ACE AIR MANIFEST COMMUNICATION AND DATA PROCESSING SERVICES

A list of companies/persons offering air communication and data processing services available to the trade community is outlined below. Inclusions on this list do not constitute any form of an endorsement by U.S. Customs and Border Protection (CBP) as to the nature, extent or quality of the services, which may be provided.

Attachment (1) contains Communication Network Providers. These organizations have the communication capability to transmit and receive air manifest data.

Software Vendors who have developed software packages for handling air manifest data. Some of these include a communication interface. These organizations presently have the capability to transmit and receive data.

Service Centers which presently have the capability to provide carriers with an interface with ACE. Inquiries concerning specific capabilities should be addressed to the individual organization.

Communications sources include the use of ARINC or SITA. Network access is also available by using approved CBP communication options: Cisco VPN/MQ Series Solution via a client provisioned Internet Service Provider (ISP) connection. More details are available at <https://www.cbp.gov/trade/automated/getting-started/transmitting-data-cbp-electronic-data-interchange-edi>.

Each participant, regardless of the computer hardware and/or software used, must successfully complete a period of intensive testing with Customs.

The decision to utilize a particular data processing service is strictly an individual user decision.

Attachment (2) is the ACE Air Respondent Checklist. All participants should complete this document.

This list will be updated periodically.
