

2018 GRI Content Index

The Global Reporting Initiative (GRI) Sustainability Reporting Standards provide a globally recognized framework for companies to measure and communicate their environmental, economic, social and governance performance. We prepared this report in accordance with the 2016 GRI Standards: Core option. This is the eighth consecutive year that these reporting principles have informed our reporting process, and we assess our progress against these guidelines.

In this report, the GRI General Disclosures are solely for The Coca-Cola Company. For all other indicators, the scope is identified in the referenced documents. Beyond reporting on performance indicators required by the GRI, we report on additional indicators important to our broad range of stakeholders. We review our reporting regularly, and aim to be as responsive as possible to our stakeholders' feedback.

Additional Reporting Frameworks

This report also meets the requirements of the United Nations Global Compact (UNGC) Advanced Communication on Progress and aligns with the United Nations Guiding Principles Reporting Framework (UNGPRF). Please see our [2018 Business & Sustainability Report Partnerships](#) section, p. 41, for a table on where our programs most directly contribute to the UN Sustainable Development Goals.

THE COCA-COLA COMPANY

GENERAL DISCLOSURES

GRI 416: Customer Health and Safety	416-2	Incidents of non-compliance concerning the health and safety impacts of products and services	<p>As a global system that, in 2018, produced the equivalent of 711 billion 8-oz servings, we consider the most important part of this indicator to be product safety for the end consumer. Given that we report for the approximately 225 bottling partners across the Coca-Cola system, we do not generate all-inclusive, consolidated information for this metric. However, we applied the following methodology to assess this metric to the best of our ability: we reviewed our incident management database and identified a total of 25 matters that had a food safety aspect. We identified 15 incidents that had some contact with regulatory authorities. The total number of incidents that met both criteria is three.</p>	
	G4-FP5	Percentage of production volume manufactured in sites certified by an independent third party according to internationally recognized food safety management system standards.	<p>Product and Ingredient Safety Coca-Cola Product Facts</p> <p>We do not track percentage of production volume manufactured in GFSI sites.</p>
