

MetaMap/MTI Web API

MetaMap/MTI Web API

- MetaMap identifies biomedical concepts in text

Cigarette smoking increases the mean platelet volume
in elderly patients with risk factors for atherosclerosis.
- Medical Text Indexer (MTI) summarizes text using MetaMap and the Medical Subject Headings (MeSH) vocabulary

Cigarette smoking increases the mean platelet volume
in elderly patients with risk factors for atherosclerosis.

Cigarette Smoking
Tobacco
Blood Platelets
Aged
Humans
Risk Factors
Arteriosclerosis
Atherosclerosis

MetaMap/MTI Web API

- Easy-to-use Java-based API providing programmatic access to both MetaMap and MTI

MetaMap/MTI Web API

- Simple code insertion

Create MetaMap/MTI Web API Object:

```
GenericObject myGenericObj = new GenericObject();
```

Set Required Fields:

```
myGenericObj.setField("Email_Address", "metamap@nlm.nih.gov");
myGenericObj.setField("APIText", "Cigarette smoking increases ...");
myGenericObj.setField("Batch_Command", "metamap -pci");
```

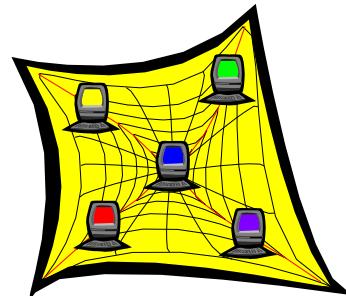

Submit and Receive Results:

```
try
{
    String results = myGenericObj.handleSubmission();
    System.out.print(results);
} catch (RuntimeException ex) {
} // catch
```

MetaMap/MTI Web API

- Batch Facility (Scheduler)
 - Capacity for large sets of non-Sensitive/non-Personally Identified Information (PII) data
 - Processing spread across large pool of computing resources

```
myGenericObj.setField("UpLoad_File", "./sample.txt");
```

MetaMap/MTI Web API Uses

- **Named Entity Recognition**
 - Identifying drugs or diseases in text
- **Text Indexing**
 - Support NLM Indexing efforts
- **Literature-based discovery**
 - Search for important undiscovered connections
- **2011** 160,000 requests +
 12,000 records nightly in-house

Downloadable MetaMap

- What if you do have Sensitive/PII data?
- Download MetaMap and run locally
 - Linux, MacOS X, Windows XP/7
 - Local MetaMap API and UIMA support
 - <http://metamap.nlm.nih.gov>

MetaMap/MTI Web API

- Download, Documentation, and Examples:
http://skr.nlm.gov/SKR_API
- Contact: metamap@nlm.nih.gov
- Requires Free UMLS Terminology Services (UTS) account: <https://uts.nlm.nih.gov>
