

# The International Association of Geodesy

## Historical Overview

H. Drewes<sup>1</sup> · J. Adám<sup>2</sup>

The history of the International Association of Geodesy goes back to April 1862 when the Central European Arc Measurement (“Mitteleuropäische Gradmessung”) was initiated at a “preliminary consultation” of representatives of the states of Prussia, Austria and Saxony in Berlin. At the end of the year, 16 countries had joined the project. The first General Conference was held in Berlin, October 1864, with delegates from 14 countries. In 1867 it was expanded to the European Arc Measurement and in 1886 to the International Geodetic Association (“Internationale

Erdmessung”, “Association Géodésique Internationale”). At the Constitutive Assembly of the International Research Council (IRC) in Brussels, July 1919, the “Section Geodesy” was one of the constituents of the International Union of Geodesy and Geophysics (IUGG) and held its Constitutive Assembly during the first IUGG General Assembly in Rome, April-May 1922. The name was changed to “Association of Geodesy” in Stockholm, August 1930, and to the present name in July 1946. The following summarises the historic development.
