COMPLAINT PROCESS – PRIOR TO BID DUE DATE:

The purpose of a complaint process is to settle unresolved issues or concerns that either were not or could not be resolved during the question and answer period.

Any Bidder may submit a complaint regarding this solicitation based upon the following:

- The solicitation unnecessarily restricts competition;
- The evaluation/scoring process is unfair or flawed; or
- The requirements are inadequate or insufficient so that a response/bid is difficult to prepare.

Complaints not based on procedural matters will not be considered. Complaints will be rejected as without merit if they address issues such as: 1) an evaluator's professional judgment on the

quality of a proposal, or 2) Agency's assessment of its own and/or other agencies needs or requirements.

If no complaint is filed, a Bidder cannot later file a protest based on one of the above complaint criteria.

Any complaint to the solicitation must be in writing and submitted to the Bid Coordinator no less than five (5) business days prior to the date when the bid is due, and shall clearly articulate the basis for the complaint and include a proposed remedy.

Responses to complaints will be articulated in writing, including any resulting changes to the solicitation, and will be posted on WEBS, and the Agency head will be notified.

The Agency's decision is final; no further administrative appeal is available.

DEBRIEFING OF UNSUCCESSFUL BIDDERS:

Any Bidder who has submitted a bid and been notified that they were not selected for contract award may request a debriefing. The request for a debriefing conference must be received by the Bid Coordinator within three (3) business days after the Unsuccessful Bidder notification is e-mailed to the Bidder. The debriefing must be held within three (3) business days of the request.

Discussion at the debriefing conference will be limited to the following:

- Evaluation and scoring of the Bidder's bid;
- Critique of the bid based on the evaluation; and
- Review of Bidder's final score in comparison with other final scores without identifying the other firms.

Comparisons between bids or evaluations of the other bids will not be allowed. Debriefing conferences may be conducted in person or on the telephone and will be scheduled for a maximum of one hour.

PROTEST PROCEDURE:

This procedure is available to Bidders who submitted a response to this solicitation and who have participated in a debriefing conference. Upon completing the debriefing conference, the Bidder is allowed five (5) business days to file a protest of the acquisition with the Bid Coordinator. Protests must be submitted in writing via e-mail and signed by the protesting party or an authorized Agent.

The protest must state the grounds for the protest with specific and complete statements of the action(s) being protested. A description of the relief or corrective action being requested should also be included.

Bidders protesting this procurement shall follow the procedures described below. Protests that do not follow these procedures shall not be considered. This protest procedure constitutes the sole administrative remedy available to Bidders under this procurement.

Only protests stipulating an issue of fact concerning the following subjects shall be considered:

- A matter of bias, discrimination or conflict of interest on the part of the evaluator;
- Errors in computing the score;
- Non-compliance with procedures described in the solicitation document, or applicable state or federal laws or regulations.

Upon receipt of a protest, a protest review will be held by the Agency. All available facts will be considered and a decision will be issued by the Commissioner of Public Lands or his/her delegate within five (5) business days of receipt of the protest. If additional time is required, the protesting party will be notified of the delay.

In the event a protest may affect the interest of another Bidder who submitted a bid, such Bidder will be given an opportunity to submit its views and any relevant information on the protest to the Bid Coordinator.

The final determination of the protest shall:

- Find the protest lacking in merit and uphold the Agency's action; or
- Find only technical or harmless errors in the Agency's acquisition process conduct and determine the Agency to be in substantial compliance and reject the protest; or
- Find merit in the protest and provide the Agency options which may include:
 - Correct the errors and re-evaluate all bids, quotations and/or proposals; and/or
 - Reissue the solicitation document; and/or
 - Make other findings and determine other courses of action as appropriate.

If the Agency determines that the protest is without merit, the Agency will enter into a contract with the Apparent Successful Bidder.

The Agency protest decision is final and no appeal process will be required. If a protesting Bidder does not accept the Agency protest response, the Bidder may try to seek relief from Thurston County Superior Court.

If the Bidder fails to obtain the court order enjoining disclosure, the Agency will release the requested information on the date specified. A-21 Non-conformances with Work Schedule

If Contractor is not in conformance with the Work Schedule for reasons other than acts of Force Majeure, Contractor shall bring its activities into conformance with the schedule or request the Compliance Forester to revise the schedule to reconcile with the actual progress of the Work. The Compliance Forester may require a meeting prior to granting a revision. A revision to the Work Schedule for one Unit shall not change the timing for any other Unit unless expressly authorized. SECTION I-B: SPECIFICATIONS FOR THE ACTIVITY

Contractor shall accomplish all Work specified in the Unit(s) according to the following specifications:

B-01 Precedence between Sections

Section I-B covers the general standards that apply over the whole contract. If a change is required on a site by site basis those differences will be outlined on the Unit Description Form (Section II-A). The site specific details found on the Unit Description Form should take precedence over these general guidelines when they exist. If special requirements noted in the Unit Description conflict with requirements in this Section, the special requirements will prevail.

B-02 Workers, Supervision, and Equipment

Contractor shall provide the following at its own expense:

- A. All workers, adequate crew supervision, and serviceable equipment to satisfactorily accomplish treatment of all acres identified in the Unit Description (Section II-A).
- B. Equipment operators that are skilled in machine operation on the particular equipment offered under comparable working conditions.
- C. Transportation for all workers, supplies, materials, and equipment to and from the Unit(s).
- D. All supplies, materials, and equipment needed to ensure safe operations.
- E. The equipment shall be a track mounted excavator which meets the following specifications:

- Ground Pressure – maximum 10 PSI. PSI will be determined using this formula:

$$\text{PSI} = \frac{(\text{Inches of track on ground} \times \text{inches of track width}) \times 2}{\text{Weight of Equipment}}$$

- Capability – machine must have the capability of picking up wood debris between 1 inch and 20 inches in diameter, while at the same time allowing all loose soil and duff to fall free so it is not placed into the pile. To do this, the machine shall be equipped with a *grapple or claw rake and thumb*. **No bucket and thumb will be allowed.**
- Climbing ability – up to 50% slope.
- Pivot – attachment arm shall be able to swing 360 degrees while the tracks remain stationary.
- Reach – attachment arm shall have a minimum reach of 22 feet.
- Equipment must have a closed cab and adequate guarding to protect the machine and operator from falling material or debris.

B-03 Boundaries

The boundaries depicted on Unit Map (Section II-B) delineate the Work area. Contractor is responsible for completing all Work to boundaries. The Work boundaries will consist of easily identifiable features (including but not limited to roads, streams, or abrupt changes in forest type or age). Flagging will be used for areas where identifiable features are absent. Contractor is responsible for understanding the location of all boundaries. Failure to complete Work to boundaries in any Unit renders Work in that Unit incomplete, and no payment will be made to Contractor for any Work on that Unit. No payment will be provided for Unit(s) with Work that extends beyond Unit boundaries. Work extending beyond Unit boundaries will be considered breach of contract. See Clause A-23, above.

B-04 DNR shall furnish:

- A. Compliance Forester(s) to acquaint the Contractor with each unit to be worked and to conduct periodic field inspections.

- B. Boundary marking and access to the unit as reasonably necessary to complete the contract.

B-05 Weather Conditions

Operations may be suspended when the Compliance Forester determines that weather conditions will cause excessive soil damage due to high soil moisture content. Suspended operations shall not resume unless approval to do so has been given, in writing, by the Compliance Forester.

B-06 Resource Protection Requirements

Contractor shall accomplish the following in all Unit(s):

- A. Work shall be accomplished with the least possible damage to the residual stand and soil. If Contractor operations cause excessive damage as determined by the Compliance Forester, the Contractor shall alter operations to prevent the occurrence of such damage. Failure to alter operations within one day of written notice, in order to prevent further damage and/or repeated failure to conduct operations in such a manner as to prevent excessive damage, may be cause for contract termination for default or cause.

- B. Equipment must be washed and inspected by the Compliance Forester prior to working to prevent the spread of invasive species and contaminated soils.

- C. Mechanical equipment shall not cross meadows, stream channels (wet or dry), or other non-work areas and shall not be operated on road surfaces, cut-banks or fill slopes unless approved by the Compliance Forester.

- D. Protect all hardwoods and conifer trees marked, or otherwise designated, as seed trees or wildlife reserve trees. Leave standing all snags or cull trees greater than 16" diameter, unless they create a safety hazard.

- E. Protect designated buffer zones from disturbance by equipment operations. This includes, but is not limited to, to the falling or deposition of material into such buffers.

- F. Mechanical equipment shall not be operated within 50 feet of any wetland or live stream as indicated on unit maps.
- G. Contractor may be required to remove spoils berms to improve access. After dismantling the berm, Contractor must block the road past the work area to prevent further access to the area.
- H. Construct or re-construct spoils berms, dips, water bars, cross drains, ditches and/or other drainage control structures that are altered or damaged by Contractor's operations.
- I. Protect legal land subdivision survey corners and/or witness objects. If destroyed or disturbed, such points shall be re-established by a licensed land surveyor in accordance with the U.S. General Land Office Standards at Contractor's expense. DNR shall determine the method for accomplishing this work, either by withholding sufficient performance security to pay for the work, or by requiring Contractor to do so before releasing Contractor's performance security.

B-07 Fences and Improvements

Contractor shall not damage fences and other improvements within or adjacent to the Units during the operation. Any such damage will be communicated to the Compliance Forester and be repaired at Contractor's expense. Trees adjacent to fences or other improvements shall be felled away. All slash falling on fences and other improvements shall be removed and distributed back into the unit by Contractor. Trees and slash felled onto lands not owned by the State shall also be removed and distributed back into the unit.

B-08 Piling Specifications

Contractor will use approved equipment (clause B-02-E) to accomplish the following in all units

A. Piling of Slash

- i. The Contractor shall collect and pile 85% of all green and existing woody vegetation and logging slash material from 1 to 12 inches in diameter over 4 feet in length into compact piles. Contractor shall attempt to place slash of various sizes into each pile and avoid piling concentrations of only large logs and stumps.
- ii. The Contractor shall leave all logs that are greater than 12.1 inches diameter at the small end and longer than 10 feet in length in place.
- iii. Slash does not include cull decks or landing piles in existence prior to award of this contract.

B. Location of Piles

- i. Contractor is required to monitor pile placement closely so that subsequent burning does not cause excessive crown scorch or bole scorch to leave trees, snags, or seed wall trees. Contractor shall construct piles as far away from designated leave trees as feasible.
- ii. Piles shall be located within contract unit boundaries. Piles should be located at least **20 feet** from unit boundaries adjacent to DNR land and **50 feet** from unit boundaries

adjacent to other ownership land. Piles within 75 feet or closer of private ownership shall be lined with fire trail removing vegetation around each pile to bare mineral soil.

- iii. Piles shall not be located on any road prism or any ditch line.
- iv. Piles shall not be located next to existing snags. A snag is any dead standing tree greater than 20 feet in height and 16 inch DBH.

C. Construction and Size of Machine Piles

- i. Mechanical piles shall be compacted (smashed down) to minimize air space and assist with protection of the debris from penetration by precipitation prior to burning.
- ii. All piles shall be relatively free of dirt and decomposed duff. No soil other than that adhering to the bark or root wads will be acceptable in the piles.
- iii. Pile height shall be 6 feet minimum and 30 feet maximum.
- iv. To allow for maximum fuel consumption during ignition, ensure that boles extending 10 feet beyond the general side contours of the piles are limited.

B-09 Resource Protection Requirements

Contractor shall accomplish the following in all Unit(s):

- A. Protect all trees marked, or otherwise designated, as seed trees or wildlife reserve trees. Leave standing all snags or cull trees greater than 10" diameter, unless they create a safety hazard.
- B. Where they exist, leave a minimum of two down logs with small end diameters greater than 12 inches and lengths greater than 20 feet as large organic material. Where down logs are greater in number than two per acre, leave additional down logs exist in sufficient numbers to compensate for acreage where no down logs occur.
- C. Protect designated buffer areas from disturbance by equipment operations. This includes, but is not limited to, to the falling or deposition of material into such buffers.
- D. Leave all roads open and in fully drivable condition. Prevent excessive damage to ditches, culverts, or roadways. Remove immediately any debris or soil deposited in ditches, culverts, or roadways. Repair all water-bars and other drainage control structures damaged by Contractor's operations. Construct or re-construct dips, water bars, cross drains and/or ditches as needed to control erosion.
- E. Protect legal land subdivision survey corners and/or witness objects. If destroyed or disturbed, such points shall be re-established by a licensed land surveyor in accordance with the U.S. General Land Office Standards at Contractor's expense. DNR shall determine the method for accomplishing this work, either by withholding sufficient performance security to pay for the work, or by requiring Contractor to do so before releasing Contractor's performance security.
- F. Protect any fences or other improvements on all land ownerships.

B-09 Trees to be Cut

- G. Undesirable trees have poor form, physical or mechanical damage, dead or broken tops, or crooks or sweeps in the boles. More information about this specification and whether it is required in the unit will be provided on the Unit Description.

SECTION I-C: UNIT COMPLIANCE INSPECTION AND PAYMENT

C-01 Field Inspections

The Compliance Forester will conduct periodic inspections. Inspections will generally be done concurrently with Work but will be completed no later than five (5) business days after Work completion on the Unit.

C-02 Determination of Payment by Unit

The acceptability and the Rate of Pay for Work performed will be based on the following factors:

A. Satisfactory Performance

‘Satisfactory Performance’ on the Unit is when all Work has been completed to boundaries (Clause B-03), all piling specifications (Clause B-08) have been met throughout the entire Unit, and all resource protection requirements (Clause B-09) have been met throughout the entire Unit.

B. Unsatisfactory Performance

‘Unsatisfactory Performance’ on the Unit is when one or the more of the following have occurred: 1) Work has not been completed to boundaries (Clause B-03); 2) all piling specifications (Clause B-08) have not been met throughout the entire Unit; or 3) not all resource protection requirements (Clause B-09) have been met throughout the entire Unit.

C. Rate of Pay

The ‘Rate of Pay’ is the actual amount (in dollars) that the Contractor will be paid per acre for each Unit. The Rate of Pay is equal to the Unit Bid Price for Units with Satisfactory Performance. The Rate of Pay is the Unit Bid Price minus any reductions in payment (Clause C-02-D) for Units with Unsatisfactory Performance. The Rate of Pay will not exceed the Unit Bid Price for any Unit.

D. Reduction in Payment

The reduction in payment for Unsatisfactory Performance on a Unit will be calculated for the Unit in one of the following ways, at the Compliance Forester’s sole discretion:

1. If Work on the Unit is not completed to boundaries (Clause B-03), DNR can either withhold payment for the entire Unit, or reduce payment by the number of untreated acres multiplied by the average bid price per acre. The number of untreated acres shall not include areas that could not be treated due to solid rock outcrops, steep slopes, wetlands, or other features on site.
2. If Unsatisfactory Performance is due to all piling specifications (Clause B-08) not having been met throughout the entire Unit, DNR can either withhold payment for the entire Unit, or reduce payment by the number of untreated acres multiplied by the average bid price per acre. The number of unsatisfactorily treated acres shall not include areas that could not be treated due to solid rock outcrops, steep slopes, wetlands, or other features on site.

3. If Unsatisfactory Performance is due to resource protection requirements (Clause B-09) not having been met throughout the entire Unit, then DNR will reduce payment by calculating the cost to remedy the damage. If no remedy is possible, then payment may be withheld for the entire Unit.

C-03 Re-work of Unsatisfactory Units

The Compliance Forester may require Contractor to re-work a Unit that has Unsatisfactory Performance (Clause C-02-B). The Compliance Forester may require the re-work to be completed prior to starting Work on a new Unit. The Compliance Forester will re-inspect the Unit following the re-work to determine if it now meets Satisfactory Performance requirements (Clause C-02-A).

If Contractor refuses to re-work the Unit, DNR may then pursue its available remedies for either breach (Clause A-23) or default (Clause A-24) of contract. If Contractor re-works the Unit and it is rated unsatisfactory a second time, DNR may consider this breach or default of contract.

The Compliance Forester is not required to give Contractor the opportunity to re-work Unit(s) with Unsatisfactory Performance (Clause C-02-B). In some cases, DNR may not have the additional staff needed to perform contract compliance for such re-work, and Contractor's overall performance on this contract may indicate that Contractor will be unable to improve the quality of Work enough to justify the additional time and expense of re-working Unit(s). In these cases, the Compliance Forester may choose to simply calculate the correct reduction in payment in accordance with Clause C-02-D and allow Contractor to continue Work on other Unit(s).

C-04 Payment Schedule

The default payment schedule will be one monthly payment to Contractor, following completion of each full calendar month, unless otherwise approved by Contract Manager. If a different schedule is requested by either party, it will be agreed upon during the Pre-Work Conference (Clause A-19) and will be set forth in the Work schedule. Payment shall be made as follows:

A. Partial Payment

Contractor may request partial payment when part of a Unit is completed, though DNR has no obligation to honor this request.

B. Unit Completion Form

Contractor or Designated Contract Representative shall sign the Unit Completion Form after completion of each partial Unit being submitted for payment, or at the conclusion of Work and completion of the Compliance Inspection for each Unit. The Compliance Forester will make payment recommendations for the invoice and forward the Unit completion form to the Contract Manager for processing.

C. Verification Traverse

If a Unit's acreage is disputed, Contractor may request a verification traverse by DNR. The request must be in writing and signed by Contractor. DNR will base the rate of pay on the acres determined from the verification traverse. If the net acres specified in the Unit Description (Section II-A) are correct within plus or minus five percent ($\pm 5\%$) after the verification traverse, Contractor shall pay for the verification traverse at a rate of ten dollars (\$10.00) per one hundred (100) feet of traversed boundary.
