Domestic Uranium Production Report 2nd Quarter 2015

August 2015

This report was prepared by the U.S. Energy Information Administration (EIA), the statistical and analytical agency within the U.S. Department of Energy. By law, EIA's data, analyses, and forecasts are independent of approval by any other officer or employee of the United States Government. The views in this report therefore should not be construed as representing those of the U.S. Department of Energy or other federal agencies.

Preface

The U.S. Energy Information Administration (EIA) reports data spanning 1996 through second quarter 2015 on U.S. uranium production activities in this report, *Domestic Uranium Production Report 2nd Quarter 2015*. Data in this report are based on information reported on Form EIA-851A, “Domestic Uranium Production Report (Annual)” and Form EIA-851Q, “Domestic Uranium Production Report (Quarterly).”

Previous issues of this report may be found on the EIA website at <http://www.eia.gov/uranium/production/quarterly>

Definitions for terms used in this report can be found in EIA’s Energy Glossary: <http://www.eia.gov/tools/glossary/>.

2nd Quarter 2015

U.S. production of uranium concentrate in the second quarter 2015 was 789,980 pounds U_3O_8 , down 32% from the first quarter 2015 and down 28% from the second quarter 2014. Additionally, the second quarter 2015 production level was the lowest quarterly U.S. production since the fourth quarter 2005. During the second quarter 2015, U.S. uranium was produced at six U.S. uranium facilities, two less than in the first quarter 2015. Uranium was not produced at Alta Mesa Project in Texas and White Mesa Mill in Utah.

2. Hobson ISR Plant/La Palangana (Texas)
3. Lost Creek Project (Wyoming)
4. Nichols Ranch ISR Project (Wyoming)
5. Smith Ranch-Highland Operation (Wyoming)
6. Willow Creek Project (Wyoming)

For the first half of 2015, U.S. uranium concentrate production totaled 1,944,388 pounds U_3O_8 . This amount is 17% lower than the 2,337,190 pounds produced during the first half of 2014.

Notes: The reported 4th quarter 2002 production amount was adjusted by rounding to the nearest 100,000 pounds to avoid disclosure of individual company data. This also affects the 2002 annual production. The reported 2003 and 1st, 2nd, and 4th quarter 2004 production amounts were adjusted by rounding to the nearest 200,000 pounds to avoid disclosure of individual company data. The reported 2004 total is the actual production for 2004. Totals may not equal sum of components because of independent rounding.

¹ Milling uranium-bearing ore.

² Not milling ore, but producing uranium concentrate from other (non-ore) materials.

³ Not including in-situ-leach plants that only produced uranium concentrate from restoration.

⁴ Uranium concentrate as a byproduct from phosphate production.

¹ Heap leach solutions: The separation, or dissolving-out from mined rock, of the soluble uranium constituents by the natural action of percolating a prepared chemical solution through mounded (heaped) rock material. The mounded material usually contains low grade mineralized material and/or waste rock produced from open pit or underground mines. The solutions are collected after percolation is completed and processed to recover the valued components.

Notes: Capacity for 2nd Quarter 2015. An operating status of "Operating" indicates the mill usually was producing uranium concentrate at the end of the period.

- = No data reported.

Notes: Production capacity for 2nd Quarter 2015. An operating status of "Operating" indicates the in-situ-leach plant usually was producing uranium concentrate at the end of the period. Hobson ISR Plant processed uranium concentrate that came from La Palangana. Hobson and La Palangana are part of the same project. ISR stands for in-situ recovery. Christensen Ranch and Irigaray are part of the Willow Creek Project. Uranerz Energy has a tolling arrangement with Cameco Resources. Uranium is first processed at the Nichols Ranch plant and then transported to the Smith Ranch-Highland Operation plant for final processing into Uranerz's uranium concentrate. CPP stands for central processing plant.
