EXPLANATORY NOTE

Data on fatal and nonfatal injuries in motor vehicle traffic accidents for calendar year 1973 are summarized by highway system in the tables which follow. These tables, compiled from reports submitted by the 50 States and the District of Columbia, include data for all roads and streets in the United States.

Table FRS-1 (page 1) presents a year-to-year comparison of fatality rates by highway system for the years from 1968 through 1973. The following 12 tables (pages 2-13) show fatal accident rates, fatality rates, injury accident rates and injury rates by highway system and State for 1973. Table VPD-1 (page 14) relates the 1973 fatality and injury accident data to vehicle registrations, population and numbers of licensed drivers. The remaining tables (pages 15-38) contain the detailed accident information on which the preceding tables are based. At the bottom of the tables on pages 2-38 are amended national figures for the years from 1967 through 1972; these amended figures reflect refinements of previously reported data.

Preparation of these accident tables requires distribution of all fatal and injury accidents to specific highway systems. Since there is no single highway classification system in use in all the States for classifying accidents and travel data, the set of highway systems used in these tables is necessarily a compromise. Generally, adjustments for highway classification differences have been made by the States; if it was necessary for the Federal Highway Administration to adjust the data, an asterisk follows the State name in the "FT" table (pages 15-22) or "IT" table (pages 27-34) which contains the adjusted figures.

The rates shown in these tables are uniformly carried out to two decimal places. This apparent precision surpasses the degree of accuracy of much of the data on which the computed rates are based. Collection and classification of information about miles of highway, vehicle-miles of travel, and motor vehicle traffic accidents is a highly complex undertaking in which thousands of persons participate. Because of this complexity and the necessity of subjective judgments at many points in the process, the computed rates should be regarded as approximations, not as precise measurements.

In addition to the fatalities reported in this publication, about 1,100 deaths per year occur in motor vehicle *nontraffic* accidents. Such accidents may, for example, occur in private driveways or involve off-the-road recreational or farm vehicles. The inclusion of *nontraffic* deaths in some of the figures published by the National Safety Council explains much of the difference between the statistics published by that organization and the fatality statistics in this book.

Terms used in these tables are defined as follows:

An *injury* is any bodily harm received by any person in a motor vehicle traffic accident.

A *fatal injury* is any injury that results in death within one year of the accident.

A *nonfatal injury* is any injury other than a fatal injury.

A *fatality* is the death of any person who suffers a fatal injury.

A *fatal accident* is a motor vehicle traffic accident resulting in one or more fatal injuries.

A *nonfatal injury accident* is a motor vehicle traffic accident that results in one or more injuries, but no fatal injuries.

A *nonfatally injured person* is one who suffers a nonfatal injury in either a fatal accident or a nonfatal injury accident.

Vehicle-miles are the miles of travel by all types of motor vehicles, as determined by the State highway departments on the basis of actual traffic counts and established estimating procedures.

The *fatal accident rate*, *injury accident rate*, *fatality rate* and *injury rate* are, respectively, the number of fatal accidents, injury accidents, fatalities and nonfatally injured persons per 100 million vehicle-miles (except as indicated in Table VPD-1).

An *urban highway* is any road or street within the boundaries of an urban area. An urban area is an area including and adjacent to a municipality or other urban place with 5,000 or more population. The boundaries of urban areas are fixed by the State highway departments, subject to the approval of the Federal Highway Administration, for purposes of the Federal-aid highway program.

A *rural highway* is any road or street which is not an urban highway.

Paper and microfiche copies of *Fatal and Injury Accident Rates on Federal-Aid and Other Highway Systems* for the years 1967 through 1971 may be purchased from the U. S. Department of Commerce, National Technical Information Service, Springfield, Virginia 22151. Accession numbers are: 1967-PB-206 147; 1968-PB-206 148; 1969-PB-206 151; 1970-PB-206 152; 1971-PB-218 136; 1972-PB-231 045.

The characteristics of the several Federal-aid highway systems referred to in this report may be briefly described as follows:

The Federal-aid Primary, Secondary and Urban highway systems are those for which Federal-aid highway matching funds may be spent by the States. The Primary system is essentially a system of connected main highways which provide intercity and interstate service. The Secondary system consists principally of roads and streets providing local service. The Urban system, established by the Federal-Aid Highway Act of 1970, serves major traffic demands not served by other Federal-aid systems within urban areas.

The Interstate System—a part of the Federal-aid Primary highway system—is a system of

freeways (i.e., expressways with fully controlled access) connecting and serving the principal cities of the United States. That part of the Interstate System which has been completed to Interstate design standards is identified in this publication as "Interstate System (Final)," while "Traveled Way—Interstate System" includes both unfinished segments of Interstate highways and non-Interstate routes serving Interstate traffic until Interstate routes are open for use.

Some unpublished corrections have been incorporated in the national statistics for previous years. The updated national figures are included in each table. Corresponding revisions of State statistics may be obtained from the Federal Highway Administration, Office of Traffic Operations, 400 7th Street, S.W., Washington, D.C. 20590.

Fatality Rate Trends by Highway System, U.S., 1967-1973

* STATE SYSTEM

* Includes all highway systems except Interstate (Final)

NOTE--The significance of each of the above rates is related to the volume of travel on which it is based. Consult the tables on pages 15-38 for travel volumes (vehicle-miles).

Fatal Accident Rates

* STATE SYSTEM

Includes all highway systems except Interstate (Final)

NOTE--The significance of each of the above rates is related to the volume of travel on which it is based. Consult the tables on pages 15-38 for travel volumes (vehicle-miles).

Source: State Highway Department Reports on Federal Highway Administration Table TA.1

Rural Fatal Accident Rates by Highway System and State, 1973

NOVEMBER 1974

(Rates are per 100 million Vehicle Miles)

Fatal and Injury Accident Rates, 1973

* STATE SYSTEM

Includes all highway systems except Interstate (Final)

NOTE--The significance of each of the above rates is related to the volume of travel on which it is based. Consult the tables on pages 15-38 for travel volumes (vehicle-miles).

Fatal and Injury Accident Rates, 1973

* STATE SYSTEM

Includes all highway systems except Interstate (Final)

NOTE--The significance of each of the above rates is related to the volume of travel on which it is based. Consult the tables on pages 15-38 for travel volumes (vehicle-miles).

Rural Nonfatal Injury Rates by Highway System and State, 1973

NOVEMBER 1974

(Rates are per 100 million Vehicle Miles)

TABLE IR-2

* STATE SYSTEM

Includes all highway systems except Interstate (Final)

NOTE--The significance of each of the above rates is related to the volume of travel on which it is based. Consult the tables on pages 15-38 for travel volumes (vehicle-miles).

Fatal and Injury Accident Rates, 1973

* STATE SYSTEM

* Includes all highway systems except Interstate (Final)

NOTE--The significance of each of the above rates is related to the volume of travel on which it is based. Consult the tables on pages 15-38 for travel volumes (vehicle-miles).

Source: State Highway Department Reports on Federal Highway Administration Table TA-1

Nonfatal Injury Accident Rates by Highway System and State, 1973

NOVEMBER 1974

(Rates are per 100 million Vehicle Miles)

Injury Accident Rates

NOTE -- The significance of each of the above rates is related to the volume of travel on which it is based. Consult the tables on pages 15-38 for travel volumes (vehicle-miles).

* STATE SYSTEM

Includes all highway systems except Interstate (Final)

Fatal and Injury Accident Data Related to Vehicle Registrations, Population, and Licensed Drivers, 1973

NOVEMBER 1974

TABLE VPD-1

STATE	REGISTERED VEHICLES		RATES PER THOUSAND VEHICLES				POPULATION		RATES PER THOUSAND POPULATION				LICENSED DRIVERS		RATES PER THOUSAND DRIVERS				STATE	
	NUMBER (THOUSANDS) (1)	VEHICLE MILES PER VEHICLE (2)	FATAL ACCIDENT RATE (3)	FATALITY RATE (4)	INJURY ACCIDENT RATE (5)	INJURY RATE (6)	NUMBER (THOUSANDS) (7)	VEHICLE MILES PER CAPITA (8)	FATAL ACCIDENT RATE (9)	FATALITY RATE (10)	INJURY ACCIDENT RATE (11)	INJURY RATE (12)	NUMBER (THOUSANDS) (13)	VEHICLE MILES PER DRIVER (14)	FATAL ACCIDENT RATE (15)	FATALITY RATE (16)	INJURY ACCIDENT RATE (17)	INJURY RATE (18)
