

# **2023 Proceedings of the National Association of Insurance Commissioners**

**2023 Spring National Meeting  
March 21 – 25, 2023**

---

**Held at the  
Omni Louisville, Louisville Marriott Downtown, &  
Kentucky International Convention Center  
Louisville, Kentucky**

*The NAIC is the authoritative source for insurance industry information. Our expert solutions support the efforts of regulators, insurers and researchers by providing detailed and comprehensive insurance information. The NAIC offers a wide range of publications in the following categories:*

**Accounting & Reporting**

Information about statutory accounting principles and the procedures necessary for filing financial annual statements and conducting risk-based capital calculations.

**Consumer Information**

Important answers to common questions about auto, home, health and life insurance — as well as buyer's guides on annuities, long-term care insurance and Medicare supplement plans.

**Financial Regulation**

Useful handbooks, compliance guides and reports on financial analysis, company licensing, state audit requirements and receiverships.

**Legal**

Comprehensive collection of NAIC model laws, regulations and guidelines; state laws on insurance topics; and other regulatory guidance on antifraud and consumer privacy.

**Market Regulation**

Regulatory and industry guidance on market-related issues, including antifraud, product filing requirements, producer licensing and market analysis.

**NAIC Activities**

NAIC member directories, in-depth reporting of state regulatory activities and official historical records of NAIC national meetings and other activities.

**Special Studies**

Studies, reports, handbooks and regulatory research conducted by NAIC members on a variety of insurance related topics.

**Statistical Reports**

Valuable and in-demand insurance industry-wide statistical data for various lines of business, including auto, home, health and life insurance.

**Supplementary Products**

Guidance manuals, handbooks, surveys and research on a wide variety of issues.

**Capital Markets & Investment Analysis**

Information regarding portfolio values and procedures for complying with NAIC reporting requirements.

**White Papers**

Relevant studies, guidance and NAIC policy positions on a variety of insurance topics.

**CERTIFICATE OF INCORPORATION OF  
NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS  
a Nonstock Corporation**

**I. Name**

The name of the Corporation is: **National Association of Insurance Commissioners (NAIC)**.

**II. Duration**

The period of duration of the NAIC is perpetual.

**III. Registered Office and Agent**

The NAIC's Registered Office in the State of Delaware is to be located at: 1209 Orange St., in the City of Wilmington, Zip Code 19801. The registered agent in charge thereof is The Corporation Trust Company.

**IV. Authority to Issue Stock**

The NAIC shall have no authority to issue capital stock.

**V. Incorporators**

The name and address of the incorporator are as follows:

Catherine J. Weatherford  
National Association of Insurance Commissioners  
120 W. 12<sup>th</sup> St., Suite 1100  
Kansas City, MO 64106

**VI. Purpose**

The NAIC is organized exclusively for charitable and educational purposes within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law), including without limitation, to assist state insurance regulators, individually and collectively, in serving the public interest and achieving the following fundamental insurance regulatory goals in a responsive, efficient and cost-effective manner, consistent with the wishes of its members:

- (a) Protect the public interest, promote competitive markets and facilitate the fair and equitable treatment of insurance consumers.
- (b) Promote, in the public interest, the reliability, solvency and financial solidity of insurance institutions.
- (c) Support and improve state regulation of insurance.

**VII. Restrictions**

- A. No substantial part of the activities of the Corporation shall be the carrying of propaganda, or otherwise attempting to influence legislation except as otherwise permitted by Section 501(h) of the Code and in any corresponding laws of the State of Delaware, and the Corporation shall not participate in or intervene

in including the publishing or distribution of statements concerning any political campaign on behalf of or in opposition to any candidate for public office.

- B. For any period for which the Corporation may be considered a private foundation, as defined in Section 509(a), the Corporation shall be subject to the following restrictions and prohibitions:
1. The Corporation shall not engage in any act of self-dealing as defined in section 4941(d) of the Code.
  2. The Corporations shall make distributions for each taxable year at such time and in such manner so as not to become subject to the tax on undistributed income imposed by section 4942 of the Code.
  3. The Corporation shall not retain any excess business holdings as defined in section 4943(c) of the Code.
  4. The Corporation shall not make any investments in such manner as to subject it to tax under section 4944 of the Code.
  5. The Corporation shall not make any taxable expenditures as defined in section 4945(d) of the Code.

### **VIII. Membership**

The NAIC shall have one class of members consisting of the Commissioners, Directors, Superintendents, or other officials who by law are charged with the principal responsibility of supervising the business of insurance within each State, territory, or insular possession of the United States. Members only shall be eligible to hold office in and serve on the Executive Committee, Committees and Subcommittees of the NAIC. However, a member may be represented on a Committee or Subcommittee by the member's duly authorized representative as defined in the Bylaws. Only one official from each State, territory or insular possession shall be a member and each member shall be limited to one vote. Any insurance supervisory official of a foreign government or any subdivision thereof, which has been diplomatically recognized by the United States government, may attend and participate in all meetings of this Congress but shall not be a member and shall not have the power to vote.

### **IX. Activities**

The NAIC is a nonprofit charitable and educational organization and no part of the net earnings or property for the corporation will inure to the benefit of, or be distributable to its members, directors, officers or other private individuals, except that the NAIC shall be authorized and empowered to pay reasonable compensation for services rendered by employees and contractors, and to make payments and distributions in furtherance of the purposes set forth in Article VI hereof.

### **X. Powers**

The NAIC shall have all of the powers conferred by the Delaware General Corporation Law for non-profit corporations, except that, any other provision of the Certificate to the contrary notwithstanding, the NAIC shall neither have nor exercise any power, nor carry on any other activities not permitted: (a) by a corporation exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law); or (b) by a corporation contributions to which are deductible under Section 170(c)(2) of the Internal Revenue Code of 1986, as amended, (or the corresponding provision of any future United States Internal Revenue law).

**XI. Immunity**

All officers and members of the Executive Committee shall be immune from personal liability for any civil damages arising from acts performed in their official capacity, and shall not be compensated for their services as an officer or member of the Executive Committee on a salary or a prorated equivalent basis. The immunity shall extend to such actions for which the member of the Executive Committee or officer would not otherwise be liable, but for the Executive Committee member's or officer's affiliation with the NAIC. This immunity shall not apply to intentional conduct, wanton or willful conduct or gross negligence. Nothing herein shall be construed to create or abolish an immunity in favor of the NAIC itself. Nothing herein shall be construed to abolish any immunities held by the state officials pursuant to their individual state's law.

**XII. Exculpation and Indemnification**

A member of the Executive Committee shall not be liable to the NAIC or its members for monetary damages for breach of fiduciary duty as a member of the Executive Committee, provided that this provision shall not eliminate or limit the liability of a member of the Executive Committee for any breach of the duty of loyalty to the NAIC or its members, for acts or omissions not in good faith, or which involve intentional misconduct or a knowing violation of law, or for any transaction from which the member of the Executive Committee involved derived an improper personal benefit. Any amendment, modification or repeal of the foregoing sentence shall not adversely affect any right or protection of a member of the Executive Committee of the Corporation hereunder in respect of any act or omission occurring prior to the time of such amendment, modification, or repeal. If the Delaware General Corporation Law hereafter is amended to authorize the further elimination or limitation of the liability of the members of the Executive Committee, then the liability of a member of the Executive Committee, in addition to the limitation provided herein, shall be limited to the fullest extent permitted by the amended Delaware General Corporation Law.

The NAIC shall indemnify to the full extent authorized or permitted by the laws of the State of Delaware, as now in effect or as hereafter amended, any person made or threatened to be made a party to any threatened, pending or completed action, suit or proceeding (whether civil, criminal, administrative or investigative, including an action by or in the right of the NAIC) by reason of the fact that the person is or was a member of the Executive Committee, officer, member, committee member, employee or agent of the NAIC or serves any other enterprise as such at the request of the NAIC.

The foregoing right of indemnification shall not be deemed exclusive of any other rights to which such person may be entitled apart from this Article XII. The foregoing right of indemnification shall continue as to a person who has ceased to be a member of the Executive Committee, officer, member, committee member, employee or agent and shall inure to the benefit of the heirs, the executors and administrators of such a person.

**XIII. Dissolution**

In the event of the dissolution of the NAIC, the Executive Committee shall, after paying or making provision for the payment of all of the liabilities of the NAIC, dispose of all the assets of the NAIC equitably to any state government which is represented as a member of the NAIC at the time of dissolution, provided that the assets are distributed upon the condition that they be used primarily and effectively to implement the public purpose of the NAIC, or to one or more such organizations organized and operated exclusively for religious, charitable, education, scientific, or literary purposes or similar purposes as shall at the time qualify: (a) as an exempt organization under Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law); and (b) as an organization contributions to which are deductible under Section 170(c) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law), as the Executive Committee shall determine.

**XIV. Bylaws**

The Bylaws of the NAIC may prescribe the powers and duties of the several officers, members of the Executive Committee and members and such rules as may be necessary for the work of the NAIC provided they are in conformity with the Certificate of Incorporation.

**XV. Amendments**

This Certificate of Incorporation may be altered or amended at any meeting of the full membership (Plenary Session) of the NAIC by an affirmative vote of two-thirds of the members qualified to vote, or their authorized representatives, provided that previous notice of the proposed amendment has been mailed to all members by direction of the Executive Committee at least thirty (30) days prior to the meeting.

**IN WITNESS WHEREOF**, this Certificate of Incorporation has been signed this 4th day of October 1999.

/signature/

Catherine J. Weatherford, Incorporator

*ADOPTED 1999, Proc. Third Quarter*

*Adopted October 1999*

*Amended October 2011*  
*Amended December 2015*  
*Amended December 2021*

*Bylaws of the NAIC, a Delaware Non-Profit Corporation*

**BYLAWS OF THE  
 NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS**

**ARTICLE I**

**Name, Organization and Location**

The name of this corporation is **NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS** (NAIC). The NAIC is organized under the General Corporation Law of the State of Delaware. The NAIC may have one (1) or more office locations within or without the State of Delaware as the Executive Committee may from time to time determine.

**ARTICLE II**

**Membership**

The Membership of the NAIC shall be comprised of those persons designated as members in the Certificate of Incorporation. Each member of the NAIC shall have the power to vote and otherwise participate in the affairs of the NAIC as set forth herein or as required by applicable law. This power may be exercised through a duly authorized representative who shall be a person officially affiliated with the member's department and who is wholly or principally employed by said department.

The organization may charge members an annual assessment, the amount of which shall be determined by the Executive Committee. Members failing to pay all NAIC assessments on a timely basis shall be placed in an inactive status. Members in an inactive status shall not have any voting rights and shall be denied membership on NAIC committees and task forces, access to mailings and services of the NAIC Offices, as well as access to zone examination processes and other benefits of membership in the NAIC.

The NAIC's receipt of full payment from the inactive member of all current and past due assessments shall serve to immediately remove them from inactive status.

The Membership of the NAIC shall be subject to a conflict of interest policy and disclosure form as adopted by the members.

The Executive Committee is empowered to reinstate, in part or in whole, an inactive member's participation on the committees and task forces, access to mailings and services of the NAIC Offices and satellite offices, as well as access to zone examination processes, and other benefits of membership in the NAIC upon good cause shown as determined by the Executive Committee.

### **ARTICLE III**

#### **Officers**

The officers of the NAIC shall be a President, a President-Elect, a Vice President, and a Secretary-Treasurer. Annual officer elections shall be held at the last regular National Meeting of each calendar year or at such other plenary session as agreed to by the members. The voting membership, by secret ballot, shall elect officers as provided in these Bylaws. Officers' terms shall be for one year, beginning on January 1 following their election. The officers shall hold office until their death, resignation, removal or the election and qualification of their successors, whichever occurs first. Any Officer may resign at any time by giving notice thereof in writing to the President of the NAIC. Any such resignation will take effect upon delivery if no date is specified, or as of its date, unless some other date is specified therein, in which event it will be effective as of that date. The acceptance of that resignation will not be necessary to make it effective.

If an interim vacancy occurs in the office of President, the President-Elect shall cease to hold his or her office effective immediately and shall assume the office of President. If an interim vacancy occurs in any one or more of the other officer positions, an interim election shall be held to fill the vacancy. No member may hold any office for more than two consecutive years. Notwithstanding the foregoing, at no time shall more than two officer positions be filled by members of the same Zone during the same term. Any officer may be removed from office by the affirmative vote of two-thirds (2/3) of the members, but only after a resolution for removal is adopted by two-thirds (2/3) of the Executive Committee whenever, in their judgment, the best interests of the NAIC would be served thereby.

The President shall serve as Chairman of the Executive Committee and shall preside at all special and regular meetings of the members. The President shall serve as the leader of the organization and its principal spokesperson. The President shall work closely with the Executive Committee to establish and achieve the strategic, business and operational goals of the organization; ensure appropriate policies and procedures for the organization are implemented and followed; and protect the integrity as well as the resources of the organization. After a member completes his or her term or terms as President, he or she shall not be able to hold another officer position for a period of twelve (12) months from the date such member completes his or her term or terms as President, which shall be referred to as a "waiting period"; provided however, the Executive Committee may waive the twelve month waiting period if warranted by exigent circumstances.

The President-Elect shall serve as Vice-Chairman of the Executive Committee. In the absence of the President at a duly convened meeting of the Executive Committee or at a regular or special meeting of the members, the President-Elect shall preside over such meeting to the extent of the President's absence. The President-Elect shall perform such other duties and tasks as may be assigned by the President. Where the President does not run for re-election, the President-Elect shall become President at the conclusion of the President's term of office.

The Vice President, in the absence of the President and President-Elect at a duly convened meeting of the Executive Committee or at a regular or special meeting of the members, shall preside over such meeting to the extent of the President's and the President-Elect's absence; and shall perform such other duties as may be assigned by the President or President-Elect, or in the absence thereof, by the Executive Committee.

The Secretary-Treasurer shall assist the President and, as applicable, the President-Elect or the Vice President in the conduct of meetings of the Executive Committee and members. For member meetings, the Secretary-Treasurer shall call the roll of the membership and certify the presence of a quorum and shall receive, validate and maintain all proxies for elections held at member meetings. The Secretary-Treasurer shall also recommend to the Executive Committee such policies and procedures to maintain the history and continuity of the NAIC. The

Secretary-Treasurer shall also assist the President and President-Elect in all matters relating to the budget, accounting, expenditure and revenue practices of the NAIC; including, but not limited to reviewing the financial information of the organization and consulting with NAIC management, independent auditors, and other necessary parties regarding the financial operations and condition of the organization.

## **ARTICLE IV**

### **Executive Committee**

The business and affairs of the NAIC shall be managed by and under the direction of the Executive Committee. The Executive Committee shall be made up entirely of members of the NAIC. The Executive Committee shall consist of the following members: the officers of the NAIC; the most recent past president; the twelve (12) members of the zones as provided for in Article V of these Bylaws. The members of the Executive Committee shall be subject to a conflict of interest policy as adopted by the members. Any Executive Committee member may resign at any time by giving notice thereof in writing to the members of the NAIC. Resignation as an Executive Committee member also operates as resignation as a Zone officer. Any such resignation will take effect upon delivery if no date is specified, or as of its date, unless some other date is specified therein, in which event it will be effective as of that date. The acceptance of that resignation will not be necessary to make it effective.

1. The Executive Committee shall have the authority and responsibility to:
  - (a) manage the affairs of the NAIC in a manner consistent with the Certificate of Incorporation and Bylaws.
  - (b) make recommendations to achieve the goals of the NAIC based upon either its own initiative or the recommendations of the Standing Committees or Subcommittees reporting to it, for consideration and action by the members at any NAIC Plenary Session.
  - (c) create and terminate one or more Task Forces reporting to it to the extent needed and appropriate.
  - (d) establish and allocate, from time to time, functions and responsibilities to be performed by each Zone.
  - (e) to the extent needed and appropriate, oversee NAIC Offices to assist the NAIC and the individual members in achieving the goals of the NAIC.
  - (f) submit to the NAIC at each National Meeting, during which a Plenary Session is held, its report and recommendations concerning the reports of the Standing Committees. All Standing Committee reports shall be included as part of the Executive Committee report.
  - (g) plan, implement and coordinate communications and activities with other state, federal and local government organizations in order to advance the goals of the NAIC and promote understanding of state insurance regulation.
  
2. Duties and Operations of the Executive Committee.
  - (a) The Executive Committee shall hold at least two (2) regular meetings annually at a designated time and place. Special meetings may be held when called by the President, or by at least three (3) members of the Executive Committee in writing. In any case, the Executive Committee shall meet at least once per calendar month. At least five (5) days notice shall be given of all regular and special meetings. Meetings

may be held in person or by means of conference telephone or other communication equipment by means of which all persons participating in the meeting can hear each other, and such participation in a meeting shall constitute presence in person at such meeting in accordance with applicable laws. The presiding member of the Executive Committee shall only cast his or her vote in order to break a tie vote. In addition, the Executive Committee may act by written consent as provided by law.

- (b) The Executive Committee may, with the concurrence of two-thirds of the members of the Executive Committee, establish rules for its conduct that shall not conflict with the Certificate of Incorporation and Bylaws. Such rules may be changed only by a concurrence of two-thirds of the members of the Executive Committee after twenty-four (24) hours notice to all members of the Executive Committee.
- (c) Any action required or permitted to be taken at any meeting of the Executive Committee or any committee thereof may be taken without a meeting if all members of the Executive Committee or such committee, as the case may be, consent thereto in writing in accordance with applicable law.
- (d) The Executive Committee shall cause to be kept minutes of its meeting and have information of any action of a general character taken by it published to members qualified to vote.

(e) NAIC OFFICES

- (i) The Executive Committee shall oversee an Executive Office and a Central Office with management and staff personnel and appropriate resources for performance of duties and assigned responsibilities. Additional satellite offices may be established as needed. The Executive Committee shall have the authority to select, employ and terminate a Chief Executive Officer who shall not be a member of the NAIC and who shall have the primary responsibility for the internal management and functioning of the NAIC Offices within the direction of the Executive Committee, as well as other duties assigned by the Executive Committee through execution of an Employment Agreement or other authorization. The Chief Executive Officer appointed by the Executive Committee pursuant to this section shall not be considered an officer for purposes of Article III hereof and shall not be a member of the Executive Committee. The Executive Committee, through the Internal Administration (EX1) Subcommittee, shall provide oversight and direction to the Chief Executive Officer regarding Office operations.
- (ii) Consistent with the purposes of the NAIC, the role of the NAIC Offices is to: (1) provide services to the NAIC through support to the NAIC Committees, Subcommittees, Task Forces or otherwise; (2) provide services to individual State insurance departments; and (3) develop recommendations for consideration as to NAIC policy and administrative decisions of the NAIC.
- (iii) In performing its role, subject to the oversight and direction specified in (paragraph i) the NAIC Offices may engage in a variety of functions including but not limited to the following: research; analysis; information gathering and dissemination; library services; data collection; data base building and maintenance; report generation and dissemination; government liaison; non-regulatory liaison; securities valuation; administration; litigation; legislative and regulatory drafting; and educational development.
- (iv) The Chief Executive Officer shall prepare an annual budget, related to the priorities of the NAIC, for the NAIC Offices to be submitted through the EX1 Subcommittee to the Executive Committee, which shall make its recommendations to the members of the NAIC for action at the next Plenary Session of the NAIC.

### 3. Internal Administration (EX1) Subcommittee

The Internal Administration (EX1) Subcommittee shall be a Subcommittee reporting to the Executive Committee. Appointments of the Chair and Vice Chair of the Executive Subcommittee and members other than those specifically designated herein shall be made by the President and President-Elect.

This Subcommittee shall be comprised of the President, President-Elect, Vice President, the Secretary-Treasurer, the most recent past President, and three (3) other members of the Executive Committee. The presiding member of the Subcommittee shall only cast his or her vote in order to break a tie vote.

The Internal Administration (EX1) Subcommittee shall:

- (a) Exercise such powers and authority as may be delegated to it by the Executive Committee.
- (b) Generally oversee the NAIC Offices including, without limitation: (i) periodically monitor operations of the NAIC Offices, (ii) review and revise the budget of the NAIC, hold an annual hearing to receive public comments on the budget of the NAIC, and submit the revised budget to the Executive Committee, (iii) approve emergency expenditures which vary from the adopted budget and promptly certify its action in writing to the Executive Committee, (iv) evaluate the Chief Executive Officer and make appropriate recommendations to the Executive Committee, (v) assist the Chief Executive Officer in resolving competing demands for NAIC resources, (vi) review compensation of all senior management and (vii) quarterly prepare a report containing the current budget and expenditures which the Secretary-Treasurer shall present to the Executive Committee.

### 4. Audit Committee

The Executive Committee shall appoint an Audit Committee made up of at least four (4) members of the NAIC, including at least one member from each zone, in addition to the NAIC Secretary-Treasurer. The NAIC Secretary-Treasurer shall chair the Audit Committee. The Audit Committee shall report to the Executive Committee without any NAIC employees being present. The Audit Committee shall be directly responsible for the appointment, compensation, and oversight of the independent certified public accountant employed to conduct the audit. The Audit Committee shall also have the power, to the extent permitted by law, to: (i) initiate or review the results of an audit or investigation into the business affairs of the NAIC; (ii) review the NAIC's financial accounts and reports; (iii) conduct pre-audit and post-audit reviews with NAIC staff, members and independent auditors; and (iv) exercise such other powers and authority as delegated to it by the Executive Committee.

## **ARTICLE V**

### **Zones**

To accomplish the purposes of the NAIC in a timely and efficient manner, the United States, its territories and insular possessions shall be divided into four Zones. Each Zone shall consist of a group of at least eight States, located in the same geographical area, with each State being contiguous to at least one other State in the group so far as practicable, plus any territory or insular possession that may be deemed expedient, all as determined by majority of the Executive Committee. Members of each Zone shall annually elect a Chairman, a Vice Chairman and a Secretary from among themselves prior to or during the last regular National Meeting of each calendar year or at such time as agreed to by the Zone members. The Chairman, Vice Chairman and Secretary of each Zone shall be members of the Executive Committee with terms of office corresponding to that of the officers. Each Zone shall perform such functions as are designated by the Executive Committee of the

NAIC or by the members of the NAIC as a whole or by the members of the Zone. Each Zone may hold Zone Meetings for such purposes as may be deemed appropriate by members of the Zone.

## **ARTICLE VI**

### **Standing Committees and Task Forces**

#### 1. General

The Standing Committees shall not be subcommittees of the Executive Committee and shall have no power or authority for the management of the business and affairs of the NAIC. Each Standing Committee shall be composed of not more than 15 members, including a Chair and one or more Vice Chairs, appointed by the President and President-Elect, and such appointments shall remain effective until the succeeding President and President-Elect appoint members for the following year. Standing Committees shall meet at least twice a year at National Meetings and may meet more often at the call of the Chair as required to complete its assignments from the Executive Committee in a timely manner.

The Executive Committee shall make all assignments of subject matter to the Standing Committees and shall require coordination between Committees and Task Forces of the subject matter if more than one Committee or Task Force is affected. The format of the Committee reports shall be prescribed by the Executive Committee. All appointments or elections of members of the NAIC to any office or Committee of the NAIC shall be deemed the appointment or election of a particular member and shall not automatically pass to a successor in office.

#### 2. Specific Duties

The Standing Committees of the NAIC, their duties and responsibilities shall be as follows:

- (a) Life Insurance and Annuities (A) Committee: This Standing Committee shall consider issues relating to life insurance and annuities.
- (b) Health Insurance and Managed Care (B) Committee: This Standing Committee shall consider issues relating to health and accident insurance and managed care.
- (c) Property and Casualty Insurance (C) Committee: This Standing Committee shall consider issues relating to personal and commercial lines of property and casualty insurance, worker's compensation insurance, statistical information, surplus lines, and casualty actuarial matters.
- (d) Market Regulation and Consumer Affairs (D) Committee: This Standing Committee shall consider issues involving market conduct in the insurance industry; competition in insurance markets; the qualifications and conduct of agents and brokers; market conduct examination practices; the control and management of insurance institutions; consumer services of State insurance departments; and consumer participation in NAIC activities.
- (e) Financial Condition (E) Committee: This Standing Committee shall consider both administrative and substantive issues as they relate to accounting practices and procedures; blanks; valuation of securities; the Insurance Regulatory Information System (IRIS), as it relates to solvency and profitability; the call, monitoring and concluding report of Zone Examinations; and financial examinations and examiner training.
- (f) Financial Regulation Standards and Accreditation (F) Committee: This Standing Committee shall consider

both administrative and substantive issues as they relate to administration and enforcement of the NAIC Accreditation Program, including without limitation, consideration of standards and revisions of standards for accreditation, interpretation of standards, evaluation and interpretation of states' laws and regulations, and departments' practices, procedures and organizations as they relate to compliance with standards, examination of members for compliance with standards, development and oversight of procedures for examination of members for compliance with standards, qualification and selection of individuals to perform the examination of members for compliance with standards, and decisions regarding whether to accredit members.

(g) International Insurance Relations (G) Committee. This Standing Committee shall have the responsibility for issues relating to international insurance.

(h) Innovation, Cybersecurity and Technology (H) Committee. This Standing Committee shall consider issues related to cybersecurity, innovation, data security and privacy, and emerging technology issues.

### 3. Task Forces

The Executive Committee, its Subcommittee and the Standing Committees may establish one or more Task Forces, subject to approval of the Executive Committee. The parent Committee or Subcommittee, subject to approval of the Executive Committee, may vote to discontinue a Task Force once its charge has been completed.

Vacancies in the positions of Chair or Vice Chair of any Task Force shall be filled by the parent Committee or Subcommittee from within or outside the present Task Force membership; provided, however, that the chief insurance regulatory official of the state of the former Chair or Vice Chair shall become a member of the Task Force. A vacancy in the position of member shall be filled by the chief insurance regulatory official of the vacating member's state.

If an existing Task Force is dealing with insurance issues that require continuing study, the Executive Committee may adopt the recommendation of the parent Committee or Subcommittee that the Task Force be designated a Standing Task Force. A Standing Task Force shall continue in effect until terminated by the Executive Committee.

## **ARTICLE VII**

### **Meetings of the Membership**

#### 1. Regular Meetings

The NAIC shall hold at least two (2) regular meetings of the members ("National Meetings") each calendar year. Notice, stating the place, day and hour and any special purposes of the National Meeting, shall be delivered by the Executive Committee not less than ten (10) calendar days nor more than sixty (60) calendar days before the date on which the National Meeting is to be held, either personally, by mail or by other lawful means, to each member entitled to be present and vote at such meeting.

#### 2. Special Meetings

Special meetings of the members may be called by any five (5) members of the Executive Committee by giving all members notice of such meeting at least ten (10) but not more than sixty (60) days prior thereto, or by any twenty (20) members of the NAIC by giving all members notice of such meeting at least thirty (30) but not more than sixty (60) days prior thereto. Notice of the special meeting shall state the place, day and hour of the

special meeting and the purpose or purposes for which the special meeting is called, and shall be delivered by the persons calling the meeting within the applicable time period set forth herein, either personally, by mail or by other lawful means, to each member entitled to be present and vote at such meeting.

### 3. Waiver of Notice; Postponement

Member meetings may be held without notice if all members entitled to notice are present (except when members entitled to notice attend the meeting for the express purpose of objecting, at the beginning of the meeting, because the meeting is allegedly not lawfully called or convened), or if notice is waived by those not present. Any previously scheduled meeting of the members may be postponed by the Executive Committee (or members calling a special meeting, as the case may be) upon notice to members, in person or writing, given at least two (2) days prior to the date previously scheduled for such meeting.

### 4. Quorum

Except as otherwise provided by law or by the Certificate of Incorporation, the presence, by person or proxy, of a majority of the members shall constitute a quorum at a member meeting, a meeting of a Standing Committee, Task Force or a working group. The chairman of the meeting may adjourn the meeting from time to time, whether or not there is such a quorum. The members present at a duly called member meeting at which a quorum is present may continue to transact business until adjournment, notwithstanding the withdrawal of enough members to leave less than a quorum.

5. Any meeting of the NAIC may be held in executive session as defined in the NAIC policy on open meetings. Any member may attend and participate in any meeting of the NAIC or any meeting of a Standing Committee or Task Force whether or not such member has the right to vote. All National Meetings shall provide for a Plenary Session of the NAIC as a whole in order to consider and take action upon the matters submitted to the NAIC.

## **ARTICLE VIII**

### **Elections**

1. The election of officers of the NAIC shall be scheduled for the plenary session of the last National Meeting of the calendar year or at such other plenary session as agreed to by the members.
2. At the beginning of such Plenary Session, the Secretary-Treasurer shall ascertain and announce the presence of a quorum.
3. Upon the determination of a quorum, the chair shall briefly review the provisions of the Certificate of Incorporation and Bylaws in regard to voting.
4. The President shall ask for and announce all proxies. Proxies shall be held by the Secretary-Treasurer or a designee throughout the election session. Proxies shall be valid, subject to their term, until superseded by the member and shall be governed by ARTICLE IX of the Bylaws.
5. Every individual voting by proxy must meet the requirements of Article II of the Bylaws of the NAIC which requires that such a person be "...officially affiliated with the member's (the member delegating authority to vote) department, and is wholly or principally employed by said department."
6. Prior to opening the nominations for office, the Chair shall appoint three (3) members of the NAIC to act as

voting inspectors. The voting inspectors shall distribute, collect, count and/or verify ballots, and report their findings to the Secretary-Treasurer. If a voting inspector is nominated for an office and does not withdraw as a candidate, he or she shall not be a voting inspector for the election of the office to which he or she is nominated and the chair shall appoint another voting inspector in his or her place.

7. The Chair shall announce the opening of nominations for offices in the following order:
  - (a) President. Provided, however, where the President does not run for re-election, the President-Elect shall become President at the conclusion of the President's term of office. In those cases where the President runs for re-election or where a vacancy exists because the President-Elect fails or is otherwise unable to assume the Presidency, this office will be subject to an election.
  - (b) President-Elect.
  - (c) Vice President.
  - (d) Secretary-Treasurer.
8. Only members or duly authorized proxyholders may make nominations.
9. One nominating speech, not to exceed three (3) minutes in duration, shall be allowed for each nominee.
10. After nominations are closed for each office, each nominee must indicate whether he or she accepts the nomination and, if he or she accepts, shall be permitted to address the membership for a period of up to seven (7) minutes. Such addresses shall be given in the order by which the nominations were made.
11. The votes of members, in person or by proxy, constituting a majority of the quorum present at the meeting shall be necessary for election to such office. If no candidate receives a majority, the two candidates with the most votes will participate in a run-off election. The candidate with the most votes in the run-off election shall win such election.
12. Voting need not be by written ballot, unless otherwise required by these Bylaws, the Certificate of Incorporation, or applicable law.

## **ARTICLE IX**

### **Proxies; Waiver of Notice**

Where the delegation of power to vote or participate in the membership of the NAIC is required by ARTICLE II of these Bylaws to be in writing, such delegation must be effected by proxy. All proxies must be dated, give specific authority to a named individual who meets the requirements of ARTICLE II for duly authorized representatives, and meet any other applicable legal requirement. Documents such as electronic transmission, telegrams, mailgrams, etc. are acceptable as proxies if they otherwise meet the requirements contained herein and applicable law. Proxies should be maintained by NAIC Central Office staff. Notwithstanding the foregoing, a member may not vote by proxy in a meeting of the Executive Committee, Financial Regulation Standards and Accreditation (F) Committee in a vote concerning a state-specific item, Government Relations Leadership Council, or International Insurance Relations Leadership Group, or any respective subcommittees.

Whenever any notice is required to be given to any member (for a meeting of members or the Executive Committee) under the provisions of the Certificate of Incorporation, these Bylaws or applicable law, a written

waiver, signed by the person entitled to notice, or a waiver by electronic transmission by person entitled to notice, whether before or after the time stated therein, shall be deemed equivalent to the giving of such notice. Neither the business to be transacted at, nor the purpose of, any annual or special meeting of the members or any committee, subcommittee or task force need be specified in any waiver of notice of such meeting.

Unless otherwise restricted by the Certificate of Incorporation or these Bylaws, Members may participate in a meeting by means of conference telephone or by any means by which all persons participating in the meeting are able to communicate with one another, and such participation shall constitute presence in person at the meeting.

Any notice required under these Bylaws may be provided by mail, facsimile, or electronic transmission.

## **ARTICLE X**

### **Procedures: Books and Records**

The Executive Committee shall adopt policies and procedures for the conduct of meetings. In the event such policies and procedures conflict with the NAIC's Certificate of Incorporation or Bylaws, the Certificate of Incorporation and Bylaws shall govern.

The books and records of the NAIC may be kept outside the State of Delaware at such place or places as may from time to time be designated by the Internal Administration Subcommittee (EX1) of the Executive Committee.

## **ARTICLE XI**

### **Amendments**

These Bylaws may be altered or repealed and new Bylaws may be adopted at any regular or special meeting of the members by an affirmative vote, in person or by proxy, of a majority of the members entitled to vote at such meeting; provided, however, that any proposed alteration (except to correct typographical or grammatical errors or article, section or paragraph cross- references caused by other alterations, repeals, or adoptions) or repeal of, or the adoption of any Bylaw inconsistent with, Article II [Membership], Article VII, Paragraph 2 [Special Meetings of Members] and Paragraph 4 [Quorum], Article VIII [Elections], or this Article XI [Amendments] of these Bylaws (the "Supermajority Bylaws") by the members shall require the affirmative vote, in person or by proxy, of at least two-thirds (2/3) of the members entitled to vote at such meeting and provided, further, that in the case of any such member action at a special meeting of members, notice of the proposed alteration, repeal or adoption of the new Bylaw or Bylaws must be contained in the notice of such special meeting. Corrections for typographical or grammatical errors or to article, section or paragraph cross- references caused by other alterations, repeals or adoption, shall only be made if approved by the affirmative vote of at least two-thirds (2/3) of the Executive Committee.

Adopted October 1999, see 1999 Proc., Third Quarter page 7

Amended November 2002, see 2002 Proc., Fourth Quarter page 25

Amended September 2009, see 2009 Proc., Third Quarter

Amended October 2011, see Proc., Summer 2011

Amended December 2015, see Proc., Spring 2016  
Amended December 2021, see Proc., Spring 2022

**NAIC Policy Statement on Open Meetings**  
**Revised: April 1, 2014**

The NAIC is the U.S. standard-setting and regulatory support organization created and governed by the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories. NAIC members are the elected and appointed state government officials who, along with their departments and staff, regulate the conduct of insurance companies and agents in their respective state or territory. The NAIC is committed to conducting its business openly. This policy statement applies to meetings of NAIC committees, subcommittees, task forces and working groups. It does not apply to Roundtable discussions, zone meetings, commissioners' conferences, and other like meetings of the members. Applicable meetings will be open unless the discussion or action contemplated will include:

1. Potential or pending litigation or administrative proceedings which may involve the NAIC, any NAIC member, or their staffs, in any capacity involving their official or prescribed duties, requests for briefs of amicus curiae, or legal advice.
2. Pending investigations which may involve either the NAIC or any member in any capacity.
3. Specific companies, entities or individuals, including, but not limited to, collaborative financial and market conduct examinations and analysis.
4. Internal or administrative matters of the NAIC or any NAIC member, including budget, personnel and contractual matters, and including consideration of internal administration of the NAIC, including, but not limited to, by the Internal Administration (EX1) Subcommittee or any subgroup appointed thereunder.
5. Voting on the election of officers of the NAIC.
6. Consultations with NAIC staff members related to NAIC technical guidance, including, but not limited to, Annual and Quarterly Statement Blanks and Instructions, the Accounting Practices and Procedures Manual, and similar materials.
7. Consideration of individual state insurance department's compliance with NAIC financial regulation standards by the Financial Regulation Standards and Accreditation (F) Committee or any subgroup appointed thereunder.
8. Consideration of strategic planning issues relating to federal legislative and regulatory matters or international regulatory matters.
9. Any other subject required to be kept confidential under any Memorandum of Understanding or other agreement, state or federal law or under any judicial or administrative order.

Because not all situations requiring a regulator to regulator discussion can be anticipated at the time a meeting is scheduled, a meeting convened in open session can move into regulator to regulator session on motion by the chair or other member approved by a majority of the members present. Public notice will be provided of all applicable meetings. The reason for holding a meeting in regulator only session will be announced when the meeting notice is published, at the beginning of any regulator only session, and when an open meeting goes into regulator only session.

This revised policy statement shall take effect upon adoption by the membership.

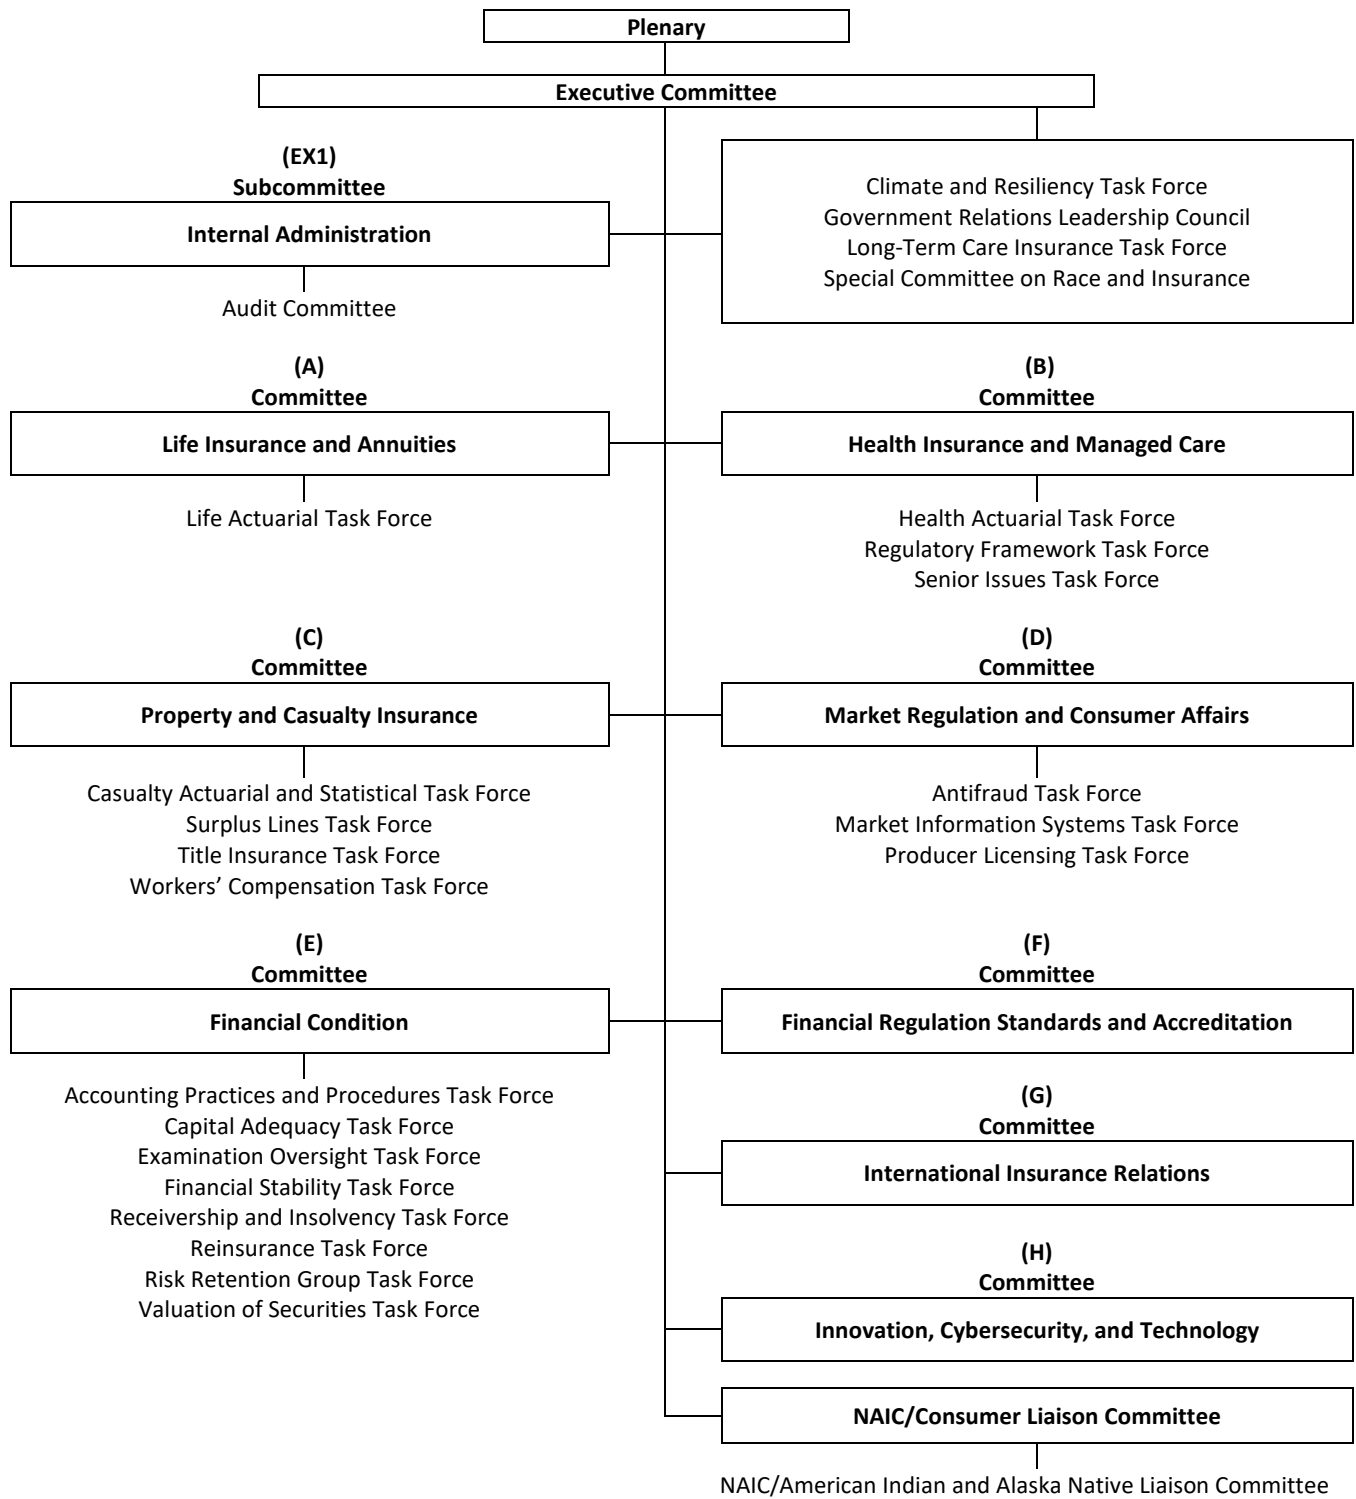

[NOTE: (Effective Jan. 1, 1996, conference call meetings are included in the application of the policy statement, by action of the NAIC on June 4, 1995). This policy statement was originally adopted by the NAIC membership during the 1994 Fall National Meeting in Minneapolis, Minnesota, Sept. 18–20, 1994.]

1. Sept. 23, 1886: John K. Tarbox (MA) was elected President for the 1887 Convention; Samuel H. Cross (RI) was elected Vice-President; and Robert B. Brinkerhoff (Ohio chief clerk) was elected Secretary. Commissioner Tarbox died May 28, 1887. Auditor Cross was out of office effective June 1, 1887. Mr. Brinkerhoff was out of office effective June 3, 1887. Oliver Pillsbury (NH) was chosen to preside over the 1887 Convention. It is unknown who acted as Vice-President. Jacob A. McEwen (Ohio chief clerk) was chosen to act as Secretary.
2. Aug. 21, 1890: Charles B. Allan (Nebraska deputy auditor) was elected Secretary for the 1891 Convention; however, he resigned before the Convention assembled. Sept. 30, 1891: John J. Brinkerhoff (Illinois actuary) was elected Secretary for the 1891 Convention.

3. Sept. 18, 1895: William M. Hahn (OH) was elected President for the 1896 Convention and James R. Waddill (MO) was elected Vice-President; however, Superintendent Hahn was out of office effective June 3, 1886. Sept. 22, 1896: Superintendent Waddill was elected President for the 1896 Convention and Stephen W. Carr (ME) was chosen to act as Vice-President.
4. Sept. 23, 1896: James R. Waddill (MO) was elected President for the 1897 Convention and Stephen W. Carr (ME) was elected Vice-President; however, Mr. Waddill was out of office effective March 1, 1897. Sept. 7, 1897: Commissioner Carr was elected President for the 1897 Convention. It is unknown who acted as Vice-President.
5. Sept. 23, 1896: Frederick L. 'Fred' Cutting (MA) was elected Secretary for the 1897 Convention; however, he was out of office at the date of the Convention. Sept. 7, 1897: John J. Brinkerhoff (Illinois actuary) was elected Secretary for the 1897 Convention.
6. Sept. 7, 1897: Frederick L. 'Fred' Cutting (MA) was elected Secretary for the 1898 Convention; however, he declined the offer. Sept. 13, 1898: John J. Brinkerhoff (Illinois actuary) was elected Secretary for the 1898 Convention.
7. Sept. 15, 1898: Elmer H. Dearth (MN) was elected President for the 1899 Convention; however, he was out of office at the date of the Convention. Sept. 5, 1899: Edward T. Orear (MO) was elected President for the 1899 Convention.
8. Sept. 20, 1900: John A. O'Shaughnessy (MN) was elected President for the 1901 Convention; however, he was out of office at the date of the Convention. September 1901: William H. Hart (IN) was elected President for the 1901 Convention.
9. Sept. 29, 1910: Theodore H. Macdonald (CT) was elected Vice-President for the 1911 Convention; however, he was out of office at the date of the Convention. It is unknown who acted as Vice-President.
10. Aug. 25, 1911: Harry R. Cunningham (MT) was elected Secretary for the 1912 Convention; however, he resigned before the Convention assembled. March 1912: Fitz Hugh McMaster (SC) was elected Secretary for the 1912 Convention.
11. Aug. 1, 1913: Willard Done (UT) was elected First Vice-President for the 1914 Convention; however, he resigned before the Convention assembled. It is unknown who acted as First Vice-President.
12. Aug. 31, 1917: Emory H. English (IA) was elected President for the 1918 Convention; Robert J. Merrill (NH) was elected First Vice-President; and Michael J. Cleary (WI) was elected Second Vice-President. November 1917: Mr. Merrill resigned as First Vice-President. Dec. 6, 1917: Mr. Cleary was elected First Vice-President for the 1918 Convention and Walter K. Chorn (MO) was elected Second Vice-President. Jan. 1, 1918: Mr. English resigned as President and Mr. Cleary was elected President for the 1918 Convention by the Executive (EX) Committee. It is unknown who acted as First Vice-President.
13. Aug. 31, 1917: Fitz Hugh McMaster (SC) was elected Secretary for the 1918 Convention; however, he resigned before the Convention assembled. Dec. 6, 1917: Joseph L. Button (VA) was elected Secretary for the 1918 Convention.
14. Sept. 12, 1919: John B. Sanborn (MN) was elected Second Vice-President for the 1920 Convention; however, he resigned before the Convention assembled. June 1920: Alfred L. Harty (MO) was chosen to act as Second Vice-President for the 1920 Convention.
15. Sept. 3, 1920: Frank H. Ellsworth (MI) was elected President for the 1921 Convention; Alfred L. Harty (MO) was elected First Vice-President; and Thomas B. Donaldson (PA) was elected Second Vice-President. Commissioner Ellsworth resigned effective April 30, 1921, as NAIC President and Michigan Insurance Commissioner. June 27, 1921: Superintendent Harty was elected President for the 1921 Convention by the Executive (EX) Committee; Commissioner Donaldson was elected First Vice-President; and Platt Whitman (WI) was elected Second Vice-President.
16. Sept. 8, 1922: Platt Whitman (WI) was elected President for the 1923 Convention; Herbert O. Fishback (WA) was elected First Vice-President; and John C. Luning (FL) was elected Second Vice-President. July 1, 1923: Commissioner Whitman resigned as President; Commissioner Fishback was elected President for the 1923 Convention by the Executive (EX) Committee; and Mr. Luning was elected First Vice-President by the Executive (EX) Committee. It is unknown who acted as Second Vice-President.
17. Sept. 18, 1925: William R. C. Kendrick (IA) was elected President for the 1926 Convention. January 1926: Commissioner Kendrick resigned as NAIC President and Harry L. Conn (OH) was elected President for the 1926 Convention. Commissioner Kendrick remained as Iowa Insurance Commissioner until March 1, 1926.

18. Nov. 19, 1926: Harry L. Conn (OH) was elected President for the 1927 Convention and Albert S. Caldwell (TN) was elected First Vice-President. April 15, 1927: Superintendent Conn resigned as NAIC President and Ohio Insurance Superintendent. May 3, 1927: Commissioner Caldwell was elected President for the 1927 Convention and James A. Beha (NY) was elected First Vice-President.
19. Sept. 26, 1928: Charles R. Detrick (CA) was elected President for the 1929 Convention; James A. Beha (NY) was elected First Vice-President; and Howard P. Dunham (CT) was elected Second Vice-President. Jan. 1, 1929: Superintendent Beha resigned as NAIC First Vice-President and New York Insurance Superintendent. Commissioner Dunham was elected First Vice-President for the 1929 Convention. April 24, 1929: Commissioner Detrick resigned as NAIC President and California Insurance Commissioner. Commissioner Dunham was elected President for the 1929 Convention; Clarence C. Wysong (IN) was elected First Vice-President; and Jess G. Read (OK) was elected Second Vice-President.
20. Sept. 19, 1929: Joseph L. Button (VA) was elected Secretary for the 1930 Convention; however, he resigned effective Oct. 15, 1929, as NAIC Secretary and Virginia Commissioner of Insurance and Banking. Dec. 10, 1929: Albert S. Caldwell (TN) was elected Secretary for the 1930 Convention.
21. Sept. 9, 1930: Clarence C. Wysong (IN) was elected President for the 1931 Convention; Jess G. Read (OK) was elected First Vice-President; and Clare A. Lee (OR) was elected Second Vice-President. January 1931: Commissioner Wysong resigned effective Jan. 1, 1931, as NAIC President and Indiana Insurance Commissioner; Commissioner Lee was no longer serving as Second Vice-President; and Commissioner Read was elected President by the Executive (EX) Committee for the 1931 Convention. June 17, 1931: Charles D. Livingston (MI) was elected First Vice-President by the Executive (EX) Committee for the 1931 Convention and William A. Tarver (TX) was elected Second Vice-President by the Executive (EX) Committee.
22. Oct. 20, 1932: William A. Tarver (TX) was elected President for the 1933 Convention; Garfield W. Brown (MN) was elected First Vice-President; and Daniel C. 'Dan' Boney (NC) was elected Second Vice-President. Commissioner Tarver resigned effective Feb. 10, 1933, as NAIC President and Texas Life Insurance Commissioner. Commissioner Brown was elected President for the 1933 Convention; Commissioner Boney was chosen to act as First Vice-President and George S. Van Schaick (NY) was chosen to act as Second Vice-President.
23. July 1935: It is unclear why no one acted as First Vice-President or Second Vice-President for the 1935 Convention.
24. June 23, 1939: J. Balch Moor (DC) was elected Vice-President; however, he died July 22, 1939, before the 1940 Convention assembled. John C. Blackall (CT) was elected Vice-President by the Executive (EX) Committee to fill the unexpired term.
25. June 6, 1945: Edward L. Scheufler (MO) was elected Vice-President for the 1946 Convention; however, he resigned effective Oct. 15, 1945, as NAIC Vice-President and Missouri Insurance Superintendent. Dec. 3, 1945: Robert E. Dineen (NY) was elected Vice-President by the Executive (EX) Committee for the 1946 Convention.
26. June 11, 1946: Jess G. Read (OK) was elected Secretary for the 1947 Convention; however, he died July 20, 1946. Sept. 4, 1946: Nellis P. Parkinson (IL) was elected Secretary by the Executive (EX) Committee to fill the unexpired term.
27. June 1953: George B. Butler (TX) was elected Vice-President; however, he died Sept. 28, 1953. It is unknown who acted as Vice-President for the November 1953 Convention. Nov. 30, 1953: Donald Knowlton (NH) was elected Vice-President by the Executive (EX) Committee to fill the unexpired term.
28. May 1956: George A. Bowles (VA) was elected Secretary; however, he died June 1, 1956. Paul A. Hammel (NV) was elected Secretary to fill the unexpired term.
29. June 1958: Arch E. Northington (TN) was elected President; however, he resigned effective Dec. 23, 1958, as NAIC President and Tennessee Insurance Commissioner. January 1959: Paul A. Hammel (NV) was elected President and Sam N. Beery (CO) was elected Vice-President by the Executive (EX) Committee to fill the unexpired term.
30. June 1962: Joseph S. Gerber (IL) was elected Vice-President; however, he resigned effective Jan. 29, 1963, as NAIC Vice-President and Illinois Insurance Director. The office of Vice-President was vacant for the June 1963 Convention.
31. June 1968: Charles R. Howell (NJ) was elected President; however, he resigned effective Feb. 28, 1969, as NAIC President and New Jersey Commissioner of Banking and Insurance. Ned Price (TX) was elected by the Executive (EX) Committee to fill the unexpired term.

32. June 1970: Richard E. ‘Dick’ Stewart (NY) was elected President; however, he resigned as NAIC President effective Dec. 17, 1970, and as New York Insurance Superintendent effective Dec. 31, 1970. Dec. 17, 1970: Lorne R. Worthington (IA) was elected by Plenary to fill the unexpired term.
33. A constitutional amendment moved NAIC officer elections from June to December (commencing December 1974), President Johnnie L. Caldwell (GA) served a six-month term.
34. Kenneth E. ‘Ken’ DeShetler (OH) was elected President; however, he resigned effective Jan. 13, 1975, as NAIC President and Ohio Insurance Director. William H. Huff, III (IA) was elected by the Executive (EX) Committee to fill the unexpired term.
35. H. Peter ‘Pete’ Hudson (IN) was elected President; however, he resigned as NAIC President and Indiana Insurance Commissioner effective Nov. 15, 1979. It is unknown who presided over the December 1979 Convention.
36. John W. Lindsay resigned effective Sept. 3, 1981, as NAIC Vice-President and South Carolina Insurance Commissioner. Johnnie L. Caldwell (GA) was elected by the Executive (EX) Committee to fill the unexpired term.
37. David J. Lyons resigned effective June 17, 1994, as NAIC Vice President but remained as Iowa Insurance Commissioner until July 31, 1994. A special interim Plenary election was held June 12, 1994: Arkansas Insurance Commissioner Lee Douglass was elected Vice President to serve June 17, 1994, to Dec. 31, 1994.
38. September 2001: NAIC members unanimously agreed that the 2001 Fall National Meeting should be canceled in the wake of the tragic events that occurred Sept. 11, 2001. The meeting had been scheduled for Sept. 22–25, 2001, at the Marriott and Westin Copley Place hotels in Boston, Massachusetts.
39. Ernst N. ‘Ernie’ Csiszar resigned effective Aug. 18, 2004, as NAIC President and South Carolina Director of Insurance. Approximately two weeks later, James A. ‘Jim’ Poolman resigned as NAIC Vice President but remained as North Dakota Insurance Commissioner. A special interim Plenary election was held Sept. 13, 2004, during the Fall National Meeting in Anchorage, Alaska: Pennsylvania Insurance Commissioner M. Diane Koken was elected President; Oregon Insurance Administrator Joel S. Ario was elected Vice President; and Maine Insurance Superintendent Alessandro A. ‘Al’ Iuppa was elected Secretary-Treasurer to serve from Sept. 13, 2004, to Dec. 31, 2004.
40. December 2004: NAIC members voted at its 2004 Winter National Meeting to adopt amendments to the NAIC Bylaws, which included the creation of a President-Elect position as an NAIC officer.
41. September 2005: NAIC members agreed to cancel the 2005 Fall National Meeting due to the devastation caused by Hurricane Katrina on Aug. 29, 2005. The meeting had been scheduled for Sept. 10–13, 2005, at the Sheraton hotel in New Orleans, Louisiana.
42. Eric P. Serna resigned effective June 14, 2006, as NAIC Secretary-Treasurer and New Mexico Superintendent of Insurance. A special Plenary interim election was held during the 2006 Summer National Meeting: New Hampshire Insurance Commissioner Roger A. Seigny was elected Secretary-Treasurer to serve from June 14, 2006, to Dec. 31, 2006.
43. Michael T. McRaith resigned effective May 31, 2011, as NAIC Secretary-Treasurer and Illinois Director of Insurance. A special Plenary interim election was held via conference call May 16, 2011: North Dakota Insurance Commissioner Adam Hamm was elected Secretary-Treasurer to serve from May 31, 2011, to Dec. 31, 2011.
44. Aug. 25, 2011: NAIC members agreed to cancel its 2011 Summer National Meeting so members could assist consumers in disaster situations caused by Hurricane Irene. The meeting had been scheduled for Aug. 29–Sept. 1, 2011, at the Marriott Philadelphia Downtown in Philadelphia, Pennsylvania.
45. Michael F. ‘Mike’ Consedine resigned effective Jan. 20, 2015, as NAIC President-Elect and Pennsylvania Insurance Commissioner. A special Plenary interim election was held via conference call Feb. 8, 2015: Missouri Insurance Director John M. Huff was elected President-Elect to serve from Feb. 8, 2015, to Dec. 31, 2015.
46. Sharon P. Clark resigned effective Jan. 11, 2016, as NAIC President-Elect and Kentucky Insurance Commissioner. A special Plenary interim election was held in Bonita Springs, Florida, on Feb. 7, 2016: Wisconsin Insurance Commissioner Theodore K. ‘Ted’ Nickel was elected President-Elect; Tennessee Insurance Commissioner Julie Mix McPeak was elected Vice President; and Maine Insurance Superintendent Eric A. Cioppa was elected Secretary-Treasurer to serve from Feb. 7, 2016, to Dec. 31, 2017.

47. David C. Mattax, NAIC Secretary-Treasurer and Texas Insurance Commissioner, died in office April 13, 2017. A special Plenary interim election was held via conference call on May 12, 2017: South Carolina Insurance Director Raymond G. Farmer was elected Secretary-Treasurer to serve from May 12, 2017, to Dec. 31, 2017.
48. Gordon I. Ito resigned effective Dec. 31, 2018, as NAIC Vice President and Hawaii Insurance Commissioner. A special Plenary interim election was held in La Quinta, California, on Feb. 4, 2019: Florida Insurance Commissioner David Altmaier was elected Vice President to serve from Feb. 4, 2019, to Dec. 31, 2019.
49. March 11, 2020: Due to concerns about the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership— decided to hold the 2020 Spring National Meeting in a virtual format. However, on March 23, 2020, the NAIC officers decided to suspend holding any further sessions of the virtual Spring National Meeting to allow NAIC members and staff more time to focus on the health emergency. The meeting had been scheduled for March 21–24, 2020, at the Phoenix Convention Center and the Sheraton Grand and Hyatt Regency hotels in Phoenix, Arizona.
50. June 10, 2020: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2020 Summer National Meeting in a virtual format. The meeting had been scheduled for Aug. 8–11, 2020, at the Minneapolis Convention Center and the Hilton and Hyatt Regency hotels in Minneapolis, Minnesota.
51. Sept. 21, 2020: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2020 Fall National Meeting in a virtual format. The meeting had been scheduled for Nov. 14–17, 2020, at the JW Marriott hotel in Indianapolis, Indiana.
52. Feb. 24, 2021: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2021 Spring National Meeting in a virtual format. The meeting had been scheduled for April 10–13, 2021, at the Gaylord Texan Hotel and Convention Center in Grapevine, Texas.
53. June 1, 2021: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2021 Summer National Meeting in a hybrid format. In-person meetings took place for NAIC members and interested parties as capacity allowed. Meetings were live-streamed for participants who attended virtually.
54. Oct. 27, 2021: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2021 Fall National Meeting in a hybrid format. In-person meetings took place for NAIC members and interested parties as capacity allowed. Meetings were live-streamed for participants who attended virtually.

*NAIC 2023 Spring National Meeting  
Louisville, KY*

**OPENING SESSION**  
March 22, 2023

**CALL TO ORDER**

*Chlora Lindley-Myers, NAIC President*

The 237th session of the National Association of Insurance Commissioners (NAIC) will now come to order. Good afternoon. My name is Chlora Lindley-Myers, and I am the NAIC President and Director of the Missouri Department of Commerce and Insurance. It is my pleasure to open the 2023 NAIC Spring National Meeting.

Thank you to the NAIC Meetings team for all the planning that went into the experience we will have this week. I would like to thank Churchill Downs Bugler Steve Buttleman for playing the “Call to Post” and Kentucky Department of Insurance Investigator/Analyst Chris Woodyard for singing the National Anthem. What an inspiring way to kick off this meeting. Thank you!

**INTRODUCTION OF SPECIAL GUESTS**

*Chlora Lindley-Myers, NAIC President*

We are pleased to welcome our special guests: federal officials, state officials, and international regulators to our Spring National Meeting.

**INTRODUCTION OF HEAD TABLE**

*Chlora Lindley-Myers, NAIC President*

I am honored to introduce the members of our head table.

Honorable Sharon P. Clark, Meeting Host and Kentucky Insurance Commissioner  
Honorable James J. Donelon, NAIC Past President and Louisiana Insurance Commissioner  
Honorable Dean L. Cameron, NAIC Immediate Past President and Idaho Insurance Director  
Honorable Andrew N. Mais, NAIC President-Elect and Connecticut Insurance Commissioner  
Honorable Jon Godfread, NAIC Vice President and North Dakota Insurance Commissioner  
Honorable Scott A. White, NAIC Secretary-Treasurer and Virginia Insurance Commissioner  
Andrew J. Beal, NAIC Chief Operating Officer (COO) and Chief Legal Officer (CLO)  
Michael F. Consedine, NAIC Chief Executive Officer (CEO)

Please welcome the members of our NAIC Spring National Meeting head table.

**INTRODUCTION OF NEW MEMBERS**

*Chlora Lindley-Myers, NAIC President*

I would also like to recognize our newest members in this short video. [New member video plays]

**INTRODUCTION OF HOST COMMISSIONER**

*Chlora Lindley-Myers, NAIC President*

Here to welcome us to the Blue Grass State is Kentucky’s Insurance Commissioner Sharon P. Clark, and I understand we will also have a special guest welcoming us. I love this Kentucky hospitality, but before we are officially welcomed, I want to share a few words about Commissioner Clark, someone whom I have had the pleasure of knowing for many years. Commissioner Clark is a veteran of the Kentucky state government. She was appointed commissioner of the Department of Insurance (DOI) on Jan. 6, 2020. She also served as commissioner of the DOI from July 2008 to January 2016, and she has the longest tenure as a Kentucky commissioner since the

DOI was established in May 1870. Commissioner Clark was the first director of the DOI's Consumer Protection and Education Division, a position she held for five years.

Under her leadership, the DOI hired its first ombudsman, added consumer education and outreach functions, and strengthened enforcement efforts by expanding the number of consumer complaint investigators. Commissioner Clark served as the chair of the Kentucky Health Benefit Exchange (KHBE) Advisory Board during its inaugural year and continues as a board member. She is a member of the Kentucky Group Health Insurance Board, and during her first tenure as Kentucky's insurance commissioner, she served as an officer at the NAIC and chair of the NAIC's Market Regulation and Consumer Affairs (D) Committee.

This year, Commissioner Clark serves on several committees, including serving as vice chair of the Financial Regulation Standards and Accreditation (F) Committee, vice chair of the Producer Licensing (D) Task Force, chair of the Regulatory Framework (B) Task Force, and a member of the of the National Insurance Producer Registry (NIPR) Board of Directors. I have known Commissioner Clark for a very long time. I can attest to her commitment and hard work for the Commonwealth of Kentucky. Thank you, Commissioner, for the work you do! You are a testament to the fact that a regulators' work is never done!

### **HOST COMMISSIONER REMARKS**

*Commissioner Sharon P. Clark*

Thank you, Madam President. I have enjoyed the chance to catch up with many of you already and welcome you to Louisville. For those I have not seen yet, I want to take the opportunity now to say thank you for joining us this week. I look forward to seeing you in the meetings and hallways, and hopefully outdoors! Our governor, Andy Beshear, unfortunately could not be with us to welcome you in person today, but we are grateful he could send a special video message. Prior to his election in 2019 as Kentucky's 63rd governor, Governor Beshear served as our state's 50th Attorney General. His family is no stranger to the governor's office, as he is the son of Kentucky's 61st governor, Steve Beshear. [Governor Beshear's video plays]

Thank you again to Governor Beshear. I want to echo the governor's comments in a couple ways.

First, while we have a lot of important work to do this week, I encourage you to take in as much of the "Derby City" as possible. Louisville contains so much of Kentucky's history and industry in one location, and it is the birthplace of notable names as diverse as Muhammad Ali, Hunter S. Thompson, and Mary Travers of "Peter, Paul and Mary." It has provided inspiration to F. Scott Fitzgerald, and at one point, it contributed 90% of the U.S.'s disco ball count—some of us remember John Travolta dancing in the movie "Saturday Night Fever." Perhaps Louisville is best known for the Kentucky Derby, and while the Derby itself is still a few weeks away, the Kentucky Derby Museum does a great job of providing the next best thing, immersing over 240,000 visitors each year in the experience and tradition of "the most exciting two minutes in sports." Baseball season is even closer, and for our baseball fans—NAIC staff, I am talking to you—you may want to check out the Louisville Slugger Museum & Factory. It is just down the street, and it is home to a 120-foot tall and 68,000-pound baseball bat. You can even order your own personalized Louisville Slugger.

In a few minutes, we will go our separate ways to different meetings, and in a few days, we will return to our homes. In this little piece of time and space where we are all together—regulators, industry, and interested parties—I want to echo Governor Beshear's remarks by saying thank you. To my fellow regulators, thank you for your encouragement, support, and assistance as Kentucky endured historic storms and devastation. Over the past several years, it has seemed that as one part of the state recovers, another gets hit in some way. I know Kentucky is far from alone in dealing with the effects of severe weather. This is not just our story. It seems like every week we hear of an insurance event that has tragically struck our country, but in our state-based system, we do not have to face these kinds of challenges on our own. We face them together. We see what the cameras show—the wreckage, the shattered lives—but our roles take us far beyond that. We are the hands that reach out to help pull

someone up; the ears that take their calls and give their grief and difficulties an outlet; the eyes that see life arise from the ashes and hope return when we help resolve their uncertainty, calm their fears, bring closure, and provide a new start. Our fellow citizens contact us when they are most in need, and we are there for them. As regulators, having each other's backs maximizes our ability to support our individual consumers and markets. None of us go through the same situation the same way, and our collective experiences and expertise better inform and influence our individual responses.

The world is not an easy place right now. In truth, it never has been. The work we do does not make it perfect, but it makes it far better. I hope that encourages you as much as it does me. To industry, thank you for your quick responses and flexibility as the claims poured in. Thank you for stepping up to the plate and standing alongside our departments. We tackle tragedy by working well together as a team. You may sell policies, but those plans are not just products. They secure a family's dreams, provide some certainty for our loved ones, or offer the only way to afford treatment and find relief for an illness. Consumers count on both of us, and we owe it to them to always keep them first. As I was thinking about what I wanted to say today, three words kept coming to mind: protection, trust, and faith.

Everything we do, whether as regulators or industry, should have consumers' protection foremost in mind, never forgetting the trust and faith they have in us and the trust and faith we must have in each other to honor our commitments to them. Madam President, I have known you for almost 25 years. I know your leadership. I know the consistent example and your "C.A.L.M." approach. Thank you for the opportunity to say a few words today.

#### **PRESIDENTIAL ADDRESS**

*Chlora Lindley-Myers, NAIC President*

It is my honor to welcome you to the NAIC Spring National Meeting. On behalf of my fellow commissioners and the NAIC staff, thank you for joining us. We hope you have a wonderful experience at this meeting as you learn, participate, and network with the other attendees.

For those who are joining us for the first time, let us have a special welcoming round of applause! Each one of us has had a "first" national meeting. Some of us may have been around long enough that it is hard to remember our first meeting, but we all learned the ropes because someone took the time to welcome us and show us how things work. Do not hesitate to reach out and ask questions; we are all glad you are here.

As we are welcoming newcomers to the NAIC, we must say good-bye to others from time to time. With great sadness, we share the news of the passing of Colin M. Hayashida, former Hawaii Insurance Commissioner. He passed away on Feb. 28, 2023, due to health issues. Colin's work for the Hawaii Insurance Division spanned over 20 years, including his service as commissioner from January 2019 to December 2022. He was an extraordinary person who made countless contributions to advance NAIC efforts, the insurance industry, and his community. Colin will be greatly missed, and our deepest sympathies are with Colin's family, friends, and colleagues at the Hawaii Insurance Division.

We also say good-bye, in another way, to NAIC Chief Executive Officer (CEO) Mike Consedine, who submitted his resignation and will be leaving us on April 30. Mike has done a wonderful job in his leadership of the NAIC, and we are grateful for his dedication to the success of this organization. He led us during the pandemic through strategic planning, as well as some of our most challenging international issues. I know his shoes will be hard to fill, but we wish him well as he looks at the next chapter in his career, one that will allow him to spend more time with his lovely family. On behalf of all of the NAIC family, thank you Mike!

I have been a part of the NAIC and attending national meetings for many, many, MANY years, and I am just as excited and passionate about the mission of the NAIC and the work of state insurance regulators now as I was when I started in the early 1980s. Our state-based regulatory system is vital to keeping consumers safe and our

industry thriving. I applaud the resiliency of the NAIC and the perseverance of our state insurance regulators. I appreciate the curiosity and actions of interested parties who want to know more and do more to improve access and protections for our consumers.

The amount of effort it takes to ensure the insurance market's solvency and stability and educate the public about insurance products is significant. Since the NAIC was founded in 1871, insurance company solvency and the protection of consumers have been the core of who we are and what we do. While we come from a variety of different political viewpoints, geographical regions, experiences, and perspectives, we all have common goals. In a world filled with global uncertainty, challenges, and divisions, our commitment to support one another fuels our progress, growth, and effectiveness.

Our list of challenges is growing every day and, frankly, every minute. The insurance landscape is changing at an accelerated pace. This means our work here is more important each time we meet, and our ability to focus and collaborate is critical.

As we look at the many goals we must address, it is good to know we have a guide to help us achieve those goals. Many of you may recall the NAIC's *State Ahead* strategic plan. I am happy to announce the next phase of *State Ahead*, called *State Connected*. *State Connected* is a three-year plan that builds on that foundational blueprint for the NAIC's future. *State Connected* was finalized in the fall of 2022, and it has six key strategic focus areas:

- **Member Connectivity**

An example of member connectivity is the new NAIC Connect app that encourages more member access and interaction.

- **Training, Expertise, and Technology**
- **Data and Analytics**
- **Consumer Education, Outreach, and Advocacy**

I believe this is one of our most important areas of responsibility. Our consumers need our help to become better informed, educated, and prepared to make better decisions.

- **Committee Governance and Management**
- **NAIC Operations**

The vision that *State Connected* represents is a combined vision, and it would not have been possible without the engagement and support of all NAIC members and NAIC staff. The plan was formulated over a two-year period involving countless sessions and discussions. Now, it is finally time to implement it, and we are excited! Consumers, market participants, and our fellow state insurance regulators are counting on us to continue building on that long legacy of excellence. For those of us now serving, we must carry this forward and demonstrate our commitment. For more information, I invite you to reference our *State Connected* strategy at [naic.org](http://naic.org).

Last month, we announced the NAIC's 2023 priorities, and you will be able to see the *State Connected* strategic plan woven into most of what we do. Although the priorities are familiar, we all agree that the six areas identified for 2023 should receive our attention and focus.

It should come as no surprise that a top priority continues to be **financial oversight and transparency**. While this is always a priority for the NAIC, it is even more important given the economic climate we are in right now.

We need to maintain our vigilance to ensure companies are not only able to remain solvent and pay their claims when times are good, but they are also making sound investment choices and safeguarding their ability to remain solvent when we have economic challenges and a prolonged low interest rate environment. Stability is essential and remains a high priority.

**Cybersecurity** continues to be a big concern worldwide. Data breaches have touched nearly every industry, and the demand for cyber insurance is growing. Globally, this is further affected by international issues such as the war in Ukraine, supply chain interruptions, and the volatility in banking and the insurance marketplace. How companies are managing their third-party risks is now something that is on our radar. The fact that companies outsource certain functions and services does not absolve them of their responsibility.

Beyond cybersecurity, other technological issues, such as artificial intelligence (AI), are being addressed by the new Innovation, Cybersecurity, and Technology (H) Committee. While AI itself can represent advancements in the industry, we must also be mindful of the potential pitfalls that come along with this automation.

We want to see product innovation, but we also need to protect a consumer against potential problems, such as predictive modeling, price algorithms, and AI, which may affect people of color or underrepresented groups. Ensuring that everyone who needs insurance can get insurance is an important issue for us. Ensuring that consumers understand and know what they are buying and what protections it affords is a priority for the NAIC when looking at the **marketing of insurance products**.

As people become even more concerned with their family budgets, they look for the best value or least expensive option to serve their needs. We want to protect those consumers from being exposed to plans that may be marketed in an unfair and deceptive manner. Amending our *Unfair Trade Practices Act* (#880) and ensuring we stay up to date on some of these deceptive practices will help us keep our consumers safe and our markets safe and stable.

Another priority on our list is a possible transition of the **long-term care (LTC)** strategy. We will continue working to resolve the inconsistent rate review practices among the state insurance departments and ensure that consistent regulatory oversight and reduced benefit options are available to our collective citizenry. Customers who have these products should get what they are paying for.

**Race and insurance** continues to be a priority for the NAIC. We must continue to focus on addressing race, diversity, and inclusion within the insurance sector. Our customers are varied, our products are varied, our services are varied, and we should meet that. This includes not only access to affordable products, but also practices within the insurance industry that may have the potential to disadvantage people of color or underrepresented groups. We need to look at that. We are taking major steps to ensure that the protection gap is closed and that we look at ways to make financial inclusion a priority. We will continue to work across the various committees to accomplish these goals, but it takes all of us to do that.

Last, but certainly not least, is **climate risk, natural catastrophe, and resiliency**. Every commissioner in every state has a list of natural disasters they are dealing with from droughts to flooding, tornadoes to hurricanes, wildfires to earthquakes. Our newsfeeds are full of an increasing number of natural catastrophes, and this makes the business of insurance even more complicated. This is not just a state problem or a U.S. problem; it is a global issue. We are continuing to look at ways to anticipate and plan for these events and reduce the negative impact on our consumers.

One of the key ways we can help consumers prepare is through education. The NAIC hopes to develop a consumer education campaign on the coverage gap to help build awareness about this issue and inform them of the NAIC's efforts to work on this problem on their behalf.

If you want more information about the NAIC's 2023 priorities, you can tune in to Season 5, Episode 2 of the NAIC's "The Regulators" podcast, where I talked about each of these in more detail.

As we look ahead to the rest of this week and all the important work that continues to be before us, I want to remind you again that this year is the year of CALM. I know I have already explained that this is a play on my initials, and in my first newsletter I outlined what each letter of CALM represents.

Now, I want to put one more layer of meaning on the word CALM. The dictionary would tell us that calm simply implies the absence of agitation or one who is composed or has clarity of judgment.

Calm will help guide us as we address the many issues ahead of us. The work we have before us is important and complex. We will not always agree on the solutions or the path forward, but I know we will work together to find the right path, pivot where we need to, and abandon what no longer works. We will be calm and collegial.

I have the utmost respect for the talent and knowledge represented by this body of state insurance regulators. I look forward to working with you this year and moving the ball forward for the consumers we serve.

I want to thank you for working with me and together with consumers and the varied industry we regulate to make products plentiful, meaningful, accessible and most of all fairly priced and available. Welcome to the NAIC Spring National Meeting.

**ADJOURNMENT**

*Chlora Lindley-Myers, NAIC President*

I look forward to the sessions and discussing the work of the NAIC. I encourage you to network, make note of ways you can support state insurance regulators and the mission of the NAIC. With that, I officially conclude this opening session of the 237th meeting of the NAIC.

Draft: 4/26/2023

**Synopsis of the NAIC Committee, Subcommittee, and Task Force Meetings  
2023 Spring National Meeting  
March 21–25, 2023**

TO: Members of the NAIC and Interested Parties

FROM: The Staff of the NAIC

Committee Action

NAIC staff have reviewed the committee, subcommittee, and task force reports and highlighted the actions taken by the committee groups during the 2023 Spring National Meeting. The purpose of this report is to provide NAIC members, state insurance regulators, and interested parties with a summary of these meeting reports.

**EXECUTIVE (EX) COMMITTEE AND PLENARY (Joint Session)**

March 25, 2023

1. Received the March 23 report of the Executive (EX) Committee. See the Committee listing for details.
2. Adopted by consent the committee, subcommittee, and task force minutes of the 2022 Fall National Meeting.
3. Received the report of the Life Insurance and Annuities (A) Committee. See the Committee listing for details.
4. Received the report of the Health Insurance and Managed Care (B) Committee. See the Committee listing for details.
5. Received the report of the Property and Casualty Insurance (C) Committee. See the Committee listing for details.
6. Received the report of the Market Regulation and Consumer Affairs (D) Committee. See the Committee listing for details.
7. Received the report of the Financial Condition (E) Committee. See the Committee listing for details.
8. Received the report of the Financial Regulation Standards and Accreditation (F) Committee. See the Committee listing for details.
9. Received the report of the International Insurance Relations (G) Committee. See the Committee listing for details.
10. Received the report of the Innovation, Cybersecurity, and Technology (H) Committee. See the Committee listing for details.
11. Adopted the revisions to *Actuarial Guideline XLIX-A—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest to Policies Sold on or After December 14, 2020 (AG 49-A)*.
12. Adopted *Actuarial Guideline LIV—Nonforfeiture Requirements for Index-Linked Variable Annuity Products (AG 54)*.
13. Adopted the *Regulator Resources for Consumers on Personal Lines Pricing and Underwriting*.
14. Adopted the *Rate/Rule Filing Checklist*.
15. Received a report on the state implementation of NAIC-adopted model laws and regulations.

**EXECUTIVE (EX) COMMITTEE**

March 23, 2023

1. Adopted the report of the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, which met March 22 in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) and paragraph 6 (consultations with NAIC staff members related to NAIC technical guidance). During this meeting, the Committee and Subcommittee took the following action:
  - A. Appointed Andrew J. Beal (NAIC, Chief Operating Officer and Chief Legal Officer) as acting Chief Executive Officer (CEO).

- B. Approved the retention of a consultant to conduct an organizational review and succession planning exercise.
2. Adopted the report of the Executive (EX) Committee, which met Feb. 10 and Jan. 13 and took the following action:
  - A. Appointed Superintendent Elizabeth Kelleher Dwyer (RI) to serve on the International Association of Insurance Supervisors (IAIS) Executive Committee.
  - B. Appointed the following to serve as members on the Consumer Board of Trustees: Commissioner Andrew R. Stolfi, Chair (OR); Commissioner Alan McClain (AR); Director Dana Popish Severinghaus (IL); Commissioner Vicki Schmidt (KS); Commissioner Troy Downing (MT); and Acting Commissioner Michael Humphreys (PA).
  - C. Appointed Commissioner Glen Mulready (OK) to the National Insurance Producer Registry (NIPR) Board of Directors.
  - D. Approved the recommendation for the NAIC's Kansas City, MO, office space.
  - E. Adopted the Washington, DC, property site selection and fiscal impact statement.
  - F. Appointed the following as members of the NAIC 2023 Audit Committee: Connecticut, Kentucky, Maryland, Massachusetts, Missouri, Nebraska, New Jersey, North Dakota, Oregon, South Dakota, Tennessee, and Virginia.
  - G. Received an update from the Investment Committee.
  - H. Received updates on various operational matters.
3. Adopted the report of the Climate and Resiliency (EX) Task Force. See the Task Force listing for details.
4. Adopted the report of the Government Relations (EX) Leadership Council. See the Leadership Council listing for details.
5. Adopted the report of the Long-Term Care Insurance (EX) Task Force. See the Task Force listing for details.
6. Adopted the report of the Special (EX) Committee on Race and Insurance. See the Special Committee listing for details.
7. Adopted the Request for NAIC Model Law Development to amend the *Property and Casualty Insurance Guaranty Association Model Act* (#540).
8. Adopted the Request for NAIC Model Law Development to amend the *Unfair Trade Practices Act* (#880).
9. Received the 2022 Annual Report of the NAIC Designation Program Advisory Board activities.
10. Received a status report on the implementation of the *State Connected* strategic plan.
11. Received a status report on model law development efforts for amendments to: 1) the *Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act* (#171); 2) Model #540; 3) the *Mortgage Guaranty Insurance Model Act* (#630); 4) the *Nonadmitted Insurance Model Act* (#870); and 5) the *Insurance Consumer Privacy Protection Model Law* (#674).
12. Heard a report from NIPR.
13. Heard a report from the Interstate Insurance Product Regulation Commission (Compact).

### **Climate and Resiliency (EX) Task Force**

March 24, 2023

1. Received updates from its workstreams:
  - A. The Pre-Disaster Mitigation Workstream will continue to be led by Director Barbara D. Richardson (AZ).
  - B. The Climate Risk Disclosure Workstream will continue to be led by Commissioner Andrew R. Stolfi (OR).
  - C. The Technology Workstream and Innovation Workstream will be combined into one Technology Workstream that will be led by Commissioner James J. Donelon (LA).
  - D. The Solvency Workstream will continue to be led by Commissioner Kathleen A. Birrane (MD). The Workstream met Feb. 1 in regulator-to-regulator session and took the following action:
    - i. Heard a presentation from the Federal Reserve on its recently exposed proposed climate scenario analysis exercise.
    - ii. Discussed members' initial view on the role of climate scenario analysis as a financial oversight tool for U.S. state insurance regulators.

2. Adopted its 2022 Fall National Meeting Minutes.
3. Heard a presentation from Public Safety Canada (PSC) on Canadian flood risk and proposed insurance solutions. The Task Force on Flood Insurance and Relocation explored viable solutions for insurance in high-risk areas and the consideration for the potential relocation of homes most at risk of repeat flooding. The summarization of its findings and the analysis of possible insurance solutions in Canada are found in the Task Force’s paper “Adapting to Rising Flood Risk: An Analysis of Insurance Solutions for Canada.” The paper identifies four flood insurance market obstacles, including uncertainty, market penetration, affordability, and moral hazard, and it identifies recommendations to combat those obstacles.
4. Heard a presentation from the Canadian Council of Insurance Regulators (CCIR) on consumer protection gaps and property-specific risk related to flood risk in Canada. The presentation highlighted recommendations that will be found in the March 2023 report, including identifying best practices for assessing and communicating natural catastrophe risk, training, and education for those selling flood insurance; innovation in products and incentives for consumer mitigation practices; and ensuring that consumers understand the insurance product they are being offered.
5. Heard an international update. The International Association of Insurance Supervisors (IAIS) held public consultations on an approach to address climate risk, and it continues work on scenario analysis and climate risk data. The Sustainable Insurance Forum (SIF) is addressing access and affordability issues.
6. Heard a federal update. The National Flood Insurance Program (NFIP) expires on Sept. 30. The U.S. Congress (Congress) held a hearing on encouraging greater flood insurance coverage in America. The U.S. Securities and Exchange Commission’s (SEC’s) climate risk disclosure rule is expected to be finalized in the next few months. The executive branch’s budget proposal contains funding for investment in clean energy and community resilience to natural disasters. The NAIC continues to support the Disaster Mitigation and Tax Parity Act.
7. Received an update from the Catastrophe Modeling Center of Excellence (COE). The COE is developing catastrophe model training; developing tools, such as the compendium of regulatory interaction and requirements regarding catastrophe models; and continuing to engage insurance departments, catastrophe modelers, and organizations focused on resilience initiatives.

### **Government Relations (EX) Leadership Council**

The Government Relations (EX) Leadership Council did not meet at the Spring National Meeting.

### **Long-Term Care Insurance (EX) Task Force**

March 13, 2023 (in lieu of the Spring National Meeting)

1. Adopted its 2022 Fall National Meeting minutes.
2. Heard a report on industry trends and other updates. State insurance departments continue to monitor the impacts of cost-of-care inflation, shifts in care from facilities to home care, increases in home care daily costs and other factors. The Long-Term Care Actuarial (B) Working Group has requested comments on the information checklist for rate increase filings and the actuarial methodologies for rate review. If any changes to either the checklist or the methodologies are made as a result of the Working Group’s review, related changes will be referred to the Long-Term Care Insurance Multistate Rate Review Framework (LTCI MSA Framework).
3. Adopted proposed edits to the *Checklist for Premium Increase Communications*.

### **Special (EX) Committee on Race and Insurance**

March 23, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Received a status report from the Property/Casualty (P/C) Workstream.
3. Received a status report from the Life Workstream.
4. Received a status report from the Health Workstream.
5. Heard an update on the Member Diversity Leadership Forum.

**INTERNAL ADMINISTRATION (EX1) SUBCOMMITTEE**

See the Executive (EX) Committee listing for details.

**LIFE INSURANCE AND ANNUITIES (A) COMMITTEE**

March 23, 2023

1. Adopted its Feb. 24 minutes, which included the following action:
  - A. Adopted its 2022 Fall National Meeting minutes.
  - B. Adopted revisions to *Actuarial Guideline XLIX-A—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest to Policies Sold on or After December 14, 2020* (AG 49-A).
  - C. Adopted *Actuarial Guideline LIV—Nonforfeiture Requirements for Index-Linked Variable Annuity Products* (AG 54).
2. Adopted the report of the Life Actuarial (A) Task Force. See the Task Force listing for details.
3. Adopted the report of the Accelerated Underwriting (A) Working Group, including its Feb. 22 minutes. During this meeting, the Working Group took the following action:
  - A. Exposed the draft regulatory guidance for accelerated underwriting (AU) in life insurance for a 45-day public comment period ending April 15.
  - B. Exposed the draft referral to the Market Conduct Examination Guidelines (D) Working Group for a 30-day public comment period ending March 24.
4. Heard a presentation from the American Council of Life Insurers (ACLI) and the Society of Actuaries (SOA) on the current state of life insurance.

**Life Actuarial (A) Task Force**

March 20–21, 2023

1. Adopted its March 2, Feb. 23, Feb. 2, and Jan. 26 minutes, which included the following action:
  - A. Exposed referrals received from the Valuation of Securities (E) Task Force.
  - B. Exposed a VM-20, Requirements for Principle-Based Reserves for Life Products/VM-21, Requirements for Principle-Based Reserves for Variable Annuities, Economic Scenario Generator Technical Drafting Group topics, timing, and decision points document.
  - C. Adopted amendment proposal form (APF) 2022-09, which addresses reporting issues in VM-31, PBR Actuarial Report Requirements for Business Subject to a Principle-Based Valuation.
  - D. Exposed APF 2023-04, which clarifies VM-31 reporting requirements that support company experience mortality rates.
  - E. Adopted its 2022 Fall National Meeting Minutes.
  - F. Exposed proposed charges for the Economic Scenarios (E/A) Subgroup.
  - G. Adopted APF 2022-10, which clarifies VM-20 requirements for universal life policies with non-material secondary guarantees.
  - H. Adopted APF 2023-02, which adds disclosure requirements to VM-31 to explain any reporting discrepancies between the annual statement and the principle-based reserving (PBR) actuarial report.
  - I. Exposed APF 2023-01, a non-substantive amendment to clarify the value of starting assets in VM-21.
  - J. Exposed APF 2023-03, which addresses a series of clean-up items in VM-20, VM-21, and VM-31.
  - K. Responded to a referral from the Financial Regulation Standards and Accreditation (F) Committee by conveying the Task Force’s recommendation to remove the *Actuarial Opinion and Memorandum Regulation* (#822) as an accreditation standard.
  - L. Adopted APF 2022-07, which clarifies a VM-20 net premium reserve (NPR) mortality adjustment.
  - M. Adopted APF 2022-08, which clarifies that companies only reporting VM-21 reserves determined using the alternative methodology are subject to limited governance requirements under VM-G, Appendix G – Corporate Governance Guidance for Principle-Based Reserves.

2. Adopted the reports of the Longevity Risk (E/A) Subgroup, the Variable Annuities Capital and Reserve (E/A) Subgroup, the Indexed Universal Life (IUL) Illustration (A) Subgroup, and the Index-Linked Variable Annuity (A) Subgroup, which have not met this year.
3. Adopted the report of the Valuation Manual (VM)-22 (A) Subgroup, including its March 1 minutes. During this meeting, the Subgroup took the following action:
  - A. Heard an update on the VM-22, Statutory Maximum Valuation Interest Rates for Income Annuities, project plan.
  - B. Discussed the VM-22 exemption.
4. Heard a presentation on the impact of a rising interest rate environment.
5. Heard an update on the *Actuarial Guideline LIII—Application of the Valuation Manual for Testing the Adequacy of Life Insurer Reserves* (AG 53) review plan.
6. Adopted the report of the Experience Reporting (A) Subgroup and heard an update on VM-50, Experience Reporting Requirements, and VM-51, Experience Reporting Formats, of the *Valuation Manual*.
7. Exposed APF 2021-08, which would reduce the time lag in the VM-50/VM-51 mortality experience collection.
8. Heard a presentation on the VM-21/C3 Phase II economic scenario generator field test.
9. Exposed APF 2023-05, which revises hedge modeling language in the *Valuation Manual* to address index hedge crediting.
10. Heard an update from the American Academy of Actuaries (Academy) Life Practice Council.
11. Received an update on the activities of the Economic Scenario Generator Governance Drafting Group, the VM-20/VM-21 Economic Scenario Generator Technical Drafting Group, and the Standard Projection Amount Drafting Group.
12. Heard an update on the Society of Actuaries' (SOA's) research and education.
13. Heard an update from the Academy Council on Professionalism and Education.
14. Heard an update on mortality improvement.
15. Adopted APF 2023-03, which clarifies the VM-20 treatment of hedge modeling error and adds considerations to VM-20 regarding the assumed cost of borrowing and the treatment of risk factors other than interest and equities that are stochastically modeled.
16. Adopted APF 2023-01, which clarifies the value of starting assets in VM-21.

## **HEALTH INSURANCE AND MANAGED CARE (B) COMMITTEE**

March 24, 2023

1. Discussed its 2023 activities.
2. Adopted its 2022 Fall National Meeting minutes.
3. Adopted the report of the Consumer Information (B) Subgroup, including its Feb. 2 minutes. During this meeting, the Subgroup took the following action:
  - A. Adopted its Jan. 31 minutes, which included the following action:
    - i. Discussed the results of a survey of states' consumer engagement activities.
  - B. Discussed its potential activities for 2023.
4. Adopted the report of the Health Innovations (B) Working Group, which met March 22 and took the following action:
  - A. Adopted its 2022 Fall National Meeting minutes.
  - B. Heard presentations from the Colorado Division of Insurance, the National Health Law Program (NHeLP), and America's Health Insurance Plans (AHIP) on work and recommendations related to essential health benefits (EHBs).
  - C. Discussed potential topics for future meetings, including telehealth services and adjustments to the premium load attributable to cost-sharing reductions.
5. Adopted the report of the Health Actuarial (B) Task Force. See the Task Force listing for details.
6. Adopted the report of the Regulatory Framework (B) Task Force. See the Task Force listing for details.
7. Adopted the report of the Senior Issues (B) Task Force. See the Task Force listing for details.

8. Heard a discussion on the Kaiser Family Foundation (KFF) issue brief, “Claims Denials and Appeals in ACA Marketplace Plans in 2021.” The presenters discussed what the data could mean and its limitations, whether the federal Centers for Medicare & Medicaid Services (CMS) use it as part of its regulatory oversight responsibilities, and its potential future uses.
9. Heard a discussion on a state “checklist” of actions related to the Medicaid unwinding process provided in the State Health and Value Strategies’ (SHVS’) issue brief, “Secrets to a Successful Unwinding: Actions State-Based Marketplaces and Insurance Departments Can Take to Improve Coverage Transitions.”
10. Heard an update from the federal Center for Consumer Information and Insurance Oversight (CCIIO) on its recent activities.

### **Health Actuarial (B) Task Force**

March 21, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Adopted the report of the Long-Term Care Actuarial (B) Working Group, including its Feb. 17 minutes. During this meeting, the Working Group took the following action:
  - A. Discussed disbanding the Long-Term Care Pricing (B) Subgroup and the Long-Term Care Valuation (B) Subgroup.
  - B. Exposed a request for comments on a proposal to revise the nationally coordinated long-term care insurance (LTCI) rate increase review checklist.
  - C. Exposed a request for comments on the Minnesota and Texas LTCI rate increase review methodologies.
  - D. Heard an update on LTCI valuation issues.
3. Disbanded the Long-Term Care Pricing (B) Subgroup and the Long-Term Care Valuation (B) Subgroup.
4. Heard an update from the federal Center for Consumer Information and Insurance Oversight (CCIIO) on plan year 2024 federal Affordable Care Act (ACA) rate filing dates and procedures.
5. Heard a presentation from the Society of Actuaries (SOA) Research Institute on social, physical, and cultural determinants of health and their incorporation into actuarial data and workstreams.
6. Heard a presentation from the American Academy of Actuaries (Academy) Health Practice Council (HPC) on its key 2023 policy priorities of health equity, COVID-19 and other public health challenges, insurance coverage and benefit design, health care costs and quality, Medicare sustainability, long-term services and supports, financial reporting and solvency, and professionalism.
7. Heard an Academy professionalism update on the 2022 Actuarial Board for Counseling and Discipline (ABCD) report and revisions to various Actuarial Standards of Practice (ASOPs).

### **Regulatory Framework (B) Task Force**

March 22, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Adopted the report of the Accident and Sickness Insurance Minimum Standards (B) Subgroup, including its March 13, Feb. 27, and Feb. 13 minutes. During these meetings, the Subgroup took the following action:
  - A. Discussed the comments received on Section 8A—Supplementary and Short-Term Health Minimum Standards for Benefits of the *Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act* (#171).
  - B. Completed its review of Section 8A of Model #171.
  - C. Discussed the comments received on Section 7—Prohibited Policy Provisions of Model #171.
  - D. Discussed its upcoming work to review the remaining provisions in Model #171 in the following order:
    - i. The remainder of Section 8, including revisiting the proposed new subsection on short-term, limited-duration (STLD) plans to discuss the Feb. 24 comments received on that section.
    - ii. Section 7.
    - iii. Revisit Section 5—Definitions and Section 6—Policy Definitions to reconcile any inconsistencies that may have arisen after the Subgroup’s review of the substantive provisions of Model #171.
    - iv. Section 9—Required Disclosure Provisions.

3. Adopted the report of the Employee Retirement Income Security Act (ERISA) (B) Working Group. The Working Group has not met in open session since the 2022 Summer National Meeting, but it is continuing its work to update the NAIC chart on multiple employer welfare arrangements (MEWAs)/multiple employer trust (METs) and association plans and surveying the states regarding their stop-loss laws in relation to level-funded plans.
4. Adopted the report of the Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group, which plans to meet March 23 to hear a discussion of the *Wit v. United Behavioral Health* case, a potential landmark case setting a precedent for how care will be covered for individuals seeking treatment for mental health and addiction. The Working Group also met Feb. 24 and took the following action:
  - A. Adopted its 2022 Fall National Meeting minutes.
  - B. Discussed parity issues with health insurers.
5. Adopted the report of the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup, which met March 22 and took the following action:
  - A. Adopted its 2022 Fall National Meeting minutes.
  - B. Received an update on the status of the pharmacy benefit manager (PBM) white paper.
  - C. Heard an update on PBM-related federal legislative and regulatory activities.
  - D. Heard an update on PBM-related litigation.
  - E. Heard a discussion on recently enacted state laws regulating PBMs and their business practices.
6. Heard an update from the Center on Health Insurance Reforms (CHIR) on its work on various projects of interest to the Task Force. In light of the upcoming end of the public health emergency (PHE) and the resulting Medicaid unwinding process, the CHIR recently released an issue brief, “Secrets to a Successful Unwinding: Actions State-Based Marketplaces and Insurance Departments Can Take to Improve Coverage Transitions.” The CHIR has taken on a few projects related to enrollment, including an analysis of state-based marketplace (SBM) outreach strategies for boosting health plan enrollment of the uninsured and the process of implementing the family glitch fix on the federal Affordable Care Act’s (ACA’s) marketplaces. The CHIR is also examining state activities, such as those occurring in Washington and Nevada, related to public option programs. The CHIR plans to continue monitoring these activities and new state public option legislation. The CHIR is examining what states are doing to improve coverage, and it recently released a few issue briefs highlighting state efforts in this area. The CHIR is continuing to monitor and analyze state action related to health equity. As part of this effort, the CHIR plans to publish a survey of SBMs’ language access and policy practices. The CHIR continues to monitor the implementation of the federal No Surprises Act (NSA), and it expects to issue publications on several issues related to the implementation process, including a one-year progress report. The CHIR recently launched a four-part series studying employer-sponsored insurance (ESI) and cost containment. The CHIR’s future work in this area includes investigating cost containment and outpatient facility fees. Another future CHIR project is a 50-state survey on state protections against medical debt.

### **Senior Issues (B) Task Force**

March 22, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Discussed issues and topics for the Task Force to consider in 2023, including:
  - A. Medicare Advantage and whether the oversight should return to the states.
  - B. Possibly refreshing the 2017 long-term care insurance (LTCI) policy options document.
  - C. Preparing for any possible recommendations from the Long-Term Care Insurance (EX) Task Force.
  - D. Revisiting the conflict between Medicare and the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA) rules that has led to some confusion about which system and set of rules govern eligibility for coverage, as well as how the responsibility for the payment of health care benefits for eligible individuals is determined.
  - E. Possible further action on the conflict involving durable medical equipment (DME), Medicare Supplement (Medigap), and excess charges.

## PROPERTY AND CASUALTY INSURANCE (C) COMMITTEE

### March 24, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Adopted the report of the Casualty Actuarial and Statistical (C) Task Force. See the Task Force listing for details.
3. Adopted the report of the Surplus Lines (C) Task Force. See the Task Force listing for details.
4. Adopted the report of the Title Insurance (C) Task Force. See the Task Force listing for details.
5. Adopted the report of the Workers' Compensation (C) Task Force. See the Task Force listing for details.
6. Adopted the report of the Cannabis Insurance (C) Working Group, which has not met this year.
7. Adopted the report of the Catastrophe Insurance (C) Working Group, which met March 21 in joint session with the NAIC/Federal Emergency Management Agency (FEMA) (C) Advisory Group and took the following action:
  - A. Adopted its 2022 Fall National Meeting minutes.
  - B. Heard an update on federal legislation. The National Flood Insurance Program (NFIP) has had 25 reauthorizations since 2017. Risk Rating 2.0, affordability, and the NFIP reauthorization are all being discussed. FEMA has experienced declines in reinsurance due to the hardening market.
  - C. Received an update on the *Catastrophe Modeling Primer* (Primer) progress. The drafting group has met several times, and it is making progress. Currently, several sections have been drafted, and the drafting group plans to meet following the Spring National Meeting to continue its work.
  - D. Heard updates regarding the activities of state and FEMA regional workshops. FEMA Region 1 will meet in Massachusetts May 22–23. The purpose of the meeting is to help departments of insurance (DOIs) form relationships with their FEMA partners. FEMA Region 2 and FEMA Region 3 will hold meetings later.
  - E. Heard a presentation from the Midland Radio Corporation on the National Oceanic and Atmospheric Administration (NOAA) Weather Radio (NWR). The presentation included the importance of using weather radios, as well as the availability of the radios through the FEMA Hazard Mitigation Grant Program (HMGP).
  - F. Held a panel discussion on homeowners deductible trends. There was a panelist representing consumers, a panelist representing insurers, and a panelist representing state insurance regulators. The panel discussed the types of deductibles trending, the importance of mitigation, and a policyholder's understanding of their homeowners insurance policy.
8. Adopted the report of the Terrorism Insurance Implementation (C) Working Group, which has not met this year.
9. Adopted the report of the Transparency and Readability of Consumer Information (C) Working Group, which met March 15 and took the following action:
  - A. Adopted its 2022 Fall National Meeting minutes.
10. Adopted revisions to the *Nonadmitted Insurance Model Act* (#870).
11. Heard presentations from the Nonprofits Insurance Alliance (NIA) and the National Association of Mutual Insurance Companies (NAMIC) on the availability and affordability of insurance coverage for nonprofit organizations.
12. Discussed the Committee's charge related to developing marketing intelligence data so state insurance regulators can better assess their markets. Heard presentations from Florida, Missouri, and the NAIC about prior data calls and how they helped state insurance regulators meet regulatory goals.

### **Casualty Actuarial and Statistical (C) Task Force**

#### March 7, 2023 (in lieu of the Spring National Meeting)

1. Adopted its Jan. 31, 2023; Jan. 27, 2023; Jan. 10, 2023; Jan. 3, 2023; Dec. 9, 2022; and 2022 Fall National Meeting minutes, which included the following action:
  - A. Exposed the generalized additive models (GAMs) appendix to the *Regulatory Review of Predictive Models* white paper for a 45-day public comment period ending Feb. 24.
  - B. Adopted the *2021 Competition Database Report* (Competition Report).
  - C. Adopted the *2019/2020 Auto Insurance Database Report* (Auto Report).

- D. Adopted the *2021 Report on Profitability by Line by State* (Profitability Report).
- E. Adopted the *2020 Dwelling, Fire, Homeowners Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owner's Insurance Report* (Homeowners Report).
- 2. Adopted the report of the Actuarial Opinion (C) Working Group, including its Jan. 26 minutes. During this meeting, the Working Group took the following action:
  - A. Discussed 2022 instructions for the Statement of Actuarial Opinion (SAO). The Working Group agreed not to propose any substantive changes.
  - B. Discussed a referral from the Financial Analysis (E) Working Group about reserving models.
- 3. Adopted the report of the Statistical Data (C) Working Group, including its Feb. 23 minutes. During this meeting, the Working Group took the following action:
  - A. Adopted a proposal to create and release an *Auto Database Report Supplement for Average Premium Data* (Auto Supplement) annually in March, in addition to the Auto Report that is published at year-end.
  - B. Discussed proposed changes to NAIC statistical reports.
  - C. Discussed its 2023 work plan.
- 4. Adopted the GAMs appendix regarding the regulatory review of GAMs.
- 5. Eliminated the Expense Constant Supplement.
- 6. Discussed a communication plan for the adopted NAIC loss cost multiplier (LCM) forms.
- 7. Heard reports from the American Academy of Actuaries' (Academy's) Committee on Property and Liability Financial Reporting (COPLFR) and Casualty Practice Council (CPC), the Actuarial Board for Counseling and Discipline (ABCD), the Casualty Actuarial Society (CAS), and the Society of Actuaries (SOA) on their current activities and research efforts.

### **Surplus Lines (C) Task Force**

#### March 21, 2023

- 1. Adopted its 2022 Fall National Meeting minutes.
- 2. Adopted the report of the Surplus Lines (C) Working Group, which met March 9 in regulator-to-regulator session pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings, to approve one insurer for admittance to the NAIC *Quarterly Listing of Alien Insurers*.
- 3. Adopted amendments to the *Nonadmitted Insurance Model Act* (#870), including a drafting note within Section 5D. Model #870 was modernized to align with the federal Nonadmitted and Reinsurance Reform Act (NRRRA) of 2010.

### **Title Insurance (C) Task Force**

#### March 23, 2023

- 1. Adopted its 2022 Fall National Meeting minutes.
- 2. Took a vote of consensus to postpone the review of the *Title Insurers Model Act* (#628), Section 15C pending the outcome of its consideration under the Model Law Review Initiative.
- 3. Heard an update on the information the Task Force requested from Voxtur following its presentation during the 2022 Fall National Meeting. On March 14, Voxtur told the Task Force chair and vice chair that it was discussing internally methods of sharing the requested information that requires confidentiality.
- 4. Heard a presentation from the American Land Title Association (ALTA) on new movements in the title alternative space. The information included United Wholesale Mortgage's (UWM's) alternative to the traditional lender title process and the Federal National Mortgage Association's (Fannie Mae's) pilot program on title insurance requirements.
- 5. Discussed adding additional questions to the *Survey of State Insurance Laws Regarding Title Data and Title Matters* before it is administered. The Task Force took a vote of consensus to add questions to the following sections: data reporting, policy rate and regulation, procedural regulation, and insurer-agent relationship. It also added a new category and questions for title opinion letters.

**Workers' Compensation (C) Task Force**March 6, 2023 (in lieu of the Spring National Meeting)

1. Adopted its 2022 Fall National Meeting minutes.
2. Heard a presentation from the International Association of Industrial Accident Boards and Commissions (IAIABC) on telework and how it is affecting workers' compensation.
3. Heard a presentation from the National Council of Compensation Insurance (NCCI) on presumptive workers' compensation benefits for firefighters and other first responders.

**MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE**March 24, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Heard a presentation from Demotech and 4WARN on the emerging cyberthreat of technology-enabled claims instigation. The presentation reviewed the use of search engine optimization (SEO), as well as how public adjusters and plaintiff law firms create web content that results in their websites having the most favored ranking in response to consumer searches on Google and other internet search engines.
3. Adopted the report of the Antifraud (D) Task Force. See the Task Force listing for details.
4. Adopted the report of the Producer Licensing (D) Task Force, which has not met this year. The Task Force reported that:
  - A. NAIC staff are reviewing and summarizing the 17 comments received on the draft template on the 1033 waiver process.
  - B. Commissioner Trinidad Navarro (DE) will lead a new workstream on public adjusters for the Adjuster Licensing (D) Working Group.
5. Adopted the report of the Market Analysis Procedures (D) Working Group, which has not met this year. The Working Group reported that it plans to meet April 10 to discuss its 2023 charges.
6. Adopted the report of the Market Conduct Examination Guidelines (D) Working Group, which met March 15, Feb. 27, Feb. 7, and Feb. 1. During these meetings, the Working Group took the following action:
  - A. Discussed its 2023 charges.
  - B. Discussed topics continuing from last year, including a new travel insurance policy in-force standardized data request (SDR), a new travel insurance claims SDR, and revisions to Chapter 23—Conducting the Life and Annuity Examination of the *Market Regulation Handbook*.
7. Adopted the report of the Market Regulation Certification (D) Working Group, which met Feb. 27 and took the following action:
  - A. Adopted its Dec. 9, 2022, and 2022 Fall National Meeting minutes, which included the following action:
    - i. Adopted the Market Regulation Certification Program implementation plan.
  - B. Discussed its 2023 charges and goals.
  - C. Reviewed the pilot program suggested revisions to the Market Regulation Certification Program.
8. Adopted the report of the Speed to Market (D) Working Group, which has not met this year. The Working Group reported that:
  - A. It is continuing its work on the revisions to the *Product Filing Review Handbook*.
  - B. It will conduct its annual consideration of suggestions for the product coding matrices (PCMs) in June and July.

**Antifraud (D) Task Force**March 23, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Discussed its 2023 charges and outlined its priorities. In addition to overseeing the work of the Improper Marketing of Health Insurance (D) Working Group and the Antifraud Technology (D) Working Group, the Task Force's priorities include the NAIC Producer Portal, the Antifraud Plan Repository, and the implementation of the Online Fraud Reporting System (OFRS) redesign.

3. Received the report of the Improper Marketing of Health Insurance (D) Working Group, which met March 23 and took the following action:
  - A. Discussed the *Unfair Trade Practices Act* (#880).
  - B. Discussed topics concerning the improper marketing of health insurance.
4. Received an update on the OFRS redesign. The Task Force discussed the completion of the OFRS redesign. The implementation process will include collaboration with the National Insurance Crime Bureau (NICB), the National Health Care Anti-Fraud Association (NHCAA), and state vendors.
5. Heard reports on antifraud activity from the Coalition Against Insurance Fraud (CAIF) and the NICB.

#### **Market Information Systems (D) Task Force**

The Market Information Systems (D) Task Force did not meet at the Spring National Meeting.

#### **Producer Licensing (D) Task Force**

The Producer Licensing (D) Task Force did not meet at the Spring National Meeting.

### **FINANCIAL CONDITION (E) COMMITTEE**

March 24, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Adopted the report of the Accounting Practices and Procedures (E) Task Force. See the Task Force listing for details.
3. Adopted the report of the Capital Adequacy (E) Task Force. See the Task Force listing for details.
4. Adopted the report of the Financial Stability (E) Task Force. See the Task Force listing for details.
5. Adopted the report of the Receivership and Insolvency (E) Task Force. See the Task Force listing for details.
6. Adopted the report of the Reinsurance (E) Task Force. See the Task Force listing for details.
7. Adopted the report of the Valuation of Securities (E) Task Force. See the Task Force listing for details.
8. Adopted the report of the Mortgage Guaranty Insurance (E) Working Group, which met March 22 and took the following action:
  - A. Adopted its 2022 Fall National Meeting minutes.
  - B. Discussed comments received on the exposure draft of the *Mortgage Guaranty Insurance Model Act* (#630).
  - C. Discussed a proposed U.S. Securities and Exchange Commission (SEC) rule.
9. Adopted the report of the National Treatment and Coordination (E) Working Group, which met Feb. 14 and took the following action:
  - A. Adopted proposal 2022-03 (Domestic Corporate Amendment Application and Instructions).
  - B. Adopted proposal 2023-01 (Redomestication Form 2R).
10. Adopted the report of the Risk-Focused Surveillance (E) Working Group, which met March 23 and took the following action:
  - A. Discussed and exposed proposed changes to the NAIC's *Financial Analysis Handbook* and *Financial Condition Examiners Handbook* for a 45-day public comment period ending May 8. The proposed changes, developed by a drafting group consisting of state insurance regulators and industry representatives, are intended to provide additional guidance for state insurance regulators in reviewing service agreements put in place between insurers and their affiliates, particularly those that incorporate market-based reimbursement for services performed. In addition to requesting comments on the proposed handbook additions, the exposure also requests input on whether and how guidance on "cost-plus" reimbursement rates for affiliated service contracts should be developed and included in handbook guidance.
  - B. Discussed plans to conduct an all-state survey to collect data on financial analyst and examiner compensation for the purposes of adjusting the salary ranges included in NAIC handbooks.
  - C. Discussed plans for 2023 peer review training sessions, which include two financial sessions: 1) a financial examination session; and 2) an Own Risk and Solvency Assessment (ORSA)-focused session.

11. Received a referral from the Valuation of Securities (E) Task Force referral related to additional market and analytical information for bond investments.
12. Adopted action from the Valuation of Securities (E) Task Force that the Securities Valuation Office (SVO) would model collateralized loan obligations (CLOs) for NAIC designations.
13. Adopted a Request for NAIC Model Law Development extension from the Mortgage Guaranty Insurance (E) Working Group related to the *Mortgage Guaranty Insurance Model Act* (#630).
14. Agreed to merge the members and charges of the Restructuring Mechanisms (E) Subgroup into the Restructuring Mechanisms (E) Working Group.

### **Accounting Practices and Procedures (E) Task Force**

#### March 23, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Adopted the report of the Statutory Accounting Principles (E) Working Group, which met March 22 and took the following action:
  - A. Adopted its 2022 Fall National Meeting minutes.
  - B. Adopted Issue Paper No. 16X—*Derivatives and Hedging*, which historically documents new Statutory Accounting Principles (SAP) concept revisions to the documentation and assessment of hedge effectiveness, measurement method guidance for excluded components, and the modified incorporation of the U.S. generally accepted accounting principles (GAAP) portfolio layer method and the partial-term hedging method in *Statement of Statutory Accounting Principles (SSAP) No. 86—Derivatives*. (Ref #2017-33)
  - C. Adopted the following clarifications to statutory accounting guidance:
    - i. *SSAP No. 25—Affiliates and Other Related Parties*: Revisions clarify that any invested asset held by a reporting entity that is issued by, or includes the obligations of, an affiliated entity is an affiliated investment. (Ref #2022-15)
    - ii. *SSAP No. 34—Investment Income Due and Accrued*: Revisions add and data-capture additional disclosures. Directed NAIC staff to submit a corresponding blanks proposal to the Blanks (E) Working Group for year-end 2023. (Ref #2022-17)
    - iii. *SSAP No. 100R—Fair Value*: Revisions adopt, with modification, *Accounting Standards Update (ASU) 2022-03, Fair Value Measurement of Equity Securities Subject to Contractual Sales Restrictions*, with modification to reject the contractual sales restrictions disclosures. (Ref #2022-16)
    - iv. *SSAP No. 105R—Working Capital Finance Investments*: Rejects guidance from *ASU 2017-12, Derivatives and Hedging* and *ASU 2022-04, Disclosure of Supplier Finance Program Obligations*, as the disclosures are for borrowers, not insurance entity investors. (Ref #2022-18)
  - D. Exposed the following SAP clarifications to statutory accounting guidance for a public comment period ending June 9, except for agenda items 2023-03 and 2023-11EP, which have a public comment period ending May 5:
    - i. *SSAP No. 5R—Liabilities, Contingencies and Impairments of Assets* and *Issue Paper No. 16X—Updates to the Definition of a Liability*: Exposure includes revisions that defer to topic-specific SSAP guidance that varies from the liability definition. (Ref #2022-01)
    - ii. *SSAP No. 7—Asset Valuation Reserve and Interest Maintenance Reserve*: Exposure requests Working Group feedback and direction to NAIC staff regarding the direction and consideration of negative interest maintenance reserve (IMR). (Ref #2022-19)
    - iii. *SSAP No. 20—Nonadmitted Assets* and *SSAP No. 21R—Other Admitted Assets*: Exposed revisions clarify that pledged collateral must qualify as an admitted invested asset for a collateral loan to be admitted. The revisions require audits and the use of net equity value for valuation assessments when the pledged collateral is in the form of partnerships, limited liability companies (LLCs), or joint ventures. (Ref #2022-11)

- iv. *SSAP No. 24—Discontinued Operations and Unusual or Infrequent Items*: Exposed revisions to SSAP No. 24 to clarify the rejection of *ASU 2021-10, Government Assistance*, and the incorporation of disclosures regarding government assistance. (Ref #2023-06)
  - v. *SSAP No. 43R—Loan-Backed and Structured Securities*: Exposed revisions to incorporate changes to add collateralized loan obligations (CLOs) to the financial modeling guidance and clarify that CLOs are not captured as legacy securities. (Ref #2023-02)
  - vi. *SSAP No. 104R—Share-Based Payments* and *SSAP No. 95—Nonmonetary Transactions*: Exposed revisions to adopt with modification *ASU 2019-08, Compensation—Stock Compensation (Topic 718) and Revenue from Contracts with Customers (Topic 606): Codification Improvements—Share-Based Consideration Payable to a Customer*. The revisions add guidance to include share-based consideration payable to customers. (Ref #2023-07)
  - vii. *Interpretation (INT) 03-02: Modification to an Existing Intercompany Pooling Arrangement*: Exposed the intent to nullify INT 03-02, as it is inconsistent with SSAP No. 25. (Ref #2022-12)
  - viii. *INT 20-01: ASU 2020-04 and 2021-01 – Reference Rate Reform*: Exposed revisions to revise the expiration date of INT 20-01 to Dec. 31, 2024. (Ref #2023-05)
  - ix. *Schedule D Reporting*: Exposed revisions to *SSAP No. 26R—Bonds*, *SSAP No. 21R*, *SSAP No. 43R*, and other affected SSAPs to refine guidance for the principles-based bond project. Directed NAIC staff to continue interim discussions with interested parties. (Ref #2019-21)
  - x. *Review Annual Statement Instructions for Accounting Guidance*: Exposed a proposed new project to review the annual and quarterly statement instructions to ensure that accounting guidance is reflected within the SSAPs. (Ref #2023-01)
  - xi. *C-2 Mortality Risk Note*: Exposed revisions to *SSAP No. 51R—Life Contracts*, *SSAP No. 59—Credit Life and Accident and Health Insurance Contracts*, and *SSAP No. 61R—Life, Deposit-Type and Accident and Health Reinsurance* providing new disclosures, which provide the net amount at risk detail needed to support updates to the life risk-based capital (RBC) C-2 mortality risk charges. This item was exposed with a shortened comment deadline of May 5. (Ref #2023-03)
  - xii. *Accounting Practices and Procedures Manual (AP&P Manual) Editorial Updates*: Exposed editorial revisions. This item was exposed with a shortened comment deadline of May 5. (Ref #2023-11EP)
  - xiii. *Appendix D—Nonapplicable GAAP Pronouncements*: The following U.S. GAAP standards were exposed with revisions to reject the following, as they are not applicable to statutory accounting:
    - a. *ASU 2019-07—Codification Updates to SEC Sections: Amendments to SEC Paragraphs Pursuant to SEC Final Rule Releases No. 33-10532, Disclosure Update and Simplification, and Nos. 33-10231 and 33-10442, Investment Company Reporting Modernization, and Miscellaneous Updates*. (Ref #2023-08)
    - b. *ASU 2020-09, Amendments to SEC Paragraphs Pursuant to SEC Release No. 33-10762—Debt (Topic 470)*. (Ref #2023-09)
    - c. *ASU 2022-05, Transition for Sold Contracts*, as not applicable for statutory accounting. (Ref #2023-10)
- E. Directed NAIC staff on the following items:
- i. *Tax Credits*: Directed NAIC staff to proceed with drafting revised accounting guidance and a related issue paper for both *SSAP No. 93—Low-Income Housing Tax Credit Property Investments* and *SSAP No. 94R—Transferable and Non-Transferable State Tax Credits*. Revisions will consider final Financial Accounting Standards Board (FASB) guidance on tax equity investments and interested party feedback. (Ref #2022-14)
  - ii. *Corporate Alternative Minimum Tax (CAMT)*: Directed NAIC staff to continue work with industry and Working Group members on developing guidance for the reporting of the CAMT for interim Working Group discussion. (Ref #2023-04)
- F. Received an update on the following items:
- i. Received a referral from the Valuation of Securities (E) Task Force to inquire about the NAIC Securities Valuation Office (SVO) obtaining the ability to calculate analytical information.

- ii. Announced that copyrighted portable document format (PDF) copies of the AP&P Manual will be made available through Account Manager upon purchase of the 2023 AP&P Bookshelf subscription.
  - iii. Received a request from the American Academy of Actuaries (Academy) for clarification on observed diversity across issuers regarding long-term care (LTC) asset adequacy testing (AAT) under *Actuarial Guideline LI—The Application of Asset Adequacy Testing to Long-Term Care Insurance Reserves (AG 51)*, *SSAP No. 54R—Individual and Group Accident and Health Contracts*, and *Appendix A-010, Minimum Reserve Standards for Individual and Group Accident and Health Insurance Contracts*.
  - iv. Received an update on international activity as discussed by the International Association of Insurance Supervisors (IAIS) Accounting and Auditing Working Group. This discussion noted that public consultations of Insurance Core Principle (ICP) 14: Valuation and ICP 17: Capital Adequacy are expected in July.
  - v. Received an update on U.S. GAAP exposures, noting that pending items will be addressed during the normal maintenance process.
3. Adopted the report of the Blanks (E) Working Group, which met March 7 and took the following action:
- A. Adopted its Nov. 17, 2022, minutes.
  - B. Adopted its editorial listing and the following proposals:
    - i. 2022-14BWG Modified – Modify Exhibit 1, Part 1 and 2, and Exhibit 8, Part 1 and 2, in the life and accident and health (A&H)/fraternal blank, to include the line of business detail reported on the Analysis of Operations by Lines of Business pages.
    - ii. 2022-15BWG – In the life, A&H/fraternal, and property/casualty (P/C) blanks, revise the language of the Schedule H, Part 5 to remove the 5% of premiums filing exemption (FE).
    - iii. 2022-16BWG – Remove Supplemental Health Care Exhibit Part 3 and Supplemental Health Care Exhibit’s Expense Allocation Report.
    - iv. 2022-18BWG – For the life and A&H/fraternal blank instructional corrections on the handling of Exchange Traded Funds (ETFs) and/or SVO-Identified Funds within the IMR and the asset valuation reserve (AVR).
    - v. 2022-20BWG – Modify the instructions and blanks for various health exhibits to change the order of the Vision and Dental lines of business to be consistent with all other statement types.
  - C. Re-exposed the following proposal for a 52-day public comment period ending April 28: 2022-17BWG – Add new disclosure paragraph for Note 8 – Derivative Instruments and illustration to new disclosure to be data-captured. Add electronic-only columns related to derivatives with excluded components to Schedule DB, Part A and Part B for both Section 1 and Section 2. Add new code column instructions for Schedule DB, Part A and B (SAPWG 2021- 20).
  - D. Exposed eight proposals for a 52-day public comment period ending April 28 and one proposal for a 115-day public comment period ending June 30.

### **Capital Adequacy (E) Task Force**

March 23, 2023

- 1. Adopted its Feb. 3, 2023; and 2022 Fall National Meeting minutes, which included the following action:
  - A. Adopted proposal 2022-12-CR (2022 U.S. and Non-U.S. Catastrophe Risk Event Lists).
- 2. Adopted the report of the Health Risk-Based Capital (E) Working Group, which met March 21 and took the following action:
  - A. Adopted its Feb. 7 minutes, which included the following action:
    - i. Adopted its 2022 Fall National Meeting minutes.
    - ii. Adopted proposal 2022-14-H (Trend Test Instructions), which the Working Group exposed for a 30-day public comment period ending Dec. 7, 2022.
    - iii. Referred the runoff company response letter to the Capital Adequacy (E) Task Force.
    - iv. Exposed proposal 2022-16-CA (Underwriting Risk Factors – Investment Income Adjustment) for a 30-day public comment period ending March 9.

- v. Received an update from the American Academy of Actuaries (Academy) on the H2 – Underwriting Risk Review project.
  - B. Adopted proposal 2022-15-H (XR008 Renumbering).
  - C. Referred proposal 2022-16-CA to the Task Force for a 30-day exposure for all lines of business.
  - D. Adopted its 2023 working agenda.
  - E. Exposed proposal 2023-01-CA (Stop Loss Instructions) for a 20-day public comment period ending April 10.
  - F. Discussed the stop loss data and factors.
  - G. Received an update on the Health Test Ad Hoc Group and the draft proposal with revisions to the health test language and general interrogatories.
  - H. Discussed the effect of the COVID-19 pandemic and pandemic risk on the health risk-based capital (RBC) formula.
  - I. Received an update on the H2 – Underwriting Risk Review project.
3. Adopted the report of the Life Risk-Based Capital (E) Working Group, which met March 22 and took the following action:
    - A. Adopted its Jan. 26, 2023, and 2022 Fall National Meeting minutes, which included the following action:
      - i. Exposed the Academy’s C2 Mortality Risk Work Group’s proposal for a 30-day public comment period ending March 1.
      - ii. Exposed proposed revisions to the CM6 and CM7 mortgage RBC factors and formula for a 45-day public comment period ending March 16.
      - iii. Exposed proposed revisions to remove the dual presentation of the trend test for a 15-day public comment period ending Feb. 14.
    - B. Discussed C-2 mortality risk.
    - C. Discussed its 2023 working agenda and priorities.
    - D. Discussed runoff companies.
  4. Adopted the report of the RBC Investment Risk and Evaluation (E) Working Group, which met March 23 and took the following action:
    - A. Adopted its Feb. 27, 2023, and 2022 Fall National Meeting minutes, which included the following action:
      - i. Discussed the Academy’s follow-up to its presentation on collateralized loan obligations (CLOs).
      - ii. Discussed comments received on the referral from the Valuation of Securities (E) Task Force.
      - iii. Discussed comments received on the potential structure change to address residual tranches.
    - B. Received updates from the Valuation of Securities (E) Task Force and the Statutory Accounting Principles (E) Working Group.
    - C. Continued its discussion of CLOs.
    - D. Discussed the residual tranche structure change.
    - E. Discussed its next steps.
  5. Adopted the report of the Property and Casualty Risk-Based Capital (E) Working Group, which met March 22 and took the following action:
    - A. Adopted its Jan. 30, 2023, and 2022 Fall National Meeting minutes, which included the following action:
      - i. Adopted proposal 2022-12-CR.
    - B. Adopted the report of the Catastrophe Risk (E) Subgroup, which met March 21 and took the following action:
      - i. Adopted its Jan. 30, 2023, and 2022 Fall National Meeting minutes, which included the following action:
        - a. Adopted proposal 2022-12-CR, which the Subgroup exposed for a seven-day public comment period ending Jan. 25.
      - ii. Discussed its working agenda.
      - iii. Received an update from the Catastrophe Model Technical Review Ad Hoc Group.
      - iv. Heard a presentation from Travelers on the climate overview and scenario analysis.
      - v. Discussed the wildfire peril impact analysis.

- C. Exposed proposal 2023-02-P (Underwriting Risk Line 1 Factors) for a 30-day public comment period ending April 21.
- D. Discussed annual statement proposal 2023-01BWG, which removes pet insurance from the inland marine line of business and adds new schedule P parts to pet insurance.
- 6. Adopted proposal 2022-09-CA (Revised Affiliated Investments Structure and Instructions), which the Task Force exposed for a 45-day public comment period ending Jan. 28.
- 7. Adopted proposal 2022-13-CA (Health Premiums and Underwriting Risk Premium References), which the Task Force exposed for a 45-day public comment period ending Jan. 28.
- 8. Adopted proposal 2022-14-H, which the Health Risk-Based Capital (E) Working Group exposed for a 30-day public comment period ending Dec. 6, 2022.
- 9. Adopted proposal 2022-15-H, which the Health Risk-Based Capital (E) Working Group exposed for a 30-day public comment period ending Feb. 28.
- 10. Adopted its working agenda.
- 11. Discussed the response from the Health Risk-Based Capital (E) Working Group regarding runoff companies.
- 12. Discussed two referrals from the Valuation of Securities (E) Task Force.
- 13. Discussed the current turmoil in the banking sector, including fallout and possible implications.
- 14. Discussed other matters brought before the Task Force, including: 1) the proposed revised proposal form; 2) health text exposure updates; and 3) the establishment of ad hoc groups to review or analyze current non-investment charges, missing risks, and modernizing asset concentration instructions.

#### **Examination Oversight (E) Task Force**

The Examination Oversight (E) Task Force did not meet at the Spring National Meeting.

#### **Financial Stability (E) Task Force**

March 22, 2023 (joint session with the Macprudential (E) Working Group)

- 1. Adopted its 2022 Fall National Meeting minutes.
- 2. Heard an update on Financial Stability Oversight Council (FSOC) developments.
- 3. Received a Macprudential (E) Working Group update.
- 4. Received a Valuation Analysis (E) Working Group update.
- 5. Heard an international update, which included an update on the International Association of Insurance Supervisors (IAIS) Global Monitoring Exercise (GME). The GME includes the individual insurer monitoring (IIM) exercise and the sector-wide monitoring exercise with three more additional topics of interest: private equity (PE), climate, and cyber.

#### **Receivership and Insolvency (E) Task Force**

March 23, 2023

- 1. Adopted its 2022 Fall National Meeting minutes.
- 2. Adopted the report of the Receiver's Handbook (E) Subgroup, including its Dec. 21, 2022, minutes. During this meeting, the Subgroup took the following action:
  - A. Adopted its July 19, 2022, minutes. During this meeting, the Subgroup took the following action:
    - i. Adopted its Nov. 19, 2021, minutes.
    - ii. Adopted revised Chapters 1–2 of the *Receiver's Handbook for Insurance Insolvencies* (Receiver's Handbook).
    - iii. Exposed revised Chapters 3–5 of the Receiver's Handbook for a 30-day public comment period ending Aug. 19, 2022.
  - B. Adopted revised Chapters 3–5 of the Receiver's Handbook.
  - C. Exposed revised Chapters 6–7 of the Receiver's Handbook for a 45-day public comment period ending Feb. 6.

3. Adopted the report of the Receivership Law (E) Working Group. The drafting group that is reviewing comments received on amendments to the *Property and Casualty Insurance Guaranty Association Model Act (#540)* for restructuring mechanisms is making progress and plans to meet again in April.
4. Adopted the report of the Receivership Financial Analysis (E) Working Group. The Working Group met March 23 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings, to discuss companies in receivership and related topics.
5. Heard an update on international resolution activities. The International Association of Insurance Supervisors (IAIS) released an application paper on policyholder protection schemes for public comment. Comments to be considered by the International Insurance Relations (G) Committee should be sent to NAIC staff by March 27.
6. Heard a presentation from the National Organization of Life and Health Insurance Guaranty Associations (NOLHGA) and the National Conference of Insurance Guaranty Funds (NCIGF) on a proposed tabletop receivership training session. Task Force members provided feedback on the session and possible participation.

### **Reinsurance (E) Task Force**

#### March 6, 2023 (in lieu of the Spring National Meeting)

1. Adopted its 2022 Fall National Meeting minutes.
2. Adopted the report of the Reinsurance Financial Analysis (E) Working Group, which met Jan. 31, 2023; Dec. 19, 2022; and Nov. 22, 2022, in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings, to approve several certified and reciprocal jurisdiction reinsurers for passporting.
3. Received a status report on the reinsurance activities of the Mutual Recognition of Jurisdictions (E) Working Group. The Working Group met Nov. 7, 2022, to reapprove the status of Bermuda, France, Germany, Ireland, Japan, Switzerland, and the United Kingdom (UK) as qualified jurisdictions and reapprove Bermuda, Japan, and Switzerland as reciprocal jurisdictions.
4. Received a status report on the states' implementation of the *Term and Universal Life Insurance Reserve Financing Model Regulation (#787)*. As of Feb. 22, 33 jurisdictions have adopted Model #787, with another three jurisdictions with action under consideration.

### **Risk Retention Group (E) Task Force**

The Risk Retention Group (E) Task Force did not meet at the Spring National Meeting.

### **Valuation of Securities (E) Task Force**

#### March 23, 2023

1. Adopted its Feb. 21, 2023, and 2022 Fall National Meeting minutes. During these meetings, the Task Force took the following action:
  - A. Adopted a *Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual)* amendment to update references to 5GI. The amendment had previously been exposed for a 60-day public comment period ending Feb. 13.
  - B. Adopted a P&P Manual amendment to add instructions for the financial modeling of collateralized loan obligations (CLOs). The amendment had previously been exposed for a 15-day public comment period ending Jan. 9.
  - C. Discussed proposed CLO modeling methodology (excluding scenarios and probabilities).
2. Received a report on the projects of the Risk-Based Capital (RBC) Investment Risk and Evaluation (E) Working Group.
3. Discussed an amendment to the P&P Manual to add instructions for structured equity and funds and deferred a decision on the amendment. The amendment had previously been exposed for a 60-day public comment

period ending Feb. 13. The Task Force directed staff to send a referral to the Statutory Accounting Principles (E) Working Group to request that it consider the definition of structured equity and funds in its residual guidance.

4. Discussed next steps for the CLO modeling project.
5. Discussed proposed questions for NAIC credit rating providers (CRPs) and requested that any recommendations be sent to Securities Valuation Office (SVO) staff.
6. Exposed a proposed P&P Manual amendment to update the Notice of Credit Deterioration for the List of Qualified U.S. Financial Institutions for a 15-day public comment period ending April 10, followed by an e-vote. The Task Force directed staff to also refer the amendment to the Reinsurance (E) Task Force.
7. Received the Annual Report from the SVO on year-end carry-over filings.
8. Received a report on projects of the Statutory Accounting Principles (E) Working Group.

## **FINANCIAL REGULATION STANDARDS AND ACCREDITATION (F) COMMITTEE**

March 22, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Adopted, immediately by reference, revisions made during 2022 to NAIC publications that are required for accreditation purposes (e.g., the *Accounting Practices and Procedures Manual* [AP&P Manual]) and were deemed insignificant.
3. Discussed comment letters received in response to the previously exposed 2020 revisions to the *Insurance Holding Company System Regulatory Act* (#440) and the *Insurance Holding Company System Model Regulation with Reporting Forms and Instructions* (#450). The revisions, which will be considered for adoption at the Summer National Meeting, are recommended for all states effective Jan. 1, 2026, and implement a group capital calculation (GCC) for the purpose of group solvency supervision and a liquidity stress test (LST) for macroprudential surveillance.
4. Voted to remove the *Actuarial Opinion and Memorandum Regulation* (#822) from the Part A: Laws and Regulations, #9. Liabilities and Reserves standard as a requirement for accreditation. The Life Actuarial (A) Task Force opined that it is no longer necessary for accreditation given that the *Standard Valuation Law* (#820) and VM-30, Actuarial Opinion and Memorandum Requirement contain a large degree of overlap with Model #822.

## **INTERNATIONAL INSURANCE RELATIONS (G) COMMITTEE**

March 22, 2023

1. Adopted its Feb. 3, 2023; Jan. 4, 2023; and 2022 Fall National Meeting minutes. During these meetings, the Committee took the following action:
  - A. Discussed NAIC comments on the International Association of Insurance Supervisors' (IAIS') public consultation on the review of its individual insurer monitoring (IIM) assessment methodology.
  - B. Discussed NAIC comments on the *IAIS' Issues Paper on Insurance Sector Operational Resilience*.
2. Heard an update on international activities related to addressing protection gaps. This included hearing from speakers from the American Property Casualty Insurance Association (APCIA) and the Reinsurance Association of America (RAA) on the recently released report, *Global Protection Gaps and Recommendations for Bridging Them* by the Global Federation of Insurance Associations (GFIA).
3. Heard an update on recent activities and priorities of the IAIS, including: 1) a review of recent committee meetings; 2) finalization of the criteria for the comparability assessment process for the aggregation method (AM); 3) continuing work at various IAIS forums and steering groups; and 4) the status of papers on operational resilience and policyholder protection schemes.
4. Heard an update on international activities, including: 1) workstreams of the European Union (EU)-U.S. Insurance Dialogue Project and its plans for 2023; 2) recent meetings, events, and speaking engagements with international insurance regulators; 3) the upcoming NAIC Spring 2023 International Fellows Program; 4) recent and upcoming meetings of the Organisation for Economic Co-operation and Development (OECD) Insurance

and Private Pensions Committee; and 5) upcoming plans of the Sustainable Insurance Forum (SIF) and its priorities.

## **INNOVATION, CYBERSECURITY, AND TECHNOLOGY (H) COMMITTEE**

March 22, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Adopted the report of the Big Data and Artificial Intelligence (H) Working Group, which met March 22 and took the following action:
  - A. Adopted its 2022 Fall National Meeting minutes.
  - B. Received an update on the artificial intelligence (AI)/machine learning (ML) survey. The survey's purpose is to gain a better understanding of the industry's use of big data, AI/ML, and what governance and risk management controls are being put in place. Companies had until Dec. 15, 2022, to file their responses to the home survey. A public report on the home survey will be issued at the Summer National Meeting.
  - C. Received an update on the AI/ML life survey. The survey's purpose is to gain a better understanding of how life insurance companies are deploying AI/ML technologies in pricing and underwriting, marketing, and loss prevention. This survey will be issued to life insurance companies with more than \$250 million in premiums on all individual policies in 2021; term writers that have issued policies on more than 10,000 lives; or a specifically selected insurtech company. An informational letter regarding the survey is scheduled to be distributed by the end of March. A formal examination call letter will be issued at the end of April, and survey responses will be due by the end of May.
  - D. Discussed draft model and data regulatory questions, which insurance regulators may use to ask about models and data used by insurance companies. All comments submitted by the Feb. 13 deadline will be reviewed, and a revised draft will be circulated to the Working Group by the end of May.
3. Adopted the report of the Cybersecurity (H) Working Group, which met March 7 and took the following action:
  - A. Adopted its 2022 Fall National Meeting minutes.
  - B. Discussed its work plan for 2023.
  - C. Heard an overview of the U.S. Department of the Treasury's (Treasury Department's) report, *The Financial Services Sector's Adoption of Cloud Services*, which was released on Feb. 8.
  - D. Discussed a referral to the Information Technology (IT) Examination (E) Working Group to consider updating its cybersecurity-related guidance based on the Cybersecurity and Infrastructure Security Agency's (CISA's) cybersecurity performance goals.
  - E. Discussed the outline for the incident response plan, which builds on the *Insurance Data Security Model Law* (#668) and would aid the states in requesting information from insurers that have experienced a cybersecurity event.
4. Adopted the report of the E-Commerce (H) Working Group. The Working Group reported that it had exposed its state law surveys/framework for a public comment period ending March 23. The framework was developed based on survey work completed in 2022, which included questions on state laws, questions on actions taken in the wake of the COVID-19 pandemic, and a business impact survey.
5. Adopted the report of the Innovation in Technology and Regulation (H) Working Group. The Working Group reported that it plans to meet after the Spring National Meeting to begin implementing its work plan and setting timelines for its 2023 goals, which include the development of forums to discuss innovations within the industry and regulatory communities.
6. Adopted the report of the Privacy Protections (H) Working Group, which met March 21 and took the following action:
  - A. Adopted its 2022 Fall National Meeting minutes.
  - B. Heard an update on federal and state privacy legislation.
  - C. Discussed its updated 2023 work plan.
  - D. Received and discussed comments on the exposure draft of the new *Insurance Consumer Privacy Protection Model Law* (#674).

7. Received an update from the Collaboration Forum on Algorithmic Bias on the development of a model bulletin providing regulatory guidance regarding the use of big data/AI-driven decisional systems by insurers.
8. Heard a report on the proposed Colorado algorithm and predictive model governance regulation.
9. Heard a presentation on North Dakota’s use of blockchain methodology for data calls.

### **NAIC/CONSUMER LIAISON COMMITTEE**

March 21, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Heard a presentation from the Rhode Island Parent Information Network (RIPIN), the American Cancer Society (ACS), and the Center on Health Insurance Reforms (CHIR) on the barriers to enrollment. This presentation is important to state insurance regulators and consumers because it explained the timing and reasons for the rewinding of Medicaid and what state insurance regulators could do to assist them.
3. Heard a presentation from Health Care For All (HCFA), the Leukemia & Lymphoma Society (LLS), Consumers’ Checkbook, and the HIV + Hepatitis Policy Institute on “Obstacles to Medically Necessary Care – Part 1: Delays and Red Tape Due to Prior Authorization.” In this presentation, the spotlight was about how difficult it is and how long it takes, especially for underserved communities, to get the prior authorizations needed for urgently needed care and how state insurance regulators could provide much-needed assistance.
4. Heard a presentation from the National Women’s Law Center (NWLC) and the National Health Law Program (NHeLP) on obstacles to medically necessary care. The presentation discussed the refusal of care and network adequacy, especially reproductive health services and pre-exposure prophylaxis (PrEP) for HIV from religiously affiliated providers in areas that are geographically bent toward facilities of this type. It was important for state insurance regulators to hear how challenging these situations are for consumers.
5. Heard a presentation from the Life Insurance Consumer Advocacy Center calling attention to the dilemma of current assumption policy illustrations for indexed universal life (IUL) and other life policies. This presentation is important to consumers, industry, and state insurance regulators because it draws focus to the effect of low investment rates and their long-term effects on life insurance policies.
6. Heard a presentation from the Center for Economic Justice (CEJ) on dark patterns in digital communications that addressed the perils of the insurance industry moving from paper to digital consumer interactions. This presentation is important to insurance consumers, industry, and state insurance regulators because it pointed to an issue that causes consumers to unwittingly share personal data that did not exist within a paper society but that is very much a concern in today’s digital society.
7. Heard a presentation from the Automotive Education & Policy Institute (AEPI) on aftermarket parts, noting that imitation parts are often not equal when it comes to consumer safety, protection, and the continuation of vehicle warranties. This presentation is important to insurance consumers and state insurance regulators because it identified the differences in manufacturing parts versus vehicle parts produced for use in repairs following accidents.

### **NAIC/AMERICAN INDIAN AND ALASKA NATIVE LIAISON COMMITTEE**

March 24, 2023

1. Adopted its 2022 Fall National Meeting minutes.
2. Discussed the results of its member survey and its next steps for 2023. This is important to tribal insurance consumers, state insurance regulators, and industry because it will guide the agenda items for discussion and presentation throughout the entire year.
3. Heard a presentation from Blue Cross and Blue Shield of Oklahoma titled “ACA Risk Adjustment Treatment of Tribal Enrollees: Barriers to Tribal Member Enrollment and Investments in Tribal Health and Health Equity.” This presentation is important because it highlights the inequities of the federal Centers for Medicare & Medicaid Services (CMS) risk assessment process, especially relative to underserved tribal communities due to the lack of tribal investment opportunities.

**EXECUTIVE (EX) COMMITTEE AND PLENARY**

Executive (EX) Committee and Plenary March 25, 2023, Minutes ..... 3-2

    Adopted Revisions to *Actuarial Guideline XLIX-A—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest to Policies Sold on or After December 14, 2020* (AG 49-A) (Attachment One) ..... 3-8

    Adopted *Actuarial Guideline LIV—Nonforfeiture Requirements for Index-Linked Variable Annuity Products* (AG 54) (Attachment Two) ..... 3-14

    Adopted the *Regulatory Resources for Consumers on Personal Lines Pricing and Underwriting* (Attachment Three) ..... 3-20

    Adopted the *Rate/Rule Filing Checklist* (Attachment Four)..... 3-41

    Report on States’ Implementation of NAIC-Adopted Model Laws and Regulations (Attachment Five) ..... 3-44

Draft: 4/10/23

Executive (EX) Committee and Plenary  
Louisville, Kentucky  
March 25, 2023

The Executive (EX) Committee and Plenary met in Louisville, KY, March 25, 2023. The following Committee and Plenary members participated: Chlora Lindley-Myers, Chair (MO); Andrew N. Mais, Vice Chair (CT); Jon Godfread, Vice President (ND); Scott A. White, Secretary-Treasurer (VA); Dean L. Cameron, Most Recent Past President (ID); Lori K. Wing-Heier (AK); Mark Fowler (AL); Alan McClain (AR); Ricardo Lara represented by Lucy Wang (CA); Michael Conway represented by Peg Brown (CO); Karima M. Woods (DC); Trinidad Navarro (DE); Michael Yaworsky (FL); John F. King represented by Martin Sullivan (GA); Michelle B. Santos (GU); Gordon I. Ito (HI); Doug Ommen (IA); Dana Popish Severinghaus (IL); Amy L. Beard represented by Holly Lambert (IN); Vicki Schmidt (KS); Sharon P. Clark (KY); James J. Donelon (LA); Gary D. Anderson (MA); Kathleen A. Birrane (MD); Timothy N. Schott (ME); Anita G. Fox (MI); Grace Arnold (MN); Troy Downing represented by Matt Eberhardt (MT); Mike Causey represented by Jackie Obusek (NC); Eric Dunning (NE); Scott Kipper (NV); Adrienne A. Harris (NY); Judith L. French (OH); Glen Mulready (OK); Elizabeth Kelleher Dwyer (RI); Michael Wise (SC); Larry D. Deiter represented by Jill Kruger (SD); Carter Lawrence (TN); Cassie Brown represented by Jessica Barta (TX); Jon Pike (UT); Kevin Gaffney (VT); Mike Kreidler represented by Molly Nollette (WA); Nathan Houdek (WI); Allan L. McVey (WV); and Jeff Rude (WY).

1. Received the Report of the Executive (EX) Committee

Director Lindley-Myers reported that the Executive (EX) Committee met March 23. During this meeting, the Committee adopted the March 22 report from the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee and took the following action: 1) appointed Andrew J. Beal (NAIC, Chief Operating Officer and Chief Legal Officer) as acting Chief Executive Officer (CEO); and 2) approved the retention of a consultant to conduct an organizational review and succession planning exercise.

The Committee adopted its interim meeting report from Feb. 10 and Jan. 13 including the following action: 1) appointed Superintendent Dwyer to serve on the International Association of Insurance Supervisors (IAIS) Executive Committee; 2) appointed the following to serve as members on the Consumer Board of Trustees: Commissioner Andrew R. Stolfi, Chair (OR); Commissioner McClain; Director Severinghaus; Commissioner Schmidt; Commissioner Downing; and Acting Commissioner Michael Humphreys (PA); 3) appointed Commissioner Mulready to the National Insurance Producer Registry (NIPR) Board of Directors; 4) approved the recommendation for the NAIC's Kansas City, MO, office space; 5) adopted the Washington, DC, property site selection and fiscal impact statement; 6) appointed the following as members of the NAIC 2023 Audit Committee: Connecticut, Kentucky, Maryland, Massachusetts, Missouri, Nebraska, New Jersey, North Dakota, Oregon, South Dakota, Tennessee, and Virginia; 7) received an update from the Investment Committee; and 8) received updates on various operational matters.

The Committee adopted the reports of its task forces: 1) the Climate and Resiliency (EX) Task Force; 2) the Government Relations (EX) Leadership Council; 3) the Long-Term Care Insurance (EX) Task Force; and 4) the Special (EX) Committee on Race and Insurance.

The Committee approved Requests for NAIC Model Law Development to amend: 1) the *Property and Casualty Insurance Guaranty Association Model Act* (#540); and 2) the *Unfair Trade Practices Act* (#880).

The Committee also: 1) received the 2022 Annual Report of the NAIC Designation Program Advisory Board activities; and 2) received a status report on the implementation of *State Connected*.

The Committee received a status report on model law development efforts for amendments to: 1) the *Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act* (#171); 2) the *Property and Casualty Insurance Guaranty Association Model Act* (#540); 3) the *Mortgage Guaranty Insurance Model Act* (#630); 4) the *Nonadmitted Insurance Model Act* (#870); and 5) the *Insurance Consumer Privacy Protection Model Law* (#674).

The Committee heard reports from the National Insurance Producer Registry (NIPR) and the Interstate Insurance Product Regulation Commission (Compact).

2. Adopted by Consent the Committee, Subcommittee, and Task Force Minutes of the 2022 Fall National Meeting

Commissioner Godfread made a motion, seconded by Commissioner Mais, to adopt by consent the committee, subcommittee, and task force minutes of the 2022 Fall National Meeting. The motion passed unanimously.

3. Received the Report of the Life Insurance and Annuities (A) Committee

Director French reported that the Life Insurance and Annuities (A) Committee met March 23. During this meeting, the Committee adopted its Feb. 24 minutes, which included the following action: 1) adopted its 2022 Fall National Meeting minutes; 2) adopted revisions to *Actuarial Guideline XLIX-A—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest to Policies Sold on or After December 14, 2020* (AG 49-A); and 3) adopted *Actuarial Guideline LIV—Nonforfeiture Requirements for Index-Linked Variable Annuity Products* (AG 54).

The Committee adopted the report of the Accelerated Underwriting (A) Working Group, including its Feb. 22 minutes. During this meeting, the Working Group took the following action: 1) exposed the draft regulatory guidance for accelerated underwriting (AU) in life insurance for a 45-day public comment period ending April 15; and 2) exposed the draft referral to the Market Conduct Examination Guidelines (D) Working Group for a 30-day public comment period ending March 24.

The Committee also heard a presentation from the American Council of Life Insurers (ACLI) and the Society of Actuaries (SOA) on the current state of life insurance.

4. Adopted Revisions to Actuarial Guideline XLIX-A—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest to Policies Sold on or After December 14, 2020 (AG 49-A)

Director French reported that revisions to AG 49-A were adopted by the Life Insurance and Annuities (A) Committee on Feb. 24. These revisions, effective for policies sold on or after May 1, address an issue in indexed universal life (IUL) illustrations where some companies are illustrating non-benchmark indices in a more favorable manner than benchmark indices, particularly for products with uncapped volatility-controlled funds and a fixed bonus.

Director French made a motion, seconded by Commissioner Ommen, to adopt the revisions to AG 49-A (Attachment One). The motion passed unanimously.

5. Adopted Actuarial Guideline LIV—Nonforfeiture Requirements for Index-Linked Variable Annuity Products (AG 54)

Director French reported that the Life Insurance and Annuities (A) Committee adopted AG 54 during its Feb. 24 meeting. AG 54 provides principles outlining the conditions under which an index-linked variable annuity (ILVA) is

consistent with the definition of a variable annuity and exempt from the *Standard Nonforfeiture Law for Individual Deferred Annuities* (#805), and it specifies nonforfeiture requirements consistent with variable annuities.

The guideline promotes consistency while allowing for reasonable product variation, outlining that interim values should provide equitable treatment to the contract holder and the insurance company. AG 54 ensures that consumers will not only experience losses when indices go down, but they will realize gains when indices go up.

Director French made a motion, seconded by Commissioner Donelon, to adopt AG 54 (Attachment Two). The motion passed unanimously.

#### 6. Received the Report of the Health Insurance and Managed Care (B) Committee

Director Fox reported that the Health Insurance and Managed Care (B) Committee met March 23. During this meeting, the Committee adopted its 2022 Fall National Meeting minutes.

The Committee adopted its subgroup, working group, and task force reports and their interim minutes.

The Committee heard a discussion on the Kaiser Family Foundation (KFF) issue brief, “Claims Denials and Appeals in ACA Marketplace Plans in 2021.” The presenters discussed what the data could mean and its limitations, whether the federal Centers for Medicare & Medicaid Services (CMS) use it as part of its regulatory oversight responsibilities, and its potential future uses.

The Committee also heard a discussion of a state “checklist” of actions related to the Medicaid unwinding process provided in the State Health and Value Strategies’ (SHVS’s) issue brief, “Secrets to a Successful Unwinding: Actions State-Based Marketplaces and Insurance Departments Can Take to Improve Coverage Transitions.”

The Committee heard an update from the federal Center for Consumer Information and Insurance Oversight (CCIIO) on recent activities of interest to the Committee, including activities related to the Medicaid unwinding process as a result of the ending of the COVID-19 public health emergency (PHE), the implementation of the federal No Surprises Act (NSA), its new plan management certification modernization project, its health equity initiatives, and the soon to be finalized Notice of Benefit and Payment Parameters 2024 proposed rule.

#### 7. Received the Report of the Property and Casualty Insurance (C) Committee

Commissioner McClain reported that the Property and Casualty Insurance (C) Committee met March 24. During this meeting, the Committee adopted its 2022 Fall National Meeting minutes.

The Committee adopted the reports of its task forces and working groups: 1) the Casualty Actuarial and Statistical (C) Task Force; 2) the Surplus Lines (C) Task Force; 3) the Title Insurance (C) Task Force; 4) the Workers’ Compensation (C) Task Force; 5) the Cannabis Insurance (C) Working Group; 6) the Catastrophe Insurance (C) Working Group; 7) the Terrorism Insurance Implementation (C) Working Group; and 8) the Transparency and Readability of Consumer Information (C) Working Group.

The Committee adopted revisions to the *Nonadmitted Insurance Model Act* (#870). The revisions are intended to conform Model #870 to the federal Nonadmitted and Reinsurance Reform Act of 2010 (NRRRA), which was part of the federal Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).

The Committee heard presentations from the Nonprofits Insurance Alliance (NIA) and the National Association of Mutual Insurance Companies (NAMIC) on the availability and affordability of insurance coverage for nonprofit organizations.

The Committee discussed its charge related to developing marketing intelligence data so state insurance regulators can better assess their markets.

#### 8. Adopted the *Regulatory Resources for Consumers on Personal Lines Pricing and Underwriting*

Commissioner McClain reported that the *Regulator Resources for Consumers on Personal Lines Pricing and Underwriting* was adopted by the Transparency and Readability of Consumer Information (C) Working Group on Nov. 15, 2022, and by the Property and Casualty (C) Committee on Dec. 15, 2022.

This document can be used by state departments of insurance (DOIs) to create consumer education bulletins, social media posts, and other consumer facing materials to help consumers better understand their home and auto insurance premiums.

Commissioner McClain made a motion, seconded by Commissioner Fowler, to adopt the *Regulatory Resources for Consumers on Personal Lines Pricing and Underwriting* (Attachment Three). The motion passed unanimously.

#### 9. Adopted the *Rate/Rule Filing Checklist*

Commissioner McClain reported that the Transparency and Readability of Consumer Information (C) Working Group adopted the *Rate/Rule Filing Checklist* on Nov. 15, 2022, and the Property and Casualty Insurance (C) Committee adopted it on Dec. 15, 2022. DOIs can use the checklist to ensure that their rate/rule filings include all necessary information.

The checklist is based on Kansas' *Rate/Rule Filing Checklist* with the inclusion of a question regarding whether an insurer uses a rating model.

Commissioner McClain made a motion, seconded by Director Cameron, to adopt the *Rate/Rule Filing Checklist* (Attachment Four). The motion passed unanimously.

#### 10. Received the Report of the Market Regulation and Consumer Affairs (D) Committee

Commissioner Pike reported that the Market Regulation and Consumer Affairs (D) Committee met March 24. During this meeting, the Committee adopted its 2022 Fall National Meeting minutes.

The Committee heard a presentation on the emerging cyberthreat of technology-enabled claims instigation, including the review of the use of search engine optimization (SEO).

The Committee adopted the reports of its task forces and working groups: 1) the Antifraud (D) Task Force; 2) the Market Information Systems (D) Task Force; 3) the Producer Licensing (D) Task Force; 4) the Advisory Organization (D) Working Group; 5) the Market Analysis Procedures (D) Working Group; 6) the Market Conduct Annual Statement Blanks (D) Working Group; 7) the Market Conduct Examination Guidelines (D) Working Group; 8) the Market Regulation Certification (D) Working Group; and 9) the Speed to Market (D) Working Group.

#### 11. Received the Report of the Financial Condition (E) Committee

Superintendent Dwyer reported that the Financial Condition (E) Committee met March 24. During this meeting, the Committee: 1) adopted its 2022 Fall National Meeting minutes; 2) received a referral from the Valuation of Securities (E) Task Force related to additional market and analytical information for bond investments; 3) adopted action from the Valuation of Securities (E) Task Force directing that the Securities Valuation Office (SVO) model

collateralized loan obligations (CLOs) for NAIC designations; and 4) adopted an extension until the Summer National Meeting for revisions to the *Mortgage Guaranty Insurance Model Act* (#630).

The Committee adopted the reports of its task forces and working groups: 1) the Accounting Practices and Procedures (E) Task Force; 2) the Capital Adequacy (E) Task Force; 3) the Examination Oversight (E) Task Force; 4) the Financial Stability (E) Task Force; 5) the Receivership and Insolvency (E) Task Force; 6) the Reinsurance (E) Task Force; 7) the Valuation of Securities (E) Task Force; 8) the Mortgage Guaranty Insurance (E) Working Group; 9) the National Treatment and Coordination (E) Working Group; 10) and the Risk-Focused Surveillance (E) Working Group.

The Committee also agreed to merge the members and charges of the Restructuring Mechanisms (E) Subgroup into the Restructuring Mechanisms (E) Working Group.

**Note:** Items adopted within the Financial Condition (E) Committee’s task force and working group reports that are considered technical, noncontroversial, and not significant by NAIC standards—i.e., they do not include model laws, model regulations, model guidelines, or items considered to be controversial—will be considered for adoption by the Executive (EX) Committee and Plenary through the Financial Condition (E) Committee’s technical changes report process. Pursuant to this process, which was adopted by the NAIC in 2009, a listing of the various technical changes will be sent to NAIC Members shortly after the completion of the national meeting, and the Members will have 10 days to comment with respect to those items. If no objections are received with respect to a particular item, the technical changes will be considered adopted by the NAIC membership and effective immediately.

## 12. Received the Report of the Financial Regulation Standards and Accreditation (F) Committee

Director Wing-Heier reported that the Financial Regulation Standards and Accreditation (F) Committee met March 21 in regulator-to-regulator session, pursuant to paragraph 7 (consideration of individual state insurance department’s compliance with NAIC financial regulation standards) of the NAIC Policy Statement on Open Meetings, to: 1) discuss state-specific accreditation issues; and 2) vote to award continued accreditation to the insurance departments of Nebraska, Virginia, and West Virginia.

The Committee met March 22. During this meeting, the Committee adopted its 2022 Fall National Meeting minutes and revisions to NAIC publications that are required for accreditation purposes (e.g., the *Accounting Practices and Procedures Manual* [AP&P Manual]) and were deemed insignificant.

The Committee discussed comment letters received in response to the previously exposed 2020 revisions to the *Insurance Holding Company System Regulatory Act* (#440) and the *Insurance Holding Company System Model Regulation with Reporting Forms and Instructions* (#450). The revisions, which will be considered for adoption at the Summer National Meeting, are recommended for all states effective Jan. 1, 2026, and implement a group capital calculation (GCC) for the purpose of group solvency supervision and a liquidity stress test (LST) for macroprudential surveillance.

The Committee voted to remove the *Actuarial Opinion and Memorandum Regulation* (#822) from the Part A: Laws and Regulations, #9 Liabilities and Reserves standard as a requirement for accreditation. The Life Actuarial (A) Task Force reported that the standard is no longer necessary for accreditation because the *Standard Valuation Law* (#820) and VM-30, Actuarial Opinion and Memorandum Requirements, overlap with Model #822.

## 13. Received the Report of the International Insurance Relations (G) Committee

Commissioner Anderson reported that the International Insurance Relations (G) Committee met March 22. During this meeting, the Committee adopted its Feb. 3, 2023; Jan. 4, 2023; and 2022 Fall National Meeting minutes.

The Committee heard an update on international activities related to protection gaps, including presentations from the American Property Casualty Insurance Association (APCIA) and the Reinsurance Association of America (RAA) on the recently released report, *Global Protection Gaps and Recommendations for Bridging Them* by the Global Federation of Insurance Associations (GFIA).

The Committee also heard an update on recent activities and priorities of the International Association of Insurance Supervisors (IAIS), including: 1) a review of recent committee meetings; 2) the finalization of the criteria for the comparability assessment process for the aggregation method (AM); 3) continuing work at various IAIS forums and steering groups; and 4) the status of papers on operational resilience and policyholder protection schemes.

The Committee heard an update on international activities, including: 1) workstreams of the European Union (EU)-U.S. Insurance Dialogue Project and its plans for 2023; 2) recent meetings, events, and speaking engagements with international insurance regulators; 3) the upcoming 2023 Spring International Fellows Program; 4) upcoming meetings of the Organisation for Economic Co-operation and Development (OECD) Insurance and Private Pensions Committee; and 5) upcoming plans of the Sustainable Insurance Forum (SIF).

#### 14. Received the Report of the Innovation, Cybersecurity, and Technology (H) Committee

Commissioner Birrane reported that the Innovation, Cybersecurity, and Technology (H) Committee met March 22 and adopted: 1) its 2022 Fall National Meeting minutes; and 2) the reports of its task forces and working groups.

The Committee received an update from the Collaboration Forum on Algorithmic Bias on the development of a model bulletin providing regulatory guidance regarding the use of big data/artificial intelligence (AI)-driven decisional systems by insurers.

The Committee also: 1) heard a report on the proposed Colorado Algorithm and Predictive Model Governance Regulation; and 2) heard a presentation on North Dakota's use of blockchain methodology for data calls.

#### 15. Received a Report on the States' Implementation of NAIC-Adopted Model Laws and Regulations

Director Lindley-Myers referred attendees to the written report for updates on the states' implementation of NAIC-adopted model laws and regulations (Attachment Five).

Having no further business, the Executive (EX) Committee and Plenary adjourned.

*Adopted by Life Actuarial (A) Task Force – Dec. 11, 2022*

*Adopted by Life Insurance and Annuities (A) Committee – Feb. 24, 2023*

### Actuarial Guideline XLIX-A

## THE APPLICATION OF THE LIFE ILLUSTRATIONS MODEL REGULATION TO POLICIES WITH INDEX-BASED INTEREST SOLD (On or After December 14, 2020)

### Background

The *Life Insurance Illustrations Model Regulation* (#582) was adopted by the NAIC in 1995. Since that time there has been continued evolution in product design, including the introduction of benefits that are tied to an index or indices. Although these policies are subject to Model #582, not all of their features are explicitly referenced in the model, resulting in a lack of uniform practice in its implementation. In the absence of uniform guidance, two illustrations that use the same index and crediting method often illustrated different credited rates. The lack of uniformity can be confusing to potential buyers and can cause uncertainty among illustration actuaries when certifying compliance with Model #582.

~~In 2019, the NAIC decided that illustrations of products with multipliers, cap buy-ups, and other enhancements that are linked to an index or indices should not illustrate better than products without such features. This new requirement is intended to apply to illustrations on policies sold on or after the effective date of this guideline while the existing requirements continue to apply for inforce illustrations on policies sold before the effective date of this guideline.~~

This guideline provides uniform guidance for policies with index-based interest. In particular, this guideline:

- (1) Provides guidance in determining the maximum crediting rate for the illustrated scale and the earned interest rate for the disciplined current scale.
- (2) Limits the policy loan leverage shown in an illustration.
- (3) Requires additional consumer information (side-by-side illustration and additional disclosures) that will aid in consumer understanding.

### Text

#### 1. Effective Date

This Actuarial Guideline shall be effective for all new business and in force illustrations on policies sold on or after December 14, 2020.

#### 2. Scope

This Actuarial Guideline shall apply to any life insurance illustration that meets both (i) and (ii), below:

- i. The policy is subject to Model #582.
- ii. The policy offers Indexed Credits.

#### 3. Definitions

A. Alternate Scale: A scale of non-guaranteed elements currently being illustrated such that:

- i. The Annual Rate of Indexed Credits for each Index Account does not exceed the lesser of

## AG XLIX-A

## Appendix C

the maximum Annual Rate of Indexed Credits for the illustrated scale less 100 basis points and the credited rate for the Fixed Account. If the insurer does not offer a Fixed Account with the illustrated policy, the Annual Rate of Indexed Credits for each Index Account shall not exceed the average of the maximum Annual Rate of Indexed Credits for the illustrated scale and the guaranteed Annual Rate of Indexed Credits for that account. However, the Annual Rate of Indexed Credits for each Index Account shall never be less than the guaranteed Annual Rate of Indexed Credits for that account.

- ii. If the illustration includes a loan, the illustrated Policy Loan Interest Credited Rate shall not exceed the illustrated Policy Loan Interest Rate. For example, if the illustrated Policy Loan Interest Rate is 4%, the Policy Loan Interest Credited Rate shall not exceed 4%.
  - iii. All other non-guaranteed elements are equal to the non-guaranteed elements for the illustrated scale.
- B. Annual Net Investment Earnings Rate: Gross portfolio annual earnings rate of the general account assets (excluding hedge assets for Indexed Credits), less provisions for investment expenses and default cost, allocated to support the policy. Charges of any kind cannot be used to increase the Annual Net Investment Earnings Rate.
- C. Annual Rate of Indexed Credits: The total annualized Indexed Credits expressed as a percentage of the account value used to determine the Indexed Credits.
- D. Benchmark Index Account: An Index Account with the following features:
- i. The interest calculation is based on the percent change in S&P 500<sup>®</sup> Index value only, over a one-year period using only the beginning and ending index values. (S&P 500<sup>®</sup> Index ticker: SPX)
  - ii. An annual cap is used in the interest calculation.
  - iii. The annual floor used in the interest calculation shall be 0%.
  - iv. The participation rate used in the interest calculation shall be 100%.
  - v. Interest is credited once per year.
  - vi. The Hedge Budget used to determine the cap in 3 (D) (ii) does not exceed the Annual Net Investment Earnings Rate. Charges of any kind cannot be used to increase the annual cap.
  - vii. There are no enhancements or similar features that provide additional Indexed Credits in excess of the interest provided by 3 (D) (i) through 3 (D) (v), including but not limited to experience refunds, multipliers, or bonuses.
  - viii. There are no limitations on the portion of account value allocated to the account.
  - ix. A single Benchmark Index Account will be determined for each policy. This can be either an Index Account offered with the illustrated policy or determined according to Section 4 (A) (ii) for purposes of complying with this guideline. A policy shall have no more than one Benchmark Index Account.

## AG XLIX-A

## Appendix C

- E. Fixed Account: An account where there are no Indexed Credits.
- F. Hedge Budget: For each Index Account, the total annualized amount assumed to be used to generate the Indexed Credits of the account, expressed as a percent of the account value in the Index Account. This total annualized amount should be consistent with the hedging program of the company.
- G. Index Account: An account where some or all of the amounts credited are Indexed Credits.
- H. Indexed Credits: Any interest credit, multiplier, factor, bonus, charge reduction, or other enhancement to policy values that is linked to an index or indices. Amounts credited to the policy resulting from a floor greater than zero on an account with any interest credit, multiplier, factor, bonus, charge reduction, or other enhancement to policy values that is linked to an index or indices are included.
- I. Loan Balance: Any outstanding policy loan and loan interest, as defined in the policy.
- J. Policy Loan Interest Rate: The current annual interest rate as defined in the policy that is charged on any Loan Balance. This does not include any other policy charges.
- K. Policy Loan Interest Credited Rate: The annualized interest rate credited that applies to the portion of the account value backing the Loan Balance:
  - i. For the portion of the account value in the Fixed Account that is backing the Loan Balance, the Policy Loan Interest Credited Rate is the applicable annual interest crediting rate.
  - ii. For the portion of the account value in an Index Account that is backing the Loan Balance, the Policy Loan Interest Credited Rate is the Annual Rate of Indexed Credits, net of any applicable Supplemental Hedge Budget, for that account.
- L. Supplemental Hedge Budget: For each Index Account, the Hedge Budget minus the minimum of the Annual Net Investment Earnings Rate and the Hedge Budget that is used in the determination of the Benchmark Index Account. The Supplemental Hedge Budget will never be less than zero. This amount should be consistent with the hedging program of the company.

## 4. Illustrated Scale

The total Annual Rate of Indexed Credits for the illustrated scale for each Index Account shall be limited as follows:

- A. Calculate the geometric average annual credited rate for the Benchmark Index Account for the 25-year period starting on 12/31 of the calendar year that is 66 years prior to the current calendar year (e.g., 12/31/1949 for 2015 illustrations) and for each 25-year period starting on each subsequent trading day thereafter, ending with the 25-year period that ends on 12/31 of the prior calendar year.
  - i. If the insurer offers a Benchmark Index Account with the illustrated policy, the illustration actuary shall use the current annual cap for the Benchmark Index Account in 4 (A).
  - ii. If the insurer does not offer a Benchmark Index Account with the illustrated policy, the illustration actuary shall use actuarial judgment to determine a hypothetical, supportable current annual cap for a hypothetical, supportable Index Account that meets the definition of the Benchmark Index Account, and shall use that cap in 4 (A).

## AG XLIX-A

## Appendix C

- B. For the Benchmark Index Account the Annual Rate of Indexed Credits shall not exceed the minimum of (i) and (ii):
- i. The arithmetic mean of the geometric average annual credited rates calculated in 4 (A).
  - ii. 145% of the Annual Net Investment Earnings Rate.
- C. For any other Index Account that is not the Benchmark Index Account in 3 (D), the Annual Rate of Indexed Credits illustrated as a percentage of the account value in the Index Account prior to the deduction of any charges used to fund a Supplemental Hedge Budget shall not exceed the minimum of (i) and (ii) for policies sold prior to May 1, 2023 and shall not exceed the minimum of (i), (ii), and (iii) for policies sold on or after May 1, 2023:
- i. The Annual Rate of Indexed Credits for the Benchmark Index Account calculated in 4 (B) plus the Supplemental Hedge Budget for the Index Account.
  - ii. The Annual Rate of Indexed Credits reflecting the fundamental characteristics of the Index Account and the appropriate relationship to the expected risk and return of the Benchmark Index Account. The illustration actuary shall use actuarial judgment to determine this value using lookback methodology consistent with 4 (A) and 4 (B) (i) where appropriate.
  - iii. The lesser of (1) and (2) multiplied by the Annual Rate of Index Credits for the Benchmark Index Account, calculated in 4 (B), divided by (2); plus, the Supplemental Hedge Budget for the Index Account:
    1. The Hedge Budget of the Index Account
    2. Hedge Budget of the Benchmark Index Account.
- D. For the purposes of compliance with Section 6 (C) of Model #582, the Supplemental Hedge Budget is subtracted from the Annual Rate of Indexed Credits before comparing to the earned interest rate underlying the disciplined current scale.

At the beginning of each calendar year, the insurer shall be allowed up to three (3) months to update the credited rate for each Index Account in accordance with 4 (B) and 4 (C).

## 5. Disciplined Current Scale

The earned interest rate for the disciplined current scale shall be limited as follows:

- A. If an insurer engages in a hedging program for Indexed Credits in an account, the assumed earned interest rate underlying the disciplined current scale for that account, inclusive of all general account assets, both hedge and non-hedge assets, that support the policy, net of default costs and investment expenses (including the amount spent to generate the Indexed Credits of the policy) shall not exceed the lesser of (i) and (ii):
- i. The Annual Net Investment Earnings Rate, plus 45% of the lesser of (1) and (2):
    1. Hedge Budget minus any annual floor, to the extent that the floor is supported by the Hedge Budget.

## AG XLIX-A

## Appendix C

2. The minimum of the Annual Net Investment Earnings Rate and the Hedge Budget that is used in the determination of the Benchmark Index Account.
- ii. The Annual Rate of Indexed Credits plus the Annual Net Investment Earnings Rate minus the Hedge Budget.

These rates should be adjusted for timing differences in the hedge cash flows to ensure that fixed interest is not earned on the Hedge Budget minus any annual floor, to the extent that the floor is supported by the Hedge Budget.

Guidance Note: The above approach does not stipulate any required methodology as long as it produces a consistent limit on the assumed earned interest rate underlying the disciplined current scale.

For a policy with multiple Index Accounts, a maximum rate in 5 (A) should be calculated for each account. All accounts, fixed and indexed, within a policy can be tested in aggregate.

- B. If an insurer does not engage in a hedging program for Indexed Credits, the assumed earned interest rate underlying the disciplined current scale shall not exceed the Annual Net Investment Earnings Rate.
- C. These experience limitations shall be included when testing for self-support and lapse-support under Model #582, accounting for all illustrated benefits including any illustrated benefits and bonuses that impact the policy's account value.

## 6. Policy Loans

If the illustration includes a loan, the illustrated Policy Loan Interest Credited Rate shall not exceed the illustrated Policy Loan Interest Rate by more than 50 basis points. For example, if the illustrated Policy Loan Interest Rate is 4.00%, the Policy Loan Interest Credited Rate shall not exceed 4.50%.

## 7. Additional Standards

The basic illustration shall also include the following:

- A. A ledger using the Alternate Scale shall be shown alongside the ledger using the illustrated scale with equal prominence.
- B. A table showing the minimum and maximum of the geometric average annual credited rates calculated in 4 (A).
- C. For each Index Account illustrated, a table showing actual historical index changes and corresponding hypothetical Indexed Credits using current index parameters for the most recent 20-year period.

**PROJECT HISTORY****2023 REVISIONS TO ACTUARIAL GUIDELINE XLIX-A—  
THE APPLICATION OF THE LIFE ILLUSTRATIONS MODEL  
REGULATION TO POLICIES WITH INDEX-BASED INTEREST SOLD  
(ON OR AFTER DECEMBER 14, 2020)****1. What issues was the project intended to address?**

After the 2020 adoption of *AG XLIX-A— The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest to Policies Sold on or After December 14, 2020* (AG 49-A), state regulators developed concerns with some new product designs that illustrated more favorably than those based on a traditional capped Standard and Poor's 500 index (S&P 500). In particular, the revisions to AG 49-A intend to improve illustrations for indexed universal life (IUL) products with uncapped volatility-controlled funds and a fixed bonus.

**2. What states participated in drafting the model?**

The following states are currently members of the IUL Illustration (A) Subgroup of the Life Actuarial (A) Task Force: Minnesota (Chair), California, Connecticut, Illinois, Indiana, Iowa, Nebraska, New York, Ohio, Texas, Utah, and Virginia.

**3. What general procedure was followed in drafting the model? What efforts were made to assure that all interested parties were provided an opportunity to comment during the drafting process?**

To address the illustration issues, open meetings of the existing IUL Illustration (A) Subgroup were held to draft revisions to AG 49-A (see Table 1). The subgroup coordinated with all of the industry interested parties, including representatives from the American Council of Life Insurers and the American Academy of Actuaries. Notice of the open conference calls was posted to the NAIC's home page on the Internet and emailed to over 500 interested parties.

Table 1:

Meeting Date	Open/Regulator-only?
7/18/2022	Open
10/12/22	Open
11/9/22	Open

**4. What significant issues were raised during the drafting process, and how were those issues resolved?**

The key question the group faced was whether to address the issues with the illustrations of specific IUL product designs by revising AG 49-A or to more comprehensively address life insurance illustration issues by opening up the *Life Insurance Illustrations Model Regulation* (#582). The Task Force decided to move forward with a phased approach that would address the immediate issues impacting by revising AG 49-A, while continuing to consider larger changes to life insurance illustration regulations.

**5. What are the implications of this project for accreditation and codification?**

The Guideline should be handled in a manner that is consistent with the treatment of other guidelines.

*Adopted by Life Actuarial (A) Task Force – 12/11/2022*

*Adopted by Life Insurance and Annuities (A) Committee – 2/24/2023*

## Actuarial Guideline LIV

### Nonforfeiture Requirements for Index-Linked Variable Annuity Products

#### **Background**

**The purpose of this guideline is to specify the conditions under which an Index-Linked Variable Annuity (ILVA) is consistent with the definition of a variable annuity and exempt from Model 805 and specify nonforfeiture requirements consistent with variable annuities.**

A number of insurers have developed and are issuing annuity products with credits based on the performance of an index with caps on returns, participation rates, spreads or margins, or other crediting elements, that include a risk of negative index returns subject to limitations on the loss, such as a floor or a buffer. These products are not unitized and do not invest directly in the assets whose performance forms the basis for the credits.

There is no established terminology for these annuity products. These products go by several names, including structured annuities, registered index-linked annuities (RILA), or index-linked variable annuities, among others. This guideline refers to these products as index-linked variable annuities (ILVA).

Variable annuities are exempted from the scope of NAIC Model 805, *Standard Nonforfeiture Law for Individual Deferred Annuities*; however, NAIC Model 805 does not define the term "variable annuity".

NAIC Model 250, *Variable Annuity Model Regulation*, defines variable annuities as “contracts that provide for annuity benefits that vary according to the investment experience of a separate account.” Section 7B of NAIC Model 250 provides that "to the extent that a variable annuity contract provides benefits that do not vary in accordance with the investment performance of a separate account" the contract shall satisfy the requirements of the NAIC Model 805.

The application of the NAIC Model 250 to a traditional variable annuity with unitized values is straightforward. The unitized feature provides an automatic linkage between annuity values and the investment experience of a separate account. Daily values (market values of the separate account assets) are the basis of all the benefits, including surrender values.

The fact that ILVA accounts are not unitized means they do not have values determined directly by the market prices of the underlying assets. Therefore, this guideline sets forth principles and requirements for determining values, including death benefit, withdrawal amount, annuitization amount or surrender values, such that an ILVA is considered a variable annuity and thereby exempt from Model 805. An ILVA that does not comply with the principles and requirements of this guideline is not considered a variable annuity and therefore is subject to Model 805.

**Drafting Note:** This guideline interprets the term “variable annuity” for purposes of exemption from Model 805. It is not intended to modify the definition of a variable annuity under Model 250 or other Model Regulations.

#### **Scope**

This guideline applies to any index-linked annuity exempt from the NAIC Model 805 on the basis that it is a variable annuity and includes index-linked crediting features that are built into policies or contracts (with or without unitized subaccounts) or added to such by rider, endorsement, or amendment.

**Principles**

This guideline is based on the following principles:

1. Interim Values defined in the contract provide equity between the contract holder and the insurance company.
2. Interim Values are consistent with the value of the Hypothetical Portfolio over the Index Strategy Term.

**Definitions**

“Derivative Asset Proxy” means a package of hypothetical derivative assets established at the beginning of an Index Strategy Term that is designed to replicate credits provided by an Index Strategy at the end of an Index Strategy Term.

“Fixed Income Asset Proxy” is a hypothetical fixed income asset.

“Hypothetical Portfolio” means a hypothetical portfolio composed of a Fixed Income Asset Proxy and a Derivative Asset Proxy.

“Index” means a benchmark designed to track the performance of a defined portfolio of securities.

“Index Strategy” means a method used to determine index credits with specified index or indices and cap, buffer, participation rate, spread, margin or other index crediting elements.

“Index Strategy Base” means the notional amount used to determine index credits that does not change throughout the Index Strategy Term except for withdrawals, transfers, deposits, loans, and any explicit charges.

“Index Strategy Term” means the period of time from the term start date to the term end date over which an index changes and the index credit is determined.

“Interim Value” means the Strategy Value at any time other than the start date and end date of an Index Strategy Term.

“Strategy Value” means the value, attributable to an Index Strategy, used in determining values including death benefit, withdrawal amount, annuitization amount or surrender values.

“Trading Cost” means the additional cost of liquidating the derivative assets in the Derivative Asset Proxy or actual derivative assets supporting the Index Strategy that is not accounted for in the Derivative Asset Proxy calculation.

**Text**

The Index Strategy Base must equal the Strategy Value at the Index Strategy Term start date.

The Fixed Income Asset Proxy is assumed to be a hypothetical fixed income asset with a yield that results in

- i. At the beginning of the Index Strategy Term, the book value of the Fixed Income Asset Proxy equal to the Index Strategy Base less the Derivative Asset Proxy value; and
- ii. At the end of the Index Strategy Term, the book value of the Fixed Income Asset Proxy, assuming no change in yield, projected to equal the Index Strategy Base.

**Drafting Note:** The guideline defines the conditions under which an index-linked variable annuity is exempt from Model 805 on the basis that it is a variable annuity. A variable annuity provides daily values (analogous to Interim Values in this guideline) based on the market value of separate account assets. In order to more closely align an ILVA to a variable annuity Interim Values should be consistent with the market value of hypothetical assets supporting the ILVA (i.e. Hypothetical Portfolio). The market value of the assets may be determined by a fair value methodology or by applying an MVA to the book value. A state may want to consider whether including or

excluding an MVA is appropriate. In making a determination regarding whether including or excluding an MVA is appropriate and, if applicable, what an acceptable MVA formula is, the state should consider whether the Interim Values provide reasonable equity between the contract holder and the insurance company.

The value of the package of derivative assets is determinable daily. Assumptions used to determine the market value of the Derivative Asset Proxy including implied volatilities, risk-free rates, and dividend yields must be consistent with the observable market prices of derivative assets, whenever possible.

Interim Values must be materially consistent with the value of the Hypothetical Portfolio over the Index Strategy Term less a provision for the cost attributable to reasonably expected or actual Trading Costs at the time the Interim Value is calculated.

If a contract provides Interim Values determined using a methodology other than a Hypothetical Portfolio methodology as described in this guideline, the company must demonstrate that the contractually defined Interim Values will be materially consistent over the Index Strategy Term with the Interim Values that would be produced using the Hypothetical Portfolio methodology for each combination of Index Strategy and Index Strategy Term under a reasonable number of realistic economic scenarios that include index changes that test crediting constraints and recognize initial option pricing market conditions.

The company must provide an actuarial memorandum with each ILVA product filing that includes the following:

1. Actuarial certifications must be included with each ILVA product filing and must include the following:
  - a. Interim Values defined in the contract provide equity between the contract holder and the insurance company;
  - b. The assumptions used to determine the market value of the Derivative Asset Proxy including implied volatilities, risk-free rates, dividend yields, and other parameters required to value the derivatives are consistent with the observable market prices of derivative assets over the Index Strategy Term, whenever possible. Valuation techniques include the standard Black-Scholes method, Monte-Carlo Simulation techniques, and other market consistent option valuation techniques for more complex options;
  - c. The contractually defined Interim Values are materially consistent with the Interim Values that would be produced using the Hypothetical Portfolio methodology for each combination of Index Strategy and Index Strategy Term over the Index Strategy Term less a provision for the Trading Costs at the time the Interim Value is calculated; and
  - d. Any Trading Costs represent reasonably expected or actual costs at the time the Interim Value is calculated.
2. If the Interim Values are determined using a methodology other than the Hypothetical Portfolio methodology described in this guideline, the actuary shall describe the testing performed to verify that the values are materially consistent with the Hypothetical Portfolio methodology. The actuary should define any parameters or assumptions used in determining material consistency and provide a summary of the results of the testing.
3. Descriptions of
  - a. The value of the Fixed Income Asset Proxy;
  - b. The market value adjustment formula, if any;
  - c. The market value of the Derivative Asset Proxy including any Trading Costs; and
  - d. All formulas, methodologies and assumptions used to calculate these values for each Index Strategy and Index Strategy Term as well as the sources for all assumptions.

ILVA nonforfeiture benefits for Index Strategies subject to this guideline must comply with Section 7 of Model 250 not including Section 7.B with net investment return consistent with the requirements for determining Interim Values in this guideline.

**Effective Date**

The Guideline applies to all contracts (including associated riders, endorsements, or amendments) issued on or after July 1, 2024.

**PROJECT HISTORY****ACTUARIAL GUIDELINE LIV—  
NONFORFEITURE REQUIREMENTS FOR INDEX-LINKED  
VARIABLE ANNUITY PRODUCTS****1. What issues was the project intended to address?**

The purpose of the Guideline is stated as follows: “The purpose of this guideline is to specify the conditions under which an Index-Linked Variable Annuity (ILVA) is consistent with the definition of a variable annuity and exempt from Model 805 and specify nonforfeiture requirements consistent with variable annuities.”

**2. What states participated in drafting the model?**

The following states are currently members of the Index-Linked Variable Annuity (ILVA) (A) Subgroup of the Life Actuarial (A) Task Force: Ohio (Chair), Utah (Vice-Chair), California, Illinois, Indiana, Nebraska, New Jersey, New York, Texas, Virginia, and Washington.

**3. What general procedure was followed in drafting the model? What efforts were made to assure that all interested parties were provided an opportunity to comment during the drafting process?**

In response to the emergence of products commonly referred to as index-linked variable annuities, registered index-linked annuities, or other names, Pete Weber (OH) recommended that the Life Actuarial (A) Task Force form an ILVA (A) Subgroup to draft a standard that would define the minimum interim values for these products at a call of the Task Force on June 17, 2021. After approval of the formation of the ILVA (A) Subgroup from the Task Force and subsequent approval from the Life Insurance and Annuities (A) Committee and the NAIC’s Executive (EX) Committee and Plenary, open meetings of the subgroup began.

The work of the subgroup was coordinated with all industry interested parties. In addition to twelve open subgroup conference calls that were held over 2021 and 2022 (see Table 1) to develop a draft Actuarial Guideline, several updates were provided to the Life Actuarial (A) Task Force during open sessions. Notice of these conference calls was posted on the NAIC’s home page on the Internet and e-mailed to approximately 500 interested parties, including representatives of the American Council of Life Insurers, the Committee of Annuity Insurers, and the American Academy of Actuaries.

**4. What significant issues were raised during the drafting process, and how were those issues resolved?**

Two key questions emerged during the process of drafting the actuarial guideline:

1. Should the actuarial guideline allow companies to utilize market value adjustment term lengths other than the maturity of the Fixed Income Asset Proxy?
2. Should the actuarial guideline allow companies to continue to have the option to include or exclude a market value adjustment in their ILVA products?

There was concern that reaching a strong consensus on both of these items would be time consuming if not impossible. To address both issues and advance the actuarial guideline, revisions were made to remove specific requirements related to market value adjustments. In place of specific market value adjustment requirements, a drafting note was added that granted more flexibility to the states to be able to approve products that are consistent with the principles laid out in the actuarial guideline. In particular, the first principle of the actuarial guideline states that the interim values must provide equity between the contract holder and the insurance company. That principle should guide states in determining whether a market value adjustment is appropriate or not.

**5. What are the implications of this project for accreditation and codification?**

The Guideline should be handled in a manner that is consistent with the treatment of other guidelines.

*Adopted by Transparency and Consumer Readability (C) Working Group – Nov. 15, 2022*

*Adopted by Property and Casualty (C) Committee – Dec. 15, 2022*

*REGULATORY RESOURCES

PERSONAL LINES PRICING  
AND UNDERWRITING*

# *AUTO SECTION*

## How Do Insurers Determine Your Auto Insurance Premium?

The way auto insurers determine how much you pay for insurance is constantly changing. The process starts with the information you provided on the application. The two parts of the process are *underwriting* and *rating*.

### How Do Insurers Underwrite?

The first part of the process is underwriting. Insurance companies underwrite to:

- know the risk of insuring an applicant.
- group the applicant with others who have similar risks.
- decide if they will insure the applicant.

To underwrite an auto insurance policy, insurance companies want information about certain factors that might affect how likely you are to have a loss that insurance covers. Some of these factors are beyond your control, such as age and gender. You have control over other factors an insurance company considers, including where your car is, how you use it, the make and model of your car, and your credit-based insurance score.

An underwriter uses information from your application as well as from other sources.

Insurance companies depend on the information in your policy application. The questions you're asked when you apply for insurance help the company know how likely you are to have a loss that insurance covers.

Insurance companies also get information from other sources. For example, some auto insurers get information about your credit history from credit bureaus. They also get information about your driving record from third parties, such as the Division of Motor Vehicles, and your history of filing auto insurance claims from insurance claims databases.

### How Do Insurers Rate Risk?

After underwriting, the next step is to rate your risk. The company sets a rate for each group of applicants who are similar risks.

A rating factor is a specific characteristic of a potential policyholder that an insurer uses to price auto insurance premiums. All else being equal, the less risky your rating factors are, the less you'll pay for insurance.

For more information about the rating factors many companies use, see *Factors Used to Rate Auto Insurance*.

### How Do Insurers Determine Auto Insurance Premiums?

Insurance companies use information about you, your vehicle, and your insurance coverage to decide whether to insure you and how much you'll pay for auto insurance. They'll get this information from you or from organizations. All this information is used to rate you as an insurance risk and affects how much you'll pay for insurance.

Some factors relate to the driver(s) and some to the type of vehicle you want to insure. Others are based on the amount and types of coverage you buy. There are discounts that could reduce the premium.

Insurance companies use various methods to rate your risk. Different insurance companies often charge you different amounts for the same or similar coverage.

Also, some states limit the factors an insurance company can use. States also have different requirements about how much insurance you buy, which affects your cost.

## General Information

Age, years of driving experience, gender, and marital status are factors insurance companies may use to determine how much you'll pay. The insurance company gets information about your driving record and accident history from a third party (such as the Division of Motor Vehicles). In some states, insurance companies can't consider certain factors, such as your gender or age.

If other drivers live with you, your insurance company will also look at their information to decide how much you'll pay.

## How You Use the Vehicle

Your insurance premium may vary based on whether you use your vehicle only for pleasure or drive it back and forth to work. Driving for pleasure means that you drive only occasionally. If you drive only for pleasure, you might pay less.

Most personal auto insurance policies won't pay for accidents if you use your car for business activities your policy doesn't cover, such as transporting people or delivering goods.

## Gender and Age

Some research shows that males have more accidents than females and younger drivers have more accidents than older and more experienced drivers. That's why young men are often charged more for insurance than young women. Inexperienced drivers may pay more regardless of age. Some states don't let insurance companies use gender as a factor when they rate insurance.

Insurance companies look at accident statistics for all age groups. What you pay for insurance may change as you get older.

Some states require insurance companies to give a discount to any primary driver who is older than 55 if they complete an approved accident prevention or defensive driving course the Division of Motor Vehicles approves.

## Location

It's important to tell your insurance company where you keep (or "garage") your vehicle. You may pay more or less based on where you live or keep your car. The insurance company may look at the weather and number of accidents and thefts in the area you live in.

## Other Risk Factors

Some insurance companies consider your job and education to decide how much to charge you. That's why an insurance company may ask what you do for a living and how much school you've completed.

In some states, married drivers might pay less for auto insurance. And homeowners might pay less than renters.

## Coverage History

When you apply for insurance, you may be asked about your previous insurance coverage. Most insurance companies charge you more if you've gone without insurance before.

You might need to give the name of your previous insurance companies and the dates you were insured. Insurance companies want to know if a company ever cancelled your insurance policy because you didn't pay. Your new insurance company also may ask about your traffic violations and claims history.

Some states limit insurance companies' use of prior insurance coverage as a factor when rating a policy.

## Driving Habits and History

Insurance companies look at your driving record and habits and those of anyone else on your policy or living with you. Your new insurance company might ask if you've had traffic tickets or been in an accident. Typically, your driving record for the past three to five years impacts what you pay. Drivers with a bad driving record have a greater chance of being in an accident and might pay more for their insurance.

Drive safely. Nothing affects your auto insurance premium more than how you drive. Insurance companies consider drivers who have caused car accidents to be a higher risk and might charge them more for insurance.

Although the company will get your driving record from a third party when you apply for a policy, it's important to be honest and truthful when you give the insurer information. Being honest will mean it's more likely that your quote will match what you'll actually pay for your insurance.

If your driving record has improved over the last few years, shop around to see if you can pay less with another insurance company.

## Vehicle Owners and Operators in Your Household

Some states may let you exclude a driver from your insurance policy. Others will not. An excluded driver is one that you ask your insurance company not to cover, usually because having them on your policy will increase what you'll pay. Talk with your agent or insurance company to find out if this is an option for you. Be aware that you have no insurance coverage for damage caused by an excluded driver driving your vehicle.

## Telematics

Telematics is in-car tracking technology that insurance companies use to monitor your car and your driving behaviors. Many insurance companies use telematics to learn how fast you drive, your braking behaviors, and the distance you drive. Telematics can work through a mobile app or a Bluetooth device that communicates with your car. The insurance company may use your driving behaviors and habits to determine how much to charge you. Telematics can also work directly with your car to record how it performs and how it's maintained.

### Usage-Based Premiums

Some insurance companies may use information about how you drive or how much you drive to decide how much you'll pay. Pay As You Drive and Pay-per-Mile policies are two examples of using telematics to determine premium.

**Pay As You Drive.** Pay As You Drive uses information from telematics about your driving habits to determine what you'll pay. Telematics can track braking and speeding, how often you drive, the time of day or night you drive, where you drive, and whether you use a cell phone while driving. You may be able to log on to the insurance company's website to see how your driving habits affect how much you pay.

**Pay-per-Mile.** Insurance companies base what you pay for insurance on an estimate of how much you drive. Some insurance companies charge a base rate and then add a "per-mile" fee to determine your premium. Insurance companies use a device installed in your car to track the number of miles you drive. If you work from home, use mass transit, or don't drive often this type of policy could save you money. Some companies let you have this type of policy without a tracking device but require you to send a photo of your odometer reading each month.

### Credit-Based Insurance Score

Insurance companies may use information about your credit history when they rate your policy. They use credit-based insurance scores which, like all credit-based scores, predict an outcome. Credit-based insurance scores predict the amount of a claim, the likelihood of filing a claim, or the likelihood a policyholder will stay with an insurer instead of shopping around.

Credit-based insurance scores, like other credit scores, are based on your credit payment history, your current debt, how much new credit you've applied for, and what types of credit you have. Some insurance companies combine credit information with traditional insurance information, such as claims history, to create hybrid credit-based insurance scores. In either case, a higher score indicates you'll likely pay less for insurance.

Some states restrict or even ban the use of credit-based insurance scoring. Each insurance company uses its own method to determine your score.

Before you apply for insurance, it's a good idea to get a copy of your credit report and make sure the information in it is correct. Bankruptcies, judgments, liens, late payments, and credit inquiries

may mean a lower credit-based insurance score. You can find information about how to get your credit report at <https://www.usa.gov/credit-reports>.

It's important to talk to your agent or insurance company if you've had extraordinary life circumstances, such as divorce, death of a family member, job loss, military deployment, or serious illness, that might affect your credit.

If you have a “freeze” on your credit to help prevent identity theft, an insurance company won't be able to see your credit report and you may pay more for your insurance. You can temporarily “unfreeze” your credit when you apply for insurance.

## Vehicle Specific Factors

The type of vehicle you drive affects the cost of your auto insurance. You'll pay more for cars that cost more to repair or replace or that are often stolen. For example, you'll pay more to insure higher-value cars and newer cars. Some examples are large SUVs or trucks, high-performance sports cars, and vehicles with special features such as all-wheel drive transmissions and hybrid engines.

## Auto Insurance Discounts

You may pay less for car insurance if you qualify for a discount. To make sure you get the discounts you qualify for, be sure to ask your agent what discounts the insurance company offers and how much you could save. When you compare the cost of insurance between different companies, compare the total cost after any discounts.

Here are some important things to consider:

- Discounts vary depending on the insurance company and the state where you live;
- Ask about discounts at every policy renewal; and
- If you get quotes from different insurance companies, be sure to ask each about discounts.

## General Discounts

Most insurance companies offer various types of discounts. Insurance companies might offer discounts if you use automated payments, pay your annual premium in one payment, or sign up for electronic billing.

Ask your agent or insurance company about discounts you can get.

## Continuous Coverage

Insurers may offer discounts if you keep a car continually insured and haven't had a gap in coverage.

## Group Memberships

Some insurance companies may offer a discount if you're a member of an organization, such as an alumni or professional association, a union, or other organization.

## Loyalty

Some insurance companies may offer discounts for:

- Renewing your policy for a certain number of years;
- Children who use the same company their parents use even after they move out.

## Multiple Vehicles

Most insurance companies offer a discount if you insure more than one car with them.

## Multiple Policies

Insurance companies may offer discounts if you have your auto and homeowners insurance with the same insurance company. This often is called bundling or home/auto packages.

## Driver-Specific Discounts

Insurance companies may look at information about each driver on the policy when they choose which discounts to give you.

## Claim Free

If you haven't filed any claims, insurance companies may offer a discount.

## Defensive Driver/Driver's Education

Many insurance companies offer discounts if you've completed a defensive driving or driver's education course. Discounts for driver education courses are targeted primarily at younger and older drivers.

## Good Student

Some insurance companies offer discounts to students who get good grades.

## Mileage

Driving fewer miles reduces the chance you'll be in an accident. Many insurance companies know this and offer discounts if you don't drive much. Some companies offer discounts to drivers who use carpools.

## Military

Some insurance companies offer a discount to active, retired, reserve, and honorably discharged members of the military (and often their family members). This discount isn't available in all states. Ask your insurance company if this discount is available to you.

They might also have a discount if you keep your car on base while you're deployed.

## Non-smoker/Non-drinker

Because smoking and drinking can increase the chances that you'll be in an accident, some insurance companies offer non-smoker and non-drinker discounts.

## Seat Belt Use

Using your seat belt may get you a discount.

## Vehicle Discounts

### Safety Devices.

Auto safety devices can reduce how much you'll pay because they help prevent accidents, vehicle damage, and injuries. This equipment includes:

- Adaptive Cruise Control
- Adaptive Headlights
- Air Bags
- Anti-Lock Brakes
- Automatic Braking
- Automatic Seat Belts
- Blind Spot Warning
- Daytime Running Lights
- Electronic Stability Control
- Forward Collision Warning
- Lane Departure Warning
- Passive Restraint

### Anti-Theft Discount

You'll also pay less if you have certain devices that reduce theft or vandalism. Some examples include:

- Active Disabling Device
- Audible Alarm
- Vehicle Recovery
- Vehicle Identification Number Etching

There are a lot of things to consider if you're trying to lower your auto insurance premiums. You'll find some great questions to ask your agent in [A Shopping Tool for Auto Insurance](#).

# *HOMEOWNERS SECTION*

## How Do Insurers Determine Your Homeowners Insurance Premium?

Insurance companies use information about you, your home, and your insurance coverage to decide whether to insure your home and how much you'll pay for homeowners insurance. They'll get this information from you and from organizations. All this information is linked to "factors" that affect how much you'll pay for insurance, or how the insurance company "rates" your insurance risk. Many of these factors are described below. Different insurance companies determine their risk of insuring you in different ways and charge different amounts for the same or similar coverage.

There may be discounts that reduce your premium.

### Factors Relating to You

#### Claims History and Loss History Reports

If you've filed homeowners insurance claims, or if a previous homeowner has filed claims for your home, you may pay more for insurance. Your history of filing claims will affect how much you pay for homeowners insurance, even if claim payments were low. Insurance companies use third-party data, including the Comprehensive Loss and Underwriting Exchange (CLUE) database to see, the number and types of claims you've filed in the last five to seven years. Different insurance companies treat claims information differently, so it's always a good idea to shop around.

#### Credit-Based Insurance Score

Insurance companies may use information about your credit history when they rate your policy. They use credit-based insurance scores which, like all credit-based scores, predict an outcome. Credit-based insurance scores predict the amount of a claim, the likelihood of filing a claim, or the likelihood a policyholder will stay with an insurer instead of shopping around.

Credit-based insurance scores, like other credit scores, are based on your credit payment history, your current debt, how much new credit you've applied for, and what types of credit you have. Some insurance companies combine credit information with traditional insurance information, such as claims history, to create hybrid credit-based insurance scores. In either case, a higher score indicates you'll likely pay less for insurance.

Some states restrict or even ban the use of credit-based insurance scoring. Each insurance company uses its own method to determine your score.

Before you apply for insurance, it's a good idea to get a copy of your credit report and make sure the information in it is correct. Bankruptcies, judgments, liens, late payments, and credit inquiries may mean a lower credit-based insurance score. You can find information about how to get your credit report at <https://www.usa.gov/credit-reports>.

It's important to talk to your agent or insurance company if you've had extraordinary life circumstances, such as divorce, death of a family member, job loss, military deployment, or serious illness, that might affect your credit.

If you have a “freeze” on your credit to help prevent identity theft, an insurance company won't be able to see your credit report and you may pay more for your insurance. You can temporarily “unfreeze” your credit when you apply for insurance.

## Pets

Some insurance companies consider some pets or breeds of pets aggressive. An aggressive pet increases the risk you may be legally responsible if someone makes a claim against you for a pet-related injury. Some insurance companies have their own list of pet breeds they won't cover, or that could increase your premium. Check with your agent or company if you own a pet.

## Smoking

Smoking increases the risk of a fire in your home. Insurance companies usually charge more if someone in your home smokes.

## Factors Relating to Your Policy

### Coverage History

Insurance companies look at your insurance history to see if you've had continuous coverage on your home. If you canceled a policy before you bought a new one (called a lapse) you may pay a higher premium on a new policy. You also could have had a lapse in coverage if:

- you didn't pay your bill on or before the due date or within the grace period; or
- you let your current policy end before you bought a new policy.

If you don't pay your bill on time, your insurance company could:

- cancel your policy and not cover a loss to your home; or
- refuse to continue your policy, which may leave you without homeowners insurance.

If you let your insurance coverage lapse and you have a mortgage, your lender may buy a policy and charge you for it. Your premium for a lender-placed policy will probably be higher and might not provide as much coverage for you.

### The Homeowners Insurance Coverage You Choose

Your insurance agent or company will help you decide what types and amounts of coverage you need. Your policy will specify the coverage for your home and personal belongings. It also may include *liability* coverage, which can pay if someone gets hurt on your property.

Your agent might suggest that you buy enough coverage to rebuild your house and replace your personal belongings. That's called replacement cost coverage. Another type of coverage is based on actual cash value.

- *Actual cash value* coverage pays the fair market value of property at the time of the loss. This value usually is the cost to repair or replace the property, less *depreciation*. (Depreciation is a deduction for the age of the property and wear and tear.) Actual cash value coverage pays you for your loss, but often doesn't pay enough to fully replace or repair the damage to your property.

Some policies provide only actual cash value coverage for roofs over a certain age or that are in poor condition. Be sure to find out what your policy covers.

- *Replacement cost* coverage pays the cost to repair or replace your damaged or destroyed property *without* a deduction for depreciation. Most policies cover your house for replacement cost. If you don't have replacement cost coverage, your insurance company might only pay actual cash value. The cost of building supplies might be higher now than when you bought your policy. Review your policy with your agent at renewal to be sure you have the best coverage you can afford.

Replacement cost and *market value* aren't the same. The market value of a home includes the price of your land and depends on the real estate market. For more information about these and other coverages, see the NAIC's [Homeowners Shopping Tool](#).

### The Deductible You Choose

A deductible is the money you pay out of pocket on a claim before the policy pays. The deductible applies to coverage for your home and personal property. You pay a deductible for each claim. Higher deductibles mean lower policy premiums. The premium for a policy with a \$1,000 deductible will be lower than the premium for the same policy with a \$500 deductible. In some areas, there are also catastrophe deductibles, which are either a dollar amount or a percentage of the value of the property.

A higher deductible can be a good way to save money on your premium. But be sure you can afford the deductible if you have a loss.

### The Risks Your Policy Covers

*Peril* is an insurance term for a specific risk or reason for a loss. An all-perils policy insures your property against all perils, except those the policy names as not covered. Flood and earthquake are often not covered.

A *named perils* policy covers your home and personal property only against a specific list of reasons for a loss. Your policy will list the types of losses that it covers. Common examples of covered losses include fire, theft, and vandalism. Named perils policies cover less than all perils policies and are less expensive.

Talk with your insurance company's representative or agent if you want coverage for floods or earthquakes. A homeowners policy doesn't cover either, so you'll need to buy extra coverage.

### Coverage You Add

To cover the full value of your possessions, you may need to add coverage to your homeowners policy. These additions may be called endorsements or riders and will increase your premium.

You may want to add coverage for:

- Antiques
- Computer Equipment
- Fine Art
- Firearms
- Jewelry

## Your Home's characteristics

### Your Home's Age and Condition

If you have an older home, your policy might be more expensive. Older homes might have outdated electrical and plumbing systems which might increase the risk of a loss. Older "historic" homes may require building materials that are hard to find. If you have an older home, you may need a special policy and probably will pay a higher premium.

Improvements to your home, such as replacing your roof; upgrading electrical, heating, or plumbing; or installing a security system, may lower your premium. You should tell your insurance agent or company about any upgrades you make to your home.

### The Size of Your Home

The size of your home affects what you pay for insurance. Larger homes normally cost more to insure because they cost more to rebuild or repair. Your agent or company might ask about your basement and what percent is finished.

### Your Home's Construction and Exterior Features

The material your home is made of affects how your home holds up against a natural disaster and perils like wind and fire. Homes made with concrete or solid brick exteriors are less likely to catch fire and are more stable during a storm.

Your home's roof is its main protection against hail, wind, fire, and other perils. The age, condition, material, and shape of your roof are all factors that determine your premium. Homes with newer roofs made of materials that are stable and fire-resistant usually cost less to insure.

Installing fire-resistant siding made of metal, fiber-cement shingles and clapboards, or masonry can help you pay less for your homeowners insurance, especially in fire-prone areas.

### Custom Features of the Home

If you have a wood-burning or pellet stove, you may pay more for insurance. If a licensed contractor installed your stove and it meets code requirements, your premium may be lower.

If your home is made from custom, designer, or luxury grade materials, such as high-end marble, luxury grade cabinets, and expensive lighting, or requires professional craftsmanship to rebuild, you may pay more for your insurance.

## Where You Live

Your home's location affects what you pay for homeowners insurance. If your area gets a lot of hurricanes, tornadoes, or wildfires, your insurance will cost more.

Insurance companies consider how far you live from a fire station when they calculate your premium. Living in a city or suburban area, by a body of water, or in an area with a lot of crime will increase your premium.

## Attractive Nuisances (For Example, A Swimming Pool) on Your Property

An *attractive nuisance* is a dangerous condition that may attract children to a homeowner's property. Examples are swimming pools, trampolines, and playground equipment. If you have an attractive nuisance you might want to increase your homeowners policy's liability insurance. You may be liable if someone is hurt using an attractive nuisance on your property (even if they don't have your permission and aren't using the item safely).

Your insurance company may require you to install an enclosure or fence around an attractive nuisance. Your policy might not cover items like diving boards or slides. Having an attractive nuisance on your property likely will increase your premium.

## Homeowners Insurance Discounts

Most insurance companies offer various types of discounts. You will pay less for homeowners insurance if you qualify for a discount. Ask your agent or the insurance company what discounts the company offers and how much you could save. When you compare the costs of different insurance policies, compare the total cost after discounts.

Here are some important things to know:

- Discounts vary depending on the insurance company and the state where you live. Some insurance companies may not offer discounts.
- Ask about discounts every year when you renew your policy.
- If you get quotes from different insurance companies, be sure to ask each about discounts you might qualify for.

## General Discounts

Most insurance companies offer various types of discounts. The discounts may be tied to how you pay for your policy, your personal characteristics, and/or your home.

### Advance Purchase

You might get an Advance Purchase Discount if you buy a policy before the renewal date. Insurance companies might give discounts if you give them seven to 10 days' notice before you switch to their company.

### Purchasing and Payment

Some insurance companies offer discounts if you pay for the full year of insurance in one payment, sign up for electronic billing, or are a new customer.

### Multiple Policies

Insurance companies might offer a discount if you have your auto and homeowners policies with the same insurance company. This is known as bundling.

### Discounts Specific to You and Your Policy

Discounts vary by insurance company. Some are not available in all states.

#### Claim Free

Insurance companies might offer a discount if you haven't filed any claims or haven't filed a claim for a certain number of years. Ask your insurance company if they offer this discount.

#### Prior Insurance

The prior insurance discount is for new policyholders. It's based on the number of years in a row that you had a policy with your previous insurance company.

#### Being Married or Widowed

Your insurance company may offer a discount if you're married or widowed. Ask your agent or insurance company about this discount.

#### Retirement Discount

Some insurance companies offer a discount to retired people. They tend to spend more time at home and will know about fires, water leaks, or burglaries at their homes.

#### Non-smoker Discount

Smoking at home may increase your fire risk, so some insurance companies offer a non-smoker discount.

### Group Memberships

#### Military

Some insurance companies offer a discount to active, retired, reserve, and honorably discharged members of the military (and often their family members). Ask your agent or insurance company if they offer this discount.

#### Associations

Some insurance companies offer a discount if you're a member of an organization, such as an alumni or professional association or a union.

#### Occupation

Some insurance companies offer a discount to people with certain jobs, such as first responders, teachers, and nurses.

### Loyalty (5-10 years or more)

Some insurance companies offer discounts if you:

- Renew your policy for a certain number of years
- No longer live with your parents, but buy a policy from the same insurance company

### Replacement Cost

If you insure your home for 100% of the cost to replace it, you might be eligible for a discount.

### Discounts Relating to Your Home

#### Age of Home

If your home is less than 10 years old, insurance companies may offer you a discount.

#### Construction Type

If your home is built from brick, stucco, metal, or concrete, you might be eligible for a discount.

#### New or Renovated Home Discount

If you bought a new or renovated home with upgraded electrical or plumbing, you may be eligible for a discount.

#### Roof Age Discount

Some insurance companies give a discount based on the age of your roof. If your home has a newer roof, or an impact-resistant roof, you might get a discount.

#### Accredited Builder Discount

If your home's builder is on the insurance company's "accredited builder" list, you might be eligible for a discount. This discount will probably only last for five years after your home is built.

#### Homeowners Association (HOA)

Some insurance companies offer a discount if you live in a neighborhood with an HOA.

#### Living in a Gated Community

Living in a gated community (with or without security patrols) offers an extra level of security and might make you eligible for a discount.

#### Fire and Safety Protection

Your insurance company may offer a discount if your home has qualifying fire or theft protection. Some of these include:

- Smoke Detectors
- Sprinkler System
- Fire Alarm
- Security Alarm
- Backup Generator
- Smart Technology to Alert You to Fires, Water Leaks, or Burglaries
- Deadbolt Locks

### Water Leak Detection

You might get a discount if you have a water leak detector or prevention system. Discounts depend on how advanced the detection system is, so ask your agent or insurance company.

### Mitigation Discounts

If you live in an area that has severe weather, your insurance company might give you a discount if you have storm shutters, reinforced doors, shatterproof glass, or other protections.

If you live in an area that is at risk for wildfires, you may get a discount if you take steps to mitigate damage. This includes using concrete or other fire-resistant materials for your home's structure and creating an area around your home that reduces fire risks.

## PROJECT HISTORY

### **Transparency and Readability of Consumer Information (C) Working Group's Regulatory Resources for Consumers on Personal Lines Pricing and Underwriting**

#### **1. Description of the project, issues addressed, etc.**

The purpose of the *Regulatory Resources for Consumers on Personal Lines Pricing and Underwriting* document is to provide state insurance regulators with information they can use in social media, bulletins, and other means of consumer information for which a department of insurance (DOI) might need to provide information to consumers regarding the pricing, rating, and underwriting of personal lines products.

The resources document includes information regarding both auto insurance and homeowners' insurance.

The auto insurance section includes information regarding how insurers: 1) underwrite; 2) rate risk; and 3) determine premiums for auto insurance products. The rating factors addressed in the document include: 1) how a vehicle is used; 2) an insured's gender and age; 3) the vehicle's location; 4) vehicle-specific factors; and 5) other risk factors. The document also affords information regarding a driver's coverage history, driving habits and history, and the vehicle owners and operators in a household.

The document additionally covers information regarding telematics and usage-based premiums, information regarding credit-based insurance scores, and vehicle-specific factors.

Furthermore, the document identifies information regarding auto insurance premium discounts, including general discounts like: 1) continuous coverage; 2) group memberships; 3) loyalty discounts; and 4) multiple vehicle and multiple policy discounts.

The document further identifies driver-specific discounts, including: 1) being claims-free; 2) taking defensive driving or driver's education courses; 3) good student discounts; 4) mileage discounts; 5) military discounts; 6) being a non-smoker/non-drinker; and 7) using a seat belt. Lastly, the document includes vehicle discounts for various safety devices and anti-theft discounts.

The document's homeowners insurance section discusses how insurers determine a premium using factors related to the homeowner, as well as discount information. General factors include items such as: 1) the homeowner's credit-based insurance score; 2) pets owned by the homeowner; and 3) whether someone in the homeowner's home smokes.

Factors concerning the homeowners policy include: 1) coverage history; 2) the coverage chosen; 3) the deductible chosen; 4) risks a policy covers; and 5) coverages added for valuable items.

Factors about a home's characteristics consist of: 1) the home's age and condition; 2) the home's size; 3) the home's construction and exterior features; 4) the home's custom features; 5) the home's location; and 6) whether there are attractive nuisances on the homeowner's property.

Discounts offered for a homeowners policy include general discounts, such as: 1) the advance purchase of a policy; 2) certain methods of purchasing and paying for insurance; and 3) whether the homeowner has multiple policies.

Discounts to a homeowners policy also include discounts specific to the homeowner and their policy, including: 1) being claims-free; 2) having prior insurance; 3) being married or widowed; 4) retirement discounts; and 5) non-

smoker discounts. Homeowners can also get discounts for things like: 1) having a group membership, such as belonging to the military or being a member of an association; 2) the homeowner's occupation; 3) loyalty discounts for having a policy for five to 10 years or more; and 4) insuring a home for replacement cost.

Discounts pertaining to the home may include: 1) the home's age; 2) the construction type; 3) whether the home is new or renovated; 4) roof age; 5) an accredited builder discount; 6) living in a gated community; 7) having qualifying fire or theft protection; 8) having water leak detection; and 9) mitigating the home for damage.

**2. Name of group responsible for drafting the model and states participating.**

The Transparency and Readability of Consumer Information (C) Working Group of the Property and Casualty Insurance (C) Committee was responsible for drafting the resource document and formed drafting groups to draft it. Participating states included: Alabama, the District of Columbia, Kansas, Maryland, Michigan, North Carolina, and Tennessee.

**3. Project authorized by what charge and date first given to the group.**

The project was authorized by the charge of the Transparency and Readability of Consumer Information (C) Working Group of the Property and Casualty Insurance (C) Committee to: "Consider drafting regulatory best practices that serve to inform consumers of the reasons for significant increases related to property/casualty (P/C) insurance products." The charge was given to the Working Group in 2021.

**4. A general description of the drafting process (e.g., drafted by a subgroup, interested parties, the full group, etc.). Include any parties outside the members that participated.**

In March 2021, the Transparency and Readability of Consumer Information (C) Working Group began discussing items to be included in a document meant to provide state insurance regulators with information about pricing, rating, and the underwriting of personal lines products. The document gives the state insurance regulator information that can be used in social media, bulletins, and other means of consumer education.

The Working Group formed drafting groups to work on each section of the document. The drafting groups met monthly to work on drafting the document. Interested parties from the American Property Casualty Insurance Association (APCIA) and the American Automobile Association (AAA) of Missouri also joined these meetings and provided feedback.

**5. A general description of the due process (e.g., exposure periods, public hearings, or any other means by which widespread input from industry, consumers, and legislators was solicited).**

The drafting groups of the Transparency and Readability of Consumer Information (C) Working Group met regularly, and during its meetings, the Working Group heard comments and discussed suggested revisions from state insurance regulators and interested parties. Following the drafting of the document, the document was exposed on June 9, 2022, for a 14-day public comment period. Once comments were received, in early July, the drafting groups addressed these comments to put back before the Working Group. The changes made were editorial, mainly to increase the readability level. The Working Group adopted the regulatory document on Nov. 15, 2022. The Property and Casualty Insurance (C) Committee adopted the regulatory document during its Dec. 15, 2022, meeting at the 2022 Fall National Meeting.

**6. A discussion of the significant issues (items of some controversy raised during the due process and the group's response).**

There were no items of controversy raised during the due process.

**7. Any other important information (e.g., amending an accreditation standard).**

Not applicable.

Adopted by the Transparency and Readability of Consumer Information (C) Working Group, Nov. 15, 2022  
Adopted by the Property and Casualty Insurance (C) Committee, Dec. 15, 2022

Completed	N/A	<b>EXAMPLE RATE/RULE FILING CHECKLIST</b>	
<input type="checkbox"/>	<input type="checkbox"/>	1.	Please complete all check boxes on this form or your filing may be returned "Rejected," and a resubmission may be necessary.
<input type="checkbox"/>	<input type="checkbox"/>	2.	All rate information must be completed on the rate/rule tab without capping.
<input type="checkbox"/>	<input type="checkbox"/>	3.	All proposed rate/rule manual pages must be submitted under the rate/rule schedule tab for approval.
<input type="checkbox"/>	<input type="checkbox"/>	4.	Complete rate/rule manual with all proposed changes must be submitted under supporting documents tab as this will be marked informational only. A complete manual should consist of all corresponding rules for your optional forms, all rules corresponding to your rating factors, all rating factors, territory definitions and factors, and all proposed changes to rules and rates.
<input type="checkbox"/>	<input type="checkbox"/>	5.	Provide a histogram on an uncapped basis. If the filing contains more than one company, please provide a separate histogram for each company.
<input type="checkbox"/>	<input type="checkbox"/>	6.	Provide the characteristics of the insured(s) receiving the maximum rate increase. If the filing contains more than one company, please provide a separate histogram for each company.
<input type="checkbox"/>	<input type="checkbox"/>	7.	Provide the average dollar change, the maximum dollar change, and minimum dollar change on an uncapped basis. If the filing contains more than one company, please provide a separate histogram for each company.
<input type="checkbox"/>	<input type="checkbox"/>	8.	Please provide our department with a talking points sheet that will assist our consumer assistance division should we receive consumer complaints regarding the rate increase. This submission should provide detailed information that we can share with policyholders that will explain what it is causing this rate increase.
<input type="checkbox"/>	<input type="checkbox"/>	9.	Please provide us with the breakdown of the permissible loss ratio by coverage including: a. Taxes, licenses, and fees b. Total production expense c. Underwriting profit d. Any other fees that comprise the permissible loss ratio e. Permissible loss ratio
<input type="checkbox"/>	<input type="checkbox"/>	10.	Provide all support and justification exhibits for rate change including how you derived your overall indication, all support for proposed factor changes, etc.
<input type="checkbox"/>	<input type="checkbox"/>	11.	This checklist item is only required for Personal Auto rate filings: Provide the percentage breakdown of the rate impact. If the filing contains more than one company, please provide a separate histogram for each company.
<input type="checkbox"/>	<input type="checkbox"/>	12.	Rates developed using generalized linear modeling or other predictive modeling techniques must include a detailed narrative of the modeling process. This should include a description of the modeling data, variable selection process, data dictionary, model testing & validation, and any judgements made throughout the process.
<input type="checkbox"/>	<input type="checkbox"/>	13.	If a GLM (Generalized Linear Model) is currently in use, the company must include the SERFF tracking number of the original GLM filing.

## PROJECT HISTORY

### **Transparency and Readability of Consumer Information (C) Working Group's NAIC Rate/Rule Filing Checklist**

#### **1. Description of the project, issues addressed, etc.**

The purpose of the *NAIC Rate/Rule Filing Checklist* is to provide state insurance regulators with a checklist that insurers with a rate/rule filing can complete. It was determined that many states do not have a rate/rule filing checklist in place. Kansas and Connecticut both have checklists in place and have found them to be extremely helpful.

The checklist includes items insurers are required to complete for the filing to be accepted. For example: 1) all rate information must be completed on the rate/rule tab without capping; 2) all proposed rate/rule manual pages must be submitted under the rate/rule schedule tab for approval; 3) all proposed changes must be submitted under the supporting documents tab (will be marked informational only); 4) provide a histogram on an uncapped basis; 5) provide the characteristics of the insureds receiving the maximum rate increase; 6) provide the average dollar change, the maximum dollar change, and minimum dollar change on an uncapped basis; 7) provide the department of insurance (DOI) with a talking points sheet that will assist the consumer assistance division if a consumer complaint regarding a rate increase is made; 8) provide a breakdown of permissible loss ratio by coverage; 9) provide all support and justification exhibits for rate change; 10) the checklist is only required for personal auto rate filings; 11) rates developed using a generalized linear modeling (GLM) or other predictive modeling techniques must include a detailed narrative of the modeling process; and 12) if a GLM is currently in use, the company must include the System for Electronic Rates & Forms Filing (SERFF) tracking number of the original GLM filing.

The checklist is not a required document but will be available to states that do not have one in place and wish to implement it.

#### **2. Name of group responsible for drafting the model and states participating.**

The Transparency and Readability of Consumer Information (C) Working Group of the Property and Casualty Insurance (C) Committee was responsible for drafting the *NAIC Rate/Rule Filing Checklist*. A drafting group was formed to draft the checklist. Participating states included: Alabama, Kansas, Maryland, and Tennessee.

#### **3. Project authorized by what charge and date first given to the group.**

The project was authorized by the charge of the Transparency and Readability of Consumer Information (C) Working Group of the Property and Casualty Insurance (C) Committee to: "Consider drafting regulatory best practices that serve to inform consumers of the reasons for significant increases related to property/casualty (P/C) insurance products." The charge was given to the Working Group in 2021.

#### **4. A general description of the drafting process (e.g., drafted by a subgroup, interested parties, the full group, etc.). Include any parties outside the members that participated.**

In March 2021, the Transparency and Readability of Consumer Information (C) Working Group began discussing items to be included in the checklist. This checklist is based on a checklist that has been used in Kansas for several years.

The Working Group formed a drafting group to work on the rate/rule filing checklist. The drafting group met monthly via conference call to work on drafting the document.

**5. A general description of the due process (e.g., exposure periods, public hearings, or any other means by which widespread input from industry, consumers, and legislators was solicited).**

The drafting group of the Transparency and Readability of Consumer Information (C) Working Group met regularly via conference call, during which the drafting group discussed suggested revisions in the *NAIC Rate/Rule Filing Checklist*. Following the drafting of the checklist, the Working Group exposed the checklist on June 9, 2022, for a 14-day public comment period. Interested parties were given the opportunity to participate in the calls, and there were no objections prior to the comment period. The drafting group received one comment from a trade organization. However, the Working Group agreed there was no need for changes to be made to the checklist, as it has been being used in Kansas for several years with no objections from insurers. The Transparency and Readability of Consumer Information (C) Working Group adopted the checklist on Nov. 15, 2022. The Property and Casualty Insurance (C) Committee adopted the checklist during its Dec. 15, 2022, meeting at the 2022 Fall National Meeting.

**6. A discussion of the significant issues (items of some controversy raised during the due process and the group's response).**

There were no items of controversy raised during the due process.

**7. Any other important information (e.g., amending an accreditation standard).**

Not applicable.

Date: 3/23/2023

## State Implementation Reporting of NAIC-Adopted Model Laws and Regulations

### Executive (EX) Committee

- Amendments to the *Unfair Trade Practices Act (#880)*—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2021 Spring National Meeting. Eight jurisdictions have enacted the revisions to this model.

### Life Insurance and Annuities (A) Committee

- Amendments to the *Annuity Disclosure Model Regulation (#245)*—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2021 Summer National Meeting. NAIC staff are not aware of any activity regarding this model.
- Amendments to the *Suitability in Annuity Transactions Model Regulation (#275)*—These revisions were adopted by the Executive (EX) Committee and Plenary during the February 13, 2020, conference call. 30 jurisdictions have enacted the revisions to the model.
- Amendments to the *Standard Nonforfeiture Law for Individual Deferred Annuities (#805)*—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. 22 jurisdictions have adopted the revisions to this model.

### Health Insurance and Managed Care (B) Committee

- Amendments to the *Health Maintenance Organization Model Act (#430)*—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. One jurisdiction has adopted the revisions to this model.
- Amendments to the *Insurance Holding Company System Regulatory Act (#440)*—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. 24 jurisdictions have adopted the revisions to this model.
- Amendments to the *Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450)*—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. 12 jurisdictions have adopted the revisions to this model.

### Property and Casualty Insurance (C) Committee

- Adoption of the *Real Property Lender-Placed Insurance Model Act (#631)*—This model was adopted by the Executive (EX) Committee and Plenary at the 2021 Spring National Meeting. One jurisdiction has adopted this model.
- Adoption of the *Pet Insurance Model Act (#633)*— This model was adopted by the Executive (EX) Committee and Plenary at the 2022 Summer National Meeting. One jurisdiction has adopted this model.

**EXECUTIVE (EX) COMMITTEE**

Executive (EX) Committee March 23, 2023, Minutes..... 4-2  
 Executive (EX) Committee Interim Meeting Report (Attachment One) ..... 4-7  
 Executive (EX) Committee Task Force Reports (Attachment Two)..... 4-8  
 Approved the Request for NAIC Model Law Development to Amend the *Property and Casualty Insurance Guaranty Association Model Act* (#540) (Attachment Three) ..... 4-9  
 Approved the Request for NAIC Model Law Development to Amend the *Unfair Trade Practices Act* (#880) (Attachment Four)..... 4-11  
 2022 Annual Report of NAIC Designation Program Advisory Board Activities (Attachment Five) ..... 4-14  
 Report of Model Law Development Requests (Attachment Six) ..... 4-20

Draft: 4/10/23

Executive (EX) Committee  
Louisville, Kentucky  
March 23, 2023

The Executive (EX) Committee met in Louisville, KY, March 23, 2023. The following Committee members participated: Chlora Lindley-Myers, Chair (MO); Andrew N. Mais, Vice Chair (CT); Jon Godfread, Vice President (ND); Scott A. White, Secretary-Treasurer (VA); Dean L. Cameron, Most Recent Past President (ID); Lori K. Wing-Heier (AK); Michael Conway (CO); Trinidad Navarro (DE); Doug Ommen (IA); Vicki Schmidt (KS); Sharon P. Clark (KY); James J. Donelon (LA); Kathleen A. Birrane (MD); Anita G. Fox (MI); Carter Lawrence (TN); and Kevin Gaffney (VT). Also participating was: Elizabeth Kelleher Dwyer (RI).

1. Adopted the March 22 Report of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee

Director Lindley-Myers reported that the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee met March 22 in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) and paragraph 6 (consultations with NAIC staff members related to NAIC technical guidance) of the NAIC Policy Statement on Open Meetings.

During this meeting, the Committee and Subcommittee: 1) appointed Andrew J. Beal (NAIC, Chief Operating Officer and Chief Legal Officer) as acting Chief Executive Officer (CEO); and 2) approved the retention of a consultant to conduct an organizational review and succession planning exercise.

Commissioner Mais made a motion, seconded by Commissioner Godfread, to adopt the March 22 report of the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee. The motion passed unanimously.

2. Adopted its Feb.10 and Jan. 13 Interim Meeting Report

Commissioner Donelon made a motion, seconded by Director Cameron, to adopt the Executive (EX) Committee's Feb. 10 and Jan. 13 interim meeting report (Attachment One). The motion passed unanimously.

3. Adopted the Reports of its Task Forces

Director Wing-Heier made a motion, seconded by Commissioner Donelon, to adopt the reports of the: 1) Climate and Resiliency (EX) Task Force; 2) Government Relations (EX) Leadership Council; 3) Long-Term Care Insurance (EX) Task Force; and 4) Special (EX) Committee on Race and Insurance (Attachment Two). The motion passed unanimously.

4. Approved a Request for NAIC Model Law Development Regarding Model #540

Superintendent Dwyer reported that on Dec. 15, 2022, the Financial Condition (E) Committee approved a Request for NAIC Model Law Development to amend the *Property and Casualty Insurance Guaranty Association Model Act* (#540). The amendments will clarify guaranty fund coverage of cybersecurity insurance.

The National Conference of Insurance Guaranty Funds (NCIGF) developed and presented language to the Receivership and Insolvency (E) Task Force that they believe would address this issue. The NCIGF's proposed

language is drafted to provide each state's guaranty associations with the solvency tools needed to handle a cybersecurity insurance claim.

The Request for NAIC Model Law Development was exposed by the Task Force, and no comments were received. The Task Force is confident that these amendments can be adopted on the same timeline as another set of amendments to Model #540 currently being drafted, which clarify coverage for insurance business transfers (IBTs) and corporate divisions (CDs).

Commissioner Donelon made a motion, seconded by Commissioner Gaffney, to approve the Request for NAIC Model Law Development to amend Model #540 (Attachment Three). The motion passed unanimously.

#### 5. Approved a Request for NAIC Model Law Development Regarding Model #880

Commissioner Navarro reported that on Dec. 14, 2022, the Market Regulation and Consumer Affairs (D) Committee approved the Request for NAIC Model Law Development to amend the *Unfair Trade Practices Act* (#880). The request came from the Improper Marketing of Health Insurance (D) Working Group of the Antifraud (D) Task Force, which was charged with reviewing existing NAIC models and guidelines that address the use of lead generators for the sale of health insurance products to identify models and guidelines that need to be updated or developed to address current marketplace activities.

These amendments aim to provide state insurance regulators with the appropriate regulatory authority over health insurance lead generators and define prohibited practices of health insurance lead generators. The Working Group believes amending Model #880 is the best option to address this issue, but it will consider alternative courses of action during its discussions.

Commissioner Navarro made a motion, seconded by Commissioner Godfread, to approve the Request for NAIC Model Law Development to amend Model #880 (Attachment Four). The motion passed unanimously.

#### 6. Received the 2022 Annual Report of the NAIC Designation Program Advisory Board Activities

Commissioner Clark provided an update on the NAIC Designation Program Advisory Board's activities and 2022 achievements for the NAIC Insurance Regulator Professional Designation Program (Attachment Five). At year-end, enrollment totaled 3,373. State insurance regulators earned 1,969 professional insurance regulation designations.

Commissioner Clark noted that the Advisory Board met quarterly in 2022 to discuss policy recommendations, renewal credits, and the future of the program, and it began working with the Education & Training Department on a modernization project.

Commissioner Clark also reported some notable accomplishments in 2022, including implementing virtual proctoring across all designation exams and waiving renewals for active chief insurance regulators and deputy commissioners.

Commissioner Clark reported on the State Mentor Program, which liaises between state insurance departments and the NAIC's Education & Training Department to help disseminate information and assist with candidate questions. All but one jurisdiction currently have mentors. The Advisory Board is strategizing for the future of the program and how it can best serve members and state insurance regulators.

#### 7. Received a Status Report on the Implementation of *State Connected*

Director Lindley-Myers provided an update on *State Connected* implementation efforts. The NAIC has finalized the next iteration of the strategic plan, which builds on *State Ahead* initiatives and will position the NAIC as a “connected hub” for the membership.

#### 8. Received a Report on Model Law Development Efforts

Director Lindley-Myers presented a written report on the progress of ongoing model law development efforts (Attachment Six).

#### 9. Heard a Report from the NIPR Board of Directors

Director Deiter reported that the National Insurance Producer Registry (NIPR) Board of Directors met March 21. During this meeting, the Board accepted the 2022 independent financial audit conducted by RubinBrown, a professional service firm. The audit report is part of NIPR’s 2022 Annual Report released on March 21. The Annual Report highlights NIPR’s 2022 accomplishments, including processing 47 million credentialing and report transactions on behalf of state departments of insurance (DOIs), a year-over-year increase of 10%. NIPR had 8.1 million producer records in its database and \$67.4 million in revenue, representing a 9.3% increase from 2021. NIPR moved \$1.29 billion in state licensing fees from NIPR to DOIs, a 17.5% increase over last year. Through February, NIPR revenues are 6% over budget.

In 2022, NIPR completed several important initiatives that help fulfill its mission to provide cost-effective, streamlined, and uniform producer licensing services. NIPR added three states—Hawaii, Kansas, and Massachusetts—to major NIPR products. NIPR expanded the Contact Change Request (CCR) for Business Entities, which gives businesses the ability to change their contact information easily through *nipr.com*. CCR is available in 34 states. NIPR also achieved 97% first contact resolution by NIPR’s customer service team, which eliminates calls and questions to state departments of insurance (DOIs).

The NAIC and NIPR are holding a Training and Collaboration Summit, April 18–20, in Kansas City, MO. This summit is an opportunity for attendees to learn more about NAIC and NIPR products while sharing ideas and best practices with state insurance regulators from around the country.

#### 10. Heard a Report from the Compact

Commissioner Birrane reported that the Interstate Insurance Product Regulation Commission (Compact) met March 24. During this meeting, the Compact released its 2022 Annual Report, which provides a detailed account of the Compact’s activities and accomplishments in 2022.

The Compact also finalized Position Statement 1-2022, which addresses the issues raised by the Colorado Supreme Court’s 2020 decision in *Amica Life Insurance Company v. Wertz*. The question in that case was whether a company selling a Compact product with a two-year suicide clause provision could enforce that two-year clause given that for non-Compact products, the Colorado legislature adopted a one-year suicide clause provision. The Colorado Supreme Court concluded that the Colorado legislature could not delegate to the Compact the authority to adopt a standard, effective in Colorado, that was in direct conflict with a product standard adopted by the Colorado legislature.

The Compact adopted a Position Statement in 2022 and received support in the form of resolutions from the National Council of Insurance Legislators (NCOIL) and the National Conference of State Legislatures (NCSL). The Position Statement notes that the Colorado opinion is of concern to Compact members because of its potential

to undermine the premise of the Compact and because it is at odds with the understanding and intent of the Compacting States. The Compact's position is that the Colorado opinion is wrong because among other things, it ignores that the Compact received implied Congressional consent.

In December 2022, the Compact amended the suicide exclusion period in question across all life Uniform Standards, keeping the standard at two years but providing that if a state has a period of less than two years, the shorter period applies. This amendment becomes effective in April 2023. The Compact members agreed to give filers until early October 2023 to bring their previously approved Compact products into compliance with the amendment.

In 2022, the members also adopted a framework for expanding the use of Uniform Standards for non-employer groups. The Compacting States continue to exercise authority over the eligibility and approval of non-employer groups, but once authorized, the insurer can issue a Compact-approved product to the eligible group.

The Compact's Product Standards Committee is working on several projects, including developing standards for group whole products and index-linked variable annuities (ILVAs).

During its meeting, the Compact: 1) adopted two new Uniform Standards for disability income products; 2) adopted guidelines for Uniform Standards development; and 3) received reports from its committees.

Commissioner Birrane also noted that in 2022, the Compact officers launched the concept of Compact Roundtables to facilitate communication among officers, committee leaders, members, legislators, and Compact filers. The goal of the roundtables is to have open communication regarding the performance of the Compact and how it can better support the needs of member states.

There were two roundtables in 2022 in New York City, NY, and Omaha, NE. Discussion at the roundtables focused on how to balance uniformity with states' concerns, as well as how to keep up with the pace of product development.

After the Roundtables, an ad hoc committee of members from across Zones was established to evaluate the viability and appropriateness of ideas coming out of the Roundtables. The committee agreed to establish an Advisory Services Office and recommended creating a formal task force to develop proposals for these services.

The Compact officers will host another Compact Roundtable on May 17, the day before the International Insurance Forum.

In 2022, the Compact developed and distributed its first Value of Services report for members states. The report quantifies the benefits of being a Compacting State, showing the annual dollar value of services the Compact provides to each member.

Commissioner Birrane also reported that the Compact's financial position is strong. The Compact ended 2022 at 80% of budgeted revenues, or \$2,547,200, compared to a budget of \$3.2 million. This variance was partially offset by a reduction in Compact expenses, which came in at 88% or \$2,804,072, compared to a budget of \$3.1 million. The Compact ended 2022 with a net loss of \$256,872, compared to a net gain in 2021 of \$790,016. The Compact's year-end cash balance is \$1.8 million, and its net assets at year-end were \$533,144.

This volatility in revenue over the past two years tracks life companies' filing cycles, including new or amendatory filings needed to meet standards adopted by the Compact. For example, companies needed to file nonforfeiture updates by the end of 2021, which resulted in a record number of filings that year. No such imperative was in place for 2022, so filings were lower.

The Compact was within 3% of meeting its annual registration revenue budget in 2022, which is the revenue the Compact receives from companies for access to the Compact platform. In 2022, the Compact also collected and remitted \$2,750,000 in state filing fees to its members.

Through the end of February 2023, the Compact is meeting budgeted revenues and has a cash balance of a little over \$2 million. This positions the Compact to make its fourth annual repayment this month on the outstanding debt to the NAIC in the amount of \$275,000.

Having no further business, the Executive (EX) Committee adjourned.

SharePoint/NAIC Support Staff Hub/Committees

## **EXECUTIVE (EX) COMMITTEE**

February 10, 2023 / January 13, 2023

### **Summary Report**

The Executive (EX) Committee met Feb. 10 and Jan. 13, 2023, in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings. During these meetings, the Committee:

1. Appointed Superintendent Elizabeth Kelleher Dwyer (RI) to serve on the International Association of Insurance Supervisors (IAIS) Executive Committee.
2. Appointed the following to serve as members on the Consumer Board of Trustees: Commissioner Andrew R. Stolfi (OR), Chair; Commissioner Alan McClain (AR); Director Dana Popish Severinghaus (IL); Commissioner Vicki Schmidt (KS); Commissioner Troy Downing (MT); and Commissioner Michael Humphreys (PA).
3. Appointed Commissioner Glen Mulready (OK) to the National Insurance Producer Registry (NIPR) Board of Directors.
4. Approved the recommendation for the NAIC's Kansas City, MO, office space.
5. Adopted the Washington, DC, property site selection and fiscal impact statement.
6. Appointed the following as members of the NAIC 2023 Audit Committee: Connecticut, Kentucky, Maryland, Massachusetts, Missouri, Nebraska, New Jersey, North Dakota, Oregon, South Dakota, Tennessee, and Virginia.
7. Received an update from the Investment Committee.
8. Received updates on various operational matters.

Draft: 3/22/23

## REPORT OF THE EXECUTIVE (EX) COMMITTEE TASK FORCES

**Climate and Resiliency (EX) Task Force**—The Climate and Resiliency (EX) Task Force will meet March 24 and anticipates the following action: 1) adopting its 2022 Fall National Meeting minutes; 2) hearing presentations from Canadian insurance regulators related to insuring flood risks; 3) hearing an update on private flood insurance data; 4) hearing an update from the Catastrophe Modeling Center of Excellence (COE); 5) receiving a federal update; and 6) receiving an international update.

**Government Relations (EX) Leadership Council**—The Government Relations (EX) Leadership Council did not meet at the Spring National Meeting. The Leadership Council meets weekly in regulator-to-regulator session, pursuant to paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings, to discuss federal legislative and regulatory developments affecting insurance regulation.

**Long-Term Care Insurance (EX) Task Force**—The Long-Term Care Insurance (EX) Task Force met March 13, in lieu of the Spring National Meeting, and took the following action: 1) adopted its 2022 Fall National Meeting minutes; 2) heard a report on industry trends and factors affecting reserve levels; and 3) adopted proposed amendments to the *Checklist for Premium Increase Communications*. The Task Force will also meet March 23 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individual) of the NAIC Policy Statement on Open Meetings.

**Special (EX) Committee on Race and Insurance**—The Special (EX) Committee on Race and Insurance will meet March 23 and anticipates the following action: 1) adopting its 2022 Fall National Meeting minutes; 2) receiving a status report from its workstreams; and 3) hearing an update on the Member Diversity Leadership Forum. At the end of last year, the Special Committee voted to disband Workstream One and Workstream Two (focused on diversity within the insurance industry, the insurance regulatory community, and the NAIC) and rename its remaining workstreams by product line—property/casualty (P/C), life, and health. The work of the Special Committee was discussed at the Commissioners' Conference, and Members focused on defining deliverables for the Workstreams, strategies to engage industry and consumers in the ongoing discussions, and data needs. Work planning for the year is ongoing, and meetings of each workstream will be scheduled shortly.

*Adopted by the Financial Condition (E) Committee, Dec. 15, 2022*

*Adopted by the Receivership and Insolvency (E) Task Force, Dec. 14, 2022*

### REQUEST FOR NAIC MODEL LAW DEVELOPMENT

This form is intended to gather information to support the development of a new model law or amendment to an existing model law. Prior to development of a new or amended model law, approval of the respective Parent Committee and the NAIC's Executive Committee is required. The NAIC's Executive Committee will consider whether the request fits the criteria for model law development. Please complete all questions and provide as much detail as necessary to help in this determination.

**Please check whether this is:**       **New Model Law**      or       **Amendment to Existing Model**

**1. Name of group to be responsible for drafting the model:**

Receivership Law (E) Working Group of the Receivership and Insolvency (E) Task Force to complete the drafting.

Note that Model #540 is currently being amended to address restructuring mechanisms, per the request for model law development adopted by NAIC Executive (EX) Committee on August 11, 2022. The Task Force hopes to consider the adoption of further amendments for this request within a similar timeframe.

**2. NAIC staff support contact information:**

Jane Koenigsman  
[jkoenigsman@naic.org](mailto:jkoenigsman@naic.org)  
816-783-8145

**3. Please provide a brief description of the proposed new model or the amendment(s) to the existing model. If you are proposing a new model, please also provide a proposed title. If an existing model law, please provide the title, attach a current version to this form and reference the section(s) proposed to be amended.**

- ***Property and Casualty Insurance Guaranty Association Model Act (#540)***

As presented by the National Conference of Insurance Guaranty Funds (NCIGF), cyber security insurance coverage is trending into the admitted market. Consequently, NCIGF anticipates the insurance insolvency resolution system will be presented with claims and other issues related to this coverage. These policy obligations may flow both from standalone cyber policies, endorsements, or from coverages that may be found to exist in commercial general liability and other lines of business typically written for business entities. For this reason, policymakers need to determine how such coverages will be handled should an insurer writing this business become insolvent. While each jurisdiction will need to decide whether, and within what parameters, cyber claims will be covered, we offer for consideration and guidance recommended amendments to the NAIC Property and Casualty Insurance Guaranty Association Act (NAIC Model 540). Policy makers should also consider how such claims will be handled before guaranty funds and associations (hereinafter "guaranty funds") are triggered – for example in a rehabilitation proceeding. Likewise, current insolvency processes and transition to the guaranty funds will need to be changed and enhanced to deal with this unique line of business and especially its demanding claims administration standards.

**4. Does the model law meet the Model Law Criteria?**       **Yes**      or       **No (Check one)**

**(If answering no to any of these questions, please reevaluate charge and proceed accordingly to address issues).**

- a. Does the subject of the model law necessitate a national standard and require uniformity amongst all states?**       **Yes**      or       **No (Check one)**

**If yes, please explain why:**

This proposed change is needed to ensure cyber insurance policyholders in all states are provided with guaranty fund coverage for this trending line of business.

- b. Does Committee believe NAIC members should devote significant regulator and Association resources to educate, communicate and support this model law?

Yes or  No (Check one)

5. What is the likelihood that your Committee will be able to draft and adopt the model law within one year from the date of Executive Committee approval?

1  2  3  4  5 (Check one)

High Likelihood

Low Likelihood

**Explanation, if necessary:**

NCIGF has provided a proposal of suggested amendments for consideration. Proposed amendments include a definition of cyber insurance, coverage limitations and updates to other references.

6. What is the likelihood that a minimum two-thirds majority of NAIC members would ultimately vote to adopt the proposed model law?

1  2  3  4  5 (Check one)

High Likelihood

Low Likelihood

**Explanation, if necessary:** See previous discussion.

7. What is the likelihood that state legislatures will adopt the model law in a uniform manner within three years of adoption by the NAIC?

1  2  3  4  5 (Check one)

High Likelihood

Low Likelihood

**Explanation, if necessary:**

At this juncture, the amendments being considered are simple and because they have the potential to address future policyholder protection for this line of business, we believe such changes will be widely supported by all parties.

8. Is this model law referenced in the NAIC Accreditation Standards? If so, does the standard require the model law to be adopted in a substantially similar manner?

No reference in Accreditation Standards.

9. Is this model law in response to or impacted by federal laws or regulations? If yes, please explain.

No.

Draft: Nov. 16, 2022

*Adopted by the Market Regulation and Consumer Affairs (D) Committee, Dec. 14, 2022*  
*Adopted by the Antifraud (D) Task Force, Nov. 16, 2022*

**REQUEST FOR NAIC MODEL LAW DEVELOPMENT**

This form is intended to gather information to support the development of a new model law or amendment to an existing model law. Prior to development of a new or amended model law, approval of the respective Parent Committee and the NAIC’s Executive Committee is required. The NAIC’s Executive Committee will consider whether the request fits the criteria for model law development. Please complete all questions and provide as much detail as necessary to help in this determination.

**Please check whether this is:**             **New Model Law**            or             **Amendment to Existing Model**

**1. Name of group to be responsible for drafting the model:**

Market Regulation Consumer Affairs (D) Committee/Antifraud (D) Task Force/Improper Marketing of Health Insurance (D) Working Group

**2. NAIC staff support contact information:**

Market Regulation and Consumer Affairs (D) Committee – Tim Mullen  
Antifraud (D) Task Force – Greg Welker  
Improper Marketing of Health Insurance (D) Working Group – Greg Welker

**3. Please provide a brief description of the proposed new model or the amendment(s) to the existing model. If you are proposing a new model, please also provide a proposed title. If an existing model law, please provide the title, attach a current version to this form and reference the section(s) proposed to be amended.**

Proposed are amendments to the *Unfair Trade Practices Act* (#880):

- Section 2: Definitions
- Section 3: Unfair Trades Practices Prohibited
- Section 4: Unfair Trade Practices Defined

The Improper Marketing of Health Insurance (D) Working Group is charged to (1) coordinate with regulators, both on a state and federal level, to provide assistance monitoring the improper marketing of health plans and coordinate appropriate enforcement actions, as needed, with other NAIC Committees, Task Forces, and Working Groups; and (2) review existing NAIC Models and Guidelines that address the use of lead generators for sales of health insurance products and to identify models and guidelines that need to be updated or developed to address current marketplace activities.

In order to achieve this goal and provide regulation over lead generators, the Working Group is requesting the review the above-mentioned Model #880, Sections 2, 3, and 4.

Section 2: There is currently no definition for Health Insurance Lead Generator. This section will be amended to include a definition of Health Insurance Lead Generator.

Section 3: This section will be amended to prohibit a Health Insurance Lead Generator, as defined in Section 2, from engaging in an unfair trade practice.

Section 4: This section will be amended to define what marketing-related activity of Health Insurance Lead Generators are unfair trade practices. These amendments will provide states the means to regulate lead generators and gain a level of consumer protection that is not currently in place.

4. Does the model law meet the Model Law Criteria?  Yes or  No (Check one)

(If answering no to any of these questions, please reevaluate charge and proceed accordingly to address issues).

- a. Does the subject of the model law necessitate a national standard and require uniformity amongst all states?  Yes or  No (Check one)

If yes, please explain why: One of the initial efforts at developing state legislation in response to the McCarran-Ferguson Act of 1945 was the development of trade practices legislation and the adoption of the NAIC's Unfair Trade Practices Act in 1947. Health Insurance Lead Generators impact consumers in every jurisdiction. Insurance regulatory authority over Health Insurance Lead Generators and defining prohibited practices of Health Insurance Lead Generators need to be clarified.

- b. Does Committee believe NAIC members should devote significant regulator and Association resources to educate, communicate and support this model law?

Yes or  No (Check one)

5. What is the likelihood that your committee will be able to draft and adopt the model law within one year from the date of Executive Committee approval?

1  2  3  4  5 (Check one)

High Likelihood

Low Likelihood

Explanation, if necessary:

6. What is the likelihood that a minimum two-thirds majority of NAIC members would ultimately vote to adopt the proposed model law?

1  2  3  4  5 (Check one)

High Likelihood

Low Likelihood

Explanation, if necessary:

7. What is the likelihood that state legislatures will adopt the model law in a uniform manner within three years of adoption by the NAIC?

1  2  3  4  5 (Check one)

High Likelihood

Low Likelihood

Explanation, if necessary:

8. Is this model law referenced in the NAIC Accreditation Standards? If so, does the standard require the model law to be adopted in a substantially similar manner?

No

**9. Is this model law in response to or impacted by federal laws or regulations? If yes, please explain.**

No

---

To: Members of the NAIC Executive Committee

From: Commissioner Sharon Clark, Kentucky Department of Insurance  
Chair, NAIC Insurance Regulator Professional Designation Program Advisory Board

Date: March 23, 2023

Subject: 2022 Annual Report of NAIC Designation Program Advisory Board Activities

---

In October of 2006, the NAIC launched the Insurance Regulator Professional Designation Program (“Designation Program”), a formal credentialing program designed for regulators, by regulators to establish structured training and development paths for insurance department employees. In that same year, the Internal Administration (EX1) Subcommittee directed the program’s Advisory Board to present a brief annual report of program benchmarks and board activities. This memorandum, with its supplemental charts, sets forth an account of the program’s year in review.

#### **Program Enrollments**

We continued our outreach to states and have seen increased interest and enrollments across the board. In 2022, the Designation Program surpassed 3,300 enrollments, bringing the total number of enrollments since 2006 to 3,373.

By year-end, earned designation totals were as follows: 1,405 APIR designees, 534 PIR designees, 26 SPIR designees, and 4 IPIR designees.

#### **The Designation Program Mentoring Network**

States have been encouraged to appoint a “mentor” that can serve as a liaison between the Department and the NAIC’s Education & Training Department as a means of disseminating information about the program to interested regulators, and to assist candidates as they have questions. Most mentors have earned an NAIC Designation or are currently working toward one.

#### **Designation Program Advisory Board Meetings**

The Designation Program Advisory Board met quarterly throughout 2022 both in-person at NAIC National Meeting and via WebEx to discuss policy matters and other issues. Discussion items included modernizing the Designation Program and the delivery of courses, policy recommendations and promotion of the program to increase awareness and participation.

#### **2022 Accomplishments**

Significant accomplishments of 2022 include:

- Fully rolled out the new online proctoring service to eliminate the need for an in-person, department of insurance staff member to proctor exams.
- The Designation Program Advisory Board approved an automatic renewal policy for chief insurance regulators and deputy commissioners who hold an NAIC APIR, PIR, SPIR or IPIR designation. The Designation Advisory Board recognizes that the work of commissioners and deputy commissioners results in experiential learning which meets and exceeds the formal learning requirements to earn Designation Renewal Credits (DRCs).
- Increased designation renewal credit options to include insurance related college courses.

**About the Insurance Regulator Professional Designation Program Advisory Board**

The 2022 Advisory Board was composed of Laura Arp (NE Department of Insurance), Rachel Chester (RI Insurance Division), Eric Fletcher (ID Department of Insurance) and Scott Sanders (GA Department of Insurance).

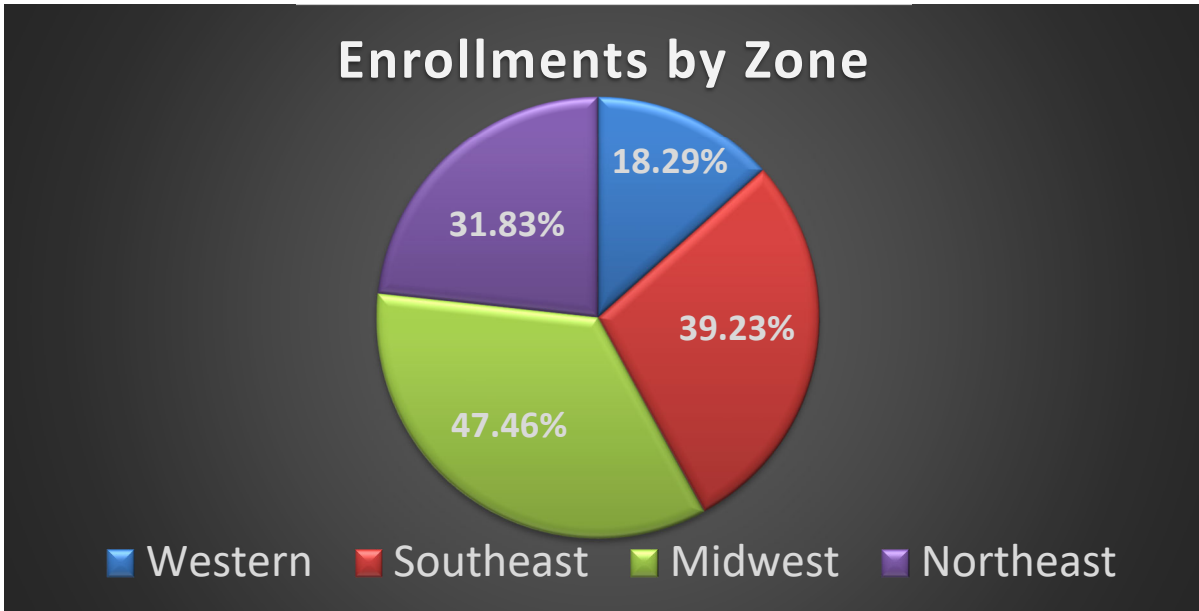

Kentucky Commissioner Sharon Clark chaired the 2022 Advisory Board.

In addition to overseeing Designation Program policy and advising NAIC Education Department staff on designation program policy administration, the board members work on outreach to regulators during NAIC Zone Meetings and other regulatory meetings. Additional information about the Designation Program can be found by visiting the NAIC website: [http://naic.org/education\\_designation.htm](http://naic.org/education_designation.htm)

Draft: 3/15/23

### Model Law Development Report

**Amendments to the *Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171)***—Amendments to Model #171 are required for consistency with the federal Affordable Care Act (ACA) and the revisions to its companion model act, the *Supplementary and Short-Term Health Insurance Minimum Standards Model Act (#170)*. The Accident and Sickness Insurance Minimum Standards (B) Subgroup completed the revisions to Model #170 in late 2018, which the Executive (EX) Committee and Plenary adopted in February 2019. Therefore, they did not require approval of a Request for NAIC Model Law Development by the Executive (EX) Committee. Soon after completing its work on Model #170, the Subgroup began considering revisions to Model #171. The Subgroup met every two weeks until it lost one of its co-chairs in December 2019. After a long hiatus since late 2019 because of the loss of a co-chair and the COVID-19 pandemic, as well as other resource issues, the Subgroup resumed its meetings in June 2021. The Subgroup has been meeting on a regular basis to discuss the comments received on Model #171. During the last few months of 2022, the Subgroup’s discussions focused on Section 8—Supplementary and Short-Term Health Minimum Standards for Benefits. This section establishes minimum standards for benefits for the products subject to the model, including accident-only coverage, hospital indemnity or other fixed indemnity coverage, and disability income protection coverage. The revisions also include a new section establishing minimum benefits for short-term, limited-duration (STLD) plans. The Subgroup completed its discussions of Section 8 in December 2022, including developing a new subsection establishing minimum benefit standards for STLD plans. The Subgroup resumed its meetings in February and plans to continue meeting on a regular basis to continue its discussions and plans to work on the following Model #171 sections in this order: 1) the remainder of Section 8, including revisiting the proposed new subsection on STLD plans to discuss the Feb. 24 comments received on that section; 2) Section 7—Prohibited Policy Provisions; 3) revisit Section 5—Definitions and Section 6—Policy Definitions to reconcile any inconsistencies that may have arisen after the Subgroup’s review of the substantive provisions of Model #171; and 4) Section 9—Required Disclosure Provisions. The Subgroup hopes to finish its work to develop an initial draft of comments on Model #171 for public comment by the end of the year.

**Amendments to the *Property and Casualty Insurance Guaranty Association Model Act (#540)***—The Executive (EX) Committee approved a Request for NAIC Model Law Development for amendments to Model #540 during the 2022 Summer National Meeting. The amendments will address the continuity of guaranty fund coverage when a policy is transferred from one insurer to another. The Financial Condition (E) Committee approved this request on July 21, 2022. The Receivership Law (E) Working Group exposed draft revisions for a 30-day comment period ending Oct. 14, 2022. During the Working Group’s Nov. 7, 2022, meeting, it formed a drafting group to address comments received. The drafting group met Nov. 30, 2022, and March 6, 2023, to consider further revisions and will continue to meet as needed to finalize the Model #540 amendments.

**Amendments to the *Mortgage Guaranty Insurance Model Act (#630)***—The Executive (EX) Committee approved a Request for NAIC Model Law Development for amendments to Model #630 during the 2013 Summer National Meeting. The Mortgage Guaranty Insurance (E) Working Group has developed proposed changes to the model, which have been exposed for comment, and subsequent changes have been made to address the comments. A third exposure for a 15-day comment period ended on March 14, 2023, and the Working Group plans to discuss comments received during the Spring National Meeting. The Working Group received an extension from the Financial Condition (E) Committee until the 2023 Fall National Meeting.

**Amendments to the *Nonadmitted Insurance Model Act (#870)***—The Executive (EX) Committee approved a Request for NAIC Model Law Development for amendments to Model #870 during the 2021 Spring National

Meeting. The amendments will modernize the model and bring it into alignment with the federal Nonadmitted and Reinsurance Reform Act (NRRRA). The Surplus Lines (C) Task Force met May 23, 2022, to discuss amendments to Model #870 and expose Model #870 for a 60-day public comment period ending July 21, 2022. The Task Force met Oct. 17, 2022, to hear a summary of comments received on the draft exposure and actions taken by the drafting group to address the comments. The Task Force exposed Model #870 for a 30-day public comment period ending Nov. 17, 2022. The Task Force discussed the comments received on the draft exposure during an open meeting on Dec. 12, 2022. On Jan. 23, 2023, the Task Force exposed a draft of Model #870 for a 14-day public comment period. The Task Force and the Property and Casualty Insurance (C) Committee will consider adoption of Model #870 during the Spring National Meeting.

**New Model: *Insurance Consumer Privacy Protection Model Law***—During the 2022 Summer National Meeting, the Executive (EX) Committee approved a Request for NAIC Model Law Development for a new model that would replace existing models in order to enhance consumer protections and corresponding obligations of entities licensed by insurance departments to reflect the extensive innovations that have been made in communications and technology. The Privacy Protections (H) Working Group approved this request on Aug. 2. The drafting group met in regulator-to-regulator session on Aug. 31, Sept. 15, Sept. 29, Oct. 4, Oct. 13, Dec. 1, and Dec. 5. The drafting group also met with companies privately to discuss current consumer data practices on Nov. 17, Nov. 29, Nov. 30, Dec. 5, Dec. 6, and Dec. 8. The Working Group met in open session Dec. 12 to hear presentations from an industry and a consumer perspective on general market practices regarding the use of personal information during the insurance process followed by an open discussion of these insights.

The Working Group exposed its initial draft of the new model (Model #674) Feb. 1, 2023, for a 60-day public comment period ending April 3, 2023. The drafting group met in regulator-to-regulator session on Jan. 23 and March 15. The drafting group continued its meetings with companies privately to discuss current consumer data practices on Feb. 16, March 1, March 2, March 7, March 8, March 9, and March 14 with additional meetings scheduled for April 5, April 12, and April 13. The Working Group will discuss comments received and collaborate on workable language at the Spring National Meeting and Summer National Meeting; during open meetings every two weeks following the comment period; and at an in-person, two-day interim meeting in Kansas City, MO, in June.

**CLIMATE AND RESILIENCY (EX) TASK FORCE**

Climate and Resiliency (EX) Task Force March 24, 2023, Minutes ..... 4-23

Draft: 4/4/23

Climate and Resiliency (EX) Task Force  
Louisville, Kentucky  
March 24, 2023

The Climate and Resiliency (EX) Task Force met in Louisville, KY, March 24, 2023. The following Task Force members participated: Lori K. Wing-Heier, Co-Chair (AK); Ricardo Lara, Co-Chair (CA); James J. Donelon, Co-Vice Chair (LA); Mike Kreidler, Co-Vice Chair (WA); Mark Fowler (AL); Peni Itula Sapini Teo (AS); Barbara D. Richardson (AZ); Michael Conway represented by Peg Brown (CO); Andrew N. Mais represented by Wanchin Chou (CT); Trinidad Navarro represented by Susan Jennette (DE); Michael Yaworsky represented by Anoush Brangaccio (FL); Gordon I. Ito (HI); Doug Ommen (IA); Dana Popish Severinghaus (IL); Amy L. Beard represented by Patrick O'Connor (IN); Sharon P. Clark represented by Shawn Boggs (KY); Gary D. Anderson represented by Rachel M. Davison (MA); Kathleen A. Birrane (MD); Timothy N. Schott (ME); Anita G. Fox represented by Chad Arnold (MI); Chlora Lindley-Myers represented by Cynthia Amann (MO); Mike Chaney represented by Andy Case (MS); Troy Downing represented by Bob Biskupiak (MT); Mike Causey represented by Jackie Obusek (NC); Jon Godfread (ND); Eric Dunning (NE); Jennifer Catechis (NM); Scott Kipper represented by David Cassetty (NV); Adrienne A. Harris represented by John Finston (NY); Judith L. French (OH); Glen Mulready (OK); Andrew R. Stolfi represented by Alex Cheng (OR); Michael Humphreys represented by Michael McKenney (PA); Elizabeth Kelleher Dwyer represented by Matt Gendron (RI); Michael Wise (SC); Scott A. White (VA); Kevin Gaffney (VT); Nathan Houdek represented by Sarah Smith (WI); and Jeff Rude (WY). Also participating were: Alan McClain (AR); Christian Citarella (NH); Tregenza A. Roach (VI); and Allan L. McVey (WV).

1. Received Updates from its Workstreams

Director Wing-Heier said the Pre-Disaster Mitigation Workstream will continue to be led by Director Richardson. She said the Climate Risk Disclosure Workstream will continue to be led by Commissioner Stolfi. She said the Technology Workstream and Innovation Workstream will be combined into one Technology Workstream that will be led by Commissioner Donelon. She said the Solvency Workstream will continue to be led by Commissioner Birrane.

Commissioner Birrane said in the first half of 2022, the Solvency Workstream developed and sent three referrals to three different Financial Condition (E) Committee working groups to propose specific enhancements to the existing financial solvency tools to more explicitly consider climate-related risks. She said the Workstream is reaching back out to those groups to see what the status is regarding their consideration of the referrals. She said the Workstream focused on climate scenario analysis in 2022, holding three public panels to discuss the topic. She said the first panel was held Oct. 12, 2022, and it provided a foundational education on climate scenario analysis, including what it is intended to accomplish and what data is needed to do the analysis effectively. She said the second panel was held Nov. 4, 2022, and it included presentations from international jurisdictions that have required the industry or a subset of the industry to participate in mandatory analytical risk evaluation exercises. She said the third panel was held Nov. 29, 2022, and it included presentations from a property/casualty (P/C) carrier and a life insurance carrier on how they utilize climate scenario analysis in their risk management and business strategy.

Commissioner Birrane said the Solvency Workstream is now tasked with understanding what role climate scenario analysis plays in the oversight of insurers in the U.S. She said on Feb. 1, the Workstream met in regulator-to-regulator session to: 1) receive a presentation from the Federal Reserve on its recently exposed proposed climate scenario analysis exercise; and 2) discuss members' initial view on the role of climate scenario analysis as a financial oversight tool for U.S. state insurance regulators.

Commissioner Birrane said the next steps for the Solvency Workstream include developing and sending out a survey to its members and interested state insurance regulators on whether the Workstream and the NAIC should look at the development and incorporation of any form of specific climate scenario analysis approach with regard to current oversight tools. She said the Solvency Workstream would also begin to look at stress testing. She said it would hold public meetings that would include education for state insurance regulators and others on climate stress testing, as well as hearing from international jurisdictions that are using climate stress tests.

## 2. Adopted its 2022 Fall National Meeting Minutes

Director Wing-Heier said the Task Force met Dec. 15, 2022.

Commissioner Kreidler made a motion, seconded by Commissioner Donelon, to adopt the Task Force's Dec. 15, 2022, minutes (*see NAIC Proceedings – Fall 2022, Climate and Resiliency (EX) Task Force*). The motion passed unanimously.

## 3. Heard a Presentation from PSC on Flood Risk

Matthew Godsoe (Public Safety Canada—PSC) said with the increase in frequency and severity of disaster events, the need to address flooding and other disasters has become an elevated priority within the Canadian government. He said a December 2021 mandate from the Canadian Prime Minister sets out provisions to take actions to help Canadians be prepared for and recover from the impact of floods in high-risk areas by creating a low-cost national flood insurance program to protect homeowners who are at high risk of flooding and do not have adequate insurance protection. He said this issue has to be addressed by the federal, provincial, and territorial governments working together.

Godsoe said flooding is Canada's most frequent and costly natural disaster, causing over \$1.5 billion in direct damage to homes each year. He said 94% of Canadians in high-risk areas remain unaware of their flood risk. He said most of the major cities in Canada are wholly or partially located in flood zones, and new unmitigated developments in these cities are the current number one driver of flood risk in Canada. He said financial and social hardships that occur because of disasters disproportionately affect vulnerable and marginalized populations. He said to date, almost all residential flood losses have been ineligible for insurance coverage; therefore, those losses had to be covered by provincial and territorial government disaster assistance programs.

Godsoe said the PSC created a Task Force on Flood Insurance and Relocation to explore viable solutions for insurance in high-risk areas and considerations for the potential relocation of homes most at risk of repeat flooding. He said the Task Force did not decide on an insurance or relocation solution, but it undertook research, costing, and analysis to inform future decision-making processes. He said this work concludes with its report titled *Adapting to Risking Flood Risk: An Analysis of Insurance Solutions for Canada*.

Godsoe said the Task Force created six public policy objectives to serve as a framework to later assess the viability of insurance arrangements. He said those objectives were: 1) provide adequate and predictable financial compensation for residents in high-risk areas; 2) incorporate risk-informed price signals and other levers that promote risk-appropriate land use, mitigation, and improved flood resiliency; 3) be affordable to residents of high-risk areas, with specific consideration for marginalized, vulnerable, and/or diverse populations; 4) provide coverage that is widely available for those at a higher risk across all regions; 5) maximize the participation of residents in high-risk areas; and 6) provide value for money for governments and taxpayers. He said the Task Force also focused on the need for targeted risk reduction activities through the mitigation and relocation for those in high-risk areas, which included household defenses, community flood mitigation, national support for risk reduction, and strategic relocation.

Godsoe said the Task Force studied international examples of how other countries were dealing with flood risk and other natural disasters. He said it referenced the work of Australia, France, the United Kingdom (UK), and the U.S. He said the Task Force put forth six potential insurance arrangements for analysis, and four were determined to be viable options in Canada. He said two of the arrangements were based on public-private pooling, and two arrangements were based on direct intervention in the insurance and reinsurance markets.

Godsoe said the report highlights four obstacles that Canada could potentially face based on the flood arrangements: 1) uncertainty; 2) market penetration; 3) affordability; and 4) moral hazard. He said the report also includes recommendations to overcome these obstacles.

Godsoe said the Canadian federal government will need to put forth its position based on the recommendations in the report. He said once that position has been determined, the PSC will go back to working with the provincial and territorial governments to implement one of the models.

#### 4. Heard a Presentation from the CCIR on Flood Risk

Lucas Neufeld (Canadian Council of Insurance Regulators—CCIR) said a CCIR working group released a paper in 2016 that focused on the impact of catastrophic floods and other perils on personal property insurance. He said with the increase in frequency and severity of these perils, the CCIR has released multiple reports that highlight findings on its research on these perils and property insurance. He said the common element in all of its reports is that there remain consumer protection gaps, which is the cost to rebuild plus additional living expenses, less insurance coverage. He said this includes both uninsured and underinsured consumers.

Neufeld said the CCIR has identified consumer awareness gaps, such as low awareness of one's property specific risk, low awareness of available insurance coverage options, low awareness of actual coverage purchased, and low awareness of what is and is not covered by provincial disaster financial assistance programs. He said these are limiting the uptake of flood coverage and potentially adding to the overall consumer protection gaps. He said industry is aware of the knowledge gaps and has created materials to address these gaps. He said there is still a disconnect between consumers having access to those materials and actual action to address and decrease the gaps. He said one example of this is that even though flood mapping is generally widely available, 80% of surveyed Canadians say they have not seen a flood map for the community they live in.

Neufeld said an important element of the work of the CCIR is to address property-specific risk. He said these include knowing the likelihood of flooding and the severity and frequency that could increase due to climate factors. He said structure and land-specific risks also need to be addressed, as these could potentially be mitigated due to personal or public action.

Neufeld said a forthcoming report from the CCIR working group highlights five recommendations: 1) identify and implement best practices for assessing and communicating property-specific natural catastrophe risk at the point of sale and renewal; 2) identify and implement best practices that insurers and intermediaries may use to communicate natural catastrophe related insurance options to customers; 3) take steps to ensure that consumers understand the insurance product they are being offered, including a simplified approach to summarizing coverage on the first page of the policy; 4) design innovative products and create incentives to encourage customers to act on personalized advice and product features; and 5) train and educate those selling insurance products to ensure that they understand the product's key features, including how it aligns with the customer's needs.

Director Wing-Heier asked if there will be a mandate for insurers and intermediaries to disclose the need for flood insurance. Rob O'Brien (CCIR) said in Canada, that decision would occur at a provincial or territorial level.

Director Richardson asked whether strategic relocation would kick in when there is no insurance available or because insurance is so expensive that current residents cannot afford it. Godsoe said some provinces provide dedicated relocation funding even if insurance has not been purchased, but the funding amount is capped and usually does not meet the market value of properties. He said with the future government decision on a national flood insurance arrangement, there may be a more consistent approach.

Commissioner Lara asked who is responsible for creating the flood maps. Godsoe said regulatory flood maps are developed by local governments, provinces, or territories. He said while most Canadian residents are covered by these flood maps, they only represent a small percentage of Canadian land mass. He said the PSC has been working with insurers to look at flood models to create maps in addition to the already created regulatory flood maps.

Chou asked how big the private flood insurance market is in Canada. O'Brien said in 2020, direct written premiums were about \$71 billion, but that is not broken out between auto and property coverage.

Chou asked who is working on the model validation in the PSC work. Godsoe said the Task Force is using a composite of private sector models that are overlaid on top of one another and calibrated against the regulatory flood maps. He said after a federal government decision, the PSC would come up with a Canadian model based on interventions from private catastrophe modeling firms that would provide a standard view to bring to the provinces and territories.

Aaron Brandenburg (NAIC) said the NAIC has collected private flood insurance data starting with premium and loss data from the NAIC Financial Annual Statement State Page. He said the NAIC issued a data call in 2020 to collect 2018 and 2019 data at a much more granular level, which led to the inclusion of a Private Flood Insurance Supplement in the Annual Statement. He said the data call and supplement collected data split out between commercial and residential, as well as data on a standalone, first dollar, excess, and endorsement basis. He said it also included data elements such as the number of policies, number of claims, and claims closed with payment. He said this data showed that in 2021, there were over 360,000 residential flood insurance policies, which was a 29% increase over the previous year. He said the 2022 NAIC Annual Statement State Page showed an increase of 21% in direct written premium for private flood.

## 5. Heard an International Update

Ryan Workman (NAIC) said the International Association of Insurance Supervisors (IAIS) launched one of three public consultations planned for the next year and a half looking at the initial approach of its work to address climate risk. He said the IAIS started off doing an assessment and review of existing insurance core principles (ICPs), which found the way those principles are drafted to accommodate climate risk and are applicable, but they also identified some areas where it might be helpful to provide additional supporting material on ways climate plays on in different contexts.

Workman said the IAIS has a workstream that is developing an application paper that is looking at climate issues as they relate to enterprise risk management (ERM) and macroprudential supervision.

Workman said the IAIS published a special topic edition of its *Global Insurance Market Report* (GIMAR) in 2021, which was a first attempt to look at doing a quantitative global study on the impact of climate change in the insurance sector. He said the current global monitoring exercise (GME) has seen the addition of data elements that would help the IAIS collect annual data on insurance sector risks, looking particularly at climate risks.

Workman said the Sustainable Insurance Forum (SIF) is continuing its work on net zero, which is identifying a potential role for insurance supervisors in the net zero transition. He said this group is looking at how to leverage

existing practices around the globe to address access and affordability issues. He said the group plans to meet in the second quarter of this year.

Workman said the (European Union) EU-U.S. dialog project has two workstreams focused on climate: 1) Climate Risk and Financial Oversight; and 2) Climate Risk and Resilience. He said the project is holding a public stakeholder event on June 16.

#### 6. Heard a Federal Update

Shana Oppenheim (NAIC) said the National Flood Insurance Program (NFIP) authorization is set to expire on Sept. 30. She said it has been reauthorized on a short-term basis 25 times since 2017. She said on March 10, the U.S. House of Representatives (House) Financial Services Subcommittee on Housing, Community Development, and Insurance, led by Chairman Warren Davidson (R-OH), held a hearing entitled “How Do We Encourage Greater Flood Insurance Coverage in America?” She said Republicans were focused on encouraging private flood uptake, especially in regions outside of flood zones. She said they also expressed interest in examining federal regulatory barriers to private flood insurance, consumer information, and public awareness. She said Democrats expressed an interest in bipartisan, long-term authorization and looking at the diversity, equity, and inclusion (DE&I) aspects of flood risk and insurance. She said U.S. Sen. John Kennedy (R-LA) has introduced bills to cap annual flood insurance premium increases and force the Federal Emergency Management Agency (FEMA) to explain price changes under Risk Rating 2.0. She said U.S. Rep. Blaine Luetkemeyer (R-MO) has introduced bills to require that FEMA purchase reinsurance to pay for flood losses and allow communities to develop alternative flood maps.

Oppenheim said the U.S. Securities and Exchange Commission’s (SEC’s) climate risk disclosure is expected to be finalized in the next few months. She said the chair, Gary Gensler (D-MD) may be signaling a departure from the International Sustainability Standards Board (ISSB) standards.

Oppenheim said the Federal Insurance Office (FIO) has not yet released the climate report that was expected at the end of 2022. She said in October 2022, the FIO published a notice and request for comment on a proposal to collect data from certain P/C insurers to assess the potential for major disruptions of the private insurance coverages in the U.S. market. She said the NAIC sent a letter expressing disappointment that the FIO did not engage state insurance regulators in a credible exercise to identify data elements gathered by either the regulatory community or industry that is indicative of climate risk. She said the NAIC letter expressed a willingness to work with the FIO on this issue.

Oppenheim said President Joe Biden’s budget plan calls for significant investments in clean energy and billions of dollars to help build community resilience to flood, wildfire, storms, extreme heat, and drought. She said the budget also calls for investment in green climate funds and loan guarantees; reasserting U.S. leadership in the Indo-Pacific region to finance energy, security, and infrastructure projects; and reducing reliance on volatile energy supplies.

Oppenheim said the NAIC continues to support the Disaster Mitigation and Tax Parity Act of 2021, which would ensure that state-based disaster mitigation grants receive the same federal tax exemption as federal mitigation grants.

Oppenheim said the NAIC is in dialogue with the Federal Deposit Insurance Corporation (FDIC) and the Federal Housing Finance Agency (FHFA) over concerns about coverage caps in the property insurance market in areas that are being affected by rising sea levels and increasing storms, floods, and wildfires.

## 7. Heard a Presentation from the NAIC Catastrophe Modeling COE

Jeff Czajkowski (NAIC) said the Catastrophe Modeling Center of Excellence (COE) is fully operational and staffed with catastrophe risk modeling experts and resilience subject matter experts (SMEs), and they are integrated and well aligned with the catastrophe modeling community. He said the COE has several regulator-oriented tools and training, and they are engaged with individual departments of insurance (DOIs) and a number of NAIC committees.

Czajkowski said the goal of the COE is to provide the same level of technical expertise and tools to state insurance departments that the industry has at their disposal. He said they are implementing that goal through their three pillars of activity: 1) vendor models; 2) education and tools; and 3) applied research. He said the central coordination for the provided tools is the CAT COE SharePoint site, which is available for state insurance regulator access. He said the COE has entered into agreements with seven catastrophe modelers, and their information is accessible on the SharePoint site.

Czajkowski said in terms of education and training, the COE is expected to debut its Catastrophe Modeling 101 training in the spring of 2023. He said it also has access to the International Society of Catastrophe Managers training. He said the COE provides virtual and in-person training for state insurance departments on peril-specific catastrophe models.

Jennifer Gardner (NAIC) said the COE is developing tools to work in conjunction with the provided training. She said the COE has developed peril model cards that provide high-level summaries of models. She said the COE is developing a compendium of legislative and regulatory actions relative to catastrophe models. She said the COE is using catastrophe models to develop risk assessments.

Gardner said the COE is combining market insights from NAIC data with different risk assessments to focus on resilience and mitigation efforts.

Gardner said the COE has been bringing members of state insurance departments to the Insurance Institute for Business and Home Safety (IBHS) facilities to highlight wildfire risks and severe convective storm risks.

Gardner said the COE had the opportunity to involve a couple of states in a panel discussion at the National Disaster Resilience Conference hosted by the Federal Alliance for Safe Homes Inc. (FLASH). She said the organization was initiated by the insurance industry, and it does advocacy and awareness campaigns around risk reduction, flood losses, building code awareness, and hazard preparedness. She said the COE also hosted several state insurance regulators at the Reinsurance Association of America (RAA) Catastrophe Risk Management conference, where they spoke about earthquake risk, insurance market stability, and state resiliency initiatives.

Gardner said the COE is working with the Colorado Division of Insurance to identify potential resources that could be developed by Catastrophe model vendors to support risk assessment and regulatory initiatives.

Gardner said the COE is continuing to engage with NAIC working groups on catastrophe and mitigation matters, as well as engaging in discussions on support tools needed to stand up a mitigation grant program.

Commissioner Donelon said he endorses the important work of the COE and the training for state DOIs, and he said he encourages state insurance regulators to learn about the tools and training available.

## 8. Discussed Other Matters

Dave Snyder (American Property Casualty Insurance Association—APCIA) said he wanted to offer a future presentation from the Global Federation of Insurance Associations (GFIA), which has produced a report on global

protection gaps and recommendations for bridging them. He said there is growing concern about political polarization that is leading to potentially undercutting diverse business models and time-tested regulation of the insurance markets by state insurance regulators.

Birny Birnbaum (Center for Economic Justice—CEJ) said there is a bill in the Texas legislature that would ban economic scenario generator (ESG) considerations, therefore banning climate risk consideration for state insurance regulators.

Amann said the Catastrophe Risk (C) Working Group is undergoing revisions to the Catastrophe Risk Primer, and it would invite participation from any states.

Having no further business, the Climate and Resiliency (EX) Task Force adjourned.

[SharePoint/NAIC Support Staff Hub/Committees/EX CMTE/CRTF/2023\\_Spring/CRTF\\_Minutes](#)

**GOVERNMENT RELATIONS (EX) LEADERSHIP COUNCIL**

The Government Relations (EX) Leadership Council did not meet at the Spring National Meeting.

Draft: 3/16/23

Long-Term Care Insurance (EX) Task Force  
Virtual Meeting (*in lieu of meeting at the 2023 Spring National Meeting*)  
March 13, 2023

The Long-Term Care Insurance (EX) Task Force met March 13, 2023. The following Task Force members participated: Michael Conway, Chair (CO); Andrew R. Stolfi, Vice Chair, represented by TK Keen (OR); Lori K. Wing-Heier represented by Sarah Bailey (AK); Mark Fowler (AL); Alan McClain represented by Jimmy Harris (AR); Barbara D. Richardson represented by Erin Klug (AZ); Ricardo Lara represented by Tyler McKinney (CA); Andrew N. Mais represented by Paul Lombardo (CT); Karima M. Woods represented by Philip Barlow (DC); Trinidad Navarro (DE); Michael Yaworsky represented by Lilyan Zhang (FL); Gordon I. Ito (HI); Doug Ommen represented by Klete Geren (IA); Dean L. Cameron (ID); Amy L. Beard represented by Scott Shover (IN); Vicki Schmidt (KS); Sharon P. Clark (KY); James J. Donelon represented by Tom Travis (LA); Gary D. Anderson represented by Rachel M. Davison (MA); Timothy N. Schott (ME); Anita G. Fox represented by Rachel Davison (MI); Grace Arnold represented by Fred Andersen (MN); Chlora Lindley-Myers (MO); Troy Downing represented by Mari Kindberg (MT); Mike Causey represented by Ted Hamby (NC); Jon Godfread represented by Chrystal Bartuska (ND); Eric Dunning (NE); Jennifer Catechis represented by Anna Krylova (NM); Scott Kipper (NV); Judith L. 1. Adopted its 2022 Fall National Meeting Minutes

Keen made a motion, seconded by Commissioner Clark, to adopt the Task Force's Nov. 30, 2022, minutes (*see NAIC Proceedings – Fall 2022, Long-Term Care Insurance (EX) Task Force*). The motion passed unanimously.

2. Heard a Report on Industry Trends and Other Updates

Andersen said coordinated efforts between states have resulted in the completion of targeted reviews of year ending 2021 reserve adequacy filings. Review of the 2022 annual filings will begin soon. The following are key industry trends that have been seen and that will be monitored going forward:

- Cost-of-care inflation trends lead to more maximum daily benefit being used than originally expected. There is consensus among companies selling long-term care insurance (LTCI) that home care costs have increased over the past five to six years. There will likely be long-term impacts from this issue.
- There is a shift in situs of care from facilities to home care. Varying reports indicate the reversal of that trend back to facilities.
- Home care daily costs are starting to catch up with the cost of facility care.
- There is an increase in incidents and the length of claims. COVID-19 had caused lower incidents and shorter claims. So far, the impact of COVID-19 is short-term. COVID-19 is not seen as having a long-term impact on the finances of the blocks of business.
- Pre-claim wellness initiatives have had some impact on claims. Wellness initiatives may involve being proactive or preventing falls, providing early cognitive tests, and providing care for the family caregiver. It is still uncertain if the investments in these wellness initiatives will be more than offset by cost reductions.
- Improvements in technology and medical and drug advancements have potential impacts on claim costs.

Andersen said the Long-Term Care Actuarial (B) Working Group met Feb. 17 and exposed: 1) the information checklist submitted with rate increase filings; and 2) the actuarial methodologies used to review older blocks of

business. Comments on both exposures are due April 24. If any changes are made to the checklist or the methodologies, similar changes will be proposed to the Long-Term Care Insurance Multistate Rate Review Framework (LTCI MSA Framework). Review of the checklist is likely to be completed in 2023. Review of the methodologies will likely conclude in 2024.

### 3. Adopted Proposed Edits to the Checklist for Premium Increase Communications

Commissioner Conway said proposed edits to the *Checklist for Premium Increase Communications* were exposed for a 30-day public comment period ending Feb. 3. Five comment letters were received. A drafting group of consumer representatives and regulators from California, Pennsylvania, Vermont, and Virginia reviewed the comments and recommended a few edits in response to the comments.

Jane Koenigsman (NAIC) summarized the comments and the drafting group's responses (Attachment One). Comments were received from Wayne Enstice (University of Cincinnati), Patrick Cantilo (Cantilo & Bennett), Robert Wake (ME), Jan Andrews (NC), and Molly Nollette (WA).

Koenigsman said the comments from Enstice did not appear to be related to consumer communication but rather the review of rate increases and reduced benefit options (RBOs). She said the drafting group recommended referring those comments to the Long-Term Care Actuarial (B) Working Group.

Commissioner Kreidler made a motion, seconded by Superintendent Schott, to refer the comments received from Enstice to the Long-Term Care Actuarial (B) Working Group. The motion passed unanimously.

Koenigsman said the drafting group proposed additional edits to address certain comments, including duplicative checklist items, the use of references to "example" RBOs in the revisions, rate guarantees, default options, and other clarifying changes.

Hamby made a motion, seconded by Commissioner Kreidler, to adopt the revised *Checklist for Premium Increase Communications* (Attachment Two). The motion passed unanimously.

Having no further business, the Long-Term Care Insurance (EX) Task Force adjourned.

### Checklist for Premium Increase Communications

#### AUTHORITY

The Long-Term Care Insurance Reduced Benefit Options (RBO) (EX) Subgroup **was** composed of regulators from 17 state insurance departments. It has been tasked with assisting the Long-Term Care Insurance (EX) Task Force in completing the following charge:

*Identify options to provide consumers with choices regarding modifications to long-term care insurance (LTCI) contract benefits where policies are no longer affordable due to rate increases.*

The Long-Term Care Insurance (EX) Task Force (Task Force) adopted the Long-Term Care Insurance RBO Communication Principles **and this** complementary checklist **Nov. 19, 2021. The checklist was amended March 13, 2023.**

**Deleted:** Adopted by the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup 11/19/21 ¶  
**Deleted:** i

#### INTRODUCTION

This checklist is intended to establish a consistent approach to drafting and reviewing Long-Term Care Insurance RBO policyholder communications. The checklist can be used as guidance and does not carry the weight of law or impose any legal liability.

State regulators who consider the checklist excessive, deficient, or not focused on issues specific to consumer experiences in their state are encouraged to modify the checklist to suit the needs of the Department.

Leveraging the checklist could enable insurers and state regulators to mitigate consumer confusion and complaints, improve the quality of consumer communications, and ensure that consumer communications:

- Read in a clear, logical, not overly complex manner.
- Present options **fairly** and without subtle coercion.
- Include appropriate referrals to external resources, definitions, disclosures, and visualization tools.

**Deleted:** The Long-Term Care Insurance RBO EX Subgroup has been charged with developing a  
**Deleted:** , that  
**Deleted:** The principles and checklist can be leveraged by state regulators and Long-Term Care Insurance insurers. ...

**Deleted:** or examples of options

**The Task Force RECOMMENDS** that state regulators adapt the checklist to reflect their state regulations, laws, or statutes and **use the checklist** when reviewing filed Long-Term Care Insurance RBO Communications.

**Deleted:**

*Comments and Drafting Group and Task Force responses shown in comment balloons.  
Edits since exposure are highlighted yellow.*

**CALLS ON** all insurance companies to consider the checklist when developing reduced benefit option policyholder communications in the event of a rate increase.

<b>Tracking number(s) SERFF form filing:</b>	

		SERFF FILING	Page Reference and Filing Notes
Yes	No	N/A	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1. Does the filing contain all required materials including: policyholder communication, supplemental FAQ, graphs, illustrations, website screenshots (expected if communication refers policyholder to website for more information)?
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	2. Has actuarial review of the rate increase been completed?
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	3. Will notice of the rate action be mailed at least 45 days prior to the policyholder anniversary date (or billing date if state law allows)?
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	4. Have all new innovative RBO options presented in the communication been clearly explained in the filing? Have they been vetted by policy and actuarial staff? (e.g., rate guarantees)

**Commented [A1]:** ME Comment: ME suggested various non-substantive spacing and formatting edits.

**Commented [A2R1]:** Drafting Group: Formatting will be addressed by NAIC staff before republishing on the website.

**Commented [A3]:** Patrick Cantillo Comment: Based on our experience with SHIP, I offer three comments.

- 1.Does the communication clearly describe the "default" option that will be given effect if the policyholder does not respond by the applicable deadline?
- 2.Does the communication include objective indicators by which the relative values of the options can be compared? Examples would include for each option:
  - 1.Premium,
  - 2.Maximum Policy Value (MPV),
  - 3.Maximum Daily Benefit (MDB) by site of care if different,
  - 4.Maximum Benefit Period,
  - 5.Elimination Period, and
  - 6.Inflation factor
- 3.Consideration should be given to "bang for the buck" value indicators for each option, such as:
  - 1.MPV/premium,

**Commented [A4R3]:** Drafting Group: Comment #1 is addressed with a new question in #44. The topics proposed in comments 2 & 3 had been previously discussed by the RBO Subgroup and due to opposition, were not included in the checklist. No further changes recommended.

**Page 3: [1] Commented [A3] Author**

Patrick Cantillo Comment: Based on our experience with SHIP, I offer three comments.

1. Does the communication clearly describe the “default” option that will be given effect if the policyholder does not respond by the applicable deadline?
2. Does the communication include objective indicators by which the relative values of the options can be compared? Examples would include for each option:
  1. Premium,
  2. Maximum Policy Value (MPV),
  3. Maximum Daily Benefit (MDB) by site of care if different,
  4. Maximum Benefit Period,
  5. Elimination Period, and
  6. Inflation factor
3. Consideration should be given to “bang for the buck” value indicators for each option, such as:
  1. MPV/premium,
  2. Gross Premium Valuation/premium, and
  3. MDB/premium.

**Page 5: [2] Commented [A11] Author**

ME comment: Does that really stand out as the “most readable” serif typeface? And there are a lot of unreadable sans-serif options available.

**Page 5: [3] Commented [A12R11] Author**

Drafting Group: No change. Generically, a sans serif font (one without the decorative strokes) is considered easier to read than a serif font. Using a sans serif font is a common recommendation to improve readability.

**Page 5: [4] Commented [A14R13] Author**

Drafting Group: No edits necessary.

## Checklist for Premium Increase Communications

### AUTHORITY

The Long-Term Care Insurance Reduced Benefit Options (RBO) (EX) Subgroup was composed of regulators from 17 state insurance departments. Beginning in 2019, it has been tasked with assisting the Long-Term Care Insurance (EX) Task Force in completing the following charge:

*Identify options to provide consumers with choices regarding modifications to long-term care insurance (LTCI) contract benefits where policies are no longer affordable due to rate increases.*

The Long-Term Care Insurance (EX) Task Force (Task Force) adopted the Long-Term Care Insurance RBO Communication Principles and this complementary checklist Nov. 19, 2021. The checklist was amended March 13, 2023.

### INTRODUCTION

This checklist is intended to establish a consistent approach to drafting and reviewing Long-Term Care Insurance RBO policyholder communications. The checklist can be used as guidance and does not carry the weight of law or impose any legal liability.

State regulators who consider the checklist excessive, deficient, or not focused on issues specific to consumer experiences in their state are encouraged to modify the checklist to suit the needs of the Department.

Leveraging the checklist could enable insurers and state regulators to mitigate consumer confusion and complaints, improve the quality of consumer communications, and ensure that consumer communications:

- Read in a clear, logical, not overly complex manner.
- Present options fairly and without subtle coercion.
- Include appropriate referrals to external resources, definitions, disclosures, and visualization tools.

**The Task Force:**

- **RECOMMENDS** that state regulators adapt the checklist to reflect their state regulations, laws, or statutes and use the checklist when reviewing filed Long-Term Care Insurance RBO Communications.
- **CALLS ON** all insurance companies to consider the checklist when developing reduced benefit option policyholder communications in the event of a rate increase.

### Checklist for Premium Increase Communications

<b>Insurer name:</b>	
<b>Date of filing:</b>	
<b>Product form:</b>	
<b>Tracking number(s) SERFF <i>rate</i> filing:</b>	
<b>Tracking number(s) SERFF <i>form</i> filing:</b>	

Yes	No	N/A	SERFF FILING	Page Reference and Filing Notes
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1. Does the filing contain all required materials including: policyholder communication, supplemental FAQ, graphs, illustrations, website screenshots (expected if communication refers policyholder to website for more information)?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	2. Has actuarial review of the rate increase been completed?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	3. Will notice of the rate action be mailed at least 45-days prior to the policyholder anniversary date (or billing date if state law allows)?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	4. Have all new innovative RBO options presented in the communication been clearly explained in the filing? Have they been vetted by policy and actuarial staff? (e.g., rate guarantees)	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	5. Do reviewers understand any variable information that appears in the communication?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	6. Were state-specific or contract-specific pre-rate increase filing notification procedures followed? For example: VT has insurers notify consumers of rate increases when	

			filed in addition to notification before effective date. PA posts filed rate increase details on their website.	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>READABILITY AND ACCESSIBILITY</b>	<b>Page Reference and Filing Notes</b>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	7. Is the communication easy to follow? Does it flow logically? Does it display the essential information and/or the primary action first (followed by the nonessential information)? Is the primary message of the communication presented first and clearly worded?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	8. Are all technical insurance terms clearly explained in the communication?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	9. Are all technical terms used consistently throughout the communication?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	10. Is the communication in an easily readable font? For example: Is the type at least 11-point type?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	11. Does the communication use headings to help the reader find information easily?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	12. Is white space (margins, lines spacing, and spacing between paragraphs) sufficient and consistent?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	13. Are tables, charts, and other graphics easy to read and understand? (See question 18 for reference).	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	14. Are the grade level and reading ease scores appropriate according to state readability standards?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	15. Is it clear which reduced benefit options are available to the policyholder? Are there side-by-side illustrations showing how the RBOs impact the policy benefits and premiums?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	16. Does the communication avoid diminished contrast features that may make it harder to read? Examples include: <ul style="list-style-type: none"> <li>• Use of Italics</li> </ul>	

			<ul style="list-style-type: none"> <li>• Narrow margins (top and bottom less than 1.5 inches)</li> <li>• All caps (all bold is acceptable)</li> <li>• Difficult to read text (typefaces other than Sans Serif or Courier)</li> <li>• Different colors throughout</li> <li>• Small font</li> </ul> <p>Reviewers should aim to review these communications in the size and contrast in which a consumer would see them; a print test may be beneficial.</p>	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	17. If FAQs are included, are they succinct and easy to understand?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>18. Does the communication include notice that policyholders with disabilities and policyholders for whom English is not a first language can request ongoing accommodations that will enable them to read online and written materials and notices?</p> <p>For example, accessibility of its online and written material to all interested parties, including those with disabilities such as blindness or macular degeneration, deafness and hearing loss, learning disabilities, cognitive limitations, limited movement, speech disabilities, photosensitivity, and combinations of these.</p>	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>IDENTIFICATION</b>	<b>Page Reference and Filing Notes</b>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	19. Does the communication clearly indicate that its purpose is to inform the consumer of a rate increase and, if applicable, that they have options to reduce that increase?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	20. Does the communication answer why the consumer is receiving a rate increase and when the rate increase will be effective?	

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	21. Does the communication reflect negatively on the Department of Insurance?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	22. Does the communication accurately reflect the role of the Department of Insurance in approving rate increases?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	23. Does the communication clearly indicate the policyholder has options? Does the communication clearly indicate whether the RBOs listed are the policyholder's <i>only</i> options? Can the insurer confirm policyholders will see only those illustrated options that are available to them (and not be shown options that are not available to them)?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	24. Does the communication clearly indicate how the consumer may elect an option? Does the election documentation allow the consumer to clearly indicate his or her choice? Does the election form description of options match the description of options found earlier in the communication, such that consumers will not be confused looking at the election form?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	25. Does the communication clearly explain that the consumer is not being singled out for the increase?	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>COMMUNICATION TOUCH AND TONE</b>	<b>Page Reference and Filing Notes</b>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	26. Does the communication remind consumers to reflect on the original reason they bought the policy?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	27. Does the communication express an understanding of the difficulty of evaluating choices?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	28. Is there a statement telling consumers how to contact the insurer for more information or help understanding their options?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	29. Are the options represented fairly? Options are <b>not</b> presented fairly If one option is	

			emphasized, mentioned multiple times, or bolded when the other options are not.	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	30. Are words used that could influence a policyholder’s decision, such as <i>must</i> or <i>avoid</i> ? For instance, consider demonstrating immediacy by using the word “now” and avoiding words like “must.” Consider “manage an increase” instead of “avoid an increase.”	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>CONSULTATION AND CONTACT INFORMATION</b>	<b>Page Reference and Filing Notes</b>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	31. Is the insurer’s consumer service number easy to find? Is it clear what hours and days consumer service is open? Regulators may consider testing the phone number to ensure it connects easily to live company representatives without long wait times. Regulators may want to determine if company representatives in other countries have sufficient language skills and speak without strong accents that might make them difficult for older people to understand. For example, test calls could be made to understand consumer experience.	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	32. Are website links accurate and functional?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	33. Does the insurer encourage consumers to consult with multiple sources to include any of the following: Financial advisor, producer, state SHIP program (where applicable) with the state-specific name of the program or trusted family member?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	34. Does the insurer encourage consumers to consult the Department of Insurance?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	35. Does the communication encourage consumers to consult with a tax advisor or someone who could advise as to the impact on eligibility for public benefits or tax consequences of any refunded amounts	

			if the reduction options include a cash buy out or could cause loss of Partnership status?	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>UNDERSTANDING OPTIONS - PRESENTATION</b>	<b>Page Reference and Filing Notes</b>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	36. Does the communication have a clearly worded, descriptive title or subject line? For example: <b>Your Long-Term Care Premiums Are Increasing.</b>	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	37. Are the options included with the rate increase notification communication? Is it clear that the policyholder can ask for additional options?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	38. Are the number of options presented reasonable? If there are more than 5, engage with insurer to understand what is being presented.	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	39. Is it clear if the policyholder has the right to reduce coverage at any time? Are the instructions about how to do that clear?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	40. Is there enough information to make a decision? If other sources are referenced like videos, websites, etc. are they supplemental education materials or are they required sources to choose an option?	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>UNDERSTANDING OPTIONS – PAST AND FUTURE RATE ACTIONS</b>	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	41. Does the communication include a statement that premiums may increase in the future? Is it clear that any future increase will include RBOs? Is the plan for filing future rate increases disclosed and clear?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	42. Does the communication include a 10-year nationwide rate increase history for this and similar forms?	

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	43. Does the communication disclose the policy is guaranteed renewable and clearly explain guaranteed renewable?	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>UNDERSTANDING OPTIONS – WINDOW OF TIME TO ACT</b>	<b>Page Reference and Filing Notes</b>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	44. Does the communication indicate what the reader must do to elect an option and provide a deadline to do it? Does the communication indicate what happens if they do not elect an option? Is the deadline in compliance with state law regarding notification periods in advance of a rate increase? If there is no deadline, does the communication avoid creating a false sense of urgency to act?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	45. If options are only available during the decision window, is that limitation clear to consumers?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	46. Does the communication indicate what happens if the policyholder does not send payment? For example, if the policy lapses within 120 days, does it advise Contingent Benefit Upon Lapse will apply, if applicable?	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>UNDERSTANDING OPTIONS – CURRENT BENEFITS</b>	<b>Page Reference and Filing Notes</b>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	47. Does the communication include all the following applicable information? Current policy benefits (daily benefit, elimination period, current lifetime maximum benefit in dollars, inflation option, partnership status)?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	48. If current benefits have an inflation option, does the communication clearly explain the impact that changes to this inflation option may have on benefits now and in the future?	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>UNDERSTANDING OPTIONS – PERSONAL DECISION</b>	<b>Page Reference and Filing Notes</b>

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	49. Does the communication prompt the policyholder to consider their personal situation, such as: current age, gender, health conditions, financial position, availability of caregivers, spouse or partner impacts, and potential need for and cost of care?	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>UNDERSTANDING OPTIONS – VALUE OF OPTIONS</b>	<b>Page Reference and Filing Notes</b>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	50. Does the narrative describing the Contingent Nonforfeiture (CNF) and other limited benefit options make it clear that there is a reduction in the current policy’s LTC benefits? The narrative does not have to include the dollar value for CNF.	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>UNDERSTANDING OPTIONS – IMPACT OF DECISION</b>	<b>Page Reference and Filing Notes</b>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	51. Is there a prominent statement telling policyholders they can maintain their current benefits by paying the increased premium?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	52. Do the options reflect the impact of removing or reducing the inflation option on the growth or reduction of future benefits?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	53. Is there a declarative statement about whether dropping or adjusting inflation protection results in the loss of some or all of the accumulated benefit amount?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	54. For phased-in increases: Is there a table with all state approved phase-in dates and premium amounts if no RBO is selected? Does the communication clearly state if RBO(s) are limited to only the first rate increase or will be available during each phase of the rate increase?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	55. For phased-in increases, are there communications sent at least 45 days before each phase of the increase?	

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	56. Does the communication disclose that all reduction options require careful consideration and may not be equal in value?	
<b>Yes</b>	<b>No</b>	<b>N/A</b>	<b>UNDERSTANDING OPTIONS – OTHER</b>	<b>Page Reference and Filing Notes</b>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	57. Does the notice include a reminder to the policyholder to keep the notice or any other documents related to this policy with the policyholder’s long-term care insurance policy? Does the notice encourage the policyholder to keep the policy and related documents in an easily accessible location ( <b>not</b> a safe deposit box) and inform the appropriate individuals about where the policy can be found?	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	58. Does the notice include a reminder that the policyholder can identify a third party to be notified if premiums aren’t paid and information about how to make that election?	

**SPECIAL (EX) COMMITTEE ON RACE AND INSURANCE**

Special (EX) Committee on Race and Insurance March 23, 2023, Minutes ..... 4-60

Draft: 4/10/23

Special (EX) Committee on Race and Insurance  
Louisville, Kentucky  
March 23, 2023

The Special (EX) Committee on Race and Insurance met in Louisville, KY, March 23, 2023. The following Special Committee members participated: Chlora Lindley-Myers, Co-Chair (MO); Andrew N. Mais, Co-Chair (CT); Jon Godfread, Co-Vice Chair (ND); Scott A. White, Co-Vice Chair (VA); Lori K. Wing-Heier (AK); Mark Fowler (AL); Alan McClain (AR); Peni Itula Sapini Teo (AS); Michael Conway (CO); Karima M. Woods (DC); Michael Yaworsky (FL); Doug Ommen (IA); Dean L. Cameron (ID); Dana Popish Severinghaus (IL); Amy L. Beard (IN); Sharon P. Clark (KY); James J. Donelon (LA); Gary D. Anderson (MA); Kathleen A. Birrane (MD); Timothy N. Schott (ME); Anita G. Fox (MI); Grace Arnold (MN); Troy Downing (MT); Mike Causey (NC); Eric Dunning (NE); Marlene Caride (NJ); Jennifer Catechis (NM); Scott Kipper (NV); Judith L. French (OH); Glen Mulready (OK); Andrew R. Stolfi (OR); Michael Humphreys (PA); Alexander S. Adams Vega (PR); Elizabeth Kelleher Dwyer (RI); Michael Wise (SC); Larry D. Deiter (SD); Jon Pike (UT); Kevin Gaffney (VT); Mike Kreidler (WA); Nathan Houdek (WI); and Jeff Rude (WY).

1. Adopted its 2022 Fall National Meeting Minutes

Commissioner Godfread made a motion, seconded by Director Cameron, to adopt the Special Committee's Dec. 14, 2022, minutes (see *NAIC Proceedings – Fall 2022, Special (EX) Committee on Race and Insurance*). The motion passed unanimously.

2. Received a Status Report on the Property/Casualty (P/C) Workstream

Commissioner Gaffney reported that the Property/Casualty (P/C) Workstream continues its focus on engaging with the Collaboration Forum activities related to algorithmic bias. The work of the Collaboration Forum is critical as this Workstream looks more deeply at issues related to unfair discrimination. The education and framework within the Collaboration Forum related to algorithmic bias are necessary building blocks in evaluating issues of unfair discrimination.

The Workstream is building on this foundational work by looking at potential bias in marketing, access to insurance, underwriting, rating, and claims handling, including fraud detection. The Workstream is looking at the product life cycle, starting with marketing and access first.

The workstream recently met with several insurers in order to focus on marketing and advertising activities and to learn more about insurers' corporate governance principles and best practices. These discussions help to inform the Workstream's efforts looking at potential algorithmic bias and explore industry best practices. In addition to additional areas of the product life cycle, as previously discussed, the Workstream will likely have continued engagement with the industry in the marketing and advertising area related to the industry's general approach to diversity, equity, and inclusion (DE&I) issues both internally and externally.

3. Received a Status Report on the Life Workstream

Commissioner Woods reported that the Life Workstream met Nov. 2, 2022, and heard a panel presentation focusing on what agents and advisors are doing to increase diversity in marketing, distribution, and access to life insurance products.

In discussing 2023 plans for this Workstream, Commissioner Woods shared with Director French current DE&I initiatives at the District of Columbia Department of Insurance, Securities, and Banking. A new initiative the

Department is launching focuses on providing resources about life insurance, including when to purchase and how to purchase the right policy. The Department is partnering with local organizations, relevant government agencies, and industry on this new initiative. A Webex presentation on the District of Columbia Life Insurance Program is currently being planned for April 13, and a call notice will be distributed following the Spring National Meeting.

Commissioner Woods noted that even as the capabilities and focus of state insurance departments may differ, her hope is to provide helpful information and ideas for state insurance regulators as the Workstream continues to focus on marketing, distribution, and access to life insurance products in minority communities and the role that financial literacy plays.

#### 4. Received a Status Report on the Health Workstream

Commissioner Arnold provided an update on the continuation of the Health Workstream's work from 2022 and outlined what the Workstream plans to do this year.

Last year, the Health Workstream set out on a mission to identify and better understand the barriers to accessing and using health insurance that exist for systematically disadvantaged and historically underrepresented populations. In 2022, the Workstream held seven open meetings on two main focus areas: 1) provider network design and benefit structures; and 2) consumer engagement and education.

Four of the seven meetings focused on plan networks, providers, and benefits and innovative benefit design. From the early meetings, the Workstream learned that historically underserved communities face the greatest challenges in finding high-quality health care, often due to inadequate provider networks. Workstream members heard presentations on how state insurance regulators can require more inclusive networks from their carriers to promote better access to appropriate care and more equitable health outcomes.

Later meetings focused on health carriers' benefit design practices that limit access to care, such as burdensome cost sharing or utilization management protocols placed on high-value health care services or prescription drugs, especially for historically underserved communities. Workstream members heard presentations on the tools that are available to state insurance regulators that can serve to lower such barriers to care.

Commissioner Birrane reported that the other three meetings focused on consumer engagement and education. The Workstream heard presentations and discussions from community-based providers, state based exchange marketplaces, independent navigator programs, and advocates. These presentations covered the deployment of various strategies and techniques to identify and engage certain systematically disadvantaged and historically underserved and underrepresented populations to connect them to coverage. The presentations also addressed the continuity of assistance that certain enrollees require to better use their coverage and to ultimately retain their coverage.

The objective from the seven sessions was to take the information gathered and lessons learned from each presentation and develop a resource for state insurance regulators that presents potential tools and strategies to address and remove the barriers to accessing and using health insurance for historically disadvantaged populations at the community and micro-community level.

This deliverable is underway. Per the NAIC's strategic goals, the Health Workstream plans to make the information and materials that it captured on removing barriers to health insurance for historically disadvantaged communities available to the NAIC Membership in a SharePoint space similar to what the NAIC has developed for Climate Risk and Resiliency and International Engagement. The thought is that a SharePoint site would be a living resource for state insurance regulators, and content and other tools will continue to be added to the site. This site

could also serve as a platform for discussion and conversations related to health equity, among other things. The plan is to launch the site this year, starting with last year's information and grow from there.

In addition to that deliverable, the Workstream is considering its future work plan and the initiatives that may be taken up in 2023.

The Health Workstream will meet in regulator-only session to consider its activities and initiatives for 2023, which may include, among other things: 1) the continuation of its education on benefit design relating to specific areas of focus, such as preventative care and mental health coverage (beyond pure parity); 2) exploring the practical considerations for adjusting one's benchmark plan under the relatively new federal Centers for Medicare & Medicaid Services (CMS) process and guidance from states that have done that; 3) the evolution of 1033 waivers and state activity focusing on and targeting specific issues in innovative ways intended to address health inequity; and 4) working with the Health Insurance and Managed Care (B) Committee and the Big Data and Artificial Intelligence (H) Working Group to look at doing a survey on the use of artificial intelligence (AI) with respect to health insurance.

#### 5. Heard an Update on the Member Diversity Leadership Forum

Evelyn Boswell, NAIC Director of Diversity, Equity & Inclusion, provided an update on the Member Diversity Leadership Forum. The Forum meets quarterly, with a designated leader from each jurisdiction, sharing information and best practices. In addition to the Forum, the NAIC has started DE&I leadership breakfast meetings at national meetings and created DE&I coursework for state insurance regulators. Rodney Hugle, Assistant Director of Financial Standards & Examination, Kentucky Department of Insurance (DOI), provided information regarding the Member Diversity Leadership Forum and sharing DE&I best practices across territories, and he read the positive comments about the regulator coursework. The coursework program, Foundations of Diversity, Equity and Inclusion for Regulators, was piloted in February 2023 and is now available to all state insurance regulators through the NAIC Education and Training Department.

Mr. Hugle reported that as of March 15, 66 state insurance regulators have registered for the Foundations of Diversity, Equity and Inclusion for Regulators course, which currently has a rating of 4.5 out of 5. Mr. Hugle said the Member Diversity Leadership Forum is great for sharing DE&I best practices across states. He talked about the Kentucky DOI's internship program, developed under Commissioner Clark's leadership and in partnership with Kentucky State University, a historically black land-grant university. Other Kentucky executive branch agencies are using the program, which has expanded to include the University of Kentucky and the University of Louisville.

Commissioner Humphreys shared that the Pennsylvania Insurance Department's diversity council participated in the NAIC's Foundations of Diversity, Equity and Inclusion for Regulators and had positive feedback. He now plans to roll it out more broadly across the Department—not mandating it, but creating incentives for the Department's bureaus with the greatest participation.

Ms. Boswell went on to share next steps. The next Member Diversity Leadership Forum meeting is scheduled for April 24, with Ohio presenting its best practices. On June 8 in Kansas City, MO, is the NAIC's 3<sup>rd</sup> Annual DE&I Conference, "Awareness in Action." The conference is invitation only, and the NAIC will pay for one regulator from each jurisdiction to attend.

Having no further business, the Special (EX) Committee on Race and Insurance adjourned.

SharePoint/NAIC Support Staff Hub/Committees

Draft: 4/3/23

Life Insurance and Annuities (A) Committee  
Louisville, Kentucky  
March 23, 2023

The Life Insurance and Annuities (A) Committee met in Louisville, KY, March 23, 2023. The following Committee members participated: Judith L. French, Chair (OH); Carter Lawrence, Vice Chair (TN); Mark Fowler (AL); Barbara D. Richardson (AZ); Karima M. Woods represented by Philip Barlow (DC); Doug Ommen (IA); Vicki Schmidt (KS); James J. Donelon (LA); Eric Dunning (NE); Marlene Caride (NJ); Scott Kipper (NV); Adrienne A. Harris represented by Mona Bhalla (NY); Glen Mulready (OK); Scott A. White represented by Don Beatty and Craig Chupp (VA); and Nathan Houdek (WI). Also participating was: Rachel Hemphill (TX).

1. Adopted its Feb. 24 Minutes

Director French said the Committee met Feb. 24 and took the following action: 1) adopted its 2022 Fall National Meeting minutes; 2) adopted revisions to *Actuarial Guideline XLIX-A—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest to Policies Sold on or After December 14, 2020* (AG 49A); and 3) adopted *Actuarial Guideline LIV—Nonforfeiture Requirements for Index-Linked Variable Annuity Products* (AG 54).

Commissioner Caride made a motion, seconded by Director Dunning, to adopt the Committee's Feb. 24 minutes (Attachment One). The motion passed unanimously.

2. Adopted the Report of Life Actuarial (A) Task Force

Hemphill said the Life Actuarial (A) Task Force met Mar. 20–21 at the Spring National Meeting. She said the Task Force had a robust discussion of the impacts of a rising interest rate environment, including hearing from the Society of Actuaries (SOA) on relevant actuarial research, as well as hearing from company actuaries regarding their sensitivity testing and ongoing monitoring of the appropriateness of their assumptions, including dynamic lapse behavior.

Hemphill said the Task Force re-exposed an amendment proposal form (APF) to shorten the time lag in Valuation Manual (VM)-50/VM-51 mortality experience reporting from two years to one year. She explained that this change will require a transitional year in which companies submit two years of mortality experience data, but then it will allow for more timely analysis and reporting of mortality experience and the development of mortality tables. She said the industry supports these efforts, but there may be a need for additional flexibility in the reporting deadlines in the first year or two as companies adjust their processes to the new reporting timeline.

Hemphill reported that the Task Force continued discussion on the work to develop a replacement economic scenario generator, including hearing an update on the activities of the Economic Scenario Generator Governance Drafting Group and the Economic Scenario Generator Technical Drafting Group and hearing a presentation from NAIC staff on quantitative results from the Economic Scenario Generator field test.

Commissioner Lawrence made a motion, seconded by Director Chupp, to adopt the report of the Life Actuarial (A) Task Force. The motion passed unanimously.

### 3. Adopted the Report of the Accelerated Underwriting (A) Working Group

Commissioner Houdek said the Accelerated Underwriting (A) Working Group met Feb. 22 and took the following action: 1) exposed the draft regulatory guidance for accelerated underwriting (AU) in life insurance for a 45-day public comment period ending April 15; and 2) exposed the draft referral to the Market Conduct Examination Guidelines (D) Working Group for a 30-day public comment period ending March 24.

Commissioner Lawrence made a motion, seconded by Commissioner Ommen, to adopt the report of the Accelerated Underwriting (A) Working Group, including its Feb. 22 minutes (Attachment Two). The motion passed unanimously.

### 4. Heard a Presentation from the ACLI and the SOA on the Current State of Life Insurance

Patrick C. Reeder (American Council of Life Insurers—ACLI) explained that the ACLI's chief economist and vice president of research, Andrew Melnyk, will be giving a high-level presentation focused solely on life insurance and not the other products that life insurers sell. He said that Dale Hall, managing director of research at the SOA Research Institute, will give the second part of the presentation, focusing on mortality trends.

Melnyk discussed a number of slides illustrating the changes in life insurance over time from a variety of vantage points. His first slide showed annual percentage changes in life insurance death benefits paid from 1910 to 2021 to illustrate how the last few years of the COVID-19 pandemic fit into the historical context. He said between 1920 and 2021, the greatest percentage increases occurred in 1918, which saw a 40% increase, followed by 1926, with a 15.3% increase. Next was 2020, which saw a 15.4% increase, and 2021, which saw a 10.8% increase. The next slide illustrated life insurance death benefits paid over time between 1880 and 2021 in dollars, adjusted for inflation. He said the graph shows increases in the actual amounts paid over time, with a steep, significant jump in the amount paid over the last two years. He said this illustrates why the life insurance industry is important and that it has been consistently meeting its obligations.

Melnyk said the next slide shows annual life insurer risk-based capital (RBC) ratios between 2018 and 2021. He said the average RBC ratio in 2020 was 428%. In 2021, it was 443%, which is a bit better than the average in 2018, when it was 424%. He said the percentage of companies with RBC greater than 200% (by assets) in those four years also has remained relatively constant. There are less than 1% of companies with RBC below 200%, which illustrates the strength of the life insurance industry.

Melnyk said the next slide compares individual and group life insurance purchases between 1985 and 2021. He said the graph shows a steady increase in individual life insurance purchases over time. He said there was a slight dip in group purchases between 2019 and 2021 during the COVID-19 years, which can be attributed, at least in part, to the erratic labor market and unprecedented unemployment due to stay-at-home orders. He said that individuals continue to purchase life insurance, and he anticipates a continuing increase in individual purchases. He said that in looking back in history, there was unprecedented growth in the life insurance market in the years following the 1918 pandemic. He said between 1917 and 1926, the dollar amount of in-force life insurance more than doubled. He said that there were other factors involved at the time, like World War I and an exploding economy, but he said he thought that the industry might experience an increase coming out of COVID-19, just to a lesser degree. He said there seems to have been an increase in demand for life insurance during the last few years, but that may be short-lived. He said the Life Insurance Marketing and Research Association (LIMRA) has looked into this and anticipates things will return to a more normal level.

Melnyk discussed the next slide showing a graph of life insurance as a percentage of gross domestic product (GDP) from 1945 to 2021. He said the graph strips away price and premiums and shows mortality and the savings component of life insurance in relation to the economy as a whole. He explained that the graph shows that life

insurance, as a percentage of GDP, was on an upward trend throughout most of the World War II era, but since the mid-1990s, it has started to fall. He said that he does not have an explanation for this trend, and it is something that requires much more study, but it suggests society is underinsured.

The last slide graphs the percentage of families reporting any life insurance coverage between 1968 and 2019, based on data from the U.S. Federal Reserve *Survey of Consumer Finances* (SCF), which is an extensive survey of household finances. He said this graph shows that the percentage of families self-reporting any life insurance coverage at all has steadily declined, from a high of 85.4% of families reporting life insurance coverage in 1971, to a low of 59.4% of families in 2019. He said once more current data is available, it will be seen if the pandemic had any effect on these numbers.

Reeder pointed out that the ACLI *Life Insurers Fact Book* was the resource for much of the data provided in the presentation. He said it contains a great deal of information about the life insurance industry and is available on the ACLI's website. He said that the data in the first few slides of the presentation shows that state insurance regulation works and that the industry provides an important resource for consumers. He said that while the last couple of slides show a decline, the ACLI is looking into the reasons for that decline and how to remedy that, which involves delving into questions of race and insurance and how to break down barriers to access, particularly in underserved communities. He said that the ACLI is researching how technology may decrease barriers and increase access in underserved communities.

Hall said, in his presentation, he would make some observations about mortality and discuss how those population trends relate to insured mortality based on reviewed historical U.S. population mortality data from the Centers for Disease Control and Prevention (CDC). He said since 1999, there have been reasonably strong mortality improvements in the U.S., with the strongest improvements in the first 10 years of this century. After that, between 2010 to 2019, mortality continued to improve but at a slower pace. In 2019, the population mortality rate was 715 deaths per 100,000. He said there was a 16.8% increase in 2020 (4.9% with COVID-19 removed) with age-adjusted rates at 835 deaths per 100,000. He said mortality increased again in 2021 by another 5.3%, with 880 deaths per 100,000, which is the same mortality rate as in 1999. Hall said we are awaiting fourth-quarter 2022 data, but the full year is looking like it is down from 2021, which is close to results for 2020. Hall said that population life expectancy is one statistic that can be used to compare where trends are over time.

Hall reviewed the next slide showing changes in mortality rates by cause of death. Hall said heart disease has increased as a cause of death in the population after many years of downward trends, and mortality due to cancer increased for the first time in 22 years. Hall pointed out that there was a large increase in mortality due to chronic conditions such as diabetes, liver disease, and hypertension. Hall said that many of these may be the result of people putting off care during the pandemic and hopefully will improve as people return to normal. Hall discussed the chart comparing the relationship between population mortality trends to group life and individual life trends. Historically, insured mortality is 30%–50% of what happens in the population, and this seems to have held true during the pandemic. He showed a slide illustrating actual to expected mortality trends in the insured market compared with actual and expected mortality trends in the population. He said some of the largest actual to expected ratios occurred during the delta and omicron variants in late 2021. He said data for the second quarter of 2022 shows the ratio of actual to expected claims below 100% for the first time since the start of the pandemic, and there may be some indication, based on third- and fourth-quarter data from 2022, that things are slowly getting back to a more normal actual to expected ratio. Hall explained that his final slide shows ratios of individual life insurance claims during 2020–2022 compared to 2017–2019. He said the largest individual life mortalities were in the third or fourth quarter of 2021 and started to come down in 2022.

Commissioner Lawrence asked about the ACLI slide that showed a 25% decline in the percentage of households reporting life insurance coverage from the high in 1971 to the low in 2019. He wondered whether there was any information available that would show the demographic distribution of the decline, such as the differences by

geographical area or socioeconomic sector. Melnyk said they had not looked into that data very deeply and did not have that information. Commissioner Mulready said that a 25% decline in coverage and a 25% increase in death rates is concerning for the industry. Reeder said that this was a large reason why the ACLI is spending a lot of time making sure it accesses consumers and identifies what has changed to cause the decline. He said that the ACLI does not have the socioeconomic and demographic information related to data that comes from the federal government. He said that there have been a lot of changes in family structure over time, and the insurance industry has to learn to innovate. He said that the industry has to be more deliberate in its efforts to reach underrepresented communities and that it must make sure barriers come down and engagement is fostered in the industry at every level.

Commissioner Mulready said he heard a report of a 40% increase in deaths and another report recently about an increase in heart attacks in young people. He asked if there was any information about the average age of death. Reeder said the ACLI saw that reporting, and the thinking is that the reporting was based on early SOA research that was not fully understood by those reporting on it as far as the trending. Hall said that there are many ways to look at group life data, such as by occupation code or areas of the country. He said another important way to study excess mortality is by looking at different age bands. Hall said some of the overall pandemic results show a 30% increase in excess mortality, and some of that was concentrated in some of the younger working ages. He cautioned, however, that the mortality rates for younger age groups are already quite low, so when excess deaths are added on to what is already a small number, the percentages get higher. Hall said that in the group insurance market, it is important for insurers to consider demographic data in order to make the right assessment of the risks associated with a particular group. He said, for example, that insurers should consider the potential impact of retired lives that might be part of the group, or how much of the group is the working population, and that different occupation codes have different exposures, especially during a pandemic.

Commissioner Donelon said that he was in Tokyo about 10 years ago for a meeting about the much higher take-up rate per capita of life insurance in Japan than in the U.S. but that Europeans owned much less life insurance. He said if this is still the case, it might indicate that cultural factors are the driver of whether someone purchases insurance. Melnyk said that he is not aware that the statistics have changed and thinks there are many variables that affect the demand for life insurance. He said cultural factors are variables to be considered. He said he knows that, for example, in Japan, it is not uncommon for a person to purchase a whole life insurance policy as soon as they graduate from college. He said that saving is also much more common in the culture, so that may have something to do with it as well.

Birny Birnbaum (Center for Economic Justice—CEJ) said the ACLI *Life Insurers Fact Book* contains some interesting information that could complement the presentation. He said in 1955, the U.S. population was around 165 million people, and there were 22 million individual life insurance policies in force. He said in 2021, the population had doubled, but there were only 10 million individual insurance policies in force. He said the number of group certificates during that same time frame went up from 2.2 million to more than 25 million, but that is still less than what was in force for group policies in 2004. Birnbaum said these statistics illustrate that insurance companies are marketing their products more as investments than death protection and focusing more on affluent consumers and higher face amount policies.

Birnbaum said another piece of information that gets at the issue of underserved communities is the difference in life expectancy by income and by race. He said there is a widening gap in life expectancy based on income and that communities are underserved, not because of changing needs for life insurance, but because producers are not serving them. He said that these factors need to be considered when thinking about how to address insurance for the underserved. He said that insurance companies recognize these trends, so the question is how to get involved with more loss prevention and loss mitigation to make risky policies less risky and more attractive for insurance companies to write. Brendan Bridgeland (Center for Insurance Research—CIR) asked if there have been any comparisons of product offerings and innovations and the decline in household life insurance ownership. He

asked whether there has been a focus on using life insurance products as investment planning for high-net-worth individuals at the same time as a decline in sales to lower and moderate-income families.

Reeder said that since 1955, there has been an increase in group life insurance, which is a part of the socioeconomic changes during which insurance became more readily accessible through the workplace. The ACLI agrees with Birnbaum and Bridgeland and wants to bring products to the consumers who need them. He said if the industry is not thoughtful about increasing access, it will continue to struggle, which is why they are putting time and energy into programs and initiatives to decrease barriers to producer licensing and being thoughtful as an industry. He said that Birnbaum and Bridgeland raise valid concerns, and they are the types of things the ACLI is looking at. Melnyk said that the ACLI has not done a study like Bridgeland suggested of product offerings. He said there have been some observations looking at ownership patterns in underserved communities, and there is some indication that ownership peaks at later ages. Still, there has not been a lot of research done beyond that.

Director Richardson said that around five years ago, she heard that the average age of a life insurance producer was approximately 57 years old. She wondered if that was still true or if the industry had found a way to reach a younger and more diverse group. Reeder said that is still the case and that the industry recognizes the need to bring new people into the industry, not just as producers, but in every aspect of the industry. Reeder said he would provide some follow-up information about the industry efforts in this area.

Brenda J. Cude (University of Georgia) said that the graph showing the percentage of families reporting any life insurance comes from data from the SCF, which notoriously does not do a good job of asking life insurance questions. She said one example is a question regarding health insurance. The question asks if a person has health insurance; if they do not, it asks why. She said there is no parallel question for life insurance. She also said the survey asks about term and whole life insurance, but it is possible that a person has universal life or coverage through an employer and may answer no. She said if there was a desire to make suggestions to the Federal Reserve Board (FRB) regarding ways to improve the questions they ask about life insurance in the SCF, she would be available to assist with that project. She said she knows many researchers who would value that. Melnyk said this was a comprehensive survey, but the depth could be better, so to the extent that the NAIC would want to work with the FRB to improve the survey, it would be willing to help. He also mentioned that the ACLI uses a proprietary database to confirm the information from the SCF and has found that the information generally matches. Birnbaum suggested that some of the granular data that the NAIC collects could be repurposed to inform some of the questions and research that was talked about.

## 5. Discussed Other Matters

Director French recognized Peter G. Gallanis' retirement as president of the National Organization of Life and Health Insurance Guaranty Associations (NOLHGA) with the following resolution:

WHEREAS, Peter G. Gallanis has served as President of the National Organization of Life and Health Insurance Guaranty Associations ("NOLHGA") since 1999 and, prior to that, served as the Special Deputy Insurance Receiver for the State of Illinois; and

WHEREAS, Peter has been a longtime friend and supporter of the NAIC, working with Insurance Commissioners and NAIC Task Forces and Working Groups on a host of issues relating to troubled company resolution; and

WHEREAS, Peter has worked tirelessly to protect consumers of insolvent life and health insurance companies and to support the national state-based guaranty system, including by speaking and testifying on insurance matters before a number of courts, state legislatures, Congress, the NAIC, the IAIS, and the FSB; and

WHEREAS, Peter’s dedication to the guaranty system has taken him around the world, from Canada to Switzerland to Taiwan to Thailand and to state capitals across the country, not to mention his beloved Chicago.

THEREFORE, BE IT RESOLVED, that the Life Insurance and Annuities (A) Committee wishes to express its heartfelt gratitude to Peter G. Gallanis, on the occasion of his retirement as President of NOLHGA, for more than three decades of service to state regulators, the guaranty system, and the consumers they protect.

Having no further business, the Life Insurance and Annuities (A) Committee adjourned.

SharePoint/NAIC Support Staff Hub/Committees/A Committee/2023 Spring National Meeting/A\_Cmte\_SprNMeetingminfinal.docx

Draft: 3/8/23

Life Insurance and Annuities (A) Committee  
Virtual Meeting  
February 24, 2023

The Life Insurance and Annuities (A) Committee met Feb. 24, 2023. The following Committee members participated: Judith L. French, Chair, and Peter Weber (OH); Carter Lawrence, Vice Chair (TN); Mark Fowler (AL); Shane W. Foster (AZ); Karima M. Woods (DC); Doug Ommen (IA); Vicki Schmidt (KS); James J. Donelon (LA); Eric Dunning represented by Megan VanAusdall (NE); Marlene Caride (NJ); Nick Stosic (NV); Adrienne A. Harris represented by Mona Bhalla (NY); Scott A. White (VA); and Nathan Houdek (WI). Also participating were: Fred Andersen (MN); Glen Mulready (OK); and Rachel Hemphill (TX).

1. Adopted its 2022 Fall National Meeting Minutes

Commissioner Houdek made a motion, seconded by Commissioner Ommen, to adopt the Committee's Dec. 14, 2022, minutes (see *NAIC Proceedings – Fall 2022, Life Insurance and Annuities (A) Committee*). The motion passed unanimously.

2. Adopted the Revised AG 49-A

Hemphill explained that the Life Actuarial Task Force adopted edits to *Actuarial Guideline XLIX-A—The Application of the Life Illustrations Model Regulation to Policies with Index-based Interest Sold on or after December 14, 2020* (AG 49-A), effective May 1, 2023, to address an issue in indexed universal life (IUL) illustrations where some companies are illustrating non-benchmark indices in a more favorable manner than benchmark indices, particularly for products with uncapped volatility-controlled funds and a fixed bonus. These “quick fix” edits address a pressing issue in current practice, while the Indexed Universal Life (IUL) Illustration (A) Subgroup continues to discuss longer-term larger-scale improvements.

Andersen clarified that the revisions to AG 49-A are proposed to be effective for illustrations of policies that are sold on or after May 1, 2023. He said the term “sold” has been used in the past, is the term in the current guideline, and has not presented a problem.

Birny Birnbaum (Center for Economic Justice—CEJ) said that the term “sold” is still unclear and would allow for the continued use of illustrations that have been determined to be deceptive and abusive well after May 1. He said not only will policies not be fully paid for until well after May 1, but also policies that were sold before May 1 will continue to be illustrated using the old methodology after May 1. He suggested that it would be easier to administer and more protective of consumers to prohibit the use of the illustrations after May 1. Birnbaum said that insurers would not be required to go back and re-do any illustrations; it would simply require companies to say that they are no longer going to be using the illustration methodology that is deceptive and that state insurance regulators have decided is not appropriate.

Andersen clarified that the revisions to AG 49-A arose out of a concern that there should be a level playing field between the illustrations of benchmark indices and non-benchmark indices, rather than the determination that the illustrations were misleading, per se. Birnbaum said that even if state insurance regulators have not explicitly said the illustrations were misleading, the fact that the guideline has been revised twice is an implicit acknowledgment that insurers have continued to use product design to game the illustration guideline.

Director French said she appreciates Birnbaum sharing his point of view. She reiterated that these changes were just a first step, more work was ongoing, and that “sold” was the term used in the original guideline. Director French said that the revisions to AG 49-A are an example of state insurance regulators trying to get ahead of any actions that could be misleading. She said state insurance regulators also have market conduct exams as a tool available to address any activities that are in fact misleading to consumers.

Commissioner White made a motion, seconded by Commissioner Donelon, to adopt the revisions to AG 49-A (see *NAIC Proceedings – Spring 2023, Executive (EX) Committee and Plenary, Attachment One*). The motion passed unanimously.

### 3. Adopted AG 54

Hemphill explained that the Life Actuarial (A) Task Force adopted *Actuarial Guideline LIV—Nonforfeiture Requirements for Index-linked Variable Annuity Products* (AG 54) addressing index-linked variable annuities (ILVAs), effective July 1, 2024. AG 54 provides principles outlining the conditions under which an ILVA is consistent with the definition of a variable annuity and exempt from the *Standard Nonforfeiture Law for Individual Deferred Annuities* (#805) and specifies nonforfeiture requirements consistent with variable annuities. The guideline promotes consistency while allowing for reasonable product variation, outlining that interim values should provide equitable treatment to the contract holder and the insurance company.

Weber said that this guideline is important because it ensures that consumers’ expectations are met in that gains will be realized when indices go up, not just that they will experience losses when the indices go down.

Commissioner White made a motion, seconded by VanAusdall, to adopt AG 54 (see *NAIC Proceedings – Spring 2023, Executive (EX) Committee and Plenary, Attachment Two*). The motion passed unanimously.

### 4. Discussed Other Matters

Director French said that there had been some discussions about using national meetings as an opportunity to have presentations of general interest to a wide audience. She asked anyone having any ideas for topics or areas of interest that the Committee might want to hear about to let her or Jennifer Cook (NAIC) know.

Having no further business, the Life Insurance and Annuities (A) Committee adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/A Cmte/2023 Spring National Meeting/2-24-2 ACmte min Draft

Draft: 3/13/23

Accelerated Underwriting (A) Working Group  
Virtual Meeting  
February 22, 2023

The Accelerated Underwriting (A) Working Group of the Life Insurance and Annuities (A) Committee met Feb. 22, 2023. The following Working Group members participated: Nathan Houdek, Chair and Lauren Van Buren (WI); Grace Arnold, Vice Chair, represented by Sarah Gillaspey (MN); Jason Lapham (CO); Russ Gibson (IA); Cynthia Amann (MO); Ross Hartley (ND); Megan VanAusdall (NE); Matthew Gendron (RI); and David Hippen (WA).

1. Exposed the Draft of an Accelerated Underwriting Guidance Document and Referral

Commissioner Houdek explained that he would chair the Working Group in 2023 along with Commissioner Grace Arnold (MN) as vice chair. He said that since the Working Group met last, a regulator-only drafting group has been working on developing guidance for regulators on accelerated underwriting. He explained that a draft Accelerated Underwriting Guidance Document (Attachment Two-A) along with a draft referral to the Market Conduct Examination Guidelines (D) Working Group (Attachment Two-B) were distributed prior to the call. Commissioner Houdek explained that the purpose of the virtual meeting today is to review these drafts and formally expose them for comment.

Gillaspey reviewed the draft guidance document and referral. She said the document begins with a brief explanation of NAIC process—that the Working Group was created in 2019 and drafted an educational paper that was adopted by the Life Insurance and Annuities (A) Committee in the Spring of 2022. She said the guidance keys off on a definition of accelerated underwriting that was the result of the presentations heard by the Working Group and the subsequent feedback that the Working Group received through drafting the educational paper. She explained that the guidance focuses on ensuring that life insurers utilize new technologies in ways that comply with existing laws. In addition to coordinating with other NAIC groups working on similar issues, the guidance recognizes that future efforts to develop additional regulations, model laws, data processes, and tools that apply to insurers, data, and vendors may be needed. Gillaspey explained that the guidance focuses on questions and considerations for Departments of Insurance (DOIs) as they review accelerated underwriting programs focusing on ensuring that accelerated underwriting programs are fair, transparent, and secure, and includes examples of questions and requests for information that DOIs may want to use. The goal is to create a useful working document for regulators.

Gillaspey said the Working Group also developed a referral to the Market Conduct Examination Guidelines (D) Working Group, asking them to consider adding some specific guidance to the *Market Regulation Handbook*. She said that the drafting group thought the *Market Regulation Handbook* (Handbook) was a logical place to house some of the knowledge that came out of the educational paper and would be useful to regulators during reviews involving accelerated underwriting programs. She explained that the additions to the Handbook would be based on the *Unfair Trade Practices Act* (#880) and would provide specific guidance to regulators regarding questions to ask life insurers and the types of documents they may want to review to ensure that accelerated underwriting programs are not unfairly discriminatory—that data is fair, data use is transparent, and data is secure. She said the Accelerated Underwriting (A) Working Group is happy to work with the Market Conduct Examination Guidelines (D) Working Group at any point as it considers this referral and any additions to the Handbook.

Birny Birnbaum (Center for Economic Justice—CEJ) asked whether the drafting group had considered making a referral to the Innovation, Cybersecurity, and Technology (H) Committee. He also asked why the drafting group thinks there is a need for additional regulations, models, processes, and tools if current regulations apply. Also,

regulators have broad authority to review accelerated underwriting programs in the same way as traditional underwriting programs and ensure they are not unfairly discriminatory. Gillaspey explained that the drafting group wanted to have as many useful tools as possible for regulators as they review these products, and the Handbook is a tool for that. She said that it makes sense to give examiners an idea of the kinds of questions to ask based on the information learned through the process of researching and drafting the educational report. Van Buren said that insurers are using accelerated underwriting programs currently, and regulators need the appropriate tools to ask about these practices. She said other groups are also looking at these issues and that there is a survey underway looking at accelerated underwriting in life insurance that will inform any future actions on this topic. Any revisions to the Handbook put out now will ensure that practices comply with existing law.

Birnbaum asked where existing laws fall short of necessitating additional regulations, model laws, data processes, and tools. Van Buren said that additional information will likely come from the other groups that are looking into this issue, as well as out of the survey that is underway. Miguel Romero (NAIC) mentioned that the Innovation, Cybersecurity, and Technology (H) Committee is aware of the ongoing work of this Working Group. Romero also explained that a referral to the Market Conduct Examination Guidelines (D) Working Group makes sense right now because there is an existing Handbook that can be revised to address the issue. On the other hand, while the Innovation, Cybersecurity, and Technology (H) Committee has work ongoing, there is no defined place to receive a referral.

Amann pointed out that the Innovation, Cybersecurity, and Technology (H) Committee is a newer Committee and did not exist when the Accelerated Underwriting (A) Working Group was created. She also explained that exam standards rely on having a model, but this issue is so prominent right now that these questions can help guide an examiner when they are doing an underwriting guideline review or looking at rate reviews. She said these questions help frame the kind of review an examiner would conduct.

Peter Kochenburger (University of Connecticut School of Law) said that the draft guidance document refers to prohibiting unfair discrimination but does not define it. He said there is a lot of debate about what “unfairly discriminatory” means, especially in the context of proxy discrimination. Van Buren explained that the guidance is based on state law, so what that term means is going to be consistent with the state’s laws that prohibit unfair discrimination. Birnbaum said that states differ in their understanding of unfair discrimination. In the context of life insurance, insurers have an unfortunate history of using certain occupations as a proxy for race. Whereas in property and casualty insurance, there is precedent for considering unfair discrimination to involve the violation of either actuarial standards or intentional use of race or other protective classes. He said unintentional discrimination or using a proxy for race in life insurance is unfair discrimination, and he does not understand why any state would not consider that to be unfair discrimination.

Commissioner Houdek proposed forwarding the referral to the Market Conduct Examination Guidelines (D) Working Group and exposing the draft guidance document for a formal 30-day comment period following this call. He said the plan is to have another open meeting to discuss any comments received before finalizing the guidance. Jennifer McAdam (American Council of Life Insurers—ACLI) said she was working on other responses to accelerated underwriting issues happening across the country and requested a longer comment period on the guidance document.

Commissioner Houdek agreed to expose the draft guidance document for a 45-day public comment period ending April 15.

Birnbaum requested a comment period for the referral since the guidance document references the referral, and any comments on the guidance document may implicate the referral. Commissioner Houdek agreed to expose

the referral to the Market Conduct Examination Guidelines (D) Working Group for a 30-day public comment period ending March 24.

Having no further business, the Accelerated Underwriting (A) Working Group adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/A Cmte /AUWG/AUWG min 2-23-23 final

**Draft January 25, 2023**

**Comments are requested by close of business Friday, April 14, 2023**

**Accelerated Underwriting (A) Working Group  
Ad Hoc Drafting Subgroup  
Regulatory Guidance and Considerations**

**Introduction**

The Accelerated Underwriting Working Group (AUWG) was created by the Life Insurance and Annuities (A) Committee at the NAIC 2019 Summer National Meeting. One of the original charges given to the Working Group was to “... consider the use of external data and data analytics in accelerated life underwriting, including consideration of the ongoing work of the Life Actuarial (A) Task Force on the issue and, if appropriate, drafting guidance for the states.”

A significant portion of the AUWG’s work over the last three years benefitted from a multitude of presentations from the life insurance industry, actuarial consulting firms, a machine learning assurance company, and consumer advocate groups. These presentations are summarized in an educational paper adopted by the Life Insurance and Annuities (A) Committee at the NAIC 2022 Spring National Meeting.

The AUWG’s analysis and recommendations for life insurers and regulators included in the educational paper are based on the following definition:

Accelerated underwriting (AU) is the use of big data, artificial intelligence, and machine learning to underwrite life insurance in an expedited manner. The process generally uses predictive models and machine learning algorithms to analyze applicant data, which may include the use of non-traditional, non-medical data, provided either by the applicant directly or obtained through external sources. The process is typically used to replace all or part of traditional underwriting in life insurance and to allow some applicants to have certain medical requirements waived, such as paramedical exams and fluid collection.

The educational paper includes recommendations for insurers and regulators designed to ensure new technologies are utilized by life insurers in ways that comply with existing insurance law. While existing insurance laws vary from state to state, the recommendations acknowledge that most states: 1) require life insurance underwriting to be based on expected losses and expenses; 2) require insurers that collect consumer data to maintain that data in secure systems; and 3) prohibit unfair discrimination in insurance underwriting.

Below, the AUWG presents regulatory guidance for State Departments of Insurance (DOIs) when reviewing accelerated underwriting programs used by life insurers. The regulatory guidance expounds on the recommendations the AUWG made in its educational paper and provides sample questions and areas for review for DOIs.

Also, the AUWG is making a referral to the **Market Conduct Examination Guidelines (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee** with suggested additions to the NAIC’s *Market Regulation Handbook* (MRH) (Attachment A). The AUWG has concluded that it

would be beneficial to include additional guidance in the NAIC’s MRH that addresses questions involving accelerated underwriting in life insurance.

Finally, the AUWG understands that there are other NAIC groups working on similar or overlapping issues related to accelerated underwriting. The AUWG plans to coordinate with the following groups:

- **The Big Data and Artificial Intelligence (H) Working Group under the Innovation, Cybersecurity and Technology (H) Committee.**

The Big Data and Artificial Intelligence (H) (BDAI) Working Group has three charges:

- A. Research the use of big data and artificial intelligence (AI) including machine learning (ML) in the business of insurance, and evaluate existing regulatory frameworks for overseeing and monitoring their use. Present findings and recommendations to the Innovation, Cybersecurity, and Technology (H) Committee including potential recommendations for development of model governance for the use of big data and AI including ML for the insurance industry.
- B. Review current audit and certification programs and/or frameworks that could be used to oversee insurers’ use of consumer and non-insurance data and models using intelligent algorithms including AI and in alignment with the NAIC AI Principles. If appropriate, issue recommendations and coordinate with the appropriate SME committees on the development of or modifications to model laws, regulations, handbooks, and regulatory guidance regarding data analysis, marketing, rating, underwriting and claims, regulation of data and model vendors, regulatory reporting requirements, and consumer disclosure requirements.
- C. Assess data and regulatory tools needed for state insurance regulators to appropriately monitor the marketplace, and evaluate the use of big data, algorithms, and ML, including AI/ML in underwriting, rating, claims, and marketing practices This assessment shall include a review of currently available data and tools, as well as recommendations for development of additional data and tools, as appropriate. Based on this assessment, propose a means to include these tools in existing and/or new regulatory oversight and monitoring processes to promote consistent oversight and monitoring efforts across state insurance departments.

To achieve its charges, the BDAI Working Group formed 4 Workstreams:

- **Workstream 1** – focused on surveys of the industry related to their use of AI/ML systems. The survey of the life insurance industry has been piloted with a select few life insurers and the survey is in the final stages of revision and is expected to be sent to all life insurers in first quarter 2023.
- **Workstream 2** - focused on the appropriate regulatory evaluation to produce a recommended regulatory framework for monitoring and overseeing industry’s use of third-party data and model vendors.
- **Workstream 3** – focused on gathering data and evaluating information from sources, including vendors, academics, industry, international supervisory authorities, on governance models/frameworks and software tools/resources, which could assist regulators in overseeing and monitoring industry’s use of data and AI/ML and eliminate unintended bias in such use.
- **Workstream 4** – focused on evaluating how best to implement the expectations outlined in the *NAIC’s Principles on Artificial Intelligence* and provide suggestions on next steps, which could include regulatory guidance or development of a model regulation and report back to the working group and ultimately the H Committee.

In addition, it is clear to the AUWG that additional regulations, model laws, data, processes, and tools are needed for DOIs to appropriately monitor the use of accelerated underwriting programs used by life insurers. Such additional regulations, model laws, data, processes, and tools should include regulating data and vendors that provide external consumer non-traditional, non-medical data and predictive models to insurers. In addition, they should mandate consumer disclosures related to insurers' use of such data in models using ML algorithms. The AUWG recommends that the Innovation Cybersecurity and Technology (H) Committee include the consideration of these potential regulations, models laws, data processes, and tools as part of its Committee's work.

The AUWG also believes that its work, including the regulatory guidance below and the referral to the Market Conduct Examination Guidelines (D) Working Group, may be useful to the Workstreams under the Big Data and Artificial Intelligence (H) Working Group.

In addition, the AUWG understands that any work that is completed by the Workstreams under the BDAI Working Group may be useful to incorporate into the regulatory guidance below along with any potential standard(s) developed by the Market Conduct Examination Guidelines (D) Working Group related to accelerated underwriting in life insurance.

- **The Privacy Protections (H) Working Group under the Innovation, Cybersecurity and Technology (H) Committee**

The Privacy Protections (H) Working Group is working on replacing the NAIC's Insurance Information and Privacy Protection Model Act (#670) and the Privacy of Consumer Financial and Health Information Regulation (#672) with one new model. Although this group is addressing a unique set of issues, it will require coordination, especially with regard to definitions.

## **Regulatory Guidance**

Following the adoption of the educational paper, the AUWG continued its work on the second part of its charge: drafting a guidance document for DOIs to use when reviewing accelerated underwriting programs used by life insurers to ensure the programs are fair, transparent, and secure in compliance with existing law.

Making sure that the use of accelerated underwriting is fair to consumers is important because its use impacts both the availability and affordability of life insurance to consumers. Ensuring that insurers use accelerated underwriting in a transparent manner is important because consumers should understand what personal data is being accessed by insurers and how that data is being used. Lastly, insurers accessing sensitive consumer data have a duty to secure that data to protect consumers from the harm of unauthorized disclosure.

The AUWG developed the following regulatory considerations for DOIs when reviewing a life insurer's use of accelerated underwriting programs:

- Data inputs are transparent, accurate, reliable, and the data itself is evaluated for unfair bias.

- External data sources, algorithms or predictive models are based on sound actuarial principles, including a causal or rational explanation why a rating variable is correlated to expected loss or expense, and why that correlation is consistent with the expected direction of the relationship.<sup>1</sup>
- Predictive models or machine learning algorithm(s) within accelerated underwriting accurately assess and price risk.
- Predictive models or machine learning algorithm(s) achieve an outcome that is not unfairly discriminatory.
- Reason(s) for an adverse underwriting decision are provided to the consumer along with all information upon which the insurer based its adverse underwriting decision.
- The insurer establishes and follows procedures to protect the consumer’s privacy and the consumer’s data.
- The insurer has a mechanism in place to correct mistakes if found in consumer data.
- The insurer will produce information upon request as part of regular filing submission reviews or market conduct examinations.
- The insurer has procedures in place to address the following requirements pertaining to the consumer: Notice Requirements, Opting-Out of Data Sharing, Correcting or Deleting Information, Data Portability, and Restricting the use of Data.

Using these regulatory expectations as a baseline for review, DOIs may:

- Review a life insurer’s initial submission of policy filings to confirm the proper use of data elements.
- Request a life insurer provide and/or file accelerated underwriting data sources, predictive models, and algorithms and/or summaries for analysis.
- Request a life insurer provide additional information and/or explanation about how a particular predictive model or machine learning algorithm is used in an accelerated underwriting program.
- Request a life insurer provide information about source data used as part of its accelerated underwriting programs regardless of whether the data or score is provided by a third party.
- Request a life insurer provide information about its auditing of data sets, predictive models, and machine learning algorithms to ensure they are accurate, reliable, and do not result in unfairly discriminatory outcomes.

The following are examples of questions and requests for information DOIs may want to submit to life insurers when reviewing AU programs:

- What specific external data or information about life insurance applicants is being utilized by the accelerated underwriting program?
- How does the company obtain any external data or information used as part of its life insurance accelerated underwriting program?
- Explain in detail how the company discloses to applicants for life insurance what external information is used in its accelerated underwriting program and how this external information is used in the accelerated underwriting program.

---

<sup>1</sup> For clarity and consistency, this bullet borrows language from the Casualty Actuarial and Statistical (C) Task Force *Regulatory Review of Predictive Models White Paper* to describe this concept, replacing the language from the Accelerated Underwriting Educational Paper recommendation, which said: “External data sources, algorithms or predictive models are based on sound actuarial principles, including a valid explanation or rationale for any claimed correlation or causal connection.”

- Ask for a copy of all company disclosures provided to applicants regarding the company's accelerated underwriting program.
- What process or recourse does the company provide to applicants for life insurance should they receive an adverse underwriting decision?
- What process or recourse does the company provide to applicants for life insurance to correct mistakes in the external data or information?
- How is external data or information about life applicants utilized, stored, and destroyed after the completion of the underwriting process?
- How does the company audit data sets, predictive models, and machine learning algorithms to ensure accuracy, reliability, and outcomes insurance that are not unfairly discriminatory?
- How often does the company perform audits?
- Does the company perform audits internally or does it utilize a third-party to perform independent audits?
- Has the company modified its predictive models or machine learning algorithms, or the data sets used by the models and algorithms, as a result of an audit? If so, what modifications were made and why?
- Ask the company to provide a copy of audit results.
- How does the company ensure that the model(s) it uses are based on sound actuarial principles?
- How does the company address potential unfair discrimination by ensuring that external consumer data's correlation to risk is not outweighed by any correlation to a protected class(es).

The AUWG offers this guidance to the state DOIs for consideration, while recognizing that there is more work to come. The AUWG anticipates that the work of the other NAIC groups on this topic, including the referral to the Market Conduct Examination Guidelines (D) Working Group and the results of the BDAI Working Group Workstream 1 life insurance survey will lead to additional guidance regarding accelerated underwriting in life insurance.

Draft 1-11-23

Comments are requested by close of business Friday, March 24, 2023

### MEMORANDUM

TO: **Market Conduct Examination Guidelines (D) Working Group** of the Market Regulation and Consumer Affairs (D) Committee

FROM: Accelerated Underwriting (A) Working Group of the Life Insurance and Annuities (A) Committee

DATE: January ?, 2023

RE: Suggested additions to the NAIC's *Market Regulation Handbook* addressing accelerated underwriting in life insurance

---

The Accelerated Underwriting Working Group (AUWG) was created by the Life Insurance and Annuities (A) Committee at the NAIC 2019 Summer National Meeting to "... consider the use of external data and data analytics in accelerated life underwriting, including consideration of the ongoing work of the Life Actuarial (A) Task Force on the issue and, if appropriate, drafting guidance for the states."

The AUWG drafted an education paper that was adopted by the Life Insurance and Annuities (A) Committee on April 7, 2022. The AUWG continues its work to draft guidance for the states reviewing life insurers' use of accelerated underwriting. As part of that work, the AUWG makes this referral to the Market Conduct Examination Guidelines (D) Working Group to include additional guidance in the NAIC's *Market Regulation Handbook* (MRH) that will address questions involving accelerated underwriting in life insurance. The AUWG believes that adding additional explanation and review criteria about accelerated underwriting in the MRH is necessary to alert the market conduct examiner to the novel data and processes utilized by life insurers in accelerated underwriting.

Existing regulations apply to accelerated underwriting programs in the same way as traditional underwriting programs. DOIs have broad authority to examine the processes and procedures of life insurers to determine if their accelerated underwriting programs comply with the statutes and regulations of the department, in particular the state equivalent to the *Unfair Trade Practices Act* (#880)<sup>1</sup>, to ensure that these accelerated underwriting programs are not unfairly discriminatory.

The AUWG recommends that a new standard be included in Chapter 23 – Conducting the Life and Annuity Examination related to a life insurer's use of big data, artificial intelligence, and machine learning to underwrite life insurance. The applicable standard should address how accelerated underwriting programs used by life insurers are fair, transparent, and secure. The types of documents to be reviewed by examiners should include policy rates and forms, accelerated underwriting models and/or summaries of those models, information about source data used as part of the accelerated underwriting program, consumer disclosures, and testing and/or auditing policies and procedures of the models.

---

<sup>1</sup> See Section 4G(1) Unfair Discrimination. Making or permitting any unfair discrimination between individuals of the same class and equal expectation of life in the rates charged for any life insurance policy or annuity or in the dividends or other benefits payable thereon, or in any other of the terms and conditions of such policy.

Review procedures and criteria should include the following:

- Ensure data is fair. Determine if the company has policies in place for and regularly performs audits of its data sets, predictive models, and machine learning algorithms to ensure data inputs are accurate and reliable, and do not result in unfairly discriminatory outcomes. Determine if the predictive model(s) and machine learning algorithms are based on sound actuarial principles.
- Ensure data use is transparent. Determine if the company discloses to applicants for life insurance the external information used in its accelerated underwriting program and how that external information is used in the accelerated underwriting program. Determine if the company provides a process or recourse to applicants for life insurance if they receive an adverse underwriting decision. Determine if the company provides applicants for life insurance an opportunity to correct mistakes in external data or information used in the accelerated underwriting program.
- Ensure data is secure. Determine how external data or information about life insurance applicants is utilized, stored, and destroyed by the company after the completion of the underwriting process.

The AUWG defers to the Market Conduct Examination Guidelines (D) Working Group regarding whether any updates to the MRH should be made to the chapter pertaining to life insurance as recommended above, or should be included in a chapter that deals specifically with the use of big data, algorithms, and machine learning by insurers generally. The AUWG looks forward to working with the Market Conduct Examination Guidelines (D) Working Group to draft the recommended changes to the MRH.

Draft: 4/10/23

Life Actuarial (A) Task Force  
Louisville, Kentucky  
March 20–21, 2023

The Life Actuarial (A) Task Force met in Louisville, KY, March 20–21, 2023. The following Task Force members participated: Cassie Brown, Chair, represented by Rachel Hemphill (TX); Scott A. White, Vice Chair, represented by Craig Chupp (VA); Lori K. Wing-Heier represented by Sharon Comstock (AK); Mark Fowler represented by Sanjeev Chaudhuri (AL); Ricardo Lara represented by Ahmad Kamil and Ted Chang (CA); Andrew N. Mais represented by Wanchin Chou (CT); Doug Ommen represented by Mike Yanacheak (IA); Dana Popish Severinghaus represented by Vincent Tsang and Bruce Sartain (IL); Amy L. Beard represented by Scott Shover (IN); Vicki Schmidt represented by Nicole Boyd (KS); Timothy N. Schott represented by Marti Hooper (ME); Grace Arnold represented by Fred Andersen and Ben Slutsker (MN); Chlora Lindley-Myers represented by William Leung (MO); Eric Dunning represented by Michael Muldoon (NE); Marlene Caride represented by Seong-min Eom (NJ); Adrienne A. Harris represented by Bill Carmello (NY); Judith L. French represented by Peter Weber (OH); Glen Mulready represented by Andrew Schallhorn (OK); Michael Humphreys represented by Steve Boston (PA); and Jon Pike represented by Tomasz Serbinowski (UT).

1. Adopted its March 2, Feb. 23, Feb. 2, and Jan. 26 Minutes and the Reports of the Variable Annuities Capital and Reserve (E/A) Subgroup, the Longevity Risk (E/A) Subgroup, the Indexed Universal Life (IUL) Illustration (A) Subgroup, and the Index-Linked Variable Annuity (A) Subgroup.

The Task Force met March 2, Feb. 23, Feb. 2, and Jan. 26. During these meetings, the Task Force took the following action: 1) exposed referrals received from the Valuation of Securities (E) Task Force; 2) exposed a Valuation Manual (VM)-20, Requirements for Principle-Based Reserves for Life Products/VM-21, Requirements for Principle-Based Reserves for Variable Annuities, Economic Scenario Generator Technical Drafting Group topics, timing, and decision points document; 3) adopted amendment proposal form (APF) 2022-09, which addresses reporting issues in VM-31, PBR Actuarial Report Requirements for Business Subject to a Principle-Based Valuation; 4) exposed APF 2023-04, which clarifies VM-31 reporting requirements that support company experience mortality rates; 5) reported that it met Feb. 9 in regulator-to-regulator session, pursuant to paragraph 6 (consultations with NAIC staff members related to NAIC technical guidance) of the NAIC Policy Statement on Open Meetings, to discuss the economic scenario generator corporate model; 6) adopted its 2022 Fall National Meeting minutes; 7) exposed proposed charges for the proposed Economic Scenarios (E/A) Subgroup; 8) adopted APF 2022-10, which clarifies VM-20 requirements for universal life policies with non-material secondary guarantees; 9) adopted APF 2023-02, which adds disclosure requirements to VM-31 to explain any reporting discrepancies between the annual statement and the principle-based reserving (PBR) actuarial report; 10) exposed APF 2023-01, a non-substantive amendment to clarify the value of starting assets in VM-21; 11) exposed APF 2023-03, which addresses a series of clean-up items in VM-20, VM-21, and VM-31; 12) responded to a referral from the Financial Regulation Standards and Accreditation (F) Committee by conveying the Task Force's recommendation to remove the *Actuarial Opinion and Memorandum Regulation (#822)* as an accreditation standard; 13) adopted APF 2022-07, which clarifies a VM-20 net premium reserve (NPR) mortality adjustment; and 14) adopted APF 2022-08, which clarifies that companies only reporting VM-21 reserves determined using the alternative methodology are subject to limited governance requirements under VM-G, Appendix G — Corporate Governance Guidance for Principle-Based Reserves.

The Task Force reviewed the reports of the Longevity Risk (E/A) Subgroup, the Variable Annuities Capital and Reserve (E/A) Subgroup, the Indexed Universal Life (IUL) Illustration (A) Subgroup, and the Index-Linked Variable Annuity (A) Subgroup.

Chupp made a motion, seconded by Slutsker, to adopt the Task Force’s March 2 (Attachment One), Feb. 23 (Attachment Two), Feb. 2 (Attachment Three), and Jan. 26 (Attachment Four) minutes and the reports of the Longevity Risk (E/A) Subgroup (Attachment Five), the Variable Annuities Capital and Reserve (E/A) Subgroup (Attachment Six), the Indexed Universal Life (IUL) Illustration (A) Subgroup (Attachment Seven), and the Index-Linked Variable Annuity (A) Subgroup (Attachment Eight). The motion passed unanimously.

## 2. Adopted the Report of the VM-22 (A) Subgroup

Slutsker noted that his report would cover an introduction to the VM-22, Requirements for Principle-Based Reserves for Non-Variable Annuities framework (VM-22), a project history, a project plan, a discussion of the Standard Projection Amount, and the relationship between the VM-22 project and the NAIC’s economic scenario generator project. After Slutsker walked through the presentation, Hemphill asked a couple of questions regarding the prospective versus retrospective considerations: 1) Does the Task Force need to consider the exemption differently depending on if VM-22 is ultimately prospective or retrospective?; and 2) Will the VM-22 field test focus only on new business or will in-force business be included? Regarding the field test, Slutsker said that while final decisions have not yet been made, there had been some discussions of testing in-force business. Slutsker also noted that given the likely later implementation of in-force business in VM-22, the Subgroup could consider any impacts to the exemption threshold when in-force business is added.

Brian Bayerle (American Council of Life Insurers—ACLI) asked how the timing of the VM-22 field test would work given the current status of the economic scenario generator project. Slutsker noted that the VM-22 timeline relies on the progress of the economic scenario generator project, and additional timeline delays were possible. Slutsker further stated that it is possible that if the scenarios for the second-round economic scenario generator project are a lot closer to final, the VM-22 field test could be performed simultaneously with the economic scenario generator field test. Bayerle responded that there could be challenges with securing consultant resources for the VM-22 field test if the timeline for the project is indefinite, to which Slutsker agreed.

Boston asked whether a change would need to be made to the *Standard Valuation Law* (#820) if VM-22 was made to be retrospective. Hemphill asked that the NAIC’s legal team looks into the issue of retrospective application of VM-22 and provide an opinion on what would need to occur. Bruce Friedland (Friedland Consulting Services LLC) asked whether there was any consideration of using the current prescribed scenarios for the VM-22 field test. Slutsker noted that had not come up in Subgroup discussions but that his personal view was that it would not be very fruitful to utilize the current prescribed scenarios given the expected large changes to the prescribed scenarios in the future arising from the NAIC economic scenario generator project.

Slutsker made a motion, seconded by Yanacheak, to adopt the report of the VM-22 (A) Subgroup (Attachment Nine), including its March 1 minutes (Attachment Ten). The motion passed unanimously.

## 3. Heard a Presentation on the Impact of a Rising Interest Rate Environment

Andersen introduced the agenda for the discussion of the current rising interest rate environment, which would include his presentation (Attachment Eleven), a presentation (Attachment Twelve) by Dale Hall (Society of Actuaries—SOA), and a roundtable discussion of industry panelists, including Theresa Resnick (Everlake Life), Stephen McNamara (New York Life), and Paul Hance (Pacific Life). After Andersen and Hall concluded their presentations, Slutsker moderated the roundtable discussion of the impact of rising interest rates on insurance organizations. Carmello noted that he was surprised to see the prevalence of annuities without a market value adjustment (MVA) and asked if the companies were seeing different experiences with lapses depending on whether an MVA was present. McNamara noted that his company’s MVAs were limited to the surrender charge period. While they did see some difference in lapse experience before and after the surrender charge period ended, he noted that their lapse experience overall is fairly minimal regardless. Resnick noted that her company

did see different experiences between annuities with an MVA and without, but they also include different lapse assumptions between those groups.

Hemphill asked whether when margins were developed for lapse assumptions, a margin was needed for both the dynamic portion of the lapse formula in addition to the base or if a margin on top of the base assumption could be sufficient. McNamara stated that his organization leans toward a conservative dynamic lapse assumption and that margins were applied to both the base and dynamic portion of the formula. However, McNamara said that his investment team had challenged the conservatism of their dynamic lapse assumptions and would like something more on a best-estimate basis to better manage the assets supporting the business, which is leading the team to reconsider their lapse assumptions. Resnick said that their approach to margin development is to try to keep it simple so that the results can be explained to senior management. However, they do employ more complex sensitivity testing to ensure that the margins are robust.

Muldoon asked what types of metrics companies are reviewing regarding early warning signs for liquidity risk. McNamara replied that they are monitoring their anticipated cash needs, policyholder behavior, general market conditions, and credit spreads. Muldoon then asked how many additional withdrawals the company is expecting to see, given the rising interest rate environment. McNamara said that additional withdrawals are part of their dynamic lapse formulae that varied by product and that they would expect to see more withdrawals, particularly in a prolonged high interest rate environment. Tsang asked if companies were changing their crediting rate strategy to control the level of lapses and reduce the stress on liquidity. Resnick stated that they were increasing credited rates with the rising interest rate environment but that there were challenges due to a lack of data on how policyholders will react with respect to higher credited rates.

#### 4. Heard an Update on the AG 53 Review Plan

Andersen noted that Actuarial Guideline 53 (AG 53) was adopted last year, which added provisions to asset adequacy testing (AAT) to ensure that claims will be paid even if complex assets do not perform as expected. He said that during the development of AG 53, regulators agreed to not add any guard rails into AAT in favor of well-thought-out company disclosures. Andersen said that if companies only include minimal information in their AG 53 disclosures, it may lead the state insurance regulators reviewing the disclosures to conclude that the company does not have a sufficient rationale for the high-yield assumptions on their assets. He further stated that companies with a greater proportion of their assets in the high-yield category without sufficient disclosure could expect to receive greater scrutiny in the form of follow-up questions after regulatory review.

#### 5. Adopted the Report of the Experience Reporting (A) Subgroup and Heard an Update on VM-50/VM-51 Experience Reporting

Andersen said that Pat Allison (NAIC) would be delivering a presentation (Attachment Thirteen) on the NAIC's VM-50, Experience Reporting Requirements, and VM-51, Experience Reporting Formats mortality experience collection progress.

Andersen made a motion, seconded by Chou, to adopt the report of the Experience Reporting (A) Subgroup. The motion passed unanimously.

#### 6. Exposed APF 2021-08

Mary Bahna-Nolan (MBN Advisors Inc.) walked through APF 2021-08, which would reduce the time lag in the VM-50/VM-51 mortality experience collection. Hemphill suggested a friendly amendment to change the years used in the example in APF 2021-08 for clarity. Bahna-Nolan agreed that the clarification was an improvement. Bayerle noted that their comments on APF 2021-08 would likely include suggestions for language changes that are

reflective of how the experience collection deadlines have worked in practice over the NAIC's two years of mortality experience collection and requested that the comment period be longer than 21 days.

Chupp made a motion, seconded by Eom, to expose APF 2021-08 (Attachment Fourteen) for a 30-day public comment period ending April 21, 2023. During the discussion of the motion, Allison noted that the NAIC is supportive of APF 2021-08. The motion passed unanimously.

7. Heard a Presentation on the VM-21/C3 Phase II Economic Scenario Generator Field Test Results

Scott O'Neal (NAIC) walked through a presentation (Attachment Fifteen) of the VM-21/C-3 Phase II economic scenario generator field test results. Mark Tenney (Mathematical Finance Company) asked if there was any response bias present due to the companies that had not participated or dropped out during the process. O'Neal responded that although there was a good amount of participation for variable annuity products that would tend to reduce potential bias, the average results of the field test could be highly dependent on a small number of larger players. Chang asked how the baseline comparisons to the field test runs would look if you split the participants that used the Academy Interest Rate Generator (AIRG) in their valuation versus those that used a proprietary economic scenario generator. O'Neal replied that due to the limited participation of companies that used a proprietary economic scenario generator, it would not be possible to detail in a public call. However, O'Neal stated it was likely that the reserve and capital increases for the field test runs would be relatively smaller given the requirement that proprietary economic scenario generators be at least as conservative as the AIRG.

8. Exposed APF 2023-05

Bayerle walked through APF 2023-05, which revises hedge modeling language in the *Valuation Manual* to address index hedge modeling. Hemphill noted concerns with "tied directly to the contracts falling under the scope of VM-21 stochastic reserve requirements," language included in Section 4.A.4.a and Section 4.A.4.b, along with additional editorial language corrections. Neither the Task Force nor Bayerle opposed making Hemphill's suggested modifications to the exposure document.

Slutsker made a motion, seconded by Yanacheak, to expose APF 2023-05 (Attachment Sixteen) with the discussed modifications for a 21-day public comment period ending Apr. 12, 2023, with the edits described above. The motion passed unanimously.

9. Heard an Update from the Academy's Life Practice Council

Amanda Barry-Moilanen (American Academy of Actuaries—Academy) walked through a presentation (Attachment Seventeen) providing an update from the Academy's Life Practice Council.

10. Heard an Update on the Activities of the Economic Scenario Generator Governance Drafting Group, the VM-20/VM-21 Economic Scenario Generator Technical Drafting Group, and the SPA Drafting Group

Hemphill said that she would provide an update on the Economic Scenario Generator Governance Drafting Group, the VM-20/VM-21 Economic Scenario Generator Technical Drafting Group, and the Standard Projection Amount (SPA) Drafting Group in order to promote transparency into each group's activities. She stated the Economic Scenario Generator Governance Drafting Group met several times to determine recommendations for the ongoing governance of the economic scenario generator. As for the activities of the Technical Drafting Group, Hemphill said that it met to discuss VM-20 stochastic exclusion test results from the field test. Hemphill said that the Drafting Group currently has a planned series of topics to discuss a document that has been exposed and that the group will resume calls in early April to cover those topics, with potential modifications based on any comments received. Finally, for the SPA Drafting Group, Hemphill said that the results of a company survey were discussed

at a public meeting and that more details would be discussed at a regulator-only session after the Spring National Meeting.

#### 11. Heard an Update on SOA Research and Education

Hall delivered a presentation (Attachment Eighteen) on the SOA's research and education initiatives. Yanacheak asked about how the data breakout groups were chosen for the payout annuity study. Hall said that these were categories that industry participants were using in their financial modeling. Regarding a potential new mortality table for payout annuities, Slutsker asked: 1) if the slope in the latest study would be considered in deciding whether a new mortality table was needed; and 2) how long it would take the SOA to create a new mortality table. Hall stated that the slope is an important consideration in deciding whether to create a new mortality table and that it would take approximately 12–18 months to create a new mortality table.

Andersen asked if the data from 2020 to 2023 that included COVID-19 would make it challenging to decide on the assumptions for a new mortality table. Hall replied that dealing with COVID-19 in the data was the new normal and something everyone would need to adjust to. Carmello asked if the SOA was looking into group annuity mortality and how much representation of the industry was present in the current payout annuity study. Hall replied that the SOA was looking into group annuity mortality and that the payout annuity mortality study represented approximately 75% to 80% of the industry.

#### 12. Heard an Update from the Academy Council on Professionalism and Education.

Shawna Ackerman (Actuarial Board for Counseling and Discipline—ABCD) noted that the ABCD received 96 requests for guidance, with 20% of those requests coming from life actuaries.

Rob Damler (Actuarial Standards Board—ASB) said that the ASB was very active, with more than 15 actuarial standards of practice (ASOPs) undergoing review. Damler said that the Task Force may be particularly interested in the current work on ASOP 41, which discusses actuarial communications, and ASOP 12, which deals with risk classification.

#### 13. Heard an Update on Mortality Improvement

Marianne Purushotham (SOA) delivered a presentation (Attachment Nineteen) on the work of the joint SOA Mortality and Longevity Oversight Advisory Council (MLOAC) and Mortality Improvements Life Work Group (MILWG). Carmello asked if the Task Force should be considering mortality improvement, given the level of uncertainty present due to the impact of the COVID-19 virus and other mortality drivers that have occurred recently. Hemphill noted that instead of calling it a "mortality improvement" assumption, it should potentially be referred to as a "mortality trend," given that deterioration is also considered. Hemphill further stated that the mortality trend assumption approved last year included deterioration in the initial years followed by recovery and improvement.

#### 14. Adopted Portions of APF 2023-03

Hemphill walked through APF 2023-03, noting that the Task Force would be considering adopting the language associated with the VM-21 portion of section three, along with sections four and five, outlined in the cover sheet. Hemphill stated that a comment letter (Attachment Twenty) from the ACLI in response to the exposure of APF 2023-03.

Slutsker made a motion, seconded by Eom, to adopt the discussed portions of APF 2023-03 (Attachment Twenty-One). During a discussion of the motion, Chupp asked why the VM-20 portion of Section 3 was not going to be

included in the adoption. Hemphill replied that although she felt the VM-20 language in Section 3 would work in its current form, there may be some additional clarifying language that could be added to limit the possibility of misinterpretation. Chupp noted that he would prefer to adopt the VM-20 language now to ensure consistency with the new VM-21 language in Section 3. Slutsker and Eom agreed to modify their motion to adopt to include the VM-20 language from Section 3. The motion passed unanimously.

15. Adopted APF 2023-01

Hemphill discussed APF 2023-01, which clarifies the value of starting assets in VM-21.

Weber made a motion, seconded by Chupp, to adopt APF 2023-01 (Attachment Twenty-Two). The motion passed unanimously.

Having no further business, the Life Actuarial (A) Task Force adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/A CMTE/LATF/2023-1 Spring/Spring Natl Meeting/Meeting Minutes Packet/LATF Spring National Meeting Minutes.docx

Draft: 3/11/23

Life Actuarial (A) Task Force  
Virtual Meeting  
March 2, 2023

The Life Actuarial (A) Task Force met March 2, 2023. The following Task Force members participated: Cassie Brown, Chair, represented by Rachel Hemphill and Iris Huang (TX); Scott A. White, Vice Chair, represented by Craig Chupp (VA); Lori K. Wing-Heier represented by Sharon Comstock (AK); Mark Fowler represented by Sanjeev Chaudhuri (AL); Ricardo Lara represented by Ahmad Kamil (CA); Andrew N. Mais represented by Wanchin Chou and Manny Hidalgo (CT); Doug Ommen represented by Mike Yanacheak (IA); Dana Popish Severinghaus represented by Vincent Tsang (IL); Amy L. Beard represented by Scott Shover (IN); Vicki Schmidt represented by Nicole Boyd (KS); Timothy N. Schott represented by Marti Hooper (ME); Grace Arnold represented by Fred Andersen and Ben Slutsker (MN); Chlora Lindley-Myers represented by William Leung (MO); Eric Dunning represented by Michael Muldoon (NE); Adrienne A. Harris represented by Bill Carmello (NY); Judith L. French represented by Peter Weber (OH); Glen Mulready represented by Andrew Schallhorn (OK); Michael Humphreys represented by Steve Boston (PA); Jon Pike represented by Tomasz Serbinowski (UT); and Allan L. McVey represented by Tim Sigman (WV).

1. Exposed Referrals Received from the Valuation of Securities (E) Task Force

Charles Therriault (NAIC) walked through the first informational referral from the Valuation of Securities (E) Task Force to the Life Actuarial (A) Task Force proposing that the *Purposes and Procedures Manual of the NAIC Investment Analysis Office* (P&P Manual) be amended to define structured equity and fund investments and exclude these investments from filing exemption eligibility. Nancy Bennett (American Academy of Actuaries—Academy) asked if making these investments ineligible for a filing exemption would have an impact on the calculation of prescribed default costs or other unintended consequences. Therriault responded that any changes to reporting classification would be decided by the other task forces and working groups at the NAIC and that this proposal would strictly be looking at assessing a risk designation that is more consistent with the underlying risk of the investment.

Carmello made a motion, seconded by Tsang, to expose the first informational referral (Attachment One-A) for a 21-day public comment period ending March 22. The motion passed unanimously.

Therriault then walked through the second referral from Valuation of Securities (E) Task Force requesting that the Life Actuarial (A) Task Force respond with ideas on how it could use investment information on a proposed new analytical capability at the NAIC's Securities Valuation Office (SVO), and whether it is supportive of the initiative. Tsang asked if company-determined investment risk measures, such as asset duration, would be consistently reported. Therriault responded that one of the benefits of building out the proposed analytical capability at the SVO would be that these risk measures would be determined consistently by the SVO across all companies. Tsang then asked if the purpose of this capability would be to spot outliers. Therriault said that the initial purpose of the data would be to identify inconsistencies with ratings that were assigned to securities, but that part of the purpose of this referral is to see how other groups could make use of the data. Bennett then asked if this new capability would effectively make the SVO a rating agency. Therriault replied that this new capability would not make the SVO a rating agency in effect, and these additional risk measures that the SVO is seeking to obtain are common throughout the industry and have been for decades.

Leung made a motion, seconded by Hidalgo, to expose the second informational referral (Attachment One-B), with a cover letter added to explain that the Task Force is seeking commentary on the five questions outlined in the referral, for a 42-day public comment period ending April 14. The motion passed unanimously.

2. Exposed a VM-20/VM-21 ESG Technical Drafting Group Topics, Timing, and Decision Points Document

Hemphill walked through a document that outlined the timing for upcoming discussions of the VM-20/VM-21 Economic Scenario Generator (ESG) Technical Drafting Group and decisions that would need to be made.

Chupp made a motion, seconded by Leung, to expose the document (Attachment One-C) for a 21-day public comment period ending March 23. The motion passed unanimously.

3. Adopted APF 2022-09

Hemphill walked through amendment proposal form (APF) 2022-09, noting that one comment letter from the American Council of Life Insurers (ACLI) had been received and was supportive of the APF.

Hidalgo made a motion, seconded by Leung, to adopt APF 2022-09 (Attachment One-D). The motion passed unanimously.

4. Exposed APF 2023-04

Huang walked through APF 2023-04, which clarifies the VM-31 reporting requirements that support that the company experience mortality rates are not lower than what the company actually expects to occur.

Chupp made a motion, seconded by Leung, to expose the APF 2023-04 (Attachment One-E) for a 21-day public comment period ending March 23. The motion passed unanimously.

Having no further business, the Life Actuarial (A) Task Force adjourned.

RE: Referral on Additional Market and Analytical Information for Bond Investments

DATE: February 13, 2023

**Summary** – The Investment Analysis Office (IAO) staff recommended in its Feb. 25, 2022, memorandum to the Valuation of Securities (E) Task Force (VOSTF) (attached hereto, Blanks Market Data Disclosure v2.pdf) that it would like additional market-data fields added to the annual statement instructions for bond investments. This was, in part, based upon the NAIC's adoption in 2010 of the recommendations of

Washington, DC 444 North Capitol Street NW, Suite 700, Washington, DC 20001-1509 p | 202 471 3990 f | 816 460 7493

Kansas City 1100 Walnut Street NW, Suite 1500, Kansas City, MO 64106-2197 p | 816 842 3600 f | 816 783 8175

New York One New York Plaza, Suite 4210, New York, NY 20004 p | 212 398 9000 f | 212 382 4207

www.naic.org

the Rating Agency (E) Working Group (RAWG), which was formed following the Great Financial Crisis of 2007-2008 to study the NAIC's reliance on rating agencies, and the IAO staff's recent findings in its Nov. 2021 memo regarding disparities between rating agencies. RAWG recommended that: 1) regulators explore how reliance on rating agencies can be reduced when evaluating new, structured, or alternative asset classes, particularly by introducing additional or alternative ways to measure risk; and 2) consider alternatives for regulators' assessment of insurers' investment risk, including expanding the role of the NAIC Securities Valuation Office ("SVO"); and 3) VOSTF should continue to develop independent analytical processes to assess investment risks. These mechanisms can be tailored to address unique regulatory concerns and should be developed for use either as supplements or alternatives to ratings, depending on the specific regulatory process under consideration.

The NAIC's need for alternative measures of investment risk has only increased since RAWG made its recommendations, as privately issued and rated complex structured finance transactions have become commonplace without adequate ways of identifying them. The SVO recommended the following market data fields to be added to the annual statement instructions: Market Yield, Market Price, Purchase Yield, Weighted Average Life, Spread to Average Life UST, Option Adjusted Spread, Effective Duration, Convexity and VISION Issue ID. Please refer to the attached memo for more detail on each data field.

In comments received from industry there were question as to how the SVO, VOSTF and/or other regulators who would receive the analytic data included in the proposal would utilize that information and why it is of value to them. The SVO was also asked to consider industry's recommendation that the NAIC be responsible for calculating this analytical information by utilizing commercially available data sources and investment models instead of having each individual insurance company incur the costs to implement system changes. The SVO shared their thoughts on the alternatives in the Jul. 14, 2022, memorandum to the VOSTF (attached, Blanks\_Market\_Data\_Options\_v3.pdf).

Capabilities like this within the SVO would permit it to calculate for regulators all the analytic values previously mentioned for any Schedule D investment along with additional measures such as key rate duration (a measure of interest rate sensitivity to maturity points along the yield curve), sensitivity to interest rate volatility, principal and interest cash flow projections for any security or portfolio for any given interest rate projection, loss estimates for any security for any given scenario and many others measures.

**Referral** – VOSTF refers this matter to the above referenced Committees, Task Forces and Working Groups for consideration and requests a response from you by May 15<sup>th</sup> outlining:

1. Indicate if your group is supportive of creating this capability within the SVO.
2. List the investment analytical measures and projections that would be most helpful to support the work performed by your respective group.
3. Describe how your group would utilize the data and why it would be of value.
4. Are there other investment data or projection capabilities that would be useful to your group that could be provided by commercially available data sources or investment models? And if so, please list them.
5. Any other thoughts you may have on this initiative.

Please contact Charles Therriault or Marc Perlman with any questions.

RE: Referral regarding a Proposed Purposes and Procedures Manual (P&P Manual) Amendment to Define and Add Guidance for Structured Equity and Funds

DATE: February 3, 2023

---

**Summary** – The SVO has processed several private letter rating (PLR) filings for investments in notes issued by special purpose vehicles or other legal entities that operate as feeder funds which themselves then invest, directly or indirectly, in one or more funds or other equity investments. The SVO proposes defining these investments as Structured Equity and Fund investments.<sup>1</sup> The SVO proposed at the 2022 Fall National Meeting the removal of Structured Equity and Fund investments from Filing Exemption, the reliance upon a credit rating provider (CRP) ratings for the assignment of NAIC Designations. The SVO is concerned about this general structure for the following reasons:

---

<sup>1</sup> Proposed Definition: A Structured Equity and Fund investment is a note issued by, or equity or limited partnership interest in, a special purpose vehicle, trust, limited liability company, limited partnership, or other legal entity type, as issuer, the contractually promised payments of which are wholly dependent, directly or indirectly, upon payments or distributions from one or more underlying equity or fund investments. The inclusion of an intervening legal entity or entities between the Structured Equity and Fund investment issuer and the underlying equity or fund(s), does not change the risk that the insurer investment is ultimately dependent, in whole or in part, upon an investment in equity or one or more funds and its underlying investments. Any design that circumvents this definition, and related examples, through technical means but which in substance achieves the same ends or poses the same risk, shall be deemed a Structured Equity and Fund.

Executive Office | 444 North Capitol Street NW | Suite 700 | Washington, DC 20001 | (202) 471-3990

Central Office | 1100 Walnut Street | Suite 1500 | Kansas City, MO 64106-2197 | (816) 842-3600

Capital Markets & Investment Analysis Office | One New York Plaza | Suite 4210 | New York, NY 10004 | (212) 398-9000

[www.naic.com](http://www.naic.com)

- 1) Circumvent Regulatory Guidance - The introduction of an intervening entity as debt issuer, when the underlying investment is in substance an equity investment, circumvents regulatory guidance established by the Valuation of Securities (E) Task Force, the Statutory Accounting Principles (E) Working Group and the Capital Adequacy (E) Task Force for the reporting of equity investments because, according to the P&P Manual (i) equity and fund investments are ineligible to use credit rating provider (CRP) ratings in the assignment of an NAIC Designation and (ii), in the case of funds, only the SVO is tasked with determining whether a fund produces fixed-income like cash flows and is therefore eligible for specific classification.

**All non-SEC registered funds are required to be reported on Schedule BA. Life insurance entities are permitted to file investments in non-SEC registered private equity funds, partnerships, limited liability companies and joint ventures with the SVO for specific classification on Schedule BA;**

- 2) Reliance on Ratings - These investments are being reported as bonds and receiving bond risk-based capital (RBC) factors based upon the mechanical assignment of NAIC Designations that rely upon CRP ratings through the filing exempt process. The use of CRP ratings would not be permitted for the fund or equity investments which underly these notes if the equity or fund investments were held directly;
- 3) RBC / Investment Limit Arbitrage - The structure may permit in-substance equity and fund investments to obtain better RBC treatment than would otherwise be received if the investments had been directly reported. In addition to improved RBC treatment, the structures could permit entities to hold more underlying equity / fund investments than would be permitted under state investment law; and
- 4) Transparency - The structures typically use two or more interconnected private entities through which the privately rated “bond” securities are issued that are backed by investments in non-public assets. The many non-public layers deny regulators, and possibly insurer investors, transparency into the true underlying risks, credit exposure and nature of the investment. The notes issued are described generically as a “senior note” or “term loan” further obscuring their actual structure and complexity. These structures can invest in any asset including affiliate investments, non-fixed income investments, derivatives, borrowings for the purpose of leverage and non-admitted assets.

It is possible that many of the transactions the SVO has processed would not qualify as bonds eligible for Schedule D-1 reporting according to the principles-based bond definition currently being drafted by the Statutory Accounting Principles (E) Working Group, while others likely will qualify. The bond definition requires a review of the substance of the investment to determine whether it has the substance of a bond; significantly, that the ultimate underlying collateral has fixed income cash flows. In either case, however, the use of a fund intermediary has the potential to be abused and requires significant judgment to understand the substance and nature of the ultimate underlying risk. This has already been recognized by the establishment of processes for the SVO to provide NAIC Designations for fixed-income-like funds. It would then follow that debt instruments backed by the types of funds that would ordinarily be required to be filed with the SVO, should follow the same process.

**Informational Referral** – Given the magnitude of the multiple regulatory arbitrage opportunities, the judgment involved in assessing the nature of the ultimate risk, the lack of transparency, circumvention of regulatory guidance and the reliance on CRP ratings to accomplish these ends, the SVO proposed amending the P&P Manual to include a definition for Structured Equity and Fund and to exclude such investments from Filing Exemption eligibility. The proposed amendment would not change how the investment is classified for reporting by the insurer but it would ensure that the NAIC Designation and Category assigned are appropriate for the risk. This is an informational referral and no direct action is required by the Capital Adequacy (E) Task Force, Life Actuarial (A) Task Force or Risk-based Capital Investment Risk and Evaluation (E) Working Group unless those groups wish to comment on the proposal.

Please contact Charles Therriault or Marc Perlman with any questions.

<https://naiconline.sharepoint.com/teams/SVOVOSTaskForce/Shared Documents/Meetings/2023/Referrals/To CATF LATF RBCIRE/VOSTF Referral to CATF LATF RBCIRE - Structured Equity and Funds 2022-02-03.docx>

## Economic Scenario Generator Technical Drafting Group Planned Topics, Tentative Timing, and initial Decision Points

### 1) Stochastic Exclusion Ratio Test

**Timeline:** Initially, 2 more meetings tentatively in March-April, to finish covering field test results and discuss decision points below. Subsequently, two additional meetings after the second round of field testing, to discuss SERT field test results, pick a version of the SERT (if multiple were tested), and to determine SERT cutoff (assuming this form of SERT is selected).

#### **SERT Goals:**

- Practically sort products that may have a constraining SR from those that would not have a constraining SR.
- Give reasonably consistent results over time and in different economic environments.

#### **SERT Decision Points:**

1. **Decision Point:** Should the SERT be removed entirely, given that it is duplicative of what could be provided for the certification method? This could include moving the primary SERT outline to the examples for a broadened certification method. With a QA certifying as to the risks, a more judgment-based evaluation of the variability could be performed rather than having a rough cutoff that does not consider the size of the business or the materiality standard.

**Advantage for removal:** The SERT discourages a holistic assessment and discussion of risk that is more appropriate for PBR. It could potentially be replaced with versions of the certification or demonstration method. One suggested alternative was to run a small, representative scenario set (e.g., 50 scenarios) and show it is not constraining compared to the NPR and DR. This is currently allowable under the stochastic exclusion demonstration test option outlined in 6.A.3.b.iii, except that it is left up to the company to determine “a sufficient number of adverse scenarios”.

**Advantage for retaining:** The SERT is often used because it is simple to implement. Following the same approach but as part of a certification method would require additional reporting and may trigger follow-up questions.

2. **Decision Point:** What products are generally expected to pass the SERT, what products are generally expected to fail, and what percentage of the time should this single test be able to accurately sort these accordingly?

**Proposal:** Pass: most Term with 20 year or shorter level period (non-ROP); Fail: most ULSG (unless minimal guarantees); the current SERT appears to fail roughly 10% of the time.

3. **Decision Point:** Do the SERT scenarios need to be at a moderately adverse level?

**Proposal:** No. The SERT is not a set of scenarios that need to be “passed”. They should reasonably assess whether performing an SR and taking a CTE(70) is likely to produce a higher reserve than the DR. Thus, they should assess whether tail scenarios lead to significant increases. They should generally be representative of the tail, but tail results may not be driven by the 85th percentile. Ultimately, the cutoff, which will be calibrated based on the SERT methodology, is what will determine whether products pass or fail the SERT.

4. **Decision Point:** Should the SERT scenarios be derived directly from the stochastic scenario distribution, as Conning has done or modified, or should they be “stylized” scenarios be created that reflect starting conditions and a level of reversion to a mean? Is there an alternative approach?

**Advantages for scenarios based on full scenario set:** Direct relationship for goal #1; avoids disconnect between the test and its effectiveness for the intended purpose of determining whether there would likely be a SR excess over the DR. The intent is for economic scenario generator updates to be more gradual over time now that we have a vendor to maintain the economic scenario generator. Each update would require an evaluation and potential update of the stylized scenarios as well.

**Advantages for scenarios based on stylized set:** Ease of implementation. Being less responsive means being more predictable.

5. **Decision Point:** How do we evaluate the SERT is appropriately calibrated, independent of the additional risk reflected in the new scenarios? That is, what must be included in a subsequent Field Test to calibrate an appropriate cutoff?

**Proposal:** Adequate coverage of different starting conditions, adequate representation of products (Term, ULSG, VULSG, VULnoSG par & non-par WL).

## 2) Deterministic Reserve

**Timeline:** Initially, 2 meetings tentatively in April. Subsequent to the second round of field testing, two meetings to review DR field test results and to select a version of the DR (if multiple were tested) and confirm DR methodology.

### DR Goal:

- Provide a moderately adverse deterministic scenario that will be adequate to capture risk for products that do not have significant interest rate and or equity risk.

### DR Decision Points:

1. **Decision Point:** Should this scenario be linked to the stochastic exclusion ratio test or can it be separate?  
**Proposal:** Separate. The DR must primarily be suitable for the DR goal above.
2. **Decision Point:** Do we agree with the format of the current deterministic scenario (adverse for 20 years, followed by reversion to mean)?  
**Proposal:** Generally yes, but should consider whether the reversion to mean after 20 years particularly impacts specific products, giving less than a moderately adverse result. The focus for DR reserve adequacy should be policies passing the SET, but we should be mindful that it can be constraining for those with an SR as well.
3. **Decision Point:** Is the deterministic reserve scenario methodology used for the first field test appropriate?  
**Proposal:** The DR scenario used may be beyond moderately adverse. While recalibration will impact the DR level, ask Conning to develop a form of DR that is more consistent with the current DR.

### 3) Scenario Picker Tool

**Timeline:** 3 meetings, tentatively in May

#### Scenario Picker Tool Goal:

- Provide scenario subsets that are reasonably representative of the full 10,000 scenario set for policies and/or contracts that are sensitive primarily to interest rates, equities, or both.

#### Scenario Picker Tool Decision Points:

1. **Decision Point:** Should there be a scenario picker that is included as part of the economic scenario generator?  
**Proposal:** Yes.

2. **Decision Point:** Should custom stratifications be allowed, for both VM-20 and VM-21, if the company provides an off-cycle or model office comparison between the subset and full 10,000 to show there is not material understatement or bias?  
**Proposal:** Yes. This may reduce the importance of having a perfect response for items #3-#5 below.
3. **Decision Point:** What size of subsets are needed?  
**Proposal:** 50, 200, 1000, 2000.
4. **Decision Point:** Should there be stratification based on interest rates and/or equity?  
**Proposal:** There should be two or three versions of the scenario picker tool, which stratify scenarios based on interest rate, equity, and/or both.
5. **Decision Point:** For interest rates, what tenor(s) should be used for stratification?  
**Proposal:** This may be a limitation in the current scenario picker tool. Consider multiple metrics based on different tenors.
6. **Decision Point:** What metric should be used for stratification?  
**Proposal:** Evaluate whether the current scenario picker's metric is reasonable, aside from its narrow focus on a specific interest rate tenor.

#### 4) Company-Specific Market Paths (CSMP)

**Timeline:** 1 meeting, tentatively in May

**CSMP Goal:**

- Provide a reasonable alternative to the CTEPA that gives consistent results but is more tractable.

**CSMP Decision Points:**

7. **Decision Point:** Should the CSMP be removed entirely?  
**Proposal:** Not at this time, but we should consider whether a sunset timeline is appropriate depending on current use. The CTEPA is very widely used, provides greater insight into the differences between company and prescribed assumptions, and is more straightforward to implement (although more time-intensive). Note that the NAIC and regulators are looking into obtaining a more exhaustive list of its use, and will recommend to companies using the CSMP that they participate in ACLI and AAA groups related to this effort as well as the Technical DG.

8. **Decision Point:** Should there be any update to the CSMP Market paths?

**Proposal:** Primarily, updates would be designed to ensure that the 40 scenarios are likely to bracket CTE70(Adj). May need to replace the 1 bps floor on interest rates with a negative [25 bps] floor on interest rates, given the update to the economic scenarios to allow for negative interest rates. No other changes to magnitude of initial equity/interest rate shocks or subsequent equity returns. Interest rate paths (VM requires “all random variables in the generator are set to zero across all time periods” with the intention that “interest rates revert to the same long-term mean”) may be determined as Conning has done for SERT scenario #9 from the initial field test (median path), or we can consider whether Conning can more directly calculate the CSMP subsequent interest rate paths.

## 5) Alternative Methodology

**Timeline:** 1 meeting, tentatively in June

### Alternative Methodology Goal:

- Provide a reasonable alternative to stochastic modeling that captures the risk of the guarantee for contracts with GMDBs only. Note that for contracts with no guarantees, the Alternative Methodology simply refers to AG33, so the focus of our consideration is on contracts with GMDBs.

### Alternative Methodology Decision Points:

1. **Decision Point:** Should the Alternative Methodology be removed entirely?  
**Proposal:** Not at this time, but we should consider whether a sunset timeline is appropriate depending on current use. Note that the NAIC and regulators are looking into obtaining a more exhaustive list of its use, and will recommend to companies using the Alternative Methodology that they participate in ACLI and AAA groups related to this effort as well as the Technical DG. One suggested alternative for maintaining the Alternative Methodology was to revert to AG34 with an increased stress for richer GMDBs. In addition, there was a question of whether LATF would look for companies with a material block of “rich” GMDBs to follow full SR modeling. Consider not allowing **new** use of the Alternative Methodology.
2. **Decision Point:** Should there be a significant update to the Alternative Methodology (updating the table of factors)?  
**Proposal:** No. Based on early input from the AAA, an update of the current factor-based approach would be onerous if not impossible. If the equity scenarios materially differ

from the AIRG, can consider a crude adjustment as was previously done for mortality during VA reform if the impact for the Alternative Methodology is also likely material.

3. **Decision Point:** The Alternative Methodology uses the current AIRG in VM-21 Section 7.C.8 when describing “typical” adjustments to F and G for product design variations. Can Section 7.C.8 be removed, as it only outlines a possible approach, and it will be left to the actuary’s judgment how to adjust results for product design variations? Alternately, can the “prescribed scenarios” be replaced with the option to use either CFT scenarios or the updated prescribed (Conning) scenarios rather than the current AIRG (again, since this is an example)?

**Proposal:** Need input on whether this approach is being relied on. If this is not being used, remove for simplicity since it is not a requirement. If it is being used, update with the option to use CFT scenarios or the updated prescribed (Conning) scenarios.

DRAFT

**Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force  
Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

**Identification:**

PBR Staff of Texas Department of Insurance

**Title of the Issue:**

VM-31 Reporting Issues:

1. Senior Management and Qualified Actuary are distinct, layered reporting roles in VM-G.
  2. Life and VA Reports do not discuss the aggregate impact of approximations and simplifications.
  3. There are three issues in VM-31's scenario generation documentation for VM-21 in 3.F.9:
    - a) In addition to supporting that the number of scenarios is appropriate for the CTE 70 calculation, the company should also support that the number of scenarios is appropriate for the CTE 98 calculation.
    - b) The version of the ESG should be included and the parameters of the scenario generation should be available upon request.
    - c) A section reference needs to be corrected: VM-21 Section 8.G.1 does not exist.
  4. VM-21 is missing consideration of use of a date prior to the valuation date for the SR and the additional standard projection amount, which is inconsistent with the reporting in VM-31 Section 3.F.12.e.
  5. VM-31 should specifically address actual to expected analyses for certain liability assumptions such as expenses, partial withdrawals, annuitizations as well as GMIB/ GMWB utilization.
  6. Refine VM-31 documentation to address mortality improvement requirements in VM-21 Section 11.C and Section 11.D.
  7. The requirement for the projection period in VM-20 Section 7.A.1.d is not correctly reflected in VM-31 Section 3.D.2.f.
2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

VM-21 Section 3.I (new), VM-31 Section 3.D.2.f, VM-31 Section 3.D.5.f (new), VM-31 Section 3.D.11.k (new – renumber current 3.D.11.k and 3.D.11.l), VM-31 Section 3.D.14.c, VM-31 Section 3.F.2.f (new – renumber current 3.F.2.f and 3.F.2.g), VM-31 Section 3.F.3.k (new), VM-31 Section 3.F.3.i.vii, VM-31 Section 3.F.9, VM-31 Section 3.F.12.e (remove – renumber current Sections from 3.F.12.f to 3.F.12.m), VM-31 Section 3.F.13.e (New), VM-31 Section 3.F.16.c

January 1, 2023 NAIC *Valuation Manual*

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

1. An internal control certification from Senior Management is required by VM-31. It is not appropriate for the qualified actuary to complete the certification for senior management since these two roles have different responsibilities under VM-G, representing distinct layers of reporting and oversight. Senior

management receives reporting from the qualified actuary for principle-based valuation under VM-20 and VM-21.

2. In order to better understand the aggregate impact of approximations and simplifications used by the company, VM-31 Life Report and VA Report should add a new section to discuss it. If regulators were to gain comfortable with documentation of the aggregate impact, then the requirement that each individual approximation or simplification not bias the reserves downward could be revisited. For context, here are the current sections on approximations, simplifications, and modeling efficiency techniques, which only address the individual impacts.

**VM-31 Section 3.D.11.j**

*j. Approximations, Simplifications, and Modeling Efficiency Techniques – A description of each approximation, simplification or modeling efficiency technique used in reserve calculations, and a statement that the required VM-20 Section 2.G demonstration is available upon request and shows that: 1) the use of each approximation, simplification, or modeling efficiency technique does not understate the reserve by a material amount; and 2) the expected value of the reserve is not less than the expected value of the reserve calculated that does not use the approximation, simplification, or modeling efficiency technique.*

**VM-31 Section 3.F.2.e**

*e. Approximations, Simplifications, and Modeling Efficiency Techniques – A description of each approximation, simplification or modeling efficiency technique used in reserve or TAR calculations, and a statement that the required VM-21 Section 3.H demonstration is available upon request and shows that: 1) the use of each approximation, simplification, or modeling efficiency technique does not understate TAR by a material amount; and 2) the expected value of TAR is not less than the expected value of TAR calculated without using the approximation, simplification, or modeling efficiency technique.*

If discussions of the aggregate impact of approximations, simplifications, and modeling efficiency techniques were included, then there could be a future consideration of the removal of the requirement in VM-20 Section 2.G and VM-21 Section 3.H that approximations, simplifications, and modeling efficiency techniques not bias the reserve downward.

3. For VA, support should also be provided for the number of scenarios used for the C-3 RBC calculation based on CTE 98. For VA, the version of ESG should be included. Correct section reference.
4. VM-21 is missing consideration of use of a date prior to the valuation date for the additional standard projection amount, whereas VM-31 Section 3.F.12.e implies that the intent was for VM-21 to have such a consideration or allowance. VM-20 explicitly addresses such a consideration in VM-20 Section 2.E, and we use that language as a starting point for VM-21.

**VM-20 Section 2.E**

*The company may calculate the DR and the SR as of a date no earlier than three months before the valuation date, using relevant company data, provided an appropriate method is used to adjust those reserves to the valuation date. Company data used for experience studies to determine prudent estimate assumptions are not subject to this three-month limitation.*

5. In order for regulator reviewers to be able to better understand and evaluate a company's liability assumptions for expenses, partial withdrawals, annuitizations, as well as GMIB and GMWB utilization, a comparison of actual to expected should specifically be referenced in VM-31. We have used the

language for actual to expected policyholder behavior analysis in VM-31 Section 3.D.4.c (Life Report) as a format for a general A/E request.

**VM-31 Section 3.D.4.c**

*Actual to Expected Policyholder Behavior Analysis – The results of the most recently available actual to expected (without margins) analysis, including:*

- i. Definitions of the expected basis used in all actual-to-expected ratios shown.*
- ii. Comments addressing the conclusions drawn from the analysis.*

- 6. Adding documentation to confirm that the company has applied historical and future mortality improvement when it would result in an increase in the stochastic reserve as required by VM-21 Section 11.C and Section 11.D.
- 7. The language in VM-31 should be modified to correctly require reporting on VM-20’s requirement for the projection period. For reference, here is the relative passage of VM-20:

**VM-20 Section 7.A.1.d:**

*Projects cash flows for a period that extends far enough into the future so that no obligations remain.*

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

**VM-31 Section 3.D.14.c:**

c. Senior Management on Internal Controls – A certification from senior management, other than the qualified actuary, regarding the effectiveness of internal controls with respect to the principle-based valuation under VM-20, as provided in Section 12B(2) of Model #820.

**VM-31 Section 3.F.16.c:**

c. Senior Management on Internal Controls – A certification from senior management, other than the qualified actuary, regarding the effectiveness of internal controls with respect to the principle-based valuation under VM-21, as provided in Section 12B(2) of Model #820.

**VM-31 Section 3.D.11.k (new – renumber current 3.D.11.k and 3.D.11.l):**

k. Aggregate Impact of Approximations, Simplifications and Modeling Efficiency Techniques – Support that the aggregate impact of approximations and simplifications does not result in a material understatement of the reserve. This should include consideration of not just the magnitude of the sum of the individual impacts when considered in isolation, but also consideration of any potential interaction of approximations, simplifications, and modeling efficiency techniques.

**VM-31 Section 3.F.2.f (new– renumber current 3.F.2.f and 3.F.2.g):**

f. Aggregate Impact of Approximations, Simplifications and Modeling Efficiency Techniques – Support that the aggregate impact of approximations and simplifications does not result in a material understatement of TAR. This should include consideration of not just the magnitude of the sum of the individual impacts when considered in isolation, but also consideration of any potential interaction of approximations, simplifications, and modeling efficiency techniques.

**VM-31 Section 3.F.9:**

9. Scenario Generation – The following information regarding the scenario generation for interest rates and equity returns used by the company in performing a principle-based valuation under VM-21 and in determining the C-3 RBC amount under LR027, as it applies to the calculation of the SR, TAR and CTEPA (if used):

- a. Sources – Identification of the sources or generators used to produce the scenarios. Versions should be identified and parameters to the scenario generation shall be available upon request.
- b. Number of Scenarios – Number of scenarios used, rationale for that number, methods used to determine the sampling error of the CTE 70 and CTE 98 statistic when using the selected number of scenarios, and documentation that any resulting understatement in reserve or TAR, as compared with that resulting from running additional scenarios, is not material, as discussed in VM-21 Section 8.F.
- c. Scenario Reduction Techniques – If a scenario reduction technique is used, a description of the technique and documentation of how the company determined that the technique does not lead to a material understatement of results.
- d. Time-Step – Identification of the time-step of the model (e.g., monthly, quarterly, annual), and results of testing performed to determine that use of a more frequent time-step does not materially increase reserves, as discussed in VM-21 Section ~~8.G.14.F.1~~.

**VM-21 Section 3.I (New):**

The company may calculate the SR and the additional standard projection amount as of a date no earlier than three months before the valuation date, using relevant company data, provided an appropriate method is used to adjust

those amounts to the valuation date. Company data used for experience studies to determine prudent estimate assumptions are not subject to this three-month limitation.

**VM-31 Section 3.F.12.e (remove – renumber current Sections from 3.F.12.f to 3.F.12.m):**

Prior Date – If the additional standard projection amount was developed as of a date prior to the valuation date, disclosure of the prior date, the additional standard projection amount of the in force on the prior date, and an explanation of why the use of such a date will not produce a material change in the results compared to if the results were based on the valuation date. Such an explanation shall describe the process that the qualified actuary used to determine the adjustment, the amount of the adjustment, and the rationale for why the adjustment is appropriate.

**VM-31 Section 3.F.13.e (New):**

Calculations as of a Date Preceding the Valuation Date – If the SR and/or the additional standard projection amount were developed as of a date prior to the valuation date, disclosure of the prior date, the SR and the additional standard projection amount of the in force on the prior date, and an explanation of why the use of such a date will not produce a material change in the results compared to if the results were based on the valuation date. Such an explanation shall describe the process that the qualified actuary used to determine the adjustment required by VM-21 Section 3.I, the amount of the adjustment, and the rationale for why the adjustment is appropriate.

**VM-31 Section 3.D.5.f (New):**

5. Expenses – The following information regarding the expense assumptions used by the company in performing a principle-based valuation under VM-20:

f. Actual to Expected Analysis – The results of the most recently available actual to expected (without margins) analysis, including:

- i. Definitions of the expected basis used in all actual-to-expected ratios shown.
- ii. Comments addressing the conclusions drawn from the analysis.

**VM-31 Section 3.F.3.k (New – renumber current section 3.F.3.k):**

k. Actual to Expected Analysis – Disclosure of the results of the most recently available actual to expected (without margins) analysis for the assumptions including 3.F.3.d Expenses Other than Commissions, 3.F.3.e Partial Withdrawals, 3.F.3.g Annuitization Benefits and 3.F.3.h GMIB and GMWB Utilizations, including:

- i. Definitions of the expected basis used in all actual-to-expected ratios shown.
- ii. Comments addressing the conclusions drawn from the analysis.

**VM-31 Section 3.F.3.i.vii:**

Discussion of any assumptions made on mortality improvements both for applying up to and beyond the valuation date (if applicable), the support for such assumptions, and how such assumptions adjusted the modeled mortality. In a case where mortality improvement as discussed in VM-21 Section 11.C and Section 11.D has not been applied, confirmation that applying such improvement would not result in an increase in the SR.

**VM-31 Section 3.D.2.f:**

Projection Period – Disclosure of the length of projection period and comments addressing the conclusion that ~~no material amount of business remains at the end of the projection period~~ the projection of cash flows extends far enough into the future that no obligations remain for both the deterministic and stochastic models.

**Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force  
 Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

**Identification:**

PBR Staff of Texas Department of Insurance

**Title of the Issue:**

Companies appear unclear how to support the requirement that “company experience mortality rates shall not be lower than the mortality rates the company expects to emerge” in PBR Actuarial Report under VM-31 Section 3.D.3.1.iv.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

VM-31 Section 3.D.3.1.iv

January 1, 2023 NAIC *Valuation Manual*

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

We have observed a consistent issue, where there is not adequate support showing compliance with the requirement that “the company experience mortality rates shall not be lower than the mortality rates the company expects to emerge”. The most commonly provided support is a retrospective quantitative analysis (e.g., the actual to expected analysis), without any further discussion of the mortality rates that the company expects to emerge. The intention of this requirement is to discuss any forward-looking qualitative analysis, rather than just a historical quantitative analysis. The disclosure shall include, but is not limited to, the discussion of underwriting standard changes (or the lack thereof), distribution channel changes (or the lack thereof), any pandemic adjustments (or the lack thereof), and the results of ongoing experience monitoring.

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

2/24/23	SO		
Notes: APF 2023-04			

W:\National Meetings\2010\...\TF\LHA\

**VM-31 Section 3.D.3.I.iv**

Description and justification of the mortality rates the company actually expects to emerge, and a demonstration that the anticipated experience assumptions are no lower than the mortality rates that are actually expected to emerge. The description and demonstration should include the level of granularity at which the comparison is made (e.g., ordinary life, term only, preferred term, etc.). For the mortality rates that are actually expected to emerge, the description should include a forward-looking qualitative analysis which includes, but is not limited to, the discussion of any underwriting standard changes (or lack thereof), distribution channel changes (or lack thereof), any pandemic adjustments (or lack thereof), and the results of ongoing experience monitoring.

Draft: 3/7/23

Life Actuarial (A) Task Force  
Virtual Meeting  
February 23, 2023

The Life Actuarial (A) Task Force met Feb. 23, 2023. The following Task Force members participated: Cassie Brown, Chair, represented by Rachel Hemphill and Chonlada Pongpipattanachai (TX); Scott A. White, Vice Chair, represented by Craig Chupp (VA); Lori K. Wing-Heier represented by Sharon Comstock (AK); Ricardo Lara represented by Ahmad Kamil and Elaine Lam (CA); Andrew N. Mais represented by Wanchin Chou (CT); Doug Ommen represented by Mike Yanacheak (IA); Dana Popish Severinghaus represented by Vincent Tsang (IL); Vicki Schmidt represented by Nicole Boyd (KS); Timothy N. Schott represented by Marti Hooper (ME); Grace Arnold represented by Fred Andersen and Ben Slutsker (MN); Chlora Lindley-Myers represented by William Leung (MO); Eric Dunning represented by Michael Muldoon (NE); Marlene Caride represented by Seong-min Eom (NJ); Adrienne A. Harris represented by Bill Carmello (NY); Judith L. French represented by Peter Weber (OH); Michael Humphreys represented by Steve Boston (PA); Jon Pike represented by Tomasz Serbinowski (UT); and Allan L. McVey represented by Tim Sigman (WV).

1. Reported it Met Feb. 9 in Regulator-to-Regulator Session

Hemphill said that the Task Force met Feb. 9 in regulator-to-regulator session, pursuant to paragraph 6 (consultations with NAIC staff members related to NAIC technical guidance) of the NAIC Policy Statement on Open Meetings. Hemphill stated that Scott O’Neal (NAIC) provided the Task Force with technical guidance related to the economic scenario generator (ESG) corporate model and that state insurance regulators had a robust discussion of the American Academy of Actuaries’ (Academy’s) simplified corporate model and proposed acceptance criteria. Hemphill further said that regulators have two takeaways from the meeting: 1) they would like to understand the materiality of the difference between the results of the Academy’s simplified corporate model and the Conning corporate model; and 2) they want to know more about any issues with incomplete documentation and/or lack of transparency for both the Academy and Conning corporate models.

2. Adopted its 2022 Fall National Meeting Minutes

Chupp made a motion, seconded by Yanacheak, to adopt the Task Force’s Dec. 11–12, 2022, minutes (*see NAIC Proceedings – Fall 2022, Life Actuarial (A) Task Force*). The motion passed unanimously.

3. Exposed the Proposed Charges for the Proposed Economic Scenarios (E/A) Subgroup

Hemphill said that the Economic Scenario Generator Governance Drafting Group held discussions where it became clear that there was a need for a joint subgroup of the Task Force and the Life Risk-Based Capital (E) Working Group to support the implementation of the ESG and take on a governance role. Hemphill then walked through the proposed charges for the Economic Scenarios (E/A) Subgroup.

Yanacheak made a motion, seconded by Slutsker, to expose the proposed charges (Attachment Two-A) for the Economic Scenarios (E/A) Subgroup for a 21-day public comment period ending Mar 15. The motion passed unanimously.

4. Adopted APF 2022-10

Hemphill noted that the Task Force received a comment letter (Attachment Two-B) from the American Council of Life Insurers (ACLI) that noted support for both amendment proposal form (APF) 2022-10 and APF 2023-02.

Slutsker made a motion, seconded by Chupp to adopt APF 2022-10 (Attachment Two-C). The motion passed unanimously.

5. Adopted APF 2023-02

Lam made a motion, seconded by Chupp, to adopt APF 2023-02 (Attachment Two-D). The motion passed unanimously.

6. Exposed APF 2023-01

Slutsker made a motion, seconded by Leung, to deem APF 2023-01 (Attachment Two-E) non-substantive and expose it for a seven-day public comment period ending March 9. The motion passed unanimously.

Having no further business, the Life Actuarial (A) Task Force adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/A CMTE/LATF/ 2023-1-Spring/LATF Calls/02 23/Feb 23 Minutes.docx

The **Economic Scenarios (E/A) Subgroup** of the Life Risk-Based Capital (E) Working Group and the Life Actuarial (A) Task Force will:

- A. Monitor that the economic scenario governance framework is being appropriately followed by all relevant stakeholders involved in scenario delivery.
- B. Review material economic scenario generator updates, either driven by periodic model maintenance or changes to the economic environment and provide recommendations.
- C. Regularly review key economic conditions and metrics to evaluate the need for off-cycle or significant economic scenario generator updates and maintain a public timeline for economic scenario generator updates.
- D. Support the implementation of an economic scenario generator for use in statutory reserve and capital calculations.

February 22, 2023

Rachel Hemphill  
Chair, NAIC Life Actuarial (A) Task Force (LATF)

Re: Exposed APFs from the February 2, 2023, LATF Meeting

Dear Ms. Hemphill:

The American Council of Life Insurers (ACLI) is appreciative of the opportunity to comment on several of the APFs that were exposed by LATF during their meeting on February 2, 2023. This includes APF 2022-09 (VM-31 Reporting Issues), APF 2022-10 (UL with Non-material Secondary Guarantee and IUL NPR), and APF 2023-02 (Supplement Reporting and Reconciliation).

ACLI is supportive of the changes proposed within these APFs and would welcome their adoption at a future LATF meeting.

We will need additional time for our comments on APF 2023-03 but will aim to have responses on items 3 and 4 in that APF by the NAIC Spring Meeting materials cutoff. Additional feedback on items 1 and 2 will be provided as soon as feasible.

We look forward to the discussion at a future LATF meeting. Thank you.

A handwritten signature in cursive script that reads 'B Bayerle'.

A handwritten signature in cursive script that reads 'Colin Masterson'.

**Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force  
 Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Ben Slutsker, Minnesota Department of Commerce  
 Elaine Lam and Thomas Reedy, California Department of Insurance

Some policies in the ULSG Reserving Category may have a non-material secondary guarantee. This makes them eligible to be excluded from both DR and SR calculations if they pass both the DET and the SET. Currently, the language in VM-20 Section 2.A.2 does not address this possibility, and thus does not clearly state the requirement for those policies. Furthermore, aspects of the NPR calculation may have been unclear for certain indexed universal life policies that pass exclusion tests.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

Valuation Manual (January 1, 2023 edition), VM-20 Section 2.A.2, Section 3.B.5, and Section 3.B.6

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

The purpose of this APF is to add language to address the possibility of policies in the ULSG Reserving Category having a non-material secondary guarantee, and thus becoming excluded from both DR and SR calculations if they pass both the DET and the SET. The new proposed subsection within VM-20 Section 2.A.2 clarifies the total minimum reserve calculation for these policies. The new proposed Guidance Note immediately following the new proposed subsection clarifies when the subsection applies, which is only in cases of UL policies with non-material SGs. In addition, edits are proposed to Section 3.B.5 and 3.B.6 of VM-20 to have the NPR on indexed universal life policies that pass both exclusion tests follow VM-A and VM-C calculations.

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

**NAIC Staff Comments:**

<b>Dates:</b> Received	Reviewed by Staff	Distributed	Considered
<u>12/1/2022</u>	<u>SO</u>		
<b>Notes:</b> <u>APF 2022-10</u>			

W:\National Meetings\2010...\TF\LHA\

New proposed language is in redline below:

**VM-20 Section 2.A.2**

2. ULSG Reserving Category — All policies and riders belonging to the ULSG Reserving Category are to be included in Section 2.A.2.~~c~~<sup>b</sup> unless the company has elected to exclude a group of them from the SR calculation or both the DR and SR calculations and has applied the ~~SET~~applicable exclusion test(s) defined in Section 6, passed the test(s) and documented the results.

a. For the group of policies and riders for which the company did not compute the DR nor the SR: the sum of the policy minimum NPRs for those policies.

**Guidance Note:** This may be applicable for a group of ULSG policies that meet the definition of a “non-material secondary guarantee” and passes both the DET and the SET.

~~a~~.b. For the group of policies and riders for which the company did not compute the SR: the sum of the policy minimum NPRs for those policies plus the excess, if any, of the DR for those policies determined pursuant to Section 4 over the quantity (A–B), where A = the sum of the policy minimum NPRs for those policies, and B = any due and deferred premium asset held on account of those policies.

~~b~~.c. For the group of policies and riders for which the company computes all three reserve calculations: the sum of the policy minimum NPRs for those policies plus the excess, if any, of the greater of the DR for those policies determined pursuant to Section 4 and the SR for those policies determined pursuant to Section 5 over the quantity (A–B), where A = the sum of the policy minimum NPRs for those policies, and B = any due and deferred premium asset held on account of those policies.

~~e~~.d. The due and deferred premium asset, if any, shall be based on the valuation net premiums computed in accordance with Section 3.B.5.d, for the base policy, determined without regard to any NPR floor amount from Section 3.D.2.

**VM-20 Section 3.B.5**

5. For all policies and riders within the ULSG Reserving Category, other than indexed universal life policies for which the company did not compute the DR nor the SR, the NPR shall be determined as follows:

a. If the policy duration on the valuation date is prior to the point when all secondary guarantee periods have expired, the NPR shall be the greater of the reserve amount determined in Section 3.B.5.c and the reserve amount determined in Section 3.B.5.d, subject to the floors specified in Section 3.D.2.

...

**VM-20 Section 3.B.6**

6. For all policies and riders within the All Other VM-20 Reserving Category, as well as indexed universal life policies for which the company did not compute the DR nor the SR, the NPR shall be determined pursuant to applicable methods in VM-A and VM-C for the basic reserve. The mortality tables to be used are those defined in Section 3.C.1 and in VM-M Section 1.H.

**Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force  
 Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

**Identification:**

Elaine Lam, Office of PBR, California Department of Insurance (CDI)

**Title of Issue:**

Proposal to add disclosure requirements in VM-31, and clarify language in the Annual Statement Instructions related to reporting in the VM-20 Reserves Supplement.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

Valuation Manual (January 1, 2023 edition) – Proposal to add new section as VM-31 Section 3.C.11

2022 Annual Statement Instructions – Proposal to add a sentence to the instructions for “VM-20 Reserves Supplement”, starting on page 807

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

1. Add disclosure requirements in VM-31 for the Company to reconcile reported values and explain differences (if any) between reported values in the VM-31 Report (High-Level Results section), in the VM-20 Reserves Supplement (Parts 1A and 1B), and in the Annual Statement (Exhibit 3 for Separate Account values, Exhibit 5 for General Account values, and any other). Regulators have found inconsistencies in the values reported in the different locations. Moreover, without these disclosures, regulators have had a difficult time reconciling values and checking for misreported values.

2. Make a referral to the Blanks (E) Working Group to update the Annual Statement Instructions for the VM-20 Reserves Supplement to clarify that separate account amounts should be included in the Supplement. There has been inconsistent reporting by companies because the current instructions do not specifically address the treatment of separate account amounts.

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

<b>Notes:</b> <u>APF 2023-02</u>			

W:\National Meetings\2010...\TF\LHA\

New proposed language in the *Valuation Manual* is in redline below:

**(new section)**

**VM-31 Section 3.C.11**

11. Reconciliation of Reported Values – A reconciliation of reported values and an explanation of differences, if any, between reported values in Section 3.B.5 (High-Level Results), in the VM-20 Reserves Supplement – Part 1A and Part 1B, and in the Annual Statement (Exhibit 3 for Separate Account values, Exhibit 5 for General Account values, and any other).

For referral to the Blanks (E) Working Group, new proposed language in the Annual Statement Instructions is in redline below:

**VM-20 RESERVES SUPPLEMENT**

**Life Insurance Reserves Valued According to VM-20 by Product Type**

This Supplement provides information on the reserves required to be calculated by Section VM-20 of the *Valuation Manual*. This includes the Net Premium Reserve and, as applicable, the Deterministic Reserve and the Stochastic Reserve. Only business issued on or after Jan. 1, 2017, valued by the requirements of VM-20 should be reported in Part 1A and Part 1B. Part 1A and Part 1B are intended to aid regulators in the analysis of reserves as determined under Section VM-20 of the *Valuation Manual* for both the prior and current year.

This Supplement also provides information regarding business where VM-20 of the *Valuation Manual* is not required to be applied. Companies exempted from the requirements of Section VM-20 are not required to complete Part 1A or Part 1B of this Supplement but must complete Part 2 or Part 3 as applicable.

**VM-20 RESERVES SUPPLEMENT – PART 1A**

**Life Insurance Reserves Valued According to VM-20 by Product Type**

Part 1A of this Supplement breaks out, by product type, the prior year and current year reported reserves on a Post-Reinsurance-Ceded and Pre-Reinsurance-Ceded basis as defined in Section 8.D of Section VM-20 of the *Valuation Manual*. The Due and Deferred Premium Asset for the current year is also shown.

Section VM-20 of the *Valuation Manual* requires that the Post-Reinsurance-Ceded Reserve be determined by three VM-20 Reserving Categories: Term Insurance, Universal Life with Secondary Guarantees (ULSG) and all other. Term Insurance should be reported on line 1.1. ULSG, including Variable Universal Life with a secondary guarantee, Indexed life insurance with a secondary guarantee, regular Universal Life with a secondary guarantee, and ULSG policies with a non-material secondary guarantee as defined in Section VM-01 of the *Valuation Manual*, should be reported on line 1.2. Each of the other products reported in lines 1.3 – 1.8 should be determined as the sum of the policy reserves using the policy reserves determined following the allocation process of VM-20 Section 2. A similar process should be used for each of the pre-reinsurance-ceded reserves. Both Post-Reinsurance-Ceded Reserves and Pre-Reinsurance-Ceded Reserves, as defined in VM-20, include separate account amounts where applicable to the policies in scope.

**Columns 1 & 2 – Reported Reserve**

Provide the reported reserve, in whole dollars, for the prior year and current year for each line item. Post-Reinsurance-Ceded is net of reinsurance ceded. Pre-Reinsurance-Ceded should be prior to any reinsurance ceded and include reinsurance assumed. Sections 2 and 8 in the *Valuation Manual* further describe the required reserve and treatment of reinsurance. The reported reserve for the current year should reflect all policies in force as of the end of the current year. The reported reserve for the prior year should reflect all policies in force as of the end of the prior year.

Etc...

**Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force  
 Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

**Identification:**

PBR Staff of Texas Department of Insurance

**Title of the Issue:**

The values of the starting assets defined in the two sentences in VM-21 Section 4.D.1.a are not identical.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

VM-21 Section 4.D.1.a in January 1, 2023 NAIC Valuation Manual

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

1. Starting Asset Amount

a. For the projections of accumulated deficiencies, the value of assets at the start of the projection shall be set equal to the approximate value of statutory reserves at the start of the projection plus the allocated amount of PIMR attributable to the assets selected. Assets shall be valued consistently with their annual statement values. The amount of such asset values shall equal the sum of the following items plus the allocated amount of PIMR attributable to the assets selected, all as of the start of the projection:

- i. All of the separate account assets supporting the contracts;
- ii. Any hedge instruments held in support of the contracts being valued; and
- iii. An amount of assets held in the general account equal to the approximate value of statutory reserves as of the start of the projections less the amount in (i) and (ii).

4. State the reason for the proposed amendment? (You may do this through an attachment.)

The edit is necessary to have the identical value of the assets at the start of the projection as in the first sentence (i.e., For the projections of accumulated deficiencies, the value of assets at the start of the projection shall be set equal to the approximate value of statutory reserves at the start of the projection **plus the allocated amount of PIMR attributable to the assets selected**).

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

<b>Notes:</b> APF 2023-01			

W:\National Meetings\2010...\TF\LHA\

Draft: 3/7/23

Life Actuarial (A) Task Force  
Virtual Meeting  
February 2, 2023

The Life Actuarial (A) Task Force met Feb. 2, 2023. The following Task Force members participated: Cassie Brown, Chair, represented by Rachel Hemphill and Iris Huang (TX); Scott A. White, Vice Chair, represented by Craig Chupp (VA); Lori Wing-Heier represented by Sharon Comstock (AK), Ricardo Lara represented by Ahmad Kamil and Elaine Lam (CA); Andrew N. Mais represented by Wanchin Chou (CT); Doug Ommen represented by Mike Yanacheak (IA); Amy L. Beard represented by Scott Shover (IN); Vicki Schmidt represented by Nicole Boyd (KS); Timothy N. Schott represented by Marti Hooper (ME); Grace Arnold represented by Fred Andersen and Ben Slutsker (MN); Chlora Lindley-Myers represented by William Leung (MO); Eric Dunning represented by Michael Muldoon (NE); Marlene Caride represented by Seong-min Eom (NJ); Adrienne A. Harris represented by Bill Carmello (NY); Judith L. French represented by Peter Weber (OH); Glen Mulready represented by Andrew Schallhorn (OK); Michael Humphreys represented by Steve Boston (PA); Jon Pike represented by Tomasz Serbinowski (UT).

1. Exposed APF 2022-09

Huang noted that amendment proposal form (APF) 2022-09 covers a series of VM-31, PBR Actuarial Report Requirements for Business Subject to a Principle-Based Valuation, issues. Chupp asked how the support required in the proposed new VM-31 Section 3.D.11.k would differ from the current requirement for a demonstration available on request that the impact of each approximation and/or simplification does not materially understate the reserves. Hemphill replied that the new VM-31 Section 3.D.11.k would require a holistic discussion of the simplifications, and interactions between simplifications, and why they would not materially understate or bias the reserve downwards in aggregate, whereas the current demonstration for each individual simplification that is available upon request requires a rigorous analysis with quantitative support. Chupp then also mentioned a drafting error he found after reviewing APF 2022-09.

Slutsker made a motion, seconded by Yanacheak, to expose APF 2022-09 with a correction of the drafting error (Attachment Three-A) for a 21-day public comment period ending Feb. 22. The motion passed unanimously.

2. Exposed APF 2022-10

Slutsker introduced APF 2022-10, noting that it clarifies the VM-20, Requirements for Principle-Based Reserves for Life Products, valuation requirements for universal life with secondary guarantee (ULSG) policies with a non-material secondary guarantee and indexed universal life policies that pass exclusion tests.

Slutsker made a motion, seconded by Chupp, to expose APF 2022-10 (Attachment Three-B) for a 21-day public comment period ending Feb. 22. The motion passed unanimously.

3. Exposed APF 2023-02

Lam said that the purpose of APF 2023-02 is to add additional disclosure requirements to VM-31 to reconcile reported values to the Annual Statement and to make a referral to the Blanks (E) Working Group to update the instructions for the VM-20 Reserves Supplement.

Lam made a motion, seconded by Chupp, to expose APF 2023-02 (Attachment Three-C) for a 21-day public comment period ending Feb. 22. The motion passed unanimously.

#### 4. Exposed APF 2023-03

Hemphill walked through the series of clean-up items in APF 2023-03 for VM-20; VM-21, Requirements for Principle-Based Reserves for Variable Annuities; and VM-31. Hemphill noted that the change to the net premium reserve (NPR) formula in VM-20 Section 3.B.5.c.ii.4 would not generally be expected to result in material changes to the NPR calculation.

Slutsker made a motion, seconded by Weber, to expose APF 2023-03 (Attachment Three-D) for a 21-day public comment period ending Feb. 22. The motion passed unanimously.

Having no further business, the Life Actuarial (A) Task Force adjourned.

**Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force  
Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

**Identification:**

PBR Staff of Texas Department of Insurance

**Title of the Issue:**

VM-31 Reporting Issues:

1. Senior Management and Qualified Actuary are distinct, layered reporting roles in VM-G.
2. Life and VA Reports do not discuss the aggregate impact of approximations and simplifications.
3. There are three issues in VM-31's scenario generation documentation for VM-21 in 3.F.9:
  - a) In addition to supporting that the number of scenarios is appropriate for the CTE 70 calculation, the company should also support that the number of scenarios is appropriate for the CTE 98 calculation.
  - b) The version of the ESG should be included and the parameters of the scenario generation should be available upon request.
  - c) A section reference needs to be corrected: VM-21 Section 8.G.1 does not exist.
4. VM-21 is missing consideration of use of a date prior to the valuation date for the SR and the additional standard projection amount, which is inconsistent with the reporting in VM-31 Section 3.F.12.e.
5. VM-31 should specifically address actual to expected analyses for certain liability assumptions such as expenses, partial withdrawals, annuitizations as well as GMIB/ GMWB utilization.
6. Refine VM-31 documentation to address mortality improvement requirements in VM-21 Section 11.C and Section 11.D.
7. The requirement for the projection period in VM-20 Section 7.A.1.d is not correctly reflected in VM-31 Section 3.D.2.f.

2. Identify the document, including the date if the document is "released for comment," and the location in the document where the amendment is proposed:

VM-21 Section 3.I (new), VM-31 Section 3.D.2.f, VM-31 Section 3.D.5.f (new), VM-31 Section 3.D.11.k (new – renumber current 3.D.11.k and 3.D.11.l), VM-31 Section 3.D.14.c, VM-31 Section 3.F.2.f (new – renumber current 3.F.2.f and 3.F.2.g), VM-31 Section 3.F.3.k (new), VM-31 Section 3.F.3.i.vii, VM-31 Section 3.F.9, VM-31 Section 3.F.12.e (remove – renumber current Sections from 3.F.12.f to 3.F.12.m), VM-31 Section 3.F.13.e (New), VM-31 Section 3.F.16.c

January 1, 2023 NAIC *Valuation Manual*

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on "track changes" in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

1. An internal control certification from Senior Management is required by VM-31. It is not appropriate for the qualified actuary to complete the certification for senior management since these two roles have different responsibilities under VM-G, representing distinct layers of reporting and oversight. Senior

management receives reporting from the qualified actuary for principle-based valuation under VM-20 and VM-21.

2. In order to better understand the aggregate impact of approximations and simplifications used by the company, VM-31 Life Report and VA Report should add a new section to discuss it. If regulators were to gain comfortable with documentation of the aggregate impact, then the requirement that each individual approximation or simplification not bias the reserves downward could be revisited. For context, here are the current sections on approximations, simplifications, and modeling efficiency techniques, which only address the individual impacts.

**VM-31 Section 3.D.11.j**

*j. Approximations, Simplifications, and Modeling Efficiency Techniques – A description of each approximation, simplification or modeling efficiency technique used in reserve calculations, and a statement that the required VM-20 Section 2.G demonstration is available upon request and shows that: 1) the use of each approximation, simplification, or modeling efficiency technique does not understate the reserve by a material amount; and 2) the expected value of the reserve is not less than the expected value of the reserve calculated that does not use the approximation, simplification, or modeling efficiency technique.*

**VM-31 Section 3.F.2.e**

*e. Approximations, Simplifications, and Modeling Efficiency Techniques – A description of each approximation, simplification or modeling efficiency technique used in reserve or TAR calculations, and a statement that the required VM-21 Section 3.H demonstration is available upon request and shows that: 1) the use of each approximation, simplification, or modeling efficiency technique does not understate TAR by a material amount; and 2) the expected value of TAR is not less than the expected value of TAR calculated without using the approximation, simplification, or modeling efficiency technique.*

If discussions of the aggregate impact of approximations, simplifications, and modeling efficiency techniques were included, then there could be a future consideration of the removal of the requirement in VM-20 Section 2.G and VM-21 Section 3.H that approximations, simplifications, and modeling efficiency techniques not bias the reserve downward.

3. For VA, support should also be provided for the number of scenarios used for the C-3 RBC calculation based on CTE 98. For VA, the version of ESG should be included. Correct section reference.
4. VM-21 is missing consideration of use of a date prior to the valuation date for the additional standard projection amount, whereas VM-31 Section 3.F.12.e implies that the intent was for VM-21 to have such a consideration or allowance. VM-20 explicitly addresses such a consideration in VM-20 Section 2.E, and we use that language as a starting point for VM-21.

**VM-20 Section 2.E**

*The company may calculate the DR and the SR as of a date no earlier than three months before the valuation date, using relevant company data, provided an appropriate method is used to adjust those reserves to the valuation date. Company data used for experience studies to determine prudent estimate assumptions are not subject to this three-month limitation.*

5. In order for regulator reviewers to be able to better understand and evaluate a company's liability assumptions for expenses, partial withdrawals, annuitizations, as well as GMIB and GMWB utilization, a comparison of actual to expected should specifically be referenced in VM-31. We have used the

language for actual to expected policyholder behavior analysis in VM-31 Section 3.D.4.c (Life Report) as a format for a general A/E request.

**VM-31 Section 3.D.4.c**

*Actual to Expected Policyholder Behavior Analysis – The results of the most recently available actual to expected (without margins) analysis, including:*

- i. Definitions of the expected basis used in all actual-to-expected ratios shown.*
- ii. Comments addressing the conclusions drawn from the analysis.*

6. Adding documentation to confirm that the company has applied historical and future mortality improvement when it would result in an increase in the stochastic reserve as required by VM-21 Section 11.C and Section 11.D.
7. The language in VM-31 should be modified to correctly require reporting on VM-20’s requirement for the projection period. For reference, here is the relative passage of VM-20:

**VM-20 Section 7.A.1.d:**

*Projects cash flows for a period that extends far enough into the future so that no obligations remain.*

---

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

**VM-31 Section 3.D.14.c:**

c. Senior Management on Internal Controls – A certification from senior management, other than the qualified actuary, regarding the effectiveness of internal controls with respect to the principle-based valuation under VM-20, as provided in Section 12B(2) of Model #820.

**VM-31 Section 3.F.16.c:**

c. Senior Management on Internal Controls – A certification from senior management, other than the qualified actuary, regarding the effectiveness of internal controls with respect to the principle-based valuation under VM-21, as provided in Section 12B(2) of Model #820.

**VM-31 Section 3.D.11.k (new – renumber current 3.D.11.k and 3.D.11.l):**

k. Aggregate Impact of Approximations, Simplifications and Modeling Efficiency Techniques – Support that the aggregate impact of approximations and simplifications does not result in a material understatement of the reserve. This should include consideration of not just the magnitude of the sum of the individual impacts when considered in isolation, but also consideration of any potential interaction of approximations, simplifications, and modeling efficiency techniques.

**VM-31 Section 3.F.2.f (new– renumber current 3.F.2.f and 3.F.2.g):**

f. Aggregate Impact of Approximations, Simplifications and Modeling Efficiency Techniques – Support that the aggregate impact of approximations and simplifications does not result in a material understatement of TAR. This should include consideration of not just the magnitude of the sum of the individual impacts when considered in isolation, but also consideration of any potential interaction of approximations, simplifications, and modeling efficiency techniques.

**VM-31 Section 3.F.9:**

9. Scenario Generation – The following information regarding the scenario generation for interest rates and equity returns used by the company in performing a principle-based valuation under VM-21 and in determining the C-3 RBC amount under LR027, as it applies to the calculation of the SR, TAR and CTEPA (if used):

- a. Sources – Identification of the sources or generators used to produce the scenarios.  
Versions should be identified and parameters to the scenario generation shall be available upon request.
- b. Number of Scenarios – Number of scenarios used, rationale for that number, methods used to determine the sampling error of the CTE 70 and CTE 98 statistic when using the selected number of scenarios, and documentation that any resulting understatement in reserve or TAR, as compared with that resulting from running additional scenarios, is not material, as discussed in VM-21 Section 8.F.
- c. Scenario Reduction Techniques – If a scenario reduction technique is used, a description of the technique and documentation of how the company determined that the technique does not lead to a material understatement of results.
- d. Time-Step – Identification of the time-step of the model (e.g., monthly, quarterly, annual), and results of testing performed to determine that use of a more frequent time-step does not materially increase reserves, as discussed in VM-21 Section 4.F.1.

Deleted: 8.G.1

**VM-21 Section 3.I (New):**

The company may calculate the SR and the additional standard projection amount as of a date no earlier than three months before the valuation date, using relevant company data, provided an appropriate method is used to adjust

those amounts to the valuation date. Company data used for experience studies to determine prudent estimate assumptions are not subject to this three-month limitation.

**VM-31 Section 3.F.12.e (remove – renumber current Sections from 3.F.12.f to 3.F.12.m):**

**VM-31 Section 3.F.13.e (New):**

Calculations as of a Date Preceding the Valuation Date – If the SR and/or the additional standard projection amount were developed as of a date prior to the valuation date, disclosure of the prior date, the SR and the additional standard projection amount of the in force on the prior date, and an explanation of why the use of such a date will not produce a material change in the results compared to if the results were based on the valuation date. Such an explanation shall describe the process that the qualified actuary used to determine the adjustment required by VM-21 Section 3.I, the amount of the adjustment, and the rationale for why the adjustment is appropriate.

**Deleted: Prior Date** – If the additional standard projection amount was developed as of a date prior to the valuation date, disclosure of the prior date, the additional standard projection amount of the in force on the prior date, and an explanation of why the use of such a date will not produce a material change in the results compared to if the results were based on the valuation date. Such an explanation shall describe the process that the qualified actuary used to determine the adjustment, the amount of the adjustment, and the rationale for why the adjustment is appropriate.¶

**VM-31 Section 3.D.5.f (New):**

5. Expenses – The following information regarding the expense assumptions used by the company in performing a principle-based valuation under VM-20:

- f. Actual to Expected Analysis – The results of the most recently available actual to expected (without margins) analysis, including:
  - i. Definitions of the expected basis used in all actual-to-expected ratios shown.
  - ii. Comments addressing the conclusions drawn from the analysis.

**VM-31 Section 3.F.3.k (New – renumber current section 3.F.3.k):**

- k. Actual to Expected Analysis – Disclosure of the results of the most recently available actual to expected (without margins) analysis for the assumptions including 3.F.3.d Expenses Other than Commissions, 3.F.3.e Partial Withdrawals, 3.F.3.g Annuitization Benefits and GMIB and 3.F.3.h GMWB Utilizations, including:
  - i. Definitions of the expected basis used in all actual-to-expected ratios shown.
  - ii. Comments addressing the conclusions drawn from the analysis.

**VM-31 Section 3.F.3.i.viii:**

Discussion of any assumptions made on mortality improvements both for applying up to and beyond the valuation date (if applicable), the support for such assumptions, and how such assumptions adjusted the modeled mortality. In a case where mortality improvement as discussed in VM-21 Section 11.C and Section 11.D has not been applied, confirmation that applying such improvement would not result in an increase in the SR.

**VM-31 Section 3.D.2.f:**

Projection Period – Disclosure of the length of projection period and comments addressing the conclusion that the projection of cash flows extends far enough into the future that no obligations remain for both the deterministic and stochastic models.

**Deleted:** no material amount of business remains at the end of the projection period

**Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force  
 Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Ben Slutsker, Minnesota Department of Commerce  
 Elaine Lam and Thomas Reedy, California Department of Insurance

Some policies in the ULSG Reserving Category may have a non-material secondary guarantee. This makes them eligible to be excluded from both DR and SR calculations if they pass both the DET and the SET. Currently, the language in VM-20 Section 2.A.2 does not address this possibility, and thus does not clearly state the requirement for those policies. Furthermore, aspects of the NPR calculation may have been unclear for certain indexed universal life policies that pass exclusion tests.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

Valuation Manual (January 1, 2023 edition), VM-20 Section 2.A.2, Section 3.B.5, and Section 3.B.6

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

The purpose of this APF is to add language to address the possibility of policies in the ULSG Reserving Category having a non-material secondary guarantee, and thus becoming excluded from both DR and SR calculations if they pass both the DET and the SET. The new proposed subsection within VM-20 Section 2.A.2 clarifies the total minimum reserve calculation for these policies. The new proposed Guidance Note immediately following the new proposed subsection clarifies when the subsection applies, which is only in cases of UL policies with non-material SGs. In addition, edits are proposed to Section 3.B.5 and 3.B.6 of VM-20 to have the NPR on indexed universal life policies that pass both exclusion tests follow VM-A and VM-C calculations.

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

NAIC Staff Comments:

Dates: Received	Reviewed by Staff	Distributed	Considered
12/1/2022	SO		
Notes: APF 2022-10			

W:\National Meetings\2010\...TF\LHA\

New proposed language is in redline below:

**VM-20 Section 2.A.2**

2. ULSG Reserving Category — All policies and riders belonging to the ULSG Reserving Category are to be included in Section 2.A.2.g unless the company has elected to exclude a group of them from the SR calculation or both the DR and SR calculations and has applied the applicable exclusion test(s) defined in Section 6, passed the test(s) and documented the results.

Deleted: b  
Deleted: SET

a. For the group of policies and riders for which the company did not compute the DR nor the SR: the sum of the policy minimum NPRs for those policies.

**Guidance Note:** This may be applicable for a group of ULSG policies that meet the definition of a “non-material secondary guarantee” and passes both the DET and the SET.

b. For the group of policies and riders for which the company did not compute the SR: the sum of the policy minimum NPRs for those policies plus the excess, if any, of the DR for those policies determined pursuant to Section 4 over the quantity (A–B), where A = the sum of the policy minimum NPRs for those policies, and B = any due and deferred premium asset held on account of those policies.

c. For the group of policies and riders for which the company computes all three reserve calculations: the sum of the policy minimum NPRs for those policies plus the excess, if any, of the greater of the DR for those policies determined pursuant to Section 4 and the SR for those policies determined pursuant to Section 5 over the quantity (A–B), where A = the sum of the policy minimum NPRs for those policies, and B = any due and deferred premium asset held on account of those policies.

d. The due and deferred premium asset, if any, shall be based on the valuation net premiums computed in accordance with Section 3.B.5.d, for the base policy, determined without regard to any NPR floor amount from Section 3.D.2.

**VM-20 Section 3.B.5**

5. For all policies and riders within the ULSG Reserving Category, other than indexed universal life policies for which the company did not compute the DR nor the SR, the NPR shall be determined as follows:

a. If the policy duration on the valuation date is prior to the point when all secondary guarantee periods have expired, the NPR shall be the greater of the reserve amount determined in Section 3.B.5.c and the reserve amount determined in Section 3.B.5.d, subject to the floors specified in Section 3.D.2.  
...

**VM-20 Section 3.B.6**

6. For all policies and riders within the All Other VM-20 Reserving Category, as well as indexed universal life policies for which the company did not compute the DR nor the SR, the NPR shall be determined pursuant to applicable methods in VM-A and VM-C for the basic reserve. The mortality tables to be used are those defined in Section 3.C.1 and in VM-M Section 1.H.

Deleted: .

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

1. Add disclosure requirements in VM-31 for the Company to reconcile reported values and explain differences (if any) between reported values in the VM-31 Report (High-Level Results section), in the VM-20 Reserves Supplement (Parts 1A and 1B), and in the Annual Statement (Exhibit 3 for Separate Account values, Exhibit 5 for General Account values, and any other). Regulators have found inconsistencies in the values reported in the different locations. Moreover, without these disclosures, regulators have had a difficult time reconciling values and checking for misreported values.

2. Make a referral to the Blanks (E) Working Group to update the Annual Statement Instructions for the VM-20 Reserves Supplement to clarify that separate account amounts should be included in the Supplement. There has been inconsistent reporting by companies because the current instructions do not specifically address the treatment of separate account amounts.

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

<b>Notes:</b> APF 2023-02			

W:\National Meetings\2010\...\TF\LHA\

New proposed language in the *Valuation Manual* is in redline below:

(new section)

**VM-31 Section 3.C.11**

11. **Reconciliation of Reported Values** – A reconciliation of reported values and an explanation of differences, if any, between reported values in Section 3.B.5 (High-Level Results), in the VM-20 Reserves Supplement – Part 1A and Part 1B, and in the Annual Statement (Exhibit 3 for Separate Account values, Exhibit 5 for General Account values, and any other).

For referral to the Blanks (E) Working Group, new proposed language in the Annual Statement Instructions is in redline below:

**VM-20 RESERVES SUPPLEMENT**

**Life Insurance Reserves Valued According to VM-20 by Product Type**

This Supplement provides information on the reserves required to be calculated by Section VM-20 of the *Valuation Manual*.

This includes the Net Premium Reserve and, as applicable, the Deterministic Reserve and the Stochastic Reserve. Only

business issued on or after Jan. 1, 2017, valued by the requirements of VM-20 should be reported in Part 1A and Part 1B.

Part 1A and Part 1B are intended to aid regulators in the analysis of reserves as determined under Section VM-20 of the

*Valuation Manual* for both the prior and current year.

This Supplement also provides information regarding business where VM-20 of the *Valuation Manual* is not required to be

applied. Companies exempted from the requirements of Section VM-20 are not required to complete Part 1A or Part 1B of

this Supplement but must complete Part 2 or Part 3 as applicable.

**VM-20 RESERVES SUPPLEMENT – PART 1A**

**Life Insurance Reserves Valued According to VM-20 by Product Type**

Part 1A of this Supplement breaks out, by product type, the prior year and current year reported reserves on a Post-

Reinsurance-Ceded and Pre-Reinsurance-Ceded basis as defined in Section 8.D of Section VM-20 of the *Valuation Manual*.

The Due and Deferred Premium Asset for the current year is also shown.

Section VM-20 of the *Valuation Manual* requires that the Post-Reinsurance-Ceded Reserve be determined by three VM-20

Reserving Categories: Term Insurance, Universal Life with Secondary Guarantees (ULSG) and all other. Term Insurance should be reported on line 1.1. ULSG, including Variable Universal Life with a secondary guarantee, Indexed life insurance with a secondary guarantee, regular Universal Life with a secondary guarantee, and ULSG policies with a non-material secondary guarantee as defined in Section VM-01 of the *Valuation Manual*, should be reported on line 1.2. Each of the other products reported in lines 1.3 – 1.8 should be determined as the sum of the policy reserves using the policy reserves determined following the allocation process of VM-20 Section 2. A similar process should be used for each of the pre-reinsurance-ceded reserves. **Both Post-Reinsurance-Ceded Reserves and Pre-Reinsurance-Ceded Reserves, as defined in VM-20, include separate account amounts where applicable to the policies in scope.**

Columns 1 & 2 – Reported Reserve

Provide the reported reserve, in whole dollars, for the prior year and current year for each line item.

Post-Reinsurance-Ceded is net of reinsurance ceded. Pre-Reinsurance-Ceded should be prior to any reinsurance ceded and include reinsurance assumed. Sections 2 and 8 in the *Valuation Manual* further describe the required reserve and treatment of reinsurance. The reported reserve for the current year should reflect all policies in force as of the end of the current year. The reported reserve for the prior year should reflect all policies in force as of the end of the prior year.

Etc...

**Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force  
Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

**Identification:**

PBR Staff of Texas Department of Insurance

**Title of the Issue:**

Address several clean-up items for VM-20, as well as related VM-21 and VM-31 Sections.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

VM- 20 Section 3.B.5.c.ii.4, VM-20 Section 5.B.3, VM-20 Section 7.E.2 and Guidance Note below, VM-21 Section 4.D.4.c, VM-20 Section 7.K.3, VM-31 Section 3.D.6.f, VM-20 Section 9.A.4

January 1, 2023 NAIC Valuation Manual

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

1. The formula for calculating the NPR for ULSG based on the value of the SG in VM-20 Section 3.B.5.c.ii.4 excludes the EA from the scaling of the NPR. This is inconsistent with the formula for calculating the NPR for ULSG disregarding the SG in VM-20 Section 3.B.5.d.iv. The scale is the prefunding ratio of actual SG (denoted ASG) to fully funded SG (denoted FFSG), and it makes intuitive sense that the NPR would be scaled to decrease or increase relative to the level of funding of the SG.
2. The VM-20 Section 5.B.3 stochastic reserve methodology is missing an aggregate cash surrender value (CSV) floor for scenario reserves before calculating CTE70. This allows scenario reserves that exceed the CSV to be dampened or eliminated by being averaged with scenario reserves. A CSV floor in the NPR does not address this concern, because it does not reflect the scenario reserves in the SR that exceed the CSV. In contrast, in VM-21 Section 4.B.1 scenario reserves are floored at the aggregate CSV as appropriate. Scenario reserves, as the asset requirement for specific scenarios, should be held at or above the CSV.
3. Add consideration to VM-20 Section 7.E.2 consistent with VM-21 Section 4.D.4.c’s requirement on the company’s assumed cost of borrowing along with the associated Guidance Note. Editorial clarifications to the existing Guidance Note in VM-21.
4. VM-20 Section 7.K.3 should clarify the requirement to reflect the hedge modeling error or insufficiency. Related to this change, more discussion about the hedging strategy and hedge modeling should be added to the Life Report section of the VM-31 Section 3.D.6.f report.

5. VM-20 Section 9.A.4 implies companies can elect to stochastically model risk factors other than interest rates & equities. Stochastic assumptions are not subject to the requirements of Section 9 relating to prudent estimate assumptions. Nor are any guidance/specific requirements provided if companies elect to stochastically model other risk factors. Add consideration to VM-20 consistent with VM-21 Section 12.B.4’s requirement about the risk factors other than interest rates & equities that are stochastically modelled, which was added to VM-21 for this same reasoning.

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

NAIC Staff Comments:

<a href="#">1/30/23</a>	<a href="#">SO</a>		
Notes: <a href="#">APF 2023-03</a>			

W:\National Meetings\2010...\TF\LHA\

**VM-20 Section 3.B.5.c.ii.4**

- 4) The NPR for an insured age x at issue at time t shall be according to the formula below:

$$\text{Min} \left[ \frac{ASG_{x+t}}{FFSG_{x+t}}, 1 \right] \cdot (NSP_{x+t} - E_{x+t})$$

**VM-20 Section 5.B.3**

3. Set the scenario reserve equal to the sum of the statement value of the starting assets across all model segments and the maximum of the amounts calculated in Subparagraph 2 above.

The scenario reserve for any given scenario shall not be less than the cash surrender value in aggregate on the valuation date for the group of contracts modeled in the projection.

**VM-20 Section 7.E.2**

2. Model at each projection interval any disinvestment in a manner that is consistent with the company’s investment policy and that reflects the company’s cost of borrowing where applicable, provided that the assumed cost of borrowing is not lower than the rate at which positive cash flows are reinvested in the same time period, taking into account duration, ratings, and other attributes of the borrowing mechanism. Gross asset spreads used in computing market values of assets sold in the model shall be consistent with, but not necessarily the same as, the gross asset spreads in Section 7.E.1.d and Section 7.E.1.f above, recognizing that starting assets may have different characteristics than modeled reinvestment assets.

**Guidance Note:** The simple language above "provided that the assumed cost of borrowing is not lower than the rate at which positive cash flows are reinvested in the same time period" is intended to prevent excessively optimistic borrowing assumptions. If in any case, the assumed cost of borrowing restriction cannot be fully applied or followed precisely, then as with all other simplifications/approximations, the company shall not allow borrowing assumptions to materially reduce the reserve.

**VM-21 Section 4.D.4.c**

**Guidance Note:** The simple language above "provided that the assumed cost of borrowing is not lower than the rate at which positive cash flows are reinvested in the same time period" is intended to prevent excessively optimistic borrowing assumptions. If in any case, the assumed cost of borrowing restriction cannot be fully applied or followed precisely, then as with all other simplifications/approximations, the company shall not allow borrowing assumptions to materially reduce the reserve.

- Deleted:** This limitation is being referred to Life Actuarial (A) Task Force for review.
- Deleted:** not intended to impose a literal requirement. It is
- Deleted:** to reflect a general concept
- Deleted:** It is recognized that borrowing parameters and rules can be complicated, such that modeling limitations may not allow for literal compliance, in every time step, as long as the reserve is not materially affected. However, if
- Deleted:** the company is unable to fully apply this
- Deleted:** prudence dictates that a

**VM-20 Section 7.K.3**

3. In circumstances where one or more material risk factors related to a derivative program are not fully captured within the cash-flow model used to calculate CTE 70, the company shall reflect the approximation, simplification or model limitations in the modeling of such risk factors by increasing the SR as described in Section 5.E. The company shall also be able to justify that the method appropriately reflects the potential error using historical experience, e.g., analysis of historical performance or backtesting.

### **VM-31 Section 3.D.6.f**

- f. Risk Management – Detailed description of model risk management strategies, such as hedging and other derivative programs, including any future hedging strategies supporting the policies and any adjustments to the SR pursuant to VM-20, Section 7.K.3 and VM-20, Section 7.K.4, specific to the groups of policies covered in this sub-report and not discussed in the Life Summary Section 3.C.5. Documentation of any future hedging strategies should include documentation addressing each of the CDHS documentation attributes. The following should be included in the documentation:
- i. Descriptions of basis risk, gap risk, price risk and assumption risk.
  - ii. Methods and criteria for estimating the a priori effectiveness of the strategy.
  - iii. Results of any reviews of actual historical hedging effectiveness.
  - iv. Strategy Changes – Discussion of any changes to the hedging strategy during the past 12 months, including identification of the change, reasons for the change, and the implementation date of the change.
  - v. Hedge Modeling – Description of how the hedge strategy was incorporated into modeling, including:
    - Differences in timing between model and actual strategy implementation.
    - For a company that does not have a future hedging strategy supporting the contracts, confirmation that currently held hedge assets were included in the starting assets.
    - Evaluations of the appropriateness of the assumptions on future trading, transaction costs, other elements of the model, the strategy, and other items that are likely to result in materially adverse results.
    - Discussion of the projection horizon for the future hedging strategy as modeled and a comparison to the timeline for any anticipated future changes in the company's hedging strategy.
    - If residual risks and frictional costs are assumed to have a value of zero, a demonstration that a value of zero is an appropriate expectation.
    - Any discontinuous hedging strategies modeled, and where such discontinuous hedging strategies contribute materially to a reduction in the SR, any evaluations of the interaction of future trigger definitions and the discontinuous hedging strategy, including any analyses of model assumptions that, when combined with the reliance on the discontinuous hedging strategy, may result in adverse results relative to those modeled.

- The approach and rationale used to reflect the hedge modeling error(s).

#### **VM-20 Section 9.A.4**

4. If the company elects to stochastically model risk factors in addition to those listed in Section 9.A.3 above, the requirements in this section for determining prudent estimate assumptions for these risk factors do not apply.

It is expected that companies will not stochastically model risk factors other than the economic scenarios, such as policyholder behavior or mortality, until VM-20 has more specific guidance and requirements available. Companies shall discuss with domiciliary regulators if they wish to stochastically model other risk factors.

Draft: 2/28/23

Life Actuarial (A) Task Force  
Virtual Meeting  
January 26, 2023

The Life Actuarial (A) Task Force met Jan. 26, 2023. The following Task Force members participated: Cassie Brown, Chair, represented by Rachel Hemphill (TX); Scott A. White, Vice Chair, represented by Craig Chupp (VA); Lori K. Wing-Heier represented by Sharon Comstock (AK); Ricardo Lara represented by Ahmad Kamil (CA); Andrew N. Mais represented by Wanchin Chou (CT); Doug Ommen represented by Mike Yanacheak (IA); Dana Popish Severinghaus represented by Vincent Tsang (IL); Amy L. Beard represented by Scott Shover (IN); Vicki Schmidt represented by Nicole Boyd (KS); Grace Arnold represented by Fred Andersen and Ben Slutsker (MN); Chlora Lindley-Myers represented by William Leung (MO); Eric Dunning represented by Michael Muldoon (NE); Marlene Caride represented by Seong-min Eom (NJ); Adrienne A. Harris represented by Bill Carmello (NY); Judith L. French represented by Peter Weber (OH); Glen Mulready represented by Andrew Schallhorn (OK); Michael Humphreys represented by Steve Boston (PA); and Jon Pike represented by Tomasz Serbinowski (UT).

1. Heard a Presentation on Practitioner Considerations for Guideline Excess Spread Under AG 53

Marc Altschull (Actuarial Risk Management) and Dave Bulin (Actuarial Risk Management) said that they would be delivering a presentation (Attachment Four-A) based on a paper their organization produced for the Society of Actuaries' (SOA's) Financial Research Institute on the guideline excess spread methodology under *Actuarial Guideline LIII—Application of the Valuation Manual for Testing the Adequacy of Life Insurer Reserves (AG 53)*. Altschull noted that the AG 53 requirements ask companies for additional documentation, including an excess spread attribution that is the main subject of the presentation. After Altschull and Bulin completed the presentation, Hemphill said that there was no one-size-fits-all approach to spread attribution and that companies would need to reflect their specific asset and risk profiles.

Tsang then asked if appointed actuaries would be able to get spread attribution analyses from their investment departments that they would have performed as part of their normal business functions. Bulin agreed that the appointed actuaries would be unlikely to have the deep investment knowledge required for the attribution analysis, and would likely need to work with investment departments, outside investment managers, and/or consultants. Bulin further stated that there was a lack of research on spread attribution and that it would be a challenge for companies to break out the spread into distinct liquidity, credit, and other risk components. Tsang questioned whether there were a small number of risk factors that would describe the majority of the spread variation. Altschull noted that the risk factors would be dependent on the asset class, to which Hemphill agreed.

2. Discussed a Referral from the Financial Regulation Standards and Accreditation (F) Committee

Dan Schelp (NAIC) said that he prepared a memorandum (Attachment Four-B) in which he compared the significant elements of the *Actuarial Opinion and Memorandum Regulation (#822)* to the requirements laid out in VM-30, Actuarial Opinion and Memorandum Requirements, to assist the Task Force in responding to the referral from the Financial Regulation Standards and Accreditation (F) Committee. Schelp said that it is the opinion of the NAIC Legal Division that state adoption of the *Valuation Manual* should be considered substantially similar to Model #822 for accreditation purposes. Schelp then went through specific sections of both requirements that he had highlighted in the memorandum to support the opinion of the NAIC Legal Division.

Chupp made a motion, seconded by Weber, to recommend that NAIC staff prepare a memorandum conveying the Task Force's recommendation that Model #822 be removed as an accreditation standard. The motion passed unanimously.

3. Adopted APF 2022-07

Brian Bayerle (American Council of Life Insurers—ACLI) summarized amendment proposal form (APF) 2022-07 as a clarification of a previously adopted amendment to the *Valuation Manual* that requires adjustments to the mortality table used in the determination of the net premium reserve if the anticipated experience of the group of policies exceeds the table.

Chupp made a motion, seconded by Chou, to adopt APF 2022-07 (Attachment Four-C). The motion passed unanimously.

4. Adopted APF 2022-08

Bayerle said that the purpose of APF 2022-08 was to clarify that companies that only utilize the Alternative Methodology under VM-21, Requirements for Principle-Based Reserves for Variable Annuities, are subject to limited governance requirements under VM-G, Appendix G — Corporate Guidance for Principle-Based Reserves.

Chupp made a motion, seconded by Schallhorn, to adopt APF 2022-08 (Attachment Four-D). The motion passed unanimously.

Having no further business, the Life Actuarial (A) Task Force adjourned.

# Practitioner Considerations for Guideline Excess Spread Attribution Methodology under Actuarial Guideline LIII (AG53)

## Introduction

NAIC Actuarial Guideline LIII (“AG 53”), effective for year-end 2022, requires Appointed Actuaries for non-exempted life insurers to disclose detailed information about investment activities and risks, focusing primarily on assets used to support Asset Adequacy Testing. The greater degree of disclosure and transparency will enable regulators to better understand the investment risks included in insurers’ balance sheets. The riskiness of investments has become a topic of increasing concern as insurance investment holdings have become more complex.

A section of AG 53 (section 5.B.) requires an attribution of Net Market Spreads<sup>1</sup> in excess of an Investment Grade Net Spread Benchmark for many “complex” assets.

While the use of attribution analysis in some areas of investment practice, such as performance attribution, is a long-standing and well-established practice, there currently is no broadly accepted quantitative construct to decompose market spreads into component pieces. Historically there has been no requirement to attribute spreads or changes in spreads to individual risk components. The introduction of AG 53 necessitates the development of a methodology to conduct spread attribution.

The Society of Actuaries engaged Actuarial Risk Management to produce this resource for practitioners. The report describes general principles to inform the development of a methodology to attribute spread to different investment risks. This paper will list and define a number of risks that are inherent in fixed income investments. Many of these risks could serve as the components of an attribution. **Please note we are using the term “general principles” to convey considerations that can aid a practitioner. This paper is in no way intending these general principles to be perceived as any type of standard or requirements related to AG 53.**

**The paper is also not intended to create a specific methodology to attribute Guideline Excess Spread<sup>2</sup> nor does it develop a “safe harbor” approach.**

The documentation requirements for AG 53 can be found at <https://content.naic.org/sites/default/files/inline-files/AG%2053.pdf>. The principles will build on financial industry research and analytics where practical.

<sup>1</sup> Net Market Spread: For each asset grouping, shall mean the spread over comparable Treasury bonds that equates the fair value as of the valuation date with modeled cash flows, less the default assumption used in asset adequacy analysis. (Definition directly from AG 53)

<sup>2</sup> Guideline Excess Spread: The net spread derived by subtracting the Investment Grade Net Spread Benchmark from the Net Market Spread for non-equity-like instruments. Investment expenses shall be excluded from this calculation. (Definition directly from AG 53)

## Section 1: Background on Actuarial Guideline LIII (“AG 53”) and the Requirement for Guideline Excess Spread Attribution

AG 53, adopted by the NAIC Life Insurance and Annuities (A) Committee on July 20, 2022 and effective for year-end 2022, is “intended to provide uniform guidance and clarification of requirements for the appropriate support of certain assumptions for asset adequacy analysis performed by life insurers”<sup>3</sup>.

One key focus of AG 53 is on “Projected High Net Yield” (PHNY) assets, defined in Section 4.F. of the guideline as follows:

- F. Projected High Net Yield Assets.** Currently held or reinvestment assets that are either:
- i. An Equity-like Instrument assumed to have higher value at projection year 10 or later than under an assumption of annual total returns, before the deduction of investment expenses, of 4% for the first 10 projection years after the valuation date followed by 5% for projection year 11 and after. Aggregation shall be done at a level of granularity that is consistent with or more granular than how the assets are grouped, i.e., compressed, in the asset adequacy analysis model, or
  - ii. Assets other than Equity-like Instruments where the assumed Guideline Excess Spread is higher than zero. In addition:
    - (a) Aggregation of the comparison between the assumed Net Market Spread from each asset and the Investment Grade Net Spread Benchmark shall be done at a level of granularity that is consistent with or more granular than how the assets are grouped, i.e., compressed, in the asset adequacy analysis model.
    - (b) For applicable assets that do not have an explicit WAL or term to maturity, the Appointed Actuary shall disclose the method used to determine the appropriate WAL used for comparing to the Investment Grade Net Spread Benchmark.
    - (c) For purposes of the comparison between the assumed Net Market Spread from each asset and the Investment Grade Net Spread Benchmark, investment expenses shall be excluded.

*Note: “WAL” is Weighted Average Life, weighted average time to receipt of principal from an investment.*

Under AG 53, non-equity (fixed income) investments with a Net Market Spread greater than that of the Investment Grade Net Spread Benchmark are subject to a greater degree of scrutiny. The expected performance of such investments is of particular interest and as such requires disclosure of an attribution by source of the Net Market Spread over the Investment Grade Net Spread Benchmark. Note that the Guideline Excess Spread attribution is required for both existing assets and assumed reinvestment asset purchases.

It is noted in Section 3.F.iii. of AG 53 that cash or equivalents, Treasuries, and agency bonds as well as Public non-convertible, fixed-rate corporate bonds with no or immaterial callability are excluded from the Guideline Excess Spread attribution requirement.

This Guideline Excess Spread attribution is focused on understanding the sources of risk and return. Many of these sources of risk (see Section 5) have increased in magnitude on insurer balance sheets greatly over the past few decades. There is increased complexity, breadth, and magnitude of insurer investments, and disclosure is required in Section 5.B. under AG 53:

---

<sup>3</sup> National Association of Insurance Commissioners. Actuarial Guideline LIII — Application of the Valuation Manual for Testing the Adequacy of Life Insurer Reserves. naic.org, October 6, 2022, [AG 53.pdf \(naic.org\)](#) (accessed October 6, 2022).

B. For projected high net yield assets for non-equity-like instruments, either currently held or in assumed reinvestments, perform and disclose the following attribution analysis steps at the asset type level associated with the templates in Section 6:

- i. State the assumed Guideline Excess Spread.
- ii. Estimate the proportion of the Guideline Excess Spread attributable to the following factors:
  - (a) Credit risk
  - (b) Illiquidity risk
  - (c) Deviations of current spreads from long-term spreads defined in Appendix 1
  - (d) Volatility and other risks (identify and describe these risks in detail)

AG53-6

---

Appendix C AG LIII

- iii. Provide commentary on the results of Section 5.B.ii. Also, where judgment is applied, provide supporting rationale of how the expected return in excess of the Investment Grade Net Spread Benchmark is estimated.

**Guidance Note:** A best-efforts approach is expected for the year-end 2022 attribution analysis.

## Section 2: Objectives for Developing Principles for Attribution Analysis

Guideline Excess Spread attribution analysis requires an Appointed Actuary to develop an appropriate methodology. The authors used the following objectives to develop general principles to aid Appointed Actuaries in this analysis.

1. The principles can be universally and consistently applied to all life insurers and all types of fixed income investments.
2. The principles are expected to remain valid for any stage of the economic cycle and be applicable to any new fixed income investment classes that insurers may hold in their general account.
3. The principles are to be as objective and unbiased as possible notwithstanding areas of subjectivity and professional judgment that recognizes spread attribution analysis continues to mature.
4. The principles are likely to evolve as lessons are learned over time with meeting the requirement.
5. The principles are consistent with statutory valuation rules and companies' investment valuation frameworks.
6. The principles are consistent with other applications of quantifying investment risk utilized in other financial reporting activities (e.g., ASC 326 Current Expected Credit Losses or "CECL").

### Section 3: Challenges and Limitations

There are a number of challenges and limitations to developing and implementing an attribution methodology. The following are key challenges and limitations:

**Lack of Previous Research:** We are not aware of any research on fully decomposing market spreads into component pieces. The limited available research is driven at least in part by a lack of demand for spread attribution – there has been very limited demand for understanding spread decomposition from investors. While many investors utilize certain market benchmarks to understand marginal compensation for marginal risk taking, research on spread attribution has to date been very limited. Many analyses utilized to understand risks are more focused on what happens if a risk becomes realized (e.g., stress tests, VaR) and less so on what compensation is being received for the risk being assumed.

**Lack of Data:** While there is an increasing amount of market spread data that is available, it is largely focused on the more liquid sectors of the investment markets. AG 53 – while not excluding more liquid parts of the fixed income market – is more focused on increasingly complex assets. Therefore, AG 53’s focus is on the less liquid parts of the fixed income markets and thus areas with less available data.

**Non-Comparability of Data:** Due to insurers employing different methodologies and market practices to determine spreads, the spreads and resulting spread attribution analyses may not be comparable across life insurance companies.

**Lack of/Inconsistent Understanding:** There is a wide range of views of market participants. Because of the wide range of knowledge, expertise, and perspectives, efforts to increase the consistency and comparability of analyses across the industry may be beneficial.

**Granularity of Attribution:** In developing a methodology, there are likely to be tradeoffs between the number of attribution buckets, the complexity of the attribution analysis and the usefulness of the analysis. The choice of risk(s) that each bucket covers will drive some of the complexity of the spread attribution analysis. There is the potential that chosen buckets will overlap, adding complexity to the analysis to account for such redundancies. Additionally, when spread attributions are aggregated, for example from the CUSIP level to the rows shown in the AG 53 template, there may be some degree of useful information lost. An example of this may be positive attributions offsetting negative attributions.

**Variety of Asset Classes and Types of Risk:** There are a wide range of both asset types and types of risk that must be considered in the spread attribution. Many of these asset types are fairly new and may have an increasing level of complexity which leads to not all risks being known or fully understood.

## Section 4: Market Spreads - Overview

In order to perform spread attribution, it is first important to understand what market spreads are and how they are related to other key market metrics and analytics. The objective of this section is to provide a common base of understanding for practitioners.

### 4.1 RELATIONSHIP BETWEEN PRICE, RISK-FREE RATE, AND SPREAD

There is a direct, formulaic relationship between the price, assumed cash flows, underlying risk-free rate, and market spread of a fixed income investment:

$$\text{Price} = \sum_{t=1}^T \frac{\text{Coupon}_t}{(1 + \text{Risk-Free Rate} + \text{Spread})^t} + \frac{\text{Principal}_t}{(1 + \text{Risk-Free Rate} + \text{Spread})^t}$$

Companies determine price, cash flows, and risk-free rates for each investment, then calibrate the spread that replicates the price. Each company has their own processes around each of these inputs (price, cash flows, and risk-free rates), and the resulting input variation may lead to variation of market spreads across the industry for identical investment holdings:

- **Price:** In many cases, especially for publicly traded assets, prices are provided by various pricing services. For publicly traded assets, there should be a high degree of consistency of the price assumed among investors for any individual holding. In other cases where there is a limited market (e.g., private placements), the investor may determine the price based upon a model (“mark-to-model”) with various inputs.
- **Cash flows:** For certain fixed income investments without embedded options, cash flows are contractually fixed. For structured assets (e.g., asset-backed securities, structured credit) and other assets with embedded options, cash flows will be more difficult to project and are heavily model- and assumption-dependent. For these types of assets, there may be a wider range of assumed cash flows among investors. Modeled cash flows used in asset pricing utilizing the formula above are expected to be best-estimate, single-path deterministic, and before any considerations of default risk. Investment expenses are not included in asset level cash flows for this purpose.
- **Risk-free rate:** This is the market yield on a Treasury security with the same or similar weighted average life (WAL) as the fixed income investment being considered. To be consistent, the risk-free yield must be determined as of the same date and time as the asset price.
- **Spread:** This is the addition to the risk-free rate that results in a discount rate equating the present value of cash flows to the price of the investment.

#### 4.2 VALUATION FRAMEWORK

A formalized valuation framework provides structure and guidance on how fair values (prices) for investments are determined. Related, ASC 820-10 for US GAAP categorizes and requires disclosure on securities based on how their fair values are determined. There are three categories of fair value inputs under ASC 820-10<sup>4</sup>:

- **Level 1:** Quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity can access at the measurement date.
- **Level 2:** Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- **Level 3:** Unobservable inputs for the asset or liability.

Prices based upon Level 1 inputs are most common for Treasuries, common stocks, mutual funds and ETFs. Prices including Level 2 inputs are the most common pricing approach for insurance company investments and it is applicable to most publicly traded securities. Prices including Level 3 inputs are more common for privately issued investments which are becoming a larger proportion of insurer balance sheets.

Consistency is an important consideration between a company's valuation framework and the spread attribution. This is of particular note for assets that are mark-to-model<sup>5</sup> and are heavily dependent upon company-provided assumptions (e.g., US GAAP Level 3 assets). The derivation of the market spreads used to determine fair values are consistent with the spread attribution disclosed for AG 53.

---

<sup>4</sup> Financial Accounting Standards Board. Fair Value Measurement (Topic 820). Fasn.org, June 30, 2022, [820-10 Overall \(fasn.org\)](#) (accessed November 25, 2022).

<sup>5</sup> Mark-to-model: The practice of pricing an asset using a financial model instead of utilizing a market price.

## Section 5: Types of Asset Risk and Relationship to Spread

While it is not plausible to identify all of the risks in an insurer's investment portfolio, there are a number of common risks in life insurer fixed income portfolios. A risk spread, that is incremental to the risk-free rate, compensates investors for known and some unknown risks. Generally, the more of a specific risk that an asset contains, the larger the spread that will be attributed to that specific risk for that asset.

### 5.1 TYPES OF RISKS THAT CAN LEAD TO ASSET LOSS

Below is a comprehensive, but not exhaustive, list and definitions of different types of fixed income investment risks that may impact spreads. Not all risks are mutually exclusive, so there may be overlap between different risks. The first two risks listed below are specifically identified in the AG 53 templates. The risks that follow the first two are listed alphabetically.

- **Credit risk:** Risk that an asset defaults, experiences a reduction in expected recovery amount or is downgraded by a credit rating organization
- **Illiquidity risk:** Risk that an investor can only sell an asset at less than its true value or cannot be sold at all; generally driven by a wider bid-ask spread
- **Call / prepayment risk:** Risk that an asset is called or prepaid by the issuer or borrower and the investor must reinvest proceeds in a lower rate environment than the original investment was purchased
- **Complexity risk:** Risk that an asset is more difficult to analyze and model, requiring more time and expense to understand the asset and limiting the pool of investors interested in investing in the asset, thus decreasing demand and lowering the price that an asset could otherwise receive in an open market
- **Event risk:** Risk that asset values are adversely impacted by a single event such as a natural disaster, industrial accident or corporate takeover
- **Exchange-rate / currency risk:** Risk that a non-US dollar denominated asset declines in value due to adverse currency rate movements
- **Inflation / purchasing power risk:** Risk that higher than expected inflation erodes the purchasing power of a fixed income asset's cash flows
- **Interest rate risk:** Risk that interest rates increase and the value of the asset declines
- **Political / legal risk:** Risk that actions of a government adversely affect the value of an asset
- **Sector risk:** Risk of an adverse differential movement of all assets in one sector relative to another
- **Structure risk:** Risk that timing of cash flows differs from expected
- **Volatility risk:** Risk that the value of an asset with an embedded option declines due to changes in implied volatility

### 5.2 OTHER FACTORS THAT MAY AFFECT PRICE AND SPREAD

There are other factors that may impact the price and spread of an asset. While these may not be considered risks per se, they may impact asset valuation.

**Private origination:** If assets are privately originated, there is generally a limited or exclusive market and therefore pricing may be more favorable to the originator than in an efficient market. This means that assets may be acquired for a lower value and therefore with a higher spread.

**Newer asset class:** Early adopters of investing in certain asset classes often enjoy higher spread and/or returns before other investors become more comfortable with the asset class. Newer asset classes do not always ultimately end with lower spreads as sometimes the riskiness of an asset class is underappreciated, and as risks are better

understood, the market reprices spreads to the better understood levels of risk. In other cases, risks are less than originally thought, and subsequently as demand increases, prices rise and market spreads narrow.

**Information asymmetry:** This occurs when there is an imbalance of knowledge and/or expertise between buyers and sellers of an asset. The asymmetry can favor either the buyer or the seller.

## Section 6: Principles for Attribution Analysis

While this whitepaper does not propose any specific methodology, this section describes a set of principles that an Appointed Actuary can utilize to help in developing a methodology and performing the Guideline Excess Spread attribution as required by AG 53. As stated earlier in the document, the following are not intended as standards or specific requirements for conducting the analysis. All of the general principles have been developed by the authors and are not requirements of AG 53.

### 6.1 PRINCIPLES

#### GENERAL / BACKGROUND

1. Overall general consistency with conducting other analyses under Actuarial Standards of Practice set the framework for performing the Guideline Excess Spread attribution.
2. Professional actuarial judgment (as per ASOP No. 1, Section 2.9) is an aspect of this analysis because this is an emerging area with limited historical practice within investment management.
3. Subject matter experts are an important resource for an Appointed Actuary to consult with, as necessary, because of their special knowledge and the nature of the analysis.

#### RISK IDENTIFICATION

4. Consistency of risks identified in a company's AG 53 report with risks identified in ORSA, investment policy, risk appetite, and other related company documents is an important objective.
5. It is useful to identify risks for each asset class prior to quantifying Net Market Spread risk components.
6. Asset classes do not necessarily all have the same risks, so the Guideline Excess Spread attribution components may vary by asset class.
7. It is very unlikely that any single risk will constitute the entirety of a single investment's risks.
8. Each identified risk may not need to be a separate attribution category. It may be more useful for related risks to be grouped together into a single attribution category for the spread attribution analysis.

#### RISK QUANTIFICATION

9. The amount of Net Market Spread attributed to a particular risk may cover both the best-estimate "cost" of that risk as well as any adjustments for uncertainty related to that risk.
10. All Net Market Spreads are measured relative to risk-free rates, so all risks are evaluated relative to risk-free assets.
11. Certain risks may be evaluated for exclusion in the Guideline Excess Spread attribution, as they either have been accounted for before spreads are determined or are risks that do not impact market spreads. Examples:
  - a. Interest rate risk, as defined in Section 5.1, may be considered for exclusion as a spread attribution category as this risk is compensated for as part of the underlying risk-free yield and not as part of the Net Market Spread.
  - b. Asset-liability management (ALM) risk may be considered for exclusion as a spread attribution category as it is the result of mismatches between assets and liabilities and will be unique to each company. The market value and spread of an asset are independent of an investor's ALM position.
12. Given that many risks are correlated, correlations are a component of the attribution analysis to consider.
13. Guideline Excess Spread attribution components may be negative. This would imply that a particular risk of an asset or asset class (as represented by the spread attribution of an asset) is less than that of the Investment Grade Net Spread Benchmark. An illustrative example is included in Appendix B.
14. A material amount of the Guideline Excess Spread may be attributed to identified risks including the impact of any correlation among risks. Minimizing the amount of Guideline Excess Spread not attributed to specific identified risks is an overall objective.

15. When looking to history to develop assumptions, it is important to recognize that historical metrics may not be predictive.

#### **AGGREGATION AND PRESENTATION**

16. Presentation of Guideline Excess Spread attribution at the asset class level in the provided templates should reasonably reflect the risks included in the holdings for each asset class. The methodology used in determining and/or aggregating spread attribution across the individual investments underlying each row in the template should be reasonable and not biased by the choice of presentation or aggregation.

#### **FUTURE CONSIDERATIONS**

17. Spread attribution methodologies may evolve as new asset classes are added to insurers' investment portfolios and also as characteristics of asset classes evolve through time.
18. Spread attributions may not be static through time. The spread attributed to a specific risk can vary as economic and market conditions change.

#### **6.2 OTHER CONSIDERATIONS**

Below is a list of other considerations for the Appointed Actuary in performing the Guideline Excess Spread attribution analysis:

- Degree of granularity: While this attribution analysis can be performed at the individual asset level, there is no requirement to perform this analysis (nor disclose it) at the individual asset level. There are likely approaches where reasonably similar investments will be grouped together for this exercise.
- Number of attribution categories chosen: The template includes Credit and Illiquidity risks, leaving additional attribution categories to the judgment of the Appointed Actuary.
- Degree of judgment: For asset types with less available information, the attribution will be more challenging and require a greater degree of professional actuarial judgment.
- Additional analysis: An Appointed Actuary may want to perform additional scenario projections depending on the results of the Guideline Excess Spread attribution analysis. For example, if an Appointed Actuary identifies a significant amount of spread being attributed to illiquidity, they may want to perform some sensitivity or stress tests around liquidity risk. This can be with higher or lower spreads or other factors depending upon the risks and conditions of additional scenarios tested.

## Section 7: Ideas for Follow-up Research

While this research paper can provide useful information to an Appointed Actuary in complying with AG 53, there are many areas of additional research that are not covered by this paper and may be useful in the future. A partial list of ideas for follow-up research are below:

- Covenants in assets with credit risk vary in their specific elements and strength
- Impact of credit ratings issued by various rating agencies
- Correlations among different risk factors
- Additional ways to leverage the spread attribution analysis beyond the requirement in AG 53 (e.g., asset allocation analysis, investment portfolio construction)
- Specific methodological approaches to spread attribution and development of an accepted industry methodology as a “safe harbor”
- Survey of current practices resulting in publication of a practice note

(1) "IG Net Spread Benchmark" = Investment Grade Net Spread Benchmark

Additional Commentary

Appendix B: Illustrative Example of Spread Attribution with Negative Guideline Excess Spread Components

				<i>Spread Components Related to Each Risk</i>				
Asset Type	Net Market Spread			Risk Factor A	Risk Factor B	Risk Factor C	Risk Factor D	Other Risk Factors / Unallocated
Asset Class XYZ	2.5%			0.3%	0.7%	0.5%	0.8%	0.2%
IG Net Spread Benchmark	1.5%			1.0%	0.5%	0.0%	0.0%	0.0%
				<i>Excess Spread Components Related to Each Risk</i>				
Asset Type	Net Market Spread	IG Net Spread Benchmark <sup>1</sup>	Guideline Excess Spread	Risk Factor A	Risk Factor B	Risk Factor C	Risk Factor D	Other Risk Factors / Unallocated
Asset Class XYZ	2.5%	1.5%	1.0%	-0.7%	0.2%	0.5%	0.8%	0.2%

Risk Factor A has a negative Excess Spread Component in this illustrative example as Asset Class XYZ has less net Market Spread attributed to it (0.3%) than the Investment Grade Net Spread Benchmark (1.0%).

## Appendix C: Potential Sources of Information

There are a number of sources of information – both subject matter experts and vendor systems – as well as market analytics which may be useful in performing this analysis.

### POTENTIAL RESOURCES

There are a number of resources that an Appointed Actuary can utilize in performing the Guideline Excess Spread attribution. First, as this is a fairly technical analysis, subject matter experts are an important resource for conducting the analysis. Subject matter experts can be internal (e.g., portfolio managers, investment traders, asset class specialists, asset pricing specialists) and/or external (e.g., consultants). Additionally, investment analytical systems may have useful analytics that may be utilized in the attribution.

### MARKET ANALYTICS

There are a number of existing and widely accepted market metrics that may be useful in the attribution analysis. While there is likely no single system or set of metrics that would directly allow the Appointed Actuary to perform the entire attribution, the metrics below may be useful for pieces of the attribution analysis:

### CREDIT-RELATED

- **VM-20 Table A** (Baseline Annual Default Costs) ([pbr-2021-table-a-baseline-annual-default-costs.xlsx](#) ([live.com](#))): NAIC-derived annual default costs used by many companies in Principles-Based Reserves (and related) work. Derived from Moody's Corporate Bond Default Study data.
- **Probability of Default (PD)**: This is a quantitatively derived likelihood that a bond will default over a specified time horizon, based upon companies with similar characteristics at similar points in the economic and credit cycles. Many PDs are for a 1-year horizon. Others are through-the-cycle, intended to reflect an entire economic cycle. There are a number of PD models, the most well-known is the Merton model.
- **Loss Given Default (LGD)**: This is the loss, expressed as a percent of par, for a bond that defaults. It is equivalent to (100% - recovery rate).
- **Credit Default Swap (CDS)**: A financial derivative that provides default protection against a bond issuer. CDS can either be bought (buying protection) or sold (selling protection, which is equivalent to adding credit risk). Most CDS are originally contracted for 5-year tenors. Prices on most CDS are generally expressed in bps per year per dollar of notional value that the buyer pays to the seller.

Note: Since the majority of pure credit risk on life insurer balance sheets (e.g., public corporates) is out of scope for the Guideline Excess Spread attribution, and the CDS market is primarily on public corporates, there may be limited direct applicable information for CDS on assets that are the focus of AG 53. However, there are takeaways and learnings that could be applied when comparing CDS vs. asset spreads. Additionally, CDS can help inform any attribution of the Investment Grade Net Spread Benchmark.

### VOLATILITY / CALL / PREPAYMENT-RELATED

- **Option-adjusted spread (OAS)**: market spread based on a stochastic analysis, as opposed to a single deterministic path; as the name states, adjusts for embedded optionality in an asset; historically has been performed using swap rates
- **Zero-volatility spread (ZVS or Z-spread)**: a special case of OAS where volatility is zero and all paths collapse into a single spot rate curve; similar to nominal spread except cash flows discounted using spot rates instead of a single risk-free yield – also uses swap rates instead of Treasuries

**LIQUIDITY-RELATED**

- **Liquidity Credit Score (LCS):** a quantitative framework developed by Barclays ([BARCLAYS RESEARCH](#) [\(barcap.com\)](#)) that quantifies hypothetical transactions costs
  - There is a very strong correlation between a bond’s market spread and LCS
  - LCS is not a spread but could be used to develop a quantitative relationship that converts it into a spread component

## Appendix D: Other Practical and Technical Implications

There are a number of practical and fairly technical issues that an Appointed Actuary may come across in performing this analysis. Below is a partial list of some of these issues:

- Different market conventions on quoting yield and spread
  - Day count differences
    - Treasury: ACT/ACT
    - Corporates: 30/360
  - Spreads quoted off underlying Treasury
    - Corporates: maturity or WAL
    - ABS: closest on-the-run Treasury
- Periodicity of payments
  - Treasury / US Corporates: semi-annual
  - Structured assets: primarily monthly or quarterly
- Mixing different yield curves, option pricing models, etc. that are inputs to spread
  - Example: using OAS and ZVS (based off swaps curve) is not directly comparable to a nominal spread to Treasuries

These are likely rounding errors relative to broader attribution assumptions that a company must make but are worth considering and incorporating into the initial analysis.

## About The Society of Actuaries Research Institute

Serving as the research arm of the Society of Actuaries (SOA), the SOA Research Institute provides objective, data-driven research bringing together tried and true practices and future-focused approaches to address societal challenges and your business needs. The Institute provides trusted knowledge, extensive experience and new technologies to help effectively identify, predict and manage risks.

Representing the thousands of actuaries who help conduct critical research, the SOA Research Institute provides clarity and solutions on risks and societal challenges. The Institute connects actuaries, academics, employers, the insurance industry, regulators, research partners, foundations and research institutions, sponsors and non-governmental organizations, building an effective network which provides support, knowledge and expertise regarding the management of risk to benefit the industry and the public.

Managed by experienced actuaries and research experts from a broad range of industries, the SOA Research Institute creates, funds, develops and distributes research to elevate actuaries as leaders in measuring and managing risk. These efforts include studies, essay collections, webcasts, research papers, survey reports, and original research on topics impacting society.

Harnessing its peer-reviewed research, leading-edge technologies, new data tools and innovative practices, the Institute seeks to understand the underlying causes of risk and the possible outcomes. The Institute develops objective research spanning a variety of topics with its [strategic research programs](#): aging and retirement; actuarial innovation and technology; mortality and longevity; diversity, equity and inclusion; health care cost trends; and catastrophe and climate risk. The Institute has a large volume of [topical research available](#), including an expanding collection of international and market-specific research, experience studies, models and timely research.

## MEMORANDUM

TO: Life Actuarial (A) Task Force

FROM: NAIC Legal Division  
Daniel Schelp—Chief Counsel, Regulatory Affairs

RE: Comparison of Model #822 to VM-30 for Accreditation Purposes

DATE: January 18, 2023

Both the *Standard Valuation Law* (#820) and the *Actuarial Opinion and Memorandum Regulation* (#822) are currently part of the NAIC’s *Liabilities and Reserves Accreditation Standard*. Model #820 provides that the *Valuation Manual* should be adopted uniformly by the states. It came to the attention of the Financial Regulation Standards and Accreditation (F) Committee that there is substantial overlap between the significant elements of Model #822 and the *Valuation Manual* with respect to actuarial opinions; i.e., VM-01 “Definitions for Terms in Requirements” and VM-30 “Actuarial Opinion and Memorandum Requirements.” The Committee requested that the Life Actuarial (A) Task Force review the accreditation standard for Model #822 to determine whether VM-01 and VM-30 meet the necessary actuarial opinion requirements of Model #822. This would permit Model #822 to be removed from the accreditation standards, with the *Valuation Manual* standing alone as the accreditation standard for actuarial opinions.

To help facilitate this discussion by the Task Force, the NAIC Legal Division has prepared the following comparison of the significant accreditation elements of Model #822 with VM-01 & VM-30 to determine whether state adoption of the *Valuation Manual* is substantially similar to Model #822 for accreditation purposes:

### ***Actuarial Opinion and Memorandum Regulation (#822)***

#### **v. Scope provisions similar to those in Section 3?**

Section 1A(1) “Scope” of VM-30 provides, as follows: “The following provisions contain the requirements for the actuarial opinion of reserves and for supporting actuarial memoranda in accordance with Section 3 of Model #820, and are collectively referred to as Actuarial Opinion and Memorandum (AOM) requirements.” In addition, Section 3B of Model #820 is applicable to all actuarial opinions filed after the operative date of the *Valuation Manual*. Section III of the Introduction to the *Valuation Manual* provides:

Washington, DC 444 North Capitol Street NW, Suite 700, Washington, DC 20001-1509	p   202 471 3990	f   816 460 7493
Kansas City 1100 Walnut Street NW, Suite 1500, Kansas City, MO 64106-2197	p   816 842 3600	f   816 783 8175
New York One New York Plaza, Suite 4210, New York, NY 20004	p   212 398 9000	f   212 382 4207

www.naic.org

### III. Actuarial Opinion and Report Requirements

Requirements regarding the annual actuarial opinion and memorandum pursuant to Section 3 of Model #820 are provided in VM-30, Actuarial Opinion and Memorandum Requirements. The requirements in VM-30 are applicable to all annual statements with a year-ending date on or after the operative date of the Valuation Manual. Existing actuarial opinion and memorandum requirements continue to apply to all annual statements with a year-ending date before the operative date of the Valuation Manual.

Unlike the reserving requirements under VM-20, there is no small company exemption applicable to the actuarial opinion and memorandum requirements. Therefore, VM-30 should apply to all applicable actuarial opinions filed after the operative date of the *Valuation Manual*. It is the opinion of the NAIC Legal Division that VM-30 meets the requirements of this significant element.

#### w. Definitions similar to Section 4?

Section 1A(1) of VM-30 provides for the definition of “Actuarial Opinion”, while VM-01 contains the definitions of “Actuarial Standards Board” and “Annual Statement.” VM-01 also provides for the definition of “Appointed Actuary” that is similar to Section 5C of Model #822, and the definition of “Qualified Actuary” that is similar to Section 5B. Section 2B of VM-30 then provides for the definition of “Asset Adequacy Analysis” that meets the standards of Section 5D of Model #822. It is the opinion of the NAIC Legal Division that VM-01 and VM-30 meet the requirements of this significant element.

#### x. General Requirements similar to Section 5?

Section 2 of VM-30 provides general requirements under Model #822 for Section 5A “Submission of Statement of Actuarial Opinion”; Section 5C “Appointed Actuary”; Section 5D “Standards for Asset Adequacy Analysis”; and Section 5E “Liabilities Covered” of Model #822. VM-01 then provides for the general requirements for the definition of “Qualified Actuary” under Section 5B of Model #822. However, it should be noted that Section 2A(1) of VM-30 does not provide that the commissioner may grant an extension for submission of the statement of actuarial opinion similar to Section 5A(2) of Model #822. It is the opinion of the NAIC Legal Division that VM-01 and VM-30 meet the requirements of this significant element.

#### y. Provisions for statement of actuarial opinion based on an asset adequacy analysis similar to Section 6?

Section 2A(1) of VM-30 provides for the General Requirements for Submission of Statement of a Life Actuarial Opinion, while Section 3A of VM-30 provides for Statement of Actuarial Opinion Based on an Asset Adequacy Analysis similar to Section 6 of Model #822. It should be noted that the Alternate Option(s) to the requirements of Section 6B(6)(c) set forth in Section 6F of Model #822 permitting the commissioner to accept the valuation of a foreign insurer are not fully addressed in VM-30. However,

Section 3A(7)(c) of VM-30 does provide alternative language for use in such situations. It is the opinion of the NAIC Legal Division that VM-30 meets the requirements of this significant element.

**z. Provisions for description of an actuarial memorandum including an asset adequacy analysis similar to Section 7?**

Section 3B of VM-30 provides for a Description of the Actuarial Memorandum, Including an Asset Adequacy Analysis similar to Section 7 of Model #822. It is the opinion of the NAIC Legal Division that VM-30 meets the requirements of this significant element.

**aa. Provisions for regulatory asset adequacy issues summary similar to Section 7?**

Section 3B(13) of VM-30 provides for a Regulatory Asset Adequacy Issues Summary similar to Section 7C of Model #822. It is the opinion of the NAIC Legal Division that VM-30 meets the requirements of this significant element.

Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force  
**Amendment Proposal Form**

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Brian Bayerle, ACLI – Clarification of adjustments to mortality for policies subject to the NPR and for policies that pass the Life PBR Exemption when anticipated experience exceeds the prescribed CSO table.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

Valuation Manual (January 1, 2022 edition), VM-20 Section 3.C.1.g, VM-20 Section 6.B.5.d.

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

**12/14/22 Update:** The redline indicates changes from the Valuation Manual. Redline sections that are highlighted indicate changes from the previous 9/8/22 exposure. Some deletions of text that was added in the 9/8/22 version but deleted in the 12/14/22 exposure were not included in the redline below, including the removal of mortality rate capping language from sections 3.C.1.g.i and 3.C.1.g.ii and replacement into section 3.C.1.g.ii.a and the deletion of references to “FUW” policies in the guidance note.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

The purpose of this proposed amendment is to clarify the intent and calculation of the mortality adjustments to the CSO table when anticipated mortality exceeds the prescribed CSO table. The current wording of Section 3.C.1.g has led to confusion by many and a lack of consistent interpretations. The APF does not change the current requirements of VM-20, it only provides clarification. This APF revises the edits made by APF 2018-57.

There are five questions the APF is trying to answer:

1. **What policies are intended to be addressed by Section 3.C.1.g?**

The primary intent of Section 3.C.1.g is to address the higher anticipated mortality for policies that are not subject to full underwriting (FUW), such as simplified issue policies and final expense policies. It is typical for these types of policies to have mortality experience worse than the CSO table, and thus, an adjustment is necessary.

The intent of Section 3.C.1.g is not to test every possible FUW subset (e.g., attained age blocks, individual underwriting classes with lower credibility, etc.) to determine if its mortality experience is higher than the CSO table even though more aggregate mortality experience is lower than the CSO table. However, if a large, credible block or subset of FUW policies (e.g., a block of FUW business assumed from another company that has significantly different mortality experience than the rest of the assuming company’s FUW business, or a large block of business from an era when the company had significantly more permissive underwriting, etc.) is expected to have worse experience than the CSO table, then the adjustments in 3.C.1.g should be made.

A guidance note has been added following Section 3.C.1.g. to provide this clarification.

**2. What is meant by the current language in Section 3.C.1.g that the “adjustments should be consistent with the adjustments made for the DET Net Premium test” in Section 6.B.5.d?**

This wording has led to a lot of confusion. Some have interpreted this wording to mean that the adjustment factors should be the same as those defined in Section 6.B.5.d. Others have concluded that this means the form of the adjustments should be the same. Others have concluded that this means the same methodology should be used to determine the adjustments. And if the company does not elect to use the DET, there are no adjustment factors to be consistent with.

This APF clarifies that for the group of policies where the DET has been elected, the methodology to test whether adjustments are needed should be consistent with Section 6.B.5.d (that is, using a comparison of the PV of future death claims) and a reasonably consistent approach should be used to determine the adjustment factors). For groups of policies where the DET has not been elected, a reasonably consistent approach should be used.

**3. Are the adjustments to the CSO table in Section 3.C.1.g determined on a seriatim basis or can policies be grouped to determine the adjustments?**

The current wording is not clear as to whether the adjustments are determined on a seriatim basis or grouped basis, resulting in inconsistent interpretations. This APF clarifies that the adjustments to the CSO table for the NPR calculation are to be determined using a group of policies (consistent with the approach used in Section 6.B.5.d), not on a seriatim basis. Since the NPR is calculated on a policy-by-policy basis, the application of the adjustments must be applied to each policy on a seriatim basis, but the factors themselves can be determined using a group of policies.

Determining the adjustment factors on a seriatim basis is inconsistent with determining mortality experience for any other purpose. When data is not credible, the resulting mortality rates may not be smooth or consistent. For example, if the anticipated experience for male age 50 results in an adjustment factor of 1.3, but the adjustment factor for male age 48 is 2.1 (based on limited non-credible data), this results in the mortality rate for male 48 being higher than the rate for male 50.

This APF clarifies that the determination of the adjustment factors in Section 3.C.1.g. is to be done on a grouped basis. However, similar to the DET requirement, a company may not group together policies with significantly different risk profiles.

**4. How do the requirements of Section 3.C.1.g apply to policies that pass the Life PBR Exemption?**

Policies that pass the Life PBR Exemption are still subject to the requirements of Section 3.C.1 (per Section II.G.4 of the Valuation Manual). But Section 3.C.1.g includes references to the NPR and the DET which do not apply to these policies. To clarify, section 3.C.1.g. has been split into two sections: 1) policies that pass the Life PBR Exemption and 2) policies that are not utilizing the Life PBR Exemption and are subject to the NPR requirements. For policies that pass the Life PBR Exemption, all references to the NPR and DET have been removed.

**5. How do the requirements in Section 3.C.1.g. apply when calculating deficiency reserves?**

Policies that pass the Life PBR Exemption still must determine deficiency reserves, which has led to confusion on how the requirements of section 3.C.1.g apply when determining deficiency reserves. Section 3.C.1 is based on the basic reserve calculation (Section 3.B.6). Once the valuation mortality rates have been adjusted (if needed) by Section 3.C.1.g for the basic reserve, then the calculation of X-factors for the deficiency reserve follows the normal approach as described in VM-A and VM-C. This APF clarifies that the mortality adjustment in 3.C.1.g only applies to the basic reserve for policies that pass the Life PBR Exemption, and not the deficiency reserve.

Deficiency reserves are not needed for policies that are not utilizing the Life PBR Exemption. The NPR for policies other than term and ULSG equals the basic reserve defined in VM-A and VM-C, the NPR for term and ULSG follow the requirements of Section 3.4 and 3.5, and the DR and SR calculations already reflect the circumstances that give rise for the need for a deficiency reserve.

### Section 3: Net Premium Reserve

#### C. Net Premium Reserves Assumptions

- 1.g For a group of policies where the anticipated mortality experience ~~materially~~ exceeds the prescribed CSO mortality rates determined in Section 3.C.1.a through 3.C.1.d~~f~~ above, the company shall adjust the CSO mortality rates as follows:
- i. For policies that pass the Life PBR Exemption, the CSO mortality rates used to determine the basic reserve for each policy shall be adjusted in a manner commensurate with the anticipated mortality experience for the policies. The methodology used to test whether adjustments are needed can be performed on an aggregate basis for the group of policies using a reasonable method to compare the respective mortality rates, such as comparing the present value of future death claims discounted at the valuation interest rate used for VM-A and VM-C. However, for the purposes of this comparison, a company may not group together policies with significantly different risk profiles. If an adjustment is needed, the determination of the adjustment factors should use a reasonable methodology, subject to a cap that ensures that mortality rates do not exceed 1,000 per 1,000.
  - ii. For policies where the Life PBR Exemption is not utilized, the CSO mortality rates used in the NPR calculation shall be adjusted in a manner commensurate with the anticipated mortality experience for the policies.
    - a) When the company elects to use the DET in Section 6.B for a group of policies, the methodology used to test whether adjustments are needed should be consistent with the methodology used in Section 6.B.5.d (that is, using a comparison of the PV of future death claims discounted at the valuation rate used for the NPR) . For the purposes of this comparison, a company may not group together policies with significantly different risk profiles. If an adjustment is needed, the determination of the adjustment factors should use a reasonably consistent methodology to the one used in Section 6.B.5.d., subject to a cap that ensures that the mortality rates do not exceed 1,000 per 1,000.
    - b) For the group of policies where the DET is not used, the company should use a reasonably consistent approach to the one described in paragraph a) above to test whether adjustments are needed and to determine the adjustment factors. The resulting adjustment factors are not required to be identical to the adjustment factors determined in paragraph a) above.

The resulting NPR must not be lower than the NPR calculated without adjustments to the CSO mortality rates.

**Guidance Note:** It is anticipated that the 3.C.1.g adjustments are generally applicable but not limited to policies with limited underwriting, such as simplified issue or final expense. The intent of Section 3.C.1.g. is not to test every possible group of policies (e.g., attained age blocks, individual underwriting classes with lower credibility, etc.) to determine if its mortality experience is higher than the CSO table even though more aggregate mortality experience is lower than the CSO table. However, if a large, credible block or group of policies (e.g., a block of business assumed from another company that has significantly different mortality experience than the rest of the assuming company's business, or a large

block of business from an era when the company had significantly more permissive underwriting, etc.) is expected to have worse experience than the CSO table, then the adjustments in 3.C.1.g should be made.

## **Section 6: Stochastic and Deterministic Exclusion Tests**

### **B. Deterministic Exclusion Test (DET)**

- 5.d. If the anticipated mortality for the group of policies exceeds the prescribed CSO mortality rates for the NPR determined in Section 3.C.1.a through 3.C.1.g, then the company shall use anticipated mortality to determine the valuation net premium. For this purpose, mortality shall be measured as the present value of future death claims as of the valuation date discounted at the valuation interest rate used for the NPR.

**Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force  
 Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Brian Bayerle, ACLI – Clarify requirements on groups of contracts that use the Alternative Method/AG33 in VM-21 and are not subject to a principles-based valuation. Such contracts should not be not subject to VM-G but still require a sub-report under VM-31.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

Valuation Manual Jan. 1, 2023 Edition; VM-21 Section 3.E, VM-31 Section 2.A, VM-G Section 1 and Section 4.A.3.

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

There is some ambiguity about the governance requirements if a principles-based valuation is not performed.

\* This form is not intended for minor corrections, such as formatting, grammar, cross–references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

<b>Notes:</b> APF 2022-08			

**VM-21****Section 3: Reserve Methodology**

## E. Alternative Methodology

For a group of variable deferred annuity contracts that contain either no guaranteed benefits or only GMDBs—i.e., no VAGLBs—the reserve may be determined using the Alternative Methodology described in Section 7 rather than using the approach described in Section 3.C and Section 3.D. However, in the event that the approach described in Section 3.C and Section 3.D has been used in prior valuations for that group of contracts, the Alternative Methodology may not be used without approval from the domiciliary commissioner.

The reserve for the group of contracts to which the Alternative Methodology is applied shall not be less than the aggregate cash surrender value of those contracts.

Groups of contracts to which the Alternative Methodology is applied are only subject to the applicable requirements for the Alternative Methodology in VM-21. Groups of contracts to which the Alternative Methodology is applied are subject to the applicable sub-report requirements outlined in VM-31 Sections 3.E and 3.F. Groups of contracts to which the Alternative Methodology is applied are not subject to the requirements of VM-G Sections 2 and 3.

**VM-31****Section 2: General Requirements**

- A. Each year a company shall prepare, under the direction of one or more qualified actuaries, as assigned by the company under the provisions of VM-G, a PBR Actuarial Report if the company computes a deterministic reserve or stochastic reserve or performs an exclusion test for any policy as defined in VM-20, or computes an aggregate reserve for any contract as defined in VM-21.

A company that does not compute any deterministic or stochastic reserves under VM-20 for a group of policies as a result of the policies in that group passing the exclusion tests as defined in VM-20 Section 6 must still develop a sub-report for that group of policies that addresses the relevant requirements of Section 3.

A company that computes reserves under the Alternative Methodology defined in VM-21 must still develop a sub-report with the applicable requirements to the Alternative Methodology for that group of policies that addresses the relevant requirements of Section 3.

**VM-G****Section 1: Introduction, Definition and Scope**

- A. The corporate governance guidance provided in VM-G is applicable only to a principle-based valuation calculated according to methods defined in VM-20 and VM-21, **except for the following condition:**

For a company that does not compute any deterministic or SR under VM-20 as a result of passing the exclusion tests as defined in VM-20 Section 6, and ~~it does not calculate any~~ all contracts subject to reserves under VM-21 are determined by application of the Alternative Methodology, VM-G Sections 2 and 3 below are generally not applicable; the requirements of Section 4 are still applicable. However, if the company calculated the SERT using the DR method outlined in VM-20 Section 6.A.2.b.i.a, or the Stochastic Exclusion Demonstration Test outlined in VM-20 Section 6.A.3, then VM-G Sections 2 and 3 are applicable.

**Section 4: Responsibilities of Qualified Actuaries**

- A.3 The responsibility for providing a summary report to the board and to senior management on the valuation processes used to determine and test PBR, the principle-based valuation results, the general level of conservatism incorporated into the company's PBR, the materiality of PBR in relationship to the overall liabilities of the company, and significant and unusual issues and/or findings.

If Sections 2 and 3 are not applicable because the company met the requirements to be exempt from Section 2 and Section 3 as outlined in Section 1.A, this particular reporting to board and senior management is limited to:

- a. For VM-20, notifying senior management if the company is at risk of failing either exclusion test, and if so, reporting on the company's readiness to calculate deterministic and SR-; and
- b. For VM-21, notifying senior management if the company may not be able to use the Alternative Methodology for all business subject to VM-21, and if so, reporting on the company's readiness to calculate a SR.

**To:** Rachel Hemphill, Chair  
The Life Actuarial (A) Task Force

**Subject:** The Report of the Index-Linked Variable Annuity (A) Subgroup (ILVA SG) to the Life Actuarial (A) Task Force

The ILVA SG has not met since the adoption of group's main work product, Actuarial Guideline 54 (ILVA), by the Life Actuarial (A) Task Force on December 11, 2022. Actuarial Guideline 54 was subsequently adopted by the Life Insurance and Annuities (A) Committee and will be considered by the NAIC's Executive (EX) Committee and Plenary at the upcoming Spring National Meeting on March 25. After full adoption of Actuarial Guideline 54, the Life Actuarial (A) Task Force will consider next steps for the ILVA SG, which could include folding any relevant remaining charges into those of the Task Force and/or disbanding the ILVA SG.

**mn** COMMERCE DEPARTMENT

# VM-22 Project Overview

Ben Slutsker, Chair, NAIC VM-22 Subgroup

3/20/2023 mn.gov/commerce 1

# Agenda

- Introduction to Non-Variable Annuity PBR
- History and Project Plan
- Exposures and Upcoming Meetings
- Key Issues
- Standard Projection Amount
- Field Test and ESG

3/20/2023 mn.gov/commerce 2

# What is Non-Variable Annuity PBR?

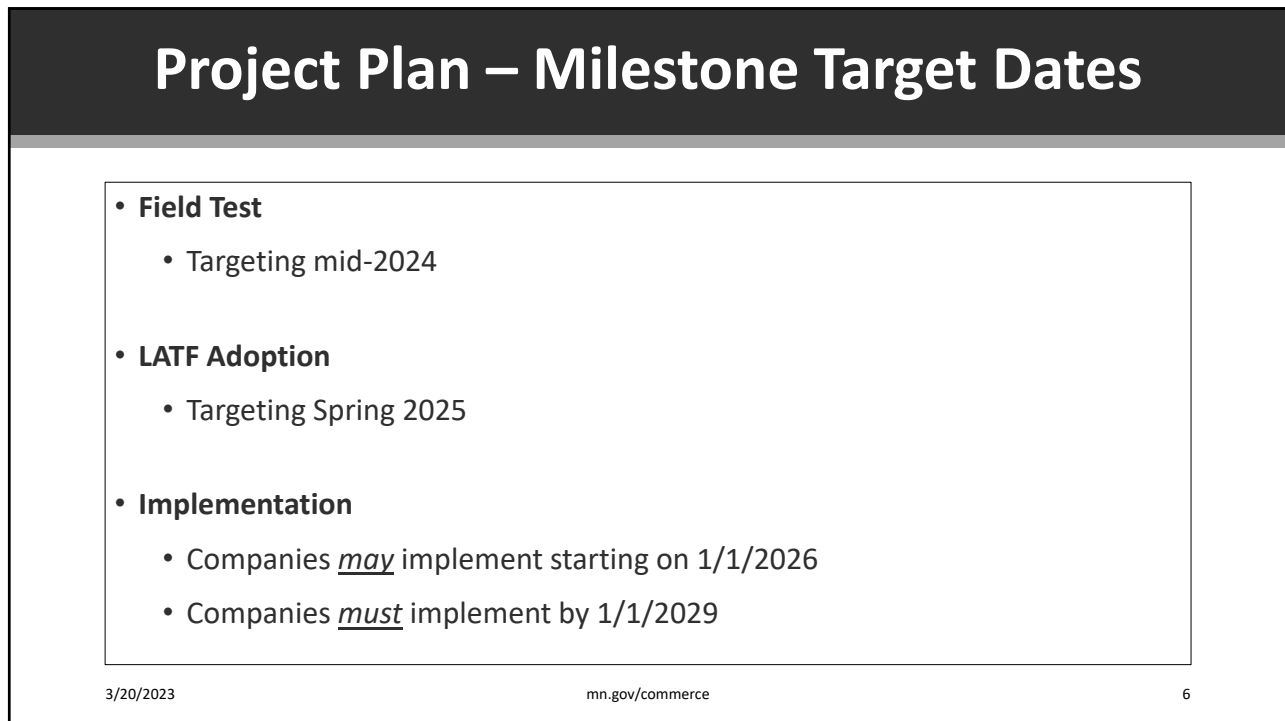

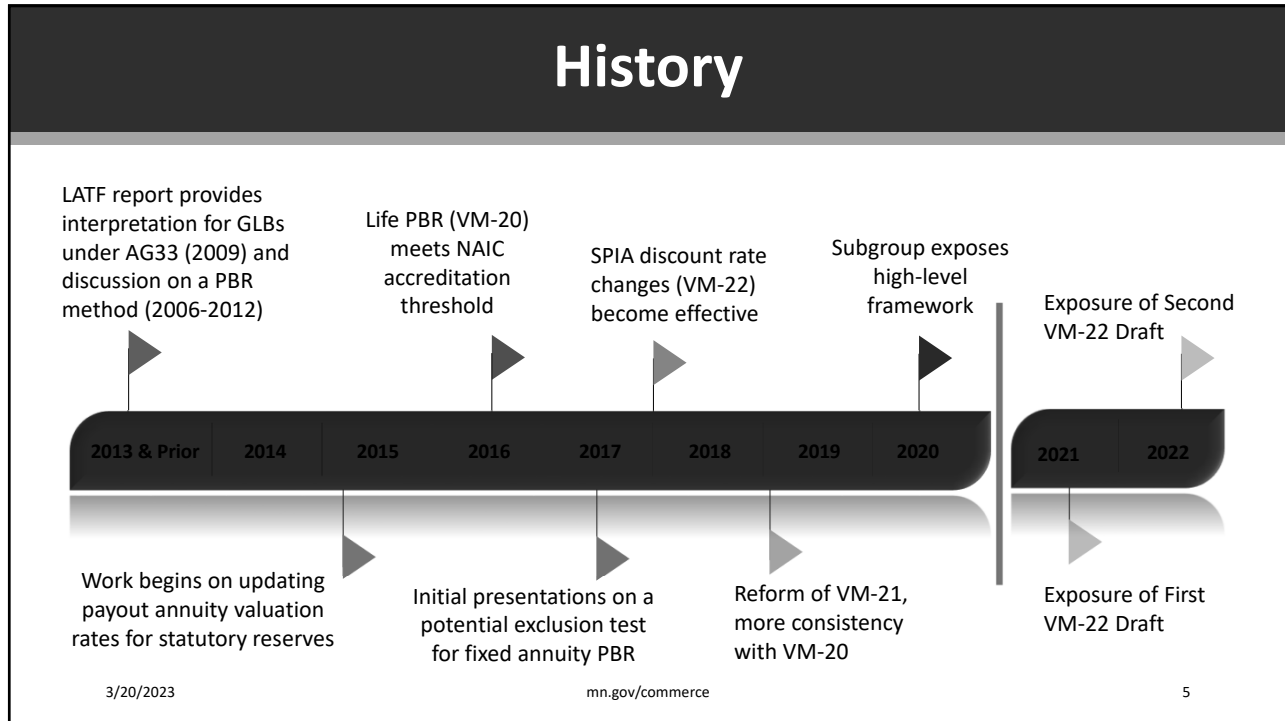

- **Principle-Based Reserving (PBR)**
  - Statutory reserve framework that uses company-specific assumptions
  - Multiple economic scenarios through stochastic reserving (CTE70)
  - Applicable to all fixed annuity contracts, except GICs and stable value contracts<sup>1</sup>
- **Contrast to current reserve framework**
  - Formulaic methodology: Actuarial Guideline 33
  - Highest present value of future guaranteed benefits less considerations across all possible product options and scenarios using prescribed assumptions
- **Requirements contained in NAIC Valuation Manual**
  - Process for adopting amendments to valuation manual permits streamlined updates

(1) RILAs and Contingent Deferred Annuities to follow VM-21 in latest draft

# Why Non-Variable Annuity PBR?

- **PBR exists in life insurance and variable annuities**
  - All variable annuity contracts and only life contracts issued in 2020+ (or implementation date if earlier)
- **Advantage of PBR is addressing product complexity**
  - More guaranteed living benefits, index options, and other features
  - Contracts that are hybrid variable, indexed, and fixed annuities
- **One challenge is that additional resources are required to review and audit**
  - Two companies may have identical products and populations, but different views on future assumptions
  - More calculation detail: asset modeling, dynamic lapses, and rider utilization

## Project Plan – 2022 (past)

8

## Upcoming Meetings

- **Scheduled to meet on a bi-weekly basis in 2023**
  - First meeting held on 3/1; next to be held on 4/12 (due to NAIC National Meeting)
- **Focus on comments for VM-22 Exposure**
  - Review on comment-by-comment basis
- **Firm up standard methodology mechanics**
  - Assumptions and Methodology

3/20/2023 mn.gov/commerce 10

## First Exposure Comments

- **Initial exposure in July 2021**
  - Academy proposal
  - NAIC VM-22 Subgroup aggregation categories
- **Eleven comment letters**
  - Nearly 400 comments
- **Categorized each comment into one of four tiers**
  - Based on priority
  - Determined order of discussion in NAIC VM-22 Subgroup

3/20/2023

mn.gov/commerce

11

## Second Exposure Comments

- **Exposure in October 2022**
  - Included revisions based on 2022 discussions
  - Reflects Subgroup decisions on how to address each comment in first exposure
- **Three comment letters**
  - Nearly 200 comments
- **Process to discuss comments will mirror the first exposure**
  - Categorized each comment into one of four tiers
  - For the fourth tier (less substantive or non-controversial), initial edits will be shared by the Subgroup and will be taken up on public calls upon request from interested parties

3/20/2023

mn.gov/commerce

12

## Key Issues Preliminarily Determined

- **Aggregation**
  - Payout vs. Accumulation vs. Longevity Reinsurance Reserving Categories
- **Exclusion test: applicability and concept**
  - Pass = option to use pre-PBR; fail = must use PBR
  - Stochastic exclusion ratio test, demonstration test, or certification method
- **Use of PBR Exemption**
  - Companies with volume of business below a threshold may be exempt
- **Different treatment for index credit hedging programs**
  - Reflect a hedge margin and, unlike other programs, no requirement to model without hedges

3/20/2023

mn.gov/commerce

13

## Key Issues in midst of Being Determined

- **Longevity reinsurance**
  - Currently discussing a “k-factor” methodology similar to CRVM
- **Exclusion test carveout for payout annuities**
  - Certain types of payout annuity contracts that can automatically pass exclusion testing?
- **Allocation of reserves to each contract**
  - Narrowed down to one proposed methodology based on an actuarial present value calculation
- **PBR Exemption level**
  - Decide the appropriate threshold to permit exemption eligibility
- **SPA mechanics**
  - Upcoming exposure and placeholder assumptions

3/20/2023

mn.gov/commerce

14

## Key Issues Yet to Be Determined

- **Reinvestment guardrail**
  - Use current VM-20/VM-21 or Academy proposal or something else?
- **Exclusion test threshold**
  - Passing level for the stochastic exclusion ratio text
- **Level of minimum index credit hedge margin**
  - To be determined based on future field test results
- **Standard Projection Amount treatment**
  - Minimum reserve floor or disclosure-only?

3/20/2023

mn.gov/commerce

15

## Standard Projection Amount

- **VM-22 Subgroup is recommending to develop calculation**
  - No recommendation on whether to use as a disclosure or floor
- **LATF to address how to use the standard projection amount**
  - Targeting consistency with VM-21
- **Drafting groups have presented initial mortality, policyholder behavior, and other liability assumptions**
  - Society of Actuaries have developed mortality factors upon drafting group requests
  - Willis Towers Watson and Academy presented proposed expense assumptions

3/20/2023

mn.gov/commerce

16

## Field Test

- **Jointly run by NAIC, Academy, ACLI**
  - Selecting consultant to manage field test
  - Targeting mid-2024
- **Will test both principle-based capital and reserves**
  - Comparison to today's standards (CARVM vs. C-3 Phase I)
  - Sensitivities and impact of margins
  - To inform decisions around exclusion ratio test and reinvestment mix
- **Applies to recently issued inforce business**
  - Will help approximate the impact to future written contracts

3/20/2023

mn.gov/commerce

17

## Relationship to Economic Scenario Generator

- **NAIC Economic Scenario Generator provides scenarios**
  - Generates assumptions for treasuries, equities, and bond funds
- **Currently under development**
  - Forming acceptance criteria
  - Already one field test and planning for a second field test
- **Dependency**
  - Field testing an economic scenario generator materially different than the one ultimately adopted could lead to results different than future reserve levels

3/20/2023

mn.gov/commerce

18

# Prospective vs Retrospective

- **Initially prospective**
  - For ease of project management and regulation changes
  - Start to review impact and work through mechanics
- **To explore retrospective implementation**
  - After initial prospective implementation
  - Consider the development of principle-based capital
- **Applicability of additional contracts out-of-scope**
  - GICs, funding agreements, and stable value contracts

3/20/2023

mn.gov/commerce

19

# Questions?

3/20/2023

mn.gov/commerce

20

Draft: 3/11/23

Valuation Manual (VM)-22 (A) Subgroup  
Virtual Meeting  
March 1, 2023

The VM-22 (A) Subgroup of the Life Actuarial (A) Task Force met March 1, 2023. The following Subgroup members participated: Ben Slutsker, Chair (MN); Elaine Lam and Thomas Reedy (CA); Lei Rao-Knight (CT); Mike Yanacheak (IA); Vincent Tsang (IL); Nicole Boyd (KS); William Leung (MO); Bill Carmello and Amanda Fenwick (NY); Rachel Hemphill and Iris Huang (TX); Tomasz Serbinowski (UT); and Craig Chupp (VA).

1. Heard an Update on the VM-22 Project Plan

Slutsker walked through an updated project plan (Attachment Ten-A), including noting that a VM-22, Requirements for Principle-Based Reserves for Non-Variable Annuities, field test would not occur in 2023 due to dependencies on the economic scenario generator (ESG) project. Slutsker said that the latest target for adoption of VM-22 was 2025.

2. Discussed the VM-22 Exemption

Slutsker said that the Subgroup had voted last year to include an exemption for small companies in the draft VM-22 requirements and that now the Subgroup would need to decide on how the threshold would be defined. Chupp commented that for VM-20, Requirements for Principle-Based Reserves for Life Products, one of the goals was to right size reserves so that some companies would see increases and others would see decreases to reserves. Chupp then asked if one would expect reserves to be lower for the new VM-22 methodology compared to the current methodology. Slutsker noted that while there were no field test results to point to, there was a general expectation that reserves would be lower for the new VM-22 methodology for many, though not all, products. Chris Conrad (American Academy of Actuaries—Academy) noted that the Academy supports basing the exemption on gross of reinsurance values, to which a number of regulators agreed.

Carmello made a motion, seconded by Tsang, to use gross of reinsurance values to define the threshold. The motion passed unanimously.

Slutsker then stated that the next part of the exemption discussion to define was the level of the threshold. Conrad said the Academy supports level of \$1 billion dollars of reserves based on comparisons made to the Life PBR Exemption. Brian Bayerle (American Council of Life Insurers—ACLI) said that the ACLI could be supportive of \$1 billion to \$2 billion dollars as the exemption threshold.

A roll call vote was then conducted on the threshold amount for an individual company, with Yanacheak and Carmello voting for a \$3 billion statutory reserve exemption level and the remaining, and large majority of, Subgroup members present voting for a \$1 billion exemption threshold.

Having no further business, the VM-22 (A) Subgroup adjourned.

**NAIC VM-22 Drafting Discussion Log - 2022 Exposure**

#	Topic	Description	Date	Tier	Outcome
1	Exemption Threshold Level	Discuss potential reserve thresholds, below which companies can apply for VM-22 exemption	3/1/2023	1	
2	Exemption Reinsurance Treatment	Are the reserves for the exemption levels gross or net of reinsurance?	3/1/2023	1	
3	Longevity Reinsurance k-factor Approach	Consider principles-based methods for longevity reinsurance requirements?	3/1/2023	1	
4	GLB Exemption Eligibility	Allow GLBs to be eligible for the exemption? Only if in payout status? What if only the GLB piece is reinsured?	TBD	2	
5	VM-21 vs. VM-22 Applicability	For principles in Section II, say "shall follow" or "generally expected to follow"?	TBD	2	
6	Combo Product Valuation	Should nursing riders and combo products be valued under PBR or prior formulaic reserves?	TBD	2	
7	Reserving Category for GLB with Depleted AV	Use principle-based categorization or require a specific reserving category?	TBD	2	
8	Frequency of Reviewing PBR Assumptions	Current text specifies reviewing experience annually, but assumptions periodically - align the two? Every 3 years?	TBD	2	
9	Rider Valuation	Add "After issuance" for determining whether a rider's reference to base policy results in valuing them together?	TBD	3	
10	Two Benefits in a Contract	"May" or "should" assume the more valuable of two benefits in a contract?	TBD	3	
11	Longevity Reinsurance Premium Frequency	Remove the statement specifying that premiums are paid over the life of the annuitant?	TBD	3	
12	Separate Account References	Remove references to the Separate Account in VM-22?	TBD	3	
13	Guidance Note in Section 3.A	Make guidance note part of formal text?	TBD	3	
14	Aggregation within each Reserving Category	Clarifying guidance on aggregation within reserving categories	TBD	3	
15	Revisiting Aggregation	View expressed that a more principles-based approach for aggregation	TBD	3	
17	Annuitization from Other Host Contracts	VM-21 vs. VM-22 treatment for annuitizations from host contracts	TBD	3	
18	Supplementary Contracts	Need a definition for supplementary contracts?	TBD	3	
16	Pre-determined Reinsurance Premiums	If premiums are pre-determined for longevity reinsurance, how does the k-factor approach apply?	TBD	3	
19	Index Credit Hedge Margin	Determine prescribed minimum margins	TBD	3	

NAIC VM-22 Drafting Discussion Log - 2022 Exposure

#	Topic	Description	Date	Tier	Outcome
20	Projection Period	No obligations or not <i>material</i> obligations at the end of the projection period?	TBD	3	
21	MVA Threshold	Should there be a percentage threshold of market value assets in a portfolio to determine MVA treatment?	TBD	3	
22	Longevity Reinsurance Guidance Note	Clarify guidance note saying that deterministic assumptions are not appropriate for longevity reinsurance	TBD	3	
23	Term Certain in SPIA SET exemption	Include "Annuities Certain" and "Supplementary Contracts" from Exhibit 7 in SPIA threshold definition?	TBD	3	
24	PRT Exclusion Testing treatment	Keep ineligibility for PRT and longevity reinsurance to automatically pass exclusion test through SPIA carveout?	TBD	3	
25	SPIAs with increasing benefits & optionality	Allow SPIA exclusion test treatment to include fixed COLA, 50% joint, non-elective changes) rather than 5% standard	TBD	3	
26	Payout Annuity Exemption Definition	Remove group annuities from payout exemption reserve definition if excluding PRT/reinsurance from carveout?	TBD	3	
27	Index vs. Non-Index Hedging Bifurcation	What if a company does not clearly separate hedging strategies for index vs. non-index hedge programs?	TBD	3	
28	E Factor Examples	Clarify examples listed for the E-factor for hedging purposes is non-exhaustive?	TBD	3	
29	Sensitivity Test Immateriality	Should sensitivity testing include assumptions that are deemed to be immaterial? (e.g., account transfers, etc.)	TBD	3	
30	Less Conservative Than Experience	Allow immaterial risk factors or low/no credibility to not be bound by less conservative than experience limit?	TBD	3	

NAIC VM-22 Drafting Discussion Log - 2021 Exposure

#	Topic	Description	Date	Tier	Outcome
1	VM-22 Scope and Definitions	Keep current definitions for what is in-scope or focus only on non-variable annuities out of scope	4/13/2022, 10/4/2022	1	Exposed principles in Section II of the Valuation Manual, moved definitions to VM-01, and removed references to product names in VM-22 section 2
2	Reserving categories and aggregation	Determine Option 1 or Option 2 from exposed reserve category definitions	4/13/2022	1	Preliminary vote to pursue Option 1
3	Small Company Exemption	Fixed Annuity PBR exemption, similar to life PBR exemption for smaller carriers?	4/13/2022, 10/4/2022	1	Voted to pursue a "Fixed Annuity PBR Exemption"; Exposed ACLI proposed threshold based on prior year reserves, with some modifications
4	Reinvestment Guardrail	Keep VM-20/VM-21 mix, Academy mix, TX mix, or other? Wait until field test for final decision?	4/27/2022	1	Wait until observing impact in field testing results before voting on a reinvestment mix guardrail
5	Principles & Risks Across VM Chapters	Build one section in the Valuation Manual for principles that apply to VM-20, VM-21, and VM-22	4/27/2022	2	Openness to interested party proposals for a common "principles" section, but will focus on working through other VM-22 decisions before exploring
6	General Assumptions Section	Add a section to the VM-22 draft on general considerations and requirements for assumption	4/27/2022	2	Will include a proposed general assumptions section ("Section 13") from Texas, to be consistent with a recent APF adoption on VM-21
7	Transition Period	Permit 1) early adoption and 2) retrospective adoption to the start of the 3-year transition period?	4/27/2022	2	Decided to not pursue early adoption; VM-22 will say silent on retrospective adoption to start of transition period, similar to VM-20
8	Minimum Error for Index Credit Hedges	What should be the minimum breakage expense (i.e., error) for modeling hedges supporting index credits?	5/11/2022	2	Will wait until seeing field testing results before minimum threshold
9	Longevity Reinsurance	How should longevity reinsurance be defined and treat negative reserves/recurring premiums?	5/11/2022	2	Academy presented on longevity reinsurance and will provide a refined definition; New Jersey proposal is exposed for reserving requirements
10	Categories for VM-31 Disclosures	What level of granularity should be required for disclosing PBR reserves for product groups in VM-31?	5/11/2022	2	Will wait until seeing field testing results before determining granularity of disclosures
11	Exclusion Test: SPIA contracts	Allow SPIAs to have the option of PBR vs. pre-PBR valuation without an exclusion test?	6/1/2022	2	Voted to allow SPIAs automatically pass exclusion testing, subject to criteria around optionality and a liability duration threshold (TBD)
12	Exclusion Test: PRT Certification Method	Allow PRT contracts to use the Certification Method for exclusion testing?	6/1/2022	2	Do not allow PRT to undergo the Certification Method
13	Exclusion Test: Grouping	Group between products with significantly different risk profiles?	6/1/2022	2	Do not allow grouping between products with significantly different risk profiles, consistent with VM-20 and TDI's proposal
14	Exclusion Test: Future Premiums	For the stochastic exclusion ratio test, determine whether to include future premiums	6/1/2022	2	Include future premiums in the numerator, but only benefits and expenses in the denominator, consistent with VM-20.
15	Exclusion Test: Deterministic Reserve	To pass the deterministic test, does the company need to pass or disclose 16 scenarios with baseline mortality?	6/1/2022	2	Require passing the ratio test for 16 economic scenarios under 100% of the anticipated experience mortality assumption
17	Import Reinsurance Wording from VM-20	Import VM-20 wording on incorporating contractual or additional characteristics for modeling reinsurance?	6/14/2022	2	Include proposed wording from VM-20
18	Fair Value Certification	Include fair value certification, similar to existing VM-21 requirement?	6/14/2022	2	Include fair value certification disclosure for non-index credit hedging programs
16	PRT Mortality	Permit PRT mortality with limited credibility to follow a third-party provider instead of an industry table?	6/14/2022	2	Voted in favor of using a prescribed table; do not permit a third party table upon limited credibility
19	Allocation Method	Determine Option 1 or Option 2? Wait until observing field test results before deciding?	9/21/2022	2	Using an ACLI proposal based on Option 2 for the VM-22 exposure, which addresses a tax issue for non-life contingent annuities

NAIC VM-22 Drafting Discussion Log - 2021 Exposure

#	Topic	Description	Date	Tier	Outcome
20	Working Reserve	Use a working reserve concept to serve as a floor for contracts without cash surrender value?	6/29/2022	2	Academy will work on a working reserve concept for contracts without cash surrender value, though may be little impact due to reserving categories
21	Grouping for Fund Value Depletion	Appropriate reserving category for deferred annuities with GMWBs/GMIBs that have depleted fund value	6/29/2022	2	Decided to leave these contracts in the "Payout Reserving Category" for now, but will add a drafting note to solicit feedback an optional approach
22	RBC Guidance Note	Retain the guidance note in VM-21 that discusses the relationship between reserves and RBC?	8/17/2022	3	ACLI will provide the full text for the Subgroup to consider
23	Principle 1	Should the edits to Principle 1 for VM-22 be incorporated into VM-21 as well?	8/17/2022	3	For now, will plan to focus only on VM-22, as LATF can explore the other VM chapters upon the Subgroup's recommendation of the VM-22 draft to LATF
24	Principle 2	Does setting an SR to be reasonably conservative over a span of economic cycles contradict other principles?	7/13/2022	3	ACLI will provide the full text for the Subgroup to consider
25	Aggregation Limits	Guidance note stating aggregation may not be possible for experience rated group and reinsurance treaties	7/13/2022	3	Will include this text in the VM-22 draft
26	Principle 3	Delete "Generally, assumptions are to be based on the conservative end of the confidence interval"?	7/13/2022	3	Retain this language
27	Principle 5	Delete sentence about the principle to not reduce the reserve unless reducing the risk?	7/13/2022	3	Retain this language
28	Risks not reflected	Retain or remove the list of "Risks not reflected" in VM-22?	7/13/2022	3	Remove subsection 3, but keep section 4 and update title to include "risks not reflected"
29	Separate Account References	Recommendation to delete all references to "separate accounts" in VM-22	7/13/2022	3	For now, will keep references to "separate accounts" and will add a drafting note to solicit feedback
30	Combination Risks	Proposal to delete "Risks modeled in the company's risk assessment processes that are related to the contracts"	7/13/2022	3	Retain this language
31	Immaterial Risks	Recommendation to delete sentence about not reflecting risks that do not materially affect the reserves	7/13/2022	3	Remove this language
32	Liquidity Risk	Refer to liquidity risks for "run on bank" or "sudden and significant levels of withdrawals and surrenders"	7/13/2022	3	Use the "run on bank" description
33	Significant Future Reserve Increases	Strike this item from the list of risks not reflected?	7/13/2022	3	Retain this language
34	Fixed Annuity Definition	Need to define a "fixed annuity"?	7/13/2022	3	Will replace all references to "fixed annuity" with "non-variable annuity"
35	Longevity Swaps	Are these contracts included in the definition of PRT?	7/13/2022	3	As a follow-up, Academy will include reviewing the definition of PRT when revisiting the definition of longevity risk
36	CSV and GMDB definitions	Retain VM-21 definitions for "cash surrender value" and "guaranteed minimum death benefits"?	7/13/2022	3	Will not retain the definition for "cash surrender value" and will move the "guaranteed minimum death benefits" to VM-01
37	Assumed reserve level for RBC	Question whether CTE70 was the assumed level for reserves upon determining RBC	7/19/2022	3	Question relates to RBC, and therefore did not discuss as part of the VM-22 Subgroup
38	VM-23	Consider reinstating "VM-23" to avoid confusion around the where exemptions/exclusions point to vs. PBR?	7/19/2022, 10/4/2022	3	Exposed moving the current VM-22 requirements (previously Section 14 in the VM-22 draft) to a separate "VM-V" section in the Valuation Manual.

NAIC VM-22 Drafting Discussion Log - 2021 Exposure

#	Topic	Description	Date	Tier	Outcome
39	Pre-Reinsurance	Request to develop further guidance around pre-reinsurance	7/19/2022	3	ACLI will consider whether to provide suggested language to clarify pre-reinsurance cash flow requirements in response to the next exposure
40	Deterministic Reserve	Use this term for the single scenario reserve calculated upon passing the deterministic exclusion test?	7/19/2022	3	Will replace "scenario reserve" with "deterministic reserve". Also added "aggregate minimum reserve" as the term for the final reserve
41	Deterministic Certification Option	Keep this terminology or change?	7/19/2022	3	Given that the term "deterministic reserve" will not be used, decided to keep this terminology
42	Stochastic Exclusion Test	Change Section 3.E to "Stochastic Exclusion Test" header?	7/19/2022	3	Accepted comment and made change to update header
43	Guidance Note for Exclusion Test	Remove the guidance note that clarifies that AG33/AG35 may be used upon passing the exclusion test	7/19/2022	3	Decided to remove this guidance note
44	Prudent Estimate Assumptions	Move Section 3.G to Section 4 of the document?	7/19/2022	3	Subgroup decided to hold off for now
45	Simplifications	Port over VM-21 Section 3.H on simplifications, approximations, and modeling efficiency techniques?	7/19/2022	3	Subgroup agreed to add this wording for simplifications, to be consistency with VM-21
46	Review experience every three years?	Make this a requirement for the qualified actuary?	7/19/2022	3	Subgroup agreed to include a requirement to review experience every three years
47	Simplification example for the SPA	Add an example of a simplification for the SPA upon development	7/19/2022	3	Delete for now and revisit upon development of the SPA
48	Stochastic Mortality	Consider including stochastic mortality in the stochastic reserve for longevity reinsurance?	7/19/2022	3	Subgroup agreed to port over VM-20 language on stochastic modeling when static prudent estimates are not appropriate for liability assumptions
49	MVA Guidance Note	Is the market value adjustment guidance note from VM-21 still appropriate for VM-22?	8/17/2022	3	Subgroup decided to remove guidance note
50	Hedging Reorganization	Move parts of Section 4.A.4 to Section 9, which covers hedging	8/17/2022	3	Open to comments on restructuring this section during the next exposure
51	Future Hedging Programs	Align VM-22 draft to be consistent with APF 2020-12 adopted edits for VM-21?	8/17/2022	3	Subgroup decided to be consistent with APF 2020-12 language
52	Index Credit Hedge Margin	Does this reflect both model risk and real-world error? How does stress testing justify the error?	8/17/2022	3	Wording is added to state that both sources of error are reflected in the margin; in addition the reference to stress testing will be removed
53	Margin on Hedging Paragraph	Remove this paragraph if included in another section, even upon edits from TDI/OPBR?	8/17/2022	3	Open to comments on restructuring this section during the next exposure
54	Revenue Sharing	Is the section of revenue sharing applicable to non-variable products?	8/17/2022	3	Decided to retain this section
55	Projection Period	Use consistent language with VM-20?	8/17/2022	3	Kept the first sentence to be consistent with VM-20, but removed the second proposed sentence, since now the approximation section has been added
56	PIMR	Include pre-tax IMR in VM-22?	8/17/2022	3	Refer to LATF
57	MVA on CSV Floor	Apply the market value adjustment factor to the cash surrender value reserve floor for applicable products?	9/7/2022	3	Will not add language applying the MVA to the CSV floor; instead new language states the MVA shall only apply when assets are held at market value

NAIC VM-22 Drafting Discussion Log - 2021 Exposure

#	Topic	Description	Date	Tier	Outcome
58	Consistency with Managed Business	Modify NAER requirement to have assets modeled in a manner consistent with how business is managed?	8/24/2022	3	ACLI will consider whether to recommend specific edits related to this comments
59	Limits on NAER	Define a specific cap or floor for the NAER instead of saying it should not be "unreasonably high"?	8/24/2022	3	Subgroup decided to modify language to change "unreasonably high" to "extremely positive or negative", which covers both directions
60	Reserve Floor	NY comment on using CARVM as a reserve floor	8/24/2022	3	Will hold off on discussing the standard projection amount until after the other sections of VM-22 are re-exposed, in Fall of 2022
61	Longevity Reinsurance & SPA	Require the k-factor approach to address negative reserve issue for longevity reinsurance in SPA?	8/24/2022	3	Will hold off on discussing the standard projection amount until after the other sections of VM-22 are re-exposed, in Fall of 2022
62	Standard Projection Amount	Equitable comment on supporting SPA with company assumptions insignificant risk factors	8/24/2022	3	Will hold off on discussing the standard projection amount until after the other sections of VM-22 are re-exposed, in Fall of 2022
63	Exclusion Testing & SPA	Modify exclusion test to address the standard projection amount?	8/24/2022	3	Will hold off on discussing the standard projection amount until after the other sections of VM-22 are re-exposed, in Fall of 2022
64	Hedging eligibility for exclusion testing	Refine wording around the restriction for not allowing blocks with hedging programs to use exclusion testing?	8/24/2022	3	Academy will suggest possible disclosures to better identify "hedging programs solely supporting index credits"
65	Mortality Stress Tests	If using the NY7 for the Certification Method, add mortality stress scenarios?	8/24/2022	3	Added language for mortality stress scenarios if using the NY7 Certification Method
66	Mortality Shock	Include the mortality shock for the ratio test based on the company materiality standard if more restrictive?	8/24/2022	3	No objections to modifying the stochastic exclusion ratio test to use the company materiality standard if more restrictive
67	Baseline Mortality Test	Include the baseline mortality test in determining the exclusion test?	6/1/2022	3	Subgroup agreed to include the baseline mortality scenario for the stochastic exclusion ratio test
68	Permutations	Include note on number of exclusion test permutations for clarity?	6/1/2022	3	Updated guidance note to include the number of permutations, inclusive of testing economic scenarios under the mortality baseline
69	Non-Proportional Reinsurance	Add definition for non-proportional reinsurance	8/24/2022	3	Decided to add a guidance note that references the APPM for clarification on the non-proportional reinsurance
70	SERT if Other Tests Fail	Prohibit passing the SERT if the demonstration test fails?	8/24/2022	3	Added language to prohibit passing the stochastic exclusion ratio test if the demonstration test fails
71	Demonstration Test	Remove options in 1.a and 2.a?	8/24/2022	3	ACLI will take back and decide whether to recommend removing the demonstration test altogether, or only certain components/language
72	Deterministic Exclusion for SPA	Consider SPA for the deterministic exclusion test	8/24/2022	3	Will hold off on discussing the standard projection amount until after the other sections of VM-22 are re-exposed, in Fall of 2022
73	Deterministic Exclusion Scenario	Is the deterministic certification intended not be applicable for blocks with index credit hedging?	9/7/2022	3	Intent is for the deterministic certification option to not apply to also not apply to hedging programs supporting index credits; no changes made
74	SPIA Guidance Note	Remove guidance note specifying that the deterministic exclusion test applies to SPIAs?	9/7/2022	3	No objections to removing guidance note
75	Delta Hedging	Replace or remove example about delta hedging for VM-22?	9/7/2022	3	Remove example referring to delta hedging
76	Non-Elective Benefits	Remove guidance note to limit modeling non-elective benefits after CSV is depleted if reducing reserves?	9/7/2022	3	No objections to language, but removed guidance note because the similar wording already existed in the paragraph above

NAIC VM-22 Drafting Discussion Log - 2021 Exposure

#	Topic	Description	Date	Tier	Outcome
77	100% Policyholder Efficiency	Assuming 100% policyholder inefficiency contradicts VM Section II 6.H.2., so revise VM Section II?	9/21/2022	3	Replace VM Section II language with the principle that efficiency increases over time
78	NGE Board of Directors	Comment that only allowing NGE exclusion if approved by the Board does not necessarily seem reasonable	9/21/2022	3	Removed this language from the draft, but added a drafting note to inquire on why potential language may be appropriate
79	Unsupported Judgement	Comment to remove the reference to using "unsupported actuarial judgement" from Section 11	9/21/2022	3	No objections to removing this language
80	Mortality and Reinsurance	Does Section 11.A require evaluation of a plus vs. minus segment differently for pre- vs. post reinsurance?	9/21/2022	3	This language is not included in VM-21 and was removed from the VM-22 draft
81	Mortality Improvement	Is the mortality improvement requirement intended to apply to all mortality assumptions in VM-22?	9/21/2022	3	Addressed by clarifying that this section only applies to industry mortality assumptions
82	Option 1 DR vs SR	Require separate allocation for DR vs. SR for allocation Option 1 (Section 13)?	9/21/2022	3	Agreed to add wording to clarify the allocation between the DR and SR should be separate
83	Option 2 for Direct Iteration Method	Option 2 is not designed to work for the Direct Iteration Method	9/21/2022	3	ACLI will consider adding language to address the direct iteration method
84	Option 2 Single Scenario	Could produce unstable allocation when products with different risk profiles are aggregated for PBR	9/21/2022	3	Reserving categories will require separate allocation for payouts and accumulation-based annuities
85	Index-linked annuity	This term is used in the proposed Section II, Subsection 2 draft, but is not defined	10/4/2022	3	Implicitly addressed through the proposed set of principles for scope of VM-21 vs. VM-22 in Section II of the Valuation Manual
86	Modified Guaranteed Annuities (MGAs)	VM-21 has language that exempts contracts falling under scope of MDL-255; does this contradict Section II edits?	10/4/2022	3	Implicitly addressed through the proposed set of principles for scope of VM-21 vs. VM-22 in Section II of the Valuation Manual

# RISING INTEREST RATE ISSUES

March 2023

1

## AGENDA

- Overview of Rising Interest Rate topic
  - Fred Andersen, Minnesota Department
- Dynamic Lapse and Other Relevant Experience
  - Dale Hall, Society of Actuaries
- Appointed Actuary Roundtable on Rising Interest Rate Impact
  - Ben Slutsker, Minnesota Department (Moderator)
  - Theresa Resnick, Everlake Life
  - Stephen McNamara, New York Life
  - Robert Egan, Global Atlantic

2

### PAST 15 YEARS

- Annuities with high long-term guaranteed credited rates on the books of many life insurers
- Declining portfolio yields due to lower reinvestment rates
  - Due to declining Treasury rates and steady spreads
- With high guarantees, annuity liabilities thought of as “sticky”
- Increased illiquidity in supporting assets
  - Little perceived risk of people surrendering their rich-guarantee annuities

4

## 2022 – RISING INTEREST RATES

- Insurers with deferred annuities model up interest rate scenarios
  - Disintermediation risk
    - Rising rates -> declining bond market values (higher discounting of bond coupons and par)
      - A particular concern with illiquid assets
    - Declining asset market values only matter if asset is sold
    - A company investing long may not be able to reinvest to take advantage of rising rates
    - A competitor may be positioned to offer favorable credited rates
    - Surprise surrenders may occur, triggering sale of “underwater” assets
      - Losses for the insurer

5

## DYNAMIC LAPSES – A:E

- Life insurers with deferred annuities have assumed dynamic lapses
- Question: how will dynamic lapse experience compare to assumptions?
  - Dale Hall will provide information from the Society of Actuaries and other research

6

## OTHER RISING RATE ISSUES

- **Accuracy of asset market values**
  - Most assets have a deep secondary market – straightforward valuation
  - Some complex assets are valued internally
    - AG 53 contains a question on this issue – step-by-step description required
- **Most issues should have been captured in past cash-flow testing**
  - A reason for multiple interest rate scenario testing
- **Some issues – wait and see**
  - Appointed Actuary roundtable will provide perspectives

# CHANGING INTEREST RATES: RESEARCH UPDATE

March 2023

R. DALE HALL, FSA, MAAA, CERA, CFA  
Managing Director of Research

## Fixed Rate Deferred Annuity Surrenders

- Last large SOA/LIMRA study released in 2006 with large focus on fixed deferred annuities; approximately 70% were book value products with no market value adjustment or equity index component
- Looking to initiate update to study this year
- Key factors impacting surrender activity
  - Time remaining in surrender charge period
  - Age of policyholder
  - Distribution method
  - Difference between Credited Rate and New Market Rate
- Factors reaffirmed by other industry studies in recent years
- Surrender functions commonly modeled using level and time remaining of surrender charges, current credited rates and proxy for potential new money rate from competing products

<https://www.soa.org/resources/experience-studies/2005-2009/deferred-annuity-persist>  
<https://ruark.co/wp-content/uploads/2021/08/COVID-and-annuity-PH-behavior-2021-update.pdf>

## Product Lines and Considerations

- AAA Asset Adequacy Analysis Practice Note
  - [https://www.actuary.org/sites/default/files/files/Asset\\_Adequacy\\_Practice\\_Note\\_Exposure\\_August2014.pdf](https://www.actuary.org/sites/default/files/files/Asset_Adequacy_Practice_Note_Exposure_August2014.pdf)
  - Increased focus for sensitivity testing include dynamic lapse parameters
  - Base Lapses and Dynamic Lapses both among the most commonly sensitivity-tested assumptions
- Interactions Between Dynamic Lapses and Interest Rates in Stochastic Modeling
  - SOA Product Matters
  - <https://www.soa.org/globalassets/assets/library/newsletters/product-development-news/2010/june/pro-2010-iss77-xue.pdf>

## Product Lines and Considerations

## Update on Mortality Experience Data Collection

Pat Allison, FSA, MAAA

March 20, 2023

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

**NAIC** NATIONAL MEETING SPRING 2023

## Update on 2021 Data Collection

- NAIC actuarial staff has calculated Actual to Expected mortality ratios for each company based on their submitted data for observation years 2018 and 2019.
- We have asked companies to review their A/E's and let us know if they are in line with their expectations.
- During their review, some companies have identified corrections that needed to be made to their data. So far, 11 companies have resubmitted their 2018 and 2019 data and another 6 companies have indicated that they plan to do so.

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

 **NAIC** NATIONAL MEETING **SPRING 2023**

## Update on 2021 Data Collection

Status on company A/E approvals for observation years 2018 and 2019:

Companies that have approved their A/E	88
Companies that have resubmitted 2018 and 2019 and have been provided revised A/E ratios to review	4
Companies that have indicated they plan to resubmit 2018 and 2019 data	6
Companies that have not yet approved their A/E. NAIC staff is meeting with these companies to discuss further.	9
<b>NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS</b>	107

 **NAIC** NATIONAL MEETING **SPRING 2023**

## Update on 2021 Data Collection

- NAIC staff is working with the SOA to verify the consistency and integrity of the data, initially focusing on analysis of data from companies that have approved their A/E ratios.
- Data analysis includes:
  - Comparison of 2018 and 2019 data collected by the NAIC vs. data collected prior to the 2018 observation year
  - Review of consistency of companies/data from year to year
  - Comparisons to population data
  - Statistical analysis

**NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS**

## Update on 2022 Data Collection

- We have received initial data submissions from 105 companies (all companies selected for observation year 2020).
- This year we had 69 resubmissions compared to 125 last year. The reduction in resubmissions is a result of the data files being much cleaner this time.
- Many companies have communicated to the NAIC that they have implemented process improvements in order to provide better data.
- Approximately 25 companies have requested an extension in order to submit corrected data files and/or respond to NAIC feedback.

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

## Update on 2022 Data Collection

- For the 2022 data collection, we asked companies to voluntarily use a new “Death due to Covid-19” cause of termination (this becomes mandatory in 2023). Many companies have done so.
- Similarly, we asked companies to voluntarily use new plan codes for Paid-Up Additions and One Year Term coverages purchased with dividends. Many companies have done this as well.
- The NAIC has hired 2 data scientists to assist with validations and data analysis.

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

Dates: Received	Reviewed by Staff	Distributed	Considered
Notes:			

**Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force**

**Amendment Proposal Form\***

- Identify yourself, your affiliation and a very brief description (title) of the issue.  
Society of Actuaries Valuation Basic Table Team – Chair Larry Bruning  
Revisions to VM-51 to allow for the data experience reporting observation calendar year to be one year prior to the reporting calendar year.

- Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

January 1, 2023, version of the Valuation Manual – VM-51 Section 2.D.

Deleted: 2021

- Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

**Section 2: Statistical Plan for Mortality**

- Process for Submitting Experience Data Under This Statistical Plan

Data for this statistical plan for mortality shall be submitted on an annual basis. Each company required to submit this data shall submit the data using the Regulatory Data Collection (RDC) online software submission application developed by the Experience Reporting Agent. For each data file submitted by a company, the Experience Reporting Agent will perform reasonability and completeness checks, as defined in Section 4 of VM-50, on the data. The Experience Reporting Agent will notify the company within 30 days following the data submission of any possible errors that need to be corrected. The Experience Reporting Agent will compile and send a report listing potential errors that need correction to the company.

Data for this statistical plan for mortality will be compiled using a calendar year method. The reporting calendar year is the calendar year that the company submits the experience data. The observation calendar year is the calendar year of the experience data that is reported. The observation calendar year will be one year prior to the reporting calendar year. For example, if the current calendar year is 2022 and that is the reporting calendar year, the company is to report the experience data that was in-force or issued in calendar year 2021, which is the observation calendar year. For the 2024 reporting calendar year, companies who are required to submit data for this statistical plan for mortality will be required to submit two observation calendar years of data, namely observation calendar year 2022 and observation calendar year 2023. For reporting calendar years after 2024, companies who are required to submit data for this statistical plan for mortality will be required to submit one observation calendar year of data.

Deleted: two

Deleted: s

Deleted: 18

Deleted: 16

Given an observation calendar year of 20XX, the calendar year method requires reporting of experience data as follows:

- Report policies in force during or issued during calendar year 20XX.

Dates: Received	Reviewed by Staff	Distributed	Considered
Notes:			

- ii. Report terminations that were incurred in calendar year 20XX and reported before July 1, 20XX+1. However, exclude rescinded policies (e.g., 10-day free look exercises) from the data submission.

For any reporting calendar year, the data call will occur during the second quarter, and the data is to be submitted according to the requirements of the *Valuation Manual* in effect during that calendar year. Data submissions must be made by Sept. 30 of the reporting calendar year. Corrections of data submissions must be completed by Dec. 31 of the reporting calendar year. State the reason for the proposed amendment? (You may do this through an attachment.)

This APF is needed for the following reasons:

1. There is a need to shorten the time period between data observation and data collection to facilitate more timely analysis and reporting of mortality experience.
2. Under a Principle Based Reserving methodology, valuation basic tables should reflect recent and current mortality experience.

**Deleted:** For any reporting calendar year, the data call will occur during the second quarter, and data is to be submitted according to the requirements of the *Valuation Manual* in effect during that calendar year. Data submissions must be made by Sept. 30 of the reporting calendar year. Corrections of data submissions must be completed by Dec. 31 of the reporting calendar year.

1. Background and Purpose
2. Limitations
3. Field Test Run Descriptions
4. Field Test Participation
5. High-Level Results, Observations, and Drivers of Results
6. Next Steps
7. Detailed Field Test Results

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

## Background and Purpose

- The purpose of this presentation is to summarize quantitative information from the VM-21/C3 Phase II field test participants to:
  - Understand the impact on reserves and capital,
  - Evaluate the impact of hedging programs across field test scenario sets,
  - Review the range of results across field test participants,
  - Compare the stability of results over time, and
  - Inform regulator decision-making on model and calibration choices.

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

## Limitations

- The NAIC took steps to review the quantitative results for reasonableness, including comparing field test data to annual statement values, reviewing qualitative survey responses, sending questions to participants, and asking participants to confirm that the NAIC compilations matched their intended result submission. However, the accuracy and reliability of the results are ultimately dependent on the quality of participant submissions.
- The field test reserve and/or capital participant analytics (average reserve/ capital impact, range of impacts, etc.) can be strongly dependent on a subset of the participants. Results shown today for the different field test runs will include varying numbers of participants corresponding to the levels of participation for that run. The lack of participation in some of the runs will limit their applicability to the overall variable annuity industry.
- Four legal entities were excluded from the analysis due to results that did not seem reasonable to the NAIC.
- A number of comparisons between company-provided field test or baseline runs are made in the presentation. These comparisons are limited to the participation of whichever run had the least participation. For example, as Baseline 2 (as of 12/31/19 + 200 BP) had significantly lower participation than run 2A, many of the 2A results will not be shown for this comparison.
- For the most part, companies did not make changes to their models to account for changes in the field test scenario sets. Therefore, field test results may not be fully representative of company results post implementation of the new scenarios.

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

 <b>NAIC</b> NATIONAL MEETING <b>SPRING 2023</b>		
<h2>Field Test Run Descriptions</h2>		
<b>Note: Bold = Required Run</b>		
Run #	Description	Purpose of Run
<b>Baseline #1</b>	Scenario set(s) the company used for 12/31/21 statutory reporting	Baseline used as comparative basis for 12/31/21 runs
Baseline #2	ESG the company used for 12/31/21 statutory reporting of reserves and RBC, but modified to produce scenario sets with a 12/31/19 yield curve modified using a 200 BP increase across all maturities	Baseline used as comparative basis for 12/31/19 + 200 BP runs
<b>Test #1a</b>	GEMS Baseline Equity and Corporate model scenarios as of 12/31/21, and Conning Treasury model calibration with generalized fractional floor as of 12/31/21	Tests Conning Treasury model w/ GFF and Baseline Equity at YE 2021
<b>Test #1b</b>	Same as Test #1a, but with Alternative Treasury model calibration with shadow floor as of 12/31/21	Tests Alternative Treasury model with shadow floor and Baseline Equity at YE 2021
<b>Test #2a</b>	Same as Test #1a, but with Equity, Corporate, and Treasury models with a 12/31/19 starting yield curve modified using a 200 BP increase across all maturities. All other initial market conditions are unchanged. The Equity model parameters would be adjusted from #1a so that the year 30 median Large Cap Equity gross wealth factors remain consistent with #1a.	Stresses the starting Treasury rates using the same calibration as 1a to evaluate whether the model produces appropriate results in different economic environments
<b>Test #2b</b>	Same as Test #2a, but with the Alternative Treasury model calibration with shadow floor instead of the Conning Treasury model calibration with generalized fractional floor	Same as 2a, but designed to stress the 1b calibration

 <b>NAIC</b> NATIONAL MEETING <b>SPRING 2023</b>		
<h2>Field Test Run Descriptions</h2>		
<b>Note: Bold = Required Run</b>		
Run #	Description	Purpose of Run
Test #3	Conning Treasury model calibration with generalized fractional floor as of 12/31/21, GEMS Corporate model as of 12/31/21, and GEMS Baseline Equity model corresponding to a 12/31/19 yield curve with a 200 BP increase across all maturities	Attribution analysis that will illustrate how much of the difference between runs #1a and #2a is driven by the equity model vs the Treasury and Corporate models
Test #4	Same as Test #3, but using Alternative Treasury model calibration with shadow floor as of 12/31/21	Same as #3, but with respect to runs #1b and #2b.
<b>Test #5a</b>	Same as #1a, but with Conning’s original Equity model calibration that had significantly lower Gross Wealth Factor’s (GWFs) than the AIRG Equity Model.	Tests Conning Treasury model w/ GFF and original equity model as of year-end 2021.
<b>Test #5b</b>	Same as #5a but using a 12/31/19 starting yield curve modified using a 200 BP increase across all maturities. The parameters of Conning’s original Equity model are used without any adjustment.	Stresses the starting Treasury rates to understand the full impact of equity-Treasury linkage in Conning’s original equity model
Test #6	Same as #1a, but with the ACLI’s GEMS® Equity Calibration	Tests the ACLI’s GEMS® Equity Calibration that assumes a constant mean equity return independent of rates and increases alignment with AIRG equity model GWFs

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

**NAIC NATIONAL MEETING SPRING 2023**

## Field Test Participation: VM-21 and C3 Phase II

- 26 participant legal entity results are summarized in this presentation. The individual level of participation for each field test run is shown below.
- Hedging practices varied throughout the field test participants, but a majority used 1,000 scenario subset sizes and the AIRG in their reporting.
- Several participants commented that the value of results for field test runs 3 and 4 may be limited, and therefore those results have not been prioritized to be included in this presentation.

Hedge Modeling	Implicit	Explicit	No Model	Runoff
	7	8	9	2
Was Proprietary Economic Scenario Generator Used?	Yes		No	
	4		22	
Number of Scenarios	1000		<1000	>=1000
	22		2	2

**Valuation Dates:** 12/31/21 12/31/19 + 200 BP Hybrid

Field Test Run	Baseline 1*	Baseline 2	1A*	1B*	2A*	2B*	3	4	5A*	5B*	6

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS \*Required Run

**NAIC NATIONAL MEETING SPRING 2023**

## Participant Separate Account Fund Distribution

Equity and Bond Funds (AIRG Names)	Type	Average Variable Annuity Separate Account Allocation
Diversified Large Capitalized U.S. Equity	Equity	41.3%
Diversified International Equity	Equity	10.9%
Intermediate Risk Equity	Equity	11.3%
Aggressive Equity	Equity	6.7%
Money Market	Bond	4.0%
U.S. Intermediate Term Government Bonds	Bond	4.3%
U.S. Long Term Corporate Bonds	Bond	12.6%
Diversified Fixed Income	Bond	5.3%
Diversified Balanced Allocation (60/40)	Equity and Bond	3.6%
<b>Total</b>		<b>100%</b>

Average Equity Fund Separate Account Allocation: **72.4%**

Average Bond Fund Separate Account Allocation: **27.6%**

- Participants were asked to provide the approximate separate account fund mapping that was used for the 12/31/21 field test runs. Data from 26 participating legal entities was included in this analysis.
- The average separate account allocation is shown in the table. Note that the average is simply an average allocation by fund across the participating legal entities, and is not weighted by the legal entity separate account balance
- All of the participating legal entities had a majority of their separate account funds mapped to equity funds, with the smallest allocation to equities being approximately 60%. The maximum equity fund allocation was 93%.

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

**NAIC NATIONAL MEETING SPRING 2023**

## Participant Guaranteed Benefit Type Distribution

Type of Guaranteed Minimum Death or Living Benefit	Average Variable Annuity GMXB Allocation by:	
	% of Separate Account	% of Net Amount at Risk
Guaranteed Minimum Death Benefit (GMDB) Only	40.2%	46.9%
GMDB/Guaranteed Minimum Income Benefit (GMIB) Combo	9.3%	7.4%
GMDB/Guaranteed Minimum Withdrawal Benefit (GMWB) Combo	41.9%	41.4%
GMDB/Guaranteed Minimum Accumulation Benefit (GMAB) Combo	0.4%	0.1%
Other Benefit Combination	8.3%	4.3%
<b>Total</b>	<b>100%</b>	<b>100%</b>

- The distributions of guaranteed benefit types provided in the table above are shown as a percentage of separate account and as a percentage of net-amount-at-risk (NAAR). Note that the average above is a simple average across the participants and does not reflect any weighting by participant separate account or NAAR.
- The most prevalent guarantee types, by both the separate account and NAAR measures, are GMDB only and GMDB/GMWB combo.
- While the distribution of guaranteed benefits offered by companies could vary significantly within individual participants between the separate account and NAAR measures, overall, the measures showed a similar prevalence of guarantee types across participants.

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

## High-Level Results: Comparisons to Baseline

Average Percent Increase over Baseline	Statistic	1A	1B	2A	2B	5A	5B	6
<b>VM-21 Reserve for Guaranteed Benefits</b>	<b>Max</b>	1,578%	1,279%	2,730%	2,802%	2,862%	5,645%	492%
	<b>Average</b>	29.4%	13.4%	13.5%	5.6%	78.7%	28.3%	10.1%
	<b>Min</b>	-20.7%	-47.8%	-94.9%	-79.5%	4.3%	0%	-14.0%
<b>Risk-Based Capital</b>	<b>Max</b>	6,782%	755%	2,709%	3,136%	17,100%	4,599%	12,161%
	<b>Average</b>	69.1%	43.4%	9.7%	11.6%	114%	26.5%	56%
	<b>Min</b>	-56.4%	-100%	-88.2%	-88.2%	-21.0%	-12.7%	-8.2%
<b>Number of Participants</b>		26	26	11	11	25	11	12

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

## High-Level Observations

- For every field test run, there was a huge range in the reserve and capital impacts across the participating companies. Additional review of individual company results in a regulator-only session may provide a more complete understanding of the underlying factors behind the range of results.
- The field test runs generally produced increases in reserves and capital. However, a minority of participants had substantial reserve and/or capital decreases for some of the runs.
- A number of companies commented that guaranteed benefits were out-of-the-money due to the economic environment (favorable stock market), and that field test impacts would have been larger if a less favorable environment had been tested.

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

## Drivers of Field Test Results

- **Hedging** – Companies that modeled hedging (either implicitly or explicitly) had much smaller impacts to reserves and capital on average vs. those that did not.
- **Relative importance of equity returns vs. interest rates** – This varied among companies. Many commented that equity returns were the main driver of results, while others noted that equity and interest rate impacts were nearly equal, or that interest rates were the primary driver.
- **Distribution of guaranteed benefit types** – There was a range in the distribution of guaranteed benefit types among participants. Some had primarily GMDB or lower guarantees, leading to smaller impacts vs. those with richer benefits.
- **Proprietary economic scenario generators** - Some companies used a proprietary economic scenario generator to produce their baseline results, so reserve and/or capital increases are generally smaller (since these generators are typically more conservative than the AIRG).
- **Hedge costs** - Some companies noted that the field test runs increased hedge costs.
- **Company-specific modeling assumptions** – For some companies, this had a significant impact

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

## High-level Results: Stability of Results Across Valuation Dates

- On average, reserves and capital decreased when comparing the results produced using the 12/31/19 + 200 BP scenarios to their corresponding 12/31/21 results (i.e. Baseline 1 vs Baseline 2, 1A vs 2A, 1B vs 2B, and 5A vs. 5B)
- For reserves, the smallest change in magnitude (and tightest range of results) came from comparing Baseline 1 to Baseline 2. However, the average reduction in reserves was comparable to the other field test results. The comparison of 5B to 5A (which included the full impact of the GEMS® equity-Treasury linkage) showed the largest swing in reserves.
- For risk-based capital results, the average decrease in results from Baseline 1 to Baseline 2 (-0.9%) was much smaller in magnitude than the other field test runs. The change from 1A to 2A was the largest in magnitude, but was comparable to the change seen from 1B to 2B and from 5A to 5B.

Reserve/Capital Amount	% Increase from Baseline 1 to Baseline 2			% Increase from 1A to 2A			% Increase from 1B to 2B			% Increase from 5A to 5B

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

## Next Steps

- The NAIC will look to present economic scenario generator field test results for VM-20 and C3 Phase I in the next 1 – 2 months after the Spring National Meeting. Additional time for follow-up discussions may be necessary
- Regulators will continue to work with interested parties in economic scenario generator drafting groups to continue progress on reserve/capital framework specific implementation tasks
- The Life Actuarial (A) Task Force will engage with the American Academy of Actuaries and other interested parties to decide on stylized facts and acceptance criteria ahead of a recalibration of the economic scenario generator and a second field test.

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

# Detailed Field Test Results: VM-21/C3 Phase II

## Field Test 1A: US Treasury Overview

- Field Test 1A (as of 12/31/21) included a recalibration of the Conning GEMS® US Treasury model that was designed to meet the regulator’s acceptance criteria related to low for long, the prevalence of high interest rates, upper and lower bounds, initial yield curve fit, and yield curve shape. The frequency and severity of negative interest rates were controlled using a generalized fractional floor.
- The 1A UST scenario set as of 12/31/21 had a much higher prevalence of low UST rates, including negative interest rates, compared to the scenarios produced by the AIRG as of 12/31/21, which is floored at 1 BP.
- The 1A UST scenario set also included greater and more frequent high UST rates, with maximum UST rates greatly exceeding that of the AIRG. While a floor was employed in all of the field test UST scenario sets, no cap was employed on how high rates could get.

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

## Field Test 1A: Equity Overview

- The 1A equity scenario set used a calibration that targeted the median gross wealth factor (GWF) produced by the AIRG at the end of 30 years. This recentring of the equity return distribution with changes to the starting interest environment partially mitigates the impact of the GEMS® equity-Treasury linkage functionality.
- While the GWF's between the AIRG and field test 1A are consistent at the 50<sup>th</sup> percentile at the end of the 30<sup>th</sup> projection year, the 1A scenario set generally has somewhat lower GWFs in the lower percentiles and earlier projection years compared to the AIRG.
- In the later durations and higher percentiles, the 1A GWFs are greater than those produced by the AIRG.

## Field Test 1A Quantitative Results

- For field test 1A, the average field test participant VM-21 reserve for guaranteed benefits increased by 29.4% and the average Risk-Based Capital increased by 69.1%.
- However, the results were highly skewed among participants, with many seeing higher impacts to reserves and capital than the average indicates.
- Several participants noted that the lower equity returns and lower (and negative) interest rates that were more prevalent in 1A compared to the AIRG led to increases in reserves and capital. The lower equity returns result in more guaranteed benefits being in-the-money and less account value-based fee income. Lower interest rates lead to less discounting of future guaranteed benefit claims.
- Participants that modeled hedging (implicitly or explicitly) saw smaller impacts to reserves (25.4%) and capital (67.8%) than those that did not model hedging (163.3% and 91.6% for reserves and capital respectively).

## Field Test 1B: US Treasury Overview

- Field Test 1B (as of 12/31/21) included a calibration of the Conning GEMS® US Treasury model that was designed to meet regulator acceptance criteria but placed additional emphasis on maintaining realistic term premiums throughout the projection. Towards that end, there was a significantly lower frequency of inversions (e.g. ~5% of 1B scenarios had 10 year/2year UST inversions at the end of year 30 compared to ~12% seen in 1A). The average level of inversion was also significantly lower (e.g. in 1B 10 year/2 year UST inversions average ~30 BP at the end of year 30, compared to ~90 BP average inversion level for 1A).
- 1B also included lower and less frequent high interest rates than 1A, but still contained greater and more frequent high interest rates than the AIRG.
- The frequency and severity of negative interest rates were controlled using a shadow floor that preserves the arbitrage free nature of the scenarios. The 1B UST scenario set has a comparable amount of low/negative UST rates to 1A, but significantly more severe and frequent low (and negative) UST rates compared to the AIRG.

## Field Test 1B: Equity Overview

- The 1B equity scenario set used the same calibration as 1A. However, due to the equity-Treasury linkage, the resulting GWFs are different. The largest differences between the 1A and 1B equity GWFs are seen at the upper percentiles at the end of the 30<sup>th</sup> projection year, with the 1B being substantially lower and more in line with the AIRG.
- The median GWF at the end of the 30<sup>th</sup> projection year for 1B (7.99) is materially lower than both 1A (8.99) and the AIRG (8.84).
- Finally, the 1<sup>st</sup> percentile GWF at the end of the 30<sup>th</sup> projection year for 1b (1.19) was consistent with those of 1A (1.17) and the AIRG (1.22).

## Field Test 1B Quantitative Results

- For field test 1B, the average field test participant VM-21 reserve for guaranteed benefits increased by 13.4%, and the average Risk-Based Capital increased by 43.3%, compared to 29.4% and 68.0% for 1A reserves and capital, respectively.
- Some participants noted exposure to high UST rates, which were less frequent and severe in 1B compared to 1A.
- Participants that modeled hedging (implicitly or explicitly) saw smaller impacts to reserves (10.1%) and capital (41.9%) than those that did not model hedging (127.4% and 68.9% for reserves and capital respectively).

## Field Test 2A: US Treasury Overview

- Field Test 2A (as of 12/31/19 + 200 BP) used the same calibration as 1A (Conning Calibration with a Generalized Fractional Floor) but with a 12/31/19 starting yield curve modified using a 200 BP increase across all maturities.
- The higher starting interest environment leads to greater and more frequent high interest rates and less severe and less frequent low interest rates in 2A compared to 1A.
- Compared to the AIRG with a 12/31/19 + 200 BP starting interest environment, the 2A scenario set has a greater frequency and severity of high UST rates and more prevalent and severe low (and negative) UST rates.

## Field Test 2A: Equity Overview

- The targets of the 2A equity scenarios is designed to align the GWF at the end of the 30<sup>th</sup> projection year (8.97) with those produced by the AIRG (8.84) no matter the starting interest rate environment. However, there is still an impact to the 2A equity scenarios due to the increased starting interest rate environment and the equity-Treasury linkage compared to the 1A equity scenarios.
- The largest differences between the 2A and 1A equity GWFs are seen at the upper percentiles at the end of the 30<sup>th</sup> projection year, for example the 99<sup>th</sup> percentile GWF for 1b is 127.28 at the end of the 30<sup>th</sup> year compared to 101.58 for the 1A scenario set.
- The same considerations apply when comparing 2A to the AIRG with a 12/31/19 + 200 BP starting interest rate environment, with the largest differences between the GWFs of 2A and the AIRG occurring in the higher percentiles and later projection years.

## Field Test 2A Quantitative Results

- The average field test participant VM-21 reserve for guaranteed benefits increased by 13.5%, and the average Risk-Based Capital increased by 9.7%.
- Comparisons to the baseline results were limited by participation in the optional Baseline 2 run.
- Less severe and less frequent low (and negative) UST rates combined with higher equity GWFs (relative to 1A) throughout the projection contributed to smaller reserve and capital increases.
- Participants that modeled hedging (implicitly or explicitly) saw smaller impacts to reserves (10.1%) and capital (41.9%) than those that did not model hedging (127.4% and 68.9% for reserves and capital respectively).

## Field Test 2B: US Treasury Overview

- Field Test 2B (as of 12/31/19 + 200 BP) used the same calibration as 1B (Alternative Calibration with Shadow Floor) but with a 12/31/19 starting yield curve modified using a 200 BP increase across all maturities. Again, generally inversions were significantly less frequent and less severe in the 2B scenario set compared to 2A.
- The higher starting interest environment leads to greater and more frequent high interest rates and less severe and frequent low interest rates in 2B compared to 1B.
- Compared to the AIRG with a 12/31/19 + 200 BP starting interest environment, the 2B scenario set has a greater frequency and severity of high UST rates and more prevalent and severe low (and negative) UST rates.
- Compared to the 2A scenario set, the 2B scenario set has less frequent negative UST rates and less frequent 1-year UST rates over 10%.

## Field Test 2B: Equity Overview

- The 2B equity scenario set used the same calibration as 2A. However, due to the equity-Treasury linkage, the resulting GWFs are different. The largest differences between the 2A and 2B equity GWFs are seen at the upper percentiles at the end of the 30<sup>th</sup> projection year, with the 2B being substantially lower and more in line with the AIRG (though still higher).
- The median GWF at the end of the 30<sup>th</sup> projection year for 2B (9.15) is consistent with both 2A (8.97) and the AIRG (8.84).
- Finally, the 1<sup>st</sup> percentile GWF at the end of the 30<sup>th</sup> projection year for 2B (1.13) was consistent with those of 1A (1.17) and the AIRG (1.22).

## Field Test 2B Quantitative Results

- The average field test participant VM-21 reserve for guaranteed benefits increased by 5.6%, and the average Risk-Based Capital increased by 11.6%, compared to 13.5% and 9.7% for 2A reserves and capital, respectively.
- Participants that modeled hedging (implicitly or explicitly) saw smaller increases to reserves (4.1%) and capital (4.1%) than those that did not model hedging (276.0% and 414.6% for reserves and capital respectively).

## Field Test 5A: Treasury and Equity Overview

- The 5A scenario set uses the exact same UST scenarios as 1A.
- For the 5A equity scenario set, the Conning's original equity model calibration is used that includes the full impact of the equity-Treasury linkage. With 5A's lower overall UST rates, the equity GWFs at the lower percentiles are much more severe than the AIRG and other field test scenario sets. For example, the 1<sup>st</sup> percentile of equity GWFs for 5A is .39, compared to 1.22 for the AIRG and 1.19 for 1A.
- The median GWF at the end of the 30<sup>th</sup> projection year for 5A (5.88) is significantly lower than with both 1A (8.99) and the AIRG (8.84).

## Field Test 5A Quantitative Results

- The average field test participant VM-21 reserve for guaranteed benefits increased by 78.7%, and the average Risk-Based Capital increased by 114%.
- Several participants noted that the very low equity returns present in 5A were a major driver of the increase in their results.
- Participants that modeled hedging (implicitly or explicitly) saw smaller impacts to reserves (64.5%) and capital (108.7%) than those that did not model hedging (371.7% and 279.6% for reserves and capital respectively).

## Field Test 5B: Treasury and Equity Overview

- The 5B scenario set uses the exact same UST scenarios as 2A (as of 12/31/19 + 200 BP).
- For the 5B equity scenario set, the Conning’s original equity model calibration is used that includes the full impact of the equity-Treasury linkage. With 5B’s higher starting interest levels, the equity GWFs at the lower percentiles are higher than those in 5A, but still lower than those in the AIRG and 2A. For example, the 1<sup>st</sup> percentile of equity GWFs for 5A is .54, compared to 1.22 for the AIRG and 1.07 for 2A.
- The median GWF at the end of the 30<sup>th</sup> projection year for 5B is 8.59, which is in the ballpark of the corresponding GWFs for both 2A (8.97) and the AIRG (8.84).

## Field Test 5B Quantitative Results

- The average field test participant VM-21 reserve for guaranteed benefits increased by 28.3%, and the average Risk-Based Capital increased by 26.8% for field test 5B, compared to much higher average reserve (78.7%) and capital (114%) increases for 5A.
- The equity-Treasury linkage produced higher equity returns in the 5B scenario set as of 12/31/19 + 200 BP, leading to more favorable results for participants.
- Participants that modeled hedging (implicitly or explicitly) saw smaller increases to reserves (25.2%) and capital (15.1%) than those that did not model hedging (586.1% and 638.8% for reserves and capital respectively).

## Field Test 6: Treasury and Equity Overview

- The field test 6 scenario set uses the exact same UST scenarios as 1A.
- The equity calibration for scenario set 6 assumes a constant mean equity return independent of rates and increases alignment with AIRG equity model GWFs.
- The median GWF at the end of the 30<sup>th</sup> projection year for 6 is 9.49, which is close but somewhat higher than the the corresponding GWFs for both 1A (8.99) and the AIRG (8.84).
- While there are differences (somewhat lower GWFs in low percentiles, lower GWFs at higher percentiles), the equity scenarios from 6 overall are more consistent with those produced by the AIRG than other field test scenario sets.

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

## Field Test 6 Quantitative Results

- The average field test participant VM-21 reserve for guaranteed benefits increased by 10.1%, and the average Risk-Based Capital increased by 56%, compared to 29.4% and 68.0% for 1A reserves and capital, respectively.
- Given the alignment between the AIRG and scenario set 6 equity GWFs, the increases in reserves and capital compared to the baseline are likely driven primarily by the UST model calibration.
- The effect of hedging was less clear in the results of the participants who elected to perform field test 6. There were a limited number of companies that participated in field test 6 and that did not model hedging.

Reserve/Capital Amount	Percentage Increase over Baseline					
	Average	Min	Percentiles			Max
			25th	50th	75th	
<b>VM-21 Reserve for Guaranteed Benefits</b>	10.1%	-14.0%	7.2%	62.2%	218.6%	492.2%
<b>Risk-Based Capital</b>	56%	-8.2%	13.4%	21.7%	216.7%	12,161%

 Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

**Identification:**

Brian Bayerle, ACLI

**Title of the Issue:**

Revise hedge modeling language to address index credit hedging.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

VM-01, VM-21 Section 4.A.4, VM-21 Section 9, VM-21 Section 9.C.2, VM-31 Section 3.F.8.d

January 1, 2023 NAIC Valuation Manual, APF 2020-12

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

Index credit hedging is fundamentally different than the dynamic GMxB hedging which formed the conceptual underpinnings for VM-21. For example, the relatively fixed parameters of traditional GMxBs drive the hedging approach. In contrast, indexed products (including RILAs) have flexible crediting parameters which are continually reset based on hedge availability and costs, as well as current market conditions. In short, GMxB contract features drive hedging, while index product hedging drives contract features.

Since the reforms of VM-21 and C3P2, ILVA products have experienced major market growth. Several carriers, with the agreement of regulators and auditors, have interpreted the current VM-21 guidance as permitting the effects of index credit hedging to be reflected in product cash flows instead of within the “best efforts” and “adjusted” scenarios. Both regulators and industry would benefit from the codification of this approach within VM-21.

ACLI’s proposal borrows heavily from the Academy’s draft VM-22. The “error” for index credit hedging is describes as a percentage reduction to hedge payoffs. The percentage reduction must be supported by relevant, credible, and documented experience. A minimum of 1% is proposed as a regulatory guardrail.

The ACLI proposal would subject index credit hedging to the “clearly defined” documentation requirements of VM-21. Substantively, the change would (a) include index credit hedge purchases with the VM-21 “adjusted” run, and (b) permit index credit hedging to reflect a different, and potentially lower, level of ineffectiveness.

<b>Dates:</b> Received	Reviewed by Staff	Distributed	Considered
3/7/23	SO		
<b>Notes:</b> APF 2023-05			

ACLI supports aligning the index credit hedging guidance between VM-21 and VM-22. We started with draft VM-22 verbiage in creating this APF. In a few areas, our members have suggested technical improvements to the draft VM-22 definitions. It may be appropriate to carry these over to VM-22.

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

## **VM-01**

The term “Index Credit Hedge Margin” means a margin capturing the risk of inefficiencies in the company’s hedging program supporting index credits. This includes basis risk, persistency risk, and the risk associated with modeling decisions and simplifications. It also includes any uncertainty of costs associated with managing the hedging program and changes due to investment and management decisions.

The term “Index Credit” means any interest credit, multiplier, factor, bonus, charge reduction, or other enhancement to policy values that is directly linked to one or more indices. Amounts credited to the policy resulting from a floor on an index account are included. An Index Credit may be positive or negative.

The term “Index Crediting Strategies” means the strategies defined in a contract to determine index credits for a contract. For example, this may refer to underlying index, index parameters, date, timing, performance triggers, and other elements of the crediting method.

## **VM-21 Section 4.A.4**

### 4. Modeling of Hedges

- a. For a company that does not have a future hedging strategy supporting the contracts tied directly to the contracts falling under the scope of VM-21 stochastic reserve requirements:
  - i. The company shall not consider the cash flows from any future hedge purchases or any rebalancing of existing hedge assets in its modeling, since they are not included in the company’s investment strategy supporting the contracts.
  - ii. Existing hedging instruments that are currently held by the company in support of the contracts falling under the scope of these requirements shall be included in the starting assets.
- b. For a company with one or more future hedging strategies supporting the contracts tied directly to the contracts falling under the scope of VM-21 stochastic reserve requirements:
  - i. For a future hedging strategy with hedge payoffs that solely offset interest credits associated with indexed interest strategies (indexed interest credits):
    - a) In modeling cash flows, the company shall include the cash flows from future hedge purchases or any rebalancing of existing hedge assets that are intended solely to offset interest credits to contract holders.
    - b) Existing hedging instruments that are currently held by the company for offsetting the indexed credits in support of the contracts falling under the scope of these requirements shall be included in the starting assets.
    - c) An Index Credit Hedge Margin for these hedge instruments shall be reflected in both the “best efforts” and the “adjusted” runs by reducing index interest credit hedge payoffs by a margin multiple that shall be justified by sufficient and credible company experience and account for model error. It shall be no less than [1%] multiplicatively of the interest credited. In the absence of sufficient and credible company experience, a margin of

Dates: Received	Reviewed by Staff	Distributed	Considered
3/7/23	SO		
Notes: APF 2023-05			

[20%] shall be assumed. There is no cap on the index credit hedge margin if company experience indicates actual error is greater than [20%].

- ii. For a company with one or more future hedging strategies supporting the contracts that do not solely offset indexed interest credits, the detailed requirements for the modeling of the hedges are defined in Section 9. The following requirements do not supersede the detailed requirements.
  - a) The appropriate costs and benefits of hedging instruments that are currently held by the company in support of the contracts falling under the scope of these requirements shall be included in the projections used in the determination of the SR.
  - b) The projections shall take into account the appropriate costs and benefits of hedge positions expected to be held in the future through the execution of the future hedging strategies supporting the contracts. Because models do not always accurately portray the results of hedge programs, the company shall, through back-testing and other means, assess the accuracy of the hedge modeling. The company shall determine a SR as the weighted average of two CTE values; first, a CTE70 (“best efforts”) representing the company’s projection of all of the hedge cash flows, including future hedge purchases, and a second CTE70 (“adjusted”) which shall use only hedge assets held by the company on the valuation date and only no future hedge purchases associated solely with indexed interest credited. These are discussed in greater detail in Section 9. The SR shall be the weighted average of the two CTE70 values, where the weights reflect the error factor determined following the guidance of Section 9.C.4.
  - c) The company is responsible for verifying compliance with all requirements in Section 9 for all hedging instruments included in the projections.
  - d) The use of products not falling under the scope of these requirements (e.g., equity-indexed annuities) as a hedge shall not be recognized in the determination of accumulated deficiencies.
- iii. If a company has a more comprehensive hedge strategy combining index credits, guaranteed benefit, and other risks (e.g., full fair value or economic hedging), an appropriate and documented bifurcation method should be used in the application of sections 4.A.4.b.i and 4.A.4.b.ii above for the hedge modeling and justification. Such bifurcation methods may quantify the specific risk exposure attributable to index credit liabilities versus other liabilities such as guaranteed living benefits, and apply such for the basis for allocation.

**VM-21 Section 9**

Section 9: Modeling Hedges under a Future Non-Index Credit Hedging Strategy

A. Initial Considerations

- 1. This section applies to modeling of hedges other than situations where the company only hedges index credits. If the company clearly separates index credit hedging from other hedging, then this section only applies to the other hedging if the index hedging follows the requirements in Section

Dates: Received	Reviewed by Staff	Distributed	Considered
3/7/23	SO		
Notes: APF 2023-05			

4.A.4.b.i. If the company does not clearly separate index credit hedging from other hedging, then this section is applicable for modeling of all hedges.

2. Subject to Section 9.C.2, the appropriate costs and benefits of hedging instruments that are currently held by the company in support of the contracts falling under the scope of these requirements shall be included in the calculation of the SR, determined in accordance with Section 3.D and Section 4.D.

(Subsequent sections to be renumbered)

**VM-21 Section 9.C.2**

2. The company shall calculate a CTE70 (adjusted) by recalculating the CTE70 assuming the company has no future hedging strategies supporting the contracts except hedge purchases solely related to strategies to hedge index credits, therefore following the requirements of Section 4.A.4.a and 4.A.4.b.i.

**VM-31 Section 3.F.8.d.x (new subsection)**

- x. Justification for the margin for any future hedging strategy that offsets interest credits associated with indexed interest strategies (indexed interest credits), including relevant experience, other relevant analysis, and an assessment of potential model error.
- y. The method used to bifurcate comprehensive hedge strategies (i.e., strategies combining index credits, guaranteed benefit, and other risks (e.g., full fair value or economic hedging), per section 4.A.4.c

# Life Practice Council Update

Ben Slutsker, MAAA, FSA  
Vice President, Life Practice Council  
Amanda Barry-Moilanen  
Policy Analyst, Life

Life Actuarial Task Force (LATF) Meeting  
March 21, 2023

May not be reproduced without express permission.

## Recent Activity

3

- Created a new group, the Asset Adequacy and Reinsurance Issues Task Force
  - Will focus on issues related to emerging reinsurance transactions and follow-ups to Actuarial Guideline (AG) 53 and asset adequacy testing
- Delivered recommended edits to the fixed annuity principle-based reserving framework to the Valuation Manual (VM)-22 (A) Subgroup
- Developed a white paper on considerations for market risk benefits in new accounting standards on targeted improvements for long-duration contracts in U.S. GAAP accounting

© 2023 American Academy of Actuaries. All rights reserved.  
May not be reproduced without express permission.

## Recent Activity

4

- Presented to the Risk-Based Capital Investment Risk and Evaluation (E) Working Group on considerations for collateralized loan obligation C-1 factors at the Fall National Meeting
  - As a follow-up, submitted clarification questions for the working group to consider for developing a framework
- Proposed to the Life Risk-Based Capital (E) Working Group structural updates, revisions to instructions, and a new financial statement note to address the newly adopted C-2 mortality factors

© 2023 American Academy of Actuaries. All rights reserved.  
May not be reproduced without express permission.

## Ongoing Activity

5

- Developed multiple education sessions on economic scenario generators and acceptance criteria for the Life Actuarial (A) Task Force
- Engaging in the discussions on a fixed annuity principle-based reserving framework in the VM-22 (A) Subgroup
- Revisiting the covariance methodology in life risk-based capital
- Creating a discussion brief related to asset assumptions
- Updating the asset adequacy analysis practice note

© 2023 American Academy of Actuaries. All rights reserved.  
May not be reproduced without express permission.

## Thank you

# 2014-19 Individual Payout Annuity Experience Study – Report

## 2014-2019 Payout Annuity Mortality Study

- Study was published in December 2022
- This is the first study released under Experience Studies Pro, the partnership between the SOA Research Institute and LIMRA
- For access to full report and detailed study results in Tableau, companies must purchase the Standard Data Package (SDP)

## 2014-2019 Payout Annuity Mortality Study

- High-level results:

Metric	Current Study, 2014-2019	Previous Study, 2009-2013
Exposure in contract years	4,323,432	4,494,272
Exposure in annual income years	33,639,077,075	26,831,330,765
Number of deaths	236,331	230,019

A/E by Amount, Expected Basis = 2012 IAM Basic w/Scale G2	Current Study, 2014-2019	Previous Study, 2009-2013
Overall	108.7%	106.4%
Females	106.7%	104.8%
Males	110.9%	107.7%

## 2014-2019 Payout Annuity Mortality Study

- Additional detail available in the full report:

- Expected bases:
  - 2012 IAM Basic Table
  - 2012 IAM Basic Table with Scale G2
  - 2012 IAM Period Table
  - 2012 IAM Period Table with Scale G2
  - 2019 SSA Table
- Data breakouts:
  - Sex
  - Attained age group
  - Contract year group
  - Study year
  - Tax class
  - Annual income group
  - Contract type
  - Refund feature
  - Benefit class
  - Annuitant status

## 2014-2019 Payout Annuity Mortality Study

- This completed study will be the basis for VM-22 Mortality SPA development for Payout Annuities
- Mortality adjustment factors by sex and attained age groups are being reviewed and developed
  - Previous factors were developed based on the 2009-2013 study
  - Will analyze any material differences in factors from 2009-13 study to current study
- Does the mortality experience in this study demonstrate the need for a new base table?
  - Would be an update to the 2012 Individual Annuity Mortality (IAM) Basic Table
  - Has not been discussed or decided on yet
  - Would a new table be the expected basis for Fixed and Variable annuities as well, or does each product line need its own table?

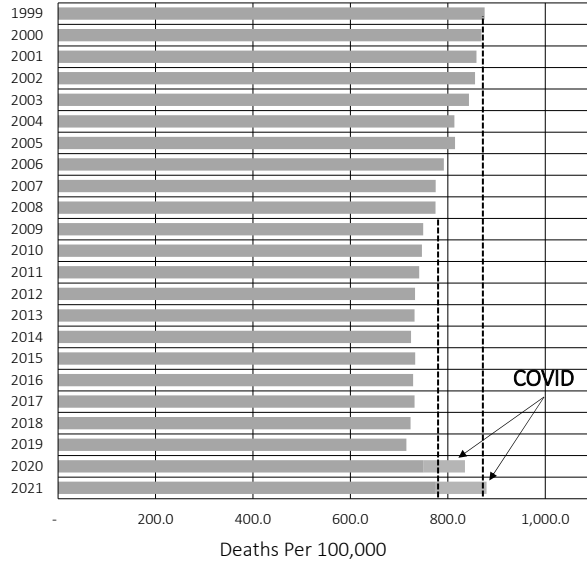

## US Population Mortality Observations: Updated with 2021 Experience

## Historical U.S. Population Mortality

- Total Population
  - 2021 mortality rate of 879.7/100,000 (0.9%)
  - 5.3% increase over 2020 (2019 to 2020 was 16.8%)
  - 23% higher in 2021 than 2019
  - highest rate in last 23 years
- COVID
  - 2021 mortality rate of 104.1 deaths/100,000
  - 22.6% increase over 2020
  - 8% decrease if 2020 ‘annualized’
- Without COVID
  - 2021 mortality rate of 775.6 deaths/100,000
  - 3.3% increase over 2020 (2019 to 2020 was 4.9%)
  - Highest since 2008

## Change in Mortality Rates by Cause of Death

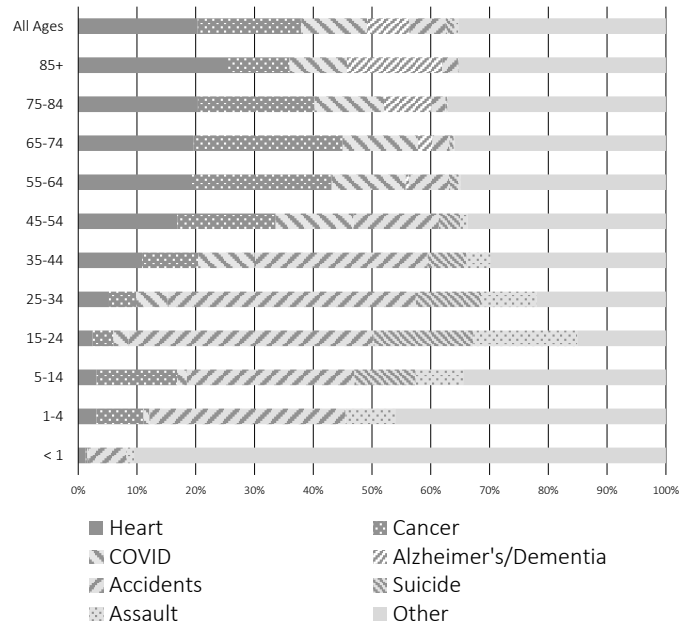

- Heart disease: 3.3% increase in 2021 following 4.1% increase in 2020
- Cancer: 2021 had first increase in last 22 years
- Accidents, diabetes, liver, hypertension, assaults 2021 increases over very large 2020 increases
- Deaths from suicides back up after decrease in 2020
- Good news in Alzheimer’s, pulmonary and flu/pneumonia

Cause of Death	2021 Deaths %	Change in Age-Adjusted Mortality Rates	
		2019-2020	2020-2021
Heart Disease	20.1%	4.1%	3.3%
Cancer	17.5%	-1.4%	1.7%
COVID	12.0%	n/a	22.6%
Alzheimer's/Dementia	6.7%	7.9%	-4.5%
Accidents	6.5%	16.8%	12.4%
Stroke	4.7%	5.1%	5.9%
Pulmonary	4.1%	-4.6%	-4.7%
Diabetes	3.0%	14.9%	2.4%
Liver	1.6%	16.9%	9.1%
Suicide	1.4%	-3.0%	4.2%
Hypertension	1.2%	13.1%	6.1%
Flu & Pneumonia	1.2%	5.9%	-19.3%
Assault	0.8%	28.9%	5.1%
Other	19.3%	6.2%	6.2%
<b>All CODs</b>	<b>100.0%</b>	<b>16.8%</b>	<b>5.3%</b>

## 2020 & 2021 Causes of Death by Age Group

- Heart disease, cancer and COVID dominate ages 55-84
- Ages 45-54
  - #1 is Heart disease, then cancer, accidents & COVID
- Accidents dominate ages 1-44
- Suicide and assault are prominent for ages 5-34
- COVID not in top 3 for ages <35

## Heart Disease

# HMI/FMI General Methodology

Example : Scale Year = 2022

## COVID-19 Modifications to General Methodology for 2022 HMI and FMI

### HMI Modified Approach:

Use average from 2010–2020 but include 2020 mortality = 2019 mortality

- Assumes zero improvement for 2020
- Results in less mortality improvement in general than HMI Approach 1

### FMI Modified Approach:

Basic scale : include COVID-19 impact (deterioration in mortality) in early years of the FMI scale

- Assume deterioration for 2023 and 2024 followed by zero improvement in 2025.
- Then grade to long-term (LT) MI level based on Social Security Administration (SSA) Intermediate projection at year 10 (grade from 2025–2032).

Loaded scale (prudent estimate) = scale above plus 25% general margin for uncertainty in trend

# Issues Addressed

- SSA Alt 2—appears to be a reasonable basis for the LTR development
  - ▣ Primary criticism of SSA’s intermediate projection has been concern that MI implied rates are too low
- Appropriateness of inclusion of COVID-19 impacts in FMI
  - ▣ Consistent with Industry Mortality Group principle that states that the shock impact of COVID-19 or other short-term mortality events should only be included in the future mortality expectations to the extent they are expected to continue
  - ▣ Recommended inclusion of FMI deterioration in the first 3 years of the reserve projection estimates the expected future impact of COVID-19

# 2023 Plan

- Approach to COVID-19 impact for 2023 – FMI and HMI
- Revisit HMI methodology in light of recent and expected experience
- Insured vs. general population MI recommendation
- Revisit FMI margin structure
- Revisit smoothing approach for HMI and FMI
- Review recommendation for MI with 2008 VBT Limited Underwriting (LU) table

© 2023 Society of Actuaries. All rights reserved.  
May not be reproduced without express permission.

# Approach to COVID-19 impact

- Quantification of COVID-19 impact
  - Data sources
  - Consideration of short- vs. medium- vs. longer-term impacts
  - Return to previously projected mortality level over time or residual excess mortality
  - Insured vs. general population considerations
  - Direct adjustment to MI rates or reflected in additional margins
- Implicit margins in MI scale development
  - Data source—general population data unadjusted for insured population differences (largest source of margin)
    - Starting MI level (HMI)
    - Long-term rate (FMI)
  - Limit on FMI assumption (20 years)

# COVID-19 Impact Discussions

- Revisit the question of inclusion/exclusion of COVID-19 deaths
  - Could remove deaths directly attributed to COVID-19 as primary cause
  - This will not remove COVID-19 deaths where it was not reported as the primary cause
- Review data for other causes of death and how much those trends will likely continue
  - Utilize data from SOA research on excess mortality for individual life insureds
  - Utilize cause of death information from SOA general population mortality research
- Keep in mind goal of this scale development work

HMI: Establish a reasonable starting point for valuation mortality

FMI: Establish a reasonable expectation of ongoing life insured mortality

# HMI Methodology Review

To be completed for 2023 HMI Scale Recommendation

- Data sources – historical and future/estimated components
- Gender and age scales
- Historical averaging period – 10 years
- Averaging methodology
- Forecast/estimate averaging period – 20 years
- Continue with 50/50 weighting for average

## Insured vs General Population Mortality Recommendation (HMI and FMI)

Data review and analysis, initial thinking to be completed in 2023

- Data sources – historical and future/estimated components
- SOA Mortality Improvement Model (MIM) support work:
  - ▣ Updated 2020-2021 data with COVID-19 impacts
  - ▣ Developing/documenting potential methodology to remove COVID-19 impact for data analysis work
  - ▣ Compare population data by socioeconomic decile to 2015 VBT and to actual industry experience for the same periods

## Reserve Impact—NAIC Model Office

- Universal Life with Secondary Guarantees (ULSG) model—long-duration product, larger potential for reserve reduction
  - Model office and assumptions same as used in the yearly renewable term (YRT) representative model analysis
  - Lifetime shadow account secondary guarantee
  - No reinsurance in the model

Component	Values
Issue ages	Decennial issue ages 30 – 70
Gender	Male Female
Risk classes	Preferred non-tobacco Standard non-tobacco Standard tobacco
Face bands	Low (\$250,000) High (\$1,000,000)

# Reserve Impact Results—ULSG

Mortality Improvement Basis	ULSG	
	Normalized VM-20 Deterministic Reserve (DR)	Percentage Change from Baseline
<b>Baseline:</b> HMI: no change to HMI FMI: zero FMI	\$ 1,000,000.00	----
HMI: Approach 2 FMI: Zero FMI	\$ 1,014,962.02	1.50%
<b>RECOMMENDATION:</b> HMI: Approach 2 FMI: Approach 2	\$ 940,464.62	-5.95%
Sensitivity: HMI: Approach 2 FMI: Approach 3	\$ 938,346.28*	-6.17%*

Approaches to HMI and FMI	
<b>HMI</b>	
<b>Approach 1</b>	= historical average 2009-2019
<b>Approach 2</b>	= historical average 2010-2020 (zero MI in 2020)
<b>FMI</b>	= grades to SSA intermediate projection long-term rate over 10 years
<b>Approach 1</b>	= no FMI deterioration for COVID-19
<b>Approach 2</b>	= apply deterioration due to COVID-19 for first 3 years
<b>Approach 3</b>	= apply greater 50 percent greater deterioration due to COVID-19 for first 3 years (sensitivity)

© 2023 Society of Actuaries. All rights reserved.  
May not be reproduced without express permission.

\*The slight decrease in reserves for the sensitivity run compared to the recommendation seems counterintuitive given the higher initial mortality deterioration present in the sensitivity. However, specific impacts related to the net-amount-at-risk pattern (decreasing in the initial years due to fund value growth before growing in later years as fund value runs out and the secondary guarantee comes into effect) meant that the shift of death claims to earlier years from later years for the sensitivity run resulted in a slightly reduced deterministic reserve compared to the recommendation. Overall, the conclusion is that the additional margin did not have a material impact on the deterministic reserve calculation for this model office product.

## Reserve Impact Results—Term

Mortality Improvement Basis	Term	
	VM-20 DR	Reserve Change
<b>Baseline:</b>		
HMI: no change to HMI FMI: zero FMI	\$ (79,846)	----
HMI: Approach 2 FMI: Zero FMI	\$ (50,285)	\$ 29,561
<b>RECOMMENDATION:</b>		
HMI: Approach 2 FMI: Approach 2	\$ (68,968)	\$ 10,878
Sensitivity:		
HMI: Approach 2 FMI: Approach 3	\$ (66,303)	\$ 13,543

**Approaches to HMI and FMI**

**HMI**  
**Approach 1** = historical average 2009-2019  
**Approach 2** = historical average 2010-2020 (zero MI in 2020)

**FMI** - grades to SSA intermediate projection long-term rate over 10 years  
**Approach 1** = no FMI deterioration for COVID-19  
**Approach 2** = apply deterioration due to COVID-19 for first 3 years  
**Approach 3** = apply greater 50 percent greater deterioration due to COVID-19 for first 3 years (sensitivity)

## Additional Considerations HMI and FMI

- MI improvement scale annual updates should not create reserve volatility
- Individual companies should also consider their own business and make appropriate additional adjustments

March 6, 2023

Rachel Hemphill

Chair, NAIC Life Actuarial (A) Task Force (LATF)

Re: APF 2023-03 Parts 3-5

Dear Ms. Hemphill:

The American Council of Life Insurers (ACLI) appreciates the opportunity to submit comments on Parts 3-5 of APF 2023-03 (APF), which was exposed by LATF during their meeting on February 2<sup>nd</sup>. While we are generally supportive of the provisions contained within these sections of the APF, we do have some concerns related to the scope of the proposal as well as some technical details that we believe should be addressed before adoption.

Overall, APF 2023-03 includes several potentially material changes that are not related to or dependent on one another, so we would recommend splitting this proposal into multiple APFs so each item can be considered separately. This would likely lead to easier and quicker adoption of the more minor items that are included. In addition, several of the proposed items cite consistency with other sections in the Valuation Manual as rationale for the change. While consistency may be desirable, further explanation of the rationale for the changes would be appreciated for these items.

However, as stated above, our feedback for this round of comments addresses changes proposed in Part 3 of the APF. Particularly, we have concerns surrounding the differences between VM-20 and VM-21 as we feel that the changes do not take into consideration that VM-20 and VM-21 also differ in the discount rates used to calculate scenario reserves. Under the APF, a company that models its actual strategy (rather than the alternative investment strategy) would have to document it as a simplification if borrowing cost being greater than or equal to reinvestment rate isn't true in every period.

American Council of Life Insurers | 101 Constitution Ave, NW, Suite 700 | Washington, DC 20001-2133

The American Council of Life Insurers (ACLI) is the leading trade association driving public policy and advocacy on behalf of the life insurance industry. 90 million American families rely on the life insurance industry for financial protection and retirement security. ACLI's member companies are dedicated to protecting consumers' financial wellbeing through life insurance, annuities, retirement plans, long-term care insurance, disability income insurance, reinsurance, and dental, vision and other supplemental benefits. ACLI's 280 member companies represent 94 percent of industry assets in the United States.

[acli.com](http://acli.com)

This is especially troublesome when you add the consideration of VM-20 Section 7.E.2 consistent with the VM-21 Section 4.D.4.c requirement on the company's assumed cost of borrowing along with the associated Guidance Note. This consideration adds language requiring that the assumed cost of borrowing is not lower than the rate at which positive cash flows are reinvested in the same time period, taking into account duration, ratings, and other attributes of the borrowing mechanism. While this change does align the assumed cost of borrowing between VM-20 and VM-21, it results in a disconnect between the rate at which deficiencies are accumulated and the scenario discount rate. As stated in each respective VM section:

*VM-20 Section 7.H.4: "The company shall use the path of one-year Treasury interest rates in effect at the beginning of each projection year multiplied by 1.05 for each model segment within each scenario as the discount rates in the SR calculations in Section 5."*

*VM-21 Section 4.B.2: "In determining the scenario reserve, accumulated deficiencies shall be discounted at the NAER on additional assets, as defined in Section 4.B.3". Section 4.B.3 describes an NAER that would be akin to a new money earned rate.*

Furthermore, the disconnect created between the Stochastic Reserve discount rate and borrowing rate could result in infinite SR calculations. For example, suppose that at the end of 50 years in the projection, there is a 1M deficiency and no/few policies remaining. Assuming the net earned rate on positive cash flows = borrowing rate = 5% and the discount rate is =  $1.05 * \text{Treasury} = 2\%$ , letting the projection run another N years would result in the PV of deficiency continuing to grow by  $(1.05/1.02)^N$ . It may be difficult for companies to defend cutting off the projection at 50 years, if running it 100 years causes the scenario reserve to increase by 300%, primarily driven by the disconnect in discounting accumulation rates.

It is our current understanding that these changes are regulators way of saying that companies should not be assuming significant benefits from borrowing, which is a point we agree with at an overarching level. But as we have stated above, if regulators would like to reach this goal as expeditiously as possible, there are several changes that could be made to address both the technical and bureaucratic challenges presented by the APF as it currently stands including dividing the APF into smaller proposals and acknowledging the differences between VM-20 and VM-21 requirements.

Thank you once again for your consideration of our comments and we are looking forward to further conversation and cooperation with regulators on this matter as we work towards compiling feedback on Parts 1 and 2.

cc: Scott O'Neal, NAIC

 Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

**Identification:**

PBR Staff of Texas Department of Insurance

**Title of the Issue:**

Address several clean-up items for VM-20, as well as related VM-21 and VM-31 Sections.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

VM- 20 Section 3.B.5.c.ii.4, VM-20 Section 5.B.3, VM-20 Section 7.E.2 and Guidance Note below, VM-21 Section 4.D.4.c, VM-20 Section 7.K.3, VM-31 Section 3.D.6.f, VM-20 Section 9.A.4

January 1, 2023 NAIC Valuation Manual

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

1. The formula for calculating the NPR for ULSG based on the value of the SG in VM-20 Section 3.B.5.c.ii.4 excludes the EA from the scaling of the NPR. This is inconsistent with the formula for calculating the NPR for ULSG disregarding the SG in VM-20 Section 3.B.5.d.iv. The scale is the prefunding ratio of actual SG (denoted ASG) to fully funded SG (denoted FFSG), and it makes intuitive sense that the NPR would be scaled to decrease or increase relative to the level of funding of the SG.
2. The VM-20 Section 5.B.3 stochastic reserve methodology is missing an aggregate cash surrender value (CSV) floor for scenario reserves before calculating CTE70. This allows scenario reserves that exceed the CSV to be dampened or eliminated by being averaged with scenario reserves. A CSV floor in the NPR does not address this concern, because it does not reflect the scenario reserves in the SR that exceed the CSV. In contrast, in VM-21 Section 4.B.1 scenario reserves are floored at the aggregate CSV as appropriate. Scenario reserves, as the asset requirement for specific scenarios, should be held at or above the CSV.
3. Add consideration to VM-20 Section 7.E.2 consistent with VM-21 Section 4.D.4.c’s requirement on the company’s assumed cost of borrowing along with the associated Guidance Note. Editorial clarifications to the existing Guidance Note in VM-21.
4. VM-20 Section 7.K.3 should clarify the requirement to reflect the hedge modeling error or insufficiency. Related to this change, more discussion about the hedging strategy and hedge modeling should be added to the Life Report section of the VM-31 Section 3.D.6.f report.

5. VM-20 Section 9.A.4 implies companies can elect to stochastically model risk factors other than interest rates & equities. Stochastic assumptions are not subject to the requirements of Section 9 relating to prudent estimate assumptions. Nor are any guidance/specific requirements provided if companies elect to stochastically model other risk factors. Add consideration to VM-20 consistent with VM-21 Section 12.B.4’s requirement about the risk factors other than interest rates & equities that are stochastically modelled, which was added to VM-21 for this same reasoning.

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

**VM-20 Section 3.B.5.c.ii.4**

- 4) The NPR for an insured age x at issue at time t shall be according to the formula below:

$$\text{Min} \left[ \frac{ASG_{x+t}}{FFSG_{x+t}}, 1 \right] \cdot (NSP_{x+t} - E_{x+t})$$

$$\text{Min} \left[ \frac{ASG_{x+t}}{FFSG_{x+t}}, 1 \right] \cdot (NSP_{x+t} - E_{x+t})$$

**VM-20 Section 5.B.3**

3. Set the scenario reserve equal to the sum of the statement value of the starting assets across all model segments and the maximum of the amounts calculated in Subparagraph 2 above.

The scenario reserve for any given scenario shall not be less than the cash surrender value in aggregate on the valuation date for the group of contracts modeled in the projection.

**VM-20 Section 7.E.2**

2. Model at each projection interval any disinvestment in a manner that is consistent with the company’s investment policy and that reflects the company’s cost of borrowing where applicable, provided that the assumed cost of borrowing is not lower than the rate at which positive cash flows are reinvested in the same time period, taking into account duration, ratings, and other attributes of the borrowing mechanism. Gross asset spreads used in computing market values of assets sold in the model shall be consistent with, but not necessarily the same as, the gross asset spreads in Section 7.E.1.d and Section 7.E.1.f above, recognizing that starting assets may have different characteristics than modeled reinvestment assets.

**Guidance Note:** The simple language above "provided that the assumed cost of borrowing is not lower than the rate at which positive cash flows are reinvested in the same time period" is intended to prevent excessively optimistic borrowing assumptions. If in any case, the assumed cost of borrowing restriction cannot be fully applied or followed precisely, then as with all other simplifications/approximations, the company shall not allow borrowing assumptions to materially reduce the reserve.

**VM-21 Section 4.D.4.c**

**Guidance Note:** The simple language above “provided that the assumed cost of borrowing is not lower than the rate at which positive cash flows are reinvested in the same time period” is intended to prevent excessively optimistic borrowing assumptions. If in any case, the assumed cost of borrowing restriction cannot be fully applied or followed precisely, then as with all other simplifications/approximations, the company shall not allow borrowing assumptions to materially reduce the reserve.

- Deleted:** This limitation is being referred to Life Actuarial (A) Task Force for review.
- Deleted:** not intended to impose a literal requirement. It is
- Deleted:** to reflect a general concept
- Deleted:** It is recognized that borrowing parameters and rules can be complicated, such that modeling limitations may not allow for literal compliance, in every time step, as long as the reserve is not materially affected. However, if
- Deleted:** the company is unable to fully apply this
- Deleted:** prudence dictates that a

**VM-20 Section 7.K.3**

3. In circumstances where one or more material risk factors related to a derivative program are not fully captured within the cash-flow model used to calculate CTE 70, the company shall reflect the approximation, simplification or model limitations in the modeling of such risk factors by increasing the SR as described in Section 5.E. The company shall also be able to justify that the method appropriately reflects the potential error using historical experience, e.g., analysis of historical performance or backtesting.

--

### **VM-31 Section 3.D.6.f**

- f. Risk Management – Detailed description of model risk management strategies, such as hedging and other derivative programs, including any future hedging strategies supporting the policies and any adjustments to the SR pursuant to VM-20, Section 7.K3 and VM-20, Section 7.K.4, specific to the groups of policies covered in this sub-report and not discussed in the Life Summary Section 3.C.5. Documentation of any future hedging strategies should include documentation addressing each of the CDHS documentation attributes. The following should be included in the documentation:
- i. Descriptions of basis risk, gap risk, price risk and assumption risk.
  - ii. Methods and criteria for estimating the a priori effectiveness of the strategy.
  - iii. Results of any reviews of actual historical hedging effectiveness.
  - iv. Strategy Changes – Discussion of any changes to the hedging strategy during the past 12 months, including identification of the change, reasons for the change, and the implementation date of the change.
  - v. Hedge Modeling – Description of how the hedge strategy was incorporated into modeling, including:
    - Differences in timing between model and actual strategy implementation.
    - For a company that does not have a future hedging strategy supporting the contracts, confirmation that currently held hedge assets were included in the starting assets.
    - Evaluations of the appropriateness of the assumptions on future trading, transaction costs, other elements of the model, the strategy, and other items that are likely to result in materially adverse results.
    - Discussion of the projection horizon for the future hedging strategy as modeled and a comparison to the timeline for any anticipated future changes in the company's hedging strategy.
    - If residual risks and frictional costs are assumed to have a value of zero, a demonstration that a value of zero is an appropriate expectation.
    - Any discontinuous hedging strategies modeled, and where such discontinuous hedging strategies contribute materially to a reduction in the SR, any evaluations of the interaction of future trigger definitions and the discontinuous hedging strategy, including any analyses of model assumptions that, when combined with the reliance on the discontinuous hedging strategy, may result in adverse results relative to those modeled.

- The approach and rationale used to reflect the hedge modeling error(s).

#### **VM-20 Section 9.A.4**

4. If the company elects to stochastically model risk factors in addition to those listed in Section 9.A.3 above, the requirements in this section for determining prudent estimate assumptions for these risk factors do not apply.

It is expected that companies will not stochastically model risk factors other than the economic scenarios, such as policyholder behavior or mortality, until VM-20 has more specific guidance and requirements available. Companies shall discuss with domiciliary regulators if they wish to stochastically model other risk factors.

**Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force  
 Amendment Proposal Form\***

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

**Identification:**

PBR Staff of Texas Department of Insurance

**Title of the Issue:**

The values of the starting assets defined in the two sentences in VM-21 Section 4.D.1.a are not identical.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

VM-21 Section 4.D.1.a.iii in January 1, 2023 NAIC Valuation Manual

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

1. Starting Asset Amount

a. For the projections of accumulated deficiencies, the value of assets at the start of the projection shall be set equal to the approximate value of statutory reserves at the start of the projection plus the allocated amount of PIMR attributable to the assets selected. Assets shall be valued consistently with their annual statement values. The amount of such asset values shall equal the sum of the following items, all as of the start of the projection:

- i. All of the separate account assets supporting the contracts;
- ii. Any hedge instruments held in support of the contracts being valued; and
- iii. An amount of assets held in the general account equal to the approximate value of statutory reserves as of the start of the projections plus the allocated amount of PIMR attributable to the assets selected less the amount in (i) and (ii).

4. State the reason for the proposed amendment? (You may do this through an attachment.)

The edit is necessary to have the identical value of the assets at the start of the projection as in the first sentence (i.e., For the projections of accumulated deficiencies, the value of assets at the start of the projection shall be set equal to the approximate value of statutory reserves at the start of the projection **plus the allocated amount of PIMR attributable to the assets selected**).

\* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

Draft: 4/4/23

Health Insurance and Managed Care (B) Committee  
Louisville, Kentucky  
March 23, 2023

The Health Insurance and Managed Care (B) Committee met in Louisville, KY, March 23, 2023. The following Committee members participated: Anita G. Fox (MI); Jon Pike, Co-Vice Chair (UT); Mike Kreidler, Co-Vice Chair (WA); John F. King (GA); Dean L. Cameron (ID); Kathleen A. Birrane (MD); Grace Arnold (MN); Chris Nicolopoulos (NH); Glen Mulready (OK); Andrew R. Stolfi represented by TK Keen (OR); Michael Humphreys (PA); Alexander S. Adams Vega (PR); and Allan L. McVey represented by Ellen Potter (WV). Also participating were: Lori K. Wing-Heier (AK); Michael Conway (CO); Paul Lombardo (CT); Andria Seip (IA); LeAnn Crow (KS); Cynthia Amann (MO); and Troy Downing (MT).

1. Discussed its 2023 Activities

Director Fox outlined the Committee's activities and focus for 2023. She said that in accordance with its charges, the Committee will continue to monitor the activities of its task forces and be responsive to any health insurance-related federal initiatives. She also noted that the Committee's charges include coordinating with the Market Regulation and Consumer Affairs (D) Committee, chaired by the Health Insurance and Managed Care (B) Committee's co-vice chair, Commissioner Pike. She said such coordination provides an opportunity for the Committee to work, as necessary, with the Market Regulation and Consumer Affairs (D) Committee on health benefit plan and producer enforcement issues and to monitor market conduct trends on non-federal Affordable Care Act (ACA) plans.

Director Fox said she anticipates the Committee working closely with the Special (EX) Committee on Race and Insurance's Health Workstream as that Workstream continues its work this year on health equity issues involving underserved and traditionally underrepresented populations. She noted that Committee members Commissioner Birrane and Commissioner Arnold are co-chairs of the Health Workstream. As such, this is a great opportunity for the Committee to collaborate and work with the Health Workstream as it completes its work this year.

Director Fox explained that she would like the Committee to work together this year to focus on several topics raised by Committee members that have been ranked in order of importance based on a recent survey of the Committee membership. Those topics, in order of importance, are: 1) network adequacy; 2) Medicaid unwinding due to the pending end of the COVID-19 public health emergency (PHE); 3) state-based marketplaces (SBMs); 4) pharmacy benefit manager (PBM) regulation; and 5) essential health benefits (EHBs).

Director Fox said that prior to the Spring National Meeting, the Committee met with the NAIC consumer representatives focused on health. She said this meeting provided an opportunity for the Committee and the NAIC consumer representatives to discuss priorities and focus for 2023. She said she plans to continue such outreach to enable the Committee to hear a consumer point of view, which can often be difficult to obtain without such meetings. Director Fox noted that one result of this interaction was the invitation to the Kaiser Family Foundation (KFF) to discuss one of its recently published issue briefs on claims denials and appeals for ACA marketplace plans in 2021 during today's Committee meeting.

Director Fox said that to ensure Committee members remain current on Committee meetings and other activities, she asked each Committee member to designate staff to act as a point of contact. She said she plans to use this group to preview Committee meeting agendas and other items. This group met prior to the Spring National Meeting and will continue to meet on an as-needed basis throughout the year. Lastly, Director Fox said she is instituting interim regulator-to-regulator meetings to allow Committee members and interested state insurance

regulators to have more in-depth discussions about topics of interest particularly related to presentations the Committee hears during its open meetings. She said the first of these meetings is March 24. During this meeting, KFF representatives will be available to listen and answer questions on claim denials and appeals from an individual state perspective. The Committee will also discuss in more depth its focus for the year.

Director Fox also discussed a meeting with the Center for Insurance Policy and Research (CIPR). She said that during this meeting, she discussed what the CIPR can do to support the Committee’s work this year and learned what research the CIPR has already done or plans to do in the areas Committee members have identified as important topics to focus on this year.

## 2. Adopted 2022 Fall National Meeting Minutes

Commissioner King made a motion, seconded by Commissioner Mulready, to adopt the Committee’s Dec. 14, 2022, minutes (see *NAIC Proceedings – Fall 2022, Health Insurance and Managed Care (B) Committee*). The motion passed unanimously.

## 3. Adopted its Subgroup, Working Group, and Task Force Reports

Commissioner Pike made a motion, seconded by Commissioner King, to adopt the following reports: 1) the Consumer Information (B) Subgroup, including its March 2 minutes (Attachment One); 2) the Health Innovations (B) Working Group, including its March 22 minutes (Attachment Two); 3) the Health Actuarial (B) Task Force; 4) the Regulatory Framework (B) Task Force; and 5) the Senior Issues (B) Task Force. The motion passed unanimously.

## 4. Heard a Discussion on the KFF Issue Brief

Karen Pollitz (KFF) and Kaye Pestaina (KFF) discussed findings from the recently published KFF issue brief “Claims Denials and Appeals in ACA Marketplace Plans in 2021.” Pestaina explained that Section 2715A of the ACA requires ACA-compliant plans, including employer-sponsored plans and health insurance marketplace plans, to report certain ACA transparency in coverage data—including data on the number of claims denied—to health insurance marketplace plans, the Secretary of the U.S. Department of Health and Human Services (HHS), and state insurance commissioners, as applicable, and to also make it available to the public. She explained that although the data reporting requirement applies more broadly, to date, the HHS is only requiring federally facilitated marketplace (FFM) plans to submit this data. She said that since 2016, the federal Centers for Medicare & Medicaid Services (CMS) has specifically required only FFM plans to submit a subset of the claims transparency data—claim denials and appeals data—to it. In addition, the data is limited to in-network claims, which combine both medical and pharmaceutical claims. The CMS takes the data submitted and makes it available to the public in public use files (PUFs), which is what the KFF has been examining since 2016.

Pestaina discussed the potential uses of the data, such as using it as a tool for enforcement and oversight. She said that the KFF is not sure if the CMS is using the data for such a purpose. She said some states are using transparency data as part of their oversight responsibilities related to mental health parity plan compliance. Pestaina highlighted other state uses of other non-CMS transparency data, such as the data collected and reported by the NAIC through its Market Conduct Annual Statement (MCAS). She also said that some SBM plans, such as those in California and possibly Minnesota, are collecting claims denial and appeals data.

Pollitz discussed the KFF’s findings from its review of the data reported by insurers for the plan year 2021 and posted in the PUF. She said that across HealthCare.gov insurers, approximately 230 major medical issuers, with complete data, nearly 17% of in-network claims were denied in 2021. Insurer denials rates varied widely around this average, ranging from 2% to 49%. She explained that the CMS requires insurers to report reasons for claims

denials at the plan level. Of in-network claims, about 14% were denied because the claim was for an excluded service, 9% due to lack of preauthorization or referral, and only about 2% based on medical necessity. She highlighted that insurers classified most plan-reported denials (about 82%) as “all other reasons.” She explained that this “all other reasons” category could include claim denials due to billing or coding errors, duplicate claims, or coverage eligibility. Pollitz said that in analyzing the 2021 plan data, as in its previous analyses, the KFF found that consumers rarely appealed their denied claims. In 2021, HealthCare.gov consumers appealed less than two-tenths of 1% of denied in-network claims, which is about only 1 in 500 denied in-network claims. Insurers upheld most denials (around 59%) on appeal.

Director Fox asked Pollitz if she had any thoughts about what the states can do to increase consumer awareness of their rights to appeal claims denials. Pollitz said it is perplexing as to why consumers do not appeal claim denials. She said the KFF recently completed work on a survey targeted at obtaining information from consumers on their experiences with health insurance. One of the questions to be asked is whether consumers understand their appeal rights, how the process works, and/or who or what agency to contact for assistance. She said the KFF plans to release the results of the survey at some point later this year.

Pollitz said she believes there could be other factors beyond consumers being simply overwhelmed and confused about health insurance, such as the fact that because there is a claim, the consumer or a family member is sick and, as such, may not have the wherewithal to investigate next steps and navigate the appeals process. She said that, in addition, the explanation of benefits (EOB) document consumers receive includes information on appeal rights, but it is typically presented in insurance-related jargon and/or found on the last page of a multi-page EOB document. Pollitz said there are consumer assistance programs in many states that could possibly assist consumers in understanding their appeal rights, but the federal government no longer funds these programs. Those programs in existence since 2010, for the most part, still exist due to state funding. She said that state insurance regulators in states that have these programs might want to reach out to them and work together to figure out how to better educate consumers in this area.

Director Fox asked Pollitz if she knew if there ever has been any engagement or ways to engage the provider community to assist consumers in filing appeals of claim denials. Pollitz said she is not aware of any such engagement. However, she believes that the CMS may be engaging with providers as part of implementing the federal No Surprises Act (NSA). Pollitz said that potential insurer engagement with providers could be beneficial in addressing possible issues in the way claims are submitted to insurers for payment, which could be a reason for certain types of denials, and engaging and educating providers on insurer claim submission requirements could resolve some of those issues.

Commissioner Kreidler asked if the KFF knew if SBMs who tracked claim denials and appeals had findings similar to those of the HealthCare.gov insurers. Pollitz said that among the SBMs KFF knows have similar data reporting, Covered California, the findings look roughly the same. She reiterated that she believes the Minnesota SBM may have similar data reporting requirements, but the KFF has not had the opportunity yet to review its data to determine if there are any similarities. Commissioner Kreidler suggested that of those states that have an SBM, the state department of insurance (DOI) may want to reach out to see if the SBM collects this data in order to understand better what is happening in the state as far as the number of claims denials and appeals and whether there is a need to find ways to educate consumers on their appeal rights.

Carl Schmid (HIV+Hepatitis Policy Institute) expressed appreciation for the Committee inviting the KFF to present its findings. He said the KFF findings highlight a number of troubling issues, such as the high percentage of claim denials and how few consumers appeal such denials. He said he hopes state insurance regulators try to address this issue. He offered a few recommendations to address this, such as the NAIC reviewing its appeal models to see if any revisions need to be made or looking at definitions of “medical necessity.”

#### 5. Heard a Discussion on a State Checklist of Actions Related to the Medicaid Unwinding Process

Sabrina Corlette (Georgetown University, Center on Health Insurance Reforms—CHIR) discussed a recently published issue brief from the State Health and Value Strategies (SHVS) titled “Secrets to a Successful Unwinding: Actions State-Based Marketplaces and Insurance Departments Can Take to Improve Coverage Transitions.” She highlighted the extraordinary work state Medicaid agencies will have to undertake over the next year to reassess the eligibility of approximately 95 million people to retake Medicaid coverage because of the impending end of the COVID-19 PHE. She estimated that approximately 15 million to 18 million of these individuals will be terminated from Medicaid coverage, with many of them being eligible for coverage either through ACA marketplace plans or employer-sponsored insurance (ESI). She discussed the steps state DOIs—along with other partners, such as SBMs and carriers—can take to reduce gaps in coverage and avoid disruptions in care.

Corlette provided a timeline for the Medicaid unwinding process, including the dates certain states plan to begin redeterminations of Medicaid coverage eligibility and terminations of coverage for those deemed ineligible for coverage. Also shown was the decrease in the percentage of the enhanced federal Medical Assistance Percentage (eFMAP) during the time of the Medicaid unwinding process. She discussed temporary and/or short-term actions state DOIs can take to ease transitions, including monitoring the cadence of Medicaid renewals, monitoring qualified health plan (QHP) issuers’ financials and network capacity, and guarding against deceptive marketing of unregulated products. Corlette stressed that it is important that state DOIs communicate early and often with their state and federal partners. She also discussed temporary and/or short-term actions SBMs can take.

Corlette discussed actions state DOIs can take to mitigate the ill effects of churn long-term. Those actions include: 1) expanding continuity of care requirements; 2) requiring QHPs to honor prior authorizations and step-therapy/prescription drug formulary exception decisions; 3) considering the pro-ration of deductibles and maximum out-of-pocket (MOOP) for mid-year transitions; and 4) supporting auto or EZ Enroll initiatives. She discussed similar actions that SBMs can take.

Commissioner Kreidler expressed appreciation for the presentation. He asked Corlette if she has any additional recommendations for the states, particularly those that are actively engaged in the process and are already working with their SBM to smooth the transition process. Corlette said she did not, but she urged state insurance regulators to expect that the process will not go smoothly and to be flexible and maintain lines of communication with their sister agencies, such as the state Medicaid agency.

Director Fox asked about any Special Enrollment Periods (SEPs) for Medicaid recipients that became eligible for Medicare. Corlette said the CMS has instituted such an SEP. She also noted that the CMS has established an SEP for “exceptional circumstances” for FFMs from April 2, 2023, to July 31, 2024. Commissioner Mulready noted that each state will have to decide whether to establish an SEP for enrollment into Medicare supplement (Medigap) plans. He said some states might be able to establish an SEP by rule, which is what Oklahoma did.

#### 6. Heard an Update from the CCIIO on its Recent Activities

Jeff Wu (federal Center for Consumer Information and Insurance Oversight—CCIIO) and Jeff Grant (CCIIO) provided an update on activities of interest to the Committee. Grant focused his remarks on the pending released Notice of Benefit and Payment Parameters 2024 proposed rule, which the CCIIO hopes will be finalized soon. He discussed a few of the proposed changes included in the proposed rule, including proposals that expand access to affordable coverage, but in a way designed to improve consumers’ experiences throughout the process of determining eligibility, choosing a plan, and completing enrollment. The goal is to simplify the enrollment process for consumers and improve the quality of care available. A key rationale for many of these proposed policy and operational changes is to enhance health equity and reduce disparities in health coverage and access.

One proposal central to this goal is enhancing network adequacy and essential community provider (ECP) requirements for individual market QHPs, stand-alone dental plans, and small business health options programs (SHOPs) to ensure consumers have access to a sufficient choice of providers. With the goal of expanding access to services for low-income and medically underserved consumers, CMS proposes to add mental health facilities, substance use disorder (SUD) treatment centers, and rural emergency hospitals to the list of current ECPs.

Grant said that as part of this shift, the CMS is proposing to limit the number of non-standardized plan options to streamline consumer plan choices. He said the CMS is proposing two alternative policies to reduce the number of duplicative or very similar plans currently being displayed to marketplace consumers. SBMs are not impacted. One alternative the CMS proposes is to limit the number of plans insurers can offer at each metal level, product type, and service area to two. Alternatively, the CMS proposes to reinstate a requirement that there be a “meaningful difference” between plans offered on the FFM and the state-based marketplace-federal platform (SBM-FP). Grant reiterated that the proposed rule is not final yet, but explained that these proposed changes reflect CMS’ concern with the proliferation of plans consumers are not able to choose from as opposed to the limited number of plan choices when the health insurance marketplaces first became operational.

Grant said this rule proposes to give health insurance marketplaces the option to implement a special rule giving people who lose Medicaid or the federal Children’s Health Insurance Program (CHIP) 90 days, instead of the typical 60 days, to enroll in a QHP. He also referred to the implementation of the network adequacy wait time requirements, noting the concerns expressed by some commenters about the ability and challenges of the states to have the appropriate tools and resources to assess compliance with the requirements and the burden on providers to get information to insurers in a timely manner, along with other operational challenges.

Grant also touched on: 1) the CMS’ work to modernize the QHP certification process; 2) the independent dispute process under the NSA and the impact of the Feb. 6 Texas court ruling on the ability of the CMS to make payment determinations; and 3) the CMS’ work related to Medicaid unwinding, including improving the transition process for consumers and closing the information gap among the federal and state agencies involved. He closed his remarks by discussing the CCIIO’s work related to health equity.

Commissioner Pike asked about the proposal to limit the number of non-standard plan options. He asked whether there is any consideration to provide flexibility for those states that may have only one or two insurers to permit, if the insurer wishes to do so, more than two plan options. Wu noted the issue’s complexity, explaining that the CMS is carefully weighing all the comments it has received. He pointed out that the proposed rule does not limit the number of standardized plans. An insurer can offer an unlimited number of standardized plans. As such, there are multiple ways for insurers to provide robust competition and choice for consumers in the marketplaces through this mechanism.

Having no further business, the Health Insurance and Managed Care (B) Committee adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/B CMTE/2023 Spring National Meeting/03-Bmin.docx

Draft: 3/8/23

Consumer Information (B) Subgroup  
Virtual Meeting  
March 2, 2023

The Consumer Information (B) Subgroup of the Health Insurance and Managed Care (B) Committee met March 2, 2023. The following Subgroup members participated: LeAnn Crow, Chair (KS); Debra Judy (CO); Randy Pipal (ID); Alex Peck (IN); Mary Kwei (MD); Carrie Couch (MO); Mike Rhoads and Rebecca Ross (OK); David Buono (PA); Jill Kruger (SD); Vickie Trice (TN); Shelley Wiseman (UT); and Christina Keeley (WI). Also participating were: Susan Brown (MT); and Cynthia Cisneros (NM).

1. Adopted its Jan. 31 Minutes

The Subgroup met Jan. 31 to discuss the results of a survey of states' consumer engagement activities.

Rhoads made a motion, seconded by Trice, to approve the Subgroup's Jan. 31 minutes (Attachment One-A). The motion passed unanimously.

2. Discussed Potential Subgroup Activities

Crow reviewed ideas raised during the last meeting for the Subgroup's next projects. She listed ideas including a resource document on using social media, a guide to forming partnerships with other agencies, methods for measuring the effectiveness of outreach, and creating alternate versions of existing documents. She also raised the idea of an education piece for consumers who may lose Medicaid.

Rhoads said the most pressing issue for Oklahoma and many states is helping consumers find coverage after they come off Medicaid. He said assisting consumers who lose access to Medicaid will be a critical priority in the coming months. Other states agreed that it would be helpful to have something in this area fairly quickly. Cisneros said New Mexico has worked with its state-based Marketplace and Medicaid agency, which has developed a toolkit to guide activities.

Bonnie Burns (California Health Advocates—CHA) said that consumer representatives would be happy to assist in developing a document. She said consumers are looking for answers to questions, so a document should be designed to give answers to specific questions.

Eric Ellsworth (Consumers' Checkbook) said there is a lot of messaging already from the Centers for Medicare & Medicaid Services (CMS) and state-based marketplaces. He said information dilution is a risk. He said state insurance regulators should consider what they can do that is additive to what has been produced already (e.g., compelling insurers to add messages to their websites). Kruger said consumers will be directed to Marketplaces, not individual carrier websites. She said a risk to consider is that consumers may end up on scam websites rather than Marketplace sites. Ellsworth said consumers may or may not read a letter from the Medicaid agency, but they may need help in avoiding scam websites when they seek new coverage. He said state insurance regulators should consider asking Google to mark official government sites so they can be easily distinguished. Burns said consumers have been attracted to health care sharing ministries (HCSMs) because they search for something inexpensive, so consumers should be warned what they should not do in addition to learning about official resources.

Cisneros said New Mexico has been working proactively to steer consumers away from HCSMs and scam plans with webinars and advertising. Crow said consumers may not seek help or information until it is too late.

Couch suggested the Subgroup could consider reworking its older document on shopping for low-cost health plans.

Harry Ting (Health Care Consumer Advocate) said a frequently asked questions (FAQ) document would be a more effective format and said dual eligible individuals should be addressed.

Kris Hathaway (AHIP) said her organization has been spending a lot of time on redeterminations. She said the Subgroup should not reinvent the wheel and instead make use of materials that have already been developed. She said timing and alignment with Medicaid agencies and Marketplaces are concerns, so the Subgroup should consider a library of resources rather than a new document.

Ross said states have navigators involved already and that states should help consumers find navigators.

Crow asked for volunteers to help with the project. Ross, Brown, and Burns said they would help. Burns said the Subgroup could produce multiple documents, one for consumers and one for state insurance regulators.

Ellsworth suggested that the Subgroup later in the year could work to analyze the barriers to consumers getting the information they need. The intention would be to make policy changes (e.g., requiring issuers to include Health Insurance Oversight System [HIOS] identification numbers on the Summary of Benefits and Coverage [SBC]).

Having no further business, the Consumer Information (B) Subgroup adjourned.

SharePoint/Support Staff Hub/Committees/B Committee/National Meetings/2023 Spring National Meeting/Final Minutes/Cons Info 3.2

Draft: 2/8/23

Consumer Information (B) Subgroup  
Virtual Meeting  
January 31, 2023

The Consumer Information (B) Subgroup of the Health Insurance and Managed Care (B) Committee met Jan. 31, 2023. The following Subgroup members participated: Mary Kwei, Chair, and Joy Hatchette (MD); Tara Smith (CO); Ryan Gillespie (IL); Alex Peck (IN); Carrie Couch (MO); Kathy Shortt (NC); Jennifer Ramcharan (TN); Shelley Wiseman (UT); and Christina Keeley (WI). Also participating were: Cynthia Cisneros and Paige Duhamel (NM).

1. Discussed the Results of a Survey of States' Consumer Engagement Activities

Kwei reminded the Subgroup that members had worked in 2022 to understand better how state departments of insurance (DOIs) engage with consumers on health insurance topics. She said the Subgroup is interested in understanding what states are doing and how the Subgroup can be most helpful. She said that the Subgroup had convened focus groups and conducted a survey of public information officers (PIOs).

Brenda J. Cude (University of Georgia) provided a summary of the findings of the survey. She said 13 individuals from 12 states responded. She said website content, social media, and partnerships with other government agencies were the most commonly mentioned means of outreach. Dr. Cude said participants were asked to rate the effectiveness of different methods of outreach, and those most identified as effective were online public meetings and website content, followed by social media and advertising.

Dr. Cude said Facebook was the social media used most often, followed by Twitter and LinkedIn. She said YouTube, TikTok, and Nextdoor were also mentioned. She said states that use Nextdoor rated it highly effective. She said states evaluate the effectiveness of their methods by using counting, whether of social media engagement, website hits, or event participants. Dr. Cude said counting is not necessarily the best way to rate effectiveness, even though it is the easiest. She said the Subgroup could consider providing tools to states that help in using other ways to evaluate efforts.

Dr. Cude said respondents generally reported using NAIC materials. The one state that did not said the materials were not useful because of cultural and other differences in the state. Dr. Cude said states most commonly link to NAIC documents or adapt them and use them on their own websites. She said that choosing plans and how to use health insurance were the most frequently requested topics for new content.

Kwei said the Subgroup should think through ways to deliver content on choosing and using health plans that are accessible in different ways. Duhamel asked how states use the Nextdoor app. Hatchette said Maryland tried other types of social media, but Nextdoor provides a unique opportunity because it allows government entities to post statewide, rather than in limited neighborhoods. She said Maryland uses it for both property/casualty (P/C) and health. She suggested that states reach out to Nextdoor to be registered as a government entity.

Harry Ting (Health Consumer Advocate) said that he recently calculated the number of complaints and inquiries to state DOIs per population for each state. He said there is a lot that goes into the numbers, but higher rates of complaints and inquiries could indicate more success in engaging consumers who then contact the DOI.

Dr. Cude said states could benefit from education on: ways to evaluate effectiveness; how to use any social media, not just Nextdoor; and how to partner with other organizations. Kwei said the Subgroup could consider how to repurpose and repackage some of the content that has already been developed and find other ways to distribute

it. Bonnie Burns (California Health Advocates—CHA) said consumers are often seeking the answer to a particular question rather than looking for an overall guide. She said a Q&A type of document may be more helpful.

## 2. Discussed Other Matters

Kwei said that this would be her last meeting as Subgroup chair. She said she is proud of the work the Subgroup has accomplished. Members of the Subgroup thanked her for her work. Joe Tuschner (NAIC) said that the role of vice chair is also becoming vacant and encouraged interested state insurance regulators to reach out if they would like to be considered for the role of chair or vice chair.

Kwei said there is a lot of interest in topics around health insurance and that people need information in different ways and at different times. Therefore, she said the Subgroup should continue to work on materials similar to what it has produced in the past.

Having no further business, the Consumer Information (B) Subgroup adjourned.

Draft: 4/5/23

Health Innovations (B) Working Group  
Louisville, Kentucky  
March 22, 2023

The Health Innovations (B) Working Group of the Health Insurance and Managed Care (B) Committee met in Louisville, KY, March 22, 2023. The following Working Group members participated: Nathan Houdek, Chair, Jennifer Stegall, and Sarah Smith (WI); Amy Hoyt, Vice Chair (MO); Sarah Bailey (AK); Kate Harris (CO); Andria Seip (IA); Alex Peck (IN); Julie Holmes and Craig VanAalst (KS); Jamie Sexton (MD); Marti Hooper and Robert Wake (ME); Chad Arnold (MI); Ross Hartley (ND); Jennifer A. Catechis and Paige Duhamel (NM); Daniel Bradford (OH); TK Keen (OR); Rachel Bowden and R. Michael Markham (TX); Mike Kreidler and Lichiou Lee (WA); and Erin K. Hunter (WV). Also participating was: Patrick Smock (RI).

1. Adopted its 2022 Fall National Meeting Minutes

Hoyt made a motion, seconded by Peck, to adopt the Working Group's Dec. 13, 2022, minutes (*see NAIC Proceedings – Fall 2022, Health Insurance and Managed Care (B) Committee, Attachment Four*). The motion passed unanimously.

2. Heard Presentations on EHBs

Commissioner Houdek said essential health benefits (EHBs) are of interest to state insurance regulators because states are interested in updating them, federal officials are considering revising rules, and the defrayal requirement for state-mandated benefits continues to cause concerns.

Harris reviewed Colorado's process for updating its EHB benchmark plan. She said the state started the process in the fall of 2020 using a federal grant. She said three public town halls gathered feedback on what to add or remove from the EHB. Three themes emerged, including improving mental health benefits, improving access to alternatives to opioids for pain management, and adding gender-affirming care for transgender individuals. She said the third was the most important and was driven by both input at the town halls and complaints received by the Division of Insurance. She said services varied from carrier to carrier, but many needed services were excluded as cosmetic. She said major medical associations have classified this care as medically necessary. She said the state worked to satisfy the technical requirements related to the generosity test and the typicality test. The cost for the added benefits was determined to be 64 cents per member per month. She said Colorado was the first state to explicitly include gender-affirming care to treat gender dysphoria in its benchmark plan.

Hoyt asked whether Colorado looked at other benefits before deciding on the three changes to make. Harris said the state considered more than 20 different changes but wanted to narrow the list before completing an actuarial analysis. She said the state used public feedback to help narrow the list. Seip asked if the per member per month figure was informed by the actual costs reported by insurers. Harris said Colorado's actuaries used internal data as well as carrier data. Commissioner Houdek asked how much pressure the state received from stakeholders on what to include. Harris said there were many valid requests to add benefits. She said it was helpful to walk stakeholders through the generosity test to show the guardrails. She said providers, payers, brokers, and advocates participated, and the state asked that attendees participate in all three meetings, which most did.

Wayne Turner (National Health Law Program—NHeLP) presented recommendations for improving EHBs for consumers. He said many plans excluded important benefits before the federal Affordable Care Act (ACA). The ACA establishes a coverage requirement and a cost-sharing requirement. He said the law tasks the Secretary of

the U.S. Department of Health and Human Services (HHS) with defining the 10 categories of EHB. He said it further requires HHS to periodically review and update EHBs. He said EHB compliance and enforcement are up to the states. He said his organization has seen problems, including pharmacy benefit managers (PBMs) declaring some drugs to be non-EHB. He said there is not a loophole in the law that allows this. Instead, it is against the law, and these drugs are still subject to the cost-sharing protections applicable to EHBs. He said benefits must be clinically based to be nondiscriminatory.

Turner said the benchmarking process is not in the statute. Rather, it is a policy decision to give states more flexibility. He said using commercial plans as benchmarks, particularly small group plans, can embed discriminatory provisions in the plans. He said his organization has recommended national standards. He said the defrayal requirement for state-mandated plans is part of the law, so it cannot be avoided entirely. He said adding benefits to comply with federal requirements does not trigger defrayal, so states could make additions to ensure plans are nondiscriminatory or to comply with federal mental health parity standards without requiring defrayal of their cost. He said that changes in cost sharing also do not trigger defrayal.

Turner said updating EHBs is a good use of state flexibility grants. He said many states do not have a formal process for selecting a benchmark plan. He said federal rules require public notice, and he recommends prioritizing health equity and transparency. He said the benchmarking process can be used to address unmet health needs. He said there would be winners and losers in the process, and the winners should not automatically be the best-funded lobbyists. He pushed for full transparency and providing easy ways for consumers to inform the process. He said the NAIC could consider establishing best practices for states in reviewing and updating EHBs.

Hoyt asked what kinds of data states should consider when starting the process. Turner said population-wide health data is a good starting point. He said states could also consult with academic institutions in the state. He warned that some well-funded groups might have good data, but they may leave out important information. Harris asked how long the process generally takes. Turner said there is a range, and it can be difficult when states do not have an existing process in place. He said Oregon has created an ongoing committee to keep the process going between updates. Commissioner Houdek asked about cost-sharing flexibility for states. Turner said states have authority over cost sharing, which does not trigger defrayal. He said preventive services coverage is under legal challenge, but EHBs also include preventive services. He said regulators can require no cost sharing for preventive services in the event the ACA's preventive services coverage requirement is invalidated. Bailey asked what challenges states have encountered in the update process. Turner encouraged talking to other states who have gone through the process. He said Vermont reported difficulties in the application of the typicality test. He said the test is an important consumer protection, but its application should be clarified.

Kris Hathaway (AHIP) discussed AHIP's recommendations to the federal Centers for Medicare & Medicaid Services (CMS) on EHBs. She said AHIP advocated for maintaining the core structure of EHB selection, with an emphasis on state flexibility. She said state insurance regulators should continue to be the primary regulators. She said the current structure meets local needs. She said additional conversations on defrayal would be appreciated and encouraged states to look at updates to their benchmarks every three years. She said telehealth can be a cost-saving tool, and its continued use should be allowed. She said previously controversial definitions, such as for habilitative services and pediatric services, have gone smoothly. She said that in Colorado, health plan actuaries computed different numbers for the cost of added benefits than the state used.

Harris asked whether health plans have measured cost savings due to added benefits. Hathaway said AHIP had looked at cost-saving measures like ending facility fees and improving transparency but not adding benefits. Commissioner Houdek asked about modifications to the update process. Hathaway said her organization is concerned with making updated benchmarks similar in cost to existing plans. She said patients have needs, but care needs to be affordable at the end of the day.

Holmes said Kansas is in the process of updating EHBs and is hoping to submit them to the CMS by the deadline in May. She said one issue was narrowing down what the updated benefits should be, and the state looked at consumer complaints going back 10 years to decide.

Wake said states are frustrated that the temporary concept of requiring defrayal for new mandates was continued. He said this leads to states mandating benefits through sub-regulatory guidance rather than legislation or regulations. He said CMS should recognize that the process for updating EHBs can replace the initial grandfathering standard that discourages new mandates. He said states with lean EHBs should have the opportunity to make their plans more generous rather than tying them to decisions made 20 years ago. He said it is difficult to quantify the generosity of a set of benefits without considering cost sharing.

Jackson Williams (Dialysis Patient Citizens—DPC) said expanding EHBs would not inhibit alternative payment models or value-based insurance design. He said EHB changes would not tie insurers' hands on medical management if they are done in good faith.

Randi Chapman (Blue Cross Blue Shield Association—BCBSA) said her organization supports the current regulatory structure for EHBs. She said it appropriately recognizes local markets and allows states to build on coverage that is already available in the market. She said BCBSA member plans are committed to using telehealth to expand access and to promoting health equity.

### 3. Discussed Potential Topics for Future Meetings

Bowden discussed efforts in Texas to adjust the relative affordability of plans by directing the premium load of cost-sharing reductions (CSRs). She said the legislature directed Texas to begin rate review in 2021 legislation, which also noted that silver plans were priced below the cost of providing CSRs. She said Texas adopted a rule to require plans to apply a uniform CSR to all silver plans in the exchange. She said silver plans, on average, provide an actuarial value of around 80%. She said the rule did not generate controversy, though there was some question of whether enrollment levels would change due to the rule. She said the result of the rule is that gold plans are now 11% less expensive in premium than silver plans, and the share of consumers who can purchase a gold plan with a \$0 premium rose from 43% to 73%. She said there are many policy and actuarial considerations, but the Texas approach was driven by the direction of the legislature. She clarified that issuers apply the silver load only to on-exchange plans, so consumers can purchase silver plans with no CSR load off-exchange. Wake said Maine applies silver loading through rate review and also requires a silver option that does not include a CSR load. Commissioner Houdek asked if a more detailed presentation on this topic at a future meeting would be useful and Working Group members agreed that it would.

Hoyt provided information on Project Extension for Community Healthcare Outcomes (ECHO). She said Missouri has a program called Show Me ECHO based on New Mexico's Project ECHO. She said the original Project ECHO was inspired by poor outcomes for hepatitis C patients. It connected primary care physicians with specialists so the primary care doctor could provide better care rather than the patient waiting eight to 12 months to see the specialist. She said it improved outcomes and changed lives. She said Show Me ECHO offers adult learning for multidisciplinary teams. A hub team participates and provides advice to primary care providers on how to manage patients. She said it is a way to move knowledge rather than patients. She said Medicaid in Missouri has provided incentives to providers to participate in the program. She said every state has an ECHO program devoted to different diseases or treatments. Commissioner Houdek asked if others were interested in learning more about Project ECHO, and Working Group members said they are.

Keen said one topic to keep tabs on is Medicaid redeterminations and whether any innovative practices have emerged from that experience. Harris said looking at continuity of care or pro-rating of deductibles for enrollees who leave Medicaid are other issues of interest.

Anna Howard (American Cancer Society Cancer Action Network—ACS CAN) said that the Working Group should look at what states can do to remove barriers to preventive services.

Eric Ellsworth (Consumers' Checkbook) noted that the CMS has done a great deal of work on the interoperability of healthcare data. He said the Working Group could look at how the oversight of insurers in this area is divided between states and federal agencies as well as look at the level of investment insurers are making to enhance their information systems.

Hathaway said AHIP may have more data to share on value-based care by the Fall National Meeting.

Having no further business, the Health Innovations (B) Working Group adjourned.

Health Actuarial (B) Task Force  
Louisville, Kentucky  
March 21, 2023

The Health Actuarial (B) Task Force met in Louisville, KY, March 21, 2023. The following Task Force members participated: Andrew N. Mais, Chair, represented by Paul Lombardo (CT); Anita G. Fox, Vice Chair, represented by Kevin Dyke (MI); Mark Fowler represented by Charles Hale (AL); Ricardo Lara represented by Ahmad Kamil (CA); Michael Conway represented by Eric Unger (CO); Karima M. Woods represented by Stephen F. Flick (DC); Gordon I. Ito represented by Kathleen Nakasone (HI); Doug Ommen represented by Klete Geren (IA); Dean L. Cameron represented by Weston Trexler (ID); Amy L. Beard represented by Scott Shover (IN); Vicki Schmidt represented by Nicole Boyd (KS); Timothy N. Schott represented by Marti Hooper (ME); Grace Arnold represented by Fred Andersen and Julia Lyng (MN); Eric Dunning represented by Michael Muldoon (NE); Marlene Caride represented by Seong-min Eom (NJ); Jennifer Catechis represented by Anna Krylova (NM); Judith L. French represented by Craig Kalman (OH); Glen Mulready represented by Andrew Schallhorn (OK); Michael Humphreys represented by Jodi Frantz (PA); Cassie Brown represented by Aaron Hodges (TX); Jon Pike represented by Ryan Jubber (UT); and Mike Kreidler represented by Lichiou Lee (WA).

1. Adopted its 2022 Fall National Meeting Minutes

Muldoon made a motion, seconded by Schallhorn, to adopt the Task Force’s Dec. 5, 2022, minutes (*see NAIC Proceedings – Fall 2022, Health Actuarial (B) Task Force*). The motion passed unanimously.

2. Adopted the Report of the Long-Term Care Actuarial (B) Working Group

Andersen said he and Lombardo are now the Working Group’s co-chairs. He said the Working Group met Feb. 17 and took the following action: 1) discussed disbanding the Long-Term Care Pricing (B) Subgroup and the Long-Term Care Valuation (B) Subgroup; 2) exposed a request for comments on a proposal to revise the nationally coordinated long-term care insurance (LTCI) rate increase review checklist; 3) exposed a request for comments on the Minnesota and Texas LTCI rate increase review methodologies, as used in the Long-Term Care Insurance Multistate Rate Review Framework (LTCI MSA Framework); and 4) heard an update on LTCI valuation issues. He said both requests for comment exposures have a deadline of April 24, and the Working Group plans to meet in May to discuss comments received.

Andersen said any changes that are made to the checklist or either rate increase review methodology could affect the LTCI MSA Framework. He said he believes any changes to the checklist can be completed this year, and any changes to either rate increase review methodology will likely occur next year.

Andersen made a motion, seconded by Muldoon, to adopt the report of the Long-Term Care Actuarial (B) Working Group, including its Feb. 17 minutes (Attachment One). The motion passed unanimously.

3. Disbanded the Long-Term Care Pricing (B) Subgroup and the Long-Term Care Valuation (B) Subgroup

Andersen made a motion, seconded by Muldoon, to disband the Long-Term Care Pricing (B) Subgroup and the Long-Term Care Valuation (B) Subgroup and transfer the functions of the two subgroups to the Long-Term Care Actuarial (B) Working Group. The motion passed unanimously.

#### 4. Heard an Update from the CCIIO

Brent Plemons (federal Center for Consumer Information and Insurance Oversight—CCIIO) said the plan year 2024 Rate Review Timeline Bulletin for federal Affordable Care Act (ACA) rate filing submissions was posted to the federal Centers for Medicare & Medicaid Services (CMS) website on March 15. He said the initial filing submission deadline for states with effective rate review programs, which are all states other than Oklahoma and Wyoming, is the earlier of the date set by the state and July 19. He said the two states without effective rate review programs have a deadline of June 1. He said the CCIIO intends to post initial rate filing information received to its website, *ratereview.healthcare.gov*, on July 26. He said if rate filings contain a qualified health plan (QHP) serviced by the *healthcare.gov* exchange, the filings need to be finalized by Aug. 16; and for states with state-based exchanges or non-QHP off-exchange filings, the finalization deadline is Oct. 16. He said the CCIIO plans to post final rate information no later than Nov. 1.

Plemons said the new Uniform Rate Review Template (URRT) Version 6.0 differs from the previous version (5.4) only in the removal of rounding limitations, the removal of the Actuarial Value (AV) de minimis range validation, and the state and market fields on Worksheet 1 having been moved to the left. He said updated URRT instructions for Version 6.0 will be available soon. He said the instructions do not specify where to enter factors for reinsurance waivers, but it is allowable to enter the factor on Worksheet 1, where a federal reinsurance factor would normally be entered. He said if a reinsurance waiver factor is used, insurers should be mindful of the single risk pool requirement and not apply all the reinsurance to any one plan.

Jeff Wu (CCIIO) said federal guidelines for cost-sharing reduction (CSR) loads are not particularly detailed. He said insurers can and should load for CSR amounts that the federal government will not reimburse. They can do this by spreading all of the load across all plans within the single risk pool or applying the load only to the plans that generate CSR deficiencies. Wu said whichever loading methodology is chosen, the total amount of the load should be actuarially justified, reasonable, and recover any deficiencies.

Lombardo said the transfer of filings from the System for Electronic Rates & Forms Filing (SERFF) into the federal Health Insurance and Oversight System (HIOS) in 2022 worked extremely well for Connecticut, and he has not heard of many instances to the contrary from other states. He asked if it is correct that the CCIIO is leaving the determination of actuarial justification and reasonableness of an insurer's CSR loading methodology to state insurance regulators. Wu said this is correct. Lombardo asked if there is a timeframe for the finalization of the Actuarial Value Calculator. Wu said it will likely be close to the time that the Notice of Benefit and Payment Parameters is finalized, and he believes this will occur soon. He said this will ideally be in early March 2024 for the plan year 2025 guidance. Dyke said it continues to be a challenge for state insurance regulators to determine whether an insurer's CSR loading methodology is actuarially sound and in keeping with the single-risk pool requirements.

Muldoon said regarding the July 26 posting of final rates, there have been instances in prior years where insurers, for various reasons, have not had their rates posted to *ratereview.healthcare.gov* by the federally prescribed date. He asked if there is a way to ensure that all insurers have their rates posted by the July 26 deadline. Plemons said the only recourse the CCIIO has is for its rate review team to contact the insurer and attempt to get its final rates submitted and posted. Wu asked Muldoon if he believes insurers who have not had their rates posted by the deadline are failing to do so deliberately as a strategy or if it is due to mistakes or errors on the insurers' part. He said if it is thought that the former reason is the explanation, the CCIIO needs to be very thoughtful about how to handle such a situation. Muldoon said he assumes the failure to have rates posted by the deadline was due to an error, and he has no indication that it was being used as a competitive strategy. Wu said the CCIIO will monitor the situation for the 2024 plan year and respond accordingly. Plemons said he will consult with CCIIO staff to determine if there is a way to get final rates posted for insurers that do not meet the deadline due to errors or mistakes.

Muldoon said some state insurance regulators have questions concerning the details of what should be considered appropriate for an insurer's CSR loading methodology. Lombardo said a meeting of interested state insurance regulators will be held soon to discuss these issues.

Lombardo said Connecticut has a state-based exchange, and there have been instances where insurers have missed the deadline for posting final rates. He said he does not believe these insurers were attempting to gain a competitive advantage, but other insurers that have met the deadline have concerns that these insurers are waiting to see rates posted by the deadline to modify their own rates in order to gain a competitive advantage. He said to ensure the integrity of the rate filing system, all rates for a given market should be posted and available at the same time. Wu said if an insurer displays a pattern of missing the posting deadline, the matter should be investigated. Lombardo said state insurance regulators are available to assist with the CCIIO's efforts in resolving these issues. Dyke said it is possible that the implementation of the transfer of filings from SERFF into the federal HIOS has created an issue with insurers verifying that their final rates are available for posting, and it may be beneficial for the CCIIO rate review team to encourage insurers to periodically check the HIOS to ensure that their rates are validated.

#### 5. Heard a Presentation from the SOA Research Institute

Dale Hall (Society of Actuaries—SOA) gave a presentation (Attachment Two) on the Research Institute's findings related to social, physical, and cultural determinants of health and their incorporation into actuarial data and workstreams, as well as Research Institute experience studies and other health research activities.

#### 6. Heard a Presentation from the Academy HPC

Barb Klever (Blue Cross Blue Shield Association—BCBSA) gave a presentation (Attachment Three) on American Academy of Actuaries (Academy) Health Practice Council (HPC) activities.

#### 7. Heard an Academy Professionalism Update

Shawna Ackerman (California Earthquake Authority—CEA) said the Actuarial Board for Counseling and Discipline (ABCD) recently published its 2022 annual report, which is available on the ABCD website, [abcdboard.org](http://abcdboard.org). She said the ABCD responded to 96 requests for guidance (RFGs) in 2022, and about one-third of the requests were from the health practice area. She said Precept 1, Professional Integrity, and Precept 2, Qualification Standards, of the Academy's Code of Professional Conduct continue to be popular RFG topics. She said an RFG concerning obtaining organized activity continuing education (CE) credits was received toward the end of 2022. She also encouraged actuaries to accumulate organized activity CE credits earlier rather than later during the year.

Robert Damler (Actuarial Standards Board [ASB]—Retired) said two general Actuarial Standards of Practice (ASOPs) that apply to all practice areas are in the process of being revised. He said ASOP No. 12, Risk Classification (for All Practice Areas), is undergoing revision and review by a task force, and it is anticipated that the revised ASOP No. 12 will be presented to the ASB later this year and then exposed for comment. He said revisions to ASOP No. 41, Actuarial Communications, were exposed for comment in 2022, and these comments are being reviewed by a task force. He said he expects that a second exposure draft of ASOP No. 41 revisions will be published within the next six to 12 months. He said revisions to ASOP No. 10, U.S. GAAP for Long-Duration Life, Annuity, and Health Products, were approved by the ASB in the past few months, and the new version will be effective May 1. He said an old Actuarial Compliance Guideline No. 4, which was the last such guideline in existence, has been converted to ASOP No. 57, Statements of Actuarial Opinion Not Based on an Asset Adequacy Analysis for Life Insurance, Annuity, or Health Insurance Reserves and Related Actuarial Items. He said ASOP No. 57 will become effective June 15.

Damler said there are several ASOPs under development or revision. He said these include ASOP No. 7, Analysis of Life, Health, or Property/Casualty Insurer Cash Flows; ASOP No. 28, Statements of Actuarial Opinion Regarding Health Insurance Assets and Liabilities; ASOP No. 36, Statements of Actuarial Opinion Regarding Property/Casualty Loss and Loss Adjustment Expense Reserves; ASOP No. 45, The Use of Health Status Based Risk Adjustment Methodologies; and ASOP No. 49, Medicaid Managed Care Capitation Rate Development and Certification.

8. Discussed a Meeting of the Long-Term Care Actuarial (B) Working Group at the Summer National Meeting

Lombardo said he and Andersen intend for the Working Group to meet in person at the Summer National Meeting in Seattle, WA.

Having no further business, the Health Actuarial (B) Task Force adjourned.

SharePoint/NAIC Support Staff Hub/B CMTE/HATF/2023\_Spring/3-21-23 HATF/Minutes\_HATF\_03-21-23.docx

Draft: 3/9/23

Long-Term Care Actuarial (B) Working Group  
Virtual Meeting  
February 17, 2023

The Long-Term Care Actuarial (B) Working Group of the Health Actuarial (B) Task Force met Feb. 17, 2023. The following Working Group members participated: Paul Lombardo, Co-Chair (CT); Fred Andersen, Co-Chair (MN); Sanjeev Chaudhuri (AL); Ahmad Kamil (CA); Lilyan Zhang (FL); Nicole Boyd (KS); Marti Hooper (ME); Michael Muldoon (NE); Anna Krylova (NM); Bill Carmello (NY); Craig Kalman (OH); Andrew Schallhorn (OK); Jim Laverty (PA); Andrew Dvorine (SC); Anamaria Burg and R. Michael Markham (TX); and Tomasz Serbinowski (UT).

1. Discussed Disbanding the Long-Term Care Pricing (B) Subgroup and the Long-Term Care Valuation (B) Subgroup

Andersen said Serbinowski will no longer be chair of the Working Group, and he and Lombardo will be co-chairs of the Working Group. Lombardo said the work of the Long-Term Care Pricing (B) Subgroup and the Long-Term Care Valuation (B) Subgroup will now be done by the Working Group, and the Health Actuarial (B) Task Force will consider the proposal to disband the two subgroups during its March 21 meeting. Andersen said that any members of the two subgroups and any other state insurance regulators are welcome to become members of the Working Group if they are not already. Lombardo said that Serbinowski will continue as a member of the Working Group.

2. Exposed a Request for Comments on a Proposal to Revise the Nationally Coordinated LTCI Rate Increase Review Checklist

Andersen said the Working Group, and the Long-Term Care Valuation (B) Subgroup began work approximately five years ago on a project to develop a single checklist that reflects significant aspects of long-term care insurance (LTCI) rate review increase checklists used by all individual states. He said these checklists typically contain questions that states ask insurers at the beginning of an LTCI rate increase request. He said the Nationally Coordinated LTCI Rate Increase Review Checklist (Checklist) that was developed contains aspects of the *Guidance Manual for Rating Aspects of the Long-Term Care Insurance Model Regulation* and input from many states' experiences with their individual checklists. He said the intent of creating the Checklist was to move away from having all states using different checklists, and to add efficiency to the overall rate increase review process nationwide. He said it was recognized that some states may still need to request information that is not asked for in the Checklist, but the intent was that approximately 90% of the information that any one state requires would be requested through the Checklist.

Andersen said the Health Actuarial (B) Task Force adopted the Checklist in 2018. He said many states are relying on the Checklist for their LTCI rate increase reviews, but insurers that have filed rate increase requests report that many states are not relying on it. He said that when the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup and Multistate Actuarial Team (MSA Team) began work in 2019, it decided to rely upon the Checklist for its LTCI Multistate Rate Review process. He said after the first few pilot MSA Team rate increase reviews, it was recognized that requests for additional information were similar for each of the pilot reviews, and a supplemental MSA Team checklist was developed. He said the supplemental checklist includes requests for information, including benefit utilization experience, cost of care trends, and waiver of premium treatment. He said the MSA Team has found that when the Checklist was combined with the supplemental checklist (Attachment One-A), the number of reviewer objections and interactions with filers have been greatly reduced, resulting in a more efficient review process. He said the Working Group proposes consideration of revising the Checklist by

adding the supplemental MSA Team checklist to it, and possibly consider adding or deleting requested information as suggested by state insurance regulators and interested parties. He said the proposal will be exposed for public comment until April 24.

Lombardo said it will be helpful if states that do not use the Checklist and the supplemental MSA Team checklist identify specific items that are not included in them that prevent the state from using them for their LTCI rate increase reviews.

### 3. Exposed a Request for Comments on the Minnesota and Texas LTCI Rate Increase Review Methodologies

Andersen said from 2016 to 2019, the Long-Term Care Pricing (B) Subgroup and the Working Group discussed and vetted the LTCI rate increase review methodologies that Minnesota and Texas use. He said appropriate recognition of the shrinking block issue and treatment of past losses were discussed for each of the methodologies. He said the concept of cost-sharing by the insurer as it relates to reducing the burden to policyholders without causing excess financial distress to the insurer was also discussed. He said the decline in interest rates and the impact on available investment returns to support LTCI blocks was also considered. He said the Minnesota and Texas approaches were deemed to be appropriate by most participants in the discussions.

Andersen said at roughly the time that discussions concerning the Minnesota and Texas approaches concluded, the Long-Term Care Insurance (EX) Task Force was created, with its primary mission being increasing uniformity in rate increase approvals among the states. He said this led to greater scrutiny of the Minnesota and Texas approaches, and it was determined that these two methodologies would be used for the LTCI Multistate Rate Review process pilot program. He said the Minnesota and Texas approaches have been codified into the Long-Term Care Insurance Multistate Rate Review Framework (LTCI MSA Framework) that the Executive (EX) Committee and Plenary adopted in April 2022.

Andersen said the MSA Team has applied the Minnesota and Texas methodologies to several LTCI rate increase filings. He said as these blocks have grown older and passed from premium-paying periods to claims-paying periods, more data has become available for evaluation. He said the MSA Team has faced challenges with applying the two methodologies in certain instances, and it wants to determine if the approaches can be improved for future use. He said the most common feedback to date on the Minnesota approach is a potential lack of transparency and that he hopes details available in the Framework can assist in better understanding it. He said he thinks the Minnesota approach achieves an appropriate balance between fairness to consumers and avoiding further insurer financial distress. He said that it is possible that a lack of transparency can be attributed to necessary actuarial judgment that insurers and state insurance regulators apply for assumptions used in premium and claims projections. He said some of the issues the MSA Team has encountered in using the TX methodology are situations where past rate increases were granted prior to the development of the TX methodology, precisely defining what is meant by a past loss, mature blocks of business having high sensitivity to later duration factors while placing less emphasis on past experience, and potential imbalances between fairness to consumers and avoiding further insurer financial distress.

Markham said although he thinks the Texas methodology is fairly transparent, he has found some insurers have difficulty performing the required calculations for rate increase request submittals. Serbinowski said he has seen that insurers easily project future experience for current in-force business using current assumptions, but some have difficulties developing projections using initial filing assumptions because of a lack of initial filing documentation. He said because the Texas approach compares these two different projections, the results of using it can be questionable due to the possible lack of quality in the projection using initial filing assumptions. Lombardo said that some state insurance regulators and insurers have a desire for a one-size-fits-all methodology to be used in the MSA Team reviews, but because different blocks of business have different characteristics, he

does not think the MSA Team is close to being able to develop such a uniform approach. He said the MSA Team is open to finding a uniform approach and is working towards finding a methodology that may be a better fit for the majority of rate increase reviews submitted.

Jan Graeber (American Council of Life Insurers—ACLI) said industry is not necessarily requesting there be a single, uniform methodology that is used, but would like to know what characteristics of a block make the MSA Team determine which of the Minnesota or Texas approaches will be used. Muldoon suggested the MSA Team use a process upon receiving a rate increase request to determine whether the Minnesota or Texas approach is best suited to the block being reviewed, and then base the recommended rate increase on only the methodology that was deemed best. Lombardo said the MSA Team does perform this sort of analysis upon its initial review, and thinks it is a good idea to document a flowchart of the analysis process used. He said there are instances where the MSA Team sees there are benefits to using both approaches, and this results in a rate increase recommendation that is a blend of the two approaches.

Andersen said the Working Group will expose a request for public comment on the Minnesota and Texas actuarial approaches as described in the Framework document until April 24. Muldoon suggested that the MSA Team provide the insurer with a copy of the spreadsheet used with the Minnesota methodology to arrive at the recommended rate increase that was calculated. Andersen said the Working Group will include this suggestion in the set of comments on the Minnesota and Texas approaches.

#### 4. Heard an Update on LTCI Valuation Issues

Andersen said the Long-Term Care Valuation (B) Subgroup has been inactive since the adoption of *Actuarial Guideline LI—The Application of Asset Adequacy Testing to Long-Term Care Insurance Reserves* (AG 51) in 2017. He said many of the members of the Subgroup have been involved with the review of annual AG 51 filings.

Andersen said one of the key trends seen in AG 51 reviews for the past few years is cost of care inflation, particularly for companies with policies that include a 5% inflation protection feature. He said the inflation in the cost of care is creating issues with reserve adequacy observed in AG 51 filings. He said another issue observed is the impact of COVID-19 on LTCI experience data in 2020. He said the impact of COVID-19 on experience data trended closer to normal in 2021, and the expectation was that there would be a negligible COVID-19 effect on 2022 LTCI experience data. He said one of the reviewers' findings is that the COVID-19 impact has leveled off between 2021 and 2022. He said an issue is whether the experience data seen in 2022 will be the new norm, or if there will be delayed COVID-19 impacts to experience in future years. He said the 2022 AG 51 filings are due in approximately six weeks, and the reviewers will report any issues that develop from the reviews to the Working Group.

Lombardo said the Working Group will begin work on incorporating new mortality and lapse tables proposed in American Academy of Actuaries (Academy) and Society of Actuaries (SOA) Research Institute's *Final Long-Term Care Insurance Mortality and Lapse Study* into VM-25, Health Insurance Reserves Minimum Reserve Requirements, of the *Valuation Manual*.

Having no further business, the Long-Term Care Actuarial (B) Working Group adjourned.

Meetings/Member Meetings/B CMTE/HATF/2023\_Spring/02-17-23/Minutes\_LTCAWG\_02-17-23.docx

**Three LTC rate increase review “checklists” for discussion – 2/17/23 LTC Actuarial Working Group**

- I. Recommended checklist for each state
  - NAIC Health Actuarial Task Force-adopted document, with the goal for states attaining 90% to 100% of the information necessary to make a decision about determining approvable rate increases.
- II. MSA Supplemental checklist
  - NAIC Health Actuarial Task Force-adopted document, with the goal for states attaining 90% to 100% of the information necessary to make a decision about determining approvable rate increases.
- III. Additional information requested to be included in a 50-state checklist

- I. Recommended checklist for each state

**Consolidated, Most Commonly Asked Questions – States’ LTC Rate Increase Reviews**

Adopted by the NAIC Health Actuarial (B) Task Force on 3/23/18

1. New premium rate schedule, percentage increase for each rating scenario such as issue age, benefit period, elimination period, etc., from the existing and original rates.
  - A. Provide rate increase percentages by policy form number and clear mapping of these numbers to any alternative terminology describing policies stated in the actuarial memorandum and other supporting documents.
  - B. Provide the cumulative rate change since inception, after the requested rate increase, for each of the rating scenarios.
2. Rate increase history that reflects the filed increase.
  - A. Provide the month, year, and percentage amount of all previous rate revisions.
  - B. Provide the SERFF filing numbers associated with all previous rate revisions.
3. Actuarial Memorandum justifying the new rate schedule, which includes:
  - A. Lifetime loss ratio projection, with earned premiums and incurred claims discounted at the maximum valuation interest rate.
    - i. The projection should be by year.
    - ii. Provide the count of covered lives and count of claims incurred by year.
    - iii. Provide separate experience summaries and projections for significant subsets of policies with substantially different benefit and premium features. Separate projections of costs for significant blocks of paid-up and premium-paying policies should be provided.
    - iv. Provide a comparison of state versus national mix of business. In addition, a state may request separate state and national data and projections. The company should accompany any state-specific information with commentary on credibility, materiality, and impact on requested rate increase.
  - B. Reasons for the rate increase, including which pricing assumptions were not realized & why.
    - i. Attribution analysis - present the portion of the rate increase allocated to and impact on the lifetime loss ratio from each change in assumption.

- ii. Related to the issue of past losses, explain how the requested rate increase covers a policyholder's own past premium deficiencies and/or subsidizes other policyholders' past claims.
  - iii. Provide the original loss ratio target to allow for comparison of initially assumed premiums and claims and actual and projected premiums and claims.
  - iv. Provide commentary and analysis on how credibility of experience contributed to the development of the rate increase request.
- C. Statement that policy design, underwriting, and claims handling practices were considered.
  - i. Show how benefit features, e.g., inflation and length of benefit period, and premium features, e.g., limited pay and lifetime pay, impact requested increases.
  - ii. Specify whether waived premiums are included in earned premiums and incurred claims, including in the loss ratio target calculation; provide the waived premium amounts and impact on requested increase.
  - iii. Describe current practices with dates and quantification of the effect of any underwriting changes. Describe how adjustments to experience from policies with less restrictive underwriting are applied to claims expectations associated with policies with more restrictive underwriting.
- D. A demonstration that actual and projected costs exceed anticipated costs and the margin.
- E. The method and assumptions used in determining projected values should be reviewed in light of reported experience and compared to the original pricing assumptions and current assumptions.
  - i. Provide applicable actual-to-expected ratios regarding key assumptions.
  - ii. Provide justification for any change in assumptions.
- F. Combined morbidity experience from different forms with similar benefits, whether from inside or outside the company, where appropriate to result in more credible historical claims as the basis for future claim costs.
  - i. Explain the relevance of any data sources and resulting adjustments made relevant to the current filing, particularly regarding the morbidity assumption.
  - ii. A comparison of the population or industry study to the in-force related to the filing should be performed, if applicable.
  - iii. Explain how claims cost expectations at older ages and later durations are developed if data is not fully credible at those ages and durations.
  - iv. Provide the year of the most recent morbidity experience study.
- G. Information (from NAIC Guidance Manual for Rating Aspect of the Long-Term Care Insurance Model Regulation, "Guidance Manual" Q&A): Morbidity, Lapse, Mortality, Interest
  - i. Comparison with asset adequacy testing reserve assumptions
    - a) Explain the consistency regarding actuarial assumptions between the rate increase filing and the most recent asset adequacy (reserve) testing filing.
    - b) Additional reserves that the company is holding above NAIC Model Reg 10 formula reserves should be provided, (such as premium deficiency reserves and Actuarial Guideline 51 reserves).
  - ii. Assumptions Template in Appendix 6 of the *NAIC Guidance Manual for Rating Aspect of the Long-Term Care Insurance Model Regulation (Guidance Manual)* (for policies issued after 2017, where applicable)
  - iii. Provide actuarial assumptions from original pricing and most recent rate increase filing, and have the original actuarial memorandum available upon request.

- H. Guidance Manual Checklist items: summaries (including past rate adjustments); average premium; distribution of business, including rate increases by state; underwriting; policy design and margins; actuarial assumptions; experience data; loss ratios; rationale for increase; reserve description
  - I. Assert that analysis complies with actuarial standards of practice, including 18 & 41.
  - J. Numerical exhibits should be provided in Excel spreadsheets with active formulas maintained, where possible.
- 4. Rate Comparison Statement of renewal premiums with new business premiums, if applicable.
  - 5. Policyholder notification letter – should be clear and accurate.
    - A. Provide a description of options for policyholders in lieu of or to reduce the increase.
    - B. If inflation protection is removed or reduced, is accumulated inflation protection vested?
    - C. Explain the comparison of value between the rate increase and policyholder options.
    - D. Are future rate increases expected if the rate increase is approved in full? If so, how is this communicated to policyholders?
    - E. How are partnership policies addressed?
  - 6. Actuarial certification and rate stabilization information, as described in the Guidance Manual and Contingent benefit upon lapse information, including reserve treatment.
-

Note regarding this document:

Commissioners on the Long-Term Care Insurance (B/E) Task Force requested that the LTC Pricing Subgroup develop a single checklist that reflects significant aspects of LTC rate increase review inquiries from all of the states. In this context, “checklist” means the list of inquiries (often a template) that states typically send at the beginning of reviews of rate increase filings.

This document contains aspects of the NAIC Guidance Manual and checklists developed by several other states. This single checklist is not intended to prevent a state from asking for additional information. The intent is to take a step toward moving away from 50 states having 50 different checklists in order to have a more efficient process nationally to provide the most important information needed to determine an approvable rate increase. To keep the template at a manageable length, it is anticipated that this template will result in states attaining 90 to 100 percent of the information necessary to make a decision about determining approvable rate increases. State and block specifics will generate the other zero to 10 percent of requests.

This consolidated checklist can be presented to the LTC B/E Task Force prior to or at the March 2018 NAIC national meeting. As states apply this checklist, this checklist or an improved version may be considered for future addition to the *Guidance Manual*.

---

## II. MSA Supplemental checklist

**To assist in the multi-state actuarial (MSA) review, the following, additional information, would be helpful, where applicable:**

1. Benefit utilization:
  - a. Current, prior rate increase, and original assumptions; including first-projection year through ultimate utilization percentages for 5% compound inflation, lesser inflation, and zero inflation cells;
  - b. Explain how benefit utilization assumptions vary by maximum daily benefit;
  - c. Provide the cost of care inflation assumption implied in the benefit utilization assumption.
2. Attribution of rate increase
  - a. Provide the attribution of rate increase by factor: morbidity, mortality, lapse, investment, other;
  - b. For the morbidity factor, break down the attribution by incidence, claim length, benefit utilization, and other.
  - c. Provide information on the assumptions that are especially sensitive to small changes in assumptions.
3. Reduced benefit options (RBOs)
  - a. Provide the history of RBOs offered and accepted for the block.
  - b. Provide a reasonability analysis of the value of each significant type of offered RBO.
4. Investment returns
  - a. Provide original and updated / average investment return assumptions underlying the pricing. Explain how the updated assumption reflects experience.
5. Expected loss ratio
  - a. With respect to the initial rate filing and each subsequent rate increase filing, provide the target loss ratio. Provide separate ratios for lifetime premium periods and non-lifetime premium periods and also for inflation-protected and non-inflation-protected blocks.
6. Shock lapse history
  - a. Provide shock lapse data related to prior rate increases on this block.
7. Waiver of premium handling
  - a. Explain how policies with premiums waived are handled in the exhibits of premiums and incurred claims, and explain how counting is appropriate (as opposed to double counting or undercounting).
8. Actual-to-expected differences
  - a. Explain how differences between actual and expected counts or percentages (in the provided exhibits) are reflected or not reflected in assumptions.
9. Assumption consistency with the most recent asset adequacy testing
  - a. Explain the consistency or any significant differences between assumptions underlying the rate increase request and those included in Actuarial Guideline 51 testing.

### III. Additional information requested to be included in a 50-state checklist

#### **Additional potential information to discuss**

- Actual investment rate earned in historical years
- Nationwide projections of premiums using the rates in effect in the state, as if these rates were in effect in all states
- Premiums by duration in addition to by calendar year
- Loss ratios by duration based on original pricing assumptions
- Add to 3B of the Recommended Checklist For Each State: Clear descriptions of any adversity in experience or expectations for factors since original pricing and since the most recent rate increase filing

# SOCIETY OF ACTUARIES RESEARCH UPDATE TO HATF

March 21, 2023

R. Dale Hall, FSA, MAAA, CERA, CFA  
Managing Director of Research

## Presentation Disclaimer

*The material and information contained in this presentation is for general information only. It does not replace independent professional judgment and should not be used as the basis for making any business, legal or other decisions. The Society of Actuaries assumes no responsibility for the content, accuracy or completeness of the information presented.*

# Social Physical and Cultural Determinants of Health: Their Incorporation into Actuarial Data and Workstreams

Health Care  
Cost Trends

This provides actuaries with guidance on how to use determinants of health (DOH) for actuarial work streams in the health care space.

- DOH data can be used to enrich health care data analysis beyond traditional data elements, such as age, gender, zip code or health diagnosis.
  - Often individuals who share similar traditional data characteristics can have very different DOH's resulting in very different outcomes
  - For example, within a county or a three-digit zip code, you can have completely different living environments and local characteristics, such as provider availability, food availability, income levels, cultural differences resulting in very different outcomes for individuals with similar age, gender, geography and health diagnoses

## SDOH Data Resources

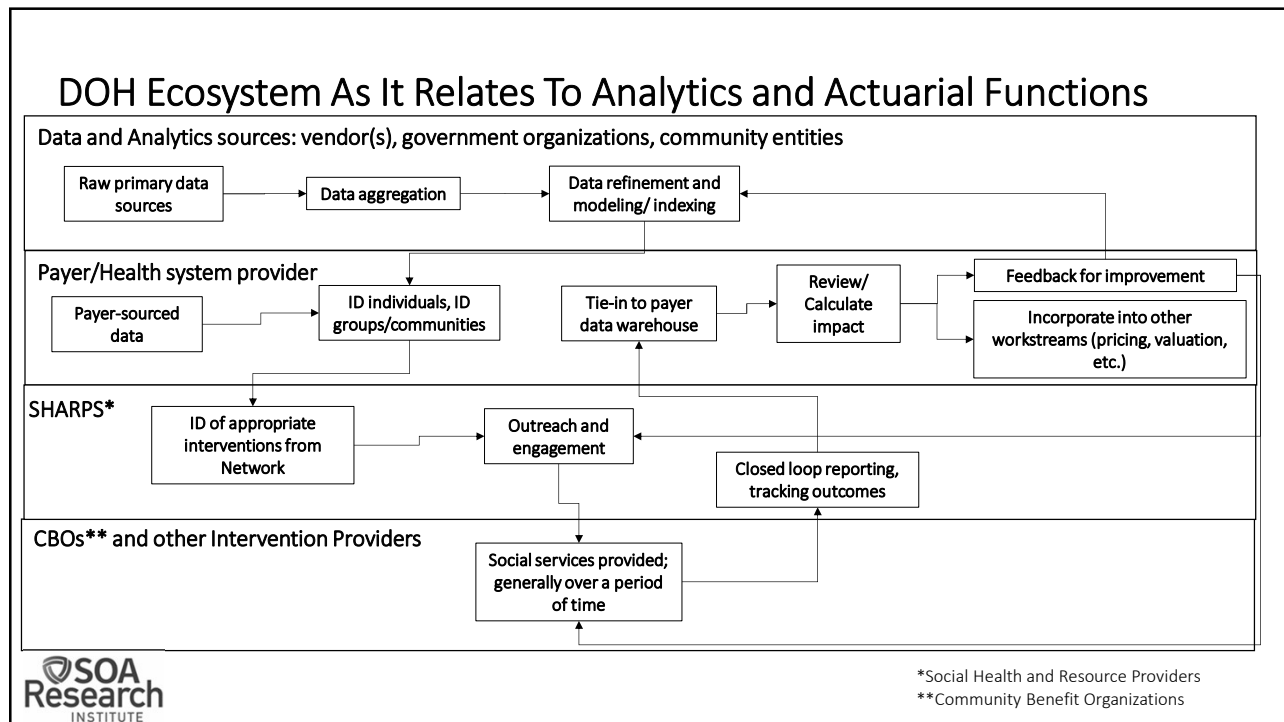

- DOH data is evolving but still fragmented and inconsistent. Can be categorized into Primary and Secondary data
  - Primary Source Characteristics
    - Their use was addressed in the SOA's Quantitative SDOH Paper:
    - Inconsistent definition or coding between different entities
    - Frequently self-reported, resulting in subjectivity and personal perspective
    - Difficult to maintain best practices
  - Secondary Source Derivation
    - Compiles Primary data into global measures of relative DOH intensity
    - Don't tie directly to the claimant, but indirectly to claimant elements (often geographical area)
    - Used as a proxy for member statuses

## SDOH Data Resources

- Secondary Source Characteristics
  - **Consistency** – values of characteristics are relatively stable
  - **Persistency** – production of these data sources is likely to continue over time
  - **Comprehensiveness** – Capture most populations and relevant DOHs
  - **Robustness** – Captures differences and variations (i.e. by geography)
  - **Applicability** – How well does a measure match with populations being analyzed
  - **Neutrality** – Minimizing biases in choice of variables or clustering of results
  - **Version Control** – Being transparent about methodology changes over time
  - **Open and Clear Methodology** – Good documentation of source materials

## Additional Challenges and Considerations with Using DOH Data

- Traditional workstreams such as pricing, reserving, risk adjustment and evaluation may be enhanced by incorporating DOH data
- Traditional models for evaluation, including strict requirements for financial return on investment, may not be appropriate in the context of DOH
- Ethical and Practical Considerations
  - Does the work reflect a fair use of data and modeling
  - Does the work align with existing practice
  - Use of SDOH in models should be easy to integrate, maintain, justify, adapt and simple
  - Avoid being technically correct but ethically problematic

## Additional Health Research

## Experience Studies, Practice Research & Data Driven In-house Research

Project Name	Objective	Expected Completion Date
Risk Adjustment White Paper	Interview Risk Adjustment SMEs and create a white paper that will address recent concerns brought up by political leaders about the use of Risk Adj through an actuarial user's guide to its past and future applications.	<a href="https://www.soa.org/resources/research-reports/2023/risk-adjustment-ma/">https://www.soa.org/resources/research-reports/2023/risk-adjustment-ma/</a>
State Based Public LTC Catastrophic Research	Studies the feasibility, possibilities and potential options for a state specific public product for Catastrophic LTC protection.	<a href="https://www.soa.org/resources/research-reports/2023/ltc-catastrophic-insurance/">https://www.soa.org/resources/research-reports/2023/ltc-catastrophic-insurance/</a>
Social Physical and Cultural Determinants of Health	Qualitative SDOH research project.	3/10/2023
Digital Health	A study focusing on telehealth and other digital communications.	3/31/2023
Emerging Impact of Long COVID on HealthCare Costs and Medical Conditions	A study that will examine the impact of a COVID 19 diagnosis on patient claims and medical conditions.	3/31/2023
Wall Street Journal Health Forum Update	This brief will summarize key takeaways for actuaries in the Health space on emerging topics and technologies discussed at the March 6th Wall Street Journal Health Forum	3/31/2023
Group Life Waiver of Premium Valuation Tables	Develop valuation tables for claim mortality and recovery on Group Term Life policies with Waiver of Premium benefits.	4/30/2023
HCO Quick Hit - Specialty Pharmacy Trends	This research will examine some key specialty drugs to look at how increases in uptake in drugs worth between 10K and 200k are driving current pharmacy trend.	5/31/2023
Health and Health Care Inequalities: Research Challenges and Considerations	A summary of the challenges involved in conducting research that requires health or health care data and protected personal information. Includes considerations for future research.	5/31/2023
Initiative 18/11 - 5/50 Project - Analyzing Characteristics of the top 5% members by cost who drive 50% of Medical Expenses	Validate the 5/50 Premise through % of total costs and average allowed annual cost by percentile grouping. Analyze ability to predict the 5% based on prior claims and risk factors. Calculate Transition probabilities between different groups.	5/31/2023

## **American Academy of Actuaries Health Practice Council—Spring 2023 Updates**

March 21, 2023—National Association of Insurance Commissioners (NAIC)  
Health Actuarial (B) Task Force (HATF) Meeting

Barbara Klever, MAAA, FSA  
Vice President, Health Practice Council  
American Academy of Actuaries

May not be reproduced without express permission.

## **About the American Academy of Actuaries**

- The American Academy of Actuaries is a 19,500-member professional association whose mission is to serve the public and the U.S. actuarial profession. For more than 50 years, the Academy has assisted public policymakers on all levels by providing leadership, objective expertise, and actuarial advice on risk and financial security issues.
- The Academy also sets qualification, practice, and professionalism standards for actuaries in the United States.

For more information, please visit: [www.actuary.org](http://www.actuary.org)

© 2023 American Academy of Actuaries. All rights reserved.  
May not be reproduced without express permission.

## **Public Policy and the Academy**

- The Academy, through its public policy work, seeks to address pressing issues that require or would benefit from the application of sound actuarial principles. The Academy provides unbiased actuarial expertise and advice to public policy decision-makers and stakeholders at the state, federal, and international levels in all areas of actuarial practice.

Regulatory Framework (B) Task Force  
Louisville, Kentucky  
March 22, 2023

The Regulatory Framework (B) Task Force met in Louisville, KY, March 22, 2023. The following Task Force members participated: Sharon P. Clark, Chair, represented by Shaun Orme (KY); Glen Mulready, Vice Chair, and Andy Schallhorn (OK); Lori K. Wing-Heier represented by Sarah Bailey (AK); Ricardo Lara represented by Tyler McKinney (CA); Andrew N. Mais represented by Jared Kosky (CT); Karima M. Woods represented by Howard Liebers (DC); Doug Ommen represented by Andria Seip (IA); Dean L. Cameron represented by Weston Trexler and Shannon Hohl (ID); Amy L. Beard represented by Alex Peck (IN); Vicki Schmidt represented by Julie Holmes (KS); Gary D. Anderson represented by Kevin Beagan (MA); Timothy N. Schott represented by Robert Wake (ME); Mike Causey represented by Ted Hamby (NC); Eric Dunning represented by Martin Swanson and Maggie Reinert (NE); Chris Nicolopoulos represented by David Bettencourt (NH); Judith L. French represented by Laura Miller (OH); Andrew R. Stolfi represented by TK Keen (OR); Michael Humphreys represented by Katie Merritt (PA); Larry D. Deiter represented by Jill Kruger (SD); Cassie Brown represented by Rachel Bowden (TX); Jon Pike represented by Tanji J. Northrup (UT); Scott A. White represented by Julie Blauvelt (VA); Mike Kreidler represented by Molly Nollette (WA); Nathan Houdek (WI); and Allan L. McVey represented by Erin K. Hunter (WV). Also participating were: Erica Weyhenmeyer (IL); Sarah Wohlford (MI); and Patrick Smock (RI).

1. Adopted its 2022 Fall National Meeting Minutes

Kruger made a motion, seconded by Swanson, to adopt the Task Force’s Dec. 13, 2022, minutes (*see NAIC Proceedings – Fall 2022, Regulatory Framework (B) Task Force*). The motion passed unanimously.

2. Adopted its Subgroup and Working Group Reports

A. Accident and Sickness Insurance Minimum Standards (B) Subgroup

Schallhorn said the Accident and Sickness Insurance Minimum Standards (B) Subgroup met March 13, Feb. 27, and Feb. 13. He said that during these meetings, the Subgroup discussed the comments received on Section 8—Supplementary and Short-Term Health Minimum Standards for Benefits of the *Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171)*, specifically, Section 8A—General Rules. He said the Subgroup also discussed its upcoming work to review the remaining provisions in Model #171 in the following order: 1) the remainder of Section 8, including revisiting the proposed new subsection on short-term, limited-duration (STLD) plans to discuss the Feb. 24 comments received on that section; 2) Section 7—Prohibited Policy Provisions; 3) revisit Section 5—Definitions and Section 6—Policy Definitions to reconcile any inconsistencies that may have arisen after the Subgroup’s review of the substantive provisions of Model #171; and 4) Section 9—Required Disclosure Provisions. The Subgroup hopes to finish its work to develop an initial draft of comments on Model #171 for public comment by the end of the year.

Schallhorn said that in discussing the comments on this revised Model #171 draft, which will reflect all the Subgroup’s discussions related to the model revisions, the Subgroup plans to only entertain and consider comments that raise issues not previously discussed. The Subgroup’s goal is to have a revised Model #171 ready for consideration by the Task Force and the Health Insurance and Managed Care (B) Committee by early 2024, before the 2024 Spring National Meeting.

#### B. ERISA (B) Working Group

Wake said the Employee Retirement Income Security Act (ERISA) (B) Working Group will not be meeting during the Spring National Meeting, but he anticipates the Working Group meeting in person at the Summer National Meeting. Wake said the Working Group will most likely meet virtually prior to the Summer National Meeting to complete its work updating the NAIC chart on multiple employer welfare arrangements (MEWAs)/multiple employer trust (MET) and association plans. He said the Working Group continues to serve as a forum and facilitate discussions among state insurance regulators and federal regulators on issues involving ERISA plans and MEWAs. He said the Working Group also stands ready to assist the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup on any issues it encounters related to ERISA preemption issues as the Subgroup works on its white paper concerning pharmacy benefit managers (PBMs) and their business practices, including the implications of the *Rutledge vs. Pharmaceutical Care Management Association (PCMA)* decision and any subsequent decisions on such business practices.

#### C. MHPAEA (B) Working Group

Weyhenmeyer said the Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group continues to serve as a forum and an opportunity for Working Group members and interested state insurance regulators to discuss MHPAEA enforcement and compliance issues. She said that since the 2022 Fall National Meeting, the Working Group met in regulator-to-regulator session and Feb. 24 to continue its discussion of parity issues with health insurers.

Weyhenmeyer said the Working Group is also continuing to monitor congressional activity related to mental health parity. She said that last year, the Working Group led the effort to write a letter in support of legislation that would provide grants to the states to assist them with mental health parity plan compliance determination, enforcement, and training. She said the legislation passed, but the U.S. Congress has not yet funded the grant program. She said the Biden Administration has included proposal funds for the grant program in its fiscal year 2024 budget. The Working Group is hopeful that this funding will remain in the final budget. Weyhenmeyer said the Working Group is anticipating an updated proposed rule related to mental health parity from the U.S. Department of Labor (DOL) and the federal Centers for Medicare & Medicaid Services (CMS). Once the proposed rule is published, she hopes to hold a Working Group meeting to discuss it and decide whether the NAIC should comment on it through the Government Relations (EX) Leadership Council.

Weyhenmeyer said the Working Group will meet March 23. During this meeting, the Working Group will hear a discussion of the *Wit v. United Behavioral Health* case, a potential landmark case setting a precedent for how care will be covered for individuals seeking treatment for mental health and addiction.

#### D. Pharmacy Benefit Manager Regulatory Issues (B) Subgroup

Keen said that since his last update, the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup released a working draft of the proposed PBM white paper. He said the Subgroup discussed the draft paper's outline during its meeting at the 2022 Fall National Meeting. Keen said the Subgroup is currently working on edits to the working draft, such as adding language to the Recommendation section and making any necessary non-substantive edits. After this is complete, the Subgroup plans to release an official draft of the white paper for public comment by the end of March or early April. Most likely, the Subgroup will set a 45-day public comment period. Keen said that following the end of the public comment period, the Subgroup plans to hold meetings to review the comments received and make changes to the draft based on those discussions. The Subgroup hopes to finish its work on the white paper prior to the 2023 Summer National Meeting and forward it to the Task Force for its consideration.

Keen said that during its March 22 meeting, the Subgroup adopted its 2022 Fall National Meeting minutes. He said the Subgroup heard an update on federal PBM-related legislative and regulatory activities. The Subgroup also heard a legal update on PBM-related litigation.

Keen made a motion, seconded by Nollette, to adopt the following reports: the Accident and Sickness Insurance Minimum Standards (B) Subgroup, including its March 13 (Attachment One), Feb. 27 (Attachment Two), and Feb. 13 (Attachment Three) minutes; the ERISA (B) Working Group; the MHPAEA (B) Working Group, including its Feb. 24 (Attachment Four) minutes; and the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup, including its March 22 (Attachment Five) minutes. The motion passed unanimously.

### 3. Heard an Update on the CHIR's Work

Maanasa Kona (Center on Health Insurance Reforms—CHIR) provided an update on the CHIR's work and various projects of interest to the Task Force. Kona said that in light of the upcoming end of the COVID-19 public health emergency (PHE) and the resulting Medicaid unwinding process, the CHIR recently released an issue brief called "Secrets to a Successful Unwinding: Actions State-Based Marketplaces and Insurance Departments Can Take to Improve Coverage Transitions." She said a colleague of hers will discuss the issue in more detail during the Health Insurance and Managed Care (B) Committee's March 23 meeting.

Kona said the CHIR has taken on a few projects related to qualified health plan (QHP) federal Affordable Care Act (ACA) marketplace enrollment, including an analysis of state-based marketplace (SBM) outreach strategies for boosting QHP enrollment of the uninsured and the process of implementing the family glitch fix on the ACA's marketplaces. She said the CHIR also is examining state activities, such as those occurring in Washington and Nevada, related to public option programs. The CHIR plans to continue monitoring these activities and new state public option legislation.

Kona said the CHIR is examining what states are doing to improve coverage and recently released a few issue briefs highlighting state efforts in this area. She said the CHIR is continuing to monitor and analyze state action related to health equity. As part of this effort, the CHIR plans to publish a survey of SBMs' language access and policy practices soon.

Kona said the CHIR continues to monitor the implementation of the federal No Surprises Act (NSA) and expects to issue publications soon on several issues related to the implementation process, including a one-year progress report. She said the CHIR recently launched a four-part series studying employer-sponsored insurance (ESI) and cost containment. Kona said the CHIR's future work in this area includes investigating cost containment and outpatient facility fees. Another future CHIR project is a 50-state survey on state protections against medical debt.

Keen said Oregon and other states have encountered an issue with provider contracts expiring in the middle of a policy year, which is very disruptive to consumers. He asked Kona if the CHIR has examined this issue as part of their research and highlighted this as an issue of concern. Kona said the CHIR has researched issues related to provider contracts, but it has not specifically honed in or researched issues related to the mid-year expiration of such contracts. She said she would take this issue back to her colleagues at the CHIR as a potential future research project.

Commissioner Mulready explained that Oklahoma has seen access issues concerning consumers being able to obtain appointments with behavioral health providers in a timely fashion. He asked Kona if the CHIR has looked at this issue and, if so, whether she could recommend any best practices that other states may be doing to address the issue.

Kona said the CHIR has studied the wait time issue with mental health parity as part of comparative analyses of non-quantitative treatment limitations (NQTLs). She said, however, that in examining this issue, it does not seem that any particular state has emerged as a leader in resolving this issue. She noted that California does have certain plan reporting requirements related to wait times for appointments, but the CHIR has not conducted an analysis of how it is working. She said the CHIR could possibly look at this as part of a future project.

Having no further business, the Regulatory Framework (B) Task Force adjourned.

Draft: 3/16/23

Accident and Sickness Insurance Minimum Standards (B) Subgroup  
Virtual Meeting  
March 13, 2023

The Accident and Sickness Insurance Minimum Standards (B) Subgroup of the Regulatory Framework (B) Task Force met March 13, 2023. The following Subgroup members participated: Andy Schallhorn, Co-Chair (OK); Rachel Bowden, Co-Chair (TX); Chris Struk (FL); Robert Wake (ME); Camille Anderson-Weddle (MO); Martin Swanson (NE); Heidi Clausen (UT); Anna Van Fleet, Jamie Gile, and Mary Block (VT); and Ned Gaines (WA).

1. Continued Discussion of Section 8A of Model #171

The Subgroup continued its discussion of the comments received on Section 8A—General Rules of the *Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act* (#171), beginning with the NAIC consumer representatives' suggestion to delete the language "within a period of less than fourteen (14) days" in Section 8A(7). The Subgroup decided to revise the timeframe to 30 days. The Subgroup also agreed, if necessary, to revisit its decision based on any stakeholder concerns.

2. Discussed Comments Received on Section 7 of Model #171

The Subgroup next discussed the comments received on Section 7—Prohibited Policy Provisions, beginning with the NAIC consumer representatives' comments for Section 7A. Section 7A prohibits specified policies from establishing provisions related to probationary or waiting periods, during which no coverage is provided under the policy under certain circumstances. Section 7A also provides that a policy may contain a probationary or waiting period for certain diseases or conditions. The NAIC consumer representatives suggest numerous revisions to this provision, including adding a provision prohibiting a supplementary or short-term, limited-duration (STLD) health insurance policy from being issued, delivered, or used in the state unless the policy has been filed and approved by the commissioner. The Subgroup discussed the suggested revisions but decided not to accept them. The Subgroup decided to accept the Maine Department of Insurance's (DOI's) suggested revisions to Section 7A, which streamline the existing language and incorporate the language in Section 7C related to preexisting condition exclusion periods. After discussing the Vermont DOI's comments on Section 7A, which question the list of specific conditions described in the provision for which a policy may have a probationary or waiting period, the Subgroup agreed to delete the reference to "appendix" because it appears to be obsolete.

The Subgroup next discussed the comments received on Section 7B. Section 7B prohibits an insurer from issuing a policy or rider for additional coverage as a dividend unless an equivalent cash payment is offered as an alternative to the dividend policy or rider. The NAIC consumer representatives and the Health Benefits Institute (HBI) suggest deleting the provision because it is not a common provision included in health insurance coverage. The HBI also suggests adding a drafting note that explains why the provision was deleted and suggests that those states where policy dividends are available for policies covered by Model #171 look at how such dividends are treated in life insurance. After discussion, the Subgroup agreed to delete Section 7B and add the HBI's suggested drafting note.

The Subgroup next discussed the Maine DOI's suggestion to delete Section 7C. Section 7C prohibits an insurer from excluding coverage for a loss due to a preexisting condition for a period greater than 12 months following the issuance of the policy or certificate where the application or enrollment form for the insurance does not seek disclosure of prior illness, disease, or physical condition or prior medical care and treatment and the preexisting

condition is not specifically excluded under the terms of the policy or certificate. After discussion, the Subgroup agreed to delete Section 7C because its provisions are folded into the revised language for Section 7A.

The Subgroup next discussed Section 7D. Section 7D describes provisions that may be included in a disability income protection policy. America's Health Insurance Plans (AHIP) suggests adding the word "option" after "cash value benefit." The Subgroup accepted the suggested revision. The Subgroup discussed the NAIC consumer representatives' suggestion to delete the term "suspension" and replace it with "cancellation." The Subgroup decided not to accept the suggested revision because of the different meanings and applications of these terms in accordance with common insurance terminology.

The Subgroup discussed the Texas DOI's suggestion to add language to Section 7, clarifying that, except for STLD plans and limited scope dental and vision plans, the policies covered under Model #171 cannot coordinate because the *Coordination of Benefits Model Regulation* (#120) excludes these types of coverages from the definition of "plan." However, because Model #120 does not technically apply to policies that are not "plans," some insurers attempt to limit coverage to "excess only." After discussion, the Subgroup agreed to consider adding such language. Bowden volunteered to draft language for the Subgroup's consideration.

The Subgroup next discussed the Texas DOI's comments on Section 7E. Section 7E prohibits a hospital confinement indemnity or other fixed indemnity coverage from containing a provision excluding coverage because of confinement in a hospital operated by the federal government. The Subgroup discussed why Section 7E is limited to hospital confinement indemnity, other fixed indemnity coverage, and hospitals operated by the federal government. The Subgroup did not make any decisions on whether to broaden Section 7E to include other coverages and other licensed facilities.

The Subgroup next discussed Section 7F. Section 7F prohibits a policy from limiting or excluding coverage by type of illness, accident, treatment, or medical condition, except as provided in the section. The American Council of Life Insurers (ACLI) and AHIP suggest adding the words "non-commercial or recreational" to clarify Section 7F(4)(c). The Subgroup accepted the suggested revision.

The Subgroup next discussed the NAIC consumer representatives' suggested revisions to Section 7F. The Subgroup did not complete its discussion of the comments, deferring discussion until the Subgroup's next meeting on March 27.

Having no further business, the Accident and Sickness Insurance Minimum Standards (B) Subgroup adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/B CMTE/RFTF/Accident and Sickness Subgrp/Accident and Sickness Ins Min Stds Subgrp 3-13-23MtgMin.docx

Draft: 3/15/23

Accident and Sickness Insurance Minimum Standards (B) Subgroup  
Virtual Meeting  
February 27, 2023

The Accident and Sickness Insurance Minimum Standards (B) Subgroup of the Regulatory Framework (B) Task Force met Feb. 27, 2023. The following Subgroup members participated: Andy Schallhorn, Co-Chair (OK); Rachel Bowden, Co-Chair (TX); Chris Struk and Shannon Doheny (FL); Robert Wake (ME); Camille Anderson-Weddle (MO); Martin Swanson (NE); Heidi Clausen and Shelley Wiseman (UT); Anna Van Fleet and Jamie Gile (VT); and Ned Gaines (WA).

1. Continued Discussion of Section 8A of Model #171

The Subgroup continued its discussion of the comments received on Section 8A—General Rules of the *Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act* (#171), beginning with the NAIC consumer representatives' suggestion to delete Section 8A(2)(c), which sets out provisions related to an individual's right to continue a policy up to a specified age under certain circumstances. The Subgroup discussed whether the provision should be retained and revised to delete the references to specific ages, similar to the changes the Subgroup agreed to for Section 8C—Disability Income Protection Coverage. After discussion, the Subgroup decided to delete the references to specific ages and revise the provision based on the Subgroup's preliminary revisions to Section 8C. The Subgroup agreed to revisit this proposed revision after it completes its review of all the comments received on Model #171.

The Subgroup next discussed the NAIC consumer representatives' suggestion to revise Section 8A(3) to delete the reference to "husband and wife" and replace it with "adult members." The NAIC consumer representatives also suggest deleting the references to "spouse" and replacing them with "person." The Subgroup agreed that it would be appropriate to delete the reference to "husband and wife" because it is outdated language. The Subgroup discussed whether replacing that reference with "adult members" would expand the scope of the provision and have unintended consequences. After discussion, the Subgroup decided to accept the Vermont Department of Insurance's (DOI's) suggestion to replace "husband and wife" with "married couple or civil union couple." The Subgroup discussed the appropriateness of adding "civil union" because such a partnership may not be applicable in every state. After discussion, the Subgroup decided to add a drafting note explaining the intent of the language, which it would review later. The Subgroup also agreed to revisit adding "civil union" and make a final decision after it completes its review of all the comments received on Model #171. The Subgroup deferred deciding on whether to delete "spouse" and replace it with "person" because of its concerns about unintentionally expanding the scope of the provision. The Subgroup agreed to revisit this issue later.

The Subgroup next discussed the NAIC consumer representatives' suggestion to delete the language "within a period of less than fourteen (14) days" in Section 8A(7). The Subgroup discussed whether deleting the language would be helpful or harmful to consumers. There also was discussion on whether to delete the provision altogether or change the time frame to 30 days. The Subgroup also discussed whether any changes were necessary because it does not appear that states have been receiving complaints about the 14-day provision. The Subgroup deferred additional discussion of the provision until its next meeting on March 13 to allow Cindy Goff (American Council of Life Insurers—ACLI) to poll ACLI members about this provision, including its 14-day time frame and whether there would be any concerns with revising the time frame to 30 days.

The Subgroup next discussed Section 8A(8). The NAIC consumer representatives and the Vermont DOI both suggest revising this provision to delete outdated language, such as the reference to "mental retardation or

physical handicap” and replacing it with “intellectual or physical disability.” They also suggest deleting the reference to “incapacity” and replacing it with “disability.” After discussion, the Subgroup agreed to accept the suggested revisions.

The Subgroup next discussed the NAIC consumer representatives’ suggestion to delete Section 8A(10). Section 8A(10) provides that a policy may contain a provision related to recurrent disabilities, but such a provision may not specify that a recurrent disability be separated by a period greater than six months. The Subgroup discussed whether deleting this provision would harm consumers. After additional discussion, the Subgroup decided to retain the provision, but consider moving it to Section 8C—Disability Income Protection Coverage.

The Subgroup next discussed the NAIC consumer representatives’ suggestion to add language to Section 8A(12) requiring that an accident-only policy providing benefits that vary according to the type of accidental cause to include in the disclosure materials required under Section 9 of Model #171, in addition to the outline of coverage, specified information on the circumstances when benefits payable under the policy will be lesser than the maximum payable benefit amount. The Subgroup agreed to accept the suggested revision.

Based on its previous discussions, the Subgroup did not accept the NAIC consumer representatives’ suggestion to delete the term “termination” in Section 8A(13) and replace it with the term “cancellation.”

The Subgroup next discussed the Texas DOI’s suggested revision to Section 8A(4) to expand the applicability of the provision to group coverage. The Subgroup discussed the suggested revision. After discussion, the Subgroup decided not to accept the suggested revision.

The Subgroup next discussed the Texas DOI’s suggested revision to Section 8A(5) to possibly expand the military service member protections to other federal or state laws. After discussion, the Subgroup decided to add a drafting note suggesting that the states may want to review other state and federal laws and regulations that may apply to this type of military service member protection.

The Subgroup next discussed the Texas DOI’s suggestion to expand Section 8A(8) to apply to group coverage. Section 8A(8) outlines requirements for continuing coverage for certain dependent children whose coverage would otherwise be terminated under the terms of the policy due to the attainment of a specified age. After discussion, the Subgroup agreed to preliminarily delete the word “individual” and have the provision apply to group coverage. The Subgroup also agreed to revisit its decision subject to industry concern about such a change.

The Subgroup next discussed the Texas DOI’s comments on Section 8A(11), suggesting expanding the time frames for paying accidental death and dismemberment benefits and disability income protection benefits. Bowden asked if Subgroup members and interested regulators took a different approach to this provision related to these time frames. A few states discussed their states’ related provisions. The Subgroup did not decide on whether to revise Section 8A(11) to reflect the Texas DOI’s comments.

The Subgroup reviewed the Texas DOI’s comments on Section 8A(12) and (13), suggesting that the Subgroup may want to move these provisions from Section 8A—General Rules to Section 8D—Accident-Only Coverage because they appear to only apply to accident-only coverage. The Subgroup did not decide whether to move the provisions.

The Subgroup next reviewed the Texas DOI’s comments on Section 8A(14). Bowden said she flagged this provision for the Subgroup for potential future discussion to add definitions for “policy period” and “benefit period” when it revisits Section 5—Definitions.

The Subgroup next discussed the Texas DOI's suggestion to broaden and revise Section 8A(15) as follows: "A policy providing coverage for certain illnesses and injuries may not define covered illnesses and injuries in a way that is misleading or include unfair exclusions. For example, a policy providing coverage for fractures or dislocations may not provide benefits only for 'full or complete' fractures or dislocations." After discussion, the Subgroup agreed to accept the suggested revision.

Having no further business, the Accident and Sickness Insurance Minimum Standards (B) Subgroup adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/B CMTE/RFTF/Accident and Sickness Subgrp/Accident and Sickness Ins Min Stds Subgrp 2-27-23MtgMin.docx

Draft: 3/7/23

Accident and Sickness Insurance Minimum Standards (B) Subgroup  
Virtual Meeting  
February 13, 2023

The Accident and Sickness Insurance Minimum Standards (B) Subgroup of the Regulatory Framework (B) Task Force met Feb. 13, 2023. The following Subgroup members participated: Andy Schallhorn, Co-Chair (OK); Rachel Bowden, Co-Chair (TX); Chris Struk and Shannon Doheny (FL); Robert Wake (ME); Shari Miles (SC); Heidi Clausen and Shelley Wiseman (UT); Anna Van Fleet and Jamie Gile (VT); and Ned Gaines (WA).

1. Discussed Proposed Revisions to the Introductory Language for Section 8 and Section 8A of Model #171

Before continuing its discussion of proposed revisions to the *Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act* (#171), Schallhorn welcomed Bowden as the new Subgroup co-chair. He also said that moving forward, the Subgroup plans to meet every other week for 90 minutes in order for the Subgroup to complete its work on revising Model #171 by the end of the year.

The Subgroup discussed America's Health Insurance Plans' (AHIP's) and the American Council of Life Insurers' (ACLI's) suggestion to delete "short-term" in the introductory language for Section 8—Supplementary and Short-Term Health Insurance Minimum Standards for Benefits. Cindy Goff (ACLI) said the ACLI suggests this revision to reflect that provisions of Section 8 do not generally apply to short-term coverage. After discussion, the Subgroup decided not to accept the suggested revision for the introductory paragraph for Section 8, but as the Subgroup reviews the other provisions in Section 8, it will consider deleting the reference to such coverage, as appropriate, such as when the provision would not apply to such coverage. The Subgroup discussed the Texas Department of Insurance's (DOI's) comments suggesting revising the language to clarify that some combinations of products could disqualify a product from being considered an excepted benefit product. After discussion, the Subgroup decided such language was unnecessary because of other revisions the Subgroup has preliminarily agreed to include for this section.

The Subgroup next discussed AHIP's and the ACLI's suggestions to delete the reference to "short-term" in Section 8A—General Rules. After discussion, the Subgroup agreed to delete these references in Section 8A(1), (2), (3), and (4). After discussion, the Subgroup agreed to add AHIP's and the ACLI's suggested language "except for nonpayment of premium" in Section 8A(6). After discussion, the Subgroup did not accept AHIP's and the ACLI's suggestion to delete the reference to "short-term" in Section 8A(8).

The Subgroup next discussed the NAIC consumer representatives' suggested revisions to Section 8A(1) to delete the term "termination" and replace it with the term "cancellation." After discussion, the Subgroup decided not to accept the suggested revisions because of concerns of unintended consequences of such a change to standard insurance terminology. The Subgroup next discussed the NAIC consumer representatives' suggestion to delete Section 8A(2)(c), which sets out provisions related to an individual's right to continue a policy up to a specified age under certain circumstances. The Subgroup discussed whether the provision should be retained and revised to delete the references to specific ages similar to the changes the Subgroup agreed to for Section 8C—Disability Income Protection Coverage. After discussion, the Subgroup deferred deciding until its next meeting on Feb. 27.

Having no further business, the Accident and Sickness Insurance Minimum Standards (B) Subgroup adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/B CMTE/RFTF/Accident and Sickness Subgrp/Accident and Sickness Ins Min Stds Subgrp 2-13-23MtgMin.docx

Draft: 3/9/23

Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group  
Virtual Meeting  
February 24, 2023

The MHPAEA (B) Working Group of the Regulatory Framework (B) Task Force met Feb. 24, 2023. The following Working Group members participated: Erica Weyhenmeyer, Chair (IL); Jimmy Harris (AR); Erin Klug (AZ); Cara Cheevers (CO); Kurt Swan (CT); Howard Liebers (DC); Elizabeth Nunes (GA); Andria Seip (IA); Julie Holmes (KS); Mary Kwei (MD); Andrew Kleinendorst (MN); Cynthia Amman (MO); David Dachs (MT); Ted Hamby (NC); Chrystal Bartuska (ND); Maureen Belanger (NH); Ralph Boeckman (NJ); Cass Brulotte and Paige Duhamel (NM); Laura Miller (OH); Ashley Scott (OK); Lindsay Swartz (PA); Glynda Daniels (SC); Jill Kruger (SD); Rachel Bowden (TX); Tanji J. Northrup (UT); Brant Lyons (VA); Barbara Belling (WI); Tim Sigman (WV); and Tana Howard (WY).

1. Adopted Its 2022 Fall National Meeting Minutes

Northrup made a motion, seconded by Kruger, to adopt the Working Group's Dec. 14, 2022, minutes (Attachment Four-A). The motion passed unanimously.

2. Discussed Parity Issues with Health Insurers

Weyhenmeyer said the same speakers from America's Health Insurance Plans (AHIP) and the Blue Cross Blue Shield Association (BCBSA) who presented at the 2022 Fall National Meeting were available to respond to follow-up questions from the Working Group.

Meghan Stringer (AHIP) reviewed the results of a survey AHIP conducted with its members on mental health care. She said AHIP's board had made a statement of commitment to expanding access to telehealth services, integrating behavioral health care into primary care, and continuing to provide mental health care at parity. She said AHIP's members have worked to expand access to mental health providers. She said mental health provider networks have grown by 48% and that four out of five plans have increased payments to mental health providers.

Kate Berry (AHIP) described member plans' work on integration of behavioral health care into primary care. She said AHIP's board has identified eight priorities on mental health, including bringing mental health services into primary care. She said AHIP recognizes there are a range of models around collaborative care with a range of payment methods. She said behavioral health care often also should be integrated into specialty care, not just primary care. Berry said integration can expand the workforce, for instance by bringing in social workers in family practice. She said telehealth has been extremely impactful in mental health services, including by increasing access and reducing stigma. She said other considerations are making electronic health records available to mental health providers and adding to the evidence base around mental health services.

Anshu Choudhri (BCBSA) reviewed some of the points from his presentation at the 2022 Fall National Meeting. He said BCBSA plans have prioritized certain areas in behavioral health, including mitigating workforce challenges and trying to drive innovation. He said youth mental health, addressing workforce challenges, and health equity are also key priorities.

Stringer shared an issue brief AHIP published on integrating mental health care.

Weyhenmeyer asked about the increase in the number of mental health providers and whether telehealth providers are included in the cited increase. Stringer said some providers offer a hybrid of telehealth services as well as in person, so she would have to check with the research team to confirm how they are included.

Duhamel brought up pending legislation in New Mexico that AHIP has opposed. She said New Mexico has not seen an increase in mental health provider networks, including psychiatrists, psychologists, and mid-level providers. She said the state has seen drops rather than increases and asked what types of providers have been added. Stringer said AHIP has worked to find a compromise on the legislation. She said the change in the number of mental health providers included 20% growth in psychiatrists, 50% growth in licensed therapists, and more than 80% in psychiatric nurse practitioners. She said the numbers are national.

Amman asked whether plans have the capability to filter out providers who are limited to facilities only and not available for outpatient referrals. She said there has been an increase in network participation by facilities, which is a good thing, but it may hide the number of providers available for patients who are not admitted to facilities. Stringer said AHIP did look at facilities separately from the number of providers. She said provider directory information is only as good as the data offered by providers. She said plans ask providers for information, but it is a challenge when they do not respond. Jen Jones (BCBSA) said some plans have established navigator programs to help patients get connected to the right providers for their care.

Duhamel said providers struggle with prior authorization. She asked what metrics are used by plans to monitor their consumer assistance programs, such as call abandonment, wait times, and successful prior authorization. Berry said prior authorization is burdensome for everyone. She said plans review their prior authorization policies and processes often. She said they are relatively selective in how they use prior authorization, focusing on the most high-volume services where there is variation in how providers practice. Choudhri said metrics on customer service would vary by plan. He said prior authorization is a difficult program to set up in cost and difficulty of administration, so plans focus on variation from clinically accepted guidelines. He said patient safety also factors in to ensure the appropriate course of treatment. He said plans work to make prior authorization more seamless and more transparent in the process.

Duhamel asked what plans are doing to streamline communication between third-party behavioral health administrators and the plans. She said New Mexico has seen breakdowns in communication from these delegated entities and has taken corrective action when there are differences in what is required from the plan and the delegated entity. Choudhri said plans work closely with delegated entities, and the expectation is that they follow plans' policies. He said some plans have moved more services in-house because of these breakdowns in communications.

Stringer said plans track metrics differently, but one plan she interacted with tracks factors like time to appointment, how long to the next appointment, how many appointments a patient has, and ensuring treatment is toward a certain outcome. Duhamel said it is difficult to get such metrics from plans.

Bartuska asked about payment parity for behavioral telehealth. She said a lack of parity in payments could lead some providers to stop offering behavioral treatment. Stringer said it is important to ask whether providers have a brick-and-mortar practice or only provide telehealth services. She said AHIP did a rough calculation that showed payments for telehealth appear to be rising faster than payments for in-person services for certain psychotherapy codes. Bartuska questioned whether telehealth-only practices should be paid the same as those with physical offices. Berry said it can cut both ways; providers want to be paid the same, but many stakeholders want to contain costs. She said many are still evaluating the cost and quality impact of virtual care, so there is not yet a clear answer. Choudhri said the emphasis should be on payment equity rather than payment parity. He said payment

for telehealth services could be paired with additional payment for care coordination. He said there is also difficulty in defining the scope of services, so flexibility is more important than a mandate for parity.

Brulotte said New Mexico prohibits additional barriers for telehealth and requires parity in payment. Berry said telehealth providers should be incorporated into regular networks, which could expand access.

Weyhenmeyer asked how plans have handled concerns from providers about prepayment audits. Choudhri said it varies from plan to plan and that he could not share detailed information without consulting them. Stringer said there is not a substantive difference between audit practices for mental health services and medical or surgical services. She said not all claims that are concerning can be looked at, and audits affect only a small number of claims overall.

Weyhenmeyer asked what contracting strategies have increased the number of participating providers. Berry said plans are doing everything they can, including paying more and reducing administrative burden where possible. Choudhri said administrative burdens can be significant for some providers, and plans are looking at ways to reduce them. He said some plans are setting up referral clinics or connecting small clinics with support services so they can remain viable rather than merging with larger organizations. Jones said plans are working to leverage the networks they have so that primary care providers have the support they need to integrate care. She said this allows behavioral health specialists to be used more effectively. She added that some plans use analytics to identify providers who are underrepresented demographically in the network or identify out-of-network providers who are serving a significant share of members.

Having no further business, the MHPAEA (B) Working Group adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/B CMTE/RFTF/National Meetings/2023 Spring National Meeting/MHPAEAWG Min 2.24.docx

Draft: 1/5/23

Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group  
Tampa, Florida  
December 14, 2022

The MHPAEA (B) Working Group of the Regulatory Framework (B) Task Force met in Tampa, FL, Dec. 14, 2022. The following Working Group members participated: Erica Weyhenmeyer, Chair (IL); Jane Beyer, Vice Chair (WA); Erin Klug (AZ); Kate Harris (CO); Kurt Swan (CT); Howard Liebers (DC); Andria Seip (IA); LeAnn Crow and Julie Holmes (KS); Mary Kwei (MD); Peter Brickwedde and Paul Hanson (MN); Carrie Couch (MO); David Dachs (MT); Ted Hamby (NC); Rachel Kriege (ND); David Bettencourt (NH); Ralph Boeckman (NJ); Paige Duhamel (NM); Daniel Bradford and Laura Miller (OH); Ashley Scott (OK); Lindsy Swartz (PA); Gwendolyn McGriff (SC); Jill Kruger (SD); R. Michael Markham (TX); Tanji J. Northrup (UT); Julie Fairbanks (VA); Barbara Belling (WI); Erin K. Hunter (WV); and Tana Howard (WY). Also participating were: Chris Struk (FL); and Kevin Beagan (MA).

1. Heard Presentations on Parity Issues from Health Insurers

Anshu Choudhri (Blue Cross Blue Shield Association—BCBSA) spoke about health insurers' opportunities for improving behavioral health access and complying with MHPAEA. He said that insurers face provider shortages in building networks. Nonetheless, he provided examples of insurers in Michigan and North Carolina that have added behavioral health providers to their networks. He said efforts are particularly focused on youth mental health and health equity. He said patient-centered medical homes have been a method for integrating mental health services with primary care.

Choudhri said health insurers are taking steps to address workforce challenges. He said insurers are trying to get creative in contracting by using value-based contracts, changing reimbursement levels, and encouraging contracts with downside risk for providers. He said insurers are working to refine contracts and using vendors to build out networks, as well as adding new provider types, like social workers and counselors, to networks. He said plans are working to support existing providers and to encourage primary care providers to offer mental health treatments.

Choudhri offered suggestions for state and federal regulators to improve MHPAEA reviews. He observed that MHPAEA governs health insurers' processes, not outcomes. He said insurers want additional clarity, consistency, and help in understanding what they should provide to show they are doing the right thing. He requested additional examples of compliance and non-compliance and alignment of compliance practices across state and federal regulations. He said plans would benefit from having a full list of nonquantitative treatment limitations. He said plans are still working to comply with requirements under the federal Consolidated Appropriations Act, 2021, so the time is not right for additional requirements.

Meghan Stringer (AHIP) provided additional perspective from health insurers on improving mental health coverage and access. She said AHIP's board has adopted a set of mental health principles and advocacy priorities. She summarized the results of a survey AHIP conducted among health insurance providers on mental health. She said that mental health provider networks are growing and that reimbursements are rising, with the number of mental health providers increasing by nearly 50% on average over the last three years. She said all plans that responded to the survey offer tele-behavioral health services. She said most plans are training and supporting primary care providers in offering mental health services, assisting enrollees in finding mental health appointments, and using specialized care managers who follow up after emergency or inpatient care.

Stringer said that case management practices differ among insurers and that different regulators have taken different views on whether a particular practice is a non-quantitative treatment limitation. She said an annual list

of non-quantitative treatment limitations (NQTLs) would be helpful, either a full list or a list of all the NQTLs that regulators have requested information on in the prior year. She said this would promote common understanding and collection of the right data.

Stringer emphasized that parity does not require the same treatment limitations, only that the processes to decide the limitations be comparable and no more stringent than those for medical/surgical services. She said prior authorization practices vary by plan and that they consider different factors. She said MHPAEA includes some clear limitations and that plans have altered their requirements in response to the law, including by limiting prior authorization. She said that the process to determine reimbursement rates is governed by MHPAEA, not the rates themselves. She said insurers routinely review their payment rates to gauge compliance with MHPAEA, including measuring against other plans. She said payment audits occur when there is a coding discrepancy or when a service is provided without approval. She said records may be requested to determine if care is appropriate or to check medical management procedures. She said a small number of claims are audited and that plans do not have the capacity to audit every suspicious claim.

Stringer said progress has been made on mental health access, but more needs to be done. She said AHIP is committed to working with regulators and other stakeholders to improve mental health support.

Weyhenmeyer asked the speakers to define fraud, waste, and abuse. Choudhri said that fraud is willfully doing something fraudulent, waste is overusing services or deviating from best practices, and abuse is misrepresenting services. Stringer said it varies by plan, but one example is drug treatment programs that do not meet quality standards.

Brickwedde asked how plans have increased their number of mental health providers. Stringer said plans have focused on using telehealth and that some increase is due to rising payment rates. Brickwedde asked whether network adequacy standards should shift focus from time and distance to appointment wait times if care is shifting to telehealth. Choudhri said it would be interesting to revisit the standards so they are not as dependent on time and distance. Brickwedde and Harris asked how plans are tracking the data needed to measure enrollees' appointment wait times. The speakers said they would have to follow up at a later time.

Beyer asked whether providers in smaller practices have the capacity to participate in value-based payments. Choudhri said contracting models like value-based payments have greater participation from broader health systems rather than small providers. He said behavioral health providers often join when systems of care form, but quality measures for behavioral health are a challenge because they have not been developed.

Weyhenmeyer said releasing an exhaustive list of NQTLs would be difficult because there are many one-off issues that insurers include in their plans. Stringer said regulators should consider releasing a list of the NQTLs they discovered or looked at in the course of a year. Hanson noted that releasing a list could be considered rulemaking under some states' laws.

Having no further business, the MHPAEA (B) Working Group adjourned into regulator-to-regulator session, pursuant to paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings.

Draft: 4/3/23

Pharmacy Benefit Manager Regulatory Issues (B) Subgroup  
Louisville, Kentucky  
March 22, 2023

The Pharmacy Benefit Manager Regulatory Issues (B) Subgroup of the Regulatory Framework (B) Task Force met in Louisville, KY, March 22, 2023. The following Subgroup members participated: TK Keen, Chair (OR); Ashley Scott and Molly Clinkscales, Vice Chair (NE); Kayla Erickson (AK); Jimmy Gunn, Reyn Norman, and Anthony L. Williams (AL); Beth Barrington (AR); Paul Lombardo (CT); Howard Liebers (DC); Andria Seip (IA); Vicki Schmidt (KS); Daniel McIlwain (KY); Frank Opelka (LA); Anita G. Fox and Chad Arnold (MI); Amy Hoyt (MO); Matthew Eberhardt (MT); Ted Hamby (NC); Erin Porter and Ralph Boeckman (NJ); Paige Duhamel and Renee Blechner (NM); David Buono (PA); Scott McAnally (TN); Tanji J. Northrup (UT); Don Beatty (VA); Jennifer Kreitler and Ned Gaines (WA); Jennifer Stegall (WI); Erin K. Hunter (WV); and Jill Reinking (WY). Also participating was: Eamon G. Rock (NY).

1. Adopted its 2022 Fall National Meeting Minutes

Beatty made a motion, seconded by Commissioner Schmidt, to adopt the Subgroup's Dec. 15, 2022, minutes (Attachment Five-A). The motion passed unanimously.

2. Heard an Update on the PBM White Paper Status

Keen said the Subgroup released a working draft of the proposed pharmacy benefit manager (PBM) white paper during its meeting at the 2022 Fall National Meeting. He said the Subgroup is working on edits to the working draft, such as adding language to the Recommendation section and making any necessary non-substantive edits. After this is complete, the Subgroup plans to release an official draft of the white paper for public comment by the end of March or early April. Keen said the Subgroup plans to set a 45-day public comment period. Following the end of the public comment period, the Subgroup plans to hold meetings to review the comments received and update the draft based on those discussions. He said the Subgroup hopes to finish its work on the white paper before the Summer National Meeting and forward it to the Regulatory Framework (B) Task Force for its consideration.

3. Heard an Update on Federal PBM-Related Legislative and Regulatory Activities

Brian R. Webb (NAIC) updated the Subgroup on recent federal PBM-related legislative and regulatory activities. He said the U.S. Senate (Senate) Committee on Commerce, Science, and Transportation passed the Pharmacy Benefit Manager Transparency Act of 2023 (S.127), which was sponsored by U.S. Sen. Maria Cantwell (D-WA) and U.S. Sen. Chuck Grassley (R-IA) on March 22. S.127 generally prohibits PBMs from engaging in certain practices when managing the prescription drug benefits under a health insurance plan, including charging the plan a different amount than the PBM reimburses the pharmacy. The bill also prohibits PBMs from arbitrarily, unfairly, or deceptively: 1) clawing back reimbursement payments; or 2) increasing fees or lowering reimbursements to pharmacies to offset changes to federally funded health plans.

Webb noted that S.127 provides that PBMs are not subject to these prohibitions if they: 1) pass along 100% of any price concession or discount to the health plan; and 2) disclose specified costs, prices, reimbursements, fees, markups, discounts, and aggregate payments received with respect to their PBM services. S.127 further requires PBMs to report annually to the Federal Trade Commission (FTC) certain information about payments received from health plans and fees charged to pharmacies. The FTC and state attorneys general are authorized to enforce the bill's provisions. Webb explained that although this is a bipartisan bill, concerns have been raised by those

accusing it of having the FTC involved in enforcing the legislation. He said he anticipates that S.127 will go to the Senate floor for a vote at some point; although, the exact timeline is unclear. If the Senate passes the bill, it is uncertain what will happen in the U.S. House of Representatives (House).

Webb said another bill of interest is the Prescription Pricing for the People Act of 2023 (S.113) introduced by Sen. Grassley, which passed the Senate Committee on the Judiciary on March 1. The bill requires the FTC to study the role of intermediaries in the pharmaceutical supply chain and merger activity. The FTC also must provide recommendations to increase transparency in the supply chain and prevent anticompetitive practices. Webb noted that like S.127, concerns involving the bill focus on the FTC's role because of a feeling that the FTC is too political and untrustworthy.

Webb said NAIC staff will continue tracking both S.127 and S.113. He explained that because both bills are bipartisan, they could be incorporated into other Senate legislation or passed as standalone bills.

Webb said with respect to federal PBM-regulatory activity, in June 2022, the FTC launched a Section 6(b) of the Federal Trade Commission Act of 1914 (FTC Act) study to inquire into the prescription drug middleman industry, requiring the six largest PBMs to provide information and records regarding their business practices. He said the FTC's investigation will closely examine how vertically integrated PBMs affect the availability and cost of prescription medications. He said as part of this investigation, the FTC issued mandatory orders to the six largest PBMs to submit to provide information and records regarding their business practices.

Webb said the inquiry is aimed at shedding light on several practices that have drawn scrutiny in recent years, including fees and clawbacks charged to unaffiliated pharmacies, methods to steer patients towards PBM-owned pharmacies, and the impact of rebates and fees from drug manufacturers on formulary design and the costs of prescription drugs to payers and patients. He said the FTC gave the PBMs 90 days to respond, but he has not seen any reports from the FTC reflecting the PBM responses. He said NAIC staff are working with FTC staff to see if the FTC would be available to participate in a regulator-to-regulator meeting with the Subgroup to discuss any findings they may have at this point in the study.

Webb said in addition to this Section 6(b) study, in June 2022, the FTC issued a "Policy Statement on Rebates and Fees in Exchange for Excluding Lower Cost Drug Products," in which the FTC said this PBM business practice may violate anti-trust laws and bribery laws. The FTC intends to closely scrutinize the impact of rebates and fees on patients and payers to determine whether any of these provisions have been violated. In addition, it plans to monitor private litigation and file amicus briefs where it can aid courts in analyzing unlawful conduct that may raise drug prices. The FTC also plans to continue to study this issue to understand the full range of practices and implications.

Webb asked which NAIC staff could discuss with relevant Congressional committee staff, given the federal legislation and the recent U.S. Supreme Court decision in *Rutledge vs. Pharmaceutical Care Management Association (PCMA)* if the Subgroup is interested in pursuing trying to codify or clarify some of the issues related to the authority of state insurance regulators to regulate PBMs and their business practices. The Subgroup expressed support for Webb's suggestion.

#### 4. Heard a Legal Update on PBM-Related Litigation

Kay Noonan (NAIC) said as the Subgroup members and other stakeholders know, there has been a lot of PBM-related legislative activity by the states to address rising prescription drug costs. She noted the PCMA's opposition to such legislation, which the PCMA asserts is preempted by the federal Employee Retirement Income Security Act of 1974 (ERISA), Medicare Part C program laws and regulations, and Medicare Part D program laws and

regulations. She explained that the U.S. Supreme Court's *Rutledge* decision potentially opened a pathway for states to regulate PBMs and their business practices. She discussed two major cases still pending in the courts—*PCMA v. Mulready* and *PCMA v. Wehbi*—considering the *Rutledge* decision, including their current litigation status and possible court decisions.

#### 5. Heard a Discussion from the States on Recently Enacted and Pending State PBM Legislation

The Subgroup heard from various members and interested state insurance regulators on recently enacted and pending state PBM legislation. Beatty said in this year's Virginia General Assembly session, two bills were introduced to include all self-funded plans in the definition of "carrier." He said because of this proposed legislation, various stakeholders not previously involved in this issue, raised concerns. After discussion, the Virginia Joint Commission on Health Care (JCHC) was charged with conducting a study generally focusing on the *Rutledge* case and its implications and issuing a report on its findings. Beatty said he believes the idea of having the JCHC conduct this study and issue a report is to better educate legislators on the issues related to the *Rutledge* case and its impact on the ability of states to regulate PBMs and their business practices.

Seip updated the Subgroup on Iowa's recently enacted PBM legislation. In this legislation, Iowa included a requirement that self-funding plans, defined as third-party payors, must comply with its provisions. She said based on this requirement, she has seen a big change in the reporting of information included in Iowa's annual report concerning the collection of rebates and fees by plans, which previously only included such information from fully insured plans. She said this information is not public yet, but there is a big difference in the numbers. She said once the report is public, she would share it with the Subgroup.

Seip said Iowa is beginning to implement provisions of the law, including the provisions requiring the Iowa Department of Insurance (DOI) to collect complaints from pharmacies. She said the Iowa DOI has received many complaints, most focusing on the pharmacy being paid less than its drug acquisition cost. She said they have received a few complaints regarding the fees being charged. She said the Iowa DOI is turning its focus to examinations. She said she would be interested in what other states are doing in this area, how they implement this provision in their laws, and working together to figure out some best practices. Keen agreed and said he would work with NAIC staff to set up a future Subgroup regulator-to-regulator meeting to discuss examinations.

Rock provided an update on New York PBM-related legislation. He said in the Governor's Executive Department proposed budget due April 1, there is a provision to provide the New York DOI with additional authority to regulate/register other prescription drug supply chain participants, such as pharmacy services administrative organizations (PSAOs), pharmacy switch companies, and rebate aggregators, as well as new requirements related to drug price disclosures of prescription drug manufacturers. He said for New York's initial law, an 18-month implementation period was built in to allow time for the New York DOI to promulgate regulations, such as market conduct regulations, to implement its provisions. The New York DOI has had a number of open meetings discussing the proposed regulations and received many comments from stakeholders. He also noted that New York's law gives the New York DOI the authority to conduct examinations. As such, he said he would support Iowa's suggestion that the Subgroup hold a regulator-to-regulator meeting to discuss best practices in this area.

Duhamel discussed legislation just passed in New Mexico, which was introduced as co-payment accumulator legislation but later was amended to include provisions meant to lower the cost of prescription drugs. She said an additional amendment added provisions on federal Section 340B discrimination and new transparency and reporting requirements. She said she has not seen the final bill language, but she knows that based on the latest version of the bill, the New Mexico DOI will be busy this year working to implement the new law. Hoyt said based on Duhamel's description, Missouri is seeing similar legislation being discussed in the state legislature. As such, she plans to follow what is going on in New Mexico as it works to implement the new law.

Lombardo discussed a bill just passed out of one of its committees that requires the Connecticut DOI to analyze the PBM distribution of prescription drugs and practices related to spread pricing, manufacturer rebates, and transparency and accountability. He said the proposed legislation also requires an examination of any impacts of ownership; governance; and vertical integration between PBMs, carriers, and pharmacies with respect to health care costs for consumers and any potential PBM anti-competitive practices in designing prescription drug formularies. He said he would keep the Subgroup apprised of what happens with the bill as it moves through the legislative process. He noted that Connecticut's three largest domestic health insurers own the three largest PBMs. As such, if the bill is enacted, it could have a lot of significant implications. Keen asked about the timeline for the Connecticut DOI to complete its analysis if the bill passed without amendment. Lombardo said the bill requires the Connecticut DOI to finish its analysis and publish a report by Feb. 1, 2024. Beatty asked if the Connecticut DOI has calculated how much it will cost to conduct the analysis. Lombardo said based on internal discussions, the Connecticut DOI anticipates hiring an outside consulting firm to assist in the work, and it is working on developing a fiscal note reflecting this. He said the fiscal note is not intended to "kill" the bill, because the Connecticut DOI wants to conduct the analysis.

Having no further business, the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/B CMTE/RFTF/PBM Regulatory Issues Subgrp/2023 Spring National Meeting/PBM Reg Issues MtgMin 3-22-23.docx

Draft: 1/4/22

Pharmacy Benefit Manager Regulatory Issues (B) Subgroup  
Tampa, Florida  
December 15, 2022

The Pharmacy Benefit Manager Regulatory Issues (B) Subgroup of the Regulatory Framework (B) Task Force met in Tampa, FL, Dec. 15, 2022. The following Subgroup members participated: TK Keen, Chair, Numi Rehfield-Griffith, Doug Hartz, Veronica Murray, and Ralph Magrish (OR); Laura Arp, Vice Chair (NE); Sarah Bailey (AK); Mark Fowler (AL); Crystal Phelps (AR); Paul Lombardo and Jared Kosky (CT); Howard Liebers (DC); Andria Seip (IA); Vicki Schmidt (KS); Daniel McIlwain, Rob Roberts, and Jonathan Abbott (KY); Chad Arnold and Joe Stoddard (MI); Norman Barrett Wiik (MN); Amy Hoyt and Carrie Couch (MO); David Dachs (MT); Robert Croom (NC); Ralph Boeckman and Erin Porter (NJ); Paige Duhamel (NM); Kelli Price (OK); Ana Paulina Gomez (PA); Scott McAnally (TN); Tanji J. Northrup (UT); Don Beatty and Stephen Hogge (VA); Ned Gaines and Molly Nollette (WA); Nathan Houdek, Rachel Cissne Carabell, and Jennifer Stegall (WI); Ellen Potter (WV); and Tana Howard (WY). Also participating were: Chris Struk (FL); Michelle B. Santos (GU); Chris Nicolopoulos (NH); and Cassie Brown (TX).

1. Adopted its Oct. 24 and Summer National Meeting Minutes

The Subgroup met Oct. 24 and Aug. 9. During these meetings, the Subgroup heard presentations from America's Health Insurance Plans (AHIP), the Blue Cross and Blue Shield Association (BCBSA), and the Pharmaceutical Care Management Association (PCMA) on issues from their perspective on the Subgroup's 2022 charge to develop a white paper to: 1) analyze and assess the role pharmacy benefit managers (PBMs), pharmacy services administrative organizations (PSAOs), and other supply chain entities play in the provision of prescription drug benefits; 2) identify, examine, and describe current and emerging state regulatory approaches to PBM business practices, such as price transparency and reporting requirements; rebating; and spread pricing, including the implications of the *Rutledge vs. PCMA* decision on such business practices; and 3) discuss any challenges, if any, the states have encountered in implementing such laws and/or regulations.

Beatty made a motion, seconded by Commissioner Houdek, to adopt the Subgroup's Oct. 24 (Attachment Five-A1) and Aug. 9 (see *NAIC Proceedings – Summer 2022, Regulatory Framework (B) Task Force, Attachment Eight*), minutes. The motion passed unanimously.

2. Discussed its Work to Develop an Initial PBM White Paper Draft

Keen said the Subgroup just released a working draft of the PBM white paper. He said that the Subgroup's aim in developing the white paper was to have it focus on the current state of play as far as PBMs and PBM regulation and business practices are concerned, as well as not have it try to predict any future changes in such regulation or business practices. He said that over the next few months, the Subgroup plans to edit and refine the document before releasing an official draft for a 30-day public comment period, which includes adding language to the introduction and recommendation sections. Keen said the main purpose of this meeting is for the Subgroup to hear from the leaders of each of the white paper section drafting groups on their process for developing an initial draft of their section and its focus.

Gaines discussed Section B—Key Players in the Drug Pricing Ecosystem. He said Section B focuses on the main players in the prescription drug supply chain, including insurers, pharmaceutical manufacturers, PBMs, pharmacists, PSAOs and the interrelation of the parties in the chain and transaction costs. He said with respect to the pharmaceutical manufacturers, Section B describes the various entities within this category—brand drug manufacturers, generic drug manufacturers, and biologic manufacturers. Gains said the subsection on pharmacies

describes both chain pharmacies and independent pharmacies. He explained that there are a few subsections in Section B that the drafting group needs to write, but it plans to complete them soon and have NAIC staff incorporate them into the white paper draft the Subgroup will expose for public comment.

Rehfield-Griffith discussed Section C—Enforcement and Federal Preemption Issues. She said Section C examines the scope of federal preemption of state laws regulating PBMs under the federal Employee Retirement Income Security Act of 1974 (ERISA), Medicare Part D, and Medicaid, including the implications of recent court decisions and ongoing litigation, and implications for states considering enacting similar laws. She said the subsection on ERISA focuses mostly on the recent U.S. Supreme Court decision in *Rutledge* and how that decision provides some leeway for the states to regulate PBMs without being concerned about ERISA preemption, but states need to be careful in crafting such legislation because it is unclear how far the facts of *Rutledge* and the precedent of that case would extend to state laws that may not mirror the Arkansas law that was the subject of that case. Rehfield-Griffith said the Medicare Part D subsection discusses the *Mulready v. PCMA* case extensively and outlines the provisions in the Oklahoma law a federal district court found were preempted by ERISA. She said this subsection concludes that Medicare Part D preemption may remain an obstacle to state insurance regulation and that state insurance regulations are likely going to be preempted in areas where a standard has been directly articulated by the federal government, such as in the provisions related to Medicare Part D.

Rehfield-Griffith said the remaining subsection in Section C, which focuses on Medicaid, does not focus on any court cases because there is little case law or precedent in this area. She said the subsection describes how the Medicaid program is set up as a federal-state partnership, which differs in how both Medicare and ERISA are set up. Because of such a partnership, states have more leeway to regulate PBMs serving Medicaid carriers as long as those regulations do not conflict with the state's Medicaid structure and are consistent with the terms of a state's current Medicaid plan. She said this subsection concludes that unlike the potential for ERISA or Medicare Part D preemption, Medicaid preemption should not be a significant concern for states looking to regulate PBMs that service Medicaid managed care plans or other Medicaid health carriers. However, states should ensure that any changes in PBM regulation in the Medicaid space are consistent with the state's Medicaid plan or seek an appropriate plan amendment if they are not.

Stoddard discussed Section D, which examines PBM functional areas, including formulary design, rebates, pricing and contracting practices, vertical integration and consolidation, pharmacy network adequacy, and the licensing of the different entities involved in the prescription drug supply chain. He discussed the main points of each of these areas as written in the subsection. He explained that the pricing and contracting practices subsection does not include any language related to mandatory arbitration as had been contemplated in the white paper outline because no one in the section drafting group had any information on this. He said the section drafting group is open to including such language if anyone in the Subgroup has this information or could clarify what this means.

Abbott discussed Section E—State Laws that Operate in the Supply Chain. He said Section E discusses the role of PBMs in the prescription drug supply chain and state laws enacted regulating PBMs and PBM business practices because of this expanding and evolving role. He described the Section E drafting group's approach and research used in writing the section, including examining different state laws and recent updates to those laws. He noted that recently there has been a push on both the state and federal level to enact laws requiring PBMs to provide more transparency in their business practices, such as disclosure of prescription drug pricing, cost information related to rebates, payments and fees collected from pharmaceutical manufacturers, insurers, and pharmacies.

Jolie H. Matthews (NAIC) said she would be speaking on behalf of the leader of the Section F drafting group. She said Section F concerns federal interest in PBMs and PBM business practices. The section focuses on the Federal Trade Commission's (FTC's) recently announced study on PBMs. She said the Section F drafting group developed

the language for Section F using information found through targeted online searches for articles on the subject. The Section F drafting group summarized the information found in the articles to include in Section F.

Price discussed Section G—Key Jurisprudence. She said Section G focuses on the three cases, to date, that have shaped state PBM laws and regulations—the *Rutledge* case, the *PCMA v. Wehbi* case, and the *Mulready* case. She explained that to some extent, Section G repeats some of the same information provided in Section C. Price discussed the details, arguments, findings, and key takeaways for each of the cases as detailed in Section G.

Arp reminded the Subgroup members and other stakeholders that the PBM white paper draft is just a draft, not an official draft the Subgroup is exposing for public comment. She said the purpose of providing the draft for this meeting is to let Subgroup members and other stakeholders know that the Subgroup is working diligently to complete its charge and the status of this work now before exposing an official draft for public comment. Keen asked for comments.

Carl Schmid (HIV+Hepatitis Policy Institute) expressed support for the Subgroup’s work to date, particularly the work the Subgroup has been doing to hear from a wide range of stakeholders on issues related to the Subgroup’s work to develop the PBM white paper. He said the NAIC consumer representatives look forward to providing comments on the draft white paper once the Subgroup exposes it for public comment. Schmid noted that the current working draft includes little information on the impact—good or bad—of PBMs and their business practices, such as mail-order service requirements or high cost-sharing requirements on certain prescription drugs for consumers. He reiterated that the NAIC consumer representatives stand ready to assist the Subgroup with addressing these initial concerns. Kris Hathaway (AHIP) also expressed support for the Subgroup’s work to date related to the PBM white paper. She suggested, however, that the Subgroup expand the current working draft to incorporate and examine high prescription drug costs and issues related to such high costs. J.P. Wieske (Horizon Government Affairs) suggested that the Subgroup include a discussion in the white paper on the NAIC’s previous work related to PBMs, such as the work done in revising the *Health Carrier Prescription Drug Benefit Management Model Act (#22)*. Chris Petersen (Arbor Strategies LLC), speaking on behalf of the PCMA, said the PCMA shares some of the concerns of AHIP, particularly with the Subgroup potentially setting a 30-day public comment period for stakeholders to submit comments on the official PBM white paper draft. He suggested a longer public comment period, such as 60 days, would be more appropriate given the white paper’s complexity.

### 3. Discussed Next Steps

Keen reiterated that the Subgroup plans to make additional edits to the PBM white paper working draft. Following this work, the Subgroup will release an official draft for a public comment period. Keen said he anticipates this will happen in January 2023. Noting that it is her last NAIC meeting, he also thanked Arp for her work as the Subgroup’s vice chair.

Having no further business, the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/B CMTE/RFTF/PBM Regulatory Issues Subgrp/2023 Spring National Meeting/PBM Reg Issues MtgMin 12-15-22.docx

Draft: 11/9/22

Pharmacy Benefit Manager Regulatory Issues (B) Subgroup  
Virtual Meeting  
October 24, 2022

The Pharmacy Benefit Manager Regulatory Issues (B) Subgroup of the Regulatory Framework (B) Task Force met Oct. 24, 2022. The following Subgroup members participated: TK Keen, Chair (OR); Laura Arp, Vice Chair (NE); Sarah Bailey (AK); Anthony L. Williams (AL); Beth Barrington (AR); Jessica Ryan (CA); Michael Shanahan and Kathy Belfi (CT); Howard Liebers (DC); Robert Koppin (IA); Craig VanAalst (KS); Sharon P. Clark and Daniel McIlwain (KY); Crystal Lewis (LA); Chad Arnold and Joe Stoddard (MI); Andrew Kleinendorst (MN); Amy Hoyt (MO); David Dachs (MT); Ted Hamby and Robert Croom (NC); Ralph Boeckman and Erin Porter (NJ); Paige Duhamel and Renee Blechner (NM); Kelli Price (OK); Michael Humphreys and Ana Paulina Gomez (PA); Katrina Rodon (SC); Michael Driver and Rhonda Bowling-Black (TN); Shelley Wiseman (UT); Julie Blauvelt (VA); Jennifer Kreitler (WA); Nathan Houdek and Jennifer Stegall (WI); Joylynn Fix (WV); and Bryce Hamilton (WY).

1. Heard a Presentation from AHIP

Kris Hathaway (America's Health Insurance Plans—AHIP) and Sergio Santiviago (AHIP) discussed the role of health insurance providers in keeping prescription drugs affordable. She focused her remarks on prescription drug costs. She explained how prescription drug prices and spending have increased over the years, growing at a rate that AHIP believes is unsustainable. She said an AHIP study found that in 2020, seven of the top 10 largest pharmaceutical companies spent more on marketing than on developing new drugs. She highlighted a 2020 Institute for Clinical and Economic Review (ICER) report, which was updated in 2022, that identified the top 10 drugs causing the greatest increase in drug spending and reviewed them for clinical evidence to justify the increases. She discussed five drugs the ICER reviewed that found no clinical reason for the drug price increase. She said prescription drug costs have decreased overall, but even small net price increases have large impacts on prescription drug spending nationally. She also noted the high costs of new drugs entering the market. She said anecdotally, it seems that recently enacted state prescription drug price transparency laws seem to be having some impact on prescription drug price increases.

Santiviago discussed the value of pharmacy benefit managers (PBMs) to health insurance providers in helping to contain costs. He said health insurance providers use PBMs to help contain costs by: 1) utilizing contract models with administrative fee payment structures and spread pricing; 2) using medication and drug management programs, such as PBM pharmacy and therapeutics (P&T) committees; and 3) developing pharmacy networks that include mail order pharmacy options and specialty pharmacies. He discussed how some of these cost containment tools, such as spread pricing and rebating, work to reduce costs and can reduce premiums in some cases. He also discussed the role of P&T committees in the development of formulary designs to help enrollees obtain safe and effective medications at the best value.

Santiviago discussed how these cost-saving tools are under attack from certain programs, such as drug manufacturer copay coupons. He also discussed how drug manufacturer rebates are not driving higher prescription drug price increases and how rebates benefit all consumers.

The AHIP presentation also included recommendations to the Subgroup related to the development of the white paper on PBM business practices. Those recommendations included suggesting that any policies included in the white paper consider both the individual consumer perspective and the overall cost to all people in the risk pool and health care system. AHIP also recommends the inclusion of all stakeholders in the process and that the white paper provide all perspectives on issues equally because each drug issue has multiple perspectives.

## 2. Heard a Presentation from the BCBSA

Randi Chapman (Blue Cross Blue Shield Association—BCBSA) focused her remarks on the roles of the various entities in the prescription drug supply chain, the BCBSA's policy positions related to prescription drug pricing and prescription drug financial assistance programs, and Blues plan initiatives to provide pharmacy benefits and member access to prescription drugs and affordable medications.

Chapman said the BCBSA agrees with state insurance regulators and many of the stakeholders who have presented to the Subgroup on the need to curb the high cost of prescription drugs. The BCBSA knows that each entity in the prescription drug supply chain, including payers, pharmacies, PBMs, and pharmacy services administrative organizations (PSAOs), play a role and share the responsibility of ensuring that consumers have access to the most effective and affordable medication. Chapman said given this, the BCBSA supports the Subgroup's direction to expand the white paper's scope to include an analysis and assessment of the roles of each supply chain player.

Chapman said the BCBSA supports state departments of insurance (DOIs) having oversight of PBMs rather than state boards of pharmacy or other provider-type state boards. She said the BCBSA also supports state prescription drug transparency laws, and it hopes the white paper includes a robust discussion of such transparency measures.

Chapman said because AHIP has already provided a thorough explanation of prescription drug costs, she would not discuss that issue in any detail. However, she noted that prescription drug manufacturers set the price of prescription drugs and administer patient assistance programs. She said in 2021, prescription drug manufacturers raised prices on 822 brand name drugs by an average of 4.6%. She said a Kaiser Family Foundation (KFF) analysis completed earlier this year showed that between July 2019 and July 2020, half of all Medicare Part D covered drugs and nearly half of the Medicare Part B covered drugs had price increases greater than inflation. She said another study found that 60% of adults between the ages of 18 and 64 recorded being prescribed at least one medication in the previous year, but 29% of them said they were not taking prescribed medication due to cost. She said stories like this one, and many others, show how the consistent rise in prescription drugs has a real and tangible impact on enrollees.

Chapman said because of this, the BCBSA supports improved prescription drug manufacturer price transparency, particularly in patient assistance programs offered by prescription drug manufacturers. She said in addition, the Blues plans and the BCBSA actively support transparency in their practices and are fully compliant with state and federal reporting requirements for claims and discounts. She said as AHIP alluded to, patient assistance programs help individual patients, but in effect, these programs hide the real costs of the drug and can prevent the utilization of generic drugs and spread costs across the system, which ultimately leads to higher premiums and higher costs overall.

Chapman said the Blues plans are looking at and initiating innovative solutions to support community-based approaches to ensure access to affordable medications. She provided examples of these approaches, such as prescription drug transparency with real-time cost information to providers and patients and outcomes-based agreements. She said overall, these approaches are trying to support their members' ability to make educated and informed choices with their providers about the prescription drugs they use and promote the affordability of those medications. She said the BCBSA believes prescription drug price transparency and quality information empowers consumers and ultimately drives larger changes in the prescription drug marketplace.

Chapman discussed the role PBMs play in the prescription drug supply chain, including the tools PBMs use to encourage patients, working with their physicians to select the safest and most effective drugs at the lowest possible price. She also discussed the BCBSA's position related to pharmacies and PSAOs. She said the BCBSA

believes specific types of pharmacy providers should not have financial advantages through mandated contract terms between pharmacies and PBMs or mandated coverage of drugs at acquisition cost. She also said the BCBSA believes further study is necessary to understand how PSAOs affect the prescription drug supply chain and what state actions are needed to lower prescription drug costs, and it urges the Subgroup to do this research when developing the white paper.

Allan Coukell (Civica) discussed how Civica is working with the BCBSA and several Blues plans to bring lower-priced generics to market. He said Civica entered into a partnership in 2020 with the BCBSA to create a new, nonprofit subsidiary, named CivicaScript, dedicated to lowering the cost of select, outpatient generic drugs. He said CivicaScript will develop and manufacture six to 10 common, but high-priced general prescription drug medicines, for which there is not enough market competition to drive down prices. He said Civica has about 10 prescription drug products in development; two of those drugs are expected to be marketed later this year.

Coukell focused his remarks on Civica's work related to generic insulin in both pen and vial form. He said in March 2022, the BCBSA and 12 Blue Cross Blue Shield (BCBS) companies announced a partnership with Civica to increase access to affordable insulin. He said Civica will produce three insulins and biologics corresponding to and interchangeable with brand name insulin. He said the cost of these generics to consumers will be no more than \$30 per vial or \$55 for a box of five pens starting in 2024.

Keen asked if the BCBSA owns Civica. Coukell said Civica is a standalone nonprofit organization. There are no equity owners. Coukell said CivicaScript is also a nonprofit organization, which was capitalized by health plans and other founding members. He said these founding members sit on the board, which also includes a PBM representative, but it is really a mission-driven organization. Keen asked about any hurdles to setting up such nonprofit organizations. Coukell said one major hurdle is obtaining tax-exempt status from the Internal Revenue Service (IRS) as a nonprofit prescription drug manufacturer due to the so-called "commerciality doctrine."

Acting Commissioner Humphreys said the Pennsylvania Capital Blue Cross announced plans to collaborate with the Mark Cuban Cost Plus Drug Company to help bring high-quality, low-cost prescriptions to its members. He asked Chapman if the BCBSA knows of any other companies contemplating such action. She said she would have to reach out to her colleagues to provide an answer, but she said she would be happy to follow up with him later. Santiviago said he believes initiatives and collaborations like Civica and the Mark Cuban Cost Plus Drug Company are a good thing because they bring more competition and supply, which can ultimately drive down prescription drug costs.

#### 4. Heard a Presentation from the PCMA

Casey Mulligan (University of Chicago), presenting on behalf of the Pharmaceutical Care Management Association (PCMA), discussed key findings from his research related to the value of PBMs. He said a managed plan is more valuable than an unmanaged plan. A managed plan provides plan member benefits and net external benefits. He said his research shows that an estimated \$145 billion per year in net value is added by PBM prescription drug plan management. He explained how he arrived at this figure, including how part of this net value is achieved by better drug utilization and inducing providers, such as prescription drug manufacturers and pharmacies, to compete more vigorously. He also explained how prescription drug benefit management reduces drug prices while rewarding drug innovation.

Having no further business, the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup adjourned.

**SENIOR ISSUES (B) TASK FORCE**

Senior Issues (B) Task Force March 22, 2023, Minutes ..... 6-71

Draft: 3/23/23

Senior Issues (B) Task Force  
Louisville, Kentucky  
March 22, 2023

The Senior Issues (B) Task Force met in Louisville, KY, March 22, 2023. The following Task Force members participated: Marlene Caride, Chair (NJ); Larry D. Deiter, Vice Chair (SD); Lori K. Wing-Heier represented by Sarah Bailey (AK); Mark Fowler represented by Willard Smith (AL); Barbara D. Richardson represented by Erin Klug (AZ); Ricardo Lara represented by Tyler McKinney (CA); Andrew N. Mais represented by Paul Lombardo (CT); Trinidad Navarro represented by Frank Pyle (DE); Michael Yaworsky represented by Bryan Peters (FL); Doug Ommen represented by Andria Seip (IA); Dean L. Cameron represented by Shannon Hohl (ID); Vicki Schmidt represented by LeAnn Crow (KS); Sharon P. Clark represented by Angi Raley (KY); James J. Donelon represented by Ron Henderson (LA); Gary D. Anderson represented by Kevin Beagan (MA); Kathleen A. Birrane represented by Joy Hatchette (MD); Timothy N. Schott represented by Marti Hooper (ME); Anita G. Fox represented by Renee Campbell (MI); Grace Arnold represented by T.J. Patton (MN); Chlora Lindley-Myers represented by Carrie Couch (MO); Mike Chaney (MS); Troy Downing represented by Mark Mattioli (MT); Mike Causey represented by Ted Hamby (NC); Jon Godfread represented by Santana Edison (ND); Eric Dunning represented by Maggie Reinert (NE); Scott Kipper (NV); Judith L. French represented by Laura Miller (OH); Glen Mulready represented by Andrew Schallhorn (OK); Michael Humphreys (PA); Jon Pike represented by Tanji J. Northrup and Tomasz Serbinowski (UT); Scott A. White represented by Julie Blauvelt (VA); Kevin Gaffney represented by Anna Van Fleet (VT); Mike Kreidler represented by Todd Dixon (WA); Nathan Houdek represented by Jennifer Stegall (WI); and Allan L. McVey represented by Erin K. Hunter (WV).

1. Adopted its 2022 Fall National Meeting Minutes

Lombardo made a motion, seconded by Dixon, to adopt the Task Force’s Dec. 13, 2022, minutes (see *NAIC Proceedings – Fall 2022, Senior Issues (B) Task Force*). The motion passed unanimously.

2. Discussed the Task Force’s Plans for 2023

Commissioner Caride asked members if they had any comments regarding the materials on the possible issues and topics the Task Force may want to consider in 2023. None were heard. Commissioner Caride asked if any interested state insurance regulators or interested parties had any comments.

Bonnie Burns (California Health Advocates—CHA) said she had two issues of importance. She said the first is an issue she has raised for many years, which is the conflict between Medicare and the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA) rules that has led to some confusion about which system and set of rules govern eligibility for coverage, as well as how the responsibility for the payment of health care benefits for eligible individuals is determined.

Burns encouraged the Task Force to reconsider editing the *Coordination of Benefits Model Regulation* (#120). She said the exception pertaining to people who are eligible or who could be eligible for Medicare benefits is unfairly discriminatory and makes no sense. She said no one has been able to tell her where this language came from or why it was put into the model.

Burns cited a U.S. Supreme Court case, *Geissal v. Moore Medical Corp.*, 524 U.S. 74 (1998), as where this COBRA and Medicare issue may have begun. She said the Supreme Court held that an employer may not deny continuation coverage under COBRA to a qualified beneficiary who is covered under another group health plan at the time he makes his COBRA election.

Burns said the NAIC should delete the exception for Medicare Part B in Model #120, as there is no rationale for this exception in the NAIC historical record, and it unfairly penalizes and discriminates against Medicare beneficiaries. She said the action specified in the exception, “is or could have been covered” produces a result that is expressly prohibited in the same subsection for any other form of health benefits. She recommended changes to parts of Section 5D of Model #120.

Burns said the second issue is the disbanding of the Long-Term Care Insurance Model Update (B) Subgroup. She said it was disappointing that the Subgroup was disbanded, as there are products in the current marketplace that models do not address. She said the majority of products in the marketplace are now life and annuity plans with long-term care (LTC) components attached. She said these products are complicated and confusing to consumers, and agents and state insurance regulators do not know the pricing of these plans or how these benefits are being used. She said there have to be better disclosures and information about these products.

Burns also suggested that the NAIC needs to have better relationships with State Health Insurance Assistance Program (SHIP) and Senior Medicare Patrol (SMP) offices. She said the SMP was created to empower and assist Medicare beneficiaries, their families, and caregivers in preventing, detecting, and reporting health care fraud, errors, and abuse through outreach, counseling, and education. She said it would be good for state insurance regulators to get to know their SHIPs and SMPs and develop an ongoing relationship.

Commissioner Caride asked if there were any other comments. Serbinowski said the *Long-Term Care Insurance Model Act* (#640) and the *Long-Term Care Insurance Model Regulation* (#641) either need to be opened and edited or a new model needs to be created to address these combo products. He said many filings are likely in violation of laws and regulations, but nothing is being done. He said he has seen filings of life products with attained age ratings and an LTC rider attached, and these products are filed as life, but the LTC models make it clear that an attained age rating is not permissible. He also raised concerns about conversions, suitability, and the fact that the LTC models have zero language about annuities. He said these new products will come to a head within a decade in terms of payouts, and now is the time to address them; thus, this warrants the opening of the LTC models or the creation of a new model.

Commissioner Caride asked for further comments, and none were heard. She asked if anyone had any other issues or matters they wished to discuss or were seeing in their states. None were heard.

Having no further business, the Senior Issues (B) Task Force adjourned.

[SITF 2023 Spring National Minutes](#)

**PROPERTY AND CASUALTY INSURANCE (C) COMMITTEE**

Property and Casualty Insurance (C) Committee March 24, 2023, Minutes..... 7-2  
    Catastrophe Insurance (C) Working Group and NAIC/Federal Emergency Management Agency  
    (FEMA) (C) Advisory Group March 21, 2023, Minutes (Attachment One)..... 7-8  
    Transparency and Readability of Consumer Information (C) Working Group March 15, 2023, Minutes  
    (Attachment Two) ..... 7-16  
    Amended *Nonadmitted Insurance Model Act* (#870) (Attachment Three) ..... 7-17

Draft: 4/3/23

Property and Casualty Insurance (C) Committee  
Louisville, Kentucky  
March 24, 2023

The Property and Casualty Insurance (C) Committee met in Louisville, KY, March 24, 2023. The following Committee members participated: Alan McClain, Chair, (AR); Grace Arnold, Co-Vice Chair (MN); Larry D. Deiter, Co-Vice Chair (SD); Mark Fowler (AL); Ricardo Lara represented by Ken Allen (CA); Andrew N. Mais and George Bradner (CT); Gordon I. Ito (HI); Amy L. Beard (IN); James J. Donelon (LA); Chris Nicolopoulos represented by Christian Citarella and Emily Doherty (NH); Jennifer Catechis (NM); Glen Mulready (OK); Kevin Gaffney (VT); and Allan L. McVey (WV). Also participating were: Michael Yaworsky (FL); and Jo LeDuc (MO).

1. Adopted its 2022 Fall National Meeting Minutes

Commissioner Fowler made a motion, seconded by Commissioner Arnold, to adopt the Committee's Dec. 15, 2022, minutes (*see NAIC Proceedings – Fall 2022, Property and Casualty Insurance (C) Committee*). The motion passed unanimously.

2. Adopted the Reports of its Task Forces and Working Groups

Commissioner McClain said the Cannabis Insurance (C) Working Group and the Terrorism Insurance Implementation (C) Working Group have not met this year but will do so soon. He said the Transparency and Readability of Consumer Information (C) Working Group met earlier in regulator-to-regulator session while the other Task Forces and Working Groups met prior to or at the Spring National Meeting.

Citrella said the Casualty Actuarial and Statistical (C) Task Force has been working on making the first-ever updates to the NAIC's loss cost multiplier filing forms. The Task Force has learned much since loss costs first replaced the use of rates filed by advisory organizations. The Task Force has adapted the forms to fit current rate-making methods, combined the separate forms for property/casualty (P/C) and workers' compensation into one form, and eliminated the separate expense constant supplement. Depending on the state, it may need to change regulation or legislation. For states that do not use the NAIC forms, it is still recommended they evaluate the new forms to determine if improvements can be made.

Commissioner Fowler made a motion, seconded by Commissioner McVey, to adopt the following task force and working group reports: Casualty Actuarial and Statistical (C) Task Force; Surplus Lines (C) Task Force; Title Insurance (C) Task Force; Workers' Compensation (C) Task Force; Cannabis Insurance (C) Working Group; Catastrophe Insurance (C) Working Group (Attachment One); Terrorism Insurance Implementation (C) Working Group; and Transparency and Readability of Consumer Information (C) Working Group (Attachment Two). The motion passed unanimously.

3. Adopted the Revised Model #870

Commissioner Donelon said the Surplus Lines (C) Task Force was charged with updating the *Nonadmitted Insurance Model Act (#870)* to conform to the federal Nonadmitted and Reinsurance Reform Act (NRRRA), which was part of the federal Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) of 2010. During the 2021 Summer National Meeting, the Surplus Lines (C) Task Force formally developed the Model #870 Drafting Group, which consisted of Colorado, Illinois, Louisiana, Texas, and Washington. The Drafting Group began its work on Model #870 on Aug. 19, 2021, and met 10 times over the next 19 months. The Task Force exposed a draft model three times and discussed comments on each draft. Some of the more significant

amendments dealt with the integration of the “home state” method of tax allocation and the new domestic surplus lines insurer status.

Commissioner Donelon said the Task Force adopted the amended Model #870 during its March 21, 2023, meeting.

Commissioner Donelon made a motion, seconded by Interim Superintendent Catechis, to adopt the amended Model #870 (*see NAIC Proceedings – Spring 2023, Surplus Lines (C) Task Force, Attachment One*). The motion passed unanimously.

#### 4. Heard Presentations from NIA and NAMIC on Insurance Availability and Affordability for Nonprofit Organizations

Commissioner McClain noted that the Committee has a charge related to studying the availability and affordability of liability and property insurance coverage for nonprofit organizations.

Chris Reed (Nonprofits Insurance Alliance—NIA) said NIA has a goal of making sure nonprofits have access to stable insurance coverages. He said the Nonprofit Property Protection Act (NPPA) will allow nonprofits a market-based solution for a market failure at no cost to taxpayers. He said the NPPA contains the narrowest possible language they could find to address the issue. He said NIA continuously hears from nonprofits that they were nonrenewed by admitted carriers over the past three years. He said most had no claims history that would justify nonrenewal.

Reed said the federal Liability Risk Retention Act (LRRA) only allows risk retention groups (RRGs) to offer liability insurance, and it does not allow them to offer the property and auto physical damage coverages. He said NIA receives regular appeals from nonprofits and their brokers in the 18 states they do not serve. He said thousands of nonprofits purchase specialized liability insurance, including tailored risk management services, from RRGs that the nonprofits own and govern. These nonprofits are unable to purchase property coverage on a monoline basis on a Business Owners Policy form and monoline auto physical damage (APD) they need from commercial insurance carriers. Nonprofits’ need for these coverages emerged after commercial insurance companies stopped offering nonprofits the package policies they needed (with the property and liability coverages all bundled together), and nonprofits created their own RRGs.

Reed said only a single carrier ever filed to offer the half business owners policy (BOP) and monoline APD, and only in 32 states and Washington, DC. He said it plans to stop offering that coverage, not because it has a poor claims record, but because it is changing its strategic direction. This would leave tens of thousands of nonprofits that rely on an RRG without the monoline APD and property coverage they need.

Reed said large brokers with access to all admitted markets place coverage for their nonprofit clients with RRGs because there are not admitted sources of the coverage their nonprofit clients need. An effort to remedy this problem has been repeatedly introduced by both parties in Congress as bills and discussion drafts. The latest discussion draft from the 117th Congress was circulated by U.S. Sen. Sherrod Brown (D-OH), chair of the U.S. Senate Committee on Banking, Housing, and Urban Affairs, after his office had reviewed objections that the NAIC raised.

Reed said RRGs are regulated for solvency much like multistate admitted carriers. He said, in 2014, the NAIC imposed significant additional governance standards on RRGs assuring that regulators must apply the same risk-based capital (RBC) standards on RRGs as on commercial carriers. He said state insurance regulators in all states have the same access to solvency information for both RRGs and traditionally regulated insurers. If nondomicile regulators have concerns, they may alert the domicile regulator, much like lead-state regulation. If a domicile

regulator refuses to conduct an examination of an RRG if requested, the nondomicile regulator has the authority to conduct its own examination of that RRG.

He said the total premium of RRGs that have failed after having 10 or more years' experience (the seasoning required by the NPPA) is less than \$200 million nationwide in 40 years. Under the NAIC accreditation program, RRGs, like admitted carriers, must comply with the usual quarterly and annual filing requirements imposed on P/C insurance companies, including financial statements, RBC calculations, audited statements, and actuarial opinions.

He said the NPPA includes the following additional provisions, which would apply to RRGs that would be able to offer property insurance, as well as the liability insurance they already offer: 1) property can only be provided by an RRG to a 501(c)(3) nonprofit; 2) RRGs must have a minimum of \$20 million in surplus; 3) RRGs must have operated as a liability-only RRG for at least 10 years before offering property; 4) RRGs may only offer total insurable value (TIV) limits up to \$50 million to any member; and 5) RRGs may not begin writing property in a state where a regulator has posted the names of three admitted companies writing the monoline property half BOP and auto physical damage.

Reed said an RRG cannot easily become an admitted carrier because in the mid-1990s, Congress created a special tax law to allow 501(c)(3) nonprofit charitable insurers to have the same tax status and same transparency of the nonprofits they insure. He said RRGs have the same cost of capital as admitted carriers, and RRGs pay at least the same or higher premium tax. He said the surplus lines market is not a solution because the nonprofits being nonrenewed or denied coverage outright are not unusual or high risk. They do not have claims histories or risk profiles that would justify relegating them to surplus lines.

Reed said the NPPA lets the states decide if RRGs offering property should be part of the guarantee fund. He said a study of the problem would not produce useful information because there is nobody that can provide such data. He said nonprofits have shown that they can insure the far more challenging liability risks successfully through their own RRGs. Commercial carriers have abandoned nonprofits, nonrenewing thousands of them.

Acting Commissioner Humphreys said the data call Pennsylvania conducted was largely inconclusive. He said the major issues are the rate of the liability coverage going up fairly significantly and the availability of property coverage. He said whether property coverage is available is less conclusive, and a deeper look at the market would be valuable. Acting Commissioner Humphreys said Pennsylvania also reached out to nonprofits, and some of them did not have an issue with or have a need for property coverage. He noted some states make stand-alone property coverage available through an insurer of last resort. He also said foreign RRGs do not always respond to regulator requests for information.

Reed said small nonprofits cannot find the auto physical damage coverage they need. He said NIA has hired Guy Carpenter to look at whether auto physical damage is available to pair with the liability coverage through the RRG. He said state Fair Access to Insurance Requirements (FAIR) plans are not an economical solution for nonprofits.

Commissioner McVey asked whether the RRG had issues with a fronting carrier writing auto physical damage and whether they have tried to market the coverage on the basis of a national program. Reed said most of the nonprofits they work with have small amounts of property and, therefore, a small premium. He said NIA is working through brokers, and they have not found the auto physical damage coverage.

Commissioner Donelon asked whether the nonprofits are associations or those doing charitable work. Reed said the nonprofits they work with are mostly those that represent vulnerable classes of people. He said those types of organizations have the toughest time getting coverage.

Andrew Pauley (National Association of Mutual Insurance Companies—NAMIC) said RRGs have played a role in providing insurance coverage since their inception. He said a tiny fraction of RRGs is seeking to expand its authority into property coverage by asserting there is a crisis in the market. He said NAMIC does not agree that there is a market crisis and an expansion of the LRRRA would be unnecessary and inappropriate, and it would place consumers at risk. He said NAMIC opposes the NPPA and has testified against it before Congress. He said the expansion would circumvent longstanding state insurance regulations and would create an unlevel regulatory playing field. He said the RRG regulatory regime is less rigorous and would put nonprofits at risk. Pauley said states have created more tailored and effective risk transfer mechanisms and alternative solutions.

Pauley said the LRRRA was passed in 1986 in response to a severe disruption in the commercial liability insurance market driven by litigation and oversized verdicts. He said there are nearly 2 million nonprofits in the U.S., and regulators are not seeing a demonstrable number of complaints in the marketplace. He said the NAIC has testified that there is not a crisis in the commercial property insurance market. He said NIA has said nonprofits may be at risk of losing coverage or struggle without adequate coverage, but this does not connote a lack of ability to get coverage.

Pauley said RRGs are not regulated in the same fashion as admitted carriers. RRGs write a majority of their coverage in non-domiciliary states. RRGs are not members of state guaranty funds and do not pay an assessment for any insurer failure. Pauley noted there are inherent advantages to being an RRG. He noted that outside of their domiciliary state, RRGs are not subject to financial examinations unless the domiciliary state has refused to examine the RRG. The question should not be whether the regulatory scheme is sufficient but whether it meets the rigorous standards of state-based regulation for admitted carriers.

Pauley said traditional admitted carriers do offer small and medium-sized nonprofits coverage in the form of BOPs with commercial liability and property coverage. He said manuscript policies are also available. Bundled products are indicative of good risk management and are good for the policyholder. Pauley said simply because there would be a preference for RRGs to underwrite these additional risks does not create a crisis. He said NAMIC members must make operational tradeoffs daily to compete in a highly competitive market within existing regulatory guardrails. He said RRGs can become admitted carriers.

Acting Commissioner Humphreys asked if Pauley could provide the Committee with a list of 10 companies that will write stand-alone businessowners coverage and stand-alone auto physical damage coverage. Pauley said the question allows RRGs to frame the playing field because RRGs would prefer to write the property and liability at the same time, but the admitted market is able to do that. Acting Commissioner Humphreys said he would like to see a list of insurers that write stand-alone coverage for small and medium-sized companies. Pauley said products can be found but are often bundled. Acting Commissioner Humphreys said nonprofits can currently buy the liability coverage due to the LRRRA, so the Committee might wish to look further into the issue to see what is available in the market.

##### 5. Heard from States and the NAIC About Data Sources and Uses

Commissioner McClain said the Committee has a charge to assist state insurance regulators in better assessing their markets by developing property market data intelligence. He said the previous issue looking at the availability of coverage for nonprofits exemplifies the fact that often regulators do not have readily available market data. He also noted that North Dakota recently undertook a pilot where it used blockchain technology to measure the uninsured motorist population.

Commissioner Yaworsky said Florida has a number of data collection techniques and tools it uses to be responsive to market challenges. He said a 2021 statute allows for a property claims reporting tool that collects annual data on all claims that have been closed in the prior calendar year, including the entire life cycle of the claim. He said it

includes the number and type of the policy, the ZIP code of the policy and property, names of vendors used, and dates of claims reported and closed with or without payment. He said this allows Florida to inform policymakers and consumers about trends within the market. The data allows for the identification of trends that may need to be addressed through regulatory action or legislation. He said the first set of data was due on March 1 and that aggregated reports will be released soon.

Commissioner Yaworsky said the annual reinsurance data call allows the Department of Insurance (DOI) to evaluate the adequacy of reinsurance. He said reinsurance data is paired with the capacity stress test to model catastrophe scenarios.

Commissioner Yaworsky said two catastrophe reporting forms are used to track claims-handling experience following hurricanes. The first is more basic and is immediately implemented after a storm. The second, more enhanced survey, measures how quickly claims are closed, whether they are closed without payment, and reasons for nonpayment.

LeDuc said Missouri receives data through text files or through an online submission portal. She said Missouri has a statistical unit dedicated to the data process. She said the state publishes a number of public statistical reports on various lines of business.

LeDuc said an Annual Statement, Page 19 Supplement is based on the State Page but collects at a much more granular level. The private passenger auto (PPA) data is divided between comprehensive and collision.

LeDuc said Missouri has also collected ZIP code data since 1987 for homeowners and auto and other lines since the 1990s. The data call is collected via a statutory requirement, and the data includes premium, exposure, and loss data at a ZIP code level. The data is also broken out by policy type and type of loss and is broken out by insured value ranges.

LeDuc said Missouri creates maps by ZIP code level showing the cost of auto insurance compared to uninsured motorists. Missouri has also created maps showing the number of auto insurance agents per capita to indicate availability. LeDuc said the state publishes reports showing trends related to the type of losses. She also noted Missouri is able to measure average premiums and take-up rates related to earthquake insurance in order to determine why certain counties may be underinsured.

Aaron Brandenburg (NAIC) said the NAIC has assisted states with a number of data calls in recent years. He said states collected ZIP code-level auto insurance data from statistical agents in 2019. This was only aggregated data. He said it allowed a comparison of premiums and losses to demographic data in each ZIP code, and a public report was published in 2020.

Brandenburg said in response to the COVID-19 pandemic, nearly all states issued a data call related to business interruption insurance in 2020. The data was collected through the NAIC's Regulatory Data Collection (RDC) system. The data call collected premium data by size of the policyholder, and it collected claims information on an ongoing basis from insurers. The NAIC aggregated the data and issued reports on its website, which has been helpful in understanding the size of this market and what business interruption claims looked like throughout the pandemic.

The NAIC issued an all-state data call in 2020 to collect 2018 and 2019 private flood insurance data. The data split coverages between commercial and residential, and it collected the number of policies and claims. It was transitioned to the annual statement in 2021. The data is presented through a tool on the NAIC's website so states can better understand the growth of the private flood market. Individual insurer data is reported as well.

Brandenburg said terrorism risk insurance data began being collected by states in 2016 and became a joint data call with the U.S. Department of the Treasury (Treasury Department) in 2018. It requires data to be reported by all insurers subject to the Terrorism Risk Insurance Program (TRIP). Insurers send the data to the state of New York, and the NAIC aggregates data and provides reports on the data through the Terrorism Insurance Implementation (C) Working Group at an aggregated level.

Brandenburg said states also issue post-disaster data calls on an as-needed basis. The NAIC assists many states with these data calls and is able to assist in getting the data call notice and instructions out quickly after a catastrophe. Claims data is collected on a ZIP code level, and the NAIC aggregates the data and provides analytic tools with mapping to states.

Having no further business, the Property and Casualty Insurance (C) Committee adjourned.

Draft: 3/29/23

Catastrophe Insurance (C) Working Group  
and the NAIC/Federal Emergency Management Agency (FEMA) (C) Advisory Group  
Louisville, Kentucky  
March 21, 2023

The Catastrophe Insurance (C) Working Group of the Property and Casualty Insurance (C) Working Group met in Louisville, KY, March 21, 2023, in joint session with the NAIC/FEMA (C) Advisory Group of the Catastrophe Insurance (C) Working Group of the Property and Casualty Insurance (C) Committee. The following Working Group members participated: Chlora Lindley-Myers, Chair, represented by Cynthia Amann, Christina Dooley, Teresa Kroll, and Jo LeDuc (MO); Mike Causey, Vice Chair (NC); Kayla Erickson, Sian Ng-Ashcraft, and Shauna Nickel (AK); Brian Powell and Erick Wright (AL); Alan McClain (AR); Ken Allen, Lucy Jabourian, Michelle Lo, Opie Oyewole, Kathryn Taras, and Lynne Wehmuller (CA); George Bradner and Philip Barrett (CT); Dan Applegarth (FL); Zachary Fuentes, Lance Hirano, and Gordon I. Ito (HI); Travis Grassel (IA); Chris Hollenbeck, Jessica Lillibridge, and Levi Nwasoria (KS); James J. Donelon (LA); Jackie Horigan (MA); Joy Hatchette (MD); Andy Case (MS); Jesse Kolodin (NJ); Margaret Pena and Melissa Robertson (NM); Caleb Gruenbaum, Laura Miller, Maureen Motter, and Karen Vourvopoulos (OH); Glen Mulready (OK); Michael Drummonds and Carolyn Kalb (OR); David Buono (PA); Glorimar Santiago (PR); Beth Vollucci (RI); Lindsay Chaffin and Dominic Rovelli (SC); Tony Dorschner (SD); Carter Lawrence (TN); Marianne Baker, J'ne Byckovski, Nicole Elliott, Eric Hintikka, Taryn Lam, Shawn Martin, Elisabeth Ret, and Matthew Richard (TX); and David Forte and Matt Stoutenberg (WA). The following Advisory Group members participated: Glen Mulready, Chair (OK); Carter Lawrence, Vice Chair (TN); Kayla Erickson, Sian Ng-Ashcraft, and Shauna Nickel (AK); Brian Powell and Erick Wright (AL); Ken Allen, Lucy Jabourian, Michelle Lo, Opie Oyewole, Kathryn Taras, and Lynne Wehmuller (CA); George Bradner and Philip Barrett (CT); Dan Applegarth (FL); Patrick O'Connor (IN); Chris Hollenbeck, Jessica Lillibridge, and Levi Nwasoria (KS); James J. Donelon (LA); Joy Hatchette (MD); Cynthia Amann, Christina Dooley, Teresa Kroll, and Jo LeDuc (MO); Margaret Pena and Melissa Robertson (NM); Michael Drummonds and Carolyn Kalb (OR); Dan Bumpus, William Christian, Rebecca Nichols, Marly Santoro, and Garth Shipman (VA); and David Forte and Matt Stoutenberg (WA). Also participating were: Linda Grant (IN); Paige Dickerson (MI); Phil Vigliaturo (MN); Fred Fuller and Timothy Johnson (NC); Kelly Christensen and Tracy Klausmeier (UT); Vanessa Richards (VI); Michael Erdman and Christina Keeley (WI); and Tracy McEwen and Lela Ladd (WY).

1. Adopted its 2022 Fall National Meeting Minutes

Bradner made a motion, seconded by Buono, to adopt the Working Group's Dec. 12, 2022, minutes (*see NAIC Proceedings – Fall 2022, Property and Casualty Insurance (C) Committee, Attachment Two*). The motion passed unanimously.

2. Heard an Update on Federal Legislation

Shana Oppenheim (NAIC) provided an update on federal legislation. The National Flood Insurance Program's (NFIP's) latest extension expires Sept. 30. FEMA recently released data showing a 36% decline in the number of reinsurers participating in the NFIP's reinsurance program as compared to the prior year. According to FEMA, the NFIP's traditional reinsurance placement is indicative of a hard market condition in the catastrophe space and the challenges of securing coverage. Such a decline could also suggest that some notable insurers decided not to write NFIP policies this year or were reluctant to offer these policies at the necessary pricing level.

On March 10, the U.S. House of Representatives (House) Financial Services Subcommittee on Housing and Insurance, led by Chairman Warren Davidson (R-OH), held a hearing entitled, "How Do We Encourage Greater Flood Insurance Coverage in America?"

Republicans were focused on encouraging the private flood insurance market uptake, especially in regions outside of the flood maps, where they believe 20% of floods are occurring. They also expressed interest in examining federal regulatory barriers to private flood insurance. The Democrats wanted a bipartisan, long-term NFIP reauthorization. Notably, the NFIP has had 25 short-term reauthorizations since 2017. Democrats also focused on flood as not just a financial or insurance industry issue, but as an equity, diversity, and inclusion industry issue, as well as encouraging private flood insurance.

U.S. Sen. John Kennedy (R-LA) and U.S. Rep. Blaine Luetkemeyer (R-MO) have introduced bills tackling Risk Rating 2.0 flood insurance affordability and reauthorization.

### 3. Received an Update on the Primer Progress

Amann provided an update on the *Catastrophe Modeling Primer* (Primer). The Primer will replace the NAIC's *Catastrophe Computer Modeling Handbook*. The drafting group has met several times and continues to make progress. Sections that are currently drafted include: 1) Purpose of the Primer; 2) Background Information on Catastrophe Modeling; 3) What is a Catastrophe Model?; 4) Why Use a Catastrophe Model?; 5) Model Components; 6) Key Metrics; and 7) Regulator's Perspectives.

Amann said the Primer is meant to be a regulatory tool to help state insurance regulators understand catastrophe modeling.

The drafting group will meet following the Spring National Meeting to continue its drafting work.

### 4. Heard Updates Regarding the Activities of State and FEMA Regional Workshops

Commissioner Mulready provided updates on the activities of the state and regional FEMA workshops. FEMA Region 1 will meet in Maynard, MA, on the afternoon of May 22 and all day on May 23. Virtual participation will be available for anyone in FEMA Regions 2 or 3 who would like to see how these meetings are conducted, as well as the topics covered. These regions will hold in-person workshops later.

The purpose of these NAIC/FEMA workshops is to help departments of insurance (DOIs) form relationships with their FEMA partners. Oklahoma hosted a workshop for FEMA Region 6 last year and found it to be helpful.

### 5. Heard a Presentation from the Midland Radio Corporation on the NWR

Bruce Jones (Midland Radio Corporation) said the National Oceanic and Atmospheric Administration (NOAA) Weather Radio (NWR) is essentially an indoor tornado siren. The National Weather Service (NWS) started a Weather-Ready Nation Ambassador program. Currently, there are 16,000 Weather-Ready Nation (WRN) Ambassadors. These WRN Ambassadors include businesses, churches, and other groups. The WRN Ambassadors are required to have a plan in place for their organization and staff, including identifying safe places in case of a weather-related event. WRN Ambassadors also teach their staff the principles of weather safety.

Jones said to become a WRN Ambassador, a business or other group can contact their local NWS office and volunteer to become a WRN Ambassador to promote weather safety, preparedness, and resiliency. Every state has a weather awareness week. State insurance regulators could send out a message during the designated week that illustrates weather preparedness.

Jones said one of the main messages from the NWS is that everyone needs to have multiple and redundant ways to receive lifesaving alerts. The NWS is the best in the world at alerting people to severe weather. The six ways

you can receive a warning include: 1) the NWR; 2) local television and radio; 3) wireless emergency alerts and weather apps; 4) outdoor sirens; 5) the *mobile.weather.gov* website; and 6) from your friends, family, and neighbors.

Outdoor warning sirens were created in the 1950s and 1960s, and they could be heard when people had their windows open in the spring and summer. Warning sirens are not meant to be heard inside and wake people up. Hearing a tornado siren is a signal to get indoors and seek additional information. When warning sirens stop, it does not mean the severe weather threat is over. Additionally, the outdoor warning sirens are activated by city or county officials and not the NWS.

If a cell phone tower is destroyed your cell phone will not be able to provide an alert to you. The NWR network is made up of over 1,000 transmitters that send a signal to 95% of the U.S. population. The weather radio is the quickest and most direct way to receive alerts, as the alert goes to the NWR first. The order of alerts are as follows: 1) the NWR; 2) the emergency alert system, which includes television and radio stations; 3) cell phone or wireless emergency alerts; and 4) emergency managers who then send out reverse 911 phone calls or set off their outdoor sirens. The average tornado warning lead time for the NWS is 13 minutes if it receives the warning.

FEMA's Hazard Mitigation Grant Program (HMGP) normally covers up to 75% of the cost of weather radios; however, this year, the HMGP covers 90%. The money is given to states in the aftermath of any presidentially declared disaster, and any county in the state can apply for some of this money regardless of whether their county was included in a weather disaster. The grant must be applied for by the state's emergency management agency. State insurance regulators can remind their emergency management agencies of the HMGP grant and encourage them to apply for it.

Commissioner Mulready asked how long a state has to apply for an HMGP grant. Jones said he believes a state has two years following the presidentially declared disaster to apply for the grant. The state emergency managers control the money and pass it out. Some of the money is also used to build public storm shelters.

Grassel asked if alerts on a cell phone from the NWS are received as quickly as by weather radio. Jones said there has been a failure of the alerting system on cell phones and reverse 911 calls in the past; however, the NWR stayed on the air.

Grassel said in Iowa, it is often challenging to know when a tornado is going to hit. He asked if there is a way to adjust the areas in which the weather radio provides warnings. Jones said the weather radio can be adjusted to just receive a warning pertaining to a particular county or even parts of a county.

#### 6. Held a Panel Discussion on Personal Lines Deductible Trends

Amann said prior to the 2022 Fall National Meeting, the NAIC sent a survey to the states regarding deductibles for homeowners insurance. The Working Group received survey responses from 30 states. Almost half (45%) of the 30 states answering the survey indicated that they are seeing separate roof deductibles in their state. The survey also indicated that at least four non-coastal states are seeing the use of percentage deductibles in their state. While these states are not directly tracking this information, they are noticing an uptick in their complaint data.

Due to the increased severity of storms, the Working Group heard a panel discussion on personal lines homeowners deductible trends due to deductible changes states are seeing. The property/casualty (P/C) market is hardening, causing impacts across all lines of business; however, the focus of the panel was on homeowners insurance. Amann asked the Working Group to think about the impacts across all lines of insurance, including health insurance.

The panel included Amann as moderator, Amy Bach (United Policyholders—UP), David F. Snyder (American Property Casualty Insurance Association—APCIA), and Julia Dreier (MN).

Snyder said the APCIA appreciates the concerns that consumers and state insurance regulators have, as well as the concerns of the insurers the APCIA represents. The term “polycrisis” is defined as a simultaneous occurrence of several catastrophic events, which has been occurring in the U.S.

Snyder indicated that one negative factor includes inflation, which has increased the cost of materials and labor needed to reconstruct homes and businesses. Costs have remained elevated since the beginning of the COVID-19 pandemic. The price of construction materials for a single-family residential home rose by 33.9%. Snyder said the APCIA has seen the deterioration of the combined ratio, as well as an increase in the cost of capital.

Snyder said a second negative factor is made up of natural catastrophe losses and costs. 2022 was the eighth year in a row that the U.S. suffered at least 10 catastrophes causing over \$1 billion in losses. Natural disaster losses from 2020 through 2022 in the U.S. exceeded \$275 billion. Additionally, the U.S. incurred 75% of the global insured losses in 2022. Costs rise from the incidents themselves, as well as the patterns of development and the related costs to deliver the benefits.

Snyder indicated that a third negative factor involves the hardening of the reinsurance market and political polarization.

Snyder said deductibles have been around in one form or another for decades. Deductibles are intended to do two things: 1) provide consumers the ability to manage their risks in a way that works best for them; and 2) make the risk more manageable from the perspective of the insurance industry. Deductibles are currently changing, as they have in the past. It is a competitive market in which each insurer is trying to manage its risks. Snyder said state insurance regulators must decide the appropriateness of the various types of deductibles.

Snyder reiterated that the purpose of the deductibles is, first and foremost, to allow consumers more choice in their ability to manage risk while also providing the insurer the ability to manage its risk while maintaining solvency.

Bach said UP is a national consumer group that does a lot of education and recovery support. Insurance is intended to indemnify the policyholder in the event of a loss. Bach mentioned that the use of percentage deductibles, split deductibles, hail deductibles, etc. brings about a complexity that is challenging for consumers.

Bach said UP was formed because many people who had earthquake damage following the 1989 Loma Prieta, CA, earthquake received estimates that fell just below the \$10,000 deductible and, therefore, did not receive any money toward their loss. She said in the past, consumer advocates advised consumers that the best way to lower the cost of an insurance policy is to increase the deductible. However, that advice was based on the deductible being a flat deductible. However, with percentage deductibles, there is a calculation involved that consumers do not always understand.

Bach said she could understand that insurers see the percentage deductible as risk-sharing, but she does not believe consumers think of it in this way. She indicated that there are at least 19 states with percentage deductibles. She said it is now difficult to tell consumers to increase their deductible to try and save money, as some policyholders are seeing multiple deductibles. For example, they see one for the roof and one for the home.

Dreier said in 2022, Minnesota was hit by six weather disasters exceeding \$1 billion in property damage. Minnesota ranked third in the nation last year for reports of severe hail, following behind only Texas and Nebraska.

Dreier said Minnesota has seen an unprecedented number of rate increases, as they have already seen close to 30 rate increases over 25% this year, keeping in mind that we are only three months into 2023. Since 2020, Minnesota has seen a 55% increase in homeowners insurance complaints. Many of these complaints are from policyholders who are concerned about coverage, denials, and unexpectedly high out-of-pocket costs following damage, particularly from wind and hailstorms.

Dreier said the DOI wants to determine how it can lower overall costs. Borrowing a phrase used by Wisconsin, she said it is cheaper to pre-cover than recover from storm damage. She said Minnesota is proposing to strengthen homes in the state by reducing risk exposure through mitigation. She said Minnesota's proposal would couple grants to retrofit homes with premium reductions and homeowners insurance. This program would require grant recipients to work with contractors trained in the fortified standards, which are based on research by the Insurance Institute for Business and Home Safety (IBHS).

Dreier said Minnesota is also considering the best way to ensure its consumers understand what their policies mean and say, providing an opportunity to work with consumer groups and the insurance industry.

Amann asked Bach what UP is seeing from the consumers' perspective regarding the understanding of their deductibles. She said the American Academy of Actuaries (Academy) recently released a paper about the math of deductibles. The paper addresses deductibles across all lines of business. Bach said consumers have a difficult time understanding deductibles, especially percentage deductibles. She said when a consumer reads an insurance policy, there are many footnotes regarding what will be covered and how much a policyholder will be paid.

Amann said consumers also do not understand that basic maintenance is the responsibility of the policyholder. For example, a policyholder is not going to get a roof replaced just because there was a hailstorm. There may be a problem with the roof.

Amann asked if there is more that needs to be done to help a policyholder understand their insurance policy or if it is sufficient to just tell the policyholder to read their policy and/or declarations page to understand their coverage.

Bach said while she understands the reasoning of the insurer, it is not sufficient to tell the policyholder to read their policy to know what is covered. She believes that oftentimes, at renewal, policyholders are seeing premium increases and are looking for ways to save money on their premiums. She said policyholders do not always understand what will be paid in the event of a loss. She said percentage deductibles are more difficult for consumers to understand than flat deductibles. Bach said insurers have more advanced technology to ascertain the condition of homes than they had in the past, and she is seeing more focus on the condition of the home during claim settlement. She said UP is hearing a lot of reports of insurers denying claims on the basis of wear and tear. She said additionally, insurers have been taking a hard line on the time between when a policyholder observes damage and when they report the damage when deciding if they will pay a claim.

Dreier said the reasons behind implementing building codes are to help buildings better weather storms and minimize the overall risk for individuals. She said Minnesota's proposal would hopefully provide for lower premiums overall, as well as less damage.

Snyder said he believes everyone is struggling with the general public's perception of risk. It is difficult for the government to get the public focused on risk, a challenge for insurers to explain risk and urge consumers to purchase the right type of coverage, and a challenge for consumers to understand the insurance they purchase. The purchase of insurance is not a simple purchase. A policyholder's home includes a variety of variables, such as a roof; a heating, ventilation, and air conditioning (HVAC) system; siding; where the home is located; etc. Snyder

said the question is how insurers can assist consumers in understanding all the variables and make intelligent decisions regarding the best coverage the consumer can afford.

Snyder said he believes insurers are providing good descriptions of deductibles for consumers. He said consumers must want to read the descriptions and better understand the insurance product. He suggested that state insurance regulators work with consumer advocates to come up with questions consumers ought to ask when purchasing a homeowners policy. The NAIC has worked on a *Homeowners Shopping Tool* that provides questions for a homeowner to ask when purchasing a policy. This tool likely needs to be updated with some questions added regarding the understanding of deductibles.

Snyder said there have been changes in the weather that are causing increased volatility, as well as developing homes and businesses in areas that should not have been developed. He said the APCA produced a paper indicating that there are gaps in consumer understanding, and the more complex the product, the more gaps will exist.

Amann asked Dreier if consumers understand a roof claim due to a storm versus a catastrophic event. Dreier said she believes consumers understand more than we give them credit for in many cases. She said as a state insurance regulator, she thinks about what a DOI can do to make sure information is easily accessible to the consumer to inform them about what they are buying and how to best use their insurance coverage. She said this is a difficult task because there is so much variability in the market. She said some consumers understand, and others do not.

Amann asked Bach if she believes there are ways to improve the process of informing the consumer regarding the dollar amount they are ultimately responsible for paying. Bach said high deductibles, multiple deductibles, and percentage deductibles have created more confusion. She said it is still part of UP's standard outreach to make informed decisions and tell consumers to think about their funding plans for repairs that will not be covered if they choose to increase their deductibles.

Bach said she would like to understand more about why insurers are more inclined to raise deductibles than to cap coverage like the NFIP and guaranty associations do. She asked why policyholders are not just told the highest dollar amount the property will be insured for in case of a loss instead of cutting the coverage out on the lower end if the bigger concern is the exposure and these are catastrophic claims.

Snyder said he believes insurers try to tailor the coverage and compete in the market in the best way they can. He said they are not all going to do things the same way. He said he believes insurers see the deductible changes giving them the ability to offer some coverage. He said it is a way for insurers to stay in the market and push toward more high-end coverage, more of what is called the expensive early lower dollars, which is the amount the consumer picks up.

Amann asked how a DOI can encourage insurers to either write more coverage or modify the coverage they offer. Dreier said there is no magic bullet, but she believes the difference being seen in many cases is an effort by several insurers to try and make a product that is more affordable and usable for policyholders.

Commissioner Donelon said he tells consumers to self-insure for whatever they can afford. He said Citizens had a 2% named storm deductible in Louisiana in 2008 after Hurricane Katrina. When Hurricane Gustav went through Baton Rouge, LA, which had been spared by Hurricanes Katrina and Rita, many of the homeowners were not aware that they had the 2% deductible. Insurers then raised deductibles from 2% to 3% to 5%. As the deductibles grew, coverage shrunk. Commissioner Donelon said the deductible is a vehicle around the limitation Louisiana has on insurers from coming and going on coastal exposure and other exposures they no longer want to cover. He

encouraged insurers not to use the split roof deductible because when you are pricing out repairs, this adds more math confusion.

Commissioner Lawrence asked Bach if it would help if the stated amount of the percentage deductible is put on the declarations page if the math is what is confusing the policyholders. Bach said she believes this is important because the policyholder will know the amount of money they will have to pay out of pocket in the event of a claim. She said insurers have always used the argument that a deductible is put into place to help eliminate fraud. She said risk-sharing is having a deductible where the policyholder has a pre-defined deductible, such as \$5,000. Risk-shifting is when most of the losses a policyholder experiences are paid by the policyholder, which she believes is occurring with high percentage deductibles, etc. She said she believes collaborative work amongst the state insurance regulators, such as work resulting in a model law, is timely and required.

Snyder said the market is different today than it was 20 years ago. There have been negative effects from inflation, weather volatility, weather patterns, etc. Some of these negative effects are due to not having up-to-date building codes, and others are due to weather volatility. Snyder said insurers want to sell insurance and take on risk, but they also must manage the risk to maintain their own solvency. Insurers are managing risk in different ways. Snyder said he believes the insurance industry and state insurance regulators need to work together to figure out how to help consumers better understand their risk and what actions to take to reduce risk.

Commissioner Lawrence asked Bach about claims being denied due to the duration of time that passes before a claim is filed. He asked if that is happening within the policy's duration. Bach said she was referring to insurers saying the damage was due to deferred maintenance. An example of this would be an insurer saying the policyholder should have known to take a tree down. Bach said insurers have more technology available now; therefore, they know the condition of a property prior to a claim being filed. She said there are more losses denied due to deferred maintenance, and these losses are not viewed as sudden and accidental.

Nwasoria asked if there is a way state insurance regulators can work with insurers to provide a premium reduction for policyholders that have brought their property up to the current code. Dreier said the insurance community in Minnesota has been engaging in conversations with the DOI regarding premium reductions for mitigation. Snyder believes progress is being made, as there is more community engagement

Nwasoria asked if there is a way to get insurers to visit a home and inform the property owner of the things they can do to improve the insurability of their property. Snyder said he believes improvements in technology, such as the use of drones, may offer a way to make this happen. Bach said there are some important NAIC workstreams looking at ways to provide policyholders with incentives to mitigate damage.

Commissioner Lawrence asked how lenders felt about high deductibles and percentage deductibles. Bach said UP has been working with the Federal National Mortgage Association (FNMA) on a project to improve options for insuring manufactured homes. UP has had conversations with the Federal Reserve Bank about its concern regarding collateral not being insured to replacement value due to the new exclusions they are seeing, as well as higher deductibles. Bach believes the Federal Insurance Office (FIO) is trying to conduct a data call due to the collateral issue.

Amann reminded the Working Group that there are several other NAIC working groups, task forces, and committees experiencing overlap concerning the issues discussed in the panel.

## 7. Discussed Other Matters

Amann asked Working Group members to contact NAIC staff if they wish to see the homeowners survey results.

Amann said in October, Missouri will be hosting the Earthquake Summit tentatively scheduled to be held in St. Louis, MO. There will be seismic experts, disaster preparedness, and response teams presenting at the Summit

Having no further business, the Catastrophe Insurance (C) Working Group and the NAIC/FEMA (C) Advisory Group adjourned.

SharePoint/NAIC Support Staff Hub/Committees/C/Catastrophe/Minutes – Joint Meeting CAT\_FEMA.docx

Draft: 3/15/23

Transparency and Readability of Consumer Information (C) Working Group  
E-Vote  
March 15, 2023

The Transparency and Readability of Consumer Information (C) Working Group of the Property and Casualty Insurance (C) Committee conducted an e-vote that concluded March 15, 2023. The following Working Group members participated: Ken Allen (CA); Bobbie Baca (CO); George Bradner (CT); Julie Rachford (IL); Chris Hollenbeck (KS); Ron Henderson (LA); Carrie Couch (MO); Cuc Nguyen (OK); Rachel Chester (RI); Jennifer Ramcharan (TN); and Marianne Baker (TX).

1. Adopted its 2022 Fall National Meeting Minutes

The Working Group considered adoption of its Nov. 15, 2022, minutes.

A majority of the Working Group members voted in favor of adopting its Nov. 15, 2022, minutes (*see NAIC Proceedings – Fall 2022, Property and Casualty Insurance (C) Committee, Attachment Four*). The motion passed.

Having no further business, the Transparency and Readability of Consumer Information (C) Working Group adjourned.

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

Draft 3/21/23

**Adopted by the Surplus Lines (C) Task Force, March 21, 2023****NONADMITTED INSURANCE MODEL ACT****Table of Contents**

Section 1.	Short Title
Section 2.	Purpose—Necessity for Regulation
Section 3.	Definitions
Section 4.	Placement of Insurance Business
Section 5.	Surplus Lines Insurance
Section 6.	Insurance Independently Procured—Duty to Report and Pay Tax
Section 7.	Penalties
Section 8.	Violations
Section 9.	Service of Process
Section 10.	Legal or Administrative Procedures
Section 11.	Enforcement
Section 12.	Suits by Nonadmitted Insurers
Section 13.	<del>Severability</del> <u>parability of Provisions</u>
Section 14.	Effective Date

**Section 1. Short Title**

This Act shall be known and may be cited as “The Nonadmitted Insurance Act.”

**Section 2. Purpose—Necessity for Regulation**

This Act shall be liberally construed and applied to promote its underlying purposes which include:

- A. Protecting persons seeking insurance in this state;
- B. Permitting surplus lines ~~insurance~~ insurance to be placed with reputable and financially sound nonadmitted insurers and exported from this state pursuant to this Act;
- C. Establishing a system of regulation which will permit orderly access to surplus lines insurance in this state and encourage admitted insurers to provide new and innovative types of insurance available to consumers in this state;
- D. Providing a system through which persons may purchase insurance other than surplus lines insurance, from nonadmitted insurers pursuant to this Act;
- E. Protecting revenues of this state; and
- F. Providing a system pursuant to this Act which subjects nonadmitted insurance activities in this state to the jurisdiction of the insurance commissioner and state and federal courts in suits by or on behalf of the state.

**Section 3. Definitions**

As used in this Act:

- A. “Admitted insurer” means an insurer licensed to ~~do engage in~~ ~~an~~ the business of insurance ~~business~~ in this state.
- B. “Affiliate” means, with respect to an insured, any entity that controls, is controlled by, or is under common control with the insured.
- C. “Affiliated group” means any group of entities that are all affiliated. “Capital,” as used in the financial requirements of Section 5, means funds paid in for stock or other evidence of ownership.

## Nonadmitted Insurance Model Act

~~D~~E. “Commissioner” means the insurance commissioner of [insert name of state], or the commissioner’s deputies or staff, or the ~~c~~ommissioner, ~~d~~irector or ~~s~~uperintendent of ~~i~~nsurance in any other state.

**Drafting Note:** Insert the title of the chief insurance regulatory official wherever the term “commissioner” appears.

E. “Control” means with respect to an insured:

(1) A person, either directly or indirectly, or acting through one or more other persons, owns, controls, or has the power to vote 25 percent or more of any class of voting securities of the other entity; or

(2) The entity controls in any manner the election of a majority of the directors or trustees of the other entity.

F. [OPTIONAL: ~~“Domestic surplus lines insurer” means a surplus lines insurer domiciled in this state, that which may write insurance in this state on as if it were a surplus lines insurer basis domiciled in another state.~~]

G. “Eligible surplus lines insurer” means a nonadmitted insurer with which a surplus lines licensee may place surplus lines insurance pursuant to Section 5 of this Act.

H. “Exempt commercial purchaser” means any person purchasing commercial insurance that, at the time of placement, meets the following requirements:

(1) ~~n~~H~~as paid aggregate nationwide commercial property and casualty insurance premiums in excess of \$100,000 in the immediately preceding 12 months; and:~~

(2) (a) ~~The person m~~Meets at least one+ of the following criteria:

(i) ~~The person P~~ossesses a net worth in excess of \$20,000,000;:

(ii) ~~The person G~~enerates annual revenues in excess of \$50,000,000;:

(iii) ~~The person E~~mploys more than 500 full-time or full-time equivalent employees per individual insured or is a member of an affiliated group employing more than 1,000 employees in the aggregate;:

(iv) ~~The person I~~s a not-for-profit organization or public entity generating annual budgeted expenditures of at least \$30,000,000; or:

(v) ~~The person i~~s a municipality with a population in excess of 50,000 persons.

(b) Effective on July 21, 2010, every five years and each fifth January 1 occurring thereafter on January 1, the amounts in subsections Items (i), (ii), and (iv) of Subparagraph Section 3H(32)(a) of this Paragraph shall be adjusted to reflect the percentage change for such five- year period in the Consumer Price Index for All Urban Consumers published by the Bureau of Labor Statistics of the Department of Labor.

**Drafting Note:** This definition of “Exempt commercial purchaser” follows the language of the federal Nonadmitted and Reinsurance Reform Act (NRRA). Some states have chosen not to adopt the inflation adjustment. The NRRA uses the term “municipality,” which some states may find limiting. States may choose to use terminology consistent with state law to expand this provision to include counties and other public entities.

~~E~~I. “Export” means to place surplus lines insurance with a nonadmitted insurer.

~~F~~. “Foreign decree” means any decree or order in equity of a court located in any United States jurisdiction, including a federal court of the United States, against any person engaging in the transaction of insurance in this state.

J. “Home state,” ~~means~~with respect to an insured, means:

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- (1) The state in which an insured maintains its principal place of business or, in the case of a natural person, the person’s principal place of residence;
- (2) If 100 percent of the insured risk is located out of the state referred to in ~~subParagraph (1)~~Section 3J(1), the state to which the greatest percentage of the insured’s taxable premium for that insurance contract is allocated; ~~or~~
- (3) If the insured is an affiliated group with more than one member listed as a named insured on a single nonadmitted insurance contract, the home state is the home state of the member of the affiliated group that has the largest percentage of premium attributed to it under the insurance contract. ~~or~~
- ~~(4) [Option 1] In the case of an unaffiliated group policy:~~
- ~~(a) If a group policyholder pays 100% of the premium from its own funds, then the home state is determined according to paragraphs (1) and (2);~~
- ~~(b) If a group policyholder does not pay 100% of the premium from its own funds, then the home state is determined according to paragraphs (1) and (2) for each member of the group;~~
- ~~[Option 2] In the case of an unaffiliated group policy, the home state shall be the home state of the group policyholder as determined by the application of paragraphs (1) and (2);~~

Comment: The NRRA definition of “home state” includes ~~S~~subsections ~~Paragraphs~~ (1), (2), and (3) of Section 3J. The NRRA definition does not expressly cover unaffiliated groups. States have taken different approaches to the taxation of unaffiliated group policies. Some states tax based on the “home state” of the group member or certificate holder under the unaffiliated group policy. Some states assess tax on the “home state” of the person that pays the premium. Not all states have an express provision to address unaffiliated group policies. ~~The Drafting Group could not arrive at language to address each possibility and opted to omit it from the Model, such as risk purchasing groups model language contains two options for addition of that are expressly covering unaffiliated groups treating the members of such a group as individual insureds for purposes of placement and taxation.~~

- ~~K. “Insurer” means any person, corporation, association, partnership, reciprocal exchange, interinsurer, Lloyds insurer, insurance exchange syndicate, fraternal benefit society, and any other legal entity engaged in the business of insurance.~~
- ~~H. “Kind of insurance” means one of the types of insurance required to be reported in the annual statement which must be filed with the commissioner by admitted insurers.~~
- ~~K. “Nonadmitted insurance” means any insurance written on properties, risks or exposures, located or to be performed in this state, by an insurer not licensed to engage in the ~~transaction~~business of insurance in this state [or a domestic surplus lines insurer].~~
- ~~L.I. “Nonadmitted insurer” means an insurer not licensed to ~~do an~~engage in the ~~transaction~~business of insurance ~~business~~ in this state but does not include a risk retention group pursuant to the federal Liability Risk Retention Act of 1986.~~
- ~~M.J. “Person” means any natural person or ~~other business~~ entity, including, but not limited to, individuals, partnerships, associations, trusts or corporations.”~~
- ~~N. “Premium” means any payment made as consideration for an insurance contract.~~
- ~~N.O. “Principal place of business” means:~~

- ~~(1) The state where a person maintains its headquarters and where the person’s high-level officers direct, control, and coordinate ~~the~~ business activities; or~~
- ~~(2) If the person’s high-level officers direct, control, and coordinate the business activities in more than one state, or if the person’s principal place of business is located outside any state, then it is the state~~

## Nonadmitted Insurance Model Act

to which the greatest percentage of the person's taxable premium for that insurance contract is allocated.

PO. “Principal residence” means:

(1) The state where the person resides for the greatest number of days during a calendar year; or

(2) If the person's principal residence is located outside any state, the state to which the greatest percentage of the person's taxable premium for that insurance contract is allocated.

“State” includes any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Northern Mariana Islands, the Virgin Islands, and American Samoa. K. “Policy” or “contract” means any contract of insurance, including but not limited to annuities, indemnity, medical or hospital service, workers' compensation, fidelity or suretyship.

L. “Reciprocal state” means a state that has enacted provisions substantially similar to:

(1) Sections 5F, 5I(5), 5Q(10), 5R(4) and Section 6; and

(2) The allocation schedule and reporting form contained in [cite the regulation on surplus lines taxation].

M. “Surplus,” as used in the financial requirements of Section 5, means funds over and above liabilities and capital of the company for the protection of policyholders.

Q.R.N. “Surplus lines insurance” means any property and casualty insurance in this state on properties, risks or exposures, located or to be performed in this state, permitted to be placed through a surplus lines licensee with an nonadmitted insurer-eligible surplus lines insurer to accept such insurance, pursuant to Section 5 of this Act.

Drafting Note: If a state chooses to adopt the alternative Section 5B, this definition of “surplus lines insurance” should be consistent with the acceptable coverage listed in Section 5B. States may choose to extend the definition of “surplus lines insurance” beyond property/casualty insurance. NAIC.

RS. “Surplus lines insurer” means a nonadmitted [or domestic surplus lines] insurer that is eligible to accept the placement of surplus lines insurance pursuant to Section 5 of this Act.

STO. “Surplus lines licensee” means any person individual, firm or corporation licensed under Section 5 of this Act to place surplus lines insurance on properties, risks or exposures located or to be performed in this state with an nonadmitted insurers-eligible surplus lines insurers to accept such insurance.

TU. “Taxable premium” means any premium less return premium that is not otherwise exempt from tax pursuant to this Act. [OPTIONAL: ++Premium on property risk or exposure that is properly allocated to federal or international waters or is under the jurisdiction of a foreign government is not taxable in this state.]

UVS. “Transaction of insurance”

(b) (1) For purposes of this Act, any of the following acts in this state effected by mail or otherwise by a nonadmitted insurer or by any person acting with the actual or apparent authority of the insurer, on behalf of the insurer, is deemed to constitute the transaction of an insurance business in or from this state:

(a) The making of or proposing to make, as an insurer, an insurance contract;  
(b) The making of or proposing to make, as guarantor or surety, any contract of guaranty or suretyship as a vocation and not merely incidental to any other legitimate business or activity of the guarantor or surety;

(c) The taking or receiving of an application for insurance;

(d) The receiving or collection of any premium, commission, membership fees, assessments,

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

dues or other consideration for insurance or any part thereof;

- (e) The issuance or delivery in this state of contracts of insurance to residents of this state or to persons authorized to do business in this state;
  - (f) The solicitation, negotiation, procurement or effectuation of insurance or renewals thereof;
  - (g) The dissemination of information as to coverage or rates, or forwarding of applications, or delivery of policies or contracts, or inspection of risks, the fixing of rates or investigation or adjustment of claims or losses or the transaction of matters subsequent to effectuation of the contract and arising out of it, or any other manner of representing or assisting a person or insurer in the transaction of risks with respect to properties, risks or exposures located or to be performed in this state;
  - (h) The transaction of any kind of insurance business specifically recognized as transacting an insurance business within the meaning of the statutes relating to insurance;
  - (i) The offering of insurance or the transacting of insurance business; or
  - (j) Offering an agreement or contract which purports to alter, amend or void coverage of an insurance contract.
- (2) The provisions of this subsection shall not operate to prohibit employees, officers, directors or partners of a commercial insured from acting in the capacity of an insurance manager or buyer in placing insurance on behalf of the employer, provided that the person’s compensation is not based on buying insurance.
- (3) The venue of an act committed by mail is ~~at the point~~location where the matter transmitted by mail is delivered or issued for delivery or takes effect.

**Drafting Note:** States may need to alter this subsection to reflect their decision as to whether they intend to permit citizens to directly purchase coverage within the state from a nonadmitted insurer, or if self-procurement of coverage will be permitted only when it occurs outside the state. States electing to allow direct procurement will need to insert an appropriate exemption in Section 4A of this Act. Additionally, states should consider whether the preceding definition of “transaction of insurance” is consistent with other statutory definitions of this phrase in the state. Finally, states may want to consider whether group insurance purchases or the maintenance of insurance books and records in this state should fall within the scope of the definition of “transaction of insurance.”

~~Q. “Type of insurance” means coverage afforded under the particular policy that is being placed.~~

~~VI.~~ “Wet marine and transportation insurance” means:

- (1) Insurance upon vessels, crafts, hulls and other interests in them or with relation to them;
- (2) Insurance of marine builder’s risks, marine war risks and contracts of marine protection and indemnity insurance;

~~(1)(3)~~ Insurance of freight and disbursements pertaining to a subject of insurance within the scope of this subsection; and

~~(2)~~

~~(4)~~ Insurance of personal property and interests therein, in the course of exportation from or importation into any country, or in the course of transportation coastwise or on inland waters, including transportation by land, water or air from point of origin to final destination, in connection with any and all risks or perils of navigation, transit or transportation, and while being prepared for and while awaiting shipment, and during any incidental delays, transshipment, or reshipment; provided, however, that insurance of personal property and interests therein shall not be considered wet marine and transportation insurance if the property has:

## Nonadmitted Insurance Model Act

- (a) Been transported solely by land; or
- (b) Reached its final destination as specified in the bill of lading or other shipping document; or
- (c) The insured no longer has an insurable interest in the property.

**Comment:** The language added in 1994 to the end of the definition of “wet marine and transportation insurance” {Subparagraphs 4(a), 4(b), and 4(c)} is intended to clarify the scope of the definition, which ultimately affects the exemption of certain risks from this Act. The 1994 amendments address current regulatory concerns and concerns raised by those who drafted the 1983 amendments to the Model Surplus Lines Law. The 1983 drafters wrote: “Several [drafters] felt the term ‘storage’ should not appear in... [the wet marine definition] to ensure that warehousemen and other types of insurance covering risks of storage are not interpreted to be within the purview of this definition. The term ‘delays’ is sufficiently broad to cover temporary storage while in the course of transit.”

**Drafting Note:** In addition to the definitions provided in this section, individual states may wish to consider adopting definitions for “agent,” “broker” or “producer” in a manner consistent with its other laws. Additionally, states may want to cross-reference the definition of “insurance” as it appears elsewhere in the state insurance code. The definition of insurance should reach illegal unauthorized activities.

#### Section 4. Placement of Insurance Business

- A. An insurer shall not engage in the transaction of insurance unless authorized by a license in force pursuant to the laws of this state, or exempted by this Act or ~~otherwise exempted by~~ the insurance laws of this state.
- B. A person shall not ~~directly or indirectly~~ engage in a transaction of insurance ~~with or on behalf of or shall in this state directly or indirectly act as agent for, or otherwise represent or aid on behalf of another, a nonadmitted insurer in this state, in the solicitation, negotiation, procurement or effectuation of insurance, or renewals thereof, or forwarding of applications, or delivery of policies or contracts or inspection of risks, or fixing of rates, or investigation or adjustment of claims or losses, or collection or forwarding of premiums, or in any other manner represent or assist the insurer in the transaction of insurance.~~
- C. A person who represents or aids a nonadmitted insurer in violation of this section shall be subject to the penalties set forth in Section 7 of this Act. No insurance contract entered into in violation of this section shall preclude the insured from enforcing his rights under the contract in accordance with the terms and provisions of the contract of insurance and the laws of this state, to the same degree those rights would have been enforceable had the contract been lawfully procured.
- D. If the nonadmitted insurer fails to pay a claim or loss within the provisions of the insurance contract and the laws of this state, a person who assisted or in any manner aided directly or indirectly in the procurement of the insurance contract, shall be liable to the insured for the full amount under the provisions of the insurance contract.
- E. Section 4B or 4D shall not apply to a person in regard to an insured who independently procures insurance as provided under Section 6. This section shall not apply to a person, properly licensed as an agent or broker in this state who, for a fee and pursuant to a written agreement, is engaged solely to offer to the insured advice, counsel or opinion, or service with respect to the benefits, advantages or disadvantages promised under any proposed or in-force policy of insurance if the person does not, directly or indirectly, participate in the solicitation, negotiation or procurement of insurance on behalf of the insured.

**Drafting Note:** If a state collects tax on unlicensed transactions which violate this Act, it may consider imposing liability for payment of those taxes on persons who violate this Act by assisting in the procurement of nonadmitted insurance.

**Drafting Note:** Some states permit other licensed professionals to engage in these activities as provided in their insurance statutes or other state statutes. Those states may want to amend Section 4E to include those professionals, to the extent they act within the scope of their licenses.

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

F. This section shall not apply to a person acting in material compliance with the insurance laws of this state in the placement of the types of insurance identified in Paragraphs (1), (2), (3) and (4) below:

- (1) Surplus lines insurance as provided in Section 5. For the purposes of this subsection, a licensee shall be deemed to be in material compliance with the insurance laws of this state, unless the licensee committed a violation of Section 5 that proximately caused loss to the insured;
- (2) Transactions for which a certificate of authority to do business is not required of an insurer under the insurance laws of this state;

~~Drafting Note: A number of states exempt from licensing and premium taxation nonprofit educational insurers insuring only nonprofit educational institutions and their employees. Some states require certificates of authority while others require licensing, and the appropriate language should be used in Paragraph (2) above. Additionally, some states may want to consider adding language to establish an option of allowing persons to file for an exemption with the Department of Insurance.~~

- (3) Reinsurance provided that, unless the commissioner waives the requirements of this subsection:
  - (a) The assuming insurer is authorized to ~~de-engage in the business of an~~ insurance or reinsurance ~~business by~~ its domiciliary jurisdiction and is authorized to write the type of reinsurance in its domiciliary jurisdiction; and
  - (b) The assuming insurer satisfies all legal requirements for such reinsurance in the state of domicile of the ceding insurer;
- (4) The property and operation of railroads or aircraft engaged in interstate or foreign commerce, wet marine and transportation insurance;
- (5) Transactions subsequent to issuance of a policy not covering properties, risks or exposures located, or to be performed in this state at the time of issuance, and lawfully solicited, written or delivered outside this state.

**Drafting Note:** States may also wish to consider exempting from Section 4A of this Act self-procured insurance or industrial insurance purchased by a sophisticated buyer who does not necessarily require the same regulatory protections as an average insurance buyer. Additionally, some states allow other insurance transactions with nonadmitted insurers. Examples include certain aviation and railroad risks. Other states may want to narrow the scope of the exemptions above or reserve the right to approve exemptions on a case-by-case basis.

## Section 5. Surplus Lines Insurance

A. Surplus lines insurance may be placed by a surplus lines licensee if:

- (1) Each insurer is ~~an~~-eligible ~~to write~~ surplus lines ~~insurance~~insurer; and
- (2) Each insurer is authorized to write the type of insurance in its domiciliary jurisdiction; and
- (3) ~~Other than for exempt commercial purchasers, t~~The full amount or type of insurance cannot be obtained from insurers who are admitted to ~~de-engage in the~~ business ~~of insurance~~ in this state. The full amount or type of insurance may be procured from eligible surplus lines insurers, provided that a diligent search is made among the insurers who are admitted to transact and are actually writing the particular type of insurance in this state if any are writing it; and
- (4) All other requirements of this Act are met.

~~Drafting Note: States may prefer to reference “kind of insurance” rather than “type of insurance” in Section 5A(3). The term utilized should be defined within the Act. The diligent search requirement of Section 5A(3) must be satisfied in accordance with the statutes and regulations of the governing state. Such Diligent search statutes and regulations might vary from state to state in terms of the number of declinations required and the person designated to conduct the search. Several states permit surplus lines placement without a diligent search for or without regard to the availability of admitted coverage. States may want to~~

## Nonadmitted Insurance Model Act

consider changing diligent search requirements in light of electronic transactions. Section 5A(3) does not prohibit a regulatory system in which a surplus lines licensee may place with an eligible nonadmitted insurer any coverage listed on a current “Export List” maintained by the commissioner. The eExport list would identify types of insurance for which no admitted market exists. The commissioner may waive the diligent search requirement for any such type of insurance.

**Drafting Note:** Utilizing the “full amount” standard in Section 5A(3) of this Act may have certain market implications. An alternative to this approach would be to require that whatever part of the coverage is attainable through the admitted market be placed in the admitted market and only the excess part of the coverage may be exported.

- B. Subject to Section 5A(3) of this Act, a surplus lines licensee may place any coverage with an an nonadmitted eligible surplus lines insurer ~~eligible to accept the insurance~~, unless specifically prohibited by the laws of this state.

[Alternative Subsection B]

- [~~C~~B. Subject to Section 5A(3) of this Act, a surplus lines licensee may place only the following types of coverage with an an nonadmitted eligible surplus lines insurer ~~eligible to accept insurance~~: (list acceptable coverage).]

**Drafting Note:** The two statutory alternatives described in Section 5B represent different regulatory approaches to defining those coverages which may be placed in the nonadmitted market and they would impact the admitted market in different manners.

- C. A surplus lines licensee shall not place ~~surplus lines insurance coverage with a nonadmitted insurer~~, unless, at the time of placement, the surplus lines licensee has determined that the nonadmitted insurer is eligible to write surplus lines insurance under one of the following subsections:

~~(1) Has established satisfactory evidence of good repute and financial integrity; and~~

~~(2) — Qualifies is eligible to write surplus lines insurance under one of the following subparagraphs:~~

1. Drafting Note: Current numbering is retained in this Model to remain consistent with the reference within the NRRA.

2. Is eligible to write surplus lines insurance under one of the following subsections:

(a) For a nonadmitted insurer domiciled in another United States jurisdiction, the insurer shall have both of the following:

~~(ia) i~~ The authority to write the type of insurance in its domiciliary jurisdiction; and

~~(iib) ii~~ Has capital and surplus or its equivalent under the laws of its domiciliary jurisdiction ~~which~~ that equals the greater of:

~~(I) (i) — (IA) —~~ The minimum capital and surplus requirements under the law of this state; or

~~(II) (B)~~ \$15,000,000;

Drafting Note: States that have not previously increased capital and surplus requirements may wish to consider implementation of the capital and surplus requirements in this subparagraph in a series of phases over a period of up to three (3) years. In some circumstances, implementation of a \$15,000,000 capital and surplus requirement may represent a dramatic increase over existing requirements. States may wish to allow insurers which are eligible under existing law some period of time to increase their capital and surplus to meet the new standards. Current numbering is retained in this Model to remain consistent with the reference within the NRRA.

~~(iii) III~~ The requirements of Subparagraph (b)(i) may be satisfied by an insurer’s possessing less than the minimum capital and surplus upon an affirmative finding of

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

acceptability by the commissioner. The finding shall be based upon such factors as quality of management, capital and surplus of any parent company, company underwriting profit and investment income trends, market availability and company record and reputation within the industry. In no event shall the commissioner make an affirmative finding of acceptability when the nonadmitted insurer's capital and surplus is less than \$4,500,000; or

~~(a) For a nonadmitted insurer domiciled outside the United States, the insurer shall be listed on the Quarterly Listing of Alien Insurers maintained by the International Insurers Department of the National Association of Insurance Commissioners (NAIC); [or]~~

~~(b)~~

~~(c) [(3)e] For an insurer domiciled in this state, the insurer is a domestic surplus lines insurer.]~~

~~(b) In the case of an insurance exchange created by the laws of a state other than this state:~~

~~(i) The syndicates of the exchange shall maintain under terms acceptable to the commissioner capital and surplus, or its equivalent under the laws of its domiciliary jurisdiction, of not less than \$75,000,000 in the aggregate; and~~

~~(ii) The exchange shall maintain under terms acceptable to the commissioner not less than fifty percent (50%) of the policyholder surplus of each syndicate in a custodial account accessible to the exchange or its domiciliary commissioner in the event of insolvency or impairment of the individual syndicate; and~~

~~(iii) In addition, each individual syndicate to be eligible to accept surplus lines insurance placements from this state shall meet either of the following requirements:~~

~~(I) For insurance exchanges which maintain funds in an amount of not less than \$15,000,000 for the protection of all exchange policyholders, the syndicate shall maintain under terms acceptable to the commissioner minimum capital and surplus, or its equivalent under the laws of the domiciliary jurisdiction, of not less than \$5,000,000; or~~

~~(II) For insurance exchanges which do not maintain funds in an amount of not less than \$15,000,000 for the protection of all exchange policyholders, the syndicate shall maintain under terms acceptable to the commissioner minimum capital and surplus, or its equivalent under the laws of its domiciliary jurisdiction, of not less than the minimum capital and surplus requirements under the laws of its domiciliary jurisdiction or \$15,000,000, whichever is greater; or~~

**Drafting Note:** Some states may want to cross-reference statutory provisions in their own states which provide a grandfather clause for syndicates established with a lower capital and surplus requirement.

~~(c) In the case of a Lloyd's plan or other similar group of insurers, which consists of unincorporated individual insurers, or a combination of both unincorporated and incorporated insurers:~~

~~(i) The plan or group maintains a trust fund that shall consist of a trustee account representing the group's liabilities attributable to business written in the United States; and~~

~~(ii) In addition, the group shall establish and maintain in trust a surplus in the amount of \$100,000,000; which shall be available for the benefit of United States surplus lines policyholders of any member of the group.~~

## Nonadmitted Insurance Model Act

- ~~(iii) — The incorporated members of the group shall not be engaged in any business other than underwriting as a member of the group and shall be subject to the same level of solvency regulation and control by the group's domiciliary regulator as are the unincorporated members.~~
- ~~(iv) — The trust funds shall be maintained in an irrevocable trust account in the United States in a qualified financial institution, consisting of cash, securities, letters of credit or investments of substantially the same character and quality as those which are eligible investments for the capital and statutory reserves of admitted insurers to write like kinds of insurance in this state and, in addition, the trust required by item (ii) of this paragraph shall satisfy the requirements of the Standard Trust Agreement required for listing with the National Association of Insurance Commissioners (NAIC) International Insurers Department; or~~
- ~~(d) — In the case of a group of incorporated insurers under common administration, which has continuously transacted an insurance business outside the United States for at least three (3) years immediately prior to this time, and which submits to this state's authority to examine its books and records and bears the expense of the examination:~~
- ~~(i) — The group shall maintain an aggregate policyholders' surplus of \$10,000,000,000; and~~
- ~~(ii) — The group shall maintain in trust a surplus in the amount of \$100,000,000; which shall be available for the benefit of United States surplus lines policyholders of any member of the group; and~~
- ~~(iii) — Each insurer shall individually maintain capital and surplus of not less than \$25,000,000 per company.~~
- ~~(iv) — The trust funds shall satisfy the requirements of the Standard Trust Agreement requirement for listing with the NAIC International Insurers Department, and shall be maintained in an irrevocable trust account in the United States in a qualified financial institution, and shall consist of cash, securities, letters of credit or investments of substantially the same character and quality as those which are eligible investments for the capital and statutory reserves of admitted insurers to write like kinds of insurance in this state.~~
- ~~(v) — Additionally, each member of the group shall make available to the commissioner an annual certification of the member's solvency by the member's domiciliary regulator and its independent public accountant; or~~
- ~~(e) — Except for an exchange or plan complying with Subparagraph (b), (c) or (d), an insurer not domiciled in one of the United States or its territories shall satisfy the capital and surplus requirements of Subsection C(2)(a) of this section and shall have in force a trust fund of not less than the greater of:~~
- ~~(i) — \$5,400,000; or~~
- ~~(ii) — Thirty percent (30%) of the United States surplus lines gross liabilities, excluding aviation, wet marine and transportation insurance liabilities, not to exceed \$60,000,000, to be determined annually on the basis of accounting practices and procedures substantially equivalent to those promulgated by this state, as of December 31 next preceding the date of determination, where:~~
- ~~(1) — The liabilities are maintained in an irrevocable trust account in the United States in a qualified financial institution, on behalf of U.S. policyholders consisting of cash, securities, letters of credit or other investments of substantially the same character and quality as those which are eligible investments pursuant to [cite insurance investment law] for the capital and statutory reserves of admitted insurers to write~~

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

~~like kinds of insurance in this state. The trust fund, which shall be included in any calculation of capital and surplus or its equivalent, shall satisfy the requirements of the Standard Trust Agreement required for listing with the NAIC International Insurers Department; and~~

~~(II) The insurer may request approval from the commissioner to use the trust fund to pay valid surplus lines claims; provided, however, that the balance of the trust fund is never less than the greater of \$5,400,000 or thirty percent (30%) of the insurer's current gross U.S. surplus lines liabilities, excluding aviation, wet marine and transportation insurance liabilities; and~~

~~(III) In calculating the trust fund amount required by this subsection, credit shall be given for surplus lines deposits separately required and maintained for a particular state or U.S. territory, not to exceed the amount of the insurer's loss and loss adjustment reserves in the particular state or territory;~~

~~Drafting Note: The commissioner may wish to establish the authority to set a higher level on a case by case basis.~~

~~(f) An insurer or group of insurers meeting the requirements to do a surplus lines business in this state at the effective date of this law shall have two (2) years from the date of enactment to meet the requirements of Subparagraph (e), as follows:~~

<del>Year Following Enactment</del>	<del>Trust Fund Requirement</del>
<del>1</del>	<del>15% of U.S. surplus lines liabilities, excluding aviation, wet marine and transportation insurance, with a maximum of \$30,000,000</del>
<del>2</del>	<del>30% of U.S. surplus lines liabilities, excluding aviation, wet marine and transportation insurance, with a maximum of \$60,000,000.</del>

~~(g) The commissioner shall have the authority to adjust, in response to inflation, the trust fund amounts required by Subparagraph (e).~~

~~(3) In addition to all of the other requirements of this subsection, an insurer not domiciled in the United States or its territories shall be listed by the NAIC International Insurers Department. The commissioner may waive the requirement in Paragraph (3) or the requirements of Section 5C(2)(e)(ii) may be satisfied by an insurer's possessing less than the trust fund amount specified in Section 5C(2)(e)(ii) upon an affirmative finding of acceptability by the commissioner if the commissioner is satisfied that the placement of insurance with the insurer is necessary and will not be detrimental to the public and the policyholder. In determining whether business may be placed with the insurer, the commissioner may consider such factors as:~~

~~(a) The interests of the public and policyholders;~~

~~(b) The length of time the insurer has been authorized in its domiciliary jurisdiction and elsewhere;~~

~~(c) Unavailability of particular coverages from authorized insurers or unauthorized insurers meeting the requirements of this section;~~

~~(d) The size of the company as measured by its assets, capital and surplus, reserves, premium writings, insurance in force or other appropriate criteria;~~

~~(e) The kinds of business the company writes, its net exposure and the extent to which the company's business is diversified among several lines of insurance and geographic locations; and~~

## Nonadmitted Insurance Model Act

- ~~(f) — The past and projected trend in the size of the company’s capital and surplus considering such factors as premium growth, operating history, loss and expense ratios, or other appropriate criteria; and~~
- ~~(4) — Has caused to be provided to the commissioner a copy of its current annual statement certified by the insurer and an actuarial opinion as to the adequacy of, and methodology used to determine, the insurer’s loss reserves. The statement shall be provided at the same time it is provided to the insurer’s domicile, but in no event more than eight (8) months after the close of the period reported upon, and shall be certified as a true and correct copy by an accounting or auditing firm licensed in the jurisdiction of the insurer’s domicile and certified by a senior officer of the nonadmitted insurer as a true and correct copy of the statement filed with the regulatory authority in the domicile of the nonadmitted insurer. In the case of an insurance exchange qualifying under Paragraph (2)(b) of this subsection, the statement may be an aggregate combined statement of all underwriting syndicates operating during the period reported; and~~

**Drafting Note:** The following paragraph is for use by those states which desire to adopt a “white list” for determining the eligibility of nonadmitted insurers to write surplus lines insurance.

- ~~(5) — In addition to meeting the requirements in Paragraphs (1) to (4) of this subsection an insurer shall be an eligible surplus lines insurer if it appears on the most recent list of eligible surplus lines insurers published by the commissioner from time to time but at least semiannually. Nothing in this paragraph shall require the commissioner to place or maintain the name of any nonadmitted insurer on the list of eligible surplus lines insurers.~~
- ~~(6) — Notwithstanding Section 5A, only that portion of any risk eligible for export for which the full amount of coverage is not procurable from listed eligible surplus lines insurers may be placed with any other nonadmitted insurer which does not appear on the list of eligible surplus lines insurers published by the commissioner pursuant to Paragraph (5) of this subsection but nonetheless meets the requirements set forth in Sections 5C(1) and 5C(2) and any regulations of the commissioner. The surplus lines licensee seeking to provide coverage through an unlisted nonadmitted insurer shall make a filing specifying the amounts and percentages of each risk to be placed, and naming the nonadmitted insurers with which placement is intended. Within [insert number] days after placing the coverage, the surplus lines licensee shall also send written notice to the insured or the producing broker that the insurance, or a portion thereof, has been placed with the nonadmitted insurer.~~

D. The placement of surplus lines insurance shall be subject to the statutory and regulatory requirements solely of the insured’s home state.

**Drafting Note:** Section 522(d) of the federal Nonadmitted and Reinsurance Reform Act provides a workers’ compensation exception to home state authority; specifically, that this section may not be construed to preempt any State law, rule, or regulation that restricts the placement of workers’ compensation insurance or excess insurance for self-funded workers’ compensation plans with a nonadmitted insurer. In addition, Section 527(9) of the NRRRA provides that the term “nonadmitted insurance” means any property and casualty insurance permitted to be placed directly or through a surplus lines broker with a nonadmitted insurer eligible to accept such insurance and is not applicable to accident and health insurance. States may consider whether to add language making these exceptions explicit when codifying Section 5D into state law.

~~E.D.~~ Insurance procured under this section shall be valid and enforceable as to all parties.

~~F.E.~~ Withdrawal of Eligibility as a Surplus Lines Insurer

F.

If at any time the commissioner has reason to believe that a surplus lines insurer is no longer eligible under Section 5C,

- ~~(1) — Is in unsound financial condition or has acted in an untrustworthy manner;~~
- ~~(2) — No longer meets standards set forth in Section 5C of this Act;~~
- ~~(3) — Has willfully violated the laws of this state; or~~

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

~~(4) — Does not conduct a proper claims practice.~~

~~The~~ commissioner may, after notice and an opportunity for a hearing, declare it ineligible. The commissioner shall promptly ~~mail~~publish notice of all such declarations in a timely manner reasonably calculated to reach to each surplus lines licensee or surplus lines advisory organization, for distribution to all surplus lines licensees.

**Drafting Note:** Individual states should consider whether such declarations of ineligibility are appropriate in view of the state's other due process and administrative procedure requirements. Eligibility criteria are independent of other considerations such as compliance with other laws, for example, 18 USC 1033, relating to felons participating in the insurance business.

GF. Surplus Lines Tax

~~(1) (1) —~~ In addition to the full amount of gross premiums charged by the insurer for the insurance, every person licensed pursuant to Section 5H of this Act shall collect and pay to the commissioner a sum equal to [insert number] percent of the gross premiums charged, less any return premiums, for surplus lines insurance provided by the licensee pursuant to the license. Where the insurance covers properties, risks or exposures located or to be performed both in and out of this state, the sum payable shall be ~~computed on that portion of the gross premiums allocated to this state pursuant to Paragraph (4) of this subsection less the amount of gross premiums allocated to this state and returned to the insured paid entirely to the hHome sState of the insured.~~ The tax on any portion of the premium unearned at termination of insurance having been credited by the state to the licensee shall be returned to the policyholder directly by the surplus lines licensee or through the producing broker, if any. The surplus lines licensee is prohibited from rebating, for any reason, any part of the tax.

(2) At the time of filing the [insert monthly, quarterly, annual] report as set forth in Subsection SR of this section, each surplus lines licensee shall pay the premium tax due for the policies written during the period covered by the report.

~~(3) — If a surplus lines policy procured through a surplus lines licensee covers properties, risks or exposures only partially located or to be performed in this state, the tax due shall be computed on the portions of the premiums which are attributable to the properties, risks or exposures located or to be performed in this state. In determining the amount of premiums taxable in this state, all premiums written, procured or received in this state shall be considered written on properties, risks or exposures located or to be performed in this state, except premiums which are properly allocated or apportioned and reported as taxable premiums of a reciprocal state. In no event shall the tax payable to this state be less than the tax due pursuant to Paragraph (4) of this subsection; provided, however, in the event that the amount of tax due under this provision is less than \$50 in any jurisdiction, it shall be payable in the jurisdiction in which the affidavit required in Subsection K of this section is filed. The commissioner shall, at least annually furnish to the commissioner of a reciprocal state, as defined in Section 3L, a copy of all filings reporting an allocation of taxes as required by this subsection.~~

~~(4) — In determining the amount of gross premiums taxable in this state for a placement of surplus lines insurance covering properties, risks or exposures only partially located or to be performed in this state, the tax due shall be computed on the portions of the premiums which are attributable to properties, risks or exposures located or to be performed in this state and which relates to the kinds of insurance being placed as determined by reference to an allocation schedule duly promulgated in a regulation by the commissioner.~~

~~(a) — If a policy covers more than one classification:~~

~~(i) — For any portion of the coverage identified by a classification on the Allocation Schedule, the tax shall be computed by using the Allocation Schedule for the corresponding portion of the premium;~~

~~(ii) — For any portion of the coverage not identified by a classification on the Allocation Schedule, the tax shall be computed by using an alternative equitable method of~~

## Nonadmitted Insurance Model Act

~~allocation for the property or risk;~~

~~(iii) For any portion of the coverage where the premium is indivisible, the tax shall be computed by using the method of allocation which pertains to the classification describing the predominant coverage.~~

~~(b) If the information provided by the surplus lines licensee is insufficient to substantiate the method of allocation used by the surplus lines licensee, or if the commissioner determines that the licensee's method is incorrect, the commissioner shall determine the equitable and appropriate amount of tax due to this state as follows:~~

~~(i) By use of the Allocation Schedule where the risk is appropriately identified in the schedule;~~

~~(ii) Where the Allocation Schedule does not identify a classification appropriate to the coverage, the commissioner may give significant weight to documented evidence of the underwriting bases and other criteria used by the insurer. The commissioner may also consider other available information to the extent sufficient and relevant, including the percentage of the insured's physical assets in this state, the percentage of the insured's sales in this state, the percentage of income or resources derived from this state, and the amount of premium tax paid to another jurisdiction for the policy.~~

~~**Drafting Note:** Subparagraph (b) above may be included in the Act or in a separate regulation at the option of the state. It is highly recommended that the model Allocation Schedule and reporting form be adopted by regulation in conjunction with the adoption of the above language. In order for the model law to work effectively, the allocation schedules used by the states should be as uniform as possible.~~

HG. Collection of Tax

If the tax owed by a surplus lines licensee under this section has been collected and is not paid within the time prescribed, the same shall be recoverable in a suit brought by the commissioner against the surplus lines licensee and the surety on the bond filed under Subsection HI of this section. The commissioner may charge interest at the rate of [insert number] percent per year for the unpaid tax.

HI. Surplus Lines Licenses

(1) A person shall not procure a contract of surplus lines insurance with a ~~nonadmitted~~ surplus lines insurer unless the person possesses a current surplus lines insurance producer license issued by the commissioner.

(2) The commissioner may issue a resident surplus lines license to a qualified holder of ~~a current underlying~~ property and casualty ~~agent's or broker's or general agent's~~ licenses, but only when the ~~broker or agent~~ producer has:

(a) Remitted the \$[insert amount] annual fee to the commissioner;

(b) Submitted a completed license application on a form supplied by the commissioner;

~~(c) Passed a qualifying examination approved by the commissioner, except that all holders of a license prior to the effective date of this Act shall be deemed to have passed such an examination;~~

~~(c)~~ In the case of a resident agent, filed with the commissioner, and continues to maintain during the term of the license, in force and unimpaired, a bond or errors and omissions (E&O) policy in favor of this state in the penal sum of \$[insert amount] aggregate liability, with corporate sureties approved by the commissioner. The bond or E&O policy shall be conditioned that the Surplus Lines Licensee will conduct business in accordance with the provisions of this Act and will promptly remit the taxes as provided by law. No bond or E&O policy shall be terminated unless at least thirty (30) days prior written notice is

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

given to the licensee and commissioner;

**Drafting note:** Under Public Law No. 106-102 (the “Gramm-Leach-Bliley Act”), it is believed that a requirement for a nonresident agent to file a bond may contravene the reciprocity provisions. The requirement for a resident agent to file a bond would not, seemingly, contravene these provisions, and there may be methodologies whereby such resident bonds could become reciprocal between states. Some states have expressed concern that their bonding requirements constitute important consumer protections, and that elimination of these simply to comply with Gramm-Leach-Bliley may result in unintended consequences, and a lack of Control over possibly unscrupulous nonresident agents.

- (de) If a resident, established and continues to maintain an office in this state, ~~and~~
- (f) ~~Designated the commissioner as agent for service of process, thereby designating the commissioner to be the licensee’s true and lawful attorney upon whom may be served all lawful process in a proceeding instituted by or on behalf of an insured or beneficiary arising out of any contract of insurance, and shall signify its agreement that such service of process is of the same legal force and validity as personal service of process in this state upon the licensee.~~

- (3) A nonresident person shall receive a nonresident surplus lines license if:
  - (a) The person is currently licensed as a surplus lines licensee and in good standing in his or her home state;
  - (b) The person has submitted the proper request for licensure and has paid the fees required by [insert appropriate reference to state law or regulation];
  - (c) The person has submitted or transmitted to the insurance commissioner the application for licensure that the person submitted to his or her home state, or in lieu of the same, a completed Uniform Application; and
  - (d) The person’s home state awards nonresident surplus lines licenses to residents of this state on the same basis.

**Drafting Note:** In accordance with Public Law No. 106-102 (the “Gramm-Leach-Bliley Act”) states should not require any additional attachments to the Uniform Application or impose any other conditions on applicants that exceed the information requested within the Uniform Application. ~~f~~

- (4) The insurance commissioner may verify the person’s licensing status through the Producer Database maintained by the ~~NAICational Association of Insurance Commissioners~~, its affiliates or subsidiaries. ~~f~~
- (5) A nonresident surplus lines licensee who moves from one state to another state or a resident surplus lines licensee who moves from this state to another state shall file a change of address and provide certification from the new resident state within thirty (30) days of the change of legal residence. No fee or license application is required.
- (6) The insurance commissioner shall waive any requirements for a nonresident surplus lines license applicant with a valid license from his or her home state, except the requirements imposed by this subsection, if the applicant’s home state awards nonresident surplus lines licenses to residents of this state on the same basis.
- (7) Each surplus lines license shall expire on [insert date] of each year, and an application for renewal shall be filed before [insert date] of each year upon payment of the annual fee and compliance with other provisions of this section. A surplus lines licensee who fails to apply for renewal of the license

## Nonadmitted Insurance Model Act

before [insert date] shall pay a penalty of \$[insert amount] and be subject to penalties provided by law before the license will be renewed.

**Drafting Note:** States may wish to reference their specific licensing statutes in this section.

**Drafting Note:** Some states allow surplus lines licensees to hold binding authorities on behalf of ~~eligible~~ surplus lines insurers. States which allow such binding authorities might want to establish minimum standards for the related agreements. In addition, states might want to consider requiring surplus lines licensees with such binding authorities to submit the related agreements to state regulators for review and approval.

J. Suspension, Revocation or Nonrenewal of Surplus Lines Licensee's License

The commissioner may suspend, revoke or refuse to renew the license of a surplus lines licensee after notice and an opportunity for a hearing as provided under the applicable provision of this state's laws ~~for upon one or more of the following grounds:~~

- ~~(1) Removal of the resident surplus lines licensee's office from this state;~~
- ~~(2) Removal of the resident surplus lines licensee's office accounts and records from this state during the period during which the accounts and records are required to be maintained under Subsection Q of this section;~~
- ~~(3) Closing of the surplus lines licensee's office for a period of more than thirty (30) business days, unless permission is granted by the commissioner;~~
- ~~(4) Failure to make and file required reports;~~
- ~~(5) Failure to transmit required tax on surplus lines premiums to this state or a reciprocal state to which a tax is owing;~~
- ~~(6) Failure to maintain required bond;~~
- ~~(17) Violation of any provision of this Act; or~~
- ~~(28) For any cause for which an insurance license could be denied, revoked, suspended or renewal refused under Sections [insert applicable citation].~~

K. Actions Against Eligible Surplus Lines Insurers Transacting Surplus Lines Business

- (1) An eligible surplus lines insurer may be sued upon a cause of action arising in this state under a surplus lines insurance contract made by it or evidence of insurance issued or delivered by the surplus lines licensee. A policy issued by the eligible surplus lines insurer shall contain a provision stating the substance of this section and designating the person to whom the commissioner shall mail process.
- (2) The remedies provided in this section are in addition to any other methods provided by law for service of process upon insurers.

L. Duty to File Evidence of Insurance and Affidavits

Within [insert number] days after the placing of any surplus lines insurance, each producing broker shall execute and each surplus lines licensee shall execute where appropriate, and file a written report regarding the insurance which shall be kept confidential by the commissioner, including the following:

- (1) The name and address of the insured;
- (2) The identity of the insurer or insurers;
- (3) A description of the subject and location of the risk;

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- (4) The amount of premium charged for the insurance;
- (5) Such other pertinent information as the commissioner may reasonably require; and
- (6) An affidavit on a standardized form promulgated by the commissioner as to the diligent efforts to place the coverage with admitted insurers and the results of that effort or the insured is an exempt commercial purchaser. The affidavit shall be open to public inspection. The affidavit shall affirm that the insured was expressly advised in writing prior to placement of the insurance that:
  - (a) The surplus lines insurer with whom the insurance was to be placed is not licensed in this state and is not subject to its supervision; and
  - (b) In the event of the insolvency of the surplus lines insurer, losses will not be paid by the state insurance guaranty fund.

**Drafting Note:** Surplus lines licensees will frequently communicate with the insured through a producing broker rather than communicate with the insured directly. In preparing affidavit forms, states may wish to recognize that, as a result of communications passing through the producing broker, the surplus lines licensee may not be in a position to affirm, based upon personal knowledge, that the insured received from the producing broker the written information required by this subsection.

M. Surplus Lines Advisory Organizations

- (1) There is hereby created a nonprofit association to be known as the [insert name]. All surplus lines licensees shall be deemed to be members of the association. The association shall perform its functions under the plan of operation established pursuant to Paragraph (3) of this subsection and must exercise its powers through a board of directors established under Paragraph (2) of this subsection. The association shall be supervised by the commissioner. The association shall be authorized and have the duty to:

**Drafting Note:** The preceding paragraph provides that all surplus lines licensees are “deemed” to be members of the association. Some states, however, may choose not to establish a surplus lines advisory organization; in those states Subsection M would not be necessary.

- (a) Receive, record, and subject to Subparagraph (b) of this paragraph, stamp all surplus lines insurance documents which surplus lines brokers are required to file with the association pursuant to the plan of operation;

**Drafting Note:** Subparagraph (a) of this paragraph authorizes the association to receive, record and stamp all surplus lines documents which must be submitted to the association pursuant to the plan of operation. Documents to be submitted to the association for stamping are likely to vary by state.

- (b) Refuse to stamp submitted insurance documents, if the association determines that a nonadmitted insurer does not meet minimum state financial standards of eligibility, or the commissioner orders the association not to stamp insurance documents pursuant to Paragraph (9) of this subsection. The association shall notify the commissioner and provide an explanation for any refusal to stamp submitted insurance documents other than a refusal based upon the order of the commissioner;
- (c) Prepare and deliver annually to each licensee and to the commissioner a report regarding surplus lines business. The report shall include a delineation of the classes of business procured during the preceding calendar year, in the form the board of directors prescribes;
- (d) Encourage compliance by its members with the surplus lines law of this state and the rules and regulations of the commissioner relative to surplus lines insurance;
- (e) Communicate with organizations of agents, brokers and admitted insurers with respect to the proper use of the surplus lines market;

## Nonadmitted Insurance Model Act

- (f) Employ and retain persons as necessary to carry out the duties of the association;
  - (g) Borrow money as necessary to effect the purposes of the association;
  - (h) Enter contracts as necessary to effect the purposes of the association; and
  - (i) Provide such other services to its members as are incidental or related to the purposes of the association.
- (2) The association shall function through a board of directors elected by the association members, and officers who shall be elected by the board of directors.
- (a) The board of directors of the association shall consist of not less than five (5) nor more than nine (9) persons serving terms as established in the plan of operation. The plan of operation shall provide for the election of a board of directors by the members of the association from its membership. The plan of operation shall fix the manner of voting and may weigh each member's vote to reflect the annual surplus lines insurance premium written by the member.
  - (b) The board of directors shall elect officers as provided for in the plan of operation.
- (3) The association shall establish a plan of operation. The plan of operation shall provide for the formation, operation and governance of the association. The plan and any amendments shall be effective upon approval by the commissioner, which shall not be unreasonably withheld or delayed. All association members shall comply with the plan of operation or any amendments to it. Failure to comply with the plan of operation or any amendments shall constitute a violation of the insurance law and the commissioner may issue an order requiring discontinuance of the violation.
- (4) The association shall file with the commissioner:
- (a) A copy of its plan of operation and any amendments to it;
  - (b) A current list of its members revised at least annually;
  - (c) The name and address of a resident of this state upon whom notices or orders of the commissioner or processes issued at the direction of the commissioner may be served; and
  - (d) An agreement that the commissioner may examine the association in accordance with the provisions of Paragraph (5) of this subsection.
- (5) The commissioner shall, at least once in [insert number] years, make or cause to be made an examination of the association. The reasonable cost of an examination shall be paid by the association upon presentation to it by the commissioner of a detailed account of each cost. The officers, managers, agents, and employees of the association may be examined at any time, under oath, and shall exhibit all books, records, accounts, documents or agreements governing its method of operation. The commissioner shall furnish a copy of the examination report to the association and shall notify the association that it may request a hearing within thirty (30) days on the report or on any facts or recommendations contained in it. If the commissioner finds the association to be in violation of this section, the commissioner may issue an order requiring the discontinuance of the violation. A director may be removed from the association's board of directors by the commissioner for cause, stated in writing, after an opportunity has been given to the director to be heard.
- (6) There shall be no liability on the part of and no causes of action of any nature shall arise against the association, its directors, officers, agents or employees for any action taken or omitted by them in the performance of their powers and duties under this section, absent gross negligence or willful misconduct.

## NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- (7) Within [insert number] days after a surplus lines policy is procured, a licensee shall submit to the association for recording and stamping all documents which surplus lines brokers are required to file with the association. Every insurance document submitted to the association pursuant to this subsection shall set forth:
- (a) The name and address of the insured;
  - (b) The gross premium charged;
  - (c) The name of the nonadmitted insurer; and
  - (d) The class of insurance procured.

**Drafting Note:** The appropriate time limits for submitting documents required for stamping will vary by state.

- (8) It shall be unlawful for an insurance agent, broker or surplus lines broker to deliver in this state any insurance document which surplus lines brokers are required to file with the association unless the insurance document is stamped by the association or is exempt from such requirements. However, a licensee's failure to comply with the requirements of this subsection shall not affect the validity of the coverage.
- (9) The services performed by the association shall be funded by a stamping fee assessed for each premium-bearing document submitted to the association. The stamping fee shall be established by the board of directors of the association from time to time. The stamping fee shall be paid by the insured.
- (10) The commissioner may declare a nonadmitted insurer ineligible and order the association not to stamp insurance documents issued by the nonadmitted insurer and issue any other appropriate order.

NM. Evidence of the Insurance and Subsequent Changes to the Insurance

- (1) Upon placing surplus lines insurance, the surplus lines licensee shall promptly deliver to the insured or the producing broker the policy, or if the policy is not then available, a certificate as described in Paragraph (4) of this subsection, cover note, binder or other evidence of insurance. The certificate described in Paragraph (4) of this subsection, cover note, binder or other evidence of insurance shall be executed by the surplus lines licensee and shall show the description and location of the subject of the insurance, coverages including any material limitations other than those in standard forms, a general description of the coverages of the insurance, the premium and rate charged and taxes to be collected from the insured, and the name and address of the insured and surplus lines insurer or insurers and proportion of the entire risk assumed by each, and the name of the surplus lines licensee and the licensee's license number.
- (2) A surplus lines licensee shall not issue or deliver any evidence of insurance or purport to insure or represent that insurance will be or has been written by any ~~eligible~~ surplus lines insurer, or a nonadmitted insurer ~~pursuant to Section 5C(4)~~, unless the licensee has authority from the insurer to cause the risk to be insured or has received information from the insurer in the regular course of business that the insurance has been granted.
- (3) If, after delivery of any evidence of insurance, there is any change in the identity of the insurers, or the proportion of the risk assumed by any insurer, or any other material change in coverage as stated in the surplus lines licensee's original evidence of insurance, or in any other material as to the insurance coverage so evidenced, the surplus lines licensee shall promptly issue and deliver to the insured or the original producing broker an appropriate substitute for, or endorsement of the original document, accurately showing the current status of the coverage and the insurers responsible for the coverage.
- (4) As soon as reasonably possible after the placement of the insurance, the surplus lines licensee shall deliver a copy of the policy or, if not available, a certificate of insurance to the insured or producing broker to replace any evidence of insurance previously issued. Each certificate or policy of insurance

## Nonadmitted Insurance Model Act

shall contain or have attached a complete record of all policy insuring agreements, conditions, exclusions, clauses, endorsements or any other material facts that would regularly be included in the policy.

~~(5) A surplus lines licensee who fails to comply with the requirements of this subsection shall be subject to the penalties provided in this Act.~~

(56) The surplus lines licensee shall give the following consumer notice to every person, ~~other than exempt commercial purchasers,~~ applying for insurance with a nonadmitted insurer. The notice shall be printed in 16-point type on a separate document affixed to the application. The applicant shall sign and date a copy of the notice to acknowledge receiving it. The surplus lines licensee shall maintain the signed notice in its file for a period of five (5) years from expiration of the policy. The surplus lines licensee shall tender a copy of the signed notice to the insured at the time of delivery of each policy the licensee transacts with a nonadmitted insurer. The copy shall be a separate document affixed to the policy.

*“Notice: ~~1. A “nonadmitted” or “surplus lines” insurer that is not licensed in this state is issuing the insurance policy that you have applied to purchase. These companies are called “nonadmitted” or “surplus lines” insurers. 2. The insurer is not subject to the financial solvency regulation and enforcement that applies to licensed insurers in this state. 3. These insurers generally do not participate in insurance guaranty funds created by state law. These guaranty funds will not pay your claims or protect your assets if the insurer becomes insolvent and is unable to make payments as promised. 4. Some states maintain lists of approved or eligible surplus lines insurers and surplus lines brokers may use only insurers on the lists. Some states issue orders that particular surplus lines insurers can not be used. 5. For additional information about the above matters and about the insurer, you should ask questions of your insurance agent, broker or surplus lines broker. You may also contact your insurance department consumer help line.”~~*

**Drafting Note:** This notice is intended to inform personal lines customers and smaller commercial risks of the nature of the coverage they are purchasing. A state may wish to add language to this statute providing that this notice need not be given to commercial risks meeting defined criteria for size and insurance expertise.

ON. Licensee’s Duty to Notify Insured

- (1) No contract of insurance placed by a surplus lines licensee under this Act shall be binding upon the insured and no premium charged shall be due and payable until the surplus lines licensee or the producing broker ~~shall have~~ notified the insured in writing, in a form acceptable to the commissioner, a copy of which shall be maintained by the licensee or the producing broker with the records of the contract and available for possible examination, that:
  - (a) The insurer [other than a domestic surplus lines insurer] with which the licensee places the insurance is not licensed by this state and is not subject to its supervision; and
  - (b) In the event of the insolvency of the surplus lines insurer, losses will not be paid by the state insurance guaranty fund.
- (2) Nothing herein contained shall nullify any agreement by any insurer to provide insurance.

**Drafting Note:** To ensure the meaningfulness of the notice required by this subsection, the commissioner might want to establish criteria related to readability, ~~type face~~font, and ~~type~~size of the notice.

PO. Effect of Payment to Surplus Lines Licensee

A payment of premium to a surplus lines licensee acting for a person other than itself in procuring, continuing or renewing any policy of insurance procured under this section shall be deemed to be payment to the insurer, whatever conditions or stipulations may be inserted in the policy or contract notwithstanding.

QP. Surplus Lines Licensees May Accept Business from Other Producers

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

A surplus lines licensee may originate surplus lines insurance or accept such insurance from any other producing broker duly licensed as to the kinds of insurance involved, and the surplus lines licensee may compensate the producing broker for the business.

**RE.** Records of Surplus Lines Licensee

(1) Each surplus lines licensee shall keep ~~in this state~~ a full and true record of each surplus lines insurance contract placed by or through the licensee, including a copy of the policy, certificate, cover note or other evidence of insurance showing each of the following items applicable:

- (~~1a~~) Amount of the insurance, risks and perils insured;
- (~~2b~~) Brief description of the property insured and its location;
- (~~3c~~) Gross premium charged;
- (~~4d~~) Any return premium paid;
- (~~5e~~) Rate of premium charged upon the several items of property;
- (~~6f~~) Effective date and terms of the contract;
- (~~7g~~) Name and address of the insured;
- (~~8h~~) Name and address of the insurer;
- (~~9i~~) Amount of tax and other sums to be collected from the insured;
- (~~10~~) ~~Allocation of taxes by state as referred to in Subsection F of this section;~~ and
- (~~11j~~) Identity of the producing broker, any confirming correspondence from the insurer or its representative, and the application.

(2) The record of each contract shall be kept open at all reasonable times to examination by the commissioner without notice for a period not less than five (5) years following termination of the contract. In lieu of maintaining offices in this state, each nonresident surplus lines licensee shall make available to the commissioner any and all records that the commissioner deems necessary for examination.

**Drafting Note:** States may wish to extend the five-year period prescribed for open access to insurance records because of the long-term nature of this business.

**SR.** Reports—Summary of Exported Business

On or before the end of the month following each [insert month, quarter, year], each surplus lines licensee shall file with the commissioner, on forms prescribed by the commissioner, a verified report in duplicate of all surplus lines insurance transacted during the preceding period, showing:

- (1) Aggregate gross premiums written;
- (2) Aggregate return premiums;
- (3) Amount of aggregate tax remitted to this state; and
- (4) Amount of aggregate tax due or remitted to each other state for which an allocation is made pursuant to Subsection ~~GF~~ of this section.

**Drafting Note:** States desiring to have taxes remitted annually may call for more frequent detailed listing of business.

## Nonadmitted Insurance Model Act

T. [OPTIONAL: Domestic Surplus Lines Insurers]

- (1) The commissioner may designate a domestic insurer as a domestic surplus lines insurer upon its application, which shall include, as a minimum, an authorizing resolution of the board of directors and evidence to the commissioner's satisfaction that the insurer has capital and surplus of not less than fifteen million dollars.
- (2) A domestic surplus lines insurer:
- (a) ~~(a)~~ Shall be limited in its authority in this state to providing surplus lines insurance.
- ~~(b)~~ May be authorized to write any type of property and casualty [or accident and health] insurance in this state that may be placed with a surplus lines insurer pursuant to this Subpart.
- (c) Be subject to the legal and regulatory requirements applicable to domestic insurers, except for theas following:
- (i) Premium taxes, fees, and assessments applicable to admitted insurance;
- (ii) Regulation of rates and forms requiring the filing of rates and forms for approval;
- (iii) Assessment or coverage by insurance guaranty funds.]

**Section 6. Insurance Independently Procured—Duty to Report and Pay Tax**

- A. Each insured whose home state is in this state, who procures or continues or renews insurance with a nonadmitted insurer ~~on properties, risks or exposures located or to be performed in whole or in part in this state,~~ other than insurance procured through a surplus lines licensee, shall, within [insert number] days after the date the insurance was so procured, continued or renewed, file a written report with the commissioner, upon forms prescribed by the commissioner, showing the name and address of the insured or insureds, name and address of the insurer, the subject of the insurance, a general description of the coverage, the amount of premium currently charged, and additional pertinent information reasonably requested by the commissioner. ~~For the purposes of this subsection, properties, risks or exposures only partially located or to be performed in this state, which are covered under a multistate policy placed by a surplus lines licensee in another state, shall be deemed to be insurance independently procured unless the insurer is an admitted insurer.~~

**Drafting Note:** Subsection A may need to be revised in those states exempting from taxation insurance procured by nonprofit educational institutions and their employers, from nonprofit educational insurers.

- B. ~~Gross~~ Premiums charged for the insurance, less any return premiums, is subject to a tax at the rate of [insert number] percent. At the time of filing the report required in Subsection A of this section, the insured whose home state is this state shall pay the tax on all taxable pPremium to the commissioner, who shall transmit the same for distribution as provided in this Act.

**Drafting Note:** Existing state laws and procedures may require that the tax report be forwarded to another state agency, such as the Department of the Treasury, rather than to the commissioner. In addition, some states may require the tax to be paid on a periodic basis (e.g., annually) rather than at the time of the filing required by Subsection A. Subsections A and B may need to be revised in these states.

- ~~C.~~ If an independently procured policy covers properties, risks or exposures only partially located or to be performed in this state, the tax payable shall be computed on the portion of the premium properly attributable to the properties, risks or exposures located or to be performed in this state, as set forth in Sections 5F(3) and 5F(4) of this Act.
- ~~C.D.~~ Delinquent taxes hereunder shall bear interest at the rate of [insert number] percent per year.
- ~~D.E.~~ This section does not abrogate or modify, and shall not be construed or deemed to abrogate or modify any other provision of this Act.

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

**Section 7. Penalties**

- A. A person who in this state represents or aids a nonadmitted insurer in violation of this Act may be found guilty of a criminal act and subject to a fine not in excess of \$[insert amount].

**Drafting Note:** Some states might want to specify “misdemeanor” or “felony” rather than “criminal act” in Section 7A.

- B. In addition to any other penalty provided herein or otherwise provided by law, including any suspension, revocation or refusal to renew a license, any person, firm, association or corporation violating any provision of this Act shall be liable to a civil penalty not exceeding \$[insert amount] for the first offense, and not exceeding \$[insert amount] for each succeeding offense.
- C. The above penalties are not exclusive remedies. Penalties may also be assessed under [insert citation to trade practices and fraud statute] of the insurance code of this state.

**Section 8. Violations**

Whenever there is evidence satisfactory to the commissioner ~~believes, from evidence satisfactory to him or her,~~ that a person is violating or about to violate the provisions of this Act, the commissioner may cause a complaint to be filed in the [insert appropriate court] Court for restitution and to enjoin and restrain the person from continuing the violation or engaging in or doing any act in furtherance thereof. The court shall have jurisdiction of the proceeding and shall have the power to make and enter an order of judgment awarding such preliminary or final injunctive relief and restitution as in its judgment is proper.

**Section 9. Service of Process**

- A. Any act of transacting insurance by an unauthorized person or a nonadmitted insurer is equivalent to and shall constitute an irrevocable appointment by the unauthorized person or insurer, binding upon it, its executor or administrator, or successor in interest of the [insert title of appropriate state official] or his or her successor in office, to be the true and lawful attorney of the unauthorized person or insurer upon whom may be served all lawful process in any action, suit or proceeding in any court by the commissioner or by the state and upon whom may be served any notice, order, pleading or process in any proceeding before the commissioner and which arises out of transacting insurance in this state by the unauthorized person or insurer. Any act of transacting insurance in this state by a nonadmitted insurer shall signify its acceptance of its agreement that any lawful process in such court action, suit or proceeding and any notice, order, pleading or process in such administrative proceeding before the commissioner so served shall be of the same legal force and validity as personal service of process in this state upon the unauthorized person or insurer.
- B. Service of process in the action shall be made by delivering to and leaving with the [insert title of appropriate state official], or some person in apparent charge of the office, two (2) copies thereof and by payment to the [insert title of appropriate state official] of the fee prescribed by law. Service upon the [insert title of appropriate state official] as attorney shall be service upon the principal.

**Drafting Note:** Existing state laws and procedures may require that service of process be made upon either the commissioner or another state official.

- C. The [insert title of appropriate state official] shall forward by certified mail one of the copies of the process or notice, order, pleading or process in proceedings before the commissioner to the defendant in the court proceeding or to whom the notice, order, pleading or process in the administrative proceeding is addressed or directed at its last known principal place of business and shall keep a record of all process so served on the commissioner which shall show the day and hour of service. Service is sufficient, provided:
- (1) Notice of service and a copy of the court process or the notice, order, pleading or process in the administrative proceeding are sent within ten (10) days by certified mail by the plaintiff or the plaintiff's attorney in the court proceeding or by the commissioner in the administrative proceeding to the defendant in the court proceeding or to whom the notice, order, pleading or process in the administrative proceeding is addressed or directed at the last known principal place of business of the defendant in the court or administrative proceeding; and

## Nonadmitted Insurance Model Act

- (2) The defendant's receipt or receipts issued by the post office with which the letter is registered, showing the name of the sender of the letter and the name and address of the person or insurer to whom the letter is addressed, and an affidavit of the plaintiff or the plaintiff's attorney in a court proceeding or of the commissioner in an administrative proceeding, showing compliance are filed with the clerk of the court in which the action, suit or proceeding is pending or with the commissioner in administrative proceedings, on or before the date the defendant in the court or administrative proceeding is required to appear or respond, or within such further time as the court or commissioner may allow.
- D. A plaintiff shall not be entitled to a judgment or a determination by default in any court or administrative proceeding in which court process or notice, order, pleading or process in proceedings before the commissioner is served under this section until the expiration of forty-five (45) days from the date of filing of the affidavit of compliance.
- E. Nothing in this section shall limit or affect the right to serve any process, notice, order or demand upon any person or insurer in any other manner now or hereafter permitted by law.
- F. Each nonadmitted insurer assuming insurance in this state, or relative to property, risks or exposures located or to be performed in this state, shall be deemed to have subjected itself to this Act.
- G. ~~Notwithstanding~~Notwithstanding conditions or stipulations in the policy or contract, a nonadmitted insurer may be sued upon any cause of action arising in this state, or relative to property, risks or exposures located or to be performed in this state, under any insurance contract made by it.
- H. ~~Notwithstanding~~Except with regard to exempt commercial purchasers, independently procured insurance, [aviation], and wet marine and transportation insurance, conditions or stipulations in the policy or contract ~~notwithstanding, a nonadmitted insurer subject to arbitration or other alternative dispute resolution mechanism arising in this state or relative to property, risks or exposures located or to be performed in this state under an insurance contract made by it shall conduct the arbitration or other alternative dispute resolution mechanism in this state in the home state of the insured.~~

**Drafting Note:** Provisions of a state's constitution, statutes, regulations, and public policy may necessitate amendment of the prior ~~sub~~Section 9H. States should consider adoption or modification of priorSection 9H in light of their own laws on arbitration or other alternative dispute resolution in insurance and commercial transactions. States should cross-reference their state insurance code to verify the inclusion of "Aviation" within this provision.

- I. A policy or contract issued by the nonadmitted insurer or one which is otherwise valid and contains a condition or provision not in compliance with the requirements of this Act is not thereby rendered invalid but shall be construed and applied in accordance with the conditions and provisions which would have applied had the policy or contract been issued or delivered in full compliance with this Act.

#### Section 10. Legal or Administrative Procedures

- A. Before any nonadmitted insurer files or causes to be filed any pleading in any court action, suit or proceeding or in any notice, order, pleading or process in an administrative proceeding before the commissioner instituted against the person or insurer, by services made as provided in this Act, the insurer shall either:
- (1) Deposit with the clerk of the court in which the action, suit or proceeding is pending, or with the Commissioner of Insurance in administrative proceedings before the commissioner, cash or securities, or file with the clerk or commissioner a bond with good and sufficient sureties, to be approved by the clerk or commissioner in an amount to be fixed by the court or commissioner sufficient to secure the payment of any final judgment which may be rendered in the action or administrative proceeding; or
- (2) Procure a certificate of authority to transact the business of insurance in this state. In considering the application of an insurer for a certificate of authority, for the purposes of this paragraph the commissioner need not assert the provisions of [insert sections of insurance laws relating to retaliation] against the insurer with respect to its application if the commissioner determines that the company would otherwise comply with the requirements for a certificate of authority.

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- B. The Commissioner of Insurance, in any administrative proceeding in which service is made as provided in this Act, may in the commissioner’s discretion, order such postponement as may be necessary to afford the defendant reasonable opportunity to comply with the provisions of Subsection A of this section and to defend the action.
- C. Nothing in Subsection A of this section shall be construed to prevent a nonadmitted insurer from filing a motion to quash a writ or to set aside service thereof made in the manner provided in this Act, on the ground that the nonadmitted insurer has not done any of the acts enumerated in the pleadings.
- D. Nothing in Subsection A of this section shall apply to placements of insurance which were lawful in the [home state of the insured in which the placement took place](#) and which were not unlawful placements under the laws of this state. Without limiting the generality of the foregoing, nothing in Subsection A shall apply to a placement made pursuant to Section 5 of this Act.

## Section 11. Enforcement

- A. The commissioner shall have the authority to proceed in the courts of this state or any other United States jurisdiction to enforce an order or decision in any court proceeding or in any administrative proceeding before the commissioner of Insurance.

### A. Filing and Status of Foreign Decrees

~~A copy of a foreign decree authenticated in accordance with the statutes of this state may be filed in the office of the clerk of any [insert proper court] Court of this state. The clerk, upon verifying with the commissioner that the decree or order qualifies as a “foreign decree” shall treat the foreign decree in the same manner as a decree of a [insert proper court] Court of this state. A foreign decree so filed has the same effect and shall be deemed a decree of a [insert proper court] Court of this state, and is subject to the same procedures, defenses and proceedings for reopening, vacating or staying as a decree of a [insert proper court] Court of this state and may be enforced or satisfied in like manner.~~

### B. Notice of Filing

- (1) ~~At the time of the filing of the foreign decree, the plaintiff shall make and file with the clerk of the court an affidavit setting forth the name and last known post office address of the defendant.~~
- (2) ~~Promptly upon the filing of the foreign decree and the affidavit, the clerk shall mail notice of the filing of the foreign decree to the defendant at the address given and to the commissioner of this state and shall make a note of the mailing in the docket. In addition, the plaintiff may mail a notice of the filing of the foreign decree to the defendant and to the commissioner of this state and may file proof of mailing with the clerk. Lack of mailing notice of filing by the clerk shall not affect the enforcement proceedings if proof of mailing by the plaintiff has been filed.~~
- (3) ~~No execution or other process for enforcement of a foreign decree filed hereunder shall issue until thirty (30) days after the date the decree is filed.~~

**Drafting Note:** This section presumes that the commissioner has authority to proceed without the cooperation of the state’s attorney general. Governing state laws might require that a person other than the commissioner or the attorney general serve as the plaintiff. The title of that person shall be substituted for “commissioner” or “plaintiff” in Section 11 whenever required by state law.

### C. Stay of the Foreign Decree

- (1) ~~If the defendant shows the [insert proper court] Court that an appeal from the foreign decree is pending or will be taken, or that a stay of execution has been granted, the court shall stay enforcement of the foreign decree until the appeal is concluded, the time for appeal expires, or the stay of execution expires or is vacated, upon proof that the defendant has furnished the security for the satisfaction of the decree required by the state in which it was rendered.~~
- (2) ~~If the defendant shows the [insert proper court] Court any ground upon which enforcement of a~~

## Nonadmitted Insurance Model Act

~~decree of any [insert proper court] Court of this state would be stayed, the court shall stay enforcement of the foreign decree for an appropriate period, upon requiring the same security for satisfaction of the decree which is required in this state.~~

- ~~B. D.~~ It shall be the policy of this state that the insurance commissioner shall cooperate with regulatory officials in other United States jurisdictions to the greatest degree reasonably practicable in enforcing lawfully issued orders of such other officials subject to public policy and the insurance laws of the state. Without limiting the generality of the foregoing, the commissioner may enforce an order lawfully issued by other officials provided the order does not violate the laws or public policy of this state.

**Section 12. Suits by Nonadmitted Insurers**

A nonadmitted insurer may not commence or maintain an action ~~in~~ at law or in equity, including arbitration or any other dispute resolution mechanism, in this state to enforce any right arising out of any insurance transaction except with respect to:

- A. Claims under policies lawfully placed pursuant to the law of the home state of the insured~~written in this state~~;
- B. Liquidation of assets and liabilities of the insurer (other than collection of new premium), resulting from its former authorized operations in this state;
- C. Transactions subsequent to issuance of a policy not covering domestic risks at the time of issuance, and lawfully procured under the laws of the jurisdiction where the transaction took place;
- D. Surplus lines insurance placed by a licensee under authority of Section 5 of this Act;
- E. Reinsurance placed under the authority of [insert citations of state's reinsurance intermediary act and other reinsurance laws];
- F. The continuation and servicing of life insurance, health insurance policies or annuity contracts remaining in force as to residents of this state where the formerly authorized insurer has withdrawn from the state and is not transacting new insurance in the state;
- e G. Servicing of policies written by an admitted insurer in a state to which the insured has moved but in which the company does not have a certificate of authority until the term expires;
- H. Claims under policies covering wet marine and transportation insurance;
- I. Placements of insurance which were lawful in the jurisdiction in which the transaction took place and which were not unlawful placements under the laws of this state.

**Drafting Note:** Provisions of a state's constitution, statutes, regulations, and public policy may necessitate amendment of the opening paragraph of this section.

**Section 13. ~~Separability Severability Clause of Provisions~~**

If any provisions of this Act, or the application of the provision to any person or circumstance, shall be held invalid, the remainder of the Act and the application of the provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

**Section 14. Effective Date**

This Act shall take effect [insert appropriate date].

Casualty Actuarial and Statistical (C) Task Force  
Virtual Meeting (*in lieu of meeting at the 2023 Spring National Meeting*)  
March 7, 2023

The Casualty Actuarial and Statistical (C) Task Force met March 7, 2023. The following Task Force members participated: Chris Nicolopoulos, Chair, represented by Christian Citarella (NH); Chlora Lindley-Myers, Vice Chair, represented by Julie Lederer (MO); Lori K. Wing-Heier represented by Sian Ng-Ashcraft (AK); Mark Fowler represented by Charles Hale (AL); Ricardo Lara represented by Mitra Sanandajifar and Lynne WehmueLLer (CA); Andrew N. Mais represented by Wanchin Chou (CT); Michael Yaworsky represented by Greg Jaynes (FL); Doug Ommen represented by Travis Grassel (IA); Dana Popish Severinghaus represented by Reid McClintock (IL); Amy L. Beard represented by Larry Steinert (IN); Vicki Schmidt represented by Nicole Boyd (KS); James J. Donelon represented by John Sobhanian (LA); Kathleen A. Birrane represented by Walter Dabrowski (MD); Timothy N. Schott represented by Sandra Darby (ME); Anita G. Fox represented by Kevin Dyke (MI); Grace Arnold represented by Phil Vigliaturo (MN); Troy Downing represented by Mari Kindberg (MT); Eric Dunning represented by Michael Muldoon (NE); Marlene Caride represented by Carl Sornson (NJ); Jennifer Catechis represented by Anna Krylova (NM); Scott Kipper represented by Gennady Stolyarov (NV); Judith L. French represented by Tom Botsko (OH); Glen Mulready represented by Kate Yang (OK); Andrew R. Stolfi represented by David Dahl, Brian Fordham, and Ying Liu (OR); Michael Humphreys represented by Michael McKenney (PA); Michael Wise represented by Will Davis (SC); Cassie Brown represented by J'ne Byckovski and Miriam Fisk (TX); Kevin Gaffney represented by Rosemary Raszka (VT); Mike Kreidler represented by Eric Slavich (WA); and Allan L. McVey represented by Juanita Wimmer (WV).

1. Adopted its Jan. 31, 2023; Jan. 27, 2023; Jan. 10, 2023; Jan. 3, 2023; Dec. 9, 2022; and 2022 Fall National Meeting Minutes

Citarella said the Task Force met Jan. 10, 2023, and conducted e-votes that concluded on Jan. 31, 2023; Jan. 27, 2023; Jan. 3, 2023; and Dec. 9, 2022. The Jan. 10 minutes include exposure of the Generalized Additive Model (GAM) Appendix for a 45-day public comment period ending Feb. 24. The e-vote minutes include adoption of the following statistical reports: 2020 *Dwelling, Fire, Homeowners Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owner's Insurance Report* (Homeowner Report); 2021 *Competition Database Report* (Competition Report); 2019/2020 *Auto Insurance Database Report* (Auto Report); and the 2021 *Report on Profitability by Line by State* (Profitability Report).

Botsko made a motion, seconded by Darby, to adopt the Task Force's Jan. 31, 2023 (Attachment One); Jan. 27, 2023 (Attachment Two); Jan. 10, 2023 (Attachment Three); Jan. 3, 2023 (Attachment Four); Dec. 9, 2022 (Attachment Five); and Nov. 8, 2022 (*see NAIC Proceedings – Fall 2022, Casualty Actuarial and Statistical (C) Task Force*) minutes. The motion passed unanimously.

2. Adopted the Report of the Actuarial Opinion (C) Working Group

Fisk said the Actuarial Opinion (C) Working Group met Jan. 26 to discuss draft changes to the 2023 actuarial opinion instructions and a draft response to the referral from the Financial Analysis (E) Working Group on the use of predictive analytics in reserving.

Fisk said the Actuarial Opinion (C) Working Group discussed potential changes to the qualification documentation requirement in the opinion instructions, but it ultimately decided not to propose any substantive changes to the property/casualty (P/C) and title instructions. The Working Group provided two editorial corrections to the 2023

instructions to Blanks (E) Working Group staff. The Actuarial Opinion (C) Working Group plans to meet later this year to discuss potential changes to the 2024 actuarial opinion instructions.

The Working Group discussed a draft response to the referral from the Financial Analysis (E) Working Group regarding the use of predictive analytics in reserving. The Actuarial Opinion (C) Working Group plans to continue the discussion on this topic before responding to the referral later this year.

Fisk made a motion, seconded by Lederer, to adopt the report of the Actuarial Opinion (C) Working Group, including its amended Jan. 26 minutes (Attachment Six). The motion passed unanimously.

### 3. Adopted the Report of the Statistical Data (C) Working Group

Darby said the Statistical Data (C) Working Group met twice since the 2022 Fall National Meeting. The first meeting was a regulator-to-regulator session to review a Tableau dashboard created by NAIC staff based on data from the Profitability Report. Darby said NAIC staff are working to develop similar dashboards using data from the Auto Report and the Homeowners Report. She said the goal of the dashboards is to develop regulatory training on the availability and uses of statistical data by the end of 2023.

The Working Group's second meeting was held Feb. 23. During this meeting, the Working Group adopted a proposal to create an Auto Insurance Average Premium Supplement to fast-track the reporting of average premium data. Darby said the supplement will exist in addition to the full Auto Report. The Working Group also discussed proposed changes to the statistical reports. Darby said these proposed changes, under review since last fall, are prompting interesting discussions on what kinds of data are included in the reports and how that data is presented.

Darby said NAIC staff are currently checking data for the 2021 Homeowners Report and the 2021 Auto Insurance Average Premium Supplement. Both reports are scheduled to be released this spring.

Darby made a motion, seconded by Chou, to adopt the report of the Statistical Data (C) Working Group, including its Feb. 23 minutes (Attachment Seven). The motion passed unanimously.

### 4. Adopted the GAM Regulatory Guidance

Citarella said Sam Kloese (NAIC) presented at the Jan. 10 meeting about GAMs. At that meeting, the Task Force exposed the GAM Regulatory Guidance for a 45-day public comment period ending Feb. 24. Numerous comment letters were received (Attachment Eight). Kloese said he documented the revisions made to the guidance based on comments submitted (Attachment Nine).

Darby made a motion, seconded by Steinert, to adopt the GAM Regulatory Guidance (Attachment Ten). The motion passed unanimously.

### 5. Eliminated the Expense Constant Supplement

Citarella said the Task Force discussed the potential elimination of the NAIC Expense Constant Supplement for a perceived lack of need at the 2022 Fall National Meeting and exposed the idea for a 45-day public comment period ending Dec. 22, 2022. No comments were received. Steinert said the new loss cost multiplier (LCM) forms include the option to use an expense constant, so the separate Expense Constant Supplement is not needed.

Steinert made a motion, seconded by Davis, to eliminate the Expense Constant Supplement. The motion passed unanimously.

#### 6. Discussed a Communication Plan Regarding New LCM Forms

Citarella said the next steps with the LCM forms are to update the NAIC's website and begin communication to state insurance regulators. He said he would expect the Task Force to recommend that states consider implementing the new forms and/or making similar changes to their state forms. He said these types of forms are sometimes in state regulations and laws, where it would take a significant amount of time for implementation. He suggested sending a letter to states, asking for the distribution of the forms in System for Electronic Rates & Forms Filing (SERFF) announcements, and notifying affected committee groups. Wehmueller said it would be unlikely that California can implement the revised forms.

#### 7. Heard Reports from Professional Actuarial Organizations

The American Academy of Actuaries' (Academy's) Committee on Property and Liability Financial Reporting (COPLFR) and Casualty Practice Council (CPC), the Actuarial Board for Counseling and Discipline (ABCD), the Casualty Actuarial Society (CAS), and the Society of Actuaries (SOA) provided reports on current activities.

#### 8. Discussed Other Matters

Lederer will lead a regulatory discussion about the second exposure draft of the Actuarial Standard of Practice (ASOP) 29: Expense Provisions for Prospective Property/Casualty Risk Transfer and Risk Retention. Any state insurance regulator can participate in a March 30 call to evaluate the draft for any regulatory issues. If issues are identified, the Task Force will then discuss and consider sending a comment letter by the May 1 comment deadline.

Citarella asked Task Force members to request Book Club topics by sending those to Kloese.

Citarella said the NAIC is developing new training on the regulatory review of generalized linear models (GLMs). Kris DeFrain (NAIC) said the training will explain what state insurance regulators should look for, how to read the graphs and understand the content, and how to assess the model. Vigliaturo requested that the training also be developed to assist technical staff who are not actuaries.

Citarella said he will arrange an ad hoc meeting of P/C actuaries at the Spring National Meeting. He suggested that the Task Force attend the Big Data and Artificial Intelligence (H) Working Group meeting at the Spring National Meeting or watch it virtually, where modeling questions for all types of company models will be discussed. He said the Working Group's work overlaps with some of the Task Force's work, so it is important to monitor the Working Group's activities related to modeling.

Having no further business, the Casualty Actuarial and Statistical (C) Task Force adjourned.

Draft: 2/2/23

Casualty Actuarial and Statistical (C) Task Force  
E-Vote  
January 31, 2023

The Casualty Actuarial and Statistical (C) Task Force conducted an e-vote that concluded Jan. 31, 2023. The following Task Force members participated: Mike Kreidler, Chair, represented by Eric Slavich (WA); Andrew N. Mais represented by Wanchin Chou (CT); Karima M. Woods represented by David Christhlf (DC); TBD represented by Christina Huff (FL); Doug Ommen represented by Travis Grassel (IA); Dana Popish Severinghaus represented by Reid McClintock (IL); Amy L. Beard represented by Larry Steinert (IN); Vicki Schmidt represented by Nicole Boyd (KS); Kathleen A. Birrane represented by Robert Baron (MD); Timothy N. Schott represented by Sandra Darby (ME); Troy Downing represented by Mari Kindberg (MT); Mike Causey represented by Richard Kohan (NC); Eric Dunning represented by Michael Muldoon (NE); Chris Nicolopoulos represented by Christian Citarella (NH); Marlene Caride represented by Carl Sornson (NJ); Jennifer Catechis represented by Anna Krylova (NM); Judith L. French represented by Tom Botsko (OH); Glen Mulready represented by Andrew Schallhorn (OK); Michael Wise represented by Will Davis (SC); Cassie Brown represented by J'ne Byckovski (TX); Kevin Gaffney represented by Rosemary Raszka (VT); and Allan L. McVey (WV).

1. Adopted the Competition Report

The Task Force conducted an e-vote to consider adoption of the *2021 Competition Database Report* (Competition Report). The motion passed unanimously.

Having no further business, the Casualty Actuarial and Statistical (C) Task Force adjourned.

Draft: 1/31/23

Casualty Actuarial and Statistical (C) Task Force  
E-Vote  
January 27, 2023

The Casualty Actuarial and Statistical (C) Task Force conducted an e-vote that concluded Jan. 27, 2023. The following Task Force members participated: Mike Kreidler, Chair, represented by Eric Slavich (WA); Andrew N. Mais represented by Wanchin Chou (CT); Karima M. Woods represented by David Christhilf (DC); TBD represented by Christina Huff (FL); Doug Ommen represented by Travis Grassel (IA); Dana Popish Severinghaus represented by Reid McClintock (IL); Amy L. Beard represented by Larry Steinert (IN); Vicki Schmidt represented by Nicole Boyd (KS); James J. Donelon represented by Nichole Torblaa (LA); Kathleen A. Birrane represented by Robert Baron (MD); Timothy N. Schott represented by Sandra Darby (ME); Anita G. Fox represented by Kevin Dyke (MI); Chlora Lindley-Myers represented by Julie Lederer (MO); Troy Downing represented by Mari Kindberg (MT); Mike Causey represented by Richard Kohan (NC); Chris Nicolopoulos represented by Christian Citarella (NH); Marlene Caride represented by Carl Sornson (NJ); Jennifer Catechis represented by Anna Krylova (NM); Judith L. French represented by Tom Botsko (OH); Glen Mulready represented by Cuc Nguyen and Andrew Schallhorn (OK); Andrew R. Stolfi represented by David Dahl (OR); Michael Wise represented by Will Davis (SC); Cassie Brown represented by J'ne Byckovski (TX); Kevin Gaffney represented by Rosemary Raszka (VT); and Allan L. McVey (WV).

1. Adopted the 2019/2020 Auto Report

The Task Force conducted an e-vote to consider adoption of the *2019/2020 Auto Insurance Database Report* (Auto Report). The motion passed unanimously.

Having no further business, the Casualty Actuarial and Statistical (C) Task Force adjourned.

Draft: 1/23/23

Casualty Actuarial and Statistical (C) Task Force  
Virtual Meeting  
January 10, 2023

The Casualty Actuarial and Statistical (C) Task Force met Jan. 10, 2023. The following Task Force members participated: Mike Kreidler, Chair, represented by Eric Slavich (WA); Grace Arnold, Vice Chair, represented by Phil Vigliaturo (MN); Mark Fowler represented by Charles Hale (AL); Ricardo Lara represented by Mitra Sanandajifar and Lynne Wehmueller (CA); Michael Conway represented by Mitchell Bronson (CO); Andrew N. Mais represented by Wanchin Chou (CT); David Altmaier represented by Greg Jaynes (FL); Colin M. Hayashida represented by Randy Jacobson (HI); Dana Popish Severinghaus represented by Reid McClintock and Judy Mottar (IL); Vicki Schmidt represented by Nicole Boyd (KS); James J. Donelon represented by Nichole Torblaa and Arthur Schwartz (LA); Kathleen A. Birrane represented by Walter Dabrowski (MD); Chlora Lindley-Myers represented by Cynthia Amann and Julie Lederer (MO); Chris Nicolopoulos represented by Christian Citarella (NH); Marlene Caride represented by Sam Sackey (NJ); Russell Toal represented by Anna Krylova (NM); Barbara D. Richardson represented by Gennady Stolyarov (NV); Judith L. French represented by Tom Botsko (OH); Glen Mulready represented by Andrew Schallhorn (OK); Andrew Stolfi represented by David Dahl and Ying Liu (OR); Michael Humphreys represented by Michael McKenney (PA); Michael Wise represented by Will Davis (SC); Cassie Brown represented by J'ne Byckovski (TX); Kevin Gaffney represented by Rosemary Raszka (VT); and Allan L. McVey represented by Juanita Wimmer (WV).

1. Exposed the Draft GAM Appendix

Sam Kloese (NAIC) presented about Generalized Additive Models (GAMs) (Attachment Three-A). He said the draft GAM appendix to the white paper *Regulatory Review of Predictive Models* has tracked changes showing how the GAM appendix would differ from the already-adopted Generalized Linear Model (GLM) appendix (Attachment Three-B). At the chair's request, the appendix was exposed for a 45-day public comment period ending Feb. 24. No members objected.

Having no further business, the Casualty Actuarial and Statistical (C) Task Force adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/C CMTE/2023\_Spring/CASTF/011023 min.docx

## Introduction

- GLMs are industry standard
- The CASTF White Paper for Predictive Models is focused primarily on GLM's
- New Appendix for Tree Based Models has already been adopted
- New proposed appendix will cover GAMs
  - GAMs are similar to GLMs with just a few differences
  - The original GLM appendix was used as a starting point

## Similarity to GLM's

- GAMs are an extension of GLMs
- GAMs have many of the same elements
  - Multiple terms in the Regression functions to model the target variable
  - Allows selecting a distribution from the exponential distribution family (Poisson, Gamma, Tweedie...)
  - Link Function defines the relationship between the linear predictor and the mean (log link, logistic link...)
  - Offset terms can be added
  - Records can be weighted (exposures in a frequency model...)

```
gam_final <- gam(claim_count ~ pol_coverage + pol_usage +
  s(drv_age1, k = 4) + s(vh_age, k = 4) +
  te(vh_din, vh_weight, k = 3),
  family = poisson(link = "log"),
  offset = log(exposures),
  data = training_data)
```

## Similarity to GLM's

- GAM is like a GLM with the addition of smoothed terms
  - LM (Least squares):  $\mu = \beta_0 + X_1\beta_1 + \dots$
  - GLM:  $g(\mu) = \beta_0 + X_1\beta_1 + \dots$
  - GAM:  $g(\mu) = \beta_0 + X_1\beta_1 + \dots + f_1(X_1) + \dots$
- LM to GLM to GAM
  - A LM is a special case of GLM
    - Distribution: Normal
    - Link Function: Identity
  - A GLM is a special case of GAM
    - No smoothed terms

## Smooth functions

- Smooth functions are comprised of basis functions
- Modeling software allows you to set the type and number of the basis functions
- The overall impact of the smooth can be visualized and analyzed
- There are many types
  - Thin Plate
  - Cubic Splines
  - Random Effect
  - P Splines
  - Factor smooths

## Polynomial Basis Example

## GAM is a type of Penalized Regression

- Other forms of penalized regression
  - Lasso, Ridge, Elastic Net
- GAM Penalized Log-Likelihood
  - The smoothing parameter  $\lambda$  controls the penalty for the wiggleness of the model
  - The  $\lambda$  balances model fit vs. model complexity

$$L_p = \underbrace{L(\beta)}_{\text{Maximum Likelihood as in the GLM}} - \underbrace{\frac{1}{2} \lambda \beta^T S \beta}_{\text{Penalty to discourage overfitting - wiggleness}}$$

## GAM is a type of Penalized Regression

### HadCRUT4 time series

HadCRUT4 is a global temperature dataset, providing gridded temperature anomalies across the world as well as averages for the hemispheres and the globe as a whole.

The smaller the  $\lambda$  the wigglier the fit.

The modeler sets smooths and related  $k$  values, the software typically chooses  $\lambda$ .

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

4/3/2023 7

## Complications from Smoothed Terms

- Smoothed terms have multiple beta coefficients
  - Relationship no longer summarized within 1 single number
  - The impact of the smoothed term is hard to interpret without plots
- P-values are less straightforward
  - The calculation changes for penalized regression methods
  - The mgcv package provides p-values, but they are approximate
- Smoothed terms introduce the risk of “concurvity”
  - Concurvity is similar to the concept of collinearity in the parametric (non-smoothed) terms
  - Concurvity is when the smoothed terms move together

NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

4/3/2023 8

## Recommendations for Smoothed Terms

1. Review plots for each smoothed term
2. Review approximate p-value for each smoothed term
3. Review concavity metrics

## Recommendations for Reviewing Plots

- Focus on the reasonability of the aggregate smooth [Level 1 item]
  - Does the shape match the rational explanation?
- Place less focus on smooth type and underlying basis functions [Level 4 item]
- Consider if the confidence intervals are extremely wide
- Consider if the smooth seems overly noisy or overly smooth
- Consider if the smooth appears like it will extrapolate correctly
  - Look at the far left and far right sides
  - Look at areas with thinner data

Extremely wide confidence intervals  
Fails horizontal line test

Different smooth types or more basis functions are not necessarily materially different

## Recommendations for Reviewing Approximate P-values

- Approximate p-values are provided by the mgcv package in R
- Smoothed term p-values don't account for uncertainty in  $\lambda$
- P-values are biased low, a lower threshold may be appropriate

```
##
## Family: poisson
## Link function: log
##
## Formula:
## claim_count ~ pol_coverage + pol_usage + s(drv_age1, k = 4) +
## s(vh_age, k = 4) + te(vh_din, vh_weight, k = 3)
##
## Parametric coefficients:
##              Estimate Std. Error z value Pr(>|z|)
## (Intercept)  -1.17696    0.18626  -6.319 2.63e-10 ***
## pol_coverageMedian1 -0.05899    0.03944  -1.496 0.134755
## pol_coverageMedian2 -0.13774    0.02885  -4.775 1.80e-06 ***
## pol_coverageMini   -0.59877    0.05396 -11.097 < 2e-16 ***
## pol_usageProfessional -0.40514    0.18800  -2.155 0.031163 *
## pol_usageRetired   -0.71978    0.18835  -3.822 0.000133 ***
## pol_usageWorkPrivate -0.59133    0.18624  -3.175 0.001498 **
## ---
## Signif. codes:  0 '***' 0.001 '**' 0.01 '*' 0.05 '.' 0.1 ' ' 1
##
## Approximate significance of smooth terms:
##              edf Ref.df Chi.sq p-value
## s(drv_age1)    2.870  2.988  11.75 0.00653 **
## s(vh_age)      2.207  2.591 173.96 < 2e-16 ***
## te(vh_din,vh_weight) 6.453  7.073 176.90 < 2e-16 ***
## ---
## Signif. codes:  0 '***' 0.001 '**' 0.01 '*' 0.05 '.' 0.1 ' ' 1
##
## R-sq.(adj) =  0.0156  Deviance explained =  2.9%
## UBRE = -0.36299  Scale est. =  1          n = 79995
```

## Recommendations for Reviewing Concurvity

- MgcV provides 3 versions of concurvity metrics: worst, observed, estimate
- Worst is the most pessimistic view
- Rule of thumb, a worst concurvity > 0.8 is too high for a smoothed term

```
concurvity(gam_final, full = TRUE)
```

```
##              para s(drv_age1) s(vh_age) te(vh_din,vh_weight)
## worst  0.9990397  0.64082722  0.5583683  0.2826454
## observed 0.9990397  0.05038042  0.5504003  0.1831978
## estimate 0.9990397  0.42190878  0.5073782  0.1054095
```

## GLM Tests that are still applicable

- Overall model fit tests
  - Quantile Plots (Lift Curves)
  - Lorenz Curves (Measures segmentation power)
- Significance by term
  - (Approximate) P-value
  - Confidence Intervals (within plots)
  - AIC\* would ideally decrease after each term added
  - F nested model test
  - Residual Plots
  - Univariate Observed Average vs. Predicted Average

Formula	Predictors	AIC
~pol_coverage	1	75,573
~pol_coverage + pol_usage	2	75,422
~pol_coverage + pol_usage + s(drv_age1, k = 4)	3	75,406
~pol_coverage + pol_usage + s(drv_age1, k = 4) + s(vh_age, k = 4)	4	75,118
~pol_coverage + pol_usage + s(drv_age1, k = 4) + s(vh_age, k = 4) + te(vh_dln, vh_weight, k = 3)	5	74,955

\*The formula for AIC is different from a GLM, but is still readily available in R

**APPENDIX B – INFORMATION ELEMENTS AND GUIDANCE FOR A REGULATOR TO MEET BEST PRACTICES’ OBJECTIVES (WHEN REVIEWING GLMSGAMS)**

This appendix identifies the information a state insurance regulator may need to review a predictive model used by an insurer to support a personal automobile or home insurance rating plan. The list is lengthy but not exhaustive. It is not intended to limit the authority of a regulator to request additional information in support of the model or filed rating plan. Nor is every item on the list intended to be a requirement for every filing. However, the items listed should help guide a regulator to sufficient information that helps determine if the rating plan meets state-specific filing and legal requirements.

Documentation of the design and operational details of the model will help ensure the business continuity and transparency of the models used. Documentation should be sufficiently detailed and complete to enable a qualified third party to form a sound judgment on the suitability of the model for the intended purpose. The theory, assumptions, methodologies, software, and empirical bases should be explained, as well as the data used in developing and implementing the model. Relevant testing and ongoing performance testing need to be documented. Key model limitations and overrides need to be pointed out so that stakeholders understand the circumstances under which the model does not work effectively. End-user documentation should be provided and key reports using the model results described. Major changes to the model need to be documented and shared with regulators in a timely and appropriate manner. Information technology (IT) controls should be in place, such as a record of versions, change control, and access to the model.<sup>1</sup>

Many information elements listed below are probably confidential, proprietary, or trade secret and should be treated as such, in accordance with state laws and/or regulations. Regulators should be aware of their state laws and/or regulations on confidentiality when requesting data from insurers that may be proprietary or trade secret. For example, some proprietary models may have contractual terms (with the insurer) that prevent disclosure to the public. Without clear necessity, exposing this data to additional dissemination may compromise the model’s protection.<sup>2</sup>

Although the list of information is long, the insurer should already have internal documentation on the model for more than half of the information listed. The remaining items on the list require either minimal analysis (approximately 25%) or deeper analysis to generate for a regulator (approximately 25%).

The “Level of Importance to the Regulator’s Review” is a ranking of information a regulator may need to review which is based on the following level criteria:

**Level 1** – This information is necessary to begin the review of a predictive model. These data elements pertain to basic information about the type and structure of the model, the data and variables used, the assumptions made, and the goodness of fit. Ideally, this information would be included in the filing documentation with the initial submission of a filing made based on a predictive model.

**Level 2** – This information is necessary to continue the review of all but the most basic models, such as those based only on the filer’s internal data and only including variables that are in the filed rating plan. These data elements provide more detailed information about the model and address questions arising from review of the information in Level 1. Insurers concerned with speed to market may also want to include this information in the filing documentation.

**Level 3** – This information is necessary to continue the review of a model where concerns have been raised and not resolved based on review of the information in Level 1 and Level 2. These data elements address even more detailed aspects of the model. This information does not necessarily need to be included with the initial submission, unless specifically requested by a particular state, as it is typically requested only if the reviewer has concerns that the model may not comply with state laws and/or regulations.

**Level 4** – This information is necessary to continue the review of a model where concerns have been raised and not resolved based on the information in Level 1, Level 2, and Level 3. This most granular level of detail is addressing the basic building blocks of the model and does not necessarily need to be included by the filer with the initial submission, unless specifically requested by a particular state. It is typically requested only if the reviewer has serious concerns that the model may produce rates or rating factors that are excessive, inadequate, and/or unfairly discriminatory.

Lastly, although the best practices presented in this white paper will readily be transferrable to review of other predictive models, the information elements presented here might be useful only with deeper adaptations when starting to review different types of predictive

<sup>1</sup> Bourdeau, M., 2016. “Model Risk Management: An Overview,” The Modeling Platform, Issue 4, December. Accessed online at <https://www.soa.org/globalassets/assets/library/newsletters/the-modeling-platform/2016/december/mp-2016-iss4.pdf>.

<sup>2</sup> There are some models that are made public by the vendor and would not result in a hindrance of the model’s protection.

models. If the model is not a GLM, some listed items might not apply; e.g., not all predictive models generate p-values or F tests. Depending on the model type, other considerations might be important but are not listed here. When information elements presented in this appendix are applied to lines of business other than personal automobile and home insurance or other type of models, unique considerations may arise. In particular, data volume and credibility may be lower for other lines of business. Regulators should be aware of the context in which a predictive model is deployed, the uses to which the model is proposed to be put, and the potential consequences the model may have on the insurer, its customers, and its competitors. This white paper does not delve into these possible considerations, but regulators should be prepared to address them as they arise.

**A. SELECTING MODEL INPUT**

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>1. Available Data Sources</b>			
A.1.a	Review the details of sources for both insurance and non-insurance data used as input to the model (only need sources for filed input characteristics included in the filed model).	1	<p>Request details of data sources, whether internal to the company or from external sources. For insurance experience (policy or claim), determine whether data are aggregated by calendar, accident, fiscal, or policy year and when it was last evaluated. For each data source, get a list of all data elements used as input to the model that came from that source. For insurance data, get a list all companies whose data is included in the datasets.</p> <p>Request details of any non-insurance data used (customer-provided or other), whether the data was collected by use of a questionnaire/checklist, whether data was voluntarily reported by the applicant, and whether any of the data is subject to the federal Fair Credit Reporting Act (FCRA). If the data is from an outside source, find out what steps were taken to verify the data was accurate, complete, and unbiased in terms of relevant and representative time frame, representative of potential exposures, and lacking in obvious correlation to protected classes.</p> <p><b>Note:</b> Reviewing source details should not make a difference when the model is new or refreshed; refreshed models would report the prior version list with the incremental changes due to the refresh.</p>
A.1.b	Reconcile aggregated insurance data underlying the model with available external insurance reports.	4	Accuracy of insurance data should be reviewed. It is assumed that the data in the insurer's data banks is subject to routine internal company audits and reconciliation. "Aggregated data" is straight from the insurer's data banks without further modification (i.e., not scrubbed or transformed for the purposes of modeling). In other words, the data would not have been specifically modified for the purpose of model building. The company should provide some form of reasonability check that the data makes sense when checked against other audited sources.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
A.1.c	Review the geographic scope and geographic exposure distribution of the raw data for relevance to the state where the model is filed.	2	Many models are developed using a countrywide or a regional dataset. The company should explain how the data used to build the model makes sense for a specific state. The regulator should inquire which states were included in the data underlying the model build, testing, and validation. The company should provide an explanation where the data came from geographically and that it is a good representation for a state; i.e., the distribution by state should not introduce a geographic bias. However, there could be a bias by peril or wind-resistant building codes. Evaluate whether the data is relevant to the loss potential for which it is being used. For example, verify that hurricane data is only used where hurricanes can occur.
<b>2. Sub-Models</b>			
A.2.a	Consider the relevance of (i.e., whether there is bias) of overlapping data or variables used in the model and sub-models.	1	Check if the same variables/datasets were used in the model, a sub-model, or as stand-alone rating characteristics. If so, verify the insurance company has processes and procedures in place to assess and address double-counting or redundancy.
A.2.b	Determine if the sub-model was previously approved (or accepted) by the regulatory agency.	1	If the sub-model was previously approved/accepted, that may reduce the extent of the sub-model's review. If approved, obtain the tracking number(s) (e.g., state, SERFF) and verify when and if it was the same model currently under review.  Note: A previous approval does not necessarily confer a guarantee of ongoing approval; e.g., when statutes and/or regulations have changed or if a model's indications have been undermined by subsequent empirical experience. However, knowing whether a model has been previously approved can help focus the regulator's efforts and determine whether the prior decision needs to be revisited. In some circumstances, direct dialogue with the vendor could be quicker and more useful.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
A.2.c	Determine if the sub-model output was used as input to the <b>GEMGAM</b> ; obtain the vendor name, as well as the name and version of the sub-model.	1	<p>To accelerate the review of the filing, it may be desirable to request (from the company), the name and contact information for a vendor representative. The company should provide the name of the third-party vendor and a contact in the event the regulator has questions. The “contact” can be an intermediary at the insurer (e.g., a filing specialist), who can place the regulator in direct contact with a subject-matter expert (SME) at the vendor.</p> <p>Examples of such sub-models include credit/financial scoring algorithms and household composite score models. Sub-models can be evaluated separately and in the same manner as the primary model under evaluation. A sub-model contact for additional information should be provided. Sub-model SMEs may need to be brought into the conversation with regulators (whether in-house or third-party sub-models are used).</p>
A.2.d	If using catastrophe model output, identify the vendor and the model settings/assumptions used when the model was run.	1	<p>To accelerate the review of the filing, get contact information for the SME that ran the model and an SME from the vendor. The “SME” can be an intermediary at the insurer (e.g., a filing specialist), who can place the regulator in direct contact with the appropriate SMEs at the insurer or model vendor.</p> <p>For example, it is important to know hurricane model settings for storm surge, demand surge, and long-term/short-term views.</p>
A.2.e	Obtain an explanation of how catastrophe models are integrated into the model to ensure no double-counting.	1	<p>If a weather-based sub-model is input to the <b>GLM GAM</b> under review, loss data used to develop the model should not include loss experience associated with the weather-based sub-model. Doing so could cause distortions in the modeled results by double-counting such losses when determining relativities or loss loads in the filed rating plan.</p> <p>For example, redundant losses in the data may occur when non-hurricane wind losses are included in the data while also using a severe convective storm model in the actuarial indication. Such redundancy may also occur with the inclusion of fluvial or pluvial flood losses when using a flood model or inclusion of freeze losses when using a winter storm model.</p>
A.2.f	If using output of any scoring algorithms, obtain a list of the variables used to determine the score and provide the source of the data used to calculate the score.	1	Any sub-model should be reviewed in the same manner as the primary model that uses the sub-model's output as input. Depending on the result of item A.2.b, the importance of this item may be decreased.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>3. Adjustments to Data</b>			
A.3.a	Determine if premium, exposure, loss, or expense data were adjusted (e.g., developed, trended, adjusted for catastrophe experience, or capped). If so, how? Do the adjustments vary for different segments of the data? If so, identify the segments and how the data was adjusted.	2	<p>The rating plan or indications underlying the rating plan may provide special treatment of large losses and non-modeled large loss events. If such treatments exist, the company should provide an explanation how they were handled. These treatments need to be identified and the company/regulator needs to determine whether model data needs to be adjusted.</p> <p>For example, should large bodily injury (BI) liability losses in the case of personal automobile insurance be excluded, or should large non-catastrophe wind/hail claims in home insurance be excluded from the model's training, test and validation data? Look for anomalies in the data that should be addressed. For example, is there an extreme loss event in the data? If other processes were used to load rates for specific loss events, how is the impact of those losses considered?</p> <p>Examples of losses that can contribute to anomalies in the data are large losses or flood, hurricane, or severe convective storm losses for personal automobile comprehensive or home insurance.</p>
A.3.b	Identify adjustments that were made to aggregated data (e.g., transformations, binning and/or categorizations). If any, identify the name of the characteristic/variable and obtain a description of the adjustment.	1	
A.3.c	Ask for aggregated data (one dataset of pre-adjusted/scrubbed data and one dataset of post-adjusted/scrubbed data) that allows the regulator to focus on the univariate distributions and compare raw data to adjusted/binning/transformed/etc. data.	4	<p>This is most relevant for variables that have been "scrubbed" or adjusted.</p> <p>Though most regulators may never ask for aggregated data and do not plan to rebuild any models, a regulator may ask for this aggregated data or subsets of it.</p> <p>It would be useful to the regulator if the percentage of exposures and premium for missing information from the model data by category are provided. This data can be displayed in either graphical or tabular formats.</p>
A.3.d	Determine how missing data was handled.	1	<p>This is most relevant for variables that have been "scrubbed" or adjusted. The regulator should be aware of assumptions the modeler made in handling missing, null, or "not available" values in the data.</p> <p>For example, it would be helpful to the reviewer if the modeler were to provide a statement as to whether there is any systemic reason for missing data. If adjustments or recoding of values were made, they should be explained. It may also be useful to the regulator if the percentage of exposures and premium for missing information from the model data are provided. This data can be displayed in either graphical or tabular formats.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
A.3.e	If duplicate records exist, determine how they were handled.	1	
A.3.f	Determine if there were any material outliers identified and subsequently adjusted during the scrubbing process.	3	Look for a discussion of how outliers were handled. If necessary, the regulator may want to investigate further by getting a list (with description) of the types of outliers and determine what adjustments were made to each type of outlier. To understand the filer's response, the regulator should ask for the filer's materiality standard.
<b>4. Data Organization</b>			
A.4.a	Obtain documentation on the methods used to compile and organize data, including procedures to merge data from different sources or filter data based on particular characteristics and a description of any preliminary analyses, data checks, and logical tests performed on the data and the results of those tests.	2	This should explain how data from separate sources was merged and/or how subsets of policies, based on selected characteristics, are filtered to be included in the data underlying the model and the rationale for that filtering.
A.4.b	Obtain documentation on the insurer's process for reviewing the appropriateness, reasonableness, consistency, and comprehensiveness of the data, including a discussion of the rational relationship the data has to the predicted variable.	2	An example is when by-peril or by-coverage modeling is performed; the documentation should be for each peril/coverage and make rational sense. For example, if "murder" or "theft" data are used to predict the wind peril, the company should provide support and a rational explanation for their use.
A.4.c	Identify material findings the company had during its data review and obtain an explanation of any potential material limitations, defects, bias, or unresolved concerns found or believed to exist in the data. If issues or limitations in the data influenced modeling analysis and/or results, obtain a description of those concerns and an explanation of how modeling analysis was adjusted and/or results were impacted.	1	"None" or "N/A" may be an appropriate response.

**B. BUILDING THE MODEL**

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>1. High-Level Narrative for Building the Model</b>			
B.1.a	Identify the type of model underlying the rate filing (e.g., <u>GAM</u> , GLM, decision tree, Bayesian GLM, gradient-boosting machine, neural network, etc.). Understand the model's role in the rating system and provide the reasons why that type of model is an appropriate choice for that role.	1	It is important to understand if the model in question is a <u>GLM-GAM</u> and, therefore, these information elements are applicable; or if it is some other model type, in which case other reasonable review approaches may be considered. There should be an explanation of why the model (using the variables included in it) is appropriate for the line of business. If by-peril or by-coverage modeling is used, the explanation should be by-peril/by-coverage. <b>Note:</b> If the model is not a <u>GLM/GAM</u> , the information elements in this white paper may not apply in their entirety.
B.1.b	Identify the software used for model development. Obtain the name of the software vendor/developer, software product, and a software version reference used in model development.	3	Changes in software from one model version to the next may explain if such changes, over time, contribute to changes in the modeled results. The company should provide the name of the third-party vendor and a "contact" in the event the regulator has questions. The "contact" can be an intermediary at the insurer (e.g., a filing specialist) who can place the regulator in direct contact with the appropriate SME at the vendor.  Open-source software/programs used in model development should be identified by name and version the same as if from a vendor.
B.1.c	Obtain a description how the available data was divided between model training, test, and/or validation datasets. The description should include an explanation why the selected approach was deemed most appropriate, whether the company made any further subdivisions of available data, and reasons for the subdivisions (e.g., a portion separated from training data to support testing of components during model building). Determine if the validation data was accessed before model training was completed and, if so, obtain an explanation of why that came to occur. Obtain a discussion of whether the model was rebuilt using all the data or if it was only based on the training data.	1	The reviewer should be aware that modelers may break their data into three or just two datasets. Although the term "training" is used with little ambiguity, "test" and "validation" are terms that are sometimes interchanged, or the word "validation" may not be used at all.  It would be unexpected if validation and/or test data were used for any purpose other than validation and/or test, prior to the selection of the final model. However, according to the CAS monograph, "Generalized Linear Models for Insurance Rating": "Once a final model is chosen, ... we would then go back and rebuild it using all of the data, so that the parameter estimates would be at their most credible."  The reviewer should note whether a company employed cross-validation techniques instead of a training/test/validation dataset approach. If cross-validation techniques were used, the reviewer should request a description of how cross-validation was done and confirm that the final model was not built on any particular subset of the data, but rather the full dataset.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.1.d	Obtain a brief description of the development process, from initial concept to final model and filed rating plan.	1	The narrative should have the same scope as the filing.
B.1.e	Obtain a narrative on whether loss ratio, pure premium, or frequency/severity analyses were performed and, if separate frequency/severity modeling was performed, how pure premiums were determined.	1	
B.1.f	Identify the model's target variable.	1	A clear description of the target variable is key to understanding the purpose of the model. It may also prove useful to obtain a sample calculation of the target variable in Excel format, starting with the "raw" data for a policy, or a small sample of policies, depending on the complexity of the target variable calculation.
B.1.g	Obtain a description of the variable selection process.	1	The narrative regarding the variable selection process may address matters such as the criteria upon which variables were selected or omitted, identification of the number of preliminary variables considered in developing the model versus the number of variables that remained, and any statutory or regulatory limitations that were taken into account when making the decisions regarding variable selection.  The modeler should comment on the use of automated feature selection algorithms to choose predictor variables and explain how potential overfitting that can arise from these techniques was addressed.
B.1.h	In conjunction with variable selection, obtain a narrative on how the company determined the granularity of the rating variables during model development.	3	The narrative should include discussion of how credibility was considered in the process of determining the level of granularity of the variables selected.
B.1.i	Determine if model input data was segmented in anyway (e.g., by-coverage, by-peril, or by-form basis). If so, obtain a description of data segmentation and the reasons for data segmentation.	1	The regulator would use this to follow the logic of the modeling process.
B.1.j	If adjustments to the model were made based on credibility considerations, obtain an explanation of the credibility considerations and how the adjustments were applied.	2	Adjustments may be needed, given that models do not explicitly consider the credibility of the input data or the model's resulting output; models take input data at face value and assume 100% credibility when producing modeled output.
<b>2. Medium-Level Narrative for Building the Model</b>			
B.2.a	At crucial points in model development, if selections were made among alternatives regarding model assumptions or techniques, obtain a narrative on the judgment used to make those selections.	3	

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.2.b	If post-model adjustments were made to the data and the model was rerun, obtain an explanation on the details and the rationale for those adjustments.	2	Evaluate the addition or removal of variables and the model fitting. It is not necessary for the company to discuss each iteration of adding and subtracting variables, but the regulator should gain a general understanding of how these adjustments were done, including any statistical improvement measures relied upon.
B.2.c	Obtain a description of the testing that was performed during the model-building process, including an explanation of the decision-making process to determine which interactions were included and which were not.	3	<p>There should be a description of the testing that was performed during the model-building process. Examples of tests that may have been performed include univariate testing and review of a correlation matrix.</p> <p>The number of interaction terms that could potentially be included in a model increases far more quickly than the number of "main effect" variables (i.e., the basic predictor variables that can be interacted together). Analyzing each possible interaction term individually can be unwieldy. It is typical for interaction terms to be excluded from the model by default, and only included where they can be shown to be particularly important. So, as a rule of thumb, the regulator's emphasis should be on understanding why the insurer included the interaction terms it did, rather than on why other candidate interactions were excluded.</p> <p>In some cases, however, it could be reasonable to inquire about why a particular interaction term was excluded from a model—for example, if that interaction term was ubiquitous in similar filings and was known to be highly predictive, or if the regulator had reason to believe that the interaction term would help differentiate dissimilar risks within an excessively heterogeneous rating segment.</p>
B.2.d	For the <u>GLM-GAM</u> , identify the link function used. Identify which distribution was used for the model (e.g., Poisson, Gaussian, log-normal, Tweedie). Obtain an explanation of why the link function and distribution were chosen. Obtain the formulas for the distribution and link functions, including specific numerical parameters of the distribution. If changed from the default, obtain a discussion of applicable convergence criterion.	1	Solving the <u>GLM-GAM</u> is iterative and the modeler can check to see if fit is improving. At some point, convergence occurs; however, when it occurs can be subjective or based on threshold criteria. If the software's default convergence criteria were not relied upon, an explanation of any deviation should be provided. <u>If the GAM did not reach convergence, an explanation should be provided.</u>
B.2.e	Obtain a narrative on the formula relationship between the data and the model outputs, with a definition of each model input and output. The narrative should <u>include all coefficients describe all parametric (non-smoothed) and smoothed terms</u> necessary to evaluate the predicted pure premium, relativity, or other value, for any real or hypothetical set of inputs.	2	<u>GAMs can have both parametric terms similar to GLMs and smoothed terms. The smoothed terms are the sum of multiple basis function which can take on a variety of types. The narrative provided should clarify which variables are included as parametric terms (non-smoothed) and which variables are included within a smoothed function.</u>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.2.f	If there were data situations in which <u>GLM-GAM</u> weights were used, obtain an explanation of how and why they were used.	3	Investigate whether identical records were combined to build the model.
<b>3. Predictor Variables</b>			
B.3.a	Obtain a complete data dictionary, including the names, <u>data types</u> , <u>variable fit types</u> , definitions, and uses of each predictor variable, offset variable, control variable, proxy variable, geographic variable, geodemographic variable, and all other variables in the model used on their own or as an interaction with other variables (including sub-models and external models).	1	<u>Data F</u> types of variables might be continuous, discrete, Boolean, etc. Definitions should not use programming language or code. <u>Variable fit types include parametric (non-smoothed) and smoothed</u> . For any variable(s) intended to function as a control or offset, obtain an explanation of its purpose and impact. Also, for any use of interaction between variables, obtain an explanation of its rationale and impact.
B.3.b	Obtain a list of predictor variables considered but not used in the final model, and the rationale for their removal.	4	The purpose of this requirement is to identify variables the company finds to be predictive but ultimately may reject for reasons other than loss-cost considerations (e.g., price optimization). Also, look for variables the company tested and then rejected. This item could help address concerns about data dredging. The reasonableness of including a variable with a given significance level could depend greatly on the other variables the company evaluated for inclusion in the model and the criteria for inclusion or omission.  For instance, if the company tested 1,000 similar variables and selected the one with the lowest p-value of 0.001, this would be a far, far weaker case for statistical significance than if that variable was the only one the company evaluated. <b>Note:</b> Context matters.
B.3.c	Obtain a correlation matrix for all <u>parametric (non-smoothed)</u> predictor variables included in the model and sub-model(s).	3	While <u>GLMs-GAMs</u> accommodate collinearity, the correlation matrix provides more information about the magnitude of correlation between variables. The company should indicate what statistic was used (e.g., Pearson, Cramer's V). The regulatory reviewer should understand what statistic was used to produce the matrix but should not prescribe the statistic.
B.3.d	<u>Obtain concurrency metrics for all smoothed predictor variables included in the model and sub-models.</u>	<u>3</u>	<u>GAMs can suffer from high concurrency in addition to high collinearity. Concurrency is the degree to which the smoothed terms move together. The company should indicate what concurrency metrics were used. The regulatory reviewer should understand what metric was used to produce the concurrency metrics but should not prescribe the type of metrics.</u>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.3.e	Obtain a rational explanation for why an increase in each predictor variable should increase or decrease frequency, severity, loss costs, expenses, or any element or characteristic being predicted.	3	<p>The explanation should go beyond demonstrating correlation. Considering possible causation may be relevant, but proving causation is neither practical nor expected. If no rational explanation can be provided, greater scrutiny may be appropriate.</p> <p>For example, the regulator should look for unfamiliar predictor variables and, if found, the regulator should seek to understand the connection that variable has to increasing or decreasing the target variable.</p>
B.3.f	If the modeler made use of one or more dimensionality reduction techniques, such as a principal component analysis (PCA), obtain a narrative about that process, an explanation why that technique was chosen, and a description of the step-by-step process used to transform observations (usually correlated) into a set of (usually linearly uncorrelated) transformed variables. In each instance, obtain a list of the pre-transformation and post-transformation variable names, as well as an explanation of how the results of the dimensionality reduction technique was used within the model.	2	
<b>4. Adjusting Data, Model Validation, and Goodness-of-Fit Measures</b>			
B.4.a	Obtain a description of the methods used to assess the statistical significance/goodness-of-fit of the model to validation data, such as lift charts and statistical tests. Compare the model's projected results to historical actual results and verify that modeled results are reasonably similar to actual results from validation data.	1	<p>For models that are built using multistate data, validation data for some segments of risk is likely to have low credibility in individual states. Nevertheless, some regulators require model validation on state-only data, especially when analysis using state-only data contradicts the countrywide results. State-only data might be more applicable but could also be impacted by low credibility for some segments of risk.</p> <p><b>Note:</b> It may be useful to consider geographic stability measures for territories within the state.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.4.b	<p>For all <u>parametric (non-smoothed)</u> variables (<del>discrete or continuous</del>), review the appropriate parameter values and relevant tests of significance, such as confidence intervals, chi-square tests, p-values, or F tests. Determine if model development data, validation data, test data, or other data was used for these tests.</p>	1	<p>Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter value, confidence intervals, chi-square tests, p-values, and any other relevant and material tests.</p> <p>For variables that are modeled continuously, it may be sufficient to obtain statistics around the modeled parameters; e.g., confidence intervals around each level of an AOI curve might be more than what is needed.</p>
B.4.c	<p><u>For all smoothed variables, review plots representing the smooths and relevant tests of significance, such as approximate confidence intervals, chi-square tests, approximate p-values, or F tests. Determine if model development data, validation data, test data, or other data was used for these tests.</u></p>	1	<p><u>Smoothed terms in a GAM can have many coefficients based on the number of basis functions. It is difficult to interpret the impact of the smoothed term based on the coefficients. Instead, regulators can review plots representing the cumulative effect of smoothed terms. The company could provide variable value on the x-axis and partial effects on the y-axis. The company could alternatively provide variable value on the x-axis and model prediction for the base risk on the y-axis. The company should provide confidence interval lines regardless of the type of plot. The regulatory reviewer should assess whether the plot has an intuitive shape and whether the curve extrapolates well, especially to areas of the curve representing thinner data.</u></p> <p><u>Smoothed interaction terms should also be expressed as plots. Heat map contour plots or 3D perspective plots may be useful.</u></p> <p><u>GAMs are a form of penalized regression which complicates the calculation of p-values. The p-values for the smoothed terms output by the modeling software are generally approximate p-values for GAMs. Approximate p-values should be reviewed at the smoothed variable level. The regulatory reviewer may want to select a smaller threshold for smoothed terms than they used for the parametric term p-value threshold.</u></p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.4.d	<p><u>For all smoothed variables, request details about the basis functions comprising each smoothed function.</u></p>	4	<p><u>Smooth functions are based on a sum of basis functions. The company should provide the number of basis functions for each smooth and discuss how the number was chosen.</u></p> <p><u>There are many types of smooth functions that can be applied. Examples include thin plate splines, cubic splines, and cyclic splines. The company should provide the type of each smooth and a narrative on why that type of smooth is appropriate for the variable.</u></p>
B.4.e	<p>Identify the threshold for statistical significance and explain why it was selected. Obtain a reasonable and appropriately supported explanation for keeping the variable for each discrete variable level where the p-values were not less than the chosen threshold.</p>	1	<p>The explanation should clearly identify the thresholds for statistical significance used by the modeler. Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter values <u>for parametric terms, plots representing smoothed terms</u>, confidence intervals, chi-square tests, p-values, and any other relevant and material tests.</p>
B.4.f	<p>For overall discrete variables, review type 3 chi-square tests, p-values, F tests and any other relevant and material test. Determine if model development data, validation data, test data, or other data was used for these tests.</p>	2	<p>Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter values <u>for parametric terms, plots representing smoothed terms</u>, confidence intervals, chi-square tests, p-values, and any other relevant and material tests.</p> <p>For variables that are modeled continuously, it may be sufficient to obtain statistics around the modeled parameters; e.g., confidence intervals around each level of an AOI curve might be more than what is needed.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.4.g	Obtain evidence that the model fits the training data well, for individual variables, for any relevant combinations of variables, and for the overall model.	2	<p>For a <u>GLMGAM</u>, such evidence may be available using chi-square tests, <u>approximate</u> p-values, F tests and/or other means.</p> <p>The steps taken during modeling to achieve goodness-of-fit are likely to be numerous and laborious to describe, but they contribute much of what is generalized about a <u>GLMGAM</u>.</p> <p>The regulator should not assume to know what the company did and ask, "How?" Instead, the regulator should ask what the company did and be prepared to ask follow-up questions.</p>
B.4.h	For continuous variables, provide confidence intervals, chi-square tests, <u>approximate</u> p-values, and any other relevant and material test. Determine if model development data, validation data, test data, or other data was used for these tests.	2	<p>Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter <u>values for parametric terms, plots representing smoothed terms value</u>, confidence intervals, chi-square tests, <u>approximate</u> p-values and any other relevant and material tests.</p> <p>For variables that are modeled continuously, it may be sufficient to obtain statistics around the modeled parameters; for example, confidence intervals around each level of an AOI curve might be more than what is needed.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.4.i	Obtain a description how the model was tested for stability over time.	2	<p>Evaluate the build/test/validation datasets for potential time-sensitive model distortions (e.g., a winter storm in year 3 of 5 can distort the model in both the testing and validation datasets).</p> <p>Obsolescence over time is a model risk (e.g., old data for a variable or a variable itself may no longer be relevant). If a model being introduced now is based on losses from years ago, the reviewer should be interested in knowing whether that model would be predictive in the proposed context. Validation using recent data from the proposed context might be requested. Obsolescence is a risk even for a new model based on recent and relevant loss data.</p> <p>The reviewer may want to inquire as to the following: What steps, if any, were taken during modeling to prevent or delay obsolescence? What controls exist to measure the rate of obsolescence? What is the plan and timeline for updating and ultimately replacing the model?</p> <p>The reviewer should also consider that as newer technologies enter the market (e.g., personal automobile) their impact may change claim activity over time (e.g., lower frequency of loss). So, it is not necessarily a bad thing that the results are not stable over time.</p>
B.4.j	Obtain a narrative on how potential concerns with overfitting were addressed.	2	
B.4.k	<u>Obtain the value of the model complexity parameter <math>\lambda</math> and a discussion of how it was chosen.</u>	<u>4</u>	<u>GAMs are a form of penalized regression. Smaller values of <math>\lambda</math> allow the model to increase complexity and fit "wigglier" data. Larger values of <math>\lambda</math> constricts the model and increases smoothness. Multiple automated approaches exist for tuning <math>\lambda</math> including predictive approaches that optimize AIC or Bayesian approaches such as Restricted Maximum Likelihood.</u>
B.4.l	Obtain support demonstrating that the <u>overall GLM GAM</u> assumptions are appropriate.	3	<p>A visual review of plots of actual errors is usually sufficient.</p> <p>The reviewer should look for a conceptual narrative covering these topics: How does this particular <u>GLM GAM</u> work? Why did the rate filer do what it did? Why employ this design instead of alternatives? Why choose this particular distribution function and this particular link function? A company response may be at a fairly high level and reference industry practices.</p> <p>If the reviewer determines that the model makes no assumptions that are considered to be unreasonable, the importance of this item may be reduced.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.4.m	Obtain support demonstrating that the assumptions for each smoothed term are appropriate.	3	<u>The reviewer should look for a narrative on how the fit of the smoothed terms was checked for reasonability.</u> <u>It may be useful to ask for each plot of the smoothed terms to include residuals to ensure that the smoothed line runs through the middle of the residuals.</u> <u>It may be useful for the company to provide tests that each smoothed term is not predictive of residual values (similar to tests achieved in the gam.check() function of the mcgv R package). These tests would ideally demonstrate that the residuals are randomly distributed across all parts of the smoothed term.</u>
B.4.n	Obtain 5-10 sample records with corresponding output from the model for those records.	4	
<b>5. "Old Model" Versus "New Model"</b>			
B.5.a	Obtain an explanation of why this model is an improvement to the current rating plan. If it replaces a previous model, find out why it is better than the one it is replacing; determine how the company reached that conclusion and identify metrics relied on in reaching that conclusion. Look for an explanation of any changes in calculations, assumptions, parameters, <u>changes in smoothed variable plots</u> , and data used to build this model from the previous model.	2	The regulator should expect to see improvement in the new class plan's predictive ability or other sufficient reason for the change.
B.5.b	Determine if two Gini coefficients were compared and obtain a narrative on the conclusion drawn from this comparison.	3	This information element requests a comparison of Gini coefficient from the prior model to the Gini coefficient of proposed model. It is expected that there should be improvement in the Gini coefficient. A higher Gini coefficient indicates greater differentiation produced by the model and how well the model fits that data. This is relevant when one model is being updated or replaced. The regulator should expect to see improvement in the new class plan's predictive ability. One example of a comparison might be sufficient. <b>Note:</b> This comparison is not applicable to initial model introduction. Reviewer can look to CAS monograph, "Generalized Linear Models for Insurance Rating."
B.5.c	Determine if double-lift charts were analyzed and obtain a narrative on the conclusion drawn from this analysis.	3	One example of a comparison might be sufficient. <b>Note:</b> "Not applicable" is an acceptable response.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.5.d	If replacing an existing model, obtain a list of any predictor variables used in the old model that are not used in the new model. Obtain an explanation of why these variables were dropped from the new model.  Obtain a list of all new predictor variables in the new model that were not in the prior old model.	2	It is useful to differentiate between old and new variables, so the regulator can prioritize more time on variables not yet reviewed.
<b>6. Modeler Software</b>			
B.6.a	Request access to SMEs (e.g., modelers) who led the project, compiled the data, and/or built the model.	4	The filing should contain a contact that can put the regulator in touch with appropriate SMEs and key contributors to the model development to discuss the model.

**C. THE FILED RATING PLAN**

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>I. General Impact of Model on Rating Algorithm</b>			
C.1.a	In the actuarial memorandum or explanatory memorandum, for each model and sub-model (including external models), look for a narrative that explains each model and its role (i.e., how it was used) in the rating system.	1	<p>The “role of the model” relates to how the model integrates into the rating plan as a whole and where the effects of the model are manifested within the various components of the rating plan. This is not intended as an overarching statement of the model’s goal, but rather a description of how specifically the model is used.</p> <p>This item is particularly important, if the role of the model cannot be immediately discerned by the reviewer from a quick review of the rate and/or rule pages. (Importance is dependent on state requirements and ease of identification by the first layer of review and escalation to the appropriate review staff.)</p>
C.1.b	Obtain an explanation of how the model was used to adjust the filed rating algorithm.	1	<p>Models are often used to produce factor-based indications, which are then used as the basis for the selected changes to the rating plan. It is the changes to the rating plan that create impacts.</p> <p><u>The regulator should consider asking how the smoothed functions of the GAM will be implemented.</u></p> <p>The regulator should consider asking for an explanation of how the model was used to adjust the rating algorithm.</p>
C.1.c	Obtain a complete list of characteristics/variables used in the proposed rating plan, including those used as input to the model (including sub-models and composite variables) and all other characteristics/variables (not input to the model) used to calculate a premium. For each characteristic/variable, determine if it is only input to the model, whether it is only a separate univariate rating characteristic, or whether it is both input to the model and a separate univariate rating characteristic. The list should include transparent descriptions (in plain language) of each listed characteristic/variable.	1	<p>Examples of variables used as inputs to the model and used as separate univariate rating characteristics might be criteria used to determine a rating tier or household composite characteristic.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>2. Relevance of Variables and Relationship to Risk of Loss</b>			
C.2.a	Obtain a narrative regarding how the characteristics/rating variables included in the filed rating plan relate to the risk of insurance loss(or expense) for the type of insurance productbeing priced.	2	The narrative should include a discussion of the relevance each characteristic/rating variable has on consumer behavior that would lead to a difference in risk of loss (or expense). The narrative should include a rational relationship to cost, and model results should be consistent with the expected direction of the relationship. <b>Note:</b> This explanation would not be needed if the connection between variables and risk of loss (or expense) has already been illustrated.
<b>3. Comparison of Model Outputs to Current and Selected Rating Factors</b>			
C.3.a	Compare relativities indicated by the model to both current relativities and the insurer's selected relativities for each risk characteristic/variable in the rating plan.	1	"Significant difference" may vary based on the risk characteristic/variable and context. However, the movement of a selected relativity should be in the direction of the indicated relativity; if not, an explanation is necessary as to why the movement is logical.
C.3.b	Obtain documentation and support for all calculations, judgments, or adjustments that connect the model's indicated values to the selected relativities filed in the rating plan.	1	The documentation should include explanations for the necessity of any such adjustments and each significantdifference between the model's indicated values and the selected values. This applies even to models that produce scores, tiers, or ranges of values for which indications can be derived. <b>Note:</b> This information is especially important if differences between model-indicated values and selected values are material and/or impact one consumer population more than another.
C.3.c	For each characteristic/variable used as both input to the model (including sub-models and composite variables) and as a separate univariate rating characteristic, obtain a narrative regarding how each characteristic/variable was tempered or adjusted to account for possible overlap or redundancy in what the characteristic/variable measures.	2	Modeling loss ratios with these characteristics/ variables as control variables would account for possible overlap. The insurer should address this possibility or other considerations; e.g., tier placement models often use risk characteristics/ variables that are also used elsewhere inthe rating plan. One way to do this would be to model the loss ratios resulting from a process that already uses univariate rating variables. Then the model/composite variables would be attempting to explain the residuals.
<b>4. Responses to Data, Credibility, and Granularity Issues</b>			
C.4.a	Determine what, if any, consideration was given to the credibility of the output data.	2	The regulator should determine at what level of granularity credibility is applied. If modeling was by-coverage, by-form, or by-peril, the company should explain how these were handled when there was not enough credible data by coverage, form, or peril to model.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
C.4.b	If the rating plan is less granular than the model, obtain an explanation of why.	2	This is applicable if the company had to combine modeled output in order to reduce the granularity of the rating plan.
C.4.c	If the rating plan is more granular than the model, obtain an explanation of why.	2	A more granular rating plan may imply that the company had to extrapolate certain rating treatments, especially at the tails of a distribution of attributes, in a manner not specified by the model indications. It may be necessary to extrapolate due to data availability or other considerations.
<b>5. Definitions of Rating Variables</b>			
C.5.a	Obtain a narrative regarding adjustments made to model output (e.g., transformations, binning and/or categorizations). If adjustments were made, obtain the name of the characteristic/variable and a description of the adjustment.	2	If rating tiers or other intermediate rating categories are created from model output, the rate and/or rule pages should present these rating tiers or categories. The company should provide an explanation of how model output was translated into these rating tiers or intermediate rating categories.
<b>6. Supporting Data</b>			
C.6.a	Obtain aggregated state-specific, book-of-business-specific univariate historical experience data, separately for each year included in the model, consisting of loss ratio or pure premium relativities and the data underlying those calculations for each category of model output(s) proposed to be used within the rating plan. For each data element, obtain an explanation of whether it is raw or adjusted and, if the latter, obtain a detailed explanation for the adjustments.		For example, were losses developed/undeveloped, trended/untrended, capped/uncapped, etc.? Univariate indications should not necessarily be used to override more sophisticated multivariate indications. However, they do provide additional context and may serve as a useful reference.
C.6.b	Obtain an explanation of any material (especially directional) differences between model indications and state-specific univariate indications.	4	Multivariate indications may be reasonable as refinements to univariate indications, but possibly not for bringing about significant reversals of those indications. For instance, if the univariate indicated relativity for an attribute is 1.5 and the multivariate indicated relativity is 1.25, this is potentially a plausible application of the multivariate techniques. If, however, the univariate indicated relativity is 0.7 and the multivariate indicated relativity is 1.25, a regulator may question whether the attribute in question is negatively correlated with other determinants of risk. Credibility of state-level data should be considered when state indications differ from modeled results based on a broader dataset. However, the relevance of the broader dataset to the risks being priced should also be considered. Borderline reversals are not of as much concern. If multivariate indications perform well against the state-level data, this should suffice. However, credibility considerations need to be taken into account as state-level segmentation comparisons may not have enough credibility.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>7. Consumer Impacts</b>			
C.7.a	Obtain a listing of the top five rating variables that contribute the most to large swings in renewal premium, both as increases and decreases, as well as the top five rating variables with the largest spread of impact for both new and renewal business.	4	These rating variables may represent changes to rating factors, be newly introduced to the rating plan, or have been removed from the rating plan.
C.7.b	Determine if the company performed sensitivity testing to identify significant changes in premium due to small or incremental change in a single risk characteristic. If such testing was performed, obtain a narrative that discusses the testing and provides the results of that testing.	3	One way to see sensitivity is to analyze a graph of each risk characteristic's/variable's possible relativities. Look for significant variation between adjacent relativities and evaluate if such variation is reasonable and credible.
C.7.c	For the proposed filing, obtain the impacts on renewal business and describe the process used by management, if any, to mitigate those impacts.	2	Some mitigation efforts may substantially weaken the connection between premium and expected loss and expense and, hence, may be viewed as unfairly discriminatory by some states.
C.7.d	Obtain a rate disruption/dislocation analysis, demonstrating the distribution of percentage and/or dollar impacts on renewal business (created by rerating the current book of business) and sufficient information to explain the disruptions to individual consumers.	2	The analysis should include the largest dollar and percentage impacts arising from the filing, including the impacts arising specifically from the adoption of the model or changes to the model as they translate into the proposed rating plan.  While the default request would typically be for the distribution/dislocation of impacts at the overall filing level, the regulator may need to delve into the more granular variable-specific effects of rate changes if there is concern about particular variables having extreme or disproportionate impacts, or significant impacts that have otherwise yet to be substantiated.  See Appendix D for an example of a disruption analysis.
C.7.e	Obtain exposure distributions for the model's output variables and show the effects of rate changes at granular and summary levels, including the overall impact on the book of business.	3	See Appendix D for an example of an exposure distribution.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
C.7.f	Identify policy characteristics, used as input to a model or sub-model, that remain “static” over a policy’s lifetime versus those that will be updated periodically. Obtain a narrative on how the company handles policy characteristics that are listed as “static,” yet change over time.	3	<p>Some examples of “static” policy characteristics are prior carrier tenure, prior carrier type, prior liability limits, claim history over past X years, or lapse of coverage. These are specific policy characteristics usually set at the time new business is written, used to create an insurance score or to place the business in a rating/underwriting tier, and often fixed for the life of the policy.</p> <p>The reviewer should be aware, and possibly concerned, how the company treats an insured over time when the insured’s risk profile based on “static” variables changes over time but the rate charged, based on a new business insurance score or tier assignment, no longer reflect the insured’s true and current risk profile.</p> <p>A few examples of “non-static” policy characteristics are age of driver, driving record, and credit information (FCRA-related). These are updated automatically by the company on a periodic basis, usually at renewal, with or without the policyholder explicitly informing the company.</p>
C.7.g	Obtain a means to calculate the rate charged a consumer.	3	<p>The filed rating plan should contain enough information for a regulator to be able to validate policy premium. However, for a complex model or rating plan, a score or premium calculator via Excel or similar means would be ideal, but this could be elicited on a case-by-case basis. The ability to calculate the rate charged could allow the regulator to perform sensitivity testing when there are small changes to a risk characteristic/variable. <b>Note:</b> This information may be proprietary.</p> <p>For the rating plan, the rate order of calculation rule may be sufficient. However, it may not be feasible for a regulator to get all the input data necessary to reproduce a model’s output. Credit and telematics models are examples of model types where model output would be readily available, but the input data would not be readily available to the regulator.</p>
C.7.h	In the filed rating plan, be aware of any non-insurance data used as input to the model (customer-provided or other). In order to respond to consumer inquiries, it may be necessary to inquire as to how consumers can verify their data and correct errors.	1	<p>If the data is from a third-party source, the company should provide information on the source. Depending on the nature of the data, it may need to be documented with an overview of who owns it.</p> <p>The topic of consumer verification may also need to be addressed, including how consumers can verify their data and correct errors.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>8. Accurate Translation of Model into a Rating Plan</b>			
C.8.a	Obtain sufficient information to understand how the model outputs are used within the rating system and to verify that the rating plan's manual, in fact, reflects the model output and any adjustments made to the model output.	1	The regulator can review the rating plan's manual to see that modeled output is properly reflected in the manual's rules, rates, factors, etc.
<b>9. Efficient and Effective Review of Rate Filing</b>			
C.9.a	Establish procedures to efficiently review rate filings and models contained therein.	1	<p>“Speed to market” is an important competitive concept for insurers. Although the regulator needs to understand the rate filing before accepting the rate filing, the regulator should not request information that does not increase his/her understanding of the rate filing.</p> <p>The regulator should review the state's rate filing review process and procedures to ensure that they are fair and efficient.</p>
C.9.b	Be knowledgeable of state laws and regulations in order to determine if the proposed rating plan (and models) are compliant with state laws and/or regulations.	1	This is a primary duty of state insurance regulators. The regulator should be knowledgeable of state laws and regulations and apply them to a rate filing fairly and efficiently. The regulator should pay special attention to prohibitions of unfair discrimination.
C.9.c	Be knowledgeable of state laws and regulations in order to determine if any information contained in the rate filing (and models) should be treated as confidential.	1	The regulator should be knowledgeable of state laws and regulations regarding confidentiality of rate filing information and apply them to a rate filing fairly and efficiently. Confidentiality of proprietary information is key to innovation and competitive markets.

**APPENDIX B (Continued)**

**Mapping Best Practices to Information Elements and Information Elements to Best Practices**

Table 1 maps the best practices to each GLM information element. Table 2 maps the GLM information elements to each best practice. With this mapping, a state insurance regulator interested in how to meet the objective of a best practice can consider the information elements associated with the best practice in the table.

Appendix B: Table 2 Information Element Mapped to Best Practices		
Best Practice	Best-Practice Code	Information Element (for GLMs)
1. Ensure that the factors developed based on the model produce rates that are not excessive, inadequate, or unfairly discriminatory:		
a. Review the overall rate level impact of the proposed revisions to rate level indications provided by the filer.	1-a	C.3.a, C.3.b, C.7.a, C.7.b, C.7.e, C.7.d, C.7.e, C.7.d
b. Determine whether individual input characteristics to a predictive model and their resulting rating factors are related to the expected loss or expense differences in risk.	1-b	A.1.a, A.1.e, A.2.a, A.2.f, A.3.a, A.4.b, B.1.f, B.1.g, B.1.i, B.2.a, B.3.d, B.4.e, B.4.d, B.4.e, B.4.f, B.4.i, C.1.e, C.2.a, C.6.b
c. Review the premium disruption for individual policyholders and how the disruptions can be explained to individual consumers.	1-c	C.3.a, C.3.b, C.7.a, C.7.b, C.7.e, C.7.d, C.7.e, C.7.g
d. Review the individual input characteristics to and output factors from the predictive model (and its sub-models), as well as associated selected relativities, to ensure they are compatible with practices allowed in the state and do not reflect prohibited characteristics.	1-d	A.1.a, A.2.a, A.2.e, A.2.f, A.4.b, A.4.e, B.1.g, B.3.a, B.3.e, B.3.d, B.4.j, C.1.e, C.2.a, C.7.h
2. Obtain a clear understanding of the data used to build and validate the model and thoroughly review all aspects of the model, including assumptions, adjustments, variables, sub-models used as input, and resulting output:		
a. Obtain a clear understanding of how the selected predictive model was built.	2-a	A.1.a, A.2.e, A.2.d, A.2.e, A.2.f, A.3.a, A.3.b, A.4.a, A.4.e, B.1.a, B.1.b, B.1.e, B.1.d, B.1.e, B.1.f, B.1.g, B.1.h, B.1.i, B.1.j, B.2.a, B.2.b, B.2.e, B.2.d, B.2.e, B.2.f, B.3.a, B.3.b, B.3.e, B.3.e, B.4.a, B.4.b, B.4.e, B.4.d, B.4.e, B.4.f, B.4.g, B.4.h, B.4.i, B.4.j, B.5.b, B.5.e, B.6.a, C.1.a, C.4.b, C.4.e, C.5.a

Casualty Actuarial and Statistical (C) Task Force  
E-Vote  
January 3, 2023

The Casualty Actuarial and Statistical (C) Task Force conducted an e-vote that concluded Jan. 3, 2023. The following Task Force members participated: Mike Kreidler, Chair, represented by Eric Slavich (WA); Grace Arnold, Vice Chair, represented by Phil Vigliaturo (MN); Ricardo Lara represented by Lynne Wehmueller (CA); Michael Conway represented by Mitchell Bronson (CO); Andrew N. Mais represented by Wanchin Chou (CT); Karima M. Woods represented by David Christhilf (DC); David Altmaier represented by Christina Huff (FL); Colin M. Hayashida represented by Randy Jacobson (HI); Dana Popish Severinghaus represented by Reid McClintock (IL); Amy L. Beard represented by Larry Steinert (IN); Timothy N. Schott represented by Sandra Darby (ME); Chlora Lindley-Myers and Julie Lederer (MO); Troy Downing represented by Mari Kindberg (MT); Chris Nicolopoulos represented by Christian Citarella (NH); Marlene Caride represented by Carl Sornson (NJ); Judith L. French represented by Tom Botsko (OH); Glen Mulready represented by Andrew Schallhorn (OK); Cassie Brown represented by J'ne Byckovski (TX); and Allan L. McVey (WV).

1. Adopted the 2021 Profitability Report

The Task Force conducted an e-vote to consider adoption of the 2021 *Report on Profitability by Line by State* (Profitability Report). The motion passed unanimously.

Having no further business, the Casualty Actuarial and Statistical (C) Task Force adjourned.

Casualty Actuarial and Statistical (C) Task Force  
E-Vote  
December 9, 2022

The Casualty Actuarial and Statistical (C) Task Force conducted an e-vote that concluded Dec. 9, 2022. The following Task Force members participated: Mike Kreidler, Chair, represented by Eric Slavich (WA); Grace Arnold, Vice Chair, represented by Phil Vigliaturo (MN); Ricardo Lara represented by Lynne Wehmuller (CA); Michael Conway represented by Mitchell Bronson (CO); Andrew N. Mais represented by Wanchin Chou (CT); Karima M. Woods represented by David Christhilf (DC); David Altmaier represented by Christina Huff (FL); Colin M. Hayashida represented by Randy Jacobson (HI); Doug Ommen represented by Travis Grassel (IA); Dana Popish Severinghaus represented by Judy Mottar (IL); Amy L. Beard represented by Larry Steinert (IN); Vicki Schmidt represented by Nicole Boyd (KS); Timothy N. Schott represented by Sandra Darby (ME); Chlora Lindley-Myers represented by Julie Lederer (MO); Troy Downing represented by Mari Kindberg (MT); Russell Toal and Anna Krylova (NM); Judith L. French represented by Tom Botsko (OH); Glen Mulready represented by Andrew Schallhorn (OK); Andrew R. Stolfi represented by David Dahl (OR); Michael Humphreys represented by Michael McKenney (PA); Michael Wise represented by Will Davis (SC); Cassie Brown represented by J'ne Byckovski (TX); and Allan L. McVey and Juanita Wimmer (WV).

1. Adopted the 2020 Homeowners Report

The Task Force conducted an e-vote to consider adoption of the *2020 Dwelling, Fire, Homeowners Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owner's Insurance Report* (Homeowner Report). The motion passed unanimously.

Having no further business, the Casualty Actuarial and Statistical (C) Task Force adjourned.

Draft: 3/7/23

Actuarial Opinion (C) Working Group  
Virtual Meeting  
January 26, 2023

The Actuarial Opinion (C) Working Group of the Casualty Actuarial and Statistical (C) Task Force met Jan. 26, 2023. The following Working Group members participated: Miriam Fisk, Chair (TX); Anna Krylova, Vice Chair (NM); Amy Waldhauer (CT); David Christhilf (DC); Chantel Long and Judy Mottar (IL); Sandra Darby (ME); Julie Lederer (MO); Tom Botsko (OH); Andrew Schallhorn (OK); and James DiSanto (PA). Also participating was: Arthur Schwartz (LA).

1. Discussed Draft Changes to the Actuarial Opinion Instructions

Krylova said the Working Group has discussed changing the qualification documentation requirement from annual submission to submission once every five years. Michelle L. Iarkowski (Deloitte Consulting LLP) said feedback at the American Academy of Actuaries' (Academy's) Actuarial Opinion Reserve Seminar was that a change to requiring submission once every five years would increase the administrative burden and that most participants said they would continue to submit it annually.

Ralph Blanchard (The Travelers Companies) said that once every five years might make the Board pay more attention to the document. Long said the regulatory burden of the qualification document has, so far, outweighed the benefit. Iarkowski said seminar participants still do not understand why the requirement to provide qualification documentation to the Board has been imposed and point out that there is no similar requirement for life and health actuaries.

The Working Group suggested two editorial corrections be made by NAIC staff but said that the Working Group would not propose any substantive changes to the 2023 Statement of Actuarial Opinion (SAO) instructions for property/casualty (P/C) and title.

Long gave a preview of some proposed changes for 2024 actuarial opinions: 1) remove the address of the appointed actuary from the signature block. Some actuaries are working from home and may not feel comfortable using their home address and have no other address to provide; and 2) within the "change in actuary" section, add an additional example to encompass disagreements outside of the scope of the opinion.

2. Discussed a Financial Analysis (E) Working Group Referral on Predictive Analytics in Reserving

The Working Group discussed a draft response to a referral from the Financial Analysis (E) Working Group asking for discussion of the use of predictive analytics in reserving and consideration of drafting guidance. Lederer drafted a potential response to the referral, including some potential questions to ask about reserving models.

Long said the proposed response contains a good description of the issues that occurred in the case that prompted the Financial Analysis (E) Working Group's referral. Lederer suggested the Working Group reach out to other actuarial regulators to find someone who has reviewed a reserve model in a financial examination.

Regarding the questions to ask during an exam, Schwartz said he would need more technical information (e.g., goodness of fit metrics for variables and the model as a whole; a list of variables; amount of data on which the model is based) to evaluate the model.

Both Lederer and Krylova said they are concerned that state departments of insurance (DOIs) examiners may not have staff that would be able to evaluate responses to in-depth, technical questions. Fisk offered to share additional resources containing lists of questions that could be applicable.

Having no further business, the Actuarial Opinion (C) Working Group adjourned.

Draft: 3/1/23

Statistical Data (C) Working Group  
Virtual Meeting  
February 23, 2023

The Statistical Data (C) Working Group of the Casualty Actuarial and Statistical (C) Task Force met Feb. 23, 2023. The following Working Group members participated: Sandra Darby, Chair (ME); Qing He, Vice Chair, George Bradner, and Wanchin Chou (CT); David Christhlf (DC); Arthur Schwartz and John Sobhanian (LA); Cynthia Amann (MO); Christian Citarella (NH); Alexander Vajda (NY); Tom Botsko (OH); and David Dahl and Ying Liu (OR). Also participating were: Luciano Gobbo (CA); David Dombrowski (MT); and Chris Aufenthie (ND).

1. Adopted the Auto Insurance Average Premium Supplement

Darby said this Working Group adopted a new timeline that would have written premium and exposure data for the *Auto Insurance Database Report* (Auto Report) reported about six months earlier. She said this speeds up the reporting of average premiums, but earned premiums, earned exposures, and loss data cannot be reported on the same faster timeline. She said this would leave a large gap in the years of data provided and that the earned premium and loss data would now be published later than it would have been on the previous timeline.

Justin Cox (NAIC) said the new timeline creates a couple of issues. He said the first issue is that if this Working Group plans to release the full Auto Report in the spring as dictated by the new timeline, the only updates to the report would be the written premium and exposure as the other data would not have changed from the report released in February 2023. He said the second issue is the two-year gap between the reported written premiums and the reported earned premiums going forward. He said the best solution to these issues is to release an Auto Insurance Average Premium Supplement in the spring that would include only the written premium and exposure information that is reported by the statistical agents on Dec. 1 following the end of the data year. Then, the statistical agents would provide the full premium, exposure, and loss data set on the original timeline, with the full Auto Report being released at the end of the year.

Darby asked if the statistical agents that provide the data are agreeable to providing two data sets throughout the year to allow for the release of an average premium supplement. Laura Panesso (Insurance Services Office—ISO), Lori Munn (American Association of Insurance Services—AAISO), Albert Burton (Independent Statistical Service—ISS), and Jeff Patterson (National Independent Statistical Service—NISS) said they would not have a problem providing the data twice during the year.

Amann made a motion, seconded by Citarella, to adopt the creation of the Auto Insurance Average Premium Supplement. The motion passed unanimously.

Cox said NAIC staff are working to draft language to accompany the supplement and that language will be distributed to the Working Group for comment. Amann suggested adding information on the timeline issues to the language to explain the need for the creation of the supplement.

2. Discussed Proposed Changes to NAIC Statistical Reports

Schwartz said his first proposed change to the *Dwelling, Fire, Homeowners Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owner's Insurance Report* (Homeowners Report) is to change the name to the NAIC Home Insurance Database or the NAIC Residential Insurance Database. He said this is similar to his proposals for the other reports and that all of the reports should have common names. He said including the

word database in the report title will give people a better understanding of what is included in the report. He said the current name is too long. Botsko said the word database implies a store of data on which reports can be run. He said he would be hesitant to change the title to include the word database since this is a static report.

Darby agreed that the name was long, and it may be a good idea to change it. She suggested calling it a data report instead of a database. Schwartz said he would like a title that makes it clear that it is a report of the data. Amann said she agrees with streamlining the name of the report, but there should be an indication early in the report of what coverages are included. Birny Birnbaum (Center for Economic Justice—CEJ) said the Homeowners Report title is accurate and provides a complete description.

Schwartz said one of his proposals is also to have all the reports available in a downloadable CSV format. Darby said the CSV versions of the reports are already available to state insurance regulators by requesting access from NAIC staff.

Schwartz said his next proposal is to include a table showing average premium per insurance range. He said the report should also take into consideration the large differences in home prices based on location and other factors. Darby said the data is provided in the buckets shown in the report by the statistical agents, so the table Schwartz is trying to create would not currently be possible. Libby Crews (NAIC) confirmed that the data is aggregated into the buckets before it is sent to the NAIC by statistical agents. Schwartz suggested using the midpoint of each bucket to determine the average premium per insurance range. He said it would also be useful to include the median home price per state. Birnbaum said taking the midpoint of the insurance range would not be accurate and would not be possible for the range of \$500,000 and above.

Darby said she would like to reevaluate the current insurance ranges because home prices, and therefore coverage, have gone up significantly since these ranges were first determined. She said the distribution of premiums and exposures in the lower ranges is significantly less than it was years ago. She said they should also look at adding additional ranges over \$500,000 since many states have large premium and exposure amounts in that range. Dahl said he agrees there should be additional ranges above \$500,000 and that they should also consider breaking some of the current ranges into smaller ranges to get more detail. Brian Sullivan (Risk Information) said it is clear that when the ranges were created, they were trying to capture information about the ranges with the most exposures. He said since then, the lower ranges have had less exposures while the highest ranges have increased. He said the ranges need to be reset so there is granularity in the ranges with the most exposure. He said the reporting of the data should be set up in such a way that it is not difficult to change the ranges in the future if necessary. Qing He asked what the criteria were when the insurance ranges were set up. Crews said she would look into past meeting minutes to determine how the Working Group initially determined the ranges.

Darby asked the participating statistical agents how they currently collect the insurance range information and if they have raw data or if they collect it in the determined insurance ranges. All participating statistical agents said they have the raw data on the insured value, and they map that data to each insurance range that is requested by the NAIC.

Darby said she would create a spreadsheet to gather data from the statistical agents regarding the premiums and exposures for smaller insurance ranges. She said the Working Group would then be able to determine the distribution of exposures at a more granular level and they could then decide which ranges of insurance make sense to publish in the report.

Darby said the Working Group will continue to discuss changes to these reports in future meetings.

### 3. Discussed its 2023 Work Plan

Darby said the Working Group received an initial look at dashboards created by NAIC staff during a regulator-only meeting in January 2023. She said NAIC staff are developing dashboards for the *Report on Profitability by Line by State* (Profitability Report), Homeowners Report, and Auto Report. She said this Working Group will spend the year reviewing and developing these dashboards. She said this will provide a good look at the type of data regulators currently have available, which will inform future discussions about updates to the statistical handbook, including what data regulators need and the most efficient way to collect and analyze that data. She said since these dashboards will be looking at company-level data, as well as data from specific statistical agents, the majority of the Working Group discussions will be regulator-only. She said they will work toward developing training on the use of this data for regulators, which they hope to present at the NAIC Insurance Summit in September. She said once the Working Group has determined how state insurance regulators can use the data currently available, they can pivot into how they can update the statistical handbook to gather data that state insurance regulators are looking for.

Having no further business, the Statistical Data (C) Working Group adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/C CMTE/2023\_Spring/CASTF/SDWG/StatDataWGmin\_0223

**Casualty Actuarial and Statistical Taskforce:**

Thank you for opening the GAM Appendix for comments. Currently, GAMs are largely synonymous with the MGCV package in R. The goal of these comments is to future-proof the GAM appendix by acknowledging the wide definition of a GAM. I recommend this addition to the narrative preceding the requested information elements as part of the future-proofing of this document:

*The definition of GAM is quite broad and the available information elements will differ depending on the basis function used in the GAM as well as the method of penalization.*

*For example, although AGLM is best reviewed through a traditional penalized regression framework, AGLM is considered a GAM by the definition from the original paper by Tibshirani (1990). While the MGCV package uses splines as a basis function combined with ridge-like penalization, the AGLM model uses step functions as a basis function and lasso penalization. These differences mean that metrics provided by the MGCV package such as concavity and approximated p-values, while appropriate for MGCV, would not be appropriate for AGLM.*

*This broad definition of a GAM means that a reviewer should be looking for analogous information in the case where certain necessary information elements are not available. For example, p-values will not be produced for some varieties of GAM. If p-values are being evaluated to confirm the significance of variables included in the model, the reviewer may start a dialogue on how variable significance was evaluated in this particular GAM to obtain the information necessary to satisfy this area of review. In this way, a reviewer can use the information elements below to review wide varieties of GAM.*

Below are recommended changes to the table of information elements to supplement the narrative addition above.

For items B.3.d, B.4.c, B.4.e, B.4.f, B.4.h, B.4.m, I recommend adding a footnote to the following comment:

*Please note that certain statistics such as p-values, confidence intervals, and concavity may not be available or relevant for all varieties of GAM. In these cases, requests should focus on satisfying the purpose of this information element through methodology or metrics supplied by this type of GAM.*

B.4.d

Recommended significance level: 4 or 2

Recommended addition to comments:

*If the GAM is built using a basis function significantly different from those available in the MGCV package in R, this information element may have a higher level of significance (2). The goal of requesting details of the basis function would be to help identify any metrics that may be interpreted similarly to the MGCV package's concavity metrics and gain a better understanding of the GAM building process.*

*In these cases, it is not necessary that a reviewer request the exact mathematical formula for the basis function. Instead, a written or visual example of how the basis function creates a final factor curve for a variable may be requested to aid model review.*

The referenced information elements are included at the end of this document for clarity along with the recommended edits in **bold and colored**.

Thank you for your consideration,

Thomas Holmes - Head of US Actuarial Data Science, Akur8

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
B.3.d	Obtain concurvity metrics for all smoothed predictor variables included in the model and sub-models.	3	GAMs can suffer from high concurvity in addition to high collinearity. Concurvity is the degree to which the smoothed terms move together. The company should indicate what concurvity metrics were used. The regulatory reviewer should understand what metric was used to produce the concurvity metrics but should not prescribe the type of metrics.*
B.4.c	For all smoothed variables, review plots representing the smooths and relevant tests of significance, such as approximate confidence intervals, chi-square tests, approximate p-values, or F tests. Determine if model development data, validation data, test data, or other data was used for these tests.	1	<p>Smoothed terms in a GAM can have many coefficients based on the number of basis functions. It is difficult to interpret the impact of the smoothed term based on the coefficients. Instead, regulators can review plots representing the cumulative effect of smoothed terms. The company could provide variable value on the x-axis and partial effects on the y-axis. The company could alternatively provide variable value on the x-axis and model prediction for the base risk on the y-axis. The company should provide confidence interval lines regardless of the type of plot. The regulatory reviewer should assess whether the plot has an intuitive shape and whether the curve extrapolates well, especially to areas of the curve representing thinner data.</p> <p>Smoothed interaction terms should also be expressed as plots. Heat map contour plots or 3D perspective plots may be useful.</p> <p>GAMs are a form of penalized regression which complicates the calculation of p-values. The p-values for the smoothed terms output by the modeling software are generally approximate p-values for GAMs. Approximate p-values should be reviewed at the smoothed variable level. The regulatory reviewer may want to select a smaller threshold for smoothed terms than they used for the parametric term p-value threshold.*</p>
B.4.e	Identify the threshold for statistical significance and explain why it was selected. Obtain a reasonable and appropriately supported explanation for keeping the variable for each discrete variable level where the p-values were not less than the chosen threshold.	1	<p>The explanation should clearly identify the thresholds for statistical significance used by the modeler. Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p- values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter values for parametric terms, plots representing smoothed terms, confidence intervals, chi-square tests, p-values, and any other relevant and material tests.*</p>

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
B.4.f	For overall discrete variables, review type 3 chi-square tests, p-values, F tests and any other relevant and material test. Determine if model development data, validation data, test data, or other data was used for these tests.	2	<p>Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p- values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter values for parametric terms, plots representing smoothed terms, confidence intervals, chi-square tests, p-values, and any other relevant and material tests.</p> <p>For variables that are modeled continuously, it may be sufficient to obtain statistics around the modeled parameters; e.g., confidence intervals around each level of an AOI curve might be more than what is needed.*</p>
B.4.h	For continuous variables, provide confidence intervals, chi-square tests, approximate p-values, and any other relevant and material test. Determine if model development data, validation data, test data, or other data was used for these tests.	2	<p>Typical p-values greater than 5% are large and should be questioned. Subject: RE: CASTF Exposure – Regulatory Review of GAMs

When you are preparing your revised version for potential adoption, please spell out G..A...M... in the title and fix the column label “Regulator’ s” to eliminate the extra space. Also, didn’t we modify the introduction for the non-GLM appendices? The introductory paragraphs still focus on GLMs only.

#### APPENDIX B – INFORMATION ELEMENTS AND GUIDANCE FOR A REGULATOR TO MEET BEST PRACTICES’ OBJECTIVES (WHEN REVIEWING GAMS)

This appendix identifies the information a state insurance regulator may need to review a predictive model used by an insurer to support a personal automobile or home insurance rating plan. The list is lengthy but not exhaustive. It is not intended to limit the authority of a regulator to request additional information in support of the model or filed rating plan. Nor is every item on the list intended to be a requirement for every filing. However, the items listed should help guide a regulator to sufficient information that helps determine if the rating plan meets state-specific filing and legal requirements.

Documentation of the design and operational details of the model will help ensure the business continuity and transparency of the models used. Documentation should be sufficiently detailed and complete to enable a qualified third party to form a sound judgment on the suitability of the model for the intended purpose. The theory, assumptions, methodologies, software, and empirical bases should be explained, as well as the data used in developing and implementing the model. Relevant testing and ongoing performance testing need to be documented. Key model limitations and overrides need to be pointed out so that stakeholders understand the circumstances under which the model does not work effectively. End-user documentation should be provided and key reports using the model results described. Major changes to the model need to be documented and shared with regulators in a timely and appropriate manner. Information technology (IT) controls should be in place, such as a record of versions, change control, and access to the model.<sup>1</sup>

Many information elements listed below are probably confidential, proprietary, or trade secret and should be treated as such, in accordance with state laws and/or regulations. Regulators should be aware of their state laws and/or regulations on confidentiality when requesting data from insurers that may be proprietary or trade secret. For example, some proprietary models may have contractual terms (with the insurer) that prevent disclosure to the public. Without clear necessity, exposing this data to additional dissemination may compromise the model’s protection.<sup>2</sup>

Although the list of information is long, the insurer should already have internal documentation on the model for more than half of the information listed. The remaining items on the list require either minimal analysis (approximately 25%) or deeper analysis to generate for a regulator (approximately 25%).

The “Level of Importance to the Regulator’s Review” is a ranking of information a regulator may need to review which is based on the following level criteria:

**Level 1** – This information is necessary to begin the review of a predictive model. These data elements pertain to basic information about the type and structure of the model, the data and variables used, the assumptions made, and the goodness of fit. Ideally, this information would be included in the filing documentation with the initial submission of a filing made based on a predictive model.

**Level 2** – This information is necessary to continue the review of all but the most basic models, such as those based only on the filer’s internal data and only including variables that are in the filed rating plan. These data elements provide more detailed information about the model and address questions arising from review of the information in Level 1. Insurers concerned with speed to market may also want to include this information in the filing documentation.

**Level 3** – This information is necessary to continue the review of a model where concerns have been raised and not resolved based on review of the information in Level 1 and Level 2. These data elements address even more detailed aspects of the model. This information does not necessarily need to be included with the initial submission, unless specifically requested by a particular state, as it is typically requested only if the reviewer has concerns that the model may not comply with state laws and/or regulations.

**Level 4** – This information is necessary to continue the review of a model where concerns have been raised and not resolved based on the information in Level 1, Level 2, and Level 3. This most granular level of detail is addressing the basic building blocks of the model and does not necessarily need to be included by the filer with the initial submission, unless specifically requested by a particular state. It is typically requested only if the reviewer has serious concerns that the model may produce rates or rating factors that are excessive, inadequate, and/or unfairly discriminatory.

Lastly, although the best practices presented in this white paper will readily be transferrable to review of other predictive models, the information elements presented here might be useful only with deeper adaptations when starting to review different types of predictive

<sup>1</sup> Bourdeau, M., 2016. “Model Risk Management: An Overview,” The Modeling Platform, Issue 4, December. Accessed online at <https://www.soa.org/globalassets/assets/library/newsletters/the-modeling-platform/2016/december/mp-2016-iss4.pdf>.

<sup>2</sup> There are some models that are made public by the vendor and would not result in a hindrance of the model’s protection.

models. If the model is not a GAM, some listed items might not apply; e.g., not all predictive models generate p-values or F tests. Depending on the model type, other considerations might be important but are not listed here. When information elements presented in this appendix are applied to lines of business other than personal automobile and home insurance or other type of models, unique considerations may arise. In particular, data volume and credibility may be lower for other lines of business. Regulators should be aware of the context in which a predictive model is deployed, the uses to which the model is proposed to be put, and the potential consequences the model may have on the insurer, its customers, and its competitors. This white paper does not delve into these possible considerations, but regulators should be prepared to address them as they arise.

**A. SELECTING MODEL INPUT**

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>I. Available Data Sources</b>			
A.1.a	Review the details of sources for both insurance and non-insurance data used as input to the model (only need sources for filed input characteristics included in the filed model).	1	<p>Request details of data sources, whether internal to the company or from external sources. For insurance experience (policy or claim), determine whether data are aggregated by calendar, accident, fiscal, or policy year and when it was last evaluated. For each data source, get a list of all data elements used as input to the model that came from that source. For insurance data, get a list all companies whose data is included in the datasets.</p> <p>Request details of any non-insurance data used (customer-provided or other), whether the data was collected by use of a questionnaire/checklist, whether data was voluntarily reported by the applicant, and whether any of the data is subject to the federal Fair Credit Reporting Act (FCRA). If the data is from an outside source, find out what steps were taken to verify the data was accurate, complete, and unbiased in terms of relevant and representative time frame, representative of potential exposures, and lacking in obvious correlation to protected classes.</p> <p><b>Note:</b> Reviewing source details should not make a difference when the model is new or refreshed; refreshed models would report the prior version list with the incremental changes due to the refresh.</p>
A.1.b	Reconcile aggregated insurance data underlying the model with available external insurance reports.	4	Accuracy of insurance data should be reviewed. It is assumed that the data in the insurer's data banks is subject to routine internal company audits and reconciliation. "Aggregated data" is straight from the insurer's data banks without further modification (i.e., not scrubbed or transformed for the purposes of modeling). In other words, the data would not have been specifically modified for the purpose of model building. The company should provide some form of reasonability check that the data makes sense when checked against other audited sources.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
A.1.c	Review the geographic scope and geographic exposure distribution of the raw data for relevance to the state where the model is filed.	2	Many models are developed using a countrywide or a regional dataset. The company should explain how the data used to build the model makes sense for a specific state. The regulator should inquire which states were included in the data underlying the model build, testing, and validation. The company should provide an explanation where the data came from geographically and that it is a good representation for a state; i.e., the distribution by state should not introduce a geographic bias. However, there could be a bias by peril or wind-resistant building codes. Evaluate whether the data is relevant to the loss potential for which it is being used. For example, verify that hurricane data is only used where hurricanes can occur.
<b>2. Sub-Models</b>			
A.2.a	Consider the relevance of (i.e., whether there is bias) of overlapping data or variables used in the model and sub-models.	1	Check if the same variables/datasets were used in the model, a sub-model, or as stand-alone rating characteristics. If so, verify the insurance company has processes and procedures in place to assess and address double-counting or redundancy.
A.2.b	Determine if the sub-model was previously approved (or accepted) by the regulatory agency.	1	If the sub-model was previously approved/accepted, that may reduce the extent of the sub-model's review. If approved, obtain the tracking number(s) (e.g., state, SERFF) and verify when and if it was the same model currently under review.  Note: A previous approval does not necessarily confer a guarantee of ongoing approval; e.g., when statutes and/or regulations have changed or if a model's indications have been undermined by subsequent empirical experience. However, knowing whether a model has been previously approved can help focus the regulator's efforts and determine whether the prior decision needs to be revisited. In some circumstances, direct dialogue with the vendor could be quicker and more useful.

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
A.2.c	Determine if the sub-model output was used as input to the GAM; obtain the vendor name, as well as the name and version of the sub-model.	1	<p>To accelerate the review of the filing, it may be desirable to request (from the company), the name and contact information for a vendor representative. The company should provide the name of the third-party vendor and a contact in the event the regulator has questions. The “contact” can be an intermediary at the insurer (e.g., a filing specialist), who can place the regulator in direct contact with a subject-matter expert (SME) at the vendor.</p> <p>Examples of such sub-models include credit/financial scoring algorithms and household composite score models. Sub-models can be evaluated separately and in the same manner as the primary model under evaluation. A sub-model contact for additional information should be provided. Sub-model SMEs may need to be brought into the conversation with regulators (whether in-house or third-party sub-models are used).</p>
A.2.d	If using catastrophe model output, identify the vendor and the model settings/assumptions used when the model was run.	1	<p>To accelerate the review of the filing, get contact information for the SME that ran the model and an SME from the vendor. The “SME” can be an intermediary at the insurer (e.g., a filing specialist), who can place the regulator in direct contact with the appropriate SMEs at the insurer or model vendor.</p> <p>For example, it is important to know hurricane model settings for storm surge, demand surge, and long-term/short-term views.</p>
A.2.e	Obtain an explanation of how catastrophe models are integrated into the model to ensure no double-counting.	1	<p>If a weather-based sub-model is input to the GAM under review, loss data used to develop the model should not include loss experience associated with the weather-based sub-model. Doing so could cause distortions in the modeled results by double-counting such losses when determining relativities or loss loads in the filed rating plan.</p> <p>For example, redundant losses in the data may occur when non-hurricane wind losses are included in the data while also using a severe convective storm model in the actuarial indication. Such redundancy may also occur with the inclusion of fluvial or pluvial flood losses when using a flood model or inclusion of freeze losses when using a winter storm model.</p>
A.2.f	If using output of any scoring algorithms, obtain a list of the variables used to determine the score and provide the source of the data used to calculate the score.	1	<p>Any sub-model should be reviewed in the same manner as the primary model that uses the sub-model’s output as input. Depending on the result of item A.2.b, the importance of this item may be decreased.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>3. Adjustments to Data</b>			
A.3.a	Determine if premium, exposure, loss, or expense data were adjusted (e.g., developed, trended, adjusted for catastrophe experience, or capped). If so, how? Do the adjustments vary for different segments of the data? If so, identify the segments and how the data was adjusted.	2	<p>The rating plan or indications underlying the rating plan may provide special treatment of large losses and non-modeled large loss events. If such treatments exist, the company should provide an explanation how they were handled. These treatments need to be identified and the company/regulator needs to determine whether model data needs to be adjusted.</p> <p>For example, should large bodily injury (BI) liability losses in the case of personal automobile insurance be excluded, or should large non-catastrophe wind/hail claims in home insurance be excluded from the model's training, test and validation data? Look for anomalies in the data that should be addressed. For example, is there an extreme loss event in the data? If other processes were used to load rates for specific loss events, how is the impact of those losses considered?</p> <p>Examples of losses that can contribute to anomalies in the data are large losses or flood, hurricane, or severe convective storm losses for personal automobile comprehensive or home insurance.</p>
A.3.b	Identify adjustments that were made to aggregated data (e.g., transformations, binning and/or categorizations). If any, identify the name of the characteristic/variable and obtain a description of the adjustment.	1	
A.3.c	Ask for aggregated data (one dataset of pre-adjusted/scrubbed data and one dataset of post-adjusted/scrubbed data) that allows the regulator to focus on the univariate distributions and compare raw data to adjusted/binning/transformed/etc. data.	4	<p>This is most relevant for variables that have been "scrubbed" or adjusted.</p> <p>Though most regulators may never ask for aggregated data and do not plan to rebuild any models, a regulator may ask for this aggregated data or subsets of it.</p> <p>It would be useful to the regulator if the percentage of exposures and premium for missing information from the model data by category are provided. This data can be displayed in either graphical or tabular formats.</p>
A.3.d	Determine how missing data was handled.	1	<p>This is most relevant for variables that have been "scrubbed" or adjusted. The regulator should be aware of assumptions the modeler made in handling missing, null, or "not available" values in the data.</p> <p>For example, it would be helpful to the reviewer if the modeler were to provide a statement as to whether there is any systemic reason for missing data. If adjustments or recoding of values were made, they should be explained. It may also be useful to the regulator if the percentage of exposures and premium for missing information from the model data are provided. This data can be displayed in either graphical or tabular formats.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
A.3.e	If duplicate records exist, determine how they were handled.	1	
A.3.f	Determine if there were any material outliers identified and subsequently adjusted during the scrubbing process.	3	Look for a discussion of how outliers were handled. If necessary, the regulator may want to investigate further by getting a list (with description) of the types of outliers and determine what adjustments were made to each type of outlier. To understand the filer's response, the regulator should ask for the filer's materiality standard.
<b>4. Data Organization</b>			
A.4.a	Obtain documentation on the methods used to compile and organize data, including procedures to merge data from different sources or filter data based on particular characteristics and a description of any preliminary analyses, data checks, and logical tests performed on the data and the results of those tests.	2	This should explain how data from separate sources was merged and/or how subsets of policies, based on selected characteristics, are filtered to be included in the data underlying the model and the rationale for that filtering.
A.4.b	Obtain documentation on the insurer's process for reviewing the appropriateness, reasonableness, consistency, and comprehensiveness of the data, including a discussion of the rational relationship the data has to the predicted variable.	2	An example is when by-peril or by-coverage modeling is performed; the documentation should be for each peril/coverage and make rational sense. For example, if "murder" or "theft" data are used to predict the wind peril, the company should provide support and a rational explanation for their use.
A.4.c	Identify material findings the company had during its data review and obtain an explanation of any potential material limitations, defects, bias, or unresolved concerns found or believed to exist in the data. If issues or limitations in the data influenced modeling analysis and/or results, obtain a description of those concerns and an explanation of how modeling analysis was adjusted and/or results were impacted.	1	"None" or "N/A" may be an appropriate response.

**B. BUILDING THE MODEL**

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>1. High-Level Narrative for Building the Model</b>			
B.1.a	Identify the type of model underlying the rate filing (e.g., GAM, GLM, decision tree, Bayesian GLM, gradient-boosting machine, neural network, etc.). Understand the model's role in the rating system and provide the reasons why that type of model is an appropriate choice for that role.	1	<p>It is important to understand if the model in question is a GAM and, therefore, these information elements are applicable; or if it is some other model type, in which case other reasonable review approaches may be considered. There should be an explanation of why the model (using the variables included in it) is appropriate for the line of business. If by-peril or by-coverage modeling is used, the explanation should be by-peril/by-coverage.</p> <p><b>Note:</b> If the model is not a GAM, the information elements in this white paper may not apply in their entirety.</p>
B.1.b	Identify the software used for model development. Obtain the name of the software vendor/developer, software product, and a software version reference used in model development.	3	<p>Changes in software from one model version to the next may explain if such changes, over time, contribute to changes in the modeled results. The company should provide the name of the third-party vendor and a "contact" in the event the regulator has questions. The "contact" can be an intermediary at the insurer (e.g., a filing specialist) who can place the regulator in direct contact with the appropriate SME at the vendor.</p> <p>Open-source software/programs used in model development should be identified by name and version the same as if from a vendor.</p>
B.1.c	Obtain a description how the available data was divided between model training, test, and/or validation datasets. The description should include an explanation why the selected approach was deemed most appropriate, whether the company made any further subdivisions of available data, and reasons for the subdivisions (e.g., a portion separated from training data to support testing of components during model building). Determine if the validation data was accessed before model training was completed and, if so, obtain an explanation of why that came to occur. Obtain a discussion of whether the model was rebuilt using all the data or if it was only based on the training data.	1	<p>The reviewer should be aware that modelers may break their data into three or just two datasets. Although the term "training" is used with little ambiguity, "test" and "validation" are terms that are sometimes interchanged, or the word "validation" may not be used at all.</p> <p>It would be unexpected if validation and/or test data were used for any purpose other than validation and/or test, prior to the selection of the final model. However, according to the CAS monograph, "Generalized Linear Models for Insurance Rating": "Once a final model is chosen, ... we would then go back and rebuild it using all of the data, so that the parameter estimates would be at their most credible."</p> <p>The reviewer should note whether a company employed cross-validation techniques instead of a training/test/validation dataset approach. If cross-validation techniques were used, the reviewer should request a description of how cross-validation was done and confirm that the final model was not built on any particular subset of the data, but rather the full dataset.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.1.d	Obtain a brief description of the development process, from initial concept to final model and filed rating plan.	1	The narrative should have the same scope as the filing.
B.1.e	Obtain a narrative on whether loss ratio, pure premium, or frequency/severity analyses were performed and, if separate frequency/severity modeling was performed, how pure premiums were determined.	1	
B.1.f	Identify the model's target variable.	1	A clear description of the target variable is key to understanding the purpose of the model. It may also prove useful to obtain a sample calculation of the target variable in Excel format, starting with the "raw" data for a policy, or a small sample of policies, depending on the complexity of the target variable calculation.
B.1.g	Obtain a description of the variable selection process.	1	The narrative regarding the variable selection process may address matters such as the criteria upon which variables were selected or omitted, identification of the number of preliminary variables considered in developing the model versus the number of variables that remained, and any statutory or regulatory limitations that were taken into account when making the decisions regarding variable selection.  The modeler should comment on the use of automated feature selection algorithms to choose predictor variables and explain how potential overfitting that can arise from these techniques was addressed.
B.1.h	In conjunction with variable selection, obtain a narrative on how the company determined the granularity of the rating variables during model development.	3	The narrative should include discussion of how credibility was considered in the process of determining the level of granularity of the variables selected.
B.1.i	Determine if model input data was segmented in anyway (e.g., by-coverage, by-peril, or by-form basis). If so, obtain a description of data segmentation and the reasons for data segmentation.	1	The regulator would use this to follow the logic of the modeling process.
B.1.j	If adjustments to the model were made based on credibility considerations, obtain an explanation of the credibility considerations and how the adjustments were applied.	2	Adjustments may be needed, given that models do not explicitly consider the credibility of the input data or the model's resulting output; models take input data at face value and assume 100% credibility when producing modeled output.
<b>2. Medium-Level Narrative for Building the Model</b>			
B.2.a	At crucial points in model development, if selections were made among alternatives regarding model assumptions or techniques, obtain a narrative on the judgment used to make those selections.	3	

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.2.b	If post-model adjustments were made to the data and the model was rerun, obtain an explanation on the details and the rationale for those adjustments.	2	Evaluate the addition or removal of variables and the model fitting. It is not necessary for the company to discuss each iteration of adding and subtracting variables, but the regulator should gain a general understanding of how these adjustments were done, including any statistical improvement measures relied upon.
B.2.c	Obtain a description of the testing that was performed during the model-building process, including an explanation of the decision-making process to determine which interactions were included and which were not.	3	There should be a description of the testing that was performed during the model-building process. Examples of tests that may have been performed include univariate testing and review of a correlation matrix.  The number of interaction terms that could potentially be included in a model increases far more quickly than the number of "main effect" variables (i.e., the basic predictor variables that can be interacted together). Analyzing each possible interaction term individually can be unwieldy. It is typical for interaction terms to be excluded from the model by default, and only included where they can be shown to be particularly important. So, as a rule of thumb, the regulator's emphasis should be on understanding why the insurer included the interaction terms it did, rather than on why other candidate interactions were excluded.  In some cases, however, it could be reasonable to inquire about why a particular interaction term was excluded from a model—for example, if that interaction term was ubiquitous in similar filings and was known to be highly predictive, or if the regulator had reason to believe that the interaction term would help differentiate dissimilar risks within an excessively heterogeneous rating segment.
B.2.d	For the GAM, identify the link function used. Identify which distribution was used for the model (e.g., Poisson, Gaussian, log-normal, Tweedie). Obtain an explanation of why the link function and distribution were chosen. Obtain the formulas for the distribution and link functions, including specific numerical parameters of the distribution. If changed from the default, obtain a discussion of applicable convergence criterion.	1	Solving the GAM is iterative and the modeler can check to see if fit is improving. At some point, convergence occurs; however, when it occurs can be subjective or based on threshold criteria. If the software's default convergence criteria were not relied upon, an explanation of any deviation should be provided. If the GAM did not reach convergence, an explanation should be provided.
B.2.e	Obtain a narrative on the formula relationship between the data and the model outputs, with a definition of each model input and output. The narrative should describe all parametric (non-smoothed) and smoothed terms necessary to evaluate the predicted pure premium, relativity, or other value, for any real or hypothetical set of inputs.	2	GAMs can have both parametric terms similar to those available in GLMs (e.g., those terms associated with coefficients) and smoothed terms. The smoothed terms are the sum of multiple basis functions which can take on a variety of types. The narrative provided should clarify which variables are included as parametric terms (non-smoothed) and which variables are included within a smoothed function.

**Commented [W1]:** Is an explanation good enough here? Isn't this a critical error in the model that would preclude its use? What kind of explanation would suffice in determining that the model is allowable?

**Commented [SM2]:** Suggest to change to: "The narrative should include a description of how all parametric (non-smoothed) and non-parametric (smoothed) terms are utilized to evaluate ..."

**Commented [W3]:** Should we leave in "coefficients" as an example of a parametric (non-smoothed) term, as "coefficients" is what most regulators are used to seeing [and many regulators may not understand the "parametric (non-smoothed)" terminology]?

**Commented [SM4]:** Do we want more detailed description of the relationship of the various predictor variables with the output of the model, as opposed to the description of type of variables which is covered in section B.3.a?

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.2.f	If there were data situations in which GAM weights were used, obtain an explanation of how and why they were used.	3	Investigate whether identical records were combined to build the model.
<b>3. Predictor Variables</b>			
B.3.a	Obtain a complete data dictionary, including the names, data types, variable fit types, definitions, and uses of each predictor variable, offset variable, control variable, proxy variable, geographic variable, geodemographic variable, and all other variables in the model used on their own or as an interaction with other variables (including sub-models and external models).	1	Data types of variables might be continuous, discrete, Boolean, etc. Definitions should not use programming language or code. Variable fit types include parametric (non-smoothed) and smoothed. For any variable(s) intended to function as a control or offset, obtain an explanation of its purpose and impact. Also, for any use of interaction between variables, obtain an explanation of its rationale and impact. For smoothed, obtain identification of type of interaction (e.g., bivariate thin plate, tensor, pure, etc.).
B.3.b	Obtain a list of predictor variables considered but not used in the final model, and the rationale for their removal.	4	The purpose of this requirement is to identify variables the company finds to be predictive but ultimately may reject for reasons other than loss-cost considerations (e.g., price optimization). Also, look for variables the company tested and then rejected. This item could help address concerns about data dredging. The reasonableness of including a variable with a given significance level could depend greatly on the other variables the company evaluated for inclusion in the model and the criteria for inclusion or omission.  For instance, if the company tested 1,000 similar variables and selected the one with the lowest p-value of 0.001, this would be a far, far weaker case for statistical significance than if that variable was the only one the company evaluated. <b>Note:</b> Context matters.
B.3.c	Obtain a correlation matrix for all parametric (non-smoothed) predictor variables included in the model and sub-model(s).	3	While GAMs accommodate collinearity, the correlation matrix provides more information about the magnitude of correlation between variables. The company should indicate what statistic was used (e.g., Pearson, Cramer's V). The regulatory reviewer should understand what statistic was used to produce the matrix but should not prescribe the statistic.
B.3.d	Obtain concurrency metrics for all smoothed predictor variables included in the model and sub-models.	3	GAMs can suffer from high concurrency in addition to high collinearity. Concurrency is the degree to which the smoothed terms move together. The company should indicate what concurrency metrics were used. The regulatory reviewer should understand what metric was used to produce the concurrency metrics but should not prescribe the type of metrics.

**Commented [WLS]:** Is there a possibility of a situation where a correlation exists between an unsmoothed and a smoothed predictor variable? If so, how can we address this situation here?

Also, is it possible for different metrics to result in different conclusions? If so, would it be worthwhile to suggest that review of multiple types of concurrency metrics would be beneficial?

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.3.e	Obtain a rational explanation for why an increase in each predictor variable should increase or decrease frequency, severity, loss costs, expenses, or any element or characteristic being predicted.	3	<p>The explanation should go beyond demonstrating correlation. Considering possible causation may be relevant, but proving causation is neither practical nor expected. If no rational explanation can be provided, greater scrutiny may be appropriate.</p> <p>For example, the regulator should look for unfamiliar predictor variables and, if found, the regulator should seek to understand the connection that variable has to increasing or decreasing the target variable.</p>
B.3.f	If the modeler made use of one or more dimensionality reduction techniques, such as a principal component analysis (PCA), obtain a narrative about that process, an explanation why that technique was chosen, and a description of the step-by-step process used to transform observations (usually correlated) into a set of (usually linearly) uncorrelated transformed variables. In each instance, obtain a list of the pre-transformation and post-transformation variable names, as well as an explanation of how the results of the dimensionality reduction technique was used within the model.	2	
<b>4. Adjusting Data, Model Validation, and Goodness-of-Fit Measures</b>			
B.4.a	Obtain a description of the methods used to assess the statistical significance/goodness-of-fit of the model to validation data, such as lift charts and statistical tests. Compare the model's projected results to historical actual results and verify that modeled results are reasonably similar to actual results from validation data.	1	<p>For models that are built using multistate data, validation data for some segments of risk is likely to have low credibility in individual states. Nevertheless, some regulators require model validation on state-only data, especially when analysis using state-only data contradicts the countrywide results. State-only data might be more applicable but could also be impacted by low credibility for some segments of risk.</p> <p><b>Note:</b> It may be useful to consider geographic stability measures for territories within the state.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.4.b	For all parametric (non-smoothed) variables, review the appropriate parameter values and relevant tests of significance, such as confidence intervals, chi-square tests, p-values, or F tests. Determine if model development data, validation data, test data, or other data was used for these tests.	1	<p>Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter value, confidence intervals, chi-square tests, p-values, and any other relevant and material tests.</p> <p>For variables that are modeled continuously, it may be sufficient to obtain statistics around the modeled parameters; e.g., confidence intervals around each level of an AOI curve might be more than what is needed.</p>
B.4.c	For all smoothed variables, including interactions between smoothed variables, review plots representing the smooths and relevant tests of significance, such as approximate confidence intervals, chi-square tests, approximate p-values, or F tests. Determine if model development data, validation data, test data, or other data was used for these tests.	1	<p>Smoothed terms in a GAM can have many coefficients based on the number of basis functions. It is difficult to interpret the impact of the smoothed term based on the coefficients. Instead, regulators can review plots representing the cumulative effect of smoothed terms. The company could provide variable value on the x-axis and partial effects on the y-axis. The company could alternatively provide variable value on the x-axis and model prediction for the base risk on the y-axis. The company should provide confidence interval lines regardless of the type of plot. The regulatory reviewer should assess whether the plot has an intuitive shape and whether the curve extrapolates well, especially to areas of the curve representing thinner data.</p> <p>Smoothed interaction terms should also be expressed as plots. Heat map contour plots or 3D perspective plots may be useful.</p> <p>GAMs are a form of penalized regression which complicates the calculation of p-values. The p-values for the smoothed terms output by the modeling software are generally approximate p-values for GAMs. Approximate p-values should be reviewed at the smoothed variable level. The regulatory reviewer may want to select a smaller threshold for smoothed terms than they used for the parametric term p-value threshold.</p>

**Commented [WL6]:** More explanation of what "base risk" is here?  
Is it worthwhile to add something about the smooth failing the horizontal line test?

**Commented [WL7]:** Is there any guidance as to what that threshold should be? Are there any factors that a regulator should consider in determining the threshold to apply?

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.4.d	For all smoothed variables, request details about the basis functions comprising each smoothed function.	4	Smooth functions are based on a sum of basis functions. The company should provide the number of basis functions for each smooth and discuss how the number was chosen.  There are many types of smooth functions that can be applied. Examples include thin plate splines, cubic splines, and cyclic splines. The company should provide the type of each smooth and a narrative on why that type of smooth is appropriate for the variable.
B.4.e	Identify the threshold for statistical significance and explain why it was selected. Obtain a reasonable and appropriately supported explanation for keeping the variable for each discrete variable level where the p-values were not less than the chosen threshold.	1	The explanation should clearly identify the thresholds for statistical significance used by the modeler. Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.  Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter values for parametric terms, plots representing smoothed terms, confidence intervals, chi-square tests, p-values, and any other relevant and material tests.
B.4.f	For overall discrete variables, review type 3 chi-square tests, approximate p-values, F tests and any other relevant and material test. Determine if model development data, validation data, test data, or other data was used for these tests.	2	Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.  Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter values for parametric terms, plots representing smoothed terms, confidence intervals, chi-square tests, p-values (approximate p-values for smoothed terms), and any other relevant and material tests.  For variables that are modeled continuously, it may be sufficient to obtain statistics around the modeled parameters; e.g., confidence intervals around each level of an AOI curve might be more than what is needed.

**Commented [WL9]:** Should we add the possibility of a lower threshold when evaluating smoothed terms?

**Commented [WL8]:**  
We are unsure if discrete variables can be smoothed.  
If so, then do we want to add "approximate" here?  
If not, should we eliminate the added language "plots representing smoothed terms" in the Comments section?

**Commented [SM10]:** "Parametric terms" that are modeled continuously?

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.4.g	Obtain evidence that the model fits the training data well, for individual variables, for any relevant combinations of variables, and for the overall model.	2	<p>For a GAM, such evidence may be available using chi-square tests, approximate p-values, F tests and/or other means.</p> <p>The steps taken during modeling to achieve goodness-of-fit are likely to be numerous and laborious to describe, but they contribute much of what is generalized about a GAM.</p> <p>The regulator should not assume to know what the company did and ask, "How?" Instead, the regulator should ask what the company did and be prepared to ask follow-up questions.</p>
B.4.h	For continuous variables, provide confidence intervals, chi-square tests, approximate p-values, and any other relevant and material test. Determine if model development data, validation data, test data, or other data was used for these tests.	2	<p>Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter values for parametric terms, plots representing smoothed terms confidence intervals, chi-square tests, approximate p-values and any other relevant and material tests.</p> <p>For variables that are modeled continuously, it may be sufficient to obtain statistics around the modeled parameters; for example, confidence intervals around each level of an AOI curve might be more than what is needed.</p>

**Commented [SM11]:** "Parametric terms" that are modeled continuously?

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.4.i	Obtain a description how the model was tested for stability over time.	2	<p>Evaluate the build/test/validation datasets for potential time-sensitive model distortions (e.g., a winter storm in year 3 of 5 can distort the model in both the testing and validation datasets).</p> <p>Obsolescence over time is a model risk (e.g., old data for a variable or a variable itself may no longer be relevant). If a model being introduced now is based on losses from years ago, the reviewer should be interested in knowing whether that model would be predictive in the proposed context. Validation using recent data from the proposed context might be requested. Obsolescence is a risk even for a new model based on recent and relevant loss data.</p> <p>The reviewer may want to inquire as to the following: What steps, if any, were taken during modeling to prevent or delay obsolescence? What controls exist to measure the rate of obsolescence? What is the plan and timeline for updating and ultimately replacing the model?</p> <p>The reviewer should also consider that as newer technologies enter the market (e.g., personal automobile) their impact may change claim activity over time (e.g., lower frequency of loss). So, it is not necessarily a bad thing that the results are not stable over time.</p>
B.4.j	Obtain a narrative on how potential concerns with overfitting were addressed.	2	
B.4.k	Obtain the value of the model complexity parameter $\lambda$ and a discussion of how it was chosen.	2	<p>GAMs are a form of penalized regression. Smaller values of <math>\lambda</math> allow the model to increase complexity and fit “wigglier” data. Larger values of <math>\lambda</math> constricts the model and increases smoothness. Multiple automated approaches exist for tuning <math>\lambda</math> including predictive approaches that optimize AIC or Bayesian approaches such as Restricted Maximum Likelihood.</p>
B.4.l	Obtain support demonstrating that the overall GAM assumptions are appropriate.	3	<p>A visual review of plots of actual errors is usually sufficient.</p> <p>The reviewer should look for a conceptual narrative covering these topics: How does this particular GAM work? Why did the rate filer do what it did? Why employ this design instead of alternatives? Why choose this particular distribution function and this particular link function? A company response may be at a fairly high level and reference industry practices.</p> <p>If the reviewer determines that the model makes no assumptions that are considered to be unreasonable, the importance of this item may be reduced.</p>

**Commented [WL12]:** Given that lambda is likely to be readily available from R or other software, should we change the level to 1 or 2?

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.4.m	Obtain support demonstrating that the assumptions for each smoothed term are appropriate.	3	<p>The reviewer should look for a narrative on how the fit of the smoothed terms was checked for reasonableness.</p> <p>It may be useful to ask for each plot of the smoothed terms to include residuals to ensure that the smoothed line runs through the middle of the residuals.</p> <p>It may be useful for the company to provide tests that each smoothed term is not predictive of residual values (similar to tests achieved in the gam.check() function of the mcgv R package). These tests would ideally demonstrate that the residuals are randomly distributed across all parts of the smoothed term.</p>
B.4.n	Obtain 5-10 sample records with corresponding output from the model for those records.	4	
<b>5. "Old Model" Versus "New Model"</b>			
B.5.a	Obtain an explanation of why this model is an improvement to the current rating plan. If it replaces a previous model, find out why it is better than the one it is replacing; determine how the company reached that conclusion and identify metrics relied on in reaching that conclusion. Look for an explanation of any changes in calculations, assumptions, parameters, changes in smoothed variable plots, and data used to build this model from the previous model.	2	The regulator should expect to see improvement in the new class plan's predictive ability or other sufficient reason for the change.
B.5.b	Determine if two Gini coefficients were compared and obtain a narrative on the conclusion drawn from this comparison.	3	<p>This information element requests a comparison of Gini coefficient from the prior model to the Gini coefficient of proposed model. It is expected that there should be improvement in the Gini coefficient. A higher Gini coefficient indicates greater differentiation produced by the model and how well the model fits that data.</p> <p>This is relevant when one model is being updated or replaced. The regulator should expect to see improvement in the new class plan's predictive ability. One example of a comparison might be sufficient.</p> <p><b>Note:</b> This comparison is not applicable to initial model introduction. Reviewer can look to CAS monograph, "Generalized Linear Models for Insurance Rating."</p>
B.5.c	Determine if double-lift charts were analyzed and obtain a narrative on the conclusion drawn from this analysis.	3	<p>One example of a comparison might be sufficient.</p> <p><b>Note:</b> "Not applicable" is an acceptable response.</p>

**Commented [WL13]:** Suggested revision for consistency with remainder of the document.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.5.d	If replacing an existing model, obtain a list of any predictor variables used in the old model that are not used in the new model. Obtain an explanation of why these variables were dropped from the new model.  Obtain a list of all new predictor variables in the new model that were not in the prior old model.	2	It is useful to differentiate between old and new variables, so the regulator can prioritize more time on variables not yet reviewed.
<b>6. Modeler Software</b>			
B.6.a	Request access to SMEs (e.g., modelers) who led the project, compiled the data, and/or built the model.	4	The filing should contain a contact that can put the regulator in touch with appropriate SMEs and key contributors to the model development to discuss the model.

**C. THE FILED RATING PLAN**

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>I. General Impact of Model on Rating Algorithm</b>			
C.1.a	In the actuarial memorandum or explanatory memorandum, for each model and sub-model (including external models), look for a narrative that explains each model and its role (i.e., how it was used) in the rating system.	1	The "role of the model" relates to how the model integrates into the rating plan as a whole and where the effects of the model are manifested within the various components of the rating plan. This is not intended as an overarching statement of the model's goal, but rather a description of how specifically the model is used.  This item is particularly important, if the role of the model cannot be immediately discerned by the reviewer from a quick review of the rate and/or rule pages. (Importance is dependent on state requirements and ease of identification by the first layer of review and escalation to the appropriate review staff.)
C.1.b	Obtain an explanation of how the model was used to adjust the filed rating algorithm.	1	Models are often used to produce factor-based indications, which are then used as the basis for the selected changes to the rating plan. It is the changes to the rating plan that create impacts.  The regulator should consider asking how the smoothed functions of the GAM will be implemented. The regulator should consider asking for an explanation of how the model was used to adjust the rating algorithm.
C.1.c	Obtain a complete list of characteristics/variables used in the proposed rating plan, including those used as input to the model (including sub-models and composite variables) and all other characteristics/variables (not input to the model) used to calculate a premium. For each characteristic/variable, determine if it is only input to the model, whether it is only a separate univariate rating characteristic, or whether it is both input to the model and a separate univariate rating characteristic. The list should include transparent descriptions (in plain language) of each listed characteristic/variable.	1	Examples of variables used as inputs to the model and used as separate univariate rating characteristics might be criteria used to determine a rating tier or household composite characteristic.

**Commented [WL14]:** Smoothed "terms" rather than "functions"?

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>2. Relevance of Variables and Relationship to Risk of Loss</b>			
C.2.a	Obtain a narrative regarding how the characteristics/rating variables included in the filed rating plan relate to the risk of insurance loss(or expense) for the type of insurance productbeing priced.	2	The narrative should include a discussion of the relevance each characteristic/rating variable has on consumer behavior that would lead to a difference in risk of loss (or expense). The narrative should include a rational relationship to cost, and model results should be consistent with the expected direction of the relationship. <b>Note:</b> This explanation would not be needed if the connection between variables and risk of loss (or expense) has already been illustrated.
<b>3. Comparison of Model Outputs to Current and Selected Rating Factors</b>			
C.3.a	Compare relativities indicated by the model to both current relativities and the insurer's selected relativities for each risk characteristic/variable in the rating plan.	1	"Significant difference" may vary based on the risk characteristic/variable and context. However, the movement of a selected relativity should be in the direction of the indicated relativity; if not, an explanation is necessary as to why the movement is logical.
C.3.b	Obtain documentation and support for all calculations, judgments, or adjustments that connect the model's indicated values to the selected relativities filed in the rating plan.	1	The documentation should include explanations for the necessity of any such adjustments and each significantdifference between the model's indicated values and the selected values. This applies even to models that produce scores, tiers, or ranges of values for which indications can be derived. <b>Note:</b> This information is especially important if differences between model-indicated values and selected values are material and/or impact one consumer population more than another.
C.3.c	For each characteristic/variable used as both input to the model (including sub-models and composite variables) and as a separate univariate rating characteristic, obtain a narrative regarding how each characteristic/variable was tempered or adjusted to account for possible overlap or redundancy in what the characteristic/variable measures.	2	Modeling loss ratios with these characteristics/ variables as control variables would account for possible overlap. The insurer should address this possibility or other considerations; e.g., tier placement models often use risk characteristics/ variables that are also used elsewhere inthe rating plan. One way to do this would be to model the loss ratios resulting from a process that already uses univariate rating variables. Then the model/composite variables would be attempting to explain the residuals.
<b>4. Responses to Data, Credibility, and Granularity Issues</b>			
C.4.a	Determine what, if any, consideration was given to the credibility of the output data.	2	The regulator should determine at what level of granularity credibility is applied. If modeling was by-coverage, by-form, or by-peril, the company should explain how these were handled when there was not enough credible data by coverage, form, or peril to model.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
C.4.b	If the rating plan is less granular than the model, obtain an explanation of why.	2	This is applicable if the company had to combine modeled output in order to reduce the granularity of the rating plan.
C.4.c	If the rating plan is more granular than the model, obtain an explanation of why.	2	A more granular rating plan may imply that the company had to extrapolate certain rating treatments, especially at the tails of a distribution of attributes, in a manner not specified by the model indications. It may be necessary to extrapolate due to data availability or other considerations.
<b>5. Definitions of Rating Variables</b>			
C.5.a	Obtain a narrative regarding adjustments made to model output (e.g., transformations, binning and/or categorizations). If adjustments were made, obtain the name of the characteristic/variable and a description of the adjustment.	2	If rating tiers or other intermediate rating categories are created from model output, the rate and/or rule pages should present these rating tiers or categories. The company should provide an explanation of how model output was translated into these rating tiers or intermediate rating categories.
<b>6. Supporting Data</b>			
C.6.a	Obtain aggregated state-specific, book-of-business-specific univariate historical experience data, separately for each year included in the model, consisting of loss ratio or pure premium relativities and the data underlying those calculations for each category of model output(s) proposed to be used within the rating plan. For each data element, obtain an explanation of whether it is raw or adjusted and, if the latter, obtain a detailed explanation for the adjustments.		For example, were losses developed/undeveloped, trended/untrended, capped/uncapped, etc.? Univariate indications should not necessarily be used to override more sophisticated multivariate indications. However, they do provide additional context and may serve as a useful reference.
C.6.b	Obtain an explanation of any material (especially directional) differences between model indications and state-specific univariate indications.	4	Multivariate indications may be reasonable as refinements to univariate indications, but possibly not for bringing about significant reversals of those indications. For instance, if the univariate indicated relativity for an attribute is 1.5 and the multivariate indicated relativity is 1.25, this is potentially a plausible application of the multivariate techniques. If, however, the univariate indicated relativity is 0.7 and the multivariate indicated relativity is 1.25, a regulator may question whether the attribute in question is negatively correlated with other determinants of risk. Credibility of state-level data should be considered when state indications differ from modeled results based on a broader dataset. However, the relevance of the broader dataset to the risks being priced should also be considered. Borderline reversals are not of as much concern. If multivariate indications perform well against the state-level data, this should suffice. However, credibility considerations need to be taken into account as state-level segmentation comparisons may not have enough credibility.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>7. Consumer Impacts</b>			
C.7.a	Obtain a listing of the top five rating variables that contribute the most to large swings in renewal premium, both as increases and decreases, as well as the top five rating variables with the largest spread of impact for both new and renewal business.	4	These rating variables may represent changes to rating factors, be newly introduced to the rating plan, or have been removed from the rating plan.
C.7.b	Determine if the company performed sensitivity testing to identify significant changes in premium due to small or incremental change in a single risk characteristic. If such testing was performed, obtain a narrative that discusses the testing and provides the results of that testing.	3	One way to see sensitivity is to analyze a graph of each risk characteristic's/variable's possible relativities. Look for significant variation between adjacent relativities and evaluate if such variation is reasonable and credible.
C.7.c	For the proposed filing, obtain the impacts on renewal business and describe the process used by management, if any, to mitigate those impacts.	2	Some mitigation efforts may substantially weaken the connection between premium and expected loss and expense and, hence, may be viewed as unfairly discriminatory by some states.
C.7.d	Obtain a rate disruption/dislocation analysis, demonstrating the distribution of percentage and/or dollar impacts on renewal business (created by rerating the current book of business) and sufficient information to explain the disruptions to individual consumers.	2	The analysis should include the largest dollar and percentage impacts arising from the filing, including the impacts arising specifically from the adoption of the model or changes to the model as they translate into the proposed rating plan.  While the default request would typically be for the distribution/dislocation of impacts at the overall filing level, the regulator may need to delve into the more granular variable-specific effects of rate changes if there is concern about particular variables having extreme or disproportionate impacts, or significant impacts that have otherwise yet to be substantiated.  See Appendix D for an example of a disruption analysis.
C.7.e	Obtain exposure distributions for the model's output variables and show the effects of rate changes at granular and summary levels, including the overall impact on the book of business.	3	See Appendix D for an example of an exposure distribution.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
C.7.f	Identify policy characteristics, used as input to a model or sub-model, that remain "static" over a policy's lifetime versus those that will be updated periodically. Obtain a narrative on how the company handles policy characteristics that are listed as "static," yet change over time.	3	<p>Some examples of "static" policy characteristics are prior carrier tenure, prior carrier type, prior liability limits, claim history over past X years, or lapse of coverage. These are specific policy characteristics usually set at the time new business is written, used to create an insurance score or to place the business in a rating/underwriting tier, and often fixed for the life of the policy.</p> <p>The reviewer should be aware, and possibly concerned, how the company treats an insured over time when the insured's risk profile based on "static" variables changes over time but the rate charged, based on a new business insurance score or tier assignment, no longer reflect the insured's true and current risk profile.</p> <p>A few examples of "non-static" policy characteristics are age of driver, driving record, and credit information (FCRA-related). These are updated automatically by the company on a periodic basis, usually at renewal, with or without the policyholder explicitly informing the company.</p>
C.7.g	Obtain a means to calculate the rate charged a consumer.	3	<p>The filed rating plan should contain enough information for a regulator to be able to validate policy premium. However, for a complex model or rating plan, a score or premium calculator via Excel or similar means would be ideal, but this could be elicited on a case-by-case basis. The ability to calculate the rate charged could allow the regulator to perform sensitivity testing when there are small changes to a risk characteristic/variable. <b>Note:</b> This information may be proprietary.</p> <p>For the rating plan, the rate order of calculation rule may be sufficient. However, it may not be feasible for a regulator to get all the input data necessary to reproduce a model's output. Credit and telematics models are examples of model types where model output would be readily available, but the input data would not be readily available to the regulator.</p>
C.7.h	In the filed rating plan, be aware of any non-insurance data used as input to the model (customer-provided or other). In order to respond to consumer inquiries, it may be necessary to inquire as to how consumers can verify their data and correct errors.	1	<p>If the data is from a third-party source, the company should provide information on the source. Depending on the nature of the data, it may need to be documented with an overview of who owns it.</p> <p>The topic of consumer verification may also need to be addressed, including how consumers can verify their data and correct errors.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>8. Accurate Translation of Model into a Rating Plan</b>			
C.8.a	Obtain sufficient information to understand how the model outputs are used within the rating system and to verify that the rating plan's manual, in fact, reflects the model output and any adjustments made to the model output.	1	The regulator can review the rating plan's manual to see that modeled output is properly reflected in the manual's rules, rates, factors, etc.
<b>9. Efficient and Effective Review of Rate Filing</b>			
C.9.a	Establish procedures to efficiently review rate filings and models contained therein.	1	<p>“Speed to market” is an important competitive concept for insurers. Although the regulator needs to understand the rate filing before accepting the rate filing, the regulator should not request information that does not increase his/her understanding of the rate filing.</p> <p>The regulator should review the state's rate filing review process and procedures to ensure that they are fair and efficient.</p>
C.9.b	Be knowledgeable of state laws and regulations in order to determine if the proposed rating plan (and models) are compliant with state laws and/or regulations.	1	This is a primary duty of state insurance regulators. The regulator should be knowledgeable of state laws and regulations and apply them to a rate filing fairly and efficiently. The regulator should pay special attention to prohibitions of unfair discrimination.
C.9.c	Be knowledgeable of state laws and regulations in order to determine if any information contained in the rate filing (and models) should be treated as confidential.	1	The regulator should be knowledgeable of state laws and regulations regarding confidentiality of rate filing information and apply them to a rate filing fairly and efficiently. Confidentiality of proprietary information is key to innovation and competitive markets.

## Significant Changes Summary

- 1 The introduction has been clarified to reflect that this appendix is for GAMs only.
  - 2 Information elements discussing p-values and concurvity metrics have an asterisk and a related footnote. The footnote explains that if a certain variety of GAM can't produce these measures, requests should focus on satisfying the purpose of this element through other methods.
  - 3 The correlation matrix information element now requests both the parametric variables and the inputs for the smoothed variables. This is to help identify relationships between the parametric variables and non-parametric variables.
  - 4 The commentary about lower approximate p-value thresholds now includes an example. "For example, if a regulator typically applies a 0.05 threshold to a GLM, they may want to consider applying a 0.03 threshold to the smoothed terms within a GAM."
  - 5 The commentary about evaluating smoothed term plots now discusses the "horizontal line test." The regulatory reviewer should review whether the plot passes the "horizontal line test". The "horizontal line test" checks whether a horizontal line could be drawn in the plot through the confidence intervals. If so, this implies that the smoothed variable is not measuring significant differences across the target variable.
  - 6 Added a statement that the review of multiple concurvity metrics may be beneficial.
- Most of the other changes improve the clarity of the wording without revising the original meaning.

## APPENDIX B-GAM – INFORMATION ELEMENTS AND GUIDANCE FOR A REGULATOR TO MEET BEST PRACTICES’ OBJECTIVES (WHEN REVIEWING GENERALIZED ADDITIVE MODELS)

This appendix identifies the information a state insurance regulator may need to review a Generalized Additive Model (GAM) used by an insurer to support a personal automobile or home insurance rating plan. GAM models are similar to Generalized Linear Models (GLMs) but feature smoothed terms in addition to traditional parametric terms. The list is lengthy but not exhaustive. It is not intended to limit the authority of a regulator to request additional information in support of the model or filed rating plan. Nor is every item on the list intended to be a requirement for every filing. However, the items listed should help guide a regulator to sufficient information that helps determine if the rating plan meets state-specific filing and legal requirements.

Documentation of the design and operational details of the model will help ensure the business continuity and transparency of the models used. Documentation should be sufficiently detailed and complete to enable a qualified third party to form a sound judgment on the suitability of the model for the intended purpose. The theory, assumptions, methodologies, software, and empirical bases should be explained, as well as the data used in developing and implementing the model. Relevant testing and ongoing performance testing need to be documented. Key model limitations and overrides need to be pointed out so that stakeholders understand the circumstances under which the model does not work effectively. End-user documentation should be provided and key reports using the model results described. Major changes to the model need to be documented and shared with regulators in a timely and appropriate manner. Information technology (IT) controls should be in place, such as a record of versions, change control, and access to the model.<sup>1</sup>

Many information elements listed below are probably confidential, proprietary, or trade secret and should be treated as such, in accordance with state laws and/or regulations. Regulators should be aware of their state laws and/or regulations on confidentiality when requesting data from insurers that may be proprietary or trade secret. For example, some proprietary models may have contractual terms (with the insurer) that prevent disclosure to the public. Without clear necessity, exposing this data to additional dissemination may compromise the model’s protection.<sup>2</sup>

Although the list of information is long, the insurer should already have internal documentation on the model for more than half of the information listed. The remaining items on the list require either minimal analysis (approximately 25%) or deeper analysis to generate for a regulator (approximately 25%). The definition of GAM is quite broad and the available information elements will differ depending on the basis functions used in the GAM as well as the method of penalization. This broad definition of a GAM means that a reviewer should be looking for analogous information in the case where certain necessary information elements are not available. For example, p-values will not be produced for some varieties of GAM. If p-values are being evaluated to confirm the significance of variables included in the model, the reviewer may start a dialogue on how variable significance was evaluated in this particular GAM to obtain the information necessary to satisfy this area of review. In this way, a reviewer can use the information elements below to review wide varieties of GAM.

The “Level of Importance to the Regulator’s Review” is a ranking of information a regulator may need to review which is based on the following level criteria:

**Level 1** – This information is necessary to begin the review of a predictive model. These data elements pertain to basic information about the type and structure of the model, the data and variables used, the assumptions made, and the goodness of fit. Ideally, this information would be included in the filing documentation with the initial submission of a filing made based on a predictive model.

**Level 2** – This information is necessary to continue the review of all but the most basic models, such as those based only on the filer’s internal data and only including variables that are in the filed rating plan. These data elements provide more detailed information about the model and address questions arising from review of the information in Level 1. Insurers concerned with speed to market may also want to include this information in the filing documentation.

**Level 3** – This information is necessary to continue the review of a model where concerns have been raised and not resolved based on review of the information in Level 1 and Level 2. These data elements address even more detailed aspects of the model. This information does not necessarily need to be included with the initial submission, unless specifically requested by a particular state, as it is typically requested only if the reviewer has concerns that the model may not comply with state laws and/or regulations.

<sup>1</sup> Bourdeau, M., 2016. “Model Risk Management: An Overview,” The Modeling Platform, Issue 4, December. Accessed online at <https://www.soa.org/globalassets/assets/library/newsletters/the-modeling-platform/2016/december/mp-2016-iss4.pdf>.

<sup>2</sup> There are some models that are made public by the vendor and would not result in a hindrance of the model’s protection.

**Level 4** – This information is necessary to continue the review of a model where concerns have been raised and not resolved based on the information in Level 1, Level 2, and Level 3. This most granular level of detail is addressing the basic building blocks of the model and does not necessarily need to be included by the filer with the initial submission, unless specifically requested by a particular state. It is typically requested only if the reviewer has serious concerns that the model may produce rates or rating factors that are excessive, inadequate, and/or unfairly discriminatory.

Appendix B-GAM is focused on Generalized Additive Models (GAMs). This appendix should not be referenced in the review of other model types. GAMs have significant differences from GLMs. This Appendix B-GAM is intended to provide state guidance for the review of rate filings based on Generalized Additive Models.

**A. SELECTING MODEL INPUT**

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
<b>1. Available Data Sources</b>			
A.1.a	Review the details of sources for both insurance and non-insurance data used as input to the model (only need sources for filed input characteristics included in the filed model).	1	<p>Request details of data sources, whether internal to the company or from external sources. For insurance experience (policy or claim), determine whether data are aggregated by calendar, accident, fiscal, or policy year and when it was last evaluated. For each data source, get a list of all data elements used as input to the model that came from that source. For insurance data, get a list all companies whose data is included in the datasets.</p> <p>Request details of any non-insurance data used (customer-provided or other), whether the data was collected by use of a questionnaire/checklist, whether data was voluntarily reported by the applicant, and whether any of the data is subject to the federal Fair Credit Reporting Act (FCRA). If the data is from an outside source, find out what steps were taken to verify the data was accurate, complete, and unbiased in terms of relevant and representative time frame, representative of potential exposures, and lacking in obvious correlation to protected classes.</p> <p><b>Note:</b> Reviewing source details should not make a difference when the model is new or refreshed; refreshed models would report the prior version list with the incremental changes due to the refresh.</p>
A.1.b	Reconcile aggregated insurance data underlying the model with available external insurance reports.	4	<p>Accuracy of insurance data should be reviewed. It is assumed that the data in the insurer’s data banks is subject to routine internal company audits and reconciliation. “Aggregated data” is straight from the insurer’s data banks without further modification (i.e., not scrubbed or transformed for the purposes of modeling). In other words, the data would not have been specifically modified for the purpose of model building. The company should provide some form of reasonability check that the data makes sense when checked against other audited sources.</p>

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
A.1.c	Review the geographic scope and geographic exposure distribution of the raw data for relevance to the state where the model is filed.	2	Many models are developed using a countrywide or a regional dataset. The company should explain how the data used to build the model makes sense for a specific state. The regulator should inquire which states were included in the data underlying the model build, testing, and validation. The company should provide an explanation where the data came from geographically and that it is a good representation for a state; i.e., the distribution by state should not introduce a geographic bias. However, there could be a bias by peril or wind-resistant building codes. Evaluate whether the data is relevant to the loss potential for which it is being used. For example, verify that hurricane data is only used where hurricanes can occur.
<b>2. Sub-Models</b>			
A.2.a	Consider the relevance of (i.e., whether there is bias) of overlapping data or variables used in the model and sub-models.	1	Check if the same variables/datasets were used in the model, a sub-model, or as stand-alone rating characteristics. If so, verify the insurance company has processes and procedures in place to assess and address double-counting or redundancy.
A.2.b	Determine if the sub-model was previously approved (or accepted) by the regulatory agency.	1	If the sub-model was previously approved/accepted, that may reduce the extent of the sub-model’s review. If approved, obtain the tracking number(s) (e.g., state, SERFF) and verify when and if it was the same model currently under review.  Note: A previous approval does not necessarily confer a guarantee of ongoing approval; e.g., when statutes and/or regulations have changed or if a model’s indications have been undermined by subsequent empirical experience. However, knowing whether a model has been previously approved can help focus the regulator’s efforts and determine whether the prior decision needs to be revisited. In some circumstances, direct dialogue with the vendor could be quicker and more useful.

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
A.2.c	Determine if the sub-model output was used as input to the GAM; obtain the vendor name, as well as the name and version of the sub-model.	1	<p>To accelerate the review of the filing, it may be desirable to request (from the company), the name and contact information for a vendor representative. The company should provide the name of the third-party vendor and a contact in the event the regulator has questions. The “contact” can be an intermediary at the insurer (e.g., a filing specialist), who can place the regulator in direct contact with a subject-matter expert (SME) at the vendor.</p> <p>Examples of such sub-models include credit/financial scoring algorithms and household composite score models. Sub-models can be evaluated separately and in the same manner as the primary model under evaluation. A sub-model contact for additional information should be provided. Sub-model SMEs may need to be brought into the conversation with regulators (whether in-house or third-party sub-models are used).</p>
A.2.d	If using catastrophe model output, identify the vendor and the model settings/assumptions used when the model was run.	1	<p>To accelerate the review of the filing, get contact information for the SME that ran the model and an SME from the vendor. The “SME” can be an intermediary at the insurer (e.g., a filing specialist), who can place the regulator in direct contact with the appropriate SMEs at the insurer or model vendor.</p> <p>For example, it is important to know hurricane model settings for storm surge, demand surge, and long-term/short-term views.</p>
A.2.e	Obtain an explanation of how catastrophe models are integrated into the model to ensure no double-counting.	1	<p>If a weather-based sub-model is input to the GAM under review, loss data used to develop the model should not include loss experience associated with the weather-based sub-model. Doing so could cause distortions in the modeled results by double-counting such losses when determining relativities or loss loads in the filed rating plan.</p> <p>For example, redundant losses in the data may occur when non-hurricane wind losses are included in the data while also using a severe convective storm model in the actuarial indication. Such redundancy may also occur with the inclusion of fluvial or pluvial flood losses when using a flood model or inclusion of freeze losses when using a winter storm model.</p>
A.2.f	If using output of any scoring algorithms, obtain a list of the variables used to determine the score and provide the source of the data used to calculate the score.	1	<p>Any sub-model should be reviewed in the same manner as the primary model that uses the sub-model’s output as input. Depending on the result of item A.2.b, the importance of this item may be decreased.</p>

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
<b>3. Adjustments to Data</b>			
A.3.a	Determine if premium, exposure, loss, or expense data were adjusted (e.g., developed, trended, adjusted for catastrophe experience, or capped). If so, how? Do the adjustments vary for different segments of the data? If so, identify the segments and how the data was adjusted.	2	<p>The rating plan or indications underlying the rating plan may provide special treatment of large losses and non-modeled large loss events. If such treatments exist, the company should provide an explanation how they were handled. These treatments need to be identified and the company/regulator needs to determine whether model data needs to be adjusted.</p> <p>For example, should large bodily injury (BI) liability losses in the case of personal automobile insurance be excluded, or should large non-catastrophe wind/hail claims in home insurance be excluded from the model’s training, test and validation data? Look for anomalies in the data that should be addressed. For example, is there an extreme loss event in the data? If other processes were used to load rates for specific loss events, how is the impact of those losses considered?</p> <p>Examples of losses that can contribute to anomalies in the data are large losses or flood, hurricane, or severe convective storm losses for personal automobile comprehensive or home insurance.</p>
A.3.b	Identify adjustments that were made to aggregated data (e.g., transformations, binning and/or categorizations). If any, identify the name of the characteristic/variable and obtain a description of the adjustment.	1	
A.3.c	Ask for aggregated data (one dataset of pre-adjusted/scrubbed data and one dataset of post-adjusted/scrubbed data) that allows the regulator to focus on the univariate distributions and compare raw data to adjusted/binning/transformed/etc. data.	4	<p>This is most relevant for variables that have been “scrubbed” or adjusted.</p> <p>Though most regulators may never ask for aggregated data and do not plan to rebuild any models, a regulator may ask for this aggregated data or subsets of it.</p> <p>It would be useful to the regulator if the percentage of exposures and premium for missing information from the model data by category are provided. This data can be displayed in either graphical or tabular formats.</p>
A.3.d	Determine how missing data was handled.	1	<p>This is most relevant for variables that have been “scrubbed” or adjusted. The regulator should be aware of assumptions the modeler made in handling missing, null, or “not available” values in the data.</p> <p>For example, it would be helpful to the reviewer if the modeler were to provide a statement as to whether there is any systemic reason for missing data. If adjustments or recoding of values were made, they should be explained. It may also be useful to the regulator if the percentage of exposures and premium for missing information from the model data are provided. This data can be displayed in either graphical or tabular formats.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
A.3.e	If duplicate records exist, determine how they were handled.	1	
A.3.f	Determine if there were any material outliers identified and subsequently adjusted during the scrubbing process.	3	Look for a discussion of how outliers were handled. If necessary, the regulator may want to investigate further by getting a list (with description) of the types of outliers and determine what adjustments were made to each type of outlier. To understand the filer's response, the regulator should ask for the filer's materiality standard.
<b>4. Data Organization</b>			
A.4.a	Obtain documentation on the methods used to compile and organize data, including procedures to merge data from different sources or filter data based on particular characteristics and a description of any preliminary analyses, data checks, and logical tests performed on the data and the results of those tests.	2	This should explain how data from separate sources was merged and/or how subsets of policies, based on selected characteristics, are filtered to be included in the data underlying the model and the rationale for that filtering.
A.4.b	Obtain documentation on the insurer's process for reviewing the appropriateness, reasonableness, consistency, and comprehensiveness of the data, including a discussion of the rational relationship the data has to the predicted variable.	2	An example is when by-peril or by-coverage modeling is performed; the documentation should be for each peril/coverage and make rational sense. For example, if "murder" or "theft" data are used to predict the wind peril, the company should provide support and a rational explanation for their use.
A.4.c	Identify material findings the company had during its data review and obtain an explanation of any potential material limitations, defects, bias, or unresolved concerns found or believed to exist in the data. If issues or limitations in the data influenced modeling analysis and/or results, obtain a description of those concerns and an explanation of how modeling analysis was adjusted and/or results were impacted.	1	"None" or "N/A" may be an appropriate response.

**B. BUILDING THE MODEL**

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
<b>1. High-Level Narrative for Building the Model</b>			
B.1.a	Identify the type of model underlying the rate filing (e.g., GAM, GLM, decision tree, Bayesian GLM, gradient-boosting machine, neural network, etc.). Understand the model’s role in the rating system and provide the reasons why that type of model is an appropriate choice for that role.	1	<p>It is important to understand if the model in question is a GAM and, therefore, these information elements are applicable; or if it is some other model type, in which case other reasonable review approaches may be considered. There should be an explanation of why the model (using the variables included in it) is appropriate for the line of business. If by-peril or by-coverage modeling is used, the explanation should be by-peril/by-coverage.</p> <p><b>Note:</b> If the model is not a GAM, the information elements in this white paper may not apply in their entirety.</p>
B.1.b	Identify the software used for model development. Obtain the name of the software vendor/developer, software product, and a software version reference used in model development.	3	<p>Changes in software from one model version to the next may explain if such changes, over time, contribute to changes in the modeled results. The company should provide the name of the third-party vendor and a “contact” in the event the regulator has questions. The “contact” can be an intermediary at the insurer (e.g., a filing specialist) who can place the regulator in direct contact with the appropriate SME at the vendor.</p> <p>Open-source software/programs used in model development should be identified by name and version the same as if from a vendor.</p>
B.1.c	Obtain a description how the available data was divided between model training, test, and/or validation datasets. The description should include an explanation why the selected approach was deemed most appropriate, whether the company made any further subdivisions of available data, and reasons for the subdivisions (e.g., a portion separated from training data to support testing of components during model building). Determine if the validation data was accessed before model training was completed and, if so, obtain an explanation of why that came to occur. Obtain a discussion of whether the model was rebuilt using all the data or if it was only based on the training data.	1	<p>The reviewer should be aware that modelers may break their data into three or just two datasets. Although the term “training” is used with little ambiguity, “test” and “validation” are terms that are sometimes interchanged, or the word “validation” may not be used at all.</p> <p>It would be unexpected if validation and/or test data were used for any purpose other than validation and/or test, prior to the selection of the final model. However, according to the CAS monograph, “Generalized Linear Models for Insurance Rating”: “Once a final model is chosen, ... we would then go back and rebuild it using all of the data, so that the parameter estimates would be at their most credible.”</p> <p>The reviewer should note whether a company employed cross-validation techniques instead of a training/test/validation dataset approach. If cross-validation techniques were used, the reviewer should request a description of how cross-validation was done and confirm that the final model was not built on any particular subset of the data, but rather the full dataset.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.1.d	Obtain a brief description of the development process, from initial concept to final model and filed rating plan.	1	The narrative should have the same scope as the filing.
B.1.e	Obtain a narrative on whether loss ratio, pure premium, or frequency/severity analyses were performed and, if separate frequency/severity modeling was performed, how pure premiums were determined.	1	
B.1.f	Identify the model's target variable.	1	A clear description of the target variable is key to understanding the purpose of the model. It may also prove useful to obtain a sample calculation of the target variable in Excel format, starting with the "raw" data for a policy, or a small sample of policies, depending on the complexity of the target variable calculation.
B.1.g	Obtain a description of the variable selection process.	1	The narrative regarding the variable selection process may address matters such as the criteria upon which variables were selected or omitted, identification of the number of preliminary variables considered in developing the model versus the number of variables that remained, and any statutory or regulatory limitations that were taken into account when making the decisions regarding variable selection.  The modeler should comment on the use of automated feature selection algorithms to choose predictor variables and explain how potential overfitting that can arise from these techniques was addressed.
B.1.h	In conjunction with variable selection, obtain a narrative on how the company determined the granularity of the rating variables during model development.	3	The narrative should include discussion of how credibility was considered in the process of determining the level of granularity of the variables selected.
B.1.i	Determine if model input data was segmented in anyway (e.g., by-coverage, by-peril, or by-form basis). If so, obtain a description of data segmentation and the reasons for data segmentation.	1	The regulator would use this to follow the logic of the modeling process.
B.1.j	If adjustments to the model were made based on credibility considerations, obtain an explanation of the credibility considerations and how the adjustments were applied.	2	Adjustments may be needed, given that models do not explicitly consider the credibility of the input data or the model's resulting output; models take input data at face value and assume 100% credibility when producing modeled output.
<b>2. Medium-Level Narrative for Building the Model</b>			
B.2.a	At crucial points in model development, if selections were made among alternatives regarding model assumptions or techniques, obtain a narrative on the judgment used to make those selections.	3	

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
B.2.b	If post-model adjustments were made to the data and the model was rerun, obtain an explanation on the details and the rationale for those adjustments.	2	Evaluate the addition or removal of variables and the model fitting. It is not necessary for the company to discuss each iteration of adding and subtracting variables, but the regulator should gain a general understanding of how these adjustments were done, including any statistical improvement measures relied upon.
B.2.c	Obtain a description of the testing that was performed during the model-building process, including an explanation of the decision-making process to determine which interactions were included and which were not.	3	<p>There should be a description of the testing that was performed during the model-building process. Examples of tests that may have been performed include univariate testing and review of a correlation matrix.</p> <p>The number of interaction terms that could potentially be included in a model increases far more quickly than the number of “main effect” variables (i.e., the basic predictor variables that can be interacted together). Analyzing each possible interaction term individually can be unwieldy. It is typical for interaction terms to be excluded from the model by default, and only included where they can be shown to be particularly important. So, as a rule of thumb, the regulator’s emphasis should be on understanding why the insurer included the interaction terms it did, rather than on why other candidate interactions were excluded.</p> <p>In some cases, however, it could be reasonable to inquire about why a particular interaction term was excluded from a model—for example, if that interaction term was ubiquitous in similar filings and was known to be highly predictive, or if the regulator had reason to believe that the interaction term would help differentiate dissimilar risks within an excessively heterogeneous rating segment.</p>
B.2.d	For the GAM, identify the link function used. Identify which distribution was used for the model (e.g., Poisson, Gaussian, log-normal, Tweedie). Obtain an explanation of why the link function and distribution were chosen. Obtain the formulas for the distribution and link functions, including specific numerical parameters of the distribution. If changed from the default, obtain a discussion of applicable convergence criterion.	1	Solving the GAM is iterative and the modeler can check to see if fit is improving. At some point, convergence occurs; however, when it occurs can be subjective or based on threshold criteria. If the software’s default convergence criteria were not relied upon, an explanation of any deviation should be provided. If the GAM did not reach convergence, an explanation should be provided.
B.2.e	Obtain a narrative on the formula relationship between the data and the model outputs, with a definition of each model input and output. The narrative should describe all parametric (non-smoothed terms represented as coefficients) and smoothed terms necessary to evaluate the predicted pure premium, relativity, or other value, for any real or hypothetical set of inputs.	2	GAMs can have both parametric terms similar to those available in GLMs (e.g., those terms associated with coefficients) and smoothed terms. The smoothed terms are the sum of multiple basis functions which can take on a variety of types. The narrative should describe the relationships captured between the terms in the model (parametric and non-parametric) and the model output.

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.2.f	If there were data situations in which GAM weights were used, obtain an explanation of how and why they were used.	3	Investigate whether identical records were combined to build the model.
<b>3. Predictor Variables</b>			
B.3.a	Obtain a complete data dictionary, including the names, data types, variable fit types, definitions, and uses of each predictor variable, offset variable, control variable, proxy variable, geographic variable, geodemographic variable, and all other variables in the model used on their own or as an interaction with other variables (including sub-models and external models).	1	Data types of variables might be continuous, discrete, Boolean, etc. Definitions should not use programming language or code. Variable fit types include parametric (non-smoothed) and smoothed. For any variable(s) intended to function as a control or offset, obtain an explanation of its purpose and impact. Also, for any use of interaction between variables, obtain an explanation of its rationale and impact.
B.3.b	Obtain a list of predictor variables considered but not used in the final model, and the rationale for their removal.	4	The purpose of this requirement is to identify variables the company finds to be predictive but ultimately may reject for reasons other than loss-cost considerations (e.g., price optimization). Also, look for variables the company tested and then rejected. This item could help address concerns about data dredging. The reasonableness of including a variable with a given significance level could depend greatly on the other variables the company evaluated for inclusion in the model and the criteria for inclusion or omission.  For instance, if the company tested 1,000 similar variables and selected the one with the lowest p-value of 0.001, this would be a far, far weaker case for statistical significance than if that variable was the only one the company evaluated. <b>Note:</b> Context matters.
B.3.c	Obtain a correlation matrix for all predictor variables included in the model and sub-model(s). The variables used as parametric terms and the variables used as inputs to the smooth functions should all be included.	3	While GAMs accommodate collinearity, the correlation matrix provides more information about the magnitude of correlation between variables. The company should indicate what statistic was used (e.g., Pearson, Cramer's V). The regulatory reviewer should understand what statistic was used to produce the matrix but should not prescribe the statistic.
B.3.d	Obtain concurrency metrics for all smoothed predictor variables included in the model and sub-models.	3	GAMs can suffer from high concurrency in addition to high collinearity. Concurrency is the degree to which the smoothed terms move together. The company should indicate what concurrency metrics were used. The regulatory reviewer should understand what metric was used to produce the concurrency metrics but should not prescribe the type of metrics. The review of multiple concurrency metrics may be beneficial.*

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
B.3.e	Obtain a rational explanation for why an increase in each predictor variable should increase or decrease frequency, severity, loss costs, expenses, or any element or characteristic being predicted.	3	<p>The explanation should go beyond demonstrating correlation. Considering possible causation may be relevant, but proving causation is neither practical nor expected. If no rational explanation can be provided, greater scrutiny may be appropriate.</p> <p>For example, the regulator should look for unfamiliar predictor variables and, if found, the regulator should seek to understand the connection that variable has to increasing or decreasing the target variable.</p>
B.3.f	If the modeler made use of one or more dimensionality reduction techniques, such as a principal component analysis (PCA), obtain a narrative about that process, an explanation why that technique was chosen, and a description of the step-by-step process used to transform observations (usually correlated) into a set of (usually linearly uncorrelated) transformed variables. In each instance, obtain a list of the pre-transformation and post-transformation variable names, as well as an explanation of how the results of the dimensionality reduction technique was used within the model.	2	
<b>4. Adjusting Data, Model Validation, and Goodness-of-Fit Measures</b>			
B.4.a	Obtain a description of the methods used to assess the statistical significance/goodness-of-fit of the model to validation data, such as lift charts and statistical tests. Compare the model’s projected results to historical actual results and verify that modeled results are reasonably similar to actual results from validation data.	1	<p>For models that are built using multistate data, validation data for some segments of risk is likely to have low credibility in individual states. Nevertheless, some regulators require model validation on state-only data, especially when analysis using state-only data contradicts the countrywide results. State-only data might be more applicable but could also be impacted by low credibility for some segments of risk.</p> <p><b>Note:</b> It may be useful to consider geographic stability measures for territories within the state.</p>

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
B.4.b	For all parametric (non-smoothed) variables, review the appropriate parameter values and relevant tests of significance, such as confidence intervals, chi-square tests, p-values, or F tests. Determine if model development data, validation data, test data, or other data was used for these tests.	1	<p>Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter value, confidence intervals, chi-square tests, p-values, and any other relevant and material tests.</p> <p>For variables that are modeled continuously, it may be sufficient to obtain statistics around the modeled parameters; e.g., confidence intervals around each level of an AOI curve might be more than what is needed.</p>

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
B.4.c	<p>For all smoothed variables, including interactions between smoothed variables, review plots representing the smooths and relevant tests of significance, such as approximate confidence intervals, chi-square tests, approximate p-values, or F tests. Determine if model development data, validation data, test data, or other data was used for these tests.</p>	1	<p>Smoothed terms in a GAM can have many coefficients based on the number of basis functions. It is difficult to interpret the impact of the smoothed term based on the coefficients. Instead, regulators can review plots representing the cumulative effect of smoothed terms. The company could provide variable value on the x-axis and partial effects on the y-axis. The company could alternatively provide variable value on the x-axis and model prediction for the base risk on the y-axis. A base risk is a specific rating class and is often defined as the risk where each predictor variable is set at the base level (where the indicated factor is 1.000). The company should provide confidence interval lines regardless of the type of plot. The regulatory reviewer should assess whether the plot has an intuitive shape and whether the curve extrapolates well, especially to areas of the curve representing thinner data. The regulatory reviewer should review whether the plot passes the “horizontal line test”. The “horizontal line test” checks whether a horizontal line could be drawn in the plot through the confidence intervals. If so, this implies that the smoothed variable is not measuring significant differences across the target variable.</p> <p>Smoothed interaction terms should also be expressed as plots. Heat map contour plots or 3D perspective plots may be useful.</p> <p>GAMs are a form of penalized regression which complicates the calculation of p-values. The p-values for the smoothed terms output by the modeling software are generally approximate p-values for GAMs. Approximate p-values should be reviewed at the smoothed variable level. The regulatory reviewer may want to select a smaller threshold for smoothed terms than they used for the parametric term p-value threshold. For example, if a regulator typically applies a 0.05 threshold to a GLM, they may want to consider applying a 0.03 threshold to the smoothed terms within a GAM.*</p>

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
B.4.d	For all smoothed variables, request details about the basis functions comprising each smoothed function.	4 or 2	<p>Smooth functions are based on a sum of basis functions. The company should provide the number of basis functions for each smooth and discuss how the number was chosen.</p> <p>There are many types of smooth functions that can be applied. Examples include thin plate splines, cubic splines, and cyclic splines. The company should provide the type of each smooth and a narrative on why that type of smooth is appropriate for the variable.</p> <p>If the GAM is built using a basis function significantly different from those available in the MGCV package in R, this information element may have a higher level of significance (2). The goal of requesting details of the basis function would be to help identify any metrics that may be interpreted similarly to the MGCV package’s concurvity metrics and gain a better understanding of the GAM building process.</p> <p>In these cases, it is not necessary that a reviewer request the exact mathematical formula for the basis function. Instead, a written or visual example of how the basis function creates a final factor curve for a variable may be requested to aid model review.</p>
B.4.e	Identify the threshold for statistical significance and explain why it was selected. Obtain a reasonable and appropriately supported explanation for keeping the variable for each discrete variable level where the p-values were not less than the chosen threshold.	1	<p>The explanation should clearly identify the thresholds for statistical significance used by the modeler. Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter values for parametric terms, plots representing smoothed terms, confidence intervals, chi-square tests, p-values, and any other relevant and material tests.*</p>
B.4.f	For overall discrete variables, review type 3 chi-square tests, p-values for parametric terms, approximate p-values for non-parametric terms, F tests and any other relevant and material test. Determine if model development data, validation data, test data, or other data was used for these tests.	2	<p>Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual</p>

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
			<p>variables, the reviewer may obtain, for each discrete variable level, the parameter values for parametric terms, plots representing smoothed terms, confidence intervals, chi-square tests, p-values, and any other relevant and material tests.</p> <p>For variables that are modeled continuously, it may be sufficient to obtain statistics around the modeled parameters; e.g., confidence intervals around each level of an AOI curve might be more than what is needed.*</p>
B.4.g	<p>Obtain evidence that the model fits the training data well, for individual variables, for any relevant combinations of variables, and for the overall model.</p>	2	<p>For a GAM, such evidence may be available using chi-square tests, approximate p-values, F tests and/or other means.</p> <p>The steps taken during modeling to achieve goodness-of-fit are likely to be numerous and laborious to describe, but they contribute much of what is generalized about a GAM.</p> <p>The regulator should not assume to know what the company did and ask, “How?” Instead, the regulator should ask what the company did and be prepared to ask follow-up questions.</p>
B.4.h	<p>For continuous variables, provide confidence intervals, chi-square tests, p-values for parametric terms, approximate p-values for non-parametric terms, and any other relevant and material test. Determine if model development data, validation data, test data, or other data was used for these tests.</p>	2	<p>Typical p-values greater than 5% are large and should be questioned. Reasonable business judgment can sometimes provide legitimate support for high p-values. Reasonableness of the p-value threshold could also vary depending on the context of the model; e.g., the threshold might be lower when many candidate variables were evaluated for inclusion in the model.</p> <p>Overall lift charts and/or statistical tests using validation data may not provide enough of the picture. If there is concern about one or more individual variables, the reviewer may obtain, for each discrete variable level, the parameter values for parametric terms, plots representing smoothed terms confidence intervals, chi-square tests, approximate p-values and any other relevant and material tests.</p> <p>For variables that are modeled continuously, it may be sufficient to obtain statistics around the modeled parameters; for example, confidence intervals around each level of an AOI curve might be more than what is needed.*</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
B.4.i	Obtain a description how the model was tested for stability over time.	2	<p>Evaluate the build/test/validation datasets for potential time-sensitive model distortions (e.g., a winter storm in year 3 of 5 can distort the model in both the testing and validation datasets).</p> <p>Obsolescence over time is a model risk (e.g., old data for a variable or a variable itself may no longer be relevant). If a model being introduced now is based on losses from years ago, the reviewer should be interested in knowing whether that model would be predictive in the proposed context. Validation using recent data from the proposed context might be requested. Obsolescence is a risk even for a new model based on recent and relevant loss data.</p> <p>The reviewer may want to inquire as to the following: What steps, if any, were taken during modeling to prevent or delay obsolescence? What controls exist to measure the rate of obsolescence? What is the plan and timeline for updating and ultimately replacing the model?</p> <p>The reviewer should also consider that as newer technologies enter the market (e.g., personal automobile) their impact may change claim activity over time (e.g., lower frequency of loss). So, it is not necessarily a bad thing that the results are not stable over time.</p>
B.4.j	Obtain a narrative on how potential concerns with overfitting were addressed.	2	
B.4.k	Obtain the value of the model complexity parameter $\lambda$ and a discussion of how it was chosen.	4	<p>GAMs are a form of penalized regression. Smaller values of <math>\lambda</math> allow the model to increase complexity and fit “wigglier” data. Larger values of <math>\lambda</math> constricts the model and increases smoothness. Multiple automated approaches exist for tuning <math>\lambda</math> including predictive approaches that optimize AIC or Bayesian approaches such as Restricted Maximum Likelihood.</p>
B.4.l	Obtain support demonstrating that the overall GAM assumptions are appropriate.	3	<p>A visual review of plots of actual errors is usually sufficient.</p> <p>The reviewer should look for a conceptual narrative covering these topics: How does this particular GAM work? Why did the rate filer do what it did? Why employ this design instead of alternatives? Why choose this particular distribution function and this particular link function? A company response may be at a fairly high level and reference industry practices.</p> <p>If the reviewer determines that the model makes no assumptions that are considered to be unreasonable, the importance of this item may be reduced.</p>

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
B.4.m	Obtain support demonstrating that the assumptions for each smoothed term are appropriate.	3	<p>The reviewer should look for a narrative on how the fit of the smoothed terms was checked for reasonableness.</p> <p>It may be useful to ask for each plot of the smoothed terms to include residuals to ensure that the smoothed line runs through the middle of the residuals.</p> <p>It may be useful for the company to provide tests that each smoothed term is not predictive of residual values (similar to tests achieved in the gam.check() function of the mcgv R package). These tests would ideally demonstrate that the residuals are randomly distributed across all parts of the smoothed term.*</p>
B.4.n	Obtain 5-10 sample records with corresponding output from the model for those records.	4	
<p>*Please note that certain statistics such as p-values, confidence intervals, and concavity may not be available or relevant for all varieties of GAM. In these cases, requests should focus on satisfying the purpose of this information element through methodology or metrics supplied by this type of GAM.</p>			
<p><b>5. “Old Model” Versus “New Model”</b></p>			
B.5.a	<p>Obtain an explanation of why this model is an improvement to the current rating plan.</p> <p>If it replaces a previous model, find out why it is better than the one it is replacing; determine how the company reached that conclusion and identify metrics relied on in reaching that conclusion. Look for an explanation of any changes in calculations, assumptions, parameters, changes in smoothed variable plots, and data used to build this model from the previous model.</p>	2	<p>The regulator should expect to see improvement in the new class plan’s predictive ability or other sufficient reason for the change.</p>
B.5.b	Determine if two Gini coefficients were compared and obtain a narrative on the conclusion drawn from this comparison.	3	<p>This information element requests a comparison of Gini coefficient from the prior model to the Gini coefficient of proposed model. It is expected that there should be improvement in the Gini coefficient. A higher Gini coefficient indicates greater differentiation produced by the model and how well the model fits that data.</p> <p>This is relevant when one model is being updated or replaced. The regulator should expect to see improvement in the new class plan’s predictive ability. One example of a comparison might be sufficient.</p> <p><b>Note:</b> This comparison is not applicable to initial model introduction. Reviewer can look to CAS monograph, “Generalized Linear Models for Insurance Rating.”</p>
B.5.c	Determine if double-lift charts were analyzed and obtain a narrative on the conclusion drawn from this analysis.	3	<p>One example of a comparison might be sufficient.</p> <p><b>Note:</b> “Not applicable” is an acceptable response.</p>

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
B.5.d	If replacing an existing model, obtain a list of any predictor variables used in the old model that are not used in the new model. Obtain an explanation of why these variables were dropped from the new model.  Obtain a list of all new predictor variables in the new model that were not in the prior old model.	2	It is useful to differentiate between old and new variables, so the regulator can prioritize more time on variables not yet reviewed.
<b>6. Modeler Software</b>			
B.6.a	Request access to SMEs (e.g., modelers) who led the project, compiled the data, and/or built the model.	4	The filing should contain a contact that can put the regulator in touch with appropriate SMEs and key contributors to the model development to discuss the model.

**C. THE FILED RATING PLAN**

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
<b>1. General Impact of Model on Rating Algorithm</b>			
C.1.a	In the actuarial memorandum or explanatory memorandum, for each model and sub-model (including external models), look for a narrative that explains each model and its role (i.e., how it was used) in the rating system.	1	<p>The “role of the model” relates to how the model integrates into the rating plan as a whole and where the effects of the model are manifested within the various components of the rating plan. This is not intended as an overarching statement of the model’s goal, but rather a description of how specifically the model is used.</p> <p>This item is particularly important, if the role of the model cannot be immediately discerned by the reviewer from a quick review of the rate and/or rule pages. (Importance is dependent on state requirements and ease of identification by the first layer of review and escalation to the appropriate review staff.)</p>
C.1.b	Obtain an explanation of how the model was used to adjust the filed rating algorithm.	1	<p>Models are often used to produce factor-based indications, which are then used as the basis for the selected changes to the rating plan. It is the changes to the rating plan that create impacts.</p> <p>The regulator should consider asking how the smoothed terms of the GAM will be implemented. The regulator should consider asking for an explanation of how the model was used to adjust the rating algorithm.</p>
C.1.c	Obtain a complete list of characteristics/variables used in the proposed rating plan, including those used as input to the model (including sub-models and composite variables) and all other characteristics/variables (not input to the model) used to calculate a premium. For each characteristic/variable, determine if it is only input to the model, whether it is only a separate univariate rating characteristic, or whether it is both input to the model and a separate univariate rating characteristic. The list should include transparent descriptions (in plain language) of each listed characteristic/variable.	1	<p>Examples of variables used as inputs to the model and used as separate univariate rating characteristics might be criteria used to determine a rating tier or household composite characteristic.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>2. Relevance of Variables and Relationship to Risk of Loss</b>			
C.2.a	Obtain a narrative regarding how the characteristics/rating variables included in the filed rating plan relate to the risk of insurance loss(or expense) for the type of insurance productbeing priced.	2	<p>The narrative should include a discussion of the relevance each characteristic/rating variable has on consumer behavior that would lead to a difference in risk of loss (or expense). The narrative should include a rational relationship to cost, and model results should be consistent with the expected direction of the relationship.</p> <p><b>Note:</b> This explanation would not be needed if the connection between variables and risk of loss (or expense) has already been illustrated.</p>
<b>3. Comparison of Model Outputs to Current and Selected Rating Factors</b>			
C.3.a	Compare relativities indicated by the model to both current relativities and the insurer's selected relativities for each risk characteristic/variable in the rating plan.	1	<p>"Significant difference" may vary based on the risk characteristic/variable and context. However, the movement of a selected relativity should be in the direction of the indicated relativity; if not, an explanation is necessary as to why the movement is logical.</p>
C.3.b	Obtain documentation and support for all calculations, judgments, or adjustments that connect the model's indicated values to the selected relativities filed in the rating plan.	1	<p>The documentation should include explanations for the necessity of any such adjustments and each significantdifference between the model's indicated values and the selected values. This applies even to models that produce scores, tiers, or ranges of values for which indications can be derived.</p> <p><b>Note:</b> This information is especially important if differences between model-indicated values and selected values are material and/or impact one consumer population more than another.</p>
C.3.c	For each characteristic/variable used as both input to the model (including sub-models and composite variables) and as a separate univariate rating characteristic, obtain a narrative regarding how each characteristic/variable was tempered or adjusted to account for possible overlap or redundancy in what the characteristic/variable measures.	2	<p>Modeling loss ratios with these characteristics/variables as control variables would account for possible overlap. The insurer should address this possibility or other considerations; e.g., tier placement models often use risk characteristics/variables that are also used elsewhere inthe rating plan.</p> <p>One way to do this would be to model the loss ratios resulting from a process that already uses univariate rating variables. Then the model/composite variables would be attempting to explain the residuals.</p>
<b>4. Responses to Data, Credibility, and Granularity Issues</b>			
C.4.a	Determine what, if any, consideration was given to the credibility of the output data.	2	<p>The regulator should determine at what level of granularity credibility is applied. If modeling was by-coverage, by-form, or by-peril, the company should explain how these were handled when there was not enough credible data by coverage, form, or peril to model.</p>

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
C.4.b	If the rating plan is less granular than the model, obtain an explanation of why.	2	This is applicable if the company had to combine modeled output in order to reduce the granularity of the rating plan.
C.4.c	If the rating plan is more granular than the model, obtain an explanation of why.	2	A more granular rating plan may imply that the company had to extrapolate certain rating treatments, especially at the tails of a distribution of attributes, in a manner not specified by the model indications. It may be necessary to extrapolate due to data availability or other considerations.
<b>5. Definitions of Rating Variables</b>			
C.5.a	Obtain a narrative regarding adjustments made to model output (e.g., transformations, binning and/or categorizations). If adjustments were made, obtain the name of the characteristic/variable and a description of the adjustment.	2	If rating tiers or other intermediate rating categories are created from model output, the rate and/or rule pages should present these rating tiers or categories. The company should provide an explanation of how model output was translated into these rating tiers or intermediate rating categories.
<b>6. Supporting Data</b>			
C.6.a	Obtain aggregated state-specific, book-of-business-specific univariate historical experience data, separately for each year included in the model, consisting of loss ratio or pure premium relativities and the data underlying those calculations for each category of model output(s) proposed to be used within the rating plan. For each data element, obtain an explanation of whether it is raw or adjusted and, if the latter, obtain a detailed explanation for the adjustments.		<p>For example, were losses developed/undeveloped, trended/untrended, capped/uncapped, etc.?</p> <p>Univariate indications should not necessarily be used to override more sophisticated multivariate indications. However, they do provide additional context and may serve as a useful reference.</p>
C.6.b	Obtain an explanation of any material (especially directional) differences between model indications and state-specific univariate indications.	4	<p>Multivariate indications may be reasonable as refinements to univariate indications, but possibly not for bringing about significant reversals of those indications. For instance, if the univariate indicated relativity for an attribute is 1.5 and the multivariate indicated relativity is 1.25, this is potentially a plausible application of the multivariate techniques. If, however, the univariate indicated relativity is 0.7 and the multivariate indicated relativity is 1.25, a regulator may question whether the attribute in question is negatively correlated with other determinants of risk.</p> <p>Credibility of state-level data should be considered when state indications differ from modeled results based on a broader dataset. However, the relevance of the broader dataset to the risks being priced should also be considered. Borderline reversals are not of as much concern. If multivariate indications perform well against the state-level data, this should suffice. However, credibility considerations need to be taken into account as state-level segmentation comparisons may not have enough credibility.</p>

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
<b>7. Consumer Impacts</b>			
C.7.a	Obtain a listing of the top five rating variables that contribute the most to large swings in renewal premium, both as increases and decreases, as well as the top five rating variables with the largest spread of impact for both new and renewal business.	4	These rating variables may represent changes to rating factors, be newly introduced to the rating plan, or have been removed from the rating plan.
C.7.b	Determine if the company performed sensitivity testing to identify significant changes in premium due to small or incremental change in a single risk characteristic. If such testing was performed, obtain a narrative that discusses the testing and provides the results of that testing.	3	One way to see sensitivity is to analyze a graph of each risk characteristic’s/variable’s possible relativities. Look for significant variation between adjacent relativities and evaluate if such variation is reasonable and credible.
C.7.c	For the proposed filing, obtain the impacts on renewal business and describe the process used by management, if any, to mitigate those impacts.	2	Some mitigation efforts may substantially weaken the connection between premium and expected loss and expense and, hence, may be viewed as unfairly discriminatory by some states.
C.7.d	Obtain a rate disruption/dislocation analysis, demonstrating the distribution of percentage and/or dollar impacts on renewal business (created by rerating the current book of business) and sufficient information to explain the disruptions to individual consumers.	2	The analysis should include the largest dollar and percentage impacts arising from the filing, including the impacts arising specifically from the adoption of the model or changes to the model as they translate into the proposed rating plan.  While the default request would typically be for the distribution/dislocation of impacts at the overall filing level, the regulator may need to delve into the more granular variable-specific effects of rate changes if there is concern about particular variables having extreme or disproportionate impacts, or significant impacts that have otherwise yet to be substantiated.  See Appendix D for an example of a disruption analysis.
C.7.e	Obtain exposure distributions for the model’s output variables and show the effects of rate changes at granular and summary levels, including the overall impact on the book of business.	3	See Appendix D for an example of an exposure distribution.

Section	Information Element	Level of Importance to the Regulator’s Review	Comments
C.7.f	Identify policy characteristics, used as input to a model or sub-model, that remain “static” over a policy’s lifetime versus those that will be updated periodically. Obtain a narrative on how the company handles policy characteristics that are listed as “static,” yet change over time.	3	<p>Some examples of “static” policy characteristics are prior carrier tenure, prior carrier type, prior liability limits, claim history over past X years, or lapse of coverage. These are specific policy characteristics usually set at the time new business is written, used to create an insurance score or to place the business in a rating/underwriting tier, and often fixed for the life of the policy.</p> <p>The reviewer should be aware, and possibly concerned, how the company treats an insured over time when the insured’s risk profile based on “static” variables changes over time but the rate charged, based on a newbusiness insurance score or tier assignment, no longer reflect the insured’s true and current risk profile.</p> <p>A few examples of “non-static” policy characteristics are age of driver, driving record, and credit information (FCRA-related). These are updated automatically by the company on a periodic basis, usually at renewal, with or without the policyholder explicitly informing the company.</p>
C.7.g	Obtain a means to calculate the rate charged a consumer.	3	<p>The filed rating plan should contain enough information for a regulator to be able to validate policy premium. However, for a complex model or rating plan, a score or premium calculator via Excel or similar means would be ideal, but this could be elicited on a case-by-case basis. The ability to calculate the rate charged could allow the regulator to perform sensitivity testing when there are small changes to a risk characteristic/variable. <b>Note:</b> This information may be proprietary.</p> <p>For the rating plan, the rate order of calculation rule may be sufficient. However, it may not be feasible for a regulator to get all the input data necessary to reproduce a model’s output. Credit and telematics models are examples of model types where model output would be readily available, but the input data would not be readily available to the regulator.</p>
C.7.h	In the filed rating plan, be aware of any non-insurance data used as input to the model(customer-provided or other). In order to respond to consumer inquiries, it may be necessary to inquire as to how consumers can verify their data and correct errors.	1	<p>If the data is from a third-party source, the company should provide information on the source. Depending on the nature of the data, it may need to be documented with an overview of who owns it.</p> <p>The topic of consumer verification may also need to be addressed, including how consumers can verify their data and correct errors.</p>

Section	Information Element	Level of Importance to the Regulator's Review	Comments
<b>8. Accurate Translation of Model into a Rating Plan</b>			
C.8.a	Obtain sufficient information to understand how the model outputs are used within the rating system and to verify that the rating plan's manual, in fact, reflects the model output and any adjustments made to the model output.	1	The regulator can review the rating plan's manual to see that modeled output is properly reflected in the manual's rules, rates, factors, etc.
<b>9. Efficient and Effective Review of Rate Filing</b>			
C.9.a	Establish procedures to efficiently review rate filings and models contained therein.	1	<p>“Speed to market” is an important competitive concept for insurers. Although the regulator needs to understand the rate filing before accepting the rate filing, the regulator should not request information that does not increase his/her understanding of the rate filing.</p> <p>The regulator should review the state's rate filing review process and procedures to ensure that they are fair and efficient.</p>
C.9.b	Be knowledgeable of state laws and regulations in order to determine if the proposed rating plan (and models) are compliant with state laws and/or regulations.	1	This is a primary duty of state insurance regulators. The regulator should be knowledgeable of state laws and regulations and apply them to a rate filing fairly and efficiently. The regulator should pay special attention to prohibitions of unfair discrimination.
C.9.c	Be knowledgeable of state laws and regulations in order to determine if any information contained in the rate filing (and models) should be treated as confidential.	1	The regulator should be knowledgeable of state laws and regulations regarding confidentiality of rate filing information and apply them to a rate filing fairly and efficiently. Confidentiality of proprietary information is key to innovation and competitive markets.

**SURPLUS LINES (C) TASK FORCE**

Surplus Lines (C) Task Force March 21, 2023, Minutes..... 7-156  
    *Nonadmitted Insurance Model Act (#870) (Attachment One)* ..... 7-158  
    Model #870 Project History (Attachment Two)..... 7-185

Draft: 3/24/23

Surplus Lines (C) Task Force  
Louisville, Kentucky  
March 21, 2023

The Surplus Lines (C) Task Force met in Louisville, KY, March 21, 2023. The following Task Force members participated: James J. Donelon, Chair, Stewart Guerin, and Tom Travis (LA); Larry D. Deiter, Vice Chair, represented by Tony Dorschner (SD); Lori K. Wing-Heier represented by David Phifer (AK); Mark Fowler represented by Willard Smith (AL); Ricardo Lara represented by Libio Latimer (CA); Michael Conway represented by Rolf Kaumann (CO); Michael Yaworsky represented by Virginia Christy (FL); Doug Ommen represented by Travis Grassel (IA); Dean L. Cameron represented by Randy Pipal (ID); Dana Popish Severinghaus represented by Susan Berry (IL); Vicki Schmidt represented by Jessica Lillibridge (KS); Gary D. Anderson represented by John Turchi (MA); Kathleen A. Birrane represented by Erin Nickles (MD); Troy Downing represented by Bob Biskupiak (MT); Mike Causey represented by Robert Croom (NC); Scott Kipper (NV); Glen Mulready represented by Eli Snowbarger (OK); Michael Humphreys represented by Shannen Logue (PA); Michael Wise represented by Rachel Moore (SC); Carter Lawrence represented by Trey Hancock (TN); and Cassie Brown represented by Jamie Walker (TX). Also participating was: Robert Wake (ME).

1. Adopted its 2022 Fall National Meeting Minutes

Walker made a motion, seconded by Hancock, to adopt the Task Force's Dec. 12, 2022, minutes (see *NAIC Proceedings – Fall 2022, Surplus Lines (C) Task Force*). The motion passed unanimously.

2. Adopted the Report of the Surplus Lines (C) Working Group

Guerin reported that the Surplus Lines (C) Working Group met March 9 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings, to discuss two applications seeking approval for listing on the NAIC *Quarterly Listing of Alien Insurers*. One application was approved.

Snowbarger made a motion, seconded by Kaumann, to adopt the report of the Surplus Lines (C) Working Group. The motion passed unanimously.

3. Adopted Amendments to Model #870

Commissioner Donelon commented that before considering adoption of the *Nonadmitted Insurance Model Act* (#870) (Attachment One), an update from the drafting group and a summary of the project history would be provided by Travis.

Travis stated that since the 2022 Fall National Meeting, the Model 870 Drafting Group met twice. First, it met Jan. 18 to address comments and expose Model #870 as directed by the Task Force at the 2022 Fall National Meeting. Then, it met Feb. 10 to discuss a few lingering comments received from the exposure. Travis stated that as a result of the exposure, a couple of edits have been made to the draft model. He indicated that those edits are highlighted in yellow in the redlined version. He stated that Section 5D received several comments to remove the statement "with the exception of workers' compensation insurance, excess workers' compensation insurance, and accident and health insurance," and the drafting group concurred with removing it. He said following a discussion with Maine, the drafting group added a drafting note that Daleo circulated to the Task Force. He indicated that the drafting note covers Section 522(d) of the federal Nonadmitted and Reinsurance Reform Act of 2010 (NRRRA) with regard to exceptions to the home state authority. Second, he commented that regarding Section 9H on arbitration,

“Aviation” was added to the draft, bracketed to reflect as optional. He concluded by summarizing the Model #870 project history (Attachment Two).

Wake commented that he believes there was consensus during the last meeting that there would be a carve-out for workers’ compensation and disability regarding Section 5D. He commented that he was surprised to hear that the drafting group had pushback on this and it was removed. He indicated that he would urge the Task Force to reinstate that provision. He stated that if the Task Force thinks that reinstatement is too much of a heavy lift at this late stage, the proposed drafting note is a good compromise. He commented that Lloyd’s summarized it best by stating that the carve out for workers’ compensation, excess workers’ compensation, and accident and health (A&H) is unnecessary because the model law already memorialized that states have the ability to decide for themselves which lines of business are permitted to be placed in surplus lines insurance. He indicated that Congress said 13 years ago that the states no longer have that ability after Section 5D was added as an exception. He stated that if it were not for Section 5D, Section 3 would give states that ability. He commented that within Section 522 of the NRRRA, Congress allowed states to reserve the authority to control, as the non-home state, the placement of workers’ compensation and excess workers’ compensation; and because of the way nonadmitted insurance is defined, the power to control A&H insurance was never taken away. The carve-out would exercise that right; without the carve-out, that right is not being exercised. Wake indicated that that is why the carve-out was proposed; however, he understands that the drafting note may be the best that the Task Force can do at this late date. However, he proposed going back to the carve-out language.

Sabrina Miesowitz (Lloyd’s) commented that Lloyd’s supports the drafting note, and the comment letter indicated that there was some disagreement regarding the interpretation of what the NRRRA says. She said Lloyd’s believes states have the authority to decide whether workers’ compensation or A&H are allowed to be exportable to the surplus lines market. She indicated that that is why Lloyd’s supports preserving that language, so that possibility is not being closed for states where A&H can be exportable.

Commissioner Donelon commented that the Task Force has come a long way with Model #870, and it has reached the finish line. He offered a special thanks to the drafting group, specifically Colorado, Illinois, Louisiana, Texas and Washington, and he commended them on all the hard work. Before moving forward to consider adoption, he inquired about any questions or comments. Given that none were raised, he asked for a motion to adopt the proposed amendments to Model #870, including the drafting note.

Walker made a motion, seconded by Kaumann, to adopt the proposed amendments to Model #870, including the drafting note. The motion passed unanimously.

Having no further business, the Surplus Lines (C) Task Force adjourned.

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

Draft 3/1/23

**NONADMITTED INSURANCE MODEL ACT****Table of Contents**

Section 1.	Short Title
Section 2.	Purpose—Necessity for Regulation
Section 3.	Definitions
Section 4.	Placement of Insurance Business
Section 5.	Surplus Lines Insurance
Section 6.	Insurance Independently Procured—Duty to Report and Pay Tax
Section 7.	Penalties
Section 8.	Violations
Section 9.	Service of Process
Section 10.	Legal or Administrative Procedures
Section 11.	Enforcement
Section 12.	Suits by Nonadmitted Insurers
Section 13.	<del>Severability</del> <del>parability of Provisions</del>
Section 14.	Effective Date

**Section 1. Short Title**

This Act shall be known and may be cited as “The Nonadmitted Insurance Act.”

**Section 2. Purpose—Necessity for Regulation**

This Act shall be liberally construed and applied to promote its underlying purposes which include:

- A. Protecting persons seeking insurance in this state;
- B. Permitting surplus lines ~~fi~~insurance to be placed with reputable and financially sound nonadmitted insurers and exported from this state pursuant to this Act;
- C. Establishing a system of regulation which will permit orderly access to surplus lines insurance in this state and encourage admitted insurers to provide new and innovative types of insurance available to consumers in this state;
- D. Providing a system through which persons may purchase insurance other than surplus lines insurance, from nonadmitted insurers pursuant to this Act;
- E. Protecting revenues of this state; and
- F. Providing a system pursuant to this Act which subjects nonadmitted insurance activities in this state to the jurisdiction of the insurance commissioner and state and federal courts in suits by or on behalf of the state.

**Section 3. Definitions**

As used in this Act:

- A. “Admitted insurer” means an insurer licensed to ~~de-engage in an the business of~~ insurance ~~business~~ in this state.
- B. ~~“Affiliate” means, with respect to an insured, any entity that controls, is controlled by, or is under common control with the insured.~~
- C. ~~“Affiliated group” means any group of entities that are all affiliated. “Capital,” as used in the financial requirements of Section 5, means funds paid in for stock or other evidence of ownership.~~

## Nonadmitted Insurance Model Act

~~D~~C. “Commissioner” means the insurance commissioner of [insert name of state], or the commissioner’s deputies or staff, or the ~~c~~Commissioner, ~~d~~Director or ~~s~~Superintendent of insurance in any other state.

**Drafting Note:** Insert the title of the chief insurance regulatory official wherever the term “commissioner” appears.

E. “Control” means with respect to an insured:

- (1) A person, either directly or indirectly, or acting through one or more other persons, owns, controls, or has the power to vote 25 percent or more of any class of voting securities of the other entity; or
- (2) The entity controls in any manner the election of a majority of the directors or trustees of the other entity.

~~F~~. [OPTIONAL: ~~“Domestic surplus lines insurer” means a surplus lines insurer domiciled in this state, that which may write insurance in this state on as if it were a surplus lines insurer-basis domiciled in another state.~~]

G. “Eligible surplus lines insurer” means a nonadmitted insurer with which a surplus lines licensee may place surplus lines insurance pursuant to Section 5 of this Act.

H. “Exempt commercial purchaser” means any person purchasing commercial insurance that, at the time of placement, meets the following requirements:

- (1) ~~n~~Has paid aggregate nationwide commercial property and casualty insurance premiums in excess of \$100,000 in the immediately preceding 12 months; and:
- (2) (a) ~~The person m~~Meets at least one+ of the following criteria:
  - (i) ~~The person P~~ossesses a net worth in excess of \$20,000,000;:-
  - (ii) ~~The person G~~enerates annual revenues in excess of \$50,000,000;:-
  - (iii) ~~The person E~~mploys more than 500 full-time or full-time equivalent employees per individual insured or is a member of an affiliated group employing more than 1,000 employees in the aggregate;:-
  - (iv) ~~The person I~~s a not-for-profit organization or public entity generating annual budgeted expenditures of at least \$30,000,000; or:-
  - (v) ~~The person i~~s a municipality with a population in excess of 50,000 persons.
- (b) Effective on July 21, 2010, every five years and each fifth January 1 occurring thereafter on January 1, the amounts in subsections~~Items~~ (i), (ii), and (iv) of ~~Subparagraph~~Section 3H(32)(a) of this Paragraph shall be adjusted to reflect the percentage change for such ~~five~~5- year period in the Consumer Price Index for All Urban Consumers published by the Bureau of Labor Statistics of the Department of Labor.

**Drafting Note:** This definition of “Exempt commercial purchaser” follows the language of the federal Nonadmitted and Reinsurance Reform Act (NRRA). Some states have chosen not to adopt the inflation adjustment. The NRRA uses the term “municipality,” which some states may find limiting. States may choose to use terminology consistent with state law to expand this provision to include counties and other public entities.

~~E~~I. “Export” means to place surplus lines insurance with a nonadmitted insurer.

~~F~~. “Foreign decree” means any decree or order in equity of a court located in any United States jurisdiction, including a federal court of the United States, against any person engaging in the transaction of insurance in this state.

J. “Home state;” ~~means~~with respect to an insured, means:

## NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- (1) The state in which an insured maintains its principal place of business or, in the case of a natural person, the person's principal place of residence;
- (2) If 100 percent of the insured risk is located out of the state referred to in ~~subParagraph (1)~~Section 3J(1), the state to which the greatest percentage of the insured's taxable premium for that insurance contract is allocated; or
- (3) If the insured is an affiliated group with more than one member listed as a named insured on a single nonadmitted insurance contract, the home state is the home state of the member of the affiliated group that has the largest percentage of premium attributed to it under the insurance contract. or
- (4) [Option 1] In the case of an unaffiliated group policy:
- (a) If a group policyholder pays 100% of the premium from its own funds, then the home state is determined according to paragraphs (1) and (2).
- (b) If a group policyholder does not pay 100% of the premium from its own funds, then the home state is determined according to paragraphs (1) and (2) for each member of the group.
- [Option 2] In the case of an unaffiliated group policy, the home state shall be the home state of the group policyholder as determined by the application of paragraphs (1) and (2).

**Comment:** The NRRA definition of “home state” includes ~~subsections Paragraphs (1), (2), and (3) of Section 3J. The NRRA definition does not expressly cover unaffiliated groups. States have taken different approaches to the taxation of unaffiliated group policies. Some states tax based on the “home state” of the group member or certificate holder under the unaffiliated group policy. Some states assess tax on the “home state” of the person that pays the premium. Not all states have an express provision to address unaffiliated group policies. The Drafting Group could not arrive at language to address each possibility and opted to omit it from the Model, such as risk purchasing groups model language contains two options for addition of that are expressly covering unaffiliated group~~ treating the members of such a group as individual insureds for purposes of placement and taxation.

~~K.~~ “Insurer” means any person, corporation, association, partnership, reciprocal exchange, interinsurer, Lloyds insurer, insurance exchange syndicate, fraternal benefit society, and any other legal entity engaged in the business of insurance.

~~H.~~ “Kind of insurance” means one of the types of insurance required to be reported in the annual statement which must be filed with the commissioner by admitted insurers.

~~K.~~ “Nonadmitted insurance” means any insurance written on properties, risks or exposures, located or to be performed in this state, by an insurer not licensed to engage in the ~~transaction~~ business of insurance in this state [or a domestic surplus lines insurer].

~~L.~~ “Nonadmitted insurer” means an insurer not licensed to ~~do an~~ engage in the ~~transaction~~ business of insurance ~~business~~ in this state but does not include a risk retention group pursuant to the federal Liability Risk Retention Act of 1986.

~~M.~~ “Person” means any natural person or ~~other business~~ entity, including, but not limited to, ~~individuals,~~ partnerships, associations, trusts or corporations.”

~~N.~~ “Premium” means any payment made as consideration for an insurance contract.

~~N.O.~~ “Principal place of business” means:

- (1) The state where a person maintains its headquarters and where the person's high-level officers direct, control, and coordinate ~~the~~ business activities; or
- (2) If the person's high-level officers direct, control, and coordinate the business activities in more than one state, or if the person's principal place of business is located outside any state, then it is the state to which the greatest percentage of the person's taxable premium for that insurance contract is allocated.

Nonadmitted Insurance Model Act

PO. “Principal residence” means:

- (1) ~~The state where the person resides for the greatest number of days during a calendar year; or~~
  - (2) ~~If the person’s principal residence is located outside any state, the state to which the greatest percentage of the person’s taxable premium for that insurance contract is allocated.~~
- ~~“State” includes any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Northern Mariana Islands, the Virgin Islands, and American Samoa. K. “Policy” or “contract” means any contract of insurance, including but not limited to annuities, indemnity, medical or hospital service, workers’ compensation, fidelity or suretyship.~~

~~L. “Reciprocal state” means a state that has enacted provisions substantially similar to:~~

- (1) ~~Sections 5F, 5I(5), 5Q(10), 5R(4) and Section 6; and~~
- (2) ~~The allocation schedule and reporting form contained in [cite the regulation on surplus lines taxation].~~

~~M. “Surplus,” as used in the financial requirements of Section 5, means funds over and above liabilities and capital of the company for the protection of policyholders.~~

~~Q.RN. “Surplus lines insurance” means any property and casualty insurance in this state on properties, risks or exposures, located or to be performed in this state, permitted to be placed through a surplus lines licensee with an nonadmitted insurer eligible surplus lines insurer to accept such insurance, pursuant to Section 5 of this Act.~~

~~**Drafting Note:** If a state chooses to adopt the alternative Section 5B, this definition of “surplus lines insurance” should be consistent with the acceptable coverage listed in Section 5B. States may choose to extend the definition of “surplus lines insurance” beyond property/casualty insurance. NAIC.~~

RS. “Surplus lines insurer” means a nonadmitted [or domestic surplus lines] insurer that is eligible to accept the placement of surplus lines insurance pursuant to Section 5 of this Act.

STO. “Surplus lines licensee” means any person ~~individual, firm or corporation~~ licensed under Section 5 of this Act to place surplus lines insurance ~~on properties, risks or exposures located or to be performed in this state with an nonadmitted insurers eligible surplus lines insurer to accept such insurance.~~

TU. “Taxable premium” means any premium less return premium that is not otherwise exempt from tax pursuant to this Act. [OPTIONAL: ]~~Premium on property risk or exposure that is properly allocated to federal or international waters or is under the jurisdiction of a foreign government is not taxable in this state.]~~

UVS. “Transaction of insurance”

- (~~b~~) (1) For purposes of this Act, any of the following acts in this state effected by mail or otherwise by a nonadmitted insurer or by any person acting with the actual or apparent authority of the insurer, on behalf of the insurer, is deemed to constitute the transaction of an insurance business in or from this state:
  - (a) The making of or proposing to make, as an insurer, an insurance contract;
  - (b) The making of or proposing to make, as guarantor or surety, any contract of guaranty or suretyship as a vocation and not merely incidental to any other legitimate business or activity of the guarantor or surety;
  - (c) The taking or receiving of an application for insurance;
  - (d) The receiving or collection of any premium, commission, membership fees, assessments, dues or other consideration for insurance or any part thereof;

## NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- (e) The issuance or delivery in this state of contracts of insurance to residents of this state or to persons authorized to do business in this state;
  - (f) The solicitation, negotiation, procurement or effectuation of insurance or renewals thereof;
  - (g) The dissemination of information as to coverage or rates, or forwarding of applications, or delivery of policies or contracts, or inspection of risks, the fixing of rates or investigation or adjustment of claims or losses or the transaction of matters subsequent to effectuation of the contract and arising out of it, or any other manner of representing or assisting a person or insurer in the transaction of risks with respect to properties, risks or exposures located or to be performed in this state;
  - (h) The transaction of any kind of insurance business specifically recognized as transacting an insurance business within the meaning of the statutes relating to insurance;
  - (i) The offering of insurance or the transacting of insurance business; or
  - (j) Offering an agreement or contract which purports to alter, amend or void coverage of an insurance contract.
- (2) The provisions of this subsection shall not operate to prohibit employees, officers, directors or partners of a commercial insured from acting in the capacity of an insurance manager or buyer in placing insurance on behalf of the employer, provided that the person's compensation is not based on buying insurance.
  - (3) The venue of an act committed by mail is ~~at the~~ point/location where the matter transmitted by mail is delivered or issued for delivery or takes effect.

**Drafting Note:** States may need to alter this subsection to reflect their decision as to whether they intend to permit citizens to directly purchase coverage within the state from a nonadmitted insurer, or if self-procurement of coverage will be permitted only when it occurs outside the state. States electing to allow direct procurement will need to insert an appropriate exemption in Section 4A of this Act. Additionally, states should consider whether the preceding definition of “transaction of insurance” is consistent with other statutory definitions of this phrase in the state. Finally, states may want to consider whether group insurance purchases or the maintenance of insurance books and records in this state should fall within the scope of the definition of “transaction of insurance.”

~~Q. “Type of insurance” means coverage afforded under the particular policy that is being placed.~~

~~V.F.~~ “Wet marine and transportation insurance” means:

- (1) Insurance upon vessels, crafts, hulls and other interests in them or with relation to them;
- (2) Insurance of marine builder's risks, marine war risks and contracts of marine protection and indemnity insurance;

~~(3)~~ Insurance of freight and disbursements pertaining to a subject of insurance within the scope of this subsection; and

~~(2)~~

~~(4)~~ Insurance of personal property and interests therein, in the course of exportation from or importation into any country, or in the course of transportation coastwise or on inland waters, including transportation by land, water or air from point of origin to final destination, in connection with any and all risks or perils of navigation, transit or transportation, and while being prepared for and while awaiting shipment, and during any incidental delays, transshipment, or reshipment; provided, however, that insurance of personal property and interests therein shall not be considered wet marine and transportation insurance if the property has:

- (a) Been transported solely by land; or

## Nonadmitted Insurance Model Act

- (b) Reached its final destination as specified in the bill of lading or other shipping document;  
or
- (c) The insured no longer has an insurable interest in the property.

~~**Comment:** The language added in 1994 to the end of the definition of “wet marine and transportation insurance” (Subparagraphs 4(a), 4(b), and 4(c)) is intended to clarify the scope of the definition, which ultimately affects the exemption of certain risks from this Act. The 1994 amendments address current regulatory concerns and concerns raised by those who drafted the 1983 amendments to the Model Surplus Lines Law. The 1983 drafters wrote: “Several [drafters] felt the term ‘storage’ should not appear in... [the wet marine definition] to ensure that warehousemen and other types of insurance covering risks of storage are not interpreted to be within the purview of this definition. The term ‘delays’ is sufficiently broad to cover temporary storage while in the course of transit.”~~

**Drafting Note:** In addition to the definitions provided in this section, individual states may wish to consider adopting definitions for “agent,” “broker” or “producer” in a manner consistent with its other laws. Additionally, states may want to cross-reference the definition of “insurance” as it appears elsewhere in the state insurance code. The definition of insurance should reach illegal unauthorized activities.

#### Section 4. Placement of Insurance Business

- A. An insurer shall not engage in the transaction of insurance unless authorized by a license in force pursuant to the laws of this state; or exempted by this Act or ~~otherwise exempted by~~ the insurance laws of this state.
- B. A person shall not ~~directly or indirectly~~ engage in a transaction of insurance ~~with or on behalf of or shall in this state directly or indirectly act as agent for, or otherwise represent or aid on behalf of another, a nonadmitted insurer in this state, in the solicitation, negotiation, procurement or effectuation of insurance, or renewals thereof, or forwarding of applications, or delivery of policies or contracts or inspection of risks, or fixing of rates, or investigation or adjustment of claims or losses, or collection or forwarding of premiums, or in any other manner represent or assist the insurer in the transaction of insurance.~~
- C. A person who represents or aids a nonadmitted insurer in violation of this section shall be subject to the penalties set forth in Section 7 of this Act. No insurance contract entered into in violation of this section shall preclude the insured from enforcing his rights under the contract in accordance with the terms and provisions of the contract of insurance and the laws of this state, to the same degree those rights would have been enforceable had the contract been lawfully procured.
- D. If the nonadmitted insurer fails to pay a claim or loss within the provisions of the insurance contract and the laws of this state, a person who assisted or in any manner aided directly or indirectly in the procurement of the insurance contract, shall be liable to the insured for the full amount under the provisions of the insurance contract.
- E. Section 4B or 4D shall not apply to a person in regard to an insured who independently procures insurance as provided under Section 6. This section shall not apply to a person, properly licensed as an agent or broker in this state who, for a fee and pursuant to a written agreement, is engaged solely to offer to the insured advice, counsel or opinion, or service with respect to the benefits, advantages or disadvantages promised under any proposed or in-force policy of insurance if the person does not, directly or indirectly, participate in the solicitation, negotiation or procurement of insurance on behalf of the insured.;

**Drafting Note:** If a state collects tax on unlicensed transactions which violate this Act, it may consider imposing liability for payment of those taxes on persons who violate this Act by assisting in the procurement of nonadmitted insurance.

**Drafting Note:** Some states permit other licensed professionals to engage in these activities as provided in their insurance statutes or other state statutes. Those states may want to amend Section 4E to include those professionals, to the extent they act within the scope of their licenses.

- F. This section shall not apply to a person acting in material compliance with the insurance laws of this state in the placement of the types of insurance identified in Paragraphs (1), (2), (3) and (4) below:

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- (1) Surplus lines insurance as provided in Section 5. For the purposes of this subsection, a licensee shall be deemed to be in material compliance with the insurance laws of this state, unless the licensee committed a violation of Section 5 that proximately caused loss to the insured;
- (2) Transactions for which a certificate of authority to do business is not required of an insurer under the insurance laws of this state;

~~**Drafting Note:** A number of states exempt from licensing and premium taxation nonprofit educational insurers insuring only nonprofit educational institutions and their employees. Some states require certificates of authority while others require licensing, and the appropriate language should be used in Paragraph (2) above. Additionally, some states may want to consider adding language to establish an option of allowing persons to file for an exemption with the Department of Insurance.~~

- (3) Reinsurance provided that, unless the commissioner waives the requirements of this subsection:
  - (a) The assuming insurer is authorized to ~~do engage in the business of an~~ insurance or reinsurance ~~business by in~~ its domiciliary jurisdiction and is authorized to write the type of reinsurance in its domiciliary jurisdiction; and
  - (b) The assuming insurer satisfies all legal requirements for such reinsurance in the state of domicile of the ceding insurer;
- (4) The property and operation of railroads or aircraft engaged in interstate or foreign commerce, wet marine and transportation insurance;
- (5) Transactions subsequent to issuance of a policy not covering properties, risks or exposures located, or to be performed in this state at the time of issuance, and lawfully solicited, written or delivered outside this state.

**Drafting Note:** States may also wish to consider exempting from Section 4A of this Act self-procured insurance or industrial insurance purchased by a sophisticated buyer who does not necessarily require the same regulatory protections as an average insurance buyer. Additionally, some states allow other insurance transactions with nonadmitted insurers. Examples include certain aviation and railroad risks. Other states may want to narrow the scope of the exemptions above or reserve the right to approve exemptions on a case-by-case basis.

## Section 5. Surplus Lines Insurance

- A. Surplus lines insurance may be placed by a surplus lines licensee if:
  - (1) Each insurer is ~~an~~ eligible to write surplus lines ~~insurance~~~~insurer~~; and
  - (2) ~~Each insurer is authorized to write the type of insurance in its domiciliary jurisdiction; and~~
  - (3) ~~Other than for exempt commercial purchasers, t~~The full amount or type of insurance cannot be obtained from insurers who are admitted to ~~do engage in the business of insurance~~ in this state. The full amount or type of insurance may be procured from eligible surplus lines insurers, provided that a diligent search is made among the insurers who are admitted to transact and are actually writing the particular type of insurance in this state if any are writing it; and
  - (4) All other requirements of this Act are met.

~~**Drafting Note:** States may prefer to reference “kind of insurance” rather than “type of insurance” in Section 5A(3). The term utilized should be defined within the Act.~~The diligent search requirement of Section 5A(3) must be satisfied in accordance with the statutes and regulations of the governing state. ~~Such Diligent search~~ statutes and regulations ~~might~~ vary from state to state in terms of the number of declinations required and the person designated to conduct the search. ~~Several states permit surplus lines placement without a diligent search for or without regard to the availability of admitted coverage. States may want to consider changing diligent search requirements in light of electronic transactions.~~ Section 5A(3) does not prohibit a regulatory system in which a surplus lines licensee may place with an eligible nonadmitted insurer any coverage listed on a current

Nonadmitted Insurance Model Act

“~~E~~export ~~L~~ist” maintained by the commissioner. The ~~e~~Export list would identify types of insurance for which no admitted market exists. The commissioner may waive the diligent search requirement for any such type of insurance.

**Drafting Note:** Utilizing the “full amount” standard in Section 5A(3) of this Act may have certain market implications. An alternative to this approach would be to require that whatever part of the coverage is attainable through the admitted market be placed in the admitted market and only the excess part of the coverage may be exported.

- B. Subject to Section 5A(3) of this Act, a surplus lines licensee may place any coverage with an nonadmitted eligible surplus lines insurer ~~eligible to accept the insurance~~, unless specifically prohibited by the laws of this state.

*[Alternative Subsection B]*

- ~~[C]~~B. Subject to Section 5A(3) of this Act, a surplus lines licensee may place only the following types of coverage with an nonadmitted eligible surplus lines insurer ~~eligible to accept insurance~~: (list acceptable coverage).]

**Drafting Note:** The two statutory alternatives described in Section 5B represent different regulatory approaches to defining those coverages which may be placed in the nonadmitted market and they would impact the admitted market in different manners.

- C. A surplus lines licensee shall not place ~~surplus lines insurance coverage with a nonadmitted insurer~~, unless, at the time of placement, the surplus lines licensee has determined that the ~~nonadmitted insurer~~ is eligible to write surplus lines insurance under one of the following subsections:

~~(1) Has established satisfactory evidence of good repute and financial integrity; and~~

~~(2) Qualifies is eligible to write surplus lines insurance under one of the following subparagraphs:~~

1. **Drafting Note:** Current numbering is retained in this Model to remain consistent with the reference within the NRRRA.

2. Is eligible to write surplus lines insurance under one of the following subsections:

(a) For a nonadmitted insurer domiciled in another United States jurisdiction, the insurer shall have both of the following:

~~(i)~~ The authority to write the type of insurance in its domiciliary jurisdiction; and

~~(ii)~~ Has capital and surplus or its equivalent under the laws of its domiciliary jurisdiction ~~which~~ that equals the greater of:

~~(I)~~ ~~(i)~~ ~~(I)~~ The minimum capital and surplus requirements under the law of this state; or

~~(II)~~ (B) \$15,000,000;

**Drafting Note:** ~~States that have not previously increased capital and surplus requirements may wish to consider implementation of the capital and surplus requirements in this subparagraph in a series of phases over a period of up to three (3) years. In some circumstances, implementation of a \$15,000,000 capital and surplus requirement may represent a dramatic increase over existing requirements. States may wish to allow insurers which are eligible under existing law some period of time to increase their capital and surplus to meet the new standards. Current numbering is retained in this Model to remain consistent with the reference within the NRRRA.~~

~~(iii)~~ The requirements of Subparagraph (b)(i) may be satisfied by an insurer ~~s~~ possessing less than the minimum capital and surplus upon an affirmative finding of acceptability by the commissioner. The finding shall be based upon such factors as quality of management, capital and surplus of any parent company, company

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

underwriting profit and investment income trends, market availability and company record and reputation within the industry. In no event shall the commissioner make an affirmative finding of acceptability when the nonadmitted insurer's capital and surplus is less than \$4,500,000; or

~~(a) For a nonadmitted insurer domiciled outside the United States, the insurer shall be listed on the *Quarterly Listing of Alien Insurers* maintained by the International Insurers Department of the National Association of Insurance Commissioners (NAIC); [or]~~

~~(b)~~

~~(c) [(3)c] For an insurer domiciled in this state, the insurer is a domestic surplus lines insurer.]~~

~~(b) In the case of an insurance exchange created by the laws of a state other than this state:~~

~~(i) The syndicates of the exchange shall maintain under terms acceptable to the commissioner capital and surplus, or its equivalent under the laws of its domiciliary jurisdiction, of not less than \$75,000,000 in the aggregate; and~~

~~(ii) The exchange shall maintain under terms acceptable to the commissioner not less than fifty percent (50%) of the policyholder surplus of each syndicate in a custodial account accessible to the exchange or its domiciliary commissioner in the event of insolvency or impairment of the individual syndicate; and~~

~~(iii) In addition, each individual syndicate to be eligible to accept surplus lines insurance placements from this state shall meet either of the following requirements:~~

~~(I) For insurance exchanges which maintain funds in an amount of not less than \$15,000,000 for the protection of all exchange policyholders, the syndicate shall maintain under terms acceptable to the commissioner minimum capital and surplus, or its equivalent under the laws of the domiciliary jurisdiction, of not less than \$5,000,000; or~~

~~(II) For insurance exchanges which do not maintain funds in an amount of not less than \$15,000,000 for the protection of all exchange policyholders, the syndicate shall maintain under terms acceptable to the commissioner minimum capital and surplus, or its equivalent under the laws of its domiciliary jurisdiction, of not less than the minimum capital and surplus requirements under the laws of its domiciliary jurisdiction or \$15,000,000, whichever is greater; or~~

**Drafting Note:** Some states may want to cross reference statutory provisions in their own states which provide a grandfather clause for syndicates established with a lower capital and surplus requirement.

~~(e) In the case of a Lloyd's plan or other similar group of insurers, which consists of unincorporated individual insurers, or a combination of both unincorporated and incorporated insurers:~~

~~(i) The plan or group maintains a trust fund that shall consist of a trustee account representing the group's liabilities attributable to business written in the United States; and~~

~~(ii) In addition, the group shall establish and maintain in trust a surplus in the amount of \$100,000,000; which shall be available for the benefit of United States surplus lines policyholders of any member of the group.~~

~~(iii) The incorporated members of the group shall not be engaged in any business other than underwriting as a member of the group and shall be subject to the same level~~

## Nonadmitted Insurance Model Act

~~of solvency regulation and control by the group's domiciliary regulator as are the unincorporated members.~~

- ~~(iv) — The trust funds shall be maintained in an irrevocable trust account in the United States in a qualified financial institution, consisting of cash, securities, letters of credit or investments of substantially the same character and quality as those which are eligible investments for the capital and statutory reserves of admitted insurers to write like kinds of insurance in this state and, in addition, the trust required by item (ii) of this paragraph shall satisfy the requirements of the Standard Trust Agreement required for listing with the National Association of Insurance Commissioners (NAIC) International Insurers Department; or~~
- ~~(d) — In the case of a group of incorporated insurers under common administration, which has continuously transacted an insurance business outside the United States for at least three (3) years immediately prior to this time, and which submits to this state's authority to examine its books and records and bears the expense of the examination:~~
- ~~(i) — The group shall maintain an aggregate policyholders' surplus of \$10,000,000,000; and~~
- ~~(ii) — The group shall maintain in trust a surplus in the amount of \$100,000,000; which shall be available for the benefit of United States surplus lines policyholders of any member of the group; and~~
- ~~(iii) — Each insurer shall individually maintain capital and surplus of not less than \$25,000,000 per company.~~
- ~~(iv) — The trust funds shall satisfy the requirements of the Standard Trust Agreement requirement for listing with the NAIC International Insurers Department, and shall be maintained in an irrevocable trust account in the United States in a qualified financial institution, and shall consist of cash, securities, letters of credit or investments of substantially the same character and quality as those which are eligible investments for the capital and statutory reserves of admitted insurers to write like kinds of insurance in this state.~~
- ~~(v) — Additionally, each member of the group shall make available to the commissioner an annual certification of the member's solvency by the member's domiciliary regulator and its independent public accountant; or~~
- ~~(e) — Except for an exchange or plan complying with Subparagraph (b), (c) or (d), an insurer not domiciled in one of the United States or its territories shall satisfy the capital and surplus requirements of Subsection C(2)(a) of this section and shall have in force a trust fund of not less than the greater of:~~
- ~~(i) — \$5,400,000; or~~
- ~~(ii) — Thirty percent (30%) of the United States surplus lines gross liabilities, excluding aviation, wet marine and transportation insurance liabilities, not to exceed \$60,000,000, to be determined annually on the basis of accounting practices and procedures substantially equivalent to those promulgated by this state, as of December 31 next preceding the date of determination, where:~~
- ~~(1) — The liabilities are maintained in an irrevocable trust account in the United States in a qualified financial institution, on behalf of U.S. policyholders consisting of cash, securities, letters of credit or other investments of substantially the same character and quality as those which are eligible investments pursuant to [cite insurance investment law] for the capital and statutory reserves of admitted insurers to write like kinds of insurance in this state. The trust fund, which shall be included in any calculation of capital and surplus or its equivalent, shall~~

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- ~~(H) — The insurer may request approval from the commissioner to use the trust fund to pay valid surplus lines claims; provided, however, that the balance of the trust fund is never less than the greater of \$5,400,000 or thirty percent (30%) of the insurer’s current gross U.S. surplus lines liabilities, excluding aviation, wet marine and transportation insurance liabilities; and~~
- ~~(II) — In calculating the trust fund amount required by this subsection, credit shall be given for surplus lines deposits separately required and maintained for a particular state or U.S. territory, not to exceed the amount of the insurer’s loss and loss adjustment reserves in the particular state or territory;~~

**Drafting Note:** The commissioner may wish to establish the authority to set a higher level on a case-by-case basis.

- ~~(f) — An insurer or group of insurers meeting the requirements to do a surplus lines business in this state at the effective date of this law shall have two (2) years from the date of enactment to meet the requirements of Subparagraph (e), as follows:~~

<b>Year Following Enactment</b>	<b>Trust Fund Requirement</b>
1	15% of U.S. surplus lines liabilities, excluding aviation, wet marine and transportation insurance, with a maximum of \$30,000,000
2	30% of U.S. surplus lines liabilities, excluding aviation, wet marine and transportation insurance, with a maximum of \$60,000,000.

- ~~(g) — The commissioner shall have the authority to adjust, in response to inflation, the trust fund amounts required by Subparagraph (e).~~
- ~~(3) — In addition to all of the other requirements of this subsection, an insurer not domiciled in the United States or its territories shall be listed by the NAIC International Insurers Department. The commissioner may waive the requirement in Paragraph (3) or the requirements of Section 5C(2)(e)(ii) may be satisfied by an insurer’s possessing less than the trust fund amount specified in Section 5C(2)(e)(ii) upon an affirmative finding of acceptability by the commissioner if the commissioner is satisfied that the placement of insurance with the insurer is necessary and will not be detrimental to the public and the policyholder. In determining whether business may be placed with the insurer, the commissioner may consider such factors as:~~
  - ~~(a) — The interests of the public and policyholders;~~
  - ~~(b) — The length of time the insurer has been authorized in its domiciliary jurisdiction and elsewhere;~~
  - ~~(c) — Unavailability of particular coverages from authorized insurers or unauthorized insurers meeting the requirements of this section;~~
  - ~~(d) — The size of the company as measured by its assets, capital and surplus, reserves, premium writings, insurance in force or other appropriate criteria;~~
  - ~~(e) — The kinds of business the company writes, its net exposure and the extent to which the company’s business is diversified among several lines of insurance and geographic locations; and~~
  - ~~(f) — The past and projected trend in the size of the company’s capital and surplus considering such factors as premium growth, operating history, loss and expense ratios, or other appropriate criteria; and~~

## Nonadmitted Insurance Model Act

~~(4) — Has caused to be provided to the commissioner a copy of its current annual statement certified by the insurer and an actuarial opinion as to the adequacy of, and methodology used to determine, the insurer's loss reserves. The statement shall be provided at the same time it is provided to the insurer's domicile, but in no event more than eight (8) months after the close of the period reported upon, and shall be certified as a true and correct copy by an accounting or auditing firm licensed in the jurisdiction of the insurer's domicile and certified by a senior officer of the nonadmitted insurer as a true and correct copy of the statement filed with the regulatory authority in the domicile of the nonadmitted insurer. In the case of an insurance exchange qualifying under Paragraph (2)(b) of this subsection, the statement may be an aggregate combined statement of all underwriting syndicates operating during the period reported; and~~

**Drafting Note:** The following paragraph is for use by those states which desire to adopt a “white list” for determining the eligibility of nonadmitted insurers to write surplus lines insurance.

~~(5) — In addition to meeting the requirements in Paragraphs (1) to (4) of this subsection an insurer shall be an eligible surplus lines insurer if it appears on the most recent list of eligible surplus lines insurers published by the commissioner from time to time but at least semiannually. Nothing in this paragraph shall require the commissioner to place or maintain the name of any nonadmitted insurer on the list of eligible surplus lines insurers.~~

~~(6) — Notwithstanding Section 5A, only that portion of any risk eligible for export for which the full amount of coverage is not procurable from listed eligible surplus lines insurers may be placed with any other nonadmitted insurer which does not appear on the list of eligible surplus lines insurers published by the commissioner pursuant to Paragraph (5) of this subsection but nonetheless meets the requirements set forth in Sections 5C(1) and 5C(2) and any regulations of the commissioner. The surplus lines licensee seeking to provide coverage through an unlisted nonadmitted insurer shall make a filing specifying the amounts and percentages of each risk to be placed, and naming the nonadmitted insurers with which placement is intended. Within [insert number] days after placing the coverage, the surplus lines licensee shall also send written notice to the insured or the producing broker that the insurance, or a portion thereof, has been placed with the nonadmitted insurer.~~

~~D. The placement of surplus lines insurance shall be subject to the statutory and regulatory requirements solely of the insured's home state.~~

~~ED.~~ Insurance procured under this section shall be valid and enforceable as to all parties.

~~FE.~~ Withdrawal of Eligibility as a Surplus Lines Insurer

F.

If at any time the commissioner has reason to believe that a surplus lines insurer is no longer eligible under Section 5C,

~~(1) — Is in unsound financial condition or has acted in an untrustworthy manner;~~

~~(2) — No longer meets standards set forth in Section 5C of this Act;~~

~~(3) — Has willfully violated the laws of this state; or~~

~~(4) — Does not conduct a proper claims practice.~~

~~The~~the commissioner may, after notice and an opportunity for a hearing, declare it ineligible. The commissioner shall promptly ~~mail~~publish notice of all such declarations in a timely manner reasonably calculated to reach to each surplus lines licensee or surplus lines advisory organization, for distribution to all surplus lines licensees.

**Drafting Note:** Individual states should consider whether such declarations of ineligibility are appropriate in view of the state's other due process and administrative procedure requirements. Eligibility criteria are independent of other considerations such as compliance with other laws, for example, 18 USC 1033, relating to felons participating in the insurance business.

~~GF.~~ Surplus Lines Tax

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- ~~(1) (4)~~—In addition to the full amount of gross premiums charged by the insurer for the insurance, every person licensed pursuant to Section 5~~H~~ of this Act shall collect and pay to the commissioner a sum equal to [insert number] percent of the gross premiums charged, less any return premiums, for surplus lines insurance provided by the licensee pursuant to the license. Where the insurance covers properties, risks or exposures located or to be performed both in and out of this state, the sum payable shall be ~~computed on that portion of the gross premiums allocated to this state pursuant to Paragraph (4) of this subsection less the amount of gross premiums allocated to this state and returned to the insured~~ paid entirely to the hHome sState of the insured. The tax on any portion of the premium unearned at termination of insurance having been credited by the state to the licensee shall be returned to the policyholder directly by the surplus lines licensee or through the producing broker, if any. The surplus lines licensee is prohibited from rebating, for any reason, any part of the tax.
- (2) At the time of filing the [insert monthly, quarterly, annual] report as set forth in Subsection ~~S~~R of this section, each surplus lines licensee shall pay the premium tax due for the policies written during the period covered by the report.
- ~~(3)~~—~~If a surplus lines policy procured through a surplus lines licensee covers properties, risks or exposures only partially located or to be performed in this state, the tax due shall be computed on the portions of the premiums which are attributable to the properties, risks or exposures located or to be performed in this state. In determining the amount of premiums taxable in this state, all premiums written, procured or received in this state shall be considered written on properties, risks or exposures located or to be performed in this state, except premiums which are properly allocated or apportioned and reported as taxable premiums of a reciprocal state. In no event shall the tax payable to this state be less than the tax due pursuant to Paragraph (4) of this subsection; provided, however, in the event that the amount of tax due under this provision is less than \$50 in any jurisdiction, it shall be payable in the jurisdiction in which the affidavit required in Subsection K of this section is filed. The commissioner shall, at least annually furnish to the commissioner of a reciprocal state, as defined in Section 3L, a copy of all filings reporting an allocation of taxes as required by this subsection.~~
- ~~(4)~~—~~In determining the amount of gross premiums taxable in this state for a placement of surplus lines insurance covering properties, risks or exposures only partially located or to be performed in this state, the tax due shall be computed on the portions of the premiums which are attributable to properties, risks or exposures located or to be performed in this state and which relates to the kinds of insurance being placed as determined by reference to an allocation schedule duly promulgated in a regulation by the commissioner.~~
- ~~(a)~~—~~If a policy covers more than one classification:~~
- ~~(i)~~—~~For any portion of the coverage identified by a classification on the Allocation Schedule, the tax shall be computed by using the Allocation Schedule for the corresponding portion of the premium;~~
- ~~(ii)~~—~~For any portion of the coverage not identified by a classification on the Allocation Schedule, the tax shall be computed by using an alternative equitable method of allocation for the property or risk;~~
- ~~(iii)~~—~~For any portion of the coverage where the premium is indivisible, the tax shall be computed by using the method of allocation which pertains to the classification describing the predominant coverage.~~
- ~~(b)~~—~~If the information provided by the surplus lines licensee is insufficient to substantiate the method of allocation used by the surplus lines licensee, or if the commissioner determines that the licensee's method is incorrect, the commissioner shall determine the equitable and appropriate amount of tax due to this state as follows:~~

## Nonadmitted Insurance Model Act

- ~~(i) By use of the Allocation Schedule where the risk is appropriately identified in the schedule;~~
- ~~(ii) Where the Allocation Schedule does not identify a classification appropriate to the coverage, the commissioner may give significant weight to documented evidence of the underwriting bases and other criteria used by the insurer. The commissioner may also consider other available information to the extent sufficient and relevant, including the percentage of the insured's physical assets in this state, the percentage of the insured's sales in this state, the percentage of income or resources derived from this state, and the amount of premium tax paid to another jurisdiction for the policy.~~

**Drafting Note:** Subparagraph (b) above may be included in the Act or in a separate regulation at the option of the state. It is highly recommended that the model Allocation Schedule and reporting form be adopted by regulation in conjunction with the adoption of the above language. In order for the model law to work effectively, the allocation schedules used by the states should be as uniform as possible.

HG. Collection of Tax

If the tax owed by a surplus lines licensee under this section has been collected and is not paid within the time prescribed, the same shall be recoverable in a suit brought by the commissioner against the surplus lines licensee and the surety on the bond filed under Subsection HI of this section. The commissioner may charge interest at the rate of [insert number] percent per year for the unpaid tax.

HH. Surplus Lines Licenses

- (1) A person shall not procure a contract of surplus lines insurance with a ~~nonadmitted surplus lines~~ insurer unless the person possesses a current surplus lines insurance producer license issued by the commissioner.
- (2) The commissioner may issue a resident surplus lines license to a qualified holder of ~~a current underlying property and casualty agent's or broker's or general agent's licenses,~~ but only when the ~~broker or agent~~ producer has:
- (a) Remitted the \$[insert amount] annual fee to the commissioner;
- (b) Submitted a completed license application on a form supplied by the commissioner;
- ~~(c) Passed a qualifying examination approved by the commissioner, except that all holders of a license prior to the effective date of this Act shall be deemed to have passed such an examination;~~
- ~~(cd)~~ In the case of a resident agent, filed with the commissioner, and continues to maintain during the term of the license, in force and unimpaired, a bond or errors and omissions (E&O) policy in favor of this state in the penal sum of \$[insert amount] aggregate liability, with corporate sureties approved by the commissioner. The bond or E&O policy shall be conditioned that the Surplus Lines Licensee will conduct business in accordance with the provisions of this Act and will promptly remit the taxes as provided by law. No bond or E&O policy shall be terminated unless at least thirty (30) days prior written notice is given to the licensee and commissioner;

**Drafting note:** Under Public Law No. 106-102 (the "Gramm-Leach-Bliley Act"), it is believed that a requirement for a nonresident agent to file a bond may contravene the reciprocity provisions. The requirement for a resident agent to file a bond would not, seemingly, contravene these provisions, and there may be methodologies whereby such resident bonds could become reciprocal between states. Some states have expressed concern that their bonding requirements constitute important consumer protections, and that elimination of these simply to comply with Gramm-Leach-Bliley may result in unintended consequences, and a lack of Ceontrol over possibly unscrupulous nonresident agents.

- ~~(de)~~ If a resident, established and continues to maintain an office in this state, ~~;~~ and

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

~~(f) Designated the commissioner as agent for service of process, thereby designating the commissioner to be the licensee's true and lawful attorney upon whom may be served all lawful process in a proceeding instituted by or on behalf of an insured or beneficiary arising out of any contract of insurance, and shall signify its agreement that such service of process is of the same legal force and validity as personal service of process in this state upon the licensee.~~

- (3) A nonresident person shall receive a nonresident surplus lines license if:
- (a) The person is currently licensed as a surplus lines licensee and in good standing in his or her home state;
  - (b) The person has submitted the proper request for licensure and has paid the fees required by [insert appropriate reference to state law or regulation];
  - (c) The person has submitted or transmitted to the insurance commissioner the application for licensure that the person submitted to his or her home state, or in lieu of the same, a completed Uniform Application; and
  - (d) The person's home state awards nonresident surplus lines licenses to residents of this state on the same basis.

**Drafting Note:** In accordance with Public Law No. 106-102 (the "Gramm-Leach-Bliley Act") states should not require any additional attachments to the Uniform Application or impose any other conditions on applicants that exceed the information requested within the Uniform Application.

- (4) The insurance commissioner may verify the person's licensing status through the Producer Database maintained by the ~~NAICational Association of Insurance Commissioners~~, its affiliates or subsidiaries.
- (5) A nonresident surplus lines licensee who moves from one state to another state or a resident surplus lines licensee who moves from this state to another state shall file a change of address and provide certification from the new resident state within thirty (30) days of the change of legal residence. No fee or license application is required.
- (6) The insurance commissioner shall waive any requirements for a nonresident surplus lines license applicant with a valid license from his or her home state, except the requirements imposed by this subsection, if the applicant's home state awards nonresident surplus lines licenses to residents of this state on the same basis.
- ~~(7)~~ Each surplus lines license shall expire on [insert date] of each year, and an application for renewal shall be filed before [insert date] of each year upon payment of the annual fee and compliance with other provisions of this section. A surplus lines licensee who fails to apply for renewal of the license before [insert date] shall pay a penalty of \$[insert amount] and be subject to penalties provided by law before the license will be renewed.

**Drafting Note:** States may wish to reference their specific licensing statutes in this section.

**Drafting Note:** Some states allow surplus lines licensees to hold binding authorities on behalf of ~~eligible~~ surplus lines insurers. States which allow such binding authorities might want to establish minimum standards for the related agreements. In addition, states might want to consider requiring surplus lines licensees with such binding authorities to submit the related agreements to state regulators for review and approval.

#### II. Suspension, Revocation or Nonrenewal of Surplus Lines Licensee's License

## Nonadmitted Insurance Model Act

The commissioner may suspend, revoke or refuse to renew the license of a surplus lines licensee after notice and an opportunity for a hearing as provided under the applicable provision of this state's laws ~~for upon one or more of the following grounds:~~

- ~~(1) Removal of the resident surplus lines licensee's office from this state;~~
- ~~(2) Removal of the resident surplus lines licensee's office accounts and records from this state during the period during which the accounts and records are required to be maintained under Subsection Q of this section;~~
- ~~(3) Closing of the surplus lines licensee's office for a period of more than thirty (30) business days, unless permission is granted by the commissioner;~~
- ~~(4) Failure to make and file required reports;~~
- ~~(5) Failure to transmit required tax on surplus lines premiums to this state or a reciprocal state to which a tax is owing;~~
- ~~(6) Failure to maintain required bond;~~
- ~~(17)~~ Violation of any provision of this Act; or
- ~~(28)~~ For any cause for which an insurance license could be denied, revoked, suspended or renewal refused under Sections [insert applicable citation].

K.J. Actions Against Eligible Surplus Lines Insurers Transacting Surplus Lines Business

- (1) An eligible surplus lines insurer may be sued upon a cause of action arising in this state under a surplus lines insurance contract made by it or evidence of insurance issued or delivered by the surplus lines licensee. A policy issued by the eligible surplus lines insurer shall contain a provision stating the substance of this section and designating the person to whom the commissioner shall mail process.
- (2) The remedies provided in this section are in addition to any other methods provided by law for service of process upon insurers.

L.K. Duty to File Evidence of Insurance and Affidavits

Within [insert number] days after the placing of any surplus lines insurance, each producing broker shall execute and each surplus lines licensee shall execute where appropriate, and file a written report regarding the insurance which shall be kept confidential by the commissioner, including the following:

- (1) The name and address of the insured;
- (2) The identity of the insurer or insurers;
- (3) A description of the subject and location of the risk;
- (4) The amount of premium charged for the insurance;
- (5) Such other pertinent information as the commissioner may reasonably require; and
- (6) An affidavit on a standardized form promulgated by the commissioner as to the diligent efforts to place the coverage with admitted insurers and the results of that effort or the insured is an exempt commercial purchaser. The affidavit shall be open to public inspection. The affidavit shall affirm that the insured was expressly advised in writing prior to placement of the insurance that:
  - (a) The surplus lines insurer with whom the insurance was to be placed is not licensed in this state and is not subject to its supervision; and

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- (b) In the event of the insolvency of the surplus lines insurer, losses will not be paid by the state insurance guaranty fund.

**Drafting Note:** Surplus lines licensees will frequently communicate with the insured through a producing broker rather than communicate with the insured directly. In preparing affidavit forms, states may wish to recognize that, as a result of communications passing through the producing broker, the surplus lines licensee may not be in a position to affirm, based upon personal knowledge, that the insured received from the producing broker the written information required by this subsection.

ML. Surplus Lines Advisory Organizations

- (1) There is hereby created a nonprofit association to be known as the [insert name]. All surplus lines licensees shall be deemed to be members of the association. The association shall perform its functions under the plan of operation established pursuant to Paragraph (3) of this subsection and must exercise its powers through a board of directors established under Paragraph (2) of this subsection. The association shall be supervised by the commissioner. The association shall be authorized and have the duty to:

**Drafting Note:** The preceding paragraph provides that all surplus lines licensees are “deemed” to be members of the association. Some states, however, may choose not to establish a surplus lines advisory organization; in those states Subsection M would not be necessary.

- (a) Receive, record, and subject to Subparagraph (b) of this paragraph, stamp all surplus lines insurance documents which surplus lines brokers are required to file with the association pursuant to the plan of operation;

**Drafting Note:** Subparagraph (a) of this paragraph authorizes the association to receive, record and stamp all surplus lines documents which must be submitted to the association pursuant to the plan of operation. Documents to be submitted to the association for stamping are likely to vary by state.

- (b) Refuse to stamp submitted insurance documents, if the association determines that a nonadmitted insurer does not meet minimum state financial standards of eligibility, or the commissioner orders the association not to stamp insurance documents pursuant to Paragraph (9) of this subsection. The association shall notify the commissioner and provide an explanation for any refusal to stamp submitted insurance documents other than a refusal based upon the order of the commissioner;
- (c) Prepare and deliver annually to each licensee and to the commissioner a report regarding surplus lines business. The report shall include a delineation of the classes of business procured during the preceding calendar year, in the form the board of directors prescribes;
- (d) Encourage compliance by its members with the surplus lines law of this state and the rules and regulations of the commissioner relative to surplus lines insurance;
- (e) Communicate with organizations of agents, brokers and admitted insurers with respect to the proper use of the surplus lines market;
- (f) Employ and retain persons as necessary to carry out the duties of the association;
- (g) Borrow money as necessary to effect the purposes of the association;
- (h) Enter contracts as necessary to effect the purposes of the association; and
- (i) Provide such other services to its members as are incidental or related to the purposes of the association.
- (2) The association shall function through a board of directors elected by the association members, and officers who shall be elected by the board of directors.

## Nonadmitted Insurance Model Act

- (a) The board of directors of the association shall consist of not less than five (5) nor more than nine (9) persons serving terms as established in the plan of operation. The plan of operation shall provide for the election of a board of directors by the members of the association from its membership. The plan of operation shall fix the manner of voting and may weigh each member's vote to reflect the annual surplus lines insurance premium written by the member.
- (b) The board of directors shall elect officers as provided for in the plan of operation.
- (3) The association shall establish a plan of operation. The plan of operation shall provide for the formation, operation and governance of the association. The plan and any amendments shall be effective upon approval by the commissioner, which shall not be unreasonably withheld or delayed. All association members shall comply with the plan of operation or any amendments to it. Failure to comply with the plan of operation or any amendments shall constitute a violation of the insurance law and the commissioner may issue an order requiring discontinuance of the violation.
- (4) The association shall file with the commissioner:
  - (a) A copy of its plan of operation and any amendments to it;
  - (b) A current list of its members revised at least annually;
  - (c) The name and address of a resident of this state upon whom notices or orders of the commissioner or processes issued at the direction of the commissioner may be served; and
  - (d) An agreement that the commissioner may examine the association in accordance with the provisions of Paragraph (5) of this subsection.
- (5) The commissioner shall, at least once in [insert number] years, make or cause to be made an examination of the association. The reasonable cost of an examination shall be paid by the association upon presentation to it by the commissioner of a detailed account of each cost. The officers, managers, agents, and employees of the association may be examined at any time, under oath, and shall exhibit all books, records, accounts, documents or agreements governing its method of operation. The commissioner shall furnish a copy of the examination report to the association and shall notify the association that it may request a hearing within thirty (30) days on the report or on any facts or recommendations contained in it. If the commissioner finds the association to be in violation of this section, the commissioner may issue an order requiring the discontinuance of the violation. A director may be removed from the association's board of directors by the commissioner for cause, stated in writing, after an opportunity has been given to the director to be heard.
- (6) There shall be no liability on the part of and no causes of action of any nature shall arise against the association, its directors, officers, agents or employees for any action taken or omitted by them in the performance of their powers and duties under this section, absent gross negligence or willful misconduct.
- (7) Within [insert number] days after a surplus lines policy is procured, a licensee shall submit to the association for recording and stamping all documents which surplus lines brokers are required to file with the association. Every insurance document submitted to the association pursuant to this subsection shall set forth:
  - (a) The name and address of the insured;
  - (b) The gross premium charged;
  - (c) The name of the nonadmitted insurer; and

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- (d) The class of insurance procured.

**Drafting Note:** The appropriate time limits for submitting documents required for stamping will vary by state.

- (8) It shall be unlawful for an insurance agent, broker or surplus lines broker to deliver in this state any insurance document which surplus lines brokers are required to file with the association unless the insurance document is stamped by the association or is exempt from such requirements. However, a licensee's failure to comply with the requirements of this subsection shall not affect the validity of the coverage.
- (9) The services performed by the association shall be funded by a stamping fee assessed for each premium-bearing document submitted to the association. The stamping fee shall be established by the board of directors of the association from time to time. The stamping fee shall be paid by the insured.
- (10) The commissioner may declare a nonadmitted insurer ineligible and order the association not to stamp insurance documents issued by the nonadmitted insurer and issue any other appropriate order.

~~NM.~~ Evidence of the Insurance and Subsequent Changes to the Insurance

- (1) Upon placing surplus lines insurance, the surplus lines licensee shall promptly deliver to the insured or the producing broker the policy, or if the policy is not then available, a certificate as described in Paragraph (4) of this subsection, cover note, binder or other evidence of insurance. The certificate described in Paragraph (4) of this subsection, cover note, binder or other evidence of insurance shall be executed by the surplus lines licensee and shall show the description and location of the subject of the insurance, coverages including any material limitations other than those in standard forms, a general description of the coverages of the insurance, the premium and rate charged and taxes to be collected from the insured, and the name and address of the insured and surplus lines insurer or insurers and proportion of the entire risk assumed by each, and the name of the surplus lines licensee and the licensee's license number.
- (2) A surplus lines licensee shall not issue or deliver any evidence of insurance or purport to insure or represent that insurance will be or has been written by any ~~eligible~~ surplus lines insurer, or a nonadmitted insurer ~~pursuant to Section 5C(4)~~, unless the licensee has authority from the insurer to cause the risk to be insured or has received information from the insurer in the regular course of business that the insurance has been granted.
- (3) If, after delivery of any evidence of insurance, there is any change in the identity of the insurers, or the proportion of the risk assumed by any insurer, or any other material change in coverage as stated in the surplus lines licensee's original evidence of insurance, or in any other material as to the insurance coverage so evidenced, the surplus lines licensee shall promptly issue and deliver to the insured or the original producing broker an appropriate substitute for, or endorsement of the original document, accurately showing the current status of the coverage and the insurers responsible for the coverage.
- (4) As soon as reasonably possible after the placement of the insurance, the surplus lines licensee shall deliver a copy of the policy or, if not available, a certificate of insurance to the insured or producing broker to replace any evidence of insurance previously issued. Each certificate or policy of insurance shall contain or have attached a complete record of all policy insuring agreements, conditions, exclusions, clauses, endorsements or any other material facts that would regularly be included in the policy.
- ~~(5) A surplus lines licensee who fails to comply with the requirements of this subsection shall be subject to the penalties provided in this Act.~~
- ~~(5)~~ (6) The surplus lines licensee shall give the following consumer notice to every person, ~~other than exempt commercial purchasers~~, applying for insurance with a nonadmitted insurer. The notice shall be printed in 16-point type on a separate document affixed to the application. The applicant shall sign and date a copy of the notice to acknowledge receiving it. The surplus lines licensee shall maintain

## Nonadmitted Insurance Model Act

the signed notice in its file for a period of five (5) years from expiration of the policy. The surplus lines licensee shall tender a copy of the signed notice to the insured at the time of delivery of each policy the licensee transacts with a nonadmitted insurer. The copy shall be a separate document affixed to the policy.

*“Notice: ~~1. A “nonadmitted” or “surplus lines” insurer that is not licensed in this state is issuing the insurance policy that you have applied to purchase. These companies are called “nonadmitted” or “surplus lines” insurers. 2. The insurer is not subject to the financial solvency regulation and enforcement that applies to licensed insurers in this state. 3. These insurers generally do not participate in insurance guaranty funds created by state law. These guaranty funds will not pay your claims or protect your assets if the insurer becomes insolvent and is unable to make payments as promised. 4. Some states maintain lists of approved or eligible surplus lines insurers and surplus lines brokers may use only insurers on the lists. Some states issue orders that particular surplus lines insurers can not be used. 5. For additional information about the above matters and about the insurer, you should ask questions of your insurance agent, broker or surplus lines broker. You may also contact your insurance department consumer help line.”~~*

**Drafting Note:** This notice is intended to inform personal lines customers and smaller commercial risks of the nature of the coverage they are purchasing. A state may wish to add language to this statute providing that this notice need not be given to commercial risks meeting defined criteria for size and insurance expertise.

QN. Licensee’s Duty to Notify Insured

- (1) No contract of insurance placed by a surplus lines licensee under this Act shall be binding upon the insured and no premium charged shall be due and payable until the surplus lines licensee or the producing broker ~~shall have~~has notified the insured in writing, in a form acceptable to the commissioner, a copy of which shall be maintained by the licensee or the producing broker with the records of the contract and available for possible examination, that:
  - (a) The insurer [other than a domestic surplus lines insurer] with which the licensee places the insurance is not licensed by this state and is not subject to its supervision; and
  - (b) In the event of the insolvency of the surplus lines insurer, losses will not be paid by the state insurance guaranty fund.
- (2) Nothing herein contained shall nullify any agreement by any insurer to provide insurance.

**Drafting Note:** To ensure the meaningfulness of the notice required by this subsection, the commissioner might want to establish criteria related to readability, ~~type face~~font, and ~~type~~ size of the notice.

PQ. Effect of Payment to Surplus Lines Licensee

A payment of premium to a surplus lines licensee acting for a person other than itself in procuring, continuing or renewing any policy of insurance procured under this section shall be deemed to be payment to the insurer, whatever conditions or stipulations may be inserted in the policy or contract notwithstanding.

QP. Surplus Lines Licensees May Accept Business from Other Producers

A surplus lines licensee may originate surplus lines insurance or accept such insurance from any other producing broker duly licensed as to the kinds of insurance involved, and the surplus lines licensee may compensate the producing broker for the business.

RQ. Records of Surplus Lines Licensee

(1) Each surplus lines licensee shall keep ~~in this state~~ a full and true record of each surplus lines insurance contract placed by or through the licensee, including a copy of the policy, certificate, cover note or other evidence of insurance showing each of the following items applicable:

- ~~(+a)~~ Amount of the insurance, risks and perils insured;

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- ~~(2b)~~ Brief description of the property insured and its location;
  - ~~(3c)~~ Gross premium charged;
  - ~~(4d)~~ Any return premium paid;
  - ~~(5e)~~ Rate of premium charged upon the several items of property;
  - ~~(6f)~~ Effective date and terms of the contract;
  - ~~(7g)~~ Name and address of the insured;
  - ~~(8h)~~ Name and address of the insurer;
  - ~~(9i)~~ Amount of tax and other sums to be collected from the insured;
  - ~~(10)~~ ~~Allocation of taxes by state as referred to in Subsection F of this section;~~ and
  - ~~(11j)~~ Identity of the producing broker, any confirming correspondence from the insurer or its representative, and the application.
- ~~(2)~~ The record of each contract shall be kept open at all reasonable times to examination by the commissioner without notice for a period not less than five (5) years following termination of the contract. In lieu of maintaining offices in this state, each nonresident surplus lines licensee shall make available to the commissioner any and all records that the commissioner deems necessary for examination.

**Drafting Note:** States may wish to extend the five-year period prescribed for open access to insurance records because of the long-term nature of this business.

SR. Reports—Summary of Exported Business

On or before the end of the month following each [insert month, quarter, year], each surplus lines licensee shall file with the commissioner, on forms prescribed by the commissioner, a verified report in duplicate of all surplus lines insurance transacted during the preceding period, showing:

- (1) Aggregate gross premiums written;
- (2) Aggregate return premiums;
- (3) Amount of aggregate tax remitted to this state; and
- (4) Amount of aggregate tax due or remitted to each other state for which an allocation is made pursuant to Subsection ~~GF~~ of this section.

**Drafting Note:** States desiring to have taxes remitted annually may call for more frequent detailed listing of business.

T. [OPTIONAL: Domestic Surplus Lines Insurers]

- ~~(1)~~ The commissioner may designate a domestic insurer as a domestic surplus lines insurer upon its application, which shall include, as a minimum, an authorizing resolution of the board of directors and evidence to the commissioner's satisfaction that the insurer has capital and surplus of not less than fifteen million dollars.
- ~~(2)~~ A domestic surplus lines insurer:
  - ~~(a)~~ ~~(a)~~ Shall be limited in its authority in this state to providing surplus lines insurance.

## Nonadmitted Insurance Model Act

~~(b) May be authorized to write any type of property and casualty [or accident and health] insurance in this state that may be placed with a surplus lines insurer pursuant to this Subpart.~~

~~(c) Be subject to the legal and regulatory requirements applicable to domestic insurers, except for theas following:~~

~~(i) Premium taxes, fees, and assessments applicable to admitted insurance;~~

~~(ii) Regulation of rates and formss requiring the filing of rates and forms for approval;~~

~~(iii) Assessment or coverage by insurance guaranty funds.]~~

**Section 6. Insurance Independently Procured—Duty to Report and Pay Tax**

- A. Each insured ~~whose home state is in~~ this state, who procures or continues or renews insurance with a nonadmitted insurer ~~on properties, risks or exposures located or to be performed in whole or in part in this state~~, other than insurance procured through a surplus lines licensee, shall, within [insert number] days after the date the insurance was so procured, continued or renewed, file a written report with the commissioner, upon forms prescribed by the commissioner, showing the name and address of the insured or insureds, name and address of the insurer, the subject of the insurance, a general description of the coverage, the amount of premium currently charged, and additional pertinent information reasonably requested by the commissioner. ~~For the purposes of this subsection, properties, risks or exposures only partially located or to be performed in this state, which are covered under a multistate policy placed by a surplus lines licensee in another state, shall be deemed to be insurance independently procured unless the insurer is an admitted insurer.~~

**Drafting Note:** Subsection A may need to be revised in those states exempting from taxation insurance procured by nonprofit educational institutions and their employers, from nonprofit educational insurers.

- B. ~~Gross~~ Premiums charged for the insurance, less any return premiums, is subject to a tax at the rate of [insert number] percent. At the time of filing the report required in Subsection A of this section, the insured ~~whose home state is this~~ state shall pay the tax ~~on all taxable p~~Premium to the commissioner, who shall transmit the same for distribution as provided in this Act.

**Drafting Note:** Existing state laws and procedures may require that the tax report be forwarded to another state agency, such as the Department of the Treasury, rather than to the commissioner. In addition, some states may require the tax to be paid on a periodic basis (e.g., annually) rather than at the time of the filing required by Subsection A. Subsections A and B may need to be revised in these states.

~~C. If an independently procured policy covers properties, risks or exposures only partially located or to be performed in this state, the tax payable shall be computed on the portion of the premium properly attributable to the properties, risks or exposures located or to be performed in this state, as set forth in Sections 5F(3) and 5F(4) of this Act.~~

~~C.D.~~ Delinquent taxes hereunder shall bear interest at the rate of [insert number] percent per year.

~~D.E.~~ This section does not abrogate or modify, and shall not be construed or deemed to abrogate or modify any other provision of this Act.

**Section 7. Penalties**

- A. A person who in this state represents or aids a nonadmitted insurer in violation of this Act may be found guilty of a criminal act and subject to a fine not in excess of \$[insert amount].

**Drafting Note:** Some states might want to specify “misdemeanor” or “felony” rather than “criminal act” in Section 7A.

- B. In addition to any other penalty provided herein or otherwise provided by law, including any suspension, revocation or refusal to renew a license, any person, firm, association or corporation violating any provision

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

of this Act shall be liable to a civil penalty not exceeding \$[insert amount] for the first offense, and not exceeding \$[insert amount] for each succeeding offense.

- C. The above penalties are not exclusive remedies. Penalties may also be assessed under [insert citation to trade practices and fraud statute] of the insurance code of this state.

## Section 8. Violations

Whenever there is evidence satisfactory to the commissioner ~~believes, from evidence satisfactory to him or her,~~ that a person is violating or about to violate the provisions of this Act, the commissioner may cause a complaint to be filed in the [insert appropriate court] Court for restitution and to enjoin and restrain the person from continuing the violation or engaging in or doing any act in furtherance thereof. The court shall have jurisdiction of the proceeding and shall have the power to make and enter an order of judgment awarding such preliminary or final injunctive relief and restitution as in its judgment is proper.

## Section 9. Service of Process

- A. Any act of transacting insurance by an unauthorized person or a nonadmitted insurer is equivalent to and shall constitute an irrevocable appointment by the unauthorized person or insurer, binding upon it, its executor or administrator, or successor in interest of the [insert title of appropriate state official] or his or her successor in office, to be the true and lawful attorney of the unauthorized person or insurer upon whom may be served all lawful process in any action, suit or proceeding in any court by the commissioner or by the state and upon whom may be served any notice, order, pleading or process in any proceeding before the commissioner and which arises out of transacting insurance in this state by the unauthorized person or insurer. Any act of transacting insurance in this state by a nonadmitted insurer shall signify its acceptance of its agreement that any lawful process in such court action, suit or proceeding and any notice, order, pleading or process in such administrative proceeding before the commissioner so served shall be of the same legal force and validity as personal service of process in this state upon the unauthorized person or insurer.
- B. Service of process in the action shall be made by delivering to and leaving with the [insert title of appropriate state official], or some person in apparent charge of the office, two (2) copies thereof and by payment to the [insert title of appropriate state official] of the fee prescribed by law. Service upon the [insert title of appropriate state official] as attorney shall be service upon the principal.

**Drafting Note:** Existing state laws and procedures may require that service of process be made upon either the commissioner or another state official.

- C. The [insert title of appropriate state official] shall forward by certified mail one of the copies of the process or notice, order, pleading or process in proceedings before the commissioner to the defendant in the court proceeding or to whom the notice, order, pleading or process in the administrative proceeding is addressed or directed at its last known principal place of business and shall keep a record of all process so served on the commissioner which shall show the day and hour of service. Service is sufficient, provided:
- (1) Notice of service and a copy of the court process or the notice, order, pleading or process in the administrative proceeding are sent within ten (10) days by certified mail by the plaintiff or the plaintiff's attorney in the court proceeding or by the commissioner in the administrative proceeding to the defendant in the court proceeding or to whom the notice, order, pleading or process in the administrative proceeding is addressed or directed at the last known principal place of business of the defendant in the court or administrative proceeding; and
  - (2) The defendant's receipt or receipts issued by the post office with which the letter is registered, showing the name of the sender of the letter and the name and address of the person or insurer to whom the letter is addressed, and an affidavit of the plaintiff or the plaintiff's attorney in a court proceeding or of the commissioner in an administrative proceeding, showing compliance are filed with the clerk of the court in which the action, suit or proceeding is pending or with the commissioner in administrative proceedings, on or before the date the defendant in the court or administrative proceeding is required to appear or respond, or within such further time as the court or commissioner may allow.

## Nonadmitted Insurance Model Act

- D. A plaintiff shall not be entitled to a judgment or a determination by default in any court or administrative proceeding in which court process or notice, order, pleading or process in proceedings before the commissioner is served under this section until the expiration of forty-five (45) days from the date of filing of the affidavit of compliance.
- E. Nothing in this section shall limit or affect the right to serve any process, notice, order or demand upon any person or insurer in any other manner now or hereafter permitted by law.
- F. Each nonadmitted insurer assuming insurance in this state, or relative to property, risks or exposures located or to be performed in this state, shall be deemed to have subjected itself to this Act.
- G. ~~Notwithstanding~~Notwithstanding conditions or stipulations in the policy or contract, a nonadmitted insurer may be sued upon any cause of action arising in this state, or relative to property, risks or exposures located or to be performed in this state, under any insurance contract made by it.
- H. ~~Notwithstanding~~Except with regard to exempt commercial purchasers, independently procured insurance, [aviation], and wet marine and transportation insurance, conditions or stipulations in the policy or contract ~~notwithstanding~~, a nonadmitted insurer subject to arbitration or other alternative dispute resolution mechanism ~~arising in this state or relative to property, risks or exposures located or to be performed in this state under an insurance contract made by it~~ shall conduct the arbitration or other alternative dispute resolution mechanism ~~in this state in the home state of the insured.~~

**Drafting Note:** Provisions of a state’s constitution, statutes, regulations, and public policy may necessitate amendment of the prior ~~sub~~Section 9H. States should consider adoption or modification of priorSection 9H in light of their own laws on arbitration or other alternative dispute resolution in insurance and commercial transactions. States should cross-reference their state insurance code to verify the inclusion of “Aviation” within this provision.

- I. A policy or contract issued by the nonadmitted insurer or one which is otherwise valid and contains a condition or provision not in compliance with the requirements of this Act is not thereby rendered invalid but shall be construed and applied in accordance with the conditions and provisions which would have applied had the policy or contract been issued or delivered in full compliance with this Act.

**Section 10. Legal or Administrative Procedures**

- A. Before any nonadmitted insurer files or causes to be filed any pleading in any court action, suit or proceeding or in any notice, order, pleading or process in an administrative proceeding before the commissioner instituted against the person or insurer, by services made as provided in this Act, the insurer shall either:
  - (1) Deposit with the clerk of the court in which the action, suit or proceeding is pending, or with the Commissioner of Insurance in administrative proceedings before the commissioner, cash or securities, or file with the clerk or commissioner a bond with good and sufficient sureties, to be approved by the clerk or commissioner in an amount to be fixed by the court or commissioner sufficient to secure the payment of any final judgment which may be rendered in the action or administrative proceeding; or
  - (2) Procure a certificate of authority to transact the business of insurance in this state. In considering the application of an insurer for a certificate of authority, for the purposes of this paragraph the commissioner need not assert the provisions of [insert sections of insurance laws relating to retaliation] against the insurer with respect to its application if the commissioner determines that the company would otherwise comply with the requirements for a certificate of authority.
- B. The Commissioner of Insurance, in any administrative proceeding in which service is made as provided in this Act, may in the commissioner’s discretion, order such postponement as may be necessary to afford the defendant reasonable opportunity to comply with the provisions of Subsection A of this section and to defend the action.
- C. Nothing in Subsection A of this section shall be construed to prevent a nonadmitted insurer from filing a motion to quash a writ or to set aside service thereof made in the manner provided in this Act, on the ground that the nonadmitted insurer has not done any of the acts enumerated in the pleadings.

NAIC Model Laws, Regulations, Guidelines and Other Resources—March 2023

- D. Nothing in Subsection A of this section shall apply to placements of insurance which were lawful in the home state of the insured in which the placement took place and which were not unlawful placements under the laws of this state. Without limiting the generality of the foregoing, nothing in Subsection A shall apply to a placement made pursuant to Section 5 of this Act.

## Section 11. Enforcement

- ~~A. The commissioner shall have the authority to proceed in the courts of this state or any other United States jurisdiction to enforce an order or decision in any court proceeding or in any administrative proceeding before the commissioner of Insurance.~~

### ~~A. Filing and Status of Foreign Decrees~~

~~A copy of a foreign decree authenticated in accordance with the statutes of this state may be filed in the office of the clerk of any [insert proper court] Court of this state. The clerk, upon verifying with the commissioner that the decree or order qualifies as a “foreign decree” shall treat the foreign decree in the same manner as a decree of a [insert proper court] Court of this state. A foreign decree so filed has the same effect and shall be deemed a decree of a [insert proper court] Court of this state, and is subject to the same procedures, defenses and proceedings for reopening, vacating or staying as a decree of a [insert proper court] Court of this state and may be enforced or satisfied in like manner.~~

### ~~B. Notice of Filing~~

- ~~(1) At the time of the filing of the foreign decree, the plaintiff shall make and file with the clerk of the court an affidavit setting forth the name and last known post office address of the defendant.~~
- ~~(2) Promptly upon the filing of the foreign decree and the affidavit, the clerk shall mail notice of the filing of the foreign decree to the defendant at the address given and to the commissioner of this state and shall make a note of the mailing in the docket. In addition, the plaintiff may mail a notice of the filing of the foreign decree to the defendant and to the commissioner of this state and may file proof of mailing with the clerk. Lack of mailing notice of filing by the clerk shall not affect the enforcement proceedings if proof of mailing by the plaintiff has been filed.~~
- ~~(3) No execution or other process for enforcement of a foreign decree filed hereunder shall issue until thirty (30) days after the date the decree is filed.~~

**Drafting Note:** This section presumes that the commissioner has authority to proceed without the cooperation of the state’s attorney general. Governing state laws might require that a person other than the commissioner or the attorney general serve as the plaintiff. The title of that person shall be substituted for “commissioner” or “plaintiff” in Section 11 whenever required by state law.

### ~~C. Stay of the Foreign Decree~~

- ~~(1) If the defendant shows the [insert proper court] Court that an appeal from the foreign decree is pending or will be taken, or that a stay of execution has been granted, the court shall stay enforcement of the foreign decree until the appeal is concluded, the time for appeal expires, or the stay of execution expires or is vacated, upon proof that the defendant has furnished the security for the satisfaction of the decree required by the state in which it was rendered.~~
- ~~(2) If the defendant shows the [insert proper court] Court any ground upon which enforcement of a decree of any [insert proper court] Court of this state would be stayed, the court shall stay enforcement of the foreign decree for an appropriate period, upon requiring the same security for satisfaction of the decree which is required in this state.~~

- ~~B. D.~~ It shall be the policy of this state that the insurance commissioner shall cooperate with regulatory officials in other United States jurisdictions to the greatest degree reasonably practicable in enforcing lawfully issued orders of such other officials subject to public policy and the insurance laws of the state. Without limiting the generality of the foregoing, the commissioner may enforce an order lawfully issued by other officials provided the order does not violate the laws or public policy of this state.

## Nonadmitted Insurance Model Act

**Section 12. Suits by Nonadmitted Insurers**

A nonadmitted insurer may not commence or maintain an action ~~in~~ at law or in equity, including arbitration or any other dispute resolution mechanism, in this state to enforce any right arising out of any insurance transaction except with respect to:

- A. Claims under policies lawfully ~~placed pursuant to the law of the home state of the insured~~ written in this state;
- B. Liquidation of assets and liabilities of the insurer (other than collection of new premium), resulting from its former authorized operations in this state;
- C. Transactions subsequent to issuance of a policy not covering domestic risks at the time of issuance, and lawfully procured under the laws of the jurisdiction where the transaction took place;
- D. Surplus lines insurance placed by a licensee under authority of Section 5 of this Act;
- E. Reinsurance placed under the authority of [insert citations of state’s reinsurance intermediary act and other reinsurance laws];
- F. The continuation and servicing of life insurance, health insurance policies or annuity contracts remaining in force as to residents of this state where the formerly authorized insurer has withdrawn from the state and is not transacting new insurance in the state;
- G. Servicing of policies written by an admitted insurer in a state to which the insured has moved but in which the company does not have a certificate of authority until the term expires;
- H. Claims under policies covering wet marine and transportation insurance;
- I. Placements of insurance which were lawful in the jurisdiction in which the transaction took place and which were not unlawful placements under the laws of this state.

**Drafting Note:** Provisions of a state’s constitution, statutes, regulations, and public policy may necessitate amendment of the opening paragraph of this section.

**Section 13. ~~Separability~~ Severability Clause of Provisions**

If any provisions of this Act, or the application of the provision to any person or circumstance, shall be held invalid, the remainder of the Act and the application of the provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

**Section 14. Effective Date**

This Act shall take effect [insert appropriate date].

**PROJECT HISTORY*****NONADMITTED INSURANCE MODEL ACT (#870)*****1. Description of the Project, Issues Addressed, etc.**

The 2023 revisions to the NAIC *Nonadmitted Insurance Model Act (#870)* are intended to conform Model #870 to the federal Nonadmitted and Reinsurance Reform Act of 2010 (NRRRA), which was part of the federal Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). The current Model #870 was adopted in 1994 to combine three NAIC models that date as far back as 1969: 1) the Unauthorized Insurers Model Act; 2) the Model Surplus Lines Law; and 3) the Model Nonadmitted Insurance Act. Since the adoption of Model #870 on Sept. 18, 1994, the NAIC has amended it on the following dates: 1) Dec. 16, 1996; 2) March 18, 1998; 3) Dec. 6, 1999; and 4) Sept. 10, 2002. The 2002 modifications resulted from the passage of the federal Gramm-Leach-Bliley Act (GLBA) by the U.S. Congress (Congress). Currently, 31 states have adopted Model #870.

The most recent activity regarding Model #870 is related to the NRRRA. Model #870 was not modified as a result of the implementation of the NRRRA. On Oct. 11, 2011, the *Nonadmitted Insurance Reform Sample Bulletin* (Bulletin), which was distributed to the state insurance departments, was adopted by the Executive (EX) Committee and Plenary. The Bulletin outlined federally mandated regulatory changes that affect the placement of nonadmitted insurance. Specifically, the Bulletin addressed the scope of the NRRRA, the application of “Home State” for the purposes of jurisdictional authority and paying premium tax, licensure requirements for brokers, diligent search requirements, and eligibility requirements for nonadmitted insurers.

During the implementation of the NRRRA, the Surplus Lines (C) Task Force and NAIC staff were working on state tax allocation proposals. The leading proposals were the Surplus Lines Insurance Multistate Compliance Compact (SLIMPACT), which pre-dated the NRRRA, and the Nonadmitted Insurance Multistate Agreement (NIMA), which was developed by the Task Force in response to the NRRRA. The SLIMPACT failed to obtain the 10 states needed to become operative. The NIMA clearinghouse operated for only a few years before the NIMA was dissolved in 2016. With the focus on achieving a system of tax allocation before the NRRRA deadline in July 2012, the decision was made to draft the Bulletin rather than amend Model #870.

During the 2020 Summer National Meeting of the Task Force, the chair directed staff to develop a drafting group to produce a summary document that outlined significant updates needed to modernize Model #870 and present a recommendation to the Task Force at a future national meeting. The drafting group consisted of Tom Travis (LA), Jeff Baughman (WA), Eli Snowbarger (OK), Andy Daleo (NAIC), and Dan Schelp (NAIC). The drafting group met Sept. 30 and Oct. 27, 2020. As a result of those meetings, the drafting group outlined numerous proposed revisions to Model #870.

During the 2020 Fall National Meeting, the Task Force adopted the Request for NAIC Model Law Development. During the 2021 Spring National Meeting, the Executive (EX) Committee approved the Request for NAIC Model Law Development.

**2. Name of Group Responsible for Drafting the Model and States Participating**

The Surplus Lines (C) Task Force and the drafting group consisting of Louisiana, Chair; Colorado; Illinois; Texas; and Washington.

**Nonadmitted Insurance Model Act (#870)**Project History

---

**3. Project Authorized by What Charge and Date First Given to the Group**

The charges of the Surplus Lines (C) Task Force state, “Develop or amend relevant NAIC model laws, regulations, and/or guidelines.” Also, as described in charge #1, the Request for NAIC Model Law Development was approved by the Executive (EX) Committee during the 2021 Spring National Meeting.

**4. A General Description of the Drafting Process (e.g., drafted by a subgroup, interested parties, the full group, etc). Include any parties outside the members that participated**

During the 2021 Summer National Meeting, the Surplus Lines (C) Task Force formally developed the Model #870 Drafting Group that consisted of Travis, chair; Rolf Kaumann (CO); Marcy Savage (IL); Jamie Walker (TX); and Jeff Baughman (WA). The Drafting Group began its work on Model #870 on Aug. 19, 2021. During that call the Drafting Group discussed the overall approach to updating the model, initial comments received, and a timeline.

**5. A General Description of the Due Process (e.g., exposure periods; public hearings; or any other means by which widespread input from industry, consumers, and legislators was solicited)**

The Drafting Group met Aug. 19, 2021, for a regulator-only planning session. Following the initial meeting, the Drafting Group met in open session Sept. 28, Oct. 20, Nov. 4, and Dec. 1, 2021. During these sessions, interested state insurance regulators and parties submitted comment letters to the Drafting Group. The Drafting Group held regulator-only discussion and planning calls on Jan. 10, March 15, and May 3, 2022. During a Surplus Lines (C) Task Force call on May 23, 2022, Model #870 was exposed for a 60-day public comment period. Comments were received from the American Property Casualty Insurance Association (APCIA), CRC Group: Wholesale and Specialty Insurance; Lloyd’s of London; McDermott Will & Emery; the National Risk Retention Association (NRRRA); Surplus Line Association of Illinois (SLAI); the Council of Insurance Agents & Brokers (CIAB); and the Wholesale & Specialty Insurance Association (WSIA). The Drafting Group held a regulator-only discussion and planning call on Aug. 3, 2022 and the Task Force held a call on Oct. 17 to discuss the comments received and on Oct. 27, 2022 it exposed Model #870 for a 30-day public comment period. Comments were received from the Maine Bureau of Insurance; the APCIA; Lloyd’s of London; and the WSIA. During the Fall National Meeting, the Task Force heard a summary of the comments received. The Drafting Group held a regulator-only discussion and planning call on Jan. 18, 2023 to discuss comments received and on Jan. 23 exposed a new draft of Model #870 for a 14-day public comment period. Comments were received from the California Department of Insurance; the APCIA; the CIAB; Lloyd’s of London; McDermott Will & Emery; and the WSIA. On Feb. 10 the drafting group held a regulatory-only discussion and planning call and integrated edits into Model #870.

**6. A Discussion of the Significant Issues (e.g., items of some controversy raised during the due process and the group’s response)**

The most significant issue raised was related to the methodology of determining the “Home State” for unaffiliated groups as outlined within Section 2 of the model. Following comments from various interested parties and discussion among Drafting Group members, an agreed-upon revision resulted in clarification via a drafting note.

**7. List the Key Provisions of the Model (e.g., sections considered most essential to state adoption)**

Section 5C(2)(b) – Non-U.S. Insurers

**Nonadmitted Insurance Model Act (#870)**Project History

---

- For a Nonadmitted Insurer domiciled outside the U.S., the insurer shall be listed on the *Quarterly Listing of Alien Insurers* maintained by the International Insurers Department (IID) of the NAIC.

## Section 5G – Surplus Lines Tax

- In addition to the full amount of gross Premium charged by the insurer for the insurance, every Person licensed pursuant to Section 5J of this Act shall collect and pay to the commissioner a sum equal to [insert number] percent of the gross Premium charged, less any return Premium, for Surplus Lines Insurance provided by the licensee pursuant to the license. Where the insurance covers properties, risks or exposures located or to be performed both in and out of this state, the sum payable shall be paid entirely to the Home State of the insured. The tax on any portion of the Premium unearned at the termination of insurance having been credited by the state to the licensee shall be returned to the policyholder directly by the Surplus Lines Licensee or through the producing broker, if any. The Surplus Lines Licensee is prohibited from rebating, for any reason, any part of the tax.

## Section 5T – Domestic Surplus Lines Insurer

- The commissioner may designate a domestic insurer as a domestic Surplus Lines Insurer upon its application, which shall include, as a minimum, an authorizing resolution of the board of directors and evidence to the commissioner's satisfaction that the insurer has capital and surplus of not less than \$15 million. (Although this was added to the model as optional, it remains an important part of the model.)

**8. Any Other Important Information (e.g., amending an accreditation standard)**

There were no discussions held regarding making Model #870 an accreditation standard.

**TITLE INSURANCE (C) TASK FORCE**

Title Insurance (C) Task Force March 23, 2023, Minutes ..... 7-189

Draft: 3/28/23

Title Insurance (C) Task Force  
Louisville, Kentucky  
March 23, 2023

The Title Insurance (C) Task Force met in Louisville, KY, March 23, 2023. The following Task Force members participated: Eric Dunning, Chair, and Connie Van Slyke (NE); Kevin Gaffney, Vice Chair, and Emily Brown (VT); Mark Fowler represented by Jimmy Gunn (AL); Michael Yaworsky represented by Anoush Brangaccio (FL); Doug Ommen represented by Travis Grassel (IA); Vicki Schmidt represented by Monica Richmeier (KS); James J. Donelon represented by Chuck Meyers (LA); Kathleen A. Birrane represented by Mary Kwei (MD); Grace Arnold represented by Paul Hanson (MN); Troy Downing represented by Bob Biskupiak (MT); Mike Causey represented by Tracy Biehn, Timothy Johnson, and Angela Hatchell (NC); Judith L. French represented by Maureen Motter (OH); Glen Mulready represented by Erin Wainner (OK); Michael Humphreys represented by Michael McKenney (PA); Elizabeth Kelleher Dwyer represented by Patrick Smock (RI); Michael Wise represented by Melissa Manning (SC); and Larry D. Deiter represented by Tony Dorschner (SD). Also participating was Michael Conway represented by Peg Brown (CO) and Amy Beard represented by Pat O'Connor (IN).

1. Adopted its 2022 Fall National Meeting Minutes

Commissioner Gaffney made a motion, seconded by Hatchell, to adopt the Task Force's Dec. 14, 2022, minutes (see *NAIC Proceedings – Fall 2022, Title Insurance (C) Task Force*). The motion passed unanimously.

2. Discussed its Charge to Open Model #628

Director Dunning stated that the Task Force is charged to review the *Title Insurers Model Act (#628)*, Section 15C to determine if a request should be made to remove the requirement for the on-site review of underwriting and claims practices. As the pandemic demonstrated, on-site reviews are not always practical. However, based on research done by NAIC legal staff, only eight states adopted the model. Only three of these states still require on-site review. An additional two states require on-site review, but they did not adopt the NAIC model. As a result of the low adoption, Model #628 will be put on the list of models to be reviewed for the Model Law Review Initiative this year. The initiative deals with retention/archiving models, but the full process for this has not yet been finalized. Given this new information, he recommended that the Task Force postpone reviewing Model #628 pending the outcome of its review under the Model Law Review Initiative.

Commissioner Gaffney stated that he supports postponing the review of Model #628. Director Dunning stated that given that there were no objections, the Task Force has a consensus to postpone reviewing Model #628 pending the outcome of its review under the Model Law Review Initiative.

3. Heard an Update on Requested Information from Voxtur

Director Dunning stated that Stacy Mestayer (Voxtur) presented to the Task Force during the 2022 Fall National Meeting on Voxtur's attorney opinion letter (AOL). Following her presentation, the Task Force requested that Voxtur share information on: 1) its operations; 2) whether it has a prominent notice that it does not participate in the guarantee fund in states where applicable; 3) how its carriers are reserving; 4) what due diligence was performed to try and obtain admitted coverage before going to the nonadmitted market; 5) its standard letters and policy; 6) the release of its white paper addressing conflicting characterizations of the Voxtur AOL; and 7) a comparison of the Voxtur AOL and title insurance.

On March 14, Commissioner Gaffney, Director Dunning, and NAIC staff met on a background call with Mestayer to discuss the requested items. Mestayer stated that Voxtur relied on its insurance broker for coverage, and it is working on connecting the Task Force with the broker and carriers for direct communications on insurance questions. She is discussing with Voxtur leadership if there are methods of sharing the other requested information that they are comfortable with, as they have confidentiality concerns.

4. Heard a Presentation on UWM’s Alternative to the Traditional Lender Title Process and the FNMA’s Pilot Program on Title Insurance Requirements

Steve Gottheim (American Land Title Association—ALTA) said the new alternatives to title insurance on the market are meant to provide more affordable options to homeowners. However, ALTA worries that the lack of transparency on these products is confusing homeowners’ understanding of what they will be protected on. On April 6, 2022, the Federal National Mortgage Association (FNMA) updated its selling guidance on AOLs to permit lenders to obtain either a lender’s title insurance policy or, in limited circumstances, an attorney title opinion letter. Shortly thereafter, Voxtur announced that it would be selling an AOL on FNMA loans. In June 2022, the FNMA and the Federal Home Loan Mortgage Corporation (FHLMC) issued their government-sponsored enterprise (GSE) equitable housing finance plans. These plans were requested of them to help support low- and moderate-income homeownership, especially for minorities. In October 2022, United Wholesale Mortgage (UWM), the largest U.S. mortgage finance company, announced that it would be entering the space through its title review and closing (TRAC) product. While Voxtur’s AOL purports to offer owners’ coverage, the UWM only offers lenders coverage. In February 2023, there was an article in Politico stating that the FNMA is rumored to be looking at forgoing title insurance. It would serve as a default insurer by waiving the title insurance requirement from lenders and reserving funds for claims related to title matters.

ALTA proposes the following questions to guide the Task Force in its discussions on these topics: 1) how these products are marketed to consumers; 2) what type of title search and curative work is done with these alternatives; 3) what the differences are in coverage and who takes on the additional risk; 4) whether owners’ coverage is provided and how it compares to title insurance; 5) whether there is a duty of defense; 6) whether these products are being sold in the market; 7) how these products are licensed; 8) whether their coverage and forms are filed publicly; 9) what level of reserves for future loss the insurer holds; and 10) how these reserves are actuarially determined.

The actual underwriting that goes into these products is critical. About 70% of the cost of title insurance comes from underwriting costs (e.g., search, examination, and curative efforts to ensure a clean record). The potential for an increase in title consumer complaints from insufficient underwriting should be examined. Duty to defense is also critical, as most consumers view title insurance as litigation insurance. Model #628 defines the business of title insurance as “guarantying, warranting, or insuring searches or examinations of title to real property or any interest in real property; or guaranteeing or warranting the status of title as to ownership of or liens on real property and personal property by any person other than the principals to the transaction; or doing or proposing to do any business substantially equivalent to any of the activities listed in this subsection in a manner designed to evade the provisions of this Act.”

This is not the first time alternative lighter search products have entered the market stating that they are not title insurance and therefore do not need to be regulated as such. Norwest Mortgage, now Wells Fargo Home Mortgage, offered a similar product to the alternatives entering the market now. In *Norwest Corp. v. State, Dept. of Ins.*, 253 Neb. 574, 571 N.W.2d 628 (1997) and *State, Division of Insurance v. Norwest Corp.*, 1998 S.D. 61, 581 N.W.2d 158, the Court found an alternative product involving a title search and representation that the loan that was in first lien position was title insurance because representation involved a transfer of risk.

The UWM partners with brokers rather than having its own mortgage originators. TRAC products provide lenders' with coverage only, and in-house attorneys write the opinions, creating a question on moral hazard. The purchase price is based on a certain basis point of the loan amount as is owed from the broker to the UWM. This purchase price is not necessarily the price charged from the brokerage company to the consumer. TRAC products are available in Arizona; California; Colorado; Connecticut; Delaware; Florida; Georgia; Illinois; Massachusetts; Michigan; Nevada; New Hampshire; New Jersey; New York; Ohio; Pennsylvania; Rhode Island; Texas; Utah; Virginia; Washington; and Washington, DC.

Per frequently asked questions (FAQ) issued to mortgage brokers, the UWM will take on the risk of title defects and issue an AOL. The FNMA is believed to be the sole secondary market purchaser for these products. Despite these products being designed for cost effectiveness, ALTA believes they are more expensive than title insurance in most circumstances. This is particularly true because of the number of states where it is customary for sellers to pay for an owner's policy. There is usually a discount when the loan and owner's policy are purchased together because the underwriting work overlaps. The UWM requires settlement agents to sign a closing indemnification letter, which is a rearranged version of a standard ALTA closing protection letter (CPL). ALTA has concerns about another set of closing letters that only place the agent at risk, instead of an insurer.

ALTA has been engaging directly with the FNMA and the FHLMC to help support the mission of more affordable homeownership. There has been some success with ALTA members offering newer or discounted products to help meet the need for lower closing costs. These include first-time homebuyer discounts, community reinvestment rates, special purpose credit programs, and partnering with state housing agencies.

Commissioner Gaffney asked for more information on the first-time homebuyer discounts and whether there are any regulatory barriers. He also asked what percentage of purchasers purchase an owner's policy versus a lender's policy. Gottheim stated these are rates title companies have filed in a handful of states to offer discounted rates to first-time homebuyers. Occasionally, states will have laws that state that rates cannot be discriminatory, excessive, or unfair, which make it difficult to get a lower rate for first-time homeowners approved. Due to FNMA and FHLMC guidelines, 99% of homebuyers purchase a lender's policy. ALTA national member data indicates that about 75% of homebuyers purchase an owner's policy. The uptake rate for owner's policies is consistent between low-, middle-, and upper-income homebuyers. Commissioner Gaffney stated that he would be interested in seeing ALTA's national data on take-up rates.

McKenney stated that he is concerned that if these alternative products do not include the same extensive search and curative work as occurs with title insurers, there would be an increase in unclean titles that would then increase the price of title insurance.

Gottheim stated that ALTA believes the curative work done with the alternative products is not as detailed. ALTA is concerned that if more loans are going through these processes, there will be less of an incentive to fix a legal description issue or an issue with the satisfaction of the loan from two owners that never got recorded. If there is a large enough uptake in these alternative products, title insurers may have to pick up an additional expense item, stemming from the lack of diligence done with the alternative products.

Hanson stated that the \$370,000 mortgage amount used in the example to illustrate the UWM's pricing seems excessive for a product meant to save lower-income buyers money. Gottheim stated that the \$370,000 mortgage pricing example came from the UWM's marketing. The national sales price of a home is \$375,000. ALTA is concerned that these programs are set up to help cherry-pick higher income products. There is a rumor that the FNMA will be taking on title insurance risks only for homes with a 20% down payment. The median down payment for a first-time homebuyer is 7%.

Birny Birnbaum (Center for Economic Justice—CEJ) stated that the cost of title insurance is significant for first-time homebuyers, and while required to purchase it, they have little understanding of it. His daughter purchased a home in Texas for \$225,000, and she was asked to pay several thousands of dollars for title insurance. In Texas, title insurance includes the search, underwriting, and portions of the closing. The title agent also wanted an additional \$700 for title and escrow. Eventually, the \$700 was removed, as the title insurance policy was supposed to include it. However, most consumers would not have known that they could negotiate its removal. The automated underwriting process includes pulling information from a database, running it through an algorithm, and developing a score that indicates whether the policy is issued automatically. This is a similar process to getting a credit score for a loan. However, a credit score is \$25, and a title insurance policy is \$2,500. Mortgage lenders set up affiliated title agencies or title insurers to monetize access to the consumer. Title insurance is ripe for innovation, disruption, and consumer protection. Iowa guarantees titles, but it does not allow title insurance. A title insurance policy does not guarantee a title; it provides a marketable title.

Gottheim stated that those offering alternative products are asserting that they are not subject to state regulation, despite offering similar products to title insurers. This should concern state insurance regulators. Automated title insurance engines are in their infancy and used in refinancing. Otherwise, the underwriting process is still a very paper and labor-intensive process.

Birnbaum stated that the FNMA's *Barriers to Entry: Closing Costs for First-Time and Low-Income Homebuyers* report was issued Dec. 2, 2021. The report found that closing costs are a meaningful obstacle to sustainable homeownership for first-time and low-income first-time homebuyers, including Black and Hispanic borrowers. Within the low-income first-time homebuyers in the study, 21% of African American and 19% of Hispanic buyers paid closing costs equal to or greater than their down payment. Title insurance is an expensive proposition for first-time homebuyers.

5. Discussed if Additional Questions Should be Added to the Survey of State Laws Before it is Distributed for Update

Director Dunning stated that the Task Force is charged to administer the *Survey of State Insurance Laws Regarding Title Data and Title Matters* (Survey of State Laws) this year. It was last administered in 2018 and published in 2019. Task Force members were asked to email NAIC staff with any questions they believed should be added to the Survey of State Laws. Additional questions proposed were submitted by Louisiana and Rhode Island, and they are included in the materials. Under the Data Reporting section, Rhode Island proposed adding, "If the number of policies issued is collected, is the number separated by standard title policies and enhanced title policies?" after question 9. Under the Policy Rate and Form Regulation section, Rhode Island proposed adding, "Does the department set requirements for standard title policies? For enhanced title policies?" after question 12. Under the Procedural Regulation section, Louisiana proposed adding two questions: 1) "Is there a statutory requirement for an attorney opinion letter concerning the title examination for the issuance of a title insurance policy?"; and 2) "Is there a statutory standard for the information contained in: a title examination? A title opinion letter?" Under the Insurer-Agent Relationship section, Rhode Island proposed adding, "What are the requirements for title insurers to confirm/verify valid license status of title agents? How often is confirmation/ verification completed?" after question 47. Rhode Island also proposed adding a new category for Title Opinion Letters, with the following questions: "1) Does the state department regulate title opinion letters?"; 2) "Does the state department regulate the pricing of title opinion letters?"; 3) "Does the state license the entity that generates the title opinion letters?"; 4) "What license is required?"; and 5) "Are title opinion letter forms and rates filed with the state department?"

Smock stated that he is supportive of all the questions, and he particularly liked the ones suggested by Louisiana. Birnbaum stated that the CEJ appreciates the proposed questions, and he has no further questions to propose.

Commissioner Gaffney made a motion, seconded by McKenney, to add the proposed questions to the Survey of State Laws. The motion passed unanimously.

Having no further business, the Title Insurance (C) Task Force adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/C CMTE/2022/TITLE/03-TitleTF.docx

**WORKERS' COMPENSATION (C) TASK FORCE**

Workers' Compensation (C) Task Force March 6, 2023, Minutes..... 7-195

Draft: 3/15/23

Workers' Compensation (C) Task Force  
Virtual Meeting (*in lieu of meeting at the 2023 Spring National Meeting*)  
March 6, 2023

The Workers' Compensation (C) Task Force met March 6, 2023. The following Task Force members participated: Alan McClain, Chair (AR); John F. King, Vice Chair, and Steve Manders (GA); Mark Fowler represented by Jimmy Gunn, Yada Horace, and Erick Wright (AL); Lori K. Wing-Heier represented by Alex Reno (AK); Ricardo Lara represented by Yvonne Hauscarriague, Giovanni Muzzarelli, Mitra Sanandajifar, and Sarah Ye (CA); Andrew N. Mais represented by George Bradner, Wanchin Chou, and Bridget Lamagdelaine (CT); Karima M. Woods represented by David Christhilf (DC); Gordon I. Ito represented by Randy Jacobson, Kathleen Nakasone, and Roland Teruya (HI); Doug Ommen represented by Mathew Cunningham (IA); Dean L. Cameron represented by Randy Pipal (ID); Vicki Schmidt represented by Chris Hollenbeck, Julie Holmes, Sara Hurtado, and Cassandra McCall (KS); Sharon P. Clark represented by Sue Hicks (KY); James J. Donelon represented by Tom Travis (LA); Gary D. Anderson represented by Bashiru Abubakare, Caleb Huntington, and Matthew Mancini (MA); Timothy N. Schott, Brock Bubar, Sandra Darby, and Robert Wake (ME); Grace Arnold represented by Sandra Anderson, Tammy Lohmann, and Phil Vigliaturo (MN); Chlora Lindley-Myers represented by Jo LeDuc (MO); Mike Causey represented by Tracy Biehn and Fred Fuller (NC); Marlene Caride represented by Carl Sornson (NJ); Scott Kipper represented by Gennady Stolyarov (NV); Glen Mulready, Kim Hunter and Cuc Nguyen (OK); Andrew R. Stolfi represented by Alex Cheng and TK Keen (OR); Michael Humphreys, Mark Lersch, Lu Xiaofeng (PA); Shannon Kost, Michael McKenney, Dennis Sloand, and Eric Zhou (PA); Elizabeth Kelleher Dwyer represented by Beth Vollucci (RI); Larry D. Deiter and Tony Dorschner (SD); Kevin Gaffney, Rosemary Raszka, and Mary Richter (VT); and Allan L. McVey represented by Juanita Wimmer (WV). Also participating were: Kaylee Baumstark and Tom Zuppan (AZ); Lucretia Prince, Frank Pyle, and Jeffry Schott (DE); Patrick O'Connor (IN); Chris Arth, Paige Dickerson, Robyn Lowes, Tina Nancy, and Mandi Whinnie (MI); Bob Biskupiak (MT); Christian Citarella (NH); Anna Krylova (NM); Jessica Thomas (TN); Marianne Baker and Nicole Elliott (TX); Tracy Klausmeier (UT); and Rebecca Nichols (VA).

1. Adopted its 2022 Fall National Meeting Minutes

Sanandajifar said she had a couple of corrections to the Fall National Meeting minutes. The first item was to replace the word "depended" with "dependent" on page 2 in the third paragraph. The second item was to replace "combined ratio" with "premium" on page 2 in the last paragraph.

Commissioner King made a motion, seconded by Keen, to adopt the Task Force's Nov. 15, 2022, minutes as amended (*see NAIC Proceedings – Fall 2022, Workers' Compensation (C) Task Force*). The motion passed unanimously.

2. Heard a Presentation from the IAIABC on Telework and how it is Affecting Workers' Compensation

Heather Lore (International Association of Industrial Accident Boards and Commissions—IAIABC) said she reached out to several state workers' compensation administrators to ask how their jurisdictions are tracking teleworking injuries. She asked about injury frequencies, severity, premium, class codes, etc. Lore said of all those she talked to, no one is tracking information regarding workers' compensation injuries experienced by teleworkers, making it challenging to understand the impact of telework on workers' compensation.

Lore said telework will continue. She said McKinsey & Company's study this spring estimated that 35% of job holders in the U.S. were offered the option to work from home full-time, and 58% of these workers can work from home at least part-time. Prior to the pandemic, approximately 6% of workers were able to work from home on a full-time basis.

Lore said the IAABC has been teleworking on a full-time basis since March 2020 and does not plan to return to the office. She said prior to this time, all but one of the IAABC staff worked full-time in the office. Lore asked the state insurance regulators on the call to share whether they allow telework and who determines the ability to telework.

O'Connor said the state of Indiana allows telework two days a week.

Gaffney said the state of Vermont had a well-established telework policy prior to the pandemic. He said in the past, it was mainly financial examiners who took advantage of teleworking, but others were also able to telework. The governor leaves the telework decision to the department heads to determine the level of telework. Gaffney said jobs might require more in-office and manual processes, so it is not a one size fits all solution. He said he leaves it up to each division to determine the telework processes, so it varies by team. Gaffney believes the implementation of telework has allowed the department to attract talent they would not otherwise have been able to attract. He said some needs still occur in the office, such as cross-training staff, skills training, and meeting with industry and other interested parties. Gaffney believes there are hazards that come with remote work that will need to be tracked as well.

King said he has broad authority regarding work schedules. He believes it is not a one size fits all solution, and each of the activities in the agencies requires tailoring and assessments. King said in the instance of brand-new employees, they need to start in the office to understand the culture and be trained. He said Georgia has a mechanism in place to track the performance of teleworkers.

The following states responded in the WebEx chat box:

- The Iowa Department of Insurance (DOI) allows teleworking for all employees, which was the commissioner's decision based on what the governor has allowed for state employees.
- The Kansas DOI allows two remote workdays per week as approved by the division directors.
- The Kentucky DOI allows two days per week to telework, and the governor dictates the policy.
- The Missouri DOI allows limited remote work on a part-time basis for no more than two days per week.
- The Nevada DOI allows remote work for unclassified employees but not for classified employees. The new governor, Joe Lombardo, recently issued an order for state offices to return to "pre-pandemic working conditions" by July 1, 2023, but it is not certain whether this will alter the current arrangement in which classified employees need to work from the office, while unclassified employees have more flexibility.
- The Pennsylvania DOI allows telework two days a week for management and leadership, while the civil service and union are allowed to continue full-time telework.
- The South Dakota DOI has a few telework options, and division directors weigh each situation case by case.
- The Virginia DOI allows teleworking up to three days per week, and its agency decides the teleworking policy.
- The West Virginia Offices of the Insurance Commissioner (OIC) do not allow telework. The governor left these decisions to each cabinet secretary, and they have determined that no remote or hybrid options will apply to the OIC.

Lore said it is difficult to discuss the frequency of workers' compensation claims that occur while an employee is teleworking because jurisdictions are not actually tracking those employees who are teleworkers. She said none of the states she reached out to had plans to add new class codes. However, California did add a new class code for clerical teleworking employees in 2021. Lore said she was going to try and see what data California has available regarding this new class code.

Lore said loss costs were generally higher for jobs that are unable to telecommute, such as retail, construction, transportation, and manufacturing. These jobs have higher claims frequency in general than telecommuting-optional clerical jobs. Lore said the hazards are likely not a lot different when an employee is working in the office or when they are working from home. In an office, employees might be getting up more from their desks to go to a conference room for a meeting, or getting up to talk to a colleague, but functionally the work itself is really the same.

Lore said several states mentioned they have concerns about the psychological issues of telecommuting employees, and while it is not something that is showing up in the data yet, it may be a lagging issue. She said we might see more psychological issues arise as people might be feeling more disconnected from the workplace, which may cause anxiety and depression to set in, particularly for people who are working full-time from home and do not have the same connections to their colleagues that they did when they were working in the office. Lore said most jurisdictions do not allow for mental-only claims, but it is possible we will start to see an increase in disputes regarding these types of injuries.

Lore asked if any of the states were seeing any frequency or severity trends they could report on for workers' compensation or anything in states regarding premiums being affected. She asked if, anecdotally, states had seen any psychological impacts on their teleworking employees.

Stolyarov said in Nevada, they have seen a significant decrease in the loss costs for workers' compensation since the beginning of the pandemic. He said he believes the shift to telework for many occupations has contributed to this decrease. Stolyarov said it is not a matter of work being different, but it could be a matter of the workplace setting being different. He said, understandably, there are some hazards at home as well as in the office, but from an intuitive standpoint there are less hazards because the worker has more control over the environment. He said someone in an office could put a cord somewhere in the hallway that creates a tripping hazard, whereas that likely would not happen in someone's own home.

Lore said a couple of employees in her office did not have an office in their home, and therefore their ethernet port was on the opposite side of the home from their desk. She asked how we encourage employees to set up their home offices safely. Lore said while an employee does not have to set up an office per se, their workspace needs to be safe.

McKenney said he was hoping to discuss this topic in a meeting because the data is many years behind in workers' compensation. He said Pennsylvania just got the most recent loss cost filing from their independent bureau, and it takes effect on April 1, 2023. McKenney said the most recent year in the experience was the policy year 2020, so he does not know what is happening and does not like the idea that he must wait for the results to come through the data.

McKenney said a lot of workers' compensation is returned to work, as you are paying an injured person's salary while they are not working, and it may be easier for a person to return to work if they are working from home. He said he is concerned that we are not getting, and taking account of, any of the positive impacts we are gaining from telework.

Lore said workers' compensation data is slower to get, and therefore, it is a challenge that the data is not available.

Lore asked the various states what insurers require when writing a workers' compensation policy. She asked if agencies require their employees to have a desk that is at a proper height, etc. Lore said she knows that one jurisdiction does conduct home office visits in which a safety coordinator goes to the teleworker's home to make sure they have a safe and ergonomic workspace. She said that while this is not practical for all employers, some are having their employees send in pictures of their home workspace to make needed suggestions.

Lore said items to take into consideration regarding injuries at home include:

1. Is going to the kitchen to get lunch considered to be in the course of work?
2. Does the lack of witnesses to an injury cause potential friction?
3. Many jurisdictions have a coming-and-going rule, so a commute would generally not be covered. But if coming and going is covered, and a person falls down the stairs walking into their home office, is that covered?

Lore asked the Task Force if they have seen any compensability challenges in court regarding teleworking or denials specifically for teleworking injuries.

Lore said there is a lack of data and information regarding workers' compensation injuries occurring in the course of telework. She said as an employer, she is looking at the requirements her business should begin complying with, including developing specific telework policies that provide necessary equipment lists and safety standards to ensure employees are working in a safe work environment. Lore asked the Task Force if their agencies have safety and equipment requirements for teleworking employees, how they are monitoring these requirements, if insurers require their policyholders to develop these written policies, and how else they might be mitigating the risk for teleworking employees. Answers in the chat included states having checklists for teleworkers and teleworking agreements.

Lore said there needs to be some data collected to better understand the impacts. She said the NAIC and the IAABC have discussed the opportunity to collaborate on a paper that could dive deeper into this issue. McClain said he liked the idea of a collaborative white paper. King said Georgia is still assessing the data, and it is hard to predict when more data will be available, as it could be a year or longer before data is available.

King said telework will likely continue at the current rates because productivity is not being affected. He said they are not seeing a surge in claims but believes it is likely too early to tell what will transpire.

### 3. Heard a Presentation from the NCCI Regarding Presumptive Workers' Compensation Benefits for Firefighters and Other First Responders

Jeff Eddinger (National Council of Compensation Insurance—NCCI) said numerous studies have examined the relationship between the job duties of firefighters and the contraction of certain diseases. He said these studies have provided varying conclusions, and the NCCI does not take a position on whether there is an actual correlation between the job duties of firefighters and these types of injuries.

Over the last decade, many states have enacted presumption laws for firefighters and other first responders. When a statutory presumption exists, and a worker meets certain requirements, the injury is presumed to have arisen out of and in the course of employment. More than a dozen states have introduced bills this year that would add some more types of cancers to the list of comprehensive injuries for first responders, such as police, firefighters, and emergency medical personnel. This has been a legislative trend in recent years as more states seek to expand benefits.

Eddinger said over the years, the NCCI has produced a white paper to provide information and insights on this topic to various stakeholders. This white paper was recently updated. The white paper outlines the different varieties of firefighter bills and some of the issues associated with them. The bills generally vary in two major respects, namely, the specific diseases that are covered and how certain restrictions may apply.

One of the diseases included in most of the firefighter bills is cancer. There can be either a broad definition of cancer or a specific list of cancers that would be covered. One of the issues with cancer is that it is a relatively

common disease in the U.S., as well as being among one of the most expensive medical conditions. Another issue with cancer is that it tends to have a long latency period, so it may be difficult to tie back to a prior employment period.

A second common disease found in firefighter bills includes respiratory conditions. Chronic respiratory diseases are relatively common diseases, as they are the sixth leading cause of death in the U.S. Smoking can contribute to respiratory conditions and some states include a non-smokers clause in their legislation.

A third type of disease found in firefighter bills includes blood and infectious diseases. First responders often come into contact with diseases like HIV, AIDS, hepatitis, tuberculosis, and recently COVID-19. These diseases have a shorter latency period, so theoretically, there would be less of an impact for these types of diseases due to a presumption law because it might be easier to track when the exposure occurred.

A fourth type of disease found in the firefighter bills includes heart and vascular conditions, including high blood pressure and heart disease. Heart disease is prevalent among firefighters, and sudden cardiac arrest accounts for half of all on-the-job fatalities for firefighters. It is difficult to prove a link because lifestyle and family history play a large role in heart disease. Additionally, there could be some heart-related presumptions that have time restrictions, so there could be a minimum amount of time between the firefighter's service and the episode for it to be eligible for a presumption.

Finally, the presumption being discussed most recently is mental injuries, which may expand to include things like Post-traumatic Stress Disorder (PTSD). At least 25 states recognize mental injuries, which are defined as mental injuries that arise without physical injuries. The NCCI is tracking this topic.

The other variabilities in these bills deal with different types of restrictions. Many times, these restrictions are service restrictions and time limitations, meaning that in order to qualify for a presumption, the employee must have served a minimum number of years to qualify. There may also be a limitation on the time after retirement or termination and could also be age restrictions. These presumptions may require health evaluations so that a pre-employment exam shows no pre-existing conditions for the types of diseases we have been discussing.

Furthermore, these presumption bills generally have wording on rebuttal presumptions. These presumptions are usually rebuttable presumptions that may be rebutted by a preponderance of the evidence.

Some additional considerations include voluntary firefighters. Some state statutes specifically exclude voluntary firefighters versus full-time firefighters. In those states where voluntary firefighters are included, it makes it more difficult to estimate the potential impact of one of these bills. A voluntary firefighter does not have set hours and there can be a variation of how much time they might actually spend being a firefighter.

Another issue is the potential shifts to coverage. Sometimes when these presumptions are put into place, there is a fear that the presumptions might open up or increase claims activity. Firefighters who do not self-insure may have difficulty finding workers' compensation coverage in the voluntary market.

If a presumption is passed, there is also an unexpected impact on the judicial environment, meaning that just because of the uncertainty, there could be an increase in litigation.

Another important impact to consider is the retroactive impact. Once a presumption bill is put into place, any claims that are filed could end up coming from years prior to the effective date of that presumption, so there was no premium collected to cover past injuries.

The final issue the NCCI discusses in its white paper is the issue of estimating the impact of the proposed bills. The availability of data is one issue that makes it hard to estimate the impact of firefighter bills. Most firefighters are employed by municipalities or other entities that self-insure, and this data is not reported to the NCCI. Additionally, there is the issue of the long latency of some of the diseases, meaning the data will not be available for many years. Even when the data does exist, it is impossible to differentiate between claims that were compensable under presumption versus just general standards.

The NCCI will continue to track these bills. The NCCI's newly updated white paper that includes additional information can be found on the NCCI's website.

Having no further business, the Workers' Compensation (C) Task Force adjourned.

Market Regulation Certification (D) Working Group Dec. 9, 2022, Minutes (Attachment One-A) ..... 8-9  
Market Regulation Certification Program Implementation Plan (Attachment One-A1) ..... 8-10

Draft: 3/29/23

Market Regulation and Consumer Affairs (D) Committee  
Louisville, Kentucky  
March 24, 2023

The Market Regulation and Consumer Affairs (D) Committee met in Louisville, KY, March 24, 2023. The following Committee members participated: Jon Pike, Chair (UT); Mike Causey, Co-Vice Chair, represented by Tracy Biehn (NC); Michael Humphreys, Co-Vice Chair, and David Buono (PA); Peni Itula Sapini Teo represented by Elizabeth Perri (AS); Karima M. Woods and Sharon Shipp (DC); Trinidad Navarro and Susan Jennette (DE); Sharon P. Clark (KY); Chlora Lindley-Myers, Cynthia Amann, and Jo LeDuc (MO); Jon Godfread represented by John Arnold (ND); Michael Wise (SC); Cassie Brown represented by Jessica Barta, Matthew Tarpley, and Jamie Walker (TX); Kevin Gaffney represented by Karla Nuisl (VT); and Jeff Rude (WY). Also participating were: Erica Weyhenmeyer (IL); Matt Gendron (RI); Rebecca Nichols (VA); and John Haworth (WA).

1. Adopted its 2022 Fall National Meeting Minutes

Biehn made a motion, seconded by Commissioner Navarro, to adopt the Committee's Dec. 15, 2022, minutes (see *NAIC Proceedings – Fall 2022, Market Regulation and Consumer Affairs (D) Committee*). The motion passed unanimously.

2. Heard a Presentation on the Emerging Cyberthreat of Technology-Enabled Claims Instigation

Joseph Petrelli (Demotech) said multiple insurers in Florida have become insolvent in the last few years. Research by Demotech and 4Warn has shown a disproportionate increase in litigation in Florida, and they have tied this increase in litigation to the insolvencies. Petrelli said law firms have targeted the insurance companies. He said Demotech asked Todd Kozikowski (4Warn) to investigate the reasons for the insolvencies.

Kozikowski said Google sells keywords, which are used by its search engine to prioritize results obtained in searches. Entities that pay for the keywords that are used in the searches will appear as the first results for a search. Buying keywords to push up the prioritization of an entity's advertisement is called search engine optimization (SEO). He said an analysis of the keywords and the sites that own them show that the keywords include insurance company names; public adjuster names; and generic searches, such as "public insurance adjusters near me" or "claims department." The keywords will be purchased just prior to a National Oceanic and Atmospheric Administration (NOAA) named storm arriving along an affected path. Kozikowski said average monthly spending on SEO keywords by six major multinational companies—McDonald's, Ford Motor Company, Starbucks, Nestle, Costco, and Anthem Blue Cross Blue Shield—was \$296,000. He said the average monthly spending by one substantial law firm was \$741,000. He noted that one Florida public adjuster paid an average of \$57,000 per month, or about \$650,000 per year, to buy keywords. The 1,200 paid keywords generated 3,700 clicks compared to 1,200 clicks from 2,600 organic searches that did not use paid keywords.

Petrelli said six Florida insurance companies failed due to a significant increase in new lawsuits that often exceeded the number of lawsuits in entire states. He said law firms used Litify to increase lawsuit filings by 480%. He said litigation financing outperformed investments in private equity (PE), real estate, and hedge funds. He noted that the Louisiana Department of Insurance (DOI) issued a cease and desist on one law firm for fraudulent activity related to marketing practices related to promising large recoveries before a claim is investigated.

Kozikowski said he monitored search activities and the purchase of keywords prior to the landfall of Hurricane Ian. There was a substantial increase in the purchase of keywords to elevate the results for law firms and public adjusters when consumers searched for information on their insurance companies and claims information. He

said one law firm has targeted more than 90 insurance companies by buying keywords, including the company name, such as “Travelers insurance personal injury settlement” and “Travelers insurance claims.”

Commissioner Clark asked if there was evidence of public adjusters and litigators collaborating. Petrelli said there is no direct evidence, but he believes it is occurring. He said it would be necessary to coordinate with companies to see their claims files to know if there is collaboration. He said he believes litigators have carved up the Florida insurance marketplace.

Commissioner Navarro asked if the law firms and public adjusters were intercepting calls intended for the insurance companies. Kozikowski said by using SEO, a Google search will show as a top result the telephone number for a public adjuster or litigator who purchased keywords using the insurance company’s name. Commissioner Navarro said everyone assumed that the reason the companies went insolvent in Florida was because of the cost of the hurricane-related losses. He asked if Petrelli and Kozikowski believe the companies went insolvent because of lawsuits. Petrelli said it was death by litigation.

Arnold asked if other industries and regions of the country have the same SEO issues that 4Warn is noticing in the insurance industry. Kozikowski said other industries are experiencing the same, but he has no analysis on them. There are increased litigation levels in Chicago, San Francisco, and Florida. Gendron asked why no upticks are indicated in cities other than Chicago, San Francisco, and Miami. Kozikowski said the lawsuits are targeted at specified insurers, and the upticks would be in the cities where those companies have the most losses.

Birny Birnbaum (Center for Economic Justice—CEJ) said he would like to have an opportunity to present a rebuttal to the presentation by Petrelli and Kozikowski. He said he was outraged that the Committee provided a platform for this conspiracy theory.

Ken Klein (California Western School of Law) noted that regulatory and legislative efforts to reduce litigation reduce both frivolous and meritorious lawsuits. He asked if Kozikowski or Petrelli can identify how many of the lawsuits were frivolous or meritorious. Shipp asked how many of the litigated claims resulted in payments, and Petrelli said that is information that would have to be gathered from the insurance companies.

### 3. Adopted its Task Force and Working Group Reports

#### a. Antifraud (D) Task Force

Commissioner Navarro said the Antifraud (D) Task Force met March 23 to adopt its 2022 Fall National Meeting minutes and discuss its charges and priorities for the year. He said the Task Force received an update from the Improper Marketing of Health Insurance (D) Working Group. He said the Working Group holds monthly regulator-only conference calls to discuss ongoing investigations and state efforts concerning lead generators. The Working Group is also continuing to work on its charge to “Review existing NAIC Models and Guidelines that address the use of lead generators for sales of health insurance products, and identify models and guidelines that need to be updated or developed to address current marketplace activities.” He said in 2022, the Working Group started reviewing the *Unfair Trade Practices Act* (#880) for potential amendments. The Working Group is finalizing the draft amendments. Commissioner Navarro said following the Spring National Meeting, the Working Group will distribute an updated draft for review and hold an open conference call in April to review and potentially adopt the amendments.

Commissioner Navarro said the Task Force received an update on the NAIC’s Online Fraud Reporting System (OFRS) redesign. He said the implementation process will include collaboration with the National Insurance Crime Bureau (NICB), the National Health Care Anti-Fraud Association (NHCAA), and state vendors. He said the Antifraud Technology (D) Working Group will begin reviewing suggested enhancements for OFRS moving forward. He said

the Task Force concluded its meeting with reports on matters of interest from the Coalition Against Insurance Fraud (CAIF), the Healthcare Fraud Prevention Partnership (HFPP), and the NICB.

b. Producer Licensing (D) Task Force

Commissioner Clark said the Producer Licensing (D) Task Force has not met this year. She said the Task Force will have three working groups in 2023. The Adjuster Licensing (D) Working Group will be chaired by Rachel Chester (RI). The Uniform Education (D) Working Group will be chaired by Richard Tozer (VA). The Producer Licensing Uniformity (D) Working Group will be chaired by Bryan Stevens (WY).

Commissioner Clark said last year, the Task Force circulated a draft template on the 1033 waiver process. She said following the 2022 Fall National Meeting, the draft was circulated for comment to the Producer Licensing (D) Task Force, the Antifraud (D) Task Force, and all interested parties with a comment deadline of Jan. 31. She said there were 17 comments submitted from both state insurance regulators and industry, and NAIC staff are reviewing and summarizing the comments. She said the comments will also be posted to the Producer Licensing (D) Task Force web page for further consideration prior to the Summer National Meeting.

Commissioner Clark said Commissioner Navarro will lead a new workstream on public adjusters for the Adjuster Licensing (D) Working Group. She said the National Association of Public Insurance Adjusters (NAPIA) has requested the following four items to be addressed: 1) unlicensed public adjusters; 2) contractors who are also acting as public adjusters on the same claims; 3) the assignment of benefit rights to contractors; and 4) the general claims appraisal process.

Commissioner Clark said with last year's adoption by the Executive (EX) Committee and Plenary of the "Guidelines for Amending the Uniform Producer Licensing Applications," NAIC staff will begin coordinating with the National Insurance Producer Registry (NIPR) and states, including any back-office system support vendors, to conduct an analysis of how long it will take to implement a proposed change and the cost to implement it.

c. Market Analysis Procedures (D) Working Group

LeDuc said the Market Analysis Procedures (D) Working Group will meet April 10.

LeDuc said during its April 10 meeting, the Working Group will discuss its charges for 2023, which include a new charge to assess the current market analysis data in the NAIC Market Information Systems (MIS) and identify needed improvements in the effectiveness of the data and the predictive abilities of the scoring systems that utilize the data. She said the Working Group will begin by identifying the data that is available in the MIS and how the states are using the data.

d. Market Conduct Examination Guidelines (D) Working Group

Tarpley said he and Market Conduct Examination Guidelines (D) Working Group vice chair Weyhenmeyer met Feb. 1, Feb. 7, Feb. 27, and March 15 to discuss the Working Group's 2023 charges and topics continuing from last year. He said last year's continuing topics include a new travel insurance policy in-force standardized data request (SDR), a new travel insurance claims SDR, revisions to Chapter 23—Conducting the Life and Annuity Examination of the *Market Regulation Handbook*. The revision to the chapter is to the best interest provisions of the *Suitability in Annuity Transactions Model Regulation* (#275).

Tarpley said he and the Working Group vice chair are monitoring the work of the Accelerated Underwriting (A) Working Group and the Innovation, Cybersecurity, and Technology (H) Committee to prepare for the Market Conduct Examination Guidelines (D) Working Group's first meeting on March 28.

e. Market Regulation Certification (D) Working Group

Haworth said the Market Regulation Certification (D) Working Group met Feb. 27. He said during the meeting, the Working Group discussed its charges for 2023 and received an update on the revisions to the Voluntary Market Regulation Certification Program requirements, checklist, and guidelines. He said the work of the subject matter expert (SME) group revising the certification program requirements, checklist, guidelines, and scoring matrix is nearly complete. He said once the drafting group completes its final review of the revisions, the redline and clean versions of all these documents will be posted to the Working Group's web page in preparation for the Working Group's consideration and adoption.

Haworth provided an overview of the draft certification program for new members of the Market Regulation and Consumer Affairs (D) Committee. He said the current work on putting together a certification program for state market regulation departments differs from previous attempts in not insisting upon domestic deference. He noted that after the original drafting of this certification program, the Working Group oversaw a pilot of the certification program with 18 states. The states applied the certification standards to their departments and came up with a number of suggestions to improve the program prior to adoption. Haworth said the draft certification program consists of 11 requirements that a department would be expected to achieve. The 11 requirements are broken into five broad categories covering: 1) the available statutory authorities; 2) use the *Market Regulation Handbook*; 3) staffing resources and qualifications; 4) use of NAIC MIS databases and the Market Conduct Annual Statement (MCAS); and 5) collaboration with other departments.

Haworth said the proposed implementation plan for the program anticipates an initial period where jurisdictions will be encouraged to self-certify that they meet the requirements and be provided with peer review, guidance, and training. After the initial self-certification period, jurisdictions can choose to continue to self-certify or seek full certification. Full certification would be measured by an independent panel appointed by the Working Group. A fully certified jurisdiction would submit annual self-assessments and be re-certified every five years. Haworth said the Working Group should have the entire certification program ready for Committee consideration by the Summer National Meeting.

f. Speed to Market (D) Working Group

Nichols said the Speed to Market (D) Working Group has not met yet this year, but it is continuing its work on the revisions to the *Product Filing Review Handbook*. She said the *Product Filing Review Handbook* revisions are near completion, and the Working Group expects to have the exposure draft posted to its web page by late May or early June. She said the Working Group will consider the changes in three segments, and it anticipates having the entirety of the *Product Filing Review Handbook* changes adopted prior to the Fall National Meeting.

Additionally, Nichols said in June and July, the Working Group will conduct its annual consideration of suggestions for the product coding matrices (PCMs). The Market Information Systems (D) Task Force and the Market Conduct Annual Statement Blanks (D) Working Group did not meet prior to the Spring National Meeting, and they did not report.

Commissioner Navarro made a motion, seconded by Biehn, to adopt the following reports: 1) the Antifraud (D) Task Force; 2) the Producer Licensing (D) Task Force; 3) the Market Analysis Procedures (D) Working Group; 4) the Market Conduct Examination Guidelines (D) Working Group; 5) the Market Regulation Certification (D) Working Group (Attachment One); and 6) the Speed to Market (D) Working Group. The motion passed unanimously.

Having no further business, the Market Regulation and Consumer Affairs (D) Committee adjourned.

SharePoint/NAIC Support Staff Hub/Committees ...

Draft: 3/6/23

Market Regulation Certification (D) Working Group  
Virtual Meeting (*in lieu of meeting at the 2023 Spring National Meeting*)  
February 27, 2023

The Market Regulation Certification (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee met Feb. 27, 2023. The following Working Group members participated: Mike Kreidler, Chair, represented by John Haworth (WA); Bill Cole, Vice Chair (WY); Lori K. Wing-Heier represented by Chelsy Maller (AK); Erica Weyhenmeyer (IL); Kathleen A. Birrane represented by Mary Kwei (MD); Chlora Lindley-Myers represented by Jo LeDuc (MO); Mike Causey represented by Tracy Biehn (NC); Robert McCollough (NE); Marlene Caride represented by Ralph Boeckman and Erin Porter (NJ); Judith L. French represented by Don Layson (OH); Glen Mulready represented by Landon Hubbart (OK); Michael Wise represented by Rachel Moore (NC); Tanji J. Northrup (UT); Don Beatty (VA); and Kevin Gaffney represented by Marcia Violette (VT).

1. Adopted its Dec. 9, 2022, and 2022 Fall National Meeting Minutes

Haworth said the Working Group conducted an e-vote that concluded Dec. 9, 2022, to adopt the revisions to the Market Regulation Certification Program implementation plan.

Cole made a motion, seconded by Biehn, to adopt the Working Group's Dec. 9, 2022, (Attachment One-A) and Nov. 28, 2022 (*see NAIC Proceedings – Fall 2022, Market Regulation and Consumer Affairs (D) Committee, Attachment Six*) minutes. The motion passed unanimously.

2. Discussed its Charges and Goals for 2023

Haworth said the only charge for the Working Group is to develop a formal market regulation certification proposal for consideration by the NAIC members. He said this has five parts.

Haworth said the first part is for the Working Group to develop the certification standards that a state's insurance department should or must meet to be certified. He said this, for the most part, has been achieved. He noted that 12 requirements were originally drafted into the certification program covering staffing, use of the NAIC Market Information Systems (MIS), participation in Market Regulation and Consumer Affairs (D) Committee Working Groups, participation in the Market Conduct Annual Statement (MCAS), collaboration with other departments, and the ability to enforce compliance of regulated entities to market conduct laws and regulations.

Haworth said the Working Group is currently assessing the recommendations made by a group of 18 states that volunteered to certify themselves with the original certification program requirements.

Haworth said the second part of the charge is to develop an implementation plan for the certification program. He said this is finished and that on Dec. 9, 2022, the Working Group adopted the Market Regulation Certification Program implementation plan.

Haworth said the third part tasks the Working Group with developing a process for measuring a jurisdiction's compliance to the standards. He said this was completed in 2022, but the scoring matrix is currently being updated as revisions are being recommended by the drafting group that is reviewing the requirements.

Haworth said the fourth part of the charge is to create a process for future revisions to the certification standards. He said this was included in the implementation plan that was adopted in December.

Haworth said the final part of the charge is the Working Group's ongoing activity once a certification program is approved to assist jurisdictions in achieving certification.

Haworth said his goal is for the Working Group to have the complete package of the requirements, scoring matrix, and implementation plan to the Market Regulation and Consumer Affairs (D) Committee by the Summer National Meeting.

### 3. Reviewed the Pilot Program Suggested Revisions to the Market Regulation Certification Program

Haworth said the drafting group did not meet in January but met twice in February. He said the drafting group has completed going through the requirements. He said the group has reviewed all the requirements and is now doing one final close look to be sure the wording in the program is consistent, clear, and logical and that the scoring matrix is aligned with the requirements guidelines, measurements, and checklists.

Haworth said the revisions were primarily in line with recommendations received by the jurisdictions that piloted the Market Regulation Certification Program. However, the drafting group also came up with some revisions it felt were important.

Haworth said among the revisions and suggestions are:

- 1) The drafting group added an "Objective" and a "Measurement" section to each requirement. Much of the redline is simply cutting paragraphs from the "Guidelines" section to the new sections.
- 2) On requirements 3 and 4, the drafting group clarified that requirement 3 measures staffing resources and requirement 4 measures staffing qualifications. He said requirement 4 was rewritten to be clearer and to match the formatting of the requirements. He noted that the requirements originally were written by different individuals, so there were many inconsistencies that needed to be cleaned up.
- 3) The drafting group believes the requirement 4 measurements of "unqualified pass" and "provisional pass" create confusion. The drafting group will be asking the Working Group to decide whether those measurements should be replaced with a simple description of what is required to pass.
- 4) Recognizing that employees often have multiple responsibilities, the drafting group changed "full-time employee" to "full-time equivalent employee."
- 5) The drafting group will also be proposing to the Working Group that requirements 6 and 11 should be merged. Requirement 6 concerns collaboration, and requirement 11 concerns the Market Actions (D) Working Group's national analysis process. Because national analysis is a collaborative process, the drafting group believes it should be included with requirement 6. Also, because the national analysis process itself changes frequently, as the Working Group tries to make it more effective, it should not be its own requirement within the Market Regulation Certification Program.
- 6) For requirement 7 regarding the MCAS, the drafting group removed question 7c about requiring companies to file using a format acceptable to the NAIC. There are really no alternatives.
- 7) Requirement 8 concerns electronic data entry with the NAIC. The drafting group will be asking the Working Group to consider simplifying the requirement to only the actual submission of Complaints Database System (CDS), Regulatory Information Retrieval System (RIRS), and data to the NAIC. The

drafting group will be suggesting that the timeliness of the submissions be moved from the requirement itself to the checklist and measurement sections of the requirement.

- 8) For requirement 8, the drafting group will be asking the Working Group to consider building in tolerances (e.g., a jurisdiction could fulfill the requirement if it submits data in a timely manner 75% of the time).
- 9) In requirement 10 regarding Collaborative Action Designees (CADs), the drafting group will be asking that the Working Group alter the language of the requirement slightly to make it clear that the CAD needs to attend only 50% of the Market Actions (D) Working Group meetings they are eligible to attend because there are Working Group meetings that are only open to the Working Group members.

Haworth said the drafting group stopped at requirement 6 and that he is confident it will complete its review by the Spring National Meeting.

Having no further business, the Market Regulation Certification (D) Working Group adjourned.

SharePoint/NAIC Support Staff Hub/Member Meetings/D Cmte/2023 Spring National Meeting/MRCWG/02 MRCWG T

Draft: 2/22/23

Market Regulation Certification (D) Working Group  
E-Vote  
December 9, 2022

The Market Regulation Certification (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee conducted an e-vote that concluded Dec. 9, 2023. The following Working Group members participated: Russell Toal, Chair (NM); John Haworth, Vice Chair (WA); Lori K. Wing-Heier (AK); Kathleen A. Birrane (MD); Grace Arnold (MN); Chlora Lindley-Myers (MO); Mike Causey (NC); Martin Swanson (NE); Chris Nicolopoulos (NH); Michael Humphreys (PA); Michael Wise (SC); Tanji J. Northrup (UT); Don Beatty (VA); Kevin Gaffney (VT); Allan L. McVey (WV); and Bill Cole (WY).

1. Adopted the Market Regulation Certification Program Implementation Plan

The Working Group considered adoption of the Market Regulation Certification Program Implementation Plan.

A majority of the Working Group members voted in favor of adopting the implementation plan (Attachment One-A1). The motion passed.

Having no further business, the Market Regulation Certification (D) Working Group adjourned.

SharePoint/NAIC Support Staff Hub/Meetings/D CMTE/2023 Spring /MRCWG/1209/12-MRCWG T.docx

Draft: 12/2/22

*Implementation Plan adopted Market Regulation and Consumer Affairs (D) Committee –  
Implementation Plan adopted by the Market Regulation Certification (D) Working Group*

## **Voluntary Market Regulation Certification Program Proposal for Implementation**

---

### **Current Charge of the Working Group**

The Market Regulation Certification (D) Working Group will develop a formal market regulation certification proposal for consideration by the National Association of Insurance Commissioners (NAIC) membership that provides recommendations for the following:

- 1) Certification standards.
- 2) A process for the state implementation of the standards.
- 3) A process to measure the states' compliance with the standards.
- 4) A process for future revisions to the standards.

As per the charges adopted for the Market Regulation Certification (D) Working Group, the following is a draft proposal for charges 2 and 4.

### **Implementation Proposal**

The Voluntary Market Regulation Certification Program will be overseen and administered by a working group (Market Regulation Standards and Certification (D) Working Group) established by the Market Regulation and Consumer Affairs (D) Committee. Members of the Working Group shall be appointed annually pursuant to the NAIC Bylaws.

### ***Self-Certification Program***

- Upon adoption/approval of the Voluntary Market Regulation Certification Program, the Market Regulation Certification Program Self-Assessment Guidelines and Checklist Tool and the Implementation Plan by the NAIC membership, participating jurisdictions may begin self-certification. No later than two weeks prior to the first Fall National Meeting following the adoption/approval of the program, a jurisdiction may submit a self-certification report that outlines the progress achieved towards implementation of the Voluntary Market Regulation Certification Program requirements. The self-certification will follow the formatted checklist designed and finalized by the Market Regulation Certification (D) Working Group.
- A jurisdiction's self-certification report will be submitted to NAIC staff. The Market Regulation Standards and Certification (D) Working Group will monitor and assess its progress towards compliance with the *Voluntary Market Regulation Certification Program* requirements. Each jurisdiction that submits a self-certification report will be provisionally certified. The Working Group will provide the jurisdiction with an acknowledgement and its assessment of the jurisdiction's self-certification.
- Prior to each Fall National Meeting following a jurisdiction's initial provisional certification, each provisionally certified jurisdiction will submit its self-certification report to NAIC staff. Jurisdictions that have not previously submitted a self-certification report, may do so prior to any Fall National Meeting using the process noted above to receive provisional certification.
- At any time, participating jurisdictions may request peer-review, guidance, and training. To the extent necessary to accommodate such requests, NAIC staff may work with seasoned regulators with market conduct examination and/or market analysis experience to assist in meeting the needs of such requestors.

Draft: 12/2/22

*Implementation Plan adopted Market Regulation and Consumer Affairs (D) Committee –  
Implementation Plan adopted by the Market Regulation Certification (D) Working Group –*

- Once a mechanism is in place for implementing the Full Certification Program (see *Full Certification Program* below), jurisdictions will have the option to continue self-certifying or to apply for full certification. Jurisdictions that decide to continue self-certifying will use the same process described above.

### ***Full Certification Program***

- The Market Regulation Standards and Certification Working Group will determine whether jurisdictions that apply to be fully certified meet the certification standards. An NAIC Review Team (similarly constructed as the Financial Regulation and Accreditation Standards Accreditation Review Team) will conduct the certification reviews.
- No later than two weeks prior to the first Spring National Meeting after the Market Regulation Standards and Certification Working Group has been established (or no later than two weeks prior to any subsequent Spring National Meeting), any participating jurisdiction may apply for full certification by submitting a request for full certification along with a self-certification report to NAIC staff. The jurisdiction's request will be reviewed by the NAIC Review Team, which will provide its recommendation to the Market Regulation Standards and Certification Working Group. For jurisdictions applying for full certification, the Committee will use applicable monitoring tools to verify the self-certification information reported by the participating jurisdictions. The NAIC Review Team may use additional forms of verification deemed necessary, such as interviews or on-site visits. Each fully certified jurisdiction will be reviewed every five years to assess the jurisdiction's ongoing compliance with the certification standards.
- The requests for full certification will be reviewed in the order in which they are received. No more than 12 reviews will be conducted in each of the first five years of the certification program. In each subsequent year, jurisdictions that request to have full certification must submit their request with its self-certification report to NAIC staff two weeks prior to the Spring National Meeting. The NAIC Review Team will conduct the five-year re-assessments and review all the requests. Recommendations for full certification and re-certifications will be provided to the Market Regulation Standards and Certification Committee prior to the Fall National Meeting of the same calendar year. The Market Regulation Standards and Certification Committee will make its decision regarding certification or re-certification by the end of the calendar year.
- All jurisdictions that submit a request for full certification will be provisionally certified by the Market Regulation Standards and Certification Working Group (as per the process described in the *Self-Certification Program* above) until their request for full certification is reviewed and a decision on the request is made by the Market Regulation Standards and Certification Working Group.
- Fully certified jurisdictions will submit a self-certification report during the third year to NAIC staff at least two weeks prior to the Summer National Meeting.
- A jurisdiction may withdraw its request for full certification at any time. A jurisdiction that is fully certified can exit the full certification re-assessment cycle and choose to be either provisionally certified (per the process described in the *Self-Certification Program* above) or to not participate in the Voluntary Market Regulation Certification Program.

Draft: 12/2/22

*Implementation Plan adopted Market Regulation and Consumer Affairs (D) Committee –  
Implementation Plan adopted by the Market Regulation Certification (D) Working Group –*

- A fully certified jurisdiction may qualify for financial incentives. (Details will be determined and approved by the Executive (EX) Committee.)

***Future Revisions***

- The Market Regulation Standards and Certification Working Group will regularly review feedback from jurisdictions concerning any issues or recommended changes to the *Voluntary Market Regulation Certification Program* requirements and the *Market Regulation Certification Program Self-Assessment Guidelines and Checklist Tool* based on the use of the guidelines and checklist for self-certification.
- Future revisions of the market regulation certification standards will be made from time to time by the Market Regulation Standards and Certification Working Group with approval of the Market Regulation and Consumer Affairs (D) Committee and NAIC membership. New standards will be added only as necessary and added no more frequently than once per year. Revised sets of standards will constitute a new “certification tier.” An effective date will be specified for each new requirement within a tier. Self-certified and fully certified jurisdictions that comply with a previous tier of requirements will not be measured on compliance to new tier requirements until the first self-assessment audit or the five-year re-certification review (whichever occurs first) after the effective date of the new requirement.

**ANTIFRAUD (D) TASK FORCE**

Antifraud (D) Task Force March 23, 2023, Minutes ..... 8-14

Draft: 4/4/23

Antifraud (D) Task Force  
Louisville, Kentucky  
March 23, 2023

The Antifraud (D) Task Force met in Louisville, KY, March 23, 2023. The following Task Force members participated: Trinidad Navarro, Chair (DE); John F. King, Vice Chair (GA); Lori K. Wing-Heier represented by Alex Romero (AK); Alan McClain represented by Crystal Phelps (AR); Barbara D. Richardson represented by Maria Ailor (AZ); Andrew N. Mais represented by Kurt Swan (CT); Doug Ommen represented by Andria Seip and Jared Kirby (IA); Dean L. Cameron represented by Randy Pipal (ID); Vicki Schmidt represented by John Eichkorn (KS); Sharon P. Clark represented by Rob Roberts (KY); Kathleen A. Birrane represented by Mary Kwei (MD); Anita G. Fox represented by Joseph Garcia (MI); Grace Arnold represented by Paul Hanson (MN); Chlora Lindley-Myers represented by Carrie Couch and Marjorie Thompson (MO); Mike Chaney represented by John Hornback (MS); Troy Downing represented by Steve Matthews (MT); Mike Causey represented by Tracy Biehn (NC); Jon Godfread represented by Dale Pittman (ND); Eric Dunning represented by Laura Arp and Martin Swanson (NE); Chris Nicolopoulos represented by Heather Silverstein (NH); Jennifer A. Catechis represented by Leatrice Geckler (NM); Judith L. French represented by Michelle Brugh Rafeld (OH); Glen Mulready represented by Rick Wagnon (OK); Andrew R. Stolfi represented by Dorothy Bean and Stephanie Noren (OR); Michael Wise (SC); Larry D. Deiter represented by Melissa Manning and Travis Jordan (SD); Jon Pike represented by Randy Overstreet, Tanji J. Northrup, and Tracy Klausmeier (UT); Scott A. White represented by Juan A. Rodriguez Jr. and Richard Tozer (VA); Kevin Gaffney (VT); and Allan L. McVey represented by Erin K. Hunter (WV).

1. Adopted its 2022 Fall National Meeting Minutes

Commissioner King made a motion, seconded by Mueller, to adopt the Task Force’s Dec. 14, 2022, minutes (see *NAIC Proceedings – Fall 2022, Antifraud (D) Task Force*). The motion passed unanimously.

2. Discussed its 2023 Charges and Priorities

Commissioner Navarro said the Task Force discussed its 2023 proposed charges during the 2022 Fall National Meeting. Commissioner Navarro said those proposed charges were officially adopted by full NAIC Membership. He said the Task Force will be focusing on additional priorities, including; 1) the creation of a Producer Portal, which will be a centralized portal that would allow consumers to find licensing information on insurance producers; 2) an Antifraud Plan Repository, which will assist with streamlining the process of submitting and collecting companies’ antifraud plans; and 3) the implementation of the Online Fraud Reporting System (OFRS) redesign. Commissioner Navarro said the Task Force will also be assisting the Improper Marketing of Health Insurance (D) Working Group’s review of the *Unfair Trade Practices Act* (#880) for potential amendments to address current marketplace activities and the Antifraud Technology (D) Working Group’s work on the implementation of an OFRS redesign and future enhancements.

3. Received an Update from the Improper Marketing of Health Insurance (D) Working Group

Frank Pyle, Vice Chair of the Improper Marketing of Health Insurance (D) Working Group, said the Working Group held its first regulator-to-regulator meeting of the year on Feb. 23. Pyle said the Working Group will continue to meet in regulator-to-regulator session on the fourth Thursday of the month. He said that last year, the Working Group began working on its charge to “review existing NAIC models and guidelines that address the use of lead generators for sales of health insurance products, and identify models and guidelines that need to be updated or developed to address current marketplace activities.” Pyle said the Working Group started reviewing Model #880. He said the Working Group will be continuing its work on this charge and is on a path to finalizing the review of

the model in April and May. Pyle said the Working Group will continue with its regulator-to-regulator meetings and will be adding public meetings as necessary to complete its charges and goals for 2023. The Working Group will meet this afternoon on March 23 following the Task Force.

#### 4. Discussed the NAIC OFRS

Greg Welker (NAIC) said that during the 2022 Fall National Meeting, the Task Force briefly discussed the completion of the OFRS redesign. Welker said that notifications have been sent out. However, he wanted to follow up during the Task Force meeting to announce to those who have not heard that the OFRS redesign is completed and live. Welker said if they have not already, he encourages state insurance regulators to review the redesign. He said the purpose behind the redesign was to update an out-of-date system being used, provide the necessary cyber security required, and add specific enhancements like attachments. Welker said that at this time, an individual submitting a potential fraud referral has the ability to submit attachments directly to the OFRS. He also said that, at this time, the attachment enhancement feature is not set up with the National Insurance Crime Bureau (NICB), the National Health Care Anti-Fraud Association (NHCAA), or state vendors. The NAIC will need to work with each to implement the attachment enhancement. Welker said the NAIC is currently working with the NICB and the NHCAA. The next step will be to work with individual states. Welker said the Antifraud Technology (D) Working Group, chaired by Armand Glick (UT), will be taking back its responsibility to review requested enhancements for OFRS. Welker said the Working Group will meet after the Spring National Meeting to specifically discuss the OFRS and the next steps to fully integrate the redesigned system for everyone.

Glick said he has had discussions with Welker and others at the NAIC. Prior to the redesign project, the Working Group was responsible for reviewing all suggested enhancements and approving them before taking them to NAIC staff to update OFRS. Glick said the Working Group will be taking that responsibility again and will also be involved in the implementation of the redesign. Glick said he will work with Welker to schedule a meeting for April.

#### 5. Heard Reports from Interested Parties

##### A. Coalition Against Insurance Fraud

Matthew Smith (Coalition Against Insurance Fraud) said this will be the Coalition's 30-year anniversary. Smith said if there are states that are not familiar with the Coalition or its services available, he would encourage them to reach out. The Coalition distributes its Fraud News Weekly report, which provides comments on what is being seen from different geographic locations. Smith said that this is a free newsletter and that those not already subscribed could enroll on the Coalition's web page.

Smith said that with the continued growth of the Coalition, it is adding staff. He said the Coalition hired Tracy Thompson, former New Jersey state insurance fraud prosecutor, and Brady Bell as a second full-time communications staff member. The Coalition is also interviewing for a full-time government affairs position that will be announced at the end of April.

Smith said the Coalition has continued to work on its research studies, which assist the states in fighting against insurance fraud. He said it has completed a data ethics study that provides a detailed view of the good and bad taking place in insurance fraud. Smith said the data from this study shows that 85% of consumers support the appropriate use of data to fight insurance fraud. He said another study is being completed in partnership with Verisk. Smith said this study will be a psychology fraud study. The analysis will show consumers' perceptions of insurance fraud. Smith said the last study will be with PricewaterhouseCoopers (PWC) on the keys to unlocking special investigation unit (SIU) success.

Smith said the Coalition’s legislative advocacy program has been busy, with 165 legislative bills being introduced. He said a new bill is being introduced that provides an incentive for reporting insurance fraud. Smith said the bill states that anyone who reports potential fraud that leads to an investigation in which there is a conviction and money recovered will receive 40% of the recovered amount.

Smith said other items to announce on behalf of the Coalition include its efforts to work with Glick for the Utah Insurance Department to host the 2023 Annual Fraud Directors Meeting and its plans to host a webinar in April on litigation finances. The Coalition’s midyear meeting will be June 5–6, and the year-end meeting will be held in December.

#### B. NICB

Patrick Martin (National Insurance Crime Bureau—NICB) said he is filling in for Rich DiZinno, who could not attend due to weather. Martin said that the NICB fully supports the OFRS redesign, which provides an avenue to report fraud to the states. The NICB has a similar reporting system, and they complement each other. As the NAIC implements the redesign, the NICB will be 100% behind the implementation. The NICB and NAIC are working together with quarterly calls to help with any implementation issues.

#### 6. Discussed Other Matters

Glick said the Utah Insurance Department has the privilege of hosting the Annual Fraud Directors Conference in October. Glick said this will be the largest gathering of state fraud directors. The NAIC will be assisting with the contracts and funding in addition to the Coalition and NICB. Glick said the conference will take place Oct. 3–5 in St. George, UT.

Having no further business, the Antifraud (D) Task Force adjourned.

Draft: 3/28/23

Financial Condition (E) Committee  
Louisville, Kentucky  
March 24, 2023

The Financial Condition (E) Committee met in Louisville, KY, March 24, 2023. The following Committee members participated: Elizabeth Kelleher Dwyer, Chair (RI); Nathan Houdek, Vice Chair, and Amy Malm (WI); Mark Fowler (AL); Michael Conway represented by Keith Warburton (CO); Michael Yaworsky represented by Jane Nelson (FL); Amy L. Beard and Roy Eft (IN); Doug Ommen and Carrie Mears (IA); Timothy N. Schott (ME); Chlora Lindley-Myers represented by John Rehagen and Danielle Smith (MO); Marlene Caride (NJ); Adrienne A. Harris represented by John Finston and Bob Kasinow (NY); Michael Wise (SC); Cassie Brown represented by Jamie Walker and Jessica Barta (TX); and Scott A. White (VA).

1. Adopted its 2022 Fall National Meeting Minutes

Commissioner Caride made a motion, seconded by Commissioner Houdek, to adopt the Committee's Dec. 15, 2022, minutes (*see NAIC Proceedings – Fall 2022, Financial Condition (E) Committee*). The motion passed unanimously.

2. Adopted the Reports of its Task Forces and Working Groups

Superintendent Dwyer stated that the Committee usually takes one motion to adopt its task force and working group reports that are considered technical, noncontroversial, and not significant by NAIC standards, i.e., they do not include model laws, model regulations, model guidelines, or items considered to be controversial. He reminded Committee members that after the Committee's adoption of its votes, all the technical items included within the reports adopted will be sent to the NAIC Members for review shortly after the conclusion of the Summer National Meeting as part of the Financial Condition (E) Committee Technical Changes report. Pursuant to the technical changes report process previously adopted by the Executive (EX) Committee and Plenary, the members will have 10 days to comment. Otherwise, the technical changes will be considered adopted by the NAIC and effective immediately. With respect to the task force and working group reports, Superintendent Dwyer asked the Committee: 1) whether there were any items that should be discussed further before being considered for adoption and sent to the Members for consideration as part of the technical changes; and 2) whether there were other issues not up for adoption that are currently being considered by task forces or working groups reporting to this Committee that require further discussion. The response to both questions was no.

In addition to presenting the reports for adoption, Superintendent Dwyer noted that the Financial Analysis (E) Working Group met March 21, Feb. 15, and Jan. 19 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings, to discuss letter responses and financial results. Additionally, the Valuation Analysis (E) Working Group met March 21 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings, to discuss valuation items related to specific companies.

Finston made a motion, seconded by Superintendent Schott, to adopt the following task force and working group reports: Accounting Practices and Procedures (E) Task Force; Capital Adequacy (E) Task Force; Financial Stability (E) Task Force; Receivership and Insolvency (E) Task Force; Reinsurance (E) Task Force; Valuation of Securities (E) Task Force; Mortgage Guaranty Insurance (E) Working Group (Attachment One); National Treatment and Coordination (E) Working Group (Attachment Two), and Risk-Focused Surveillance (E) Working Group (Attachment Three). The motion passed unanimously.

### 3. Received a Referral from the Valuation of Securities (E) Task Force

Mears said that there was a need identified within the Valuation of Securities (E) Task Force pertaining to its role in assessing investment risk and how it would benefit from different data points that are currently not available. She noted that most of these data points were market value-based, and the original proposal to address this was to add columns to some of the annual reporting schedules. However, it was quickly realized that this was not efficient. Mears noted how that method would result in outdated data by the time it was received. She noted it might not be consistently completed, and many times the insurers and their accounting systems were not matched up with their investment systems to allow this to be data captured as easily as one would expect. Consequently, the industry challenged the proposal, and the general consensus was that a different method and platform were needed to modernize the ability to access this kind of information. Mears said that part of this referral was trying to establish whether that was a valid way forward. Mears requested that the Committee members think about data points around investments that would be valuable and helpful to the process and make a laundry list of requests. She cited as an example how perhaps with more data, actuaries could more easily look at asset duration or other metrics when reviewing and comparing to what is delivered for asset adequacy testing. She asked that a response be provided by May 15. Superintendent Dwyer asked that each of the Committee members review the referral from the Valuation of Securities (E) Task Force (Attachment Four) and develop their own lists, as Mears requested.

### 4. Adopted the Securities Valuation Office's (SVO's) Modeling of CLOs for NAIC Designations

Superintendent Dwyer stated that the Valuation of Securities (E) Task Force had recently adopted an amendment (Attachment Five) to the *Purposes and Procedures Manual of the NAIC Investment Analysis Office* (P&P Manual) to include collateralized loan obligations (CLOs) as a financially modeled security under the responsibility of the NAIC's Structured Securities Group (SSG). She explained that CLOs are a type of structured security backed by a pool of debt, typically corporate loans with low credit ratings. She noted that this amendment makes this asset class ineligible to use credit rating provider ratings to determine an NAIC designation if the SSG can model the security. She noted that the NAIC's Investment Analysis Office (IAO) had identified that securities within this asset class had inconsistently assigned NAIC designations when relying upon credit rating provider ratings and had recommended this change to the Task Force to ensure reporting equivalency for NAIC regulatory purposes. The amendment is effective as of Jan. 1, 2024, with insurers first reporting the financially modeled NAIC designations for CLOs with their year-end 2024 financial statement filings.

Mears made a motion, seconded by Finston, to adopt the action taken by the Valuation of Securities (E) Task Force on this item. The motion passed unanimously.

### 5. Adopted a Request for NAIC Model Law Development Extension from the Mortgage Guaranty Insurance (E) Working Group

Superintendent Dwyer noted that a memorandum from the Mortgage Guaranty Insurance (E) Working Group was included in the materials, requesting an extension on making revisions to the *Mortgage Guaranty Insurance Model Act* (#630). She noted that she believed they had made good progress and, while they are close to finalizing, they are requesting an extension until the Fall National Meeting. Commissioner Houdek stated he supports the work, as Wisconsin was a former chair of the Working Group.

Rehagen made a motion, seconded by Finston, to adopt the request (Attachment Six). The motion passed unanimously.

## 6. Discussed Other Matters

Superintendent Dwyer stated that each year the commissioners gather in early February for a Commissioners' Conference. For the last few years, each of the committees has held a short session at that conference to get acclimated with each other and to briefly discuss some of the key regulatory objectives and projects for the year. She stated that during this year's session, the Committee members agreed that one of its priorities was the work of the Restructuring Mechanisms (E) Working Group and Restructuring Mechanisms (E) Subgroup. Further to that point, they agreed to roll the charges and members of the Subgroup into the Working Group (Attachment Seven). No objections were raised to the change, and she asked that NAIC staff update the web pages of both groups to reflect that change.

Having no further business, the Financial Condition (E) Committee adjourned.

[https://naiconline.sharepoint.com/sites/NAICSupportStaffHub/Member Meetings/E CMTE/2022-3-Fall/121522 E Minutes.docx](https://naiconline.sharepoint.com/sites/NAICSupportStaffHub/Member%20Meetings/E%20CMTE/2022-3-Fall/121522%20E%20Minutes.docx)

Draft: 3/28/23

Mortgage Guaranty Insurance (E) Working Group  
Louisville, Kentucky  
March 22, 2023

The Mortgage Guaranty Insurance (E) Working Group of the Financial Condition (E) Committee met March 22, 2023. The following Working Group members participated: Jackie Obusek, Chair (NC); Kurt Regner (AZ); Monica Macaluso (CA); Virginia Christy (FL); John Rehagen (MO); Margot Small (NY); Melissa Greiner and Michael McKenney (PA); Amy Garcia (TX); and Amy Malm and Levi Olson (WI).

1. Adopted its 2022 Fall National Meeting Minutes

Malm made a motion, seconded by Rehagen, to adopt the Working Group's Dec. 13, 2022, minutes (*see NAIC Proceedings – Fall 2022, Financial Condition (E) Committee, Attachment Three*). The motion passed unanimously.

2. Discussed Comments Received on the Exposure Draft of Model #630

Obusek commented that during the 2022 Fall National Meeting, the Working Group discussed draft revisions to the *Mortgage Guaranty Insurance Model Act (#630)* (Attachment One-A). Following this discussion, the Drafting Group met and integrated revisions to the draft and re-exposed Model #630 for a 15-day public comment period that ended March 14. As a result of the exposure, a letter was received from the Mortgage Guaranty Insurance Corporation (MGIC), the Reinsurance Association of America (RAA), and the Center for Economic Justice (CEJ) (Attachment One-B). Obusek stated that the goal is to hear from those who submitted comments and allow Working Group members and others an opportunity to ask questions.

Benjamin Schmidt (Radian Guaranty Inc.) commented that within Section 10B(1) when an insurer establishes its contingency reserve in a segregated account or collateral in a trust that serves the same function as a contingency reserve in the case of a reinsurer. The reinsurers are not filing statutory financial statements and would not have the ability to establish a contingency reserve. The MGC asked for clarification on this provision. Malm asked for clarification regarding who has control of the trust if the reinsurer establishes it. Schmidt commented that it is clarified in the reinsurance agreement that if the reinsurer does not pay its obligations, the mortgage insurer would have access to pay from that account. Heidi Heyrman (Mortgage Guaranty Insurance Corporation) commented that the reinsurers would have no ability to transfer or withdraw money from the trust account. Malm questioned whether it would be possible for other states to not have that requirement and the reinsurance agreement to be set up without that type of collateral. Schmidt indicated that it would be possible; in that case, there would not be credit for the contingency reserve, and that company would set up a contingency reserve. He indicated that the concern with the current language is that only a mortgage insurer would be able to establish that contingency reserve.

Schmidt commented that Section 12D(1) referenced the chief executive officer (CEO) and the chief financial officer (CFO), and some mortgage insurers do not have those positions. Those titles would be at the parent level. The MGC recommends using the term "highest ranking officer" or "highest ranking financial officer."

Schmidt stated that within Section 14 on policy forms and policy rates filed, the July 2000 version of the model has a note on open rating states that would allow a state that adopts the model to delete a portion of the provision and insert its own rating law. He indicated that in certain states, they would want mortgage insurance to be treated as any other line in their state. He commented that this flexibility might allow for more states to adopt the model.

Schmidt commented that regarding to Section 21, the inclusion would allow for less frivolous lawsuits, and there are means for redress if warranted. He stated that frivolous lawsuits weaken the financial condition of companies due to the significant legal fees. There is the risk of plaintiffs' attorneys misconstruing the regulatory intent of these provisions. Schmidt stated that the comment letter regarding this section stated that the state insurance regulators do not have an adequate track record of bringing mortgage insurer enforcement actions. He stated that this accretion overlooks that insurance departments have mechanisms for the enforcement of their laws other than litigation, such as periodic market examinations and desk reviews. Further, he indicated that the no private right of action does not preempt other remedial statutes and causes of action that could apply to the same underlying conduct. He stated that it is not an immunity provision for the mortgage insurers, and it would not insulate the mortgage insurer from being sued for breach of contract of the insurance policy, bad faith, separate federal and state remedial statutes, or common law claims.

Debra Darcy (Consumer Representative) indicated that she would speak on behalf of the comment letter submitted by the CEJ. She commented that Section 21 should be deleted due to the structure of the market, the history of practices that the model law addresses, and the role that some institutions played in the Great Recession. She stated that the structure of the private mortgage insurance market, in which private mortgage insurers sell their product to lenders rather than directly to consumers, meets the NAIC's definition of reverse competition. As such, there need to be extra prohibitions to ensure that there are adequate economic incentives for insurers to follow the provisions in the model law. Darcy further stated that without a private right of action, there could be new tools to sell products in the future that are now not specifically prohibited in the model law. A private right of action ensures that a private mortgage insurer can be held liable when they utilize a practice that is not specifically prohibited in the model but would ultimately harm consumers, the housing market, or the economy. Darcy stated that Section 21 is one-sided; i.e., lenders and consumers cannot sue the private mortgage insurer. However, insurers can sue and have sued lenders and consumers. Darcy also indicated that the assertion that Section 21 will stop frivolous lawsuits neglects the fact that cases have been brought against private mortgage insurers in the past that have not been frivolous. Those cases resulted in penalties and practices that have been changed due to the lawsuits.

Amy Bach (United Policyholders) also spoke on behalf of the comment letter submitted by the CEJ. Regarding Section 21, she commented that curtailing a right that exists in the law today would strain state insurance regulator resources as regulatory agencies do not have the ability to prosecute every consumer violation reported. Bach indicated that the fact that there is another channel of enforcement provides a critical source of consumer protection.

Birny Birnbaum (CEJ) commented that there is no other personal lines model law that has a provision barring a private right of action. He indicated that is because consumers of personal line products need to have some sort of recourse. He stated that the personal lines markets are expansive, further supporting that state insurance regulators need assistance in monitoring these markets.

Obusek indicated that the Drafting Group will reconvene in the coming weeks to arrive at a third and final draft of Model #630. She stated that it is anticipated that a new draft will be available by the end of April, with the intent to hold an open Working Group call in either late April or early May.

### 3. Discussed Other Matters

Theresa Cameron (Arch Mortgage Insurance Company) summarized a comment letter from mortgage insurers regarding a new proposed U.S. Securities and Exchange Commission (SEC) rule that seeks to prevent conflicts of interest in conjunction with synthetic asset-backed securities (ABS). She indicated that the SEC rule could inadvertently prohibit mortgage insurers from utilizing mortgage insurance-linked notes (MILNs) because

synthetic ABS are not explicitly defined. Since 2015, mortgage insurers have used MILNs as a reinsurance mechanism to disperse and mitigate risks in the ordinary course of business. She requested that the NAIC support that MILNs are an important risk management tool and are encouraged by state insurance regulators to manage risk, provide protection, and enhance mortgage insurers' capital position.

Obusek indicated that the mortgage insurers' comment letter regarding the concerns about the SEC rule has been sent to the appropriate NAIC staff and will be presented to the Government Relations (EX) Leadership Council to coordinate communication with the SEC.

Having no further business, the Mortgage Guaranty Insurance (E) Working Group adjourned.

**Section 1. Title**

This Act may be cited as the Mortgage Guaranty Insurance Act.

**Section 2. Definitions**

The definitions set forth in this Act shall govern the construction of the terms used in this Act but shall not affect any other provisions of the code.

~~A.~~ A. “Authorized ~~real estate security,~~” ~~for the purpose of this Act,~~ Real Estate Security” means ~~an:~~

~~(1)~~ An amortized note, bond or other ~~evidence~~ instrument of indebtedness, ~~except for reverse mortgage loans made pursuant to [insert citation of state law that authorizes reverse mortgages] of the real property law, evidencing a loan,~~ not exceeding ~~ninety-five~~ one hundred three percent (~~95~~ 103%) of the fair market value of the real estate, secured by a mortgage, deed of trust, or other instrument that constitutes, or is equivalent to, a first lien or junior lien or charge on real estate, with any percentage in excess of one hundred percent (100%) being used to finance the fees and closing costs on such indebtedness; provided:

~~(a) (1)~~ The real estate loan secured in this manner is one of a type that a ~~bank, savings and loan association, or an insurance company~~ creditor, which is supervised and regulated by a department of ~~this~~ any state ~~or territory of the U.S~~ or an agency of the federal government, is authorized to make, or would be authorized to make, disregarding any requirement applicable to such an institution that the amount of the loan not exceed a certain percentage of the value of the real estate;

MO-630-1

Mortgage Guaranty Insurance Model Act

- (2b) ~~The improvement on loan is to finance the acquisition, initial construction or refinancing of real estate that is a:~~
- ~~(i) Residential building designed for occupancy by not more than four families, a one-family residential condominium or unit in a planned unit development, or any other one-family residential unit as to which title may be conveyed freely; or~~
  - ~~(ii) Mixed-use building with only one non-residential use and one one-family dwelling unit; or~~
  - ~~(iii) Building or buildings designed for occupancy as specified by Subsections A(1) and A(2) of this section; and by five (5) or more families or designed to be occupied for industrial or commercial purposes.~~

~~(c32) The lien on the real estate may be subject to and subordinate to the following:~~

- ~~(a) The lien of any public bond, assessment or tax, when no installment, call or payment of or under the bond, assessment or tax is delinquent; and~~
- ~~(b) Outstanding mineral, oil, water or timber other liens, leases, rights, rights of way, easements or rights of way of support, sewer rights, building restrictions or other restrictions or easements, covenants, conditions or regulations of use, or outstanding leases upon that do not impair the use of the real property under which rents or profits are reserved to the owner thereof state for its intended purpose.~~

~~(2) Notwithstanding the foregoing, a loan referenced in Section 2(A)(1) of this Act may exceed 103% of the fair market value of the real estate in the event that the Mortgage Guaranty Insurance company has approved for loss mitigation purposes a request to refinance a loan that constitutes an existing risk in force for the company.~~

~~(3) An amortized note, bond or other instrument of indebtedness evidencing a loan secured by an ownership interest in, and a proprietary lease from, a corporation or partnership formed for the purpose of the cooperative ownership of real estate and which at the time the loan does not exceed one hundred three percent (103%) of the fair market value of the ownership interest and proprietary lease, if the loan is one of a type that meets the requirements of Section 2A(1)(a). In this Act, unless the context clearly requires otherwise, any reference to a mortgagor shall include an owner of such an ownership interest as described in this paragraph and any reference to a lien or mortgage shall include the security interest held by a lender in such an ownership interest.~~

~~B. “Bulk Mortgage Guaranty Insurance” means mortgage guaranty insurance that provides coverage under a single transaction on each mortgage loan included in a defined portfolio of loans that have already been originated.~~

~~CP. “Certificate of Insurance” means a document issued by a mortgage guaranty insurance company to the initial insured to evidence that it has insured a particular Authorized Real Estate Security under a Master Policy, identifying the and which describes the particular characteristics, terms, and conditions and representations, in addition to those contained in the Master Policy and endorsements, applicable to such coverage of that insured Authorized Real Estate Security.~~

~~D. “Commissioner” means [insert the title of the principal insurance supervisory official] of this state, or the [insert the title of the principal insurance supervisory official]’s deputies or assistants, or any employee of the [insert name of the principal insurance regulatory agency] of this state acting in the [insert the title of the principal insurance supervisory official]’s name and by the [insert the title of the principal insurance supervisory official]’s delegated authority.~~

~~E. “Contingency Reserve” means an additional premium reserve established to protect policyholders against the effect of adverse economic cycles.~~

~~F~~

NAIC Model Laws, Regulations, Guidelines and Other Resources—February 2023

- “Domiciliary Commissioner” means the principal insurance supervisory official of the jurisdiction in which a mortgage guaranty insurance company is domiciled, or that principal insurance supervisory official’s deputies or assistants, or any employee of the regulatory agency of which that principal insurance supervisory official is the head acting in that principal insurance supervisory official’s name and by that principal insurance supervisory official’s delegated authority.
- G. “Effective Guaranty” refers to the assumed backing of existing or future holders of securities by virtue of their issuer’s conservatorship or perceived access to credit from the U.S. Treasury, as opposed to the direct full faith and credit guarantee provided by the U.S. government.
- H. “Loss” refers to losses and loss adjustment expenses, excluding costs which have already been expensed.
- I. “Master Policy” means a document issued by a mortgage guaranty insurance company to a creditor or mortgage holding entity that establishes the terms and conditions of mortgage guaranty insurance coverage provided thereunder, including any endorsements thereto.
- J. “Mortgage Guaranty Insurance” is:
- (1) Insurance against financial loss by reason of nonpayment of principal, interest or other sums agreed to be paid under the terms of any note or bond or other evidence of indebtedness secured by a mortgage, deed of trust, or other instrument constituting a lien or charge on real estate, provided the improvement on the real estate is a residential building or a condominium unit or buildings designed for occupancy by not more than four families; Authorized Real Estate Security; and
- (2) Insurance against financial loss by reason of nonpayment of principal, interest or other sums agreed to be paid under the terms of any note or bond or other evidence of indebtedness secured by a mortgage, deed of trust, or other instrument constituting a lien or charge on real estate, providing the improvement on the real estate is a building or buildings designed for occupancy by five (5) or more families or designed to be occupied for industrial or commercial purposes; and
- (3) Insurance against financial loss by reason of nonpayment of rent or other sums agreed to be paid under the terms of a written lease for the possession, use or occupancy of real estate, provided the improvement on the real estate is a building or buildings designed to be occupied for industrial or commercial purposes.
- K. “Mortgage Guaranty Quality Control Program” means an early detection warning system for potential underwriting compliance issues which could potentially impact solvency or operational risk within a mortgage guaranty insurance company.
- L. “NAIC” means the National Association of Insurance Commissioners.
- M. “Pool Mortgage Guaranty Insurance” means mortgage guaranty insurance that provides coverage under a single transaction or a defined series of transactions on a defined portfolio of loans for losses up to an aggregate limit.
- N. “Right of Rescission” represents a remedy available to a mortgage guaranty insurance company to void a certificate and restore parties to their original position, based on inaccurate information provided to, or information concealed from, the mortgage guaranty insurance company in the insurance application based on inaccurate, incomplete or misleading information provided to, or information omitted or concealed from, the Mortgage Guaranty Insurance company in connection with the insurance application, resulting in an insured loan that did not meet the Mortgage Guaranty Insurance company’s eligibility requirements in effect on the date of submission of the insurance application, resulting in an insured loan which does not meet acceptable risk tolerance requirements in accordance with the mortgage guaranty insurance company’s underwriting standards.
- O. “Risk in Force” mean the mortgage guaranty insurance coverage percentage applied to the unpaid principal balance.

MO-630-3

## Mortgage Guaranty Insurance Model Act

**Section 3. Insurer's Authority to Transact Business**

A company may not transact the business of Mortgage Guaranty Insurance until it has obtained a Certificate of authority from the Commissioner.

**Section 4. Mortgage Guaranty Insurance as Monoline**

A Mortgage Guaranty Insurance company that anywhere transacts any class of insurance other than Mortgage Guaranty Insurance is not eligible for the issuance of a Certificate of Authority to transact Mortgage Guaranty Insurance in this state nor for the renewal thereof.

**Section 5. Risk Concentration**

A Mortgage Guaranty Insurance company shall not expose itself to any Loss on any one Authorized Real Estate Security risk in an amount exceeding ten percent (10%) of its surplus to policyholders. Any risk or portion of risk which has been reinsured shall be deducted in determining the limitation of risk.

**Section 6. Capital and Surplus**

A. **Initial and Minimum Capital and Surplus Requirements.** A Mortgage Guaranty Insurance company shall not transact the business of Mortgage Guaranty Insurance unless, if a stock insurance company, it has paid-in capital of at least \$~~10~~10,000,000 and paid-in surplus of at least \$~~15~~15,000,000, or if a mutual insurance company, a minimum initial surplus of \$~~25~~25,000,000. A stock insurance company or a mutual insurance company shall at all times thereafter maintain a minimum policyholders' surplus of at least \$~~1,500~~20,000,000.

B. **Minimum Capital Requirements Applicability.** A Mortgage Guaranty Insurance company formed prior to passage of this Act may maintain the amount of capital and surplus or minimum policyholders' surplus previously required by statute or administrative order for a period not to exceed twelve months following the effective date of the adoption of this Act.

C. **Minimum Capital Requirements Adjustments.** The Domiciliary Commissioner may by order reduce the minimum amount of capital and surplus or minimum policyholders' surplus required under Section 6A under the following circumstances:

(1) For an affiliated reinsurer that is a Mortgage Guaranty Insurance company and that is or will be engaged solely in the assumption of risks from affiliated Mortgage Guaranty Insurance companies, provided that the affiliated reinsurer is in run-off and, in the Domiciliary Commissioner's opinion, the business plan and other relevant circumstances of the affiliated reinsurer justify the proposed reduction in requirements.

(2) For Mortgage Guaranty Insurance companies that are in run-off and not writing new business that is justified in a business plan, in the Domiciliary Commissioner's opinion.

**Section 4. Insurer's Authority to Transact Business**

~~No mortgage guaranty insurance company may issue policies until it has obtained from the commissioner of insurance a certificate setting forth that fact and authorizing it to issue policies.~~

**Section 57. Geographic Concentration**

A. A Mortgage Guaranty Insurance company shall not insure loans secured by a single risk in excess of ten percent (10%) of the company's aggregate capital, surplus and Contingency Reserve.

B. No Mortgage Guaranty Insurance company shall have more than twenty percent (20%) of its total insurance in force in any one Standard Metropolitan Statistical Area (SMSA), as defined by the ~~United States~~U.S Department of Commerce.

MO-630-4

NAIC Model Laws, Regulations, Guidelines and Other Resources—February 2023

- C. The provisions of this section shall not apply to a Mortgage Guaranty Insurance company until it has possessed a Certificate of Authority in this state for three (3) years.

### **Section 68. Advertising**

No Mortgage Guaranty Insurance company or an agent or representative of a Mortgage Guaranty Insurance company shall prepare or distribute or assist in preparing or distributing any ~~brochure, pamphlet, report or any form of~~ advertising media or communication to the effect that the real estate investments of any financial institution are “insured investments,” unless the ~~brochure, pamphlet, report or~~ advertising media or communication clearly states that the loans are insured by Mortgage Guaranty Insurance companies possessing a ~~certificate~~Certificate of Authority to transact Mortgage Guaranty Insurance in this state or are insured by an agency of the federal government, ~~as the case may be.~~

### **Section 79. Investment Limitation**

Investments in notes or other evidence of indebtedness secured by a mortgage or other liens upon residential real property shall not be allowed as assets in any determination of the financial condition of a mortgage guaranty insurer. A Mortgage Guaranty Insurance company shall not invest in notes or other evidence of indebtedness secured by a mortgage or other lien upon real property. This section shall not apply to obligations secured by real property, or contracts for the sale of real property, which obligations or contract of sale are acquired in the course of ~~the~~ good faith settlement of claims under policies of insurance issued by the Mortgage Guaranty Insurance company, or in the good faith disposition of real property so acquired. This section shall not apply to investments backed by the full faith and credit of the U.S. Government or, with the approval of the Domiciliary Commissioner, to investments with the Effective Guaranty of the U.S. Government. This section shall not apply to investments held by a Mortgage Guaranty Insurance company prior to the passage of this Act.

### **Section 8. Coverage Limitation**

~~A mortgage guaranty insurance company shall limit its coverage net of reinsurance ceded to a reinsurer in which the company has no interest to a maximum of twenty five percent (25%) of the entire indebtedness to the insured or in lieu thereof, a mortgage guaranty insurance company may elect to pay the entire indebtedness to the insured and acquire title to the authorized real estate security.~~

### **Section 10. Filing Requirements Reserve Requirements**

- A. Unearned premium Reserves, Loss Reserves, and Premium Deficiency Reserves. Financial reporting will be prepared in accordance with the Accounting Practices and Procedures Manual and Annual Financial Statement Instructions of the National Association of Insurance Commissioners.
- B. Contingency Reserve. Each Mortgage Guaranty Insurance ~~as Monoline~~ company shall establish a Contingency Reserve subject to the following provisions:
- A. ~~A mortgage guaranty insurance~~
- (1) The Mortgage Guaranty Insurance company shall make an annual contribution to the Contingency Reserve which in the aggregate shall be equal to fifty percent (50%) of the direct earned premiums reported in the annual statement or net earned premiums reported if the reinsurer maintains the contingency reserve.
  - (2) Except as provided within this Act, a Mortgage Guaranty Insurance company’s contributions to the Contingency Reserve made during each calendar year shall be maintained for a period of 120 months, to provide for reserve buildup. The portion of the Contingency Reserve established and maintained for more than 120 months shall be released and shall no longer constitute part of the Contingency Reserve.
  - (3) Withdrawals may be made from the Contingency Reserve on a first-in, first-out basis or such other basis, with the prior written approval of the Domiciliary Commissioner, based on the amount by which:
    - (a) Incurred losses and loss adjustment expenses exceed 35% of the direct earned premium in any year. Provisional withdrawals may be made from the Contingency Reserve on a quarterly basis

MO-630-5

## Mortgage Guaranty Insurance Model Act

in an amount not to exceed 75% of the withdrawal as adjusted for the quarterly nature of the withdrawal, with prior written approval of the Domiciliary Commissioner; or

(b) ~~With~~ Upon the approval of the Domiciliary Commissioner and 30-day prior notification to non-domiciliary commissioners, a mortgage guaranty insurer may withdraw from the Contingency Reserve any amounts which are in excess of the ~~minimum policyholder's position~~ requirements of Section 15 as required in (insert section of the Mortgage Guaranty Insurance model law requiring minimum policyholder's position) as filed with the most recently filed annual statement.

(i.) The Mortgage Guaranty Insurance company's Domiciliary Commissioner may consider loss developments and trends in reviewing a request for withdrawal. If any portion of the Contingency Reserve for which withdrawal is requested is maintained by a reinsurer or in a segregated account or trust of a reinsurer, the Domiciliary Commissioner may also consider the financial condition of the reinsurer.

C. Miscellaneous.

(1) ~~Whenever the laws of any jurisdiction in which a Mortgage Guaranty Insurance company subject to the requirement of this Act is also licensed to transact Mortgage Guaranty Insurance require a larger unearned premium reserve or Contingency Reserve in the aggregate than that set forth herein, the establishment of the larger unearned premium reserve or Contingency Reserve in the aggregate shall be deemed to be in compliance with this Act.~~

(1) Unearned premium reserves and Contingency Reserves on risks insured before the effective date of this Act may be computed and maintained as required previously.

Section 11. Reinsurance

A. **Prohibition of Captive Reinsurance.** A Mortgage Guaranty Insurance company shall not enter into captive reinsurance arrangements which involve the direct or indirect ceding of any portion of its insurance risks or obligations to a reinsurer owned or controlled by an insured; any subsidiary or affiliate of an insured; an officer, director or employee of an insured or any member of their immediate family; a corporation, partnership, trust, trade association in which an insured is a member, or other entity owned or controlled by an insured or an insured's officer, director or employee or any member of their immediate family that has a financial interest; or any designee, trustee, nominee or other agent or representative of any of the foregoing.

B. **Subterfuge in Reinsurance Prohibited Cessions.** A mortgage guaranty insurer may, by written contract, reinsure any insurance that it transacts, except that no mortgage guaranty insurer may enter into reinsurance arrangements designed to circumvent the compensating control provisions of Section 17 or the Contingency Reserve requirement of Section 10. The unearned premium reserve, and the loss reserves, and the Contingency Reserve required by Section 10 shall be established and maintained by the direct insurer or by the assuming reinsurer so that the aggregate reserves shall be equal to or greater than the reserves required by direct writer. A reinsurer that is not a Mortgage Guaranty Insurance company is not required to establish a Contingency Reserve provided the reinsurance obligations are not supported by a reserve maintained by the reinsurer will not be entitled to reinsurance credit unless the reinsurance obligations are supported by collateral complying with the requirements of [insert provisions defining acceptable collateral for non-admitted reinsurers] and [The cession shall be accounted for as a retroactive reinsurance agreement as provided in the accounting practices and procedures prescribed or permitted by the applicable accounting practices and procedures manual of the National Association of Insurance Commissioners.]

Section 12. Sound Underwriting Practices

A. **Underwriting Review and Approval Required.** All Certificates of Mortgage Guaranty Insurance, excluding policies of reinsurance, shall be written based on an assessment of evidence that prudent underwriting standards have been met by the originator of the mortgage. Delegated underwriting decisions shall be reviewed based on a reasonable method of sampling of post-closing loan documentation to ensure compliance with the Mortgage Guaranty Insurance company's underwriting standards

MO-630-6

NAIC Model Laws, Regulations, Guidelines and Other Resources—February 2023

**B. Quality Control Reviews.** Quality control reviews for Bulk Mortgage Guaranty Insurance and Pool Mortgage Guaranty Insurance shall be based on a reasonable method of sampling of post-closing loan documentation for delegated underwriting decisions to ensure compliance with the representations and warranties of the creditors or creditors originating the loans and with the Mortgage Guaranty Insurance company's underwriting standards.

**C. Minimum Underwriting Guidelines Standards.** Mortgage Guaranty Insurance companies shall establish formal underwriting guidelines standards which set forth the basis for concluding that prudent underwriting standards have been met.

**D. Underwriting Guideline Review and Approval.** A Mortgage Guaranty Insurance company's underwriting guidelines standards shall be:

- (1) Reviewed and approved by executive management, including but not limited to the chief executive officer and the chief financial officer; and
- (2) Reviewed with either the board of directors or a board committee designated to provide oversight of underwriting policy and ratification of material changes under a written resolution of the board of directors setting forth the scope of review for such oversight and ratification; and
- (23) Communicated across the organization to promote consistent business practices with respect to underwriting.

**E. Maintenance of Minimum Underwriting Standards and Documentation Generally.** Underwriting standards, including but not limited to review and approval procedures, minimum underwriting guidelines, and the collection and retention of underwriting documentation shall be in accordance with:

**Minimum mortgage documentation standards;**

**Loan program or type qualification requirements;**

**Minimum borrower repayment qualification requirements; and**

**Minimum property marketability qualifications;**

**Notification of Changes in Underwriting Guidelines Standards.** OA Mortgage Guaranty Insurance company shall provide notice to the Commissioner of changes to its underwriting guidelines as follows:

On or before March 1 of each year, a Mortgage Guaranty Insurance company shall file with the Domiciliary Commissioner an annual summary of material changes into its underwriting standards and an analysis of the changes guidelines implemented during the course of the immediately preceding year along with references to supporting hardcopy or website documentation.

The annual summary of material underwriting guideline standard changes should include any change associated with loan to value ratios, debt to income ratios, borrower credit standing or maximum loan amount which has resulted in a material impact on net premium written of +/- 5% from prior year to date.

**F. Nondiscrimination.** In extending or issuing Mortgage Guaranty Insurance, a Mortgage Guaranty Insurance company may not discriminate on the basis of the applicant's sex, marital status, race, color, creed, national origin, disability, or age or solely on the basis of the geographic location of the property to be insured unless the discrimination related to geographic location is for a business purpose that is not a mere pretext for unfair discrimination; or the refusal, cancellation, or limitation of the insurance is required by law or regulatory mandate.

**Drafting Note:** States and jurisdictions should consult their constitution or comparable governance documents and applicable civil rights legislation to determine if broader protections against unacceptable forms of discrimination should be included in Section 12G.

MO-630-7

## Mortgage Guaranty Insurance Model Act

**Section 13. Quality Assurance**

- A. **Quality Assurance Program.** A Mortgage Guaranty Insurance company shall establish a formal internal Mortgage Guaranty Quality Assurance Program, which provides an early detection warning system as it relates to potential underwriting compliance issues which could potentially impact solvency or operational risk. This Mortgage Guaranty Quality Assurance Program shall provide for the documentation, monitoring, evaluation and reporting on the integrity of the ongoing loan origination process based on indicators of potential underwriting strategy and control inadequacies or non-compliance. This shall include, but not limited to:
- (1) **Segregation of Duties.** Administration of the quality assurance program shall be delegated to designated risk management, quality assurance or internal audit personnel, who are technically trained and independent from underwriting activities that they audit-related to loan origination, pricing, underwriting and operations.
  - (2) **Senior Management Oversight.** Quality control personnel shall provide periodic quality assurance control reports to an enterprise risk management committee or other equivalent senior management level oversight body.
  - (3) **Board of Director Oversight.** Quality assurance control personnel shall provide periodic quality assurance control reports to the board of directors or a designated committee of directors established to facilitate board of director oversight.
  - (4) **Policy and Procedures Documentation.** Mortgage Guaranty Quality Assurance Control Program, excluding policies and procedures of reinsurance, shall be formally established and documented to define scope, roles and responsibilities.
  - (5) **Underwriting Risk Review.** Quality assurance control review shall include an examination of underwriting risks including categorization classification of risk written unless and until the insurer's exposure and compliance with risk tolerance levels.
  - (6) **Lender Performance Reviews.** Quality assurance control monitoring provisions shall include an assessment of lender performance expectations.
  - (7) **Underwriting Performance Reviews.** Quality assurance control monitoring provisions shall assess compliance with underwriting guidelines standard.
  - (8) **Problem Loan Trend Reviews.** Quality assurance control monitoring provisions shall assess prospective risks associated with timely loan payment including delinquency, default inventory, foreclosure and persistency trends.
  - (9) **Underwriting System Change Oversight.** Underwriting system program changes shall be monitored to ensure the integrity of underwriting and pricing programs, which impact automated underwriting system decision making.
  - (10) **Pricing and Performance Oversight.** Pricing controls shall be monitored to ensure that business segment pricing supports applicable performance goals.
  - (11) **Internal Audit Validation.** Periodic internal audits shall be insurer has conducted to validate compliance with the Mortgage Guaranty Quality Assurance Control Program.
- B. **Regulator Access and Review of Quality Assurance Program.** The Commissioner shall be provided access to an insurer's Mortgage Guaranty Quality Assurance Control Program for review at any reasonable time upon request and during any financial regulatory examination. Nothing herein shall be construed to limit a regulator's right to access any and all of the records of an insurer in an examination or as otherwise necessary to meet regulatory responsibilities.

**Section 14.****Section 11. Policy Forms and Premium Rates Filed**

MO-630-8

NAIC Model Laws, Regulations, Guidelines and Other Resources—February 2023

**A. Policy Forms.**

~~A. All policy forms and endorsements, and modifications (excluding Bulk Mortgage Guaranty Insurance and Pool Mortgage Guaranty Insurance) shall be filed with and be subject to the approval of the commissioner. With respect to owner-occupied, single-family dwellings, the mortgage guaranty insurance or a mixed-use building described in Section 2A(1)(b), which is owner-occupied at the time of loan origination and for at least 50% of the days within the twelve (12) consecutive months prior to borrower default, the Mortgage Guaranty Insurance policy shall provide that the borrower shall not be liable to the insurance company for any deficiency arising from a foreclosure sale.~~

B. **Premiums and Rates.** ~~In addition, e~~ Each Mortgage Guaranty Insurance company (excluding Bulk Mortgage Guaranty Insurance and Pool Mortgage Guaranty Insurance) shall file with the ~~department commissioner~~ the rate to be charged ~~and the premium~~ including all modifications of rates and premiums to be paid by the policyholder.

C. **Schedule of Premium Charges. Premium Charges.** Every Mortgage Guaranty Insurance company shall make available to insureds the premium charges for Mortgage Guaranty Insurance policies via a company website or an integration with a third-party system. The premium rate provided shall show the entire amount of premium charge for the type of Mortgage Guaranty Insurance policy to be issued by the insurance company. Every Mortgage Guaranty Insurance company shall adopt, print and make available a schedule of premium charges for Mortgage Guaranty Insurance policies. Premium charges made in conformity with the provisions of this Act shall not be deemed to be interest or other charges under any other provision of law limiting interest or other charges in connection with mortgage loans. The schedule shall show the entire amount of premium charge for each type of Mortgage Guaranty Insurance policy issued by the insurance company.

**Drafting Note:** Open rating states may delete a portion or all of this provision and insert their own rating law.

**Section 4215. Outstanding Total Liability Risk in Force and Waivers**

A. **Risk in Force.** A Mortgage Guaranty Insurance company shall not at any time have outstanding a ~~total liability~~ Risk in Force, net of reinsurance, under its aggregate Mortgage Guaranty Insurance policies exceeding twenty-five (25) times its capital, surplus and Contingency Reserve. In the event that any Mortgage Guaranty Insurance company has outstanding total ~~liability Risk in Force~~ exceeding twenty-five (25) times its capital, surplus and Contingency Reserve, it shall cease transacting new mortgage guaranty business until such time as its total ~~liability Risk in Force~~ no longer exceeds twenty-five (25) times its capital, surplus and Contingency Reserve. Total ~~outstanding liability~~ Risk in Force shall be calculated on an ~~consolidated individual entity~~ basis for all mortgage guarantee insurance companies that are part of a holding company system.

B. **Waiver.** The Commissioner may waive the requirement found in subsection (a) of this section at the written request of a mortgage guaranty insurer upon a finding that the mortgage guaranty insurer's policyholders position is reasonable in relationship to the mortgage guaranty insurer's aggregate insured Risk in Force and adequate to its financial needs. The request must be made in writing at least 90 days in advance of the date that the mortgage guaranty insurer expects to exceed the requirement of subsection (a) of this section and shall, at a minimum, address the factors specified in subsection (j) of this section.

C. **Waiver Criteria.** In determining whether a mortgage guaranty insurer's policyholders position is reasonable in relation to the mortgage guaranty insurer's aggregate insured Risk in Force and adequate to its financial needs, all of the following factors, among others, may be considered:

(1) The size of the mortgage guaranty insurer as measured by its assets, capital and surplus, reserves, premium writings, insurance in force, and other appropriate criteria.

(2) The extent to which the mortgage guaranty insurer's business is diversified across time, geography, credit quality, origination, and distribution channels.

(3) The nature and extent of the mortgage guaranty insurer's reinsurance program.

MO-630-9

## Mortgage Guaranty Insurance Model Act

(4) The quality, diversification, and liquidity of the mortgage guaranty insurer's assets and its investment portfolio.

(5) The historical and forecasted trend in the size of the mortgage guaranty insurer's policyholders position.

(6) The policyholders position maintained by other comparable mortgage guaranty insurers in relation to the nature of their respective insured risks.

(7) The adequacy of the mortgage guaranty insurer's reserves.

(8) The quality and liquidity of investments in affiliates. The Commissioner may treat any such investment as a nonadmitted asset for purposes of determining the adequacy of surplus as regards policyholders.

(9) The quality of the mortgage guaranty insurer's earnings and the extent to which the reported earnings of the mortgage guaranty insurer include extraordinary items.

(10) An independent actuary's opinion as to the reasonableness and adequacy of the mortgage guaranty insurer's historical and projected policyholders position.

(11) The capital contributions which have been infused or are available for future infusion into the mortgage guaranty insurer.

(12) The historical and projected trends in the components of the mortgage guaranty insurer's aggregate insured risk, including, but not limited to, the quality and type of the risks included in the aggregate insured risk.

**D. Authority to Retain Experts.** The Commissioner may retain accountants, actuaries, or other experts to assist the Commissioner in the review of the mortgage guaranty insurer's request submitted pursuant to subsection (i) of this section. The mortgage guaranty insurer shall bear the Commissioner's cost of retaining those persons.

**E. Specified Duration.** Any waiver shall be (i) for a specified period of time not to exceed two years and (ii) subject to any terms and conditions that the Commissioner shall deem best suited to restoring the mortgage guaranty insurer's minimum policyholders position required by subsection (a) of this section.

**Section 16. Conflict of Interest**

~~A. — A mortgage guaranty insurer may underwrite mortgage guaranty insurance on mortgages originated by the holding company system or affiliate or on mortgages originated by any mortgage lender to which credit is extended, directly or indirectly by the holding company system or affiliate only if the insurance is underwritten on the same basis, for the same consideration and subject to the same insurability requirements as insurance provided to nonaffiliated lenders. Mortgage guaranty insurance underwritten on mortgages originated by the holding company system or affiliate or on mortgages originated by any mortgage lender to which credit is extended, directly or indirectly by the holding company system or affiliate shall be limited to 50% of the insurer's direct premium written in any calendar year, or such higher percentage established in writing for the insurer in the commissioner's discretion, based on the commissioner's determination that a higher percentage is not likely to adversely affect the financial condition of the insurer. If a member of a holding company system, a~~

~~A. — A Mortgage Guaranty Insurance company licensed to transact business in this state shall not, as a condition of its Certificate of Authority, knowingly underwrite Mortgage Guaranty Insurance on mortgages originated by the holding company system or an affiliate or on mortgages originated by any mortgage lender to which credit is extended, directly or indirectly, by the holding company system or an affiliate.~~

~~B. — A Mortgage Guaranty Insurance company, the holding company system of which it is a part, or any affiliate shall not, as a condition of the Mortgage Guaranty Insurance company's Certificate of Authority, engage in activities proscribed in Sections 17 and 18.~~

MO-630-10

NAIC Model Laws, Regulations, Guidelines and Other Resources—February 2023

**Section 1714. Compensating Balances Prohibited**

Except for commercial checking accounts and normal deposits in support of an active bank line of credit, a Mortgage Guaranty Insurance company, holding company or any affiliate thereof is prohibited from maintaining funds on deposit with the lender for which the Mortgage Guaranty Insurance company has insured loans. Any deposit account bearing interest at rates less than what is currently being paid other depositors on similar deposits or any deposit in excess of amounts insured by an agency of the federal government shall be presumed to be an account in violation of this section. Furthermore, a Mortgage Guaranty Insurance company shall not use compensating balances, special deposit accounts or engage in any practice that unduly delays its receipt of monies due or that involves the use of its financial resources for the benefit of any owner, mortgagee of the real property or any interest therein or any person who is acting as agent, representative, attorney or employee of the owner, purchaser or mortgagee as a means of circumventing any part of this section.

**Section 18. Limitations on Rebates, Commissions, Charges and Contractual Preferences**

- A. **No Inducements.** Unless set force in the policy and subject to the [state equivalent of the Unfair Trade Practices Act (Model #880)], a Mortgage Guaranty Insurance company shall not pay or cause to be paid either directly or indirectly, to any owner, purchaser, lessor, lessee, mortgagee or prospective mortgagee of the real property that secures the Authorized Real Estate Security or that is the fee of an insured lease, or any interest therein, or to any person who is acting as an agent, representative, attorney or employee of such owner, purchaser, lessor, lessee or mortgagee, any commission, or any part of its premium charges or any other consideration as an inducement for or as compensation on any Mortgage Guaranty Insurance business.
- B. **No Compensation for Placement.** In connection with the placement of any Mortgage Guaranty Insurance, a Mortgage Guaranty Insurance company shall not cause or permit the conveyance of anything of value, including but not limited to any commission, fee, premium adjustment, remuneration or other form of compensation of any kind whatsoever to be paid to, or received by an insured lender or lessor; any subsidiary or affiliate of an insured; an officer, director or employee of an insured or any member of their immediate family; a corporation, partnership, trust, trade association in which an insured is a member, or other entity in which an insured or an officer, director or employee or any member of their immediate family has a financial interest; or any designee, trustee, nominee or other agent or representative of any of the foregoing, except for the value of the insurance itself or claim payments thereon as provided by contract or settlement.
- ~~A.C. **No Rebates.** Unless set force in the policy and subject to the [state equivalent of the Unfair Trade Practices Act (Model #880)], a Mortgage Guaranty Insurance company shall not make a rebate of any portion of the premium charge, as shown by the schedule required by Section 14C. No Mortgage Guaranty Insurance company shall not quote any rate or premium charge to a person that is different than that currently available to others for the same type of coverage. The amount by which a premium charge is less than that called for by the current schedule of premium charges is an unlawful rebate.~~
- ~~D. **No Undue Contractual Preferences.**~~
- ~~(1) Any contract, letter agreement, or other arrangement used to modify or clarify any terms, conditions, or interpretations of a Master Policy or Certificate shall be documented in writing.~~
- ~~(2) Any contractual or letter agreements used to modify or clarify general business practices and administrative, underwriting, claim submission or other information exchange processes shall not contain provisions which override or significantly undermine the intent of key provisions of the Mortgage Guaranty Insurance Model Act, including mortgage insurer discretion, rights and responsibilities related to:~~
- ~~(a) Underwriting standards~~
- ~~(b) Quality assurance~~
- ~~(c) Rescission~~
- E. **Sanctions.** The Commissioner may, after notice and hearing, suspend or revoke the Certificate of Authority of a Mortgage Guaranty Insurance company, or in his or her discretion, issue a cease and desist order to a Mortgage Guaranty Insurance company that pays a commission, rebate, or makes any unlawful conveyance of value under this section in willful violation of the provisions of this Act. In the event of the issuance of a

MO-630-11

## Mortgage Guaranty Insurance Model Act

cease and desist order, the Commissioner may, after notice and hearing, suspend or revoke the Certificate of Authority of a Mortgage Guaranty Insurance company that does not comply with the terms thereof.

- F. **Educational Efforts and Promotional Materials Permitted.** A Mortgage Guaranty Insurance company may engage in any educational effort with borrowers, members of the general public, and officers, directors, employees, contractors and agents of insured lenders that may reasonably be expected to reduce its risk of Loss or promote its operational efficiency and may distribute promotional materials of minor value.

**Section 19. Rescission**

The Right of Rescission shall be governed by the following:

- A. **Rescission Rights and Responsibilities.** All Mortgage Guaranty Insurance company master policies shall include a detailed description of provisions governing rescissions, re-pricing, and cancellations, which specify the insurer's and insured's rights, obligations and eligibility terms under which those actions may occur to ensure transparency.

- ~~B. **Rescission Relief Provisions.** Mortgage Guaranty Insurance company rescission relief practices shall be in accordance with the following:~~

~~A Mortgage Guaranty Insurance Master Policy may provide for mandatory rescission relief based on evidence of compliance with payment history and loan status eligibility requirements.~~

~~A Mortgage Guaranty Insurance Master Policy may offer an earlier rescission relief option based on evidence of compliance with underwriting and payment history eligibility requirements.~~

~~A Mortgage Guaranty Insurance company shall retain the Right of Rescission in instances in which a creditor or the officers, directors, employees, contractors, and agents of a creditor engage in misstatements, misrepresentations, omissions, data inaccuracies or active efforts to deceive through submission of forged or fictitious information in connection with loan origination or closing for a period of at least 10 years, based on:~~

~~Credible evidence of the existence of the above conditions; and~~

~~Credible evidence of the materiality of the above conditions to the Mortgage Guaranty Insurance company's acceptance of risk.~~

- ~~C. **Re-pricing Provisions.** A Mortgage Guaranty Insurance company shall have the option to re-price the insurance premium for coverage upon a loan, when prudent, in lieu of rescinding coverage based on the following:~~

~~Rescission relief has not been granted based on Subsection 17B;~~

~~The loan would have been eligible for coverage with alternative pricing under the underwriting standards in effect at origination; and~~

~~Misstatements, misrepresentations, omissions or inaccuracies by the creditor or the officers, directors, employees, contractors, and agents of a creditor are not considered material based on reasonable verification of appraisal value and borrower income by the Mortgage Guaranty Insurance company.~~

**Section 20. Records Retention**

- A. **Record Files.** A licensed Mortgage Guaranty Insurance company shall maintain its records in a manner which allows the Commissioner to readily ascertain the insurer's compliance with state insurance laws and rules during an examination including, but not limited to, records regarding the insurer's management, operations, policy issuance and servicing, marketing, underwriting, rating and claims practices.

~~Recordkeeping requirements shall relate to:~~

MO-630-12

NAIC Model Laws, Regulations, Guidelines and Other Resources—February 2023

~~(1) Policy records to clearly document the application, underwriting, issuance and servicing of each policy and Certificate and~~

~~(2) Claim records to clearly document the inception, handling and disposition~~

~~B. **Retention Period.** Policy and claim records shall be retained for the period during which the Certificate or claim is active plus five (5) years, unless otherwise specified by the Insurance Commissioner.~~

~~Recordkeeping requirements shall relate to:~~

~~(1) Policy records to clearly document the application, underwriting, and issuance and servicing of each Master Policy and Certificate of Insurance; and~~

~~(2) Claim records to clearly document the inception, handling and disposition~~

~~C. **Record Format.** Any record required to be maintained by a mortgage insurer may be created and stored in the form of paper, photograph, magnetic, mechanical or electronic medium.~~

~~D. **Record Maintenance.** Record maintenance under this Act shall comply with the following requirements:~~

~~Each mortgage guaranty insurance company shall establish a contingency reserve out of net premium remaining (gross premiums less premiums returned to policyholders net of reinsurance) after establishment of the unearned premium reserve. The mortgage guaranty insurance company shall contribute to the contingency reserve an amount equal to fifty percent (50%) of the remaining unearned premiums. Contributions to the contingency reserve made during each calendar year shall be maintained for a period of 120 months, except that withdrawals may be made by the company in any year in which the actual incurred losses exceed thirty five percent (35%) of the corresponding earned premiums, and no releases shall be made without prior approval by the commissioner of insurance of the insurance company's state of domicile.~~

~~If the coverage provided in this Act exceeds the limitations set forth herein, the commissioner of insurance shall establish a rate formula factor that will produce a contingency reserve adequate for the added risk assumed. The face amount of an insured mortgage shall be computed before any reduction by the mortgage guaranty insurance company's election to limit its coverage to a portion of the entire indebtedness. Insurer maintenance responsibilities shall provide for record storage in a location that will allow the records to be reasonably produced for examination within the time period required.~~

~~(21) Third-Party maintenance related responsibilities shall be set forth in a written agreement, a copy of which shall be maintained by the insurer and available for purposes of examination.~~

#### **Section 21. No Private Right of Action**

~~No Private Right of Action. Nothing in this Act is intended to, or does, create a private right of action based upon compliance or noncompliance with any of the Act's provisions. Authority to enforce compliance with this Act is vested exclusively in the Commissioner.~~

#### **Section 221**

##### ~~D. Reinsurance~~

~~Whenever a mortgage guaranty insurance company obtains reinsurance from an insurance company that is properly licensed to provide reinsurance or from an appropriate governmental agency, the mortgage guaranty insurer and the reinsurer shall establish and maintain the reserves required in this Act in appropriate proportions in relation to the risk retained by the original insurer and ceded to the assuming reinsurer so that the total reserves established shall not be less than the reserves required by this Act.~~

##### ~~E. Miscellaneous~~

MO-630-13

## Mortgage Guaranty Insurance Model Act

- ~~(1) Whenever the laws of any other jurisdiction in which a mortgage guaranty insurance company subject to the requirement of this Act is also licensed to transact mortgage guaranty insurance require a larger unearned premium reserve or contingency reserve in the aggregate than that set forth herein, the establishment of the larger unearned premium reserve or contingency reserve in the aggregate shall be deemed to be in compliance with this Act.~~
- ~~(2) Unearned premium reserves and contingency reserves shall be computed and maintained on risks insured after the effective date of this Act as required by Subsections A and C. Unearned premium reserves and contingency reserves on risks insured before the effective date of this Act may be computed and maintained as required previously.~~

**Section 17. Regulations**

The Commissioner shall have the authority to promulgate rules and regulations deemed necessary to effectively implement the requirements of this Act.

c/o Andy Daleo,  
Senior Manager – Financial Regulatory Services

**RE: MI Industry Group Comment Letter – February 2023 Draft Model Act**

Dear Ms. Obusek:

The Private Mortgage Guaranty Insurance Industry Group (“Industry Group”) submits the following comments to the *Mortgage Guaranty Insurance Model Act* exposed on February 28, 2023 (“Model Act”). Also attached for your convenience is proposed clarifying language regarding the topics addressed below.

**Section 10(B)(1) – Contingency Reserve**

In Section 10(B)(1), the Industry Group seeks to clarify the language in one sentence regarding the interaction between the contingency reserve requirement and reinsurance by stating that the reinsurer’s establishment of the contingency reserve includes maintaining separately held collateral in a trust or segregated account to support the reinsurer’s obligation. We believe that this concept comports with the intent of the Working Group in redrafting Section 10(B)(1)<sup>1</sup>, but seek added clarity in the Model Act as it is vital to the reinsurance market for mortgage guaranty insurance given that many reinsurers do not file a statutory financial statement that shows a contingency reserve liability.

Specifically, insurance-linked notes (“ILNs”) are special purposes entities that do not file statutory financial statements, and certain quota share and excess of loss reinsurance (“QSR/XOL”) counterparties are Bermuda-based reinsurers that do not file statutory financial statements. However, in both the cases of ILNs and QSR/XOL reinsurance transactions, our counterparties generally are required to maintain assets isolated in trust or segregated accounts to support their reinsurance obligation.

Similarly, the requirement that the direct insurer record a liability for funds held under the reinsurance treaty serves the same function because “funds held” is reported as a liability on the insurer’s balance sheet just like the contingency reserve. Therefore we also respectfully request to address this reinsurance treaty practice in the Model Act.

---

<sup>1</sup> An alternative approach similar to that used in the July 2000 Mortgage Guaranty Insurance Model Act also could be used here in addressing the effect of reinsurance on the contingency reserve requirement. See Industry Group Comment Letter dated November 18, 2022, at p. 7 (recommending the substitution of the term “*earned premiums net of reinsurance*” for “*direct earned premiums*”).

**Section 12(D) – Underwriting Review and Approval**

We respectfully request that the Model Act use the generic term “highest ranking” in front of “executive officer” and “financial officer” in Section 12(D) instead of “chief”. Many mortgage insurers do not have an officer with the title of chief executive officer or chief financial officer as these titles are more commonly reserved for use at the publicly traded holding company level rather than at the subsidiary level. The highest ranking executive officer of most mortgage insurers typically is the president, although this could vary by company.

**Section 14 – Policy Forms and Premium Rates Filed**

We respectfully request to retain a note similar to the Drafting Note that is part of the equivalent subsections of the July 2000 Mortgage Guaranty Insurance Model Act stating: “**Drafting Note:** *Open rating states may delete a portion or all of [this provision] and insert their own rating law.*” States that do not require companies writing other insurance lines to file rates or modifications of rates should be advised that the Model Act contemplates the flexibility to treat mortgage guaranty insurance the same as other types of insurance in that regard.

**Other Recommendations and Corrections to the Model Act**
