

8/6/20

MTG w/ CID FORENSICS TEAM

Emin, Les, Daren, Velma

59) was encrypted.

Prob. encrypted at Clerk's Office, then would have to have been decrypted by AUSA

⊗ Metadata doesn't tell you the doc. was changed / altered. ^{just}
 It tells you the file was handled / opened

⊗ "Created date" is when file is created.

If you chg. file name, you are "creating" a new doc.

⊗ Modified - time logs - It proves nothing per Adobe - Not a reliable indicator.

If you redact something, that creates + modifies

If you export a zip file to unencrypt it, it would "create" new doc. would show new "Created" date

⊗ I Text Tool - manipulates / edits pdf files
 you'd use it to redact - if Buis redacted it, it would "create" new doc.

He didn't provide the email for the first doc.

⊗ If you (Buis) were manip. data, why wouldn't he strip out his name.

Encryption / decryption could generate "Created" EY0227
