

# USPS APIs

The USPS API Platform provides a dynamic, one-stop-shop of shipping capabilities to expand business reach and increase efficiency. The USPS suite of APIs enables integrators to standardize an address, price a package, create a label, find a USPS acceptance facility, schedule a carrier pick-up, and track a package from entry to delivery. The USPS API platform also offers webhooks for near-real-time push notifications for tracking events.

The Developer Portal provides coding examples and downloadable specifications to accelerate integration.

## UNMATCHED PRODUCTS WITH UBIQUITOUS REACH

- Ship **domestic packages** with USPS Ground Advantage, USPS Connect Local/Regional, Priority Mail, Priority Mail Express, Library Mail, Media Mail, and Bound Printed Matter products
- Ship **international packages** with Priority Mail International, Priority Mail Express International, and First-Class Package International Service products
- Ship **USPS Returns** with Priority Mail (1–3 days), Priority Mail Express (1-2 days), and Ground Advantage (2-5 days)

## SIMPLIFIED SHIPMENT PREPARATION

- Print more than 1 million labels per hour
- Create outbound and return labels together
- Choose a label size of either 4" X 5" or 4" X 6" including support for thermal labels
- Choose from multiple file formats: PDF, TIFF, JPG, SVG, ZPL at 203dpi and 300dpi, or custom label creation
- Cancel labels prior to mailing date

## COMPETITIVE PRICING AND FLEXIBLE PAYMENT

- Receive discounted pricing through the USPS Sales Team
- Pay for labels with Credit Card, ACH Debit, or USPS Trust
- Shop the best USPS price based on package attributes

## POWERFUL VALUE-ADDED SERVICES

- Find a USPS Post Office or drop-off location
- Request Carrier Pickup of packages
- Generate and store labels for future printing or have labels delivered to your mailbox
- Subscribe to track orders in near-real-time from package drop-off to fulfillment or return
- Opt-in for delivery status notifications for customers
- Create Informed Delivery Rich Content Campaigns linked to package shipments to help grow and retain customers
- Onboard new customers easily to Marketplace or Platform

## HOW TO SIGN UP

Developers access the USPS Developer Portal at <https://developer.usps.com> to begin using USPS APIs.

# USPS APIs and Endpoints

Name	Description	Endpoints																					
<p><b>Domestic Labels</b></p>	<p><a href="#">Domestic Labels 2.0   devportal (usps.com)</a> Create domestic outbound and return shipping labels for packages. The API calculates postage based on package attributes, applies rate, ensures product availability, standardizes addresses and generates the required Shipping Services File ensuring USPS compliance. By default, Commercial rates are applied.</p> <p>Access USPS contract rates by applying an authorized USPS payment account or permit within the payment account end point. Contact a USPS representative to learn more about discounted rates.</p> <p>Create a label:</p> <ol style="list-style-type: none"> <li>1. Call the payment account endpoint to configure payment and define transaction roles. Single and multi-party billing available.</li> </ol> <table border="1" data-bbox="305 674 1177 947"> <thead> <tr> <th>Role</th> <th>Definition</th> </tr> </thead> <tbody> <tr> <td>Payer (Required)</td> <td>Who is paying the postage</td> </tr> <tr> <td>Label Owner (Required)</td> <td>The mailer ID used to create the tracking number and generate manifest files</td> </tr> <tr> <td>Mail Owner</td> <td>Entity who owns the contents of the package</td> </tr> <tr> <td>Rate Holder</td> <td>Whose rates will be used to calculate postage</td> </tr> <tr> <td>Shipper</td> <td>Who is tendering packages to USPS</td> </tr> <tr> <td>Platform</td> <td>The platform used to create labels</td> </tr> </tbody> </table> <ol style="list-style-type: none"> <li>2. Call the Domestic Labels API with origin and destination address, package details (mail class, dimensions, etc.), and requested label image information (image size, format, etc.) to print label(s).</li> </ol> <table border="1" data-bbox="347 1079 1138 1339"> <thead> <tr> <th>Mail classes supported for domestic labels</th> </tr> </thead> <tbody> <tr> <td>Parcel Select, Parcel Select Lightweight</td> </tr> <tr> <td>USPS Connect Local, Connect Regional, and Connect Local Mail</td> </tr> <tr> <td>Priority Mail, Priority Mail Express</td> </tr> <tr> <td>Library Mail, Media Mail, and Bound Printed Matter</td> </tr> <tr> <td>USPS Ground Advantage</td> </tr> <tr> <td>Priority Mail Return Service, Priority Mail Express Return Service, Ground Advantage Return Service</td> </tr> </tbody> </table>	Role	Definition	Payer (Required)	Who is paying the postage	Label Owner (Required)	The mailer ID used to create the tracking number and generate manifest files	Mail Owner	Entity who owns the contents of the package	Rate Holder	Whose rates will be used to calculate postage	Shipper	Who is tendering packages to USPS	Platform	The platform used to create labels	Mail classes supported for domestic labels	Parcel Select, Parcel Select Lightweight	USPS Connect Local, Connect Regional, and Connect Local Mail	Priority Mail, Priority Mail Express	Library Mail, Media Mail, and Bound Printed Matter	USPS Ground Advantage	Priority Mail Return Service, Priority Mail Express Return Service, Ground Advantage Return Service	<ul style="list-style-type: none"> <li>• Payment Account (/payment-account)</li> <li>• Outbound Label (/label)</li> <li>• Return Label (/return-label)</li> <li>• Cancel Label (/label/{trackingNumber})</li> </ul>
Role	Definition																						
Payer (Required)	Who is paying the postage																						
Label Owner (Required)	The mailer ID used to create the tracking number and generate manifest files																						
Mail Owner	Entity who owns the contents of the package																						
Rate Holder	Whose rates will be used to calculate postage																						
Shipper	Who is tendering packages to USPS																						
Platform	The platform used to create labels																						
Mail classes supported for domestic labels																							
Parcel Select, Parcel Select Lightweight																							
USPS Connect Local, Connect Regional, and Connect Local Mail																							
Priority Mail, Priority Mail Express																							
Library Mail, Media Mail, and Bound Printed Matter																							
USPS Ground Advantage																							
Priority Mail Return Service, Priority Mail Express Return Service, Ground Advantage Return Service																							
<p><b>International Labels</b></p>	<p>Create international outbound shipping labels and customs forms for packages. The API calculates postage based on package attributes, applies rate, ensures product availability, standardizes addresses and generates the required Shipping Services File ensuring compliance with USPS and US Customs and Border Control standards and avoid non-compliance fees. By default, Commercial rates are applied. Access USPS contract rates by applying a linked USPS payment account or permit within the payment account end point. Contact a sales representative to learn more about discounted rates.</p> <p>Create a label:</p> <ol style="list-style-type: none"> <li>1. Contact a sales representative to obtain sequence numbers for international labels.</li> <li>2. Call the payment account endpoint to configure payment and define transaction roles. Payer and label owner roles are required, the remaining roles are optional. These roles enable multi-party billing.</li> </ol>	<ul style="list-style-type: none"> <li>• Outbound Label (/international-label)</li> <li>• Payment Account (international-label/payment-account)</li> <li>• Label Cancel (/international-label/{trackingNumber})</li> </ul>																					

Role	Definition
Payer (Required)	Who is paying the postage
Label Owner (Required)	The mailer ID used to create the tracking number and generate manifest files
Mail Owner	Entity who owns the contents of the package
Rate Holder	Whose rates will be used to calculate postage
Shipper	Who is tendering packages to USPS
Platform	The platform used to create labels

3. Call the International Labels API with origin and destination address, package information (mail class, dimensions, etc.), and requested image label information (image size, format, etc.) to print label.

Mail classes supported for international labels
Priority Mail Express International
Priority Mail International
First-Class Package International

SCAN Form

Shipment Confirmation Acceptance Notice (SCAN) form allows integrators to link multiple domestic and international labels through one Electronic File Number (EFN) and physical SCAN Form (PS Form 5630). The USPS scans this form at mailing acceptance to generate an acceptance tracking event for each linked label.

- SCAN Form (/scan-form)

Domestic Prices

Request domestic commercial or contract rates based on the characteristics of the package. Pass required information (origin and destination ZIP Code, dimensions, weight, mailing date, and, if applicable, a contract ID and product ID to access contract rates) to receive prices for domestic packages.

Domestic mail classes supported
Parcel Select, Parcel Select Lightweight
USPS Connect Local, Connect Regional, and Connect Local Mail
USPS Ground Advantage, Priority Mail, Priority Mail Express, USPS Retail Ground
Library Mail, Media Mail, and Bound Printed Matter
USPS Ground Advantage Return Service, Priority Mail Return Service, Priority Mail Express Return Service

Calculate total postage by adding the base rate and applicable extra services.

Extra services provide greater security and accountability for packages, convenience for the sender, and special handling options. Extra services include insurance, Certified Mail, Collect On Delivery (COD), Registered Mail, Adult Signature, USPS Tracking, Signature Confirmation and more.

- Base Rates (/base-rates)
- Extra Service Rates (/extra-service-rates/search)

International Prices

Request international commercial or contract rates based on the characteristics of the package. Pass required information (origin ZIP Code, destination country with postal code, dimensions, weight, mailing date, and, if applicable, a contract ID and product ID to access contract rates) to receive prices for international package mail classes.

International mail classes supported
Priority Mail Express International
Priority Mail International
First-Class Package International
Global Express Guaranteed

Calculate total postage by adding the base rate and applicable extra services.

Extra services are enhancements that provide greater security and accountability for mail, convenience for the sender, and special handling options. Extra services include insurance, hazardous material and return receipt.

- Base Rates (/base-rates)
- Extra Service Rates (/extra-service-rates/search)

<b>Locations</b>	<p>Find the closest USPS Post Office or destination entry facility [e.g., Destination Delivery Unit (DDU), Sectional Center Facility (SCF) or Network Distribution Center (NDC)] by passing in the destination ZIP Code. Optionally pass in Mail Class, Processing Category, Destination Entry Facility Type, or Palletized Indicator to filter and limit search results. The API returns information such as address, hours of operations, available services, etc.</p>	<ul style="list-style-type: none"> <li>• Drop Off Locator (/dropoff-locations)</li> <li>• Post Office Locator (/post-office-locations)</li> </ul>							
<b>Service Standards</b>	<p>Find USPS delivery standards or estimated delivery dates for all package mail classes by entering origin and destination ZIP Code. Optionally, pass in Mail Class to filter and limit search results.</p>	<ul style="list-style-type: none"> <li>• Expected (/estimates)</li> <li>• Standards (/standards)</li> </ul>							
<b>Carrier Pickup</b>	<p>Schedule a package pickup at no additional cost (Monday through Saturday, excluding holidays).</p> <ul style="list-style-type: none"> <li>• You can schedule pickups Monday - Saturday until 2:00 AM CT on the day of the pickup. Next-day pickup is available after 2:00 AM CT.</li> <li>• You can edit or cancel a scheduled pickup request until 2:00 AM CT on the day of the pickup.</li> <li>• Individual items cannot exceed 70 pounds or 130 inches in total length and girth.</li> </ul> <p>Schedule Carrier Pickup:</p> <ol style="list-style-type: none"> <li>1. Call the Eligibility endpoint and provide a location to determine if the address is available for a Carrier Pickup.</li> <li>2. Call the Create endpoint to schedule a Carrier Pickup and to identify where packages will be stored for pickup.</li> <li>3. Call Edit, Delete and/or Introspect endpoints to update or view Carrier Pickup appointments as needed.</li> </ol> <table border="1" data-bbox="370 951 1110 1165"> <thead> <tr> <th>Mail classes supported for Carrier Pickup</th> </tr> </thead> <tbody> <tr> <td>Priority Mail Express</td> </tr> <tr> <td>Priority Mail</td> </tr> <tr> <td>USPS Ground Advantage</td> </tr> <tr> <td>International</td> </tr> <tr> <td>Bulk Parcel Return Service</td> </tr> <tr> <td>Parcel Return Service</td> </tr> </tbody> </table>	Mail classes supported for Carrier Pickup	Priority Mail Express	Priority Mail	USPS Ground Advantage	International	Bulk Parcel Return Service	Parcel Return Service	<ul style="list-style-type: none"> <li>• Eligibility (/eligibility)</li> <li>• Create (/carrier-pickup)</li> <li>• Edit (/carrier-pickup/{confirmationNumber})</li> <li>• Delete (/carrier-pickup/{confirmationNumber})</li> <li>• Introspect (/carrier-pickup/{confirmationNumber})</li> </ul>
Mail classes supported for Carrier Pickup									
Priority Mail Express									
Priority Mail									
USPS Ground Advantage									
International									
Bulk Parcel Return Service									
Parcel Return Service									
<b>Tracking</b>	<p>Enter your tracking number to obtain near-real-time visibility of shipments as packages move throughout the USPS network from induction to delivery.</p> <p>Call Tracking endpoint with tracking number to view tracking details including the date, time, and location.</p> <p>Call Email Notifications endpoint with tracking number to receive near real time email notifications on selected package tracking events.</p>	<ul style="list-style-type: none"> <li>• Tracking (/tracking/{trackingNumber})</li> <li>• EmailNotifications (/tracking/{trackingNumber}/notifications)</li> </ul>							
<b>Organizations</b>	<p>Register customers with USPS by creating customer and mailer IDs.</p> <p>Leverage system-generated customer and mailer IDs to uniquely identify your customers.</p> <p>Call the Organizations endpoint by passing in organization name, address, and phone number.</p>	<ul style="list-style-type: none"> <li>• Add Company (/organizations)</li> </ul>							
<b>Addresses</b>	<p>Verify an address to help facilitate delivery.</p> <p>Call Address Standardization endpoint with a single domestic address to verify and standardize street addresses (including city and street abbreviations) and provide missing information such as ZIP Codes and ZIP Codes + 4.</p> <p>Call City/State for ZIP Code endpoint to find City/State for given ZIP Code.</p> <p>Call ZIP Codes endpoint with an address (excluding ZIP Code) to return the ZIP Codes + 4 delivery point for given address.</p>	<ul style="list-style-type: none"> <li>• Address Standardization (/address)</li> <li>• City/State for ZIP (/city-state)</li> <li>• ZIP Codes (/zipcode)</li> </ul>
