C. Accounting Policy

(1) – (5) No significant change.

(6) Mortgage-backed bonds included in bonds are generally stated at amortized cost using the scientific method unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of amortized cost or fair value. Amortization of the discount or premium from the purchase of these securities considers the estimated timing and amount of prepayments of the underlying mortgage loans. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For credit-sensitive mortgage-backed and asset-backed bonds and certain prepayment-sensitive bonds (e.g., interest-only securities), the effective yield is recalculated on a prospective basis. For all other mortgage-backed and asset-backed bonds, the effective yield is recalculated on a retrospective basis.

For certain residential mortgage-backed securities ("RMBS"), both an initial and final NAIC designation is determined on a security-by-security basis based on a range of values published by the NAIC. The initial designation is used to determine the carrying value of the RMBS. RMBS with initial designations of 1 to 2 are stated at amortized cost while RMBS with initial designations of 3, 4, 5 or 6 are stated at the lower of amortized cost or fair value. The final designation calculation compares this carrying value with a range of values, resulting in a final NAIC designation reported herein, which is used for all other accounting and reporting purposes.

For loan-backed securities, including asset-backed securities ("ABS"), which are not modeled, the NAIC relies on the second lowest NAIC Credit Rating Provider ("CRP") rating to determine the initial NAIC designation. The second lowest CRP rating is used to determine the carrying value of the security, which is based on the NAIC's estimate of expected losses, using an NAIC published formula. The carrying value of the security determines its final NAIC designation, which is used for reporting in the Annual Statement and in RBC calculations. This revised methodology does not apply to NAIC 1 and NAIC 6 securities, which are rated at the second lowest CRP designation.

G. All Other Contingencies

The contingency footnote has been prepared on a combined basis for MPC and its subsidiaries and affiliates. The Company is a wholly owned subsidiary of MPC.

Various litigation claims, and assessments against the Company, in addition to those otherwise provided for in the Company's financial statements, have arisen in the course of the Company's business, including but not limited to, in connection with its activities as an insurer, employer and taxpayer. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning the Company's compliance with applicable insurance and other laws and regulations.

It is not feasible to predict or determine the ultimate outcome of all pending investigations and legal proceedings or provide reasonable ranges of potential losses. In some matters, very large and/or indeterminate amounts, including punitive and treble damages, are sought. Although in light of these considerations it is possible that an adverse outcome in certain cases could have a material adverse effect upon the Company's financial position, based on information currently known by the Company's management, in its opinion, the outcomes of such pending investigations and legal proceedings are not likely to have such an effect. However, given the large and/or indeterminate amounts sought in certain of these matters and the inherent unpredictability of litigation, it is possible that an adverse outcome in certain matters could, from time to time, have a material adverse effect on the Company's financial statements.

Assets and Liabilities

The methods and significant assumptions used to estimate the fair value of all financial instruments are presented below.

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In most cases, the exit price and the transaction (or entry) price will be the same at initial recognition.

When developing estimated fair values, the Company considers two broad valuation techniques: (i) the market approach and (ii) the income approach. The Company determines the most appropriate valuation technique to use, given what is being measured and the availability of sufficient inputs, giving priority to observable inputs.

The Company categorizes its financial assets and liabilities into a three-level hierarchy, based on the significant input with the lowest level in their valuation. The input levels are as follows. Level 1 - Unadjusted quoted prices for identical assets or liabilities. The Company defines active markets based on average trading volume for common stock. The size of the bid/ask spread is used as an indicator of market activity for bonds. Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1, quoted prices in markets that are not active, or other significant inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities. Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

In general, investments classified within Level 3 use many of the same valuation techniques and inputs as described in the Level 2 discussions below. However, if key inputs are unobservable, or if the investments are less liquid and there is very limited trading activity, the investments are generally classified as Level 3. The use of independent non-binding broker quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency in the process to develop the valuation estimates generally causing these investments to be classified in Level 3.

Bonds, Cash, Cash Equivalents and Short-term Investments

When available, the estimated fair value for bonds, including loan-backed securities cash equivalents and short-term investments, are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1, are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified in Level 2.

When observable inputs are not available, the market standard valuation methodologies rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation, and cannot be supported by reference to market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investments are classified in Level 3.

The estimated fair value for cash approximates carrying value and is classified as Level 1 given the nature of cash.

The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's securities holdings.

Investment Income Due and Accrued

Due to the short-term nature of investment income due and accrued, the Company believes there is minimal risk of material changes in interest rates or credit of the issuer such that estimated fair value approximates carrying value.

D. At March 31, 2016, the Company had no investments where it was not practicable to estimate fair value.
