

Adding NAIC Multi Factor Authentication (MFA) to Google Authenticator app on your phone.

1. Use App Store (Apple IOS) or Google Play (Android) to download and install Google Authenticator App.
2. Open App on phone.
3. On computer, follow below instructions after clicking 'Set Up' under Google Authenticator (See MFA Getting Started instructions).
4. Click '**Setup**' or '**Configure factor**' button.

5. Next, select the device you have, iPhone or Android > Click '**Next**' button.

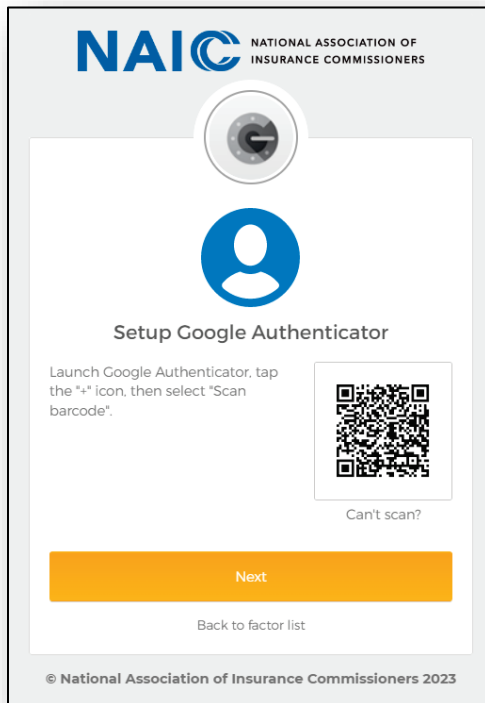

This will start the process of adding the NAIC MFA Okta account to the Google Authenticator app on your phone.

Use the Google Authenticator app on your phone to:

6. Scan the QR code displayed on your computer.

(Do Not Use a QR Scan app)

NOTE: If you have difficulty scanning the QR Code, click the Can't Scan link below the QR code and follow the instructions listed under [Can't Scan QR code](#).

7. After successfully scanning the QR code > click '**Next**' button.

8. Enter code displayed on Google Authenticator. > Click '**Verify**' button.
