

TRAINING —

Boost your sustainability knowledge with best-in-class custom training programs

bluesign®

ACADEMY

Why is this service relevant for chemical companies, textile companies and brands?

Bluesign® ACADEMY has extensive expertise in technical, safety and sustainability aspects. We address the entire textile supply chain from chemical suppliers through textile manufacturers to brands. In a rapidly changing industry with ever emerging new regulatory and sustainability requirements, regular expert training sessions are important drivers to stay in the game. Feel free to get in touch... also for topics that you may not find in this flyer.

MAIN TRAINING TOPICS

- Textile chemistry & textile processes
- Corporate sustainability reporting
- Impact and footprint calculation
- Environmental KPIs
- Chemical regulations (e.g. REACH, CLP, Proposition 65, GHS, POPs, etc.)
- Restricted substances (RSLs, MRSLs, legal)
- Chemical hazard and exposure assessments
- Product stewardship and product safety
- Occupational health & safety and risk assessments
- Management systems & root cause analyses

KEY BENEFITS

- Get up to date expert knowledge and advice
