Overview

FIBA, the International Basketball Federation is the world governing body for the sport of Basketball. Founded by eight nations in 1932, it now includes 215 National Basketball Federations from all over the world. FIBA's mission is to develop and promote the game of basketball uniting the wider basketball community that now includes 450 million players and fans.

The Internet Corporation for Assigned Names & Numbers (ICANN) is the not-for-profit corporation formed in 1998 by the global Internet community to coordinate the Internet's underlying resources of domain names, IP numbers and technical protocols. In August 2015 FIBA entered into a Registry Agreement with ICANN to operate the Top Level Domain registry **.basketball** (the "TLD").

FIBA entered into a services agreement with Roar.Basketball LLC (“RO”) wherein FIBA assigned and appointed RO the responsibilities for management, marketing and day to day operations including the right to enter into agreements with registrars.

The policies, rules and requirements (“policies”) set out below affect the nature of rights and relationships related to domain names that may be registered in the .basketball domain. They govern many of the aspects of the relationship between registrants (people who are registered as the holder of a .basketball name), registrars (accredited retailers allowed to sell .basketball names) and RO (the official wholesaler of .basketball domains).

They are largely based on contractual requirements developed by the Internet community at ICANN. The .basketball registration policies described herein have been carefully designed with the intention of protecting the interests of the global Basketball community, including its clubs, teams, officials, events, coaches, players and fans, and the reputation of the sport of Basketball in general. Many of these policies are ICANN requirements, arising from the .basketball Registry Contract.

Use of .basketball domains is to be for lawful purposes. To the greatest extent practicable, the rights of others, including private intellectual property rights, protected national geographic names, and the names of International non-governmental organisation, the Red Cross and Red Crescent organisations, and the Olympic movement have been protected.

Many of these policies are reflected in the .basketball Registrant Contract required between registrants and registrars. To the extent possible by law, those contracts are to be interpreted as adopting and expressing these policies.

Public Notice

Please read this policy document carefully. By registering or using .basketball domain names, the registrant or user expressly agrees to be bound by the terms described herein and all terms incorporated by reference, including the Privacy policy.

1. Registration

- 1.1 Names must be registered through an ICANN-accredited registrar that has signed the [.basketball Registry/Registrar Agreement](#).
- 1.2 Names may be registered for a period of no less than one (1) year and no more than ten (10) years, commencing on the date on which RO accepts the request for registration submitted by the accredited registrar.
- 1.3 Names registered in .basketball must have at least 1 character and not more than 63. RO has reserved from sale until further notice all names consisting of 1, 2, and 3 characters (i.e. letters, numbers and combinations of letters and numbers).
- 1.4 Names registered in .basketball may contain the 26 letters of the Latin alphabet, "a-z", the ten digits, "0-9", a hyphen, "-", and then a dot, ".". The dot is used exclusively to separate labels. The hyphen may not appear at the beginning or end of a label. A label may not contain more than 63 characters and the total number of characters in a name may not exceed 255 (including a final dot that is not normally displayed as a part of the name).
- 1.5 Two hyphens may appear in the third and fourth positions in a label in a .basketball name only in accordance with the policies and procedures for Internationalized Domain Names (IDN) referenced below.
- 1.6 Dotless domains are not permitted in the TLD. Dotless domain names are those that consist of a single label (e.g., <http://Basketball>, or mail@Basketball). Dotless names would require the inclusion of, for example, an A, AAAA, or MX, record in the apex of a TLD zone in the DNS (i.e., the record relates to the TLD-string itself).
- 1.7 Registry will implement IDNs as approved by ICANN in its [Registry Agreement](#).
- 1.8 All names registered in .basketball TLD are subject to the .basketball Reserved Domain Names Policy (below).
- 1.9 Proxy and or Privacy Registrations are permitted, provided they are consistent with applicable ICANN policy and RO's agreements with ICANN, and registrars.

- 1.10 The Registrant shall ensure that: (i) the information submitted by or on behalf of the Registrant to the Registrar in connection with registration of the Domain Name or otherwise ("Registrant Information"), will, during the Term, comply with all .basketball Registry Policies, and will remain true, current, complete, accurate, and reliable; and (ii) the Registrant shall maintain, update, and keep the Registrant Information true, current, complete, accurate, and reliable by notifying their registrar within 30 days of a change to any such information. RO reserves and may exercise the right to suspend and/or terminate the Registrant's registration of the Domain Name if: (i) information provided by the Registrant to their registrar and/or RO appears, in RO's sole discretion, to be false, inaccurate, incomplete, unreliable, or misleading in any respect; or (ii) the Registrant fails to maintain, update, and keep the Registrant Information true, current, complete, accurate, and reliable. In such a circumstance, RO may, in its sole discretion, suspend the Registrant's Domain Name(s) within 30 days of RO's receipt of knowledge that such information is deficient. The Registrant acknowledges that a breach of this clause will constitute a material breach of its registration agreement, which will entitle RO to terminate the registration, resulting in suspension or deletion of the Domain Name, immediately upon such breach without any refund of the Registration Fee and without notice to the Registrant.
- 1.11 The registrant understands and has, by registering or using a .basketball name, agreed to comply with the terms of the .basketball Acceptable Use Policy (below). The Registrant acknowledges that a breach of this Policy will constitute a material breach of its registration agreement, which will entitle RO to terminate the registration, resulting in suspension or deletion of the Domain Name, immediately upon such breach without any refund of the Registration Fee and without notice to the Registrant.
- 1.12 Reserved names may not be registered. In the event that a user has mistakenly been allowed to register a reserved name, RO may cancel or transfer such domain name or sub domain name, in its sole discretion. In the event that a user fraudulently registers a reserved name as a domain or sub-domain, RO may cancel or transfer such domain name in its sole discretion, and may take further action against that user. Reserved names are those identified and described in the RO Reserved Names Policy (below).
- 1.13 Names may be blocked from registration, either temporarily or permanently, according to ICANN requirements, policy requirements of RO, and or applicable law. In the event that a user has mistakenly been allowed to register a blocked name, RO may cancel or transfer such domain name, in its sole discretion. In the event that a user fraudulently registers a blocked name as a domain or sub-domain, RO may cancel or transfer such domain Name and or sub-domain, in its sole discretion, and may take further action against that user.

- 1.14 Users may not register names at any level, that infringe, or if used would infringe the rights, including the intellectual property rights, of others, nor any names confusingly similar to such names.
- 1.15 Users may not register names the registration or use of which would *false*ly suggest any connection, in trade or otherwise, with or sponsorship of any other person, activity or entity. In the event that a user has mistakenly been allowed to register a such a Name, RO may cancel or transfer such Domain Name, in its sole discretion. In the event that a user fraudulently registers such a name as a domain or sub-domain, RO may cancel or transfer such domain Name and or sub-domain, in its sole discretion, and may take further action against that user.
- 1.16 Users who are found to have frequently breached this policy may be blocked, either for a period, or permanently, from registering or renewing names in the .basketball registry and may have their conduct referred by RO to legal investigation and or enforcement authorities.
- 1.17 RO undertakes no enquiry into the rights of an applicant to register any name at the time registration is sought. Registration in the .basketball registry does not constitute a warranty, guarantee or promise of any kind by RO that the name registered is a valid registration, or that the registrant has any rights to the registration. Registrants are responsible for their registrations, and are encouraged to conduct appropriate trade mark, company name or other similar searches, and to apply common sense prior to applying for registration. Registrants should be aware that they, and the .basketball registry are subject to the provisions of ICANN's UDRP, URS and other procedures, including those in court.
- 1.18 .basketball domain names may automatically renew at the end of their term (the expiration date) in accordance with the terms of the Registrant Agreement with the sponsoring Registrar. The standard grace period fixed by ICANN policies shall apply to the renewal of .basketball names. Renewals can be made at any time prior to the domain name expiration date.
- 1.19 Unless otherwise specifically modified or limited by RO, registrants are allowed to transfer their second-level domains to the registrar of their choice, provided such registrar has signed the .basketball Registry/Registrar Agreement. Registrants should contact their registrar of choice to satisfy their availability, and to understand the applicable transfer procedures. Under ICANN rules, registrar-to-registrar transfers are not allowed in the sixty (60) days following the registration of a domain name, unless RO expressly waives said sixty (60) day period. Further, a registrar-to-registrar transfer adds one year to the term of the domain name being transferred, with the one (1) year registration fee charged to the

gaining registrar. Registrars may charge the Registrant for the additional domain year. (Note that a bulk transfer mandated by ICANN shall not add an additional year to domain names subject thereto, and the gaining registrar shall not be entitled to charge Registrants thereof for an additional domain year.)

- 1.20 Registrants for registration of a letter/letter two-character ASCII label will take steps to ensure against misrepresenting or falsely implying that the registrant or its business is affiliated with a government or country-code manager if such affiliation, sponsorship or endorsement does not exist.
- 1.21 Registry Operator shall take reasonable steps to investigate and respond to any reports from governmental agencies and ccTLD operators of conduct that causes confusion with the corresponding country code in connection with the use of a letter/letter two-character ASCII domain. In responding to such reports, Registry Operator will not be required to take any action in contravention of applicable law
- 1.22 The registrant understands and has, by registering or using a .basketball name, agreed that registration of a .basketball domain name gives the registrant the right to use the domain name, but not the ownership of it.
- 1.23 RO reserves the right, in its sole discretion, to deny, cancel or transfer any Domain Name registration or transaction, or place any Domain Name(s) or other transactions on Registry lock, hold or similar status (i) to protect the integrity and stability of RO's systems; (ii) to comply with any applicable laws, government rules or requirements, requests of law enforcement, ICANN Policies or Registry Policies, or any dispute resolution process; (iii) during the resolution of a dispute; (iv) to avoid any liability, civil or criminal, on the part of RO, as well as its affiliates, subsidiaries, officers, directors, and employees; (v) in respect of RO only, for violations of RO-registrar agreement between the applicable Registrar and RO (for example, non-payment of fees) including, without limitation, any exhibits, attachments, or schedules thereto; (vi) to correct mistakes made by RO in connection with a Domain Name registration; (vii) following an occurrence of any of the prohibited activities described in violation of RO's Anti-Abuse/Acceptable Use Policy, or (viii) as otherwise provided for by the Registrant Agreement. Furthermore, RO reserves the right at any time, to verify (ix) the truth, accuracy, and completeness of any information provided by the Registrant to RO; and (x) the compliance by the Registrant with the applicable Registry Policies. Registrants agree to fully comply and cooperate with RO in connection with such verification and furnish all available documentation as RO may reasonably require to complete the verification.

- 1.24 RO may, at its sole discretion, modify these .basketball Registry Policies from time to time. RO shall post RO Policies on RO's web site at www.nic.basketball/policies. RO may inform Registrars of changes to RO Policies via email, and the Registrar agrees to notify Registrants of any changes that affect them; Registrant agrees that such email shall not be considered spam; however, neither RO nor the Registrar shall be obliged to provide such notice via email. The Registrant's use of their Domain Name following the effective date of any changes to RO Policies constitutes the Registrant's acceptance of such revised Registry Policies. In the event that the Registrant does not wish to be bound by the revised Registry Policies, the Registrant's sole remedy is to cancel the registration of the Domain Name, by following the appropriate Registry and/or Registrar Policies regarding such cancellation.

10. Privacy Policies

Introduction

10.1 RO has appointed Registry Services, LLC, its Registry Service Provider RO collects information about visitors to RO's website and .basketball registrants through a variety of means. This information is stored and used in a number of different ways. This Privacy Policy is intended to outline the information RO collects and how it is stored, used and protected. RO may modify this Policy from time to time in its sole discretion. Any modifications or amendments to this Policy shall be effective upon posting on the RO's website giving at least 14 calendar days before it becomes effective.

Policy

10.2 RO, having considered the applicable laws on data protection principles, adopts the following privacy policies:

1. Personal data shall be processed fairly and lawfully.
2. Personal data shall be obtained only for one or more specified and lawful purposes, and shall not be further processed in any manner incompatible with that purpose or those purposes.
3. Personal data shall be adequate, relevant and not excessive in relation to the purpose or purposes for which they are processed.
4. Personal data shall be accurate and, where necessary, kept up to date.
5. Personal data processed for any purpose or purposes shall be kept for no longer than is necessary for that purpose or those purposes.
6. Appropriate technical and organisational measures shall be taken against unauthorised or unlawful processing of personal data and against accidental loss or destruction of, or damage to, personal data.

Relationship with Registrars

10.3 Domain names are distributed through Registrars, accredited by ICANN, and who have entered into a Registry Registrar Agreement ("RRA") with RO. These registrars are agents who register domain names on behalf of their customers, and typically provide additional services (such as web hosting, email, and SSL certificates). Registrars have broad powers

to register, delete, and modify the domain names that are registered for their customers, and use a variety of automated and manual tools to do so. The RRA requires that Registrars ensure that their connection to RO System is secure, and that all data exchanged between their system and RO system is protected. However, RO cannot ensure or guarantee the security of Registrars' systems. Registrants should contact their registrar if they have any questions or concerns about how the registrar processes, stores and transmits their personal information.

What information RO collects

10.4 Each domain name registered in the .basketball database has to be associated with the following information:

- Registered Name Holder (or registrant): the legal owner of the domain name.
- Administrative Contact: the entity authorised by the registrant to interact with the registrar on behalf of the registrant.
- Technical Contact: the entity authorised by the registrant to maintain the technical operations of the domain name.
- Sponsoring registrar: The entity authorised by the registrant to register and manage the domain.
- Name servers: the domain name servers to which the domain must be delegated in order to function.

10.5 The following information may also be provided:

- **Billing Contact:** the entity authorised by the registrant that is responsible for payment of registration and renewal fees to the registrar.
- **DNSSEC DS records:** digests of the DNSSEC Secure Entry Point (SEP) for the domain name.

10.6 The Registrant and the Administrative, Technical and Billing Contacts described above include the following verified information:

- Contact Name/Role
- Organisation
- Street Address
- City
- State/Province
- Post code
- Country
- Phone
- Fax
- Email

- 10.7 The Registrar provides this information to RO when the domain is registered. Registrars can also amend the above information at any time during the lifetime of the domain registration. The Registrar does not share with RO the Registrant's methods of payment or such other information about services a registrant may have with a given registrar.
- 10.8 At the point of registration, RO also stores the following information:
- The creation date of the domain,
 - The expiry date of the domain,
 - Status codes used for Registry operations including, but not limited to, lock the domain, or prohibit updates.
 - A random authorisation code used for transfers.
- 10.9 RO may also collect and retain information voluntarily supplied by applicants under its dispute procedures or QLP program, Community Priority Period, or to support premium names applications. Such information may also be shared with third parties charged with the review of such applications and verification services or for the conduct of such dispute resolution procedures. RO will only have such information as provided voluntarily in order to validate the application for the domain name(s).

Information RO does not collect

- 10.10 RO does not receive or store any of the following information:
1. The IP address of the registrar's customer,
 2. Any credit card information,
 3. Any passwords used by the registrant to access the registrar's website.

How information is stored

- 10.11 Domain name registration information is stored in a central database. This database is hosted in a secure co-location facility and is protected by enterprise-grade firewalls.
- 10.12 RO takes regular backups of the database to ensure continuity of service. All backups are stored in an encrypted format and are transmitted to off-site locations using encrypted communications channels to prevent unauthorised access.

How information is used

- 10.13 RO uses the domain name, name servers, and DNSSEC DS records (if any) to publish DNS zone files to facilitate the functioning of the domains. This information can be queried through RO's public DNS servers. Third parties can also access copies of the zone files after signing an agreement.

10.14 The Registrant, Administrative, Technical and Billing Contact information is published via the Whois service. The Whois system is a standard service operated by all domain name registries and Regional Internet Registries (RIRs) and is used by third parties to obtain information about registered domain names, and has a variety of uses, including:

- a. Supporting the security and stability of the Internet by providing contact points for network operators and administrators, including ISPs, and certified computer incident response teams;
- b. Determining the registration status of domain names;
- c. Assisting law enforcement authorities in investigations for enforcing national and international laws;
- d. Assisting in combating abusive uses of information communication technology;
- e. Facilitating enquiries and subsequent steps to conduct trademark research and to help counter intellectual property infringement;
- f. Contributing to user confidence in the Internet by helping users identify persons or entities responsible for content and services online; and
- g. Assisting businesses, other organizations and users in combating fraud, complying with relevant laws and safeguarding the interests of the public.

10.15 RO uses the Registrant, Administrative, Technical and Billing Contact information to contact the appropriate entities when dealing with the following issues, without limitation:

1. Processing applications for domain names
2. Non-payment of registration or renewal fees by the registrar¹
3. Misdirected SSL certificate requests
4. Complaints of trademark or copyright infringement, malware, fraud or spam

10.16 An example of a typical Whois record appears below – the data is a sample, for the purposes of display only , and is not provided for its accuracy:

How information is protected

- 10.17 All interfaces used to collect information (specifically, EPP and Toolkit systems, the web-based Registrar interface and RO website) use the Secure Sockets Layer (SSL) to encrypt information as it is transmitted to RO's system. This is the same technology used to secure e-commerce systems and online banking.
- 10.18 As described above, the database storing domain name registration data is hosted on a server in a secure colocation facility, protected by a firewall. When copied from this server, the database is always transmitted and stored using encryption technology.

How to get further information or ask a question

- 10.19 If a Registrant has any questions or comments about RO Policies, please contact RO at info@roar.basketball

11. Whois Access Policy

- 11.1 The Whois Access Policy relates to the dissemination of Domain Registration Information.
- 11.2 RO is required to collect and provide domain name registration information ("Whois Data") for a variety of purposes. RO provides access to Whois Data through a standard text-based network protocol on Port 43. Whois Data can also be accessed on RO's website at <http://www.nic.basketball> using a standard web interface.
- 11.3 Both interfaces are publicly available at no cost to the user and are reachable worldwide. This service is available to any Internet user and its use does not require prior authorization or permission.
- 11.4 Access to Whois Data in RO's database is provided to assist in determining the contents of a domain name's registration record. Whois Data consists not only of the domain name but also the relevant contact information associated with the domain name as provided by the registrant. It also identifies nameserver delegation and the domain name's registrar of record.
- 11.5 The data in this record is provided for informational purposes only; RO does not guarantee Whois Data accuracy. This service is intended only for query-based access. By submitting a Whois query to RO, you agree to abide by this Whois Access Policy (this "Policy"). Please note that RO may modify this Policy from time to time in its sole discretion.

Security and Stability Considerations

- 11.6 Abuse of RO's Whois interface through data mining may be mitigated by detecting and limiting bulk query access from single sources. Such queries by non-authorized parties will be limited and unauthorized queries may result in responses that do not include data sets representing significant portions of the registration database.
- 11.7 In addition, RO's Whois web interface adds a simple challenger- response CAPTCHA that requires a user to type in the characters displayed in a certain image.
- 11.8 RO will employ a blacklist to block access to Whois Data by those found to violate this Policy or any .basketball policy. At RO's sole and complete discretion, individual Internet protocol ("IP") addresses or IP ranges may be prevented from accessing Whois Data.

Terms of Use

- 11.9 By accessing Whois Data from RO, the user agrees to use the Whois Data only for lawful purposes and that under no circumstances will use the Whois Data to:
1. allow, enable, or otherwise support the transmission by e-mail, telephone, or facsimile of mass unsolicited, commercial advertising or solicitations to any entities (other than your existing customers from whom you collected such information with their knowledge and permission);
 2. enable high volume, automated, electronic processes that send queries or data to the systems of RO, its registry service provider or any ICANN-accredited registrar, except as reasonably necessary to register domain names or modify existing registrations; or
 3. collect or attempt to collect the majority or entirety of the Whois database contents.
- 11.10 Users who collect Whois Data by any of the above purposes are prohibited from publishing such Whois Data.
- 11.11 When using RO's Whois service, the user should consider the following:
1. The Whois service is not a replacement for standard EPP commands;
 2. Whois Data is not considered authoritative for registered domain objects;
 3. The Whois service may be scheduled for downtime during production or operation, testing and evaluation maintenance periods; and,
 4. Queries to the Whois service may be "throttled" (i.e. if too many queries are received from a single IP address within a specified time, the service will begin to reject further queries for a period of time to prevent disruption of Whois service access).

11.12 Information regarding the RO's searchable Whois service is available on its website at www.nic.basketball.

12. Amendments

12.1 RO may modify its Policies from time to time in its sole discretion. RO reserves its rights to update its policies herein upon no less than 14 calendar days' notice to Registrars for the limited purposes of:

1. Updating RO's contact information (email, address, etc)
2. Complying with ICANN consensus policies
3. Complying with new consumer protection legislation
4. Correcting and updating links
5. Correcting typographical errors OR
6. Updating policies following ICANN approved additional registry services or amendments to the .basketball Registry Agreement which have been subject to an RSEP or other approval process by ICANN.

12.2 Notices under section 13.1 shall be effective upon posting on RO website.

12.3 Any changes of policies which would require technical implementation or modifications to the Registrant Agreement by the Registrar shall be effective upon posting on the RO website and giving ninety (90) days prior written notice to all .basketball accredited Registrars.

13. LAUNCH PLAN

The .basketball launch plan will include the following phases:

Qualified Launch Program (QLP)

13.1 Allocation of Qualified Launch Program Names as per section 5.

Trademark Sunrise ("Sunrise")

13.2 Sunrise will be an end-date trademark sunrise period lasting at least 60 days, followed by Sunrise Allocation. Sunrise and QLP phases will both terminate at the same time.

Basketball Community Priority Registration Period

13.3 There will be a Basketball Community Priority period of at least 1 year from the end of Sunrise until the launch of GA. All registrants filing within this period must supply a token by which the registry will confirm (or not) their approval by the community to apply to register .basketball names within this period. Tokens will be issued by FIBA, through the National Federations and other community-based administrative entities.

This period has at least three distinct phases:

- (1) **Invitation Only** period. Selected subsets within the Basketball community will be invited to register names of their choice, related to their community. In addition to the token, coupons will be made available via the Registrars that will define the length of time of the respective Invitation Only period, and the selling prices of domain names in that period. The Invitation Only period will run for at least 4 months.
- (2) This clause left intentionally blank.
- (3) **General CPP**. This is a period of Community priority, open to all members of the community. Names will be allocated on a “first come, first served” basis. The General CPP runs from the end of the Invitation Only phase. All members may apply provided they have a verified token processed through the Registrar and accepted by the Registry.

Implementation.

13.4 This clause provided for the implementation of the Launch phases prior to General Availability, and which have now closed. Queries about the implementation of these phases may be directed to info@roar.basketball

General Availability (“GA”)

13.5 GA will follow the Community Priority Period.
The first 7 days of GA will consist of an Early Access Program (“EAP”).

Dates

13.6 The dates of each phase will be announced on the [Registry Website](#) and as shown at [ICANN TLD Start-up Information](#).
