

Historical Data Files for the Business Leaders Survey

Historical monthly data for all the Business Leaders Survey diffusion indexes, as well as aggregate proportion series (percentage of firms reporting increases, decreases, and no change), are available for most variables from September 2004 to the most current month. The current capital spending variables are available from June 2013. The current supply availability variables start October 2021 and the expected supply availability variables start May 2024.

The columns in the accompanying file correspond to the following variables where:

- **\$=c** for a current variable, or
- **\$=f** for a future (six-month forecast) variable

For example, "bacdina" represents the current business activity diffusion index (NSA).
