Acronyms

LCDBG	Louisiana Community Development Block Grant
CDBG	Community Development Block Grant
LGA	Local Government Assistance
OCD	Louisiana's Office of Community Development
DOA	Louisiana's Division of Administration
LGR	Local Government Representative
HUD	U. S. Department of Housing and Urban Development

Definitions

Local Government Representative	OCD staff member whose responsibility is to monitor an assigned list of grants.
Conditionally Closed-out	The status of a grant as evidenced by a letter of notification from OCD; generally receipt of a final audit is the last remaining task.
Single-purpose Application	Funds requested for one major activity; i.e., sewer, potable water, and streets.
Multi-purpose Application	Funds requested for two or more major activities; i.e., sewer, potable water, and streets.

FY 2025 LCDBG Public Facilities Program Application Package

Table of Contents

Chapter I. Program Goals and Objectives	1
Chapter II. General Information for Public Facilities Applicants	1
Chapter III. Project Selection Process	8
Chapter IV. Information for Public Facilities Projects	17
Chapter V. Application Forms and Instructions for Public Facilities Projects ...	21
Chapter VI. Displacement Policy	80

I. PROGRAM GOALS AND OBJECTIVES

All activities funded by the Louisiana Community Development Block Grant (LCDBG) Program must address one of the following three national objectives.

- Principal benefit (at least fifty-one percent) to low- and moderate-income persons.
- Elimination or prevention of slums or blight.
- Urgent Need

In order to meet these national objectives, the Office of Community Development – Local Government Assistance (OCD-LGA) has the following goals.

- Benefit low- and moderate-income persons.
- Eliminate or aid in the prevention of slums or blight.
- Strengthen community and economic development through the creation of jobs, stimulation of private investment, and community revitalization, principally for the benefit of low- and moderate-income persons.
- Provide for other community development needs with a particular urgency due to existing conditions that pose a serious and immediate threat to the health or welfare of the community.

II. GENERAL INFORMATION FOR PUBLIC FACILITIES APPLICANTS

Introduction

The Division of Administration's OCD-LGA administers the LCDBG Program. It is anticipated that Louisiana will receive approximately \$22 million from the U.S. Department of Housing and Urban Development (HUD) in Community Development Block Grant funds. Of that amount, approximately \$12 million will be available for the LCDBG Public Facilities Program. The OCD-LGA surveys eligible communities every two years to determine priorities for funding under the LCDBG Program. As in the past, public infrastructure was identified as the highest priority. The funding priorities under the Public Facilities Program for the FY 2025 Program year are:

- Sewer Improvements
- Potable Water Improvements
- Street Improvements

Application Process

The LCDBG Public Facilities Program has a two-year funding cycle, which is divided into two phases.

Phase I – For FY 2024 and FY 2025 LCDBG Public Facilities Program

Project Severity packages were accepted by the OCD-LGA on November 13, 2023. OCD-LGA scored the project severity packages. These project severity packages were reviewed for funding under the FY 2024 - FY 2025 program years.

Phase II – For FY 2025 LCDBG Public Facilities Program

OCD-LGA made determinations regarding the past performance threshold criteria beginning on page 4 as of July 15, 2024. All applicants meeting threshold criteria as of July 15, 2024, who received a project severity score in the top sixty percent among applicants who met the criteria as of that date were invited to submit a full application to the Public Facilities program. Invitations to submit a full application were issued on August 16, 2024. OCD-LGA will conduct a virtual Application Workshop on September 5, 2024 at 9:30 am. Full applications for the Public Facilities program will be due to OCD-LGA on December 16, 2024. Project severity applicants who did not meet past performance threshold criteria as of July 15, 2024, will not be included in the calculation to determine the top sixty percent of applicants. Full applications received in the FY 2024 program year that were not funded under the FY 2024 program year that (1) met past performance threshold criteria as of July 15, 2024, and (2) received a project severity score in the top sixty percent of all applicants' scores will be considered under the FY 2025 program year.

Number of Copies of Application

Each eligible applicant can submit one application for consideration. The OCD-LGA will accept applications until December 16, 2024 at 4:30 pm as follows:

One original copy of the complete application must be mailed to:
Division of Administration
Office of Community Development-Local Government Assistance
Post Office Box 94095
Baton Rouge, Louisiana 70804-9095

Or delivered to:
Division of Administration
Office of Community Development-Local Government Assistance
1201 North Third Street
Claiborne Building, Suite 3-150
Baton Rouge, Louisiana 70802

Citizen Participation Requirements

Prior to the submittal of the application, the local governments must complete certain Citizen Participation requirements, which include adopting a Citizen Participation Plan that is in compliance with Section 104 of the Housing and Community Development Act of 1974, as amended, and conducting a public hearing to allow citizens the opportunity to comment on the needs of the community. The local Citizen Participation Plan must have been made available to the public at the public hearing. The public hearing should have been held prior to the submittal of the project severity package. Citizen Participation requirements can be found on the OCD-

LGA's website at <https://www.doa.la.gov/doa/ocd-lga/lcdbg-programs/forms-and-information/OCD-LGA>. Any questions regarding this information should be directed to OCD-LGA, Heather Paul at (225)-342-7412.

Procurement Procedures for the Selection of Professional Services

It is allowable to use LCDBG funds to pay for professional services, such as program administration and engineering services. The relevant federal regulations (24 CFR 200.318-326) describe the standards required for securing professional services. Applicants must also have written procedures for conducting procurement of professional services. Procurement of these services may have been made prior to the submittal of the project severity package. Proper procurement procedures are discussed in detail in the procurement procedures document, which can be found on OCD-LGA's website at OCD-LGA <https://www.doa.la.gov/doa/ocd-lga/lcdbg-programs/forms-and-information/>. Any questions concerning this information may be directed to Traci Watts, Denease McGee, or William Hall of the OCD-LGA at (225)342-7412.

Eligible Activities

The eligible activities under Section 105(a) that are identified as priorities for the LCDBG FY 2024-2025 Public Facilities program are (1), (2), and (13). Applicants whose water system is rated "D" or "F" or whose sewer system is under a compliance order would not be eligible to apply for a different project type unless the Louisiana Department of Health (LDH) and/or the Department of Environmental Quality (DEQ) have given their approval.

Type of Grant – Single-Purpose

The OCD-LGA will only accept applications for single-purpose grants under the Public Facilities program. A single purpose grant provides funds for one primary need consisting of an activity which may be supported by auxiliary activities. Examples of auxiliary activities are drainage improvements undertaken in conjunction with street improvements, the acquisition of land upon which a wastewater treatment plant will be constructed, and the installation of service connections for a new water system.

Size of Grants

The State has established the following funding ceilings:

\$1,000,000 for street grants and \$2,000,000 for sewer treatment, sewer rehabilitation, new sewer and potable water grants, including multi-jurisdictional applications.

A minimum construction amount of \$350,000 must be included in the project. Those projects that do not involve a minimum of \$350,000 will not be considered for funding or scored in any way.

Eligible Applicants

Each eligible applicant may only submit one application for the Public Facilities program. Eligible applicants to the State LCDBG program are non-entitlement units of general local

government, consisting of municipalities and parishes (42 U.S.C. 5306(d) and 42 U.S.C. 5302(a)(7)), and excludes the following entitlement areas: Alexandria, Baton Rouge, Bossier City, Hammond, Jefferson Parish (including Grand Isle, Gretna, Harahan, Jean Lafitte, and Westwego), Kenner, Lafayette Parish Consolidated Government, Lake Charles, Monroe, New Orleans, St. Tammany Parish, Shreveport, Slidell, Terrebonne Parish Consolidated Government, and Thibodaux.

In general and in most instances, the applicant will be determined by the location of the potential beneficiaries of that project. There may be instances, however, in which the potential beneficiaries reside within the jurisdiction of more than one local government. In those circumstances, the following rules will apply.

1. If the proposed project will serve beneficiaries that reside in two or more units of general local government and more than fifty-one percent of those beneficiaries are located within the jurisdiction of one of those units, the appropriate applicant will usually be the unit of general local government in which more than fifty-one percent of the beneficiaries reside; two circumstances where an exception to this rule may apply are discussed as follows.

There may be instances whereby a local government owns an existing utility system but the majority of the existing users reside outside its jurisdiction. The local government that owns the existing system would be the appropriate applicant. There may also be instances whereby a municipality wishes to extend its utility system to an adjacent, unincorporated neighborhood or street(s); this type of instance will require annexation of the unincorporated area prior to the closeout of the grant (if the main purpose or majority of the project's scope of work is to extend the system). In both of these instances, the local government which owns the utility system will be required to discuss the issue with the staff in the State's OCD-LGA to determine the appropriate applicant.

Only the applicant, not the other unit(s) of government involved, for these types of projects will have to meet the performance threshold criteria to be eligible for funding. The applicant will have to enter into a cooperative agreement with the other unit(s) of government involved; a copy of the cooperative agreement must be included in the application.

There may be other circumstances similar to the ones described but not specifically defined herein; in those instances, the local government proposing the project must also discuss the issue with the staff in the State's OCD-LGA to determine the appropriate applicant.

2. If the proposed project will serve beneficiaries that reside in more than one unit of general local government and no more than fifty-one percent of the beneficiaries are located within the jurisdiction of one of those units of local government and none of the participating local governments currently owns the system, or if a regional project is planned, the OCD-LGA will consider this as a multi-jurisdictional application. Multi-jurisdictional applications will require a meeting with the State's OCD-LGA prior to the

submittal of the application for the purpose of determining the appropriate applicant and explaining all of the steps that must be taken by all of the units of local government involved in the application. The designated applicant will apply for the grant and will act as the representative for the other affected units of local government. The designated applicant must retain ownership of the improvements. The designated applicant must meet the performance threshold requirements for eligibility; the other individual municipalities involved do not have to meet threshold requirements with the exception that none of those municipalities can be on the Sanction List maintained by the OCD-LGA. Although each jurisdiction will have to make the required certifications, the designated applicant will be responsible for ensuring that the approved activities will be carried out in accordance with all applicable state and federal requirements. To meet the citizen participation requirements for a multi-jurisdictional application, each unit of general local government involved will conduct the public hearing and publish the notices required for an application. The application will also have to contain individual sets of assurances signed by each local government involved. The designated applicant will also have to enter into a legally binding multi-jurisdictional agreement with each local government stating, among other things, that all appropriate requirements of the Housing and Community Development Act of 1974 (HCDA), as amended, will be complied with. A copy of the fully executed agreement must be included in the application.

Restrictions on Applying for Grants

Capacity and past performance: threshold considerations for grant approval

These considerations assist with the State's ability to promote timeliness of grantee expenditures. No grant will be made to an applicant that lacks the capacity to undertake the proposed program. In addition, applicants who have previously participated in the LCDBG Program must have performed adequately.

Performance and capacity determinations for the FY 2024 and FY 2025 Public Facilities program will be made on December 20, 2023 and July 15, 2024, respectively.

In order to be eligible to receive a public facilities grant award under the FY 2025 LCDBG Program, the following thresholds must have been met:

- Units of general local government will not be eligible to receive funding for a Public Facilities grant unless past LCDBG programs awarded by the State prior to FY 2023 have been conditionally closed out. CDBG-CV funds will not be considered in making the determination of meeting the threshold requirement for the FY 2025 Public Facilities program.
- Audit and monitoring findings made by the State or HUD have been cleared.
- All required reports, documents, and/or requested data have been submitted within timeframes established by the State. Also, see Criteria for Disapproval of Application section below.
- Any funds due to HUD or the State have been repaid or a satisfactory arrangement for repayment of the debt has been made and payments are

current.

- The unit of general local government cannot be on the list of sanctioned communities that is maintained by the OCD-LGA.

For the FY 2025 program year, only those Public Facilities applications, which are submitted by applicants who meet the threshold requirements and are invited to submit a full application, will be rated and ranked. For the FY 2025 program year, the eligibility status of the Public Facilities applicants will be re-evaluated; at that time any applicants that are invited to submit a full application that are determined to be eligible for FY 2025 funding will be rated and ranked. The Public Facilities applications that are not funded under the FY 2024 program year, which meet past performance threshold criteria for FY 2025 and are within the top sixty percent of applicants that meet past performance threshold criteria for FY 2025 will continue to be considered for the FY 2025 program year. Applicants will be allowed to update the cost estimate that was included in the FY 2024 application.

If an applicant does not meet the threshold requirements for either program year, the applicant will not be included in the computation of the 60% of top project severity scores.

For the FY 2025 program year, the closeout documents (with the exception of the clear lien certificate) for previously funded grants must be received by the OCD-LGA a minimum of one calendar week prior to the performance and threshold determination date of July 15, 2024, in order to be reviewed and considered for closeout. Therefore, the deadline for receipt of the closeout documents is July 8, 2024. The clear lien certificate must be submitted by the performance and threshold determination date of July 15, 2024. The State will not be responsible for conditionally closing a grant if the closeout documents are submitted timely, but are determined to need revisions that cannot be completed prior to the established deadline.

In addition to the requirement for closeout documents discussed above, grantees must be monitored by the OCD-LGA forty-five (45) days prior to the performance and threshold determination date of July 15, 2024. Therefore, the monitoring must occur on or before June 1, 2024 in order to be considered for meeting threshold requirements as of July 15, 2024. The State will not be responsible for conditionally closing out a grant if the monitoring occurs timely, but any monitoring findings cannot be cleared prior to the performance and threshold determination date of July 15, 2024.

The State is not responsible for notifying applicants as to their performance status.

The State may announce some FY 2025 awards and issue “authorizations to incur costs” for those awards prior to receiving funds from HUD for the FY 2025 funding year. Those issuances will be contingent upon the State’s receipt of FY 2025 LCDBG funds from HUD.

All local governments participating in a funded multi-jurisdictional application will not be able to receive future public facilities grants until the multi-jurisdictional grant has been conditionally closed out.

Standard Forms

Only application packages submitted on the standard forms included herein will be accepted. The application package is available online at OCD-LGA <https://www.doa.la.gov/oa/oed-lga/lcdbg-programs/public-facilities/>.

The following regulations apply to the LCDBG Program and should be considered in the preparation of your application.

1. Uniform Act (Acquisition and Relocation) – Requires appraisals for all acquisition (valued over \$10,000) undertaken in connection with activities included in the application, including easements/servitudes for public facilities. The local governing body is required to pay at least fair market value for all properties acquired. Acquisition must be completed before construction begins. Acquisition and relocation can be very time consuming. Please develop your program time schedule accordingly.
2. Davis-Bacon and Contract Work Hours and Safety Standards – Requires that Federal prevailing wage rates are paid to all employees working under a construction contract of \$2,000 or more. Also, all employees must be paid at least time and a half for any time they work more than forty hours per week. The Federal Labor Standards Provisions and the applicable federal wage decision(s) must be included in bid packages and contract documents as well as referenced in all bid advertisements. Prevailing wage rates are higher than regular wages in many rural areas and may affect the project budget.
3. Audit Requirements – 2 CFR Part 200 Subpart F requires single audits of all grantees that have total annual federal expenditures in excess of \$750,000. Financial audits and/or certifications are required in accordance with State law when grantee has total annual federal expenditures less than \$750,000. Single audit costs may be eligible for reimbursement in part as an administrative expense.
4. Architectural Barriers Act – Requires that all non-residential structures and public facilities constructed, renovated, or rehabilitated with federal funds be accessible to the physically disabled. Entrances must have ramps; bathrooms must accommodate wheelchairs; etc.

III. PROJECT SELECTION PROCESS

Preliminary Review

The LCDBG Staff will review each application to determine the following:

1. Timeliness of Submission – Applications must be **received, not merely postmarked**, by the OCD-LGA by the deadline date and time. Applications that are received after the deadline date and time **will not be considered for funding**.

2. Completeness of the Application – Applications will be reviewed for completeness. Failure to include all forms or the inclusion of incomplete forms may result in a lower overall score (see Rating Criteria below). **If the determination is made during the review that the application did not contain items necessary to accurately rate the application, did not include all required forms, involved a local survey that was not conducted on a random or representative basis, or was poorly packaged, etc., the application may be removed from further consideration for funding at the State’s discretion.**
3. Activity Eligibility – State staff will review each proposed activity to determine that it is an eligible activity that meets one of the three national objectives identified on page 1 of this application package. **Ineligible activities will not be rated.**

Applicant Selection

Description of Rating Procedures

After preliminary review, all public facilities applications that meet the threshold criteria described in Chapter II of this application package will be rated/scored according to the rating criteria which will be described in the State’s FY 2025 Proposed Consolidated Annual Action Plan and also in this section.

Public infrastructure applications will be assigned raw scores, then ranked highest to lowest based on the scores. The State may conduct a site visit on any of the applications received. Site visits will verify the information provided in the application. If a site visit discloses information conflicting with that included in the application or the intent of the program, the State will exercise administrative discretion in making the determination as to whether or not the application will receive further consideration, or an adjustment to the score and/or the application itself. Selected applicants *may* be contacted by telephone to arrange a time to visit and to identify items the State will review while on site. Items not specifically mentioned during this phone call may be reviewed during the site visit.

Rating Criteria

Public Facilities - Water, Sewer, Streets (Maximum of 79 Points)

Since the FY 2025 Proposed Consolidated Action Plan is not available at this time, the following describes the rating system that the State anticipates to be included in the Plan.

After all rating points have been assigned, combined, final public facilities ranking list will be produced including all public facilities applications that are being considered for the FY 2025 program year ranked from highest to lowest according to the total number of points received by each application. The OCD-LGA will award funding based on this final public facilities ranking list as funds are available.

The maximum points available for all PF categories (sewer, water, and streets) is 79.

Any water or sewer project that is funded must completely remedy existing conditions that violate a state or federal standard established to protect public health and safety.

According to federal regulations, the general rule is that any expense associated with repairing, operating or maintaining public facilities and services is ineligible. LCDBG funds may be used to reconstruct or rehabilitate previously paved streets or to pave streets that have never been paved. However, according to HUD guidance, eligible street project work must have a useful life of at least eight years, otherwise, work conducted on streets with less than a projected useful life of eight years is considered to be a maintenance activity, and is ineligible. Examples of street maintenance and repair activities for which LCDBG funds may not be used are the filling of pot holes in streets, and the use of asphaltic surface treatment (two or three shot).

Drainage improvements may be undertaken in conjunction with street improvements projects. Drainage improvements, for the most part, must parallel streets that are proposed for improvements under the LCDBG program. The cleaning of drainage ditches is considered as a maintenance activity for which LCDBG funds cannot be used. The amount of funds that will be used to address drainage improvements will be taken into consideration when determining the average cost per person (cost effectiveness) for street projects.

Both parishes and municipalities are limited to two target areas for residential street projects. The local government must improve all streets within the target area(s) that qualify for improvements under the LCDBG program. In delineating the target areas, note that the boundaries must be coincident with visually recognized boundaries such as streets, streams, canals, et cetera; property lines cannot be used unless they are also coincident with visually recognized boundaries. Gerrymandering will not be accepted.

Each application will be classified as including a project that benefits a specific target area/areas or that provides benefits on a community/system-wide basis. To be considered and rated as a community/system-wide project under the LCDBG Program, at least thirty-five percent of the total construction cost (including contingencies) must be utilized for a community/system-wide activity. If a project has one or more community/system-wide activities but the construction cost of that activity or activities is less than thirty-five percent of the total construction cost, the project will be classified for rating purposes as primarily involving a target area(s). The cost estimate in the application must clearly separate and distinguish between the community/system-wide and target area activities. Those applications that propose activities serving a target area/areas (an area smaller than the jurisdiction of the local government) will also be classified and rated as a target area activity.

Specific standards/requirements that must be met for sewer, water, and street projects are discussed in detail in this LCDBG Application Package for public facilities.

- a) Benefit to Low/Moderate Income Persons (Maximum Possible Points - 5)

For those water and sewer applications that are classified as community/system-wide, for rating purposes and reporting purposes, the beneficiaries of the project will be considered

as all of the persons living within the boundaries of the local government and/or those persons served by the utility system. For those applications that involve target areas only, for rating purposes and reporting purposes, the beneficiaries of the project will be considered as those persons residing within the boundaries of the target area or areas. For those applications that involve both target area activities and community/system-wide activities, but which do not meet the LCDBG definition of community/system-wide for rating purposes, the target area data will be used for rating purposes and the community/system-wide data will be used for reporting purposes. Regardless of the application's classification, projects that involve different beneficiaries for different activities must specifically identify the beneficiary data for each activity.

For street projects, all streets within the target area(s) that require reconstruction, rehabilitation, or paving must be addressed. The total beneficiaries for rating and reporting purposes for benefit to low/moderate income persons will be all residents whose EMS/911 addresses are identified as being on one of the streets designated for construction work.

The engineer for each project must certify as to which residents or persons will benefit for each proposed activity. The OCD-LGA will make the final determination in that matter.

The percentage of low/moderate income persons benefiting will be calculated by dividing the number of low/moderate income persons benefiting (as defined by the State) by the total persons benefiting. Only those applications in which the percentage of low/moderate income persons benefiting is at least fifty-one percent are eligible for funding.

Five points will be assigned to those applications/projects where the percentage of low/moderate income persons benefiting is sixty percent or more. No point will be assigned for applications/projects benefiting less than sixty percent low/moderate income persons.

The percentage of low/moderate income persons benefiting will be calculated by dividing the number of low/moderate income persons benefiting (as defined by the State) by the total persons benefiting. Only those applications in which the percentage of low/moderate income persons benefiting is at least fifty-one percent are eligible for funding.

The percentage of low/moderate persons benefitting to the 100th decimal place will be used to determine the number of points for this category.

b) Cost Effectiveness (Maximum Possible Points - 10)

The cost per person benefiting will be calculated for each project. All applications will be categorized by the type of project being proposed (new sewer systems primarily for collection, rehabilitation of sewer systems primarily for collection, sewer treatment, and potable water, streets, and other). Each sewer application will fall into one of three subcategories for the purpose of rating. If the construction cost for new sewer system improvements is equal to or greater than seventy percent of the total construction cost, the application will be assigned to the "New Sewer System" subcategory. If the construction cost for new sewer system improvements is less than seventy percent of the total construction cost or no new sewer system improvements are proposed, then the application

will be assigned to either the “Sewer System Rehabilitation” subcategory or the “Sewer Treatment” subcategory. If the construction cost of the sewer system rehabilitation is equal to or greater than the treatment plant improvements, then the application will be assigned to the “Sewer System Rehabilitation” subcategory; otherwise it will be assigned to the “Sewer Treatment” subcategory.

Each project category will then be split into two population groups. The split for each project category will be based on the average value of the total persons benefiting per project which will be computed by dividing the sum of the total persons benefiting (after eliminating the highest and the lowest number of beneficiaries for each category for the calculation) by the number of applications for that category (after eliminating the two applications in each category with the highest and the lowest number of beneficiaries for the calculation). One group will consist of projects having a larger number of total persons benefiting than the average value; the second group will consist of those projects having a smaller number of total persons benefiting than the average value. (If the total number of persons benefiting from any project equals the average value, that project will be placed in the second or smaller group.) The project in each group having the best cost effectiveness (cost per person) will be given ten points and the remaining projects will be prorated. The population groups will NOT be combined for each category in the determination of rating points for cost effectiveness. They will remain separate, thus creating ten separate sub-categories for cost effectiveness points assignment. This allows those projects benefiting many people and those benefiting fewer people to be rated for cost effectiveness against other projects benefiting a similar number of persons.

The following formula will be used to determine the cost effectiveness points for each applicant in each grouping:

$$\text{CE Points} = \frac{\text{Lowest Cost per Person Benefiting} \times 10}{\text{Applicant Cost per Person Benefiting}}$$

For rating purposes for cost effectiveness points assignment, beneficiaries for street projects will be those residents whose EMS/911 address is identified as being on one of the streets designated for construction work.

Cost of resiliency plan components will not be included in the Cost Effectiveness calculation. Components of the resiliency plan that will be addressed in the proposed project must be separated and clearly identified in the cost estimate.

The cost effectiveness points assigned to the FY 2025 applications will be based upon those applications that meet the threshold requirements for FY 2025 funding eligibility and submit a full application upon invitation. Therefore, the cost effectiveness points assigned an applicant under the FY 2025 program will most likely differ from those points assigned to the same applicant under the FY 2024 program. When determining the cost effectiveness points for the FY 2025 applications, the applications that were funded during the FY 2024 program year will not be taken into consideration.

c) Project Severity (Maximum Possible Points – 50)

This rating will be based upon the severity of existing conditions and the extent of the effect of those existing conditions upon the health and welfare of the community. Priority will be given to wastewater systems, water systems addressing potable water, and street projects.

In assigning points for project severity, the following general criteria will be utilized by the OCD-LGA or the cognizant review agency (if applicable) for the type of project proposed.

Wastewater systems and water systems addressing potable water needs: the existence of conditions in violation of the provisions of the State Sanitary Code that most directly protect public health and the adequacy of the proposed improvements to eliminate such conditions. Compliance with federal and state laws and regulations will be considered.

Verification of existing conditions will be provided by LDH and/or DEQ based on records or field investigations. Problems that are generally attributable to a lack of routine maintenance will result in a less favorable evaluation.

The specific details of the existing problems and proposed project must be provided so that the project can be assessed properly. A lower assessment of the project could result due to the submittal of incomplete or inaccurate information; in those instances, the assigned score will not be re-evaluated.

Scores for project severity are generally based upon the proposed actions in the following tables assuming that the proposed actions will completely remedy the existing problem. If an application contains multiple actions, each action will be scored and the severity score will be pro-rated accordingly. Generally, scores will begin at the lower part of the range and will increase if evidence is presented that illustrates a more severe, existing condition. If existing conditions as stated in the severity package are unsubstantiated or not in violation of any state or federal standard, the OCD-LGA reserves the right to assign severity scores below the minimum scores shown in the point ranges below.

Project Severity Criteria for Wastewater Applications

PROPOSED ACTION	POINT RANGE
<i>COLLECTION</i>	
Replace or rehabilitate collection system components.	10-50
<i>EXISTING TREATMENT FACILITY</i>	
Replace or upgrade existing facility to meet capacity and or discharge requirements.	15-50
<i>SYSTEM</i>	

New collection system to provide service for un-served areas.	35-50
Replace or rehabilitate various components when minimum requirements have been met.	0-50

Project Severity Criteria for Potable Water Applications

PROPOSED ACTION	POINT RANGE
<i>SOURCE and SUPPLY</i>	
Replace or Rehabilitate source to meet existing demands.	15-50
<i>DISTRIBUTION</i>	
Replace or Rehabilitate Distribution due to pressure or MCL violations.	20-50
<i>STORAGE</i>	
New or Rehabilitate facility when existing capacity is not capable of meeting current requirements.	15-50
<i>TREATMENT</i>	
Replace or upgrade facility due to existing demand to meet primary drinking water standards.	20-50
<i>SYSTEM</i>	
New water system or extension of existing system to un-served areas.	35-50
Replace or rehabilitate various components when minimum requirements have been met.	0-50

MCL – Maximum Contaminant Level as established by the U.S. Environmental Protection Agency.

Residential Street construction, rehabilitation, or reconstruction: existing surface conditions and deficiencies and surface area measurements. Each street being applied for will be inspected by the OCD-LGA and will be given a condition rating ranging from 0 to 100. Unpaved streets will receive a minimum condition rating of 70. A weighted average will be determined by multiplying a particular street’s condition rating by that street’s surface area. The sum of the figures for all of the streets in the application will be divided by the total surface area of all the streets to determine the weighted condition rating. The following example clearly illustrates how this will be accomplished.

(a)	(b)	(c)	(d)	(e)	(f)
Street	Length (feet)	Width (feet)	Area (square feet)	Condition Rating	(d) x (e)
Elm Street	1,000	18	18,000	70	1,260,000

Oak Street	1,200	20	24,000	78	1,872,000
Ash Street	800	16	12,800	80	1,024,000
Cedar Street	800	18	14,400	74	1,065,600
Pecan Street	900	20	18,000	62	1,116,000
TOTALS			87,200		6,337,600

Weighted condition rating = $6,337,600/87,200 = 72.68$

Points for project severity will be determined by dividing the weighted condition rating by 2. A maximum of 50 points will be awarded for project severity on street projects. For the above example the project severity score would equal $72.68/2 = 36.31$ points, which will be rounded to 36.3 points.

d) Engineering Costs (Maximum Possible Points - 2)

Two points will be assigned to applicants that agree to pay the engineering costs associated with the implementation of the LCDBG program. Such costs include but are not limited to basic design, resident inspection, testing, staking, etc. Local funds must be pledged and allocated for such services. To confirm that the local government will pay the engineering costs associated with the LCDBG Program, a certification of such signed by the chief elected official must be included in the application as well as a copy of the resolution by the local government identifying the firm hired and the proposed amount of the contract. That resolution must state that local funds will be used to pay the engineering fees and any other engineering costs incurred by the local government.

e) Administrative Costs (Maximum Possible Points – 2)

Those applicants that agree to pay all administrative costs associated with the implementation of the LCDBG program will receive two points. Such costs will include, but will not be limited to, application preparation fees, audit fees, advertising and publication fees, local staff time, workshop expenses, administrative consultant fees, et cetera. If the applicant plans to utilize the services of an administrative consultant, local funds must be pledged and allocated for such services.

While the LCDBG Program will allow a maximum of \$100,000.00 for an administrative costs, the actual cost of these services may be less than this amount and will be determined through negotiation during the procurement process. To substantiate that the local government will pay the administrative costs associated with the LCDBG Program, a certification of such signed by the chief elected official must be included in the application as well as a copy of the resolution by the local government identifying the firms hired and the proposed amount of the contracts.

That resolution must state that local funds will be used to pay the administrative consultant fees and any other administrative costs incurred by the local government.

If the local government maintains full-time permanent staff for the sole or partial purpose of administering LCDBG or other federal programs, such staff must have proved its capacity to administer LCDBG or other federal programs through previous program administration. In this instance, the points will also be assigned.

f) Consolidation of Systems (Maximum Possible Points - 4)

If the proposed project includes the consolidation of two existing water or sewer systems into one larger system, four points will be assigned to the applicant. To be considered a consolidation, one or more of the water or sewer systems must be dissolved and be fully absorbed into the larger system. The larger system must own, operate and maintain all other systems in the consolidation grant.

Purchase only systems are not considered a consolidation.

Note: If funded, the grantee will be required to do the following in order to closeout the project and remain in good standing with the LCDBG program:

- o For water systems, the system that is dissolved must have their PWS ID removed from the LDH database.
- o For sewer systems, the system that is dissolved must contact the Louisiana Department of Environmental Quality (DEQ) and have their Discharge Permit cancelled.

All applicants with proposed projects that include the consolidation of systems must request a meeting with the OCD-LGA prior to submitting the project severity package. OCD-LGA will make the final decision in determining the correct applicant and verify that the project is considered a consolidation. The form included in this package must be submitted to OCD to request a meeting. After the meeting, OCD-LGA will provide a copy to the applicant identifying whether the project qualifies for these points.

g) Application Completeness (Maximum possible points – 2)

For applications that are submitted in which all application forms and required documents/information are included, the applicant will receive one point. Additionally, if OCD-LGA determines that no revisions are needed to documentation in order to complete the scoring of the application, the applicant will receive one point.

h) Resiliency Criteria (Maximum possible points – 2)

Resilience is the ability to prepare and plan for, absorb, respond, recover from and more successfully adapt to adverse events. Applications that include a resiliency plan as a separate attachment to the project description and specific item(s) of improvements are included on the cost estimate that coincide with item(s) identified in the resiliency plan receive two points.

Currently, there are no state or nationwide standards for resilient infrastructure that is widely recognized by engineering or public works professionals. An effective resiliency plan must integrate issues across the physical and logical (also known as digital) domains. For example,

most recent cyberattacks are described as ‘blended’ attacks meaning they exploited vulnerabilities both in the physical and digital domains. The same systems approach also applies to major weather events such as hurricanes. One of the major issues following hurricanes is to restore power and to restart critical infrastructure. One consideration is to determine how significantly the infrastructure would be affected and the degree to which disruptions to services may impact the community.

The engineer, with input from local officials, should develop local standards or guidelines that can be applied to infrastructure projects and increase resilience. Guidelines should be based on selecting probable scenarios that could impact the system within the design lifespan of a project. FEMA, NOAA, USACE, various state agencies and local officials can provide data to aid the engineer in preparing resiliency options. NOAA has developed a U.S. Climate Resilience Toolkit to share case studies, tools and information to help communities and engineers create guidelines (<https://toolkit.climate.gov>).

With broad agreement that spending on resilience protection is an investment, infrastructure owners must first identify and prioritize their critical assets and essential functions. This is crucial to ensuring the limited resources are being spent to protect the highest priority assets and processes. Priorities must also include the most probable scenarios that will occur and affect critical infrastructure. In Louisiana, resiliency plans should include extreme weather events and the effect of water and wind damage to critical infrastructure.

The resiliency plan should also consider what must be done during and after an extreme weather event to maintain operating capabilities of critical infrastructure. The proposed resiliency plan should be included as a separate attachment to the Project Description in the application and should contain the following:

- o A list of improvements to the infrastructure.
- o The effects of extreme weather that will be offset due to the implementation of the resiliency plan.
- o A list of any historical information where extreme weather has been detrimental to the infrastructure or where extreme weather has damaged operating capabilities of the infrastructure.

Components of the resiliency plan that will be addressed in the proposed project must be separated and clearly identified in the cost estimate. Cost of resiliency plan components will not be included in the Cost Effectiveness calculation. OCD-LGA will consult with LDH to determine whether resilience items are eligible for points and not included in the cost effectiveness calculation. Because resilience needs vary by system and LDH has a better knowledge of the conditions, they will make the final determination.

i) Past Performance (Maximum possible points – 2)

Applicants will receive points unless one or more of the following is applicable when reviewing past performance of any grants funded to the application during the 2018-2023 LCDBG program years.

- A second contract or contract extensions was required in order to complete and or closeout the grant.
- Penalties were assessed at any time during the grant due to failure to meet a required benchmark.
- Finding of deficiency identified as “very serious” issued during the grant.

Use of Other Funds in Conjunction with LCDBG Funds – Some projects may cost more than can be requested under the LCDBG Program; in such cases, the applicant may propose to use other funds in conjunction with the LCDBG funds. Applicants who want to use other funds in conjunction with LCDBG funds must have those funds available and ready to spend. If the other funds involve loans or grants from other state, federal, or private sources, the monies must have already been awarded or be in the bank. To substantiate the immediate availability of the other funds, one of the following items is required: a letter from the local government stating the specific source, amount, and location of local cash, a line of credit letter from a financial institution such as a bank stating the amount available as a loan, specific evidence of funds to be received from a tax or bond election that has already passed, or a letter from another funding agency stating that the funds have been awarded and are currently available for expenditure.

If other funds are involved and that applicant is in a position to be funded, the LCDBG staff will contact the applicant prior to a grant award and request positive proof of the current availability of the other funds; **if proof cannot be provided within the timeframe allowed by the OCD-LGA (approximately ten calendar days), then the project will not be funded at that time.** If additional LCDBG funds are made available and grants are awarded again in the same program year, the applicant will be reconsidered and given the opportunity to provide availability of additional funds; **if the other funds are not available at that time, the applicant will no longer be considered for funding.**

Appeals

Applicants may meet with OCD-LGA staff to review their application and program scores any time after grant awards have been announced. When an applicant requests an appeal, the following procedures apply:

1. Appeals will be granted only on the basis of miscalculation of numerical factors.
2. Applicants must submit a written request for an appeal within ten working days after notice of denial is received.
3. The State will respond in writing to appeal requests within ten working days.

Complaint Procedures

Persons wishing to object to the approval of an application by the State may make such objection known to the OCD-LGA. The State will consider objections made only on the following grounds:

1. The applicant's description of needs and objectives is plainly inconsistent with available facts and data;
2. The activities to be undertaken are plainly inappropriate in meeting the needs and objectives identified by the applicant; and
3. The application does not comply with the requirements set forth in the FY 2025 proposed Consolidated Annual Action Plan or other applicable laws.

All complaints of this nature must be submitted to the OCD-LGA in writing. Such complaints must specifically identify the grounds upon which the complaint is being made. All objections must be supported by data to document the allegation.

IV. INFORMATION FOR PUBLIC FACILITIES PROJECTS

Questions concerning forms or instructions should be directed to the OCD-LGA at (225) 342-7412. Louisiana Relay Service is available for hearing impaired persons by using the following numbers: 7-1-1 (Hamilton Relay); 1-800-846-5277 (TTY); 1-800-947-5277 (Voice).

Size of Grants

- \$2,000,000 – Sewer Treatment, New Sewer Collection, Existing Sewer Collection Rehabilitation, and Potable Water
- \$1,000,000 – Streets

A minimum construction amount of \$350,000 must be included in the project. Those projects that do not involve a minimum of \$350,000 will not be considered for funding or scored in any way.

Eligible Activities

The following are examples of eligible activities under the Sewer improvements category. The eligible activities have been divided into three subcategories for rating purposes for cost effectiveness.

- New Sewer System – A new sewer system will consist of providing improvements for a non-sewered area. The improvements may include new sewer lines, manholes, lift stations, force mains, house connections, and may include the construction of a new sewage treatment plant or the expansion of an existing treatment plant made necessary by the additional sewage from the non-sewered area.
- Sewer System Rehabilitation – This activity will include line replacement, pipe bursting, lining, manhole replacement/rehabilitation, and lift station replacement/rehabilitation.
- Sewer Treatment – This activity will include the rehabilitation and/or expansion of existing treatment facilities and/or construction of new treatment facilities to serve an existing collection system.

Each sewer application will fall into one of the three subcategories for the purpose of assigning rating points for cost effectiveness. If the construction cost for new sewer system improvements is equal to or greater than 70% of the total construction cost, the application will be assigned to the “New Sewer System” subcategory. If the construction cost for new sewer system improvements is less than 70% of the total construction cost or no new sewer system improvements are proposed, the application will be assigned to either the “Sewer System Rehabilitation” subcategory or the “Sewer Treatment” subcategory. If the construction cost of the sewer system rehabilitation is equal to or greater than the treatment plant improvements, the application will be assigned to the “Sewer System Rehabilitation” subcategory; otherwise, it will be assigned to the “Sewer Treatment” subcategory.

The following are examples of eligible activities under the Potable Water improvements category:

- Water wells

- Disinfection equipment/facilities
- Elevated and/or ground storage tanks, pump stations, etc.
- New water lines and/or water line replacement
- New treatment facilities or improvements to existing treatment facilities

If the proposed project includes providing **sewer or water** service to an area that does not currently have sewer or water service, then the following items should be noted:

- LCDBG funds, local funds, or other state or federal funds must be used to pay for connection lines to **residential** structures that are occupied by low- and moderate-income persons. Both rental and owner occupied units are eligible for this assistance if the residence is occupied by low- and moderate-income persons. The applicant is responsible for determining and maintaining documentation regarding the income status of the occupants.
- While LCDBG funds cannot be used to construct the service connection lines for the higher income residences, the applicant must require those residents to connect to the system at their own expense.
- The applicant must adopt and **enforce** a procedure that will ensure that all residences (regardless of income) will be connected to the utility system. This is necessary to meet the project impact certification whereby the engineer states that the proposed project will remedy the existing violation of a state or federal standard. Also, persons in households that are not connected to the system cannot be considered as beneficiaries of the project.
- LCDBG funds cannot be used to pay the costs associated with the connection of non-residential structures.
- If invited to submit a full application, all income verifications for hook-ups will be required with the submittal of the application.
- Some communities/parishes charge hook-up fees. A hook-up fee is a one-time access charge that the homeowner must pay for the privilege of connecting to the utility system. This fee is generally a fixed amount that is not related to the actual construction cost of the service connection line. The federal regulations governing the use of LCDBG funds to pay the hook-up fee for the homeowner are very restrictive. If the community/parish plans to require this fee directly from the recipients of a utility system funded in whole or in part with LCDBG funds, a determination must be made by this office that such a fee would not have an adverse effect on the low/moderate-income persons involved. Due to the complex federal regulations governing this matter, all applicants who propose to collect a hook-up fee (whether from LCDBG funds or directly from the homeowners) must schedule a meeting with staff in the OCD-LGA to discuss such fees; this meeting must be held **prior** to the submittal of the application.
- No more than 25% of the households surveyed can respond “no” to the required question on the survey form regarding the monthly user fee. Applications with more than 25% of households surveyed answering “no” will be disapproved and not be considered for rating/funding.

Any water or sewer project that is funded must completely remedy existing conditions that violate a state or federal standard established to protect health and safety. Also, any project that affects the entire utility system must count all households connected to the system as beneficiaries, including households outside the corporate limits of the municipality.

Only one utility system can be included in each application. For example, a Parish may have more than one sewer system within the Parish boundaries but can only propose improvements to one of those systems in an application. The exception to this is a project that involves multiple systems consolidating into one system.

According to federal regulations, the general rule is that any expense associated with repairing, operating, or maintaining public facilities and services is not eligible.

The following are examples of eligible activities under the Streets category:

- Reconstruction of previously paved streets. Reconstruction requires reworking the base course by a generally accepted construction method such as removal and replacement, in-place cement stabilization, etc. A wearing course will then be placed on the prepared base. The wearing course may be Portland cement concrete or asphaltic concrete. Asphalt surface treatment is **not** allowed for the reconstruction of previously paved streets (two or three shot).
- Rehabilitation of previously paved streets. Rehabilitation of streets consists of addressing surface deficiencies and base failures followed by the construction of a wearing course. The correction of existing deficiencies may be corrected by pavement patching, crack sealing, cold planning, etc. Patching shall be deep enough to strengthen the base. Asphalt surface treatment is **not** allowed for the rehabilitation of previously paved streets (two or three shot).
- New Construction (paving of aggregate surfaced streets or other unpaved streets). The engineer will determine the extent and type of base course that is needed as well as the type of wearing course. The wearing course may be Portland cement concrete or asphaltic concrete. Asphalt surface treatment is **not** allowed for the new construction of streets (two or three shot).

Existing paved streets must be in either fair or poor condition as defined by the “Sufficiency Rating Data Guide for LCDBG Street Projects” found in the instructions for the Project Impact Certification Form shown on page 56.

According to federal regulations, the general rule is that any expense associated with repairing, operating, or maintaining public facilities and services is not eligible. Therefore, the cleaning of ditches and the repair and/or filling of potholes alone are NOT eligible under the LCDBG program. HUD guidance states that project work must have a useful life of at least eight years; otherwise, work conducted on streets with less than a projected useful life of eight years is considered to be a maintenance activity and is ineligible. Miscellaneous items that are eligible on street projects include, but are not limited to, curb and gutter sections, crack relief layers, leveling courses, pavement widening, reshaping ditches, side drains, cross drains, and adjustments to manholes and water valves.

Each street project applicant is limited to two target areas. All streets within the target area that meet the criteria for improvement under the program must be improved. **Beneficiaries for street projects will be those residents whose EMS/911 address is identified as being on one of the streets designated for construction, except residents living in group homes**

who normally do not drive vehicles. If a portion of a street is being improved, only those residences whose EMS/911 address is identified within the portion of the street being improved can be counted as beneficiaries. The number of occupied residences for each street scheduled for construction was counted and shown on the Street Summary Table in the Severity Package (page 27 of the package). A copy of the Street Summary Table from the Severity Package should also be submitted with the application. In delineating the target areas, the boundaries must be coincident with visually recognized boundaries such as streets, streams, canals, etc. Property lines cannot be used unless they are also coincident with visually recognized boundaries. Gerrymandering will not be accepted.

Each target area for street projects must have a minimum of fifty-one percent low- and moderate-income persons benefiting, be a minimum of seventy-five percent residential, and not more than fifty percent exempt.

State roads are not eligible for improvement with LCDBG funds.

If there are any funds being utilized for acquisition items, the associated costs should be reflected under the main public facilities activity in the project. These include items such as purchase of property, legal fees associated with acquisition, property surveying, appraisals, etc.

CHECKLIST FOR PUBLIC FACILITIES APPLICATIONS

This checklist should not be included in the submitted application. This checklist is only provided for informational purposes during application preparation. All forms listed on this page are required for public facilities applications.

FORM	Page No.	Completed
General Description Form	21

INSTRUCTIONS

General Description Form

- Item 1: Enter applicant name (municipality or parish).
- Item 2: Type of Application – Circle the type of project for which you are applying.
- Item 3: Enter mailing address of applicant (P.O. Box or street address, name of city, and zip code plus four digits). (Note: For the four digit number, please contact your local post office).
- Item 4: Enter the name of the City Clerk or Parish Secretary.
- Item 5: Enter an Email address for the applicant. If the applicant does not have an Email address, enter “Not Applicable”.
- Item 6: Enter the name and phone number of the Administrative Consultant preparing the application. If the Consultant is self-employed, enter the individual’s name; otherwise, enter the name of the firm.
- Item 7: Enter the name and phone number of the engineering **firm** preparing the application. Enter the name of the firm, not the name of an individual.
- Item 8: Enter an Email address for the Administrative Consultant preparing the application. If the Administrative Consultant does not have an Email address, enter “Not Applicable”.
- Item 9: Enter an Email address for the Engineer preparing the application. If the Engineer does not have an Email address, enter “Not Applicable”.
- Item 10: Indicate an “x” as to whether the proposed project will involve a system-wide project or a target area(s). If a target area(s) is involved, enter the name(s) of the target area(s). Also list the census tract(s), block group(s), and nine-digit zip code for each target area.
- Item 11: Enter the district number of each State Senator, State Representative, and U.S. Congressman representing the local governing body for community-wide projects. If the project involves a target area(s), enter the district numbers of only those representing the target area(s)
- Item 12: Identify the national objective addressed by the proposed activity by placing an “x” in the []. Mark only one national objective for the application.
- Principal benefit to low/moderate income persons is an objective that will be addressed by an activity whose beneficiaries will be at least fifty-one percent low/moderate income.
 - In order to claim that the proposed activity meets the objective of elimination or prevention of slums and blight, the following must be included. An area must be delineated by the applicant that:
 - Meets the definition of slums and blight as defined in 24 CFR 570.483(c), and
 - Contains a substantial number of deteriorating or dilapidated buildings or improvements throughout the area delineated.

The applicant must describe in the application the area boundaries (map), the conditions (number of deteriorated or dilapidated buildings or improvements) of the area at the time of its designation, and how the proposed activity will eliminate the conditions that qualify the area as slum and blight. Attach a narrative containing the above specifics as well as a map identifying the slum/blight area. If the slum/blight area is different from the target area, include a separate map.

- Meets the definition of urgent need as defined in 24 CFR 570.483(d).

Item 13: Enter the total amount of LCDBG funds being requested.

Item 14: Identify all funds that will be used for completion of the project. Include funds requested through this application and any other funding sources to be utilized. List amount of funds in each category and specific source of these funds. For example, "Local Funds" are any funds included in total project costs contributed by the unit of local government submitting the application. "Private Funds" are those from sources other than governmental entities such as private businesses, banks, etc. Any funds received through other state programs that are used for this specific project would be listed under "State Funds." Any federal funds, such as EPA, USDA Rural Development, etc., should be listed under "Federal Funds." Any other funds not previously identified to be used for the project should be listed under "Other" and the source specified. For each funding source, indicate the status of the funds, i.e., application being prepared, application submitted, preliminary approval, final approval.

Item 15: The chief elected official must sign on line 15.

Item 16: Enter the date the application was signed by the chief elected official.

Item 17: Type or print the name and title of the chief elected official signing the application.

Item 18: Enter the applicant's telephone number.

LCDBG PROGRAM
 BUDGET/COST SUMMARY FORM

APPLICANT NAME:

I. Costs by Activity (Read Instructions Before Completing)				
Activity (A)	LCDBG (B)	Other (C)	Total (D)	Source of Other Funds ¹ (E)
1.				
2.				
3.				
4.				
5. Administration				
TOTAL				

II. Line Item Budget – LCDBG Funds Only		For State Use Only
1. Public Facilities – Water/Sewer/Streets (Total)	\$	\$
a. Construction Costs	\$	\$
b. Engineering Costs	\$	\$
c. Acquisition Costs	\$	\$
2. Rehabilitation Loans and Grants (PF Hook-ups)	\$	\$
3. Administration (Total)	\$	\$
a. Public Facilities	\$	\$
4. Other	\$	\$
5. Other	\$	\$
6. TOTAL	\$	\$

III. Contract Execution Dates (only if scheduled to be paid using LCDBG funds)		
Name of Administrative/Engineering Firm	Contract Execution Date	Amount of Contract

¹ If other funds are being injected in a public facilities project, refer to the “Certification of Other Funds” form on page 63 and the corresponding instructions.

INSTRUCTIONS

Budget/Cost Summary Form

Enter Name of Applicant.

SECTION I: COSTS BY ACTIVITY

Column A: List each activity on a separate line. Administration (including pre-agreement costs) is shown separately on line 5. Note that Acquisition is no longer a separate activity, and is now carried under the main Public Facilities activity.

Columns B, C, D, & E: For each activity, complete the cost columns. Indicate the LCDBG money requested in Column B. Lump together all other funds that will be used to accomplish the activity and show these costs in Column C. Add together LCDBG (B) and Other (C) and record the result in Column D. In Column E, identify the sources of the funds listed in Column C.

Be sure to include all costs related to an activity in the cost columns. For example, if the project involves the construction of a new sewer treatment plant, costs to be included should include engineering costs, construction costs, inspection costs, etc.

If other funds are being injected into a public facilities project, please refer to the "Certification of Other Funds" form on page 63 and the corresponding instructions.

SECTION II: LINE ITEM BUDGET

Include LCDBG costs only in this budget. In this section, the costs shown in the LCDBG column of Costs by Activity in Section I should be broken down by the type of cost. Note: Acquisition is no longer a separate activity, and thus is now carried under the main Public Facilities activity. The total costs for the main activity would appear in Section II, Line 1. Construction costs, engineering costs and acquisition costs would appear in lines 1a, 1b, and 1c, respectively. Any costs associated with the construction of hook-ups or work done on private property would appear in Section II, Line 2.

NOTE: If the applicant is requesting reimbursement for pre-agreement costs for engineering and/or administrative consulting services, those funds must be identified on line 3a. In addition, the amount of funds requested for overall program administration must be identified on line 3b. The amount of funds requested for pre-agreement costs and overall program administration must be identified separately. The total amount of pre-agreement and overall program administration funds should be identified on line 3.

SECTION III: CONTRACT EXECUTION DATES

If LCDBG funds will be used to cover administrative and/or engineering costs, enter the name of the administrative consulting and/or engineering firm that the applicant has contracted with to perform services for the proposed project, the date the contract between the applicant and the firm was executed, and the dollar amount of the contract. **An executed contract must be in place prior to services being performed for the project when using LCDBG funds to pay for these services.** The program cannot reimburse the applicant for expenditures that are incurred prior to the existence of an executed contract between the applicant and the firm.

ACTIVITY BENEFICIARY INFORMATION

First, the target area(s) being served by the project must be determined, and beneficiary information obtained. If there is more than one target area, then the low- and moderate-income information must be determined for each target area independently of the others. Each target area must benefit at least fifty-one percent low- to moderate-income persons.

ACTIVITY BENEFICIARY FORM

Beneficiary information is shown on an Activity Beneficiary Form (ABF). For projects involving more than one target area, an individual ABF must be completed for each target area. Indicate target area (1, 2, etc.) to which the data on the form corresponds. The projected information from each target area's individual ABF must be shown on a Combined ABF that includes data for all target areas. The number and percent of low/moderate income persons are determined by combining the number of persons shown on each individual target area's ABF, and dividing by the total persons benefiting from the project. This methodology is also used in combining information from the data for a census area, and a smaller area that was surveyed.

Example:	<u>Target Area 1</u>	<u>Target Area 2</u>
	Total persons: 30	Total persons: 100
	Low/mod persons: 17 or 57%	Low/mod persons: 70 or 70%

<u>Combined ABF</u>	
<u>87</u>	
130	= 66.92% low/mod

The final ABF must be labeled as "System-Wide," "Target Area," or "Combined" in the space provided following "Target Area." The information needed for the ABF will be determined from census data and/or a local random household survey.

System-wide versus Target Area Projects

In order to be classified as a "system-wide" project for rating purposes, the project must have at least 35% of the construction funds in a "system-wide" activity. If less than 35% of the construction funds are being spent in a "system-wide" activity, then the project will be considered a "target area" project for rating purposes. The project will be rated using the target area information, but the system-wide information will be used for reporting purposes if the project is funded. The costs must be distinguished on the cost estimate as "system-wide" or "target area" in order for the Office of Community Development Staff to verify the applicant's status. For projects that include some funds in a "system-wide" activity, but not enough to be considered a "system-wide" project for rating purposes, one ABF must be submitted with target area information and a second ABF must be submitted with the system-wide information. All households connected to the utility system that is included in the application must be counted as beneficiaries of the project if the project is system-wide, including households that may be located outside the municipality corporate limits.

The applicant must utilize census data (if available). Census data for parishes, places (municipalities), and block groups is provided on HUD's website at <https://www.hudexchange.info/programs/acs-low->

mod-summary-data/. Use the links for “all block groups” and “local government summaries.” Census maps must be checked to determine if a census tract(s), or block group(s) is generally contiguous with the target area(s). An applicant can go to <http://factfinder.census.gov> and select Reference Maps, then make selections from the dropdown lists to show the desired items on the map.

When a project area does not coincide with census tracts or block groups, an applicant must conduct a local survey or combine census data with a local survey. For instance, if a project area encompasses an entire block group area, but is larger than the block group area, (however does not encompass the entire neighboring block group area or the place), the applicant would utilize the census data for the block group area, and conduct a survey of the additional area(s) which are outside of the block group area and combine the data. An ABF would be completed for the block group area, a Survey Tabulation Form and ABF for the surveyed area(s), then an ABF combining the information from the two. If there is more than one outside area, and the areas are not contiguous with each other but are both contiguous with the block group or place area, one previous would cover both areas.

For target areas that are smaller than the block group area they are located in, generally, a random household survey would be conducted. If ten percent (10%) or less of the houses in the project area (where census data is available and the project area is generally contiguous with the census data area) are not currently served by nor will be served by the proposed project, census data, rather than survey data, must be used to determine the benefit to low/moderate income persons. For example, if there are 100 occupied houses in the project area and 10 of those houses are not connected to the system, the applicant must still utilize census data rather than a local survey to determine income data, (if census data is available for the project area).

If a random household survey is involved, the ABF must identify all beneficiaries, not just those surveyed. If all households were not surveyed, projections must be made based on the survey results. The Office of Community Development has developed excel workbooks, Household Survey Forms and Household Survey Instruction Forms, which provide forms and instructions. The workbooks are located on the OCD website at http://www.doa.la.gov/Pages/ocd/CDBG/lcdbg_applications_and_forms.aspx.

The workbook includes Survey Forms, Tabulation Sheets, the Survey Tabulation Form, Projected Occupied Households Sheet, and Projection Sheet: From the Survey Tab Form to the ABF, and the ABF. **A separate workbook must be completed for each target area.**

NOTE: Each target area must benefit at least fifty-one percent low- and moderate-income persons.

ACTIVITY BENEFICIARY FORM INSTRUCTIONS (for census data)

If using census data, fill out this ABF and submit it with the application. If a survey is involved instead of census data, use the survey form(s) and ABF provided in the Household Survey Forms document found on our website:

http://www.doa.la.gov/Pages/ocd/CDBG/lcdbg_applications_and_forms.aspx.

ACTIVITY BENEFICIARY FORM DEMONSTRATION: ONE TARGET AREA, TWO ABFs

The following diagram illustrates the flow of information for combining census data with household survey results when the census data alone is not sufficient.

SURVEY TABULATION FORM

If conducting a local random survey is necessary, a complete set of survey forms must be submitted with the application as well as the Survey Tabulation Form. **If there are multiple target areas, a survey of each target area must be conducted independently of the others and a Survey Tabulation Form for each target area must be completed.** Survey data must be submitted on the forms provided in the excel workbook, Household Survey Forms, located on the OCD website under the Applications and Forms tab in the order specified in the Survey Form and Methodology section of this application package.

Household surveys conducted for the previous applicant cycle are acceptable.

SURVEY INFORMATION AND METHODOLOGY

For guidance purposes, a memorandum from the U. S. Department of Housing and Urban Development regarding survey methodology is provided on the Office of Community Development’s website at http://www.doa.la.gov/pages/ocd/cdbg/lcdbg_resources.aspx.

The survey form provided by the Office of Community Development must be used for Public Facilities projects that require a survey. The form and instructions are included in the excel workbooks, Household Survey Forms and Household Survey Instruction Forms, available on the OCD’s website under the Applications and Forms tab. In addition to those instructions, the following applies to the survey process.

User Fee – Enter the projected monthly user fee that will be imposed on the users of a new utility system. When surveying the houses, inform the surveyed person of the projected fee and enter “y” for yes or “n” for no, indicating whether or not the user is willing to pay the fee. If 25% or more of the persons surveyed indicate they would not be willing to pay the user fee, then the applicant should consider a different project application to be submitted.

Household Income – The income category for households/persons must be determined based upon the number of persons in the household. The surveyor should determine the income range that corresponds to the household’s annual income with consideration to the number of persons in the household by using current income limits data obtained from HUD’s website as described below.

The Income Limits Summary is located on HUD’s website at: <http://www.huduser.org/portal/datasets/il.html>. On that webpage, click on the appropriate links to access the most recent Income Limits for the applicant’s parish (county) in the State of Louisiana.

Refer to the sample chart for Acadia Parish on the following pages as an example. If there are five persons in a household located in Acadia Parish and the annual household income is \$45,000, then the household would be classified as high income. If that same household had an annual income of \$41,000, then the household would be classified as low/moderate income.

A copy of the applicant’s parish Income Limit Chart from the HUD website must be included in the application if a household survey is conducted.

The income limits as shown on the HUD website form have different category terminology than the CDBG terminology. This is due to the fact that the terminology used on the charts are those applied in the HUD Section 8 Housing Choice Voucher Program. The differences in terminology are as shown below:

	<u>Section 8 Limits</u>	<u>CDBG Limits</u>
80%	Low	Moderate
50%	Very Low	Low
30%	Extremely Low	Extremely Low

Family Size Adjustments

The income limit statute requires adjustments for family size. The same family size adjustments are used for all income limits. They are as follows:

Number of Persons in Family and Percentage Adjustments							
<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>	<u>6</u>	<u>7</u>	<u>8</u>
70%	80%	90%	Base	108%	116%	124%	132%

For each person in excess of eight, the four-person income limit should be added by an additional 8 percent. (For example, the nine-person limit equals 140 percent [132 + 8] of the relevant four-person income limit.) Income limits are rounded to the nearest \$50. Local agencies may round income limits for nine or more persons to the nearest \$50, or may use the un-rounded numbers.

The following should be noted when conducting surveys:

- Persons in correctional institutions cannot be counted as program beneficiaries.
- Camps that are used for recreational purposes, weekend retreats, etc. will be counted as occupied households for projects seeking funds for public infrastructure.
- If there is a group home located in the target area, contact Traci Watts at the Office of Community Development in order to determine if the residents of the home should be counted as beneficiaries.

All surveys must be accompanied by a corresponding map. The survey for sewer, water, or street improvement applications must be conducted using a map identifying all structures in the area. **Customer lists are not allowed to be utilized.** A detailed map of the target area(s) that corresponds to the survey must be included in the application. An example is demonstrated on page 38. See the instructions for Maps on page 43 for more details. Applicants may choose to complete a separate map of each street identifying each structure, but would also need a map of the area that shows all streets in the area. This will enable the State to verify that no street was omitted from the individual street maps. The map must identify which structures are commercial or exempt. Then, all residential structures (occupied and vacant) on the map or the list are numbered in a consecutive order. The total number of residential structures will be the **POPULATION** size.

In order to determine the survey sample size, go to <http://www.surveysystem.com/sscalc.htm>. Enter the Population size with a Confidence Level of 95% and a Confidence Interval of 5, then click the Calculate button to obtain the required number of surveys. Print a copy of the screen and include the printout in the application. **The number of surveys obtained for each surveyed area(s) as required by the survey sample size chart must be exact. Any target areas with a Population size of 50 or below must be 100 percent surveyed.**

In order to identify the households within the Population that are required to be surveyed, go to <https://www.random.org/sequences/>. In the area identified as Sequence Boundaries, enter the “Smallest Value” as 1 and the “Largest Value” as the total number of your Population. Choose the number of columns that is preferred by the applicant for the output of the random numbers sequence, then click the Get Sequence button. The OCD does not have a preference for number of columns. **Print a copy of the sequence list. A copy of original printout of the sequence list must be included in the application.**

The applicant should count down the sequence list equal to the number of required surveys identified in the previous step. Those numbers would be the required numbers and households that correspond with those numbers on the map must be surveyed. If any of those households cannot be surveyed for any

reason, then the next number on the sequence list would be used to replace the original required number. For example, if the required number of surveys is 100, then the households that correspond to the first 100 numbers on the sequence list would be required as surveys. If one of those households are vacant, then the 101st number on the sequence list would be used to replace the vacant household in the surveys, and so on. **Note: if the sample size cannot be reached due to too many vacant households, then a 100 percent survey is required.**

The data on the Household Survey Forms that are submitted with the application must be in the same order as identified on the sequence list. The data cannot be in numerical order. If this is not done correctly, the application will not be rated.

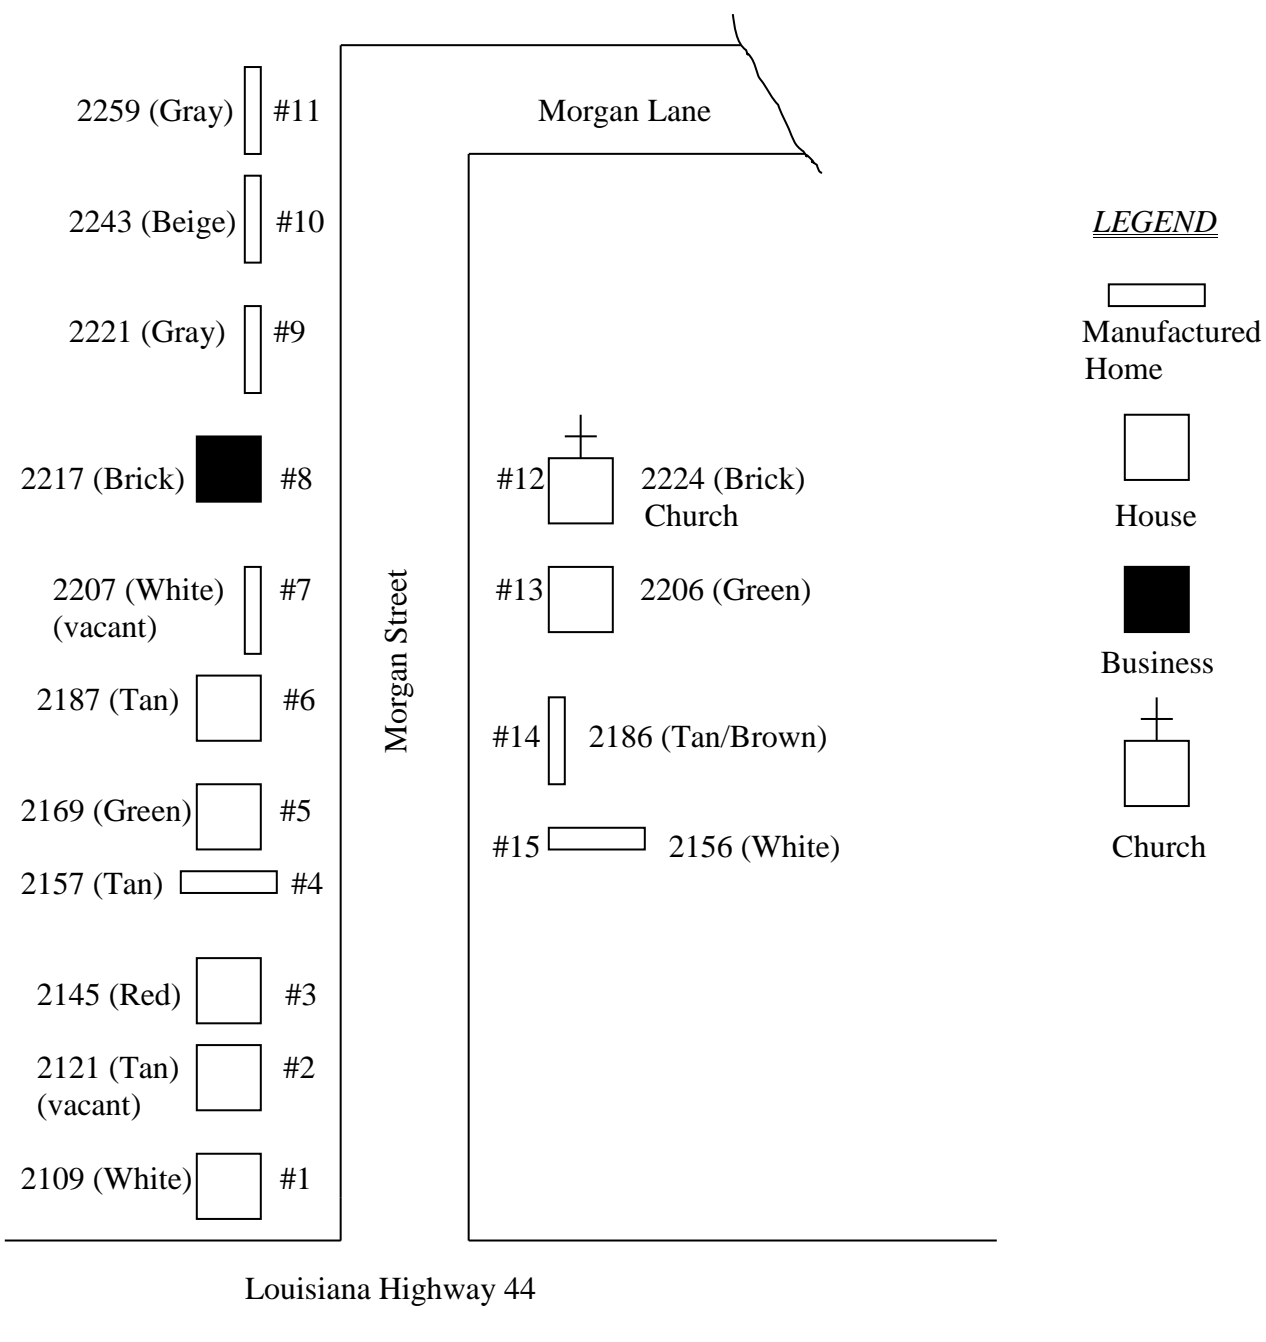

An occupied house where no one is home is one that cannot be surveyed after three separate attempts were made to obtain the survey. Surveys should be attempted at different times of the day and on different days of the week if the first attempt to obtain the survey is unsuccessful. If the first attempt is made during normal working hours, other attempts must be made at times other than normal working hours. If all three attempts were made during normal working hours, the applicant will be required to repeat the survey process for that particular home. Documentation of the survey attempts (including dates and the time of day the visits occurred) must be maintained. If more than 10% of the survey results show houses where no one is home, this documentation must be submitted. Otherwise, this documentation does not have to be submitted with the application, however, the OCD may request the documentation if necessary.

NOTE: If there are multiple target areas, each target area must have a minimum of fifty-one percent low- and moderate-income persons benefiting. Each target area must have census data reported and/or survey data reported independently of the others. The number of required surveys for each target area depends on the Population size of the area being surveyed.

In the past, OCD did not allow any municipalities to conduct a household survey if the HUD low/mod-income summary data indicated the low/mod percentage for a municipality was below 51.0. The current HUD data includes the margin of error for the low/mod percentage. This information was not available previously. Therefore, municipalities will be allowed to conduct a household survey if the municipality’s low/mod percentage and margin of error is summed to be at least 51.0. In the example below, the Village of Ashland has a low/mod percentage of 38.8 and a margin of error for the low/mod percentage of +/- 14.50. The sum of those two numbers is 53.30. Therefore, the Village of Ashland would have the option of conducting a household survey to establish the benefit to low/mod persons.

geoname	Stusab	State	Place	low	lowmod	Immi	lowmoduniv	lowmod_pct	moe_lowmod_pct
Ashland village, Louisiana	LA	22	03145	80	95	125	245	38.8%	+/-14.50

INSTRUCTIONS

Analysis of Household Survey Data Form

Due to the potential variance that can occur in data obtained during the Household Survey process, the applicant is required to complete this form if the percentage of low/moderate income persons for a target area is at least 51 but less than 56. Please remember that in order to be eligible, a target area must be at least 51 percent low/moderate income persons. Each target area must pass this test independently. If more than one target area has a percentage of low/moderate income persons of at least 51 but less than 56, then this form must be completed for each target area. For example, if Target Area 1 has a low/moderate income percentage of 53.2, Target Area 2 has a low/moderate income percentage of 54.9, and Target Area 3 has a low/moderate income percentage of 58.4; then the application must include analyses for Target Areas 1 and 2.

MAPS

The following maps are required:

1. A map(s) that delineates the census tract and/or block groups (by number) for each target area. The target area must also be indicated on this map.
2. A map indicating the location of concentrations of minorities and concentrations of low- and moderate-income persons, showing number and percent for both groups by jurisdiction, (if minorities and/or low- and moderate-income persons are evenly disbursed throughout the jurisdiction then the applicant must include such a statement on the map). All proposed target areas must be indicated on the map as well.
3. A map showing the boundaries of the beneficiary area with proposed improvements included.
4. A map of the entire utility system is required, if the entire water or sewer system is benefiting from the proposed improvements. This is a requirement for sewer and water applications.
5. Also, for projects that require a survey, a detailed field map identifying every structure on each street must be provided. **A customer utility list cannot be used to conduct a survey.** Each residential structure (occupied and vacant) must be identified by a number. The numbers must be in a consecutive order. Numbers 20 through 25 and number 213 identifying structures should not occur on the same street. The following two types of field maps will be acceptable.
 - a. One map identifying all houses in the surveyed area. Each residential structure should be numbered in consecutive order, or
 - b. One map of each street identifying all residential structures on the street and one map of the entire surveyed area. Each residential structure should be numbered in consecutive order

LCDBG PROGRAM
PUBLIC FACILITIES IMPROVEMENTS

APPLICANT NAME:

PROJECT DESCRIPTION

(Use only one sheet per target area)

INSTRUCTIONS

Project Description Form

Provide a concise description of the public facilities improvements project for which funds are being requested. The description should include the following:

- Identify the proposed improvements, location of the proposed improvements, current size/capacity of and area served by the system, etc.
- Indicate whether or not the project will require acquisition of easements or rights-of-way and the approximate number of parcels to be acquired. Also, indicate whether the proposed acquisition is to be paid for with LCDBG funds or not.
- Briefly explain the needs to be addressed with the proposed improvements.
- Describe how the project relates to the existing infrastructure. For example, if installing new sewerage collection lines, can the treatment plant handle the increase?
- Describe how people will benefit from the project and indicate whether there will be direct and/or indirect benefit. Direct benefit is defined as an activity that will take place on private property (such as hook-ups). Provide an estimate of the number of hook-ups, if applicable. This information should correlate with the number and information listed on the Engineer's Cost Estimate.
- Identify the entity that will retain ownership of the system after the completion of the project. Please note that the applicant must retain ownership of the improvements, unless the system is owned by a political subdivision of the applicant; however, a cooperative endeavor agreement can be executed with another entity regarding operation and maintenance of the proposed improvements.
- Describe the method by which the applicant can ensure that adequate revenues will be available to operate and maintain the proposed project. The description must identify the source and the estimated amount of funds that will be generated for this purpose.
- If the applicant is proposing the installation of sewer or water service in areas where no service currently exists, then the project description must specifically state who will be financially responsible for providing the service connection lines. Please remember, LCDBG funds, local funds, or other state or federal funds must be used to pay for connection lines to residential structures that are occupied by low- and moderate-income persons. **The applicant must adopt and enforce a procedure that will ensure that all residences (regardless of income) will be connected to the utility system. Also, persons in households that are not connected to the system CANNOT be considered as beneficiaries of the project. If LCDBG funds will be used to finance the service connection lines, please remember that federal regulations mandate that the line be physically connected to the house.**
- Describe the physical boundaries of the target area(s) in relation to the beneficiaries of the project.

System Information Form

1. What kind of system does the project involve? Water _____ Sewer _____ Other _____

2. The system involved in this project is owned by:

- applicant (sewer or water district included) _____
- other municipal/parish (sewer or water district included) _____
- private (for-profit) _____
- private (non-profit) _____
- other (_____)

Note: If the project is part of a system that is not owned by the applicant, please provide documentation from the entity that owns the system that acknowledges the entity will operate and maintain the improvements resulting from the project. If the project includes providing new water services to an area previously not connected to a water system, the documentation must also state that the owner of the system agrees to provide water to the new area, as well as to operate and maintain the improvements resulting from the project. **If funded and upon completion, the applicant (Village, Town, City, or Parish) can only donate the improvements to a sewer or water district that is a political subdivision of the applicant.**

3. Please provide a brief history of the system, explaining how and when it was established:

INSTRUCTIONS

- Item 1: Identify the type of system for which the applicant is seeking funds.
- Item 2: Identify what type of entity owns the utility system.
- Item 3: Provide a brief history of the system, including how and when the system was established and who governs the system.

Please remember that if the project involves improvements to a system that is not owned by the applicant, the application must include documentation from the entity that owns the system that acknowledges the entity will operate and maintain the improvements resulting from the project. If the project includes providing new water services to an area previously not connected to a water system, the documentation must also state that the owner of the system agrees to provide water to the new area, as well as to operate and maintain the improvements resulting from the project. **If funded and upon completion, the applicant (Village, Town, City, or Parish) can only donate the improvements to a sewer or water district that is a political subdivision of the applicant.**

ENGINEER'S COST ESTIMATE (Refer to the instructions for the specific information that must be included herein. Attach additional sheets if necessary.)

Estimated number of weeks of construction: _____

Estimated number of parcels to be acquired: _____

Signature of
Licensed Engineer

Date

INSTRUCTIONS

Engineer's Cost Estimate

All proposed activities must be accompanied by a detailed cost estimate prepared, signed, and stamped by a Professional Engineer licensed in the State of Louisiana. The cost estimate shall contain the cost of construction, engineering fees, and any other project costs. The construction estimate shall be a listing of construction items (as a bid proposal), estimated quantity, unit of measure, unit price, amount, and applicability to Build America Buy America (BABA). A maximum of 10 percent is allowed for construction contingencies.

Engineering fees shall be identified by type in a line item format. Typical items include basic services, resident project representative, surveying (property acquisition), construction staking, geotechnical investigation, and testing. Written justification must be provided for all engineering services other than basic services and a resident project representative. The justification is to contain an explanation of why the service is needed and how the proposed fee was derived. Please refer to the document, "Engineering Fee Schedules and Policies," located on OCD's website for more information concerning eligible fees. Justification of other fees is not required if fees are not to be paid with LCDBG funds.

In order to be classified as a "system-wide" project for rating purposes, the project must have at least 35% of the construction funds in a "system-wide" activity. If less than 35% of the construction funds are being spent in a "system-wide" activity, then the project will be considered a "target area" project for rating purposes. The costs must be distinguished on the cost estimate as "system-wide" or "target area" in order for the Office of Community Development Staff to verify the applicant's status.

If the proposed project involves hook-ups (work conducted on private property), then the costs associated with hook-ups must be identified separately on the cost estimate.

If any other funds (federal, local, etc.) will be used to complete the project, then the cost estimate must identify the source and amount of those funds as well as the specific use of those funds. For example, if \$200,000 in local funds will be used to assist in the construction of a treatment facility for a new sewerage collection and treatment system, a specific identification of such must be shown on the cost estimate.

Resilience costs must be identified separately on the cost estimate.

Although acquisition is no longer its own activity, if the project requires acquisition the amounts required for all aspects of the acquisition process must be listed on the cost estimate.

The cost estimate must identify the estimated number of weeks of construction and the estimated number of parcels to be acquired.

Examples of cost estimates for sewer, water, and street improvements can be found on the following pages.

BABA Guidance available at <https://www.doa.la.gov/dao/ocd-lga/lcdbg-programs/forms-and-information/>

PROJECT IMPACT CERTIFICATION – SEWER , WATER, AND STREETS PROJECTS

I certify, to the best of my knowledge and belief, that (check all boxes that apply):

- The funds requested herein for the proposed sewer or water project will completely remedy existing conditions that violate a state or federal standard (must be identified on the lines below) that has been established for the purpose of protecting public health and safety.
- That all persons residing within the target area or connected to the utility system for system-wide activities as described in the Project Description are benefiting from the proposed project and have been included in the application beneficiary data.
- That each street proposed for improvements has a Pavement Sufficiency Rating Range (PSR) of 3.0 or lower, based on the Sufficiency Rating Data Guide on page 61 of this Application Package or has an unpaved surface.
- The improvements proposed for the streets in the application will improve the Pavement Sufficiency Rating to greater than a 4.1 and extend the service life of a minimum of 8 years.

Refer to the instructions for any specific statements that must be made on this form.

INSTRUCTIONS

Project Impact Certification

A Professional Engineer licensed in the State of Louisiana must sign and stamp this form certifying that if the proposed project is funded, those conditions that currently violate a state or federal standard established to protect public health and safety will be completely remedied and that all persons in the target area as described in the Project Description will benefit. The specific state or federal standard(s) that is currently being violated and will be addressed must be identified on this form.

The engineer must certify for all types of projects that all persons residing within the target area or connected to the utility system for system-wide activities as described in the Project Description will benefit from the proposed project and have been included in the application beneficiary data.

For street projects, the engineer must certify that the streets proposed for improvements have a Pavement Sufficiency Rating Range (PSR) of 3.0 or lower, based on the Sufficiency Rating Data Guide below, or has an unpaved surface. The engineer must further certify that the proposed improvements for the streets in the application will improve the Pavement Sufficiency Rating to greater than 4.1 and extend the service life of the streets for a minimum of 8 years.

The Pavement Sufficiency Rating Range is described as follows:

SUFFICIENCY RATING DATA GUIDE FOR LCDBG STREET PROJECTS

CONDITION:

Very Good: PSR Range 4.1 - 5.0	Visually, pavement should show no deviations from a smooth surface. facilities should have no cracks or patches. Pavement was probably recently constructed or reconstructed or pavement was resurfaced within the past year or two. No maintenance is required.
Good: PSR Range 3.1 - 4.0	Pavements in this category give a first-class ride and are beginning to show signs of surface deterioration. Flexible pavements show evidence of slight rutting, random cracking, and possibly some raveling. Rigid pavements show evidence of minor joint spalling, scaling, or minor cracking. Pavements require minor to normal maintenance.
Fair: PSR Range 2.1 - 3.0	The riding qualities of pavement in this category are noticeably inferior to those of new pavements and may be barely tolerable for high-speed traffic. Surface defects of flexible pavements may include moderate rutting, map cracking, raveling, and moderate patching. Surface defects of rigid pavements could include joint spalling, some faulting, moderate to heavy cracking, and frequent patching. Maintenance on these pavements has been normal to excessive.
Poor: PSR Range 0.0 - 2.0	Pavements in this category have deteriorated to a point where resurfacing at least or total reconstruction may be required. Ride-ability at any speed is impaired to such a level that the motorist will experience discomfort. Traffic will slow down. Surface defects of flexible pavements will include frequent and

severe rutting, cracking, patching and raveling. Rigid pavements will show frequent and severe scaling, joint spalling, pumping, faulting, cracking, and patching. Maintenance efforts have been extensive and have not been enough to keep the surface in an acceptable condition.

Source: Highway Needs and Priorities Manual published by the Louisiana Department of Transportation and Development.

Unpaved streets are eligible for improvement under the LCDBG Program, and must be paved if they are within the designated target area.

COST EFFECTIVENESS

- a. Total LCDBG funds requested less administration, resiliency and engineering costs \$ _____
- b. Total number of persons benefiting (for streets, use number of persons living in occupied houses on streets designated for work) _____
- c. Average cost per person (a / b = c) \$ _____

ENGINEERING COSTS CERTIFICATION

I certify that our local government will pay all of the engineering costs associated with the implementation of this LCDBG program. These costs will include but not be limited to basic design, resident inspection, testing, staking. etc.

A resolution adopted by our local government is attached which identifies the firm hired and the proposed amount of their contract.

Signature of Chief Elected Official

Date

CERTIFICATION OF OTHER FUNDS

Enter the amount of other cash funds that the applicant will inject into the proposed project's construction costs. \$ _____

Verification identifying the amount and source of other funds must be inserted behind this form. Do not identify any local funds that will be used to pay pre-agreement, administrative or engineering costs on this form. This form should involve cash contributions that will be used for the construction of the project.

INSTRUCTIONS

Cost Effectiveness

This form will be used to determine the project cost per person benefiting. In calculating the cost effectiveness, fill out the form using only the LCDBG funds requested for the project (less administration, resiliency and engineering costs).

- a. On line a., indicate the total amount of LCDBG funds requested less administration, pre-agreement, and engineering costs. Do not include "other" funds on line a.
- b. On line b., identify the total persons benefiting, not just the persons surveyed. For street projects, only identify the number of persons living in occupied houses located on streets designated for work. See page 9 of the application package for specifics on this calculation.
- c. On line c., divide the monies shown on line a. by the total persons benefiting as shown on line b.

For example, if a total of \$700,000 is required to construct a sewer project benefiting 1,000 people and \$700,000 is requested from LCDBG funds, the average cost per person would be \$700. Using the same example, if \$300,000 in local funds and \$400,000 in LCDBG funds will be used for that same \$700,000 sewer project, the average cost per person would be \$400.

Engineering Costs Certification

This form must be completed by those applicants that will pay all of the engineering costs associated with the implementation of the LCDBG Program. Such costs may include, but not be limited to, basic design, resident inspection, testing, staking, etc. However, property surveying and SSES costs can be paid with grant funds even if the applicant receives the rating points for paying the engineering costs.

To substantiate that the local government will pay the engineering costs associated with the LCDBG Program, this form must be completed and signed by the chief elected official. **A copy of the resolution passed by the local government identifying the engineering firm hired and the proposed amount of the contract must be included in the application. That resolution should also state that local funds will be used to pay the engineering fees and any other engineering costs incurred by the local government, (except property surveying and SSES costs). The applicant will not receive these points if the required information is not included in the application.**

For those applicants that receive the points for paying engineering costs (and are successful in receiving a grant), if there is an under-run in their project costs, the grantee will not be allowed to re-budget those monies for the purpose of reimbursing the local government for any engineering costs associated with the LCDBG Program.

Certification of Other Funds

If no other funds are being used in conjunction with the LCDBG funds for construction purposes, it is not necessary to complete this form. Do not identify any local funds that will be used to pay pre-agreement, administrative or engineering costs on this form. This form should involve cash contributions that will be used for the construction of the project.

Some projects may cost more than can be requested under the LCDBG Program. Therefore, the applicant may propose to use other funds in conjunction with the LCDBG funds. Applicants that want to use other funds in conjunction with LCDBG funds must have those funds **available and ready to spend**. If the other funds involve loans or grants from other state, federal, or private sources, the monies must have already been **awarded** or be **in the bank**. To substantiate the immediate availability of the other funds, one of the following items will be required: a letter and adopted resolution from the local governing body stating the specific source, amount, and location of local cash, a line of credit letter from a financial institution such as a bank stating the amount available as a loan, specific evidence of funds to be received from a tax or bond election that has already passed, or a letter from another funding agency stating that the funds have been awarded and are currently available for expenditure. **The supporting documentation must be attached to the application.**

If other funds are involved and that applicant is in a position to be funded, the LCDBG staff will contact the applicant prior to a grant award and request positive proof of the current availability of the other funds; if proof cannot be provided within the timeframe allowed by the Office of Community Development (approximately ten calendar days), then the project will not be funded at that time. If additional LCDBG funds are made available and grants are awarded again in the same program year, the applicant will be reconsidered and given the opportunity to provide availability of additional funds; if the other funds are not available at that time, the applicant will no longer be considered for funding.

ADMINISTRATIVE COSTS CERTIFICATION

I certify that our local government will pay all of the pre-agreement and administrative costs associated with the implementation of this LCDBG program; such costs will include, but not be limited to application preparation fees, audit fees, advertising and publication fees, local staff time, workshop expenses, and/or administrative consultant fees. I have marked the following box which indicates who will be responsible for administering the LCDBG program. The documentation to support this is included in this application in accordance with the instructions.

_____ The local government will utilize an administrative consultant to administer the LCDBG Program. The proposed consultant is _____. Attached is a copy of the required resolution by the local government.

_____ The local government will utilize its own staff for the purpose of administering the LCDBG Program. Attached are a resolution and a sheet containing the required documentation requested in the instructions.

Signature of Chief Elected Official

Date

FEDERAL FUNDING ACCOUNTABILITY AND TRANSPARENCY ACT REPORTING

Please mark whether the following is accurate for your local government:

Did your local government receive both of the following in the most recent completed fiscal year?

1. 80 percent or more of your annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; and
2. \$25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements?

_____ Yes, the above statements are accurate for my local government.

_____ No, the above statements are not accurate for my local government.

Signature of Chief Elected Official

Date

PROOFS OF PUBLICATION

Attach the two required public notices and proofs of publication.

INSTRUCTIONS

Administrative Costs Certification

This form must be completed by those applicants that will pay all of the administrative costs associated with the implementation of the LCDBG Program. To receive the points associated with this factor, the form must be completed and signed by the chief elected official and the corresponding documentation must be included in the application. Such administrative costs may include, but not be limited to, application preparation fees, audit fees, advertising and publication fees, local staff time, workshop expenses, administrative consultant fees, etc. It is not allowable for grantees to re-budget monies for the purpose of reimbursing the local government for any pre-agreement and/or administrative costs associated with the LCDBG Program if an under-run in project costs occurs. **The applicant will not receive these points if the required information is not included in the application. If the applicant is requesting LCDBG funds for administrative costs, this form should not be completed and no points will be assigned during the rating process.**

An applicant may intend to utilize the services of an administrative consultant, to utilize local staff, or to utilize both. The certification must identify which circumstances apply by marking one or both boxes. If the applicant plans to utilize the services of an administrative consultant, local funds must be pledged and allocated for such services. **A copy of the resolution passed by the local government identifying the administrative consultant hired and the proposed amount of the contract must be included in the application.** That resolution should also state that local funds will be used to pay the pre-agreement costs, administrative consultant fees and any other administrative costs incurred by the local government.

If the local government maintains full-time permanent staff for the sole purpose of administering LCDBG or other federal programs, such staff must have proved its capacity to administer LCDBG or other federal programs through previous program administration. A sheet should be attached that identifies the staff person(s) who will be responsible for program administration, their job title or position, and a brief listing of their previous experience in administering LCDBG or other federal programs. A copy of the resolution passed by the local government stating that local funds will be used to pay all pre-agreement and administrative costs incurred by the local government must be included in the application.

Proofs of Publication

A copy of the public notices and proofs of publication must be included in the application package (one for the Citizen Participation requirements and one making the application available for review).

LOUISIANA CDBG PROGRAM STATEMENT OF ASSURANCES

This document may not be modified.

This applicant hereby assures and certifies that:

1. Legal Authority

It possesses:

- a. Legal authority to apply for the grant and to execute the proposed project, and its governing body has duly adopted or passed as an official act a resolution, motion or similar action authorizing the filing of the application, including all understandings and assurances contained therein, and directing and authorizing the applicant's chief executive officer and/or other designated official representatives to act in connection with the application and to provide such additional information as may be required; and
- b. Has developed its application, including its projected use of funds, so as to give maximum feasible priority to activities that will benefit low and moderate income persons or aid in the prevention or elimination of slums or blight. (The requirement for this certification will not preclude the State from approving an application where the applicant certifies and the State determines, that all or part of the proposed project activities are designed to meet other community development needs that have arisen during the preceding twelve-month period and have particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community and where other financial resources are not available to meet such needs.)

2. Citizen Participation

It has or will comply with all citizen participation requirements, which include, at a minimum, the following:

- a. Provides for and encourages citizen participation, with particular emphasis on participation by persons of low- and moderate-income who are residents of slum and blighted areas and of areas in which funds are proposed to be used;
- b. Provides citizens with reasonable and timely ADA compliant access to local meetings, information, and records relating to the unit of local government's proposed and actual use of CDBG funds;
- c. Provides for technical assistance to groups representative of persons of low and moderate income that request such assistance in developing proposals with the level and type of assistance to be determined by the grantee;
- d. Provides for public hearings to obtain citizen views and to respond to proposals and questions at all stages of the community development program, including at least the development of needs, the review of proposed activities, and review of program performance, which hearings shall be held after adequate notice, at times and locations convenient to potential or actual beneficiaries, and with accommodations for the disabled. This shall include one public hearing prior to the submission of the CDBG application;
- e. Solicit and provide for a timely written answer to written complaints and grievances, within fifteen (15) working days where practicable, and;
- f. Identify how the needs of non-English speaking residents will be met in the case of public hearings where non-English speaking residents can be reasonably expected to participate.

3. National Objective

The applicant's Community Development Block Grant program has been developed so as to give maximum feasible priority to activities that will benefit low- and moderate-income households, will aid in the prevention or elimination of slums or blight, or meet community development needs having a particular urgency.

It has determined that the proposed activity will meet the identified community development needs of its jurisdiction and will carry out its proposed activity in a manner that will significantly benefit the residents of its jurisdiction. Any CDBG expenditures that serve beneficiaries outside the jurisdiction will not be unreasonably disproportionate to the benefits to its residents.

4. NEPA Environmental Review

Its chief executive officer, chief elected official, or other officer of applicant approved by the State will consent to assume the status of a responsible entity as defined by 24 CFR 58.2(a)(7) in compliance with the National Environmental Policy Act of 1969 insofar as the provisions of such Act apply to the Louisiana Community Development Block Grant Program. With regard to environmental impact, it will comply with the National Environmental Policy Act of 1969 and Section 104(f) of the Housing and Community Development Act of 1974 (42 USC 5304(d)). Also included in this requirement is compliance with Executive Order 11988 relating to the evaluation of flood hazards, Section 102(a) of the Flood Disaster Protection Act of 1973 (Public Law 93-234) regarding the purchase of flood insurance, the National Historic Preservation Act of 1966 (54 USC 300101), the Clean Air Act (42 USC 7401), the Farmland Protection Act of 1981 (USC 4201), the Endangered Species Act of 1973 (16 USC 1531), the Wild and Scenic Rivers Act of 1968 (16 USC 1271), HUD Environmental Standards (24 CFR Part 51), and implementing regulations (36 CFR 800.8)

5. Uniform Administrative Requirements

It will comply with the applicable federal grant management regulations, policies, guidelines, and/or other requirements as they relate to the application, acceptance, and use of federal funds: 2 CFR Part 200 (Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards).

It has the ability to comply with the Financial Management requirements in Subpart D, the Cost Principles requirements in Subpart E and the Audit requirements in Subpart F. In particular it assures it will be responsible for the preparation of appropriate financial statements in accordance with the requirements of 2 CFR 200.508.

6. Nondiscrimination/Equal Access

It will comply with the following regarding nondiscrimination laws and practices:

- a. **Title VI of the Civil Rights Acts of 1964** (Pub. L. 88-252) (42 U.S.C. 2000d) as amended, and the regulations issued pursuant thereto (24 CFR Part 1), which provides that no person in the United States shall on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity for which the applicant receives federal financial assistance and will immediately take any measures necessary to effectuate this assurance.
- c. **Title VIII of the Civil Rights Act of 1968** (Pub. L. 90-284) as amended; and will administer all programs and activities related to housing and community development in a manner affirmatively furthering fair housing.
- d. **Executive Order 11063 (1962)**, as amended by Executive Order 12259, requiring equal

opportunity in housing by prohibiting discrimination on the basis of race, color, religion, sex or national origin in the sale or rental of housing built with federal assistance.

- e. **Executive Order 11246 (1965)**, as amended by Executive Orders 11375, prohibiting discrimination on the basis of race, color, religion, sex or national origin in any phase of employment during the performance of federal or federally-assisted contracts in excess of \$2,000.
- f. **Section 109 of the Housing and Community Development Act of 1974**, as amended and the regulations issued pursuant thereto (24 CFR Part 570.602) which provides that no person in the United States shall, on the grounds of race, color, national origin, or sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program or activity funded in whole or in part with funds provided under this Part. The policies and procedures necessary to ensure enforcement of section 109 are codified in 24 CFR part 6.
- g. **Section 504 of the Rehabilitation Act of 1973**, as amended. Under Section 504, the requirement to make reasonable accommodations applies to any changes that may be necessary to provide equal opportunity to participate in any federally assisted program or activity. This includes a change, adaptation or modification to a policy, program, service, facility, or workplace which will allow a qualified person with a disability to participate fully in a program, take advantage of a service, live in housing, or perform a job. Reasonable accommodations also include any structural changes that may be necessary. Reasonable accommodations may include changes which may be necessary in order for the person with a disability to use and enjoy a dwelling, including public and common use spaces, or participate in the federally assisted program or activity.
- h. **The Americans with Disabilities Act of 1990** prohibits discrimination based on disability in programs and activities provided or made available by public entities.
- i. **The Age Discrimination Act of 1975** prohibits discrimination based on age in programs and activities receiving federal financial assistance.
- j. **The Fair Housing Act** (42 U.S.C. 3601-3619), Executive Order 12892, Section 104(b)(2) of Housing and Community Development Act of 1974, as amended, and implementing regulations at 24 CFR Subtitle B, Subchapter A prohibit discrimination in the sale, rental, and financing of dwellings, and in other housing-related transactions based on race, color, religion, sex (including gender identity and sexual orientation), familial status, national origin, and disability. It also requires that all programs and activities relating to housing and community development in a manner to affirmatively further fair housing.

7. Anti-Displacement/Relocation

It will:

- a) to the greatest extent practicable under State law, comply with the acquisition and relocation requirements **Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970**, as amended, and will comply with the HUD implementing regulations at 24 CFR Part 42 the DOT implementing regulations at 49 CFR 24; and
- b) Follow a residential anti-displacement and relocation assistance plan and it will comply with **Section 104(d) of the Housing and Community Development Act of 1974**, as amended in connection with any activity assisted with funding under the CDBG program; and
- c) Minimize displacement of persons as a result of activities assisted with such LCDBG funds.

8. Procurement

That it will conduct all procurement activities utilizing Federal funds in a manner consistent with the procurement requirements of 2 CFR 200.318-326. In particular it assures that it will exclude from competition any contractor or vendor who assists the applicant in the development or drafting of specifications or scopes of work for such solicitations or any other actions that would confer an unfair competitive advantage in accordance with the requirements of 2 CFR 200.319(a).

9. Conflict of Interest

It will enforce standards for conflicts of interest which govern the performance of their officers, employees, or agents engaged in the award and administration, in whole or in part, of State CDBG grant funds ([24 CFR §570.611](#)).

10. Debarred Contractors

It certifies that neither the applicant or its staff are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in federal assistance programs, in any proposal submitted in connection with the CDBG program, per the Excluded Party List System located at <https://www.sam.gov/SAM/>. In addition, the applicant will not award contracts to or otherwise engage the services of any contractor while that contractor (or its principals) is debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation from the covered transaction, in any proposal submitted in connection with the CDBG program under the provisions of [24 CFR Part 24](#).

11. Architectural Barriers

It will require every building or facility (other than a privately owned residential structure) designed, constructed, or altered with funds provided under this part to comply with the requirements of the Architectural Barriers Act of 1968 (42 U.S.C. 4151-4157) and the Americans with Disabilities Act (42 U.S.C. 12131; 47 U.S.C. 155, 201, 218 and 225).

12. Section 3

It will comply with Section 3 of the Housing and Urban Development Act of 1968 (24 CFR part 75), as amended, requiring that to the greatest extent feasible opportunities for training and employment be given to lower-income residents of the project area and contracts for work in connection with the project be awarded to eligible Section 3 business concerns.

13. Access to Records

It will provide access to (1) the State, Representatives of HUD, the Inspector General, and the General Accounting Office to all books, accounts, records, reports, files, and other papers, or property pertaining to the administration, receipt and use of CDBG funds and necessary to facilitate such reviews and audits, and (2) It shall provide citizens with reasonable access to records regarding the past use of CDBG funds and ensure that units of general local government provide citizens with reasonable access to records regarding the past use of CDBG funds consistent with State or local requirements concerning the privacy of personal records.

14. Cost Recovery

It will not attempt to recover any capital costs for public improvements financed in whole or in part with LCDBG funds, through assessments against properties owned and occupied by low and moderate income persons including any fees charged or assessed made as a condition of obtaining access to such public improvements.

15. Excessive Force

It will adopt and enforce a policy prohibiting the use of excessive force by law enforcement agencies within its jurisdiction against any individual engaged in non-violent Civil Rights demonstrations in accordance with 42 U.S.C. 5304 (l).

16. Anti-Lobbying

It certifies its compliance with restrictions on lobbying required by [24 CFR Part 87](#), together with disclosure forms, if applicable. It will comply with the **Hatch Act** ([5 U.S.C. §1501, et seq.](#)) regarding political activity of employees.

17. Program Income

It acknowledges that proceeds recovered from a charge filed as a lien against a parcel of real estate improved as a direct result of benefit derived from this program shall constitute program income as defined by 24 CFR 570.489(e) and shall be returned to the State if received less than 5 years after expiration of the grant agreement between the State and the unit of general local government.

18. Labor Standards

It will comply with the following regarding labor standards:

- a. **Section 110 of the Housing and Community Development Act of 1974**, as amended.
- b. **Davis-Bacon and Related Acts** as amended (40 USC 276(a)) regarding the payment of prevailing wage rates.
- c. **Contract Work Hours and Safety Standards Act** (40 USC 3702) regarding overtime compensation.
- d. **Copeland Act of 1934** (41 USC 51-58) prohibiting “kickbacks” of wages in federally assisted construction activities.

19. Domestic Preference Requirements for Federal Financial Assistance to Non-Federal Entities

This agreement is subject to the Build America, Buy America Act (BABAA) requirements under Title IX of the Infrastructure Investment and Jobs Act (“IIJA”), [Pub. L. 177-58](#). Absent an approved waiver, all iron, steel, manufactured products, and construction materials used in this project must be produced in the United States, as further outlined by the Office of Management and Budget’s Memorandum M-22-11, Initial Implementation Guidance on Application of Buy America Preference in Federal Financial Assistance Programs for Infrastructure, April 18,2022.

20. Right to Report

It will comply with the requirements of the [Violence Against Women Act Reauthorization Act of 2022](#) for U.S. Department of Housing and Urban Development (HUD) recipients to support an individual’s right to seek law enforcement or emergency assistance. This includes:

- a. Reporting on the existence of laws or policies they have adopted that impose penalties based on requests for law enforcement or emergency assistance or based on criminal activity that occurred at a covered property.
- b. Certify that they are in compliance or describe the steps they will take to comply within 180 days of the report to HUD.

21. Lead Based Paint

It will, as necessary, devise, adopt and carry out procedures with respect to CDBG assistance that fulfill the objectives and requirements of the **Lead-Based Paint Poisoning Prevention Act** (42 U.S.C. 4821-4846), the Residential Lead-Based Paint Hazard Reduction Act of 1992 (42 U.S.C. 4851-

4856), and implementing regulations at 24 CFR Part 35, subparts A, B, J, K, and R of this title.

Signing these assurances means that the municipality/parish agrees to implement its program in accordance with these provisions. Applicant further acknowledges in addition to the previous cited provisions that if it is awarded funds it will be responsible for compliance and enforcement of applicable Federal laws (42 U.S.C. 5301-5320) and regulations (24 CFR Part 570) including the Subpart K requirements (24 CFR 570.601-614) of the Community Development Block Grant program and such provisions for the proper administration of the program made by this Office of Community Development, Division of Administration as allowed by 24 CFR 570.480(f).

Failure to comply can result in serious audit and/or monitoring findings that require repayment of funds to the State or expending municipality/parish funds to correct deficiencies. A training session will be held to describe these requirements to all funded applicants. Municipality/parish staff attendance will be mandatory. Failure to attend this session, as required, will result in a monetary penalty assessed against the municipality/parish.

Public Reporting Burden Statement: This collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering, and maintaining the data needed, and completing and reviewing the collection of the requested information. Comments regarding the accuracy of this burden estimate and any suggestions for reducing this burden can be sent to: U.S. Department of Housing and Urban Development, Office of the Chief Data Officer, R, 451 7th St SW, Room 8210, Washington, DC 20410-5000. Do not send completed HUD-2880 forms to this address. This agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection displays a valid OMB control number. This agency is authorized to collect this information under Section 102 of the Department of Housing and Urban Development Reform Act of 1989. The information you provide will enable HUD to carry out its responsibilities under this Act and ensure greater accountability and integrity in the provision of certain types of assistance administered by HUD. This information is required to obtain the benefit sought in the grant program. Failure to provide any required information may delay the processing of your application and may result in sanctions and penalties including of the administrative and civil money penalties specified under 24 CFR §4.38. This information will not be held confidential and may be made available to the public in accordance with the Freedom of Information Act (5 U.S.C. §552). The information contained on the form is not retrieved by a personal identifier, therefore it does not meet the threshold for a Privacy Act Statement.

Instructions—Disclosure Report

All applicants for LCDBG funding must include a Disclosure Report as part of the application for funding. Instructions for completing the Disclosure Report, as prepared by HUD, are on the following two pages. The Disclosure Report form, along with instructions, can be found on the HUD Clips website located at: <https://www.hud.gov/sites/dfiles/OCHCO/documents/2880.pdf> /.

Also: The answer to Part I, Question 1 should be checked “No”. The applicant must check Question 2 as appropriate, then sign and date the bottom of the form.

Instructions

Overview.

A. Coverage. You must complete this report if:

- (1) You are applying for assistance from HUD for a specific project or activity **and** you have received, or expect to receive, assistance from HUD in excess of \$200,000 during the during the fiscal year;
- (2) You are updating a prior report as discussed below; or
- (3) You are submitting an application for assistance to an entity other than HUD, a State or local government if the application is required by statute or regulation to be submitted to HUD for approval or for any other purpose.

B. Update reports (filed by "Recipients" of HUD Assistance):

General. All recipients of covered assistance must submit update reports to the Department to reflect substantial changes to the initial applicant disclosure reports.

Line-by-Line Instructions.

Applicant/Recipient Information.

All applicants for HUD competitive assistance, must complete the information required in blocks 1-5 of form HUD-2880:

1. Enter the full name, address, city, State, zip code, and telephone number (including area code) of the applicant/recipient. Where the applicant/recipient is an individual, the last name, first name, and middle initial must be entered.
2. Entry of the applicant/recipient's EIN, as appropriate, is optional. Individuals must not include social security numbers on this form.
3. Applicants enter the HUD program name under which the assistance is being requested.
4. Applicants enter the amount of HUD assistance that is being requested. Recipients enter the amount of HUD assistance that has been provided and to which the update report relates. The amounts are those stated in the application or award documentation. **NOTE:** In the case of assistance that is provided pursuant to contract over a period of time (such as project-based assistance under section 8 of the United States Housing Act of 1937), the amount of assistance to be reported includes all amounts that are to be provided over the term of the contract, irrespective of when they are to be received.
5. Applicants enter the name and full address of the project or activity for which the HUD assistance is sought. Recipients enter the name and full address of the HUD-assisted project or activity to which the update report relates. The most appropriate government identifying number must be used (e.g., RFP No.; IFB No.; grant announcement No.; or contract, grant, or loan No.) Include prefixes.

Part I. Threshold Determinations - Applicants Only

Part I contains information to help the applicant determine whether the remainder of the form must be completed. Recipients filing Update Reports should not complete this Part.

If the answer to **either** questions 1 or 2 is No, the applicant need not complete Parts II and III of the report, but must sign the certification at the end of the form.

Part II. Other Government Assistance and Expected Sources and Uses of Funds.

A. Other Government Assistance. This Part is to be completed by both applicants and recipients for assistance and recipients filing update reports. Applicants and recipients must report any other government assistance involved in the project or activity for which assistance is sought. Applicants and recipients must report any other government assistance involved in the project or activity. Other government assistance is defined in note 4 on the last page. For purposes of this definition, other government assistance is expected to be made available if, based on an assessment of all the circumstances involved, there are reasonable grounds to anticipate that the assistance will be forthcoming.

Both applicant and recipient disclosures must include all other government assistance involved with the HUD assistance, as well as

any other government assistance that was made available before the request, but that has continuing vitality at the time of the request. Examples of this latter category include tax credits that provide for a number of years of tax benefits, and grant assistance that continues to benefit the project at the time of the assistance request.

The following information must be provided:

1. Enter the name and address, city, State, and zip code of the government agency making the assistance available.
2. State the type of other government assistance (e.g., loan, grant, loan insurance).
3. Enter the dollar amount of the other government assistance that is, or is expected to be, made available with respect to the project or activities for which the HUD assistance is sought (applicants) or has been provided (recipients).
4. Uses of funds. Each reportable use of funds must clearly identify the purpose to which they are to be put. Reasonable aggregations may be used, such as "total structure" to include a number of structural costs, such as roof, elevators, exterior masonry, etc.

B. Non-Government Assistance. Note that the applicant and recipient disclosure report must specify all expected sources and uses of funds - both from HUD and any other source - that have been or are to be, made available for the project or activity. Non-government sources of Form HUD-2880 funds typically include (but are not limited to) foundations and private contributors.

Part III. Interested Parties.

This Part is to be completed by both applicants and recipients filing update reports. Applicants must provide information on:

1. All developers, contractors, or consultants involved in the application for the assistance or in the planning, development, or implementation of the project or activity and
2. Any other person who has a financial interest in the project or activity for which the assistance is sought that exceeds \$50,000 or 10 percent of the assistance (whichever is lower). Note: A financial interest means any financial involvement in the project or activity, including (but not limited to) situations in which an individual or entity has an equity interest in the project or activity, shares in any profit on resale or any distribution of surplus cash or other assets of the project or activity, or receives compensation for any goods or services provided in connection with the project or activity. Residency of an individual in housing for which assistance is being sought is not, by itself, considered a covered financial interest.

The information required below must be provided.

1. Enter the full names and addresses. If the person is an entity, the listing must include the full name and address of the entity as well as the CEO. Please list all names alphabetically.
2. Entry of the Unique Entity Identifier (UEI), for non-individuals, or city of residence, for individuals, for each organization and person listed is **optional**.
3. Enter the type of participation in the project or activity for each person listed: i.e., the person's specific role in the project (e.g., contractor, consultant, planner, investor).
4. Enter the financial interest in the project or activity for each person listed. The interest must be expressed both as a dollar amount and as a percentage of the amount of the HUD assistance involved.

Note that if any of the source/use information required by this report has been provided elsewhere in this application package, the applicant need not repeat the information, but need only refer to the form and location to incorporate it into this report. (It is likely that some of the information required by this report has been provided on SF 424A, or on various budget forms accompanying the application.) If this report requires information beyond that provided elsewhere in the application package, the applicant must include in this report all the additional information required. Recipients must submit an update report for any change in previously disclosed sources and uses of funds as provided in Section I.D.5., above.

Notes:

1. All citations are to 24 CFR Part 4, which was published in the Federal Register. [April 1, 1996, at 63 Fed. Reg. 14448.]
2. Assistance means any contract, grant, loan, cooperative agreement, or other form of assistance, including the insurance or guarantee of a loan or mortgage, that is provided with respect to a specific project or activity under a program administered by the Department. The term does not include contracts, such as procurements contracts, that are subject to the Fed. Acquisition Regulation (FAR) (48 CFR Chapter 1).
3. See 24 CFR §4.9 for detailed guidance on how the threshold is calculated.
4. "Other government assistance" is defined to include any loan, grant, guarantee, insurance, payment, rebate, subsidy, credit, tax benefit, or

any other form of direct or indirect assistance from the Federal government (other than that requested from HUD in the application), a State, or a unit of general local government, or any agency or instrumentality thereof, that is, or is expected to be made, available with respect to the project or activities for which the assistance is sought.

5. For the purpose of this form and 24 CFR Part 4, "person" means an individual (including a consultant, lobbyist, or lawyer); corporation; company; association; authority; firm; partnership; society; State, unit of general local government, or other government entity, or agency thereof (including a public housing agency); Indian tribe; and any other organization or group of people.

Notice of Application to the Division of Administration for a CDBG Sewer Project

All LCDBG applicants who are (1) proposing a “new” sewerage treatment facility, (2) planning a treatment plant upgrade that will increase the design capacity, or (3) operating an existing facility without a permit or under an expired permit must prepare a “Notice of Application to the Division of Administration for a Community Development Block Grant Sewer Project” form. **Submit the form directly to DEQ. The form and instructions are included at <https://www.doa.la.gov/doa/ocd-lga/lcdbg-programs/forms-and-information/>. The deadline to submit the forms to DEQ is September 30, 2024. Forms received by DEQ after the established deadline will not be considered.** It is strongly recommended that the notice be submitted as early as possible in order to receive the information in a timely manner.

All applicants that are proposing to construct a “new” sewerage treatment facility or who have an existing facility operating without a permit or under an expired permit must also apply for a Louisiana Pollutant Discharge Elimination System (LPDES) permit through DEQ. Additionally, applicants who have an existing facility and whose proposed project will cause a change in the facility’s design capacity or discharge location must apply for a modification to their present permit.

VI. DISPLACEMENT POLICY

The State will review and determine whether any subgrantee activity will cause temporary or permanent displacement as a result of the operation of its LCDBG program. If the State determines that an individual, family, or business will be displaced as a result of any activity, then the locality will insure that reasonable benefits will be provided.

Reasonable benefits include but are not limited to:

- (1) counseling and referral services;
- (2) providing assistance in obtaining suitable living quarters/business location whether renting or purchasing;
- (3) provide some form of benefits for moving expenses consisting of the cost of the actual move or a fixed payment based on the number of rooms as allowed by the U. S. Department of Transportation's moving schedule.

In accordance with federal regulations, the State requires each recipient locality to prepare and implement a residential antidisplacement and relocation assistance plan. That plan must include:

- (a) A requirement that all low/moderate income dwelling units that are demolished or converted to a use other than low/moderate income housing as a direct result of the use of LCDBG assistance will be replaced and
- (b) A relocation assistance component.

Guide for Residential Antidisplacement and Relocation Assistance
Plan under Section 104(d) of the Housing and Community
Development Act of 1974, as Amended

Consistent with the goals and objectives of activities assisted under the Housing and Community Development Act of 1974, the (jurisdiction) will take the following steps to minimize the displacement of persons from their homes.

1. All public facilities projects (water, sewer, gas, et cetera) will be designed so that there will be no displacement of any residences or businesses;
2. No homes will be demolished that can be rehabilitated;
3. There will be no displacement of any residential or business occupants on LCDBG projects.

If displacement does occur, then the following requirements apply:

In the event the activities of this program shall result in displacement of any person(s), the (jurisdiction) shall provide the displaced person(s) as defined by 24 CFR 570.606(b)(2)(i) with relocation assistance at the levels described in, and in accordance with the requirements of 49 CFR part 24. The contact person for antidisplacement in (jurisdiction) is _____ who can be reached at (address and telephone number).

All replacement housing will be provided within three years of the commencement of the demolition or rehabilitation relating to conversion. Before obligating or expending funds that will directly result in such demolition or conversion, the (jurisdiction) will make public and submit to the State the following information in writing:

1. A description of the proposed assisted activity;
2. The general location on a map and approximate number of dwelling units by size (number of bedrooms) that will be demolished or converted to a use other than as low/moderate income dwelling units as a direct result of the assisted activity;
3. A time schedule for the commencement and completion of the demolition or conversion;
4. The general location on a map and approximate number of dwelling units by size (number of bedrooms) that will be provided as replacement dwelling units;
5. The source of funding and a time schedule for the provision of replacement dwelling units; and
6. The basis for concluding that each replacement dwelling unit will remain a low/moderate income dwelling unit for at least ten years from the date of initial occupancy.

The (jurisdiction) will provide relocation assistance, as described in 570.606(b)(2), to each low/moderate income household displaced by the demolition of housing or by the conversion of a low/moderate income dwelling to another use as a direct result of assisted activities.
