

Protect Web Apps and APIs on AWS with FortiWeb Cloud WAF-as-a-Service

Better security, less time and money

Legacy web application firewalls (WAFs) can't keep up with a fast-changing world.

FortiWeb Cloud WAF-as-a-Service for AWS cuts cost and frees up time while improving protection.

The sad state of application security

66% of web applications contain high-severity vulnerabilities.¹

Attacks that originated from web applications rose from 31.5% in 2020 to 53.6% in 2021.²

60% of organizations struggle to recruit cybersecurity talent, and 52% struggle to retain it.³

Detecting and preventing cyberattacks on your web applications and APIs is business critical.

Legacy security approaches waste the time and talent of your security experts.

The strain makes security and DevOps teams less effective and distracts them from value-added work.

Liberate your team's time and talent

The hours your team spends on...

- Fault tolerance
- Load balancing
- Capacity planning
- Manual tuning and configuration
- Compute, network, and storage infrastructure for on-premises WAFs
- Managing false positives

Fortinet can save with...

- Highly resilient cloud-based architecture
- Integrated load-balancing engine
- Automatic scaling to match your app's needs
- Machine learning that adapts in real time
- All-in-one, cloud-based WAF-as-a-Service
- Intelligent threat detection that dramatically reduces false positives

Are you overspending on your WAF?

Three ways FortiWeb Cloud WAF-as-a-Service for AWS reduces your cost:

- Eliminates overprovisioning idle capacity to handle spikes.
- Dramatically reduces manual configuration and management.
- Provides API protection, advanced reporting, bot mitigation, threat analytics, and a CDN in one easy-to-manage solution.

FortiWeb Cloud WAF for AWS makes business sense

- SIMPLE, FAST, SETUP**
Deploy in minutes with less manual work.
- EASY TO MANAGE**
Reduce false positives and centralize security.
- OPTIMIZED COSTS**
Pay for what you need, when you need it, from test instances to terabytes.
- SMART PROTECTION**
Benefit from machine learning that adapts to app usage in real time.
- MODERN SECURITY**
Protect against OWASP Top 10, malicious bots, and zero-day threats.

Take it from our customers

We've found that FortiWeb WAF is a reliable and stable solution. The product is easy to manage with a friendly graphical user interface. Unlike other products, it uses machine learning, so it can identify users' normal behavior.
