

Adding NAIC Multi Factor Authentication (MFA) to Voice Call Authentication.

On computer, follow below instructions after clicking 'Set Up' under Voice Call Authentication. (See *MFA Getting Started instructions*)

Requires a telephone – desktop or cell (no app needed).

1. Click '**Setup**' or '**Configure factor**' button.
2. Enter phone number information > Click '**Call**' button.
3. Answer phone call and enter code received > Click '**Verify**' button.

NOTE: Code will be repeated twice. If call is missed or not received, click Redial and try again.
