

## INTERNATIONAL EQUITY CLASS I

## OVERVIEW

The GMO International Equity Fund seeks to generate high total return by investing primarily in non-U.S. developed market equities. The Fund measures its performance against the MSCI EAFE Index.

The Fund's investment approach is grounded in the Systematic Equity team's belief that, in the short term, equity markets exhibit exploitable inefficiencies as a result of irrational investor actions, the imperfect flow of information, and the participation of non-economic actors, while in the long-term returns are ultimately driven by economic reality. The Fund aims to take advantage of these inefficiencies by utilizing a multi-factor valuation model in conjunction with other methods, such as cross-asset signals and corporate alerts, to identify undervalued equity securities.
