		
The remaining (4) elective courses must be selected from among those approved by the Gender and Sexuality Studies Program with the following distribution requirements: a minimum of two different disciplines or departments must be represented in the elective coursework.		
One Elective any level		3
Three Electives at the 3000-level or above		9
Total Credit Hours		**18**

Courses applied to the student's major field of study or to another minor may not be applied toward the Gender and Sexuality Studies minor.

Examples of Electives that may count toward the GESS minor:

Course ID	Title	Credits
GESS 4700	Sexuality in US History	3
AFRS 6050	Black Feminism and Social Movement in the United States	3
ANTH 2030	The Anthropology of Women and Men	3
ANTH 3120	Anthropology of Sex and Reproduction	3
ANTH 3320	Archaeology of Gender	3
ANTH 3330	Anthropology of Gender	3
ARHS 3620	Contemporary Art Since 1950	3
ARHS 6220	Women and Gender in Medieval Art	3
COMM 3650	Feminist Doc & New Media	3
COMM 4350	Gender and The Cinema	4

Note that the list of approved electives varies from semester to semester, so please check with the GESS Program Director to verify the eligibility of an elective course before registering: GESSdirector@tulane.edu.

Gender and Sexuality Studies Certificate (Graduate)

Overview

Gender and Sexuality Studies offers a Graduate Certificate Program for students currently enrolled in SLA PhD programs at Tulane. Students must take five 6000 or 7000-level courses, including a required theory sequence of GESS 6940 (Feminist Theory) and GESS 6950 (Queer Theory). Of the five courses required for the certificate, no more than one can overlap with the student's PhD program requirements.

Requirements

Course ID	Title	Credits
Core Requirements		
GESS 6940	Gender & Sexuality Theory I	3
GESS 6950	Adv Sexualty & Queer Theory II	3
Three elective courses at the 6000-7000 level		**9**
The following have been previously approved (other electives may be submitted to the Director for approval)		
ANTH 7320	Archaeology of Gender	
ANTH 7330	Anthropology of Gender	
ARHS 6220	Women and Gender in Medieval Art	
HISU 6350	History of Gender Based Violence in the United States	

MUSC 6201	Women Die in Opera
MUSC 6350	Music and Gender
SOCI 6060	Issues In Soc of Gender
SOCI 6070	Sociology of Sexuality
Total Credit Hours	**15**

Latin American Studies Program

Programs

Undergraduate

Major

- Latin American Studies Major (p. 301)

Minor

- Latin American Studies Minor (p. 301)

Certificate

- Latin American Studies Certificate for Public Health Majors (p. 300)

Graduate

- Latin American Studies and Art History, PhD (p. 300)
- Latin American Studies, MA (p. 302)
- Latin American Studies, PhD (p. 303)

Latin American Studies and Art History, PhD

The program is small and selective, accepting only one or two highly qualified applicants each year. Successful applicants must demonstrate an ability to work in a critical and imaginative fashion and to conduct original, clearly articulated research that will advance the frontiers of knowledge. Prospective students should submit their application to the joint PhD program through the online application portal (https://liberalarts.tulane.edu/academics/graduate-studies/prospective-students/) for relevant information on the application process and the link to the online application system.

Along with the School of Liberal Arts graduate program application form, applicants submit transcripts, three letters of recommendation, a statement of purpose, and an MA thesis or two substantive research papers, at least one in English. Applicants may also submit a CV/resume. The GRE is not required. International applicants whose native language is not English must submit TOEFL or IELTS scores as part of their application. The application deadline is January 10 for admission in the fall.

Requirements

The Ph.D. requires 54 credit hours (including an M.A. thesis or equivalent) in addition to qualifying examinations and the production of a dissertation. Of the 54 credit hours of coursework, at least 30 hours must have a Latin American content, including at least 18 hours in Latin American art; other Latin American courses can be taken in departments such as Anthropology, Economics, History, Political Science, Sociology, and Spanish and Portuguese; the School of Architecture; and Latin American Studies special offerings. Fifteen credit hours must be in art history pertaining to areas outside Latin America. The balance of credit hours are electives; they may be in art history and/or Latin America, but they may also pertain to other areas relevant to the student's work (e.g., European history, Medieval thought, writing systems). The Latin American Studies core seminar is required, as is a course on art historical method and/or theory. All courses must be at the 6000 and 7000 levels.

Students must develop a primary concentration (e.g., Pre-Columbian, colonial, or modern) and a secondary one. The second concentration may be within Latin American art (e.g., Pre-Columbian, colonial, or modern), or it may cover a comparative area (e.g., modern Latin American art paired with modern European art, or colonial Latin American art paired with medieval and early modern European art). Twenty-one semester hours (7 courses) must pertain to the primary concentration, and 12 semester hours (4 courses) must pertain to the secondary concentration. These courses may be in Art History or other disciplines with Latin American content. For example, a student with a primary concentration in Precolumbian and a secondary concentration in colonial would take 7 art history and anthropology courses with a Precolumbian content, and 4 courses with a colonial content in art history, history, or literature.

Latin American Studies Certificate for Public Health Majors

Overview

The Undergraduate Certificate in Latin American Studies for Public Health Majors is designed to supplement the Public Health major by developing skills and knowledge connected with Latin American/Latinx, and/or the Caribbean (including diasporas).

Students strengthen regional expertise within their major field through (1) language study; (2) public health electives on Latin America/Latinx populations and/or cultural context of infectious disease; (3) through an introduction to Latin America (LAST 1010) and (4) interdisciplinary coursework with core Latin America content.

This program is for students who wish to internationalize their studies, deepen their awareness of Latin America and the Caribbean, and to hold a certificate that makes them increasingly competitive for work and advanced studies enhanced by regional understanding and intercultural competency.

Requirements

The program certifies that students have:

- Obtained a basic comprehension of a Latin American language;
- Taken course work in the field of public health on Latin America, the Latinx population in the US, or on societal and cultural influences more broadly as they affect health and disease behavior beyond strictly biological mechanisms;
- Completed an introduction to Latin America survey course (LAST 1010); and
- Advanced their understanding of public health in the region with two Latin American-content electives.

Course ID	Title	Credits
Latin American Language (two courses required) [1]		**6**
LAST 1010	Introduction to Latin American Studies	3
Latin American Studies Electives (Choose 2) [2]		**6**
Public Health Elective (choose 1) [3]		**3**
SPHU 2016	Infectious Disease Outbreaks	
SPHU 2400	Global Health in Action	
SPHU 3120	Issues & Strategies in Public Health	
SPHU 4220	Latino Health in the US	
SPHU 4330	Resilience in International Disasters	

1 Spanish or Portuguese – 2 classes beyond the 2030 level or 2 semesters of Haitian Creole, Kaqchikel or other Indigenous language. Students who enter the program fluent in a Latin American language will take at least 2 semesters of an additional language.

2 **Suggested LAST electives:**
AFRS 3300 Issues in Africana Diaspora Studies (3 or 4 c.h.), ANTH 3750 Bones, Bodies and Disease (3 c.h.), ANTH 3091 Selected Cultural Systems (3,4 c.h.) when taught as Politics of Fieldwork, ANTH 3092 Selected Cultural Systems (3,4 c.h.) When taught as Sex Work or Race and Migration, ECON 4600 Inequality & Poverty in Latin America (3 or 4 c.h.), HISL 2910 Special Topics (1-3 c.h.), HISL 3910 Special Topics (1-4 c.h.) LAST 3010 Approaches to Latinx Studies (3 c.h.),LAST 6200 Health & Inequality Latin Amer (3 c.h.) POLC 4390 Poverty & Development (3 or 4 c.h.), POLI 6530 International Human Rights (4 c.h.), PSDV 4320 Migrants Refugees & Development (3 or 4 c.h.),SOCI 2600 Environmental Sociology (3 c.h.), SOCI 6012 Adv Special Topics: SOCI (3 or 4 c.h.) when taught as Sociology of Food.

3 Other courses may count in consultation with the Latin American Studies Undergraduate Advisor.

Latin American Studies Major

Latin American Studies prepares students for a job market that increasingly demands keen global sensibilities and the ability to work between cultures. Introducing diverse methodological and theoretical approaches to the study of Latin America, while providing a core interdisciplinary foundation in the humanities and social sciences, Latin American Studies prepares students to engage a broad spectrum of local and global phenomena with intellectual rigor and flexibility. Students may choose courses from twenty cooperating departments, taught by some seventy affiliated faculty specializing in the region. Interdisciplinary and comparative perspectives on the region offer students a depth of knowledge of hemispheric relations and build area expertise. The curriculum approaches Latin America as both a local and foreign culture, illuminating critical transnational issues such as immigration, climate change, cultural flows, security, and economic development that transcend the boundaries of the region.

The major's solid foundation in language skills, cultural and political understanding, experiential learning and international education and training provide critical preparation for careers in an increasingly globalized world. Students receiving this degree go on to careers in business, education, public service, government and humanitarian work, health care and health sciences, and law and advocacy, among others. Many graduates pursue careers in education or go on for more advanced degrees in Latin American Studies and a range of disciplines in the humanities and social sciences including Sociology, Political Science, Anthropology, Art History, Communications, History and others. The major also provides a valuable supplement for those who subsequently pursue professional degrees in business, law, engineering, medicine, public health or other fields. Students majoring in Latin American Studies are urged to minor (or get a second major) in a core discipline such as anthropology, economics, history, literature, art history, political science, or sociology.

Requirements

The Latin American Studies major requires a minimum of 30 credit hours in 10 Latin American content courses. Courses are selected from the various departments offering classes in the field as well as from Latin American Studies.

Latin American Studies students should consult the Schedule of Classes each semester to review available electives and are advised to confer with their major advisor to structure their course of study, particularly when planning study abroad coursework.

Course ID	Title	Credits
Required Courses		
LAST 1010	Introduction to Latin American Studies	3
LAST 4000	Core Seminar [1]	4
One of the following: [2]		**3**
LAST 3000	Approaches to Latin American Studies (or)	
LAST 3010	Approaches to Latinx Studies	
Seven Electives		
1 may be at any level		3
2 must be at the 2000-level or higher		6
2 must be at the 4000-level or higher		6
2 must be at the 6000-level [3]		6
Total Credit Hours		**31**

1 LAST 4000 Core Seminar is offered fall semesters only and is intended to be completed in the final year.

2 LAST 3000 or 3010 may be used as elective if not used to fulfill this requirement.

3 All 6000-level coursework for the major must be taken in residence at Tulane University; courses taken abroad will not count toward this requirement. Students who take at least 20 college credits in 7 courses with Latin American content while on academic programs in Latin America approved by Tulane are required to take only one course at the 6000-level.

Latin American Studies Minor

The Bachelor of Latin American Studies curriculum focuses on achieving an interdisciplinary understanding of the region relative to an increasingly globalizing world. Under an advisor's supervision, students write their own minors, selecting electives from more than twenty cooperating departments taught by some seventy affiliated faculty specializing in Latin America. The program strives to develop critical thinking, intercultural competency and research, analytical and

communicative skills. A minor in Latin American Studies consists of 15 credit hours in 5 courses.

Requirements

A minor in Latin American Studies consists of 15 credit hours in 5 courses. Students pursuing this minor should consult the Schedule of Classes each semester to review available electives and are advised to confer with the Assistant Director, Undergraduate Affairs in the Stone Center for Latin American Studies to structure their course of study, particularly when planning study abroad coursework.

Required courses: LAST 1010 plus 4 electives.

Course ID	Title	Credits
LAST 1010	Introduction to Latin American Studies	3
Select four electives		12
2 must be at the 2000-level or higher		
2 must be at the 4000-level or higher		
Total Credit Hours		**15**

Latin American Studies, MA

The Roger Thayer Stone Center for Latin American Studies is one of the largest and most prestigious interdisciplinary units at Tulane University. It functions in many capacities to provide programming and degree plans to a broad range of educational constituencies. Currently, these include a Bachelor of Arts major and minor in Latin American Studies, a Master of Arts degree in Latin American Studies, and a Doctor of Philosophy degree in Latin American Studies.

The design of the M.A. and curriculum in Latin American Studies is dependent upon the student's particular research interests. While we welcome all qualified applicants interested in pursuing interdisciplinary research on Latin America, the STONE CENTER/TU has developed significant faculty strengths in "Economics, Politics & Society in Latin America" and "Arts, Media, Culture & Politics in Latin America." The Stone Center also has very strong regional expertise in Brazilian Studies and Cuban & Caribbean Studies.

The Graduate Advisor and the student will discuss the student's research interests before the start of the student's first semester of coursework and will map out a comprehensive program of study with the goal of developing an interdisciplinary research project. Students accumulate the research skills and tools by undertaking coursework in multiple disciplines or fields. Students should expect to narrow their coursework to one primary and two secondary concentration areas. Of course, there is also the opportunity to extend one's coursework beyond these three concentration areas when the research project will be enhanced by doing so.

The Stone Center also collaborates with other units across the University to offer specialized graduate degree programs. Such programs include joint professional degree programs with the Law School (MA/JD) and the Business School (MA/MBA), and a dual Doctor of Philosophy degree (a Ph.D. in Latin American Studies and Art History). For further information on these specialized degree programs, please consult the relevant sections of our website (https://stonecenter.tulane.edu/node/2565/).

Requirements

Distribution Requirements

Degree requirements include 30 credit hours as follows:

Course ID	Title	Credits
Select a primary concentration (History, Anthropology, etc.)		12
Select a second supporting concentration		6
Select a third supporting concentration		6
LAST 7000	Core Seminar	3
Select one of the following options:		3
Option One: The M.A. thesis, written under the direction of a thesis director and approved by a faculty committee.		
Option Two: A three-hour course in theory or methodology in the primary concentration.		
Total Credit Hours		**30**

- Option One: The M.A. thesis, written under the direction of a thesis director and approved by a faculty committee. Students register for thesis credit in the fourth semester (LAST 8990) and are required to participate in a thesis writing workshop under the direction of the Graduate Advisor. This is a graded course. A passing grade is assigned for the thesis by the Graduate Advisor if the student successfully defends the thesis by the end of the Spring semester. [NOTE: If a student plans to graduate in the Spring Semester of their second year of study, the thesis must be completed, defended, and submitted to the School of Liberal Arts in final form usually by the first week of May.] If the student has not completed and defended the thesis by the end of the Spring semester of the second year of studies, a grade of "I" (Incomplete) will be reported until such time as the student completes the thesis AND applies to graduate. If the student fails to complete the thesis within one year of the end of the second year of study, the "I" grade will convert to a failing grade.
- Option Two: A three-hour course in theory or methodology in the primary concentration. This need not be a Latin American content course. For example, in Sociology, the relevant courses are "Intermediate Social Statistics" and "Intermediate Sociological Methods"; in Anthropology, "Field Methods in Social and Cultural Anthropology"; and in Political Science, "The Conduct of Research" and "Statistics for Political Scientists." Where a department does not have an appropriate offering, the Stone Center Graduate Advisor will help the student arrange an independent study project in the methodology of the primary concentration. This course must be taken by the end of the third semester.

Concentrations

The concentrations are usually departmental/disciplinary and are intended more as a guide to help organize a student's curriculum around a specific research project. Where a student's program suggests that there is an educational and qualitative logic, it is also possible to declare one synthetic concentration that combines courses from more than one department. Such a concentration might be, for example, "Cultural Studies" or "Mexican Studies." Students are also encouraged, in consultation with the Graduate Advisor, to take courses that may fall outside of their concentration areas if such courses are

critical to the development of specific research skills, tools, methods, or content necessary in the pursuit of their research agendas.

Language Requirement

The requirement for graduation with the M.A. in Latin American Studies is demonstrated competence in either Spanish or Portuguese. Students are expected to pass a language examination in Spanish or Portuguese during the first year of study. The required level of competence in Spanish and Portuguese corresponds to "intermediate-high" on the American Council on the Teaching of Foreign Language (ACTFL) scale or the Avant STAMP 4S scale. This competency is considered a minimum requirement. Students are encouraged to develop additional languages as needed by their research fields.

Currently, the Avant STAMP 4S examinations are administered by the Language Learning Center (https://liberalarts.tulane.edu/language-learning-center/language-testing/proficiency (https://liberalarts.tulane.edu/language-learning-center/language-testing/proficiency/)). Native Spanish and Portuguese speakers are exempt from this requirement, though they are still encouraged to take the examination.

Transfer of Credit

Upon entering the program a maximum of six graduate-level course credits (two courses) may be transferred from another department of Tulane or another University toward your Latin American Studies M.A. degree. However, students who do choose to transfer two courses will lose one semester of M.A. funding (limiting thesis writers to three semesters and non-thesis writers to two). To be considered for transfer credit toward an M.A. degree, graduate work done at another institution must carry a grade of 3.0 (on a 4.0 scale) or better and must have been completed no more than four years from the date of first registration for graduate work at Tulane.

Acceptance of graduate credit for work done at other graduate institutions must be approved by the Stone Center for Latin American Studies and by the Dean of the School of Liberal Arts. Although the official decision concerning the acceptance of transfer credit towards the Latin American Studies M.A. degree will be made only after the student has completed one semester of successful study in the program, the Stone Center Graduate Advisor can evaluate the transferability of previous coursework before the student enters the program. If you are planning to transfer credit, remember to contact your Graduate Advisor after you have completed your first semester in the degree program to discuss the credit transfer process.

Independent Studies

Independent Studies can be an important part of your program if used properly and sparingly. Typically an independent project is created to fill an academic need or interest that is not being met by regular disciplinary offerings or to expand upon research begun in other courses but not fully completed. Ordinarily, the Graduate Advisor will not authorize students to take more than two stand-alone Independent Study courses during the course of their M.A. degree. Students may register for the independent study directly through the Latin American Studies program; but students should first attempt to register for the independent study through the department of the sponsoring faculty member. Please consult the Graduate Advisor for further information on registering for independent study.

Latin American Studies, PhD

The Roger Thayer Stone Center for Latin American Studies is one of the largest and most prestigious interdisciplinary units at Tulane University. It functions in many capacities to provide programming and degree plans to a broad range of educational constituencies. Currently, these include a Bachelor of Arts major and minor in Latin American Studies, a Master of Arts degree in Latin American Studies, and a Doctor of Philosophy degree in Latin American Studies.

The design of both the M.A. and Ph.D. curriculum in Latin American Studies is dependent upon the student's particular research interests. While we welcome all qualified applicants interested in pursuing interdisciplinary research on Latin America, the STONE CENTER/TU has developed significant faculty strengths in "Economics, Politics, & Society in Latin America" and "Arts, Media, Culture, and Politics in Latin America." The Stone Center also has very strong regional expertise in Brazilian Studies and Cuban & Caribbean Studies.

The Graduate Advisor and the student will discuss these research interests before the start of the student's first semester of coursework and will map out a comprehensive program of study with the goal of developing an interdisciplinary research project. Students accumulate the research skills and tools by undertaking coursework in multiple disciplines or fields. Students should expect to narrow their coursework to one primary and two secondary concentration areas. Of course, there is also the opportunity to extend one's coursework beyond these three concentration areas when the research project will be enhanced by doing so.

The Stone Center also collaborates with other units across the University to offer specialized graduate degree programs. Such programs include joint professional degree programs with the Law School (MA/JD) and the Business School (MA/MBA), and a dual Doctor of Philosophy degree (a Ph.D. in Latin American Studies and Art History). For further information on these specialized degree programs, please consult the relevant sections of our website (https://stonecenter.tulane.edu/).

The standard Tulane University graduate program online application system allows applicants to identify whether their application should be considered for admission either as an M.A. student or as a Ph.D. student. The admissions policy of the Stone Center, however, is to consider for admission directly to the Ph.D. program only individuals who have an earned Master's Degree or relevant professional degree (i.e. M.D., J.D., etc.)

Applicants interested in the Ph.D. Program in Latin American Studies, but who do not have an earned Master's Degree or a relevant professional degree, will be considered for admission only to the M.A. program in Latin American Studies. Upon completion of the M.A. Program in Latin American Studies, such students are then able to reapply to the Ph.D. program. Admission to the M.A. program does not guarantee continuation in the Ph.D. program.

Requirements

Doctor of Philosophy in Latin American Studies Curriculum

The degree of Doctor of Philosophy in Latin American Studies is awarded for mastery of a body of literature and for the production of imaginative and original research. A student may enter the program (1)

progressing from the M.A. program in Latin American Studies at Tulane, (2) transferring to the program with an M.A. conferred by another Tulane department, (3) or by applying directly to the Latin American Studies Ph.D. program after having completed an M.A. in any discipline or field, or an equivalent Professional Degree (JD, MD, MBA, etc.). In each instance, prospective students must submit a formal application for admission to the Ph.D. program.

Each semester doctoral students normally enroll in three classes and teach one class. By university regulations, students are allowed to enroll in a minimum of two courses while they serve as Teaching Assistants.

Students also begin preparation for general preliminary examinations, which are given during students' last semester of classes and should be taken no later than the first semester after the completion of all coursework requirements. These are normally in October or March.

Upon satisfying the coursework and language requirements and completing the general exams, students begin research for the dissertation, presenting a formal prospectus for faculty approval. Once approved they can apply for admittance to candidacy for the doctoral degree and commence formal work on the dissertation, which must demonstrate their ability to carry out an original investigation in the field of Latin American Studies. Degrees are conferred only after the dissertation is approved in a formal defense before a faculty committee.

Coursework and Distribution Requirements

The minimum coursework requirement for the Ph.D. is 54 credit hours. Portions of this requirement are often satisfied by credit awarded for academic work completed in fulfilling requirements for the M.A. degree with thesis.

Students with an M.A. in Latin American Studies from Tulane may transfer up to 30 credits of relevant work from their M.A. program, while students transferring from other departments at Tulane or other universities may transfer no more than 12 hours of relevant work (see Transfer Credit below).

General requirements for the Ph.D. degree are:

- Thirty semester hours in the primary concentration, including a minimum of six semester hours in theory, methodology, and pedagogy. Students transferring to the Stone Center from other programs must take the Latin American Studies Core Seminar in their first Fall semester to satisfy three hours of the theory and methodology requirement. And all Ph.D. students must take the required Pedagogy and Professional Development course in the Spring semester before the academic year in which they are scheduled to teach the LAST1010 course cycle for the first time. NOTE: Of the thirty semester hours in the primary concentration, twelve hours or four courses should be at the 7000 level when possible; and no more than nine hours or three courses should be stand-alone independent study.
- Twelve semester hours in a first supporting concentration; six of these hours, when possible, should be at the 7000 level.
- Twelve semester hours in a second supporting concentration; six of these hours, when possible, should be at the 7000 level.
- A demonstrated knowledge of at least two languages, including Spanish or Portuguese.
- The successful completion of three general preliminary examinations in the primary and supporting concentrations.
- The successful defense of a dissertation prospectus.
- The successful completion and defense of the dissertation.

Concentrations

The concentrations are usually departmental/disciplinary and are intended more as a guide to help organize a student's curriculum around a specific research project. Where a student's program suggests that there is an educational and qualitative logic, it is also possible to declare one synthetic concentration that combines courses from more than one department. Such a concentration might be, for example, Cultural Studies or Mexican Studies or Gender & Sexuality Studies, etc. Students are also encouraged, in consultation with the Graduate Advisor, to take courses that may fall outside of their concentration areas if such courses are critical to the development of specific research skills, tools, methods, or content necessary in the pursuit of their research agendas.

Transfer Credits

At the time of admission, the Graduate Advisor can provide an informal assessment about what previous course credit can be transferred to meet Ph.D. requirements, but University policy allows the Graduate Advisor to make a formal evaluation of requests for transfer credit only after students have completed nine hours in residence at Tulane. After that point, and before the student accumulates a total of 42 credit hours, the Graduate Advisor recommends the transfer of appropriate and germane credit to the Graduate Dean for approval. Students seeking transfer credits should be prepared to provide copies of syllabi and/or course term papers as evidence of the relevance of the courses in question to their graduate work in their Latin American Studies program. Only courses that have a theoretical or content-specific logic to a student's Latin American Studies academic program will be approved for transfer credit.

As noted above, students with an M.A. (with thesis) in Latin American Studies from Tulane may transfer up to 30 credits of relevant work from their M.A. program, while students transferring from other departments at Tulane or other universities may transfer up to 6 hours of relevant coursework.

Acceptance of graduate credit for work done in other M.A. programs at Tulane or other universities is recommended by the Graduate Advisor and approved by the Dean of the School of Liberal Arts. To be considered for transfer credit, coursework must have received a grade of 3.0 or better on a 4.0 scale and must have been completed no more than six years before the date of first registration in the Center's doctoral program. Only in very special cases, and with the recommendation of the Stone Center's Graduate Advisor, will the Dean consider transfer of credit for courses taken earlier.

Language Requirements

The language requirement for graduation with the Ph.D. in Latin American Studies is demonstrated competence in two languages. Normally, one is Spanish; the second Portuguese. However, other languages may be presented if essential for the student's research. German, Quechua, Nahuatl, or Kaqchikel are examples. Students are expected to pass a language examination in Spanish or Portuguese during the first year of study. The required level of competence in

Spanish and Portuguese corresponds to “intermediate-high” on the American Council on the Teaching of Foreign Language (ACTFL) scale or the Avant STAMP 4S scale. This competency is considered a minimum requirement. Students are encouraged to develop additional languages as needed by their research fields. Levels of competency similar to those described for Spanish and Portuguese are required in any language presented to satisfy this requirement.

Currently, language competency is determined by performance on the Avant STAMP 4S examinations, which are administered by the Language Learning Center (https://liberalarts.tulane.edu/language-learning-center/language-testing/proficiency (https://liberalarts.tulane.edu/language-learning-center/language-testing/proficiency/)). All students, even native speakers, must be either examined for minimal linguistic competency as explained above or certified as to their native fluency by the Spanish and Portuguese Department.

Certification of competency in a second language must be presented by the end of the second year of study. Transfer students are expected to pass one language during the first year of study, and a second language examination by the end of second year of study. Testing in languages that are not available through the Avant STAMP 4S process in the Language Learning Center should be discussed with the Graduate Advisor to determine if such testing is possible and what would be the procedures for such testing.

- Linguistics, PhD (p. 311)

Computational Linguistics, MA

Computational Linguistics is a field that appeals to students with a zeal for both linguistics and computer science and a passion for developing ideas at the intersection of these fields. The program relies on the resources of the linguistics program and the department of computer science. Students studying computational linguistics will focus on the scientific study of language from a computational perspective, in which opportunities abound in many growing fields in today’s job market, such as:

- Automated text analysis
- Speech recognition
- Information retrieval
- Web search
- Machine translation
- "Big Data"
- Cryptography
- Computer security

The program admits a small-sized class size of three to five, composed of (i) Tulane undergraduate students with a background in either linguistics, computer science or the study of language who are admitted into the 4+1 program, and (ii) external outstanding students, preferably with an undergraduate degree in linguistics, computer science or the study of a language.

Requirements

Students will complete a core curriculum, several electives and an internship in a calendar year (two semesters plus summer).

MA Computational Linguistics Courses:

Course ID	Title	Credits
ANTH 7340	Dialectology	3
ANTH 7590	Syntactic Theory	3
ANTH 7630	Linguistic Phonetics	3
ANTH 7640	Phonology	3
ANTH 7650	Morphology	3
ANTH 7660	Discourse Analysis	3
ANTH 7670	Language & Acquisition	3
ANTH 7680	Language and Power	3
ANTH 7690	Language and Gender	3
CMPS 3140/6140	Intro Artificial Intelligence	3
CMPS 3240/6240	Intro to Machine Learning	3
CMPS 3250	Theory of Computation	3
CMPS 3280/6280	Information Theory	3
CMPS 4250/6250	Math Found Comp Security	3
LING 7010	Semantics	3

In order to satisfy the 30 credit requirement for the MA, students will select 10 out of these courses. Five courses must be taken in linguistics and five in computer science. The following are required courses:

- ANTH 7630 Linguistic Phonetics
- ANTH 7590 Syntax
- LING 6810 Special Topics (Natural Language Processing)
- CMPS 3140/6140 – Introduction to Artificial Intelligence
- CMPS 3240/6240 –Introduction to Machine Learning
- CMPS/MATH 3250 –Introduction to the Theory of Computation
- CMPS 3280/6280 – Information Theory

All other courses are electives.

Notes:

- CMPS 2170 Intro to Discrete Math (3 c.h.) or CMPS 2170 Intro to Discrete Math (3 c.h.) must be taken during students’ undergraduate training for it is a prerequisite for some CMPS graduate courses.
- Additional linguistic electives at the graduate level are available in the following cooperating departments: French, Spanish, Philosophy, Neuroscience, and Psychology.

Non-course requirement of the curriculum

There will be a (6-8 week) summer internship requirement for obtaining practical experience on key applications in human language technology. Local internship opportunities are available through TurboSquid, a web-based technology company in New Orleans. A written report summarizing the internship experience is required after the internship.

Linguistics, BA

Linguistics is a major that gives students insight into one of the most intriguing aspects of human knowledge and behavior. Majoring in linguistics means that you will learn about many aspects of human language, including sounds (phonetics, phonology), words (morphology), sentences (syntax), and meaning (semantics). At Tulane, we look at how languages change over time (historical linguistics); how language varies from situation to situation, group to group, and place to place (sociolinguistics, dialectology); how people use language in context (pragmatics, discourse analysis); how to model aspects of language (computational linguistics); how people acquire or learn language (language acquisition); and how people process language (psycholinguistics, brain and language).

The array of courses offered by the Program allows linguistics majors to master the basics of the discipline. Linguistics majors develop valuable intellectual skills in analytical reasoning and critical thinking, lucid communication, and the use of research methodologies.

Career opportunities for linguistics majors are: publishing, computer industry, foreign language education, advertising, national security, translating/interpreting, speech and language pathology.

Requirements

The major in linguistics consists of ten courses selected from the lists below. The student should take at least one course in each of the following areas: phonology, morphosyntax, language history, and language and thought.

Phonology:

Course ID	Title	Credits
ANTH 3630	Linguistic Phonetics	3
ANTH 3640	Phonology	3
FREN 3140	French Phonetics	3
SPAN 4260	Span Phonetic/Phonolgy	3
THEA 3090	Stage Speech I	3
THEA 4090	Stage Speech II	3

Morphosyntax:

Course ID	Title	Credits
ANTH 3590	Introduction To Syntax	3
ANTH 3650	Morphology	3
CMPS 1500	Intro to Computer Science I	4
CMPS 1600	Intro to Computer Science II	4
CMPS 2200	Intro to Algorithms	3
CMPS 4620	Artificial Intelligence	3
PHIL 1210	Elementary Symbolic Logic	3
PHIL 3040	Mathematical Logic	3
PHIL 6060	Advanced Symbolic Logic	3
RUSS 3250	Advanced Russian Grammar	3

Language History:

Course ID	Title	Credits
ANTH 3300	History of Writing	3,4
ANTH 3310	Historical Linguistics	3,4
ANTH 3440	Dialect in America	3
EDUC 3220	Linguistics for English Language Learning	3
ENLS 4050	History of the Language	3
FREN 4210	History of French Language	3
SPAN 4270	Iberoamer Dialectology	3
SPAN 6510	Hist of the Span Lang	3

Language and Thought:

Course ID	Title	Credits
ANTH 3290	The Nature of Language	3
ANTH 3400	Language and Culture	3
ANTH 3660	Discourse Analysis	3,4
ANTH 3670	Language & Acquisition	3
ANTH 3680	Language and Power	3
ANTH 3690	Language and Gender	3,4
ANTH 6400	Language and Culture	3
LING 4110	Brain and Language	3
LING 4720	Translation Studies Theory	3
PHIL 3800	Language and Thought	3,4
PHIL 6180	Mental Representation	3,4

In addition to courses listed here in cooperating departments, students may elect to take language courses to broaden their linguistic base. Students may count up to 9 credit hours of courses in a language other than English toward the major. No language courses taken to fulfill the college proficiency requirement may be counted toward the major.

Linguistics, MA

4+1 MA in Linguistics

The Linguistics Program at Tulane offers an accelerated Master of Arts program in Linguistics to enrolled seniors. Students choosing this fast-track option must take 6 graduate credits (2 courses) while still completing undergraduate course work. These 6 graduate credits are in addition to the 30 credits required for the Bachelor's degree in Linguistics. They will count toward the 30 graduate credits (10 courses) required for the MA in Linguistics, although they may also be used to fulfill one or two of the four area requirements for the undergraduate Linguistics major (Phonology, Morphosyntax, Language History, Language and Thought). Having earned these 6 graduate credits while completing the undergraduate major, student in the 4+1 MA program will take just 24 graduate credits (8 courses) during their fifth year. This program allows students to bypass the time commitment and anxiety of the graduate admissions process and places them within a year of obtaining their Master's degree upon graduating with their Bachelor's degree.

Requirements

4+1 MA in Linguistics Courses

Students are required to take 10 out of the following courses:

Course ID	Title	Credits
ANTH 6400	Language and Culture	3
ANTH 6420	Linguistic Field Methods	3
ANTH 7290	Linguistic Analysis	3
ANTH 7310	Prehistory of Languages	3
ANTH 7340	Dialectology	3
ANTH 7590	Syntactic Theory	3
ANTH 7630	Linguistic Phonetics	3
ANTH 7640	Phonology	3
ANTH 7650	Morphology	3
ANTH 7660	Discourse Analysis	3
ANTH 7670	Language & Acquisition	3
ANTH 7680	Language and Power	3
ANTH 7690	Language and Gender	3
ANTH 7780	Language Death	3
ANTH 7930	Languages of Louisiana	3
FREN 6085	Pidgins and Creoles	3
LING 7010	Semantics	3

Linguistics, PhD

Linguistics is a major that gives students insight into one of the most intriguing aspects of human knowledge and behavior. Majoring in linguistics means that you will learn about many aspects of human language, including sounds (phonetics, phonology), words (morphology), sentences (syntax), and meaning (semantics). At Tulane, we look at how languages change over time (historical linguistics); how language varies from situation to situation, group to group, and place to place (sociolinguistics, dialectology); how people use language in context (pragmatics, discourse analysis); how to model aspects of language (computational linguistics); how people acquire or learn

language (language acquisition); and how people process language (psycholinguistics, brain and language).

Our PhD program is unique because it is the only university-level interdisciplinary linguistics program in New Orleans and in the state at large, as well as one of only three in the Gulf South. We have unique resources, physical and human: (1) the Roger Thayer Stone Center for Latin American Studies, (2) the Cuban and Caribbean Studies Institute, (3) the Women's Center, (4) the Amistad Center, (5) the New Orleans Center for the Gulf South, (6) the Latin American Library, (7) the Louisiana Collection, (8) An enticing mix of less commonly taught languages (for example, Kaqchikel, Nahuatl, Yucatec Maya, Spoken Yoruba, Diaspora Yoruba, Swahili, Haitian Creole, Classical languages and writings of the Maya), (9) a growing computer science program with strong emphasis on artificial intelligence and human cognition, and (10) a committed faculty.

The Linguistics Ph.D. program at Tulane is highly competitive. All students admitted to the program receive a stipend and a tuition waiver for five years. If you are interested in applying to the program, please contact the faculty member(s) with whom you are interested in working. You may also contact the Director of the program at ling@tulane.edu.

Requirements

As a graduate student in linguistics, you are required to complete 48 hours of course work before advancement to candidacy, which will include at least one course drawn from each of the following categories:

1. Acoustic phonetics
2. Phonology
3. Morphology or syntax
4. Language variation and change (for instance, sociolinguistics, historical linguistics, dialectology, bilingual education, or multilingualism)
5. Semantics, pragmatics, philosophy of language, or discourse
6. A non-Indo-European language other than your native language (Note that this requirement can be satisfied by one of the Less Commonly Taught Languages offered at the 1000 level, which will be covered by the tuition waiver as long as you are a full-time student, but a course below the 6000 level cannot count towards graduate credit. Non-Indo-European languages taught in the Anthropology Department are 6000 level and above and so would count toward the graduate program as well as fulfilling this requirement.)

Depending on your previous course work and training, you may be able to waive some of these courses. Course waivers are to be requested on an individual basis, and must be approved by the program graduate adviser.

This range of courses ensures that you will receive a rigorous and broad background in linguistics, which will prepare you for your own research projects and will make you highly qualified for the job market. You should normally enroll in 12 credit hours (4 courses) per semester until you have completed the required course work for the Ph.D., which will normally take 4-5 semesters, depending on your background. This ensures that you will fulfill Tulane's residency requirement of four semesters of full-time study at the university, as well as Tulane's minimum course-hour requirements. (See the university graduate requirements for more information on Tulane's residency and course-hour requirements.)

In all of your course work, a grade level of B- (B minus) is the formal minimum for a passing performance in the graduate program. Although a grade of B- is a passing grade, it is considered a "weak" pass. One or two B- grades can be cause for probation or dismissal. In addition to your course grades, however, the general assessment of your overall progress in the program will also include the opinions of the faculty. The faculty meets at the end of each semester to discuss graduate students' progress. Renewal of your fellowship from year to year is dependent upon continuing satisfactory progress in your studies.

Language of Scholarship Requirement

In addition to taking at least one course in a non-Indo-European language, you must show competence in a major language of published scholarship other than English. You should meet with your adviser or the program director to discuss your proposed language and your plan for fulfilling the requirement. This requirement must be filled before advancement to candidacy.

If your native language is a major language of published scholarship other than English, you can use English to satisfy this requirement.

For everyone else, competence can be demonstrated by (i) two semesters of language instruction at the junior (3000) level or above, or (ii) a translation exam.

Comprehensive Examinations

Students must take two Ph.D. comprehensive examinations, a general examination covering all major fields of linguistics and a special field examination tailored to their chosen field of dissertation research. The general comprehensive examination is to be taken in early September of the student's third year (fifth semester) in the program, and the special field examination is to be taken in early to mid-January of the third year (sixth semester). You may petition the program to substitute a published paper for the special field exam.

Dissertation Prospectus

Immediately after taking your special field examination, if not before, you should form your dissertation committee. It must consist of at least three tenured or tenure-track Tulane faculty members. Your committee may have additional members as well, but this is not required.

Your first task with the dissertation committee is to write a research paper, called the dissertation prospectus. The prospectus should consist of a substantial dissertation proposal and a comprehensive bibliography. It may be based on a grant proposal to an external funding agency, particularly in the case of proposed fieldwork. The work described in the prospectus should lead naturally into your dissertation. The prospectus should contain a statement of the topic area of your proposed dissertation project, a problem statement, a statement of the theoretical orientation and methodology, and a comprehensive bibliography. Work out the specific details of your prospectus with the members of your dissertation committee. Once it is complete, you will schedule an oral defense of the prospectus before the members of your

committee. The prospectus defense should take place before the end of your third year (sixth semester) in the program.

Advancement to Candidacy

After you have passed your comprehensive examinations and your language requirement and your dissertation committee has approved your prospectus, you will apply for Candidacy for the Ph.D. Once you have advanced, you are considered 'ABD' (All But Dissertation). Application for some research grants requires this status.

Fieldwork

You may find it necessary to conduct fieldwork before writing your dissertation. You are encouraged to seek outside funding to support your fieldwork. If you succeed in securing outside funding to replace your Tulane stipend for one year, you may be eligible to bank that year of stipend for use in your sixth year. If your research does not require you to absent yourself in order to pursue fieldwork, you may continue directly to writing your dissertation.

Teaching or Research Training

The program normally requires a total of 6 semesters of training as a Research Assistant, Teaching Assistant, and/or Instructional Teaching Assistant during the first 5 years.

Writing, filing, and defending the dissertation

Following advancement to candidacy, you will normally be eligible for a fifth year of financial support to work full time toward the completion of the dissertation. Receiving your final year of fellowship is contingent upon your having met the following requirements:

- Achievement of ABD status
- Submission of an acceptable plan for research and writing during the final year of support
- Completion of the language requirements

Students generally find writing a dissertation to be a challenging and rewarding process. However, it is also an inherently stressful activity. For this reason, you should meet regularly with the members of your committee at every stage of your project, and keep in touch with them about data collection and writing. And finally, remember that all of the faculty members have also written a dissertation (and likely supervised a number of them too), and are happy to discuss any issues that come up for you.

Upon completion of an acceptable draft of your dissertation, you will then, in consultation with the chair of your dissertation committee, schedule a public defense of your work. All members of the Tulane community are invited to the defense, and anyone else is welcome to attend. You should prepare a short presentation of your work, summarizing the main research question(s), how you went about doing your project, and your key findings. Your dissertation committee will then ask you questions about your dissertation, as may other members of the audience, time permitting.

There are a host of important deadlines to keep track of, as well as very specific formatting minutia which you must strictly follow in order to file the dissertation. Consult the relevant sections of Deadlines for Graduating Students (https://liberalarts.tulane.edu/academics/graduate-studies/graduating-students/). As always, you are ultimately responsible for being aware of and complying with all formal requirements and university deadlines. After you have submitted a complete draft of your dissertation, defended it publicly, and made any revisions suggested by your committee, you are ready to file the dissertation. Tulane's general guidelines permit a maximum of seven years from your initial matriculation to file the Ph.D.

When the final version of the dissertation is accepted by the doctoral committee and filed with the university, and all other requirements are certified as fulfilled, you have earned a Ph.D. in Linguistics!

Medieval and Early Modern Studies Major

MEMS is a multidisciplinary program with a focus on the history and cultures of the medieval and early modern world. The Program consists of faculty and students from diverse departments within the School of Liberal Arts (Art History, Asian Studies, Classical Studies, English, French and Italian, Germanic and Slavic Studies, History, Jewish Studies, Music, Philosophy, Political Science, Spanish and Portuguese) and offers undergraduate major and minor concentrations, as well as graduate degree programs in affiliated professors' home departments. We regularly sponsor conferences, colloquia, and presentations by scholars around the world.

Requirements

The major consists of 30 credits (10 courses) to be distributed in the following manner.

Course ID	Title	Credits
Select three courses each from two of three categories:		18
Medieval (300-1499)		
Early modern (1500-1699)		
Crossover (spanning medieval and early modern)		
Select four additional courses		12
Total Credit Hours		**30**

The student may take up to four courses in a single department. Of the ten courses, no more than three courses may be taken below the 3000 level, and at least two must be completed at the 4000 level or above.

Middle East and North African Studies Program

Programs

Undergraduate

Major

- Middle East and North African Studies Major (p. 316)

Minor

- Arabic Studies Minor (https://catalog.tulane.edu/liberal-arts/interdisciplinary-programs-coordinate-majors/middle-east-and-north-african-studies/arabic-studies-minor/)

Arabic Studies Minor

Overview

Standard Arabic has an estimated 206 million speakers, while colloquial Arabic is spoken by a total of over 400 million, which makes it the fifth most widely spoken language in the world. Arabic classes at Tulane highlight the richness of Arabic culture and literature, as well as its practical applications in the global political economy.

Requirements

The Arabic minor consists of 5 courses for a minimum of 15 credits, distributed as follows:

Course ID	Title	Credits
Core Courses		
ARBC 2030	Intermediate Arabic	4
ARBC 3150	Advanced Arabic	3
Electives		
Select three or four of the following:		
ARBC 3060	Business Arabic	3
ARBC 3170	Media Arabic	3
ARBC 3220	Introduction to Arabic Literature	3
ARBC 3250	Arab Modern Culture	3
ARBC 3300	Arabic for International Relations and Diplomacy	3

If a student wishes to complete two or more minors, no courses counting toward the student's one minor will count toward the student's other minor(s). Courses taken abroad that the student wishes to count toward the Arabic minor will be evaluated on a case-by-case basis.

Middle East & North African Studies Major

Overview

Middle East and North African Studies (MENA) trains students to develop critical and analytical thinking on the Middle East and the Maghreb through an interdisciplinary, transnational approach. The MENA major draws on a number of departments and programs across Tulane's School of Liberal Arts to offer a wide array of courses introducing students to the rich history, layered politics, diverse cultures, linguistic, and religious traditions of a complex region. This background enables students to transcend simplistic generalizations and stereotypes about the region and its people while promoting students' global literacy in an increasingly interconnected world. The MENA major prepares students to pursue careers in government, policy, trade, research, and a variety of other fields.

Students must complete at least ten courses (30 credits minimum) from an approved list of Middle East-related courses. These ten courses must be distributed as follows:

1. **Arabic & Hebrew courses:** Students must take at least one course in Arabic beyond ARBC 2030 Intermediate Arabic (normally, ARBC 3150) or at least one course in Hebrew beyond HBRW 2030 Intermediate Hebrew I (normally, HBRW 2130 Intermediate Hebrew II). Students who

demonstrate proficiency in Arabic, Hebrew, Turkish, or Persian language in a suitable manner can substitute another Middle East-related course from the approved list for this requirement. Turkish and Persian are not offered at Tulane.

2. **History courses:** Students must take HISM 2200 History of Islam to 1400 **and** HISM 2210 History of Modern Middle East, 1750 to the Present. Students can petition to count similar courses at other universities or programs toward this requirement.

3. **Arab-Israeli Conflict:** Students must take one course on the Arab-Israeli conflict.

4. **Politics courses:** Students must take at least one of the following two courses: POLC 3340 Middle East Comparative Politics **or** POLI 4660 Middle East Security.

5. **Electives:** Students must select at least five elective courses from the approved electives list. These must be advanced content courses, at least one of which must be at the 4000 or 6000 level.

Requirements

Students must complete at least ten courses (minimum of 30 credit hours) as follows:

Required Courses

Course ID	Title	Credits
Arabic & Hebrew Requirements		
Students must take at least one course in Arabic beyond ARBC 2030 Intermediate Arabic (normally, ARBC 3150) or at least one course in Hebrew beyond HBRW 2030 Intermediate Hebrew I (normally, HBRW 2130 Intermediate Hebrew II). [1]		3
Arabic Courses		
ARBC 3150	Advanced Arabic	
ARBC 3170	Media Arabic	
ARBC 3220	Introduction to Arabic Literature	
ARBC 3250	Arab Modern Culture	
ARBC 3300	Arabic for International Relations and Diplomacy	
Hebrew Courses		
HBRW 2130	Intermediate Hebrew II	
HBRW 3100	Advanced Hebrew I	
HBRW 3110	Advanced Hebrew II	
History Requirements		
Students must take both of the following courses. Students can petition to count similar courses at other universities or programs toward this requirement. [2]		
HISM 2200	Pre-Modern Islamic World	3
HISM 2210	History of Modern Middle East since 18th Century	3
Arab-Israeli Conflict Requirement		
Students must take one of the following courses:		3
JWST 3220	Arab/Israeli Conflict	
or POLI 4670	Politics of Arab Israeli Confl	
or HISM 3220	Arab/Israeli Conflict	
or POLI 3550	Conflict Mgmt in Arab-Israeli	
Politics Requirement		
Students must take at least one of the following two courses:		3
POLC 3340	Middle East Comp Politics	
POLI 4660	Middle East Security	
Elective Requirements		
Students must select at least five elective courses from the approved electives list. These must be advanced content courses, at least one of which must be at the 4000 or 6000 level.		15
Total Credit Hours		**30**

[1] Students who demonstrate proficiency in Arabic, Hebrew, Turkish, or Persian language in a suitable manner can substitute another Middle East-related course from the approved list for this requirement. Turkish and Persian are not offered at Tulane.

[2] These courses are offered at least once every other year. They must be taken in the first semester that they are offered after the student enters the program.

Elective Courses

Courses listed above taken in addition to the minimum required courses can also count as electives. Additional electives may be added with permission of the Program Director.

- Native American and Indigenous Studies Minor (p. 318)

Native American and Indigenous Studies Minor

Overview

Though only 1.9% of the US population, Native Americans have played and continue to play an important part in American society. Largely invisibilized by the foregrounding of other ethnic minority groups, Native Americans in the US struggle for recognition (federal, state, and local), for survival as cultural groups (cf. Ile de Jean Charles evacuation/resettlement), and for basic rights (legal protections, religious freedom, education, health services, and subsistence). Researchers at Tulane are actively involved with Native American tribes of Louisiana, working with them on issues of language and culture revitalization, displacement due to coastal erosion, health concerns and services, and equity issues. There are many courses at Tulane that deal with Native American culture, history, and languages. Through a structured introduction to these peoples and cultures, Tulane students can gain an appreciation for continuing contribution of these communities to the American story. Students will also have an opportunity to work closely with researchers collaborating with Native communities, learning as they contribute to projects bolstering indigenous lifeways.

Situated in Bvlbancha, "the place of other tongues", Tulane is committed to increasing diversity and engagement. Recognition of Native American presence, persistence and legacies (tangible and intangible) contributes to our educational mission.

Mission: To further understanding of indigenous peoples and the issues confronting their communities through engaged learning and research.

Requirements

The Native American Studies minor requires five courses (15 Credits).

Course ID	Title	Credits
Core Courses		**6**
Choose two of the following		
ANTH 1101	Native America: Introduction	
ANTH 3535	Native American Language and Linguistics

Political Economy Major with Concentration in Economics and Public Policy

Tulane University's most popular and acclaimed multidisciplinary major, the Political Economy major aims to promote sustained reflection on the multiple connections between political and economic activities and institutions.

The Political Economy major supports and promotes Tulane University's mission to create, communicate and conserve knowledge in order to enrich the capacity of individuals, organizations and communities to think, to learn, to act and to lead with integrity and wisdom.

The political economy major aims to promote sustained reflection on the interrelations of political and economic activities and institutions. It provides undergraduate students with the basic skills of economic analysis. The major is also based firmly on the view that the study of the interrelations of politics and economics has a rich humanistic tradition and that its pursuit can encourage sustained reflection on fundamental values. Political economy is a multidisciplinary major built on a core of eight required courses and five elective courses drawn from economics, political science, history and philosophy.

This major is designed to avoid the sometimes excessive specialization that characterizes more traditional undergraduate majors. While providing students basic skills of economic analysis, the political economy major at Tulane is distinctively based on the view that technical economic analysis should not be divorced from a broader concern for understanding the moral and historical foundations of economic institutions and political structures.

Internship Grants and Senior Thesis

In the summer between junior and senior years, a political economy major may elect to participate in a summer internship. The Murphy Institute offers a limited number of grants in an open competition for political economy majors only. With consent of the Associate Director, a student may pursue a degree with honors in political economy. A senior honors thesis is required.

Finally, it should be noted that undergraduate majors in political economy are invited to participate in various activities sponsored by the Murphy Institute. The Murphy Institute hosts prominent scholars and public figures in a series of annual lectures. Student majors are invited to all of these occasions, as well as to more informal meetings with our visitors.

Political Economy with Data Analytics, MA

Overview

The Master of Arts in Political Economy with a Data Analytics Emphasis is a two-year (four-semester) interdisciplinary program. The major goal of the program curriculum is to train public policy specialists using advanced technologies and data analytics.

Requirements

A minimum of thirty- (30) credit hours of coursework with a cumulative GPA ≥ 3.0. The 30 hours include 12 hours of core courses, 18 hours of graduate Data Analytics Electives.

Course ID	Title	Credits
Core Courses		
MATH 6080	Intro to Statistical Inference	3
or CCCC 7300	Quantitative Analysis

Religious Studies Minor

Religion is and always has been a central feature of human life, for individuals and communities. The interdisciplinary field of Religious Studies enables students to approach it from different perspectives: philosophical, historical, political, sociological, anthropological and literary.

Requirements

5 courses (15 hours), completed with a grade of C or better, courses in at least 2 distinct areas or disciplines, and at least 2 at the 3000-level or higher. Eligible courses already taken can count toward the degree.

Courses can be found each semester on the Class Schedule under “Religious Studies” (RLST) as well as in listings of particular departments. Examples of courses eligible for the RLST Minor:

Course ID	Title	Credits
RLST 1020	Religions of the World	3
RLST 3020	Religious Tolerance & Coexiste	3
RLST 3950	Spec Topics Rel Studies	3

CLAS 3230	Ancient Christianity	3
HISA 2360	History of Christianity, From the Jesus Movement to the Reformation	3
HISE 2420	The Age of Reformation	3
JWST 1010	Introduction to Jewish Civilization: Foundations	3
JWST 1020	Intro to Jewish Civ:Modern Era	3
JWST 2100	Intro To Hebrew Bible	3
JWST 3540	Jewish Renaissance to Age Reas	3
MUSC 3460	Music, Religion, Spirit	3

PHIL 3010	Philosophy of Religion	3
PHIL 3020	Topics in Bible & Philosophy	3,4
PHIL 3500	Buddhism	3
POLT 3610	Jewish Political Thought	3

Social Policy and Practice Coordinate Major

The multidisciplinary coordinate Major in Social Policy & Practice introduces students to problems, policies, and methods in the social policy and welfare field through three core courses and additional elective coursework in the social and behavioral sciences. The major is designed to encourage students to explore social policy interests prior to employment or graduate education. It also serves as an excellent pre-professional major for social work, the social sciences, education, law, public health, public policy, and related fields.

The program in Social Policy & Practice is designed to grant students a considerable degree of freedom in the choice of electives and to offer ample avenues for students interested in pursuing independent research and/or internship experiences. The program is particularly interested in encouraging the study of social problems related to living in an urban environment such as issues related to race, class, poverty, gender, social justice and the intersections among them. Students in the program are encouraged to pursue study abroad opportunities. The option to write an honors thesis is available to students who are in the University's Honors Program.

Social Policy & Practice graduates often find that they have many career options because of their broad academic backgrounds and well-developed writing, critical thinking, and interpersonal skills that are highly valued by employers in a wide variety of settings. Students in the major are well prepared for entering the fields of social work, education, public policy, public health, law, medicine, business, and any other field that values a solid liberal arts education.

All social policy majors are required to have a coordinate major in one of three social science departments: Political Science, Economics, or Sociology.

Requirements

Course ID	Title	Credits
Required Courses		
SOWK 2000	Intro Social Policy/Prac	3
SOWK 4000	SPP. Emerging Programs & Policy	3
POLA 3240	Public Policy	3
Elective Courses		
Select seven elective courses		21
Total Credit Hours		**30**

Elective Courses

All SPP students are required to take 7 elective courses (21 hours) to be selected from a list of approved courses (see below) or to be negotiated in conjunction with the Program Director. Petitioning the Program Director for elective approval for courses other than those listed below must occur before the student takes the course. These courses will be policy-oriented courses in sociology, economics, political science, and other SLA disciplines and programs. No elective credit will be accepted for courses outside of Newcomb-Tulane College.

Students can take only three courses below the 4000-level for elective credit. All other elective courses must be at the 4000-level or above. A maximum of two study abroad courses can be counted as electives toward fulfillment of the SPP coordinate major, and those study abroad courses can only be counted at the below-4000 level.

All the departments have approved their courses for listing as SPP electives. The courses below are offered on a regular basis at Tulane by regular faculty members. Please note that some of these courses have prerequisites. Students should consult the course catalog prior to registering to ensure that they have met any department-specific prerequisites.

Graduate Level Social Work Courses

Priority for enrollment in graduate level social welfare courses is reserved for graduate students, but instructors will often consider undergraduates for enrollment when space is available. The instructor has total discretion in determining the suitability of the undergraduate for enrollment in a graduate course.

Strategy, Leadership & Analytics Minor

The Strategy, Leadership and Analytics Minor prepares students to be leaders who can manage the dynamics of rapidly changing marketplaces and adapt strategically and creatively for future careers.

Learning outcomes:

- Economic Planning Acumen – Students will understand the language and practice of financial and data-driven strategies, including financial planning and analytics measurement and forecasting.
- Leadership Concepts and Practices – Students will analyze and assess leadership strategies through historical and contemporary lenses.
- Critical Perspectives on Business, Industries, and Society – Students will be able to contextualize business trends and economic markets through a liberal arts discipline or perspective.
- Integration of Disciplinary Expertise with Career Opportunities – Students will be able to link their chosen majors to employment trends and practices.

Requirements

Minors will take 18 hours of coursework that includes: one gateway course (3 credits), one economic planning or forecasting course (3 credits), and 12 credits of elective courses. Students are encouraged, but not required, to choose electives based on learning modules that are organized on the program website by organizational paradigms or industries.

Course ID	Title	Credits
Gateway Course:		
SLAM 1010	Entrep Lead & Prob Solv	3

Urban Studies Minor

The Urban Studies minor is intended for any undergraduate student seeking to develop a multi-disciplinary but focused exploration of cities, urban life and artifacts, and the design and organization of urban space and experience. It is designed to complement pursuit of any major(s) throughout the Liberal Arts, Science and Engineering, Architecture, Public Health, and Business and offers an excellent

academic supplement to pre-professional training for many areas of law, social work, and medicine.

Requirements

Course ID	Title	Credits
Requirements [1]		
URST 2010	The City I	3
URST 2020	The City II	3
Electives [2]		
Select 4 of the following:		12
ANTH 3360	Anthropology of Cities	
CLAS 3190	Pompeii:Life in a Roman Town	
ECON 3320	Urban Economics	
ECON 3420	Economic History of the United States	
HISA 6230	Medieval Cities

SOCI 6960	Urban Latin America	
SPAN 4510	Hispanic Cities	
URST 3100	Urban Geography	
URST 6010	Special Topics	
Total Credit Hours		**18**

1 City I and City II can be taken in any order. Any course in which a student earns less than C- does not count toward fulfillment of the minor program. Students must achieve a C average across all required coursework.

2 Or other urban electives per program approval. List includes pre-approved course only. In as much as course offerings change, students are advised to check with the Urban Studies Program for up-to-date listings and may petition the Urban Studies Steering Committee in advance regarding other course approvals. Listed courses may have prerequisites. Prospective students should consult the catalog and/or relevant department.

Additional Information

Students must ensure that at least one elective course (3 credits) is at the 3000 level or higher and that elective courses are drawn from at least two departments, programs, or schools. Any course in which a student earns less than C- does not count toward fulfillment of the minor program. Students must achieve a C average across all required coursework.

US Public Policy Minor

The Tulane Summer Minor Program in U.S. Public Policy will give students a foundation for graduate school in public policy or a policy-oriented career in business or government at the local, state, or national level. Students complete relevant coursework and participate in service learning that together provide them with tools in the analysis of policy, knowledge in substantive policy areas, and experience in local government. Students completing the minor will fulfill one of Tulane's service learning graduation requirements.

Requirements

A minor in public policy requires 5 courses (15 hours/credits), including:

Course ID	Title	Credits
ECON 1010	Introduction to Microeconomics (Can be taken prior to or subsequent to the summer program.)	3
POLA 3240	Public Policy (Should be taken prior to or as part of the summer program.)	3
POLA 4110	Policy Research Shop (This class creates a partnership between city goverment and Tulane students in order to address issues of concern to the city and to increase students' civic engagement. In this course, the professor solicits policy topics from local elected and appointed officials and bureaucrats and their students write policy briefs on these issue areas. In exchange for the policy brief, policy sponsors agree to allow the students to present their findings at an official forum, such as city council meeting. Students will spend 20 hours during the program working on research for an office in City Hall as part of a required 20-hour service learning element.)	3
Elective 1 Must be taken during summer session		3
Elective 2 Can be taken during the summer session. If it is not taken during the summer, the director of the program must approve that the course will count toward the minor.		3
Total Credit Hours		**15**

1 If taking only one elective over the summer, students will need to take an additional elective in public policy, which must be approved by the program director.

Important Policies

***Pre-Requisites*:** There are no prerequisites for the courses during the summer. All courses are open to any student of any major. Prerequisites may be in place during the fall and spring semesters.

***Minimum Grades*:** Students must achieve a C average (2.0) across all required coursework. Students cannot take courses in the program as S/U.

***Non-minor Participation in Program*:** Courses are open to all students but declared minors will have priority registration.

***Double-Counting*:** According to SLA policy, students must have 27 credits in each major that do not also count toward a minor. No courses may overlap between minors.

SCHOOL OF MEDICINE

Overview

Street Address

Tulane University School of Medicine
Office of Academic Affairs
131 S. Robertson Street
New Orleans, LA 70112

L. Lee Hamm
M.D., University of Alabama at Birmingham
Dean

One of the nation's most recognized centers for medical education, Tulane University School of Medicine is a vibrant center for education, research and public service. Celebrating its 175th anniversary in 2009, Tulane School of Medicine is the second-oldest medical school in the Deep South and the 15th oldest medical school in the United States.

Tulane School of Medicine recruits top faculty, researchers and students from around the world, and pushes the boundaries of medicine with groundbreaking medical research and surgical advances. From invention of the binocular microscope to robotic surgeries, Tulane School of Medicine remains at the forefront of modern medical innovation. Tulane School of Medicine is equipping the next generation of medical professionals with the tools to succeed in a rapidly changing world and shape the future of health care. On a daily basis, we strive to meet our mission of "Education, Research and Patient Care: We Heal Communities."

Tulane School of Medicine is fully accredited by the Liaison Committee on Medical Education.

Academic Policies

Graduate School Policies

A full description of academic policies for all students in Graduate Programs (p. 80) can be found in the Office of Graduate and Postdoctoral Studies section of this catalog. Students should review these policies thoroughly.

Program of Nursing Policies

A full description of academic policies for nursing students can be found in the Program of Nursing (p. 374) page accessible through the Academic Department tab of the School of Medicine page.

School of Medicine Policies

Graduate Student Policies

Requirement to Stay Informed

Students are responsible for checking their Tulane issued email accounts daily since announcements from the BMS Program Office, School of Medicine Departments or other entities at Tulane are frequently sent via email. If you have an email other than the one given to you by Tulane,

it is a good idea to have your Tulane email automatically forwarded to the email address you use.

Enrollment Requirements

A student admitted to any degree program in BMS must be continuously enrolled in a degree-granting division of the University during the 12-month calendar year and maintain full-time status. A student admitted into any BMS degree program must be in continuous registration in a degree-granting division of the University until the awarding of the degree. Any student who is not registered for course work in a degree-granting division of the University must be registered in Master's Research or Dissertation Research every semester, including the summer, in order to remain in continuous registration. Although these courses are zero-credit-hour courses, registration will maintain full-time status.

Processes

Absences

- **Medical or Psychological Leave:** Medical or psychological leave should be requested in accordance with the Case Management Victim Support Services processes (https://cmvss.tulane.edu/content/medical-withdrawal-leave-return/).
- **Vacation:** Ph.D. students are entitled to 2 weeks of vacation (10 days) per year in addition to holidays approved by Tulane University (See Academic Calendar). Foreign students holding a student visa who wish to temporarily leave the United States must obtain permission of their department chairman (if applicable) and submit a written request to the BMS Program Office at least ***30 days prior to their travel*** and/or before making any travel arrangements. Students granted permission then apply for a new I20 or IAP-66 in order to return to the United States. Any foreign student who leaves the United States without the consent of the BMS Program Office will be subject to disciplinary action. Students not returning from leave of absence within the approved date may have their stipends suspended and may be required to re-apply to the Graduate Program in Biomedical Sciences.
- **Other than Vacation:** Master's students should coordinate absences with their individual Program Director. Any Ph.D. student desiring to take a leave of absence from the Program for any reason except medical/psychological for an extended period of time (more than one week) must submit the request in writing to their Dissertation Advisor and to the BMS Office, stating the reason(s) for the requested absence. Approval for such leave will be granted by the Steering Committee. In emergencies, the Co-Director or the Assistant Dean will grant this leave and present the request to the Steering Committee as soon as possible. This policy applies to all full-time Ph.D. students in the BMS Program.

Change of Name/Address

Students must complete a change of name/address form and submit it to the BMS Program Office when appropriate. Changes of address may also be made by logging into *Gibson Online* (https://gibson.tulane.edu/tulane/jsp/login.html).

Course Audits

Students may audit any course in the Graduate Program in Biomedical Sciences that he/she is otherwise qualified to attend except under the following circumstances:

1. The course has reached capacity with "for grade" students and/or;
2. The course is listed as "permission of the instructor required: and permission has not been granted, and/or;
3. Official course registration is required. Usual advisor signatures, tuition and fees and add/drop dates apply. No transfers from audit to credit will be permitted after add/drop date;
4. There are no class work or attendance requirements;

A student may take a course for credit any following semester after taking the course for audit, if otherwise qualified. This requires a second official registration and payment for the course. Students paying audit tuition and fees are entitled to copies of handouts, assignments and/or other class materials. The conditions for student participation and evaluation of student work will be agreed upon in advance by the student and the instructor. Courses taken for Audit will not appear on final transcript.

Course Changes

Student-Driven: Students wishing to add or drop courses should consult the Schedule of Classes for deadlines and instructions. Failure to make schedule adjustments promptly and accurately may result in financial or academic penalties. ALL add/drops must be processed in ***Gibson Online*** unless you have two or more classes which have a time overlap. In this case, you need to fill out an add/drop form (from the BMS website or office) and obtain signatures from both instructors. You must fill out the exact course ID and section number even if there is only one section. Students may add or withdraw from a course with approval of the instructor and the BMS Program Office. Refer to the BMS Calendar for the last days to drop a course with and without record. A student wishing to add a course after general registration should complete the Drop/Add form and have appropriate approval of the course instructor and advisor prior to the start of the course. Registration will not be permitted beyond the first week of a course. Credit will

not be given for courses in which the student was not registered.

Department-Driven: Departments often make schedule changes for courses. If a student has registered for a class and a change has been made, that class will automatically be dropped from their schedule. If the student still wants to take that class, it is their responsibility to re-register. Departments are responsible for notifying students (usually via email) if a class has been cancelled or a section change has been made.

Course Registration

Students register using Gibson Online (https://gibson.tulane.edu/tulane/jsp/login.html). Class schedules are found on the University Registrar's website at www.registrar.tulane.edu. (http://www.registrar.tulane.edu/) This site also contains a link to the Schedule of Classes. Registration for Summer and Fall semester courses opens in March and Registration for Spring semester courses opens in November. The schedule is updated twice annually. All students are responsible for their own class schedules. Consultation with assigned academic advisors or thesis mentors is strongly encouraged before enrolling in any BMS classes.

The convenience of registration on the web coupled with the delivery of tuition bills via email greatly reduces the time each student must spend on campus dealing with administrative details. Students, however, must know that by registering they assume full financial responsibility for keeping the University informed of any address changes so that bills and priority registration materials may be delivered promptly.

Students should also be aware of the requirement to confirm attendance at the beginning of each semester. Notices will be emailed to all enrolled students when the confirmation option becomes available on ***Gibson***. In addition, they must consult the academic calendar on the University Registrar's webpage when adding or dropping courses once the term has begun. Failure to heed the dates set forth in the official calendar could result in academic or financial penalty.

Registering for Independent Study:
Students must register for Independent Study (BMSP-7990) and Special Topics (BMSP-7500) in person with the BMS Office at the beginning of the semester. If registration is delayed, students run the risk of not receiving credit in that semester. ***Please submit forms to the BMS office to register.***

Missed Deadlines:
Registration deadlines are in the calendar section of the BMS website. If registration deadlines are missed, you will not be able to use Gibson to register and must fill out a drop/add form, available in the forms section of the BMS website or in the BMS Office.

Registration Holds:
Students who have an outstanding financial balance with Accounts Receivable and/or are blocked by Student Health concerning their immunization records will need to resolve these issues before registering. The BMS Program Office can help with identifying the nature of registration holds.

Enrollment Verification:
If enrollment verification is needed, contact the National Student Clearinghouse: Tel: 703-742-4200 Fax: 703-742-4239

Email: enrollmentverify@studentclearinghouse.org
Web: www.studentclearinghouse.org (http://www.studentclearinghouse.org/)

Professional/Environment of Learning Program

The Tulane University School of Medicine (SOM) is committed to creating and maintaining a positive environment for its faculty and learners. This environment is based on mutual respect and accountability. The BMS Program is designed to provide an environment that is professional, respectful, inclusive, and intellectually-stimulating. Our program allows for individuals to report concerns. Most important is early intervention to prevent concerning behavior from escalating. Exemplary behavior by individuals who are exceptional role models for professionalism can also be acknowledged within the system.

The School of Medicine has developed a reporting/tracking system for concerns about the environment of learning and workplace. Incidents are reported by a variety of mechanisms, documented in the system, and recorded in a confidential database. Each report will be investigated following the method of the Professionalism Pyramid for Graduated Interventions (first developed at the Vanderbilt School of Medicine). https://medicine.tulane.edu/student-affairs/professionalismenvironment-learning-program (https://medicine.tulane.edu/student-affairs/professionalismenvironment-learning-program/).

Transferring Credits

Students may request transfer of credits any time after the successful completion of one semester as a registered student in the BMS Program. In order to successfully complete a semester, a student must enroll in all core courses in the first semester and every semester thereafter until their formal request for transfer of credits is approved. Acceptance of graduate credit for work done at other graduate institutions or in another division of Tulane University must first be submitted in writing to the Steering

Committee through the BMS Office, who will review the transfer request and make a recommendation for approval.

In general, up to 12 semester hours of transfer credit may be accepted for a master's degree, and up to 24 semester hours of transfer credit may be accepted toward the Ph.D. degree. To be considered for transfer credit, graduate work done at another institution or in another division of Tulane University must carry a grade of B or better and must have been completed no more than four years from the date of first registration for graduate work if applied towards a master's degree and no more than six years from the date of first registration for graduate work if applied toward a Ph.D. degree. The transfer of credits taken earlier may be approved by the Assistant Dean or Co-Director in unusual cases only.

Updating Grade of Incomplete

At the end of the semester, if the student has earned an "I" (incomplete) in a class, he/she has 30 days after the semester to clear this up. Incomplete grades that are not resolved within 30 days of the end of the semester are changed to Fs. The "I" will remain on the student's transcript, accompanied by the final course grade. Extensions of the 30-day deadline must be requested in writing by the student and must be approved by the instructor and the BMS Assistant Dean or Co- Director.

Withdrawals

Voluntary: A student who has registered for a semester and plans to withdraw from the program must inform the BMS Program Office in writing. After appropriate action has been completed with the Assistant Dean or Co-Director, confirmation of withdrawal will be sent to the student. The official date of the withdrawal from the program must be approved by the Assistant Dean or Co- Director and usually is the date of formal notification. The withdrawal date is important for determining possible refunds. Students who officially have withdrawn from the program must surrender their student identification cards at the time of withdrawal. After the last day to drop courses, a student withdrawing from the program without adequate reason, as determined by the Assistant Dean or Co-Director, will receive WF grades. A W grade will be recorded if withdrawal has been approved for medical reasons.

Medical: Students may experience medical and/or psychological conditions as well as problems around substance misuse that significantly impacts their ability to complete their academic pursuits. During such circumstances, a medical withdrawal and leave of absence from the University provides the student an opportunity to remain a matriculated student while also allowing time away for appropriate treatment and recovery. Students must request a medical withdrawal in accordance with the checklist on the Case Management and Victim Support Services Website: https://cmvss.tulane.edu/content/medical-withdrawal-leave-return (https://cmvss.tulane.edu/content/medical-withdrawal-leave-return/). ***Students must notify the BMS Office of their intent to request a medical withdrawal or leave prior to beginning the process.***

Involuntary Withdrawals: A student may be required to withdraw from any course or from the University, temporarily or permanently, for any of the following reasons:

1. Work below the standard specified by the college in which the student is enrolled.
2. Violation of the honor system or other misconduct.
3. Possibility of danger to the health of the student or to other students if enrollment is continued.
4. The University reserves the right to forbid any student's continued enrollment without assignment of reason. The Graduate Program in Biomedical Sciences, however, will provide a student with a statement of reason in writing from the department. An appellate procedure has been established in cases involving academic performance or possible infringement of academic freedom. The Graduate Program in Biomedical Sciences also has appellate procedures in cases involving non-reappointment of fellowships or scholarships when the formal terms of the first award have given reasonable expectation of renewal. Such procedures may also apply to cases in which a graduate, teaching, or research assistant, is relieved of a position before the end of the term of the appointment or is not reappointed when the formal terms of the first appointment have given reasonable expectation of reappointment. Copies of these procedures are available in the Program Office.

General Policies

Academic Standards

Quality of Work Requirements: A minimum average quality-point average ratio of 3.0 (B) must be maintained by a student in the Graduate Program in Biomedical Sciences.

If a student receives one B- grade, the student is immediately considered for probation. If a student receives two grades of B-, or one grade less than B- during his/her tenure in the BMS program, the student is placed on probation and considered for dismissal by the Assistant Dean or Co-Director, in consultation with the Steering Committee. The student's advisor will be consulted and will submit information to the Steering

Committee on the student's academic progress and research work. The student will be recommended to be removed from probation if they receive no further grades of B- or less in the following semester, as long as the student maintains a grade point average of 3.0 or better in BMS studies.

Grades in BMS are reported as shown below.

Grade	Description
A	4.00
A-	3.667
B+	3.333
B	3.000
B-	2.667
C+	2.333
C	2.000
C-	1.667
D+	1.333
D	1.000
D-	0.667
F	Failure
I	Incomplete
IP	In progress
S	Satisfactory
U	Unsatisfactory
W	Withdraw
WF	Withdraw Fail

I -- Incomplete – This grade will automatically become F unless the work is made up within 30 days after the beginning of the following semester, excluding Summer School. This grade is not to be used as an automatic extension but only for unavoidable delays caused by illness or other emergencies.

R – Research – In those cases where research or experimentation, or both, cannot be completed within the 30-day limit following the end of the semester, this grade will be given to indicate this circumstance. This grade carries a different meaning from that of IP which is given at the end of the first semester of a two-semester course.

IP -- In Progress – Satisfactory progress at the end of the first semester of a year-long course; grades are assigned upon completion of the course.

W -- Courses may be dropped without record within six weeks of the first day of classes. Refer to Academic Calendar for exact dates each semester. Withdrawals with the grade of W after these dates may be accomplished only if the instructor notifies the dean that the student is passing and recommends permission to withdraw. WF (withdrawn failing) will be assigned if the student's work in a course is unsatisfactory at the time of withdrawal.

In some departments grades for certain courses are reported as follows: S Satisfactory; U Unsatisfactory. In some departments, grades for certain other designated courses may also be reported simply as S or U at the student's option, provided that the option is declared by the student no later than the end of the second week of class.

Grade or Academic Complaints: University procedures for grade and other academic complaints are available in the BMS Office.

Student Request for Review of Status: Any degree candidate enrolled and placed in jeopardy by these policies may request a review of status by the Steering Committee. The procedure for a request of a review is to submit to the BMS Steering Committee through the BMS office, a written explanation of extenuating circumstances or other matters pertinent to the request for hearing. The decision of the Steering Committee shall be considered final.

Class Attendance

Students are expected to attend all classes unless they are ill or prevented from attending by exceptional circumstances. Instructors may establish policies for attendance of their classes, which are announced at the beginning of the semester. Students who find it necessary to miss class must assume responsibility for making up the work covered during that session, including quizzes, examinations, and other exercises; they also are responsible for obtaining notes on material covered in lectures or other class sessions. Students are responsible for notifying professors about absences that result from serious illnesses, injuries, or critical personal problems. See Absences and Withdrawals in the Process section.

Code of Academic Conduct

The Graduate Program in Biomedical Sciences expects students to conduct their academic endeavors with honesty and integrity. Activities covered by the Code of Academic Conduct include course work, examinations, and research. This Code outlines individual responsibilities as well as procedures to be followed if there is a question concerning a student's academic honesty or integrity. These values are held in common by all departments and enforced by the sanctions of the Assistant Dean and the Co-Director of the program. All students enrolled in BMS are subject to these regulations and should be familiar with this Code of Academic Conduct. A copy of the Code of Academic Conduct is available in the program office. Principles and activities not covered by this Code may fall under the purview of university or departmental research and/or ethics committees. Questions concerning jurisdiction should be addressed to the Assistant Dean of Graduate Studies or the BMS Program Co-Director.

Policy on Intellectual Property

The University policy on intellectual property applies to all graduate students. Any invention or discovery resulting from projects supported in whole or in part by funds, personnel, or facilities provided by or administered by the Board of Administrators of Tulane University is the property of Tulane University. The University has a policy of sharing with the inventor any income derived from such discoveries. For more information on Tulane's policy, see "Intellectual Property Policy and Procedures" in the Tulane Faculty Handbook, a copy of which is available in the Graduate program office.

Student Employment

PhD students are not permitted to be employed off campus during their entire program. Any off- campus employment for remuneration may disqualify a student from receiving financial aid from the Graduate Program in Biomedical Sciences.

Technical Standards

Technical Standards are non-academic requirements essential for meeting the academic requirements of certain graduate programs in the School of Medicine of Tulane University. Within any area of specialization, students must demonstrate competence in those intellectual and physical tasks that together represent the fundamentals of research in their chosen discipline.

The PhD degree programs and some MS degree programs at the Tulane University School of Medicine require a dissertation or thesis based on independent research. Granting of those degrees implies the recipient has demonstrated a base of knowledge in their chosen field of study and possesses the ability to independently apply that knowledge to form hypotheses, design and conduct experiments, interpret experimental results, and communicate these findings to the scientific community. Thus, a candidate for the PhD or some of the MS degrees in the health sciences must possess abilities and skills that allow for observation, intellectual and conceptual reasoning, motor coordination, and communication. The use of a trained intermediary is not acceptable.

The following technical skills are required of the successful student:

- **Observation:** The candidate must be able to acquire knowledge by direct observation of demonstrations, experiments, and experiences within the research and instructional setting.
- **Intellectual/Conceptual Abilities:** The candidate must be able to measure, calculate, analyze, reason, integrate and synthesize information to solve problems.
- **Motor Skills:** The candidate must possess motor skills necessary to perform procedures required for experimentation within the chosen discipline. Those individuals with physical challenges are encouraged to contact the appropriate administration to determine their educational options within the chosen discipline.
- **Communication:** The candidate must be able to communicate and discuss his or her experimental hypotheses and results to the scientific community.
- **Behavioral and Social Attributes:** The candidate must possess the emotional and mental health required for appropriate utilization of his or her intellectual abilities, the exercise of good judgment, the prompt completion of responsibilities inherent in managing a scientific setting, the ability to function under the stress inherent in research, and the ability to understand and comply with ethical standards for the conduct of research.

The Tulane University Code

The University requires of all of its student's behavior compatible with its high standards of scholarship and conduct. The Vice President for Student Affairs is responsible for formulating appropriate procedures and regulations concerning student behavior and for the judicial consideration of violations. A more detailed description can be found at: https://catalog.tulane.edu/university/#academicpoliciestext.

Medical Students

The Office of Admissions and Student Affairs (504.988.5331) is your primary source for answers to academic questions and problems. Dr. Elma LeDoux has been the Associate Dean of Student Affairs since 2020. The Office of Admissions and Student Affairs staff schedules dean's hours, keeps up-to-date on curriculum requirements, processes paperwork for USMLE testing, and serves as a general resource for student issues. The office also administers the application process for Tulane medical students applying to residencies. The Office of Admissions and Student Affairs is responsible for the annual White Coat Ceremony, graduation, and orientation activities for incoming first-year students and for third-year students' transition into the clinical years.

The Office of Admissions and Student Affairs has a website at http://medicine.tulane.edu/student-affairs (http://medicine.tulane.edu/student-affairs/) . You can find pictures of the staff, along with staff email addresses and phone numbers. The areas of responsibility for each staff member are listed. The website also has information related to career planning, pre-clinical and clinical courses, and life as a medical student.

DISCLAIMER : Please note that School of Medicine (SOM) policies for the MD program may change after publication of the Tulane University catalog. For the

most current policies, please check the SOM Student Handbook and LCME Policies, available at the following link: https://medicine.tulane.edu/student-affairs (https://medicine.tulane.edu/student-affairs/)

Non-Curricular Academic Policies

School of Medicine Academic Calendars

The T1/T2 preclinical academic calendars are maintained by the T1/T2 course curriculum committee in the Office of Academic Affairs. Detailed calendars are available to students in eMedley.

The T3/T4 clinical academic calendar are posted in eMedley's eCurriculum: https://he.emedley.com/univ/tu/common/adfs/login.php .

Promotion and Graduation Policy

All students are required to complete all courses, electives, and required clinical clerkships with the grade of 70% or better.

Students must pass USMLE Step 1 prior to August 15th of their fourth year

During Year 3 and Year 4, students are required to complete 20.5 months of educational activity.

All senior students are recommended to sit for USMLE Step 2CK before December 31 of their senior year to be successful in the Match. Step 2 must be passed in order to graduate.

Before graduation, the Admissions and Student Affairs staff and administration will ensure that all students have met the requirements for graduation. The Student Professionalism and Promotion Committee will recommend to the dean candidates for graduation.

Essential Functions/Technical Standards

Purpose

Delineation of technical standards is required for the accreditation of U.S. medical schools by the Liaison Committee on Medical Education (LCME).

Overview

The MD degree is a broad undifferentiated degree attesting to general knowledge in medicine and the basic skills required for the practice of medicine. Essential abilities and characteristics required for completion of the MD degree consist of certain minimum physical and cognitive abilities and sufficient mental and emotional stability to assure that candidates for admission, promotion, and graduation are able to complete the entire course of study and participate fully in all aspects of medical training. Tulane School of Medicine intends for its graduates to become competent and compassionate physicians who are capable of entering residency training (graduate medical education) and meeting all requirements for medical licensure. The avowed intention of an individual student to practice only a narrow part of clinical medicine, or to pursue a non-clinical career, does not alter the requirement that all medical students take and achieve competence in the full curriculum required by the faculty.

The School of Medicine has a societal responsibility to train competent healthcare providers and scientists who demonstrate critical judgment, extensive knowledge and well-honed technical skills. Although students learn and work under the supervision of the faculty, students interact with patients throughout their medical school education. Patient safety and wellbeing are therefore major factors in establishing requirements involving the physical, cognitive, and emotional abilities of candidates for admission, promotion, and graduation. The essential abilities and characteristics described herein are also referred to as technical standards. They are described below in several broad categories including: observation; communication; motor function; intellectual-conceptual, integrative, and quantitative abilities; and ethical, legal, attitudinal, behavioral, interpersonal, and emotional attributes.

Candidates must adhere to universal precaution measures and meet safety standards applicable to inpatient and outpatient settings and other professional activities. Individuals whose performance is impaired by use of alcohol or other substances are not suitable candidates for admission, retention, promotion or graduation.

Delineation of technical standards is required for the accreditation of U.S. medical schools by the Liaison Committee on Medical Education (LCME). The following abilities and characteristics are defined as technical standards and are requirements for admission, retention, promotion, and graduation. Candidates and current students who have questions regarding the technical standards are encouraged to contact the dean of Admissions and Student Affairs; candidates and current students who believe they may need to request reasonable accommodation(s) in order to meet the standards are encouraged to contact Tulane's Goldman Center for Student Accessibility or Tulane's ADA/504 Coordinator.

DEFINITIONS

For purposes of this Policy, the following terms and definitions apply:

- "Candidate" means candidates for admission to medical school as well as Tulane University medical students in the MD program who are candidates for retention, promotion or graduation.

POLICY GUIDELINES

General Requirements

OBSERVATION: Candidates must be able to acquire information from demonstrations and participate in experiments of science, including but not limited to such things as dissection of cadavers; examination of specimens in anatomy, pathology, and neuroanatomy laboratories; and microscopic study of microorganisms and tissues in normal and pathologic states. Candidates must be able to accurately acquire information from patients and assess findings. These skills require the use of vision, hearing, and touch or the functional equivalent. They must be able to observe a patient accurately both directly and through indirect methods (at a distance and close at hand), to obtain and analyze medical history. Medical students must be capable of viewing and interpreting diagnostic modalities and to detect and interpret non-verbal communication from the patient. They must be able to perform a full and complete physical examination in order to integrate findings based on this information and to develop an appropriate diagnostic and treatment plan.

COMMUNICATION: Candidates must be able to communicate effectively and efficiently with patients, their families, health care personnel, colleagues, faculty, staff, and all other individuals with whom they come in contact. Candidates must be able to read and write in standard format, and must be able to interact with computers when necessary in rendering patient care. Candidates must obtain a medical history in a timely fashion, must be able to record information accurately and clearly in a written patient work-up, and orally present the work-up in a focused manner to other healthcare professionals. Candidates must be able to listen carefully and develop rapport with patients and their families, in order to elicit information and perform appropriate examinations; observe patients attentively; perceive changes in mood, activity and posture; and interpret non-verbal communication such as facial expressions, affects, and body language. Candidates must communicate effectively and efficiently in English with other health care professionals in a variety of patient settings.

MOTOR FUNCTION: Candidates must, after a reasonable period of training, possess the capacity to perform physical examinations and diagnostic maneuvers, *e.g.*, elicit information from inspection, palpation, auscultation, percussion, etc. Candidates must be able to respond to clinical situations in a timely manner and execute the movements reasonably required to provide both general and emergency care. These activities require some physical mobility, coordination of both gross and fine motor neuromuscular function, balance, and equilibrium. Specifically, candidates must be able to manipulate equipment and instruments, perform basic laboratory tests and procedures, and possess the physical capacity to examine patients in order to identify both normal and abnormal clinical findings. Finally, candidates must be able to adhere to universal precaution protocols and meet the safety standards applicable to all required clinical settings, *e.g.*, inpatient, outpatient, emergency department, etc.

INTELLECTUAL-CONCEPTUAL, INTEGRATIVE, AND QUANTITATIVE ABILITIES: Candidates must be able to assimilate the detailed and complex information presented in the medical student curriculum. They must be able to learn through a variety of modalities including, but not limited to, classroom instruction; small group, team and collaborative activities; independent study; simulation; use of computer technology; observation; and through direct patient care. Candidates must be able to memorize, measure, calculate, reason, analyze, synthesize, and transmit information. They must recognize and draw conclusions about three-dimensional spatial relationships and logical sequential relationships among events. They must be able to formulate and test hypotheses that enable effective and timely problem-solving in diagnosis and treatment of patients in a variety of clinical settings and health care systems.

ETHICAL, LEGAL, ATTITUDINAL, BEHAVIORAL, INTERPERSONAL, AND EMOTIONAL ATTRIBUTES: Candidates must demonstrate the maturity and emotional stability required for full use of their intellectual abilities. Because the medical profession is governed by generally accepted ethical principles and by state and federal laws, candidates must have the capacity to learn and understand these values and laws to perform within their guidelines. Students must be of the highest ethical and moral behavior. As such, candidates and current students must meet the legal standards to be licensed to practice medicine in Louisiana as well as the standards of Tulane School of Medicine, even as students may choose to practice in other locations after graduation. Candidates for admission must pass the criminal background check, as required by AAMC. In addition, after matriculation, students who are enrolled in Tulane's School of Medicine's medical education program must immediately notify the Associate Dean of Students of any arrest, charge, conviction or institutional investigation or action occurring thereafter. Felony conviction or failure to disclose prior or new offenses can lead to disciplinary action by the school that may include dismissal.

In addition to legal requirements, candidates must accept responsibility for learning, exercising good judgment, and promptly completing all responsibilities attendant to their curriculum and to the diagnosis and care of patients.

Candidates must be able to relate to patients, patients' families, staff, and colleagues with honesty, integrity, dedication, and non-discrimination. Students must be able to develop mature, sensitive, and effective relationships with patients. Students should be self-reflective, must be able to identify personal reactions and responses, recognize multiple points of view, and integrate all of these appropriately into clinical decision-making. Students must be able to communicate and provide treatment to persons whose culture, sexual orientation, or spiritual beliefs are different from their own. Candidates must not let their own personal attitudes, perceptions, and stereotypes compromise care of the patient.

Candidates must behave in a manner that is conscientious, altruistic, with a spirit of cooperation and teamwork. Candidates must be able to contribute to collaborative, constructive learning environments and integrate constructive feedback from others in order to modify behavior. Candidates must have the physical and emotional stamina and resilience to tolerate physically and emotionally taxing workloads and function in a competent and professional manner. Candidates must be able to tolerate and adapt to changing environments, display flexibility, and manage the uncertainty inherent in the care of patients and the health care system.

Ability to Meet the School of Medicine's Technical Standards:

The School of Medicine intends for its students and graduates to become competent and compassionate physicians through an undifferentiated medical degree. SOM expects its graduates to be capable of entering residency training (graduate medical education) while meeting all requirements for medical licensure. Criminal background checks may be conducted as part of the process of admission, participation, promotion, and/or graduation.

Should a candidate have or develop a health condition that would cause a direct threat to the health or safety of the patients, the candidate, or others, an evaluation with Tulane School of Medicine and the Goldman Center for Student Accessibility may be necessary. As in initial assessments, a complete and careful reconsideration of the objective requirements to participate in the program, as well as the qualifications of the candidate, with or without accommodation, to meet such requirements will be evaluated. In addition, Tulane will take into account the student's willingness, desire, and ability to complete the medical curriculum and fulfill all requirements for medical licensure, and Tulane recognizes that students with varied types of disabilities are able to successfully practice medicine. Failure to meet these technical standards, with or without reasonable accommodations, requires a student to appear before the School of Medicine's Professionalism and Promotion Committee to determine a plan for the student to regain a successful path within Tulane School of Medicine.

Equal Access to the School of Medicine's Educational Program:

Tulane University School of Medicine has a history of training physicians with disabilities and provides reasonable accommodations for all qualified individuals with disabilities who apply for admission to the MD degree program and who are enrolled as medical students. Otherwise qualified individuals will not be excluded from admission or participation in the School of Medicine's educational programs and activities based solely on their status as a person with a disability.

Should, despite reasonable accommodation (whether the candidate chooses to use the accommodation or not), a candidate or student's existing or acquired disability interfere with patient or peer safety, or otherwise impede the ability to complete Tulane SOM's undifferentiated undergraduate medical degree program and advance to graduation, residency, training, or licensure, the candidate may be denied admission or may be separated, discontinued, or dismissed from the program.

It is the responsibility of a candidate with a disability, or a candidate who develops a disability, who requires accommodations in order to meet these technical standards, to self-disclose to Goldman Center for Student Accessibility and request accommodations (https://accessibility.tulane.edu/). Candidates must provide documentation of the disability and the specific functional limitations during the registration process with the Goldman Center for Student Accessibility. Candidates who fail to register with the Goldman Center for Student Accessibility or who fail to provide necessary documentation shall not be considered to be claiming or receiving accommodations under the federal or state disability laws. Students are held to their performance, with or without accommodation. No candidate will be assumed to have a disability based on poor performance alone. Accommodations are not applied retroactively, and a disability-related explanation will not negate poor performance.

While Tulane SOM administration works in consultation with the Goldman Center for Student Accessibility to determine and coordinate approved accommodations, disability documentation remains confidential.

(Approved by SOM Executive Faculty April 2021.)

Exemption of Basic Medical Science Courses

Goals of the undergraduate medical program include integration across all basic science disciplines and developing teamwork skills that are necessary to practice medicine in the evolving healthcare system. While it is recognized that students may enter medical school with advanced training in a basic science discipline, even if obtained at Tulane, they will not be exempted from course work or examinations.

Clinical Rotation Requirements

During the third and fourth years of medical school, students are required to complete 20.5 months of educational activity. Clinical clerkships are assigned according to a predetermined order ("the donut"). Students receive detailed information about clinical scheduling and registration generally in mid to late October, a few months before each annual registration period begins. (In rare cases, curricular exceptions/changes for entire classes may be made, for example in the wake of pandemics or natural disasters. Students are required to monitor their Tulane emails daily to learn of critical curriculum updates.)

Required rotations include the following:

Required Core Clerkships (generally T3 year)

Clerkship	Weeks
Internal Medicine	8 Weeks
Family Medicine	6 Weeks
Surgery	8 Weeks
Pediatrics	8 Weeks
Psychiatry	4 Weeks
Neurology	4 Weeks
OB/Gyn	8 Weeks

Required Rotations (generally T4 year)

Rotations	Weeks
Community Medicine	2 Weeks
Radiology	2 Weeks*
Emergency Medicine	2 Weeks*
Acting Internship	4 Weeks*
Electives (may include MD/MPH rotation)	26 Weeks*

*may be completed outside of Tulane University affiliated hospitals

Descriptions and requirements for clinical rotations can be found on eMedley at https://he.emedley.com/univ/tu/common/adfs/login.php .

HIPAA (Health Information Portability and Accountability Act) Training

Patient information must remain confidential. To ensure proper confidentiality, the federal government enacted HIPAA legislation. Each student must complete HIPAA training. This generally occurs during orientation for the third-year clerkships.

Universal Precautions Training

Blood-borne pathogen (BBP) training is mandatory for all medical students and must be updated annually. Training is offered online via Training Wave and is documented by the Office of Environmental Health and Safety. BBP training can be accessed by clicking here (https://tulane.bridgeapp.com/learner/courses/2f128bd3/enroll/) and logging in using your Tulane credentials. Students will also receive an email regarding the course once assigned.

USMLE Requirements: Step 1 and Step 2

1. A passing score for USMLE step 1 must be recorded by NBME by August 15th in the fourth year. However, students are advised to complete Step 1 BEFORE third-year clerkships begin for the best possible fourth-year scheduling and Match outcomes. Students not passing Step 1 are required to take a leave of absence until a passing score on Step 1 is achieved. Students must allow 30 days after NBME records a passing score before they should expect to return to clerkships: this allows clerkship departments adequate time to place and credential students.

Please note the following scheduling considerations:

2. All students are required to pass USMLE Step 2CK prior to graduating medical school.

3. Students not passing Step 2CK by April of their fourth year of medical school will be required to take a leave of absence until a passing score is achieved.

4. These two USMLE exams must be passed to graduate from Tulane University School of Medicine. Failure to pass USMLE Step 1 or Step 2 CK will result in a student's being withdrawn from the academic rolls as a medical student.

5. All senior students are recommended to sit for USMLE Step 2 CK before December 31 of their senior year to participate in the Match.

6. A student may accumulate a maximum of 24 months of leave for the purpose of meeting the USMLE requirement. After 24 months, if USMLE Step 1 and Step 2 CK are not passed, students will be dismissed.

7. The Student Professionalism and Promotion Committee and the associate dean for admissions and student affairs may recommend a delay in a student sitting for Step 1 until a study program is satisfactorily completed.

Educational Site Requests

Students are assigned to clinical rotations through the Office of Admissions and Student Affairs. The specific geographic location of the rotation is determined by the department in which the rotation takes place. Assignment is made via a lottery with provision for special circumstances.

Students can appeal their assignments through the individual departments. In the case of no resolution, the matter can be referred to the associate dean for resolution.

Changing the order of rotations for the required third-year rotations is discouraged unless there are extenuating circumstances. Students should monitor their Tulane emails for the process for modifying or delaying their third-year rotations.

Fourth-year students should follow schedule-change request rules and deadlines outlined in eMedley's eCurriculum.

Senior Scheduling Requirements

T4 scheduling strategies depend a great deal on students' specialty choices. All students are expected to take an active role in matching their career objectives to their senior scheduling: this process begins in the T1 year with self-exploration, participation in AAMC's Careers in Medicine software, and attendance at multiple career-focused activities such as brown-bag informational sessions.

Each specialty has identified specialty-specific advisors, with whom students are encouraged to meet regularly, and particularly before the T4 scheduling process begins (initial informational sessions are generally held in October of T3 year; T4 scheduling appointments begin in mid-January of T3 year). Watch your Tulane email for information about career advising activities, services, and expectations.

Right to a Healthcare Provider not involved in Evaluation

Students have the right to be provided healthcare by individuals who are not involved in their assessment or instruction as medical students. As such, it is the policy of the School of Medicine that healthcare providers for students are not involved in the assessment of those students.

In the rare exception in which a faculty member is the only content expert in the region, a student *may* choose a faculty provider. In this instance, the faculty member will recuse himself/herself from participation in any academic or promotion evaluation of the involved student.

Grading Policy

The following policy on grading will apply to students entering the first year of the School in Academic Year 1987-88 and thereafter.

Grading Guidelines for Pre-Clinical and Clinical Courses

All pre-clinical courses are graded Pass/Fail or Condition. Condition grades are converted to C/P or F.

Following Hurricane Katrina, preclinical courses were graded on a Pass (P)/Fail (F) basis only. This policy was in effect for the 2005 – 2006 and 2006 – 2007 academic years. This policy was

approved by the Executive Faculty in 6/06 and renewed 6/07 with annual review thereafter.

Grades for Clinical Rotations (T3 and T4 Years)

For questions about how a specific rotation is graded), please consult the course director.

In general, all two-week rotations are graded on a pass/fail basis, and four-week rotations (with a few exceptions) are graded according to the following criteria:

Grade	Description
H - Honors	Should be awarded to a student whose performance in all phases of the course surpassed the minimum standards required by the faculty and was clearly superior to that of the average student taking the course. In courses for which an overall final numerical grade is derived, "Honors" might correspond to a grade of 94 (on a scale of 100) or higher.
HP - High Pass	Should be awarded to a student whose performance surpassed the minimum standards required by the faculty and was distinctly above average for students taking the course. In courses for which an overall final numerical grade is derived, "High Pass" might correspond to grades in the range 86 – 93 (ref. Subsection C. above). This grade may also be awarded in the case of a student whose performance was uneven in different phases of the course (e.g., a student who achieved high scores on objective examinations but whose ward or laboratory work was unremarkable).
P - Pass	Should be awarded to a student whose performance in the course met or surpassed the minimum standards required by the faculty. In courses for which an overall final numerical grade is derived, "Pass" generally corresponds to a grade in the range 70 – 85.
C - Condition	In pre-clinical courses, "Condition" should be assigned to a student whose performance was marginal. In pre-clinical courses for which an overall final numerical grade is derived, "Condition" generally corresponds to a grade in the range 65 – 69. It may also be assigned to a student who failed to meet the minimum standards required in one or more sections of a course, despite an overall final passing average (e.g., a student who scored well on written examinations but who did not perform satisfactorily in the laboratory component). Invariably, this grade constitutes an academic deficiency requiring remedial work consisting of at least passing a repeat comprehensive final examination and possibly successful repetition of the course. In clinical clerkships, "Condition" is assigned to students whose performance on the wards or in other clinical aspects of the clerkship was satisfactory but who failed the final comprehensive examination. In such cases, the deficiency must be cleared by passing a repeat examination. NOTE: "Condition" grades are noted on the transcript with a "C." When the condition is cleared, the "C" is followed by a "P" ("C/P"). A student can only receive a "Condition/Pass" in clearing a deficiency by condition examination. A student must earn a 70 on the condition examination. If a student chooses to repeat the course rather than take the condition exam, the student must pass the course with a 75.

F - Failure	Assigned to the student whose performance did not meet the minimum standards required by the faculty for this course. In pre-clinical courses or in clinical clerkships for which an overall final numerical grade is derived, “Failure” might correspond to grades below 65. In clinical clerkships, “Failure” should be assigned to students whose performance on the ward or in other clinical aspects of the clerkship was unsatisfactory irrespective of their having passed the final comprehensive examination. NOTE: When a student “fails,” the “F” remains on the transcript. The course is listed again when the student passes, and the actual grade earned is recorded. Thus a student can “Honor” a course after failing it the first time. The student must make a minimum of 75 for the course to pass a course that is repeated.
I - Incomplete	Assigned in cases where there is an unavoidable delay, caused by illness or other emergencies, in completion of course requirements. This grade will be assigned at the end of the course(s) when all but a minor portion of the course requirements have been completed. The “I” is a temporary grade and will be replaced on the transcript with the grade earned by the student. The student must satisfactorily complete the course requirements, thus earning at least a passing grade before being eligible for promotion to the succeeding year of study. All incompletes must be completed within six months of receiving the incomplete grade. After six months, incomplete grades are converted to failures. Grades of incomplete will be considered academic deficiencies for the purposes of advancement. Students with incomplete grades in pre-clinical courses must resolve the incompletes before they can advance to the next year. Students in the clinical curriculum who have two or more unresolved academic deficiencies (including any combination of incomplete grades, failures, or condition grades) must stop clinical rotations until all deficiencies are resolved. Students may not graduate with an incomplete on their transcript, even if they have completed all other graduation requirements. All incompletes must be resolved or converted to failures before a student is eligible to graduate. For example, if the student has earned an incomplete in an elective he or she does not need to meet graduation requirements, the incomplete must be converted to an F on the student’s transcript if the student opts not to resolve the incomplete.

W - Withdrawn

Assigned for all courses currently being taken in cases where a student must be placed on leave-of-absence for a medical condition, as certified by a physician, or in cases where the student is suffering serious personal difficulties, as judged by the senior associate dean or his appointed delegate, and is thus unable to complete course requirements. Generally, a "W," as opposed to an "I," will be recorded on the transcript in cases where the student is forced to discontinue studies before completing approximately two-thirds of the course requirements. The "W" is also assigned in all courses currently being taken when the student voluntarily and permanently withdraws from the School of Medicine.

The School of Medicine reserves the discretion to determine the time frame distinguishing between the grades of "I" and "W," as described above. This determination will be made by the senior associate dean in consultation with the course director(s).

Reporting of Grades

Grades are to be posted within 6 weeks of course completion. Grades are submitted by departments and are posted on the Banner System, available any time for students to view. Students may also review their academic files directly in the Office of Admissions and Student Affairs. Generally, files can be reviewed any time during business hours (8:30 a.m.– 4:30 p.m.).

Extramural Reporting

No numerical grades for any course will be reported extramurally. The official transcript for each student will show only the letter grade earned, whether pass/fail or H, HP, P, C, F, I or W, depending on the type of rotation.

Preclinical (T1 and T2) Elective Courses

Students are required to complete one pre-clinical elective during the first two years (four semesters) of medical school. This pre-clinical elective does *not* count toward the required minimum number of clinical electives students must complete in their T3/T4 years. This may include research, MPH classes, MBA classes, or other electives listed on the Office of Admissions and Student Affairs website. These are graded P (Pass) or no-credit (no indication on transcript).

The specific grade awarded to each student shall be based on the following criteria:

Distribution	Credits
Pass	Awarded to a student whose performance met or surpassed the minimum standards required by the faculty
No Credit	Assigned to a student whose performance failed to meet the standards required by the faculty

Courses graded on a Pass/Fail basis will be noted as such on the official transcript.

Retention and Student Support

The Student Professionalism and Promotion Committee meets monthly, but no less frequently than quarterly, to review the academic progress of all students who have accrued deficiencies. The committee's role is to support as well as to evaluate students to assure their future success as physicians. Retention is a top priority of the committee and of the administration and faculty of the school.

Struggling students are encouraged to seek help from the course and clerkship directors, the learning specialist, tutors, the Director of Student Support, and the Dean of Students.

Counseling services for students is encouraged and supported. While adhering to fair and consistent policies, the committee shall also consider all extenuating circumstances that may affect a student's performance.

An emphasis solely on academic performance runs contrary to the fundamental conviction of the faculty and administration at Tulane. Grades do not provide the sole criteria to determine the future performance of a physician; nevertheless, the academic standards of the School of Medicine must be maintained. Considering the responsibility to the public, the Student Professionalism and Promotion Committee and the Executive Faculty shall be as flexible and as reasonable as possible under the circumstances regarding academic deficiencies. Reasons for dismissing a student include incurring excessive academic deficiencies as judged by the Student Professionalism and Promotion Committee and detailed in this handbook, failure to remove academic deficiencies, failure of one or more courses in a repeated year, multiple and repeated academic special action, and/or unprofessional conduct.

The faculty of the school of medicine wants every student to be successful and to graduate. It is expected that students having difficulties will take advantage of every resource available to them including going to class, meeting with course directors, meeting with the Office of Medical Education, and meeting with the Deans.

Academic Deficiencies, Resolving Deficiencies and Grounds for Dismissal

A failing, or "Condition (C)," or incomplete grade in any course or clerkship constitutes an academic deficiency and requires review by the Student Professionalism and Promotion Committee which recommends to the Course Director or Clerkship Director how the deficiency is to be resolved, or if the student has more than one deficiency, what the student's promotional status may be. C grades are not permanent and are converted to either Condition/Pass (C/P)

or Failing (F) grades. Incomplete grades are also temporary and must be converted within 6 months, or they will be converted to failures. Incomplete grades may be resolved by completing the outstanding work.

Condition grades may be resolved by re-examination given on a scheduled date immediately prior to the beginning of the next school year.

Remediation of conditioned grades requires a 70 and/or higher to pass. Remediation of pre-clinical courses that are failed, requires a grade of 75 or higher. For the pre-clinical years (T1 and T2), all academic deficiencies must be removed before a student can be advanced to the next year.

Unless decided otherwise by the Student Professionalism and Promotion Committee, T1 students needing to remediate a T1 course in the summer between T1 and T2 year may continue on to phase II in the spring of T1 year but may not continue in the fall unless the deficiency has been resolved.

For T1s needing to repeat a course(s) the following year (that cannot be resolved in the summer), they should register for and take the T1 Immunology course in the spring of their T1 year. They may sit in on phase II courses but will not sign up or take them for a grade until the T1 course deficiency has been resolved.

In the clinical years (T3 and T4), when a student receives two deficiencies (I, C, or F) grades, the student must stop clinical rotations until all deficiencies are remediated. In the T4 year, students must remediate deficiencies acquired in the required clerkships by October to ensure graduation in May.

Students serving as officers of student organizations are expected to be in good academic standing without any unresolved condition, or failing, or incomplete grades on their transcripts.

If, for any reason, a student must repeat a course or courses or an entire semester due to academic deficiency, appropriate tuition and fees based on the academic year of repetition will be charged.

Academic reasons for requiring a student to repeat a year include the following: incurring more deficiencies than can be cleared in one summer; one or more academic deficiencies accompanied by generally marginal performance; failure to remove an academic deficiency during the summer, or major lapses in professional behavior.

Passing grades in all major required courses of the current phase are necessary for advancement to the succeeding phase.

Rules established by the Student Professionalism and Promotion Committee and the Executive Faculty, combined with existing precedents regarding resolution of deficiencies and dismissal, are consistently enforced. These include the following:

Pre-Clinical Coursework (Phases 1 and 2):

1. A student may only repeat the same course or course equivalent once.

2. When repeating a pre-clinical course following a failure, the student must earn a grade of at least 75 or higher depending on the parameters established by the particular department. Failure to meet these requirements results in a second failure of that course and the student is dismissed, according to rule #1.

3. Failure in one pre-clinical course and a "C" in a second one in a single year requires repetition of the year.

4. Failure of two individual pre-clinical courses results in dismissal.

5. Any combination of three deficiencies (F or C) in phases 1 or 2 results in dismissal.

6. A student cannot proceed in the clinical curriculum until deficiencies are resolved. The student must take a leave of absence to remedy the deficiencies prior to advancement to the clinical phase.

7. Students having difficulty in pre-clinical courses (as determined by course directors) are required to meet with course directors and the associate dean within 14 calendar days of notification. Failure to do so may result in an official professionalism issue report

8. A student may be dismissed due to failure to follow the Tulane University Code of Student Conduct or the Code of Professional Excellence of the School of Medicine (see section below)

9. For details regarding the appeal process regarding grades or re-admissions, see section below.

Clinical Clerkships (Phase 3):

1. A student may only repeat a clerkship once.

2. When repeating a clerkship following a failure, the student must meet the parameters established by the particular department. Failure to meet these requirements results in a second failure of that clerkship and the student is dismissed, according to rule #1.

3. Failure of two individual clerkships results in dismissal.

4. Any combination of three deficiencies (F or C) in phases 3 results in dismissal.

5. A student who has 2 deficiencies (I, C, or F) cannot proceed in the clinical curriculum until these deficiencies are resolved. The student must take a leave of absence to remedy the deficiencies prior to advancement.

6. Students having difficulty in clerkships (as determined by clerkship directors) are required to meet with clerkship directors and the associate dean within 14 calendar days of notification. Failure to do so may result in an official professionalism issue report

7. A student can have a condition grade or fail a clerkship based on professionalism alone regardless of academic performance.

8. For details regarding the appeal process regarding grades or re-admissions, see appeal process.

These changes were recommended by Committee on Student Professionalism and Promotion Affairs. The changes were approved by Executive Faculty August 26, 2014. Further changes were adopted by the Student Professionalism and Promotion Committee in January 2019 and on August 6, 2019.

Appeal Process for Grades and MSPE

General Policy Statement:

Appeal Process for Grades

The student who disputes a grade should go first to the course director. If no resolution can be reached, the appeal goes to the chairman of the department. If no resolution can be reached, the appeal goes to the senior associate dean for student affairs. At the senior associate dean's discretion (or the dean's instruction), there will be a called meeting of the Student Professionalism and Promotion Committee to consider the appeal. Both parties and all pertinent evidence will be heard. The Committee will make a recommendation, either favorable or unfavorable, to the Executive Faculty. Final appeals are made to the Dean who recuses him/herself in the Executive Faculty deliberations. All appeals must be made within 30 days of grade assignment.

Appeal Process for MSPE (Medical Student Performance Evaluation)

All students review their MSPEs prior to ERAS upload in late September or early October (the ERAS schedule varies each year). If a student disputes a comment in the MSPE, the student must first meet with the respective course director to either modify or eliminate the comment. If there is no resolution, the student can then request a change through the Department Chair. If there is still no resolution, the student can appeal to the Committee on Student Performance and Professionalism who make a recommendation to the Executive Faculty. Final appeals are made to the Dean who recuses him/herself in the Executive Faculty deliberations. All appeals must be made within 30 days of Executive Faculty decision.

Appeal Process for Re-admission

A student who has been ***dismissed*** may apply for re-admission by submitting a request for re- admission directly to the senior associate dean for students. If the senior associate dean finds merit in the request, the matter is remanded to the Student Professionalism and Promotion Committee and Admissions Committee. The Committees will entertain the request and all evidence, including oral testimony relative to the request, and make a recommendation (either favorable or unfavorable) to the Executive Faculty, where the final decision is made.

In the case of a student who has voluntarily resigned and seeks ***re-admission***, the appeal is directly to senior associate dean for students. The matter is then taken to the Student Professionalism and Promotion Committee and Admissions Committee in the same fashion as described above.

Masters of Medical Sciences

Students who successfully complete at least two years of medical school, but who do not graduate with the MD degree, may be eligible to earn a Masters of Medical Sciences (MMS) degree: students should consult the Biomedical Sciences program for additional information.

Student Records

Tulane University complies with the provisions of FERPA, the Family Education Rights and Privacy Act of 1974 (Buckley Amendment), which was enacted to protect the privacy of education records, to establish the right of students to inspect and review their education records, and to provide guidelines for the correction of inaccurate or misleading data. Under FERPA, education records are defined as records that are directly related to a student and are maintained by an educational agency or institution or by a party acting for the agency or institution. A school official with legitimate educational interests may review a student's education record in order to fulfill the official's professional responsibility without prior written consent.

Definitions

For purposes of this Policy, the following terms and definitions apply:

- School official: any person employed by Tulane in any administrative, supervisory, academic or research, or support staff position (including public safety and health services staff); any person or company with whom Tulane has contracted to provide a service to or on behalf of Tulane (such as an attorney, auditor, or collection agent); any person serving on Tulane's Board of Administrators; or any student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks
- Legitimate educational interest: the need to review an education record in order to fulfill an official's professional responsibility.

FERPA: Policy on Access to Student Records

The **Family Educational Rights and Privacy Act** of 1974, 20 U.S.C. §1232G, is a Federal law that protects the privacy of education records for eligible students. FERPA applies to all educational institutions that receive funds under the Department of Education.

The Family Educational Rights and Privacy Act (FERPA) affords you certain rights with respect to your education records.

Transfer Student/Credit Policies

Request for transfer are generally **not** entertained without significant extenuating circumstances. Students transferring into either the sophomore or junior class (there is no transfer permitted into the senior class) from other American and Canadian medical schools, which are accredited by the Liaison Committee on Medical education of the American Medical Associate/Association of American Medical Colleges, are generally given full and equal credit of all passing coursework completed for the first year or first two years of curriculum. In the very rare instances where a transfer student is considered, admission is at the prerogative of the Admissions Committee with approval by the Student Professionalism and Promotion Committee.

Absences and Leaves

Student Excused Absence Policy

Students are expected to attend all required pre-clinical sessions and to participate fully in clinical coursework. Part of becoming a professional is to think beyond self and to work for the betterment of the medical profession and patients. However, certain life events including sickness, family emergencies, marriages, etc. may necessitate missing class or patient care activities.

Students in all years should not expect to extend breaks or holidays with Excused Absence requests. For example, travel costs to or from a Thanksgiving destination are not considered legitimate reasons for excused absence requests, and these requests are routinely denied.

The School of Medicine has the following rules concerning absences:

Preclinical (T1 and T2 years):

1. Students are expected to fill out an Excused Absence Request Form to request absences. The form is on TMedWeb on the Institutional Forms page within the Student Guide tab. Excused absences are coordinated through the Office of Admissions and Student Affairs.

2. An excused absence does not obviate the need to make up work missed. Make-up processes are determined by course directors.

3. Students are also expected to notify their laboratory instructors and course directors of excused absences.

4. Any absence not excused will be considered unexcused.

5. Students should submit Excused Absence Request Forms in a timely fashion. Generally this is at least 30 days before a predicted life event, and within 24 hours following an illness or emergency.

6. In general, excused absences should be limited to a maximum of 2 per month.

Clinical (T3 and T4 years):
During clinical years, students have responsibilities to their patients and team. Reliable attendance is one significant component of professionalism. Therefore, attendance expectations are high.

Students are required to attend the following activities:

Students are required to attend the following activities,

- T3 orientation
- Mandatory Clerkship/rotation orientation days
- NBME Subject Examinations (shelf exams)
- Clinical skills exams

In addition, students may have clinical care responsibilities on the following holidays:

- MLK Jr.
- The Saturday and Sunday before and Wednesday after Mardi Gras
- Good Friday
- Memorial Day
- Independence Day
- Labor Day
- The Wednesday before and Monday after Thanksgiving break

Students should not expect to extend holidays or breaks with excused absences. These requests are routinely denied.

Interview season (October through January) and ***USMLE Step 2 CK examination dates*** may provide additional attendance challenges for students.

In addition to the special circumstances above for interview season (October through January) and USMLE Step 2 CS and USMLE Step 2 CK examination dates, the following attendance guidelines apply:

Interview season/USMLE exam date clarifications to be approved by Curriculum Committee 8/2/2017

Leave of Absence
Students on LOA are not eligible for federal financial aid.

Students taking a leave of absence for other than medical or emergency reasons should notify the Office of Admissions and Student Affairs by May for those entering the third year, by June for those entering the second year.

Leaves of absence will generally be granted for one year. Students may request one additional year of leave. Requests are to be made directly to the senior associate dean for Admissions and Student Affairs. Leaves of absence will not be granted for additional time after two years have been granted. Students failing to report following a leave of absence will be dismissed. All reasonable attempts will be made to notify students that an approved leave of absence is nearing expiration.

Students may be placed on leave of absence to complete requirements, including remediation and USMLE requirements. Students are allowed 24 months total LOA to complete all USMLE requirements. Failure to successfully complete USMLE Step 1 and Step 2 CK in the prescribed time will result in dismissal. For more information, see handbook section specifically devoted to USMLE requirements.

Financial Matters
Marissa Lespinasse is our contact person for most Financial Aid matters. Her office is on the 15th floor of the Murphy Building. Additionally, Michael Goodman, Associate VP of University Financial Aid, and his staff can handle medical school financial aid matters. The Tulane University School of Medicine Financial Aid Office is located in the Tidewater Building, 1440 Canal Street, Suite 1213. You may phone Financial Aid at 504.988.6135

Tuition Refunds for Withdrawals
GENERAL POLICY STATEMENT
This policy addresses tuition and fee refunds for students in the MD program who are withdrawing from School of Medicine (SOM) MD courses or rotations. Students in combined degree programs should consult with their combined degree program for other schools' tuition/fee refund policies. In addition, students who are considering a leave of absence must adhere to SOM's policies for leaves of absence (and, for medical leaves of absence, Tulane University's policies for beginning and returning from medical leaves of absence. The Associate Dean of Admissions and Student Affairs can provide students with direction for beginning or returning from a medical leave of absence).

Accounts Receivable Billing Cycles
Tulane SOM tuition is billed according to semester, rather than according to academic phases or modules. In general, the T1/T2 fall semester begins in early August. The T3 fall semester begins in early May. The T4 fall semester begins in early July. The spring semester for all cohorts begins in early January. Use these dates to interpret withdrawal deadlines below.

Tuition refund dates apply only to the semester in progress: a student who withdraws from medical school may be eligible for a full or partial tuition refund for the current semester but is not eligible for a refund for any previous semester.

Tuition Refunds for Withdrawals
Tuition refund deadlines differ by pre-clinical (T1 and T2) and clinical (T3 and T4) curriculum. In general, students are responsible for all fees after the 100% refund deadline for both the pre-clinical and clinical curriculum. Students should see SOM's detailed Tuition Refunds policy (https://medicine.tulane.edu/lcme-accreditation-policies/). No refunds are issued after the 25% refund date.

Off-Cycle and Leave of Absence Billing

T1 and T2 students who are making satisfactory academic progress and who take a leave of absence that does not require them to withdraw from a course that is in progress, or whose academic progress is otherwise "off cycle," will have their tuition charges reviewed on a case-by-case basis during the affected semesters. Students are responsible for all fees during all semesters of enrollment.

In general, tuition in the clinical years (T3 and T4) for students making *satisfactory academic progress* is capped at four semesters (2 semesters in the T3 year and 2 semesters in the T4 year).

T3 and T4 students who begin or end a leave of absence in the middle of a semester will have their tuition charges reviewed on a case-by-case basis during the affected semesters. Students are responsible for all fees during all semesters of enrollment.

Tuition for students who take leaves of absence in the T3 or T4 year is front-loaded: that is, students may be charged a full semester of tuition if their leave begins in the middle of the semester. However, students may not be charged tuition in their final semester if they have already paid four semesters during their clinical years.

Fees are not capped or credited: students will be able to benefit from the resources that fees pay for, even if students have reached their tuition "cap."

Billing for Repeated Coursework

Tuition for *students who need to repeat courses or rotations* because of failure or withdrawals will be assessed tuition on a pro-rated basis for the requirements they must repeat. Students repeating courses or rotations will be assessed full fees during each semester of enrollment.

Other Refunds

Academic and activity fees: There are no refunds for recreation center fees, campus health fees, activity fees, or academic services fees after the 100% refund deadline has passed.

Health Insurance fees: There are no refunds on health insurance purchased through the university, but the policy is portable for the period covered. Students should contact the Tulane Student Health Insurance administrators for more details.

Parking fees: On-campus parking is typically paid on a monthly basis. No refunds are offered for partial month usage. Students should contact the Tulane Parking Office for details about their parking contract.

Deming Housing: Deming housing is billed on a semester basis. Students should refer to the Deming contract and contact Deming Pavilion administrators for more details.

Student Conduct and Behavioral Expectations

Code of Student Conduct (University Policy)

Tulane University maintains a code of conduct applicable to all students. Please click here (https://conduct.tulane.edu/resources/code-student-conduct/) and follow the download link for the full Code of Student Conduct document, which is updated annually.

Unified Code of Graduate Student Academic Conduct

Tulane University maintains a unified code of conduct that was passed by Graduate Council and GAPSA and covers all graduate and professional students, including MD students. The Unified Code of Graduate Student Academic Conduct does not replace professional or ethical codes specific to MD students regarding their training as medical professionals. The unified code may be found here (https://ogps.tulane.edu/sites/default/files/Unified%20Code%20of%20Graduate%20Student%20Academic%20Conduct%20-%202024%20Final_0.pdf).

Medical Student Code of Professional Conduct (SOM)

The Tulane University School of Medicine community believes that a profession gains its credibility by its commitment to society. As a professional group, we recognize our multiple responsibilities to our patients, colleagues, communities, families, and ourselves. Realizing that it is a privilege and an honor to be a medical professional, we hold the following ideals:

The School of Medicine, the Honor Board, and the Student Professionalism and Promotion Committee strive to instill and uphold the values and ideas set forth in this policy.

Definition: Unprofessional behavior is defined as behavior that violates these ideals. These behaviors include, but are not limited to: acting improperly towards patients, supervisors and/or peers; disrespect for faculty, patients, supervisors and/or peers; dishonest, unethical and/or illegal behavior; failure to meet clinical responsibilities; and failure to correct deficiencies in academic performance in a responsible and timely fashion.

Disciplinary Action and Due Process Policy: Unprofessional behavior will not be tolerated. This procedure outlines how unprofessional behavior will be addressed in the School of Medicine.

Initially, perceived breaches of this code should be discussed privately among the parties. If private resolution is not possible, the following steps will occur:

The senior associate dean for Student Affairs may make exceptions to this procedure based on the severity of the unprofessional activity. That is, the senior associate dean has the option to refer matters directly to the Committee on Student Professionalism and Promotion in lieu of proceeding through the above process.

Approved by Student Professionalism and Promotion Committee (formerly "Committee on Student Affairs") (March 2004)

Approved by Executive Faculty (5/5/04)

Work hours

Students are expected to follow work-hour restrictions established by the Accreditation Council for Graduate Medical Education for interns. Generally, students are required to work no more than 80 hours per week. They are also required to have at least one day off in seven days. Work hours are monitored by the departments and reviewed by the curriculum committee on an annual basis.

Dress Code

Any student not conforming to the guidelines will not be allowed to enter the patient's/SP's exam room. Students whose religious or cultural customs may conflict with certain aspects of this dress code should speak with the Office of Admissions and Student Affairs. Patients expect that their doctors will be dressed professionally, so now is the time to adapt to this reasonable expectation. Professional attire

inspires confidence among patients and helps to reinforce the doctor-patient bond.

Approved by Student Professionalism and Promotion Committee (formerly "Student Affairs Committee") (2/7/12)

Email

Students receive important information through email listservs; therefore, **students should check email at least once each day**. If you learn that classmates are receiving listserv email but you are not, please contact the Office of Admissions and Student Affairs and give your email address and your graduation year (*i.e.*, Class of 2020, graduating in 2020). You can contact the office by phone (504.988.5331).

Policy on Social Media and Out-of-work Conduct

Tulane SOM's most current policy on social media may be found with other current LCME policies: https://medicine.tulane.edu/lcme/policies

Honor Code

Constitution

ARTICLE V: THE HONOR SYSTEM

Section 1.

There shall be an Honor Board composed of the President and Vice President of the Medical Student Body, the president of each class, four (4) representatives of the Sophomore, Junior, and Senior classes, and two (2) representatives of the Freshman class. Said representatives are to be elected at a general election conducted by each of the respective classes. The Board shall meet as often as necessary, the meeting to be presided over by the Chief Administrator who is elected by the members of the Honor Board.

Section 2.

General Violations

I. It shall be a violation of this Honor Code for a student to cheat.

II. It shall be a violation of this Honor Code for a student to knowingly circumvent any course requirement.

III. It shall be a violation of this Honor Code for a student to steal.

IV. It shall be a violation of this Honor Code for a student to purposely impair another student's educational opportunity.

V. It shall be a violation to act in a manner which is detrimental to the moral and ethical standards of the medical profession.

VI. It shall be a violation for a student to knowingly deceive another student, faculty member, or professional associate with the intent to gain advantage, academic or otherwise, for said student or for any other student.

VII. It shall be a violation for any student to fail to report any infraction of the Honor System to an appropriate representative.

The following actions may be found to constitute violations of the Honor Code.

Section 3.

The Honor Board shall act as a jury to render a decision as to the innocence or guilt of the accused, and in the event of the latter shall make recommendations for a penalty to be acted on by the Dean of the School of Medicine. The Honor Board shall have sole and final authority to judge the innocence or guilt of the accused.

The Honor Board also recognizes Tulane University's "Code of Student Conduct" and may defer authority as set forth in Article IV of the by-laws, section 3.

Sanctions:

A. General: An individual found to have violated this Honor Code shall be subject to such sanctions as may be recommended by the hearing panel and acted on by the Medical School Dean, or the Dean's designee, pursuant to rules laid out in the Bylaws of the Medical Student Body.

B. Mandatory Sanctions: In the event of a finding of any honor code violation, a letter shall be prepared by the Chief Administrator as to the findings of the hearing panel and that letter shall be permanently placed in the student's Medical School file.

C. Course Related Violations: In the event of a finding of an honor code violation regarding any course requirement, the hearing panel shall make any sanctions which the hearing panel deems just and fair which includes, but is not limited to, an entry of a failing, conditional, or passing grade. Consideration may be given to the opinions of the course director and investigators' meetings set forth in Article IV, section 2-h in the determination of appropriate sanctions.

D. Other Sanctions: In addition to the mandatory sanctions set forth in section b and course sanctions set forth in section c, recommended sanctions for any honor code violation may include one or more of the following:

I. Permanent expulsion from the Medical School.

II. Suspension from the Medical School for a specified time.

III. Any other sanction or sanctions which the hearing panel deems just and fair under the circumstances.

Section 4.

The Honor Board shall be responsible for educating the student body on all issues concerning this honor code.

ARTICLE VI: BYLAWS AND AMENDMENTS

Section 1.

Adoption, amendment, or repeal of bylaws may be brought about through a 2/3 vote of the Executive Committee.

Section 2.

Amendment of this Constitution can only be accomplished by the majority vote at a general election held for that purpose.

Section 3.

Amendments must be published two (2) weeks in advance of voting and notices must be posted throughout the School of Medicine.

Section 4.

Bylaws may be suspended by a 2/3 vote of the Executive Committee.

ARTICLE VII: MISCELLANEOUS
Section 1.

All matters of interpretation of this constitution shall be decided by the members of the Honor Board.

Section 2.

Taxes, dues, and fees or revenues may be levied upon the Student Body only by consent of a majority of said body.

Effective: March 1935

Revised: February 1976, March 1977, May 1984, May 1987, May 1988, April 1991, April 1999, July 2014,

ARTICLE IV: PRELIMINARY PROCEDURES OF THE HONOR BOARD
Section 1.

Complaint

a. Only Tulane University medical students, faculty, and staff members may file a complaint.

b. Any person witnessing a questionable violation of the Honor Code should attempt to clarify the matter with the involved party. If after clarification you still suspect an Honor Code violation, then all suspected violations shall be reported directly to the Honor Board.

c. All complaints are to be placed in a sealed envelope marked "Honor Board Complaint" and given to any Honor Board representative or class president.

d. The complaint shall be in writing and shall contain at least the following information:

I. The name of the accused, if known, or a description of the accused, if the name of the accused is not known.

II. The alleged violation.

III. A statement of the alleged facts on which the alleged violation is based, including time, place, and date, if known.

IV. A list of witnesses, if any, and a short description of other evidence, if any, tending to support the allegation.

V. The signature, local address, and telephone number of the complainant.

e. All complaints shall be considered and all complainants must testify at an Honor Board hearing which may be held pursuant to the complaint.

f. No complaint shall be considered if it is filed more than thirty days after the initial discovery of the alleged violation unless there is reasonable justification for such a delay. Days during medical school holidays, vacations, and out-of-town externships and rotations shall not be counted.

Section 2.

Investigation

a. When an Honor Board representative receives a complaint, he or she shall deliver the complaint, unopened, to the Chief Administrator.

b. The Chief Administrator shall appoint two Honor Board representatives to investigate the complaint. When possible, the investigators shall not be in the same graduation class of the involved parties.

c. Either the Chief Administrator or one of the designated investigators must inform the accused of the investigation within five working days of the decision to begin an investigation.

d. The entire investigation of the alleged violation shall be conducted by the two investigators. The investigators shall use reasonable discretion in carrying out a full investigation.

e. The investigators may interview the accused, complainant, witnesses, and any other person relevant to the investigation.

f. Both investigators shall record in writing all interviews held pursuant to the alleged Honor Code violation.

g. Every reasonable attempt shall be made to limit dissemination of information as to the alleged violations by all parties involved, including witnesses, complainants, and the accused.

h. In the case of a course violation, investigators may meet with the faculty member or chairperson of the course to determine their opinion on what sanctions they would deem appropriate should there be a trial and should the accused be found guilty. Such conversations shall not include the name of the accused.

i. If the Chief Administrator is aware of prior investigations or hearings against the accused, then the Chief Administrator may disclose this information to the investigators who in turn may include a brief summary in their investigative report.

Section 3.

Hearing Determination

a. After completion of the investigation, the two investigators shall meet with the Chief Administrator and elect whether to refer the alleged violation(s) to an Honor Board hearing, dismiss the case, or refer the case to the Code of Student Conduct. Those violations which may be deferred to the Code of Student Conduct include, but are not limited to, areas outside of academic activities and may include actions punishable by civil or criminal authorities. (see publication of the Office of the Vice President for Student Affairs, "Code of Student Conduct")

b. The Chief Administrator and the two investigators shall elect to refer the alleged violation(s) to an Honor Board hearing if they believe that there is sufficient evidence such that "it is more likely than not" that the accused has violated this Honor Code.

c. A majority vote of the two investigators and the Chief Administrator shall be necessary to refer the alleged violation(s) to an Honor Board hearing. This vote shall be made by secret ballot.

Section 4.

Notification of the Accused of the Hearing

If it is decided to proceed with a hearing, the Chief Administrator shall so notify the accused in writing at least five working days prior to the hearing date. This notice:

a. Shall state the name of the accused.

b. Shall state the nature of the charges against the accused.

c. Shall state the date, time, and location of the hearing on the alleged violation(s).

d. Shall inform the accused of the right to request appearances of witnesses (including character witnesses) on his or her behalf.

e. Shall inform the accused that the accused may bring an advisor of his/her choice selected from the students of Tulane Medical School to the hearing. Such an advisor at the hearing in no case shall be legal counsel. The advisor may not participate in the proceeding except to advise the accused.

Section 5.

Recusal

a. Any Honor Board representative, whether elected or ad hoc, shall recuse himself or herself from investigating an alleged violation and/or sitting on a hearing panel when the representative feels any personal prejudice(s) may interfere with his or her objectivity. Such recusal shall be requested at the earliest possible point and shall be granted by the Chief Administrator.

b. Any Honor Board representative, hearing panel member, and/or the accused may request that the hearing panel recuse any of its members before proceeding with a hearing. The accused will be supplied with a list of possible hearing panel members prior to the hearing. Such request, setting forth the reason for recusal, shall be made prior to the commencement of the hearing and a majority vote of the other hearing panel members, including the Chief Administrator, shall suffice to recuse a member.

c. In the event of any removal, recusal, or other inability of an Honor Board representative to perform his or her duties with the Honor Board, the Chief Administrator shall select an Honor Board representative as a replacement for the recused.

d. In the event of any removal or recusal of an Honor Board representative from a hearing panel, that Honor Board representative shall not be allowed to attend further hearings on that case unless called as a witness for either accused or complainant.

e. Where the recused representative is the Chief Administrator, his or her duties shall immediately pass to the delegated Assistant Administrator for the duration of that case.

ARTICLE V: HEARING

Section 1.

Timing

The hearing addressing the alleged Honor Code violation(s) shall take place within a reasonable time of the decision to proceed with a hearing, taking into account the time of year, the availability of Honor Board representatives, and the needs of the accused. In the event the accused refuses to appear before the hearing panel, the trial will proceed in their absence.

Section 2.

Hearing Panel

For each hearing based on an alleged Honor Code violation, there shall be one hearing panel which shall determine whether the accused has violated this Honor Code and, if so, what sanction(s) shall be recommended. In the event the accused has admitted guilt prior to the hearing panel, the hearing panel will still proceed in the same manner in order for panel members to hear full disclosure of information prior to deciding upon sanctions. The panel shall consist of a minimum of six members representing each class (T1-T4) of the medical school. The chief administrator is not to be counted in this number.

a. The Chief Administrator shall preside over the hearing, but shall not vote as to whether a violation has occurred or as to recommend sanction(s).

b. No Honor Board member shall sit on a hearing panel when he or she has investigated the alleged violation.

c. Should there be an insufficient number of Honor Board representatives to sit on a hearing panel due to recusal, illness, or any other reason, the Vice-President, Secretary, or Treasurer, in that order, shall be appointed by the Chief Administrator, as a temporary replacement from the same class as the absent representative.

Section 3.

Hearing Procedure

a. General.

I. The Chief Administrator shall preside over the hearing and shall be present during the deliberations.

II. No person shall be present in the hearing room unless he or she has been called by the hearing panel.

III. The accused may address the hearing panel and may question witnesses.

IV. The advisor of the accused shall not address the hearing panel and shall not question witnesses.

V. The accused and the accused's representative or advisor shall be given the opportunity to be present at the hearing except during the deliberations of the hearing panel.

VI. Hearing panel members may recall investigators, complainants, the accused, and/or witnesses, but the accused must always be present when testimony is given.

VII. The Chief Administrator may prohibit any question if the question compromises the rights of the accused and/or does not significantly contribute to determining whether the accused has violated this Honor Code.

VIII. The hearing shall be recorded by audio means. These recordings shall be used for the sole purpose of recalling information during the hearing procedure by the hearing

panel. All recordings shall be destroyed after deliberations have been made.

b. Testimony.

The order of those testifying before the hearing panel shall be the following:

I. The Investigators

a. Each investigator shall report his or her findings to the hearing panel.

b. Each investigator shall surrender any tangible evidence to the hearing panel.

c. After each investigator has testified, the hearing panel shall question the investigator. The accused may then question the investigator. The hearing panel may then question the investigator again.

II. The Complainant.

a. The complainant shall make a statement to the hearing panel.

b. The hearing panel shall then question the complainant.

c. The accused may question the complainant.

d. The hearing panel may question the complainant again.

III. The Accused.

a. The accused may make a statement to the hearing panel.

b. The hearing panel shall question the accused.

c. The complainant may question the accused.

d. The hearing panel may question the complainant again.

IV. The Witnesses.

The ordering of the witnesses shall be at the discretion of the Chief Administrator.

a. The witness shall make a brief statement to the hearing panel relevant to the facts of the event in question.

b. The hearing panel may question the witness.

c. The complainant may question the witness.

d. The accused may question the witness.

e. The hearing panel may question the witness again.

V. Closing Statement

The complainant and then the accused may make a brief closing statement to the hearing panel.

Section 4.

Deliberation

a. The hearing panel shall, after reasonable discussion in closed session, vote as to whether the accused has violated this Honor Code.

I. The hearing panel shall find that the accused has violated this Honor Code if they believe that there is “clear and convincing evidence” that the accused has violated this Honor Code.

II. A vote of violation by at least two-thirds of the hearing panel members shall be required to find that the accused has violated this Honor Code. The decision as to whether the accused has violated this Honor Code shall be made by secret ballot.

b. If the hearing panel finds that the accused has violated this Honor Code, then the accused may make a statement to the hearing panel relating to which sanction(s) the hearing panel should recommend to the Dean.

c. The hearing panel shall then, in closed session, after reasonable discussion, vote as to sanctions pursuant to Article V, sections 3 c and d of the Constitution. The hearing panel shall not vote as to sanctions pursuant to Article V, section b of the Constitution.

d. A vote of at least two-thirds of the hearing panel members shall be required to recommend other sanctions.

e. Deliberations of the hearing panel shall not be recorded.

f. With the exception of the recommendation of the accused, pursuant to section 4(b), no outside person may communicate with any hearing panel member regarding the hearing or deliberations during any part of deliberations, including, but not limited to recesses and/or the period of time between voting as to whether the accused has violated this Honor Code and voting as to sanctions.

Section 5.

Submission of findings to the Dean

a. If there is a finding that the accused has violated this Honor Code, the Chief Administrator shall appoint a hearing panel member to prepare a written statement of the findings and recommended sanctions. This statement, along with the recordings of the proceedings and all physical evidence, shall be submitted to the Medical School Dean, or the Dean’s designee, within one day after the hearing’s conclusion. The accused shall also be provided with a copy of the panel’s statement within one day after the hearing’s conclusion.

b. The Dean, or the Dean’s designee, shall defer to the findings of the hearing panel and shall act on the recommended sanction(s) within a reasonable period, unless the accused has filed an appeal.

Section 6.

Appeal

a. The accused may appeal the finding that the accused has violated this Honor Code and/or the recommended sanction(s)

to the Medical School Dean or the Dean's designee, within seven days after the hearing's conclusion. The Dean or the Dean's designee shall determine the method of hearing an appeal. On any appeal to the Dean, the Dean must meet with both the accused and the Chief Administrator or a member of the Honor Board designated by the Chief Administrator.

b. The Dean, or the Dean's designee, shall give great weight to the findings and recommendations of the hearing panel and shall not reverse a finding that the accused had violated this Honor Code absent the Dean's, or the Dean's designee, belief that such a finding was the result of bias or lack of due process. The Dean, or the Dean's designee, may only reduce the recommended sanction(s). Sanctions may be reduced in the best interest of justice or upon a finding that they were arbitrarily or capriciously imposed.

c. The Dean, or the Dean's designee, shall notify, in writing, the Chief Administrator of this determination within seven days of hearing an appeal. The Chief Administrator will then be given the opportunity to respond to the Dean's decision. Once the Dean has heard the response of the Chief Administrator, the Dean, or the Dean's designee will notify, in writing, the accused and the Chief Administrator of this determination.

d. If the Dean, or the Dean's designee, does alter any recommended sanction(s), the Honor Board may appeal, if it so chooses, to the Chancellor of the Medical Center.

e. When the accused is a graduating fourth-year student, the timetable for appeal shall be expedited.

ARTICLE VI: REVIEW OF FACULTY OR ADMINISTRATOR ACTION

Section 1.

Standard

If a faculty member reduces a student's grade or an administrator assesses any penalty against a student for any alleged conduct, which if true, would have violated this Honor Code, the student shall have the right to request that the Honor Board determine whether the alleged conduct occurred and whether it violated this Honor Code. A student is not entitled to this review if the grade was based on conduct or performance which, if true, would not have violated this Honor Code.

Section 2.

Review by the Honor Board

a. Investigation.

An investigation will proceed in the same manner set forth in Article IV, Section 2 of the By- laws to the Constitution.

b. Hearing.

I. An Honor Board hearing shall, pursuant to Article V, sections 3 & 4, determine whether the alleged conduct occurred and, if the alleged conduct did occur, whether the conduct violated this Honor Code.

II. If the hearing panel finds that the conduct violated this Honor Code, the hearing panel shall, pursuant to Article V, section 4, recommend the appropriate sanction(s) (which may be greater than the reduced grade by the faculty member or the penalty assessed by the Administrator) to the Dean or the Dean's designee.

Section 3.

Review by the Dean

a. If the hearing panel finds that the alleged conduct by the student occurred, and that the conduct violated this Honor Code, this determination and the recommended sanction shall be subject to the student's right of appeal to the Dean, or the Dean's Designee, as set forth in Article V, section 6.

b. If the hearing panel finds that the alleged conduct did not occur or, if it did occur, that it did not violate this Honor Code, the Honor Board shall so inform the faculty member or administrator involved. The faculty member or administrator shall have five days to increase the grade or reduce the penalty. If the faculty member or administrator refuses to increase the grade or refuses to reduce the penalty, or if the increase or reduction is not satisfactory to the student, the Dean, or the Dean's designee, shall decide the appropriate grade to be given or penalty to be assessed.

c. All issues of grade changes not related to an Honor Board violation shall be referred to the Student Professionalism and Promotion Committee.

ARTICLE VII: HONOR BOARD FILE

The Chief Administrator shall maintain a file which shall include a record of all complaints, findings, recommendations, appeals, and final determinations. This file shall be in the Student Executive Committee office and shall not include names of the accused, the complainant, or other witnesses. All members of the Medical School shall be permitted to review files with the Chief Administrator provided they have a legitimate reason to do so.

ARTICLE VIII: SELECTION OF HONOR BOARD REPRESENTATIVES

Section 1.

Composition

The Honor Board shall be composed of twenty (20) members. These members shall include the President and the Vice-President of the Medical Student Body, the President of each class, four (4) representatives of the Second, Third, and Fourth year classes, and two (2) representatives of the First year class.

Section 2.

Chief Administrator

The Chief Administrator shall be an Honor Board representative with at least one (1) year's experience on the Honor Board. He or she shall be elected by the Honor Board members within a reasonably short period after the second, third, and fourth year representatives take office.

Section 3.

Assistant Administrator

Upon election, the Chief Administrator shall designate another member of the Honor Board with at least one (1) year's experience to preside over Honor Board activities during any period(s) that the Chief Administrator should be unable to perform his/her duties. If the Assistant Administrator is subsequently unable to perform his/her duties, then the Chief Administrator shall appoint a new Assistant Administrator to act in his/her place.

Section 4.

Duration of term

a. The term of the first year representatives shall begin immediately upon posting of the Fall semester election results and shall end immediately upon the posting of the Spring semester election results of the following year.

b. The term of the second year representative shall begin immediately upon the posting of the Spring election results and shall end immediately upon posting of the third year election results. It is a one-year term.

c. The term of the third year representative shall begin immediately upon posting of the Spring semester election results and shall end upon graduation. It is a two-year term.

d. In the event that a representative does not continue with the class that he/she represents, for any reason, his/her term will be ended and a replacement shall be elected from the class by simple majority of those voting.

ARTICLE IX: FACULTY-HONOR BOARD LIAISON

The Faculty-Honor Board liaison shall be a member of the Executive Faculty appointed by the dean. His/her function shall be to facilitate communication and education between the Honor Board and the faculty.

ARTICLE X: REMOVAL OF HONOR BOARD REPRESENTATIVES

Section 1.

Removal Due to an Honor Code Violation

Any Honor Board representative found to have violated this Honor Code shall be immediately removed from his or her position with the Honor Board, upon written notice made by the Chief Administrator. Such removal shall be in addition to, and independent from, any sanction(s) recommended by the hearing panel.

Section 2.

Removal by the Student Body for Reasons Other than an Honor Code Violation

a. Any member of the student body may circulate a petition among members of his or her class to remove an Honor Board representative who represents his or her class. Such removal may be for any reason. The petition must include the signatures of one-fourth of the members of the respective class. Upon delivery of such a petition to the Chief Administrator, a vote shall be scheduled with the assistance of the S.E.C. (Article II, section 7). Such a vote shall be scheduled as soon as is reasonably possible.

b. A two-thirds vote of those students voting shall be required to remove the Honor Board representative.

c. Should the vote result in removal, the representative shall be informed, in writing, by the Chief Administrator. A replacement shall be elected within seven days, in accordance with applicable S.E.C. rules. Days during Medical School holidays and vacations shall not be counted.

Revised: May 1952, May 1970, March 1986, May 1990, April 1999, April 1965, May 1976, May 1987, April 1991, April 1966, March 1977, May 1988, November 1992, May 1969, May 1982, April 1989, June 1993

Alcohol and Other Drugs Policy (University Policy)

Tulane University is concerned about the abuse of alcohol, illegal drugs, and controlled substances on campuses and in the workplace. In addition to having an alcohol and drug policy (found here (https://campushealth.tulane.edu/policies/tulane-alcohol-policy/)), the medical center complies with the Drug Free School Act of 1989. That act mandates that university officials turn over to local police authorities for arrest and prosecution any person who illegally uses drugs.

Tulane University circulates its drug and alcohol policy annually to students and employees. A drug education and counseling program for medical center students is provided on a confidential basis through the Phoenix Society (http://tmedweb.tulane.edu/clubs/phoenix/).

Narcotics, Marijuana, and Other Controlled Substances

The use of certain drugs for "recreational" purposes is illegal and can have devastating consequences for you professionally. The Medical Practice Act of the State of Louisiana (Louisiana Revised Statutes 37:1261 through 37:1291) clearly states the following:

> "Conviction of a crime or entry of a plea of guilty or *nolo contender* to a criminal charge . . . habitual or recurring use of morphine, opium, cocaine, or other drugs having a similar effect . . . constitutes . . . causes for non-issuance, suspension, revocation, or the imposition of restrictions on any license . . . to practice medicine or surgery."

All other states of the Union have laws that are substantively the same as those in effect in Louisiana.

It should go without saying that it is totally unacceptable for medical students, physicians, nurses, and other medical personnel to attend to patient care or other professional duties while under the influence of alcohol or any of the drugs mentioned above.

Possession of Weapons

Carrying a rifle or handgun on Tulane University property is not allowed. Any student in possession of a rifle or handgun is subject to severe disciplinary action that may include expulsion.

It is expected that medical students will conduct themselves within the boundaries of the law and in accordance with the standards expected of members of the medical profession.

Degree Requirements

Degree Requirements

- General Graduate School Requirements

- Biomedical Sciences Graduate Program -Master of Science (MS)
  - One Year Programs
  - Two Year Programs
- Biomedical Sciences Graduate Program - Doctor of Philosophy
- Doctor of Medicine

General Graduate School Requirements

A full description of Master's (p. 89) and PhD Degree (p. 92) requirements for all students can be found in the Office of Graduate and Postdoctoral Studies section of this catalog. Students should review these policies thoroughly.

Biomedical Sciences Graduate Program - Master of Science (MS)

One Year Programs (Applications open October 1st)

The one-year M.S. programs are designed to enrich and improve academic credentials of graduates and strengthen their academic foundation for further intellectual development, including entrance into medical, dental, or other health profession-related programs. These programs are offered in the Departments of Anatomy (http://medicine.tulane.edu/departments/structural-cellular-biology/academic-programs/), Biochemistry & Molecular Biology (https://medicine.tulane.edu/biochemistry-molecular-biology/), Medical Genetics and Genomics (https://medicine.tulane.edu/centers-institutes/hayward-genetics-center/masters-medical-genetics-genomics/), Microbiology & Immunology (https://medicine.tulane.edu/microbiology-immunology/), Pathology (https://medicine.tulane.edu/pathology-laboratory-medicine/), Pharmacology (https://medicine.tulane.edu/pharmacology/) and Physiology (https://medicine.tulane.edu/physiology/).

Two Year Programs (Applications open October 1st)

Two-year, research-intensive M.S. programs are designed to enhance the academic credentials and scientific research experience of graduates and prepare them for careers in academic or industrial research.

The two-year thesis-required program In Biochemistry and Molecular Biology leads to a Master of Biomedical Science in Biochemistry and Molecular Biology degree. Our distinctive program emphasizes student development in five areas to broaden and strengthen their academic foundation, and equips students with basic and advanced lab skills for a career in academic or industrial research.

The MS Clinical Anatomy degree is a 2-year non-thesis program of study of cadaveric dissection-based gross anatomy, embryology, cell biology and histology, and neuroscience leading to a MS degree in Anatomy. It is designed specifically for candidates who wish to develop careers in teaching and research in the anatomical sciences.

The MS Anatomy Research program is a 2-year thesis program of study of gross anatomy, embryology, cell biology, and histology leading to a Master of Science degree in Anatomy by research. It is designed specifically for candidates who wish to develop research careers in biomedical science and medical education.

The Masters in Molecular and Cellular Pathobiology is a full-time two-year thesis-based post-baccalaureate program leading to a Master of Science in Molecular and Cellular Pathobiology. This program is designed to enrich the scientific research experience and improve the academic credentials of students interested in careers in the biotech and pharmaceutical industries, as well as in academia.

Biomedical Sciences Graduate Program - Doctor of Philosophy

Tulane's Ph.D. Program in Biomedical Sciences takes an interdisciplinary approach to graduate education and research. There are many ways to shape your Tulane experience to fit your needs and career goals, and our program has an array of options to accelerate, customize, and enrich your education and, ultimately, your career. The program is dynamic, giving you an array of controls that allows you to heavily customize your experience here to suit you.

All PhD students receive a full tuition waiver and a stipend of approximately $30,000 per year for the entire duration of the program, usually between four and seven years.

Students undertaking work for the degree of Doctor of Philosophy should understand that this degree is awarded not for an accumulation of course credits only, but for superior attainment and accomplishment in research. Ordinarily the student is expected to finish the course requirements, 48 hours of credits at a minimum, in two full years of graduate study and complete the dissertation by the fourth year. The student must demonstrate the ability to carry out independent study and research in a chosen field, as evidenced in the dissertation. A minimum of one year of full-time study in residence at Tulane University is required.

In the first two semesters, all students take the identical core curriculum, described below. In conjunction with the course work in the first year, students rotate in 6-week blocks through three of the Program's participating research laboratories of the student's choice. This allows students to become more familiar with BMS research and faculty. Students should choose a Dissertation Advisor by the end of the second semester but must choose a Dissertation Advisor by the end of the third semester. Students may choose to further specify their study by choosing an Area of Research Emphasis (a Departmental Track in Anatomy, Biochemistry, Medical Genetics and Genomics, Microbiology and Immunology, Pathology, Pharmacology or Physiology). An area of research emphasis may add further course requirements beyond those required for the Biomedical Sciences PhD degree without specialization.

Doctor of Medicine

The curriculum for the School of Medicine is designed to prepare future physicians with the knowledge, skills, and behaviors required for any specialty field they choose. The pre-clinical curriculum (years 1 and 2) is taught as a series of system-based modules that progress through two phases. In Phase I, the foundational courses of histology, physiology, biochemistry, and genetics, along with foundations in medicine are organized into system-based modules structured to provide normal structure and function, while still maintaining the identity of each course. Phase II begins in the

latter portion of Year 1 and provides the foundational knowledge and skills necessary for understanding pathophysiology and disease states, also in system-based modules containing microbiology, immunology, pathology, pharmacology, behavioral and neurosciences, and clinical medicine.

Students begin learning clinical skills early in Year 1. Specialty-based clinical training begins in May of Year 2 and continues throughout most of Year 3. The final phase of the curriculum is designed to help students choose and prepare for their residency choice while enhancing skills in emergency medicine, radiology and cultural competence. The curriculum provides enough flexibility for early and numerous opportunities in community service and service-learning, dedicated time for students interested in dual degrees (MPH, MBA), or mentored research.

TulaneGME@tulane.edu

Mailing Address

1430 Tulane Ave, #8025
New Orleans, LA 70112

https://medicine.tulane.edu/education/gme (https://medicine.tulane.edu/education/gme/)

We are extremely proud of the training opportunities offered by this health sciences center. Collectively, we have thirty-nine residency and fellowship programs. The goal of the GME office, in conjunction with our eighteen affiliated training institutions, is to provide an excellent basis for postgraduate education by offering comprehensive clinical and research programs, didactics and supervision in the care of our patients. While in residency and fellowship training at Tulane, skills are developed which equip our graduates for a lifetime of learning, professional advancement, and quality patient outcomes.

Our physicians-in-training are encouraged to develop their knowledge, skills and judgment to the maximum potential while at the same time meeting and exceeding the goals and objectives of their respective programs. Tulane residents and fellows are exposed to a rich academic environment which is designed to foster careers as contemporary clinical investigators, teachers, and practitioners of the medical arts and sciences.

Mission

The Office of Graduate Medical Education is responsible for ensuring that all residents and fellows at Tulane University School of Medicine are provided an accredited educational experience of the highest quality.

An Aging Population

The demographic reality today and in the foreseeable future is a graying population, both in terms of an increase in life expectancy and in the number of people over the age of 65. The retirement of the baby boomers, 77 million strong, will place a strain on Social Security and Medicare in the next decades. Only a compression of morbidity, coupled to changes in health systems management and healthcare delivery, can relieve this pressure. This will require significant research effort, in biological sciences, clinical medicine, behavioral and social sciences, as well as demography, economics, and policy planning. The research will engage basic, clinical, and translational scientists in multidisciplinary teams. The issues surrounding the expansion of the elder population transcend medicine and public health. The design and implementation of elder-friendly communities is emerging rapidly with abundant economic impact on this state and country. Furthermore, the increase in elder health that is an essential social and economic imperative will require planning for second and even third careers. The concept of 'active retirement' is taking on new meaning under current economic conditions. This in turn engages universities in forms of continuing education that have yet to be thoroughly explored, and it also has important implications for the model of the workplace.

Mission

The Tulane Center for Aging is dedicated to the enhancement of the quality of life of an aging population through research, education, and innovative approaches to healthcare and community planning and design.

Vision

The Tulane Center for Aging will foster and support the development of research programs across a broad spectrum of disciplines that will provide solutions to the problems associated with aging at the level of the individual, the community, and the population. Special emphasis will be placed on multidisciplinary efforts that harness the extensive resources available at the Uptown and Downtown Campuses and at the Tulane National Primate Research Center. In the process, these efforts will strengthen individual programs, departments, and

disciplines throughout Tulane University. They will also contribute to the development of new initiatives. Virtually any area of endeavor at the University becomes a focus for the Center when the dimension of aging is applied. The Tulane Center for Aging will from the outset play a leading role in the strengthening of geriatrics and gerontology training at the University. This will be achieved by coordinating research, training/education, and service efforts. Our long term goal is to create a policy planning think tank that will serve the state and the region.

Program

- Aging Studies, PhD (p. 370)

Combined Degrees

Combined Degrees

- MD/MBA
- MD/MPH
- MD/MS in Bioethics
- MD/PhD

MD/MBA

Future leaders in medicine must excel as clinicians as well as managers in the complex and rapidly evolving environment that now dominates health care. A growing number of medical students are complementing their medical education with MBA degrees. MD/MBA holders can operate their clinics more effectively, run a healthcare organization, manage a research project, or advocate for their patients and work to fix the healthcare system.

The School of Medicine is partnering with the internationally recognized A. B. Freeman School of Business to offer medical students two options for completing a joint MD/MBA program. These opportunities allow students to complete both degrees more rapidly than when done separately.

MBA Overview

In the MBA program, students take 54 credit hours at the Freeman School. Classes teach business fundamentals including leadership, management, operations, accounting, statistics, and analytics. In modules on the Practice of Management, students get hands-on business experience. Elective courses further their education in areas of finance, strategic management and leadership, marketing, analytics, and entrepreneurship. Students develop the ability to analyze opportunities for and likelihood of success of organizations operating in various environments.

MD/MPH

Tulane's MD/MPH combined degree program is open to students who have been accepted to Tulane's School of Medicine and who wish to pursue both an MD from Tulane and an MPH from Tulane's School of Public Health and Tropical Medicine (SPHTM).

The MD/MPH program is a global, integrated program in an excellent learning environment which:

- Integrates healthcare training for individuals and populations;
- Provides the foundation for a holistic approach to patient care;
- Encompasses diverse and challenged populations domestically and internationally;
- Provides in-depth training in population and public health knowledge, behaviors, and skills; and,
- Allows students to match their specific population interest with a degree concentration in the School of Public Health and Tropical Medicine.

Program Information

Tulane's MD/MPH combined degree program offers Tulane School of Medicine students a unique opportunity to build on their patient-based medical education with a population-based public health degree. The combined degree program is designed to be completed in four or five years, integrating the requirements for the School of Medicine with those from the School of Public Health and Tropical Medicine. Browse the links below to learn more general information about the program.

MD/MS in Bioethics

Recognizing local needs and national trends, an interdisciplinary faculty from the Program in Medical Ethics and Human Values in Tulane University's School of Medicine has created a new major degree within a currently existing program. The Master of Science in Bioethics and Medical Humanities will be a special track within the Biomedical Sciences (BMS) Graduate Program at Tulane School of Medicine. It will include an option for a dual degree (MD/MS) similar to the other combined degrees shown on this page.

This is a two-year, 33 credit hour post-baccalaureate program leading to a Master of Science in Bioethics and Medical Humanities. This program is designed to improve the credentials of learners who are:

1. Dual-degree students in Medicine;
2. Interested in applying for admission to medical, dental, and other health-related professional schools;
3. Mid-Career Professionals who wish to enhance their scholarly and clinical background in these areas for future service or scholarship.

MD/PhD

Tulane brings together some of the nation's most talented young people with nationally- and internationally-recognized teachers and researchers: all in the context of a vibrant city replete with opportunities both in and out of the lab and classroom. Whatever studies you pursue, your learning will intersect with the city's unique mix of influences- ethnic, musical, architectural, geographical, commercial, political, environmental, and social. Beyond the classroom and lab, Tulane also provides you with multiple opportunities for career development and possible career exploration, both in and outside of academia. As a Tulane graduate student, you will find unmatched opportunities: opportunities to pursue ideas and work that matters to others, and opportunities to grow and mature.

There are two tracks to receiving a combined MD/PHD degree, also known as the Physician Scientist Program (PSP). Both tracks start with Medical School for 2 years, followed by 3-4 years in the BMS Phd program before returning to Medical School for the last 2 years.

PSP-A students apply through the Medical School AMCAS application process for both degrees. Applicants cannot apply to the PSP-A program and Medical School. They must choose one.

- 2 students are accepted each year. Must have exceptional academic credentials and prior research experience.
- Accepted students receive a fellowship covering both medical and graduate school tuition costs.
- A stipend is paid for the duration of study in both the Graduate School and Medical School.
- Accepted students must begin research lab rotations the summer prior to entry into medical school.
- Accepted students must complete both the PhD and MD degree.

Track B or PSP-B students must have applied for and been accepted into Tulane Medical School. PSP-B track students apply for the PhD program through the Biomedical Sciences application system any time after beginning medical school studies but no later than the beginning of their third year of medical school.

- A stipend is paid for the duration of the program after acceptance.
- PSP-B students receive tuition remittance only for the PhD portion of their studies, not Medical School.

Anatomic Pathology, MS

Pathologists' Assistant Program

The Pathologists' Assistant Program at Tulane University School of Medicine is a two-year, full-time professional allied health program that currently accepts 10 students per year. Upon successful completion of the required curriculum, students will graduate with a Master of Science degree in Anatomic Pathology. The issuing of the Master of Science degree in Anatomic Pathology from Tulane University School of Medicine is not contingent upon students passing any type of external certification or licensure examination, including but not limited to the American Society for Clinical Pathology Board of Certification Examination for Pathologists' Assistants.

The curriculum includes a required component and an optional component. The required curriculum provides the education essential for students to become practicing Pathologists' Assistants upon graduation. The optional component of the curriculum allows students to pursue personal interests that align with individual career goals. The Pathologists' Assistant Scope of Practice is vast and will likely continue to expand with the ever-evolving healthcare system. To ensure that students are prepared to adapt to this environment, students may choose to gain additional knowledge or skills that align with individual career goals. While the optional component of the curriculum is available to students, no student is required to enroll in any electives.

Requirements

The required curriculum includes 83 credit hours over the course of two years, which includes both didactic and clinical components. The first year of the program consists of didactic courses in basic sciences and surgical pathology, with surgical pathology and autopsy pathology rotations during the summer. The second year of the program consists entirely of clinical rotations.

Year 1:

- Spring Semester (January – May)
  - Gross Anatomy (4 credits)
  - Human Histology (4 credits)
  - Embryology (4 credits)
  - Physiology (3 credits)
  - Surgical Pathology Techniques (4 credits)
- Summer (May – August)
  - Autopsy Pathology (3 credits)
  - Autopsy Pathology Practicum (1 credit)
  - Advanced Surgical Pathology Techniques I (4 credits)
  - Advanced Surgical Pathology Techniques I Lab (2 credits)
  - Surgical Pathology Practicum (1 credit)
  - Mechanisms of Disease I – General Pathology (5 credits)
- Fall (August – December)
  - Mechanisms of Disease II – Systemic Pathology (5 credits)
  - Advanced Surgical Pathology Techniques II (4 credits)

- Advanced Surgical Pathology Techniques II Lab (2 credits)
- Pathologists' Assistant Seminar (1 credit)

Year 2:

- Clinical rotations at various sites including surgical pathology, autopsy pathology, forensic pathology, clinical pathology, hematopathology, cytopathology, pediatric pathology, and digital pathology. Students have the option to participate in cancer research, and an optional teaching practicum.

The required curriculum is comprised of the above courses. Students have the option to take additional lecture-based or research-based electives, independent studies, and a teaching practicum.

Anatomy Research, MS

The MS Anatomy Research degree provides a program of research training for those who wish to become biomedical and medical education researchers.

This is a 2-year thesis program of study of gross anatomy, embryology, cell biology, and histology leading to a Master of Science degree in Anatomy by research. It is designed specifically for candidates who wish to develop research careers in biomedical science and medical education. In the first year, students in the program take anatomy and histology courses along with other graduate courses. All courses in the program are taught within the School of Medicine by full time faculty. In the second year, students carry out mentored research in the Department of Structural and Cellular Biology.

Who is this program meant for?
This is a two-year program of taught classes and laboratory research that leads to the MS Anatomy Research degree. It is designed for bachelor degree graduates and physicians who intend to follow a research career in the biomedical sciences. With a MS Anatomy Research degree, graduates can apply for laboratory research positions or to PhD programs in biomedical sciences.

Program calendar

The MS in Anatomy Research curriculum is designed for completion within two years. Classes start in August and end in May each year.

Offered in the Summer

Course ID	Title	Credits
ANAT 7790	Adv Surgery based Anat Dissect	5

Students must take 43 credit hours of course work over 4 semesters and complete the requirements for the degree.

Anatomy, MS

The MS Anatomy degree is structured for those who wish to enhance their eligibility for entry to professional schools. This is a 1-year non-thesis program of study of cadaveric dissection-based gross anatomy, embryology, cell biology and histology, and neuroscience leading to a Master of Science degree in Anatomy. It is designed specifically for candidates who plan to attend medical school, or dental school, or enroll in other professional or advanced degree programs; it serves to improve credentials to compete for admission to a medical or dental school.

The degree program offers a carefully designed curriculum that includes taking classes with medical students, participating in a learning experience that closely models the medical school environment (small group teaching and learning, problem-based learning, team-based learning, simulation, virtual microscopy, dissection-based anatomy). A small class size is maintained for students to maximize the small-group teaching environment. Students in the MS program take anatomy and histology courses alongside first year medical students at Tulane Medical School. All other graduate courses are taught within the School of Medicine by full time Medical School faculty.

Requirements

Students must take 32 credit hours of course work during the fall and spring semesters and complete the requirements for the degree.

Biochemistry and Applied Bioinformatics, MS

Overview

This is a two-year thesis-requiring program for study leading to a Master of Science degree in Biochemistry and Applied Bioinformatics. In year one, students will acquire an academic foundation in biochemistry and bioinformatics and then, in year two, specialize in a sub-field as befits their research or employment interests.

The program is designed to improve the academic credentials and scientific research experience of graduates. Our distinctive program emphasizes student development in six areas (coursework, laboratory skills, bioinformatic analysis, independent thought, presentation skills, and personal growth), allows students to broaden and strengthen their academic foundation, and equips students with basic and advanced lab and bioinformatics skills for a career in academic or industrial research.

Students will take Graduate Biochemistry, Cell Biology, Biostatistics, and Bioinformatics courses, with a strong emphasis on research application of biochemical, molecular and bioinformatic knowledge. Bioinformatics training focuses on skills in the application of diverse tools and databases addressing genomics, gene expression, proteomics, metabolism, and protein structure, function, and drug binding. These courses are taken along with first-year PhD students at the Tulane School of Medicine. All students will benefit from several other Biochemistry- or Molecular Biology-related courses, including a Biochemistry and Molecular Biology Seminar series, a Biochemistry Workshop, and a course on Academic Writing and Critique. All courses are taught within the Tulane School of Medicine by full time faculty.

In year two, students will perform bench or bioinformatic research toward the master's thesis and experience all aspects of basic research under supervision of a faculty advisor, from the development of an idea and scientific rationale, to experimental design and execution, data analysis, and possibly the drafting of a manuscript. Examples of high-level bioinformatics analysis (tools/databases) include the construction of mutational signatures from genome-sequencing data (Blast, Clustal, GenBank, CBioPortal), tumor pathological staging on the basis of gene expression presented in t-SNE projections (10X Genomics), immunological epitope mapping by analysis of protein conformational stability (Protein Data Bank, Swiss-Model), and in-silico drug-screening for protein binding (Autodock).

Requirements

Students must take 30 credit hours of coursework by the end of the spring semester in year two, and they must complete and defend a master's thesis by the end of the summer in year two. Thesis research may commence at the beginning of year one, upon formation of the advisory committee. The student is expected to devote full time to research after the spring semester of year one, and until the thesis defense in the summer of year two.

Biochemistry, MS

Biochemistry Masters 1-Year Program

A two-semester graduate program designed to enrich and improve credentials of graduates to apply for admission to medical, dental or other healthcare-related profession programs.

Program Overview

This is a two-semester non-thesis program leading to a Master of Biomedical Science in Biochemistry degree.

The program is primarily designed to enrich and improve academic credentials of graduates. Our distinctive program emphasizes student development in four areas (coursework, experiential learning, presentation skills, and personal growth), and allows students to broaden and strengthen their academic foundation for further intellectual development, such as gaining entrance into medical-, dental- or health profession-related schools.

The core curriculum emphasizes clinical applications of biochemistry and molecular knowledge. Required courses include Human Medical Cellular Biochemistry and Human Medical Metabolic Biochemistry which are equivalent to Tulane's first-year medical biochemistry course, Medical Biochemistry Grand Rounds Externship Seminar which provides students with a unique opportunity to experience Medicine Grand Rounds from the biochemical, molecular and clinical perspectives, and the Department Seminar series exposing students to novel research in the field of biochemistry.

All students benefit from several other biochemistry- or molecular biology-related courses. Program electives range from more medically-related courses such as Chromosomal Instability and Cancer, Molecular Basis of Pediatric Disease, and Signal Transduction and Hormone Action to more research-related courses such as Biochemistry Research, Graduate-level Biochemistry, and Biomedical Statistics and Data Analysis. Additionally, the program has reciprocal relationships with certain courses in the Graduate Program in Biomedical Sciences, the Department of Microbiology and Immunology, the Department of Physiology, and the Department of Pathology and Laboratory Medicine. Students may elect to take Tulane first-year medical course equivalents in Graduate Medical Microbiology and Medical Immunology, Medical Physiology, Cancer Biology & Pathology, or Molecular & Cellular Pathology.

All courses are taught within the Tulane School of Medicine by full time faculty.

Requirements

For the one year Program, students must take 30 credit hours of course work during the fall and spring semesters to complete the requirements for the degree. Additionally, students have the option to take the NBME Shelf Exam in Biochemistry as a culminating experience. Although not thesis based, this degree does involve several written assignments and oral presentations as part of the required course work. No research is required. Therefore, this is considered a "non-thesis" degree.

Bioethics and Medical Humanities, MS

Overview

The **Master of Science in Bioethics and Medical Humanities** is a non-thesis, capstone-required program within Biomedical Sciences which can be completed in either a **one- or a two-year** course of study. As healthcare becomes increasingly complex with both technological advances as well as social decisions that must be faced, this master's degree program will assist any learner who wishes to pursue healthcare ethics and humanities in their future. This is a 33-credit-hour program consisting of seven required core courses and four electives. This program accommodates Dual Degree MD-MS students (see below) and those students interested in pursuing the stand-alone MS degree. It is well-suited for both post-baccalaureate students progressing toward a terminal degree (e.g., an MD, JD, etc.) and mid-career professionals who wish to expand their potential in medical ethics and humanities. Students in professional schools wishing to take an MS in a gap year may complete the program in its one-year format. All courses in our program may be attended in-person or by live synchronous teleconferencing, allowing participation from virtually anywhere. Students pursue either the Bioethics Track or Medical Humanities Track to center their efforts, but the program is unique in providing the student both a bioethics and a medical humanities education through our interdisciplinary faculty brought together in the Program in Medical Ethics and Human Values. Core program faculty staffing the core courses are drawn from Philosophy, English, Medicine, Humanities and Clinical Ethics and boast a distinguished publication record in Bioethics and Medical Humanities.

This MS degree can be also earned by incoming students at the Tulane School of Medicine as a Dual Degree (MD-MS) program, completed within the same 4 years of medical school. See details at the link below.

MD-MS Dual Degree Program (p. 398)

Biomedical Informatics, MS

Overview

The program is a two-year (four-semester) thesis program leading to a Master of Science in Biomedical Informatics. The major goal of the program curriculum is to train new Biomedical Informatics (BMI) specialists. The program is primarily designed to enrich and improve the academic credentials of graduates. Our distinctive program emphasizes student development in four areas (coursework, experiential learning, presentation skills, and personal growth), and allows students to broaden and strengthen their academic foundation for further intellectual development and medical research. Each graduate will be able to use their preparation to investigate and apply information and communication technologies to advance research, practice, and solve problems in the related Biomedical fields in a comprehensive, competitive, and effective way.

The program is designed to include the following high-level competency areas:

· Biomedically-related courses: principal of public health informatics, biomedical imaging and process, advanced bioinformatics.

· Data science related courses: introduction to data science, data science with cloud computing, advanced data science analytic techniques, and big data related courses.

· The program has reciprocal relationships with specific courses in the graduate programs in Biomedical Engineering, and Biochemistry/ Molecular Biology.

The program will provide graduates with marketable skills for informatics careers in biology, medicine, public health, IT trainers, project managers, chief nursing officers, chief medical officers, or research scientists focused on the development of prescriptive analytics from big data sources. These uniquely trained master's graduates will be critical to existing efforts to improve health outcomes. Building a stronger presence in biomedical data sciences and informatics in clinical practice, research, and education, is a high priority for the institutions. This program also prepares students to participate in research programs in academia, healthcare, public health, and industry, as well as to apply the knowledge in clinical, government, and industry settings.

Requirements

The core curriculum emphasizes biomedical applications of data science and big data knowledge. Students must complete a minimum of 32 credit hours from the courses listed below (23 core and at least 9 elective credit hours).

Year 1		
Fall		**Credit Hours**
BIMI 6100	Elements in Biomedical Informatics	4
BIMI 6200	Introduction to Data Science for Biomedical Informatics	3
BIMI 6300	Fundamentals of Data Analytics	3
	Credit Hours	**10**
Spring		
BIMI 7100	Statistical Machine and Deep Learning in Biomedical Practice	3
BIMI 7300	Biomedical Data Science with Cloud Computing	3
BIMI 7500	Genomic Sequence and Omics Data Analysis	3
	Credit Hours	**9**
Summer Session 1		
BIMI 9980	Master's Thesis Research	0
	Credit Hours	**0**
Year 2		
Fall		
BIMI 8500	Research Methodology of Biomedical Informatics	2
BIMI 9980	Master's Thesis Research	0
	Credit Hours	**2**
Spring		
BIMI 8500	Research Methodology of Biomedical Informatics	2

BIMI 9980	Master's Thesis Research	0
	Credit Hours	**2**
Summer Session 1		
BIMI 9980	Master's Thesis Research	0
	Credit Hours	**0**
	Total Credit Hours	**23**

ELECTIVES

Electives courses (Year 1 or Year 2): All students are required to take at least one of the following biologically relevant courses (excluding GBCH 7250 Biomedical Statistics and Data Analysis (2 c.h.)) as an elective: BMSP 6070 Advanced Cell Biology (3 c.h.); GBCH 6010 Graduate Biochemistry (4 c.h.); EPID 7810 Human Molecular Genetics (3 c.h.). Other elective courses may be substituted with permission of the Program Director.

Course ID	Title	Credits
Fall		
BIMI 6400	Health Informatics	3
BIMI 8550	Computational Biology: Structure and Organization	3

Biomedical Sciences, PhD

What Makes Tulane's Program Unique?

Tulane's Ph.D. Program in Biomedical Sciences takes an interdisciplinary approach to graduate education and research. There are many ways to shape your Tulane experience to fit your needs and career goals, and our program has an array of options to accelerate, customize, and enrich your education and, ultimately, your career. The program is dynamic, giving you an array of controls that allows you to heavily customize your experience here to suit you.

Students complete all course requirements in their first two years. Core courses including Advanced Cell Biology, Biochemistry, Human Molecular Genetics, Biostatistics, Systems Biology, and Biomedical Informatics, which along with Basic Science electives provide a broad foundation for future research. More than 150 scientists from Basic Science and Clinical Departments and School Of Medicine Centers participate fully in the BMS program. Students have ample opportunities to match with one of these scientists by conducting at least three lab rotations in their first year prior to selecting their Dissertation Advisor.

All PhD students receive a full tuition waiver and a stipend of approximately $33,000 per year for the entire duration of the program.

Requirements

A minimum of 48 credit hours of coursework and independent study is required for a Ph.D. at Tulane University. Students take an identical Core Curriculum in the first year (except for Biomedical Informatics Track), totaling 27 credit hours. In the second year, students must complete at least 21 credit hours. Coursework in the second year must include at least 6 credit hours of lecture-based coursework (electives), with the remaining credit hours consisting of Independent Study and/or Special Topics (research). Students may take Independent Study and/or Special Topics for 1-6 credits each per semester for a maximum of 12 credits each until course completion. Electives are selected from the elective curriculum by the student in consultation with the dissertation advisor.

Year 1

Fall		**Credit Hours**
Total coursework for the First Year Fall + Spring must equal 27 credit hours		21
BMSP 6070	Advanced Cell Biology	3
GBCH 6010	Graduate Biochemistry	4
BMSP 7140	Biomedical Sci Seminar	1
BMSP 7120	Research Topics and Rotations (2 credits for seminar, 2 for first rotation)	4
BMSP 7100	Biomed Sciences Workshop	1
INTD 6010	Responsible Conduct of Research	0
	Credit Hours	**34**
Spring		
GBCH 7250	Biomedical Statistics and Data Analysis	2
EPID 7810	Human Molecular Genetics	3
BMSP 7770 or BIMI 7500	Physiological Basis of Disease or Genomic Sequence and Omics Data Analysis	3
BMSP 7150	Seminar	1
BMSP 7130	Research Topics and Rotations (2 credits each for 2nd and 3rd rotations)	4
BMSP 7110	Workshop	1
	Credit Hours	**14**
Summer Session		
BMSP 9990	Dissertation Research	0
	Credit Hours	**0**

Year 2

Fall		
Total for Second Year Fall + Spring must equal at least 21 credit hours. [1]		
BMSP 7140	Biomedical Sci Seminar	
BMSP 7100	Biomed Sciences Workshop	
Maximum of 6 credits per semester of Independent Study and/or Special Topics Combined.		
BMSP 7990	Independent Study Must register with the BMS Office	
BMSP 7500	Special Topics Must register with the BMS Office	

Electives (to be chosen in consultation with dissertation advisor)		
	Credit Hours	**0**
Spring		
BMSP 7110	Workshop	
BMSP 7150	Seminar	
Maximum of 6 credits per semester of Independent Study and/or Special Topics Combined.		
BMSP 7990	Independent Study Must register with the BMS Office	
BMSP 7500	Special Topics Must register with the BMS Office	
Electives (to be chosen in consultation with dissertation advisor)		
	Credit Hours	**0**
Summer Session		
BMSP 9990	Dissertation Research	0
	Credit Hours	**0**
	Total Credit Hours	**48**

[1] Credit hours in year 2 must total a minimum of 21 credits; Fall & Spring term credit hour totals vary by student.

Biomedical Sciences, PhD with Pharmacology Concentration

Overview

In the first two semesters, all students take the identical core curriculum, described below. In conjunction with the course work in the first year, students rotate in 8-week blocks through three of the Program's participating research laboratories of the student's choice. This allows students to become more familiar with BMS research and faculty. Students should choose a Dissertation Advisor by the end of the second semester.

After completion of the core curriculum, students who choose a dissertation advisor in the Department of Pharmacology have the option to specialize in a pharmacology research emphasis by choosing the Pharmacology Track. To earn a Concentration in Pharmacology, students will complete 25 credit hours of pharmacology-focused coursework, for a total of 52 credit hours for degree.

Requirements

Students who choose to earn a Concentration in Pharmacology will complete 27 credit hours of BMS core curriculum in their first year of study. In year 2, students will complete 25 credit hours of pharmacology-focused coursework.

Year 1		
Fall		**Credit Hours**
BMSP 6070	Advanced Cell Biology	3

Appendix

PhD Dissertation Research Seminars

Each graduate student working for the Ph.D. degree will be required to present 2 seminars related to his/her thesis problem to the staff and students as a part of the regular departmental seminar series.

Seminar I

A review of the pertinent background literature and an outline of the research problem. A design of the proposed work and how the results may fit in with the hypothesis which serves as the basis for the thesis. This seminar must be given prior to a student's submission of their doctoral prospectus.

Seminar II

A presentation of the major points included in the thesis after most of the research data has been accumulated and the thesis is almost completed. This seminar should typically be given within a few months before the final defense.

Attendance

Attendance at all graduate lectures, exams, small group sessions, advances in pharmacology & departmental seminars is mandatory. If for some reason you are unable to attend a required class or session, you must obtain an excused absence from the Director of Graduate Studies (Dr. Clarkson). An official excuse is defined as:

1. personal illness (verification may be required)

2. family emergency such as a serious illness or death in the immediate family

3. sanctioned events such as the annual BMS retreat, BMS Research Day presentation, or attending a scientific meeting.

An excuse for any other event must first be pre-approved by the Department Chair or Director of Graduate Studies.

Clinical Anatomy, MS

The MS Clinical Anatomy degree is designed to train the next generation of educators in the health sciences. This is a 2-year non-thesis program of study of cadaveric dissection-based gross anatomy, embryology, cell biology and histology, and neuroscience leading to a MS degree in Anatomy. It is designed specifically for candidates who wish to develop careers in teaching and research in the anatomical sciences. In the first year, students in the program take anatomy and histology courses along with other graduate courses. In the second year, student take courses and practicums that train them in the principles and practice of medical education and curriculum development.

Class size is small to maximize the small-group teaching environment. All graduate courses in the program are taught within the School of Medicine by full time Medical School faculty.

This is a two-year non-thesis program that leads to the MS Clinical Anatomy degree. It is designed for bachelor degree graduates and physicians who intend to follow a career in teaching the morphological sciences in colleges as well as research and scholarship in health sciences education. With a MS Clinical Anatomy degree, graduates can apply for teaching positions in anatomy, histology, embryology, neuroanatomy, biomedical sciences.

Requirements

Students must take 42 credit hours of course work over 4 semesters and complete the requirements for the degree.

LIST OF SCB ELECTIVE COURSES

Offered in Fall Semester

Clinical Ethics Graduate Certificate

Overview

The Certificate in Clinical Ethics Program is designed to provide clinical professionals, students of medicine, ethics committee members, and non-clinical health care professionals (e.g., patient advocates, hospital attorneys) with the fundamentals of clinical ethics with less time commitment than an MS degree. The Certificate curriculum consists of 4 courses (3 required and 1 elective) (12 credit hours total) and provides students with the fundamental principles of medical ethics, classroom and practical clinical experience in clinical ethics, and study of current controversial issues in clinical ethics and medicine. If students wish to pursue their studies further, their credits from the certificate would apply towards a Masters of Science degree in Bioethics and Medical Humanities. Upon completion of the Clinical Ethics Certificate, students will be able to:

- Describe, distinguish, and apply the fundamental concepts, principles, and tools of clinical ethics
- Conduct an ethics consult and create an appropriate written note in a patient chart
- Assess and analyze a variety of ethical challenges in the clinical context, both perennial and current
- Create a literature search for articles and case studies related to current ethics cases, and assess the state of current ethical debate as it pertains to specific cases
- Critically evaluate medical ethics literature and the arguments given for various ethical positions

Requirements

This program consists of four courses, three of which are core courses and one elective option. Upon completion of the Certificate Program students will have completed 12 credit hours of coursework. Elective courses are subject to change, and new electives are being created all the time. Please consult your advisor for current elective options.

Course ID	Title	Credits
BEMH 6002	Foundations in Bioethics	3
BEMH 6009	Current Controversies in Bioethics	3
BEMH 6011	Clinical Ethics	3
Electives (Select One)		**3**
BEMH 6001	Neuroethics: The Ethics of Neuroscience and the Neuroscience of Ethics	
BEMH 6003	Medical Humanities	
BEMH 6005	Medicine in Literature & Film	
BEMH 6006	The Doctor As Author	
BEMH 6007	Ethical Theory	
BEMH 6008	History of Medicine	
BEMH 6010	Research Ethics	
BEMH 6012	The End of Life in Film & Lit.	
BEMH 6013	Medicine and Identity	
BEMH 6014	Pandemic Ethics	
Total Credit Hours		**12**

Clinical Research Methods, MS

This is a 32-credit, one-year curriculum is designed for the MD who seeks familiarity with the fundamentals and techniques of clinical research. The curriculum is intended to serve the recent medical school graduate who will earn the MS degree during one year of study following medical school and prior to standard graduate medical education. The program is offered in traditional lecture, seminar and tutorial format on the Tulane University School of Medicine campus; therefore the student would be a resident of the New Orleans area and pursue classes full time.

Executive Master of Science in Clinical Research Methods

The Executive Master's Degree in Clinical Research Methods program will permit students to complete most of the curriculum "online." Special arrangements will be made to provide clinical research experience to complete the curriculum.

Requirements

Sample Course Schedule

Year 1

Fall		**Credit Hours**
BIOS 6040	Intermediate Biostatistics	3
MSCR 7070	Molecular Medicine	4
MSCR 7150	Journal Club	1

MSCR 6430	Topics in Clinical Research	3
SPHL 6070	Health Systems Policy and Management	3
	Credit Hours	**7**
	Total Credit Hours	**31**

Clinical Research Certificate (Graduate)

The Certificate in Clinical research program is designed to provide clinical professionals with some fundamentals of clinical research with less time commitment than what is required for the MS degree program. The curriculum provides scholars with an introduction to research design, regulatory issues, statistical concepts and data management. The certificate curriculum is comprised of 5 courses (12 credit hours total) covering basic biostatistics, epidemiological methods, ethics and responsible conduct of research, protocol design and writing, and an elective (from MSCR-M courses). For those scholars admitted to the MSCR program, the credits from the certificate would apply towards their masters of Science degree in Clinical Research. The MSCR Certificate is open to medical professionals and trainees, and is especially suited for K award applicants and recipients who may acquire these skills as part of their educational component.

The MSCR Certificate Program is modeled after the Clinical Research and Training Courses offered by the NIH Clinical Center.

Requirements

The Clinical Research Certificate requires 12 credits comprised of the requirements listed below.

Course ID	Title	Credits
Core Courses		
MSCR 6420	Responsible Conduct of Resrch Summer	1
MSCR 6430	Topics in Clinical Research Summer	3
MSCR 6440	Protocol Design and Writing Minimum 2 credit hours required, Offered in the Spring	2
SPHL 6050	Biostatistics for Public Health Departmental approval required, Spring, Summer, or Fall	3
or SPHL 6060	Epidemiology for Public Health	
Elective(s) **Minimum of 3 credits are required, students may combine coursework below to reach 3 credits total or take one course below, provided the course carries a minimum of 3 credit hours.**		**3**
MSCR 6450	Therapeutics Seminar	
MSCR 7070	Molecular Medicine	
MSCR 7080	Cultural Competence Research	
MSCR 7090	Grant Writing	
MSCR 7300	Clerkship	
MSCR 7150	Journal Club	
MSCR 7400	Surgical Education Conference	
MSCR 7410	Surgical Research Consortium

MSCR 7430	Residency Didactics	
MSCR 7440	Independent Study	
MSCR 7450	Practical Skills	
MSCR 9980	Mentored Research Component	
Total Credit Hours		**12**

Clinical Research, MS

The Tulane MSCR Program is a structured program leading to a Master of Science in Clinical Research degree from the Tulane University School of Medicine. It usually requires 2 to 3 years to complete the curriculum including the mentored research requirement.

Potential trainees will be self-referred or nominated by their Program Director. After approval by the MSCR Internal Advisory Committee, the trainee will enter the MSCR program, which features four components:

1. Formal didactic training providing the tools to conduct modern clinical and translational research;
2. A clinical research and clinical medicine seminar series, providing peer interaction and mentor guidance on research topics;
3. A mentored clinical research project;
4. An annual MSCR retreat

Each Clinical Research Scholar will identify a research preceptor from the scholar's home division or department. In addition, each scholar will have a career mentor from the MSCR program.

In lieu of a thesis, the MSCR candidate is expected to prepare a grant ("K" or "R" format) and/or a paper based on the mentored research.

Clinical Fellows participating in the MSCR Program must also complete their individual clinical training program requirements.

Requirements

Elective Courses		3
Total Credit Hours		**32**

In lieu of a thesis, the MSCR candidate is expected to prepare a grant ("K" or "R" format) and/or a paper based on the mentored research.

Medical Genetics and Genomics, MS

The Hayward Genetics Center offers a 1-year, post-baccalaureate Master in Medical Genetics and Genomics. This multidisciplinary program gives graduates an in-depth understanding of the rapidly advancing field of clinical medical genetics and genomics. It is designed to prepare qualified individuals for careers in the health sciences, and to provide an educational experience that will enhance the opportunity of being admitted into a postgraduate professional school such as medical school, genetic counseling or PhD programs.

- Most of our students are pre-med, and while it varies from year to year, we estimate that over 90% of our graduates who apply

to medical school or osteopathy school have been accepted in subsequent years.

- In addition to medical school, graduates from our program have also gone on to other careers including dental school, PhD programs, genetic counseling masters programs, and working with biomedical technology companies.
- The curriculum includes courses that cover the same material as the Tulane Medical School's first year Medical Genetics and Medical Biochemistry courses.
- We offer clinical shadowing opportunities in the Tulane Genetics clinics

To request more information regarding the Masters program please contact:

Dr. Karen Weissbecker
Director of Graduate Education
Hayward Genetics Center
Tulane University School of Medicine
1430 Tulane Avenue
New Orleans, Louisiana 70112-2699
Telephone: 504 988-6242
Email: kremer@tulane.edu

Requirements

The program begins every year in the fall semester and is a **non-thesis degree**. Students must complete a total of 30 hours of coursework and have a cumulative GPA of 3.0 to receive their Master's degree. Students are required to write a literature review paper on a subject in the field of human genetics during their second semester for their Special Topics course. Because our program is intradepartmental, all students will take the same courses and follow the same schedule.

Course ID	Title	Credits
Fall		
HMGN 7010	Grand Rounds in Human Genetics	1
HMGN 7020	Intro to Human Genetics	3
HMGN 7030	Clinical Aspects of Human Genetics I / Clinical Aspects of Human Genetics II	3
HMGN 7040	Human Cytogenetics	3
HMGN 7060	Human Mol. Genetics & Genomics	4

Course ID	Title	Credits
Spring		
HMGN 7010	Grand Rounds in Human Genetics	1
HMGN 7030	Clinical Aspects of Human Genetics I / Clinical Aspects of Human Genetics II	3
HMGN 7050	Medical Biochemistry	3
HMGN 7100	Population Genetics & Genetic Epidemiology	3
HMGN 7950	Advanced Topics in Genomics	3
HMGN 7980	Special Topics	1-6
or HMGN 7990	Special Topics	

Medical Humanities Graduate Certificate

Overview

The Certificate in Medical Humanities Program is designed to provide clinical and non-clinical health care professionals, students of medicine, and interested lay members of the public with the fundamentals of the medical humanities with less time commitment than an MS degree. The Certificate curriculum consists of 4 courses (12 credit hours total) and provides students with the fundamental principles of medical humanities and study of medical history, narrative medicine, and/or the intersection of film and literature with medicine. If students wish to pursue their studies further, their credits from the certificate can apply towards a Masters of Science degree in Bioethics and Medical Humanities. Upon completion of the Medical Humanities certificate coursework, students will be able to:

- Describe, distinguish, and apply the fundamental concepts, principles, and methodologies used in the medical humanities
- Evaluate the impact of the history of medicine on current medical practice and social evaluation of modern health care systems
- Critically analyze the effect of literature and film on perceptions of modern medical practice
- Conduct and create reflections on medicine through narrative writing
- Assess the intersection of the fine arts and health care systems and practices

Requirements

This program consists of four courses, one of which is a core course, two of which are selected from a group of three possible options, and one elective option. Upon completion of the Certificate Program students will have completed 12 credit hours of coursework. Elective courses are subject to change, and new electives are being created all the time. Please consult your advisor for current elective options.

Course ID	Title	Credits
BEMH 6003	Medical Humanities	3
Select two of the following:		**6**
BEMH 6016	Narrative in Medicine	
BEMH 6008	History of Medicine	
BEMH 6005	Medicine in Literature & Film	
Electives (Select One)		**3**
BEMH 6001	Neuroethics: The Ethics of Neuroscience and the Neuroscience of Ethics	
BEMH 6006	The Doctor As Author	
BEMH 6007	Ethical Theory	
BEMH 6011	Clinical Ethics	
BEMH 6012	The End of Life in Film & Lit.	
BEMH 6013	Medicine and Identity	
BEMH 6014	Pandemic Ethics	
BEMH 6015	Pro-Natalism, Anti-Natalism and the Ethics of Human Reproduction	
Total Credit Hours		**12**

Microbiology and Immunology, MS

This one-year post-baccalaureate program leading to the degree of Master of Biomedical Science in Microbiology and Immunology has been designed to prepare students for careers in biomedical sciences and to provide an in-depth educational experience to improve the probability of gaining admission to a postgraduate professional school such as medical, dental, PA, veterinary schools or Ph.D. programs. Class size is limited to 20 students. All courses are taught within the Tulane School of Medicine by full-time faculty.

Upon graduation, students

- Should have developed core knowledge in Microbiology and Immunology, and the ability to apply their knowledge to problems in these and other disciplines. *(Disciplinary and interdisciplinary knowledge)*
- Should have developed the ability to perform basic work in a Microbiology or other research laboratory. *(Professional competencies)*
- Should have developed skills that transcend disciplines and are applicable in any context, such as communications, leadership, and working in teams. *(Foundational and transferrable skills)*
- Should have developed the ability to apply the scientific method, understand the application of statistical analysis, gain experience in conducting research and other field studies, learn about and understand the importance of research responsibility and integrity, and engage in work-based learning and research in a systematic manner. *(Research)*

Requirements

Degree Requirements (two tracks available) (https://medicine.tulane.edu/microbiology-immunology/masters/)

Thesis Track

- At least 27 credit hours of course work during Fall and Spring semesters plus 3 credits for thesis-relevant courses.
- Complete requirements for a thesis, based on **library** research (generate a review paper).
- At least a "B" average (3.0 GPA) has to be achieved in order to graduate.

Non-thesis track

- At least 30 credit hours of course work during Fall and Spring semesters.
- At least a "B" average (3.0 GPA) has to be achieved in order to graduate.

Program Curriculum (https://medicine.tulane.edu/microbiology-immunology/masters/)

Students can take as many credits as desired from the courses offered with a minimum of 30 credits overall.

Required Courses (https://medicine.tulane.edu/microbiology-immunology/masters/)

Fall semester:

Course ID	Title	Credits
MIIM 7500	Graduate Medical Microbiology	4
MIIM 7600	Medical Immunology	3
MIIM 7550	Microbiology Laboratory	3
MIIM 7010	Microbiology/Immunology Seminar Series - Fall	1
MIIM 7020	Graduate Journal Club	1

Spring semester

Course ID	Title	Credits
MIIM 7400	Responsible Conduct of Biomedical Research	2
MIIM 7810	Microbiology/Immunology Seminar Series - Spring	1
MIIM 7030	Scientific Communication in Microbiology/Immunology	2

Electives

In addition to the required courses above, we offer several electives:

Fall Semester

Course ID	Title	Credits
MIIM 7210	Research Methods	2
MIIM 7720	Medical Mycology	3
MIIM 7050	Thesis Research Design	2
MIIM 7310	Research (register for 1 or 2 cr)	1 to 10
MIIM 9970	Master's Thesis (register for 1 cr)	1 or 2
GBCH 7500	Human Medical Cellular Biochemistry	5
CELL 6490	Anatomy (on uptown campus)	0 to 4
CELL 6491	Anatomy Lab (on uptown campus)	0
GPSO 6010	Medical Physiology	6

Spring Semester

Course ID	Title	Credits
MIIM 7750	Medical Parasitology	3
MIIM 7220	Advanced Research Methods/Data Mining	4
MIIM 7250	Vaccine Biology	3
MIIM 7620	Advanced Immunology (Biennial)	3
MIIM 7120	Advanced Virology	4
MIIM 7100	Clinical Cases and Their Underlying Mechanisms	2
MIIM 7065	Scientific Writing	2
MIIM 7150	At the Interface - Dynamics of Immunologic and Microbial Interactions (Biennial)	3
MIIM 9970	Master's Thesis (Register for 2 cr)	1 or 2
MIIM 7320	Research (Register for 1 or 2 cr)	1 to 10
GBCH 7520	Metabolic Biochemistry of Human Disease	5
CELL 6110	Human Histology (on uptown campus)	4

CELL 6111	Human Histology Lab (on uptown campus)	0

Molecular Medicine and Health Sciences, MS

Overview

The MS in Molecular Medicine and Health Sciences program is designed for students with a baccalaureate degree in science who are seeking advanced training in the health sciences, typically in preparation for pursuit of a professional degree (e.g., Medical, Dental, Physician Assistant, Pharmacy, and Veterinary Medicine) or for preparation to work in academia or biotech/pharmaceutical industries. This program is also useful to individuals in academia who wish to keep up with recent advances in biomedical science. Foreign medical graduates (FMG) who wish to develop research skills are also encouraged to apply.

The objective of this program is to provide students with the opportunity to study the cellular and molecular mechanisms of human diseases through didactic teaching and research training. Enrolled students can choose between the thesis- and non-thesis-track. The non-thesis track requires 30 credits of coursework with a cumulative GPA of 3.0 or higher to graduate. The thesis track requires a mentored thesis in addition to the coursework. The curriculum is designed not only to improve the credentials of students who are interested in medical, dental, or other health-related professional schools, but also to ease the transition to such professional programs. Additionally, students who choose the thesis track will develop quantitative and qualitative research skills, allowing them to be competitive in employment opportunities in biotech and pharmaceutical industries, as well as in academia.

Questions regarding the program can be addressed to the Program Coordinator (Genevieve Burguieres, gburguie@tulane.edu), Program Director (Dr. Haitao Zhang, hzhang@tulane.edu) or Co-Director (Dr. Gilbert Morris, gmorris2@tulane.edu).

Requirements

The Molecular Medicine and Health Sciences, MS non-thesis track requires 30 credits of coursework with a cumulative GPA of 3.0 or higher to graduate. The thesis track requires a mentored thesis in addition to the coursework and cumulative GPA of 3.0 requirements.

Pharmacology, MS

One Year Masters Program

- A one year post-baccalaureate program leading to the MS degree in Pharmacology
- Designed for those interested in improving their credentials to gain admission to a medical or dental school
- Class size is maintained at less than 25 to create a more personal connection between students & faculty
- Students in our MS program take the School of Medicine's 2nd year Medical Pharmacology course (taught separately in a different sequence)
- All graduate courses are taught within the School of Medicine by full time Medical School faculty
- Successful performance will significantly improve ones credentials for applying to medical or dental school.
- Students who took the MCAT a second time after completing our MS program between 2009-2013 significantly increased their MCAT score by 3.5±1.8(n=47, P<0.0001) (based upon the pre-2015 MCAT scale of 3-45).
- **The average graduate GPA after successful completion of our program over the past eight years was 3.8, and over 78% matriculated into a medical or doctoral program of their choice.**

Objectives

- To train students in the principles underlying the discipline of pharmacology
- To learn the approach, rationale, and methods required to design and conduct research in pharmacology

Tulane became the first national research institution to integrate public service into its core curriculum for undergraduates in 2006. Now, the entire university community, including the schools of Architecture, Business, Law, Liberal Arts, Medicine, Public Health and Tropical Medicine, Science and Engineering and Social Work – is committed to public service.

Public service is of particular importance to those entering our one year masters program, because providing a track record of significant public or community service has become a prerequisite for admission to most US medical schools. Students are expected to move beyond the scope of academics and work in a community to improve the health of a population. This is "what medicine is all about".

As a result, a core requirement of our Masters program in Pharmacology is that students provide public or community service for a minimum of 12 hours for the Fall semester (1 credit hour) per semester, and 24 hours for the Spring semester. Students are also

required to post monthly blogs summarizing their community service activities.

Tulane has a Center for Public Service that helps connect students with numerous community partners & outreach programs that are active in the New Orleans area. As a part of the pharmacology curriculum, students are required to document their service activities in short essays, posted photos or video clips, and reflect upon the learning garnered from such activities in an online blog or wiki page. In addition, students are also expected to reflect on what they have learned from their academic and classroom activities.

Tulane is setting the standard for public service for the next generation of universities. When you receive a Tulane education, you will get a little something extra from community service activities that most other institutions don't offer. Our students get a unique educational experience that can be found Only in New Orleans. Only at Tulane.

Requirements

Community Service: A track record of community or public service has become a prerequisite for admission to most US medical schools. During the Fall semester students must complete 1 hour of community service per week, or a minimum of 12 hours per semester. Documentation & reflection on what students learn from community service activities is a component of the Pharmacology ePortfolio course. During the Spring semester students must perform a minimum of 24 hours of community service for 2 credit hours in the ePortfolio course. This will be used to complete 32 total credit hours at the end of the program.

Curriculum

Fall and Spring Semesters

Year 1		
Fall		**Credit Hours**
GPHR 7210	Pharm Advances	1

Physiology, MS

The Physiology Graduate Program at Tulane University School of Medicine in New Orleans, LA has developed a Master's program specifically designed to provide advanced training and understanding of the functions of the body, and to serve as the foundation for the study of medicine. Successful completion of this one-year program will increase your competitiveness for medical schools or equivalent professional programs. The program includes Advanced Medical Physiology, Neurophysiology, Molecular and Cellular Biology, and Translational Physiology.

Our program will benefit students looking to strengthen their credentials. Students will have various options within our program including:

- opportunities for research
- interaction with faculty across multiple disciplines
- MCAT studies and application preparation
- mock interviews and discussions with admissions director
- physician shadowing

In addition, many of the faculty teaching in our master's program are the same faculty that are teaching our medical students. We feel our program has been instrumental in helping students become more competitive for admission to medical school or other professional programs. On average, approximately 74% of our graduates (2015-2020) have received acceptance letters to medical or equivalent schools. Congratulations to all our graduates; we wish them great success in their future careers!

Research Ethics Graduate Certificate

Overview

The Certificate in Research Ethics Program is designed to provide clinical professionals, students of medicine, Institutional Review Board members, and non-clinical professionals (including regulatory or administrative personnel) engaged or potentially engaged in medical research with the fundamentals of research ethics with less time commitment than an MS degree. The Certificate curriculum consists of 3 required courses and 1 elective chosen from other courses offered by the BEMH program (12 credit hours total) and provides students with the fundamental principles of medical ethics, in-depth study in research ethics, and study of current controversial issues in ethics and medicine. If students wish to pursue their studies further, their credits from the certificate would apply towards a Masters of Science degree in Bioethics and Medical Humanities. Upon completion of the Research Ethics coursework, students will be able to:

- Describe, distinguish, and apply the fundamental concepts, principles, and tools of research and medical ethics
- Describe and assess the ethical challenges specific to biomedical research and social and behavioral research
- Evaluate the history of ethics in medical research in the US
- Assess and analyze a variety of ethical challenges in the medical context, both perennial and current
- Perform a literature search for ethics related to particular areas of medical research, and assess the state of current ethical debate as it pertains to different topics of research
- Critically assess medical ethics literature to evaluate the arguments given for various ethical positions

Requirements

This program consists of four courses, three of which are core courses and one elective option. Upon completion of the Certificate Program students will have completed 12 credit hours of coursework. Elective courses are subject to change, and new electives are being created all the time. Please consult your advisor for current elective options.

Sports Medicine Certificate (Graduate)

Overview

Delve into the world of sports medicine with Tulane School of Medicine's graduate certificate in sports medicine. With this 100% online series of courses guided by experienced instructors, students can pursue academic goals while tapping into what it takes to succeed in the fast-paced sports industry.

The curriculum is designed for professionals who aspire to more fully understand the sports industry from a medical perspective. This certificate is particularly suited for coaches and administrators seeking to better serve athletes in their care. For any sports industry

professionals, gaining new knowledge and skills in sports medicine can optimize their current role or open doors to new career opportunities.

Whether you want to enhance your current professional role or explore new career opportunities, our sports medicine certificate can help advance skills in a wide range of careers, including:

- Athletics / Assistant Athletics Director
- Head / Assistant Coach
- Director of Sports Management
- Director of Event / Stadium Security
- Sports Facilities Manager
- Team Programs & Operations Manager
- Club Sport Director

Objectives

The proposed program is designed to be a graduate-level certificate that provides learners with an introduction to the foundational knowledge and skills important to the recognition, care, prevention and rehabilitation of athletic injury; the assessment and response to emergency situations involving athletes; and research within sports performance methods. Learners will develop a diverse base of knowledge and practices necessary to guide success in working with current and former athletes.

Student Learning Outcomes

- Demonstrate an understanding of knowledge and skills in medicine, psychology, conditioning, and nutrition necessary to guide success in working with athletes of all levels
- Understand sport-related injury at various phases; prevention, treatment, and recovery
- Determine the needs of an individual athlete while addressing multiple forms of care; preventative, management, or enhancement
- Explain the components of a comprehensive sports medicine program

Disclaimer

By completing the certificate in sports medicine, students will learn a variety of information relevant to careers in sports medicine, ethical concepts, sports performance, basic types of injuries, environmental illness, emergency response, and physiology of injury.

The curriculum is intended to expose students to the duties and responsibilities of healthcare providers in sports medicine, and many other healthcare-related fields. *Please note: the certificate coursework is not designed to instruct students in the skills required to be a physician, certified athletic trainer, or any other individual involved in the continuum of care for athletes, nor is it meant to serve as a replacement for an actual physician or licensed athletic trainer within a sports medicine program.*

Course Objectives

In addition to these program objectives, each course has specific objectives which are outlined at the start of the course.

Academic Requirements

Students wishing to apply must hold a bachelor's degree from a regionally accredited college or university, as well as official transcripts from each school attended. Students must maintain a 3.0 GPA average while enrolled.

To be considered for admission to the Graduate Certificate program, a prospective graduate student must have:

- Earned an undergraduate degree from an accredited institution prior to the first semester of proposed graduate study.
- At least a 3.0 cumulative grade point average in undergraduate coursework; students with grade point averages below 3.0 may be considered for provisional admission, provided they demonstrate significant professional experience in a relevant field.

Applications to the program must include the following:

- A statement of 250-500 words discussing interest in sport studies, and how the program will assist them to achieve personal or professional objectives.
- Official college transcripts from each college attended.

Applicants may be conditionally admitted and allowed to take one class in their first semester, in which a B or better must be earned to be fully admitted to the program. Students who do not have a 3.0 grade point average in their undergraduate coursework but possess sufficient professional experience in the sport studies field may be admitted conditionally into the program.

Eligibility

Students wishing to apply must hold a bachelor's degree from a regionally accredited college or university, as well as official transcripts from each school attended. Students must maintain a 3.0 GPA average while enrolled.

To be considered for admission to the Graduate Certificate program, a prospective graduate student must have:

- Earned an undergraduate degree from an accredited institution prior to the first semester of proposed graduate study.
- At least a 3.0 cumulative grade point average in undergraduate coursework; students with grade point averages below 3.0 may be considered for provisional admission, provided they demonstrate significant professional experience in a relevant field.

Requirements

To receive a sports medicine certificate, students must complete four sports medicine courses detailing athletic injuries, recovery and performance; emergency situations in sporting events; and how to develop quality sports medicine programs.

Course ID	Title	Credits
SPMD 6100	Foundations of Sports Medicine	3
SPMD 6110	Non-traumatic Injuries	3
SPMD 6120	Sports Performance Enhancement	3
SPMD 6130	Continuum of Care: Developing a Sports Medicine Program	3
Total Credit Hours		**12**

Certificate Degree Requirements

To receive a sports medicine graduate certificate, students must complete a total of 12 course work credits in the certificate program. Graduate students seeking to enroll in more than 9 credit hours per semester require approval from the Program Director. Students must also apply for a certificate at the beginning of the semester in which the student plans to complete all required coursework. Applications for degree conferral are now online and will appear in a student's Gibson account when available.

Apply Certificate Coursework to the MS in Sport Studies

As a 100% online program, Tulane's School of Medicine graduate certificate focuses on the fundamentals of this discipline and can advance students in their pursuit of a Masters in Sport Studies (https://sopa.tulane.edu/degrees-programs/masters-degrees/master-professional-studies-sport-studies/) through Tulane University's School of Professional Advancement. This certificate can be "stacked" with the Sport Security, Sport Coaching, or Sport Administration certificates, alongside two core classes, to be applied toward a master's degree. If you'd like to apply your certificate toward an MS in Sports Studies, contact the program director for more information. Read more about the MS in Sport Studies from the Tulane School of Professional Advancement (in partnership with the Tulane Center for Sport) (https://sopa.tulane.edu/degrees-programs/masters-degrees/master-professional-studies-sport-studies/).

Tulane Center for Aging

Program

- Aging Studies, PhD (p. 370)

Aging Studies, PhD

Overview

Mission Statement

Our program focuses on the processes of aging at the individual and societal level. It examines how people change over the adult life course, the interrelationships between older people and social institutions, and the societal impact of the changing age-composition of the population. We emphasize the dynamic interplay between the aging of individuals and their changing biomedical, social, and physical environments and multi-level interactions among psychological, physiological, genetic, social, and cultural domains. Our goal is integration and synthesis within and across these domains. Our faculty's teaching and research emphasizes molecular, cellular, animal and human studies and takes place in a wide range of disciplinary and departmental settings across all of the schools at the university. Our students and faculty provide the foundation for this enterprise, working to create a new generation of leaders in this interdisciplinary field who will assume key positions in academia and in the public and private sectors. The program facilitates both basic and translational research allowing program participants to design and develop working models or implement a process that will initiate viable products or services for older adults in the expanding global community.

History

The Interdisciplinary Ph.D. Program in Aging Studies was established in 2009, in response to a call by the Provost's Office for interdisciplinary Ph.D. programs issued in 2008. The Program conforms to applicable University policies and regulations. The first class of students matriculated in the fall of 2010. Our Program is university-wide, encompassing all the Schools at Tulane University, and it is located in the School of Medicine. On successful completion of all program requirements, the student is awarded the "Doctor of Philosophy in Aging Studies." The University funds student stipends and provides tuition waivers.

Our Research Culture

A PhD degree can only be earned by performing original and significant research that is suitable for publication in a peer-reviewed journal, in addition to any other program requirements. It cannot be earned by fulfillment of course requirements or residence for any specific period of time. We take courses to prepare us to begin to assimilate the latest findings, often prior to publication, in a variety of disciplines. Research seminars provide this new information, and they are not designed to be general in nature. An aspiring scholar must show sufficient curiosity to participate. Research seminars do not distract from research; they enhance it, which becomes only evident to a more advanced scholar. Research is a full-time activity (24/7). It involves sustained, hard work, great dedication, creativity, intellect, knowledge, and luck. One learns how to perform research by doing it under the guidance of a master, to whom the student serves as an apprentice. The PhD degree is bestowed only when the faculty determine that a student deserves the high honor of joining the fellowship of scholars, a life-long appointment that carries with it great responsibility to oneself, to the fellowship, to the university, and to society.

Requirements

The Interdisciplinary Ph.D. Program in Aging Studies is comprised of graduate students and faculty from eight schools at Tulane University and includes the Schools of Science and Engineering, Medicine, Public Health and Tropical Medicine, Liberal Arts, Social Work, Business, Law, and Architecture. The curriculum is designed to prepare students for successful careers in existing and emerging fields related to aging. Core courses include a two-semester Introductory Seminar on Aging, Topics in Aging Research, a biomedical course, a psychosocial course, and two semesters of research methods. Students also take specialized elective courses, while performing research, beginning in the first year of the Program. All course work is completed in two years, allowing the students to concentrate full time on research from their third year on.

Each student is guided closely by an academic advisor and co-advisor to facilitate integration across disciplinary domains, and by a dissertation committee. To obtain the Ph.D., each student passes a written preliminary examination following completion of course work at which time the student advances to candidacy for the Ph.D. degree. Students prepare a dissertation research proposal, under guidance of the dissertation committee, then submit and defend orally a dissertation based on their own original research contribution to the field.

Distribution Requirements

- Students will complete the general sequence of studies under the guidance of the program advisor and program committee recommendations.

- 24 graduate credits in aging-associated core and elective courses
- 6 graduate credits in research methods/statistics
- 6 credits in the Introductory Seminar (Proseminar) during the first year of study
- 6 credits in the program seminar course during the first through third years or until advancement to Candidacy
- 3 to 6 credits of internship
- At least two semesters of dissertation research
- Credits in Aging Seminar are required through Year Three and thereafter until advancement to Candidacy and registration for Dissertation Research

Typical Schedule during Years One to Three

Year 1	
Fall	**Credit Hours**
Proseminar in Aging	3

- In addition, students are required to take an approved course in Responsible Conduct of Research (RCR). Several such courses are offered at Tulane. (See Vice President for Research website.) The course offered through the Office of Research consists of about six lectures and offers a certificate of completion. A similar course is offered for credit by the Master's in Clinical Research Program at the School of Medicine. There is also an online CITI course (See Vice President for Research website.) Students must complete one of these courses before the end of the second year. Documentation of completion must be provided to the program office. Ideally, this course is taken in the fall semester of the second year.
- All students are expected to regularly attend the activities included in the Seminar (AGST 7100), even though credit is not awarded after the third year or after advancement to Candidacy, whichever is later. This includes presentations of their work-in-progress. The Program Office schedules students for their work-in-progress seminars throughout the year, and each student must present at least once each year to remain in good standing in the program. These presentations and presence of all students at the work-in-progress seminars is mandatory.
- Graduate work is a full-time effort. The number of credit hours does not indicate the amount of time that the student devotes to this effort. Students are required to spend all of their time outside the classroom to study/research.
-

MD Degree Program

Programs

Graduate

- Medicine, MD (p. 371)

Medicine, MD

The curriculum for the School of Medicine is designed to prepare future physicians with the knowledge, skills, and behaviors required for any specialty field they choose. The pre-clinical curriculum (years 1 and 2) is taught as a series of system-based modules that progress through two phases. In Phase I, the foundational courses of histology, physiology, biochemistry, and genetics, along with foundations in medicine are organized into system-based modules structured to provide normal structure and function, while still maintaining the identity of each course. Phase II begins in the latter portion of Year 1 and provides the foundational knowledge and skills necessary for understanding pathophysiology and disease states, also in system-based modules containing microbiology, immunology, pathology, pharmacology, behavioral and neurosciences, and clinical medicine.

Students begin learning clinical skills early in Year 1. Specialty-based clinical training begins in May of Year 2 and continues

throughout most of Year 3. The final phase of the curriculum is designed to help students choose and prepare for their residency choice while enhancing skills in emergency medicine, radiology and cultural competence. The curriculum provides enough flexibility for early and numerous opportunities in community service and service-learning, dedicated time for students interested in dual degrees (MPH, MBA), or mentored research.

Pre-clinical MD curriculum in the School of Medicine is available only to those students who have been accepted into Tulane's MD program.

Clinical MD electives in the School of Medicine may be available to visiting students from United States medical schools who apply and are accepted for individual electives through AAMC's VSAS/VSLO platform. ***Tulane School of Medicine does not offer electives to visiting students from international schools of medicine.***

Current MD students in the School of Medicine should log into eMedley's eCurriculum for additional registration details, and for more details about courses and rotations, such as objectives, syllabi, permission to add, etc.

Requirements

Degree requirements

Students complete their pre-clinical curriculum (first and second years) as a cohort and are registered by the School of Medicine Office of Admissions and Student Affairs. First- and second-year students will receive information through email listservs and dean's hours about how and when to choose their preclinical electives.

Third-year students complete their seven required clinical clerkships in a lock-step fashion. Third-year students will receive information through email listservs and dean's hours about how and when to find information about their third-year clerkships through eMedley's eCurriculum, and how to request a particular clinical clerkship path.

Fourth-year students select block dates for their required fourth-year rotations and electives through a lottery system. Fourth-year students will receive information through email listservs and dean's hours about how to use eMedley's eCurriculum's registration and scheduling resources.

Year 1		**Credit Hours**
GANT 1008	Gross Anatomy	8
BIOC 1010	Biochemistry	7
GENE 1007	Genetics	1
HSTO 1001	Histology	5
PYSI 1002	Physiology	5
FIM1 1005	Foundations Med I	5
One pre-clinical elective in first or second year		1
	Credit Hours	**32**
Year 2		
BRBH 2006	Brain, Mind and Behavior	6
CLDG 2004	Clinical Diagnosis	3
FIM2 2005	Foundations Med II	2
IMMU 2001	Immunology	1
MICR 2000	Intro to Infectious Diseases	4
PATH 2002	Mechnms of Disease	14
PHAR 2003	Pharmacology	5
One pre-clinical elective in first or second year		1
	Credit Hours	**36**
Year 3		
Passing score on USMLE Step 1 [1]		
FAMY 3000	Family Medicine [2]	6
SURG 3000	Surgery	8
PEDS 3000	Pediatrics	8
PYCH 3000	Psychiatry	4
NEUR 3000	Neurology	4
OBGY 3000	Obstetrics & Gynecology	8
MED 3000	Medicine	8
	Credit Hours	**46**
Year 4		
Passing scores on USMLE Step 2 Clinical Knowledge [3]		
MED 4212	Community Health [4]	2
EMER 4020	Emergency Medicine	2
ACLS training (complete before EMER4020) [5]		
RADS 3020	Radiology	2
Acting Internship (see various departments)		4
Clinical electives (see various departments) [6]		26
5 Interdisciplinary Seminars (offered through Office of Medical Education)		
	Credit Hours	**36**
	Total Credit Hours	**150**

1. Students must record a passing USMLE Step 1 score by August 15 of their fourth year or they will be placed on leave of absence. See the Tulane School of Medicine handbook and policies for more information.
2. During some years that face interruptions or crises, such as natural disasters or pandemics, core clerkships may change course number or weeks' of duration. Students should monitor their Tulane email for updates to curriculum, and students should review their transcripts for any exceptions to the core third-year clerkships identified in this table.
3. Students must record a passing USMLE Step 2 score to graduate. Students are encouraged to take Step 2 by December of their fourth year. See the Tulane School of Medicine handbook and policies for more information.
4. Students in Tulane's MD/MPH combined program are exempt from the MED4212 requirement but must complete 28 weeks' worth of electives.
5. ACLS training is provided through Tulane University's SIM Center. Students should consult the SIM Center for available training days/times.
6. Students should monitor their emails daily: curricular changes may be necessary to accommodate classes that are affected by natural disasters, pandemics, etc. Students should note that online electives and teaching/tutoring/research electives may be limited. Students are encouraged to complete as many ***clinical*** electives as possible to prepare for the clinical demands of residency.

Program of Nursing

Overview

The Program of Nursing is an innovative collaboration between the School of Medicine and the School of Professional Advancement. The program is a School of Medicine program with the baccalaureate degree conferred by the School of Professional Advancement.

Administration

Brenda Douglas, PhD, RN, CNE
Dean, Program of Nursing

Mary Mayville, DNP, RN, CNE
Director of Curriculum and Academic Affairs

The Program of Nursing Mission

To prepare highly competent and compassionate nurses who think, learn, act, and lead with integrity and sound judgment. To serve the community by developing nurses who contribute to improving health outcomes through excellence in clinical practice and distinction in scholarly endeavors.

The mission of the program is consistent with, and captures the essence of, the mission of Tulane University and the mission of the School of Medicine with a focus on knowledge acquisition and leading with integrity and wisdom and improving the health of communities and translating best evidence into practice, respectively.

Program of Nursing Goals

1. Develop highly competent and compassionate Bachelor of Science in Nursing (BSN) degreed nurses who are prepared to enter the workforce.
2. Prepare students to provide competent team-based patient care across the lifespan with individuals, families, and communities in disease prevention/promotion of health and well-being, chronic disease care, regenerative or restorative care, and hospice/palliative/supportive care.
3. Inculcate students with a commitment to community and community health outcomes fostered through community immersion experiences incorporated throughout the program.
4. Support student success in the program through a robust student support structure with tangible and accessible services.

The goals of the program reflect the need to educate competent practice ready nurses for the changing healthcare landscape with a focus on prevention and primary and community-based care, and the essential need for interprofessional team collaboration and communication skills to coordinate care. Students will utilize team-based care and communication through purposefully threaded, practice-based inter-professional learning experiences alongside medical students. The goals further reflect the accountability of professional nurses to improve healthcare outcomes at the individual, community, regional, and national levels. Finally, to educate students to be successful requires support services that respond to the recognized investment of student personal attributes essential to successfully completing a BSN course of study. These attributes include cognitive ability, physical ability, and social ability, compassion, resilience and emotional intelligence. The program and the university are committed to providing tangible resources to students to support rapid professional growth and successful program completion.

Program of Nursing Student Learning Outcomes

1. Integrate theory and research-based knowledge from nursing, the arts, humanities, and other sciences to support the delivery of nursing care using sound clinical judgment.
2. Apply the nursing process utilizing effective communication, assessment skills, and respectful team-based relationships.
3. Integrate principles of population health to develop partnerships, and advocate for and evaluate action plans that implement health promotion, risk reduction, disease prevention, disease management, and health restoration strategies across communities of interest.
4. Demonstrate the ability to consider and evaluate nursing practice and critically assess and apply research to promote ongoing evidence-based practice.
5. Apply principles of quality improvement that support standardized, evidence-based patient care, contribute to a culture of patient and provider safety, and eradicate unsafe work environments.
6. Collaborate with inter- and intraprofessional teams maintaining a climate of mutual respect and utilizing effective principles of team dynamics to efficiently address patient, family, and community healthcare needs.
7. Describe the system processes, organizational relationships, and economic factors that impact healthcare delivery and healthcare outcomes.
8. Effectively use information and communication technology to gather data, deliver safe care, document accurately, and review ethical, legal, and professional care within regulatory standards.
9. Demonstrate ethical and professional behavior across practice settings and diverse populations.
10. Commit to personal well-being and professional development while engaging in self-reflective behaviors indicative of a capacity for leadership.

Accreditation

Tulane University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, master's, doctorate, and professional degrees. The Program of Nursing received SASCOC approval on February 6, 2024.

Tulane University received Louisiana State Board of Nursing approval on December 14, 2023.

The baccalaureate degree in nursing program at Tulane University is pursuing initial accreditation by the Commission on Collegiate Nursing Education (www.ccneaccreditation.org). Applying for accreditation does not guarantee that accreditation will be granted.

Academic Policies

This catalog informs students of the nursing policies, procedures, and expectations of the Tulane University Program of Nursing. Failure to read these, and those for the School of Professional Advancement, does not excuse the student from any of the policies described in these publications. The Academic Policies and Procedures for the Program of Nursing, where different, supersede those of the School of Professional Advancement.

ACADEMIC POLICIES

General Policies

Judicial Declarations

Any student issued citations, summons, warrants, or arrests after initial approval to enter a clinical nursing program must disclosed such to the Dean of Nursing and the Louisiana State Board of Nursing (LSBN). All arrests related to driving while impaired are reportable. Failure to notify the program of an arrest or charge is grounds for disciplinary action up to and including dismissal from the program, regardless of whether the arrest or charges lead to conviction. (per Louisiana Administrative Code (LAC) 46: XVLII.3331. 3405. 3915).

Medical Disclosures and Restrictions

After initial approval to enter a clinical nursing program, any student diagnosed with a medical, physical, mental, or emotional condition that could impact their ability to safely practice as a nursing student, must disclose this condition to Dean of Nursing and the LSBN. Failure to notify the program of a condition is grounds for disciplinary action up to and including dismissal from the program. (per LAC 46: XVLII.3331. 3405. 3915).

When returning to any class, laboratory, and/or clinical experience after any event, injury, illness, or other health-related situation that may affect personal or patient safety, the student must present a written physician's release that they meet the Program of Nursing's Technical Standards and are free to participate in all practicum activities.

Technical Standards for Admission and Progression

Tulane University Nursing Program has a responsibility to educate competent nurses to care for their patients (persons, families and/or communities) with clinical judgment, broad-based knowledge, and well-honed technical skills. The nursing program has academic as well as technical standards that must be met by students to successfully progress and graduate from its program.

Tulane University Nursing Program provides a description and examples of technical standards to inform prospective and enrolled students of the performance abilities and characteristics that are necessary to successfully complete the requirements of the Baccalaureate in Nursing program. Individuals applying for admission to the program must review these standards to understand the skills, abilities, and behavioral characteristics required to successfully complete the program. Technical Standards may be found in the Program of Nursing Student Handbook. All program applicants must digitally sign that they have read and meet the Nursing Program's Technical Standards that are accessed via a link in the application.

ADA Accessibility Statement

Tulane University wishes to ensure that access to its facilities, programs, and services is available to all students, including students with disabilities (as defined by Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990, and the ADA Amendments Act of 2008) and all students can study and practice nursing with or without reasonable accommodation. If a student has a disability and needs accommodation, it is their responsibility to initiate contact with the Goldman Center for Student Accessibility and request accommodations through the established process. If approved by Goldman, make arrangements as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. I will never ask for medical documentation from you to support potential accommodation needs. Goldman Center contact information: Email: goldman@tulane.edu; Phone (504) 862-8433; Website: https://accessibility.tulane.edu (https://accessibility.tulane.edu)

Equity, Diversity, and Inclusion Statements (EDI)

"Equity, diversity, and inclusion (EDI) are important Tulane values (https://president.tulane.edu/core-values/) that are key drivers of academic excellence in our learning environments. In our drive for academic excellence, we seek to ensure that students, faculty, and staff across diverse social identities, cultural backgrounds, and lived experiences can thrive - especially those from underrepresented and underserved communities (e.g., race/ethnicity, gender identity and expression, sexual orientation, disability, social class, international, veterans, religious minorities, age, and any other classification protected by applicable law - see Tulane's Nondiscrimination Policy (https://hr.tulane.edu/laws-policies-guide-our-work/)).

The American Association of Colleges of Nursing (AACN, 2017) "recognizes diversity, inclusion, and equity as critical to nursing education and fundamental to developing a nursing workforce able to provide high quality, culturally appropriate, and congruent health care in partnership with individuals, families, communities, and populations. AACN is committed to preparing a community of scholars, clinicians, educators, and leaders who fully value the importance of diversity, inclusion, and equity to promote the health of the nation and the world."

Codes of Conduct

Tulane University Code of Student Conduct

Tulane University maintains a code of conduct applicable to all students. Please follow the link https://conduct.tulane.edu/code-conduct (https://conduct.tulane.edu/code-conduct/) for the full Code of Student Conduct document, which is updated annually.

School of Professional Advancement (SoPA) Undergraduate Code of Academic Conduct

SoPA maintains a code of academic conduct applicable to all SoPA students, except as superseded by the Program of Nursing Code of Professional Conduct. Please follow the link https://sopa.tulane.edu/student-information/policies (https://sopa.tulane.edu/student-information/policies/) for the full SoPA Code of Academic Conduct.

Program of Nursing Code of Professional Conduct

The Program of Nursing (PON) abides by Tulane University's Student Code of Conduct and process and the School of Professional Advancement (SoPA) Undergraduate Code of Academic Conduct (https://sopa.tulane.edu/student-information/policies/) and utilizes the School of Medicine's Code of Professional Conduct as its framework. If a student is alleged to have violated the Nursing Code of Professional Conduct in addition to the University Student Code of Conduct and/or the SoPA Undergraduate Code of Academic Conduct, the student may be charged under each Code separately. A full copy of the Nursing Code of Professional Conduct is available in the program office and the Program of Nursing Student Handbook.

The Tulane Healthcare Community believes that a profession gains its credibility by its commitment to society. As a professional group, we recognize our multiple responsibilities to our patients, colleagues, communities, families, and ourselves. Realizing that it is a privilege and an honor to be a healthcare professional, we hold the following ideals:

- Patient welfare is our primary concern, for only by this commitment do we justify the trust placed in us by patients and the community at large.
- Relationships with our peers, faculty and staff are an essential part of professional conduct.
- Integrating personal growth into our professional development is essential to our commitment to nursing.

- As nursing professionals, we shall strive to be responsible citizens and strive to instill and uphold the values and ideas set forth in this policy.

Definitions: Unprofessional behavior is defined as behavior that violates these ideals. These behaviors include, but are not limited to:

- acting improperly towards patients, supervisors and/or peers.
- disrespect for faculty, patients, supervisors and/or peers.
- dishonest, unethical and/or illegal behavior.
- failure to meet clinical responsibilities.
- failure to correct deficiencies in academic performance in a responsible and timely fashion.
- attempts to purposely impair another student's educational opportunity.
- acting in a manner which is detrimental to the moral and ethical standards of the profession.
- acting to knowingly deceive another student, faculty member, or peer with the intent to gain advantage, academic or otherwise, for said student or for any other student.
- Cheating, knowingly circumventing any course requirement, or stealing including:
  - Plagiarism.
  - signing another student's name on an attendance sheet.
  - taking photos of exam materials/keys, even if for personal use.
  - discussing or sharing exam questions with another student.
  - presenting the same work for credit in two separate courses.
  - tampering with academic records.

Disciplinary Action and Due Process Policy: Unprofessional behavior will not be tolerated. The Program reserves the right to dismiss or terminate any student for cause. Causes for dismissal or termination include, but are not limited to:

1. A student who violates Louisiana Administrative Code (LAC) 46:XVII.3331 *Denial or Delay of Licensure, Licensure by Endorsement, Reinstatement, or the Right to Practice Nursing as a Student Nurse.* Specifically:

   - A student will be denied the right to practice as a nursing student for infractions listed in 3331.A. and will be dismissed from the program.
   - A student will be denied the right to practice nursing as a student nurse for up to five years for infractions listed in 3331.B., will be dismissed from the program, and is potentially eligible for readmission after five years.
   - A student will be delayed in the ability to progress in the program for infractions listed in 3331.C., and will be placed on a Leave of Absence as described in the Program of Nursing Withdrawal and Leave of Absence Policy, or dismissed from the program.

2. Behaviors as noted in the Practicum Course Critical Incident Policy III.C.

3. Behaviors in Violation of the Program of Nursing Code of Professional Conduct.

Initially, perceived breaches of this code should be discussed privately among the parties. If private resolution is not possible and alleged violations of the PON Code of Professional Conduct have been reported, the following process will be followed:

Notice: The complainant shall notify the PON Director of Curriculum & Academic Affairs of their concerns in writing. Only Tulane students, faculty, and staff members may file a complaint. The PON Director of Curriculum and Academic Affairs will provide the respondent with a copy of the allegations in writing including: the nature and occasion of the allegations, the name of the complainant, and copies of the documents pertinent to the allegation within seven (7) business days after the occurrence of events or as soon as practical. This material will be sent to the student's Tulane email address.

If the respondent(s) in the case inform(s) the PON Director of Curriculum & Academic Affairs that they plan to accept responsibility, the respondent may waive the hearing.

Hearing: The PON Director of Curriculum and Academic Affairs will convene a Student Professionalism Committee hearing panel to review the charges brought against the respondent. The purpose of the hearing is to provide the complainant and respondent with an opportunity to be heard and to supply the Student Professionalism Committee with the relevant information necessary to reach a decision. A hearing is not a legal procedure and as such, formal rules of process, procedure, and/or technical rules of evidence, such as are applied in criminal or civil court, are not used in these proceedings. Polygraph tests are not admissible as evidence.

Evidence Standard: Student Professionalism Committee members shall make decisions about alleged violations based on the principle of "preponderance of the evidence" (i.e., that the alleged violation is more likely than not to have occurred.)

Hearing Date: The Student Professionalism Committee will make every effort to process cases in a timely manner. Effort will be made to convene a hearing within a reasonable time, generally fifteen (15) working days of the responding student's notice of allegations.

Student Professionalism Committee Hearing Panel: The hearing panel shall consist of two full-time nursing faculty, one adjunct or clinical nursing faculty, two nursing students, all of whom are eligible to vote, and the PON academic advisor who is a non-voting member. One full-time and one adjunct or clinical nursing faculty are appointed by the PON Dean, and one full-time faculty is elected by the PON Faculty Organization

Failure to Appear: If a respondent, having been notified, does not appear before the hearing panel, the information in support of the charges shall be presented and the hearing shall proceed. The respondent may send written testimony to be included in lieu of appearing. There shall be no penalty for not appearing at a hearing. If the complainant cannot appear at the hearing, they must send a proxy or be available by phone. If the complainant is unreachable at the hearing, the hearing may be canceled or rescheduled.

Testimony: If a person is called before a hearing panel, the person is obligated to be completely honest.

Witnesses: The PON Director of Curriculum and Academic Affairs shall consult with the complainant and the respondent, if necessary, to ascertain what witnesses should be called in the hearing.

Procedures for Hearing Panel: Hearings shall be conducted in private. The PON Director of Curriculum and Academic Affairs shall preside over each hearing panel as Hearing Chair and shall notify all parties of the date and time of the hearing. If the Chair is unable to preside, the Dean will assign a faculty member to replace them.

Evidence: Relevant documentary evidence and written statements may be accepted as information for consideration by the hearing panel at the discretion of the Chair. Relevant evidence submitted regarding the allegations should be shared with the parties and the hearing panel within a reasonable time before the hearing. All procedural questions are subject to the reasonable discretion and final decision of the Chair. Formal rules of process, procedure, and/or technical rules of evidence, such as are applied in criminal or civil court, are not used in proceedings. All testimony given in a hearing is to be held in confidence. All witnesses must be called to give substantive testimony rather than to serve as character witnesses. The respondent may make a statement before the hearing panel, examine or dispute evidence, make no statement, or decline to respond to any questions.

The Chair will lead any questions submitted to the parties during testimony. After hearing evidence and witnesses in the case, the panel will vote to determine responsibility, based on the preponderance of evidence; a majority is necessary. All members other than the Chair are required to vote. No member of the panel will be allowed to vote unless they have been present to hear the evidence in the case.

The Chair shall notify the respondent of the results generally within five (5) working days after the hearing. If the respondent is found not responsible, there will be no report of the case on their permanent record or in School records. If the respondent is found responsible, the hearing panel will recommend sanctions to the Chair. The history of violations or alleged violations by a respondent is not relevant to determining responsibility in a new case. Hearing panel members will be presented with information about past violations only after they have voted on responsibility, and this information is used only for the purposes of sanctioning students who are found responsible for repeat violations.

Sanctions: Sanctions for violations are imposed on the basis of the severity of the infraction and any history of repeated violations by the student. The appropriate sanctions will be determined by the Chair of the hearing for students who are found responsible.

Appeals Process for Findings: Any student has a right to appeal the determination of the finding and/or consequences delivered only for specific reasons set forth below:

1. Procedural Error: Material deviation#from procedures that substantially impacted determinations of responsibility or sanctions#applied (this may include a bias or conflict of interest).
2. New and Substantial Evidence: New and substantial evidence appeared that could have not reasonably been discovered before the determination of responsibility was made.
3. Disproportionate Sanctions: Where sanctions are grossly disproportionate to the findings of#responsibility. Ordinarily, a student or has#ten#(10) days to file an appeal from the delivery of written notice of#final outcome from the Chair of the Student Professionalism Committee hearing panel.

- The appellate panel will consist of three members. Panel members will be drawn from the Student Professionalism Committee. Individuals who served on the original hearing panel will not be allowed to serve on the appellate panel for the same case.
- The appeal must consist of a plain, concise, and complete written statement outlining the grounds for appeal and all relevant information to substantiate the basis for the appeal. The appeal must be sent to the Hearing Chair via Tulane email. The Chair#will#acknowledge#receipt of the written appeal#in writing. The Chair will then assess the written appeal to determine whether the appeal is timely filed and, if so, whether the appeal is properly framed based on the permissible grounds.#If the Chair determines that the appeal does not properly fit within one of the specific grounds for appeal, the appeal will be denied. If the appeal is properly filed, the appellate panel may offer impacted individuals the opportunity to review the written appeal and offer their perspectives to the appellate panel. #If multiple individuals appeal, the appeal documents from each party will be considered together in one appeal process.#In all appeals, the appellate panel will presume that decisions were made reasonably and appropriately, unless there is compelling information to the contrary.#Appeals are not intended to be a rehearing of the matter. Most appeals consist of a review of the written documentation or record of the original hearing and pertinent documentation regarding the grounds for appeal.#The appellate panel may speak to the complainant, respondent, witnesses, Chair, or any impacted individuals, as appropriate.
- The appellate panel may, by majority vote:

• Affirm the determination of transgressions or consequences in whole or in#part.

• Alter the determination of transgressions or consequences in whole or in#part.

• Return the matter to the conduct officer or hearing panel with instructions to reconvene to cure a procedural error or reconsider the consequences delivered.

No situation will ever be remanded for reconsideration more than once. The appellate panel will transmit via email a written decision generally within ten (10) business days from the date of the appeal. Appeal decisions are final.

Student Support

Academic Advising and Guidance

Advising is an important component of the retention and success of Baccalaureate of Science in Nursing (BSN) students at Tulane University. PON Academic Advisors will aid in counseling, course scheduling, and career planning. PON advisors can also assist in the review of the student's academic transcript as they progress through the curriculum and with the final degree verification requirements.

Upon admission to the PON, academic advising is coordinated by the PON Academic Advisor. The PON Academic Advisor's name, telephone number, and email address is available and accessible from the Program of Nursing office.

Academic Advisors will be available to meet with students in person or virtually. Program advising is done prior to the start of each semester, with additional advising as needed throughout the semester. Specifically, the Program Academic Advisor will assist the student by:

1. Providing any needed clarification regarding the curriculum plan and sequence.
2. Providing guidance when adjustments in the planned curriculum are needed (e.g., failures, withdrawals, leave of absence, etc.).
3. Communicating with the student to ensure the student is progressing as per plan.

Academic Success and Tutoring

Students can schedule a 1:1 tutoring appointment with a peer tutor at https://web.penjiapp.com/schools/tulane (https://web.penjiapp.com/schools/tulane/). Select the ALTC Community.

A Program of Nursing Academic Success Coach is available to proactively provide academic and developmental guidance to students and will actively initiate and continue ongoing guidance to support student knowledge acquisition and progression.

Writing Coaching: You can schedule an in-person or virtual writing consultation with one of our Writing Coaches at https://web.penjiapp.com/schools/tulane (https://web.penjiapp.com/schools/tulane/). Select the Writing Center Community.

To get the most out of your writing appointment:

- Bring all prompts, drafts, notes, and relevant research/support materials with you.
- When you receive your appointment confirmation email, reply and attach a copy of your paper for the Writing Coach to preview prior to your session.
- Have specific questions or areas that you want to work on.
- We recommend that students schedule at least 2 sessions for an average paper and 3 for a major assignment. One during the brainstorming and research collection stage, the 2nd after the first rough draft has been completed, and the 3rd prior to submitting the final draft.
- Good writing requires time, and we strongly discourage last-minute appointments. Writing resources for academic writing, presentations, and ESL tools can be found on our website here: https://success.tulane.edu/altc/academic-writing-center. (https://success.tulane.edu/altc/academic-writing-center/)
- If you need help with research, citations, writing software, or citation apps, the Howard-Tilton Memorial Library has a Research Help Desk and Subject Area Librarians to help you. They also offer workshops and presentations on a variety of topics and tools that support research and writing. You can access their resources and contact a Research Librarian here: https://library.tulane.edu/services. (https://library.tulane.edu/services/) (https://web.penjiapp.com/schools/tulane/)

Healthcare and Counseling Services Policy

Tulane University has a well-developed student support system in place with a mission to advance the health and well-being of Tulanians by providing a comprehensive suite of health and counseling services that includes prevention, maintenance, and treatment.

POLICY STATEMENT

Campus Health and Wellness is composed of the Health Center for Student Care, the Counseling Center, the Well for Health Promotion, the Campus Health Pharmacy, the Tulane Recovery Community, and Campus Recreation. Each of these offices plays a unique role in advancing our community's health and well-being. Students may access services at Campus Health and Wellness (https://healthandwellness.tulane.edu) related to nutrition, mental health, medical needs, fitness, and recovery services.

Students are assessed a mandatory fee each semester as part of the University tuition and fees to afford them unlimited access to these services.

POLICY RESOURCES
Campus Health and Wellness (https://healthandwellness.tulane.edu/)

Retention and Student Support

The Student Professionalism Committee meets monthly, but no less frequently than quarterly, to review the academic progress of all students who have accrued deficiencies. The committee's role is to support as well as to evaluate students to assure their future success as nurses. Retention is a top priority of the committee and of the administration and faculty of the school. Struggling students are encouraged to seek help from the course faculty, the Student Success Coach, their Academic Advisor or the Director of Curriculum and Academic Affairs.

Counseling services for students is encouraged and supported. While adhering to fair and consistent policies, the committee shall also consider all extenuating circumstances that may affect a student's performance. An emphasis solely on academic performance runs contrary to the fundamental conviction of the faculty and administration at Tulane. Grades do not provide the sole criteria to determine the future performance of a nurse; nevertheless, the academic standards of the Program of Nursing must be maintained. Considering the responsibility to the public, the student Professionalism Committee shall be as flexible and as reasonable as possible under the circumstances regarding academic deficiencies. The faculty of the Program of Nursing wants every student to be successful and to graduate. It is expected that students having difficulties will take advantage of every resource available to them including going to class, meeting with course faculty, the Academic Advisors, the Student Success Coach, or the Director of Curriculum of Academic Affairs.

Title IX

Tulane University recognizes the inherent dignity of all individuals and promotes respect for all people. As such,#Tulane is committed to providing an environment free of all forms of discrimination including sexual and gender-based discrimination, harassment, and violence like sexual assault, intimate partner violence, and stalking. If you (or someone you know) has experienced or is experiencing these types of behaviors, know that you are not alone. Resources and support are available: you can learn more atallin.tulane.edu (http://allin.tulane.edu/). (https://allin.tulane.edu/get-help/)# Any and all of your communications on these matters will be treated as either "Confidential" or "Private". Please know that if you choose to confide, we are required by the university to share your disclosure in a Care Connection to the Office of Case Management and Victim Support Services to be sure you are connected with all the support the university can offer.#The Office of University Sexual Misconduct Response and Title IX Administration is also notified of these

disclosures.#You choose whether or not you want to meet with these offices. You can also make a disclosure yourself, including an anonymous report, through the form attulane.edu/concerns (https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fcm.maxient.com%2Freportingform.php%3FTulaneUniv%26layout_id%3D0&data=05%7C01%7Cdlaroch1%40tulane.edu%7Cc16c06f9ca1a437a0d8708dbca7e91d0%7C9de9818325d94b139fc34de5489c1f3b%7C0%7C0%7C638326417197574950%7CUnknown%7CTWFpbGZsb3d8eyJWIjoiMC4wLjAwMDAiLCJQIjoiV2luMzIiLCJBTiI6Ik1haWwiLCJXVCI6Mn0%3D%7C3000%7C%7C%7C&sdata=p%2FxnKivM2IThaksfdw3fsJB5GKEApYMXvXd98NOlnzM%3D&reserved=0).

Anti-Discrimination and Harassment Policy

Tulane Program of Nursing adheres to the policies of Tulane University Code of Student Conduct and the Equal Opportunity/Anti-Discrimination Policies.

Emergency and Disaster Preparedness Policy

Tulane University's Office of Emergency Preparedness and Response (OEPR) provides comprehensive emergency management services for Tulane University to prepare for, respond to, recover from, and mitigate against the adverse impacts of disasters regardless of type, scale, or causality. The OEPR is charged with the preparation, prevention, and response to all-hazards events at Tulane University. The OEPR coordinates the University's response in a variety of emergency situations, activating Tulane's Incident Command team, issuing mass emergency communications, and coordinating with the City of New Orleans' Office of Emergency Management and with parishes (counties) in the Greater New Orleans Metropolitan area where Tulane has business operations.

POLICY STATEMENT

Tulane Program of Nursing adheres to the direction and policies of Tulane University's OEPR. In case of an emergency, nursing students are to follow the University's instructions for responding to the situation. Students rotating at facilities outside the New Orleans area should follow local emergency response policies and procedures. However, regardless of location, Tulane nursing students are never part of an emergency team and should always evacuate according to Tulane University's directions.

PROCEDURE

In the event of an emergency or impending threat, Tulane will send critical email, voice, and text messages to students, faculty, and staff at multiple telephone and e-mail addresses.

To ensure that Tulane has accurate and current contact information in the Office of the Registrar records, students, faculty, and staff should update their information through Gibson Online or the Registrar's Office.

Following an emergency that displaces students from campus, the University will provide updated information on the Emergency Notices website and activate the Tulane Alert Line to provide faculty, staff, students, and parents with up-to-date information regarding campus preparations, announcements about closing and reopening of university offices, and other relevant instructions.

If the School of Medicine is closed due to a city-wide evacuation notice, students are asked to finish their work and follow the University's evacuation procedures.

Nursing students, faculty and staff, and their families should develop their own personal emergency plans in the event New Orleans is threatened by a hurricane. Personal plans should include destination and transportation arrangements.

Protecting Student's Right to Confidential Educational Records Policy

The Family Educational Rights and Privacy Act of 1974, 20 U.S.C.§ 1232g, is a federal law that protects the privacy and accuracy of education records for students. FERPA applies to all educational institutions that receive funds under the Department of Education.

POLICY STATEMENT
Tulane Program of Nursing is committed to adhering to FERPA and ensuring the confidentiality of student education records in accordance with the Tulane University FERPA policy. Any disclosure of education records will only be made in compliance with FERPA.

Religious Accommodation Policy

Per Tulane's religious accommodation policy, every reasonable effort will be made to ensure that students are able to observe religious holidays without jeopardizing their ability to fulfill their academic obligations. Excused absences do not relieve the student from the responsibility for any coursework required during the period of absence. Students should notify their faculty within the first two weeks of the semester about their intent to observe any holidays that fall on a class day or on the day of the final exam.

Academic Calendar

The Program of Nursing academic calendar is built on a semester framework. Per academic year, there are three semesters - fall and spring and summer. The fall and spring semesters are 15 weeks long. The full summer session is 14 weeks. For details and dates, please

refer to: https://registrar.tulane.edu/academic-calendars (https://registrar.tulane.edu/academic-calendars/)

Academic Standards and Procedures

Program of Nursing Admission Criteria Policy

To be considered for admission to the Nursing Program students must meet and successfully complete specific prerequisite program requirements and complete a Nursing Program application. After acceptance into the Nursing Program, but prior to starting courses, students must submit to a criminal history record information check and complete documentation of health information and immunizations.
Link to the requirements: https://nextcatalog.tulane.edu/medicine/program-of-nursing/#newitemtext (p.)

Transfer Credit Policy

The Program of Nursing adheres to Tulane University policies and practices governing the transfer of college credits that are outlined by the School of Professional Advancement and the Tulane Office of Undergraduate Admissions for its prerequisite courses.

POLICY STATEMENT
As stated in the Program of Nursing Admission Criteria Policy, students may transfer up to 60 credit hours that fulfill Tulane University School of Professional Advancement core curriculum requirements and nursing major prerequisites. Nursing courses taken outside of the University may not be transferred for professional nursing program credit.
If a student has been terminated from a previous nursing program and is not eligible to continue at that school, the student will not be eligible to apply to the Tulane University BSN program for a period of seven (7) years from when they entered the previous nursing program.

POLICY RESOURCES

https://admission.tulane.edu/transfer/credit (https://admission.tulane.edu/transfer/credit/)
Program of Nursing Admission Criteria Policy

Progression Requirements Policy

Students will complete 60 credit hours of professional nursing coursework in 4 consecutive semesters following a prescribed program of study. Students in the nursing major may not register for any other courses.
POLICY STATEMENT
To be eligible to progress to successive courses in the nursing major, students must:
1. Obtain and maintain permission from the Louisiana State Board of Nursing to progress into Clinical Practicum courses.

    a. Complete the Louisiana State Board of Nursing Student License Application & Background Check (criminal history record information check).

2. Meet and maintain the University and Program of Nursing health and safety requirements. The PON follows the School of Medicine immunization requirements due to the nature of the students' studies and clinical work.

    a. Complete documentation of health information and proof of immunization compliance will be provided to Campus Health.
    b. Students will be withdrawn from courses if they fail to meet the requirements outlined by Campus Health.
    c. Students are not allowed to progress in the nursing program until evidence of compliance is submitted.

3. Maintain continuous enrollment in the nursing curriculum plan.

    a. Course Withdrawals and LOA

        i. Students who are voluntarily or involuntarily withdrawn from a nursing course are considered out of progression.
        ii. Based on the requirement that the theory course (NRSG xxxx) and the co-requisite practicum course (NRSG xxxx) are taken concurrently, a withdrawal in either the theory course or clinical course results in the student withdrawing from both courses.
        iii. Students who withdraw or request a Leave of Absence should refer to the Program of Nursing Withdrawal and Leave of Absence Policy.
        iv. A student who utilizes a partial medical withdrawal may repeat the course one time.

    b. Quality of Work - Course Failures

        i. Students who are unsuccessful in any single nursing course (earn a C-, or less than 73) will reach out to their program Academic Advisor for a modified program plan that follows course progression guidelines.
        ii. Students who fail two different courses or the same course twice will be dismissed from the program.

    c. Students receiving financial aid will also contact the Tulane Financial Aid Services. The PON follows Tulane University's Student Academic Performance Policy and appeal process for Financial Aid.

Program of Nursing Withdrawal and Leave of Absence Policy
Student Academic Performance Policy
Program of Nursing Grievance and Appeals Policy

Withdrawal and LOA Policy

A student may be required to withdraw from the nursing program or from the university, temporarily or permanently, for any of the following reasons: personal, medical and/or psychological conditions that significantly impact their ability to complete their academic pursuits. In some circumstances, personal and medical leaves of absence from the University provide the student with an opportunity to remain a matriculated student while also allowing time away for appropriate treatment and recovery.

POLICY STATEMENT
This policy mirrors the Tulane University Policies for withdrawal and leave of absence. Personal and medical leaves require approval and are allowed for no longer than two consecutive semesters without

reapplying for admission. Any student who wishes to request a withdrawal from all courses or a medical leave of absence from the Tulane Program of Nursing should begin by reaching out to their program Academic Advisor. The application procedure and impact will be discussed.

PROCEDURE
After meeting with their Nursing Program Academic Advisor, the student should attest to the
following:

- I understand the academic repercussions for taking a medical leave.
- The program requires that theory courses and the co-requisite practicum course are taken concurrently. A withdrawal in either the theory course or co-requisite practicum course results in the student withdrawing from both courses.
- I know that if I am receiving financial aid or a scholarship, I will need to connect with the appropriate Financial Aid counselor.
- I understand that I am responsible for getting the appropriate treatment while I am on leave, and that my readmission will be contingent on this treatment.
- I understand that there is a process to petition to return from medical leave.

A withdrawal for personal reasons requires the approval of the Program of Nursing Dean's Office and the School of Professional Advancement Dean's office. A withdrawal for medical reasons from all courses requires an official letter of recommendation from a physician in the Campus Health Center and the approval of Program of Nursing Dean's Office and the School of Professional Advancement Dean's office, in addition to other requirements and/or approvals as outlined on Tulane's web site pertaining to medical withdrawals. A partial medical withdrawal (from some but not all courses) after the published deadline for dropping a course may be permitted with supporting justification, the recommendation of the Campus Health Center and the approval of Program of Nursing Dean's Office and the School of Professional Advancement Dean's office.

The final deadline for medical withdrawals is the last day of classes each term. Requests for medical withdrawals should be made within the prescribed time periods/deadlines; requests for retroactive medical withdrawals are rare, evaluated on a case-by-case basis, and only granted upon showing of good cause for submitting the request after the deadline. Grades of W are assigned when a student withdraws for medical reasons after the Program of Nursing's last day to drop without record.

The Nursing Program will require a medical clearance before a student can continue studies in a semester that begins after administrative action has been taken on behalf of the student for medical reasons.

Students should contact their Academic Advisor to return from medical leave.

Students who are allowed a one or two-semester leave of absence should submit a letter of intent to resume study at least eight weeks before the start of the semester in which they wish to return.

Any student returning to the university after more than one calendar year will be required to complete the degree requirements in effect at the time of readmission.

Students who leave the Program without formal approval for a leave of absence must file an application for readmission.

Students who do not return to Tulane Nursing Program for a particular term and do not request a leave of absence by the deadline for doing so are not eligible to return without applying for readmission.

Quality of Work Standard and Grade Grievance Policy

The Program of Nursing abides by the School of Professional Advancement (SoPA) Code of Academic Conduct except as stated below and related to specific quality of work standards as listed in the Program of Nursing Progression Requirements Policy.

POLICY STATEMENT
Failure to meet the quality of work standard listed in the Program of Nursing Progression Requirements policy is grounds for Dismissal.

1. Students who fail two different courses (earn a C-, or less than 73) or who fail the same course twice will be dismissed from the program.
2. Students who wish to dispute a grade shall be addressed as follows:

Appeals Process for Grades.

1. To Course Faculty: The student who disputes a grade should go first to the course faculty within one month of receiving the grade or evaluation to cause a complaint. If no resolution can be reached within seven (7) days, the appeal goes to the Program of Nursing (PON) Director of Curriculum & Academic Affairs.
2. To PON Director of Curriculum & Academic Affairs: At the instruction of the PON Director of Curriculum & Academic Affairs, a meeting will be called of the PON Student Professionalism Committee to consider the appeal.
3. To PON Student Professionalism Committee: Both student and teacher are invited to submit written statements of their opinions concerning the grievance. Both parties and all pertinent evidence will be heard. The Committee will make a recommendation to the PON Dean within ten (10) days of receiving the statements.
4. To PON Dean: The PON Dean may uphold, reverse, or return for further consideration, the committee's findings within ten (10) days and communicate their decision in writing to all parties involved. The decision of the PON Dean is final.

POLICY RESOURCES
Program of Nursing Progression Requirements Policy.
SoPA Code of Academic Conduct

Probation

Any student who does not meet the minimum quality of work requirement, as stated in the Program of Nursing Progression Requirements policy, will be placed on academic probation. The status of probation lasts until it is removed as a result of academic improvement or ended by dismissal. Students who are placed on

probation are notified in writing that their academic progress is insufficient.

Dismissal and Termination Policy

The Program of Nursing (PON) abides by Tulane University's Code of Student Conduct and the and the School of Professional Advancement (SoPA) Code of Academic Conduct except as stated below and related to specific quality of work standards as listed in the Program of Nursing Progression Requirements Policy. The Program reserves the right to dismiss or terminate any student for cause.

POLICY STATEMENT

1. Failure to meet the quality of work standard listed in the Program of Nursing Progression Requirements Policy is grounds for Dismissal.
    a. Students who fail two different courses (earn a C-, or less than 73) or fail the same course twice will be dismissed from the program.
2. Causes for dismissal or termination include, but are not limited to:
    a. A student who violates Louisiana Administrative Code (LAC) 46:XVII.3331 Denial or Delay of Licensure, Licensure by Endorsement, Reinstatement, or the Right to Practice Nursing as a Student Nurse. Specifically:
        i. A student will be denied the right to practice as a nursing student for infractions listed in 3331.A. and will be dismissed from the program.
        ii. A student will be denied the right to practice nursing as a student nurse for up to five years for infractions listed in 3331.B., will be dismissed from the program, and is potentially eligible for readmission after five years.
        iii. A student will be delayed in the ability to progress in the program for infractions listed in 3331.C., and will be placed on a Leave of Absence as described in the Program of Nursing Withdrawal and Leave of Absence Policy, or dismissed from the program.
    b. Behaviors as noted in the Practicum Course Critical Incident Policy III.C.
    c. Behaviors in Violation of the Program of Nursing Code of Professional Conduct.

POLICY RESOURCES

PON Student Handbook
Progression Requirements Policy
Practicum Course Critical Incident Policy
Tulane University's Code of Student Conduct

Reinstatement Policy

Refer to the Program of Nursing Withdrawal and Leave of Absence Policy.

Graduation Requirements Policy

Students are required to graduate at the end of the term in which all degree requirements are completed. Students must submit an application for degree in the semester in which they plan to graduate. This application must be completed with the student's program Academic Advisor. When students apply for their degree, their work is evaluated by the criteria in place at the start of their work toward that degree.

POLICY STATEMENT
A candidate for a baccalaureate of science in nursing (BSN) degree must meet the following graduation requirements:

1. A minimum of 120 credits earned.
2. A cumulative grade point average of 2.000.
3. All financial obligations to the University must be cleared before the Registrar will release a diploma or a transcript.

Graduation Ceremonies Policy

Ceremonies will be held for BSN students at the culmination of their degree requirements:

1. The commencement ceremony is held only in May. Students completing degree requirements in August or December may, however, participate in the ceremony held the following May. All graduates who will not attend the commencement ceremony should request, with their academic advisor, that their degree be awarded in absentia.
2. A Program of Nursing Pinning Ceremony will be held at the completion of each semester for students completing their BSN degree requirements.

POLICY RESOURCES
Tulane Commencement Procedure
SoPA Requirements for Graduation

Record Retention Policy

The Program of Nursing adheres to the Tulane University policy for retention of academic records as documented in the Tulane University Catalog.

POLICY STATEMENT

1. Student Records
    a. Academic records, to include the application and final transcript, are kept by the University Registrar's Office and retained permanently.
    b. Additional student records, to include terminal clinical evaluations from each course, and graduation forms, are kept in electronic storage in a password protected Box file or in a secure locked cabinet in the Program of Nursing and retained for eight years from the time of enrollment of that student.
2. Faculty Records
    a. Faculty records shall be kept in electronic storage in a password protected Box file or in a secure locked cabinet in the Program of Nursing and shall comply with existing federal, state, and institutional requirements.

POLICY RESOURCES
https://catalog.tulane.edu/newcomb-tulane/#academicpoliciestext

Grading

Add/Drop Policy

The plan of attendance for the nursing curriculum is a set sequence of courses that spans the 4-semster program. Courses may not be added to any semester other than as identified in a student's modified program plans. Students who wish to drop courses must consult

with the nursing Academic Advisor or the Director of Curriculum and Academic Affairs.

Satisfactory/Unsatisfactory Grades
Nursing students may not avail themselves of the satisfactory/unsatisfactory option for nursing courses.

Auditing Courses
Nursing students may not take a nursing course on an audit basis.

Incomplete Grade
An Incomplete grade, '**I**', for the Program of Nursing is given only with the approval of the Director of Curriculum and Academic Affairs when extreme circumstances prevent a student from completing work assigned during the semester and with the understanding that the remaining work can be completed within 15 days.

An incomplete grade allows a maximum extension of 15 business days after the end of the term for the completion of the coursework. Students will work with their instructors to develop a plan and timeline to complete outstanding work and may not progress to subsequent clinical courses until the Incomplete grade is resolved successfully.

If the work has not been submitted by the deadline, the incomplete grade is converted to an F. Extensions of the 15-day deadline may be requested in writing by the student and must be approved by the instructor and the Director of Curriculum and Academic affairs. Extensions are approved only when a student has made an attempt to complete the missing work within the original 15-day period but, in the view of the instructor and the director, has been prevented from completing the work by some special circumstance beyond the student's control. Extensions must be approved before the 15-day deadline expires; extensions are not approved retroactively.

Maximum Credits
Nursing major students in good academic standing are allowed to register for up to 15 credits per semester.

Course Grade Determination and Standard
The requirements for satisfactory completion of the nursing courses are clearly stated in each course syllabus along with the process of grade determination. The final course grade for many undergraduate clinical nursing courses consists of a theory grade and a clinical grade. In order to progress in the curriculum, the student must achieve a minimum of a "C" in the theoretical component and a "C" in the clinical component.

The theory grade is determined by specific criteria outlined in the course syllabus. Nursing courses use a variety of methods for evaluating student achievement of course objectives. Because the practice of nursing is dependent upon integrating knowledge throughout the course of study, the quizzes, exams, and other assessments include previously covered material.

Grades are calculated to the second decimal place (hundredths column). Only the final course average is rounded off to the nearest whole number. Only the first decimal place (tenths column) is rounded. For example, a final course average of 79.50 is rounded to 80. An average of 79.49 is not rounded to 80.

Registration, Tuition, and Financial Aid

Registration
SoPA students are governed by the registration policies and procedures set by the university. Consult the University Catalog Registration Policies and Procedures (https://catalog.tulane.edu/university/#academicpoliciestext) regarding the registration and confirmation process.

Students in the Program of Nursing will be registered for courses by the nursing Academic Advisor. Students with registration holds should clear them prior to the start of the semester.

Tuition and Fees Policy
Tulane University maintains all information regarding tuition and fees for the Program of Nursing at Home | Tulane School of Medicine Nursing Program (https://nursing.tulane.edu/).

If, for any reason, a student must repeat a course or courses or an entire semester due to academic deficiency, appropriate tuition and fees based on the academic year of repetition will be charged.

Financial Aid
The Program of Nursing students are well supported by the Tulane University Financial Aid Office.

The University Financial Aid Office maintains information regarding aid on their website in matters of understanding how financial aid works and in identifying the resources necessary to make education affordable. Students eligible for financial aid will be assigned an advisor in the financial aid office.

The Tulane University School of Medicine Financial Aid Office is located in the Tidewater Building, 1440 Canal Street, Suite 1213. You may phone Financial Aid at 504.988.6135.

Course Policies

Online Student Participation Policy
This policy aims to establish reasonable expectations for participation while recognizing the diverse circumstances of online learners. It provides clarity on assessments and communication channels, while allowing flexibility for individual situations.

Participation Definition:

- Active participation includes, but is not limited to, contributions in discussion forums, engagement in live sessions, completion of assignments, and collaboration on group projects.
- The expectation is that students engage with module content for a minimum of 3 hours per credit hour per week.

Participation Expectations:

- Students are expected to engage in online activities per the syllabus, with meaningful and constructive contributions.
- A minimum of three meaningful discussion board posts per week in discussion forums is required. The standard requirement is an initial post and two substantive peer replies posted on two separate days and following course due dates. Students must post on three separate days.

- Attendance and participation in mandatory live sessions is required. For optional sessions, recordings will be made available for those unable to attend.
- Students actively engage with module content weekly even if there is no graded content required or due for that week.

Communication:

- Primary communication channels include discussion forums, emails through the Tulane email system and/or Canvas, and optional virtual office hours.
- To support communication efficiency, Tulane email should be available and accessible on your mobile device, smart phone, and personal computer. Contact Tulane IT (504)988-8888 for assistance.
- Instructors will respond to emails within 48 hours, excluding weekends and holidays.
- Online course netiquette guidelines must be followed for respectful and inclusive communication.

Assessment:

- Participation contributes to a percentage of the overall course grade as outlined in the course syllabus.
- Grading will consider the quality, relevance, and frequency of contributions.
- Grading rubrics will be provided for assessing participation.

Attendance:

Live session attendance is prescheduled and mandatory in some cases; attestation that recorded sessions were listened to will suffice in others. In case of unavoidable absence, students are expected to notify the instructor in advance.

Collaborative Activities:

- Group work is an integral part of any course, and students are expected to actively contribute to group projects.
- Clear expectations for individual and group responsibilities will be provided.

Acknowledgment:

- By enrolling in the course, students acknowledge that they have read, understood, and agreed to abide by the online student participation policy.

Student Attendance Policy

Students enrolled in professional nursing courses are expected to attend all online synchronous classes, orientation meetings, exams, lab and clinical learning experiences. Should the need for an absence arise, students are expected to notify the course faculty prior to the scheduled event. **All** student absences will be reported to the Director of Curriculum and Academic Affairs.

Absences and Consequences

The accelerated and rigorous nature of this program necessitates attendance to practice as a nurse in Louisiana. Class, lab, and clinical practicum absences will be managed as described below (**excluding proctored exams)**.

1. One absence in any course is at the student's discretion.
   a. Please note that it is recognized that students are adult learners and expected to exercise good judgement when determining the need for one synchronous class, lab, or clinical practicum absence.
   b. A clinical practicum experience is defined as one scheduled 6–8-hour day. A scheduled 12-hour clinical practicum equates to two missed clinical days.
2. If a student is absent for an online synchronous class or meeting, repeating covered material or supplying a make-up assignment is solely at the discretion of the course faculty. Course faculty are not expected to reteach critical content.
3. If a student is absent for one lab or clinical practicum (including simulation experiences), the student is required to successfully complete an 8-hour, proctored, unfolding case study offered at the end of the semester.
4. If extenuating circumstances occur and a student is absent for a second lab or clinical practicum (including simulation experiences), the student must provide documentation supporting the absence and complete a mandatory, pre-scheduled make-up session or clinical experience that reflects the missed clock hours.
5. Please be advised that a third absence from any required lab or clinical practicum (including simulation experiences) will result in lab or clinical practicum failure and the requirement to repeat the failed course. Failing a course results in a modified program plan and delays graduation. Modified program plans are developed in collaboration with the Program Academic Advisor.
6. Tulane PON recognizes that there are various reasons for absences including untoward circumstances. **All** absences are cumulative and follow the above guidelines.

Untoward Circumstances

Some examples of untoward circumstances include but are not limited to significant illness or severe injuries, death of an immediate family member, or jury duty.

1. An absence due to significant illness or severe injury *may require* a provider's note that the student is able to meet the PON Technical Standards to return to coursework.
2. In Louisiana, there are no exemptions for jury duty. However, students are expected to request a letter from the University to the judge requesting an exemption or reschedule due to their academic program.

Proctored Exams

Examinations are to be taken on the scheduled date and follow *PON Testing Rules and Procedures*.

1. Students reporting late for exams will only be permitted to utilize the time remaining for completion of the exam.
   a. Late is defined as ***no more*** than 10 minutes after the exam start time, if and only if the first student has not completed the exam and exited the exam room.
2. Rescheduling of the missed exam will not be permitted except in emergencies and under extreme circumstances.
   a. Only the Director of Curriculum and Academic Affairs can provide approval for the rescheduling of a missed exam. With approval, exam makeup will be arranged through the instructor and proctor.

b. Due to the rigor and accelerated nature of the Nursing Program, make-up exams are to be administered within five (5) business days of the missed exam; an alternate version of the exam will be administered.
c. An exam missed without prior faculty notification or without approval, results in a grade of zero (0).
d. Students are only permitted to miss, and make up, one proctored exam per semester across all courses.

Notification Procedures

- Lab: If a student is unable to attend a scheduled lab or simulation experience, students must notify the respective faculty by phone and provide written notification via Canvas Email or Teams *prior* to the start of the lab experience. If unable to contact the Course Faculty, then contact the Program site.
- Clinical Practicum: If a student is unable to attend a clinical practicum (including simulation experiences), students must notify the respective clinical faculty by phone and provide written notification via Canvas Email or Teams as soon as possible but *prior* to the start of the clinical practicum.
- Exams: Should circumstances occur at the time of any scheduled examination, it is the student's responsibility to contact the course faculty and the Program site *prior* to the examination.
- **All** student absences will be reported to the Director of Curriculum and Academic Affairs.

Class/Practicum Cancellation

Hybrid online courses are rarely canceled due to weather; plan ahead so that deadlines and due dates are met. In the event that an exam needs to be rescheduled due to a university closure, the Program of Nursing will utilize the weekend dates designated for makeup each year. These dates may be found in the Academic Calendar (https://registrar.tulane.edu/academic-calendars/).

Practicum/clinical experiences are canceled when weather conditions are such that it is not safe to have students and faculty to travel to or from clinical agencies. There will be no practicum if classes are cancelled on campus.

Procedure:

1. Obtain contact information for students, faculty members, and clinical facilities. Each faculty person should keep a copy of these listings and is responsible for contacting their students as soon as possible.
2. When considering the cancellation of any practicum/clinical experience, the faculty member will confer with the Director of Curriculum and Academic Affairs who will make the final decision.
3. If weather conditions change while students are at clinical facilities, the faculty person may decide to conclude the practicum/clinical at an earlier hour and will notify the Director of Curriculum and Academic Affairs.
4. Alternative learning experiences will be completed in the event of practicum/clinical cancellations.

Student/Faculty Expectations for Online/Hybrid Coursework

It is important to be aware of your behavior in an online learning environment to ensure positive interactions with your instructor and peers. This requires you to follow some guidelines for behaviors.

Online Course Netiquette

Netiquette, a social code that defines "good" online behavior is something to keep in mind during your online course interactions. Online may be the only means of communication you have with classmates and instructors, so it is especially important to do this effectively. Follow the guidelines below to leave your mark as a knowledgeable, respectful and polite student who is also positioned to succeed professionally.

Be Professional:
Do: Always represent yourself well. Be fully and appropriately clothed. Be truthful, accurate and run a final spell check. Treat online meetings with professionalism (dress appropriately, use your webcam, be in a quiet place without distractions, be respectful of others time/effort).
Avoid: Entering an online meeting in public places or partially clothed. Avoid consuming a meal during meeting times. Limit the use of slang and/or emoticons. Avoid using profanity or participating in hostile interactions.

Be Scholarly:
Do: Use proper language, grammar and spelling. Be explanatory and justify your opinions. Ask for clarification. Try to find the answer before asking for help. Credit the ideas of others through citing and linking to scholarly resources.
Avoid: Misinforming others when you may not know the answer. If you are guessing about something, clearly state that you do not know the answer.

Be Respectful:
Do: Respect privacy, diversity and opinions of others. Communicate tactfully and base disagreements on scholarly ideas or research evidence.
Avoid: Sharing another person's professional or personal information.

Be Polite:
Do: Address others by name or appropriate title and be mindful of your tone. Treat people as if you were in a face-to-face situation. Use respectful greetings and signatures, full sentences and the same "please" and "thank you" you use in real life.
Avoid: Using sarcasm, being rude or writing in all capital letters. Written words can be easily misinterpreted as they lack nonverbals.

Late Assignments

Students enrolled in professional nursing courses are expected to turn in all assignments, homework, case studies, care maps, and discussion board posts and replies on or before the scheduled due date.

1. In the event of an unexpected situation, students who notify their course or clinical instructor before the due date may be granted a 24-hour extension for submitting assignments, excluding quizzes and proctored exams.
   a. This allowance can be utilized up to two times per course, applicable to both initial discussion posts and responses.

i. In instances where a student is unable to participate in a discussion post assignment before the closure of the discussion board, the student will be required to complete an alternative assignment. The alternative assignment will be of comparable effort and intellectual engagement as the original discussion post and designed to meet the same learning outcomes.

b. Assignments submitted after the 24-hour extension will incur a 5% penalty per day for up to three days (72 hours). Beyond this period, a grade of zero will be assigned.

2. In the event of an unexpected situation, the student who fails to notify the course or clinical faculty before the scheduled due date must submit written notification to the faculty with a copy to the Director of Curriculum and Academic Affairs within 24 hours of the due date.
   a. Failure to provide written notification within 24 hours of the due date will receive a zero.
   b. The student will receive an automatic 5% deduction for each day the assignment is late up to three total days (72 hours). After 72-hours, from the time that the assignment was due, the student will receive a zero (0) for the assignment.

Testing Policies

Proctored Exam Settings

Randomization:

1. Exams will be randomized.
2. Questions will be placed into categories with question sets (several questions that pertain to the same scenario) and the questions will be randomized within that category or set.
3. When questions build upon one another, case study information will be repeated with each question that relates to that information and randomized with all test questions.

One Question at a Time:

1. Exams will be presented one question at a time to minimize potential exam security issues and allow each question to be saved when completed.

Back-tracking:

1. Back-tracking is permitted.
2. Students will be permitted to skip a question without answering it, or flag it, and return at their convenience.
3. Students may review the exam in its entirety before submitting it.

Multiple Select (all or none):

1. Partial/penalty (aligns with Next Generation NCLEX scoring): Students will earn corresponding points for correct answers but will lose corresponding points for an incorrect answer. The total score for a multi-point item is the sum of all positive and negative points. While mathematically you could have a negative score, it gets rounded to 0/no credit.

Testing Room Rules and Procedures

The following rules are to maintain a secure, proctored testing environment.

1. Students are asked to use the restroom prior to the start of the exam.
2. Students should not enter the computer lab until the proctor opens the doors to begin the test.
   a. Proctors will keep the door closed until 10-minutes before the start time to allow students to enter.
   b. Students will enter, sign their name on the sign-in sheet, and proceed to their assigned Chromebook.
   c. Students must show photo ID at time of sign-in.
3. Students reporting late for exams will only be permitted to utilize the time remaining for completion of the exam.
   a. Late is defined as no more than 10 minutes after the exam start time, if and only if the first student has not completed the exam and exited the exam room.
4. Proctored exams will be taken on provided Chromebooks unless there is a specific accommodation that has been requested through the appropriate university channels prior to testing, or there is a disruption that requires testing to be delivered in another format (power outage, etc.).
   a. In the situation of computer malfunction, the proctor will print the tests on paper and follow the prescribed Paper Testing Procedure.
5. If applicable, specific directions will be announced, such as seating arrangements, passwords, completion of the answer sheets, etc.
6. All personal belongings (backpacks, bags, coats/jackets, cell phones, etc.) must be stored in student lockers away from the testing area, without exception. Locks are recommended to protect valuables.
   a. Food or drinks are not permitted.
   b. Cell phones or other electronic devices (including smartwatches) are not permitted in the testing room. These devices must be turned OFF or set to airplane mode during testing.
   c. Bulky jackets or coats should be removed and placed with the student's belongings.
   d. Hats of any kind are not permitted.
   e. Hoods (including hooded sweatshirts), scarves, or other similar clothing/accessories are not permitted.
   f. Students should dress appropriately for the temperature of the building, so as to avoid needing a bulky jacket, coat, or hat.
   g. Students may utilize site provided foam earplugs.
7. Pencils, scrap paper, and calculators will be provided. Students are not permitted to use their own pencils, scrap paper, or calculators. All scrap paper (whether used or not) is to be turned in to proctor at end of test. No mechanical pencils will be allowed.
8. Students are not permitted to leave the testing room once the test has started. Individual emergency issues will be handled on an individual basis.
9. A proctor will be present in person, accompanied by a course faculty member (in person or remote), and will not answer any content related questions during the test, and may answer:
   a. Questions about the testing process and associated rules.
   b. Questions about spelling errors, misnumbering/lettering, technical test errors, etc.
10. Once the student has completed the test, all calculators, pencils and mice must be returned to their original places. Scrap paper (used or un-used) must be given to the proctor. The student then must leave the test room immediately.

11. Out of courtesy to other students still testing, the student should exit the testing environment quietly and should not congregate in the hallways outside of the testing room. Talking is very distracting to those who are still testing.
12. Students are not under any circumstances to discuss the exam or its contents until all students have completed testing (including any students who schedule a makeup exam). Students are bound by the university policies related to academic integrity.

Missed Exams Policy

Rescheduling of the missed exam will not be permitted except in emergencies and under extreme circumstances.

1. Should circumstances occur at the time of any scheduled examination, it is the student's responsibility to contact the course faculty and the Program site prior to the examination.
2. Only the Director of Curriculum and Academic Affairs can provide approval for the rescheduling of a missed exam.
    a. With written approval, exam makeup will be arranged through the instructor and proctor.
3. Due to the rigor and accelerated nature of the Nursing Program, make-up exams are to be scheduled and administered within five (5) business days of the missed exam.
    a. An alternate version of the missed exam will be administered.
    b. Testing room rules and procedures will be followed.
4. An exam missed without prior faculty notification or without approval, results in a grade of zero (0).
5. Students are only permitted to miss, and make up, one proctored exam per semester across all courses.
6. All student absences will be reported to the Director of Curriculum and Academic Affairs.

Paper Testing Procedure

The following procedure will be used in the event that a network is down, there is a power outage, or other unforeseen circumstances require students to test on paper instead of using the online platform.

1. Proctor will print a copy of the exam and bubble sheet for each student.
2. Students will be given a copy of the exam and bubble sheet to fill in their answers.
3. Proctor will notify students of the following:
    a. Students must write their name on both the bubble sheet and exam (for tracking).
    b. Students will record their answers on the bubble sheet.
        i. Answers on the bubble sheet will be the only answers accepted for grading purposes.
4. All entered exam answers will be audited by the Course Faculty.
5. The instructor will conduct all analyses and make any grading adjustments needed using Chi Tester.

Exam Scoring and Review Policy

Exam Scoring:

1. Exam scores will not be released until the course faculty analyze the exam.
    a. Analysis will be accomplished within 48 hours of exam completion.

Exam Review:

1. A conceptual exam review will be scheduled by course faculty following all proctored exams and within one week of exam completion.
2. Individual student performance and specific test questions will not be discussed.
3. Students who wish to review their individual exam may submit a formal request to course faculty & proctor, within one week of completing their exam.
    a. Upon receipt of the student's request, the proctor will schedule 15 – 30 minutes for exam reviews to occur between 2-7 days following the completion of the exam, with course faculty.
    b. Students will return to the testing room to review ONLY the questions they answered incorrectly.
    c. Faculty will be present in-person or virtually to provide rationale.

CLINICAL AND PRACTICUM POLICIES

Professional Attire and Behavior

General Expectations

Students are expected to abide by the Program of Nursing's professional attire and behavior policy and maintain a professional and business-like appearance while in all clinical areas, lab and simulation experiences. Patients expect that nurses will be dressed professionally. Professional attire inspires confidence among patients and helps to reinforce the nurse-patient bond.

Cell phones should be put on "vibrate or silent" and are not to be used in patient rooms or patient care areas. Practice good oral hygiene prior to attending practicum and lab. Gum chewing during the practicum, especially when talking with patients, is strictly prohibited. Students should remember that they are guests in the clinical organization and behave in a courteous and respectful, professional manner.

Hair

Hair must be clean, groomed, and secured off the face and above the collar, such that it cannot be grabbed by or touch a patient. Hair clips, pins, or headbands should be flat, inconspicuous and for the purpose of keeping the hair contained and may be brown, black, silver, or gold in color. Hats, caps, do-rags, skullcaps, stocking caps and or other headgear are not permitted. Hair ornamentation such as bows, ribbons, or cloth bandanas are not permitted. Head coverings worn for sincerely held cultural or religious beliefs may be permitted; they are not permitted for social or fashion reasons.

Facial hair should be neatly trimmed and follow CDC guidelines to fit entirely under a respirator mask without breaking the seal.

Jewelry, Piercings, and Body Art

One small stud in each earlobe is acceptable. No dangling earrings, bars, discs, or gauges are permitted. Necklaces and lanyards can pose a safety risk and are not permitted. Bracelets and rings interfere with proper gloving or glove integrity and are not permitted.

Facial piercings and tongue rings are also not permitted. Items placed on teeth, that are not required for dental or medical reasons, are not permitted.
Body art should not be visible; cover tattoos during clinical practicum experiences.

Fingernails
Fingernails must be clean, trimmed and neat and should not interfere with skill performance. No artificial, gel, acrylic extensions or fingernail jewelry is permitted. Polish, if worn, must be in good repair without cracks or chips. Clear polish is preferable however, some institutions do not permit any type of nail polish to be worn when caring for patients.

Footwear
Shoes must be clean, white, closed-toe, flat, and made of a sturdy material that will not absorb body fluids or potentially hazardous materials. Clogs, open toe, or fabric shoes are not permitted. Hose or socks should be worn with uniform shoes.
Shoes should be dedicated for clinical experiences, and maintained in a clean, professional condition.

Scents
While bathing is required and deodorant/antiperspirant recommended, students should avoid scented personal hygiene products such as hairspray, deodorant, body lotion, aftershave, or perfume. Patients and/or family members with Multiple Chemical Sensitivities may respond with an allergic response.

Students should refrain from smoking prior to clinical experiences to avoid a smoke odor on their clothes that may trigger an allergic response from patients and/or family members.

Uniforms and Watches
Students will wear the Program of Nursing's approved white scrub top and Tulane green pants, or scrub skirts. Uniforms are to be laundered after each use.
A wristwatch with a "second" hand is required. No digital dials. Watch bands should be a neutral color and able to be cleaned. Smart watches (i.e. Apple, Samsung, Fitbit, Pebble) and designer fashion watches are not permitted in clinical settings.

Accommodations to certain uniform requirements (for example, regarding head coverings) may be requested based on sincerely held religious beliefs. Requests for accommodations for religious reasons should be submitted to the Program of Nursing, Director of Curriculum and Academic Affairs.

Health and Safety Requirements
Immunizations
The State of Louisiana and Tulane University require students to have proof of immunity for certain diseases. All students are required to provide proof of immunization prior to arriving at Tulane. See https://campushealth.tulane.edu/immunizations/new-students for details and forms.

Additionally, after acceptance into the Program of Nursing Program and before starting courses, students must submit evidence of the following required immunizations. **Please note: some immunizations that are 'recommended' by the university are 'required' by the Program of Nursing for personal and patient safety.

All Program of Nursing immunization requirements will be tracked for verification and compliance through Complio.

1. Proof of immunity against measles, mumps, and rubella (defined as a series of two MMR vaccines with complete dates OR positive titers to all three diseases).
2. Tetanus, diphtheria, and acellular pertussis (Tdap) must remain current for the duration of the program.
3. Meningococcal (Meningitis) Vaccine.
4. Proof of immunity against varicella (defined as a series of two Varicella vaccines with complete dates OR a positive antibody test documenting immunity to Varicella).
5. Proof of immunity against Hepatitis B, (defined as a series of three Hepatitis B vaccines and positive Hep B Surface antibody testing results post-vaccine administration). If no response to the primary series, the vaccine series and follow-up Hep B Surface antibody test will be repeated.
6. Two negative tuberculin skin tests (TST) one within the past year (a negative serologic test may substitute for the yearly TST); if TST positive, a negative chest X-ray report within the previous three (3) months is required.
7. Proof of current seasonal influenza immunization. Campus Health offers no-cost flu shots on campus each fall (generally beginning in October) via our annual flu clinics. For incoming students, if you received the flu shot during the previous flu season, please upload proof of your vaccine.
8. COVID-19 Vaccine or waiver form.
9. Students who are opting out of any of the required vaccines for medical, religious or personal reasons must submit a waiver form online via the Campus Health Patient Portal. For each required vaccine a student wishes to opt out of, a separate waiver form submission is required. These waiver forms can be found by logging on to the Patient Portal, clicking on the Forms tab and scrolling down to the Immunization Waivers section.

Please note that students who opt out of new immunizations are still required to submit records of any immunizations they have received in the past.

Students who fail to provide required evidence of clinical compliance as listed above will not be allowed to enter clinical nor remain enrolled in any clinical course. Failure to renew health requirements that are expired during the semester will prevent the student's participation in clinical activities, which will constitute an absence.

Health Insurance Portability and Accountability Act (HIPAA) Regulations and Training
Patient information must remain confidential. To ensure proper confidentiality, the federal government enacted HIPAA legislation. HIPAA training is mandatory for all nursing students and must be updated annually. Training is offered online via Canvas and is documented by the Office of General Counsel. HIPAA training can be accessed by logging in using your Tulane credentials. Students will also receive an email regarding the course once assigned.

Universal Precautions Training
Universal Precautions as an approach to infection control to treat all human blood and body fluids as if they contain bloodborne pathogens. Blood-borne pathogen (BBP) training is mandatory for all nursing students and must be updated annually. Training is offered online via Canvas and is documented by the Office of Environmental Health and Safety. BBP training can be accessed by logging in using your Tulane credentials. Students will also receive an email regarding the course once assigned.

Blood-Borne Pathogen Exposure Policy

All students who have been admitted to Tulane University are required to provide proof of immunization compliance that meets Louisiana law, CDC, and American College Health Association guidelines. The Tulane Program of Nursing informs nursing students of policies and procedures to prevent and address accidental exposure to blood-borne pathogens before students undertake any educational activities that would place them at risk.

POLICY STATEMENT

Tulane Program of Nursing adheres to the policies of Tulane University's Campus Health in the event of a student's accidental exposure to Bloodborne Pathogens (on or off campus).

DEFINITIONS

Accidental Exposure: An exposure can be defined as a percutaneous injury (e.g., needlestick or cut with a sharp object), or contact of eye, mouth, mucous membranes, or non-intact skin (e.g., exposed skin that is chapped, abraded, or with dermatitis) with blood, saliva, tissue, amniotic fluid, cerebrospinal fluid, pleural/pericardial/synovial/peritoneal fluid, semen, vaginal secretions, or any other potentially infectious body fluids.

Blood-borne pathogens: Infectious agents including, but not limited to, hepatitis B virus (HBV), hepatitis C virus (HCV), and human immunodeficiency virus (HIV) infection.

PROCEDURE

1. What to Do if Exposed to Blood/Bodily Fluids:
   a. students should report any exposure to their nursing clinical faculty and preceptor (for precepted experiences), as well as the Nursing Director of Curriculum and Academic Affairs.
   b. If the exposure occurs during business hours (Monday through Friday, 8:30 a.m. to 5 p.m.), call the Health Center Downtown at 504-988-6929.
   c. If the exposure occurs at any other time (holidays, weekends, evenings, etc.), call the Nurse Advice Line at 504-862-8121.
2. Immediately After Exposure
   a. Wash the affected area.
   b. For an eye or mucous membrane exposure, flush the exposed area with water for five minutes.
   c. For skin exposure or an injury with "sharps", wash the area for five minutes with water and antimicrobial soap (ex: Hibiclens or Betadine).
3. Download the Bloodborne Pathogens Exposure Packet from: https://campushealth.tulane.edu/emergency/bloodborne-pathogens (https://campushealth.tulane.edu/emergency/bloodborne-pathogens/)
4. Print and complete all the forms included in the packet:
   a. Provider Checklist
   b. Student Checklist
   c. Supervisor/Faculty Checklist
   d. Occupational Exposure to Blood Borne Pathogens Management Algorithm
   e. Needlestick & Sharp Object Injury Report Form
5. Notify the Health Center:
   a. If the exposure occurs during business hours (Monday through Friday, 8:30 a.m. to 5 p.m.), call the Health Center Downtown at 504-988-6929.
   b. If the exposure occurs at any other time (holidays, weekends, evenings, etc.), call the Nurse Advice Line at 504-862-8121.

TUSOM Medical Student Handbook: Published by the Office of Admissions and Student Affairs *Revised November 2020*

Exposure to Environmental Hazards Policy

POLICY STATEMENT

Tulane University Program of Nursing informs nursing students of policies and procedures to address exposure to infectious and environmental hazards before students undertake any educational activities that would place them at risk. Nursing students are educated about the methods of prevention, procedures for care and treatment after exposure, including a definition of financial responsibility.

DEFINITION OF ACCIDENTAL EXPOSURE

An exposure can be defined as a percutaneous injury (e.g., needlestick or cut with a sharp object), contact of eye, mouth or other mucous membrane or non-intact skin (e.g., exposed skin that is chapped, abraded, or with dermatitis) with blood, saliva, tissue, or other body fluids that are potentially infectious. Exposure incidents place health care personnel at risk of diseases caused by a range of pathogens including hepatitis B virus (HBV), hepatitis C virus (HCV), human immunodeficiency virus (HIV) infection, Covid-19 and therefore should be evaluated according to protocol by a qualified health care professional.

Nursing students must immediately call the Student Health Center (located in the Elks Building) if exposed. During business hours, students should call 504.988.6929. During afterhours or weekends – students should call the Nurse Advice Line at 1.855.487.0290. During business hours, the student will either be scheduled a same day visit or a phone consultation with one of the physicians or nurses. After hours, the call will be directed to an all-call health care provider. Students also should report any exposure to their course faculty or clinical preceptor.

Drug Screening

The Program of Nursing conforms with and upholds all federal, state and local laws that regulate or prohibit possession, use or distribution of alcoholic beverages or illicit drugs. This policy reflects additional requirements for health care professionals to report suspected impairment and requires all nursing students to submit to a urine drug screen following acceptance into the program.

The use of certain drugs for "recreational" purposes is illegal and can have devastating consequences for you professionally. The Louisiana State Board of Nursing (LSBN) has strict rules and regulations in the Professional and Occupations Standards for Nurses (LAC 46: XVLII.3331). related to the Denial or Delay of Licensure, Reinstatement, or the Right to Practice Nursing as a Student Nurse and to determine eligibility for approval for clinical and licensure in Louisiana.

The LSBN clearly states, "Applicants for…the right to practice as a student nurse shall be denied approval to enter or progress into any clinical nursing course… if the applicant has pled guilty, nolo contendere or been convicted of a crime involving the production, manufacturing, distribution or dispensing of a controlled dangerous substance… possession of marijuana, synthetic cannabinoids, heroin…"

It is unacceptable for medical students, physicians, nurses, and other medical personnel to attend to patient care or other professional duties while under the influence of alcohol or any of the drugs mentioned above. It is the policy of the Program of Nursing to prohibit the use, abuse and presence of alcohol, illegal or unauthorized drugs, and other dangerous substances in the bodies of its nursing students while on duty engaged in any course, classroom, laboratory, and/or clinical setting.

The Program of Nursing will require a urine drug screen for all program-enrolled nursing students following their acceptance into the program, randomly, and for reasonable suspicion for cause. Students who fail to successfully complete their initial drug screen one week prior to the first day of classes will have a hold placed on their account and may be dropped from their nursing courses. The hold will be lifted when drug test results are available and cleared.

Reasonable Suspicion Testing or "For Cause" – any student may be tested who is suspected of being under the influence of alcohol or drugs where the suspicion is based on, but not limited to, any of the following:

1. Observable behavior or physical symptoms such as staggered gait, slurred speech, glassy, blood shot eyes, body odors or unkempt appearance, and unsatisfactory work performance.
2. A pattern of inappropriate, abnormal or erratic behavior.
3. Reliable objective information/observation from independent sources.
4. Evidence of drug tampering or misappropriation.
5. Arrest or conviction of a drug/alcohol related offense.
6. Being identified as the subject of a criminal investigation regarding drugs. Patterns of absenteeism or tardiness without explanation.

- In the case of a positive drug test indicating use of a prescription medication:

1. The student will be given 48 hours to produce a valid prescription for the medication to the drug screening facility.
2. If the issue is not resolved in 5 business days, the student is subject to disciplinary action through procedures outlined in the Tulane University Code of Student Conduct and the Program of Nursing Code of Professional Conduct, up to and including dismissal from the program.
   a. Please note: Pre-licensure students must comply with LSBN requirements for disclosure of medical conditions and prescriptions.
   b. Disciplinary action may still apply regardless of validation of a prescription based on professional behavior and/or patient safety concerns.

- In the case of a positive drug test for illegal drug usage or misuse of prescription drugs:

1. The student may be subject to disciplinary action through procedures outlined in the Tulane University Code of Student Conduct and the Program of Nursing Code of Professional Conduct, up to and including dismissal from the program.
2. Any student admitted who tests positive for illegal or illicit use of drugs must withdraw from all nursing courses and will be reported to LSBN. They can reapply for progression after being approved to progress by the LSBN and upon completion of the recommended course of treatment by a licensed healthcare professional.
3. Any student with an inconclusive drug screening result will be required to undergo further confirmatory testing. Students who refuse further testing or who fail to comply with stipulations of LSBN concerning treatment/monitoring will not be allowed progression in clinical coursework.

Laboratory Supply Packs

Each nursing student is required to have a standardized supply pack containing essential items, approved by the nursing program faculty, necessary to practice clinical skills in the lab and at home to gain competence. Nursing supply packs are purchased as a course fee in NRSG 3205*: Foundations of Nursing Practice Practicum/LAB* and are supplied by the Program of Nursing. The following parameters govern the handling and usage of nursing supply packs.

1. Nursing students must bring their supply pack to the lab each day.

2. Nursing students must use the supplies from their designated packs responsibly and solely for educational purposes.

3. No invasive procedure should be performed outside of the Skills Lab or on another person.

   a. Invasive procedures include, but are not limited to, injections, IV insertion, infusing of IV fluids, medication administration, foley catheterization, and nasogastric tube or feeding tube insertion.

4. Practice medications and IV fluids are intended for simulation/skills lab experiences only. Practice oral medications, IM and IV fluids are not for human use.

5. All needles given in the skills pack must be disposed of in sharps boxes provided in the Skills Lab. If the needle has a safety device, please engage the device before placing the needle in the sharps box.

6. Proper hand hygiene and disposal of used items must be followed as per established guidelines.

Nursing Skills and Simulation Laboratory Safety Policy

The Nursing skills and simulation labs provide the clinical nursing student with opportunities for practicing and being evaluated in real-time on skills used in clinical practice. There will be opportunities to work with students from other disciplines to learn the roles and responsibilities of the healthcare team and discuss how values and ethics influence healthcare and healthcare providers.

The complexity of the physical and psychological learning environment may increase the anxiety of the student(s) which may then lead to the possibility of physical injury or increased emotional stress affecting the acquisition of knowledge.

POLICY STATEMENT

The physical lab environment includes real-life mannequin simulators and accessories, electrical appliances, supply cabinets, adjustable beds, mobility assistive devices, and a variety of task training equipment including needles and sharps commonly found in clinical practice. The learning environment also includes procedures and scenarios intended to replicate clinical practice which conceivably can be mentally and emotionally taxing. To reduce the potential for physical injury, undo stress, anxiety, or emotional distress related to the lab environment and learning activities, students will attend to the following lab procedures and safety management protocols.

PROCEDURE
Lab hours will be determined and scheduled at the beginning of the semester by faculty members involved in the various clinical courses.

Professional behavior is always expected in the Nursing skills and simulation labs by all users. Students are expected to abide by the Nursing Professional Attire and Behavior and the Tulane Student Code of Conduct, including:

1. Students are required to wear a Tulane University student name badge at all times when in the laboratory practicum and during any aspect of the clinical experience (i.e. clinical assignment, observation, simulation, and clinical day).
2. When on campus for scheduled laboratory practicum and simulation days, students must wear the designated Tulane University Nursing uniform. Shoes must have closed toes and heels, with soles not thicker than 2 inches. Hair, makeup, and jewelry are to follow the Nursing Professional Attire and Behavior requirements.
3. No smoking, eating, or drinking is allowed in the labs.

Mannequins must be handled with the same respect given to humans and kept appropriately draped at all times.

Lab supplies and equipment are not for use on humans. Supplies and equipment are for use on mannequins only.

1. Clean all supplies and equipment after every use.
2. Return supplies and equipment to the proper location after each use. Leave beds neatly made and in the low, locked position with top rails up. Place trash & soiled linen in the proper receptacles.
3. Immediately report broken equipment to the faculty or the lab technician.

Nursing skills and simulation lab users should follow universal precautions against infectious disease while participating in clinical activities. The following is a list of general precautions to ensure the personal safety and security of users:

1. All sharps must be disposed of in an appropriately labeled sharps container.
2. Under no circumstances may sharps or supplies be removed from Nursing skills and simulation labs without permission.
3. The medical and disposable equipment within the labs will remain in the labs and is not for patient use.
4. All equipment should be treated with the same safety precautions employed with actual clinical equipment.
5. Hand hygiene through hand washing or use of hand sanitizers shall be part of practice in the Nursing skills and simulation labs.
6. All needle stick/sharp injuries shall be handled in accordance with the Blood Borne Pathogen Policy. If an injury occurs, immediately wash the wound thoroughly with soap and water.
7. Nursing skills and simulation labs experiences may cause students to feel stress, anxiety, or emotional distress. In the event of anxiety or emotional distress:
   a. Immediately notify lab faculty who will assist the student.
   b. In the event of a true medical emergency such as loss of consciousness, call: Downtown Campus: 504-988-5555.
   c. Further guidance and resources are available at Campus Health https://campushealth.tulane.edu/emergency

Tulane University Code of Student Conduct Handbook

Practicum Course Critical Incident Policy

Students are responsible and accountable for their behavior and for safe patient care during all clinical experiences.

POLICY STATEMENT
Any student whose behavior demonstrates unsafe clinical practice or endangers a patient, colleague, or self in the clinical setting will be suspended immediately from the clinical learning experience. The faculty of record will meet with the student to discuss the unsafe behavior and potential complications, and a document of concern will be filed. Unsafe behavior can result in removal from the clinical setting, failure of the course and/or dismissal from the School of Nursing. Faculty of record will meet with the student to discuss the behavior, document the incident to be filed in the student's record, and initiate appropriate action including notification of the Program of Nursing Director of Curriculum and Academic Affairs.

PROCEDURE
Patterns of behavior that are inconsistent with the Nursing Program and/or clinical agency policies may result in removal from the clinical setting. Behaviors include but are not limited to:

1. Absence from clinical rotation without notification.
2. Documentation not reflective of care given.
3. Lack of preparation to provide care, including, but not limited to knowledge of medications, treatments, disease processes.
4. Performance not in compliance with stated student expectations as outlined in clinical course syllabi.
5. Leaving the clinical area without consent of the clinical faculty member.
6. Failing to use universal precautions.

The following unprofessional or unsafe behaviors will result in removal from the clinical setting. The student may be referred to the Nursing Program Student Professionalism Committee to determine appropriate consequences.

1. Acting improperly towards patients, supervisors, and/or peers.
2. Disrespect for faculty, patients, supervisors and/or peers.
3. Violating HIPAA requirements and regulations.
4. Performing a procedure outside the nursing scope of practice.
5. Performing a procedure in which he/she has not been prepared.

6. Administering medications in any form via any route without consent and/or supervision from the clinical instructor or the staff RN.
7. Failure to use safety equipment (including, but not limited to side rails, call lights, gait belt)
8. Behavior inconsistent with the American Nurses' Association (ANA) Code of Ethics for Nurses include but are not limited to:
   a. Informing patients about their diagnosis, treatment, and/or prognosis without authorization.
   b. Removing copies of patient care material from health care agencies.
   c. Removal of patient identification.
   d. Refusal of the care of a client or failure to notify the instructor of the inability to carry out a clinical assignment.

In addition to behaviors that violate Louisiana Administrative Code (LAC) 46:XVII.3331, the following unsafe behaviors will result in immediate failure from the course and may result in dismissal from the program:

1. Disconnecting life support system without authority.
2. Lying about provisions of care in speech or in writing.
3. Stealing drugs or supplies from agency.
4. Obvious signs of being under the influence of drugs, alcohol, and extreme fatigue while on duty.
5. Knowingly exposing patients, colleagues, and others to actual or potential life-threatening communicable diseases.

POLICY RESOURCES

Admission Requirements

Students seeking admission to the Program of Nursing must satisfy the School of Professional Advancement (SoPA) undergraduate core curriculum requirements and nursing major prerequisite requirements.

Applicants with up to 60 credit hours of coursework who have not yet earned a degree, those with a prior associate degree, and those with a prior bachelor's degree are all eligible to be considered for admission. The program recognizes the prior academic work of applicants and transfers course credit where SoPA or nursing prerequisite course equivalency has been established.

There is no time limit for coursework that satisfies the SoPA core curriculum requirements. Prerequisite courses specific to the nursing major must be completed within 7 years of application to the program.

Professional Nursing courses taken at another institution are not accepted for transfer credit.

Nursing Major Prerequisite Requirements

A cumulative transfer GPA of 3.0 is required. Additionally, a cumulative GPA of 3.0 is required for the nursing major prerequisite courses with a grade of C or better in any one course. The nursing major prerequisite courses must be completed within seven years of application to the nursing program and are:

- Nutrition (3CR)
- `Statistics (3CR)`
- `Developmental Psychology (3CR)`
- `Anatomy & Physiology 1 w/lab (4CR)`
- `Anatomy & Physiology 2 w/lab (4CR)`
- `Microbiology w/lab (4CR)`
- `Chemistry w/lab (4CR)`

Program of Nursing Admission Criteria Policy

Qualified applicants shall be considered for admission without discrimination and in compliance with applicable state and federal laws and regulations.

The following are Program of Nursing application requirements:

1. **Complete an application.**
2. **Submit an Admission Video:** Applicants are required to submit a 2-minute admission video as part of the application packet. This video is an opportunity for you to share your story. The video must:
   a. Be no more than 2-minutes long and uploaded to Slate as part of the application. Expectations:
      - Attire and grooming are professional, no graphic t-shirts, exercise clothes, or ball caps.
      - Have suitable lighting.
      - Show your entire face.
   b. Answer these questions:
      - What characteristics do you possess that will make you a good candidate for the Tulane Nursing program?
      - Provide an example of when you demonstrated your leadership qualities.
      - How will you balance the demands of this 16-month program with the other demands in your life?

3. **Technical Standards:** The Technical Standards are accessed via a link in the application and found in the Student Handbook. Applicants digitally sign that they have read, understand, and meet the Nursing Program's Technical Standards.

Tulane University wishes to ensure that access to its facilities, programs, and services is available to all students, including students with disabilities (as defined by Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990, and the ADA Amendments Act of 2008) and all students can study and

practice nursing with or without reasonable accommodation. Questions regarding requests for accommodation should be directed to the Goldman Center for Student Accessibility. Email: goldman@tulane.edu; Phone (504) 862-8433; Website: accessibility.tulane.edu.

4. **English Language Proficiency:** If an applicant's degree is from an institution outside of the United States where English is not the primary language, they must take the TOEFL or Duolingo English test for admission. Use college code #6832. These tests measure your ability to use and understand English at the university level. A score 100 or higher on TOEFL or 130 or higher on the Duolingo English Test is expected. Applicant's may request an exemption from one of these tests.

5. **Coursework from Foreign Universities:** Coursework from foreign universities will be referred to the World Education Services (WES) for evaluation and translation, if necessary. Transfer of credit from colleges or universities not belonging to an institutional accrediting body are not accepted. All submitted materials must be in the English language.

6. **Outstanding Prerequisite Coursework**: Applicants can be considered for conditional admission to the nursing program when they have no more than 3 core curriculum or Nursing Major prerequisite courses remaining to be completed. Only 1 of the 3 courses can be a nursing major prerequisite science course. Admission is conditional until the applicant successfully completes and achieves the required GPA in the remaining courses.

After Acceptance into the Nursing Program, but Prior to Starting Courses, students will receive a Welcome Letter explaining the procedure for the items below.

1. Complete a Louisiana State Board of Nursing Student License Application & Background Check (criminal history record information check):

   The Nurse Practice Act of Louisiana requires that students must be approved by the Louisiana State Board of Nursing (LSBN) to practice as student nurses prior to enrolling in clinical nursing courses. The LSBN requires persons who have been arrested, charged with, or convicted of any criminal offense in any state to petition the Louisiana State Board in writing for the right to practice as a student in Louisiana. The LSBN also requires persons who have any addiction or impairment which may affect their ability to practice nursing to petition for the right to practice as a student prior to enrolling in a clinical nursing course. The Application for Approval to Enroll in a Clinical Nursing Course form is provided to the student upon admission to the nursing program. Students shall not be eligible to enroll in a clinical nursing course based on evidence of grounds for denial of licensure in accordance with R.S. 37:921, LAC 46:XLVII.3324, 3331 and 3403.

   Students must submit to a criminal background check and urine drug screen per LSBN requirements. Information on the procedure for completing these items is provided to students upon admission to the nursing program. Final program acceptance may be contingent upon results and is contingent upon LSBN approval.

2. Complete documentation of required health information.

Degree Requirements
Degree Requirements

School of Professional Advancement (SoPA) Requirements

Undergraduate degrees offered at SoPA fulfill the mission of the school by providing students with high quality, distinctive education across a range of disciplines, along with applied skills, as relevant to their area(s) of study. As part of their undergraduate education at SoPA, students must demonstrate proficiency in writing, quantitative reasoning, and a foreign language or global perspectives. Students must also show distribution of knowledge by completing coursework in humanities, social sciences, and science. Additional core requirements of the bachelor's degree at SoPA include coursework in American government, oral communication, and race and inclusion. The proficiency, distribution, and supplemental undergraduate degree requirements are known as the SoPA Core Curriculum.

There is no time limit for coursework that satisfies the SoPA core curriculum requirements. Prerequisite courses specific to the nursing major must be completed within 7 years of application to the program

Bachelor's Degree

To receive a first baccalaureate degree from SoPA, students must have a minimum of 120 credits of passing work.

Students majoring in Liberal Arts and Sciences disciplines that are outside of SoPA should refer to the Newcomb-Tulane College graduation requirements. (p.)

Change of Major Requirement

At any point, students may change their majors. However, students who change their majors should understand that previously completed coursework may not apply to the newly selected major, and that additional coursework may be necessary to meet the major requirements.

Electives

Students will complete electives as needed until they matriculate into the nursing program. Electives are not permitted once admitted to the nursing major.

Minimum Requirements to Graduate

Undergraduate students must have a cumulative 2.0 grade point average to graduate. They must also have a minimum 2.0 grade point average in their major. For SoPA majors, at least 60 credits must be earned in courses at the 2000 level or higher.

No more than half the credits used toward satisfying graduation requirements may be in the major. Students may take no more than 70

credits each of humanities, science, and social science. This includes credits in the major.

Up to 6 credits of electives earned in courses with designations such as Independent Study, Special Projects, Directed Study, and Practicum will count toward graduation requirements. Students who must exceed this limit are required to petition the dean's office.

Residency

At least 60 credits of a student's degree program must be completed at Tulane University. For nursing students, all 60 are taken while enrolled in the SoPA nursing program.

Program of Nursing Requirements for Bachelor of Science in Nursing Degree

Per Louisiana Administrative Code LAC 46:XLVII.3517.B. qualified applicants shall be considered for admission without discrimination and in compliance with applicable state and federal laws and regulations. To be considered for admission to the nursing major the following core, writing across the curriculum, and nursing major prerequisite requirements must be completed. Students may transfer up to 60 credit hours that include core curriculum and nursing major prerequisites. A cumulative transfer GPA of 3.0 is required, and a cumulative Nursing Major Prerequisite GPA of 3.0 is required.

SoPA Core Curriculum Requirements for Nursing Students

SoPA students are required to meet the following core curriculum requirements. Incoming Newcomb-Tulane College (NTC) students may choose to meet NTC requirements prior to transfer which are equivalent to the SOPA core requirements.

Proficiency Requirements

- English/Writing (7-8 credits)*
- Quantitative Reasoning (6-8 credits)*
- Foreign Language or Global Perspectives (6-8 credits)

Supporting Requirements

- American Government (3 credits)*
- Oral Communications (3 credits)*
- Race and Inclusion (3 credits)*

Distribution Requirements

```
Students are required to complete 12 credits each of humanities/
fine arts, sciences, and social sciences. In each distribution
 area, courses must be chosen from at least
two different disciplines. A course can only satisfy one of the
 distribution areas.
```

- Humanities (12 credits)
- Science (12 credits)
- Social Science (12 credits)

*Writing Requirement

English 1010, a 4-credit intensive writing course, is Tulane's writing requirement. Students must demonstrate writing proficiency by: successful completion of ENGL 1010 (https://catalog.tulane.edu/search/?P=ENGL%201010) Writing (4 c.h.) or ENGL 1011 (https://catalog.tulane.edu/search/?P=ENGL%201011) Writing for Academic Purposes (4 c.h.), or a grade of C or better in a course equivalent to ENGL 1010 (https://catalog.tulane.edu/search/?P=ENGL%201010) Writing (4 c.h.) from a regionally accredited institution, or an Advanced Placement score of 4 or better in either "English Literature and Composition" or "English Language and Composition" (or a similar A.P. exam).

Students who need to review basic English skills before enrolling in ENGL 1010 Writing (4 c.h.) may wish to take PAEN 1000 Academic Writing and Reading (3 c.h.) for elective credit. PAEN 1000 Academic Writing and Reading (3 c.h.) does not count toward the completion of the writing requirement.

Upon completing the mandatory first-year writing course ENGL 1010, SoPA students must also complete at least one 3-credit upper-level writing course. Students in the SoPA nursing major fulfill the upper-level writing requirement by successfully completing NRSG 4800 Management and Leadership in Nursing (3 c.h.).

*Quantitative Reasoning Requirement

Students working towards a Bachelor of Science Degree in a SoPA discipline are required to demonstrate competency in 6-8 credits in mathematics courses. Students in the SoPA B.S. programs may take any mathematics course, CPST 1070 Discrete Math for Information Technology (3 c.h.), or BSLS 3250 Business Statistics (3 c.h.) to fulfill this requirement. Nursing majors are required to take a statistics course before entering the nursing major that satisfies 3CH of the Quantitative Reasoning requirement.

Students in the SoPA nursing major fulfill the additional 3CH of the Quantitative Reasoning requirement by successfully completing NRSG 4000 Nursing Research and Evidence-Based Practice (3 c.h.).

Foreign Language/Global Perspectives Requirement

Students pursuing any bachelor's degree offered by SoPA must demonstrate foreign language proficiency through successful completion of the second level in any foreign language, or complete two courses designated as Global Perspectives. Students may also blend one language and one Global Perspectives course. Please consult the SoPA website for a list of possible Global Perspectives courses.

*American Government

SoPA students must complete one course in American government. Students in the SoPA nursing major fulfill the American Government requirement by successfully completing NRSG 4000 Nursing Research and Evidence-Based Practice (3 c.h.).

* Oral Communications

Students are required to complete one course in oral communications. Students in the SoPA nursing major fulfill the oral communications requirement by successfully completing NRSG 4800 Management and Leadership in Nursing (3 c.h.).

* Race & Inclusion

SoPA students will complete one course that focuses on race and inclusion in the United States. SoPA students in the nursing major fulfill the race and inclusion in the United States requirement by successfully completing NRSG 4500: Population and Community Health Nursing.

Courses that fulfill the global perspectives, American government, and race & inclusion requirements may also be used to satisfy SoPA distribution requirements (e.g., humanities, social sciences).

Nursing Major Prerequisite Requirements

Students seeking admission to the Bachelor of Science in Nursing program are required to demonstrate competency by obtaining a cumulative grade of 3.0 or higher in the following prerequisite courses, and a grade of C or better in any one course:

- Nutrition (3 credits)
- Statistics (3 credits)
- Developmental Psychology (3 credits)
- Anatomy & Physiology 1 with lab (4 credits)
- Anatomy & Physiology 2 with lab (4 credits)
- Microbiology with lab (4 credits)
- Chemistry with lab (4 credits)

All nursing major prerequisite courses must have been completed within seven years of application to the nursing program. These courses may also be used to fulfill proficiency or distribution degree requirements.

Outstanding Prerequisite Coursework

Applicants can be considered for conditional admission to the nursing program when they have no more than 3 core curriculum or Nursing Major prerequisite courses remaining to be completed. Only 1 of the 3 courses can be a Nursing Major prerequisite science course. Admission is conditional until the applicant successfully completes and achieves the required GPA in the remaining courses.

Program Timeline

Students will complete 60 credit hours of professional nursing coursework in 4 consecutive semesters following a prescribed program of study. Students in the nursing major may not register for any other courses.

Dual Degree

Tulane SoPA students must complete a minimum of 150 credits and satisfy all requirements for each degree and each major, to qualify for two baccalaureate degrees (dual degree) from any school at Tulane.

Second Bachelor's Degree

Students who have already earned a bachelor's degree from an accredited institution may pursue a second bachelor's degree by completing at least 60 credits at Tulane. All requirements for the degree and major must be met.

Thus, students who are seeking a **second bachelor's** degree from Tulane may transfer up to 60 credits to Tulane. All degree and major requirements must be met, including students must have completed the following:

Proficiency/Distribution/Supporting Requirements: Total requirements 24 credit hours

- English/Writing (6 credits)
- Quantitative Reasoning/Math (3 credits)
- Foreign Language or Global Perspectives (3 credits)
- Humanities (3 credits)
- Social Sciences (3 credits)
- Science (3 credits)
- Race and Inclusion (3 credits)*

*The Race and Inclusion requirement is fulfilled in the nursing major by successful completion of NRSG 4500 Population & Community Health Nursing.

English Language Proficiency

```
If an applicant's degree is from an institution outside of the
 United States where English is not the primary language, they
 must take the TOEFL or Duolingo English test
for admission. Use college code #6832. These tests measure your
 ability to use and understand English at the university level.
 A score 100+ on TOEFL or 130+ on the
 Duolingo English Test is expected. Applicant's may request an
 exemption from one of these tests.
```

Credit from an Institution Outside the United States

Coursework from foreign universities will be referred to the World Education Services (WES) for evaluation and translation, if necessary. Transfer of credit from colleges or universities not belonging to an institutional accrediting body are not accepted. All submitted materials must be in the English language.

Programs

- Nursing, BSN (p. 395)

Nursing, BSN

Overview

The Bachelor of Science in Nursing (BSN) degree program is a comprehensive, sequential four-semester, accelerated program. Nursing coursework consists of 60 credit hours including 42 didactic hours in an asynchronous, online format with some pre-scheduled, synchronous sessions throughout the course to allow for engagement and interaction with peers and faculty, and 18 credit hours (or 720 clock hours) of face to face clinical, lab and simulated experiences. The program prepares students to become highly competent and compassionate BSN-prepared registered nurses (RNs). Graduates will be prepared to successfully demonstrate competency on the National Council Licensure Examination (NCLEX-RN) and in direct patient care practice.

The Bachelor of Science in Nursing degree is awarded following the successful completion of 120 credit hours, which includes up to 60 transfer credits and 60 credits taken in the Nursing Program. Students who are seeking a first or second bachelor's degree may transfer up to 60 credits from an accredited institution to Tulane.

Requirements

Program Timeline

Students will complete 60 credit hours of professional nursing coursework in 4 consecutive semesters (16-months) following a prescribed program of study with admissions starting in the Fall, Spring and Summer sessions. Students in the nursing major may not register for any other courses.

Curriculum *(example with Fall start)*

Year 1

Fall		Credit Hours
NRSG 3000	Integrated Pathophysiology and Pharmacology for Nursing Practice: Part 1	3
NRSG 3100	Wellness and Professional Success	3
NRSG 3200	Foundations of Nursing Practice	3
NRSG 3205	Foundations of Nursing Practice Practicum/Lab	1
NRSG 3210	Adult Health Assessment	3
NRSG 3215	Advanced Skills and Health Assessment Practicum/Lab	1
NRSG 3350	Community Immersion Preparation	1
	Credit Hours	**15**
Spring		
NRSG 3010	Integrated Pathophysiology and Pharmacology for Nursing Practice: Part 2	3
NRSG 3400	Adult Health Nursing	4
NRSG 3450	Adult Health Practicum	3
NRSG 3500	Psychiatric Mental Health Nursing	3
NRSG 3550	Psychiatric Mental Health Practicum	2
	Credit Hours	**15**
Summer Session		
NRSG 4000	Nursing Research and Evidence-Based Practice	3
NRSG 4400	Complex Adult Health Nursing	4
NRSG 4450	Complex Adult Health Practicum	2
NRSG 4500	Population and Community Health Nursing	3
NRSG 4550	Community Immersion Practicum	3
	Credit Hours	**15**
Year 2		
Fall		
NRSG 4600	Pediatric Nursing (6 weeks)	3
NRSG 4650	Pediatric Nursing Practicum (6 weeks)	1
NRSG 4700	Maternal Newborn Nursing (6 weeks)	3
NRSG 4750	Maternal Newborn Nursing Practicum (6 weeks)	1
NRSG 4800	Management and Leadership in Nursing	3
NRSG 4950	Nursing Generalist Preceptorship & Seminar	4
	Credit Hours	**15**
	Total Credit Hours	**60**

Combined Degrees

- MD/MBA (p. 396)
- MD/MPH (p. 397)
- MD/MS in Bioethics (p. 398)
- MD/PhD (p. 399)

MD/MBA

Overview

Applicants interested in additional information on **MD degree** options, contact the Office of Admissions and Student Affairs at the Medical School:

Hours: Monday - Friday 8:00 a.m. - 4:00 p.m. (CST)
Phone: 504-988-5331
Email: medsch@tulane.edu

For information on **MBA degree** options, contact the Office of Graduate Admissions at the Freeman School:

Hours: Monday - Friday 8:30 a.m. - 5:00 p.m. (CST)
Phone: 504-865-5410
Email: abfadmit@tulane.edu

Future leaders in medicine must excel as clinicians as well as managers in the complex and rapidly evolving environment that now dominates healthcare. A growing number of medical students and physicians are complementing their medical education with MBA degrees. Holders of both degrees can operate their clinics more effectively, run a healthcare organization, manage a research project, or advocate for their patients and work to fix the healthcare system.

The School of Medicine partners with the internationally-recognized A. B. Freeman School of Business to offer medical students a joint MD/MBA program. This option allows students to earn both degrees more rapidly than when done separately. Two additional options are available for those who have already completed the medical degree.

Requirements

5-Year Program for Current MD Students

Students in the five-year combined program save a year of training when compared to getting both degrees separately. Students apply to the MBA program during the fall of their third year of medical school. Accepted students spend the fourth year of the program in the Freeman School. The fifth year is divided between the School of Medicine in the fall and the Freeman School in the spring.

MBA Curriculum in 5-Year Program

Course ID	Title	Credits
Year One		
Fall Semester		
First Seven Weeks		
ACCN 6000	Financial Accounting	2
FINE 6010	Economics for Managers	2
MCOM 6000	Corporate Communications	2
MGSC 6010	Introduction to Business Statistics	2
Second Seven Weeks		
FINE 6030	Managerial Finance	2
MGMT 6000	Strategy	2
MGMT 6010	Managing People	2
MGSC 6030	Analytics for Managers	2

Full Semester		
CDMA 6010	Career Development I	0
Spring Semester		
Intensive Immersion		
MGMT 6020	Business Negotiations	2
First Seven Weeks		
ACCN 6010	Managerial Accounting	2
MGSC 6040	Supply Chain and Operations Management	2
MKTG 6000	When Data Lie	2
MKTG 6010	Marketing Management	2
Second Seven Weeks

Year Two		
Fall Semester		
MD Electives	Minimum of 11 credits will count in MBA degree from MD requirements	11
Spring Semester		
Electives		15
Total Credit Hours		**61**

MBA Options for Physicians

Physicians have two options to earn the MBA from the Freeman School. For working professionals, the Professional MBA (PMBA) Program (p. 159) requires 48 credit hours which can be completed by attending classes part-time on weekday evenings. The Executive MBA (EMBA) Program (p. 154) is an accelerated, alternate-weekend program for experienced professionals. The 48 credit-hour, lockstep curriculum can be completed in 17 months, primarily attending full-time day classes on Fridays and Saturdays.

MD/MPH

Overview

Applicants interested in additional information on **MD degrees,** contact the Office of Admissions and Student Affairs:

Hours: Monday – Friday 8:00 a.m. – 4:00 p.m. (CST)
Phone: 504-988-5331
Email: medsch@tulane.edu

MD/MPH program information, contact Rachael Ruiz Currier, **504-988-7055** | rruiz1@tulane.edu

NOTE: Students must first be accepted into the School of Medicine before they are eligible to apply for the combined degree program.

Tulane's MD/MPH combined degree program is open to students who have been accepted to Tulane's School of Medicine and who wish to pursue both an MD from Tulane and an MPH from Tulane's School of Public Health and Tropical Medicine (SPHTM).

The MD/MPH program is a global, integrated program in an excellent learning environment which:

- Integrates healthcare training for individuals and populations;
- Provides the foundation for a holistic approach to patient care;
- Encompasses diverse and challenged populations domestically and internationally;
- Provides in-depth training in population and public health knowledge, behaviors, and skills; and,
- Allows students to match their specific population interest with a degree concentration in the School of Public Health and Tropical Medicine.

Program Information

Tulane's MD/MPH combined degree program offers Tulane School of Medicine students a unique opportunity to build on their patient-based medical education with a population-based public health degree. The combined degree program is designed to be completed in four or five years, integrating the requirements for the School of Medicine with those from the School of Public Health and Tropical Medicine. Browse the links below to learn more general information about the program.

Requirements

To receive the MD/MPH combined degree, students must fulfill all requirements for graduation from both schools before the graduation deadline.

While students develop MD/MPH competencies specific to both their medical and public health curricula (see below for links to specific competencies), the competency that bridges the public health curriculum with the medical school curriculum is that MD/MPH students graduate from the MD/MPH program with the ability to use educational experiences in the School of Medicine to apply population-based and public health findings and principles in assessing individuals and groups at risk of disease and injury and to translate these findings and principles into recommendations and actions for improved health in clinical practice settings.

SPHTM Requirements and Competencies

In addition to completing their School of Medicine curriculum, MD/MPH combined degree students must also complete the following requirements:

- Required core and programmatic courses in the School of Public Health and Tropical Medicine (SPHTM)
- Applied Practice Experience
- Integrated Learning Experience. All MD/MPH students are required to complete a culminating experience which requires students to synthesize and integrate knowledge acquired in coursework and other learning experiences. Your culminating experience should demonstrate to your public health advisor that you have mastered the body of knowledge and can demonstrate proficiency in core and departmental competencies.

- Additional departmental requirements: each department has specific requirements for programmatic and elective courses and the culminating experience. In some cases, departments may have additional requirements that students should verify with their SPHTM department.

Students should verify all requirements with their SPHTM department and should make contact with their advisors each semester to verify their progress toward their degrees.

MD/MPH competencies for each department mirror that department's general competencies, which are available at the following links:

- Epidemiology - MPH in Epidemiology competencies (p. 492)
- Biostatistics and Data Science - MSPH in Biostatistics competencies (p. 481)
- Community Health and Behavioral Science - MPH in Community Health Sciences competencies (p. 504)
- Environmental Health Sciences - MPH in Disaster Management competencies (p. 483)
- Health Management and Policy - MPH in Health Systems Management competencies (p. 499)
- Tropical Medicine - MPH&TM competencies (https://catalog.tulane.edu/public-health-tropical-medicine/tropical-medicine/public-health-tropical-medicine-mphtm/)

SOM Requirements

MD Requirements (p. 371)

Courses in the School of Medicine that provide public health content and that MD/MPH combined degree students are required to take include the following:

- Foundations in Medicine I & II
- Family and Community Medicine clerkship
- MD/MPH one-month rotation (3rd or 4th year)
- Medical microbiology
- Genetics
- Clinical diagnosis (evidence-based medicine)

Any changes in the School of Medicine curriculum that reduce the public health content courses may require that MD/MPH combined degree students complete additional credit hours in the School of Public Health and Tropical Medicine to meet degree requirements.

Program Options

Generally, MD students are able to complete only a single combined degree during their customary time at SOM. Multiple combined degrees are generally not possible or advisable.

Tulane's MD/MPH program offers the following two options for students who have (1) earned a baccalaureate degree, and (2) already been admitted to Tulane University School of Medicine (SOM) and who wish to complete the requirements for both the medical degree and public health degree:

Four-Year Option (for incoming or T1 SOM students)

Applicants to the 4-year program must have earned a 28 or higher on the MCAT and/or a 504 or higher on the MCAT2015.

Requirements for the MD/MPH combined degree should be completed within 4 years: students must graduate with both degrees concurrently.

Students are strongly encouraged to begin the combined degree program the summer before their SOM curriculum begins. Students may begin the four-year program as late as the spring of their T1 year. If you have been admitted to SOM, you can apply for the four-year program. Please email Adam Maese (amaese@tulane.edu?subject=MDMPH%20application) for an application form.

Five-Year Option (for T2 or T3 SOM students)

Students who will require more than 4 years to complete the requirements for the medical and the public health degrees are also eligible for the MD/MPH combined degree program. Students choose this option for a variety of reasons, including a desire to focus exclusively on public health for a year, career exploration, Couples Match timing, and a host of other personal reasons.

In the five-year option, students must graduate with both degrees concurrently. The most common path for these students is to take a leave of absence from SOM after either the T2 or T3 year of medical school.

Students who choose this option have been admitted to SOM and are generally in their T2 or T3 years. Students may also begin the program by pursuing the four-year option and then opt to take a year off from SOM to complete the MD/MPH combined degree in five years. The requirements for both options are the same; however, the application process differs.

T4 students are not eligible to begin their public health studies as part of the five-year program in the MD/MPH combined degree program. However, T4 SOM students who wish to pursue a public health degree are encouraged to pursue their public health degree as a non-combined-degree student by applying directly to the School of Public Health and Tropical Medicine and completing the public health curriculum for non-combined-degree students.

A student may not receive the MD degree and then continue working on MPH requirements as part of the MD/MPH combined degree program. A student may graduate with the MD degree and may continue working towards their public health degree, but must meet the full MPH, MSPH, or MPH&TM requirements for non-combined-degree students. MD/MPH students can discuss the non-combined-degree public health requirements with their public health advisors if they wish to delay completing their MPH requirements until after they earn their MD degrees.

MD/MS in Bioethics

Overview

This 33-credit-hour program leading to a Master of Science in Bioethics and Medical Humanities is completed while earning the MD, with all coursework normally completed in the first two years of the MD program. The MS is granted at the same time as the MD and adds **no additional time** to the four years of medical school. MS coursework is done on **Wednesday and Friday** afternoons — reserved specifically in Years 1 and 2 for all of the School of Medicine's dual degree program students and for medical student electives — and through elective coursework offered in the summers before and after Year 1.

Students in professional schools may also complete the program in its one-year format in a gap year, allowing them to graduate with the MD and MS in 5 total years.

The core courses provide essential grounding in the foundations of bioethics and medical humanities, current controversies in health care ethics, and the social and ethical contexts of health care decision-making; participation in hospital rounds emphasizes the practical realities of clinical ethics, and a capstone seminar integrates program courses with one another and with students' experience in the health care professions. The program also offers elective courses and with permission other relevant courses from other schools and departments at Tulane University may be taken as electives. Students can focus on either bioethics or medical humanities, and upon graduation will be well-suited for roles on clinical ethics committees and consultation, IRBs, and teaching ethics and medical humanities in schools of medicine and elsewhere.

Applicants interested in additional information on **MD degrees,** contact the Office of Admissions and Student Affairs:

Hours: Monday – Friday 8:00 a.m. – 4:00 p.m. (CST)
Phone: 504-988-5331
Email: medsch@tulane.edu

For **Master Programs in Biomedical Science** information, contact **bms@tulane.edu. (bms@tulane.edu)**

Requirements

Courses are taken following one of the two tracks below:

BIOETHICS TRACK

Distribution	Credits
BEMH 6002 Foundations of Bioethics	3
BEMH 6009 Current Controversies in Bioethics	3
BEMH 6003 Medical Humanities	3
BEMH 6007 Ethical Theory	3
BEMH 6011 Clinical Ethics	3

MD/PhD

Overview

Applicants interested in additional information on **MD degrees,** contact the Office of Admissions and Student Affairs:

Hours: Monday – Friday 8:00 a.m. – 4:00 p.m. (CST)
Phone: 504-988-5331
Email: medsch@tulane.edu

For **PhD program** information, contact **bms@tulane.edu**

Tulane brings together some of the nation's most talented young people with nationally- and internationally-recognized teachers and researchers: all in the context of a vibrant city replete with opportunities both in and out of the lab and classroom. Whatever studies you pursue, your learning will intersect with the city's unique mix of influences- ethnic, musical, architectural, geographical, commercial, political, environmental, and social. Beyond the classroom and lab, Tulane also provides you with multiple opportunities for career development and possible career exploration, both in and outside of academia. As a Tulane graduate student, you will find unmatched opportunities: opportunities to pursue ideas and work that matters to others, and opportunities to grow and mature.

There are two tracks to receiving a combined MD/PHD degree, also known as the Physician Scientist Program (PSP). Both tracks start with Medical School for 2 years, followed by 3-4 years in the BMS Phd program before returning to Medical School for the last 2 years.

PSP-A students apply through the Medical School AMCAS application process for both degrees. Applicants cannot apply to the PSP-A program and Medical School. They must choose one.

- 2 students are accepted each year. Must have exceptional academic credentials and prior research experience.
- Accepted students receive a fellowship covering both medical and graduate school tuition costs.
- A stipend is paid for the duration of study in both the Graduate School and Medical School.
- Accepted students must begin research lab rotations the summer prior to entry into medical school.
- Accepted students must complete both the PhD and MD degree.

Track B or PSP-B students must have applied for and been accepted into Tulane Medical School. PSP-B track students apply for the PhD program through the Biomedical Sciences application system any time after beginning medical school studies but no later than the beginning of their third year of medical school.

- A stipend is paid for the duration of the program after acceptance.
- PSP-B students receive tuition remittance only for the PhD portion of their studies, not Medical School.
-

Requirements

MD Requirements

Students complete their pre-clinical curriculum (first and second years) as a cohort and are registered by the School of Medicine Office of Admissions and Student Affairs. First- and second-year students will receive information through email listservs and dean's hours about how and when to choose their preclinical electives.

Third-year students complete their seven required clinical clerkships in a lock-step fashion. Third-year students will receive information through email listservs and dean's hours about how and when to find information about their third-year clerkships through eMedley's eCurriculum, and how to request a particular clinical clerkship path.

Fourth-year students select block dates for their required fourth-year rotations and electives through a lottery system. Fourth-year students will receive information through email listservs and dean's hours about how to use eMedley's eCurriculum's registration and scheduling resources.

Year 1		Credit Hours
GANT 1008	Gross Anatomy	8
BIOC 1010	Biochemistry	7
GENE 1007	Genetics	1
HSTO 1001	Histology	5
PYSI 1002	Physiology	5
FIM1 1005	Foundations Med I	5
One pre-clinical elective in first or second year		1
	Credit Hours	**32**
Year 2		
BRBH 2006	Brain, Mind and Behavior	6
CLDG 2004	Clinical Diagnosis	3
FIM2 2005	Foundations Med II	2
IMMU 2001	Immunology	1
MICR 2000	Intro to Infectious Diseases	4
PATH 2002	Mechnms of Disease	14
PHAR 2003	Pharmacology	5
One pre-clinical elective in first or second year		1
	Credit Hours	**36**
Year 3		
Passing score on USMLE Step 1 [1]		
FAMY 3000	Family Medicine	6
SURG 3000	Surgery	8
PEDS 3000	Pediatrics	8
PYCH 3000	Psychiatry	4
NEUR 3000	Neurology	4
OBGY 3000	Obstetrics & Gynecology	8
MED 3000	Medicine	8
	Credit Hours	**46**
Year 4		
Passing scores on USMLE Step 2 Clinical Knowledge and Clinical Skills [2]		
MED 4409	Community Health [3]	4
EMER 4020	Emergency Medicine	2
ACLS training (complete before EMER4020) [4]		
RADS 3020	Radiology	2
Acting Internship (see various departments)		4
Clinical electives (see various departments) [5]		30
5 Interdisciplinary Seminars (offered through Office of Medical Education)		
	Credit Hours	**42**
	Total Credit Hours	**156**

[1] Students must record a passing USMLE Step 1 score by October of their third year or they will be placed on leave of absence. See the Tulane School of Medicine handbook and policies for more information.

[2] Students must record passing USMLE Step 2 Clinical Knowledge (CK) and Clinical Skills (CS) scores to graduate. Students are encouraged to take both Step 2 CK and Step 2 CS by December of their fourth year. See the Tulane School of Medicine handbook and policies for more information.

[3] Students in Tulane's MD/MPH combined program and students who matriculated with or before the Class of 2015 are exempt from the MED4409 requirement but must complete 34 weeks' worth of electives.

[4] ACLS training is provided through Tulane University's SIM Center. Students should consult the SIM Center for available training days/times.

[5] Students in Class of 2021 are limited to a maximum of 1 online elective in their T3 year, and are limited to a maximum of 4 online electives in their T4 year: this limit should assist students with the busy interview season, but will also help students focus primarily on face-to-face, clinical elective opportunities. Students graduating after 2021 are advised that the Curriculum Committee may further reduce the maximum number of online electives that T4s may complete.

PhD Curriculum

In the first two semesters, all students take the identical core curriculum, described below. In conjunction with the course work in the first year, students rotate in 6-week blocks through three of the Program's participating research laboratories of the student's choice. This allows students to become more familiar with BMS research and faculty. Students should choose a Dissertation Advisor by the end of the second semester but must choose a Dissertation Advisor by the end of the third semester. Students may choose to further specify their study by choosing an Area of Research Emphasis (a Departmental Track in Anatomy, Biochemistry, Medical Genetics and Genomics, Microbiology and Immunology, Pathology, Pharmacology or Physiology). An area of research emphasis may add further course requirements beyond those required for the Biomedical Sciences PhD degree without specialization.

Year 1

Fall		**Credit Hours**
BMSP 6070	Advanced Cell Biology	3
GBCH 6010	Graduate Biochemistry	4
BMSP 7140	Biomedical Sci Seminar	1
BMSP 7120	Research Topics and Rotations (2 credits for seminar, 2 for first rotation)	4
BMSP 7100	Biomed Sciences Workshop	1
	Credit Hours	**13**
Spring		
GBCH 7250	Biomedical Statistics and Data Analysis	2
EPID 7810	Human Molecular Genetics	3
BMSP 7770	Physiological Basis of Disease	3
BMSP 7150	Seminar	1
BMSP 7130	Research Topics and Rotations (2 credits each for 2nd and 3rd rotations)	4
BMSP 7110	Workshop	1
	Credit Hours	**14**

Year 2

Fall		
BMSP 7140	Biomedical Sci Seminar	1
BMSP 7100	Biomed Sciences Workshop	1
BMSP 7990	Independent Study	1-6
Electives (to be chosen in consultation with dissertation advisor)		
	Credit Hours	**3-8**
Spring		
BMSP 7150	Seminar	1
Workshop [1]		1-6
MIIM 7400	Responsible Conduct of Biomedical Research	2
Electives (to be chosen in consultation with dissertation advisor)		
	Credit Hours	**4-9**
Summer Session		
Students must begin their dissertation research or perform more research rotations during the Summer semester of their first year.		
	Credit Hours	**0**
	Total Credit Hours	**34-44**

[1] BMSP 7110 Workshop (1 c.h.), BMSP 7990 Independent Study (1-6 c.h.), or another mentor focused workshop course

Ideally, the student should choose a dissertation advisor at the end of the Spring semester.

Total for Second Year Fall + Spring must equal at least 21 credit hours

Coursework in the 2nd year must include at least 6 credit hours of lecture-based course work (Electives) and 11 credit hours of Independent Study (Research).

A minimum of 48 credit hours of course work and independent study is required for the PhD. All formal course work is to be completed within the first two years. Students may take Independent Study (BMSP 7990 Independent Study (1-6 c.h.) or equivalent) for 1-6 credits per semester for a maximum of 12 credits total during the first two years. The remaining hours of coursework are selected from the elective curriculum by the student in consultation with the dissertation advisor. Once coursework is completed, the student must demonstrate the ability to carry out independent study and research in a chosen field, as evidenced in the dissertation. Students ordinarily complete the requirements for the Ph.D. degree between four and seven years from the date of matriculation in the program.

Physician/Scientist Program Requirements

Medical School- Years 1 & 2

Our medical school first and second year curriculum provides the necessary foundation for graduates to be well prepared to enter any field of medicine. Emphasis has been placed on self-directed learning, integration of basic and clinical sciences, and more active forms of learning. Students' medical careers begin with the White Coat

Ceremony, which defines the commitment and dedication they have made to their patients and themselves as they enter medical school. Students learn basic science knowledge during the first two years in lectures, problem-based learning sessions, small group discussions, laboratories, and clinical correlations. In mid-June of the second year, students sit for Step 1 of the USMLE.

Graduate School

P/SP students enter the graduate years full-time after completing Step 1 of the USMLE. Students may elect to do a third research rotation, or if they have already completed two research rotations, may select a graduate program and a dissertation advisor, and begin work on their Ph.D. dissertation.

Coursework during the graduate years emphasizes basic principles and concepts in biochemistry, biostatistics, genetics, and cell biology, with additional courses specific to the area of concentration. Additional program requirements include weekly seminar series, and student research presentations. All students take a online course in ethics and must complete a proposal-based Preliminary Examination, usually after the first year of graduate school. When the dissertation advisory committee is satisfied that the aims of the research project have been met and the dissertation has been defended successfully, the requirements for the Ph.D. will have been completed.

P/SP students prepare to re-enter medical school as they near completion of their dissertation. Typically students begin medical school in July or mid-August with the third year medical student class. Students anticipating return to medical school notify the medical school in January and complete the clerkship selection process, which is coordinated by the Office of Student Affairs of the medical school.

Up to 24 credit hours of coursework is transferred from the students' medical school.

Medical School - Years 3 & 4

P/SP students begin third year medical school clerkships about July 1 of their seventh year, after completing their Ph.D. dissertation.

The majority of clinical training is offered in the third and fourth years. Tulane has created a "combined" third and fourth year, whereby students have 20 months of training, of which 15 are required and 5 are elective. The requirements for the third and fourth year include: 8-week clerkships in internal medicine, surgery, pediatrics, obstetrics/gynecology, and psychiatry/neurology, a 6 week clerkship in family medicine, 2 weeks of radiology, emergency medicine, and outpatient surgery, and 5 one month electives, one month of ambulatory internal medicine, and a sub-internship.

Students are also required to participate in a new interdisciplinary seminar series in which students choose from a variety of offerings. The entire family medicine clerkship is an ambulatory based experience with a community preceptor, most of whom practice in rural settings. The medicine and surgery clerkships are in-patient experiences, while the other clerkships offer a balance of inpatient and outpatient experience

Physician/Scientist Program Curriculum

Medical School- Years 1 & 2

Our medical school first and second year curriculum provides the necessary foundation for graduates to be well prepared to enter any field of medicine. Emphasis has been placed on self-directed learning, integration of basic and clinical sciences, and more active forms of learning. Up to 24 credit hours of coursework is transferred from the students' medical school.

First Year

Fall:
BMSP 7100 Workshop (1 credit)
BMSP 7140 Seminar (1 credit)
BMSP 7990 Independent Study (4-6 credits depending upon elective chosen)
Elective Courses
Attend BMS Retreat (no credits)
Safety Training (no credits)

Spring:
GBCH 7250 Biostatistics (2 credits)
BMSP 7110 Workshop (1 credit)
BMSP 7150 Seminar (1 credit)
BMSP 7990 Independent Study (2-4 credits depending upon elective chosen)
Elective

Course Transfer from Medical School (24 credits)

Second Year

The second year consists of only Workshop (BMSP 7100 - 1credit/semester) and Seminar (BMSP 7140 1 credit/semester) to complete a total of 48 credit hours. Students must also register for Independent Study (BMSP 7990) or Selected topics (BMSP 7500) to maintain full time status. Second year will have no other formal didactic courses. However, if a student chooses a mentor within a specific area of research emphasis, further requirements may be necessary.

Introduction

The School of Professional Advancement (SoPA) offers high-quality degree and certificate programs in the humanities and in applied fields that are directly relevant to the needs and interests of working adults. Our faculty, most of whom are working professionals, ensure that our programs stay up to date, helping our graduates to maximize the value of their degrees. For over 130 years, SoPA has extended the resources of Tulane University to the communities it serves.

SoPA offices are located in Richardson Hall on Tulane University's Uptown campus; the School also makes its programs available online.

Mission

SoPA offers high-quality, distinctive undergraduate and graduate professional programs to a diverse student population in New Orleans and beyond.

History

Tulane University started offering courses to working adults in the 1880s in the areas of teacher preparation and the trades. In 1942, a range of programs across the University were consolidated into University College, which was renamed the School of Continuing Studies in 2006 as part of the University's post-Hurricane Katrina Renewal Plan. The school's name was changed to the School of Professional Advancement in 2017, to allow for a clearer focus on working adults and offering applied academic programs relevant to jobs and careers. Although the name has changed over time, the mission has remained constant: to develop and deliver distinctive undergraduate and graduate professional programs of the highest quality for a diverse student population.

Accreditation

Tulane University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, doctorate, and professional degrees. Questions about the accreditation of Tulane University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website. (https://sacscoc.org/)

Programs of Study

One of the school's greatest strengths is the diversity of its academic offerings and the flexibility with which students may approach them. SoPA offers several undergraduate and graduate programs in applied areas that prepare students to enter the workforce, as well as in the humanities and social sciences. Undergraduate students may pursue a bachelor's degree with a major offered by SoPA or work toward a major offered through another undergraduate division of the university, with a plan for transferring to that division. Individuals with a bachelor's degree may enroll in a master's degree, a graduate-level certificate program, or a post-baccalaureate certificate. Students may also prepare to transfer to a degree program at another school at the university or take miscellaneous courses that suit their personal interests or professional needs.

Bachelor Degree Programs

- Digital Design, B.A. (p. 466)
- Digital Media & Marketing Communications, B.A. (p. 467)
- Elementary Education (Grades 1-5) Coordinate Major (p. 443)
- Exercise Science, B.S. (p. 464)
- General Legal Studies, B.A. (p. 451)
- Health and Wellness, B.A. (p. 464)
- Homeland Security, B.A. (p. 449)
- Human Resources, B.A. (p. 439)
- Humanities, B.A. (p. 454)
- Information Technology, B.S. (p. 455)
- Nursing, BSN (p. 395)
- Organizational Behavior and Management Studies, B.S. (p. 440)
- Public Relations, B.A. (p. 469)
- Secondary Education (Grades 6-12) Coordinate Major (p. 445)
- Social Sciences, B.A. (p. 454)

Master's Degree Programs

- Cybersecurity Management, Master of Science (p. 458)
- Early Childhood Education, MAT (p. 442)
- Elementary Education, MAT (p. 443)
- Emergency Management, Master of Professional Studies (p. 448)
- Homeland Security Studies, Master of Professional Studies (p. 449)
- Information Technology Management, Master of Science (p. 458)

- Joint Degree in Public Administration / Sustainable Real Estate Development, MPA/MSRED (p. 460)
- Liberal Arts, Master of Liberal Arts (p. 455)
- Master of Education, M.Ed. (p. 445)
- Master of Public Administration with Concentration in Emergency Management, MPA (p. 461)
- Master of Public Administration with Concentration in Public Health, MPA (p. 461)
- Master of Public Administration, MPA (p. 462)
- Secondary Education, MAT (p. 446)
- Sport Studies, Master of Science (p. 465)

Minors

- Applied Business Studies Minor (p. 439)
- Digital Media & Marketing Communications, Minor (p. 468)
- Exercise Science Minor (p. 464)
- General Legal Studies Minor (p. 452)
- Graphic Design, Minor (p. 469)
- Health and Wellness Minor (p. 464)
- Homeland Security Studies Minor (p. 449)
- Human Resource Development Minor (p. 440)
- Information Technology Minor (p. 457)
- Interactive UX/UI Design, Minor (p. 469)
- Public Relations, Minor (p. 469)
- Small Business Development Minor (p. 441)
- Teaching English Learners, Minor (p. 447)
- Teaching, Learning, and Training Minor (p. 447)

Certificates

- Accounting Fundamentals Certificate (p. 439)
- Advanced Emergency Management Certificate (Graduate) (p. 448)
- Applied Business Certificate (p. 439)
- Cyber Defense Certificate (Graduate) (p. 457)
- Cyber Leadership Certificate (Graduate) (p. 457)
- Cyber Technology Certificate (Graduate) (p. 457)
- Data Science & Cloud Certificate (Graduate) (p. 458)
- Digital Design, Post-Baccalaureate Certificate (p. 467)
- Digital Media & Marketing Communications, Certificate (p. 468)
- Economic Development Certificate (Graduate) (p. 460)
- Emergency Management Certificate (Graduate) (p. 448)
- Environmental Management & Resilience Certificate (Graduate) (p. 460)
- Equity-Centered Education Leadership Certificate (Graduate) (p. 444)
- Human Resource Fundamentals Certificate (p. 440)
- Intelligence Studies Certificate (Graduate) (p. 450)
- IT Strategic Planning Certificate (Graduate) (p. 459)
- Learner Experience Design Certificate (Graduate) (p. 444)
- Nonprofit and Strategic Philanthropy Management Certificate (Graduate) (p. 463)
- Open Source Intelligence Certificate (Graduate) (p. 450)
- Paralegal Studies Post-Baccalaureate Certificate (p. 453)
- Public Relations, Certificate (p. 470)
- Security Management Certificate (Graduate) (p. 450)
- Small Business Development Certificate (p. 441)
- Special Education Certificate (Graduate) (p. 446)
- Sport Administration Certificate (Graduate) (p. 465)
- Sport Coaching Certificate (Graduate) (p. 465)
- Sport Security Certificate (Graduate) (p. 451)
- Teaching English Learners Certificate (Graduate) (p. 447)
- Technology Architecture Certificate (Graduate) (p. 459)

Academic Options

Accelerated Master's Programs

Students who have earned 75 credits towards a bachelor's degree, including 15 credits in the major, may request Program Director approval to apply for admission to a SoPA master's degree program.

The Accelerated Master's program is available to all Tulane students in SoPA majors (https://sopa.tulane.edu/degrees-programs/bachelors-degrees/). However, admission to a master's degree requires a minimum cumulative GPA of at least 3.0, as well as program-specific requirements that may include essays, resumes interviews, or related job experience. Completion of the bachelor's degree is not required for admission to an accelerated master's degree.

Upon admission, the student may take two, pre-approved, graduate courses charged at the undergraduate rate. The student may also take two additional graduate courses during undergraduate study (exceeding the required 120 credit hours of the bachelor's) to count toward the master's degree.

Students must complete the bachelor's degree in order to officially start the master's program. Program director approval is required to register for graduate courses as an undergraduate student, and will also be required for graduate courses to serve as dual credit.

Students must have completed a minimum of 30 credits toward their master's degree by the end of the fifth (graduate) year.

Cross Registration

Undergraduate students may enroll in undergraduate courses not listed in SoPA offerings. For courses listed under the School of Liberal Arts, students need only meet the prerequisites before enrolling. The Schools of Architecture, Business, Public Health and Tropical Medicine, or Science and Engineering courses require the relevant dean's approval for enrollment in undergraduate courses. Graduate students should check with their program director in advance of registering for courses outside of SoPA if they wish to apply those courses toward the graduate degree.

Please note that the tuition rate charged for courses taken outside of SoPA courses may be significantly higher than the SoPA course tuition rate.

Double Undergraduate Majors

Students may complete two majors by meeting the requirements established by the departments concerned. Although two diplomas are not awarded for a double major, both majors are listed on the permanent record from which transcripts are made. To undertake a

double major, students must plan each major with the department concerned. Some minimal overlap may occur: in cases where one course is listed by two major departments as part of the major curriculum of each. In any case, each major of a double major must show at least eight courses that do not overlap, except a double major in Cell and Molecular Biology where no more than five courses may overlap.

Dual Undergraduate Degrees

Tulane University offers the option of obtaining two undergraduate degrees.

SoPA students may earn dual degrees (e.g. BS, BA, BSN) by completing a minimum of 150 credits and satisfying all requirements for each degree and each major. SoPA students should consult with their advisers to ensure all degree requirements are met.

Second Undergraduate Degrees

Students already holding a baccalaureate degree from an accredited institution may enroll in SoPA for a second baccalaureate degree. They may transfer up to 60 credits to Tulane. To earn a second bachelor's degree, students must complete at least 60 credits at Tulane, for a minimum of 120 credits, and fulfill all degree and major requirements. All degree and major requirements must be fulfilled, including the following:

Distribution	Credits
Writing	6
Quantitative Reasoning/Math	3
Global Perspectives/ Foreign Language	3
Humanities	3
Social Sciences	3
Science	3
Race & Inclusion	3

Independent Study

Some programs and departments offer independent study under the direction of a faculty member to a limited number of students of superior scholastic standing .

The work may take the form of directed readings, laboratory or library research, or original composition. Instead of traditional class attendance, the student substitutes conferences, as needed, with the faculty member. Students who wish to take an independent studies course must have the approval of the program director and associate dean for academic affairs.

Minors Offered

To be awarded an undergraduate minor, students must have a 2.00 grade-point average in all required coursework and 50 percent of the coursework must be earned at Tulane.

The School of Liberal Arts and School of Science and Engineering

SoPA students may select any major in the School of Liberal Arts or the School of Science and Engineering which offers a B.A. or B.S. or B.S.E. degree. The academic departments determine the requirements for these majors. Students electing this option must fulfill the core curriculum requirements for the major. SoPA undergraduate students who wish to major in a program not available within SoPA (i.e. a major in the School of Liberal Arts or the School of Science and Engineering) will be required to meet Newcomb-Tulane College residency requirements. Those requirements are that students must earn at least 60 credits in Newcomb-Tulane College courses (which may be cross-listed with SoPA), the last thirty of which must be earned while enrolled in Newcomb-Tulane College. In practice, this requires the student to transfer into Newcomb-Tulane College prior to earning their 90th college credit. SoPA students with a non-SoPA minor will not be required to transfer.

Students should consult with their SoPA advisor if they wish to pursue a major offered by these schools.

Majors completed in disciplines not sponsored by SoPA will likely require that the student take some courses at a significantly higher tuition rate than is available directly through SoPA.

Special Programs

Concurrent Enrollment for High School Students

SoPA offers a concurrent undergraduate enrollment program for outstanding high school students. The concurrent enrollment program offers qualified 11th and 12th-grade students the opportunity to get an early start on their college education. Students take regular college coursework and earn credits and grades that become a part of their permanent college record. Concurrent enrollment students may apply for admission to Tulane upon graduation from high school, or they may transfer their Tulane credits to another institution, depending on the regulations in effect at that institution.

Concurrent enrollment students may enroll in either or both semesters of the regular academic year or the summer sessions.

To qualify, students must have a minimum grade point average of 3.2. Standardized tests are preferred but not required for admission. In addition, the student's high school counselor, teacher, or principal, must submit a letter of recommendation stating that the student has the necessary academic skills and personal development to succeed at Tulane University. Students meeting these admission standards must also submit a Concurrent Enrollment application along with a $40 application fee. SoPA will not admit any student to the Concurrent Enrollment program without all required material and records. Students are limited to two undergraduate courses per semester.

SoPA tuition rates apply to all courses.

Student Government

Student government is funded by a mandatory student fee. Part of the income goes to Tulane University student organizations and activities, and part is retained by the SoPA Student Government Association. Student activity fees are distributed by the Associated Student Body, which organizes campus activities. The SoPA Student Government Association is part of the Graduate and Professional Student Association and requests its budget from that body.

Students interested in student government should contact the assistant dean for student support and success at 504-865-5333.

Alumni Association

All graduates of SoPA automatically become members of the Alumni Association. There are no dues. The purpose of the association is to promote the idea of higher education with emphasis on the continuing education of adults and to encourage fellowship among members.

Contact with the Alumni Association may be made by calling the Office of Alumni Relations at (504) 865-5901 or online (https://alumni.tulane.edu).

Academic Policies & Procedures

Academic Calendar

SoPA’s academic calendar is built on a semester framework. Per academic year, there are two semesters - fall and spring- and summer sessions. The fall and spring semesters are 15 weeks long. The full summer session is 12 weeks. During early and late summer sessions, intensive six-week courses are offered.

Deadlines for adding and dropping courses may be found on the SoPA website (https://sopa.tulane.edu/student-information/academic-calendars/).

Campus

SoPA courses are offered at the Uptown campus, as well as online.

Academic Advising

Students are assigned a SoPA academic advisor upon admission, and are encouraged to maintain regular contact with their academic advisors in matters relating to academic planning, satisfaction of degree requirements, quality of work rules, and transfer of credit from other institutions.

Admission

Undergraduate Admission

Applicants to SoPA are not required to submit ACT or SAT test scores in order to be admitted but must hold a high school diploma or general equivalent diploma. Continued enrollment is based on satisfactory academic performance.

Individuals wishing to study through SoPA should complete the online application form (https://applysopa.tulane.edu/apply/), along with a non-refundable processing fee. Applicants who have attended college previously and plan to work toward a degree or certificate must contact all former schools and have official transcripts sent directly to SoPA. Those who have not previously attended college must submit a copy of their high school transcript (or equivalent) with their application.

Individuals desiring to attend SoPA and who do not plan to earn a degree (i.e. are "non-matriculating") do not need to submit transcripts of previous college work. However, proof of high school graduation is still required. Individuals who earned less than a 2.0 grade point average, or who were dismissed from, or on probation at, their last college may be admitted on probation at the discretion of the Academic Performance Committee. Conditions of probation at entry generally include a load limit of seven credits in the first semester. Continued enrollment after entering on probation is generally contingent upon the student earning grades of C or better in all courses taken the first semester.

Prior SoPA students who have been inactive for more than one year will be required to re-apply for admission to SoPA. This includes submitting a new admissions application, application fee, and transcripts. SoPA students who were not enrolled in classes the previous semester must go to the online application (https://applysopa.tulane.edu/apply/) to update their contact information and their government-issued ID.

Interdivisional Transfer

Students in good academic standing in Newcomb-Tulane College who wish to transfer to SoPA may do so with the approval of the dean of Newcomb-Tulane College.

Students on probation in Newcomb-Tulane College who wish to improve their academic standing through part-time studies at SoPA may, with the approval of the dean of Newcomb-Tulane College, transfer to SoPA, but will be admitted on probation.

Students not eligible to return to another division of Tulane University are generally inadmissible to SoPA. These students may appeal to the SoPA Academic Petitions and Performance Committee for probationary admission.

Students in SoPA who wish to transfer to Newcomb-Tulane College should obtain the recommendation of the SoPA associate dean for academic affairs. This recommendation is given only to students who have completed at least two semesters in SoPA and are in good academic standing. Students must also have completed at least 18 credits including ENGL 1010 Writing (4 c.h.), a course satisfying the mathematics requirement, a course satisfying the science requirement, a course that is part of the foreign language requirement, a course satisfying the social science requirement, and a course satisfying the humanities requirement.

Graduate Admissions

The graduate-level online application (https://applysopa.tulane.edu/apply/) includes a non-refundable processing fee. To be considered for admission, a prospective graduate student must have earned an undergraduate degree from an accredited institution prior to the first semester of proposed graduate study. The applicant also must have earned a 3.0 cumulative grade point average, or better, in undergraduate coursework. Students with undergraduate grade point averages below 3.0 may be considered for provisional admission at the discretion of the program director.

Additionally, program-specific requirements are included in the application itself. Every applicant for graduate admission must have official transcripts from all undergraduate institutions attended sent directly to SoPA before they will be admitted.

Prior SoPA students who have been inactive for two or more years will be required to re-apply for admission to SoPA. This includes submitting a new admissions application, application fee, and transcripts. SoPA students who were not enrolled in classes the previous semester must go to the online application (https://applysopa.tulane.edu/apply/) to update their contact information and their government-issued ID.

Non-degree Seeking Graduate Student Policy

Non-Degree Seeking (NDS) graduate students are non-matriculating students who enroll in graduate courses at Tulane School of Professional Advancement (SoPA) for which they are qualified or have the prerequisites to take. NDS graduate students must apply to SoPA and will be required to obtain approval to take the graduate courses from the director of the program involved. This status is best suited for students who would like to explore different fields of academic study to determine which program might be a good fit for continued graduate study.

Students must maintain a 3.0 GPA in the approved graduate courses to continue as NDS graduate students, and must obtain program director approval to register for graduate courses each semester. NDS graduate students cannot change the grade type of a course. Approval to register for courses in any one semester does not guarantee the NDS graduate student will be approved for courses in other graduate programs or in subsequent semesters. NDS graduate students who are interested in continuing in a SoPA graduate program must apply and meet the requirements of that program. They are not guaranteed admission and should not expect preference in admission simply because of having taken courses as a NDS graduate student. Courses taken as a NDS graduate student will be reviewed by the program director for consideration to be counted towards the graduate degree.

Up to 9 semester hours of coursework completed as a NDS graduate student may be applied toward degree and residence requirements with the program director's and the Dean's approval. NDS graduate students may not register for more than six credits in one semester.

Courses taken as a NDS graduate student will not be eligible for the tuition waiver, though NDS graduate students may be eligible for early registration and/or alumni discounts.

Prior Learning / Transfer Credit

Prior Learning credit can be awarded for learning outside of the classroom, including work experience, previous education, military and other post-secondary training, or by examinations such as the College Level Examination Program (CLEP) and DANTES Subject Standardized Tests (DSST). For undergraduate students, the total of all prior learning credits, including credits transferred from other schools, cannot exceed 60 credits; for graduate students, the total of all prior learning credits cannot exceed 9 credits.

Transfer Credit

Undergraduate Students

Students who wish to transfer credits earned at other colleges and universities must have official transcripts sent directly to SoPA. SoPA will transfer only those credits earned at another college or university that was institutionally accredited* by an accrediting authority (such as the Southern Association of Colleges and Schools) at the time the courses were taken. Up to 60 credits may be transferred from a regionally accredited college or university. For the General Legal Studies program, only courses taken at an American Bar Association-approved paralegal program may be transferred. Coursework from foreign universities will be referred to the World Education Services for evaluation and translation, if necessary. Transfer of credit from colleges or universities not belonging to an institutional accrediting body is done at the discretion of SoPA.

Individual academic departments at Tulane outside of SoPA may have rules governing the transfer of credits that may affect students, i.e. may not accept community college transfer credits that SoPA does accept. For specifics, contact a SoPA academic advisor.

Work from such institutionally accredited colleges is transferred at the value in credits/hours for which it was awarded if a grade of C or higher was earned and if an equivalent Tulane course exists. Credits earned while enrolled at other schools of Tulane University may be applied toward a SoPA degree programs; consult your academic advisor to find out if this is possible for you. Students transferring from a school using a quarter, rather than the semester, system are awarded two-thirds of a semester hour for each quarter hour credit.

Students with transfer credits should see an academic advisor before the end of their first semester to have their credits evaluated. When transcripts are received, students will be notified via a receipt of transcript acknowledgement sent to their Tulane email accounts. Students who do not receive a transcript receipt within a reasonable time frame should contact the SoPA Records Manager to check the status.

In order to process transfer credit approval requests for all college courses taken prior to enrolling in Tulane University, students will need:

- A Transfer Credit Approval Form from his or her SoPA advisor. The advisor will verify the student's eligibility to earn transfer credit and the accreditation of the school from which the student wishes to transfer.
- An official transcript issued to Tulane University (not a grade report or transcript issued to the student)
- Course descriptions from the college catalogs or brochures that correspond to the courses on the transcript, and other documentation (syllabi, etc.) that the academic department requires for review. Courses are evaluated by discipline-specific faculty for content and suitability.

Following submission of these items to the SoPA academic advisor, the courses will be evaluated, and if found to be equivalent to Tulane University coursework, the student's Tulane transcript will be adjusted to reflect the academic credit awarded in transfer. All courses are subject to approval, and in some cases, courses may not be approved for credit. Courses transferred from other institutions are not included in the calculation of grade-point average. Courses that are repeated at SoPA will not count as transfer credit.

Ordinarily, while enrolled at Tulane, SoPA students are not permitted to take credit courses at any other university and apply those credits toward a degree program at Tulane. Students wishing to take courses at another institution must first receive approval from the SoPA associate dean for academic affairs and from the appropriate department.

**Referred to as "regionally accredited" prior to 2020.*

Graduate Students

Graduate students who wish to transfer credits earned from other colleges and universities must have official transcripts sent directly to SoPA. SoPA will transfer only those credits earned at another college or university that was accredited by a regional accrediting authority at the time the courses were taken. Students in good academic standing may transfer up to 9 credits. Coursework from foreign universities will be referred to World Education Services for evaluation and translation, if necessary. Transfer of credit from institutions not belonging to an institutional accrediting body is at the discretion of SoPA.

Coursework is transferred at the value of credits/hours for which it was awarded if a grade of B or higher was earned and if an equivalent Tulane course exists. Program director approval is required for graduate transfer credit.

Credit for Life and Work Experience

SoPA recognizes that many of its students come with extensive professional and life experiences that have the potential to translate into advanced standing or exemptions from certain academic requirements and coursework in both undergraduate and graduate degree and certificate programs.

SoPA undergraduate students may receive up to 24 credits from portfolio assessment, examination, and military and other post-secondary training. Prior learning credit does not count toward the School's residency requirement, and may not be transferable to other divisions within Tulane. SoPA graduate students may receive up to six prior learning credits through portfolio assessment. Please consult your academic advisor for additional information about this process.

Portfolio Assessment Credit

SoPA is dedicated to helping working adults advance their careers through flexible degree programs that align with their goals and schedules. For those who are returning to school with a repertoire of professional experience, portfolio assessment offers an opportunity to earn credit for life and work experience. The portfolios are assessed by a qualified faculty member.

SoPA will award up to 24 portfolio credits to students earning a bachelor's degree. Graduate students may earn up to six portfolio credits. Undergraduate students may earn an additional three elective credits for completing PAPL 1000, the Prior Learning Portfolio Development course. PAPL 1000 is offered online and is graded Pass/Fail.

Students must have approval from an academic advisor or program director in order to have a portfolio evaluated. Portfolio credit may be earned for courses within one of the SoPA applied academic programs, including:

- General Legal Studies
- Business Studies
- Emergency & Security Studies
- Kinesiology
- Media + Design
- Information Technology
- Public Administration

Portfolio credit will not be permitted for capstone courses, practica, internship courses, and courses with labs.

Undergraduate students must have been enrolled at SoPA for at least one semester prior to registering for the portfolio assessment course, have at least a 2.0 cumulative GPA, and have received credit for ENGL 1010 or an equivalent. Graduate students wishing to develop and have a portfolio evaluated may develop a portfolio through a self-guided process. The portfolio assessments will be conducted by SoPA full-time and adjunct faculty trained to do these assessments in their areas of expertise.

American Council on Education (ACE) Credits

Undergraduate students may receive up to 24 credits evaluated by The American Council on Education (ACE) (https://www.acenet.edu/pages/default.aspx) and graduate students may receive up to 6 credits evaluated by ACE, with academic program and academic dean approval. SoPA Program Directors and faculty will review the ACE transcript with credit recommendations to ensure credit alignment with SoPA program learning outcomes and will make a decision on credit acceptance.

ACE has a long history of evaluating professional training and recommending academic credit equivalencies for adult learners. Specifically, ACE relies on faculty subject matter experts to evaluate professional training and make relevant credit recommendations.

Military and Public Safety Training

Up to 12 elective credits may be awarded to graduates of police officer, firefighter, and paramedic training academies. Individuals applying for these credits must be able to document their graduation from a training academy and/or certification as a firefighter, police officer, or paramedic.

Credit by Examination

SoPA accepts credits earned from successful completion of national testing programs: the College Level Examination Program (CLEP) and DANTES Subject Standardized Tests (DSST). Qualified SoPA students may receive up to 24 credits by testing out of courses through CLEP and DSST tests.

The table below lists the CLEP tests accepted by SoPA, the corresponding Tulane course, and the minimum required passing score.

Exam Name	Tulane Class	Minimum Passing Score
Financial Accounting	BSAC 1120 Elementary Accounting	65
Introductory Business Law	BSBL 3400 Legal Aspects of Business	60
Principles of Management	BSMT 2310 Principles of Management	63
Principles of Marketing	BSMK 3200 Introduction to Marketing Principles	65
Information Systems	CPST 1200 Fundamentals of IS & IT	66
Humanities	PAHM 2010 Humanities	55
American Government	POLA 2100 American Government	50
Introductory Sociology	SOCI 2010 Foundations of Sociology	50
Western Civilization I	HISE 1210 Western Civilization I	55
Western Civilization II	HISE 1220 Western Civilization II	54
Calculus	MATH 1210 Calculus I	50
Chemistry	CHEM 1070 General Chemistry I	50
Introductory Psychology	PSYC 1000 Introductory Psychology	50
Natural Sciences	PANA 2010 Natural Sciences	62

DSST

The table below lists the DSST tests accepted by SoPA, the corresponding Tulane course, and the minimum required passing score.

Exam Name	Tulane Class	Minimum Passing Score
Human Resource Management	HRDV 3330 Introduction to Human Resources	53/434
Money and Banking	BSFN 3310 Money and Banking	54/434
Organizational Behavior	BSMT 3340 Organizational Behavior	52/434
Principles of Finance	BSFN 2210 Introduction to Finance	53/434
Intro to World Religions	PARL 3330 Introduction to World Religions	52/434

Principles of Public Speaking	SPEC 1400 Persuasive Public Speaking	52/434
Here's to Your Health	WLHP 1800 Fundamentals of Health	51/434
Physical Geology	EENS 1110 Physical Geology	46/400
Principles of Statistics	MATH 1110 Probability and Statistics I	48/400

* Tests taken prior to 2008 are scored on a 20 – 80 point scale. Tests taken in 2008 and later are scored on a 200 – 500 point scale.

Registration Policies and Procedures

Registration

SoPA students are governed by the registration policies and procedures set by the university. Consult the University Catalog Registration Policies and Procedures (p. 16) regarding the registration and confirmation process.

Students with registration holds should clear them prior to the start of the semester. Students will not be allowed to retroactively register for classes after the deadline for the last day to register/add has passed.

SoPA reserves the right to cancel any course with low enrollment.

Tuition and Fees

Consult the SoPA Website (https://sopa.tulane.edu/admissions/sopa-tuition-and-fees/) for current tuition rates and fee schedules.

In addition to tuition, SoPA students pay university and student activity fees. Special fees are charged for laboratory and studio courses, and special examinations as specified in the Schedule of Classes (https://classschedule.tulane.edu/Search.aspx) published by the Registrar's Office.

SoPA students may register for courses offered by other divisions at Tulane at that division's posted tuition rate, which may be significantly higher than SoPA's. SoPA courses are clearly marked in the Schedule of Classes (https://classschedule.tulane.edu/Search.aspx).

Tuition refunds are allowed for students who drop courses by the dates specified in the academic calendar (https://sopa.tulane.edu/student-information/academic-calendars/). Application, lab, other special course fees, and university fees are non-refundable.

Failure to attend a class does not constitute a withdrawal. Students will still be held responsible for any financial obligations related to a class for which they registered and failed to properly withdraw.

No diploma or transcript will be given to a student who is in default on any payments due to Tulane University.

Changes to Academic Records

No changes to course enrollment status (including adding or dropping courses), grades or grade types will be made more than three years after the close of the semester in which the course was offered.

Retention of Academic Records

Academic records will be retained for at least eight years from the time of the student's first enrollment at SoPA. This restriction does not apply to records kept by the registrar's office; those records are retained permanently.

Add/Drop Policy

Students wishing to add or drop courses should consult the academic calendar (https://sopa.tulane.edu/student-information/academic-calendars/) for deadlines and instructions. Failure to make schedule adjustments promptly and accurately may result in financial or academic penalties.

Schedule adjustments are done online during the two weeks following the first day of the semester.

Courses may be dropped online up to the last day to drop during the semester. If a student wishes to drop all of his or her courses during a semester, he or she must submit a Withdrawal for the Term form (see Withdrawal section below.)

Students who have questions about adding or dropping courses should contact their academic advisors.

Withdrawal

Voluntary

A student who has registered for a semester and needs to drop all of his or her courses must complete a Withdrawal for the Term form, which can be completed online. Students should contact their advisor to withdraw from all courses in the term.

Medical

A withdrawal from courses for medical reasons requires an official letter of recommendation from a physician in the Campus Health Center (https://campushealth.tulane.edu/) and the approval of the SoPA Dean's office. Students seeking a medical withdrawal must report to their academic advisor before going to the Campus Health Center for an evaluation. Grades of W are assigned when a student withdraws from one or more courses for medical reasons after the last day to drop without record.

A partial medical withdrawal (from some but not all courses) or incomplete grades in one or more courses may be permitted upon the recommendation of the Campus Health Center. Withdrawals from individual courses for medical reasons after the published deadline for dropping a course will require supporting justification. Partial withdrawals are not given during the last two weeks of classes. The deadline for medical withdrawals from all courses is the last day of classes each term. Requests for retroactive medical withdrawals normally are not approved.

Refunds are based on the official date of withdrawal.

SoPA requires medical clearance before a student can continue studies in a semester that begins after administrative action has been taken on behalf of the student for medical reasons. Students will petition to return from medical leave following the protocol defined by the Division of Student Affairs (https://cmvss.tulane.edu/content/medical-withdrawal-leave-return/). Students should contact their academic advisor to return from medical leave.

Required
A student may be required to withdraw from any course or from the university, temporarily or permanently, for any of the following reasons: possibility of danger to the health of the student or to that of other students if enrollment is continued; refusal to obey regulations; violation of the Honor Code or other serious misconduct; unsatisfactory class attendance; or work below the required scholastic standards.

Appeals
Students who are requesting changes to their academic record outside of the current term's academic calendar should consult with their academic advisor.

Academic Performance Policies

Credits and Grades
Undergraduate and graduate units at Tulane University are measured by credits that correspond to the number of hours the class meets per week.

Most courses meet three hours a week and are valued at three credits. SoPA, along with the other divisions of Tulane uses a plus/minus grading system. Each grade is assigned a number of "quality points" that are used in the calculation of the grade point average (GPA). Grades and quality points used at SoPA are as follows:

Grade	Quality Points
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
D-	0.33
F	Failing, no grade points = 0.00
WF	Withdrawn failing, counts in the GPA as an F = 0.00
UW	Unofficial withdrawal, counts in GPA as an F = 0.00
W	Withdrawn passing, not used in GPA computation
S	Satisfactory, not used in GPA computation (C or above) but counted in earned hours
U	Unsatisfactory, not used in GPA computation (below C) and earns no credit
AU	Audit, not used in GPA computation
I	Incomplete, no grade points = 0.00

Satisfactory/Unsatisfactory
Undergraduate students in SoPA may avail themselves of the satisfactory/unsatisfactory option. A course with the grade of satisfactory (S) typically may not be used to satisfy proficiency, major, or minor requirements, and no more than 18 credits of S will be credited toward the degree. Students should be aware that many colleges will not accept the transfer of credit with this grade.

Students may take three credits of work on a satisfactory/unsatisfactory basis per academic year (fall, spring and summer) if they have completed at least 30 credits of college work and are not on probation.

To receive a satisfactory grade, students must earn a C or higher. The grade of S is not calculated into the grade-point average. Grades below C will be designated as unsatisfactory (U). The grade of U will not be calculated into the grade-point average.

Audit
Any student may take a course on an audit basis. No credit is earned for this work, but the course is entered on the official transcript with a grade of AU. SoPA students must pay tuition for an audited course.

Incompletes
UNDERGRADUATE

An incomplete grade, I, is given at the discretion of instructors with the approval of the program director when, in their view, special circumstances prevent a student from completing work assigned during the semester and with the understanding that the remaining work can be completed within 30 days. For undergraduate students, an incomplete grade allows a maximum extension of 30 business days after the end of the term for the completion of the coursework. Students will work with their instructors to develop a plan and timeline to complete outstanding work. If the work has not been submitted by the deadline, the incomplete grade is converted to an F. Extensions of the 30-day deadline may be requested in writing by the student and must be approved by the instructor and the SoPA associate dean for academic affairs. Extensions are approved only when a student has made an attempt to complete the missing work within the original 30-day period but, in the view of the instructor and the associate dean, has been prevented from completing the work by some special circumstance beyond the student's control. Extensions must be approved before the 30-day deadline expires; extensions are not approved retroactively.

GRADUATE

An incomplete grade, I, is given at the discretion of instructors with the approval of the program director when, in their view, special circumstances prevent a student from completing work assigned during the semester and with the understanding that the remaining work can be completed within an agreed-upon time of up to 12 months following the course. Incomplete grades also are given when a student's absence from a final examination has been excused by the school's dean or dean's designee prior to or within one day following the final examination.

If a student will require a grade of I, the student and instructor should have a clearly articulated, written agreement including a timeline of what constitutes a successful resolution of the Incomplete Grade.

Incomplete grades must be resolved within the agreed upon timeframe, which may not exceed the next 12 months or they are automatically changed to a grade of F/I.

The grade of I will remain on the student's transcript, accompanied by the final course grade only when the final grade in the course is a F. Extensions to the deadline must be requested in writing by the student and must be approved by the instructor and their school's dean or dean's designee. The faculty member must then contact the Registrar's Office to request that the timeline for the I be extended for up to 12 more months. Extensions are approved only when a student has made an attempt to complete the missing work within the original time period but, in the view of the instructor and the dean or dean's designee, has been prevented from completing the work by some special circumstance beyond the student's control. Grades may still be changed after the time period expires but before the student graduates by the faculty member.

Repeated Courses

Undergraduate students may repeat courses in which they have earned a grade of D+ or lower. No more than one course may be repeated in any semester. For each repeated course, only the second grade, whether higher or lower than the initial grade, will be used to calculate the student's GPA. The initial grade will not count as credit hours attempted or earned, and therefore is not calculated in the GPA, but it will remain visible on the student's transcript. The grade penalty for a WF is never removed from the GPA. Grades assigned by a university committee, including a WF for an Honor Code conviction, cannot be removed from the student's transcript or cumulative grade-point average even though the course may be repeated.

Graduate students may be required to repeat courses in which they have earned below a B-. The initial grade remains on the record and continues to count in the student's cumulative grade-point average. All grades remain on the transcript. The grade penalty for a WF is never removed from the GPA.

Maximum Credits for SoPA Students

Undergraduate students in good academic standing at SoPA are allowed to register for up to 19 credits per semester. Students on probation are typically limited to 7 credits. Undergraduate students may not enroll in 7000-level courses unless they have program director approval. First-time undergraduates admitted to SoPA will be limited to 11 credits in their initial fall or spring semester. Transfer students, as defined by federal guidelines, may register for up to 19 credits starting in their first semesters. Graduate students may not enroll in more than 9 credits per semester without the approval of the program director.

Honors

Dean's List

A dean's list of undergraduate students is compiled at the end of the fall and spring semesters. To be eligible for the dean's list, students classified as freshmen and sophomores (have earned 6-56 completed credits) must earn a minimum GPA of 3.50 in at least six completed credits. Students classified as juniors and seniors (have 57-120 completed credits) must earn a minimum GPA of 3.67 in at least six completed credits. In all cases, satisfactory/unsatisfactory credits are excluded from determining the dean's list.

Latin Honors

Superior baccalaureate students are recognized at graduation by the award of Latin Honors. To qualify, a SoPA student must have a cumulative grade point average of at least 3.60, must have earned at least 36 credits at Tulane University excluding those earned in courses on a satisfactory/unsatisfactory basis, and must be receiving a bachelor's degree. Latin Honors are awarded as follows, based on cumulative grade point average:

- Summa cum laude = 3.900
- Magna cum laude = 3.800
- Cum laude = 3.600

Alpha Sigma Lambda Honor Society

The Theta Chapter of Alpha Sigma Lambda is a national scholastic honor society for adult undergraduate college students who are juniors or seniors. Invitations for membership are extended each year to qualified students. To be eligible, students must be enrolled in a degree program, have attended SoPA for at least three semesters, earned at least 36 credits at Tulane, and have a cumulative grade-point average of at least 3.200. Students must be in good standing with the university and may not have an honor board violation on their record. Students with pending Honor Board cases may not be considered until the case has been adjudicated. Additional information on requirements and invitations to membership may be obtained from the chapter advisor at SoPA.

Requirements for Graduation

Students must submit an application for degree/certificate early in the semester in which they plan to graduate. This application must be completed with the student's academic advisor. Applications for degree/certificate are available on the SoPA website (https://sopa.tulane.edu/student-information/sopa-forms/) and at each campus location. When students apply for their degree, their work is evaluated by the criteria in place at the start of their work toward that degree. SoPA updates programs periodically; changes in our curriculum go into effect for students who start the program the following semester. If you are concerned that a change in our curriculum will affect your degree requirements, or if you would like to take advantage of such changes, contact your advisor.

Limitations

Leave Restrictions for Returning Students

Students who return to the SoPA after an absence of more than two years may not be able to complete the program in which they originally enrolled. Returning students should talk with an academic advisor to determine possible changes in requirements or curriculum.

Academic Standards

A student may be dismissed from SoPA for lack of sufficient academic progress toward fulfilling degree requirements. Through adherence to these regulations, the university seeks to ensure that its educational facilities are reserved for capable and motivated students. For continued eligibility, academic progress is measured both by minimum credit and minimum grade-point average.

Academic Progress

Undergraduate Classification

Undergraduate classification is based on cumulative earned credits:

Classification	Earned Credits
Freshman	0-24 earned credits
Sophomore	25-56 earned credits
Junior	57-91 earned credits
Senior	over 91 earned credits

Minimum Credits and Grade Point Average Quality-of-Work Rules

Undergraduate students in SoPA are required to maintain a minimum grade-point average throughout their enrollment (see table below). Students who fail to meet this minimum standard are placed on academic probation. The cumulative grade-point average of a student is calculated by dividing the number of quality points a student has earned by the total number of quality hours (including credits with failures). Only the grades of S, U, NR, W, and grades in courses affected by SoPA' "Repeated Course" policy are excluded from this calculation.

Minimum Cumulative Attempted Hours	Minimum Cumulative GPA
1-30	1.75
31-61	1.85
62-93	1.95
94-124	2.00

Students in undergraduate or post-baccalaureate certificate (PBC) programs must maintain a minimum cumulative GPA of 2.0 to remain in good standing.

Graduate students are required to maintain a minimum cumulative GPA of 3.0 in the graduate certificate and/or degree programs to remain in good standing.

Academic Enforcement for SoPA Students

The quality of each SoPA student's work will be monitored at the end of each semester. Enforcement of quality of work standards consists of two distinct steps: probation and dismissal.

Undergraduate Probation

Any student who does not meet the minimum cumulative quality of work rules will be placed on academic probation. The status of probation lasts until it is removed as a result of academic improvement or ended by dismissal. SoPA students who are placed on probation are notified in writing that their academic progress is insufficient. Students on probation may enroll in no more than seven credits. As a further condition, all coursework taken while on probation must be passed with at least a grade of C. Students on probation cannot be given a recommendation of good academic standing to another institution for the purpose of cross-enrollment or summer school admission. Transfer students admitted on probation to SoPA may enroll in no more than seven credits. In addition, they must earn at least a 1.75 grade-point average during their first term of enrollment, or they will be dismissed.

Graduate Probation

Graduate students admitted to study at the master's level at SoPA must maintain an overall grade point average of 3.00 or better to be considered in good academic standing. Students whose cumulative grade point average falls below 3.00 will be placed on academic probation, which will require a written academic development plan. Students will be removed from academic probation when they earn an overall grade point average of at least 3.00. Graduate students who receive a grade lower than a B- in any coursework attempted will be placed on academic probation from the program. Courses in which a student earns a grade of C+ or lower cannot be counted towards a master's degree.

Dismissal

SoPA undergraduate students who do not meet the minimum cumulative GPA for academic good standing for three consecutive semesters, or who do not have a minimum cumulative GPA of 1.75 after attempting 24 credits, will be dismissed. Students may appeal the first dismissal. A second dismissal cannot be appealed. Coursework taken at another college or university during the dismissal period is not transferable to SoPA.

Graduate students who earn two grades below a B- will be dismissed. Students may appeal the first dismissal.

Reinstatement

Students have the right to petition the SoPA Academic Performance and Petitions Committee after the first dismissal. Successful petitioners will be readmitted on the terms and conditions specified by the committee, which may include academic probation, specification of courses that must be taken, progress that must be achieved, the time within which terms and conditions must be met, and classification of academic standing.

Students may appeal the decision of the Academic Performance Committee in writing to the associate dean for academic affairs under the following circumstances: new evidence, or significant evidence or material that would have likely changed the outcome of the Academic Performance Committee's decision. This appeal must be submitted within five business days of transmission of the decision of the Academic Performance Committee to the student. The decision of the associate dean for academic affairs is final.

Petitions

Written petitions from students who have been denied registration under these regulations are evaluated by the SoPA Academic Performance Committee.

Successful petitioners will be readmitted on the terms and conditions specified by the committee, which may include limitation on the number of courses, specification of courses that must be taken, progress that must be achieved, the time within which terms and conditions must be met, and classification of academic standing.

Class Attendance

Regular attendance is essential to successful academic progress. Students are expected to attend all classes, laboratories, seminars, and conferences as scheduled unless they are ill or prevented from attending by exceptional circumstances.

Instructors may establish policies for attendance of their classes, which are announced at the beginning of the semester and included in the course syllabus. Students who find it necessary to miss class are responsible for obtaining notes on material covered in lectures or other class sessions. It is up to the instructor to determine whether to

allow the student to make up missed quizzes, examinations, or other exercises.

Students are also responsible for notifying professors about absences that result from serious illnesses, injuries or critical personal problems. Medical excuses are not issued by the University Health Service, except in instances of illnesses or injuries that involve hospitalization, in the event of partial or complete withdrawal due to medical reasons, or in the event of a missed final examination for a medical condition being cared for by the Campus Health Center. In all of these instances, medical information will only be released with the student's written permission. Students should be aware that instructors have the right to lower grades for excessive absence or failure to make up work missed. They may also be assigned a grade of WF (see below).

Students who find their attendance seriously interrupted by exceptional, unforeseen circumstances are encouraged to discuss their difficulties with their instructor or academic advisor.

Grades of WF are assigned by administrators and are computed in the grade-point average as if they were Fs. With the approval of the associate dean for academic affairs, at any time during the semester an instructor may have a student with excessive absences involuntarily dropped from a course with a WF grade. A written warning will be issued to the student before he or she is administratively dropped from the course. In cases where students are suspended or expelled during the semester, W or WF grades may be assigned at the discretion of the instructors and the student's dean. A grade of W or WF also may be assigned for disciplinary penalties resulting from an honor-code or conduct-code violation. A student who ceases to attend a course but has not withdrawn officially will receive a UW [unofficial withdrawal]. After the last day to drop without record and before the last day to drop a course, students who drop courses voluntarily will have W noted on their transcripts for each course dropped.

Academic Integrity

Undergraduate Code of Academic Conduct

The integrity of the School of Professional Advancement is based on the absolute honesty of the entire community in all academic endeavors. As part of the Tulane University community, undergraduate students have certain responsibilities regarding work that forms the basis for the evaluation of their academic achievement. Students are expected to be familiar with these responsibilities at all times. No member of the university community should tolerate any form of academic dishonesty because the scholarly community of the university depends on the willingness of both instructors and students to uphold the Undergraduate Code of Academic Conduct. When a violation of the Undergraduate Code of Academic Conduct is observed it is the duty of every member of the academic community who has evidence of the violation to take action. Students should take steps to uphold the Undergraduate Code of Academic Conduct by reporting any suspected offense to the instructor or the Chair of the Honor Board. Students should under no circumstances tolerate any form of academic dishonesty. Students may report alleged violations directly to faculty members. Students may also report them anonymously through the "Report a Concern" portal maintained and monitored by the Office of Student Conduct.

In all work submitted for academic credit, students are expected to represent themselves honestly. The presence of a student's name on any work, including group papers or projects, submitted in completion of an academic assignment is considered to be an assurance that the work and ideas are the result of the student's own intellectual effort, stated in their own words, and produced independently, unless clear and explicit acknowledgment of the sources for the work and ideas is included (with the use of quotation marks when quoting someone else's words). This principle applies to papers, tests, homework assignments, artistic productions, laboratory reports, computer programs, and other assignments.

All new students should familiarize themselves with this Undergraduate Code of Academic Conduct. Lack of familiarity with the code or with the precise application of its principles to any specific instance is not an excuse for noncompliance with it.

ARTICLE I: Definitions

The terms below are used throughout this document and are defined as follows:

1. "Appellate Panel" means any person or persons from the Honor Board authorized by the Associate Dean to consider an appeal of an Honor Board hearing panel's determination or from the sanctions imposed in a particular situation.
2. "Chairperson" means the chair of an Honor Board hearing panel.
3. "Code" means this Undergraduate Code of Academic Conduct.
4. "Dean" means the Dean of the School of Professional Advancement.
5. "School" means the School of Professional Advancement.
6. "College Official" means any person employed by the School to perform administrative or professional responsibilities.
7. "Complainant" is the person who submits a charge alleging that a student violated the Code. In most cases, complainants should be instructors of record or directors of academic programs, rather than graduate teaching assistants or other students.
8. "Chair of the Honor Board" refers to the Assistant Dean of Student Support and Success who serves as chair of the Honor Board process. This chairperson advises the Associate Dean on reported cases.
9. "Faculty Chair of the Honor Board"- refers to the faculty member assigned by the Associate Dean to co-chair the proceedings.
10. "Honor Board" means those persons who may from time to time be asked to serve on an Honor Board panel.
11. "Honor Board Hearing Panel" means any person or persons authorized by the Chair of the Honor Board to determine in a particular situation whether a student has violated the Code and to recommend sanctions that may be imposed when a rules violation has been committed.
12. "Instructor" means any person who conducts classroom or teaching activities for Tulane

University, or who is otherwise considered by the university to be a member of its faculty.

13. "Member of the University Community" means any person who is a student, instructor, College Official, or any other person employed by Tulane University. A person's status shall be determined by the Associate Dean.
14. "College records" refers to the records of Code violations in Tulane's systems. The School of Professional Advancement keeps records of cases involving findings of responsibility, including administrative disposition. Record-keeping procedures will be performed with due diligence and in compliance with the law and best practices in the field.
15. "Permanent records" refers to sanctions that are noted on student transcripts: expulsions, degree rescissions and a "WF" appear on a student's transcript permanently.
16. "Preponderance of the evidence" refers to the evidentiary standard of proof required for the Honor Board to determine responsibility in a case. Under this standard, the burden of proof is met when the party with the burden (i.e., the complainant) convinces the fact finder (i.e., the Honor Board) that there is a greater than 50% chance that the claim is true.
17. "Respondent" is the student accused of academic misconduct.
18. "School" means the School of Professional Advancement.
19. "Associate Dean" refers to the Associate Dean for Academic Affairs of the School of Professional Advancement, the official authorized by the Dean to oversee Honor Board proceedings.
20. "Student" means all persons enrolled at the School pursuing undergraduate degrees. Persons who withdraw after allegedly violating the Code or who have been notified of their acceptance for admission are considered "students."
21. "In Writing" means communications made in written letters, in email notifications, and in other electronic communications delivered to relevant email addresses of students, faculty, administrators, and staff members.

ARTICLE II: Code Authority

1. The Chair of the Honor Board shall determine the composition of Honor Board hearing panels and appellate panels.
2. The Chair of the Honor Board shall develop procedures for the conduct of Honor Board hearing panels and appellate panel hearings that are not inconsistent with provisions of the Code.
3. Decisions made by the Chair and Faculty Chair of the Honor Board shall be final, pending the normal appeal process.
4. Allegations of harassment shall be addressed under Tulane University's harassment policy.
5. Student members of the Honor Board shall work with the Chair of the Honor Board to provide training to Honor Board members.

ARTICLE III: Proscribed Conduct

1. Jurisdiction of the Code
    a. The Code shall apply to academic conduct of each student from the time of application for admission through the actual awarding of a degree, even though academic conduct may occur before classes begin or after classes end, as well as during the academic year and even if the academic conduct is not discovered until after a degree is awarded. The Code shall apply to a student's academic conduct even if the student withdraws from the School while a disciplinary matter is pending.
2. Violations of the Code
    a. Any student found to have committed or to have attempted to commit the following misconduct is subject to the disciplinary sanctions outlined in this Code. The following are defined as violations:
    b. Cheating—Giving, receiving, or using, or attempting to give, receive, or use unauthorized assistance, information, or study aids in academic work, or preventing or attempting to prevent another from using authorized assistance, information, or study aids.
    c. Consulting with any persons other than the course instructor and teaching assistants regarding a take-home examination between the time the exam is distributed and the time it is submitted by the student for grading. Students should assume any exam is closed-book; they may not consult books, notes, or any other reference material unless explicitly permitted to do so by the instructor of the course. Students must also take exams in settings determined or approved by the course instructor and/or the Center for Student Accessibility.
    d. Unless explicitly allowed by the instructor, electronic devices (such as cell phones, notebooks, calculators, etc.) are not allowed to be out of backpacks or purses during quizzes and exams. These electronic devices must be packed away and turned off. Any student who is caught with one of these devices out will have their test taken and will be

charged with the Honor Code violation of cheating.

e. Plagiarism—Unacknowledged or falsely acknowledged presentation of another person's ideas, expressions, or original research as one's own work, in rough or working drafts as well as in final drafts. Such an act often gives the reader the impression that the student has written or thought something that they have in fact borrowed from another. Any paraphrasing or quotation must be appropriately acknowledged, and published materials appropriately cited. Plagiarism also includes the unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials.

f. Students and faculty may wish to consult the Howard-Tilton Memorial Library guide to issues related to acknowledgment, citation, and plagiarism. Students may also use plagiarism detectors such as Turnitin.com to check the academic integrity of their work.

g. Fabrication—Submission of contrived or altered information in any academic exercise.

h. False Information—Furnishing false information to any University official, instructor, or Tulane University office relating to any academic assignment or issue.

i. Unauthorized collaboration — Collaboration not explicitly allowed by the instructor to obtain credit for examinations or course assignments.

j. Multiple submissions—Presentation of a paper or other work for credit in two or more distinct courses without prior approval by all instructors.

k. Sabotage—Destroying or damaging another student's work, or otherwise preventing such work from receiving fair graded assessment.

l. Unfair advantage—Any behavior disallowed by an instructor that gives an advantage over other fellow students in an academic exercise.

m. Facilitation of academic dishonesty—Knowingly helping or attempting to help another student violate any provision of the code.

n. Tampering with academic records—Misrepresenting, tampering with, or attempting to tamper with any portion of a student's academic record.

o. Improper disclosure—Failure of an honor board member or participant in an honor board hearing to maintain strict confidentiality concerning the identity of respondents.

ARTICLE IV: Responsibilities

1. Instructors
    a. Each instructor should be familiar with the principles and procedures of the Code. They should report suspected violations so that, for example, repeat offenders can be detected. Each instructor shall also appear and testify when called upon to do so by the Honor Board, and should discuss cases and concerns, as needed, with the Chair of the Honor Board.
    b. Instructors should foster in their classes an environment that encourages adherence to the principles of honesty and integrity. Instructors should give specific directions concerning the nature of examinations and assignments, stating, for example, when collaboration is permissible, when students may consult sources in "open-book" exams, and the conditions and settings in which exams can be taken.
2. Students
    a. Students must familiarize themselves with the Code of Academic Conduct, and they must conduct themselves in accordance with the Code.

ARTICLE V: Initial Processes for Reported Violations

1. Initial Review.
    a. Once alleged violations of the Code have been reported, the Chair of the Honor Board shall review the written charges to confirm that the charges being made fall within the scope of this Code, and that documents have been prepared according to its provisions. This review should be conducted promptly, generally within five (5) working days of receipt of the charge and supporting documents.
    b. Documents necessary for review may include a course syllabus, relevant test or assignment, written communication between complainant and respondent, written testimony of witnesses, and any other relevant documentation of the alleged violation.
    c. If, in the considered opinion of the Chair of the Honor Board, the charge is improper and should not be taken to a hearing, that decision shall be communicated to the complainant, who

retains the right to have the decision reviewed by the Associate Dean.

2. Copy of the Charges
    a. If the Initial Review finds that a violation of the Code is suspected, the Chair of the Honor Board will provide the respondent with a copy of the formal charge in writing: the nature and occasion of the alleged violation, the name of the complainant, copies of the documents pertinent to the allegation, and a copy of or link to the Code, within five (5) working days or as soon as practical. This material will be sent to the respondent's Tulane email address.
3. Administrative Disposition
    a. If the respondent(s) in the case inform(s) the Chair of the Honor Board that they plan to accept responsibility, the respondent may waive the hearing. The penalty will be determined by the Faculty Chair of the Honor Board, and may include a WF for major offenses, a lowering of the grade, a letter of reprimand and/or educational requirements. Honor board probation may be added to these penalties. The respondent must also sign a statement acknowledging the violation and the penalty, and in the case of a Code violation involving multiple students, the signed statement will become part of the record in the hearing for any of the other students who do not accept responsibility.
    b. A respondent may be offered this option only if they have no prior convictions and if the violation, in the opinion of the Faculty Chair of the Honor Board, would not be likely to result in suspension, expulsion or degree rescission if the student were to appear before a hearing panel. Administrative disposition of the case will appear in School records as a violation of the Code. When a WF is assigned, it is noted on the respondent's transcript and is calculated into the GPA.
4. Respondent's Review
    a. The respondent will be allowed five (5) working days to decide if they wish to accept responsibility or appear before a Hearing Panel. The respondent is not allowed to withdraw from the course in which they have been charged with an Honor Code violation until the case has been resolved.
5. Right to an Advisor
    a. The respondent has the right to be assisted by an advisor selected from a list of faculty and other College Officials as appointed by the Chair of the Honor Board, at any point after which a student is accused of a violation, including preparation for an honor board hearing. The Chair of the Honor Board will provide the respondent with a list of potential advisors. The advisor may not have an attorney-client relationship with the person advised. The respondent is responsible for presenting their own information relevant to the case, and therefore, an advisor is not permitted to speak or to participate directly in any Honor Board hearing. A student who selects an advisor should ensure that the advisor's schedule allows attendance at the scheduled date and time of the hearing because delays will not normally be allowed due to the scheduling conflicts of an advisor.
6. University Breaks
    a. Timelines for honor board proceedings, including communications from the Faculty Chair of the Honor Board, and honor board hearings, are suspended when the university is closed for holidays and recesses, including winter break, spring break, and summer. During these periods, complainants may make allegations, but the normal timeline for adjudication is suspended until classes resume.
7. Study Abroad
    a. Cases in which students are accused of violations while they are studying abroad will be adjudicated upon return to campus. Students found responsible and sanctioned with Honor Board probation before they are scheduled to go abroad may not be allowed to study abroad while they are on probation, even if they have already been accepted into a study abroad program.

ARTICLE VI: Honor Board Hearings

1. Purpose of Hearings
    a. The purpose of the hearing is to provide the complainant and respondent with an opportunity to be heard and to supply the Honor Board hearing panel with the relevant information necessary to reach a decision. It should be noted that a hearing is not a legal procedure and as such, formal rules of process, procedure, and/or technical rules of evidence, such as are applied in criminal or civil court, are not used in Honor Board proceedings. Polygraph tests are not admissible as evidence.

2. Burden of Proof
    a. The complainant bears the burden of proof of alleged violations of the Code. Honor board members shall make decisions about alleged violations based on the principle of "preponderance of the evidence."
3. Hearing Date
    a. The Honor Board will make every effort to process cases in a timely manner. The Chair of the Honor Board will convene an Honor Board hearing panel to review the charges brought against the student. Effort will be made to convene that hearing within a reasonable time, generally fifteen (15) working days of the Respondent's Review.
4. End-of-the-Semester Offenses
    a. If the offense is reported at the end of the semester, the hearing normally will be postponed until the start of the next semester. If the respondent requests a hearing at the end of a semester and a sufficient number of Honor Board members are unavailable to hear a case, the Chair of the Honor Board may form an ad hoc panel composed of two faculty members, three students, and the Faculty Chair. If the case must be heard by an ad hoc panel, it should be heard as soon as possible, generally within fourteen (14) working days after the end of final exams when feasible. If more than one student is accused in the same case and at least one of the respondents desires to postpone the hearing, it shall be deferred until the beginning of the next semester, unless any of the respondents is expected to be graduated before the hearing is to take place or will be on a study abroad program in the following semester.
5. Failure to Appear
    a. If a respondent, having been notified, does not appear before an Honor Board hearing panel, the information in support of the charges shall be presented and the hearing shall proceed. The respondent may send written testimony to be included in lieu of appearing. There shall be no penalty for not appearing at an Honor Board hearing.
    b. If the complainant cannot appear at the hearing, they must send a proxy or be available by phone. The burden of proof is on the complainant. If the complainant is unreachable at the hearing, the hearing may be canceled or rescheduled.
6. Testimony
    a. If a person is called before an Honor Board hearing panel, the person is obligated to be completely honest. It is the responsibility of every member of the university to ensure that the principles of the Code are upheld and that procedures are properly followed. Testimony given at any Honor Board hearing that indicates the possibility of additional Honor Board violations can become the basis for additional Honor Board proceedings.
7. Witnesses
    a. The Chair of the Honor Board shall consult with the complainant and the Respondent, if necessary, to ascertain what witnesses should be called in the hearing.
8. Procedures for Honor Board Hearing Panel
    a. Honor Board hearings shall be conducted in private.
    b. The Chair and Faculty Chair shall preside over each hearing panel. The Chair of the Honor Board shall notify all parties of the date and time of the hearing. If the Faculty Chair is unable to preside, the Associate Dean will assign a faculty member to replace them.
    c. Evidence: Relevant documentary evidence and written statements may be accepted as information for consideration by an Honor Board hearing panel at the discretion of the officer. Relevant evidence submitted regarding the charge should be shared with the parties and the Hearing Board within a reasonable time before the hearing.
    d. All procedural questions are subject to the reasonable discretion and final decision of the Chair. Formal rules of process, procedure, and/or technical rules of evidence, such as are applied in criminal or civil court, are not used in Code proceedings.
    e. At the beginning of the hearing, the Chair shall read the charges against the respondent. Normally the complainant will give testimony first, followed by supporting witnesses, followed by the respondent and supporting witnesses, and then by other witnesses, if any. Any of the preceding may be recalled for further testimony if clarification is necessary. The Faculty Chair shall inform the respondent and any witnesses of the following before testimony begins:
        i. False testimony given in a hearing is a violation of the Code of Academic Conduct.

ii. All testimony given in an Honor Board hearing is to be held in the strictest confidence.

iii. All witnesses must be called to give substantive testimony rather than to serve as character witnesses.

f. The respondent may make a statement before the Honor Board, examine or dispute any evidence, make no statement, or decline to respond to any questions.

g. The complainant, the respondent, and any witnesses will be brought before the hearing panel independently of one another to give testimony. The Faculty Chair will lead any questions submitted to the parties during testimony.

h. After hearing evidence and witnesses in the case, the panel will vote to determine responsibility, based on the preponderance of evidence, that the respondent violated the Code (i.e., that the alleged violation is more likely than not to have occurred, or vice versa); a majority is necessary. All members other than the Chair are eligible to vote. No member of the panel will be allowed to vote unless they have been present to hear the evidence in the case.

i. The Faculty Chair shall submit a written report of the hearing to the Chair of the Honor Board promptly, generally within five (5) working days after the hearing.

j. If the respondent is judged not responsible, there will be no report of the case on their permanent record or in School records.

k. If the respondent is found responsible of violating the Code, the Honor Board hearing panel will recommend sanctions to the Faculty Chair of the Honor Board.

l. The history of violations or alleged violations of the Code by a respondent is not relevant to determining responsibility in a new case. Honor Board members will be presented with information about past violations only after they have voted on responsibility, and this information is used only for the purposes of sanctioning students who are found responsible for repeat violations.

9. Sanctions

a. Sanctions for violations of the Code are imposed on the basis of the infraction and any history of repeated violations by the student. The appropriate sanctions may be determined by the Faculty Chair of the Honor Board for students who are found responsible or who accept responsibility through administrative disposition. They include:

i. Letter of reprimand, which includes a written warning giving the student notice that any subsequent Code violations may carry more serious sanctions.

ii. Educational requirements, which may require the completion of projects, programs, or other such requirements designed for student development purposes.

iii. Lowering of a grade to zero for an assignment or test or lowering of the final grade; the Honor Board may stipulate that if a student chooses to withdraw from a course after receiving a grade sanction for a violation of the Code, the student's record will reflect a grade of "WF" for the course in which the sanction was assessed.

iv. A grade of "WF" in a course.

v. Probation, signifying that a student is not in good academic standing for a specified length of time, often for one or two semesters. The student may remain at Tulane University, but may be required to satisfy specified conditions or requirements or report regularly to a designated administrator. Honor Board probation is for a proscribed period of time in which a student is prohibited from 1) studying abroad, 2) serving as an officer in a student organization, 3) participating in any activity in which the student represents the University, including athletics or other competitive teams, 4) transferring credit from another institution, 5) pledging in a Greek organization, and 6) graduating from the university. As long as a student has no other honor board violations during the period of probation, there is no record of the probation on the student's

permanent record and the student will return to academic good standing.

vi. Suspension, in which the student must leave the University for a definite or indefinite period. A student may eventually return if applicable conditions are satisfied.

vii. Expulsion from the University, in which a student is removed from the Tulane University community permanently. The expulsion is noted on the student's transcript.

viii. Admission to or a degree or certificate awarded by Tulane University may be revoked for violation of the Code.

ix. More than one of the sanctions listed above may be imposed for any single violation.

x. Students should be aware that infractions of the Code of Academic Conduct usually warrant a grade of a "WF" for the course and Honor Board probation of two semesters for a first offense. A conviction for a second offense warrants, and typically results in, suspension or expulsion from the University. In addition, the University reserves the right to withhold institutional support from a student's application for graduate or professional school if violations of the Code are noted in the student's academic record.

10. The Review of the Hearing Panel's Recommendation
    a. The Associate Dean shall review pertinent materials, including the report of hearing and supporting documentation. If they disagree with the recommended sanction, they must provide the panel with notice and written reasons for disagreement. The Associate Dean having reviewed the report of the hearing and supporting documentation, shall promptly notify in writing the respondent, the complainant, and the chair of the hearing panel of their decision (generally, within three (3) working days after receipt of the hearing panel's report).
11. Newcomb-Tulane College Students Taking School of Professional Advancement Classes
    a. Cases involving a student enrolled in the Newcomb-Tulane College (NTC) who is taking a class at the School of Professional Advancement (SoPA) will be processed under the NTC Code. In cases where multiple students from multiple schools are involved, the respective Honor Boards will work cooperatively to adjudicate the charges under respective Codes.
12. Cases involving Simultaneous Student and Academic Conduct
    a. When a case involves a student who is accused of violating both the Code of Academic Conduct and the Code of Student Conduct, alleged academic violations will be adjudicated only once the Student Conduct process has concluded.

ARTICLE VII: Composition and Jurisdiction of the Honor Board and Hearing Panels

1. Composition of the Honor Board
    a. The Honor Board is composed of persons selected by the procedure below who may from time to time be asked to serve on Honor Board panels. The Honor Board shall consist of approximately four (4) to six (6) students and six (6) to eight (8) instructor members from the School's academic programs. It shall be the goal of the Chair of the Honor Board to select representation proportional to enrollment from the School whenever possible. The size of the pool of members can be increased or decreased at the discretion of the Chair of the Honor Board. The Associate Dean shall have the right to remove any member of the Honor Board.
2. Selecting New Members and Officers of the Honor Board
    a. Selection of Students
        i. New student members of the Honor Board shall be chosen as needed; these students shall serve until graduation, interruption of residency, or until resigning their positions. The Honor Board will strive to achieve approximate representation across student classes and the School's academic programs.
        ii. No student who has been convicted of a violation of the Code may serve on the honor board.
    b. Selection of Instructor Members
        i. Instructor members of the Honor Board shall be chosen

by the Associate Dean and Program Directors and they will serve three-year, renewable terms.

3. Composition of Honor Board Hearing Panels
    a. Panels shall be constituted from five (5) members of the Honor Board— with at least two students and two instructors whenever possible in addition to the Faculty Chair. The panel shall hear cases and determine the responsibility of the respondent(s), and shall recommend appropriate penalties for implementation by the Faculty Chair of the Honor Board. Should the Faculty Chair be unable to serve, the Associate Dean will assign an faculty member to replace them.
4. Honor Board Hearing Panel Procedure
    a. The Honor Board shall determine the rules of procedure for its hearing panels, subject to the approval of the Chair of the Honor Board.
5. Honor Board Hearing Panel Voting Rights
    a. Students and instructors are voting members of the Honor Board hearing panel and each member has one (1) vote. The Chair of the Honor Board has no vote.

ARTICLE VIII: Record-Keeping

1. Records
    a. The Associate Dean shall maintain a record of Honor Board convictions. The record shall include a copy of evidence submitted to the hearing panel, the report of the hearing panel , and the Faculty Chair's final action.

ARTICLE IX: Appeals

Any student found responsible for violating this Code has a right to appeal the determination and/or consequences delivered for, and only for, specific reasons set forth below.

1. Appeal Process
    a. A respondent may appeal a decision of the Honor Board on the grounds of procedural error, new evidence, disproportionate sanction, or any combination of the three. Dissatisfaction with the results of a hearing is not itself a valid basis for appeal. Appeals are also not an occasion to engage in contempt of the process, administrators, or students who participated in Code process.
        i. Procedural error is defined as material deviation from procedures that substantially impacted determinations of responsibility or sanctions applied.
        ii. New evidence is defined as new and substantial evidence that has appeared that could have not reasonably been discovered before the determination of responsibility was made.
        iii. Disproportionate Sanctions are where sanctions are grossly disproportionate to the findings of responsibility.
    b. A respondent who wishes to request an appeal of a decision of the Honor Board hearing panel may do so by notifying in writing the Associate Dean within five (5) working days after being notified of the decision, except when the appeal is on the basis of new evidence, in which case more time may be granted by the Associate Dean.
    c. The respondent must submit an appeal document, consisting of a plain, concise, and complete written statement outlining the grounds for appeal and all relevant information to substantiate the basis for the appeal. The appeal must be sent to Associate Dean via email, who will acknowledge receipt of the written appeal.
2. Appellate Panel
    a. In accordance with the Constitution of the School of Professional Advancement Council, appellate panels shall be composed of three (3) faculty members of the Academic Performance Committee .
        i. No member who heard the original case may serve on the appellate panel.
3. Appellate Board Hearing Procedures
    a. The appellate board will assess the written appeal to determine whether the appeal is timely filed and, if so, whether the appeal is properly framed based on the permissible grounds. If they determine that the appeal does not properly fit within one of the three specific grounds for appeal, the appeal will be denied.
    b. If the appeal is properly filed, the appellate panel may offer impacted individuals the opportunity to review the written appeal and offer their perspectives in writing to the appellate panel. Typically, such responses must be submitted to the appellate panel within three (3) working days from being provided the appeal, but the

appellate panel may extend this time at its discretion. If multiple individuals appeal, the appeal documents from each party will be considered together in one appeal process.

c. In all appeals, the appellate panel will presume that decisions were made reasonably and appropriately, unless there is compelling information to the contrary. The burden of proof is on the appellant. Appeals are not intended to be a rehearing of the matter. Most appeals consist of a review of the written documentation or record of the original hearing and pertinent documentation regarding the grounds for appeal. The appellate panel may speak to any impacted individuals, as appropriate.

d. All information presented or discussed at an appellate panel hearing shall be confidential.

4. Appellate Decision
   a. Depending on the nature of the requested appeal(s), the appellate panel may, by majority vote:
      i. Affirm the determination of responsibility or the sanctions in whole or in part;
      ii. Alter the determination of responsibility or the sanctions in whole or in part;
      iii. Return the matter to a hearing panel with instructions to reconvene to cure a procedural error or reconsider the consequences delivered. No situation will ever be remanded for reconsideration more than once.
   b. The appellate panel will transmit to the Associate Dean a written decision generally within fifteen (15) working days from the date of the submission of all appeal documents. Appeal decisions are final with the exception of matters that are remanded for further consideration.
   c. The Associate Dean will notify in writing the respondent and the complainant of the outcome of the appeal.
5. Records
   a. All materials distributed during the appellate hearing shall be collected by the chair who shall deposit one copy of the materials in the School of Professional Advancement files. A copy of the report of the appellate panel and the action of the Associate Dean shall be included in the records of the Honor Board.
6. Attending Classes During the Appellate Processes
   a. Except when a student has interim measures that prevent them from appearing on campus, students may continue to attend classes during the appeal process. In the most serious cases, involving expulsion from the University, if the original verdict is upheld under appeal, then no academic credit can be earned for the semester in which the student was notified of the expulsion, nor for any further semester into which the appeal process might continue.
7. Students Exonerated
   a. Students exonerated as the result of the appeals process will have the original Honor Board verdict removed from their college record, and any institutional financial aid that had been withdrawn as a result of the conviction will be retroactively reinstated.

ARTICLE X: Amendments and Revisions

These regulations may be amended or revised with the approval of the School of Professional Advancement Curriculum & Educational Policy Committee.

Graduate Code of Academic Conduct

The integrity of Tulane University is based on the absolute honesty of the entire University community in all academic endeavors. As part of the Tulane University community, graduate students have certain responsibilities regarding work that forms the basis for the evaluation of their academic achievement. Students are expected to be familiar with these responsibilities at all times. No member of the University Community should tolerate any form of academic dishonesty because the scholarly community of the University depends on the willingness of both instructors and students to uphold this Unified Code of Graduate Student Academic Conduct. When a violation of the Code is observed, it is the duty of every member of the University's academic community who has evidence of the violation to take action. Students should take steps to uphold the Code by reporting any suspected offense to the instructor or the Dean of their School. Students should not, under any circumstances, tolerate any form of academic dishonesty.

In all work submitted, graduate students are expected to represent themselves honestly. The presence of a student's name on any work submitted in completion of an academic assignment is considered to be an assurance that the work and ideas are the result of the student's own intellectual effort, stated in their own words, and produced independently, unless clear and explicit acknowledgment of the sources for the work and ideas is included (with the use of quotation marks when quoting someone else's words and proper citations). Tools permitted, including but not limited to computer programs, calculators, and artificial intelligence must be noted by the professor in the assignment. This principle applies, but is not limited to, to papers, tests, homework assignments, artistic productions, laboratory reports, computer programs, and other academic assignments.

Some schools and programs may have additional codes related to professional or ethical conduct in the course of study and training. Those codes function in addition to the Unified Code of Graduate Student Academic Conduct. Graduate students should review and be familiar with any such codes.

All new graduate students in the Schools shall have access to a copy of this Code before the start of their first semester. Lack of familiarity with the Code or with the precise application of its principles to any specific instance is not an excuse for noncompliance.

ARTICLE I: DEFINITIONS

The terms below are used throughout this document and are defined as follows:

1. "Respondent" means any graduate student accused of violating the Code.
2. "Appellate Panel" means any person or persons from the Honor Board authorized by the Dean's Designee to consider an appeal either of an Honor Board Hearing Panel's determination or, of the sanctions imposed in a particular situation.
3. "Chairperson" means the Chair of an Honor Board Hearing Panel or Appellate Panel. The Chairperson must be a faculty member of the Honor Board. The Chairperson will lead the testimonies and deliberations during the hearing.
4. "Code" means this Unified Code of Graduate Student Academic Conduct.
5. "Dean's Designee" means a School Official authorized by the Dean to coordinate Honor Board proceedings and impose sanctions upon any student(s) found to have violated the Code. The Dean's Designee will lead the hearing procedures. In most cases, the Designee will be an Associate Dean of the School.
6. "School Official" means any person employed by a School to perform administrative or professional responsibilities.
7. "Reporter" means any person who submits a charge alleging that a student violated the Code.
8. "Dean" means the Dean of the School in which the Respondent is enrolled.
9. "Faculty" means those engaged in teaching and research appointed to appropriate faculty status by the Board of Administrators of the University in accordance with the existing constitutions of the various divisions of the University. For purposes of Honor Board continuity, "faculty" is limited here to regular appointments, either part- or full-time, either tenure- or non-tenure track, but does not include special appointments.
10. "Graduate Student" means all persons enrolled at Tulane University pursuing postbaccalaureate studies on either a "for credit" or on an "audit" basis, and on either a full-time or part-time basis, including Research Dissertation and Masters. This includes, but is not limited to, students pursuing the Dr.P.H., eM.B.A., M.B.A., M.A., M.ARCHII, M.ACCT., M.D., M.F.A., M.FIN., M.L.A., M.P.H., M.P.S., M.S., M.S.W., M.A.T., and Ph.D. degrees as well as graduate certificates. "Graduate Students" also includes persons who withdraw after allegedly violating the Code, who are not officially enrolled for a particular term but who have a continuing relationship with Tulane, or who have been notified of their acceptance for admission. The only students not included in this policy are students of the Law School, including but not limited to students pursuing the J.D., L.L.M., and S.J.D. degrees. Those students are governed by the Law School Honor Code.
11. "Honor Board" means those persons who may from time to time be asked to serve on an Honor Board Panel. Schools may have different procedures for selecting students and faculty to serve in the pool of potential members of an Honor Board. The Dean shall have the right to nominate, suspend, or remove any member of the Honor Board from their school.
12. "Honor Board Hearing Panel" means any person or persons authorized by the Dean's Designee to determine in a particular situation whether a student has violated the Code and to recommend sanctions that may be imposed when a Code violation has been committed.
13. "Instructor" means any person who conducts classroom or teaching activities for Tulane University. This includes dissertation or thesis advisors as well as advisors for capstone projects.
14. "Member of the University Community" means any person who is a student, Faculty, School Official, or any other person employed by Tulane University. A person's status shall be determined by the Dean's Designee.
15. "Schools" means the Schools of Architecture, Business, Professional Advancement, Law, Liberal Arts, Medicine, Public Health and Tropical Medicine, Science and Engineering, and Social Work.
16. "Tulane University" or "University" here means collectively the Schools of Architecture, Business, Professional Advancement, Law, Liberal Arts, Medicine, Public Health and Tropical Medicine, Science and Engineering, and Social Work.

ARTICLE II: CODE AUTHORITY

1. The Dean's Designee shall determine the composition of Honor Board Hearing Panels and Appellate Panels in a manner consistent with provisions of the Code, as well as which Honor Board Panel and Appellate Board Panel shall be authorized to hear each mater.
2. The Dean's Designee shall develop procedures for the conduct of Honor Board Hearing Panels and Appellate Panel hearings that are not inconsistent with provisions of the Code.

3. Decisions made by an Honor Board Panel and/or Dean's Designee shall be final, pending the normal appeal process as outlined in the Code.
4. Allegations of harassment shall be addressed under Tulane University's harassment policy. Allegations of research fraud shall be addressed under Tulane University's fraud in research policy. All other policies regarding student life; e.g., alcohol policy, are covered under the Code of Student Conduct. (https://conduct.tulane.edu/code-conduct (https://conduct.tulane.edu/code-conduct/)).

ARTICLE III: PROSCRIBED ACADEMIC CONDUCT

1. Jurisdiction of the Unified Code of Graduate Student Academic Conduct
    a. The Code shall apply to academic conduct of each student from the time of application for admission through the actual awarding of a degree, even though academic conduct may occur before classes begin or after classes end, as well as during the academic year and during periods between terms of actual enrollment, and even if the academic conduct is not discovered until after a degree is awarded. The Code shall also apply to a student's academic conduct even if the student withdraws from school while a disciplinary matter is pending.
2. Violations of the Unified Code of Graduate Student Academic Conduct
    a. Any student behavior that has the effect of interfering with education, pursuit of knowledge, and/or a fair evaluation of a student's performance is considered a violation of the Code's proscribed academic conduct. Any student found to have commited or to have attempted to commit the following misconduct is subject to the disciplinary sanctions outlined in this Code. The following are defined as academic conduct violations under the code:
        i. Cheating -- Giving, receiving, or using unauthorized assistance, information, or study aids in academic work, or preventing another from using authorized assistance, information, or study aids. Consulting with any persons other than the course professor and teaching assistants regarding a take-home examination between the time the exam is distributed and the time it is submitted by the student for grading. Students should assume that all take-home exams are closed book and that they may not consult books, notes, or any other reference material unless explicitly permitted to do so by the instructor of the course.
        ii. Plagiarism -- Unacknowledged or falsely acknowledged presentation of another person's ideas, expressions, or original research as one's own work whether intentional or unintentional. Such an act often gives the reader the impression that the student has written or thought something that they have in fact borrowed from another. Any paraphrasing or quotation must be appropriately acknowledged. Plagiarism also includes the unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials. Use of artificial intelligence generated material is a violation when presented as a student's own work and/or used in a manner not explicitly authorized by the instructor. Please consult any of the available references (https://bailiwick.lib.uiowa.edu/journalism/cite.html) on acknowledging sources in academic work for more information on documenting sources.
        iii. Fabrication -- Submission of contrived or altered information in any academic exercise. This includes, but is not limited to, the creation of false data or research results, altering or manipulating data or results to misrepresent the findings, fabricating citations or sources, forging documents, and inventing or deliberately modifying information in academic submissions.
        iv. False Information – Furnishing false information to any University official, instructor, or University office relating to any academic assignment or academic issue.

v. Unauthorized collaboration -- Collaboration with other individuals, groups, organizations, or external resources that is not explicitly allowed by the instructor to obtain credit for examinations or course assignments.

vi. Multiple submission -- Presentation of a paper or other work for credit in two distinct courses without prior approval by both instructors.

vii. Sabotage -- Destroying or damaging another student's work, or otherwise preventing such work from receiving fair graded assessment.

viii. Unfair advantage -- Any behavior disallowed by an instructor that gives an advantage over other fellow students in an academic exercise.

ix. Facilitation of academic dishonesty -- Knowingly helping or attempting to help another student violate any provision of the Code.

x. Tampering with academic records -- Misrepresenting, tampering with, or attempting to tamper with any portion of a student's academic record.

xi. Unauthorized access, sharing, or use – Providing third-party access to course materials on your individual learning management system site. This includes but is not limited to, sharing login credentials, uploading course materials to public or private forums, distributing copies of lectures, assignments, tests, or other resources provided through the learning management system, and aiding others in gaining unauthorized access. It also encompasses accessing course materials or information from another student's account without permission.

xii. Improper disclosure -- Failure of an Honor Board member, witness or participant in an Honor Board hearing to maintain strict confidentiality concerning the identity of students accused of Honor Code violations.

Article IV: RESPONSIBILITIES

1. Instructors
    a. All instructors shall foster an environment which encourages adherence to the principles of honesty and integrity. Each instructor shall give specific directions concerning the nature of examinations and assignments, stating, for example, when collaboration is permissible, detailing the expectations regarding citations, any tools permitted, including AI, and outlining the consequences of academic dishonesty. Each instructor shall be familiar with the principles and procedures of the Code. They shall report all suspected violations so that, for example, repeat offenders can be detected. Each instructor shall also appear and testify when called upon to do so by the Honor Board.
2. Students
    a. All graduate students are expected to adhere to the principles of the Code. All academic work must be the result of the student's own efforts, except when collaboration or the use of other tools/aids has been explicitly allowed. If a student is unsure how a particular assignment is affected by the Code, it is the student's responsibility to consult the Instructor. This applies not only to the student's own behavior, but also to the behavior of others.

ARTICLE V: REPORTING VIOLATIONS AND PREPARING FOR A HEARING

1. Reporting Suspected Violations
    a. Allegations of violation of the Code may be submitted in writing and directed to the Dean of the Respondent's School, the Dean's Designee, or the Faculty Chairperson. Any charge should be submitted as soon as possible after the Reporter becomes aware of the relevant events or challenged actions and/or complained of actions, preferably within five (5) working days of becoming aware of the alleged violation.
2. Copy of the Charges
    a. If a violation of the Code is suspected, the Dean will appoint a designee (Dean's Designee) who will provide the Respondent with a copy of the formal charge in writing: the nature and occasion of the alleged violation, the name of the Reporter, if available,

copies of the documents pertinent to the allegation and a copy of the Code within seven (7) working days or as soon as is practical.

3. Dean's Designee's Initial Review
    a. If an alleged violation of the Code has been reported, the Dean's Designee shall review the charge to confirm that the charge being made falls within the scope of this Code. If, in the considered opinion of the Dean's Designee, the charge is improper and should not be taken to a hearing, that decision should generally, when feasible, be communicated to the Respondent and Reporter within five (5) working days, the later of whom retains the right to have the Dean's Designee's decision reviewed by the Dean.
4. Respondent's Review
    a. If the charge is brought to a hearing, the hearing shall be held no less than five (5) working days and generally within ten (10) working days after the Respondent receives notification of the charges; an extension to this period may be granted by the Dean's Designee, if deemed necessary.
5. Administrative Disposition
    a. If the Respondent in the case informs the Dean's Designee that they plan to plead responsible, the Respondent may waive the hearing and the penalty for violating the Code will be a reduced grade for the relevant course or assignment, an educational requirement, and at least one semester of honor board probation, assigned by the Dean's Designee. The Respondent must also sign a statement acknowledging the violation and the penalty, and in the case of a Code violation involving multiple students, the signed statement will become part of the record in the hearing for any of the other students that do not plead responsible. A student may elect this option only if they have no prior convictions and if the violation, in the opinion of the Dean's Designee, would not likely result in suspension from the University if the student were to appear before a Hearing Panel. Administrative disposition of the case will appear on the Respondent's record as a violation of the Code.
6. Witnesses
    a. The Dean's Designee shall consult with the Reporter and the Respondent, if necessary, to ascertain what witnesses should be called in the Hearing, to make sure that all concerned understand the workings of the Code.
7. Right to an Advisor
    a. The Respondent has the right to be assisted by an advisor of their choice (to be selected from a list of faculty familiar with the workings of the Honor Code). The Dean's Designee can provide the Respondent with a list of potential advisors. The Dean's Designee may not act as the Respondent's advisor. The advisor may not have an attorney-client relationship with the person advised. The Respondent is responsible for presenting their own information, and therefore, an advisor is not permitted to speak or to participate directly in any Honor Board hearing. A student who selects an advisor should ensure that the advisor's schedule allows attendance at the scheduled date and time of the hearing because delays will not normally be allowed due to the scheduling conflicts of an advisor.
8. Students with Physical Impairments
    a. A Respondent with a physical impairment that may impact her or his ability to effectively participate in a Hearing or Appellate Panel; e.g., hearing impairment, may request additional assistance through the Dean's Designee. The Dean's Designee, in consultation with the staff from the Goldman Center for Student Accessibility, will determine the appropriate accommodations, if any.

ARTICLE VI: COMPOSITION AND JURISDICTION OF THE HONOR BOARD AND HEARING PANELS

1. Composition of the Honor Board
    a. The Honor Board is composed of persons selected by the Dean who may from time to time be asked to serve on an Honor Board Panel. The Honor Board shall consist of graduate students and faculty from the Schools. The Dean shall have the right to nominate, suspend, or remove any member of the Honor Board from their School.
2. Selecting New Members and Officers of the Honor Board
    a. Selection of Graduate Students
        i. New graduate student members of the Honor Board shall be appointed by the Dean in consultation with the relevant graduate student governing body in each School. The Sr. Vice President for Academic Affairs or their designee will determine the number of

graduate students members needed from each School at the beginning of each fall term.

1. No student who has been found responsible for a violation of the Code may serve in the Honor Board.

b. Selection of Faculty Members
   i. Faculty members of the Honor Board shall be chosen by the Dean of their schools and will generally serve two-year terms. The Sr. Vice President for Academic Affairs or their designee will determine the number of faculty members needed from each School at the beginning of each fall term.

3. Composition of Honor Board Hearing Panels
