Third Quarter 2020 Quarterly Performance Report

*As of September 30, 2020*

# IMRF Performance Highlights

As of September 30, 2020

- The Illinois Municipal Retirement Fund (“IMRF”) ended September 2020 with a market value of \$45.2 billion, up for the quarter by approximately \$2.1 billion. Year-to-date, total fund assets are up \$0.5 billion, net of benefit payments.
- For the quarter, IMRF outperformed its benchmark +5.62% versus +4.91%. The Fund’s 3<sup>rd</sup> Quarter return ranks at the 26<sup>th</sup> percentile relative to peers. Year-to-date, IMRF modestly trails its benchmark +2.98% versus 3.92%; however, the Fund ranks near the top quartile relative to peers (26<sup>th</sup> percentile).
  - Longer term, IMRF’s peer rankings are at or above the top quintile relative to peers. The Fund’s 10-year return of +8.49% ranks at the 17<sup>th</sup> percentile.
- The Domestic Equity composite (+8.86%) underperformed the Russell 3000 benchmark (+9.21%) for the quarter; however, continued to rank highly in a peer universe comparison (25<sup>th</sup> percentile). Year-to-date, the Domestic Equity composite has trailed the benchmark +4.17% versus +5.41%, due largely to the portfolio’s tilt to Small Cap Value. Investors have faced a significant headwind given the market’s reliance on Large Cap Growth, specifically, the Technology sector which has returned over +29% in 2020.
  - Year-to-date, Domestic Equity composite ranked in the top one-third of peers (31<sup>st</sup> percentile).
- The International Equity composite (+7.54%) outperformed the MSCI ACWI ex-US benchmark (+6.25%) for the quarter. Investment manager outperformance and the portfolio’s allocation to small cap added relative value during the quarter. The International Equity composite has also outperformed the benchmark year-to-date, returning -4.32% versus -5.44%.
  - Relative to peers, the International Equity composite ranked around median for the quarter and year-to-date - 56<sup>th</sup> percentile and 59<sup>th</sup> percentile, respectively.
- The Fixed Income composite (+1.45) benefited from a strong credit environment during the quarter and outperformed the Bloomberg Barclays U.S. Aggregate Index (+0.62%). Year-to-date, the Fixed Income composite remains behind the benchmark +5.97% versus +6.79%, despite posting strong results in the past two quarters.
  - Fixed Income composite ranked below median relative to peers for the quarter and year-to-date, ranking at the 67<sup>th</sup> percentile for the quarter, and at the 72<sup>nd</sup> percentile year-to-date.
- As of September quarter end, Domestic Equity was 4.8% over its target. The current Statement of Investment Policy states that when actual allocations of the asset classes differ by more than four percentage points from their policy target, a recommendation for rebalancing will be made to the Board of Trustees. The Chief Investment Officer and Consultant do not recommend any rebalancing at this time.

# MARKET COMMENTARY

## U.S. Equity

The U.S. stock market was up 9.1% for the third quarter of 2020. Economic news from the quarter was mixed, with a focus on employment conditions remaining a key element of the recovery. Temporary job losses continue to fall while permanent losses rise. Both initial jobless claims and continuing claims are falling from reported highs during the second quarter.

## Non-U.S. Equity

The U.K. suffered a contraction of nearly -20% during the second quarter. The government's furlough program, where they support a majority of employees' wages, has kept the unemployment rate to just 4%. Euro zone manufacturing activity is on the rise, led by particular strength in Germany. The Chinese economy actually grew during the second quarter after more than half of the country was shut down in February.

## Fixed Income

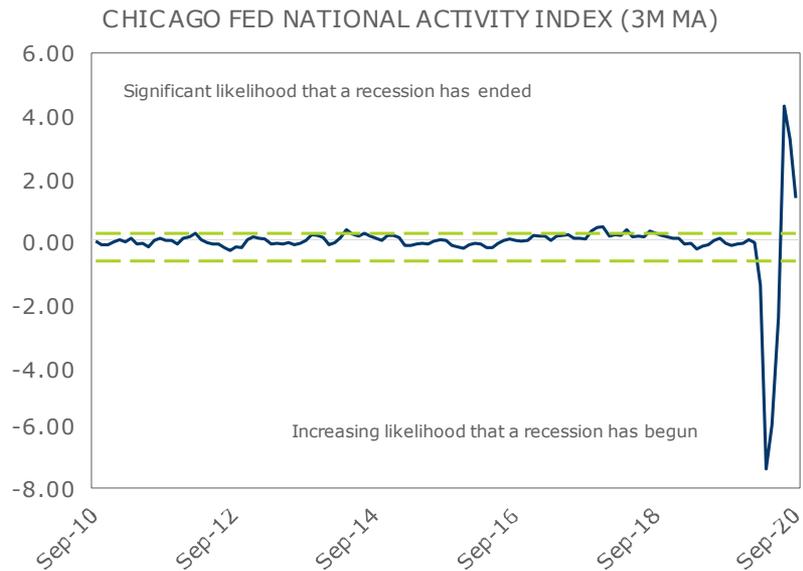

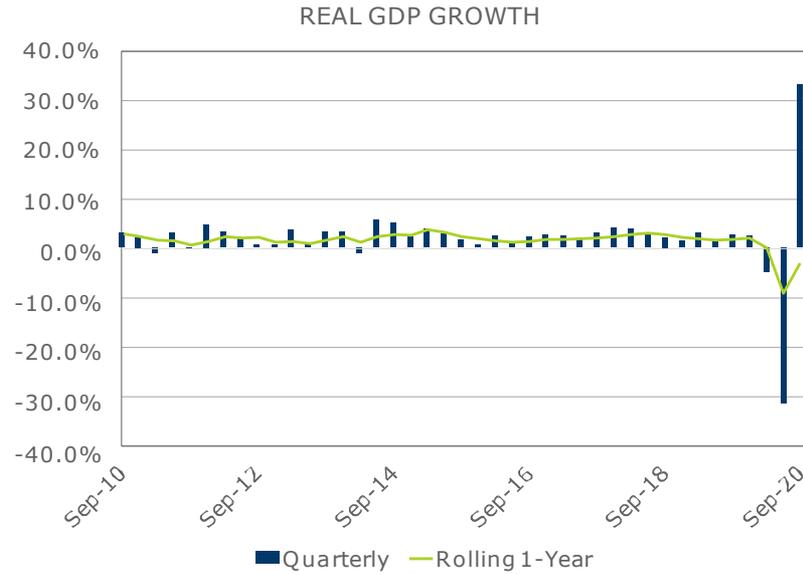

The 10-year Treasury yield ended the quarter at 0.69%, up just 3 basis points from June. The FOMC met three times during the quarter, as scheduled, with no change to their overnight rate. In a meaningful step, the Committee addressed a revised policy that allows inflation to move above the 2% target before increasing interest rates, adopting specific language to emphasize this goal.

Although the U.S. has experienced an overnight rate near zero before, this year is the first time that the bellwether 10-year Treasury has been below 1%. Interest rates have a natural floor, and as rates approach a bottom, yield (and price) changes can become asymmetrical. Rates either go up (and prices go down) or stay relatively steady. One consequence of this pattern is that fixed income returns tend to become less volatile. The history of Japan during the past 20 years serves as an example.

Data sources: Bloomberg

# FEDERAL RESERVE

- Current expectation for the Fed-funds rate is to remain near zero through 2022
- Federal Reserve has added nearly \$3 trillion in assets to their balance sheet just this year
- Unlike after the GFC, the Fed is also buying corporate and municipal bonds in addition to Treasuries and MBS

	Announced	Closed	Amount (bil)
QE1	11/25/2008	3/31/2010	\$1,403
QE2	11/3/2010	6/29/2012	\$568
QE3	9/13/2012	10/29/2014	\$1,674
QE4	3/23/2020		\$2,935

# TREASURIES AT LOW LEVELS

- Treasury yields and breakeven inflation both dropped as the U.S. entered coronavirus-related lockdowns; breakeven inflation has since increased
- Nearly 100 basis point spread between the two implies that investing in a 10-year Treasury is currently expected to cost an investor, in real terms
