

ICC Issues a Decision on Ameren Gas' Request for a General Rate Increase

Springfield, IL –Today, the Illinois Commerce Commission (ICC) disallowed \$36.34 million to Ameren Illinois' rate request for its natural gas delivery services in Illinois. The decision is approximately 50.8 percent lower than Ameren's initial request for a \$71.57 million increase and approves a 9.44 percent return on equity (ROE), a reduction from Ameren's proposed 10.3 percent ROE.

The ICC has issued its decision after closely scrutinizing Ameren's rate case filings and additional materials submitted by the utility, Commission Staff, and various interveners over an 11-month legal proceeding. The process aims to ensure the utility receives the necessary funds to provide safe and reliable service to customers and to maintain and replace aging infrastructure at a reasonable cost to ratepayers. In accordance with the Illinois Public Utilities Act, these costs are only recoverable if a utility demonstrates they are reasonable and prudent.

The decision initiates a two-step future of gas proceeding that includes a detailed action plan for the utility's future infrastructure investments to evaluate the impacts of Illinois' decarbonization and electrification goals on the natural gas system.

"As the State embarks on a journey toward a 100 percent clean energy economy, the gas system's operations will not continue to exist in its current form. Identifying how our gas and electric systems can adapt to meet these goals, and what specific actions should be taken to achieve them, will be an important task for the Commission moving forward," said **ICC Chairman Doug Scott**.

The decision also establishes a new low-income discount rate for eligible customers whose incomes are up to 300 percent of the Federal Poverty Level (FPL). The rate will offer a five-75 percent monthly total bill credit for qualifying customers beginning October 1, 2024. In December of last year, the ICC found the implementation of low-income discount rates to be appropriate for Illinois' electric and natural gas residential customers. As a part of the Commission's decision, Ameren will be required to submit annual reports documenting cost-reduction from the program.

Customers already enrolled in the state's [Low-Income Home Energy Assistance Program \(LIHEAP\)](#) will automatically qualify for the newly-established low-income discount rate. Customers not currently eligible for LIHEAP, but whose income falls within 200-300% of FPL will still qualify for a discount by self-reporting their income eligibility to their utility.

Customers struggling to pay their utility bills are encouraged to apply for [LIHEAP](#) and can access Ameren Illinois' Energy Assistance Programs [here](#).

The impact of the rate case decision on individual customers will vary based on customers' service class and energy usage. The ICC plans to an issue estimated bill impact for the average residential customer once Ameren submits its compliance filing with the Commission.

More information regarding Ameren's rate case can be found in [Docket No. 23-0067](#).

Ameren Illinois delivers natural gas to 800,000 residential, public sector, and business customers in more than 1,200 communities throughout central and southern Illinois.

About the Illinois Commerce Commission

The Illinois Commerce Commission (ICC) is a quasi-judicial body made up of five Commissioners. Through its Public Utility Program, the Commission oversees the provision of adequate, reliable, efficient, and safe utility services at the least possible cost to Illinois citizens served by electric, natural gas, telecommunications, water, and sewer public utility companies. Through its Transportation Regulatory Program, the Commission oversees public safety and consumer protection programs with regard to intrastate commercial motor carriers of general freight, household goods movers, relocation towers, safety towers, personal property warehouses and repossession agencies. The Commission's Rail Safety Program also inspects and regulates the general safety of railroad tracks, facilities, and equipment in the state.
