

ENERGY STORAGE SYSTEMS

There are a number of reasons to choose the LG Electronics Home 8 ESS. Here are the top 8.

14.4 
kWh of usable energy.

2 
User-friendly apps (EnerVu performance monitoring for installers, ThinQ for homeowners).

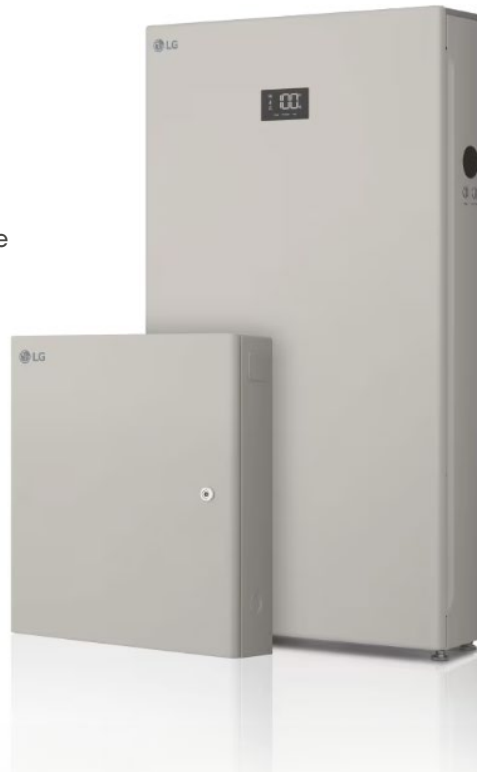

4 
Number of Home 8s that can be connected to increase capacity to 57.6 kWh with 30 kVA AC output.

15.8 
kWh total capacity. The extra space allows the Home 8 to wake itself up and look for power.

9540 
UL safety rating.

10 
Years of warranty, including 59.8 MWh throughput.

7.5 
kVA continuous AC output, with peak performance at 9.0 kVA for 10 seconds.

1 
Count on LG—the brand with a legacy of excellence and innovation.

The LG Electronics Home 8 Energy Storage System doesn't just offer backup energy. It provides power when homeowners need it most. In fact, its capabilities extend even further with the LG ThinQ app that integrates with LG's smart consumer electronics, home appliances and HVAC systems.
