B. Use of Estimates in the Preparation of the Financial Statement

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses. Actual results could differ from those estimates.

C. Accounting Policies

Premium is earned over the terms of the related policies and reinsurance contracts. Unearned Premium is established to cover the unexpired portion of premium written. Such reserves are computed by pro rata methods for direct, assumed and ceded business.

Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Net investment income earned consists primarily of interest, dividends and rent income less investment related expenses. Interest is recognized on an accrual basis and dividends are recognized on an ex-dividend basis. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed. Realized capital losses include writedowns for impairments considered to be other than temporary.

In addition, the Company utilizes the following accounting policies:

(1) Basis for Short-Term Investments

Short-term debt securities are stated at amortized cost using the interest method.

(2) Basis for Bonds and Amortization Schedule

Non loan-backed bonds with NAIC designations 1 or 2 are stated at amortized cost using the interest method. Non loan-backed bonds with NAIC designations of 3 through 6 are stated at the lower of amortized value or fair value. See paragraph 6 for loan-backed and structured securities.

(3) Basis for Common Stocks

Common Stocks, except investments in stocks of subsidiaries, are stated at fair value.

(4) Basis for Preferred Stocks

The Company has no preferred stocks.

(5) Basis for Mortgage Loans

The Company has no mortgage loans.

(6) Basis for Loan-Backed Securities and Adjustment Methodology

U.S. government agency loan-backed and structured securities are valued at amortized value. Other loan-backed and structured securities are valued at either amortized value or fair value, depending on many factors including: the type of underlying collateral, whether modeled by NAIC vendor, whether rated (by either NAIC approved rating organization or NAIC Securities Valuation Office), and relationship of amortized value to par value and amortized value to fair value.

NOTES TO FINANCIAL STATEMENTS**Note 1 – Summary of Significant Accounting Policies and Going Concern (continued from preceding page)**

(7) Accounting Policies for Investments in Subsidiaries, Controlled and Affiliated Entities

U.S. insurance subsidiaries (Affiliated FM Insurance Company, NAIC #10014, and Appalachian Insurance Company, NAIC #10316) are stated at statutory equity value in accordance with SSAP 97 paragraph 8(b)i. Foreign insurance companies (FM Insurance Company Limited, FM Insurance Europe S.A., and Risk Engineering Insurance Company Limited) are stated at the audited foreign basis equity converted to U.S statutory equity value in accordance with SSAP 97 paragraph 8(b)iv. Non-insurance subsidiaries (FMRE Holdings LLC) are stated at audited GAAP equity in accordance with SSAP 97 paragraph 8(b)iii.

(8) Accounting Policies for Investments in Joint Ventures, Partnerships and Limited Liability Entities

Investments in joint ventures, partnerships and limited liability corporations are stated at the underlying audited GAAP equity value.

(9) Accounting Policies for Derivatives

The Company has no derivatives.

(10) Anticipated Investment Income Used in Premium Deficiency Calculation

The Company anticipates investment income when evaluating the need for premium deficiency reserves.

(11) Management's Policies and Methodologies for Estimating Liabilities for Losses and Loss/Claim Adjustment Expenses

Liabilities for unpaid losses and loss adjustment expenses (including Asbestos and Environmental reserves) are based on case estimates or reports from ceding companies. Estimates of incurred-but-not-reported (IBNR) reserves are based on historical experience and management analysis. Although the above-described amounts are based on estimates, management believes recorded liabilities for unpaid losses and loss adjustment expenses are reasonable to cover the ultimate settlement cost of losses incurred. These estimates are continually reviewed and adjustments to such estimates are reflected in current operations.

(12) Changes in the Capitalization Policy and Predefined Thresholds from Prior Period

The Company has not changed its capitalization policy from the prior period.

(13) Method Used to Estimate Pharmaceutical Rebate Receivables

The Company has no "pharmaceutical rebate receivables."

D. Going Concern

Based upon its evaluation of relevant conditions and events, management has concluded that the Company will continue as going concern.

NOTES TO FINANCIAL STATEMENTS**Note 5 – Investments (continued from preceding page)****D. Loan-Backed Securities****(1) Description of Sources Used to Determine Prepayment Assumptions**

Loan-backed bonds and structured securities are valued at amortized cost using the constant interest rate method, and using an effective yield based on current prepayment assumptions obtained from Bloomberg, rather than anticipated prepayments at the date of purchase. Prepayment assumptions are reviewed periodically and updated in response to changes in market interest rates.

(2) Other-Than-Temporary Impairments (OTTI) Loss Recognized in the Aggregate

Not Applicable

(3) Recognized OTTI Securities

Not Applicable

(4) All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:	1. Less than 12 Months	\$	15,314
	2. 12 Months or Longer	\$	164,445
b. The aggregate related fair value of securities with unrealized losses:	1. Less than 12 Months	\$	11,166,237
	2. 12 Months or Longer	\$	10,683,345

(5) Information Investor Considered in Reaching Conclusion that Impairments are Not Other-Than-Temporary

All loan-backed and structured securities in an unrealized loss position were reviewed to determine whether other-than-temporary impairments should be recognized. The Company asserts that it has the intent and ability to hold these securities long enough to allow the cost basis of these securities to be recovered. These conclusions are supported by a detailed analysis of the underlying credit and cash flows of each security. Unrealized losses are primarily attributable to credit spread widening and increased liquidity discounts. It is possible that the Company could recognize other-than-temporary impairments in the future on some of the securities, if future events, information and the passage of time causes it to conclude that declines in value are other-than temporary.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions**(1) Policy for Requiring Collateral or Other Security**

Under a securities lending program with an agent, the Company has temporarily loaned certain debt securities. Borrowers of these securities must deposit an amount of cash and/or securities equal to 102% of the fair value of domestic securities or 105% of the fair value of foreign securities loaned as of the transaction date. The collateral level is monitored daily and additional cash calls are made by the agent if needed to retain the 102% or 105% collateral amount. The agent holds any securities pledged as collateral in trust for the borrower, and invests any cash collateral pledged as collateral in high quality short term securities. The cash collateral received under the securities lending agreement and invested in short term securities is included in the "Securities lending reinvested collateral assets" on Page 2 Line 10 and the offsetting liability in the "Payable for securities lending" on Page 3 Line 22.

C. Current and Deferred Income Taxes

The Tax Cuts and Jobs Act was enacted on December 22, 2017. The Act reduced the U.S. federal corporate tax rate from 35% to 21% as of January 1, 2018, requiring companies to revalue their deferred tax balances, pay a one-time transition tax on earnings of certain foreign subsidiaries that were previously not recognized by the Company, and created new taxes on certain foreign source earnings. A net tax expense amount of \$0 and \$4,695,000 has been recognized with respect to the Act, which is included as a component of the income tax expense on the Statements of Income and a net expense (benefit) of \$5,683,000 and \$(1,555,000) as a separate component of gains and losses in unassigned funds (surplus), for the years December 31, 2019 and 2018, respectively.

The Act subjects a U.S. shareholder to current tax on Global Intangible Low-Taxed Income (GILTI) earned by certain foreign subsidiaries. The effect of GILTI on income tax is immaterial and is reported in the tax effect of foreign operations.

N. Investment in Insurance SCAs

(1) Accounting Practice that Differs from NAIC Statutory Accounting Practices and Procedures

The Company's reported insurance SCA investments include one insurance company that has a permitted practice. Specifically, Affiliated FM Insurance Company (NAIC # 10014), applies paragraph 5(a) of SSAP 23, rather than paragraph 5(b) of SSAP 23, with respect to the methodology applied in translating its Canadian branch to USD. This is consistent with the methodology used in prior years, and a permitted practice has been approved by the State of Rhode Island. The total adjustment to convert Affiliated FM Insurance Company's balance sheet to USD is \$120,620,401, which appears on line 17 - "Net adjustment in assets and liabilities due to foreign exchange rates", on page 3 - "Liabilities" of its 2019 annual statement. There is no net impact on surplus for this practice, and the effect on 2019 net income would be a decrease to net income in the amount of \$273,254 (which would be offset by a corresponding increase to surplus).

(2) Monetary Effect on Net Income and Surplus

SCA Entity (Investments in Insurance SCA Entities)	Monetary Effect On NAIC SAP		Amount of Investment	
	Net Income Increase (Decrease)	Surplus Increase (Decrease)	Per Audited Statutory Equity	If the Insurance SCA Had Completed Statutory Financial Statements*
AFFILIATED FM INSURANCE COMPANY	\$ (273,254)	\$ -	\$ 2,037,984,882	\$ 2,037,984,882

* Per AP&P Manual (without permitted or prescribed practices)

(3) RBC Regulatory Event Because of Prescribed or Permitted Practice

Since there is no impact on surplus from this permitted practice, there is no effect on risk-based capital that would have triggered a regulatory event. There is no difference in the amount of the Company's investment in Affiliated FM Insurance Company from applying the permitted practice, rather than applying NAIC statutory accounting principles.

A. Defined Benefit Plans

(1) Change in Benefit Obligation

The Company sponsors certain noncontributory retirement income plans. For the vast majority of employees, the benefits are generally based on years of service and the average of the highest consecutive 60 months of the employee's compensation within the 120 months prior to retirement. The Company's funding policy is to maintain a sufficiently funded level to ensure benefit security and to vary contribution levels as appropriate to business conditions. The Company also has supplemental retirement plans that are noncontributory defined benefit plans covering certain employees.

The Company provides health care and life insurance benefits for certain retired employees and their dependents. Employees hired on or after January 1, 2000, and employees that were active employees on January 1, 2000 and had not reached the age of 30 as of January 1, 2000, are not eligible for retiree medical benefits. Eligibility of other employees hired prior to January 1, 2000 and retiring subsequent to that date depends on whether they meet certain age and service requirements at retirement. The plan is generally contributory, with retiree contributions adjusted annually. Certain retirees transitioned to the individual Medicare market effective January 1, 2014 and January 1, 2019, and others will transition on January 1, 2020. Retirees and dependents enrolled in the individual Medicare market participate in a Retiree Health Reimbursement Account.

B. Investment Policies and Strategies

Description of Investment Policies

The investment policy of the pension and postretirement plans specify the type of securities that may be used, the limits on the amount of the asset classes and subclasses, and the general principles used in managing the plan's assets. The overriding objective is to optimize plan surplus and long-term total return of plan assets within constraints established to control risk and volatility. The asset allocation is segregated within three primary asset classes representing the first layer of asset allocation. The broad categories are equities, fixed income, and cash and cash equivalents. The broad equities allocation also includes limits within domestic small cap and international equities categories, and lower thresholds for private equity and real estate. The current approved ranges for the three asset classes in the U.S. Pension fund, which is also the largest of the retirement plans, are as follows:

<u>Asset class</u>	<u>Range</u>
Equities	50 - 80%
Fixed Income	10 - 50%
Cash and cash equivalent	0 - 15%

The portfolio construction is based on prudent investment principles including diversification of securities and ongoing analysis of the fundamental and valuation factors underlying the securities owned, and external funds managed.

The equities allocation includes individual common stocks, equity mutual funds and a small allocation to private equity partnerships. All equity investments are based on fundamental analysis of investment variables, including earning prospects, cash flow, balance sheet strength, competitive positioning, and other factors. Diversification is emphasized with specific size limits on individual stocks, international-oriented mutual funds, small capitalization-oriented funds and private equity investments. Investment returns are benchmarked against standard indices including the S&P 500 and MSCI global stock indices.

The fixed income allocation consists of debt securities, including individual securities, primarily in the high-grade taxable subcategory, debt mutual funds, as well as an outside managed portfolio of U.S. high-yield bonds. Debt securities are actively managed, using best practice investment disciplines and provide a lower risk, high quality complement to the total pension investment portfolio.

The cash and cash equivalent category includes short-term investments, defined as debt securities with a maturity of less than one year, and are held primarily for liquidity purposes and secondarily to reduce duration of fixed income securities when warranted by interest rate levels. Capital preservation is the primary consideration of investment in this asset class; therefore, only the highest quality investments are used. This is principally money market funds and commercial paper carrying the highest quality ratings.

Expected rate of return assumptions are created based on assessments of long-term behavior of asset classes. As part of the process, historical relationships are considered. Using a three to five-year outlook, estimates of numerous variables are combined to gauge economic growth potential. Corporate cash flows are correlated with economic growth but also reflect productivity and profit margin trends, with positive cash flow trends driving favorable return to equity owners. Fixed income returns are expected to produce somewhat lower returns with a lower level of volatility compared to equities.

The defined benefit pension plan asset allocation and the target asset allocation, presented as a percentage of total plan assets, were as follows:

Asset Category	Percentage of Plan Assets	
	2019	Target Allocation
Equity Securities	75%	54%
Debt Securities	20%	32%
Cash	3%	3%
Other	2%	11%
Total	100%	100%

The defined benefit postretirement plan asset allocation and the target asset allocation, presented as a percentage of total plan assets, were as follows:

Equity Securities	96%	90%
Debt Securities	0%	0%

(2) Valuation Technique(s) and Inputs Used to Measure Fair Value

The valuation techniques required by the Fair Value Measurements guidance (SSAP 100) are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect market assumptions. These two types of inputs create the following fair value hierarchy:

- Level 1 Quoted prices for identical instruments in active markets
- Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable
- Level 3 Significant inputs to the valuation model are unobservable

When available, the Company uses quoted market prices to determine the fair value of investment securities, and they are included in Level 1.

When quoted market prices are unavailable, the Company uses quotes from independent pricing vendors based on recent trading activity and other relevant information, including market interest rate curves, referenced credit spreads and estimated prepayment rates, where applicable. These investments are included in Level 2 and are primarily comprised of fixed income securities.

When pricing is not available from a pricing vendor it is based on significant unobservable inputs. In those circumstances, the investment security is classified in Level 3. These investments are primarily comprised of private equity funds and partnerships.

D. Basis Used to Determine Expected Long-Term Rate-of-Return

Expected rate of return assumptions are created based on assessments of long-term behavior of asset classes. As part of the process, historical relationships are considered. Using a three to five-year outlook, estimates of numerous variables have been combined to gauge economic growth potential. Corporate cash flows are correlated with economic growth but also reflect productivity and profit margin trends, with positive cash flow trends driving favorable return to equity owners. Fixed income returns are expected to produce lower returns with a lower level of volatility compared to equities.

E. Defined Contribution Plans

The Company also sponsors a 401(k) savings plan whereby eligible employees may elect annually to contribute from 1 percent to 50 percent of their base pay on a pretax or after-tax basis. Employee contributions are restricted to Internal Revenue Service limits. The Company matches pretax contributions up to 6 percent of the employee's base pay. Company contributions to the Plan were \$19,350,000 in 2019 and \$19,006,000 in 2018.

A. Fair Value Measurements

(1) Fair Value Measurements at Reporting Date

The Company categorizes its invested assets that are measured at fair value into the three-level fair value hierarchy or designates certain invested assets as carried at net asset value (NAV). Item 4 provides a discussion of each of these categories.

Description for Each Type of Asset or Liability	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total

NOTES TO FINANCIAL STATEMENTS**Note 20 – Fair Value Measurements (continued from preceding page)**

(2) Fair Value Measurements in (Level 3) of the Fair Value Hierarchy

The Company has no assets measured at fair value in the Level 3 category.

(3) Policies when Transfers Between Levels are Recognized

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. The Company has no assets measured at fair value in the Level 3 category.

(4) Description of Valuation Techniques and Inputs Used in Fair Value Measurement

The valuation techniques required by the Fair Value Measurements guidance (SSAP 100) are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect market assumptions.

These two types of inputs create the following fair value hierarchy:

Level 1 Quoted prices for identical instruments in active markets

Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable

Level 3 Significant inputs to the valuation model are unobservable

The Company elects to use NAV for all money market mutual funds in lieu of fair value as NAV is more readily available. These funds are backed by high quality, very liquid short-term instruments and the probability is remote that the funds would be sold for a value other than NAV.

The Company retains independent pricing vendors to assist in valuing invested assets when the prices are not available from the SVO.

When available, the Company uses quoted market prices to determine the fair value of investment securities, and they are included in Level 1.

When quoted market prices are unavailable, the Company uses quotes from independent pricing vendors based on recent trading activity and other relevant information, including market interest rate curves, referenced credit spreads and estimated prepayment rates, where applicable. These investments are included in Level 2 and are primarily comprised of fixed income securities which are NAIC rated 3 or below.

In infrequent circumstances, the pricing is not available from the pricing vendor and is based on significant unobservable inputs. In those circumstances, the investment security is classified in Level 3. There are no Level 3 investments at the reporting date.

A. Change in Incurred Losses and Loss Adjustment Expenses

As a result of changes in estimates of insured events related to prior years, the provision for losses and loss adjustment expenses decreased by \$334,380,000. The decrease in the prior years was primarily due to the reduction of incurred-but-not-reported (IBNR) reserves based on actual experience.

No additional premium or return of premium have been accrued as a result of prior year effects.

Note 33 – Asbestos/Environmental Reserves

- A. Does the company have on the books, or has it ever written an insured for which you have identified a potential for the existence of a liability due to asbestos losses?

The Company has potential exposure involving asbestos, environmental impairment liability, and other types of tort-related claims, which applies only to the casualty and assumed reinsurance business now in runoff. Management has indicated that liabilities are recognized for known claims (including the cost of related litigation) when sufficient information has been developed to indicate the involvement of a specific insurance policy, and the Company's liabilities can be reasonably estimated. Additional reserves for such claims are established to cover further exposures on both known and unasserted claims based on facts currently known and the present state of the law and coverage litigation. The reserves for these types of claims are included in the foregoing loss and loss adjustment expense reserves and are subject to considerable uncertainty, due to the potential severity of the claims and the uncertain legal climate.
