

# MOLECULAR SYNTHESIS (CH36)

## Major Requirements for the **MOLECULAR SYNTHESIS** B.S. Degree Starting Fall 2022 and After – Transfer Students

The Molecular Synthesis major offers a thorough training in all aspects of the molecular synthesis of organic, inorganic, and biological substances, along with a fundamental understanding of their structure and reactivity. This major provides an excellent preparation for employment in biotechnology, diagnostic, electronic, and pharmaceutical enterprises as well as for graduate programs in organic, bioorganic, and inorganic chemistry.

### Important Notes:

- Courses listed above only include **major requirements**. Speak with your college advisor for planning completion of general education and university requirements.
- Lab courses are **bolded**. We do not recommend taking a lab your first quarter at UCSD or taking more than one lab/quarter, with the exception of Physics labs.
- No more than one (1) "D" grade is allowed in upper-division major coursework.
- A minimum 2.0 major GPA is required for graduation.
- You have multiple options for fulfilling many of your upper-division requirements with this major. The plan above considers Course Offerings but is only a sample plan. Please refer to the Course Offerings page on our website and the course catalog if you wish to adjust.
- You must complete two of the following labs: CHEM 123, 143C, and 143D. CHEM 123 enrollment is prioritized for graduating CH36 seniors.
- Molecular Synthesis Elective is chosen from CHEM 114B, 114C, 155, or 185. 4 units of CHEM 199 may be petitioned to fulfill this requirement.
- The plan above is meant to be a recommendation and guiding tool; this is not the only path to graduation in four years. Please reach out to the Advising Team if you ever have any questions or concerns.
