- Habitat management
- Lynx monitoring

Northern Spotted Owl

- Species status
- Draft USFWS Barred Owl Management Strategy and EIS
- Population augmentation feasibility assessment

Pacific Fisher

- Species status
- Fisher CCAA
- Long-term monitoring

A close-up photograph of a Western gray squirrel perched on a tree trunk. The squirrel has a thick, bushy tail with a mix of dark and light gray fur. Its body is primarily gray with a lighter, almost white, belly. The squirrel is looking towards the camera with a neutral expression. The tree bark is rough and textured, with some small green moss or lichen visible. The background is a soft, out-of-focus natural setting.

Western gray squirrel

- Species status
- Wildlife working group

Future Updates

- Taylor's Checkerspot Butterfly
- Western Gray Squirrel
