## NAIC GUIDE TO COMPLIANCE STATE AUDIT REQUIREMENTS

The NAIC has prepared this publication to assist insurers, certified public accountants, and other interested parties in complying with various state filing requirements for annual audited financial reports. These filing requirements generally provide for, among other things, specific information concerning the filing and content of audited financial reports and other related letters and reports with the state insurance department. All of the guidelines in this area have recently been significantly changed and this publication has been created to summarize these new requirements.

On June 11, 2006, the NAIC membership voted to approve amendments to the Annual Financial Reporting Model Regulation (#205), commonly known as the Model Audit Rule. The purpose of this regulation is to improve a state's surveillance of the financial condition of insurers by requiring an independent annual audit of the financial statements by Certified Public Accountants. Significant elements of this regulation are required as an accreditation standard and have been since the creation of the standards. The amendments adopted in 2006 were the result of nearly three years of continued research and discussion by financial regulators, members of industry, public accountants and representatives from trade associations. The revisions deal with primarily three areas: auditor independence, corporate governance and internal control over financial reporting. In 2014, the NAIC membership continued to refine effective financial surveillance and voted to approve a new provision relating to the establishment and maintenance of an internal audit function.

The critical new requirements associated with the 2006 and 2014 revisions have now been adopted by virtually all member states. Citations for each state's statute or regulation containing the relevant provisions have been provided within the publication. The publication summarizes requirements placed on insurers and their external auditors by the Model Audit Rule and compares and contrasts the requirements included within the NAIC Model to those ultimately adopted by each NAIC member state.

The summaries contained herein are not intended to be all-inclusive and should not be relied on solely in determining state-specific requirements. Where a question exists with respect to any requirement, the state's statute or regulation should be reviewed and, where necessary, the state insurance department should be contacted. Every effort has been made to ensure the contents of this publication are complete and factually correct, but the NAIC makes no warranty as to the completeness or correctness of the information provided. All responsibility for compliance with individual state insurance codes rests solely with the insurance company and its independent auditor.

The NAIC is the U.S. standard-setting and regulatory support organization created and governed by the chief insurance regulators from the 50 states, the District of Columbia and five U.S. territories. Through the NAIC, state insurance regulators establish standards and best practices, conduct peer review, and coordinate their regulatory oversight. NAIC staff supports these efforts and represents the collective views of state regulators domestically and internationally. NAIC members, together with the central resources of the NAIC, form the national system of state-based insurance regulation in the U.S.
