Data Sources

QUASR data – Reported quarterly to the Florida Office of Insurance Regulation (OIR) from all admitted insurers for the Florida portion of their business

- Quarterly data from fourth quarter 2002 through first quarter 2020
- 03/31/2020 data provided by the OIR on 08/21/20. Any submissions/changes made after this date will not be reflected in this report.
- Some insurers in the market are submitting QUASR data as “Trade Secret” protected information. In these instances, and where data is available, Citizens uses the most recent quarter’s data as an estimate for the current quarter’s submission. The page that immediately follows is a table identifying these insurers, the timing of the Trade Secret declaration with the OIR, estimates for data used in this analysis and the percent of the market they represent in total. Beginning in the 3rd quarter of 2019, the OIR provided Citizens total market data including trade secret insurers in aggregate and broken down by product, county and wind coverage for a more accurate reflection of how Citizens fits within the total admitted market. Given this additional piece of information the data is broken down into these components: “Published” is data for insurers that are not submitting under Trade Secret protection, “Estimated” is those that are submitting under Trade Secret protection, “Estimated Total Market” is the sum of Published and Estimated, and “Actual Total Market” is data requested from the OIR on an aggregate basis including Trade Secret insurers. The heading on each exhibit indicates either “Includes Trade Secret Insurers” or “Excludes Trade Secret Insurers.” Includes implies either estimates or the actual total market is used and Excludes uses only the QUASR data as “Published.” Footnotes in each exhibit provide further detail.
- Commercial non-residential data is not reported in QUASR and is therefore not included in this analysis (As of 03/31/2020, CNR-M and CNR-W made up approximately 1% of Citizens’ building counts)
- During the 3rd quarter of 2010, State Farm resubmitted data for 1Q2009 through 2Q2010. The totals remained the same but the aggregate change was a reduction in the policies in personal lines and an increase in commercial lines. This analysis reflects updated data.
- Prior to 2017, Citizens reported inforce premium in QUASR. This corresponds to the annualized premium charged for the quarter-end exposure values. Beginning in 2017, Citizens reports premium charged during the policy term as premium in QUASR. The only difference from prior reporting would be from the relatively small number of policies having mid-term exposure and premium adjustments. There is generally less than a 0.1% difference between the two premium values in aggregate.

S&P Global Market Intelligence (S&P) – Reported to the National Association of Insurance Commissioners (NAIC) by insurance carriers and collected, standardized and disseminated by S&P.

- Annual financial statement data submitted by participating carriers.
- 12/31/2019 data extracted from S&P 06/07/2020. Any submissions/changes made after this date will not be reflected in this report.
- Data used includes Net Written Premium, Surplus, Net Written Premium to Surplus Ratio, Combined Loss Ratio, and Net Loss & LAE Ratio.
- Values included in this report are on a total company basis as reported in annual statements.
- Some insurers write business in multiple states. When using this data, consideration of what proportion of their business is in Florida should be taken when used in conjunction with QUASR data (QUASR data is reported for the Florida portion of their business). If known, this information is included in the footnotes for each exhibit.

FSLSO Top Coverages Report data – Reported quarterly to the Florida Surplus Lines Service Office (FSLSO)

- Annual data from 2002 through 2019
- 12/31/2019 data extracted from FSLSO 06/07/2020. Any changes made after this date will not be reflected in this report.
- Surplus Lines insurance information is included on the total market exhibits only
- Data has a strong seasonal cycle so it is aggregated to annual values for this analysis
- Insured value is not reported so analyses using FSLSO data are based on policy and premium data only
- Commercial non-residential cannot be separated from commercial residential and is therefore included in this analysis; to minimize this impact only Apartment and Condominium coverage codes are utilized.
- A subset of coverages that correspond to Citizens’ lines of business is selected from all coverages reported (see notes on relevant exhibits as to which specific coverages are included in each)

Insurers Submitting QUASR Data under “Trade Secret” Protection

* Family Security and Journey filed QUASR data under “Trade Secret” protection at the time of their initial data filing so none of their data has ever been publicly available.

Mapping of Citizens Policy Forms to QUASR Policy Types

QUASR Policy Types	Citizens Policy Forms
Personal Residential - Allied Lines - WIND ONLY DWELLINGS	DW-2
Personal Residential - Condominium Unit Owners	HO-6
Personal Residential - Condominium Unit Owners - WIND ONLY	HW-6
Personal Residential - Dwelling/Fire	DP-1, DP-3
Personal Residential - Dwelling/Fire - Mobile Homeowners	MDP-1
Personal Residential - Dwelling/Fire - Mobile Homeowners - WIND ONLY	MD-1
Personal Residential - Homeowners (Excl Tenant and Condo) - Owner Occupied	HO-3, HO-8
Personal Residential - Homeowners (Excl Tenant and Condo) - Owner Occupied - WIND ONLY	HW-2
Personal Residential - Mobile Homeowners	MHO-3
Personal Residential - Mobile Homeowners - WIND ONLY	MW-2
Personal Residential - Tenants	HO-4, MHO-4
Personal Residential - Tenants - WIND ONLY	HW-4, MHW-4
Personal Residential - Allied Lines	none
Personal Residential - Farmowners	none

Notes:

- 1) Commercial Residential is broken up by policy type but there are not unique Citizens policy forms
- 2) Commercial Non-Residential is not collected in QUASR

Personal & Commercial Residential

**Market Share Based on Total Insured Value
For Policies that Include Wind Coverage
Florida Residential Property Insurance Market
Includes Trade Secret Insurers (TS)
QUASR Data as of March 31, 2020**

Insurer Category	Total Insured Value
Citizens	\$107,843,629,721
"Pups"	\$236,712,497,469
Florida-Based	\$1,739,476,537,292
Others	\$326,682,442,408
Total	\$2,410,715,106,890

The Florida Residential Property Insurance Admitted Market is divided into 4 major parts: (i) Citizens; (ii) Florida only subsidiaries "pups" of major national writers; (iii) Florida-based domestic companies; and (iv) non-domestic nationwide property writers, such as USAA, etc.

Notes:

- 1) Includes admitted insurers only
- 2) Florida-Based includes the difference between the total for insurers submitting data under "Trade Secret" protection and the estimated values for those insurers in order for the total to balance with actual. Estimated values are detailed in the Data Sources section of the Corporate Analytics Market Share Report.
- 3) Surplus lines companies are not included in the market share calculation
- 4) Based on total insured value for policies with wind coverage

All Other Insurers	\$1,436,116,270	-	-	-	-	-
Total	\$2,560,202,239	-	-	-	-	-

Notes:

- 1) Includes admitted insurers (and Citizens) writing personal and commercial residential property statewide
- 2) All Other Insurers includes the difference between the total for insurers submitting data under "Trade Secret" protection and the estimated values for those insurers in order for the total to balance with actual. Estimated values are detailed in the Data Sources section of the Corporate Analytics Market Share Report.
- 3) Surplus lines companies are not included in the market share calculation
- 4) Total Insured Value indicates Florida Personal and Commercial Residential business. All other values are on a total company basis as reported in NAIC annual statements.
- 5) Combined Loss Ratio = Net Loss & LAE Ratio plus Expense Ratio (Underwriting Expense/Net Premiums Written)
- 6) Net Loss and LAE Ratio = (Net Incurred Claims and Claim Adjustment Expenses)/ Net Earned Premiums
- 7) Some insurers write in multiple states. In 2019, Federal had approximately 9% of its direct written premium in FL.
- 8) Percentages in pie chart are rounded to the nearest whole number

Notes:

- 1) Includes insurers who participated in depopulation from 12/31/2017 to 12/31/2019
- 2) Total Insured Value indicates Florida Personal and Commercial Residential business as reported in QUASR. All other values are on a total company basis as reported in NAIC annual statements.
- 3) Combined Loss Ratio = Net Loss & LAE Ratio plus Expense Ratio (Underwriting Expense/Net Premiums Written)
- 4) Net Loss and LAE Ratio = (Net Incurred Claims and Claim Adjustment Expenses)/ Net Earned Premiums
- 5) NM indicates "Not Meaningful"
- 6) Estimated values for insurers submitting data under "Trade Secret" protection are detailed in the Data Sources section of the Corporate Analytics Market Share Report

Notes:

- 1) Admitted insurer information is as reported to the Florida Office of Insurance Regulation (QUASR data) for the 4th quarter of each calendar year
- 2) Surplus Lines data reported to the FLSLO; insured value data is not reported and thus is excluded from this analysis
- 3) Surplus Lines for personal residential include HO-3, HO-4, HO-6, HO-8(starting in 2014), Dwelling, Dwelling Builders Risk, Mobile Home, and Windstorm
- 4) Surplus Lines policy growth in 2014 largely due to the inclusion of HO-8 (18,843) and increase in number of dwelling property policies (30,839 increase)
- 5) Surplus Lines for commercial residential includes only Apartment and Condominium coverage codes
- 6) For 2014-2018, estimates for insurers submitting data under "Trade Secret" protection are detailed in the Data Sources section of the Corporate Analytics Market Share. For 2019 and later, Actual Total Market data is used.
- 7) Reports prior to 2Q 2010 included more surplus lines coverage types. This analysis reflects updated data for all periods.

Total	\$2,413,206,401	-	-	-	-	-

Notes:

- 1) Includes admitted insurers (and Citizens) writing personal residential property statewide
- 2) All Other Insurers includes the difference between the total for insurers submitting data under "Trade Secret" protection and the estimated values for those insurers in order for the total to balance with actual. Estimated values are detailed in the Data Sources section of the Corporate Analytics Market Share Report.
- 3) Surplus lines companies are not included in the market share calculation
- 4) Total Insured Value indicates Florida Personal Residential business. All other values are on a total company basis as reported in NAIC annual statements.
- 5) Combined Loss Ratio = Net Loss & LAE Ratio plus Expense Ratio (Underwriting Expense/Net Premiums Written)
- 6) Net Loss and LAE Ratio = (Net Incurred Claims and Claim Adjustment Expenses)/ Net Earned Premiums
- 7) Some insurers write in multiple states. In 2019, Federal had approximately 9% of its direct written premium in FL.

Notes:

- Counties are bolded when Citizens' market share is 10% or greater in that county
- Market share is based on all policies, not just those that include wind. For a better indication of Citizens' position in Monroe County, refer to the Monroe County Historical Trends exhibit that follows.
- Actual Total Market data is used; more information can be found in the Data Sources section of the Corporate Analytics Market Share Report

Notes:

- 1) Admitted insurer information is as reported to the Florida Office of Insurance Regulation (QUASR data) for the 4th quarter of each calendar year
- 2) Surplus Lines data reported to the FLSLO; insured value data is not reported and thus is excluded from this analysis
- 3) Surplus Lines for personal residential include HO-3, HO-4, HO-6, HO-8(starting in 2014), Dwelling, Dwelling Builders Risk, Mobile Home, and Windstorm
- 4) Surplus Lines policy growth in 2014 largely due to the inclusion of HO-8 (18,843) and increase in number of dwelling property policies (30,839 increase)
- 5) For 2014-2018, estimates for insurers submitting data under "Trade Secret" protection are detailed in the Data Sources section of the Corporate Analytics Market Share. For 2019 and later, Actual Total Market data is used.

Total	40,620	100%	\$146,995,837,849	100%	\$965,810,028	100%

Notes:

- 1) Includes admitted insurers (and Citizens) writing commercial residential property statewide
- 2) All Other Insurers includes the difference between the total for insurers submitting data under "Trade Secret" protection and the estimated values for those insurers in order for the total to balance with actual. Estimated values are detailed in the Data Sources section of the Corporate Analytics Market Share Report. A negative value for All Other Insurers indicates the estimated values for trade secret insurers are too high.
- 3) Any slight differences in market share %s in graph versus table are due to rounding

Notes:

- 1) Includes admitted insurers (and Citizens) writing commercial residential property statewide
- 2) For 2014-18, estimates for insurers submitting data under "Trade Secret" protection are detailed in the Data Sources section of the Corporate Analytics Market Share Report. For 2019 and later, Actual Total Market data is used.
- 3) Starting in 2009, State Farm changed how their data was allocated. The aggregate was the same but it resulted in a reduction in personal lines and an increase in commercial lines.

Notes:

- 1) Admitted insurer information is as reported to the Florida Office of Insurance Regulation (QUASR data) for the 4th quarter of each calendar year
- 2) Surplus Lines data reported to the FLSLO; insured value data is not reported and thus is excluded from this analysis
- 3) Surplus Lines for commercial residential includes only Apartment and Condominium coverage codes
- 4) For 2014-2018, estimates for insurers submitting data under "Trade Secret" protection are detailed in the Data Sources section of the Corporate Analytics Market Share. For 2019 and later, Actual Total Market data is used.
- 5) Reports prior to 2Q 2010 included more surplus lines coverage types. This analysis reflects updated data for all periods.
