

FORTINET

CYBER THREAT ASSESSMENT FOR STATE AND LOCAL GOVERNMENTS

Knowledge of the threat landscape combined with the ability to respond quickly at multiple levels is the foundation for state and local governments to provide effective security. Hundreds of researchers at FortiGuard Labs scour the cyber landscape every day to discover emerging threats and develop effective countermeasures to protect governments around the world. They are the reason FortiGuard is credited with over 250 zero-day and vulnerability discoveries and why Fortinet security solutions score so high in real-world security effectiveness tests at NSS Labs, Virus Bulletin, AV Comparatives, and more.

Respond fast and reduce downtime with Fortinet as your cyber security partner.

A Fortinet Cyber Threat Assessment evaluates your network's current security effectiveness, identifies staff online accountability, and tracks application usage and performance at no cost to your organization. A Fortinet expert will deploy a FortiGate appliance to monitor key indicators within your network and 5-7 days later you will be presented with a comprehensive report that is customized to your agencies internet security posture.

Get the facts about your network security.
