FORTICLIENT MANAGED SERVICES

OVERVIEW

FortiClient Managed Services are offered by highly trained product experts to help you design, configure and deploy the FortiClient Endpoint Security Agent in your network.

Fortinet's professional engineers work as an extension of your IT team to help deploy remote access solutions for Hybrid work and Endpoint security features such as Anti-Malware, Cloud Sandbox, Ransomware Protection, Web Security and Vulnerability Management to detect & help patch critical vulnerabilities that make your endpoints an easy target for attackers.

Managed Services will help your IT team with FortiClient Cloud setup & configuration to protect your endpoints across your entire organization. In an event there is any suspicious activity, Managed Services engineers will help trigger the Forensic analysis with our FortiGuard Expert team to help identify affected endpoints, applications and user accounts, plus conduct a detailed root cause analysis with remediation recommendations.
