

Ohio Revised Code

Section 5703.47 Definition of federal short term rate.

Effective: September 6, 2012

Legislation: House Bill 508 - 129th General Assembly

(A) As used in this section, "federal short-term rate" means the rate of the average market yield on outstanding marketable obligations of the United States with remaining periods to maturity of three years or less, as determined under section 1274 of the "Internal Revenue Code of 1986," 100 Stat. 2085, 26 U.S.C.A. 1274, for July of the current year.

(B) On the fifteenth day of October of each year, the tax commissioner shall determine the federal short-term rate. For purposes of any section of the Revised Code requiring interest to be computed at the rate per annum required by this section, the rate determined by the commissioner under this section, rounded to the nearest whole number per cent, plus three per cent, shall be the interest rate per annum used in making the computation for interest that accrues during the following calendar year. For the purposes of sections 5719.041 and 5731.23 of the Revised Code, references to the "federal short-term rate" are references to the federal short-term rate as determined by the tax commissioner under this section rounded to the nearest whole number per cent.

(C) Within ten days after the interest rate per annum is determined under this section, the tax commissioner shall notify the auditor of each county of that rate of interest.
