

Chester Mental Health Center

Written Testimony and
Records of Appearance
as of 10/12/2011

Volume 1

To Whom It May Concern:

My name is Michael Howie and I am the former Director of Forensic Services for the Department of Mental Health and Developmental Disabilities (DMHDD) and later the Forensic Network Manager with the Department of Human Services (DHS). I ended my career as the Network Manager responsible for the Treatment and Detention facility, then at Joliet, and now located in Rushville, IL. During the time I was in those roles we were fortunate to build new forensic buildings at both Elgin MHC, and Alton MHC, and design a state of the art center for treatment of sex offenders, which was never built. These buildings were not meant to take the place of our Chester MHC which was designated as a maximum secure, state of the art, treatment center in the 70's. This building and programs were the first of their kind to be accredited by JCAHO in 1976. These buildings (Alton and Elgin) were both built as medium security structures, and therefore not as secure as the Chester facility, but with First Defense fencing that made them more secure if a patient/resident were able to make it out of the building. I realize this is dated by nearly 10 years since I was involved, but I can assure you that what has been done to either the Alton or the Elgin facilities since my departure would not make them maximum secure.

That is the bricks and mortar argument against closing the Chester facility. The more esoteric argument is the security aspect (staff) difference among those 3 facilities. Chester has a long history of security environments with a maximum security prison built in the 1860's and still functioning as the Menard Correctional facility, and with the Hospital for Insane Criminals completed in 1891 to house those individuals needing "treatment for mental illness" in addition to their criminal status. It later became the Illinois Security Hospital, and finally the Chester Mental Health Center. In the 80's, because of court orders, the DMHDD opened several regional "secure" units at Singer, Elgin, Zeller in Peoria, McFarland, and finally in the 90's at Choate MH&DD Center for Developmentally Disabled offenders. The mentality of security when mixed with a treatment philosophy was extremely hard for clinicians and administrators alike to grasp during the next 20-30 years and has continued that way in most of those smaller programs within a larger facility. Chester has always known their goal was to "treat within a secure setting", and I would argue has done that better than any other facility within the state. As a former supervisor used to say: "You cannot treat someone for his mental illness if he is not here to treat, and consequently our first concern is maintaining the person in a secure setting and then providing the best care and treatment we can give in that setting." Chester has a 120 year history of "providing the best care they can provide in a secure setting." To the outside observer there should be many alternative closures to a maximum secure facility that DHS cannot replace with what they currently have and who has a proud history of providing secure mental health treatment.

Thank you for taking the time to read my statements. Should you have further questions I am always happy to meet with anyone concerned.

Dear Honorable Members of the Commission on Government Forecasting and Accountability:

My name is Jeff Kerkhover. I am 56 years of age, am an attorney and a lifelong resident of the City of Chester, Illinois. I live about $\frac{3}{4}$ of a mile from the Chester Mental Health Center. Although I am the City Attorney for Chester, I am writing this letter in my capacity as a concerned citizen. I know many of the employees at the Chester Mental Health Center. The Chester Mental Health Center has been located in the City of Chester for as long as I can remember.

Hopefully, you have reviewed the financial data and numbers regarding the Chester Mental Health Center. The most important numbers I have reviewed indicate the invaluable economic benefit that the Chester Mental Health Center contributes to Chester, Randolph County and Southern Illinois. The numbers also indicate the large number of people and families that would be affected by the closure of the Chester Mental Health Center, and the massive economically destructive impact the closure would have on Chester and the surrounding area.

I specifically want to point out that the Chester Mental Health Center purchases its water, sewer and gas services from the City of Chester at a cost of approximately \$236,000.00 per year. Those costs are kept low by the City of Chester with the intent of cooperating with the Chester Mental Health Center to help them stay within their budget. The City of Chester built its water plant and sewer plant to help accommodate the Chester Mental Health Center and Menard Correctional Center; therefore, the money paid by the Chester Mental Health Center contributes a substantial part toward the operational costs for the water and sewer plant of the City of Chester. Closing the Chester Mental Health Center would therefore have that further devastating impact on the City of Chester.

Looking beyond the numbers, the Chester Mental Health Center is a specialized facility that provides a special service to the citizens of the State of Illinois. The legislature has recognized this since 1961 when it enacted a statute, now 20 ILCS 1705/14, relating to the Chester Mental Health Center. The relatively new facility completed in 1976 employs workers who provide this special service. They are trained and have been doing their jobs for many years. They have been doing their jobs well. They know what they are doing. I can say this because I know many of the workers.

The employees of the Chester Mental Health Center make their homes in Chester, Randolph County and Southern Illinois. They send their children to our schools, they shop here and they pay taxes here; therefore, they provide a tremendous economic benefit to Chester, Randolph County and the State of Illinois.

The Chester Mental Health Center is located in the small town of Chester with a population of approximately 4800 (not counting the Menard Correctional Center residents or the

Chester Mental Health Center residents) in the small county of Randolph with a population of approximately 33,000.

Chester, Randolph County and Southern Illinois cannot absorb the loss and effect of closing the Chester Mental Health Center. We simply do not have the industry, factories or businesses that can absorb the loss of this facility.

One might argue that the employees may transfer to another facility, but that does not help the economic devastation that would occur to this area. Requiring employees to move for their employment has an intangible effect that cannot be measured in dollars and cents. These employees have made their homes here with their roots in the community and surrounding area. The schools are their children's schools. Who would buy their homes? What happens to the value of their homes? What happens to our schools? Will the value of all of our homes fall? If the value of all of the homes and other property falls, this means less revenue generated by real estate taxes.

I know we have all heard of the ripple effect as the result of this closure. You must consider that in a larger metropolitan area a closure might be like throwing a pebble into a lake because there are other industries, factories and businesses to absorb the loss. Closing the Chester Mental Health Center, however, would be like throwing a boulder into a small pond. It is not a ripple effect; it is a tidal wave.

We can support the continued operation of the Chester Mental Health Center; we cannot survive its closure. Closing the Chester Mental Health Center, laying off its employees or moving employees thereby devastating the economy of this area will not solve the budget problems of this State.

Keeping people employed so they pay taxes and buy goods and services and contribute to the economy locally and state wide is a step toward solving the budget issues.

Very truly yours,

R. Jeffrey Kerkhover
620 Hillview Drive
Chester, IL 62233

October 12, 2011

Dear Commission on Government Forecasting & Accountability Members:

As a current employee of Chester Mental Health Center, I would like to speak from my experience as Social Worker and Employee Assistance Representative.

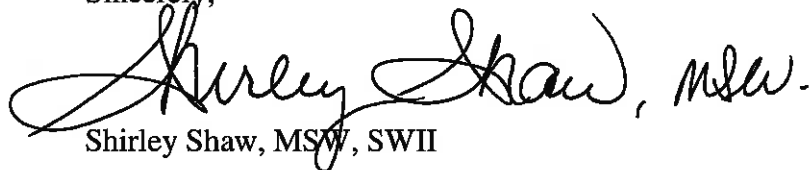

Facility Closure, Downsizing, Layoff, these are all things that bring on individual and group stress. It was just this kind of stress that brought me to Chester Mental Health Center from the St. Clair County Public Aid Office in 2002. I enjoy working with the consumers so thankfully the stress turned out to be very rewarding. Hopefully the outcome will be as positive this time as it was nearly ten years ago.

Chester Mental Health Center is small in comparison to what it could be and once was. As you toured our facility this afternoon you undoubtedly noticed the mass potential that could arise from our walls. Consumers could receive services that may end up saving the State millions. Work with us to bring Chester up to par. Right now there's group cohesion of togetherness that has not been felt in years at Chester. Administration and line staff have a wave of communication that is the best it has ever been.

I had originally planned to speak at the Public Hearing tonight. However, due to time limit restrictions, I opted to submit my comments in written format. This is such a serious matter and there is so much potential for growth, I hope to be part of the future of Chester Mental Health Center. So please stop housing our mentally ill brothers and sisters within the prison walls and start the rehabilitation process. We need your help. We don't need to close. We need to grow. The number of mentally ill individuals hasn't decreased has it?

Thank you for your efforts in helping '**Save Chester Mental Health Center.**'

Sincerely,

Shirley Shaw, MSW, SWII

PO Box 604, Tilden, IL 62292

October 12, 2011

Dear Members of the Commission on Government Forecasting & Accountability,

I am writing this letter to ask your help in saving my husband, son, and brother-in-law's jobs. All currently work at the Chester Mental Health Center. My husband is 61, my son is 31 and my brother-in-law is 51. I can barely begin to express the devastation that would befall my family if Chester Mental Health Center were to close.

My husband and I were in a similar situation 13 years ago when Arch Coal coalmine closed. My husband was a 28-year company employee when the mine closed. Being 48 years old at the time and trying to find a new job was extremely stressful. Two of our sons were in school and the oldest was in the military at that time. Our options were to move out of state away from family (we were taking care of parents at the time) or stay and look for employment for my husband. We opted to stay and eventually my husband was blessed with a job at Chester Mental Health Center.

I currently work at Memorial Hospital in Chester. I firmly believe if Chester Mental Health Center were to close, Memorial Hospital would also suffer severe consequences, perhaps putting my job in jeopardy. At our age, I am 59, relocating is out of the question and finding new jobs, in a county already economically depressed, would be very difficult.

My son (a veteran, and 10 year employee at Chester Mental Health Center) and his wife have 3 young sons the oldest in kindergarten. His wife is a stay at home Mom. I shudder to think what would happen to his family if he were to lose his job.

I am praying that my family will not be subjected to another facility closure, which would again place exceptional stress and disruption in our lives. Please reconsider the closure of Chester Mental Health Center and work with our governor to find other ways to reduce Illinois' budget deficit.

Thank you,

A handwritten signature in blue ink that reads "Thelma Grau". The signature is written in a cursive style with a large initial "T".

Thelma Grau 3857 Woodview Dr. Chester, Il 62233

Felecia Rucker
Executive Secretary I
Employee of Chester Mental Health Center for 27 years, 10 months
OPPOSED to the closing of Chester Mental Health Center

After years of hard work, frugal budgeting, and conscientious saving, my husband and I have managed to become financially secure enough to initiate plans to build a house in the spring. If Chester Mental Health Center closes and, subsequently, I am laid off from my job, those plans will not materialize. This is unfortunate for us in that our dream will not be realized at this time, or possibly ever.

However, this is not the point I want to make. If we do not build our house the following also will not happen:

- the contractor will not earn the income;
- the construction supply company will not sell us the materials to build our house;
- the plumber will not install the plumbing;
- the heating/cooling man will not install the furnace/air conditioning;
- the appliance store will not sell us new appliances for our kitchen;
- the flooring store will not sell us flooring;

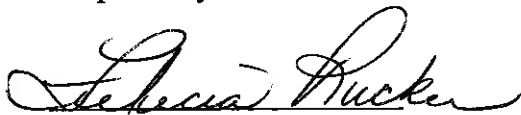

Because my husband and I believe in patronizing local businesses, all of these **LOCALLY OWNED SMALL BUSINESSES** will **NOT** do business. This means loss of income for all of them because I lost my job.

And now, here's the *really* scary part **AND** my main point: This is only a small fraction of the impact and its only **ONE** household. **ONE**.

The closure of Chester Mental Health Center will directly impact 460+ employees. What kind of economic ripple effect will that have on the State of Illinois' economy when only a rough estimate of the ripple effect of the loss of ONE job is so profound?

If you truly care about the economic future of the State of Illinois, **OPPOSE** closing Chester Mental Health Center.

Respectfully submitted,

Felecia Rucker

Senator Jeffrey M. Schoenberg, Co-Chair
 Representative Patricia Bellock, Co-Chair
 Commission on Government Forecasting and Accountability
 703 Stratton Office Building
 Springfield, Illinois 62706

Re: Proposed Closure of Chester Mental Health Center

Dear Senator Schoenberg and Representative Bellock:

Thank you for this opportunity to comment on the proposed closure of the Chester Mental Health Center, a 240-bed maximum security forensic state-operated psychiatric hospital funded and operated by the Illinois Department of Human Services Division of Mental Health (DMH). The Illinois Hospital Association (IHA) presents the following comments on behalf of our 200 member hospitals and health systems and the patients and communities they serve.

DMH's proposed closure of Chester – and two other of Illinois' nine state-operated hospitals and the transfer of forensic patients from Chester to the remaining civil acute inpatient state-operated hospital beds – will greatly weaken an already fragile mental health system in Illinois. It will reduce the statewide existing state-operated hospital capacity from approximately 1,400 civil acute beds to approximately 200 civil acute beds. Moreover, because Chester is specially designed to serve aggressive patients who have been committed there through the courts or who are transferred there by other state-operated hospitals because of patient behavioral management issues, the loss of this facility is especially significant. It is a resource with capabilities, including staff expertise, which cannot easily or cost-effectively be transferred to another facility. Closing Chester does not make clinical or financial sense.

For individuals with serious mental illness who need the level of care provided in a hospital, the loss of close to 1,200 inpatient psychiatric beds depletes an already limited pool of inpatient resources. The private hospital system does not have a sufficient pool of inpatient beds to offset this loss. There has been a 28% drop in private hospital psychiatric beds, from 5,350 beds in 1991 to 3,816 beds in 2010. Moreover, the loss of these beds is not evenly distributed across the state, leaving many Illinois communities without any psychiatric resources at all. Only nine rural hospitals in Illinois offer inpatient psychiatric services, and 84 Illinois counties have no psychiatric units at all.

The loss of acute, inpatient psychiatric capacity will further exacerbate the challenges currently experienced by persons with mental illness who depend on the public system of care. It compounds budget cuts to community mental health and substance abuse services made in the past three years. Eliminating care at both ends of the continuum of care leaves few alternatives to persons with serious, chronic illnesses and will likely contribute to an increase in the use of hospital emergency departments, longer waits for

www.ihatoday.org

limited inpatient private hospital psychiatric beds, and delays in treatment for all patients. Without treatment, persons with mental illness often become homeless, end up in jail, or in the worst cases, do not survive.

We cannot afford to take such risks for our most vulnerable residents, especially within the timelines suggested for such closures. A systems restructuring such as the one that has been proposed must occur within the framework of a plan that assures access to care will be preserved for those persons with serious mental illness who require acute care. IHA's Behavioral Health Steering Committee articulated such principles in 1997 and reiterated and refined them in 2005 when the state proposed that the Tinley Park Mental Health Center be closed (see attached). Such a plan should be developed with input from a broad cross section of stakeholders, including patients and families.

Persons with mental illness, like every patient, need the right care, at the right time, in the right place. The public psychiatric hospital is one setting in the continuum of care. It is designed to be a critical safety net that supports persons with serious illness who require a safe, structured environment.

As a key part of the continuum of care, private hospitals in Illinois are willing to serve and do serve hundreds of thousands of persons with mental illnesses each year. The state's private hospitals cared for close to 148,000 persons with a principal diagnosis of mental illness as inpatients in 2010; more than 750,000 persons diagnosed with a behavioral condition; and more than 190,000 patients with a principal diagnosis of mental or substance use illnesses in their emergency departments in 2009. However, private hospitals are serving these growing numbers of patients in fewer facilities and with fewer beds. The private hospital system does not have the capacity to assume responsibility for all the patients who will be displaced by the proposed state-operated hospital closures.

We recognize the state's challenging economic circumstances and the costs associated with maintaining antiquated facilities. However, we ask whether and to what extent the proposed closures will actually save money. It is critical that COGFA take into account several important factors when considering the proposed closures:

- If the closure of state hospitals contributes to an increase in homelessness and incarceration, it will cost the state more to house a person in jail than it does to provide treatment. The state would be transferring costs from one sector of the system to another, without any net savings to the state.
- Hospital Emergency Department care is very costly. Many persons using hospital emergency departments are Medicaid recipients. These state-operated hospital closures likely will cause more Medicaid recipients with mental illnesses to use EDs, especially in the absence of other alternatives. More important, the emergency department is not the best clinical setting for a person with mental illness.

- State law requires funds from the closure of a state facility to be reinvested in the community. The state cannot use these funds for another purpose other than mental health services. Thus, the proceeds from a sale of a state-operated hospital property must be used for mental health purposes.

It is also important to note that in 2009, DMH eliminated \$9.4 million in funding for the Community Hospital Inpatient Psychiatric Services (CHIPS) program that was designed to serve persons with mental illness who needed acute inpatient psychiatric care in a private hospital. The CHIPS program was established when the state closed the Zeller Mental Health Facility and downsized the Alton and Elgin mental health facilities as an alternative for persons who otherwise would use a state hospital. Twenty-three hospitals were participating in this program. The elimination of CHIPS has further reduced access to acute inpatient psychiatric care for a vulnerable population.

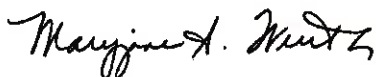

Illinois hospitals are committed to transforming health care to assure that every patient, including persons with mental and substance use illnesses, has access to the right care, at the right time, in the right place. To achieve this goal, all of us will need to work together, collaboratively, creatively and effectively, using the best of what currently exists and embracing new models.

Legislation enacted this year—House Bill 2982/Public Act 97-0381—presents one positive approach to building systems of care that capitalizes on regional strengths and encourages collaboration across systems of care. This legislation recognizes that there can be savings associated with innovative program design, elimination of redundancies and sharing of resources.

While we look forward to the opportunity to redesign the state's mental health system on a regional basis to make it more effective and efficient, we are very concerned that the proposed closures of the Chester Mental Health Center and other state-operated hospitals will adversely affect those efforts.

Thank you for the opportunity to provide these comments.

Sincerely,

Maryjane A. Wurth
President

Attachment

Position of the Illinois Hospital Association Behavioral Health Steering Committee Regarding the Closure or Other Restructuring of the Tinley Park Mental Health Center Facility

Based on principles adopted in 1997 by the IHA Behavioral Health Steering Committee (Steering Committee) and Board regarding the privatization of state-operated mental health facilities (SOF), the Steering Committee on February 22, 2005 identified the following issues as relevant to the decisions related to whether or how the Tinley Park Mental Health Center facility should be restructured. It was their recommendation that these issues must be addressed to ensure access to an appropriate level of care for persons with mental illness:

- **The State must clearly state its vision regarding mental health services for Illinois citizens and define, publicly, its intent with regard to the role and relationship of its facilities and community resources.** The failure to define the role of the SOF in terms of its mission for the citizens of the State and relationship to community hospitals and other community providers strains the relationship between the parties, interjects ambiguity where there should be clarity, and, more importantly, does not put patients, families, and all Illinois citizens first.
- **Articulate criteria regarding which patients are most appropriate for a private hospital and which are most appropriate for a SOF.** Currently, admission and length of stay criteria are lacking or poorly defined. Admission criteria primarily are about the patient's funding source: If you are a Medicaid patient, you go to a private hospital. If you are uninsured, the SOF may accept you.
 - Clinical criteria are needed to determine before an admission whether the patient would be better served in the SOF or private hospital. Criteria are also needed to determine when a transfer is appropriate and necessary.
 - Criteria are also needed about medical services the DHS views as medically necessary and, therefore, eligible for payment.

We believe that the SOF is appropriate for patients who are not successfully treated in community hospitals. These patients often exhibit the following characteristics: they are treatment resistant and/or have had multiple (three or more) admissions in the previous twelve months, and/or may require a longer length of stay (beyond 10 days). And, they may be unmanageably violent.

Private hospitals are appropriate for patients who present medical complexities that benefit from access to multiple specialties; patients who need to be stabilized and treated within the shortest time frame; and patients who will benefit from the diagnostic and other therapeutic resources of an acute care setting.

Patients with co-occurring disorders are caught between narrowly construed regulatory and public financing schemes that do not support access to appropriate services. For example, the state SOFs reluctantly accept patients with a primary diagnosis of substance abuse; Medicaid does not reimburse a private hospital for substance abuse treatment or rehabilitation, but only detoxification services, leaving the addicted person no access to treatment for their addiction in an acute care setting. The Illinois Department of Alcoholism and Substance Abuse licenses and pays for “sub-acute” Medicaid services, not acute services such as those needed by a substance abuse patient who has attempted suicide or has a psychiatric condition. Thus, the State financing of behavioral services lacks a comprehensive and coordinated rehabilitative focus, and thus leaves gaps that perpetuate expensive relapse and readmission.

Patients with developmental disabilities with mental illness also have few options for acute treatment available to them today. Given that the private sector cannot generally treat these individuals on an acute basis, they pose a natural population of citizens for which the State should assume responsibility. At a minimum, the State must fund, either directly or by arrangement, services that effectively meet the complex needs of these individuals.

- **Ensure patients in the private sector have community access to the same resources as are afforded patients in the SOF.** A patient upon discharge from a SOF has a firm referral to a community mental health provider. The patient being discharged from a private hospital must also have the same assurance he or she will have an appointment within the time frame dictated by his or her condition. Access to medication must also be assured, since failure to adhere to medication regimens often leads to readmission to an acute care setting.
- **Improve Medicaid rates.** Medicaid rates for inpatient psychiatric services are inadequate and vary across the state. The most vulnerable providers often have the lowest rates. Inadequate Medicaid rates coupled with burdensome administrative processes further weaken a fragile private inpatient psychiatric community. Because a large number of SOF patients are presumed to be Medicaid eligible, the adequacy of Medicaid payment is an essential variable in the shift of the locus of care to the private sector. If the private sector is not

financially viable, patients will be at risk of having no options should the SOF also be unavailable.

Moreover, the mechanisms under which the hospital either obtains DHS or Medicaid payment must also support rather than burden the provider. For example, the Community Hospital Inpatient Psychiatric Services (CHIPS) contract, which is the mechanism through which DHS contracts with private hospitals to serve a patient who otherwise may be treated in a SOF, requires a hospital to always attempt to qualify a patient for Medicaid before DHS pays the hospital. This is a costly and burdensome process, causing significant payment delays. For hospitals with low Medicaid rates, they will receive less money than they would have received from DHS, following a cumbersome administrative process, and following a lengthy period of time. Few, if any, hospitals can knowingly adopt a business model that requires them to seek out less reimbursement for services first.

Therefore, in order to ensure the private sector is able to care for the patient with mental illness:

- Medicaid rates for inpatient hospital psychiatric services must be improved. The State should at a minimum be willing to pay the private hospital with which it contracts the same per diem as it paid itself under Medicaid.
 - Medicaid rates should never be less than the rate DHS pays. Ideally, both rates should be comparable and adequate to cover reasonable costs.
 - The burdens associated with completing MANG applications should be shared by the State. For example, the State should provide staff support to the hospital that must complete lengthy applications. Moreover, the hospital should not be penalized if a physician does not believe a patient is disabled.
- **Make the courts more user-friendly and accessible to the private sector.** Many patients who refuse medication or admission require involvement with the judicial system. Courts are not easily accessible; there are numerous continuances; psychiatrists and staff must accompany the patient to court. There is no compensation for this. The courts must be more patient and user friendly to support the needs of patients, families and providers in the communities who must negotiate with this system. Necessary legal hearings could be conducted more creatively and efficiently. For example, a hearing could be held at the hospital, when feasible, or through the use of tele-technology that is transmitted from the courthouse or another central location. This would also assist in obtaining the support of psychiatrists to testify in such hearings.

- **Maintain in the community the funds currently allocated to the state-operated facilities.** Closure of the SOF should not reduce the overall financial support available for mental health services, i.e., there should not be a net loss of funding to the community. There is evidence that fewer funds will be available to the community, including hospitals and community mental health centers, than are currently allocated to Tinley Park SOF.

The closure of other SOFs has resulted in a net loss to the community of mental health funding. If the community alternatives to the SOF are not strong and well financed, patients will need the safety net provided by the SOF. Moreover, the DHS fee-for-service conversion threatens the financial viability of community mental health centers. The system is being tugged at both ends of the continuum. At a minimum, the funds currently allocated to the Tinley Park SOF should continue to be available either for its operations or for a combination of state operated, private operated acute services, and community outpatient services.

- **Formally evaluate effects of reducing or eliminating SOF capacity against program goals.** Perform a formal evaluation of any program of SOF reduction or deinstitutionalization to determine whether the program's goals are truly being met, the effect of the program on all of the parties involved (community hospitals, community behavioral health providers, consumers, and Illinois citizens). Make this evaluation public and available for comment.

**PRINCIPLES AND RECOMMENDATIONS
REGARDING THE PRIVATIZATION OF STATE-OPERATED
MENTAL HEALTH FACILITIES**

- Patients first.
- Services for each patient should be delivered in the most appropriate clinical setting for that particular patient. Privatization is not the goal; rather it is a means to achieve the goal of high quality, cost effective, and accessible services for the patients.
- To the extent the private sector is able and willing to provide appropriate services to persons who otherwise would receive them in the public sector, it is a cost-effective alternative that encourages creative use of scarce resources, and offers more clinical options from which patients and families can choose.
- One rationale for shifting resources from state-operated facilities to community providers is cost-effectiveness. However, current financial resources committed to delivering services in a state-operated facility must be reserved for services used by these patients, albeit in different settings. The state must demonstrate its commitment to preserving and enhancing resources for patients, not shifting the financial responsibility onto providers or families, or diverting mental health dollars into other areas.
- Government retains the ultimate responsibility to establish performance standards and to monitor performance, a responsibility that is not diminished under a privatized system. These functions, however, should involve collaboration between government, families, consumers, advocates and providers.
- Outcomes must be measured, and against these performance measures, by an objective party.
- The state must recognize and provide accordingly that some of the patients present complex symptomology that requires long-term services that may not be appropriate for an acute care model. Provisions must be made to insure these patients receive services of an intensity, comprehensiveness, and duration that are appropriate for their needs.
- The state must define the population of persons who would be eligible for services in the private sector. Such definitions should be consistent with the Illinois Mental Health Code and should, at a minimum, include (a) persons who are uninsured and without financial means to pay for needed services; (b) patients who meet a DSM IV diagnosis of mental

illness or, if a child or adolescent, a severe emotional disturbance; and (c) exhibit functional impairment in significant life activities.

- Family involvement is critical to the success of therapy and the patient's long-term health. The services provided must include families.
- A continuum of services should be available to patients to allow for an appropriate match of needs and services. Providers, must therefore, must be able to offer a range of clinical services, including, but not limited to inpatient, partial, outpatient, and wraparound services. Where a single provider entity is unable to offer the spectrum of services a patient needs, providers should collaborate to insure such access is available.
- The state should remove existing barriers to collaboration or those which prevent flexibility in programming or training.
- The delivery of mental health services neither exists in a vacuum, nor falls under the exclusive purview and control of a single state agency. All public and private resources must be considered members of the care team to which the patient belongs. All parties must contribute to the team's success and not diminish its effectiveness (e.g. judicial system in certain parts of the state impose significant burdens on mental health patients, families, and providers who must act pursuant to law and the court's decisions.)
- Services must be culturally competent and sensitive and should respect the dignity of each patient and his/her family.

October 12, 2011

Dear elected officials,

I am writing as a result of my grave concern regarding the potential closure of Chester Mental Health Center (CMHC). I am currently the principal of St. John Lutheran School in Chester. I am also a retired state employee who worked at Chester Mental Health Center for 15 years—most of them as the Quality Manager. Please consider the points below as you ruminate on a decision that could change the future for an entire town.

- St. John Lutheran School in Chester is a small private school where the closure of CMHC would directly affect 13 families who count on the facility for employment. These families represent 18 children from our school or 11% of our school population. If CMHC were to close, it is likely that this percentage of students would be withdrawn from our school as a result of inability to pay tuition.
- When one considers the economic impact study completed by the University of Illinois, stating that 175 employees and \$13 million dollars of income would be lost in the City of Chester alone, it is evident that other families with students currently at St. John will be adversely affected if CMHC were to close. It is highly likely that St. John would lose a number of other students. We are a small school with a student body of 170 children covering 3 yr. old preschool through 8th grade. Each student we lose decreases our viability as a school.
- Chester Mental Health Center is by statute Illinois' maximum security psychiatric hospital. It was designed and built for this purpose. In 1976 when it was completed, the building won architectural awards for being a maximum secure environment without appearing or feeling like a maximum secure environment. As late as the early 2000's, delegations from other states toured CMHC to study and observe the secure, yet pleasant and therapeutic environment to inform their own construction. CMHC has continued to update security by adding a keyless, code door entry system and video monitoring cameras in patient areas. These security features enable staff at CMHC to create a therapeutic milieu even for patients with the most challenging behaviors.

Worship - Sat. 6:30 p.m. • Sun. 7:45 & 10:00 a.m.

Broadcast 10:00 a.m. Sundays on KBDZ 93.1 FM & KSGM 98.0 AM

- CMHC was one of the first forensic psychiatric hospital to become accredited by the Joint Commission on Accreditation of Healthcare Organizations. It maintains this accreditation to this day. The facility has always been accredited under the hospital standards which are far more rigorous than the mental health standards.
- CMHC has historically maintained the lowest staff to patient ratio in the department and has maintained the lowest cost per patient, although it has treated some of the most difficult patients.
- Staff at CMHC is specially and extensively trained to work with forensic and difficult-to-treat patients. They maintain professional standards and yet are empathetic and caring. A number of patients who are not guilty by reason of insanity (NGRI) with long lengths of stay mandated by courts would tell you that the staff at CMHC feels like their family.
- CMHC treats patients who are placed by the court who are in need of a secure locked setting. Patients who are unfit to stand trial (UST) return to court with relatively short lengths of stay as a result of strong UST programming. Patients who are NGRI can have extremely long lengths of stay since they are placed by courts in a locked facility until their term date—the date at which they would have served the maximum sentence if they had been found “guilty” of the crime with which they are charged. These patients participate in extensive programming and therapy.
- There are also patients at CMHC who are sent by other DHS facilities because they are unmanageable at less secure facilities. This usually involves violence inflicted by these patients on staff, other patients and/or property. CMHC has strong behavior management programming to help address the needs of these individuals.
- The civil population above, with no forensic component, must participate in civil commitment hearings at regular intervals described by law—every 30 days for the first 6 months, every 90 days for the next 6 months and annually thereafter. These hearings are to occur in the original court of commitment. Chester Mental Health Center has partnered with the 20th Judicial Circuit in a unique arrangement where other jurisdictions have given the 20th circuit permission to conduct these civil commitments. Even more unique is the fact that court is actually held at CMHC. The Judge and other court personnel visit CMHC and hold court at the facility. This eliminates the need for the most difficult to manage patients to be transported to the court of original jurisdiction.

Finally, please remember that your decision has the power to permanently alter lives. The patients at CMHC are a defenseless population, settled and served with respect in Chester. The staff consists of hard-working, well-trained caring individuals who give their best daily. The families of these workers are concerned and scared. My own junior high students have written that they “think about this every day, every second, day and night.” They voice that, “we

couldn't pay the bills and we would have to relocate." They say, "my dad, uncles and aunts would lose their jobs. . . result in my family being broken up." "Businesses, schools and restaurants would possibly have to close in Chester and the population would definitely decrease." "My friends would have to move far away and I would probably never see them again."

The future of Chester is in your hands. Currently, in town you'll see signs saying "Save Chester Mental Health Center" along with a major pink ribbon campaign to create awareness of breast cancer. It appears to me with both causes, we in Chester are fighting for our lives.

Many thanks for your consideration.

RE: Objection to the closure of Chester Mental Health Center – Chester, IL

To Whom It May Concern:

So far I have seen that the State of Illinois and CGFA have spent a lot of money for the purpose of possible closure of Chester MHC. All the information that has come my way has not been a complete picture. It seems that the information given to CGFA has only been the expense of getting other facilities structurally ready to receive CMHC Recipients.

What about the peripheral expenses? Such as: training staff? hiring staff? training the staff to train the staff (not just any person can instruct Non-violent Intervention)? increasing the state's unemployment expense? the expense of moving Recipients.

I have seen no comparison of employed vs. unemployed as to how either reflects in the state budget; the county budget or even surrounding counties.

I simply think that Springfield is not looking at the complete picture of closing any state facility. It is a lot more than construction so a few facilities can house CMHC Recipients or simply moving Recipients and closing doors. And it entails a whole lot of paperwork and MONEY..

Sincerely,

Othann H. Sieberg

Tell me the Governor's decision to close Chester Mental Health and the Illinois Youth Center is not politically motivated? Southern Illinois, Republicans = Closures of 2 State Facilities. What does that add up to? The Governor wants jobs but he's trying to eliminate almost 2,000 jobs, 581 directly related to Chester Mental Health and 55 million in income and economic output for the area. Where's the logic in this? What happened to a persons word is his bond? Didn't Quinn promise no lay offs? Didn't he or his staff investigate all the rules of these closures? Chester Mental Health is designated as the only Mental Health facility to be able to house this type of inmate. He'd have to change the law and to do that he needs the legislators to go along with his plan. Even his own party don't agree with him. The Arbitrator said he can't close them and we all know the Republicans don't agree with him. He needs to reconsider this decision and the people around him needs to convince him of that.

David Cox
Retired RT
Mead CC

WHAT IS THE REAL REASON the governor of Illinois wants to close Chester Mental Health? The center is used for forensic patients who have been found "not guilty" of their crime by reason of insanity and they are unfit to stand trial but are required by the laws of Illinois to remain confined. CMHC is Illinois' only maximum security mental health center and the Legislature would have to change a state law to allow Alton Mental Health Center in Alton, IL to BECOME a maximum center, to replace CMHC. An 84 mile hospital SITE change and 3.8 million dollars to improve Alton to a maximum security center does not make any sense to me. Ensuring that inmates are treated humanely and housed safely should be the goal of Illinois. Over population issues causes problems for the patients, guards and the public. The staff at CMHC have had the proper training to provide protection to all the above.

The governor and leaders of the state, like you need to listen to the average workers at these hospitals and prisons on how to save the state money. They see money spent wastefully everyday. If you want the truth on what goes on behind the walls of these hospitals and prisons talk to them not the superintendents.

I know my state has a spending problem and it seems to me a governor who is trying to create a state where no one works. Where does he think all the unemployment benefits for CMHC and the other 6 closures will come from? The cost of transferring patients will be a big dollar expense. , RANDOLPH COUNTY has an 8.3 unemployment rate now and jobs ARE NOT TO BE FOUND. WE ARE ALREADY WITHOUT A HOSPITAL TO DELIVER BABIES IN OUR COUNTY. I ASK YOU WHAT IS NEXT FOR RANDOLPH COUNTY RESIDENTS, NO MEDICAL CARE. WE NEED CMHC 501 JOBS TO STAY ALIVE.

THE EMOTIONAL STRAIN ON THE STAFF AT THE CENTER HAS TO BE VERY PAINFUL. I AM PROUD OF THE STAFF'S DEDICATION AND SAFETY THEY PROVIDE TO THE COMMUNITIES IN RANDOLPH AND SURROUNDING COUNTIES.

THANKS, TO ALL OF YOU ON THE COMMITTEE AND TO SEN. DAVE AND STATE REP COSTELLO. FOR YOUR EFFORTS TO RETAIN CMHC IN RANDOLPH COUNTY, WHERE ILLINOIS BEGAN.

MY PERSONAL THANKS, TO ALL THE COMMITTEE MEMBERS THAT I CALLED AND YOUR PHONE STAFF WERE VERY CORDIAL AND HELPFUL.

I SAY THIS TO ALL PRESENT-LOVE YOUR HOMETOWN, KNOW ITS HISTORY, ITS STRENGTHS, AND ITS BEAUTY AND BE PROUD OF WHERE YOU ARE FROM.

THANKS,

PUDGE COMBS

Advancing the human and civil rights of people with disabilities

SELF-ADVOCACY ASSISTANCE ★ LEGAL SERVICES ★ DISABILITY RIGHTS EDUCATION ★ PUBLIC POLICY ADVOCACY ★ ABUSE INVESTIGATIONS

**Testimony of Cheryl Jansen, Equip for Equality
Before the Commission on Government Forecasting and Accountability
Proposed Closure of Chester Mental Health Center
Chester, Illinois
October 12, 2011**

Equip for Equality, the independent, not-for-profit organization designated by the Governor in 1985 to administer the federally mandated Protection and Advocacy system for people with disabilities in Illinois, appreciates the opportunity to testify before the Commission regarding the proposed closure of Chester Mental Health Center (Chester MHC). Equip for Equality's mission is to advance the civil and human rights of people with disabilities and is accomplished through self-advocacy training and technical assistance, legal services, public policy initiatives, and investigations of abuse and neglect in all settings that serve people with disabilities.

In assessing whether, when, and how to close Chester MHC, the primary consideration must be the needs and best interests of the individuals being served at this facility and how those needs and interests will be met if it is closed. Other considerations, such as preserving jobs or employee raises, should not drive this important decision. In our view, closing a state operated mental health center must only occur as part of a comprehensive plan to provide for the needs of all the facility's residents, including those without Medicaid or other insurance. In this case, that means addressing the needs of the three distinct populations served at Chester MHC: 1) forensic (NGRI and UST); civilly admitted (comprising about 50% of the total population); and 3) dually diagnosed (mental illness and developmental disabilities). It is our understanding that all care at Chester MHC is long-term and there are no acute care beds.

While the decision to close this facility may be budget driven, because Chester serves those with longer care needs, it provides the Department of Human Services (DHS) with an opportunity to look across the spectrum of mental health (and, for those with dual diagnoses, developmental disability) services to develop a plan for community care, to meet the various needs of the individuals being served. From our perspective, this must include an examination of community resources and a commitment to providing sufficient funding to serve people in the community. Illinois has publicly announced its changed focus from institutional care to community services, as reflected in the Williams and Ligas consent decrees, as well as numerous public pronouncements by the Governor and his senior staff. But by entirely excluding the community

THE INDEPENDENT, FEDERALLY MANDATED PROTECTION & ADVOCACY SYSTEM FOR THE STATE OF ILLINOIS

from its plan to close Chester MHC, Illinois is foreclosing DHS from taking advantage of the opportunity for meaningful change that a well planned closure of Chester MHC would present.

Equip for Equality believes that individuals with mental illness and developmental disabilities are best served in the community, and we have long advocated for the State to strengthen and adequately fund the community-based system so that quality treatment and services are readily available and easily accessed. We recognize that the legal requirements for Chester's forensic population do not allow them to be served in the community and that those with acute care needs often require short-term hospitalization. However, the civilly admitted and dually diagnosed residents of Chester MHC could be served in the community with adequate funding for providers and the necessary services and supports. Moreover, over time this care would be less expensive and more effective than that provided in State Operated Centers. Unfortunately, community-based services for those with mental illness in Illinois have been seriously underfunded for decades, yet it is our understanding that the proposal to close Chester MHC does not contemplate any additional funds for community providers.

The decision whether or not to close Chester MHC must not be viewed in isolation because its impact could be far-reaching. We understand that the State contemplates relocating Chester's patients to other State Operated Centers, and closing or reducing the acute care beds in those receiving facilities. Thus, in addition to displacing its current residents, this action will reduce the State's ability to provide short-term acute psychiatric care at other state operated mental health centers. To accommodate the transfer of Chester residents to other state mental health facilities, DHS' recommendation calls for the conversion of acute care units at Alton MHC, Elgin MHC, and McFarland MHC to maximum or medium security units. In total, this will result in a loss of 172 acute care beds at these facilities, which translates into a loss of care for many hundreds of people with acute mental health needs each year. This problem will be compounded by the additional loss of acute care beds contemplated by the proposed closures of Singer MHC and Tinley Park MHC. A decision to close Chester and other state operated mental health centers without having a safety net for displaced acute care patients, puts the health and safety of individuals with mental illness at risk, and is therefore premature. And the decision to re-institutionalize all civilly admitted patients, including those with developmental disabilities as well as mental illness, rather than include them in the State's rebalancing plans along with residents of IMDs and ICFDDs, is fiscally and programmatically unsound and raises some of the same legal questions that gave rise to the Williams and Ligas cases.

DHS' proposed solution to the acute care problem is to relinquish responsibility for acute care services to private hospitals and community providers. Clearly, this is not a workable solution at this time. Illinois' community mental health system has been inadequately funded and subject to disproportionate cuts for years. Private hospitals have steadily decreased the number of inpatient psychiatric beds - partly in response to low reimbursement rates and significantly delayed payments from the state. As a result, we have received reports of people with mental illness who are in crisis and in need of acute psychiatric care languishing in hospital emergency rooms for 3, 4, and 5 days, without any treatment, waiting for a bed to open somewhere. For those with no insurance, transfer to private hospitals is generally not an option. It is both short-sighted and irresponsible to expect private hospitals and community providers to pick up the slack when currently neither has the resources or capacity to do so.

Unless the State first develops a comprehensive plan and increases capacity in the community, the closure of Chester MHC will likely result in greater numbers of people with mental illness being diverted to the criminal justice system, becoming homeless, or even dying. DHS must avail itself of this opportunity to examine the current service system for people with mental illness and individuals who are dually diagnosed with developmental disabilities and, based upon that examination, develop a plan for reasonable alternatives and increased community capacity – including the necessary funding.

Equip for Equality stands ready to work with the state to develop a meaningful and effective plan so that individuals with mental illness and dual diagnoses can receive quality care in the community and access acute psychiatric care when needed. The recommendation to close Chester MHC at this time, which includes relocating all residents to other State Operated Centers, with the attendant displacement of acutely ill patients, is unwise.

Thank you very much.

Dear Members of Commission on Government Forecasting and Accountability:

My name is Dan Colvis and I reside at 601 Hillview Drive, Chester, Illinois. I am 39 years of age and own an Investment Services company located in Chester. I grew up in Chester and am raising my family here as well.

The Chester Mental Health Center employs many well-trained hard working staff members. These employees are also raising their families in Chester, Randolph County, and Southern Illinois. Closing the Center would have a huge impact on Southern Illinois and more specifically Chester. The loss of earned income that gets invested back into our community would be tragic. Our schools and City Government rely on this income and would be hurt.

I would hope that those in charge of making an important decision like closing Chester Mental Health Center would look beyond just shutting the doors. This would affect so many people beyond just the loss of jobs. The trickle down effect would be enormous.

Chester doesn't have the big industry or manufacturing jobs that some communities have. Staff members just can't go out and obtain another job. Jobs in this area are very scarce.

Please consider this important decision seriously and look into the catastrophic loss it would have to our community.

Sincerely,

Dan Colvis

October 12, 2011

Honorable Legislative Members of CGFA,

My name is Rebecca Kempfer and I am a constituent of Sparta, IL and an employee of Chester Mental Health Center.

I am here to speak of facts that will make this situation personable and relatable. I have a Bachelors Degree in Political Science with a minor in Secondary Education from the University of Illinois. I am also a certified teacher in the State of Illinois in two content areas.

Between January and May of 2010, I submitted forty applications to teaching positions in the surrounding counties. I received one interview and no offers of employment.. I became a U of I educated 23 year old who couldn't pay my bills or find a job. Paying my student loans became very difficult and I had to defer my student loans.

I applied for an Office Assistant job at Chester Mental Health Center, received an interview and was offered employment. I am very grateful for my job because I am now able to pay my bills – all of them. My job allows me to contribute financially and support my family. I enjoy going to work everyday to ensure that all employees of Chester Mental Health receive a paycheck that reflects their hours worked each pay period.

I have met many new friends at work and each one has a story. Each one has a family that he or she supports: children to feed, bills to pay, educations to support. I haven't met an employee here whose family can function with one less parent working. In many cases, there is only one parent working– due to this economic environment. Closing Chester Mental Health Center will devastate their families' lives.

I had a very difficult time finding a job in this economy. I personally understand what it is like to wake up everyday and wonder when and how much money is going to come in. I am very grateful for my job. Working and providing for my family helps me feel proud and feel that I am a valuable person in my family.

The employees here are unique because they are highly trained to provide distinctive and personalized care for each individual patient. If you ask any employee here, they will tell you how appreciative they are of their job.

Closing Chester Mental Health Center is not the right move. Our communities will be financially devastated if Chester Mental Health closes. My coworkers, whom I call friends, will have to move away to find new jobs. Their children will relocate to new schools which will pull numbers and tax dollars from our local school districts. In turn, school districts will lay off teachers. All of these events will put more people out of jobs,

raise the unemployment rate even higher and create a bigger burden on our state to provide unemployment insurance to all of us who are unemployed as a result of CMHC closing.

The economic impact study from DHS stated "\$55 million dollars in income and economic output" is generated by Chester Mental Health Center. Our communities cannot afford to lose that amount of money, nor will our communities survive without that economic output. The small businesses in Chester, Sparta and the surrounding areas will be forced to close.

Do you think that I will be able to find a teaching job when other teachers are put out of a job? No. I'm not being negative – just realistic.

I will have to: apply for unemployment, submit another forty teaching applications if there are any openings available and defer my student loans again. I will pray that my application out of 500 will be chosen for an interview. I will pray that I can provide for my family by putting food on the dinner table. I will pray that the bank will not foreclose on my house.

My life, along with the lives of my coworkers and residents of all surrounding communities, will be devastated.

I urge you, distinguished members of CGFA to recommend to Governor Quinn to keep Chester Mental Health Center open.

The life of our communities depends on it.

Thank you for your time.

A handwritten signature in black ink that reads "Rebecca Kempfer". The signature is written in a cursive, flowing style.

Rebecca Kempfer
Office Assistant
Chester Mental Health Center

Chester Mental Health Center

The former Illinois Security Hospital, replaced by the new Chester Mental Health Center.

The Chester Mental Health Center was originally established by an act of the General Assembly on June 1, 1889, as an "Asylum for Insane Criminals." Forty-five thousand dollars was appropriated for the construction of the facility. Under the jurisdiction of the Board of Prison Commissioners it received its first three patients on Nov. 2, 1891. The legislative action provided for the transfer of all inmate convicts in the penitentiaries at Joliet and Chester, Illinois; for transfer of homicidal and dangerous patients confined in other state mental hospitals upon order by the Board; and for commitments under mittimus from all county courts throughout the State of Illinois. In 1910, the name of the hospital was changed to "Chester State Hospital," and control of the facility was vested in a board of administrators.

Histories and early reports confirm that few changes were made during the first 25 years of the operation of the hospital. A major measure was taken, however, by the 50th

General Assembly when it enacted the Civil Administrative Code that was approved March 7, 1917. This Code provided for control of the hospital to pass from the Board of Administration to the Department of Public Welfare. This effectively transferred the facility to the penitentiary system.

A redecorating program began in 1921 and was completed in 1922. Included in this project was the construction of an auxiliary

The new Mental Health Center in Chester.

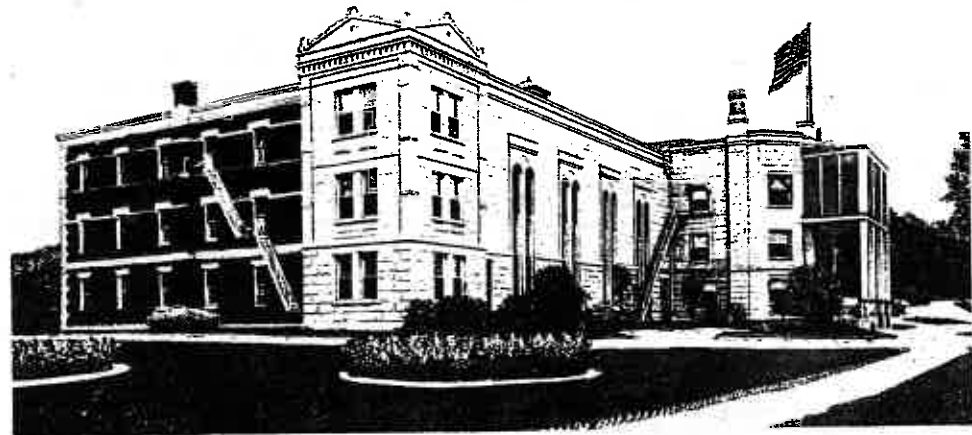

A History Of Chester, IL 1829-1979

recreation yard that was also to be used for restraining and safeguarding patients in care of fire.

A new four-story building was constructed in 1929 which more than doubled the capacity of the hospital. However, the new building did not eliminate the overcrowded condition and by 1932 the population had reached 446 persons. As a result, legislative action was taken in 1933 which eliminated the transfer of patients from penal institutions and limited the facility to patients committed under mittimus from courts and for transfers from other state mental hospitals. In addition, the facility's name was changed to the Illinois Security Hospital. By 1935 those prisoners being treated there had been returned to the penitentiary system and the population had dropped to 255.

There was little change in the facility until the early 1960's. Up until that time the hospi-

tal provided primarily custodial care for its patients. The 1960's brought about major changes in the philosophy and style of the treatment of the mentally ill throughout the country. These changes were reflected at the Illinois Security Hospital in the establishment of professionally directed efforts at treatment programming. At the same time the physical plant continued to age and was no longer adequate to meet the changing needs for the modern treatment and care. Accordingly, in 1972 the ground was broken for construction of a totally new facility. At the same time the name of the hospital was changed to the Chester Mental Health Center. In 1976 the new facility was occupied. It is considered to represent the most modern maximum security mental health facility in the country and has a capacity for 360 patients. During 1979 an average of 260 patients were in residence.

State Hospital For Criminal Insane, Chester, Illinois until 1975

ILLINOIS COMMISSION ON GOVERNMENT FORECASTING & ACCOUNTABILITY

Co-Chair Senator Jeffrey M. Schoenberg - Co-Chair Representative Patricia R. Bellock

RECORD OF COMMISSION WITNESS

10/12/11

SUBJECT MATTER: **Chester Mental Health Center**

IDENTIFICATION:

Name: Sandra K. Brooks RN
Title: Retired Nursing Supervisor Chester Mental Health
Firm / Business or Agency: Chester Mental Health
Address: 1315 Lehman Dr City: Chester State: IL Zip: 62233
Email: Suzyq.b2002@yahoo.com

POSITION: Proponent Opponent No Position

TESTIMONY: Oral Written Statement Filed Record of Appearance Only

WRITTEN COMMENTS:

Just this past December, I retired from my position as nursing supervisor of Unit E at Chester Mental Health Center after 22 years and 9 months of faithful service to the state of Illinois. In that time, I took care of the most violent mentally ill and unfit to stand trial persons in the state of Illinois - people that the other facilities could not handle. I could tell a lot of stories about CMHC, about the dedicated people who work there risking their lives and physical healthiness to care for these people. I could tell stories of watching my co-workers being attacked and severely injured. I could tell you about the less functioning, mentally retarded, mentally ill patient being brutalized by their peers and of the courageous staff who intervened to protect them. I could tell you of staff shortages, tremendous amounts of overtime, and lack of up to date equipment. But what I really want to

say here that many lives in this community are affected 24/7 by the presence of Chester Mental Health Center - not only in Chester, but also in many surrounding communities. People depend on this facility to pay their bills - pay their taxes to the state and Federal government - in other words to LIVE!! We the state employees and retirees of Chester Mental Health Center did not cause the state to have financial difficulties. Closing us and other facilities is not the answer. Where are the 242 plus patients going to go? Do you want the most violent mentally ill patients in the state of Illinois living next to you and your family? Without the medicine and the expert care that that these patients receive at CMHC, they would deteriorate rapidly and would be out of control -

ILLINOIS COMMISSION ON GOVERNMENT FORECASTING & ACCOUNTABILITY

POSITION: Proponent Opponent No Position

TESTIMONY: Oral Written Statement Filed Record of Appearance Only

WRITTEN COMMENTS:

The Chester community has a long history of caring for the physical, emotional and spiritual needs of those who are incarcerated among us. As a pastor I get to hear the pride expressed by many in how they have cared for the recipients as teachers, librarians, and even as a barber. There is a unique aspect to this, a pattern of personal care and concern that does not happen in the same way in larger communities. For this reason there are several unique arrangements our community has established, including the relationship with our local courts. Also, for this reason, Chester Mental Health Center represents more to our community than jobs and money. It is a part of our purpose and mission as a community, part of how we benefit the people of our state as a whole. Once again this is a unique pattern of care and concern that does not happen in the same way in larger communities. Others can tell of Chester Mental Health Center as a model facility, and of how much it would actually cost to adapt other facilities to provide comparable care to this number of recipients- or whether that would even be possible by adapting other facilities. This is also the only maximum security facility for the criminally insane in the state of Illinois. But I want to highlight the care and concern of the workers and the community for the recipients at Chester Mental Health Center.

I don't understand how you can spend the money to move these patients. Are you going to push them out of IL so we do not have facilities to handle this process.

The timing seems odd that we A Republican was elected and now we are under attack.

I worked @ St. Elizabeth's hospital East St. Louis And then couldn't handle extra patients. then how can they now.

WRITTEN COMMENTS:

Due to the extreme violent nature of patients placed at CMHC it would be detrimental at several levels to relocate them.

I have personally received injuries by the aggressiveness of the patients. The last of which has made it unable for me to work, changing my life forever.

Confining patients of this nature to a facility designed to work under these conditions is the most logical decision.

The closure would also financially devastate the community.

I am a 31-yr member of this community and a 28-yr. employee of Chester Mental Health (retired). This closing would be devastating to our community. We are a small, rural community with few employment opportunities, especially @ the professional level.

As a retiree, I do not see any way to close this facility that would be in any best interest of the patients. This is a new facility built specifically for maximum security patients.

WRITTEN COMMENTS:

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.

JOIN WITH LOCAL 424 CHESTER MENTAL HEALTH EMPLOYEES IN SAVING JOBS IN OUR REGION.

Currently Governor Quinn has announced that he intends on closing Chester Mental Health Center, which will affect many of our friends and family. This facility currently has approx. 500 employees, which if closed, would cause the unemployment number grow higher, not to mention devastate the local economy. Governor Quinn needs to focus on trimming the budget in other ways, and not take away the jobs which will devastate our region.
