

Full-Service First-Class Mail STIDs Impacted

STID	Current Process	New Process (Effective July 9, 2023)	What STID should I use?
036	This is a Manual Correction STID, which currently generates a separate address correction notice (PS Form 3547) when a printed endorsement is present (Address Service Requested). Mail is forwarded or returned as determined by the reason for UAA and the endorsement printed. Mail endorsed Return Service Requested is returned to sender with the new address or reason for UAA attached.	This STID will be eliminated. If STID is used after July 9, 2023, mailers will be informed of the irregularity. Printed endorsements on mail with this invalid STID will NOT generate a separate (PS Form 3547) address correction notice (Address Service Requested). Mail is forwarded or returned as determined by the reason for UAA.	Full-Service mailers that desire separate address corrections must request ACS using the appropriate STID for the ancillary endorsement and option (Address Service Request or Change Service Requested). *Full-Service mailers that print Return Service Requested should use STID 343 to receive the requested service. Temp-Return Service Requested should use STID 232.
041	This is a Manual Correction STID, which currently generates a separate address correction notice (PS Form 3547) when a printed endorsement is present (Address Service Requested). Mail is forwarded or returned as determined by the reason for UAA and the endorsement printed. Mail endorsed Return Service Requested is returned to sender with the new address or reason for UAA attached.	This STID will be eliminated. If STID is used after July 9, 2023, mailers will be informed of the irregularity. Printed endorsements on mail with this invalid STID will NOT generate a separate (PS Form 3547) address correction notice (Address Service Requested). Mail is forwarded or returned as determined by the reason for UAA.	Full-Service mailers that desire separate address corrections must request ACS using the appropriate STID for the ancillary endorsement and option (Address Service Request or Change Service Requested). *Full-Service mailers that print Return Service Requested should use STID 342 to receive the requested service. Temp-Return Service Requested should use STID 222.
260	This is a No Address Correction STID and printed endorsements are not allowed; however, due to the current STID settings, a separate manual address correction notice (PS Form 3547) is generated when a printed endorsement is present (Address Service Requested). Return to sender mail is generated when Return Service Requested is printed.	Settings of this STID will be changed. If printed endorsement is present (Address Service Requested) a Full-Service ACS notice will be generated. Mail is forwarded or returned as determined by the reason for UAA.	Full-Service mailers that desire separate address corrections must request ACS using the appropriate STID for the ancillary endorsement and option (Address Service Request or Change Service Requested). Printed endorsements are optional for First-Class Mail when the STID requests ACS. *Full-Service mailers that print Return Service Requested should use STID 343 to receive the desired return service. Temp-Return Service Requested should use STID 232.
