

# NEWS RELEASE

BUREAU OF LABOR STATISTICS  
U. S. DEPARTMENT OF LABOR

For release 10:00 a.m. (EDT) Wednesday, May 3, 2017

USDL-17-0549

Technical information:

Employment: (202) 691-6559 • [sminfo@bls.gov](mailto:sminfo@bls.gov) • [www.bls.gov/sae](http://www.bls.gov/sae)

Unemployment: (202) 691-6392 • [lausinfo@bls.gov](mailto:lausinfo@bls.gov) • [www.bls.gov/lau](http://www.bls.gov/lau)

Media contact: (202) 691-5902 • [PressOffice@bls.gov](mailto:PressOffice@bls.gov)

## METROPOLITAN AREA EMPLOYMENT AND UNEMPLOYMENT — MARCH 2017

Unemployment rates were lower in March than a year earlier in 336 of the 388 metropolitan areas, higher in 38 areas, and unchanged in 14 areas, the U.S. Bureau of Labor Statistics reported today. Twenty-three areas had jobless rates of less than 3.0 percent, and 11 areas had rates of at least 10.0 percent. Nonfarm payroll employment increased over the year in 310 metropolitan areas, decreased in 71 areas, and was unchanged in 7 areas. The national unemployment rate in March was 4.6 percent, not seasonally adjusted, down from 5.1 percent a year earlier.

### Metropolitan Area Unemployment (Not Seasonally Adjusted)

In March, Ames, Iowa, and Boulder, Colo., had the lowest unemployment rates, 2.0 percent each, closely followed by Fort Collins, Colo., 2.1 percent. El Centro, Calif., had the highest unemployment rate, 19.2 percent. A total of 197 areas had March jobless rates below the U.S. rate of 4.6 percent, 180 areas had rates above it, and 11 areas had rates equal to that of the nation. (See table 1 and map 1.)

Ocean City, N.J., had the largest over-the-year unemployment rate decrease in March (-2.8 percentage points), closely followed by Grand Junction, Colo. (-2.7 points). Seventy-four other areas had rate declines of at least 1.0 percentage point. The largest over-the-year rate increases occurred in Beaumont-Port Arthur, Texas, and Youngstown-Warren-Boardman, Ohio-Pa. (+1.4 percentage points each).

Of the 51 metropolitan areas with a 2010 Census population of 1 million or more, Denver-Aurora-Lakewood, Colo., had the lowest unemployment rate in March, 2.4 percent. Cleveland-Elyria, Ohio, had the highest jobless rate among the large areas, 6.5 percent. Forty-three large areas had over-the-year unemployment rate decreases, six had increases, and two had no change. The largest rate decrease occurred in Chicago-Naperville-Elgin, Ill.-Ind.-Wis. (-1.8 percentage points). The largest over-the-year rate increase was in Cleveland-Elyria, Ohio (+1.0 percentage point).

### Metropolitan Division Unemployment (Not Seasonally Adjusted)

Eleven of the most populous metropolitan areas are made up of 38 metropolitan divisions, which are essentially separately identifiable employment centers. In March, San Francisco-Redwood City-South San Francisco, Calif., had the lowest unemployment rate among the divisions, 2.9 percent. Detroit-Dearborn-Livonia, Mich., had the highest division rate, 6.0 percent. (See table 2.)

In March, 33 metropolitan divisions had over-the-year unemployment rate decreases, 3 had increases, and 2 had no change. The largest rate decline occurred in Chicago-Naperville-Arlington Heights, Ill. (-2.1 percentage points). The largest over-the-year rate increase occurred in Dallas-Plano-Irving, Texas (+0.5 percentage point).

### **Metropolitan Area Nonfarm Employment (Not Seasonally Adjusted)**

In March, 310 metropolitan areas had over-the-year increases in nonfarm payroll employment, 71 had decreases, and 7 had no change. The largest over-the-year employment increases occurred in Dallas-Fort Worth-Arlington, Texas (+129,700), New York-Newark-Jersey City, N.Y.-N.J.-Pa. (+108,200), and Los Angeles-Long Beach-Anaheim, Calif. (+107,600). The largest over-the-year percentage gains in employment occurred in Auburn-Opelika, Ala., and St. George, Utah (+4.9 percent each), followed by Lake Charles, La., and Palm Bay-Melbourne-Titusville, Fla. (+4.6 percent each). (See table 3 and map 2.)

The largest over-the-year decrease in employment occurred in Lafayette, La. (-6,500), followed by Houma-Thibodaux, La. (-5,200), and Rochester, N.Y. (-4,400). The largest over-the-year percentage decrease in employment occurred in Casper, Wyo. (-6.9 percent), followed by Houma-Thibodaux, La. (-5.8 percent), and Farmington, N.M., and Lafayette, La. (-3.2 percent each).

Over the year, nonfarm employment rose in 49 of the 51 metropolitan areas with a 2010 Census population of 1 million or more and fell in Rochester, N.Y. (-4,400, or -0.8 percent), and Milwaukee-Waukesha-West Allis, Wis. (-2,300, or -0.3 percent). The largest over-the-year percentage increases in employment in these large metropolitan areas occurred in Atlanta-Sandy Springs-Roswell, Ga., and Nashville-Davidson—Murfreesboro—Franklin, Tenn. (+3.9 percent each), followed by Dallas-Fort Worth-Arlington, Texas, and Riverside-San Bernardino-Ontario, Calif. (+3.8 percent each).

### **Metropolitan Division Nonfarm Employment (Not Seasonally Adjusted)**

In March, nonfarm payroll employment increased in 34 of the 38 metropolitan divisions over the year and fell in 4. The largest over-the-year increase in employment among the metropolitan divisions occurred in Dallas-Plano-Irving, Texas (+100,300), followed by New York-Jersey City-White Plains, N.Y.-N.J. (+93,700), and Los Angeles-Long Beach-Glendale, Calif. (+84,300). The largest over-the-year decrease in employment occurred in Newark, N.J.-Pa. (-5,500), followed by Lake County-Kenosha County, Ill.-Wis. (-1,700), Lawrence-Methuen Town-Salem, Mass.-N.H. (-400), and Lynn-Saugus-Marblehead, Mass. (-300). (See table 4.)

The largest over-the-year percentage increase in employment among the metropolitan divisions occurred in Dallas-Plano-Irving, Texas (+4.1 percent), followed by Fort Lauderdale-Pompano Beach-Deerfield Beach, Fla. (+3.4 percent), and Camden, N.J., and Seattle-Bellevue-Everett, Wash. (+3.2 percent each). The largest over-the-year percentage decrease occurred in Lynn-Saugus-Marblehead, Mass. (-0.7 percent), followed by Lawrence-Methuen Town-Salem, Mass.-N.H., and Newark, N.J.-Pa. (-0.5 percent each), and Lake County-Kenosha County, Ill.-Wis. (-0.4 percent).

---

**The State Employment and Unemployment news release for April is scheduled to be released on Friday, May 19, 2017, at 10:00 a.m. (EDT). The Metropolitan Area Employment and Unemployment news release for April is scheduled to be released on Wednesday, May 31, 2017, at 10:00 a.m. (EDT).**

## Technical Note

This release presents civilian labor force and unemployment data from the Local Area Unemployment Statistics (LAUS) program (tables 1 and 2) for 388 metropolitan statistical areas and metropolitan New England City and Town Areas (NECTAs), plus 7 areas in Puerto Rico. Estimates for 38 metropolitan and NECTA divisions also are presented. Nonfarm payroll employment estimates from the Current Employment Statistics (CES) program (tables 3 and 4) are provided for the same areas. State estimates were previously published in the news release *State Employment and Unemployment*, and are republished in this release for ease of reference. The LAUS and CES programs are both federal-state cooperative endeavors.

### Civilian labor force and unemployment—from the LAUS program

**Definitions.** The civilian labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employed persons and unemployed persons on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and older. *Employed* persons are those who did any work at all for pay or profit in the reference week (typically the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. *Unemployed* persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed. The *civilian labor force* is the sum of employed and unemployed persons. The *unemployment rate* is the number of unemployed as a percent of the civilian labor force.

**Method of estimation.** Estimates for states, the District of Columbia, the Los Angeles-Long Beach-Glendale metropolitan division, and New York City are produced using time-series models with real-time benchmarking to national CPS totals. Model-based estimates are also produced for the following areas and their respective balances: the Chicago-Naperville-Arlington Heights, IL Metropolitan Division; Cleveland-Elyria, OH Metropolitan Statistical Area; Detroit-Warren-Dearborn, MI Metropolitan Statistical Area; Miami-Miami Beach-Kendall, FL Metropolitan Division; and Seattle-Bellevue-Everett, WA Metropolitan Division. Modeling improves the statistical basis of the estimation for these areas and provides important tools for analysis, such as measures of errors and seasonally adjusted series. For all other substate

areas in this release, estimates are prepared through indirect estimation procedures using a building-block approach. Estimates of employed persons, which are based largely on "place of work" estimates from the CES program, are adjusted to refer to place of residence as used in the CPS. Unemployment estimates are aggregates of persons previously employed in industries covered by state unemployment insurance (UI) laws and entrants to the labor force from the CPS. The substate estimates of employment and unemployment, which geographically exhaust the entire state, are adjusted proportionally to ensure that they add to the independently estimated model-based area totals. A detailed description of the estimation procedures is available from BLS upon request.

**Annual revisions.** Civilian labor force and unemployment data shown for the prior year reflect adjustments made at the beginning of each year, usually implemented with the issuance of January estimates. The adjusted model-based estimates typically reflect updated population data from the U.S. Census Bureau, any revisions in other input data sources, and model re-estimation. All substate estimates then are re-estimated using updated inputs and adjusted to add to the revised model-based totals. In early 2015, a new generation of time-series models was implemented, resulting in the replacement of data back to the series beginnings. At the same time, enhancements were made to the substate estimation methodology, and more timely inputs from the American Community Survey were incorporated.

### Employment—from the CES program

**Definitions.** Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2012 version of the North American Industry Classification System.

**Method of estimation.** CES State and Area employment data are produced using several estimation procedures. Where possible these data are produced using a "weighted link relative" estimation technique in which a ratio of current-month weighted employment to that of the previous-month weighted employment is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are then obtained by multiplying these ratios by the previous month's employment estimates. The weighted link relative technique is utilized for data series where the sample size meets certain statistical criteria.

For some employment series, the sample of establishments is very small or highly variable. In these cases,

a model-based approach is used in estimation. These models use the direct sample estimates (described above), combined with forecasts of historical (benchmarked) data to decrease volatility in estimation. Two different models (Fay-Herriot Model and Small Domain Model) are used depending on the industry level being estimated. For more detailed information about each model, refer to the BLS Handbook of Methods.

**Annual revisions.** Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports that are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

**Seasonal adjustment.** Payroll employment data are seasonally adjusted for states, metropolitan areas, and metropolitan divisions at the total nonfarm level. For states, data are seasonally adjusted at the supersector level as well. Revisions to historical data for the most recent 5 years are made once a year, coincident with annual benchmark adjustments.

## **Reliability of the estimates**

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding.

**Civilian labor force and unemployment estimates.** Measures of sampling error are not available for metropolitan areas or metropolitan divisions. Model-based error measures

for states are available on the BLS website at [www.bls.gov/lau/lastderr.htm](http://www.bls.gov/lau/lastderr.htm). Measures of nonsampling error are not available for the areas contained in this release. Information on recent data revisions for states and local areas is available online at [www.bls.gov/lau/launews1.htm](http://www.bls.gov/lau/launews1.htm).

**Employment estimates.** Measures of sampling error for the total private employment series are available for metropolitan areas and metropolitan divisions at [www.bls.gov/sae/790stderr.htm](http://www.bls.gov/sae/790stderr.htm). Measures of sampling error for more detailed series at the area and division level are available upon request. Measures of sampling error for states down to the supersector level are available on the BLS website at [www.bls.gov/sae/790stderr.htm](http://www.bls.gov/sae/790stderr.htm). Measures of nonsampling error are not available for the areas contained in this release. Information on recent benchmark revisions is available online at [www.bls.gov/sae/benchmark2017.pdf](http://www.bls.gov/sae/benchmark2017.pdf).

## **Area definitions**

The substate area data published in this release reflect the delineations issued by the U.S. Office of Management and Budget on July 15, 2015. Data reflect New England City and Town Area (NECTA) definitions, rather than county-based definitions, in the six New England States. A detailed list of the geographic definitions is available online at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm).

## **Additional information**

Estimates of unadjusted and seasonally adjusted civilian labor force and unemployment data for states and seven substate areas are available in the news release *State Employment and Unemployment*. Estimates of civilian labor force and unemployment for all states, metropolitan areas, counties, cities with a population of 25,000 or more, and other areas used in the administration of various federal economic assistance programs are available on the Internet at [www.bls.gov/lau/](http://www.bls.gov/lau/). Employment data from the CES program are available on the BLS website at [www.bls.gov/sae/](http://www.bls.gov/sae/).

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

# LABOR FORCE DATA

## NOT SEASONALLY ADJUSTED

**Table 1. Civilian labor force and unemployment by state and metropolitan area**

<sup>1</sup> For operational reasons, these interstate areas are listed under the state that accounts for the larger share of the population, which is different from the state that contains the first principal city.

<sup>2</sup> The area boundary does not reflect the Office of Management and Budget delineation.

<sup>p</sup> Preliminary

NOTE: Data refer to place of residence. Data for Puerto Rico are derived from a monthly household survey similar to the Current Population Survey. Area delineations are based on Office of Management and Budget Bulletin No. 15-01, dated July 15, 2015, and are available on the BLS website at <https://www.bls.gov/lau/ausmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city, unless otherwise footnoted. Estimates for the latest month are subject to revision the following month.

<sup>1</sup> These 11 areas contain all of the 38 metropolitan divisions.

<sup>2</sup> Part of the area (or division) is in one or more adjacent states.

<sup>3</sup> All of the division is in one or more adjacent states.

p Preliminary

NOTE: Data refer to place of residence. Area delineations are based on Office of Management and Budget Bulletin No. 15-01, dated July 15, 2015, and are available on the BLS website at <https://www.bls.gov/lau/lausmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city. Metropolitan divisions are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed. For Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., the metropolitan area and division titles are identical. Estimates for the latest month are subject to revision the following month.

<sup>1</sup> For operational reasons, these interstate areas are listed under the state that accounts for the larger share of the population, which is different from the state that contains the first principal city.

<sup>2</sup> Area boundary does not reflect official OMB delineation.

p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area delineations are based on Office of Management and Budget Bulletin No. 15-01, dated July 15, 2015, and are available on the BLS website at <https://www.bls.gov/lau/lausmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city, unless otherwise footnoted. Estimates for the latest month are subject to revision the following month.

<sup>1</sup> These 11 areas contain all of the 38 metropolitan divisions.

<sup>2</sup> Part of the area (or division) is in one or more adjacent states.

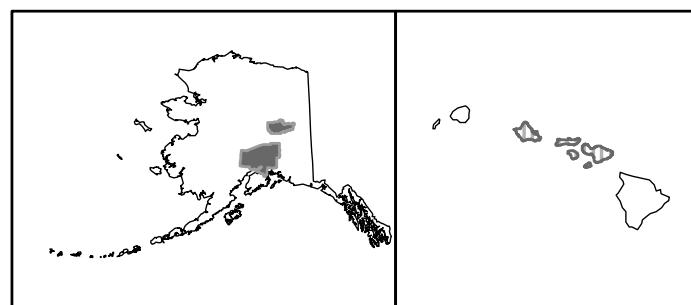

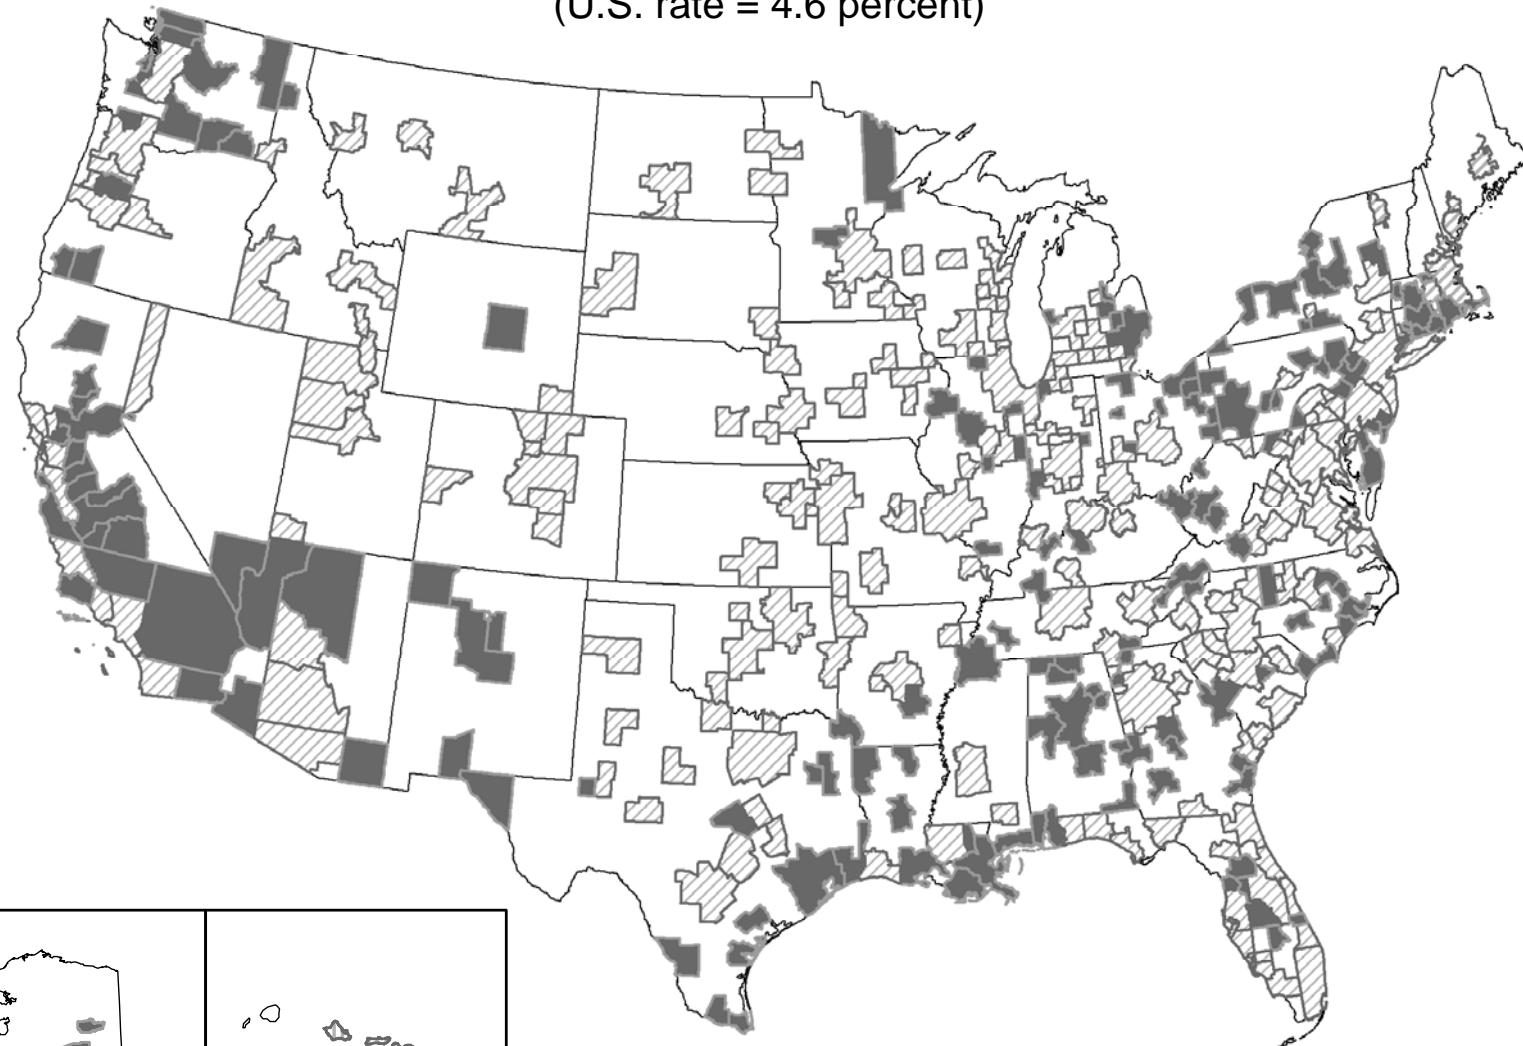

<sup>3</sup> All of the division is in one or more adjacent states.

p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are preliminary and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 15-01, dated July 15, 2015, and available at <https://www.bls.gov/lau/usmsa.htm>. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state containing the first principal city. Metropolitan divisions are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed. For Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., the metropolitan area and division titles are identical. Estimates for the latest month are subject to revision the following month.
