# Enablon Go

A key element of CN's safety strategy is the identification and reporting of safety hazards and near-misses.

PURPOSE OF ENABLON GO:

CN's Near-Miss and Hazard Reporting System provide detailed information about hazardous situations in real time.

- Employees report incidents directly on their mobile devices
- Photo, video and audio files can be uploaded to provide additional information
- GPS coordinates are captured
- Near-misses can be reported anonymously
- Managers of all crafts in the affected area are notified when a near miss or hazard occurs
- Feedback on the corrective actions are provided to the person who reported the near miss or hazard
- Escalation processes are in place to ensure that issues identified are resolved quickly
- Reporting system provides visibility across our network – solutions can be implemented system-wide

Enablon Go interface:
Captures key information to prompt immediate corrective action.

CN is leading the industry with this near miss and hazard reporting system
