NOTES TO FINANCIAL STATEMENTS

1. Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

The Metropolitan Property and Casualty Insurance Company ("the Company") is incorporated under the laws of the State of Rhode Island. The Company is a wholly owned subsidiary of MetLife, Inc ("MetLife"), incorporated in the State of Delaware, a public company whose shares are traded on the New York Stock Exchange. As of December 31, 2015, the Company owned 100% of the outstanding common stock of the following affiliated consolidated subsidiaries: Metropolitan Casualty Insurance Company ("Met CAS"), Metropolitan General Insurance Company ("Met GEN"), Metropolitan Group Property and Casualty Insurance Company ("Met Group"), Metropolitan Direct Property and Casualty Insurance Company ("Met Direct"), Economy Fire & Casualty Company ("EFAC"), and the Company reports its investment in Metropolitan Lloyds Insurance Company of Texas ("Met Lloyds") in Schedule BA (See Note 10.B.). As of December 31, 2015, the Company owned 100% of the outstanding common stock of the following affiliated unconsolidated subsidiaries: Metropolitan Lloyds, Inc. and MetLife Auto & Home Insurance Agency, Inc.

The Company is engaged, principally in the United States, in the property-liability insurance business. The Company's primary ongoing business is the sale of private passenger automobile, homeowners and personal umbrella insurance.

The Company is authorized to sell property-liability insurance in 48 states and the District of Columbia. The top geographic locations for statutory direct earned premiums were Connecticut, Massachusetts, New Jersey, New York, and North Carolina for the year ended December 31, 2015. No other jurisdiction accounted for more than 5% of statutory direct earned premiums.

The Company distributes its property-liability products through different distribution systems including exclusive agents, work-site marketing, direct response and independent agents.

The Company has exposure to catastrophes, which are an inherent risk of the property-liability insurance business, which have contributed, and will continue to contribute, to material year-to-year fluctuations in the Company's results of operations and financial position. The Company defines a catastrophe as an event that produces a number of claims in excess of a preset per-event threshold of average claims in a specific area.

Summary of Significant Accounting Policies

A. Accounting Practices

The Company's statement is presented on the basis of accounting practices prescribed or permitted by the Rhode Island Department of Business Regulation, Insurance Division ("RI DBR, Insurance Division"). While the RI DBR, Insurance Division has the right to permit specific practices that may deviate from prescribed practices, the Company did not follow any permitted practices other than those prescribed by the RI DBR, Insurance Division.

The RI DBR, Insurance Division has adopted the National Association of Insurance Commissioners' statutory accounting practices ("NAIC SAP") as the basis of its statutory accounting practices.

Accounting practices and procedures of the NAIC are a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America ("GAAP"). The more significant differences are as follows:

(1) Investment in bonds are generally carried at amortized cost, while under GAAP, they are carried at either amortized cost or fair value based on their classification according to the Company's ability and intent to hold or trade the securities;
(2) Investments in common stocks are valued as prescribed by the Securities Valuation Office ("SVO") of the NAIC, while under GAAP, common stocks are reported at market value;
(3) Acquisition costs, such as commissions and other costs related to acquiring new business, are expensed as incurred, while under GAAP, they are deferred and amortized to income as premiums are earned or in relation to estimated gross profits;
(4) Prior to January 1, 2001, a Federal income tax provision was made only on a current basis for Statutory Accounting, while under GAAP, a provision was also made for deferred taxes on temporary differences between the financial reporting and tax bases of assets and liabilities. Subsequent to January 1, 2001, NAIC SAP requires an amount to be recorded for deferred taxes; however, there are limitations as to the amount of deferred tax assets that may be reported as "admitted assets";
(5) Assets are reported under NAIC SAP as "admitted-asset" value and "non-admitted" assets are excluded through a

charge against surplus, while under GAAP, "non-admitted assets" are reinstated to the balance sheet, net of any valuation allowance;

(6) The change in provision for reinsurance is charged or credited directly through surplus under NAIC SAP, while this provision is not recognized for GAAP purposes;

(7) The balance sheet under NAIC SAP is reported net of reinsurance, while under GAAP, the balance sheet reports reinsurance recoverables, including amounts related to losses incurred but not reported, and prepaid reinsurance premium as assets;

(8) Comprehensive income and its components are not presented in the statutory financial statements;

(9) Subsidiaries are included as common stock carried under the equity method, with the equity in net income of subsidiaries credited directly to the Company's surplus for NAIC SAP, while GAAP requires either consolidation or the equity in earnings of subsidiaries or net income of subsidiaries to be credited to the income statement; and

(10) Goodwill under GAAP is calculated as the difference between the cost of acquiring the entity and the fair value of the assets received and liabilities assumed. Under NAIC SAP, goodwill is calculated as the difference between the cost of acquiring the entity and the reporting entity's share of the historical book value of the acquired entity. However, under NAIC SAP the amount of goodwill recorded as an "admitted asset" is subject to limitations. In June 2001, SFAS No. 142, Goodwill and Other Intangible Assets significantly changed the method of accounting for intangible assets. Previous authoritative guidance presumed that goodwill and all other intangible assets were wasting assets, and thus the amounts assigned them should be amortized in determining net income. SFAS No. 142 does not presume that those assets are wasting assets. Instead, goodwill and intangible assets that have indefinite useful lives will not be amortized but rather will be tested at least annually for impairment by comparing the fair values of those assets with their recorded amounts.

B. Use of Estimates

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are generally recognized as revenue on a pro rata basis over the policy term. The portion of the premiums written applicable to the unexpired terms of the policies is recorded as unearned premiums.

(1) Short-term investments are stated in the same manner as comparable longer-term investments described below.

(2) Bonds not backed by other loans are generally stated at amortized cost unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of amortized cost or fair value. Bonds not backed by other loans are amortized using the scientific method.

(3) Common stocks of non-affiliates are stated at fair value. For investments in subsidiary, controlled or affiliated ("SCA") companies, see Note 1C(7).

(4) Redeemable preferred stocks are generally stated at cost or amortized cost unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of cost, amortized cost or fair value. Perpetual preferred stocks are generally stated at fair value unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of cost or fair value.

(5) The Company has no mortgage loans.

(6) Mortgage-backed bonds included in bonds are generally stated at amortized cost using the scientific method unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of amortized cost or fair value. Amortization of the discount or premium from the purchase of these securities considers the estimated timing and amount of prepayments of the underlying mortgage loans. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For credit-sensitive mortgage-backed and asset-backed bonds and certain prepayment-sensitive bonds (e.g., interest-only securities), the effective yield is recalculated on a prospective basis. For all other mortgage-backed and asset-backed bonds, the effective yield is recalculated on a retrospective basis.

For certain residential mortgage-backed securities ("RMBS") and certain commercial mortgage-backed securities ("CMBS"), both an initial and final NAIC designation is determined on a security-by-security basis based on a range of values published by the NAIC. The initial designation is used to determine the carrying value of the RMBS and CMBS. RMBS and CMBS with initial designations of 1 to 2 are stated at amortized cost while RMBS and CMBS with initial designations of 3, 4, 5 or 6 are stated at the lower of amortized cost or fair value. The final designation calculation compares this carrying value with a range of values, resulting in a final NAIC designation reported herein, which is used for all other accounting and reporting purposes.

For loan-backed securities, including asset-backed securities ("ABS"), which are not modeled, the NAIC relies on the second lowest NAIC Credit Rating Provider ("CRP") rating to determine the initial NAIC designation. The second lowest CRP rating is used to determine the carrying value of the security, which is based on the NAIC's estimate of expected losses, using an NAIC published formula. The carrying value of the security determines its final NAIC designation, which is used for reporting in the Annual Statement and in RBC calculations. This revised methodology does not apply to NAIC 1 and NAIC 6 securities, which are rated at the second lowest CRP designation.

(7) The Company accounts for investments in subsidiary, controlled and affiliated ("SCA") companies using the statutory equity of the investee if the entity is an insurance company. All noninsurance entities are valued at the U.S. Generally Accepted Accounting Principles ("GAAP") equity of the investee.

(8) Investments in joint ventures, partnerships and limited liability companies ("LLC") are carried at the underlying audited GAAP equity of the respective entity's financial statements. Undistributed earnings of these entities are recognized in unrealized gains or losses. Such investments are nonadmitted if they do not have financial statement audits.

(9) For derivative accounting policy, see Note 8.

(10) For premium deficiency reserve policy, see Note 30.

(11) The liability for unpaid reported losses is based on a case by case estimate (case reserves) for most lines of business, for the other lines of business, unpaid losses are based on average "statistical" reserves. There is an additional overall estimate (supplemental reserves for several specific lines of business) based on the Company's past experience, this is

also known as an additional reserve on known claims. A provision also is made for losses incurred but not reported on the basis of estimates and past experience modified for current trends and estimates of expenses for investigating and settling claims, reduced for anticipated salvage and subrogation. The liability for unpaid losses on business assumed is based in part on reports received from ceding companies.

Management believes that the liability for unpaid losses and loss adjustment expenses is adequate to cover ultimate unpaid losses and loss adjustment expenses incurred. However, such liability is necessarily based on estimates, and the ultimate liability may vary significantly from such estimates. In accordance with industry practice, the Company regularly reviews its estimated liability, and any adjustments are reflected in the period in which they become known. In accordance with guidelines established by the NAIC, the liability for unpaid losses at December 31, 2015 is reported net of estimated salvage and subrogation recoverable.

(12) The Company has not modified its capitalization policy from the prior year end.

(13) The Company does not have pharmaceutical rebate receivables.

(14) EDP equipment and operating system software are stated at cost, less accumulated depreciation. Depreciation expense is recorded in insurance expenses and taxes (other than federal income and capital gains taxes). Furniture and fixtures, leasehold improvements and non-operating system computer software are classified as non-admitted assets. Changes in non-admitted assets are recorded as a charge or credit to surplus.

Depreciation is determined using the straight-line method. EDP equipment and operating system software are depreciated over the lesser of its useful life or three years. Non-operating system software is depreciated over the lesser of its useful life or five years. Estimated lives of furniture and fixtures range from five to seven years. Leasehold improvements are depreciated over the remaining lease term or ten years, whichever is shorter.

The cost basis of EDP equipment and operating system software was $429,517 and $264,382 at December 31, 2015 and 2014, respectively. Accumulated depreciation of EDP equipment and operating system computer software was $249,639 and $176,983 at December 31, 2015 and 2014, respectively. Related depreciation expense was $63,645 and $44,761 for the years ended December 31, 2015 and 2014, respectively.

Depreciation expense on furniture and fixtures, leasehold improvements and non-operating system computer software was $7,614,546 and $8,909,553 at December 31, 2015 and 2014, respectively.

(15) Each quarter, the real estate front office determines a market value for our wholly owned investment real estate. In the fourth quarter, the valuation process and assumptions are evaluated by a third party. For recently acquired properties that are not included in the third party's report and do not have a recent appraisal, the purchase price is used as a proxy for the market value and the acquisition date is used for the appraisal date on Schedule A.

D. Loan-Backed Securities

(1) Prepayment assumptions were obtained from published broker dealer values and internal estimates.

(2) a. The Company did not recognize any other-than-temporary impairments ("OTTI") on the basis of the intent to sell during the year ended December 31, 2015.

b. The Company did not recognize any OTTI on the basis of the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis during the year ended December 31, 2015.

(3) As of December 31, 2015 the Company has not recognized any OTTI on its loan-backed securities based on cash flow analysis.

(4) At December 31, 2015, the estimated fair value and gross unrealized losses for loan-backed securities, aggregated by length of time the securities have been in a continuous loss position are as follows:

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	$135,178
2. 12 Months or Longer	$38,233

NOTES TO FINANCIAL STATEMENTS

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months $11,943,995
2. 12 Months or Longer $2,072,376

(5) The Company performs a regular evaluation, on a security-by-security basis, of its securities holdings in accordance with its OTTI policy in order to evaluate whether such investments are other-than temporarily impaired. Management considers a wide range of factors about the security issuer and uses its best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Factors considered include fundamentals of the industry and geographic area in which the security issuer operates, as well as overall macroeconomic conditions.

Projected future cash flows are estimated using assumptions derived from management's best estimates of likely scenario-based outcomes after giving consideration to a variety of variables that include, but are not limited to: (i) general payment terms of the security; (ii) the likelihood that the issuer can service the scheduled interest and principal payments; (iii) the quality and amount of any credit enhancements; (iv) the security's position within the capital structure of the issuer; (v) possible corporate restructurings or asset sales by the issuer; and (vi) changes to the rating of the security or the issuer by rating agencies.

Additional considerations are made when assessing the unique features that apply to certain loan-backed securities including, but not limited to: (i) the quality of underlying collateral; (ii) expected prepayment speeds; (iii) current and forecasted loss severity; (iv) consideration of the payment terms of the underlying assets backing the security; and (v) the payment priority within the tranche structure of the security.

For loan-backed securities in an unrealized loss position as summarized in the immediately preceding table, the Company does not have the intent to sell the securities, believes it has the intent and ability to retain the security for a period of time sufficient to recover the carrying value of the security and, based on the cash flow modeling and other considerations as described above, believes these securities are not other than temporarily impaired.

E. Repurchase Agreements and/or Securities Lending Transactions
Not Applicable.

F. Real Estate

(1) For the years ended December 31, 2015 and 2014, impairment losses of $497,720 and $0 respectively, were recognized on real estate and were included in "Net realized capital gains (losses)".
(2a.) The Company had no properties classified as held-for-sale as of December 31, 2015 and 2014.
(2b.) For the years ended December 31, 2015 and 2014, the gain/(loss) on real estate sales was $0 and $0, respectively.
(3) In 2015 management listed the Vista Laurel Highlands property as held-for-sale but later reclassified the property back to held for the production of income as a result of disappointing offers received. Management withdrew this asset from the 2015 sales program and plans to continue to hold the asset as an investment for the foreseeable future. An impairment of $497,720 was recorded in 2015.
(4) The Company does not engage in retail land sales operations.
(5) The Company does not hold any real estate investments with participating mortgage loans.

B. Total amount excluded: NONE.

8. Derivative Instruments

Overview

The Company may be exposed to various risks relating to its ongoing business operations, including interest rate, foreign currency exchange rate, credit and equity market. The Company uses a variety of strategies to manage these risks, including the use of derivatives.

Derivatives are financial instruments whose values are derived from interest rates, foreign currency exchange rates, credit spreads and/or other financial indices. Derivatives may be exchange-traded or contracted in the over-the-counter ("OTC") market. All of the Company's OTC derivatives are bilateral contracts between two counterparties. The Company uses a variety of derivatives, including swaps and forwards, to manage risks that may include interest rate risk, foreign currency exchange rate risk, credit risk and equity market risk. Derivative hedges are designed to reduce risk on an economic basis while considering their impact on accounting results and statutory capital.

Insurance statutes restrict the Company's use of derivatives to: (i) hedging activities intended to offset changes in the estimated fair value of assets held, obligations and anticipated transactions; (ii) income generation transactions to generate additional income or return on covering assets; and (iii) replication synthetic asset transactions to reproduce the investment characteristics of otherwise permissible investments. The Company is prohibited from using derivatives for speculation. OTC derivatives are carried on the Company's Statutory Statements of Assets, Liabilities, Surplus and Other Funds either as derivative assets or derivative liabilities.

To qualify for hedge accounting under SSAP No. 86, *Derivatives* ("SSAP 86"), at the inception of the hedging relationship, the Company formally documents its risk management objective and strategy for undertaking the hedging transaction, as well as its designation of the hedge as either: (i) a hedge of the estimated fair value of a recognized asset or liability ("fair value hedge"); or (ii) a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability ("cash flow hedge"). In its hedge documentation, the Company sets forth how the hedging instrument is expected to hedge the designated risks related to the hedged item and sets forth the method that will be used to retrospectively and prospectively assess the hedging instrument's effectiveness. A derivative designated as a hedging instrument must be assessed as being highly effective in offsetting the designated risk of the hedged item. Hedge effectiveness is formally assessed at inception and at least quarterly throughout the life of the designated hedging relationship.

The Company can hold cash flow and fair value derivatives that hedge various assets and liabilities including bonds and liability portfolios; the derivatives that hedge those assets and liabilities are valued in a manner consistent with the underlying hedged item, if they meet the criteria for highly effective hedges. Bonds that have an NAIC designation of 1 or 2 are carried at amortized cost; therefore, the derivatives hedging such bonds are also carried at amortized cost. Bonds that have an NAIC designation of 3 through 6 are carried at the lower of amortized cost or estimated fair value; therefore, the derivatives hedging such bonds are also carried at the lower of amortized cost or estimated fair value. Liabilities of the Company are carried at amortized cost; therefore, the derivatives hedging such liabilities are also carried at amortized cost. Effective foreign currency swaps have a foreign currency adjustment reported in "Change in net unrealized foreign exchange capital gain (loss)" pursuant to SSAP 86 by using the same procedures as used to translate the hedged item.

The Company discontinues hedge accounting prospectively when: (i) it is determined that the derivative is no longer highly effective in offsetting changes in the estimated fair value or cash flows of a hedged item; (ii) the derivative expires, is sold, terminated or exercised; (iii) it is no longer probable that the hedged forecasted transaction will occur; or (iv) the Company removes the designation of the hedge.

When hedge accounting is discontinued because it is determined that the derivative is not highly effective in offsetting changes in the estimated fair value or cash flows of a hedged item, the derivative is carried at its estimated fair value with changes in estimated fair value, excluding changes in foreign exchange rates, reported in "Change in net unrealized capital gains (losses)" and estimated fair value changes attributable to changes in foreign exchange rates are reported in "Change in net unrealized foreign exchange capital gain (loss)".

Upon termination of a derivative that qualified for hedge accounting, the gain or loss is reflected as an adjustment to the basis

of the hedged item and is recognized in income consistent with the hedged item. If the hedged item is sold, the gain or loss on the derivative is realized.
To the extent the Company chooses not to designate a derivative for hedge accounting or the designated derivative no longer meets the criteria of an effective hedge, the derivative is carried at estimated fair value with changes in estimated fair value reported in "Change in net unrealized capital gains (losses)" and any change in estimated fair value attributable to changes in foreign exchange rates are reported in "Change in net unrealized foreign exchange capital gain (loss)".

Types of Derivatives

Foreign Currency Exchange Rate Derivatives

The Company uses foreign currency exchange rate derivatives, including foreign currency swaps and forwards to reduce the risk from fluctuations in foreign currency exchange rates associated with its assets denominated in foreign currencies.

In a foreign currency swap transaction, the Company agrees with another party to exchange, at specified intervals, the difference between one currency and another at a fixed exchange rate, generally set at inception, calculated by reference to an agreed upon notional amount. The notional amount of each currency is exchanged at the inception and termination of the currency swap by each party. See Schedule DB, Part A.

In a foreign currency forward transaction, the Company agrees with another party to deliver a specified amount of an identified currency at a specified future date. The price is agreed upon at the time of the contract and payment for such a contract is made in a different currency at the specified future date. See Schedule DB, Part A.

Credit Derivatives

Credit default swaps are used by the Company to hedge against credit-related changes in the value of its investments. In a credit default swap transaction, the Company agrees with another party to pay, at specified intervals, a premium to hedge credit risk. If a credit event as defined by the contract occurs, the contract may be cash settled or it may be settled gross by the delivery of par quantities of the referenced investment equal to the specified swap notional in exchange for the payment of cash amounts by the counterparty equal to the par value of the investment surrendered. Credit events vary by type of issuer but typically include bankruptcy, failure to pay debt obligations, repudiation, moratorium, involuntary restructuring, or governmental intervention. In each case, payout on a credit default swap is triggered only after the Credit Derivatives Determinations Committee of the International Swaps and Derivatives Association, Inc. ("ISDA") deems that a credit event has occurred. See Schedule DB, Part A.

Fair Value Hedges

The Company held no fair value hedges during the years ended December 31, 2015 and 2014.

Cash Flow Hedges
The Company designates and accounts for foreign currency swaps to hedge the foreign currency cash flow exposure of foreign currency denominated assets as cash flow hedges, when they have met the effectiveness requirements of SSAP 86.

In assessing effectiveness, no component of the derivative's gain or loss was excluded.

For the years ended December 31, 2015 and 2014, there were no gains (losses) related to cash flow derivatives that no longer qualify for hedge accounting or for which the Company removed the hedge designation.

In certain instances, the Company discontinues cash flow hedge accounting because it was no longer probable that the original forecasted transactions would occur by the end of the originally specified time period or within two months of that date. For the years ended December 31, 2015 and 2014, there were no gains (losses) related to such discontinued cash flow hedges.

There were no hedged forecasted transactions, other than the receipt or payment of variable interest payments, for the years ended December 31, 2015, and 2014.

Non-qualifying Derivatives

The Company enters into the following derivatives that do not qualify for hedge accounting under SSAP 86: (i) foreign currency swaps and forwards to economically hedge its exposure to adverse movements in exchange rates and (ii) credit default swaps to economically hedge its exposure to adverse movements in credit.

Derivatives for Other than Hedging Purposes

The Company held no derivatives for other than hedging purposes during the years ended December 31, 2015 and 2014.

Credit Risk

The Company enters into various collateral arrangements, which may require both the pledging and accepting of collateral in connection with its derivatives.

The table below summarizes the collateral received in connection with its OTC derivatives as of December 31, 2015 and 2014, respectively.

NOTES TO FINANCIAL STATEMENTS

	Cash (1) 2015	Cash (1) 2014
Variation Margin:		
OTC-derivatives	$ 1,819,574	$ -

(1) Cash collateral received is reported in "Cash, cash equivalents and short-term investments" and the obligation to return the collateral is reported in "Aggregate write-ins for liabilities" as "Cash collateral on derivatives".

The Company's collateral arrangements for its OTC derivatives generally require the counterparty in a net liability position, after considering the effect of netting agreements, to pledge collateral when the estimated fair value of that counterparty's derivatives reaches a pre-determined threshold. Certain of these arrangements also include credit-contingent provisions that provide for a reduction of these thresholds (on a sliding scale that converges toward zero) in the event of downgrades in the credit ratings of the Company and/or the counterparty. In addition, certain of the Company's netting agreements for derivatives contain provisions that require both the Company and the counterparty to maintain a specific investment grade credit rating from each of Moody's Investors Service and Standard & Poor's Ratings Service. If a party's credit ratings were to fall below that specific investment grade credit rating, that party would be in violation of these provisions, and the other party to the derivatives could terminate the transactions and demand immediate settlement and payment based on such party's reasonable valuation of the derivatives.

NOTES TO FINANCIAL STATEMENTS

(2) The consolidating companies join with MetLife, Inc. ("MetLife") and its includable subsidiaries in filing a consolidated U.S. life and non-life federal income tax return in accordance with the provisions of the Internal Revenue Code of 1986, as amended (the "Code"). Current taxes (and the benefits of tax attributes such as losses) are allocated to MetLife and its subsidiaries under the consolidated tax return regulations and a tax sharing agreement. Under the consolidated tax return regulations, MetLife has elected the "percentage method" (and 100 percent under such method) of reimbursing companies for tax attributes, e.g., net operating losses. As a result, 100 percent of tax attributes are reimbursed by MetLife to the extent that consolidated federal income tax of the consolidated federal tax return group is reduced in a year by tax attributes. On an annual basis, each of the profitable subsidiaries pays to MetLife the federal income tax which it would have paid based upon that year's taxable income. If MetLife or the subsidiary has current or prior deductions and credits (including but not limited to losses) which reduce the consolidated tax liability of the consolidated federal tax return group, the deductions and credits are characterized as realized (or realizable) by MetLife and its subsidiaries when those tax attributes are realized (or realizable) by the consolidated federal tax return group, even if MetLife or the subsidiary would not have realized the attributes on a stand-alone basis under a "wait and see" method.

G. As of December 31, 2015, the Company had no liability for unrecognized tax benefits.

10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

G. – H. Consolidated/Holding Company Plans – Pension and Postretirement; Postemployment Benefits and Compensated Absences

The stock-based compensation expense recognized by the Company is related to awards under incentive plans of MetLife, Inc. for which the Company has no legal obligation. The expense related to stock-based compensation is included in expenses allocated by MetLife Group, Inc. ("MLG"). MLG allocated $6,607,040 and $7,155,457 of stock-based compensation to the Company for the years ended December 31, 2015 and 2014, respectively.

Savings and Investment Plans – Metropolitan Life Insurance Company ("MLIC") sponsors and administers qualified and non-qualified defined contribution savings and investment plans in which substantially all employees of the Company participate. A portion of employee contributions are matched in accordance with the terms of the respective plans. Under agreement between the Company and MLIC, the Company is responsible to reimburse MLIC for any such matching contributions made on behalf of the employees of the Company. The Company made contributions and recognized a corresponding expense of $7,628,411 and $7,357,500, respectively, related to these plans for the years ending December 31, 2015 and 2014.

Pension Plans - MLIC sponsors and administers a qualified defined benefit pension plan in which all eligible (as defined in the plan) employees and sales representatives of the Company participate. The benefits are determined using a traditional formula or cash balances formula. Under the traditional formula, benefits are calculated using years of credited service and either final average or career average earnings. The cash balance formula utilizes hypothetical or notional accounts to which participants are credited with benefits equal to a percentage of eligible pay as well as interest credits.

Under agreement with MLIC, the Company is allocated expenses equal to the actuarially determined net periodic benefit cost accrued with respect to its employees. The Company's allocated expense with respect to the qualified defined benefit pension plan was $15,867,878 and $17,094,500 for the years ended December 31, 2015 and 2014, respectively.

The Company reimburses MLIC for any required or discretionary contributions made to the qualified pension plan, determined as an amount equal to the pro-rata portion of the obligation accrued on behalf of the employees of the Company to the total benefit obligation of the plan. During the years ending December 31, 2015 and 2014, the Company's reimbursement to MLIC was $0.

MLIC also sponsors and administers a non-qualified defined benefit pension plan that provides benefits, in excess of amounts permitted by government agencies, to certain executive level employees of the Company on substantially the same terms as those of the qualified plan. The Company's allocated expense, equal to the actuarially determined net periodic benefit costs with respect to its employees, for the non-qualified defined benefit pension plan was $1,525,152 and $1,604,000 for the years ended December 31, 2015 and 2014, respectively.

Postemployment and Other Postretirement Benefit Plans - Employees and retirees who meet age and service criteria while working for the Company may become eligible for postemployment and other postretirement medical and life benefits, at various levels, in accordance with the applicable plans. These postemployment and other postretirement benefit plans are also sponsored and administered by MLIC. The Company's allocated expense, equal to the actuarially determined net periodic benefit cost with respect to its employees, for the postemployment and other postretirement plans was $13,719,971 and $17,687,750 for the years ended December 31, 2015 and 2014, respectively.

13. Capital and Surplus, Dividend Restrictions and Quasi Reorganization

(1) The Company has 315,000 shares authorized, 315,000 shares issued and outstanding of Series C Adjustable Rate Cumulative Preferred Stock with a par value per share of $1,000 as of December 31, 2014 and a maturity date on or before December 8, 2036. The Company has 1,000 shares authorized, issued, and outstanding of common stock with a par value per share of $3,000 as of December 31, 2015.

(2) On December 6, 2006, the Company received approval from the RI DBR, Insurance Division to redeem 315,000 shares of its issued and outstanding Series B Adjustable Rate Preferred Stock and issue 315,000 shares of Series C Adjustable Rate Preferred Stock. In a noncash transaction on December 8, 2006, the Company redeemed 315,000 shares of its Series B Adjustable Preferred Stock and issued 315,000 shares of Series C Adjustable Rate Preferred Stock. The Series C Adjustable Rate Preferred Stock shall be redeemed on or before the December 8, 2036. The dividend payment dates and dividend rates are unchanged from the Series B Adjustable Rate Preferred Stock. Preferred dividends are payable quarterly in arrears beginning February 15, 2007 at the Applicable Rate which will be recalculated on the first business day after each quarterly dividend payment date based on the product of (1 – the highest federal income tax rate for corporations applicable during such dividend period) times (the "AA" Composite Commercial Paper (Financial) Rate + 180 basis points). Dividends paid on preferred stock were $4,126,907 and $4,001,498 for the periods ended December 31, 2015 and 2014, respectively. Dividends paid on common stock were $235,000,000 and $200,000,000 for the periods ended December 31, 2015 and 2014, respectively.

(3) Under Rhode Island State Insurance Law, the Company is permitted, without prior insurance regulatory clearance, to pay a stockholder dividend to its stockholders as long as the aggregate amount of all such dividends in any twelve-month period does not exceed the lesser of (i) 10% of its surplus to policyholders as of the immediately preceding calendar year; or (ii) the next preceding two calendar years net income reduced by capital gains and dividends paid to shareholders. The Company will be permitted to pay a stockholder dividend to its stockholders in excess of the lesser of such two amounts only if it files notice of its intention to declare such a dividend and the amount thereof with the RI DBR, Insurance Division and the RI DBR, Insurance Division does not disapprove the distribution within 30 days of its filing. Under Rhode Island State Insurance Law, the RI DBR, Insurance Division has broad discretion in determining whether the financial condition of a stock property and casualty insurance company would support the payment of such dividends to its shareholders. The

maximum amount of the dividend which the Company may pay to its stockholders in 2016 without prior regulatory approval is $130,973,563 for dividends with a scheduled date of payment subsequent to December 16, 2016. Any common or preferred stock dividend payment prior to December 16, 2016 will require prior regulatory clearance.

(4) On October 23, 2015 the Company's Board of Directors approved an extraordinary cash dividend of up to $260 million on its outstanding common stock, payable to MetLife on or after December 16, 2015. The Company received approval for this common stock dividend from the RI DBR, Insurance Division on November 10, 2015 and paid a dividend of $235 million on December 16, 2015. The Company paid ordinary preferred stock dividends of $1,015,105, $976,941.88, $1,067,430, and $1,067,430 on February 13, 2015, May 15, 2015, August 14, 2015, and November 16, 2015, respectively, to MetLife Credit Corp. Since these were ordinary preferred stock dividends, the Company did not require approval for these preferred stock dividends from the RI DBR, Insurance Division.

(5) Subject to the limitations of (3) above, there are no restrictions placed on the portion of Company profits that may be paid as ordinary dividends to stockholders.

(6) - (9)
Not Applicable.

(10) The portion of unassigned funds (surplus) represented or reduced by unrealized capital gains (losses) was $162,945,975.

(11) - (13)

14. Liabilities, Contingencies and Assessments

A. Contingent Commitments

The Company makes commitments to fund partnership investments. The amounts of these unfunded commitments were $87,259,847 and $11,974,197 at December 31, 2015 and 2014, respectively. The Company anticipates that these amounts will be invested in partnerships over the next five years. See Schedule BA Part 1 for details.

B. Assessments

(1) Guaranty Fund Assessments

The Company had initially estimated and recorded an accrual related primarily to the Reliance Insurance Company insolvency resulting in a liability of $6,641,426 and an asset of $2,828,724 for future premium tax offsets. There is no method to determine as to when these payments will be paid out or when all the premium tax offsets will be taken. The Company recorded charges to operations of $0 as of December 31, 2010 and December 31, 2008. In June 2007, the accrual for the State of New York was removed. The Reliance insolvency and related accrual for New York is processed as part of the New York Property Casualty Fund. The New York Property Casualty Fund accrual has been included in the taxes, licenses and fees financial statement line. In addition, minor adjustments were made to several states (Florida, Mississippi, New Hampshire, Rhode Island, Missouri, and Tennessee) resulting in a guaranty fund liability of $4,270,737 and a guaranty fund asset of $2,683,383 as of December 31, 2010. During 2011, due to the lack of Reliance assessments over the past 5 years, a review of the current accrual was performed. In July 2011 an entry was made to reduce Reliance's liability by $2,777,332 and to reduce Reliance's asset by $1,605,199. This resulted in a guaranty fund liability of $1,493,405 and a guaranty fund asset of $1,078,184 as of December 31, 2011. There were no adjustments made in 2012. As of December 31, 2012 the asset remained at $1,078,184 and the liability remained at $1,493,405. There was a slight adjustment in 2013 reducing the guaranty fund asset by $4,061 and the liability by $8,374. There were no adjustments made in 2014 or 2015 and therefore, as of December 31, 2015 the asset total remains at $1,074,123 and the liability remains at $1,485,031.

G. All Other Contingencies

All of the information in this footnote is being reported on combined basis for the Company and its subsidiaries and affiliates.

Various litigation claims, and assessments against the Company, in addition to those otherwise provided for in the Company's financial statements, have arisen in the course of the Company's business, including but not limited to, in connection with its activities as an insurer, employer and taxpayer. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning the Company's compliance with applicable insurance and other laws and regulations.

It is not feasible to predict or determine the ultimate outcome of all pending investigations and legal proceedings or provide reasonable ranges of potential losses. In some matters, very large and/or indeterminate amounts, including punitive and treble damages, are sought. Although in light of these considerations it is possible that an adverse outcome in certain cases could have a material adverse effect upon the Company's financial position, based on information currently known by the Company's management, in its opinion, the outcomes of such pending investigations and legal proceedings are not likely to have such an effect. However, given the large and/or indeterminate amounts sought in certain of these matters and the inherent unpredictability of litigation, it is possible that an adverse outcome in certain matters could, from time to time, have a material adverse effect on the Company's financial statements.

15. Leases

A. The Company's total rent expense was $17,916,079 and $16,688,735 for 2015 and 2014, respectively. The Company has entered into various lease agreements for office space, fleet vehicles, and other equipment. Rental expense under such leases was $12,308,470 and $11,196,576 in 2015 and 2014, respectively. In addition, rental expense includes affiliated rental expense of $5,607,609 and $5,492,159 for 2015 and 2014, respectively, charged to the Company pursuant to its service agreements with its affiliates. See Notes 10. B. - C. (3) and 10. F. for details. Future gross minimum rental payments under non-cancelable leases on office space, fleet vehicles, and other equipment are as follows:

		Year Ended December 31,
2016	$	4,689,541
2017		3,162,933
2018		1,757,014
2019		715,275
2020		273,083
Thereafter		156,512
Total	$	10,754,358

B. Leasing is not a significant part of the Company's business.

16. Information About Financial Instruments with Off-Balance Sheet Risk and Financial Instruments with Concentrations of Credit Risk

1. The table below summarizes the notional amount of the Company's financial instruments (derivatives that are designated as effective hedging instruments) with off-balance sheet credit risk at December 31:

	Assets		Liabilites	
	2015	2014	2015	2014
Swaps	$ 10,550,100	$ -	$ -	$ -
Futures	-	-	-	-
Options	-	-	-	-
Total	$ 10,550,100	$ -	$ -	$ -

2. See Note 8 for a description of the nature and terms of the Company's derivatives, including market risks, cash requirements and related accounting policy.

3. The Company may be exposed to credit-related losses in the event of nonperformance by counterparties to derivatives. Generally, the current credit exposure of the Company's derivatives is limited to the net positive estimated fair value of derivatives at the reporting date after taking into consideration the existence of master netting or similar agreements and any collateral received pursuant to such agreements.

The Company manages its credit risk related to derivatives by entering into transactions with creditworthy counterparties and establishing and monitoring exposure limits. The Company's OTC derivative transactions are governed by ISDA Master Agreements which provide for legally enforceable set-off and close-out netting of exposures to specific counterparties in the event of early termination of a transaction, which includes, but is not limited to, events of default and bankruptcy. In the event of an early termination, the Company is permitted to set-off receivables from the counterparty against payables to the same counterparty arising out of all included transactions. Substantially all of the Company's ISDA Master Agreements also include Credit Support Annex provisions which require both the pledging and accepting of collateral in connection with its OTC derivatives.

Off-balance sheet credit exposure is the excess of positive estimated fair value over positive book/adjusted carrying value for the Company's highly effective hedges at the reporting date. All collateral received from counterparties to mitigate credit-related losses is deemed worthless for the purpose of calculating the Company's off-balance sheet credit exposure. At

December 31, 2015, the off-balance sheet credit exposure of the Company's swaps was $220,655. At December 31, 2014, the Company had no off-balance sheet credit exposure on its swaps.

4. At December 31, 2015 and 2014, no securities collateral was received by the Company on its OTC derivatives.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

A. Transfers of Receivables Reported as Sales
Not Applicable.

B. Transfer and Servicing of Financial Assets
1. Not Applicable
2. The Company did not participate in the transfer or servicing of financial assets during the year ended December 31, 2015.

C. Wash Sales
1. In the course of the Company's asset management, securities are not sold and reacquired within 30 days of the sale date to enhance the Company's yield on its investment portfolio. There may be occasional isolated incidents where wash sales occur.
2. The Company had no wash sales with an NAIC designation of 3 or below, or of unrated securities during the year ended December 31, 2015.

18. Gain or Loss to the Reporting Entity from Uninsured Plans and the Uninsured Portion of Partially Insured Plans
Not Applicable.

19. Direct Premium Written by Managing General Agents/Third Party Administrators

No managing general agent or third party administrator writes direct premium equal to or greater than 5% of surplus. The only managing general agent or third party administrator the Company transacts with is as follows:

Name and Address of Managing General Agent And Third Party Administrator	FEI Number	Exclusive Contract	Type Of Business Written	Type of Authority Granted	Direct Written Premium

(2) The amount reported within purchases, sales, issuances and settlements is the purchase/issuance price (for purchases and issuances) and the sales/settlement proceeds (for sales and settlements) based upon the actual date purchased/issued or sold/settled.

Transfers between Levels

Overall, transfers between levels occur when there are changes in the observability of inputs and market activity. Transfers into or out of any level are assumed to occur at the beginning of the period.

Transfers into or out of Level 3:

Transfers into or out of Level 3 are presented in the table above. Assets and liabilities are transferred into Level 3 when a significant input cannot be corroborated with market observable data. This occurs when market activity decreases significantly and underlying inputs cannot be observed, current prices are not available, and/or when there are significant variances in quoted prices, thereby affecting transparency. Assets and liabilities are transferred out of Level 3 when circumstances change such that significant inputs can be corroborated with market observable data. This may be due to a significant increase in market activity, a specific event, or one or more significant input(s) becoming observable.

During the year ended December 31, 2015, transfers out of Level 3for bonds of $2,903,175 resulted primarily from increased transparency of: (i) new issuances which, subsequent to issuance and establishment of trading activity, became priced by pricing services and (ii) existing issuances for which the Company, over time, was able to corroborate with pricing received from independent pricing services with observable inputs or increases in market activity.

(3) Transfers between levels are assumed to occur at the beginning of the period.

(4) Assets and Liabilities Measured and Reported at Estimated Fair Value at Reporting Date

Valuation Techniques and Inputs for Level 2 and Level 3 Assets and Liabilities by Major Classes of Assets and Liabilities:

When developing estimated fair values, the Company considers two broad valuation techniques: (i) the market approach and (ii) the income approach. The Company determines the most appropriate valuation technique to use, given what is being measured and the availability of sufficient inputs, giving priority to observable inputs.

The Company categorizes its financial assets and liabilities into a three-level hierarchy, based on the significant input with the lowest level in their valuation. The input levels are as follows. Level 1 - Unadjusted quoted prices for identical assets or liabilities. The Company defines active markets based on average trading volume for common stock. The size of the bid/ask spread is used as an indicator of market activity for bonds. Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1, quoted prices in markets that are not active, or other significant inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities. Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the reporting entity’s own assumptions about the assumptions that market participants would use in pricing the asset or liability.

The valuation of most instruments listed below are determined using independent pricing sources, matrix pricing, discounted cash flow methodologies or other similar techniques that use either observable market inputs or unobservable inputs.

(1) Classification of derivatives is based on each derivative's positive (asset) or negative (liability) book/adjusted carrying value, which equals the net admitted assets and liabilities.

Assets and Liabilities

The methods and significant assumptions used to estimate the fair value of all financial instruments is presented below.

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In most cases, the exit price and the transaction (or entry) price will be the same at initial recognition.

When developing estimated fair values, the Company considers two broad valuation techniques: (i) the market approach and (ii) the income approach. The Company determines the most appropriate valuation technique to use, given what is being measured and the availability of sufficient inputs, giving priority to observable inputs.

The Company categorizes its financial assets and liabilities into a three-level hierarchy, based on the significant input with the lowest level in their valuation. The input levels are as follows. Level 1 - Unadjusted quoted prices for identical assets or liabilities. The Company defines active markets based on average trading volume for common stock. The size of the bid/ask spread is used as an indicator of market activity for bonds. Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1, quoted prices in markets that are not active, or other significant inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities. Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

In general, investments classified within Level 3 use many of the same valuation techniques and inputs as described in the Level 2 discussions. However, if key inputs are unobservable, or if the investments are less liquid and there is very limited trading activity, the investments are generally classified as Level 3. The use of independent non-binding broker quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency in the process to develop the valuation estimates generally causing these investments to be classified in Level 3.

Bonds, Stocks, Cash and Short-term Investments

When available, the estimated fair value for bonds, including loan-backed securities, unaffiliated preferred stocks and short-term investments are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1, are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified in Level 2.

When observable inputs are not available, the market standard valuation methodologies rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation, and cannot be supported by reference to market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investments are classified in Level 3.

Excluded from the disclosure are investments accounted for under the equity method including affiliated common stocks.

The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's securities holdings.

The estimated fair value for cash approximates carrying value and is classified as Level 1 given the nature of cash.

Investment Income Due and Accrued

Due to the short-term nature of investment income due and accrued, the Company believes there is minimal risk of material changes in interest rates or credit of the issuer such that estimated fair value approximates carrying value. These amounts are generally classified as Level 2.

Derivatives

The estimated fair value of OTC derivatives is determined through the use of pricing models. The determination of estimated fair value, when quoted market values are not available, is based on market standard valuation methodologies and inputs that management believes are consistent with what other market participants would use when pricing such instruments. The significant inputs to the pricing models for most OTC derivatives are inputs that are observable in the market or can be derived principally from, or corroborated by, observable market data. Significant inputs that are observable generally include interest rates, foreign currency exchange rates, interest rate curves, credit curves and volatility. Derivative valuations can be affected by changes in interest rates, foreign currency exchange rates, financial indices, credit spreads, default risk, nonperformance risk, volatility, liquidity and changes in estimates and assumptions used in pricing models. Generally, these derivatives are classified in Level 2.

Certain OTC derivatives may rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from, or corroborated by, observable market data. Significant inputs that are unobservable generally include references to emerging market currencies and inputs that are outside the observable portion of the interest rate curve, credit curve, volatility or other relevant market measure. These unobservable inputs may involve significant management judgment or estimation. Even though unobservable, these inputs are based on assumptions deemed appropriate given the circumstances and management believes they are consistent with what other market participants would use when pricing such instruments.

Most inputs for OTC derivatives are mid-market inputs but, in certain cases, liquidity adjustments are used when they are deemed more representative of exit value. Market liquidity, as well as the use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's derivatives and could materially affect the net change in capital and surplus.

Payable for Collateral Received

The estimated fair value of amounts payable for collateral under securities loaned and other transactions approximates carrying value as these obligations are short-term in nature. These amounts are generally classified in Level 2.

D. At December 31, 2015 the Company had no investments where it is not practicable to estimate fair value.

21. Other Items

A. Extraordinary Items
Not Applicable.

B. Troubled Debt Restructuring
Not Applicable.

C. Other Disclosures

(1) The Company has elected to use truncation in reporting amounts on all parts of Schedule D. Some Schedules and Exhibits may not agree due to rounding.
(2) Management fees paid to MLIC totaled $299,711,017 and $312,945,924 for the periods ended December 31, 2015 and 2014, respectively. These charges were allocated to the proper expense classifications based on information provided by MLIC.
(3) Effective January 1, 2001, the NAIC and most state insurance departments implemented a comprehensive guide to Statutory Accounting Principles (Codification). These Accounting Practices and Procedures produced an increase to

surplus for the Company in 2001 as a result of the recognition of deferred federal income taxes.

(4) The Company contributed $5,000 to the political action committee MetLife Political Participation Fund B as of December 31, 2015.

(5) Supplement to Interrogatory No. 18: As part of a MetLife enterprise-wide Code of Conduct Certification, the Chief Compliance Officer is designated with the responsibility to oversee such disclosures. Following that review, a summary report is sent to the Chairman of the Board of Directors of MetLife, Inc.

D. Business Interruption Insurance Recoveries
None.

E. State Transferable and Non-transferable Tax Credits
Not Applicable.

F. Subprime-Mortgage-Related Risk Exposure

At December 31, 2015, the Company had direct exposure to subprime mortgage risk through other investments as follows:

	Actual Cost	Book Adjusted Carry Value	Fair Value	Realized Gain (Loss) On Impairment
Residential Mortgage Backed Securities	$110,393	$110,609	$105,396	$0
Commercial Mortgage Backed Securities	0	0	0	0
Collateralized Debt Obligations	0	0	0	0
Structured Securities	0	0	0	0
Equity Investments in SCA Companies	0	0	0	0
Other Assets	0	0	0	0
Total	$110,393	$110,609	$105,396	$0

While there is no market standard definition, the Company defines subprime mortgage lending as the origination of residential mortgage loans to borrowers with weak credit profiles. The Company's exposure to subprime mortgage loans exists through investments in subprime RMBS. The Company has exposure to unrealized losses due to a reduction in fair value. Over the past few years, the Company has managed its exposure to subprime mortgage lending by reducing its overall exposure, increasing the credit quality of the portfolio, stress testing the portfolio with severe loss assumptions and closely monitoring the performance of the portfolio. Based upon the analysis of the Company's exposure to subprime mortgages through its investments in RMBS, the Company expects to receive payments in accordance with the contractual terms of the securities.

22. Events Subsequent

The Company has evaluated events subsequent to December 31, 2015, through February 16, 2016, which is the date these financial statements were available to be issued, and have determined there are no material subsequent events requiring adjustment to or disclosure in the financial statements.

23. Reinsurance

A. Unsecured Reinsurance Recoverables

The Company does not have unsecured aggregate recoverable losses, paid and unpaid including IBNR, loss adjustment expenses and unearned premiums with any individual reinsurers, authorized or unauthorized, that exceeds 3% of the Company’s policyholder surplus.

The Company has significant unsecured aggregate recoverables with the federal government and mandatory state pools and associations in the amount of $74,140,645, $7,644,170, and $16,463,499 with Michigan Catastrophic Claims Association (Federal ID AA-9991159), National Flood Insurance Program (Federal ID AA-9992201), and North Carolina Reinsurance Facility (Federal ID AA-9991139), respectively.

The Michigan Catastrophic Claims Association (MCCA), a private non-profit unincorporated association, was created by the state Legislature in 1978. Michigan's unique auto insurance no-fault law provides unlimited lifetime coverage for medical expenses which result from auto accidents. The MCCA reimburses auto no-fault insurance companies for each Personal Injury Protection (PIP) medical claim paid in excess of a set amount. Currently that amount is $545,000. This means that the insurance company pays the entire claim, but is reimbursed by the MCCA for medical costs over $545,000. All auto insurance companies operating in Michigan are required to participate and are assessed to cover the catastrophic medical claims occurring in Michigan. Those assessments are generally passed on to auto insurance policyholders.

The unsecured aggregate recoverable for the National Flood Insurance Program are part of the Write Your Own (WYO) Program which began in 1983 and is a cooperative undertaking of the insurance industry and FEMA. The WYO Program allows participating property and casualty insurance companies to write and service the Standard Flood Insurance Policy in their own names. The companies receive an expense allowance for policies written and claims processed while the Federal Government retains responsibility for underwriting losses. The WYO Program operates as part of the NFIP, and is subject to its rules and regulations.

NC Reinsurance Facility is a mandatory risk pool in which all direct writers of automobile coverage in the state require participation. The underlying security of this pool is backed by every insurance company, which writes automobile insurance. In the worst case scenario, if a company that participates becomes insolvent, that company’s share of the pool losses would be distributed on a pro rata basis to the remaining writers in the state. The Company has participated in

25. Change in Incurred Losses and Loss Adjustment Expenses

Reserves for incurred losses and loss adjustment expenses attributable to insured events of prior years have decreased by $832 million from $1,511 million in 2014 to $810 million in 2015. The prior year reserves have decreased principally for the private passenger auto liability, homeowners and umbrella lines of insurance. The ultimate losses and loss adjustment expenses for the prior years have also decreased for most lines, but to a lesser extent. This is shown in Schedule P. The Company has no retrospectively rated policies.

26. Intercompany Pooling Arrangements
Not Applicable.

27. Structured Settlements

A. The Company has purchased annuities with the claimant as payee for which the Company has a contingent liability. The Company eliminated its loss reserves for these claims at the time the annuities were purchased. A contingent liability exists to the extent that the issuers of the annuity contracts become unable to fulfill their contractual obligations. The present value of all annuity contracts still in force at December 31, 2015 was $178,099,326. If the Company became responsible for any payments under these annuities, such payments could possibly be reduced by reinsurance recoverables.

29.3 For each mutual fund listed in the table above, complete the following schedule:

1 Name of Mutual Fund (from above table)	2 Name of Significant Holding of the Mutual Fund	3 Amount of Mutual Fund's Book/Adjusted Carrying Value Attributable to the Holdings	4 Date of Valuation
		0	

30. Provide the following information for all short-term and long-term bonds and all preferred stocks. Do not substitute amortized value or statement value for fair value.

		1 Statement (Admitted) Value	2 Fair Value	3 Excess of Statement over Fair Value (-), or Fair Value over Statement (+)
30.1	Bonds	2,931,885,680	3,142,301,893	210,416,213
30.2	Preferred Stocks	89,336,132	89,336,132	0
30.3	Totals	3,021,221,812	3,231,638,025	210,416,213

30.4 Describe the sources or methods utilized in determining fair values:
Per Part 5, Section 1 of the Purposes and Procedures Manual of the NAIC Investment Analysis Office, Insurance companies can elect to not use prices provided by the NAIC. They can select any of 5 price sources, as defined in this section, and identify them in their appropriate schedule. MetLife and its affiliate insurance companies have chosen to not use market prices obtained from the NAIC. First an external quoted price is sought. In cases where an external quoted price is not available, the fair value is internally estimated using present value or valuation techniques. Factors considered in estimating fair value include: coupon rate, maturity, estimated duration, call provisions, sinking fund requirements, credit rating, industry sector of the issuer and quoted market prices of comparable securities.

31.1 Was the rate used to calculate fair value determined by a broker or custodian for any of the securities in Schedule D? Yes [ ] No [X]

31.2 If the answer to 31.1 is yes, does the reporting entity have a copy of the broker's or custodian's pricing policy (hard copy or electronic copy) for all brokers or custodians used as a pricing source? Yes [ ] No [ ]

31.3 If the answer to 31.2 is no, describe the reporting entity's process for determining a reliance pricing source for purposes of disclosure of fair value for Schedule D:

32.1 Have all the filing requirements of the *Purposes and Procedures Manual of the NAIC Investment Analysis Office* been followed? Yes [X] No [ ]

32.2 If no, list exceptions:

6.1 What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?

Not Applicable

6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process:

The Company's evaluation of the hurricane peril (property business only) is based on EQECAT, Risk Management Solutions (RMS) and Applied Insurance Research (AIR) computer models. The Company's evaluation of the earthquake peril (property business only) is based on the EQECAT and RMS computer models. The Company's largest Probable Maximum Loss would result from a hurricane in the Northeast region of the United States.

6.3 What provision has this reporting entity made (such as catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?

The Company is protected from this loss through the purchase of Property Catastrophe Excess of Loss reinsurance treaties.

6.4 Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence? Yes [X] No [ ]

6.5 If no, describe any arrangements or mechanisms employed by the reporting entity to supplement its catastrophe reinsurance program or to hedge its exposure to unreinsured catastrophic loss:

GENERAL INTERROGATORIES

PART 2 – PROPERTY & CASUALTY INTERROGATORIES

7.1 Has the reporting entity reinsured any risk with any other entity under a quota share reinsurance contract that includes a provision that would limit the reinsurer's losses below the stated quota share percentage (e.g., a deductible, a loss ratio corridor, a loss cap, an aggregate limit or any similar provisions)? Yes [X] No [ ]

7.2 If yes, indicate the number of reinsurance contracts containing such provisions. 1

7.3 If yes, does the amount of reinsurance credit taken reflect the reduction in quota share coverage caused by any applicable limiting provision(s)? Yes [X] No [ ]

8.1 Has this reporting entity reinsured any risk with any other entity and agreed to release such entity from liability, in whole or in part, from any loss that may occur on this risk, or portion thereof, reinsured? Yes [ ] No [X]

8.2 If yes, give full information

9.1 Has the reporting entity ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates) for which during the period covered by the statement: (i) it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; (ii) it accounted for that contract as reinsurance and not as a deposit; and (iii) the contract(s) contain one or more of the following features or other features that would have similar results:

(a) A contract term longer than two years and the contract is noncancellable by the reporting entity during the contract term;

(b) A limited or conditional cancellation provision under which cancellation triggers an obligation by the reporting entity, or an affiliate of the reporting entity, to enter into a new reinsurance contract with the reinsurer, or an affiliate of the reinsurer;

(c) Aggregate stop loss reinsurance coverage;

(d) A unilateral right by either party (or both parties) to commute the reinsurance contract, whether conditional or not, except for such provisions which are only triggered by a decline in the credit status of the other party;

(e) A provision permitting reporting of losses, or payment of losses, less frequently than on a quarterly basis (unless there is no activity during the period); or

(f) Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity? Yes [ ] No [X]

9.2 Has the reporting entity during the period covered by the statement ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates), for which, during the period covered by the statement, it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders; excluding cessions to approved pooling arrangements or to captive insurance companies that are directly or indirectly controlling, controlled by, or under common control with (i) one or more unaffiliated policyholders of the reporting entity, or (ii) an association of which one or more unaffiliated policyholders of the reporting entity is a member where:

(a) The written premium ceded to the reinsurer by the reporting entity or its affiliates represents fifty percent (50%) or more of the entire direct and assumed premium written by the reinsurer based on its most recently available financial statement; or

(b) Twenty-five percent (25%) or more of the written premium ceded to the reinsurer has been retroceded back to the reporting entity or its affiliates in a separate reinsurance contract. Yes [ ] No [X]

9.3 If yes to 9.1 or 9.2, please provide the following information in the Reinsurance Summary Supplemental Filing for General Interrogatory 9:

(a) The aggregate financial statement impact gross of all such ceded reinsurance contracts on the balance sheet and statement of income;

(b) A summary of the reinsurance contract terms and indicate whether it applies to the contracts meeting the criteria in 9.1 or 9.2; and

(c) A brief discussion of management's principle objectives in entering into the reinsurance contract including the economic purpose to be achieved.

9.4 Except for transactions meeting the requirements of paragraph 31 of SSAP No. 62R, Property and Casualty Reinsurance, has the reporting entity ceded any risk under any reinsurance contract (or multiple contracts with the same reinsurer or its affiliates) during the period covered by the financial statement, and either:

(a) Accounted for that contract as reinsurance (either prospective or retroactive) under statutory accounting principles ("SAP") and as a deposit under generally accepted accounting principles ("GAAP"); or

(b) Accounted for that contract as reinsurance under GAAP and as a deposit under SAP? Yes [ ] No [X]

9.5 If yes to 9.4, explain in the Reinsurance Summary Supplemental Filing for General Interrogatory 9 (Section D) why the contract(s) is treated differently for GAAP and SAP.

9.6 The reporting entity is exempt from the Reinsurance Attestation Supplement under one or more of the following criteria:

(a) The entity does not utilize reinsurance; or, Yes [ ] No [X]

(b) The entity only engages in a 100% quota share contract with an affiliate and the affiliated or lead company has filed an attestation supplement; or Yes [ ] No [X]

(c) The entity has no external cessions and only participates in an intercompany pool and the affiliated or lead company has filed an attestation supplement. Yes [ ] No [X]

10. If the reporting entity has assumed risks from another entity, there should be charged on account of such reinsurances a reserve equal to that which the original entity would have been required to charge had it retained the risks. Has this been done? Yes [X] No [ ] N/A [ ]

11.1 Has the reporting entity guaranteed policies issued by any other entity and now in force? Yes [ ] No [X]

11.2 If yes, give full information

12.1 If the reporting entity recorded accrued retrospective premiums on insurance contracts on Line 15.3 of the assets schedule, Page 2, state the amount of corresponding liabilities recorded for:

12.11 Unpaid losses $ 0

12.12 Unpaid underwriting expenses (including loss adjustment expenses) $ 0

12.2 Of the amount on Line 15.3, Page 2, state the amount that is secured by letters of credit, collateral and other funds? $ 0

12.3 If the reporting entity underwrites commercial insurance risks, such as workers' compensation, are premium notes or promissory notes accepted from its insureds covering unpaid premiums and/or unpaid losses? Yes [ ] No [X] N/A [ ]

12.4 If yes, provide the range of interest rates charged under such notes during the period covered by this statement:

12.41 From 0.000%

12.42 To 0.000%

12.5 Are letters of credit or collateral and other funds received from insureds being utilized by the reporting entity to secure premium notes or promissory notes taken by a reporting entity, or to secure any of the reporting entity's reported direct unpaid loss reserves, including unpaid losses under loss deductible features of commercial policies? Yes [ ] No [X]

12.6 If yes, state the amount thereof at December 31 of current year:

12.61 Letters of Credit $ 0

12.62 Collateral and other funds $ 0

13.1 Largest net aggregate amount insured in any one risk (excluding workers' compensation): $ 5,800,000

GENERAL INTERROGATORIES

PART 2 – PROPERTY & CASUALTY INTERROGATORIES

13.2 Does any reinsurance contract considered in the calculation of this amount include an aggregate limit of recovery without also including a reinstatement provision? Yes [ ] No [X]

13.3 State the number of reinsurance contracts (excluding individual facultative risk certificates, but including facultative programs, automatic facilities or facultative obligatory contracts) considered in the calculation of the amount. 2

14.1 Is the company a cedant in a multiple cedant reinsurance contract? Yes [ ] No [X]

14.2 If yes, please describe the method of allocating and recording reinsurance among the cedants:

14.3 If the answer to 14.1 is yes, are the methods described in item 14.2 entirely contained in the respective multiple cedant reinsurance contracts? Yes [ ] No [ ]

14.4 If the answer to 14.3 is no, are all the methods described in 14.2 entirely contained in written agreements? Yes [ ] No [ ]

14.5 If the answer to 14.4 is no, please explain:

15.1 Has the reporting entity guaranteed any financed premium accounts? Yes [ ] No [X]

15.2 If yes, give full information
