

Aid in Support of Gender Equality and Women's Empowerment

DONOR CHARTS

March 2023

Statistics based on DAC Members' reporting on the Gender Equality Policy Marker, 2020-2021

Creditor Reporting System database

DEFINITION

THE GENDER EQUALITY POLICY MARKER

DEFINITION

An activity should be classified as gender equality focused (score Principal or Significant) if:

It is intended to advance gender equality and women's empowerment or reduce discrimination and inequalities based on sex.

CRITERIA FOR ELIGIBILITY

Gender equality is explicitly promoted in activity documentation through specific measures which:

- a) Reduce social, economic or political power inequalities between women and men, girls and boys, ensure that women benefit equally with men from the activity, or compensate for past discrimination; or
- b) Develop or strengthen gender equality or anti-discrimination policies, legislation or institutions.

This approach requires analysing gender inequalities either separately or as an integral part of agencies' standard procedures.

EXAMPLES OF TYPICAL ACTIVITIES

Examples of activities that could be marked as principal objective:

- legal literacy for women and girls;
- male networks against gender violence;
- a social safety net project which focuses specifically on assisting women and girls as a particularly disadvantaged group in a society;
- capacity building of Ministries of Finance and Planning to incorporate gender equality objectives in national poverty reduction or comparable strategies.

Such activities can target women specifically, men specifically or both women and men.

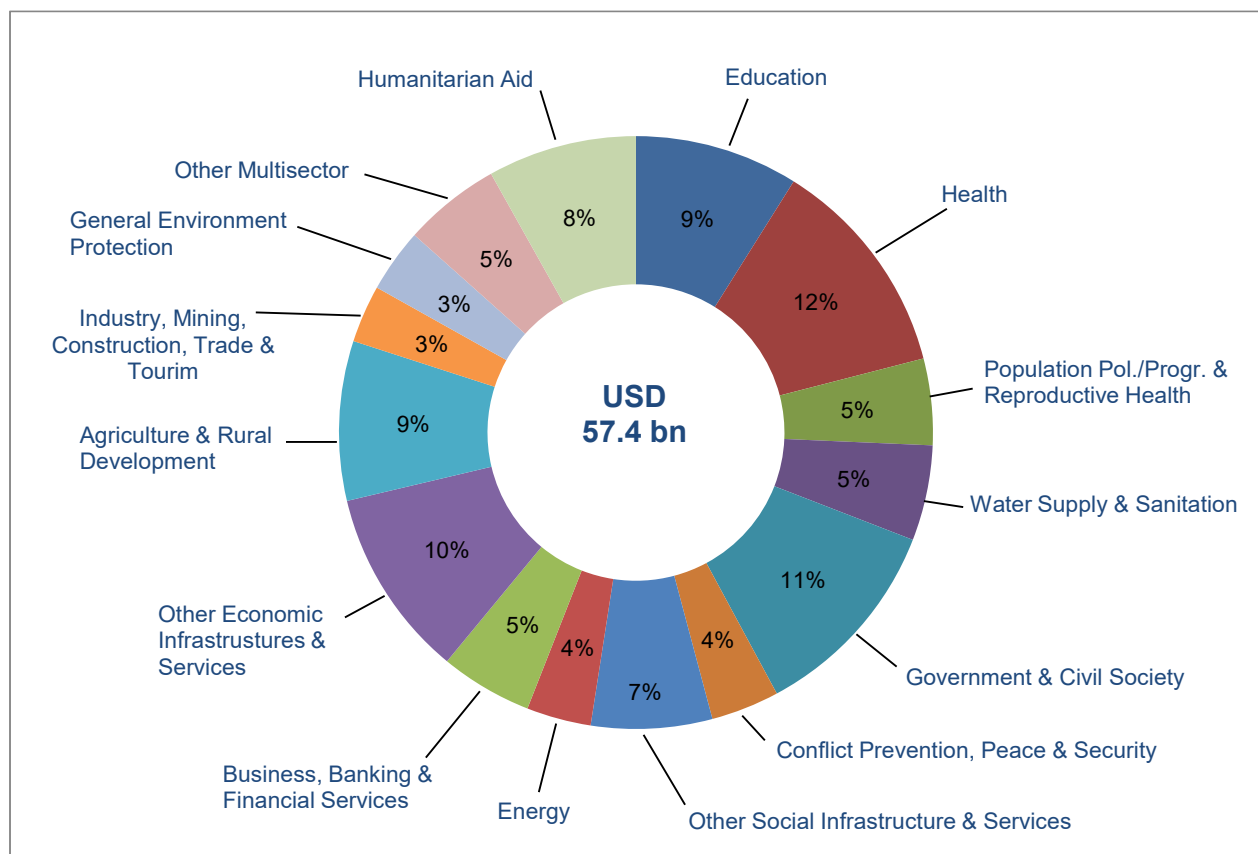

Examples of activities that could be marked as significant objective:

- activity which has as its principal objective to provide drinking water to a district or community while at the same time ensuring that women and girls have safe and easy access to the facilities;
- a social safety net project which focuses on the community as a whole and ensures that women and girls benefit equally with men and boys.

N.B. Support to women's equality organisations and institutions (**CRS sector code 15170**) scores, by definition, principal objective.

OVERVIEW

Gender Equality Focus of DAC Members' Aid by Sector Average annual value of commitments in 2020-2021 constant 2020 USD 57.4 billion

Coverage – All DAC members, except one, report on the gender equality focus of their aid. As from 2010 data, the calculation of allocable aid is based on types of aid. The calculation includes the following types of aid: sector budget support, core support to NGOs, support to specific funds managed by international organisations, pooled funding, projects, donor country personnel and other technical assistance, and scholarships in donor country. The term *bilateral allocable aid* in this publication refers to this methodology.

These charts are based on commitment data, which best reflect current policies by donors. A two-year average is given, as the focus and volume of commitments vary from year to year. DAC members use a 'marker' to identify activities that have gender equality as a principal or significant objective. Reporting has strongly improved over the years, and although some members encounter difficulties in applying the methodology, the currently available data nevertheless give a reliable indication of the extent to which those donors that report address gender equality in their aid programmes.

AID AT A GLANCE - DONORS' CHARTS

The following charts (2020-2021 average) summarise statistics on **aid focused on gender equality and women's empowerment** extended by each DAC member. Information shown includes the gender equality policy marker coverage, the top ten recipients and a sector breakdown of aid focused on gender equality and women's empowerment.

Guidance for the interpretation of the charts: The first element to take into account when analysing the data for one country or when comparing data between countries is the **coverage ratio**, i.e. the proportion of aid which is screened. A high percentage of gender equality focused aid **alone** does not mean that aid is well aligned with the gender equality policy objective, such a conclusion would only be valid for a donor with 100% coverage. When comparing data between donors, both coverage ratio and % of aid focused on gender equality and women's empowerment have to be considered. (Some members do not screen contributions that are by nature likely to fall under the "not targeted" category. Therefore, a high amount in the category "not screened" generally increases the percentage of gender equality focused aid significantly.)

Note: An activity can target gender equality as a "principal objective" or "significant objective". Principal means gender equality was an explicit objective of the activity and fundamental in its design. Significant means gender equality was an important, but secondary objective of the activity. Not targeted means that the activity was screened for promoting gender equality, but was found to not target it.

Aid in Support of Gender Equality and Women's Empowerment 2020-2021 ⁽¹⁾

Australia

An activity can target gender equality as a "principal objective" or "significant objective". Principal means gender equality was an explicit objective of the activity and fundamental in its design. Significant means gender equality was an important, but secondary, objective of the activity. Not targeted means that the activity was screened for promoting gender equality, but was not found to have targeted it.

The use of the recommended minimum criteria for the marker by some members in recent years can result in lower levels of aid reported as focused on gender equality (2).

All activities have been screened against the gender marker: the gender coverage ratio is thus **100%**.

Myanmar	12	4	38%

(1) Amounts are average commitments for 2020-2021, unless otherwise shown

(2) Handbook on the OECD-DAC Gender Equality Policy Marker 2016

(3) % of bilateral allocable aid excluding activities not screened against the gender equality marker.

Note: Statistics on gender focus exclude bilateral non-allocable aid since several members do not apply the gender marker on these forms of aid. This category includes programme assistance (e.g. general budget support...), debt relief and in-donor expenses.

Aid in Support of Gender Equality and Women's Empowerment 2020-2021 ⁽¹⁾

France

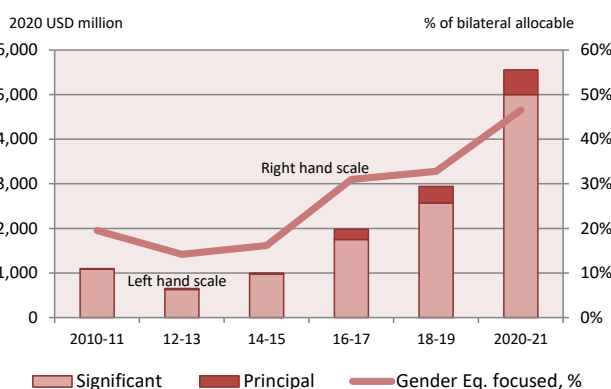

An activity can target gender equality as a "principal objective" or "significant objective". Principal means gender equality was an explicit objective of the activity and fundamental in its design. Significant means gender equality was an important, but secondary, objective of the activity. Not targeted means that the activity was screened for promoting gender equality, but was not found to have targeted it.

The use of the recommended minimum criteria for the marker by some members in recent years can result in lower levels of aid reported as focused on gender equality (2).

Not all activities have been screened against the gender marker: the coverage ratio for bilateral allocable activities is **95%**.

(1) Amounts are average commitments for 2020-2021, unless otherwise shown

(2) Handbook on the OECD-DAC Gender Equality Policy Marker 2016

(3) % of bilateral allocable aid excluding activities not screened against the gender equality marker.

Note: Statistics on gender focus exclude bilateral non-allocable aid since several members do not apply the gender marker on these forms of aid. This category includes programme assistance (e.g. general budget support...), debt relief and in-donor expenses.

Aid in Support of Gender Equality and Women's Empowerment 2020-2021 ⁽¹⁾

New Zealand

An activity can target gender equality as a "principal objective" or "significant objective". Principal means gender equality was an explicit objective of the activity and fundamental in its design. Significant means gender equality was an important, but secondary, objective of the activity. Not targeted means that the activity was screened for promoting gender equality, but was not found to have targeted it.

The use of the recommended minimum criteria for the marker by some members in recent years can result in lower levels of aid reported as focused on gender equality (2).

All activities have been screened against the gender marker: the gender coverage ratio is thus **100%**.

(2) Handbook on the OECD-DAC Gender Equality Policy Marker 2016

(3) % of bilateral allocable aid excluding activities not screened against the gender equality marker.

Note: Statistics on gender focus exclude bilateral non-allocable aid since several members do not apply the gender marker on these forms of aid. This category includes programme assistance (e.g. general budget support...), debt relief and in-donor expenses.

Aid in Support of Gender Equality and Women's Empowerment 2020-2021 ⁽¹⁾

United States

An activity can target gender equality as a "principal objective" or "significant objective". Principal means gender equality was an explicit objective of the activity and fundamental in its design. Significant means gender equality was an important, but secondary, objective of the activity. Not targeted means that the activity was screened for promoting gender equality, but was not found to have targeted it.

The use of the recommended minimum criteria for the marker by some members in recent years can result in lower levels of aid reported as focused on gender equality (2).

All activities have been screened against the gender marker: the gender coverage ratio is thus **100%**.

Gender equality focus of donor's aid programme

Sector breakdown

Percentage of gender equality focused aid by sector

Gender equality focus of sectors
2020 USD million

Top ten recipients

Gender equality focus in aid to
top ten recipients
2020 USD million

	Total aid	Total bilateral allocable aid	Gender equality focused aid (3)
Afghanistan	1,929	1,852	11%
Jordan	1,365	1,046	9%
Ethiopia	1,279	1,249	16%
Nigeria	1,024	997	26%
