

Jessica Czajkowski, L.G.

Assistant Director of Science and Research

As an Assistant Director, Jessica helps guide the science, research, public outreach, and budget of the Survey. She was previously the Survey's Editor-in-Chief. She has also performed geothermal research, fault trenching, mapping, aggregate resource mapping, and has compiled statewide digital datasets for the Survey. She also worked as a landslide geologist for a firm in southern California. Jessica has a research background in structural geology, and her Master's thesis work centered on Cretaceous-age deformation in Death Valley, California.
