2010 EU-SILC MODULE ON INTRA-HOUSEHOLD SHARING OF RESOURCES

Assessment of the implementation

0. Introduction

The objective of this report is to present an overall analysis of the microdata concerning the 2010 Module on intra-household sharing of resources. The Commission Regulation 646/2009 presents the list of target secondary variables relating to intra-household sharing of resources.

After a brief introduction in section 1 on the main features of the 2010 Module, section 2 focuses on the main definitions agreed to describe the variables, and section 3 introduces an analysis of the frequencies for each variable among countries. In section 4 the flags are analysed, while in section 5 the main findings of the analysis of questionnaires are shown. Finally, the last section concludes this document.

1. Main characteristics

1.1 Relevance

One objective of this module is to provide deeper insights into the decision-making process and the allocation of resources within the household, a topic of highest relevance when studying the poverty risk of individuals.

The module could also serve to enrich the information provided by the poverty risk indicators by providing some information on whether individuals in households can be assumed to have more or less the same standard of living or not and give some information on how transfers are best targeted to reach the most needy.

The variables of this module are grouped in two categories:

- Those on the process and the results of decision-making in the household;
- And those on the outcome of the allocation process in the household.

The proposed questions on management and decision-making are all compulsory and will enable to get a clearer picture of control and power in the household and whether one gender is more favoured in the sense that they take more decisions. It covers areas such as access to household resources or financial decision-making in the household.

The questions on the outcome of the allocation process in the household relate to time use and individual expenditure and are all optional. They give a complete picture of outcomes in terms of the so-called material welfare achieved by each interviewed household member. Knowing these outcomes for the individuals within the household allows the collection of concrete evidence on the allocation within the household and indeed on poverty of individuals and inequality in the household.

1.2 List of secondary target variables

The 2010 module includes twenty-three variables as a whole, of which eighteen are compulsory and the remaining five are optional. Among the compulsory variables, seven relating to regime and management of household finance are asked at the household level while all the other variables are asked at personal level. The variables are the following:

Household information

HA010: Regime of household finances

HA020: Management of common household finances

HA030: Identification number of person 1 managing the household's finances

HA040: Identification number of person 2 managing the household's finances

HA050: Identification number of person 3 managing the household's finances

HA060: Identification number of person 4 managing the household's finances

HA070: Identification number of person 5 managing the household's finances

Personal information

PA010: Proportion of personal income kept separate from the common household budget

PA020: Access to a bank account

PA030: Decision-making on everyday shopping

PA040: Decision-making on important expenses to make for the child(ren)

PA050: Decision-making on expensive purchases of consumer durables and furniture

PA060: Decision-making on borrowing money

PA070: Decision-making on use of savings

PA080: Decision-making - general

PA090: Ability to decide about expenses for your own personal consumption, your leisure activities and hobbies

PA100: Ability to decide about purchases for children's needs (including giving them pocket money)

PA110: Length of cohabitation of the partners

Personal information - OPTIONAL

PA120: Time spent commuting to and from work

PA130: Time spent on leisure

PA140: Time spent on household work, child care and care for other dependants

PA150: Money spent per month for own use

PA160: Money spent per month for children by the interviewed person

1.3 Units of analysis

Three different types of units are used in this module:

- Households with at least two persons aged 16+: all variables related to the regime and managing of the household's finances (HA010 - HA070);
- Each current household member (or selected respondent), aged 16+ living in a household with at least two persons aged 16+: the variables related to the contribution to common household budget (PA010), to access to a bank account (PA020), to ability to decide about expenses (PA090), to time use (PA120-PA130-PA140) and expenditure (PA150);
- Each current household member (or selected respondent), aged 16+ living in a couple/with partner: the variables related to the decision making (PA030, PA050-PA080) and to the length of cohabitation (PA110);
- Each current household member (or selected respondent), aged 16+ living in a couple/with partner or with at least two persons aged 16+ and with at least one child below 16: the variables related to the decision making (PA040), to ability to decide about expenses for children's needs (PA100) and to expenditure for children (PA160).

1.4 Modes of data collection

For variables asked at household level, the mode of data collection is personal interview with the household respondent.

For variables asked at individual level, the mode of data collection is personal interview with all current household members aged 16 years old and over or, if applicable, with the household selected respondent.

Owing to the characteristics of the information to be collected, only personal interviews (proxy interviews as an exception for persons temporarily away or incapacitated) were allowed.

1.5 Reference period

All target variables relate to the current situation as reference period.

2. Description of the definitions

This section describes the main definitions used for describing the variables in the 2010 Module.

2.1 General definitions

➤ Couple

A couple includes married people and partners in consensual union (with or without a legal basis). Couples which do not live together do not form a household for the purpose of the variables collected in this module.

➤ Child

A child is defined as a person aged under 16.

2.2 Household finances: regime and management

➤ "Common resources"

It does not necessarily imply a purely physical access or putting money physically in one pot. Incomes are treated as private resources by a household member if he or she feels that the incomes are for him or her to decide what to do with them. Incomes used for the children aged under 16 in the household are to be treated as common resources except if according to the self-perception of the respondent the expenses made for the children result from decisions of only one member of the couple.

It refers to the following variable: HA010

➤ "Incomes the household receives"

It includes any income covered by the income concept used in EU-SILC. Incomes from employment and self-employment, property and capital incomes, current transfers received as well as other income received by any household member or household as a whole are therefore included. Incomes earned by the children aged under 16 in the household are to be treated as common resources. Relatively small amounts of money kept on the side by children (pocket money, small amounts of earnings from odd jobs, etc.) should not be taken into account when considering the regime of household finances.

It refers to the following variable: HA010

➤ Person in charge of 'managing the household finances'

It is the household member aged 16+ dealing with the common household finances, i.e. keeping track of expenses, bills, loans and incomes concerning the household as a whole. More than one person may be involved in these tasks and there may be a division of tasks between these persons. All persons involved in the tasks described above are to be considered for this variable and variables HA030-HA070. The person(s) outside the household involved in the management of the household's finances may be accountants, tax advisers, business consultants (only if it concerns the household and not the family business), social workers, or family members (if the household is not capable or willing to manage its own finances). Both one-off and regular involvements are to be considered. However, one-off involvements should only be considered if the household respondent considers their contribution to be significant.

It refers to the following variables: HA020-HA070

2.3 Personal income

➤ Income kept separate from common household budget

“Keep separate” means those proportions of personal income (i.e. of income which first passes through the hands of the respondent in the household). The income does not in all cases need to be physically separated from other financial resources of the household even though this would often be the case. It is vital that the income which is considered not to be put in the “common household pot” is considered by the respondent to be his or hers to do with as he or she wishes.

It refers to the following variables: PA010

➤ Common household budget

It means expenses and savings not primarily concerning one person only in the household except where they concern the children living in the household. This means items for consumption not meant for the sole use of one person in the household or savings which are considered to be owned by the household rather than one of its members. The needs of the children (below 16) in the household are to be treated as common to the household, i.e. as part of the common budget.

It refers to the following variables: PA010

➤ Bank account

All bank accounts are to be considered, including current accounts as well as long term saving accounts. Bank accounts not held in the name of the respondent are to be included. Similar accounts with institutions other than a bank such as an account at a post office can also be considered if appropriate in the context of the country.

"Access to bank account" means the entitlement to withdraw funds. An 'entitlement to withdraw funds' refers to an official entitlement (e.g. issued from the bank) and not to an informal agreement within the household (e.g. partner withdraws money for the respondent, partner gives respondent his bank card to use). However, the actual balance of the account in question, which influences the practical ability to withdraw money, is not of concern in this context. Access to another person's bank account is essentially a self-defined concept. However, explanations may be offered by the interviewer.

It refers to the following variables: PA020

2.4 Decision making

➤ Decision-making

The individual level is vital for this question as the question asks for a subjective perception of decision-making in the household. There is thus no inconsistency if for example both persons in the household answer that they are more likely to take decisions on a specific subject. It covers all real decisions that are or were taken by the couple.

It refers to variables: PA030-PA080

➤ Everyday shopping

All expenses on everyday shopping are to be covered, including expenses made by the respondent for himself or herself.

It refers to the following variable: PA030

➤ Important expenses to make for the child(ren)

“Important expenses” is a self-defined concept – meaning an expense is a major or important expense if the respondent feels this to be the case. As an indication, an important expense could be considered one which has a one-off or regular impact on the household budget and/or which would be discussed by the couple, such as purchases of furniture, regular expenses for the children's education or activities or expensive toys.

It refers to variable: PA040

➤ Purchases of consumer durables and furniture

It includes one-off purchases of items such as white goods (fridges, washing-machines), larger pieces of furniture, electrical appliances, etc. according concretely defined as durable goods acquired by households for final consumption (i.e. those that are not used by households as stores of value or by unincorporated enterprises owned by households for purposes of production); they may be used for purposes of consumption repeatedly or continuously over a period of a year or more (source OECD). Purchasing goods with the help of hire purchase instalments and credit cards usage should be included.

It refers to the following variable: PA050

➤ Expenses for own personal consumption, leisure activities and hobbies

Expenses for leisure activities and hobbies cover sport and outdoor activities, hobbies and games, audiovisual, newspapers, books, social life and entertainment (e.g. cinema, theatre, eating out). Expenses for food (except eating out) are to be excluded.

It refers to the following variable: PA090

➤ Children's need (including giving them pocket money)

All expenses for the children in the household are included. Expenses for food (except eating out) are excluded.

It refers to the following variable: PA100

➤ Length of cohabitation

It refers to the current situation and the start of the cohabitation, irrespective of a legal basis. The break-up and subsequent renewed cohabitation with the same partner should count as setting the value of the period of cohabitation back to zero.

It refers to the following variable: PA110

2.5 Time use

➤ Leisure

By default leisure is essentially a self-defined and only self-perceived concept. If the respondent asks what is to be considered as leisure, the following list of activities (taken from the main activity categories defined as leisure in Time Use Surveys) should be used as a fall-back definition: social life and entertainment (also eating out), sport and outdoor activities, hobbies and games as well as consumption of mass media (e.g. reading, watching TV and listening to the radio). Time spent travelling in connection to leisure activities should be included. Please also note that whether an activity is considered as leisure does necessarily depend on whether the person chose the activity. However, the border between leisure and work is where the person considers the activity a chore.

It refers to the following optional variable: PA130

➤ Household work and care

Generally, as for leisure, household work and care are self-defined concepts. I.e. the person should include these activities in this variable measuring unpaid work if the person considers the activity to be work and not leisure. If the respondent asks for a clarification from the interviewer, the following categories of tasks would, by default be regarded as constituting time spent on household work, child care and care for other dependants: food management, household upkeep, making and care for textiles, gardening and pet care, construction and repairs, shopping and services, (not individual shopping and services) and household management, child care and care for other dependants (sick or elderly). Time spent travelling in connection to household work and care should be included. In defining household work, the 3rd party criterion is to be applied. This means that an activity cannot be considered to be household work, if it is for the main use of the person doing the activity, e.g. going to the hairdresser.

It refers to the following optional variable: PA140

2.6 Expenditure

➤ Money spend for own use

The expenditure should be mainly for individual use of the respondent. The variable does not include gifts made by other household members. The funds used for the expenditures can either be private or common resources. The question does not seek to know what is spent on the respondent by the household, but rather what the individual spends on himself.

It refers to the following optional variable: PA150

➤ Money spend for children

The expenditure should be mainly for individual use of the children below 16 in the household. The variable does not include gifts made by other household members. The funds used for the expenditures can either be private or common resources. The question does not seek to know what is spent on the children by the household, but rather what the individual spends on the children, also in comparison to personal expenditures. Child-care expenditures (including babysitters and nannies), food dedicated solely for the consumption of children as well as pocket money for children are to be included.

It refers to the following optional variable: PA160

3. Analysis of the variables

In this section an analysis of the frequencies of the answers variable by variable is included. For getting the complete description of the variables please read the guidelines:

(http://epp.eurostat.ec.europa.eu/portal/page/portal/income_social_inclusion_living_conditions/documents/tab7/2010%20Module%20-%20Guidelines%20for%20Website.pdf).

HOUSEHOLD INFORMATION

HA010: REGIME OF HOUSEHOLD FINANCES

Values

- | | |
|---|---|
| 1 | We treat all incomes as common resources |
| 2 | We treat some incomes as common resources and the rest as private resources |
| 3 | We treat all incomes as private resources of the person receiving it |
| 4 | We do not receive any income in the household |

Flags

- | | |
|----|---|
| 1 | filled |
| -1 | not filled |
| -4 | single person household or household with less than two persons aged 16 and above |

This question refers to the current situation and to the household respondent's self-assessment of the household regime with regard to finances. If there is only one income source in the household or only one household member receiving income, code 1 is to be used if the income is treated as a common resource for all household members. Codes 2 and 3 are to be used otherwise.

Main results:

The category 'We treat all incomes as common resources' was the most frequent in all countries with values ranging from 50.0% in Austria to 85.9% in Malta.

In 19 countries at least 20.0% of the respondents selected the category 'We treat some incomes as common resources and the rest as private resources' with the highest values in Cyprus (45.5%) and Slovakia (39.8%).

Regarding the category 'We treat all incomes as private resources of the person receiving it' the figures didn't differentiate very much with a rate going from 1.2% in Cyprus to 23.6% in Ireland. The category 'We do not receive any income in the household' was not very frequent.

HA020: MANAGEMENT OF COMMON HOUSEHOLD FINANCES

Values

- 1 One or more household members
- 2 At least one person inside and at least one person outside the household is involved in managing the common household finances
- 3 No person inside the household and at least one person outside the household is involved in managing the common household finances
- 4 There are no common household finances

Flags

- 1 filled
- 1 not filled
- 4 single person household or household with less than two persons aged 16 and above

This question refers to the current situation and to the household respondent's self-assessed view of how the household's finances are managed. If at least one household member as well as another person/ other persons outside the household are involved in managing the household's finances, code 2 is to be used.

Main results:

In all countries except Germany (89.3%), Belgium (88.2%) and Norway (84.4%) more than 90% of the households had one or more household members responsible for managing the common household finances.

The two categories 'At least one person inside and at least one person outside the household...' and 'No person inside the household and at least one person outside the household...' were quite less popular.

The values for the category 'There are no common household finances' differed across countries starting from 0.0% in Estonia, France and Denmark to 15.4% in Norway.

HA030: ID NUMBER OF PERSON 1 MANAGING THE HOUSEHOLD'S FINANCE
HA040: ID NUMBER OF PERSON 2 MANAGING THE HOUSEHOLD'S FINANCE
HA050: ID NUMBER OF PERSON 3 MANAGING THE HOUSEHOLD'S FINANCE
HA060: ID NUMBER OF PERSON 4 MANAGING THE HOUSEHOLD'S FINANCE
HA070: ID NUMBER OF PERSON 5 MANAGING THE HOUSEHOLD'S FINANCE

These variables record only the ID number of the person managing the household's finance therefore no analysis id provided.

PERSONAL INFORMATION

PA010: PROPORTION OF PERSONAL INCOME KEPT SEPARATE FROM THE COMMON HOUSEHOLD BUDGET

Values

- 1 All my personal income
- 2 More than half of my personal income
- 3 About half of my personal income
- 4 Less than half of my personal income
- 5 None
- 6 The respondent has no personal income

Flags

- 1 filled
- 1 not filled
- 3 not selected respondent
- 4 single person household or household with less than two persons aged 16 and above

This question refers to the current situation and is self-assessed by the respondent. This question attempts to capture one aspect of “pooling” – which proportion of personal income is kept separate from the common household budget.

Main results:

The most frequent answers in all countries were 'Less than half of my personal income and 'None' with the values ranging from 4.2% in Spain to 73.9% in France for the former one and from 3.0% in Norway to 66.3% in Croatia in the latter one. Both the categories 'All my personal income' and 'The respondent has no personal income' were chosen by less than 25% of the population in 30 countries.

PA020: ACCESS TO A BANK ACCOUNT

Values

- 1 Yes
- 2 No

Flags

- 1 filled
- 1 not filled
- 3 not selected respondent
- 4 single person household or household with less than two persons aged 16 and above

If the respondent does not have a bank account because he/she does not need it or the respondent does not have access to a bank account because the bank is too far from the respondent's dwelling, or there are no technical facilities to open a bank account code "2" should be used.

Main results:

In 29 countries more than half of the population had access to a bank account. The lowest value was 24.8% in Bulgaria while the highest value was 100% in Denmark.

PA030: DECISION-MAKING ON EVERYDAY SHOPPING

Values

- | | |
|---|-----------------|
| 1 | More me |
| 2 | Balanced |
| 3 | More my partner |

Flags

- 1 filled
- 1 not filled
- 2 respondent is not part of a couple living in the household (RB240_F=-2)
- 3 not selected respondent
- 4 single person household or household with less than two persons aged 16 and above

This variable refers to real decisions that are or were taken by the couple. If certain decisions (i.e. depending on the amount spent) are made by one or other partner, the code 2 – "Balanced" should be used.

Main results:

The category 'Balanced' was most frequent answer with the values ranged from 24.8% in Ireland to 67.9% in Germany. The categories 'More me' and 'More my partner' were similar with the figures ranging from 16.6% in Germany to 44.0% in Poland for 'More me' and from 12.0% in Croatia to 36.6% in Ireland for 'More my partner'.

PA040: DECISION-MAKING ON IMPORTANT EXPENSES TO MAKE FOR THE CHILD(REN)

Values

- | | |
|---|-----------------|
| 1 | More me |
| 2 | Balanced |
| 3 | More my partner |

Flags

- 1 filled
- 1 not filled
- 2 respondent is not part of a couple living in the household (RB240_F=-2) or couple not responsible for the children (grandparents, single parent living with a couple)
- 3 not selected respondent
- 4 single person household, household without any child below 16 or household with less than two persons aged 16 and above

This variable refers to real decisions that are or were taken by the couple. If certain decisions (i.e. depending on the amount spent) are made by one or other partner, the code 2 – "Balanced" should be used. If the respondent does not take any responsibility for the children in the household flag -2 should be chosen.

Main results:

In all countries more than 50% of the population answered 'Balanced'. In all countries the category 'More my partner' was chosen by less than one quarter of the population. As for the category 'More me' the highest values were reported in Slovakia (26.5%) and Iceland (24.2%).

PA050: DECISION-MAKING ON EXPENSIVE PURCHASES OF CONSUMER DURABLES AND FURNITURE

Values

- 1 More me
- 2 Balanced
- 3 More my partner
- 4 Never arisen

Flags

- 1 filled
- 1 not filled
- 2 respondent is not part of a couple living in the household (RB240_F=-2)
- 3 not selected respondent
- 4 single person household or household with less than two persons aged 16 and above

If certain decisions (i.e. depending on the amount spent) are made by one or other partner, the code 2 – "Balanced" should be used.

Main results:

The category 'Balanced' chosen by more than 80.0% of the population in 21 countries was the most frequent answer. For the category 'More me' the figures ranged from 2.5% in Bulgaria to 15.3% in Iceland. Same applies for the category 'More my partner' since its figures ranged from 2.5% in Bulgaria and 15.6% in Ireland with.

The category 'Never arisen' was chosen by less than 10.0% in 29 countries. The exceptions were Latvia (43.8%) and Bulgaria (30.7%).

PA060: DECISION-MAKING ON BORROWING MONEY

Values

- | | |
|---|-----------------|
| 1 | More me |
| 2 | Balanced |
| 3 | More my partner |
| 4 | Never arisen |

Flags

- 1 filled
- 1 not filled
- 2 respondent is not part of a couple living in the household (RB240_F=-2)
- 3 not selected respondent
- 4 single person household or household with less than two persons aged 16 and above

This variable refers to real decisions that are or were taken by the couple. If certain decisions (i.e. depending on the amount borrowed) are made by one or other partner, the code 2 – "Balanced" should be used.

Main results:

The category 'More me' was not very frequent. In all countries except the United Kingdom (16.1%), Iceland (13.1%) and Ireland (11.5%) the values didn't reach 10%. In all countries not more than 15% of the population answered 'More my partner'. The category 'Never arisen' differentiated across countries with the values from 7.3% in Cyprus to 66.2% in Latvia. As for the category 'Balanced' it was the most frequent answer with the values reaching more than 80% in Spain (83.6%), Norway (82.6%) and Luxembourg (80.8%).

PA070: DECISION-MAKING ON USE OF SAVINGS

Values

- | | |
|---|---------------------------------|
| 1 | More me |
| 2 | Balanced |
| 3 | More my partner |
| 4 | We do not have (common) savings |
| 5 | Never arisen |

Flags

- 1 filled
- 1 not filled
- 2 respondent is not part of a couple living in the household (RB240_F=-2)
- 3 not selected respondent
- 4 single person household, household with less than two persons aged 16 and above

This variable refers to real decisions that are or were taken by the couple. If certain decisions (i.e. depending on the amount of savings used) are made by one or other partner, the code 2 –

"Balanced" should be used. Code 5 (Never arisen) should be used where common savings exist but a decision on the use of these savings has never been necessary.

Main results:

In 28 countries more than the half of the population selected the category 'Balanced' with the highest values 87.1% in Norway and 85.2% in Spain. The category 'More my partner' was chosen by less than 15% of population in all countries. The figures for the category 'We do not have (common) savings' ranged from 0.0% in Ireland to 56.5% in Latvia. Both the first 'More me' and the last 'Never arisen' categories were not very popular with the highest values 16.1% in Ireland for the former and 18.7% in Greece for the latter one.

PA080: DECISION-MAKING – GENERAL

Values	
1	More me
2	Balanced
3	More my partner
Flags	
1 filled	
-1 not filled	
-2 respondent is not part of a couple living in the household (RB240_F=-2)	
-3 not selected respondent	
-4 single person household or household with less than two persons aged 16 and above	

This question refers to the current situation and should entirely reflect the respondent's self-perception. If certain decisions are made by one or other partner, the code 2 – "Balanced" should be used.

Main results:

About the results, in only 4 countries more than 20% of the population thought that they were' on the whole, more likely to have the last word when taking important decisions (Iceland – 24.0%, France – 22.8%, Finland – 22.3%, Sweden – 20.3%).

The most frequent category was 'Balanced' with the highest values 94.6% in Malta, 93.7% in Latvia and Spain and 93.6% in Czech Republic. There were slightly bigger discrepancies across the countries with figures from 2.1% in Malta to 19.7% in Iceland regarding the category 'More my partner', nevertheless it was chosen by less than 20% of the respondents in all countries.

PA090: ABILITY TO DECIDE ABOUT EXPENSES FOR YOUR OWN PERSONAL CONSUMPTION, YOUR LEISURE ACTIVITIES AND HOBBIES

Values

- 1 Yes, always or almost always
- 2 Yes, sometimes
- 3 Never or almost never

Flags

- 1 filled
- 1 not filled
- 3 not selected respondent
- 4 single person household or household with less than two persons aged 16 and above

The question asks whether respondents feel free to spend money on themselves irrespective of whether such expenses are actually necessary or not and irrespective of whether they can afford it or not.

Main results:

The most frequent category 'Yes always or almost always' was chosen by more than the half of the population in 29 countries and had figures starting from 30.3% in Romania to 94.6% in Austria. In all countries the values for the category 'yes, sometimes' didn't reach 50.0%. The values for the last category 'Never or almost never' ranged from 0.7% in Germany to 24.8% in Romania.

PA100: ABILITY TO DECIDE ABOUT PURCHASES FOR CHILDREN'S NEEDS (INCLUDING GIVING THEM POCKET MONEY)

Values

- 1 Yes, always or almost always
- 2 Yes, sometimes
- 3 Never or almost never

Flags

- 1 filled
- 1 not filled
- 2 siblings (aged 16+) of children below 16 who are not the only persons responsible for them
- 3 not selected respondent
- 4 single person household, household without any child below 16 or household with less than two persons aged 16 and above

The question asks whether respondents feel free to spend money on children living in the household irrespective of whether such expenses are actually necessary or not and irrespective of whether they can afford it or not.

Main results:

In 11 countries more than 80% of the population selected the category 'Yes always or almost always' while in Slovakia and Hungary it was the case for less than 40.0% of the population with the lowest values 39.3% and 35.6% respectively. As for category 'Never or almost never' the figures didn't vary significantly across countries with the values ranging from 1.5% in Austria to 18.1% in Hungary. In addition, this variable was not collected in Sweden.

PA110: LENGTH OF COHABITATION OF THE PARTNERS

Values

0-99 Number of years

Flags

- 1 filled
- 1 not filled
- 2 n/a (no partner or partner is not a household member)
- 3 not selected respondent
- 4 single person household or household with less than two persons aged 16 and above

Main results:

The average length of the cohabitation of partners differed between 17.2 years in the United Kingdom and 29.3 years in Croatia. In 9 countries the figures were above 25 years. It should be remarked that this variable is strictly related to age.

OPTIONAL PA120: TIME SPENT COMMUTING TO AND FROM WORK

Values

0-99 hours per week

Flags

- 1 filled
- 1 not filled
- 2 n/a (PL031≠1, 2, 3 or 4)
- 3 not selected respondent
- 4 single person household or household with less than two persons aged 16 and above
- 5 not asked

This question refers to the current situation and the sum of all jobs. This question is meant to complement the information in PL060 and PL100 to determine the total time spent on paid work. In general, the time taken between the place of accommodation, even if a hotel or bedsit

(relevant e.g. for persons who commute for the whole working week) and the place of work as well as between different jobs, but not different work places should be considered.

Main results:

About the results, as this variable was optional 19 countries did not deliver data to Eurostat (Austria, Switzerland, Cyprus, Czech Republic, Denmark, Estonia, Spain, Finland, France, Croatia, Hungary, Iceland, Italy, Latvia, Norway, Poland, Sweden, Slovakia, the United Kingdom). Among the countries the average time spent commuting to and from work per week ranged from 3.8 hours in Lithuania and Portugal to 6.9 hours in Bulgaria.

OPTIONAL PA130: TIME SPENT ON LEISURE

Values 0-99 hours per week
Flags 1 filled -1 not filled -3 not selected respondent -4 single person household or household with less than two persons aged 16 and above -5 not asked

Main results:

This question was optional and 18 countries did not deliver data to Eurostat (Austria, Switzerland, Cyprus, Czech Republic, Denmark, Estonia, Spain, Finland, France, Croatia, Hungary, Iceland, Lithuania, Latvia, Norway, Poland, Sweden and the United Kingdom). In all countries that filled in this variable the average time spent on leisure per week was below 25 hours.

OPTIONAL PA140: TIME SPENT ON HOUSEHOLD WORK, CHILD CARE AND CARE FOR OTHER DEPENDANTS

Values 0-99 hours per week
Flags 1 filled -1 not filled -3 not selected respondent -4 single person household or household with less than two persons aged 16 and above -5 not asked

This question refers to the current situation and the main activity¹ and exclusively to unpaid activities.

¹ A person might do two activities at the same time, for example ironing shirts and listening to the radio or watching the children and cooking. The respondent has to assess the main activity him or herself.

Main results:

This question was optional and as in the previous variable 18 countries did not deliver data to Eurostat (Austria, Switzerland, Cyprus, Czech Republic, Denmark, Estonia, Spain, Finland, France, Croatia, Hungary, Iceland, Lithuania, Latvia, Norway, Poland, Sweden, the United Kingdom). The average values for the time spent on household work, child care and care for other dependants per week ranged from 14.7 hours in Greece to 20.0 hours in Romania.

OPTIONAL PA150: MONEY SPENT PER MONTH FOR OWN USE

Values

0+ national currency per month

Flags

- 1 filled
- 1 not filled
- 3 not selected respondent
- 4 single person household or household with less than two persons aged 16 and above
- 5 not asked

The question does not seek to know what is spent on the respondent by the household, but rather what the individual spends on himself.

Main results:

As this variable is optional 19 countries (Switzerland, Cyprus, Czech Republic, Denmark, Estonia, Spain, Finland, France, Croatia, Hungary, Iceland, Italy, Lithuania, the Netherlands, Norway, Poland, Portugal, Sweden, the United Kingdom) did not deliver corresponding micro-data to Eurostat. The average amount of the money that people spent monthly on themselves differentiated significantly across countries ranging from 33.0 € in Latvia to 256.8 € in Luxembourg.

OPTIONAL PA160: MONEY SPENT PER MONTH FOR CHILDREN BY THE INTERVIEWED PERSON

Values

0+ national currency per month

Flags

- 1 filled
- 1 not filled
- 3 not selected respondent
- 4 single person household or no children below 16 in the household or household with less than two persons aged 16 and above
- 5 not asked

The question does not seek to know what is spent on the children by the household, but rather what the individual spends on the children, also in comparison to personal expenditures.

Main results:

21 countries did not deliver data regarding this variable as it was an optional one (Austria, Switzerland, Cyprus, Czech Republic, Germany, Denmark, Estonia, Spain, Finland, France, Croatia, Hungary, Iceland, Italy, Lithuania, the Netherlands, Norway, Poland, Portugal, Sweden, The United Kingdom). There were big discrepancies among countries that filled in this variable with the values starting from 26.1 € in Latvia to 271.9 € in Luxembourg.

4. Analysis of the flags

In this section the flag variables used in the 2010 Module are analysed. Several values were used in this module for flag variables: flag "1" (filled value), flag "-1" (missing value), flags "-2" and "-4" (not applicable), flag "-3" (not selected respondent) and "-5" (not asked). In order to carry out the analysis of the flags, we use data that can be found in Annex 2: 'Frequencies of flags 1, -1, -2, -3, -4 and -5 for each variable by country.

4.1 Flag 'Not applicable'

4.11 Flag -2

Flag "-2" is used with different meanings:

- *Not applicable due to the fact that there is no person inside the household involved in common finances or no common household finances*

The variable concerned is: HA030. It was used by all countries and the figures for this flag ranged from 1.1% in Portugal to 42.4 % in Sweden.

- *Not applicable due to the fact that there are no person inside the household involved in common finances or no common household finances or less than 2(HA040)/3(HA050)/4(HA060)/5(HA070) persons inside the household involved in the management of the household's finances.*

The variables concerned are: HA040, HA050, HA060, and HA070. It was used in all countries and the main conclusions from the analysis are:

- *HA040*: The values varied between 26.2% in Slovakia and 34.0% in Poland to 81.3% in Ireland and 86.4% in the United Kingdom.
- *HA050*: The figures were quite high ranging between 79.1% in Slovakia and 99.8% in Ireland. The only exception was Sweden with the value 42.4%.
- *HA060*: All of the countries reported very high values ranging from 90.8% in Slovakia to 100% in Finland with the exception of Sweden with the value 42.4%.
- *HA070*: The highest figures were reported for this flag, for which 17 countries had value 100% and rest of the countries had value above 97%. Sweden reported the lowest value 42.4%.

Majority of the countries used this flag incorrectly combining "not applicable"(HA020 ≠ 1, 2) and "missing".

- *Not applicable as the respondent is not part of a couple living in the household*

The variables concerned are: PA030, PA050 - PA080. It was used in 30 countries.

The frequencies varied from 4.0% in Denmark to 37.3% in Slovakia.

Inconsistencies

Malta: 2716 cases (PA030), 2719 cases (PA050, PA070, PA080) and 2715 cases (PA060)

Austria: Flag "-2" not used for PA030

Explanation: People that have no partner in the household were registered with flag -4 "single person households or less than 2 persons in the household aged 16+).

Ireland: Flag "-2" not used for PA030

- *Not applicable as the respondent is not part of a couple or couple not responsible for children aged below 16*

The variable concerned is: PA040.

The values for this flag differed from very low in Denmark (0.9 %) and the Netherlands (1.2 %) to very high in Luxembourg (56.6 %), Malta (62.2 %), Romania (65.3 %) and Slovakia (75.0 %).

Big differences across countries can be caused by the different order of using flag -2 and -4.

- *Not applicable due to the fact that respondent is a sibling of children below 16 who is not the only person responsible for them*

The variable concerned is: PA100. It was used in 21 countries.

For the countries that used this flag values were not very frequent and varied from 1.1% in Norway to 15.0% in Iceland, 19.8% in Sweden and 58.8% in Greece.

In 10 countries (Belgium, Denmark, Spain, Hungary, Portugal, Romania, Slovakia, Finland, the United Kingdom and Croatia) flag "-2" was not used for PA100. This situation was caused by the fact that flag "-2" for the variable PA100 was not included in the Commission Regulation as regards 2010 SILC module.

Countries' explanations

Denmark: all cases that should be classified as flag "-2" were, by mistake, registered with other flags.

- *Not applicable due to the fact that respondent has no partner or has a partner who is not a household member*

The variable concerned is: PA110.

The frequencies for this flag differed from 4.0% in Denmark, 4.5% in the Netherlands and 4.8% in Finland to 37.3% in Slovakia.

/>\ Inconsistencies

The meaning of this flag is exactly the same as of the flag "-2" used in the variables PA030, PA050 - PA080 (however in the guidelines different wording was proposed). Nevertheless in some countries the values of the flag "-2" for all above mentioned variables were different:

Ireland: PL030 no flag "-2"; PL110 - 28.9 %

Austria: PL030 no flag "-2"; PL110 – 18.1 %

- *Not applicable as respondent has no job as employee or self-employed*

The variable concerned is: PA120. This variable was optional and was collected by 12 countries. The flag "-2" was filled in by 11 countries.

The figures ranged from 13.6% in the Netherlands to 48.4% in Portugal and Greece and 50.5% in Malta.

4.12 Flag -4

In this section the flag -4, which is used with two different meanings, is analysed.

- *Not applicable due to the fact that household with single person or less than two persons aged 16 and above*

The variables concerned are: HA010 and HA020 at household level; PA010, PA020, PA030, PA050, PA060, PA070, PA080, PA090, PA110, PA120, PA130, PA140 and PA150 at personal level. It was used in all countries.

The main conclusions from the analysis are:

- HA010- HA020: the frequencies varied from 12.4 % in Slovenia to 36.5 % in Austria.

- PA010 – PA150: the values differed between 4.6 % in Slovenia and 52.5 % in Croatia.

/>\ Inconsistencies

Malta: 776 cases (HA010); 773 cases (HA020);

Luxembourg: 1188 cases (PA010– PA110, PA130– PA150) and 646 cases (PA120);

Croatia: 4467 cases (PA010– PA020, PA090) and 999 cases (PA030– PA080, PA110);

Austria: 3802 cases (PA010– PA020), 5291 cases (PA030), 3837 cases (PA050, PA070– PA080), 3863 cases (PA060), 2258 cases (PA110) and 3803 cases (PA090, PA150)

Explanation: High numbers of the flag -4 are caused by the fact that proxy interviews were registered there and not with flag -1;

Norway: 1382 cases (PA010– PA020, PA090) and no flag (PA030– PA080, PA110);

Ireland: In addition, some values reported for optional variable PA120 which was not actually filled in by Ireland.

- *Not applicable due to the fact that household with single person or less than two persons aged 16 and above or without any child below 16*

The variables concerned are: PA040, PA100 and PA160. It was used in all countries.

The figures ranged from 7.9 % in Slovakia and 11.6 % in Luxembourg to 77.0 % in Austria and 78.2 % in Germany.

!\ Inconsistencies

Bulgaria: 6417 cases (PA040), 10752 cases (PA100) and 10747 cases (PA160);

Ireland: 1620 cases (PA040), 5948 cases (PA100 and PA160);

Spain: 14754 cases (PA040), 21899 cases (PA100);

Italy: 5543 cases (PA040), 29903 cases (PA100);

Malta: 781 cases (PA040), 6157 cases (PA100) and 6159 cases (PA160);

Austria: 8852 cases (PA040), 8813 cases (PA100);

Poland: 11539 cases (PA040), 15268 cases (PA100);

Romania: 2817 cases (PA040), 13368 cases (PA100);

Slovenia: 4849 cases (PA040), 6884 cases (PA100 and PA160);

Slovakia: 1115 cases (PA040), 11213 cases (PA100 and PA160);

Finland: 7636 cases (PA040), 8398 cases (PA100);

Sweden: 5363 cases (PA040), 2780 cases (PA100);

Iceland: 593 cases (PA040), 1093 cases (PA100);

Norway: 1939 cases (PA040), 3652 cases (PA100);

Croatia: 6010 cases (PA040), 6555 cases (PA100);

4.2 Flag "-3" (Not selected respondent)

Flag "-3" is to be used by the register countries when the respondent is not a selected respondent.

The concerned variables are: PA010 – PA160. It was used by 8 countries which are register and non-register countries.

The frequencies for this flag varied from 13.8% in Ireland to 62.9% in Slovenia.

/>\ Inconsistencies/mistakes

Ireland: 1213 cases (PA040 – PA080); 957 cases (PA110); no flag (for remaining variables); Ireland is non-register country;

Denmark: 5877 cases (PA010 – PA030, PA050 – PA090 and PA110), 2114 cases (PA040 and PA100).

4.3 Flag "-5" (Not answered)

The variables concerned are: PA120, PA130, PA140, PA150 and PA160. It was used in 10 countries.

It's supposed to be that the countries which filled in the above mentioned variables have no value and those countries which did not fill in those variables have a value of 100 % for this flag. However, there were some countries which did not fill in those variables and also did not use the flag -5. They used another kind of flag "." which is not defined.

The main conclusions from the analysis are:

- PA120, PA130: 20 countries did not fill in those variables, 8 out of 20 countries have a value of 100 % for flag-5 and 9 countries have a value of 100 % for ".". France reported 99.2 % for flag -5 and 0.8 % for ".". Finland reported 50.7 % for flag -5 and 49.7 % for the flag "-3" not selected respondent, while Ireland reported 36.2 % for ".". Although Bulgaria filled in this variable, it reported 0.05 % for ".".
- PA140: 18 countries did not fill in this variable, 6 out of 18 countries have a value of 100 % and 10 countries have a value of 100 % for ".". France reported 99.2 % for flag -5 and 0.8 % for "." and Finland reported 50.7 % for flag -5 and 49.7 % for the flag "-3" not selected respondent.
- PA150: 19 countries did not fill in this variable, 7 out of 19 countries have a value of 100 % and 10 countries have a value of 100 % for ".". France reported 99.2 % for flag -5 and 0.8 % for "." and Finland reported 50.7 % for flag -5 and 49.7 % for the flag "-3" not selected respondent.
- PA160: 21 countries did not fill in this variable, 9 out of 21 countries have a value of 100 % and 10 countries have a value of 100 % for ".". France reported 99.2 % for flag -5 and 0.8 % for "." and Finland reported 50.7 % for flag -5 and 49.7 % for the flag "-3" not selected respondent . Bulgaria reported 0.03 % for "." although it filled in this variable.

4.4 Flag "-1"(Missing)

This section analyses the flag -1 which is to be used when the compulsory variable is not filled. The results of this analysis will allow us to determine which variables were more difficult to implement by countries.

➤ **Household information asked at household level**

In general for the set of variables HA010 – HA070 missing values were not very frequent. In the majority of countries it did not exceed 2 %. The country with highest values of flag -1 for all of the variables except HA030 was Sweden – ranging from 14.6 % to 57.6% of missing. As for the variable HA030 Portugal (23.7 %) and Malta (18.6 %) have the highest values. Since all of them have similar values none of the variables came to the forefront by taking more missing values.

% of flag -1	Number of countries	Countries
HA010: Regime of household finances

Between 7 and 20%		
Above 20%	1	SE

➤ **Personal information asked at personal level**

Missing values for the set of compulsory variables PA010 – PA110 did not exceed 7 % in majority of countries. There were five countries with the missing values exceeding 20 % - Croatia (21.4 %), Belgium (26.8 %), Ireland, France (both around 29 %) and the United Kingdom (32.9 %) in case of some particular variables. As for the missing values of optional variables PA120-PA160 they were not very frequent. Most of the countries had values less than 7 %. The only country with highest value of flag -1 for the variable PA120 was Ireland (45.34 %).

Countries comments:

General comments: Many missing values were caused by the fact that proxy interviews were not allowed for 2010 module questions. Moreover many respondents refused to answer questions related to household finances;

The United Kingdom: High number of missing values for the variable PA110 is due to an error. In the UK questionnaire data on relationships are collected and they were used to construct this variable. This information is collected only from respondents aged between 16 and 59 and is not asked by proxy;

France: High number of missing values for the variables collected at personal level is due to the fact that 1/3 of the individual questionnaires were proxy and module questions were not asked by proxy. Moreover module questions in 2010 were not compulsory in France.

Belgium: High number of missing values for the variable PA050 is due to the routing mistake in the questionnaire.

Croatia: High number of missing values for the variables collected at personal level is due to the high number of proxy interviews and personal non-response rate.

% of flag -1	Number of countries	Countries

5. Analysis of the questionnaires

In this section the analysis of different questions used by some countries to construct the variables is presented. The questionnaires analysed were from the following countries: Austria, Bulgaria, Cyprus, Czech Republic, Estonia, France, Germany, Ireland, Italy, Latvia, Luxembourg, Poland, Switzerland, the United Kingdom and the Netherlands.

The purpose of the analysis of the questionnaires is the detection of some possible lack of comparability among the national questionnaires and also the detection of problems related to data quality.

Moreover, it should be mentioned that Eurostat strongly recommends countries to follow the corresponding questionnaire in order to gain comparability across countries but this is not legal binding.

The main findings of the analysis are:

HA010: Regime of household finances

Eurostat: How are the incomes you receive in your household dealt with?

Values:

- 1 We treat all incomes as common resources
- 2 We treat some incomes as common resources and the rest as private resources
- 3 We treat all incomes as private resources of the person receiving it
- 4 We do not receive any income in the household

Countries:

1) The same wording: Germany, Poland, Cyprus, Czech Republic, Switzerland, Italy, Luxembourg, Germany and Austria

2) Slightly different wording:

- How do you usually perceive (i.e. consider, regard) the income in your household? and the category 1. We believe/regard all income to be common resources. : **Bulgaria**
- How does your household use the income? and the categories: 2. We treat some incomes as common resources and the rest at our own discretion / 3. Each HH member who has private income uses it at their own discretion. / 4. We have no income in our household: **Latvia**
- How do you deal with the incomes you receive in your household? and the categories: 1. We put all the money together / 2. We keep all the money separate / 3. We put some of the money together and keep the rest separate / 4. We do not receive any income in the household: **Ireland**

- How is the income received in your household dealt with? : **the Netherlands**
- Modality 2: ...private resource from the person receiving it: **Germany**
- In modality 1: it is specified "whether the common resources are on a common account or not" : **Austria**

3) Different meaning/formulation:

- How do you deal with the incomes you receive in your household? Do you...: 1 put all the money together? / 2 put some of the money together and keep the rest separate? /3 keep all the money separate? **Estonia**
- Concerning incomes, which following sentence seems best correspond to the organisation of your household? : 1 All incomes are put in common, and are used for common expenses as well as personal expenses / 2 any of us keep a part of his income for common expenses and spend the rest as he want / 3 one of us take over all common expenses / 4 You don't put your own income in common at all, but you share the expenses / 5 N/A the HH do not have any income: **France**
- Which of the following best describes how the incomes in your household are dealt with?: and the categories: 1. We share all incomes / 2. We share some but keep some as private to the person receiving it / 3. All incomes are kept private to the person receiving it / 4. We do not receive any income: **the United Kingdom**

4) Other remarks:

- **Estonia** has another question before HAXXX variables for the interviewer asking if at least one person in the household earns some sort of income. If the answer is "no" then the HA variables weren't asked.
- **Ireland** uses a different order of answer modalities.

HA020: Management of common household finances

Eurostat: Who is responsible for managing the common household finances, i.e. keeping track of expenses, bills, loans and incomes concerning the household as a whole?

Values

- 1 One or more household members
- 2 At least one person inside and at least one person outside the household is involved in managing the common household finances
- 3 No person inside the household and at least one person outside the household is involved in managing the common household finances
- 4 There are no common household finances

Countries:

1) The same wording: Bulgaria, Poland, the Netherlands, Cyprus, Czech Republic, Switzerland, Italy and Luxembourg, Austria and the United Kingdom

2) Slightly different wording:

- Who is in charge of dealing with the common household finances? Is it... and the categories: 1 One or more household members / 2 at least one person inside the household and at least one person outside the household / 3 only someone from outside the household? **Estonia**

- Who manages the common finances in the household (that is controls expenses, accounts, payment of loans and common income in the household)? In the common household finances management the following people are involved: the values are the same...: **Latvia**
- Would you say that the management of the household budget (holding accounts, pay bills, loans) is done by: and the categories: 1 same + (excluding any person outside the household) / 2 almost the same + (accountant, tutor, social assistant...) / one ore more person outside the household (excluding any person from the household) / 4 not asked: **France**

3) Other remarks:

- HA020 up to HA070 are part of a "questioning block" that is not structured as the model proposed but leads to the same answers **Austria**
- The question is organized as a filter following the Module guidelines. If the interviewed person answers 1 or 2 then he is asked an additional question: How many household members manage the common resources? And if, yes, then he is asked question HA030 **Latvia**
- Only 3 categories are used instead of four: 1. One or more household members / Another person outside the household is involved in managing the household's finances / 3. There are no common household's finances: **Ireland**
- Examples (i.e. keeping track of expenses, bills,...) not used in the question **Germany**

HA030: Identification number of person 1 managing the household's finances
HA030: Identification number of person 2 managing the household's finances
HA040: Identification number of person 3 managing the household's finances
HA050: Identification number of person 4 managing the household's finances
HA060: Identification number of person 5 managing the household's finances
HA070: Identification number of person 6 managing the household's finances

Eurostat: (HA030-HA070):

If HA020=1: Which household members are normally responsible for managing the household finances?

If HA020=2: Of the people within your household, who is normally responsible for managing the household finances?

Values

Personal identification number of person 1

Countries:

1) The same wording: Bulgaria, Germany, Austria, Latvia (+name of the person), Poland, Czech Republic (+first name of the person), Ireland, the United Kingdom, Cyprus, France, the Netherlands, Estonia and Luxembourg

PA010: Proportion of personal income kept separate from the common household budget

Eurostat: What proportion of your personal income do you keep separate from the common household budget?

Values

- 1 All my personal income
- 2 More than half of my personal income
- 3 About half of my personal income
- 4 Less than half of my personal income
- 5 None
- 6 The respondent has no personal income

Countries:

1) The same wording: the Netherlands, Cyprus, Switzerland, Italy, Germany and Luxembourg

2) Slightly different wording

- What part of your personal income do you keep separate from the common household budget? (The money need not be on a separate account, the separation may be mental)

Estonia

- What is the relative proportion of your personal income which you usually keep separate from...? **Bulgaria**

- "Only keep separate" is express **as keep for your personal disposal Poland**

- The fifth modality was translated "all my income goes to common household budget" by **Czech Republic** and "give all your income into the common budget?" by **Estonia**.

- What proportion of your personal income you do NOT include in the common HH budget and allocate to yourself only? **Latvia**

3) Different meaning/formulation

- Modalities: 1 a small part/ 2 less than a half /3 around a half /4 more than a half / 5 all or almost **France**

- Which part of your personal income is transferred to the common HH budget? **Austria**

- Which proportion of your personal income is pooled for common household expenses or savings and for other household member's expenses or savings? **Ireland**

4) Other remarks

- The sixth modality was not used by **Ireland**

- PA010 was asked together with: *Do you have a personal income?1 Yes/ 2No* by **the United Kingdom** and **Estonia and Latvia**

- Question built in 2 steps: Usually could you use part of your personal income (salaries, pensions, unemployment benefits, financial income, alimonies) Values: 1 yes / 2 no / 3 no personal income; (if 1) Would you say that among your personal income, you use for yourself **France**

PA020: Access to a bank account
--

Eurostat: Do you have access, meaning the right to withdraw funds for personal use, to a bank account, including accounts not held in your name?

Values: 1 Yes / 2 No

Countries:

1) The same wording: Austria, the Netherlands, Cyprus, Czech Republic, Switzerland, Italy and Luxembourg

2) Slightly different wording

- Do you have a bank account? **Estonia**
- Do you have the right to withdraw money for yourself from bank accounts, including those not held in your name? **Bulgaria**
- 'including accounts not held in your name' – is deleted from the question, only left as instructions to the interviewer **Latvia**
- Do you have personally access to a bank account? **Germany**
- Do you have access, meaning the right to withdraw funds for personal use, to a bank account, either yours or another household member's? **Ireland**

3) Other remarks

Estonia, Poland, France and the United Kingdom use two-block question, asking first whether the respondent has a bank account or not and for "no" answer asking whether "the respondent has the right to withdraw money from someone else's bank account."

Ireland asked for two additional questions: Does anyone else in the household have access to this account? 1. Yes / 2. No How many more people in the household have access to this bank account?

PA030: Decision-making on everyday shopping

Eurostat: Thinking of you and your spouse or partner, who is more likely to take decisions on everyday shopping?

Values: 1 More me / 2 Balanced /3 More my partner

Countries:

1) The same wording: Poland, the Netherlands, Cyprus, Czech Republic, Italy and Luxembourg

2) Slightly different wording

- Who in the HH most often takes decisions on everyday shopping? **Bulgaria**
- Who in your partnership takes decisions on everyday shopping? **Germany**
- How do you and your spouse/partner take decisions concerning specific expenses? Which one of you makes the final decision with regards to everyday shopping? **Latvia**
- Thinking of you and your spouse/partner, who is more likely to make decisions on everyday shopping? The **United Kingdom**
- Who in your couple is generally more likely to take decisions on everyday shopping **Ireland**
- Who usually takes the decisions concerning everyday shopping? **Switzerland**
- Is the person more likely to make everyday shopping decisions for the household.. **Estonia**
- questions PA020 to PA070 are grouped: In your couple who in general usually takes the decisions: for everyday shopping **France**
- modalities 2 my partner, 3 both of us **Austria**

- modalities: 1 You/ 2 Your partner / 3 the decision-making is balanced? **Estonia**

3) Other remarks

- Fourth modalities used by the **United Kingdom** (Spontaneous – Someone outside the household), **Switzerland** (other situation) and **France** (4 more another member of your hh)
- Different order among the answer modalities used by the **Estonia**
- The **United Kingdom** asked PA030 after PA050.
- **Ireland** has added one question before this variable asking: Are you part of a couple in this household, where both members of the couple are 16 years of age or over? 1. Yes / 2. No. If "yes" then the variable was asked.

PA040: Decision-making on important expenses to make for the child(ren)
--

Eurostat: Thinking of you and your spouse or partner, who is more likely to take decisions on important expenses to make for the child(ren) in your household?

Values: 1 More me /2 Balanced /3 More my partner

Countries:

1) The same wording: the Netherlands, Cyprus, Italy and Luxembourg

2) Slightly different wording

- Who most often takes decisions on important expenses concerning the child/children in the HH? **Bulgaria**
- Who in your partnership takes decisions on important expenses for your child(ren) under 16? **Germany**
- How do you and your spouse/partner take decisions concerning important expenses on children younger than 16? Which one of you makes the final decision with regards to this kind of expenses? **Latvia**
- Is the person more likely to make decisions about important expenses on children under 16... with modalities:1 You / 2 Your partner /3 the decision-making is balanced? **Estonia**
- Thinking of you and your spouse/partner, who is more likely to make decisions on important expenses with regards to the child(ren) aged under16 in your household? the **United Kingdom**
- Who in your couple is generally more likely to take decisions on important expenses to make for the child(ren)? **Ireland**
- In your couple who in general usually takes the decisions: for important expenses concerning children (aged 15 or less) from the household **France**
- Who usually takes decisions on.... **Switzerland**

3) Other remarks

- Fourth modality is asked by **Poland**(never arisen), **Czech Republic**(never arisen), the **Netherlands** (same household or couple is not responsible for the children (eg. grandparents, single parents living with a couple) or no children below 16 years of age live in the household.), **Cyprus** (*The couple is not responsible for the child(ren)*,

Switzerland (no responsibility for children in the household), **France** (more another member of your household)

PA050: Decision-making on expensive purchases of consumer durables and furniture

Eurostat: Thinking of you and your spouse or partner, who is more likely to take decisions on expensive purchases of consumer durables and furniture?

Values: 1 More me / 2 Balanced / 3 More my partner /4 Never arisen

Countries:

1) The same wording: Poland, the Netherlands and Cyprus

2) Slightly different wording

- Who in the HH most often takes decisions on buying expensive durables and furniture? **Bulgaria**
- "more expensive consumer durables" added in the question, **Germany**
- The question is organised as a filter and an additional question is asked: *Did you or your spouse/partner have to make a decision concerning....*: **Latvia**
- Thinking of you and your spouse/partner, who is more likely to make decisions on expensive purchases of consumer durables and furniture? The **United Kingdom**
- Who in your couple is generally more likely to take decisions on expensive purchases of consumer durables and furniture? **Ireland**
- Thinking of you and your spouse or partner, who is more likely to take decisions on expensive purchases of consumer durables (fridge, wash machine, TV) for the household. **Czech Republic**
- Who usually takes decisions on expensive purchases of consumer durables and goods such as fridge, washing machine, furniture, house appliances etc? **Switzerland**
- added as example buying car and house appliances **Italy**
- Is the person more likely to make decisions about purchasing expensive consumer durables (fridge, TV etc) for the family or oneself... ,with different answer categories: 1 You / 2 Your partner /3 the decision-making is balanced / 4 you have never had the need to purchase consumer durables? **Estonia**
- In your couple who in general usually takes the decisions: for important expenses concerning furniture or consumer durables (TV set, fridge..) and different modality 4 more another member of your household **France**
- "do not include expenses concerning professional furniture" added in the question **Luxembourg**
- Different answer categories : 2 my partner, 3 both of us **Austria**

PA060: Decision-making on borrowing money

Eurostat: Thinking of you and your spouse or partner, who is more likely to take decisions on borrowing money? (This includes decisions on mortgages and loans.)

Values: 1 More me / 2 Balanced / 3 More my partner /4 Never arisen

Countries:

1) The same wording: Poland, Czech Republic, the Netherlands, Italy

2) Slightly different wording

- slightly different explanation in the parenthesis: This includes decisions on mortgages and purchasing goods with the help of hire purchase instalments **Cyprus**
- Who in the HH most often takes decisions on taking a loan or credits? **Bulgaria**
- The question is organised as a filter and an additional question is asked: Did you or your spouse/partner have to make a decision concerning....: **Latvia**
- Thinking of you and your spouse/partner, who is more likely to make decisions on borrowing money such as mortgages or loans? The **United Kingdom**
- Who in your couple is generally more likely to take decisions on borrowing money? **Ireland**
- Who usually takes decisions on.... **Switzerland**
- Is the person more likely to make decisions about taking a loan for the household (from a bank or acquaintances)... ; and different answer categories: 1 You /2 Your partner /3 the decision-making is balanced/ 4 you have never had the need to borrow jointly? **Estonia**
- In your couple who in general usually takes the decisions: to borrow money; and different modality 4 more another member of your household **France**
- "do not include money borrowed for professional activities" added in the question **Luxembourg**
- Different answer categories : Value 2 my partner, Value 3 both of us **Austria**

3) Other remarks

Question is about the decision of taking loans **Germany**

PA070: Decision-making on use of savings

Eurostat: Thinking of you and your spouse or partner, who is more likely to take decisions on the use of savings?

Values: 1 More me / 2 Balanced / 3 More my partner /4 We do not have (common) savings / 5 Never arisen

Countries:

1) The same wording: Germany, the Netherlands, Cyprus and Luxembourg

2) Slightly different wording

- Who in the HH most often takes decisions related to the use and spending of your savings? **Bulgaria**
- Thinking of you and your spouse/partner, who is more likely to make decisions on the use of joint savings? **United Kingdom**
- Who in your couple is generally more likely to take decisions on saving money? **Ireland**
- Who usually takes decisions ... **Switzerland**
- Is the person more likely to make decisions about using mutual savings ..., with the modalities: 1 You /2 Your partner / 3 the decision-making is balanced / 4 You have no mutual savings / 5 you have never had the need to use mutual savings? **Estonia**

- In your couple who in general usually takes the decisions: on use of savings; and the modality 4 never arisen not asked **France**
- Modalities: 1 More me / 2 Balanced/ 3 More my partner / 4 Never arisen /5 We do not have savings **Poland**
- Modalities: 1 More me/ 2 Balanced/ 3 More my partner/4 Never arisen /5 We do not have savings **Czech Republic**
- Modalities: 2 my partner, 3 both of us, 4 we do not have any savings **Austria**
- The modality "4" was not used the **United Kingdom**
- Modality 5: Up to now, no need to use savings **Switzerland**
- Question referred to common savings **Italy**

3) Other remarks

Two-step question: Do you have/have you ever had earlier common savings with your spouse/partner? If yes -> Did you have to take a decision concerning the use of the common savings? If yes -> PA070 is asked (**Latvia**); and Do you and your partner have any savings? 1. Yes / 2. No Thinking of you and your spouse/partner, who is more likely to make decisions on the use of joint savings? (**the United Kingdom**)

PA080: Decision-making – general

Eurostat: Thinking of you and your spouse or partner who is, on the whole, more likely to have the last word when taking important decisions? (choice see values)

Values: 1 More me / 2 Balanced / 3 More my partner

Countries:

1) The same wording: Poland, Czech Republic, Latvia, the Netherlands, Cyprus, Italy, France and Luxembourg

2) Slightly different wording

- Who in the HH most often takes important decisions concerning everybody?(+ examples given: marriage, birth/adoption of a child, job related issues, change of accommodation, immigration, others) **Bulgaria**
- Question: Who in your hh in general takes the decisions? **Germany**
- Who in your couple, on the whole, is more likely to have the last word when taking important decisions, not just financial ones? **Ireland**
- the only difference concerns the verb spend: allocate is used instead **Latvia**
- Who usually has the last word when taking important decisions such as holiday destination, moving house, having children? **Switzerland**
- When making important decisions, is the final decision usually more likely to be **Estonia**
- Different answer category 2 my partner and 3 both of us **Austria**
- Different answer category 4 More another household member **France**

PA090: Ability to decide about expenses for your own personal consumption, your leisure activities and hobbies

Eurostat: Do you feel free (i.e. without asking the permission of other household members) to spend money on yourself for your personal consumption, your leisure activities and hobbies?

Values: 1 Yes, always or almost always / 2 Yes, sometimes / 3 Never or almost never

Countries:

1) The same wording: Poland, the Netherlands, Cyprus, Italy and Luxembourg

2) Slightly different wording:

- Can you (without asking for permission other HH members) spend money for your personal consumption, to amuse yourself (i.e. entertainment), hobbies? **Bulgaria**
- Question does not contain (i.e. without asking the permission of other household members) but gives as examples alcoholic beverages and tobacco. **Germany**
- the only difference concerns the verb spend: allocate is used instead; the issue of spending money on food for the household should not be taken into account **Latvia**
- "Can you freely decide to spend money..." (there is no mention to feel free) **Austria**
- Do you feel free to spend money, without asking permission of other household members, on purchases just for yourself including hobbies and leisure? **United Kingdom**
- Apart from regular expenses, do you feel free to spend money on yourself without asking other members of your household for your personal consumption, leisure and hobbies? Values: Yes, always or almost always / 2. Yes, but only when I consider the price to be reasonable / 3. Never or almost never (except for purchases of minor importance) / 4. Such expenses are not wanted/needed **Ireland**
- Do you feel free to spend money on yourself for your personal needs (e.g. cloths, shoes, hobbies, sport activities, tickets to cinema, books etc.) without consulting other household members? **Czech Republic**
- Added examples in the question: clothing and hairdresser **Switzerland**
- Do you feel free to spend money on yourself without consulting with other household members (on your hobbies, leisure and consumption)... **Estonia**
- do you feel free to buy something (with your personal income or not) for your own personal use without asking the opinion of the other household members and the modality 1 is yes always **France**

PA100: Ability to decide about purchases for children's needs (including giving them pocket money)

Eurostat: Do you feel free (i.e. without asking the permission of other household members) to spend money for purchases for the needs of the children in your household (including giving them pocket money)?

Values: 1 Yes, always or almost always / 2 Yes, sometimes / 3 Never or almost never

Countries:

1) The same wording: the Netherlands, Switzerland, Italy and Luxembourg

2) Slightly different wording

- Can you (without asking for permission other HH members) spend money on the needs of the children in the HH? (pocket money are not mentioned in the question)
Bulgaria
- Question does not contain (i.e. without asking the permission of other household members) + there is a modality 4 of not having kids 16-. **Germany**
- the only difference concerns the verb spend: allocate is used instead; the issue of spending money on food for the household should not be taken into account **Latvia**
- "Can you freely decide to spend money...?" (there is no mention to feel free) and it is specified "pocket money included without expenses for eating". **Austria**
- Do you feel free to spend money on the children in your household, without asking permission of the other household members? **United Kingdom**
- Do you feel free to spend money on children's needs, including pocket money, without asking other households member's opinions? Values: 1. Yes, always or almost always /2. Yes, but only when I consider the price to be reasonable / 3. Never or almost never (except for purchases of minor importance)/ 4. Such expenses are not wanted/needed
Ireland
- Do you feel free to spend money for purchases for the needs of the children in your household (including giving them pocket money) without asking the opinion of other household members? Values: Three of the categories are the same + 2 categories in addition: 4. Respondent is sibling of the children aged below 16 and is not the only person responsible for them / 5. No children under 16 years old in the household
Cyprus
- Do you feel free to spend money on the needs of children under 16 in the family without consulting with other household members (incl. Giving them pocket money) ... **Estonia**
- Do you feel free to decide on your own about expenses for your children. (If answer is not 4 N/A no children then) Do you feel free to decide on your own to you're your children pocket money **France**
- Different answer categories 1 Yes, always or almost always /2 Yes, sometimes/ 3 Never or almost never / 4 Respondent is not involve in the decision making about the purchases for children's needs **Poland**
- Different answer categories: 1 Yes, always or almost always / 2 Yes, sometimes / 3 Never or almost never /4 I'm not concern **Czech Republic**

PA110: Length of cohabitation of the partners

Eurostat: For how long have you been cohabiting with your partner?

Values: 0-99 Number of years

Countries:

1) The same wording: Germany, Latvia, Italy, France and Luxembourg

2) Slightly different wording

- How many years have you lived together? **Bulgaria**
- Since how many years have you been living with your partner? **Austria**
- How many years have you been living together as a couple? **Ireland**
- How many years have you been in cohabitation with your partner (irrespective of a legal basis)? **The Netherlands**
- How many years do you cohabit with your spouse/partner? **Cyprus**
- How many years have you continuously lived with your partner? **Estonia**
- Are you married (date of marriage)? Since which year do you live in consensual union **Luxembourg**

5) Other remarks

- Switzerland compute this variables from other variables
- Thinking about the first/second/third relationships where you lived with someone as a couple but did not get married.....how long did you live together in terms of years and months? **United Kingdom**

PA120: Time spent commuting to and from work - Optional
--

Eurostat: How many hours do you spend commuting to and from work in a typical week?

Values: 0-99 hours per week

Countries:

1) The same wording: Germany, Ireland and the Netherlands

2) Slightly different wording

- How many hours per week do you spend for going and coming back to/from work? (including walking) Values 1. Hours per week: ... / 2. I don't work. **Bulgaria**
- Question about minutes. **Germany**

3) Other remarks

Different formulation with two separate questions 1) How much time do you spend commuting to work door to door per day? Values: 1: Less than 15 mn / 2: From 15 to 30 mn / 3: From 30 to 54 mn / 4: From 45 to 60 mn / 5: 1 to 1.5 hour / 6: 1.5 to 2 hours / 7: 2 to 2.5 hours / 8: more than 2.5 hour; and 2) How many days in a normal week do you spend this amount of time commuting? **Austria**

PA130: Time spent on leisure - Optional
--

Eurostat: How many hours of leisure do you have in a typical week? Please include any time spent on activities you consider as leisure.

Values: 0-99 hours per week

Countries:

1) The same wording: Ireland

2) Slightly different wording

- How many hours per week do you spend on recreation and leisure activities? **Bulgaria**
- Question on leisure or hobbies, no precision "Please include any time spent on activities you consider as leisure." **Germany**
- How many hours do you spend on leisure in a typical week? **The Netherlands**
- How many hours do you spend on leisure in a typical week? **Luxembourg**
- "Please include any time spent on activities you consider as leisure" was not used at the end of the question. **Ireland**

PA140: Time spent on household work, child care and care for other dependants - Optional

Eurostat: How many hours do you spend on household work, child care and care for other dependant household or family members in a typical week?

Values: 0-99 hours per week

Countries:

1) The same wording: Germany, the Netherlands

2) Slightly different wording

- How many hours per week do you spend on housework, child care and/or other members of the HH? **Bulgaria**
- How many hours do you spend on housework, childcare or care for dependents in a typical week? **Ireland**
- How many hours do you spend on household work, child care and care for other dependant household? (be careful, these activities don't have to be paid): **Luxembourg**

PA150: Money spent per month for own use - Optional
--

Eurostat: How much money do you usually spend monthly on yourself? Please include expenditures for your leisure activities, clothing, personal care, personal alcohol and tobacco consumption which you yourself purchase and which are mainly for your own use.

Values: 0+ national currency per month

Countries:

1) The same wording: Germany, the Netherlands

2) Slightly different wording (*Please translate it into EN*)

- Please, indicate how many leva (BG currency) on average per month you allocate for our own consumption, for entertainment and recreation? **Bulgaria**
- It is specified "without spending on eating" **Austria**
- How much money do you usually spend on yourself per month, on leisure, clothing, personal care, alcohol and tobacco for your own use? **Ireland**

- What sum of money do you spend per month on personal consumption? Values: National currency.... / Doesn't know **Latvia**
- How much money do you usually spend monthly on yourself? **Luxembourg**

PA160: Money spent per month for children by the interviewed person - Optional

Eurostat: How much money do you usually spend monthly on the children living in your household? Please include expenditures for children's leisure activities, education, health, clothing, toys, hobbies and personal care, which you yourself purchase and which are mainly for the use of the children in your household.

Values: 0+ national currency per month

Countries:

1) The same wording: The Netherlands

2) Slightly different wording

- How many leva do you usually spend per month on the children living in your HH? (plus pocket money included in the categories list) **Bulgaria**
- How much money do you usually spend on the child(ren) in the house per month, on leisure, education, health, clothing, toys and hobbies, personal care which you purchase for the child(ren)? **Ireland**
- What sum of money do you spend per month on children younger than 16 and who live in your household (including pocket money)? Exclude expenses on food for the household. **Latvia**
- How much money do you personally usually spend monthly on the children living in your household? Please include expenditures for children's leisure activities, education, health, clothing, toys, hobbies and personal care **Luxembourg**

6. Conclusion

The analysis of the frequencies for the variables of the Module presented in this document shows that on the one hand, there is a variability of answers across countries and on the other hand, some patterns appear when looking at the results. As this Module provide a deep insight into the decision-making process and allocation of resources within the household, the detailed analysis from the gender perspective should be carried out.

It seems that this Module included some sensitive topics, for example questions related to household finances, which were difficult, at least in some countries, to address and to assess the reliability of the answers.

The analysis of the "not applicable" flags showed that they were applied correctly in many countries. It however revealed that some countries faced difficulties in distinguishing between different meanings of the same flag (e.g. flag -2). Additionally inconsistencies between variables appeared in some countries when using the same flag (e.g. flag -2 "Not applicable as the respondent is not part of a couple living in the household").

When analysing flag -3 "Not selected respondent" it was discovered that it was incorrectly used by 1 country that does not use selected respondent concept.

In this Module for the optional variables flag -5 "Not asked" was proposed. However there were some countries that did not collect optional variables and at the same time they did not use flag -5.

About the flag -1 "Missing" in the majority of countries for most variables the rate did not exceed 2 % for the items applying at household level and 7 % for the items applying at individual level. In some countries the rate of the flag -1 was quite high and exceeded 20% due to the fact that first of all proxy interviews were not allowed for the Module questions. Moreover many respondents refused to answer questions related to household finances.

In this Module 5 optional variables were proposed. They were collected by about 13 countries (the exact number depends on the variable collected).

As regards the national questionnaires 16 of them have been studied. In general the proposed by Eurostat wording of questions and answers was applied, however in some cases some differences were found that could hinder comparability across countries.

7. Annexes
