Securing people, devices, and data everywhere

Fortinet continues to be a driving force in the evolution of cybersecurity and the convergence of networking and security. Our portfolio of over 50 enterprise-grade products is the largest integrated offering available, delivering proven cybersecurity everywhere you need it.

Broad, integrated, and automated security

The Fortinet Security Fabric is the industry's highest-performing cybersecurity mesh platform, offering comprehensive real-time protection. Fortinet converges security and networking across all edges, users, and devices with consolidated security operations for effective defenses and easier management.

Reduce business disruptions, protect your reputation, and optimize costs with a complete platform for networking and security.

Efficient Networking and Security Empower Your Business

73% of senior executives

say their organization is only just beginning to unlock the potential of cloud.¹

70% of leaders

say skills shortages hinder how effectively they can use the cloud.²

HCLTech and Fortinet combine industry-leading security solutions with mature, global consulting and managed services to deliver innovative and cost-effective solutions that let you make the most of the cloud. Together we help protect every environment with centralized management and analytics, whether in the cloud, data centers, or edge. Solutions for devices, networks, and users help you reach your business goals without compromising security or performance.

Proven partnership

With joint go-to-market motions spanning secure networking, SD-WAN, SASE, and OT solutions, HCLTech and Fortinet can help you:

- Improve your security posture with cloud-native automation
- Increase security efficiency and scale with unified management
- Build an end-to-end cloud strategy that complies with changing regulations
- Enable secure access for remote and hybrid workers

Secure Data and Applications in Any Cloud

Decrease risk and ensure agility across your entire environment without impacting performance.

Protect the Converged IT/OT Network

Enable greater efficiency and data-driven operations by closing OT security gaps.

Defend Any Edge at Any Scale

Protect your network edges without compromising user experience to support secure access anywhere.

Accelerate Network and Security Convergence

Get a fast, scalable, and secure network with greater flexibility and lower costs.

Benefits

- Reduce IT risk and increase resilience
- Adapt faster to evolving security threats
- Accelerate IT modernization and innovation
- Close skill and resource gaps
- Support employees anywhere

Simplify Cloud Security

Protect your cloud applications and data everywhere without complexity.

As cloud and IT environments become more complex, your teams may be struggling to keep up with security and compliance, which puts your business at risk.

HCLTech offer a range of solutions powered by Fortinet technology, including managed security services, strategic consulting, and integration assistance, to help you secure your business as requirements grow and change.

Accelerate Secure Digital Transformation

Easily migrate applications to the cloud with HCLTech Cloud Security as a Service (CSaaS) to support digital transformation efforts while maintaining security and compliance. CSaaS provides comprehensive security for all cloud applications running anywhere across public and private cloud, hosted, or on premises.

Mitigate Cloud Risk

Using Fortinet technology, CSaaS provides consistent security policies and visibility across your multi-cloud environment to improve security posture for infrastructure, web applications, and APIs.

Enable Work from Anywhere

Protect remote workers or road warriors in addition to apps and data by providing secure internet and zero-trust access.

HCLTech's agile service delivery model combined with Fortinet technology gives you the flexibility and security to innovate with confidence.
