NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying financial statements of The Beacon Mutual Insurance Company (the "Company") have been prepared in conformity with insurance accounting practices prescribed or permitted by the Rhode Island Insurance Department. The State of Rhode Island requires insurance companies domiciled in the State of Rhode Island to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual.

SSAP 97 requires investments in subsidiaries to be carried at the entity's underlying audited statutory equity. As the Castle Hill Insurance subsidiary ("Castle Hill") has been inactive since its inception, the State of Rhode Island has granted the subsidiary an exemption from filing audited financial statements. As such, the State of Rhode Island has also granted a permitted practice to allow Castle Hill to be recorded on the Company's balance sheet as an invested asset at its unaudited statutory equity value.

A summary of the impact of the permitted practice on the Company's net income and surplus as a result of recording Castle Hill as an invested asset is estimated to be as follows:

The Company evaluated its cash flow requirements and believes that its liquidity is adequate and it will not be required to sell these securities before recovery of their cost basis. As of March 31, 2021, the Company can attest that it has the intent and believes that it has the ability to hold these securities long enough to allow the cost basis of these securities to be recovered. The conclusions are determined by a detailed analysis of the underlying credit and cash flows on each security. It is possible that the Company could recognize other than temporary impairments in the future on some of the securities held at March 31, 2021 if future events, information, and the passage of time causes it to conclude that declines in value are other than temporary.

20. Fair Value Measurement

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements by Levels 1, 2 and 3

The Company has categorized its assets and liabilities that are measured at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows:

Level 1 --Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2 --Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, prepayment speeds, spreads and yield curves.

Level 3 --Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

The following tables provide information about the Company's financial assets and liabilities measured at fair value.

	March 31, 2021			Net Asset	
	Level 1	Level 2	Level 3	Value (NAV)	Total

NOTES TO FINANCIAL STATEMENTS

transferred between Levels 1 and 2. This policy also applies to transfers into or out of Level 3 as stated in paragraph 3 below.

During 2021, the Company had no transfers into or out of Level 3.

2. Rollforward of Level 3 Items

The Company has no material assets or liabilities measured at fair value in the Level 3 category.

3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The Company has no assets or liabilities measured at fair value in the Level 3 category.

The Company's investments in bond and debt securities and preferred stock reported at fair value are classified in Level 2. Fair values of the investments reported in this category are provided by independent pricing services. Where independent pricing services provide fair values, the Company has obtained an understanding of the methods, models and inputs used in pricing and has controls in place to validate that the amounts provided represent current fair values.

Typical inputs to models used by independent pricing services include but are not limited to benchmark yields, reported trades, broker-dealer quotes, issuer spreads, benchmark securities, bids, offers, reference data, and industry and economic events. Because some preferred and common stocks do not trade daily, independent pricing services regularly derive fair values using recent trades of securities with similar features. When recent trades are not available, pricing models are used to estimate the fair values of securities by discounting future cash flows at estimated market interest rates.

5. The Company has no derivative assets or liabilities.

B. Combination of Fair Value Information
