

Sinex Issues

- Data Corrections File in SINEX
 - Only have 2 letter satellite abbreviations for LAGEOS and Etalon
 - Very time consuming to maintain
 - Developing a web based form, so sites can easily update this file
- Eccentricity File in SINEX
 - Some historical sites were never assigned DOMES numbers
 - Two different point codes for sites 7810 and 7824
 - Sites do not get these right the 1st time
 - Should this file also contain the Site Id block
- Reporting Errors of Bias Estimates in SINEX files
 - Bias Codes
 - Point Codes

Zimmerwald and San Fernando Eccentricities

*SITE	PT	SOLN	T	DATA_START__	DATA_END____	UNE	UP_____	NORTH__	EAST_____
