

# IHLA

IDAHO HOME LEARNING ACADEMY

## What our parents are saying about IHLA

*I have always homeschooled my children independently, but after joining IHLA this year, I was blown away by what wonderful support it is to our family. I no longer feel like I'm doing the job of educating my children all on my own.*

Our homeroom teacher backed us up as parents. Together we make an awesome team!

**My daughter is excelling at a pace that in-person classrooms just wouldn't support. We love that she also has access to virtual sessions with peers via Homeroom teacher sessions and the science/SS classes.**

*Learning new ways to teach and how each child learns in a different way has been amazing. Grateful to be able to enable my children to learn in their own way!*

I have gone from having a daughter that HATES school, and feeling powerless to help her. To having a say in what my daughter learns, helping her pursue her passions, and actually spending time with my children and growing together. Thank you!

Homeschooling was supposed to be a temporary experience but we're seriously considering making it the norm.

*It is wonderful to be able to ensure my child is learning all things he would in a public school setting, and to be able to tailor it to my child. In public school (due to his social nature and extreme energy) he was always "in trouble".*

*We chose homeschool but we're limited with our resources. IHLA has not only given us resources online but funds to make schooling from home really beneficial.*

**I love LOVE the flexibility that IHLA gives us to learn how we want to learn and at a pace that is healthy for our family.**

**I LOVE IT WHEN KIDS TAKE THE FRONT SEAT IN THEIR LEARNING PROCESS.**

# What our parents are saying about IHLA

Schooling at home has been a great experience for my son. It allows flexibility to meet my son's individual needs, challenging him when needed, and remediation in other areas.

My son has ADHD and this has been an amazing opportunity for me to provide him an education in the best way possible. We are able to do one-on-one as needed, able to do as many hands-on activities and teaching methods as needed, and pace ourselves according to the quality of his focus on any given day rather than being held to traditional schooling methods and timelines. I would recommend IHLA to anyone considering homeschooling, it has been a phenomenal experience!

My kids love IHLA. They tell people how much more they enjoy school with the flexibility to learn how they want and not have to be stuck in a box.

It is so important to me to be able to educate in many areas, not just math, reading, science, etc. Our girl is learning so many life skills and exploring interests with the resources we have. We get to educate the whole child, not just learn the basic subjects, and we get to have a blast doing it. Seriously so grateful for IHLA!

As a parent, being able to be a part of those "ah ha" moments has been wonderful.

My son has loved being able to do a LEGO class every week. It's a highlight for him and would not happen in public school. Seeing how much he has progressed even in a few months is exciting. Watching him set goals for himself and overcome fears has been so good in a season with so much uncertainty.

After the virtual learning fiasco of spring 2020, my KG daughter had lost all confidence in her reading skills. I knew we needed to be proactive in creating a love of reading and decided to school at home for 1st grade.

We love the freedom IHLA has given our family for learning. We have a child with ADHD and constantly had schools pushing for medication. He did not thrive in a typical brick and mortar classroom. We chose homeschool but we're limited with our resources. IHLA has not only given us resources online but funds to make our homeschool really beneficial for our kids. Our child is now excelling in all subjects and enjoying school again. Thank you IHLA!

**WE LOVE THE FLEXIBILITY THAT IHLA PROVIDES THAT ALLOW US TO DIVE DEEP INTO LEARNING, NO MATTER WHAT IT LOOKS LIKE.**
