Number of breaches globally due to lack of cyber skills or awareness

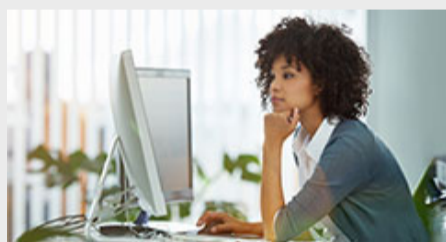

2022 Global Skills Gap Report

We surveyed over 1,200 IT leaders from around the world to uncover the impact that the skills gap is having on organizations. From the findings, 88% of organizations are now having cybersecurity discussions with their boards.

The report also uncovered the top five challenges that organizations are facing:

- Costly breaches
- Recruitment and retention struggles
- The need for certified talent
- The impact of a lack of diversity
- Security awareness deficiencies
