

## All Cross-listed Courses with ENV S as of 2022-23

A cross-listed course is a single course offered collaboratively through two or more departments or programs. Each department shares responsibility for the course and it's likely offered concurrently in the schedule of classes with seats made available under both departments (but not always). One may enroll in a cross-listed class under either department and have it apply towards their major requirements.

**IMPORTANT:** All cross-listed courses may only apply towards just one Area/Requirement within one's major requirements. For example, one can only apply a cross-listed course towards Area B (ES Electives) or Area C (Outside Concentration), but not both simultaneously.

If you have any questions about how to apply a cross-listed course towards your major requirements please consult an ES Academic Advisor.
