## 1. Nature of Operations and Summary of Significant Accounting Policies

## Nature of Operations

The Metropolitan Group Property and Casualty Insurance Company (“the Company”) is incorporated under the laws of the State of Rhode Island. The Company is a wholly owned subsidiary of Metropolitan Property and Casualty Insurance Company (“MPC”), domiciled in Rhode Island, which is a wholly owned subsidiary of MetLife, Inc. (“MetLife”), incorporated in the State of Delaware, a public company whose shares are traded on the New York Stock Exchange.

The Company is engaged, principally in the United States, in the property-liability insurance business. The Company’s primary ongoing business is the sale of private passenger automobile, homeowners and personal umbrella insurance.

The Company is authorized to sell property-liability insurance in 41 states and the District of Columbia. The top geographic locations for statutory direct earned premiums were Connecticut, Georgia, Illinois, Michigan, New Jersey, and New York for the year ended December 31, 2014. No other jurisdiction accounted for more than 5% of statutory direct earned premiums.

The Company has exposure to catastrophes, which are an inherent risk of the property-liability insurance business, which have contributed, and will continue to contribute, to material year-to-year fluctuations in the Company’s results of operations and financial position. The Company defines a catastrophe as an event that produces a number of claims in excess of a preset per-event threshold of average claims in a specific area. The Company also has exposure to environmental, asbestos, and other mass tort claims.

## Summary of Significant Accounting Policies

## A. Accounting Practices

The Company’s statement is presented on the basis of accounting practices prescribed or permitted by the Rhode Island Department of Business Regulation, Insurance Division (“RI DBR, Insurance Division”). While the RI DBR, Insurance Division has the right to permit specific practices that may deviate from prescribed practices, the Company did not follow any permitted practices other than those prescribed by the RI DBR, Insurance Division.

The RI DBR, Insurance Division has adopted the National Association of Insurance Commissioners’ statutory accounting practices (“NAIC SAP”) as the basis of its statutory accounting practices.

Accounting practices and procedures of the NAIC are a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America (“GAAP”). The more significant differences are as follows:

- (1) Investment in bonds are generally carried at amortized cost, while under GAAP, they are carried at either amortized cost or fair value based on their classification according to the Company’s ability and intent to hold or trade the securities;
- (2) Investments in common stocks are valued as prescribed by the Securities Valuation Office (“SVO”) of the NAIC, while under GAAP, common stocks are reported at market value;
- (3) Acquisition costs, such as commissions and other costs related to acquiring new business, are expensed as incurred, while under GAAP, they are deferred and amortized to income as premiums are earned or in relation to estimated gross profits;
- (4) Prior to January 1, 2001, a Federal income tax provision was made only on a current basis for Statutory Accounting, while under GAAP, a provision was also made for deferred taxes on temporary differences between the financial reporting and tax bases of assets and liabilities. Subsequent to January 1, 2001, NAIC SAP requires an amount to be recorded for deferred taxes however, there are limitations as to the amount of deferred tax assets that may be reported as “admitted assets”;
- (5) Assets are reported under NAIC SAP as “admitted-asset” value and “non-admitted” assets are excluded through a charge against surplus, while under GAAP, “non-admitted assets” are reinstated to the balance sheet, net of any valuation allowance;
- (6) The change in provision for reinsurance is charged or credited directly through surplus under NAIC SAP, while this provision is not recognized for GAAP purposes;
- (7) The balance sheet under NAIC SAP is reported net of reinsurance, while under GAAP, the balance sheet reports reinsurance recoverables, including amounts related to losses incurred but not reported, and prepaid reinsurance premium as assets;

**NOTES TO FINANCIAL STATEMENTS**

- (8) Comprehensive income and its components are not presented in the statutory financial statements;
- (9) Subsidiaries are included as common stock carried under the equity method, with the equity in net income of subsidiaries credited directly to the Company's surplus for NAIC SAP, while GAAP requires either consolidation or the equity in earnings of subsidiaries or net income of subsidiaries to be credited to the income statement; and
- (10) Goodwill under GAAP is calculated as the difference between the cost of acquiring the entity and the fair value of the assets received and liabilities assumed. Under NAIC SAP, goodwill is calculated as the difference between the cost of acquiring the entity and the reporting entity's share of the historical book value of the acquired entity. However, under NAIC SAP the amount of goodwill recorded as an "admitted asset" is subject to limitations. In June 2001, SFAS No. 142, Goodwill and Other Intangible Assets significantly changed the method of accounting for intangible assets. Previous authoritative guidance presumed that goodwill and all other intangible assets were wasting assets, and thus the amounts assigned them should be amortized in determining net income. SFAS No. 142 does not presume that those assets are wasting assets. Instead, goodwill and intangible assets that have indefinite useful lives will not be amortized but rather will be tested at least annually for impairment by comparing the fair values of those assets with their recorded amounts.

**B. Use of Estimates**

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

**C. Accounting Policy**

Premiums are generally recognized as revenue on a pro rata basis over the policy term. The portion of the premiums written applicable to the unexpired terms of the policies is recorded as unearned premiums.

- (1) Short-term investments are stated in the same manner as comparable longer-term investments described below.
- (2) Bonds not backed by other loans are generally stated at amortized cost unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of amortized cost or fair value. Bonds not backed by other loans are amortized using the scientific method.
- (3) Common stocks of non-affiliates are stated at fair value. For investments in subsidiary, controlled or affiliated ("SCA") companies, see Note 1C(7).
- (4) Redeemable preferred stocks are generally stated at cost or amortized cost unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of cost, amortized cost or fair value. Perpetual preferred stocks are generally stated at fair value unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of cost or fair value.
- (5) The Company has no mortgage loans.
- (6) Mortgage-backed bonds included in bonds are generally stated at amortized cost using the scientific method unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of amortized cost or fair value. Amortization of the discount or premium from the purchase of these securities considers the estimated timing and amount of prepayments of the underlying mortgage loans. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For credit-sensitive mortgage-backed and asset-backed bonds and certain prepayment-sensitive bonds (e.g., interest-only securities), the effective yield is recalculated on a prospective basis. For all other mortgage-backed and asset-backed bonds, the effective yield is recalculated on a retrospective basis.

For certain residential mortgage-backed securities ("RMBS"), both an initial and final NAIC designation is determined on a security-by-security basis based on a range of values published by the NAIC. The initial designation is used to determine the carrying value of the RMBS. RMBS with initial designations of 1 to 2 are stated at amortized cost while RMBS with initial designations of 3, 4, 5 or 6 are stated at the lower of amortized cost or fair value. The final designation calculation compares this carrying value with a range of values, resulting in a final NAIC designation reported herein, which is used for all other accounting and reporting purposes.

The NAIC adopted a revised rating methodology for loan-backed and structured securities, including asset-backed securities ("ABS"), collectively "loan-backed" securities which are not modeled. For these securities, the NAIC relies on the NAIC Credit Rating Provider ("CRP") rating to determine the initial NAIC designation. The second lowest CRP rating is used to determine the carrying value of the security, which is based on the NAIC's estimate of expected losses, using an NAIC published formula. The carrying value of the security determines its final NAIC designation, which is used for reporting in the annual statement. This revised methodology does not apply to NAIC 1 and NAIC 6 securities which are rated at the second lowest CRP designation.

- (7) The Company has no investments in subsidiary, controlled or affiliated ("SCA") companies.
- (8) The Company has no minor ownership interests in joint ventures, partnerships and limited liability companies.
- (9) For derivative accounting policy, see Note 8.
- (10) For premium deficiency reserve policy, see Note 30.
- (11) The liability for unpaid reported losses is based on a case by case estimate (case reserves) for most lines of business, for the other lines of business, unpaid losses are based on average "statistical" reserves. There is an additional overall estimate (supplemental reserves for several specific lines of business) based on the Company's past experience, this is also known as an additional reserve on known claims. A provision also is made for losses incurred but not reported on the basis of estimates and past experience modified for current trends and estimates of expenses for investigating and settling claims, reduced for anticipated salvage and subrogation. The liability for unpaid losses on business assumed is based in part on reports received from ceding companies.

Management believes that the liability for unpaid losses and loss adjustment expenses is adequate to cover ultimate unpaid losses and loss adjustment expenses incurred. However, such liability is necessarily based on estimates, and the ultimate liability may vary significantly from such estimates. In accordance with industry practice, the Company regularly reviews its estimated liability, and any adjustments are reflected in the period in which they become known. In accordance with guidelines established by the NAIC, the liability for unpaid losses at December 31, 2014 is reported net of estimated salvage and subrogation recoverable.

(2) The consolidating companies join with MetLife, Inc. ("MetLife") and its includable subsidiaries in filing a consolidated U.S. life and non-life federal income tax return in accordance with the provisions of the Internal Revenue Code of 1986, as amended (the "Code"). Current taxes (and the benefits of tax attributes such as losses) are allocated to MetLife and its subsidiaries under the consolidated tax return regulations and a tax sharing agreement. Under the consolidated tax return regulations, MetLife has elected the "percentage method" (and 100 percent under such method) of reimbursing companies for tax attributes, e.g., net operating losses. As a result, 100 percent of tax attributes are reimbursed by MetLife to the extent that consolidated federal income tax of the consolidated federal tax return group is reduced in a year by tax attributes. On an annual basis, each of the profitable subsidiaries pays to MetLife the federal income tax which it would have paid based upon that year's taxable income. If MetLife or the subsidiary has current or prior deductions and credits (including but not limited to losses) which reduce the consolidated tax liability of the consolidated federal tax return group, the deductions and credits are characterized as realized (or realizable) by MetLife and its subsidiaries when those tax attributes are realized (or realizable) by the consolidated federal tax return group, even if MetLife or the subsidiary would not have realized the attributes on a stand-alone basis under a "wait and see" method.

- G. As of December 31, 2014, the Company had no liability for unrecognized tax benefits.

## 10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

- A. The Company is a wholly owned subsidiary of MPC, domiciled in Rhode Island, which is a wholly owned subsidiary of MetLife, incorporated in the State of Delaware, a public company whose shares are traded on the New York Stock Exchange.

As of December 31, 2013, the Company owned 100% of the outstanding common stock of Metropolitan Reinsurance Company (UK) Limited ("MetRe U.K."), an affiliated unconsolidated subsidiary. MetRe U.K., a United Kingdom company, historically participated in aviation, marine and non-marine syndicates worldwide. It also wrote a small volume of direct reinsurance business, however, it has not written any new business since 1991. Additionally, the syndicates stopped writing new business in 1992 due to the insolvency of the English and American Insurance Company, a major syndicate participant. MetRe U.K. filed a solvent scheme of arrangement in the British courts in November of 2009. On October 12, 2010, the solvent scheme of arrangement was approved and sanctioned by the High Court of Justice of England and Wales. On December 9, 2010, the United States Bankruptcy Court granted recognition to the U.K. Court decision allowing for enforcement of the High Court's sanction order in the United States. A claims bar date of April 11, 2011, a deadline by which creditors under reinsurance agreements were required to submit any insurance claims they may have against MetRe U.K., was established.

The scheme of arrangement was finally closed as of September 13, 2013. This concluded all business relating to the EAUA pools for the pool participants, including MetRe U.K. For MetRe U.K., this also represented the conclusion of engaging in any insurance business. Following the closure of the scheme, MetRe U.K. filed an application with its U.K. regulators to be de-authorized as an insurance company. The entailed filing a petition with the Prudential Regulation Authority and the Financial Conduct Authority for cancellation of its "Part VI permission" to be an insurance company. This application was approved on March 5, 2014.

As the final step of winding down its affairs, MetRe U.K. applied to have its name stricken from the Register of Companies. Notice of the application was provided to remaining creditors and was publicized in the London Gazette by the Registrar of Companies. MetRe U.K. was notified on October 14, 2014 that MetRe U.K. was officially stricken from the Register and the company is now dissolved.

As of December 31, 2014, the Company no longer owns the common stock of any affiliated unconsolidated subsidiary.

G. All Other Contingencies

The contingency footnote has been prepared on a combined basis for MPC and its subsidiaries and affiliates. The Company is a wholly owned subsidiary of MPC.

A punitive class action has been filed in Arkansas state court alleging that MPC breached the insurance contract and engaged in bad faith by utilizing the Colossus bodily injury evaluation tool. The purported class action included Arkansas insureds who made first party uninsured/underinsured bodily injury claims. The suit alleges that Colossus systematically undervalues these bodily injury claims. MPC has removed the case to federal court and is vigorously defending the action.

MPC has appealed to the Rhode Island Supreme Court a judgment for \$1,750,000 in favor of a Rhode Island body shop who alleged MPC engaged in abuse of process by instigating a criminal investigation into its practices. Allegations of tortious interference, malicious prosecution, and violation of the Rhode Island Deceptive Trade Practices Act were dismissed prior to the two-week trial. Arguments before the Court are expected during its 2014-2015 term.

A former Property and Casualty Specialist filed a national putative collective action in the United States District Court for the District of Arizona. The complaint alleged that MPC improperly classified Property and Casualty Specialists ("PCS's") in violation of the Fair Labor Standards Act. The plaintiff sought overtime compensation, interest, statutory penalties, reasonable attorneys' fees and litigation costs and damages. Others have joined the action by filing opt-in notices with the court. The court granted plaintiff's motion for conditional certification of the collective action, authorizing notice to certain present and former PCS's. The court subsequently granted MPC's motion to decertify the collective action, dismissing the claims of the opt-in plaintiffs without prejudice to their filing of individual suits if they decide to do so.

A purported class action has been filed in Arkansas federal court alleging that MPC breached its insurance contracts by depreciating the cost of labor in Arkansas homeowner property damage claims. The plaintiff seeks damages for breach of contract and unjust enrichment. MPC no longer depreciated labor after the Arkansas Insurance Department directed insurers in July 2013 to stop the practice. MPC has removed the suit to Federal Court and is vigorously defending the suit.

Various litigation claims, and assessments against the Company, in addition to those discussed above and those otherwise provided for in the Company's financial statements, have arisen in the course of the Company's business, including but not limited to, in connection with its activities as an insurer, employer and taxpayer. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning the Company's compliance with applicable insurance and other laws and regulations.

It is not feasible to predict or determine the ultimate outcome of all pending investigations and legal proceedings or provide reasonable ranges of potential losses, except as noted above in connection with specific matters. In some of the matters referred to above, very large and/or indeterminate amounts, including punitive and treble damages, are sought. Although in light of these considerations it is possible that an adverse outcome in certain cases could have a material adverse effect upon the Company's financial position, based on information currently known by the Company's management, in its opinion, the outcomes of such pending investigations and legal proceedings are not likely to have such an effect. However, given the large and/or indeterminate amounts sought in certain of these matters and the inherent unpredictability of litigation, it is possible that an adverse outcome in certain matters could, from time to time, have a material adverse effect on the Company's financial statements.

**Assets and Liabilities**

The methods and significant assumptions used to estimate the fair value of all financial instruments are presented below.

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In most cases, the exit price and the transaction (or entry) price will be the same at initial recognition.

The Company determines the estimated fair value of its investments using primarily the market approach and the income approach. The use of quoted prices for identical assets and matrix pricing or other similar techniques are examples of market approaches, while the use of discounted cash flow ("DCF") methodologies is an example of the income approach. The Company prioritizes the use of observable inputs over unobservable inputs.

## NOTES TO FINANCIAL STATEMENTS

The Company categorizes its financial assets and liabilities into a three-level hierarchy, based on the significant input with the lowest level in their valuation. The input levels are as follows. Level 1 - Unadjusted quoted prices for identical assets or liabilities in active markets that are readily and regularly obtainable. Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1. Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

In general, investments classified within Level 3 use many of the same valuation techniques and inputs as described in the Level 2 discussions below. However, if key inputs are unobservable, or if the investments are less liquid and there is very limited trading activity, the investments are generally classified as Level 3. The use of independent non-binding broker quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency in the process to develop the valuation estimates generally causing these investments to be classified in Level 3.

### **Bonds and Cash**

When available, the estimated fair value for bonds, including loan-backed securities, are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1, are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified in Level 2.

When observable inputs are not available, the market standard valuation methodologies for determining the estimated fair value of certain types of securities that trade infrequently, and therefore have little or no price transparency, rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation, and cannot be supported by reference to market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investments are classified in Level 3.

Excluded from the disclosure are investments accounted for under the equity method including affiliated common stocks.

The estimated fair value for cash approximates carrying value and is classified as Level 1 given the nature of cash.

The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's securities holdings.

### **Investment Income Due and Accrued**

Due to the short-term nature of investment income due and accrued, the Company believes there is minimal risk of material changes in interest rates or credit of the issuer such that estimated fair value approximates carrying value.

D. At December 31, 2014, the Company had no investments where it was not practicable to estimate fair value.

## NOTES TO FINANCIAL STATEMENTS

### F. Retroactive Reinsurance

Metropolitan Group Property and Casualty Ins. Co (formerly Met Re) wrote reinsurance lines of business prior to 1991. The Company engaged in a complex transaction with Clearwater Insurance Company (formerly Odyssey Reinsurance Corporation; prior to that, Skandia America Reinsurance Corporation) and former Odyssey Re affiliate Hudson Reinsurance Company Limited, whereby all 1989 and prior reinsurance business reserves were transferred to Hudson (subsequently transferred to Clearwater via a novation of the transaction agreement). The Company is protected from negative loss development on the reinsurance reserves by virtue of an additional excess of loss reinsurance contract with Clearwater. Through a separate agreement, Clearwater agreed to administer the business during the runoff period.

The 1989 and prior reinsurance loss reserve transfer to the Odyssey Re affiliates was done on an undiscounted basis for consideration of an equal amount as follows:

a. Reserves Transferred:	\$	0	\$	327,174,389

### 27. Structured Settlements

A contingent liability exists to the extent that the issuers of the annuity contracts become unable to fulfill their contractual obligations. The present value of all annuity contracts still in force at December 31, 2014 was \$2,222,387. If the Company became responsible for any payments under these annuities, such payments could possibly be reduced by reinsurance recoverables.
