

Timber, Fish, & Wildlife Policy Committee
Timeline to November Deliverable: Permanent Water Typing Rule/Guidance Language

DRAFT v7-28-16

The following timeline is suggested from the Co-Chairs and AMPA to draft a water typing package by November 2016.

July Policy Committee meeting

1. Review the timeline for presenting the deliverable to the Forest Practices Board at November 2016 meeting.
2. Electrofishing
 - a. Review the Co-Chairs' draft on establishing the regulatory F/N break related to electrofishing.
 - b. Frame further work (when, how) for establishing the regulatory break.
3. Protocol Surveys: review the direction to the small group to revise the protocol survey method based on the Electrofishing Technical Group's report.

August Policy Committee meeting

1. Off-Channel Habitat
 - a. Review the Off-Channel Habitat Technical Group's report.
 - b. Review and discuss the Co-Chairs' initial recommendations.
2. Protocol Surveys: review the small group's recommended draft protocol survey method.
3. Review the AMPA's recommendations on how to implement the Physicals Proposal Initiation.

September Policy Committee meetings – TWO MEETINGS (Sept 8 and Sept 21)

1. Review work to date (TBD, depending on timelines).
2. Review illustrations outlining the new rule/guidance language (help translate theoretical ideas to practicality).
3. Presentation from DNR on the anticipated changes to the water typing program administration.

October Policy Committee meeting

1. Review full package that will be presented to the Board.

November Policy Committee meeting

1. Since this is right before the Board meeting and after the package is incorporated into the Board packet, likely nothing will be on Policy's agenda except how the Co-Chairs and AMPA will characterize this work to the Board.
